An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HIST 625, WGSS 575.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor.

HUM 701. Practicum in Teaching Humanities and Western Civilization. 1 Credits.
Discussion of matters relating to teaching in Humanities and Western Civilization courses. Sections may vary according to course topics. Required of all GTAs in the first year of teaching in the Program or for the first semester of a new teaching assignment. Does not count towards completion of coursework for the M.A. or Ph.D. in any field or department. Open only to GTAs employed by the Humanities Program. Graded on a satisfactory/unsatisfactory basis.

HUM 770. Research in Men and Masculinities. 3 Credits.
An intensive examination of the history and theory of masculinities in the Western World since the sixteenth century. Students will become acquainted with some of the key theories of men and masculinities, examine in depth the interplay between manhood and modernity, and develop research projects on a topic negotiated with the instructor. May be repeated if content varies sufficiently. (Same as WGSS 770.)

HUM 775. Advanced Study in the Body and Senses. 3 Credits.
An intensive examination of the role of the human body in the creation of personal and social identities in the West since the sixteenth century. Emphasis is on understanding how contemporary theories of embodiment are applied to concrete historical or contemporary problems. May be repeated if course content varies sufficiently. (Same as WGSS 775.)

Courses

**LA&S 108. Personal Numeracy. 3 Credits. NM**
This course will provide the tools to help you understand and make decisions using data. You will learn the basics of human decision making and why relying on numerical data is an important component of good decisions. The class will also help you understand the basics of probability and statistics. This will include fundamental statistical concepts used in everyday decision-making as well as training to perform statistical tests. The class will conclude with applications of numeracy to make sound personal financial decisions regarding spending and borrowing and saving and investing. Throughout the course, you will learn to use Excel to perform calculations, analyze data and spending habits and develop a personal budget.

**LA&S 110. Cherokee Language I. 5 Credits. U F1**
Emphasizes the vocabulary of and fundamentals of reading and writing the Cherokee language. Students will have an opportunity to learn the language, beliefs, and religious practices of the Cherokee. Taught at Haskell Indian Nations University.

**LA&S 120. Cherokee Language II. 5 Credits. U F2**
Continuation of Cherokee Language I. Includes an intermediate level of vocabulary skill with increased emphasis on reading and writing. Taught at Haskell Indian Nations University. Prerequisite: LA&S 110.

**LA&S 150. Academic Success Seminar. 1 Credits. U**
This course provides students with the skills and resources necessary to improve their approach to their academic career. It is designed to help enhance students’ time management and study skills as well as facilitate a connection with student success resources. Students and instructors work together in an interactive learning environment to create an academic foundation for success. Additional topics covered include: test preparation and anxiety; reading comprehension; procrastination; and memory and concentration. Recommended for students with less than a 2.5 GPA.

**LA&S 172. Exploring Health Professions. 3 Credits. U**
Students will have the opportunity to explore health care career pathways broadly and will look more thoroughly at specific pathways of interest through experiential learning activities. Class-time will include discovering the knowledge, skills, and attributes typically seen in health care professionals and the requirements for gaining admission to the various professional degree programs. The course will also discuss important ethical issues in health care and the future direction of the field. This course is designed for KU students who are interested in pursuing a health care career. This includes but is not limited to: medicine, pharmacy, physician assistant, physical therapy, and occupational therapy.

**LA&S 177. First Year Seminar: _____, 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in liberal arts and sciences. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**LA&S 200. Topics at HINU: _____, 1-6 Credits. U**
Special topics at the undergraduate level. Taught at Haskell Indian Nations University. Special permission from the Provost's Office required.

**LA&S 202. History of North American Indian Tribes. 3 Credits. W**
Introductory survey of the origin, evolution, and distribution of Indians throughout North America, location of tribes in historic times, their relationships to one another, and their responses to white penetration of the continent. Emphasis on American Indian leadership and major contributions of American Indian people to American society. Taught at Haskell Indian Nations University.

**LA&S 204. Contemporary Issues of the American Indian. 3 Credits. H**
An overview of current and historical issues which have resulted in policies and regulations affecting American Indians and Alaska Natives. The issues include: education, treaties, sovereignty and self-determination, religions, natural resources, legislation, jurisdiction, reservation and/or urban status, federal trust relationship, tribal economics and enterprises, American Indian policy, federal recognition, and
current issues both regional and local. Taught at Haskell Indian Nations University.

**LA&S 206. Indian Law and Legislation. 3 Credits. S**
An introduction and general overview of federal Indian law and processes and its relationship to tribal governments. Focus will be on sovereignty and its relationship to the internal and domestic laws of the United States government, tribal governments, and the international community. Taught at Haskell Indian Nations University.

**LA&S 210. Tribal Resources and Economic Development. 3 Credits. S**
Inventory and identify the resources currently available to tribal governments to include natural and human resources and those financial resources available to tribal governments from federal, state, and private resources. Included will be an economic analysis on how to best optimize available resources while recognizing the economic concept of constrained maximization. Taught at Haskell Indian Nations University.

**LA&S 230. Cherokee Language III. 5 Credits. U F3**
Continuation of Cherokee language II. Taught at Haskell Indian Nations University. Prerequisite: LA&S 120.

**LA&S 240. Cherokee Language IV. 5 Credits. U F4**
This course is a continuation of LA&S 230, Cherokee Language III, and includes the study of grammar, with particular attention to speaking fluency and continued practice in reading and writing. Taught at Haskell Indian Nations University. Prerequisite: LA&S 230.

**LA&S 250. Western Civilization I. 3 Credits. H**
The beliefs and values of Western civilization from the eighth century BC to the close of the eighteenth century are compared with the ideas central to American Indian cultural traditions. Fulfills the Western Civilization I requirement for CLAS. Taught at Haskell Indian Nations University.

**LA&S 252. Western Civilization II. 3 Credits. H**
The beliefs and values of Western Civilization since the close of the eighteenth century are compared with the ideas central to American Indian cultural traditions. Fulfills the Western Civilization II requirement for CLAS. Taught at Haskell Indian Nations University.

**LA&S 260. Interpersonal Management. 3 Credits. U**
This course is designed to provide students with an understanding of their personal strengths and skills that can be applied in a variety of organizational settings and in society. The course includes skills needed to be successful as a member of both professional and citizen communities, including ethical views, project management, financial management, technology, and information literacy.

**LA&S 262. Workplace Success Skills. 3 Credits. U**
This course is designed to provide students with the skills and content they need to be successful professionals in a variety of organizational settings. The course includes professional communication skills along with an understanding of organizational culture and context.

**LA&S 290. Approaches to Teaching Science and Mathematics I. 1 Credits. U**
Science and Mathematics students explore teaching as a career by teaching lessons in elementary classrooms in order to obtain first hand experience planning and implementing inquiry-based curriculum. This course is open to any student who has completed or is concurrently enrolled in a science or mathematics course at KU.

**LA&S 291. Approaches to Teaching Science and Mathematics II. 1 Credits. U**
Science and Mathematics students continue to explore secondary teaching as a possible career choice by teaching several lessons in a middle school classroom. The students build upon and practice lesson design skills that were developed in LA&S 290, in which they taught in elementary classrooms. Prerequisite: LA&S 290.

**LA&S 292. Topics and Problems on: ____. 1-6 Credits. U**
An interdisciplinary study of different topics. Designed especially for freshmen and sophomores.

**LA&S 295. Introduction to Secondary Stem Teaching. 2 Credits. U**
The UKanTeach program invites all students who have 45 hours toward their degree and have an interest in teaching secondary mathematics and/or science to take this two-hour UKanTeach course. Students learn quickly whether they are suited to the profession of teaching while also acquiring important communication skills. Through coursework and classroom experiences, students teach four hands-on inquiry-based science/mathematics lessons in local elementary and middle school classrooms. Upon successful completion of this course, student are eligible for acceptance to the UKanTeach program as they complete their bachelor's degree. This course is only offered in the summer semester. Prerequisites: Minimum of 45 hours toward a BA or a BS degree.

**LA&S 325. Career Transitions. 3 Credits. U**
This career development course studies the theories of career development and decision making focusing significantly on self-assessment and occupational research to help students make informed career decisions by better understanding themselves and the world of work in relationship to career transitions. In addition, students will learn valuable networking, personal branding, and job search tips. Prerequisite: This course is designed for students in the Military Transition Program and currently enrolled veterans. Instructor consent is required to enroll.

**LA&S 370. Personal Writing Seminar. 1 Credits. U**
This seminar helps students develop their personal writing abilities. Students analyze language and rhetorical choices in the genre of the personal essay. Students demonstrate rhetorical flexibility within the genre, considering audience, purpose, and application of the material. This course is intended for candidates for national fellowships, regardless of University Honors Program membership. (Same as HNRS 370.) Prerequisite: Permission of the Office of Fellowships.

**LA&S 372. Preparing for Programs in the Health Professions. 3 Credits. U**
Students will participate in experiential learning activities to confirm their interest in the health care professions and prepare documents for their application. Class-time will include exploring crucial health care topics such as ethical standards, the future of medicine, and social determinants of health. Additionally, students will prepare application materials, research professional programs, create a personal statement, participate in mock interviews, and decide where to apply. This course is designed for KU students who are planning to apply in the current or subsequent academic year to a health professional program including (but not limited to) medicine, pharmacy, physician assistant, physical therapy, and occupational therapy.

**LA&S 380. Critical Thinking and Advocacy Seminar. 1 Credits. U**
The focus of this class is on honing the two basic skills of critical thinking and advocacy. In this seminar, students develop a basic system for critical analysis that can be applied generally; test that critical analysis system in a series of practicums to develop the skills necessary to apply it; and develop a basic system for designing effective and ethical persuasive messages. (Same as HNRS 380.) Prerequisite: Permission of the Office of Fellowships.

**LA&S 400. Teaching and Tutoring Writing. 3 Credits. U**
Students explore theories and strategies of teaching and tutoring writing across academic disciplines. They learn more about themselves as
writers as they build a repertoire of writing techniques useful in their studies, in the workplace, and in their personal lives. By observing and consulting in the writing center, they understand how reflection leads to responsive, ethical, and engaged practice. (Same as ENGL 400.) Prerequisite: ENGL 102 or equivalent.

LA&S 414. Ethnobiology. 5 Credits. N
Integrates Native American traditional knowledge of ecology and biology with modern, western science. One purpose of the course is to preserve the unique knowledge and varied cultural traditions relating to the life sciences that are possessed by indigenous people. Taught at Haskell Indian Nations University. Prerequisite: BIOL 100 or BIOL 150.

LA&S 450. Topics at Haskell Indian Nations University: ______. 1-6 Credits.
Special topics at the junior/senior undergraduate level. Taught at Haskell Indian Nations University. Special permission from the Provost's office required.

LA&S 470. Job Search Skills for Liberal Arts and Sciences Majors. 1 Credits. U
This course is designed to introduce students to the fundamentals of planning and organizing job search strategies. Emphasis is placed on practical application of employment search tools for post-graduation employment or graduate school admission, stressing the value of the arts and sciences degree in the labor market. Prerequisite: Students must be sophomore standing or above.

LA&S 475. Professional Career Management. 3 Credits. U
When envisioning the future, many students consider immediate post-graduation needs but may fail to consider future professional career management, life and career transitions, and career progression. This advanced career development course studies the theories of career development, organizational and industrial psychology, and human resources. Students learn theories from these areas and understand how to apply them to their own professional career, future career transitions, and lifelong career progression. Prerequisite: Students must be sophomore standing or above.

LA&S 480. Preparing for International Careers. 1-3 Credits. U
This course, delivered through an 8-week seminar and week-long study abroad experience, teaches the fundamentals of executing an international job search. The course is open only to participants admitted to the Preparing for International Careers study abroad program. Students must complete a study abroad application and be approved before enrolling in the course.

LA&S 485. Global Career Management. 3 Credits. U
This global career development course studies the theories of cross-cultural communication and analyzes the global economy to help students apply these concepts to their own lifelong career management. Furthermore, the course builds upon the international experiences students are having at KU and also allows any student to gain lifelong knowledge and skills to be successful in a global job search or career transition, by assisting them to articulate their skills and value through a cross-cultural perspective to potential employers. Prerequisite: Students must be sophomore standing or above.

LA&S 490. Internship Exploration. 1-5 Credits. U
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students complete reading and writing assignments, participate in an online discussion and create a final portfolio of internship accomplishments. Hours of credit recorded (1-5) are based on number of hours at internship site and agreement of instructor. Credit hours will be assigned a letter grade. Repeatable for up to 5 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor.

LA&S 492. Topics and Problems on: ______. 1-6 Credits. U
An interdisciplinary study of different topics. Topics include Sanskrit. Designed especially for Juniors and Seniors.

LA&S 494. Senior Seminar in Liberal Arts and Sciences. 3 Credits. H
This course is a seminar to result in the student's integration of knowledge within the liberal arts and sciences. Through lecture and discussion, students explore a series of issues or themes that integrate several disciplines in the humanities, arts, social sciences, and mathematics and natural sciences. A final project (options include a portfolio, web page, paper, presentation) demonstrates the students' knowledge of the concepts, theories, and methods of several disciplines, and their ability to integrate that knowledge across disciplines. Not open to freshmen and sophomores; recommended in the senior year. Prerequisite: Completion of at least 30 junior/senior hours.

LA&S 701. Introduction to Graduate Professional Development. 1 Credits.
This course is designed to introduce early career graduate students to self-assessment and career exploration tools and best practices in developing a professional network and strong mentoring relationships. Emphasis is placed on practical application of career exploration, networking, and managing mentor relationships in order to identify and successfully pursue a variety of career pathways within and beyond the academy. Graded on a satisfactory/unsatisfactory basis.

LA&S 702. Introduction to Career Preparation for Graduate Students. 1 Credits.
This course is designed for 2nd year master's students and mid-career PhD students who are soon to complete or have just completed their comprehensive exams. The course will present various career preparation tools and techniques for careers both within and beyond the academy, and other best practices aimed at supporting students in the completion of their research and creative projects. Topics covered include but are not limited to: individual development plans, project management, building a professional network, informational interviews, CV and resume development, and identifying and applying for funding opportunities. Graded on a satisfactory/unsatisfactory basis. Prerequisite: LA&S 701 or permission by the instructor.

LA&S 703. Fundamentals in Career Planning for PhD Students. 1 Credits.
This course is designed to introduce late-career PhD students to the fundamentals of effective planning and organizing job search and application strategies for a variety of career paths. Emphasis will be placed on career paths beyond the professoriate including the private, non-profit, and public/government sectors. Topics covered include but are not limited to: external opportunities and fellowships for PhDs (ex. Presidential Management Fellowship, ACLS Public Fellows, AAAS Science & Technology Fellowships) in non-academic careers, advanced resume and cover letter development, interview and negotiation skills, and tailoring application materials to specific job postings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: LA&S 702 or instructor permission.

LA&S 720. Introduction to Language Teaching Research. 3 Credits.
An introductory study of topics in language teaching research with the focus on higher education contexts. Intended for graduate students in any area of specialization related to foreign language teaching and learning. Prerequisite: Consent of instructor.
LA&S 792. Topics in: ______. 1-3 Credits.
An interdisciplinary study of a variety of topics from the Liberal Arts and Sciences. Usually intended for graduate students, but may also be taken by qualified upper level undergraduates. May be repeated for credit when topic differs.

Bachelor of General Studies in Liberal Arts and Sciences

Why pursue the B.G.S. Liberal Arts and Sciences degree option?

If, as a student, your personal goals are best served by:

- A more broad-based, liberal arts and sciences curriculum with balanced contributions from natural sciences and mathematics, social sciences, and the humanities (requiring exploration in 15 different disciplines in the College).
- The broadest preparation for admission into a professional program.
- An avenue for adding a bachelor’s degree to an already existing technical degree or licensure certificate.
- A degree option with maximum flexibility.
- An online KU degree option.
- A degree that provides students the opportunity to build the skills and knowledge employers indicate are required for success in our changing economy and world community — skills that are limited in current college graduates.

The B.G.S. Liberal Arts and Sciences degree option is:

- Not an “Easy Out” degree option. Academic standards are the same for all degrees granted by the College of Liberal Arts and Sciences.
- Not a quick option for a bachelor’s degree. (A minimum of 120 hours is required, including degree specific coursework.)
- Not an option in which students may pursue majors or minors in the College.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements to Select B.G.S. Liberal Arts and Sciences Degree Option

CLAS Bachelor of General Studies (BGS) General Education Requirements

General Education provides opportunities for the development of core skills, critical inquiry, integrated knowledge, an appreciation of diversity, contemporary issues, and social responsibility.

B.G.S. Liberal Arts and Sciences Degree Option Requirements

The Bachelor of General Studies degree has two distinct options and requires, in addition to completion of the KU Core*, either:

- **Option A.** Completion of the requirements of a single BGS major AND a secondary field of academic study (a second degree offered by CLAS or other school, a second CLAS major or co-major, a minor offered by CLAS or another school, or two certificates offered by CLAS or another school);

- completion of an approved career preparation course (minimum 3 credit hours total). A list of currently approved courses can be found here. (https://collegeadvising.ku.edu/bgs-career-preparation/)

OR

- **Option B.** Completion of the B.G.S. in Liberal Arts and Sciences, which is also offered as an online degree completion program. This degree program requires:
  - Liberal Arts and Sciences Breadth Requirement. Satisfied by the completion of a course (with a minimum of 2 credit hours) in 15 unique departments/programs within the College or School of the Arts (as determined by course prefix). Courses fulfilling this requirement may also contribute to the KU Core and other requirements.
  - World Language and Culture.
    - 2 courses (each with 3 credit hours or more) in a single world language, or proof of two-semester proficiency in a language other than English, OR
    - Completion of 3 courses (each with 3 credit hours or more) designated as KU Core Goal 4.2 (AE42), world culture (W), or non-Western culture (NW); or language areas, beyond the KU Core. This may include a variety of areas, languages, and cultures.
  - Additional Natural Sciences and Mathematics. Satisfied by the completion of two additional courses from the natural sciences (requirement code N) and/or mathematics (MATH prefix courses) beyond the KU Core.

NOTE: Option B, the BGS in Liberal Arts and Sciences is not an option in which students may pursue a major or minor.
Minimum hour and grade-point average standards (all CLAS degrees)

- 120 credit hours
- 45 junior/senior credit hours (numbered 300 or above, 30 of which must be taken in residence at KU)
- 2.0 minimum KU cumulative grade-point average

Below is a sample 4-year plan for students pursuing the BGS in Liberal Arts and Sciences. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120-124**

1. Satisfied by 2 courses (each with 3 credit hours or more) in a single world language, or proof of two-semester proficiency in a language other than English OR satisfied by completion of 3 courses (each with 3 credit hours or more) in world, non-Western culture (AE42, W, or NW designated courses), or language areas beyond the KU Core. This may include a variety of areas, languages, and cultures.

2. Additional Natural Sciences and Mathematics satisfied by the completion of two additional courses from the natural sciences (requirement code N) and/or mathematics (MATH prefix courses) beyond the KU Core.

3. LA&S 494 is not required for this degree to fulfill Goal 6, but is recommended as it is tailored specifically to students completing this degree program.

4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

**Please note:**

Additional requirement: Liberal Arts & Sciences Breadth Requirement. This is satisfied by the completion of a course (with a minimum of 2 credit hours) in 15 unique departments/programs within the College or School of the Arts (as determined by course prefix). Courses fulfilling this requirement may also contribute to the KU Core and other requirements.

The Liberal Arts and Sciences BGS degree is not an option in which students may pursue a major or minor, however, undergraduate certificates may be pursued/completed.
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.

**Graduation with Honors**

Undergraduates may earn honors upon graduation in 3 ways. The student may graduate with distinction or highest distinction, earn departmental honors in the major, or complete the University Honors Program (http://www.honors.ku.edu/). It is possible to earn honors in 1 of these areas, any combination of them, or all 3. The award of honors is noted on the student’s transcript and in the Commencement program. Distinction and highest distinction are noted on the diploma. However, students completing Option B - the BGS in Liberal Arts and Sciences are not eligible to pursue departmental honors, as this degree option does not include a major.

**Graduation with Distinction or Highest Distinction**

The top 10 percent of each year’s graduating class is designated as graduating with distinction. Of these, the top one-third is designated as graduating with highest distinction. To be eligible, students must have completed at least 60 credit hours, graded A through F, in residence at KU. See Required Work in Residence below.

### Undergraduate Certificate in Advanced Professional Skills

The Advanced Professional Skills Certificate is a credit-bearing certificate that enhances employability skills focused on current workforce demands. This certificate is designed for students who want to further develop in-demand employability skills, as well as students who are underemployed or unemployed and looking to enhance their skills. The Advanced Professional Skills Certificate is also available to workforce partners wanting to strengthen individual employee skills.

The Advanced Professional Skills Certificate requires the completion of 12 credit hours which is comprised of 6 credit hours of In-Demand Skill Development courses and 6 credit hours of the Career Management courses below or other departmentally approved electives, which can be found at: https://edwardscampus.ku.edu/advanced-professional-skills-program-details (https://edwardscampus.ku.edu/advanced-professional-skills-program-details/).

### Master of Arts in Leadership in Diversity and Inclusion

The MA in Leadership in Diversity and Inclusion offers graduate students and working professionals tools and techniques to better understand and navigate leadership opportunities within the context of social diversity and equity in the United States.

As an interdisciplinary program, the focus of the MA in Leadership in Diversity and Inclusion is to:

1. Build foundational knowledge of the history, theory, and practice of leadership with an emphasis on ethical decision making and understanding of the dynamics of power in doing the work of leadership
2. Increase understanding of the meaning of social diversity and equity in the United States
3. Apply this knowledge to real world situations such as workplace bias and fairness, teaching environments, youth sports and recreation activities, work with community nonprofit agencies, etc.

Academic objectives for the program combine those of the constituent graduate certificates, supplemented by an introduction to the culture of graduate education, offering graduate students and working professionals:

1. Knowledge, tools, and strategies to enter into, understand, navigate through, and succeed in the culture of higher education
2. Tools and techniques to better understand and navigate leadership opportunities within professional and community environments
3. Knowledge and strategies to respond efficiently and effectively to the demands of a changing social, cultural, and political landscape while doing the work of leadership
4. Resources necessary to supplement their degrees and professional positions with a stronger understanding and historical background of core domains relevant to social differences and their meanings

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to
Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Application Deadlines
The MA program in Leadership in Diversity and Inclusion accepts applications for the fall, spring, and summer terms. Applications and all required supplemental materials must be submitted by the deadlines listed on the program's website (http://diversityleadership.ku.edu/admission-ma/) to be considered for admission.

Application Materials
Applicants should upload the supporting application documents listed below to the online application (https://gradapply.ku.edu/apply/).

- Copy of official transcripts (https://graduate.ku.edu/transcripts/) from all colleges or universities attended
- Statement of purpose (no longer than two pages, single spaced)
- Research-based writing sample (at least five pages, double spaced)
- Three letters of recommendation

Non-native speakers of English must meet English proficiency requirements (http://graduate.ku.edu/english-proficiency-requirements/).

Contact
Visit the MA in Leadership in Diversity and Inclusion website (https://diversityleadership.ku.edu) for more information about the program and admissions requirements.

Students must complete a minimum of 30 graduate-level credit hours in approved courses with Leadership and Diversity and Inclusion content. Coursework is a combination of face-to-face and online classes.

Core Seminar (3)
LDST 705 Professionalization Seminar in Leadership Studies (3)

Equity and Social Diversity (12)
Four courses (3 credit hours each) totaling 12 graduate credit hours. Courses are categorized into three pathways:

1. U.S. Race and Ethnicity
2. Women, Gender, and Sexuality
3. U.S. Social Differentials

Students must develop a concentration in one pathway by taking at least 6 credit hours of coursework in any one of the three pathways. Courses must be selected in consultation with a faculty advisor.

At least 1 course (3 credit hours) must be taken in a pathway other than the concentration.

A current list of approved courses for each pathway is available on the program website. The Diversity and Inclusion course list continues to grow and is updated regularly.

Leadership Studies (12)
4 courses (3 credit hours each, all completed online) totaling 12 graduate credit hours:

Capstone (3)
LDST 850 Leadership in Diversity and Inclusion Capstone

This course is required of all admitted students in the final semester of their degree program and provides students with the opportunity to integrate and synthesize the interdisciplinary knowledge they have gained.

Final Exam
All MA students must pass a final oral exam and defense of their capstone project. Students are required to be physically present for the exam unless permission for distance examination has been granted.

Supplemental Coursework
LDST 700: Introduction to Graduate Studies in Leadership in Diversity and Inclusion

This course is required for all provisionally admitted students and is offered as an optional course to all admitted students.

Graduate Certificate in Second Language Studies

The Graduate Certificate program in Second Language Studies (SLS) provides an opportunity at KU for graduate students of foreign language, literature, and culture and theoretical linguistics, to add a concentration in applied linguistics and language teaching.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admissions
Current graduate students in any Languages, Literatures, and Cultures department, Linguistics, or School of Education are eligible to apply. Others interested in the certificate should contact Graduate Program Coordinator, Aley Pennington (aleypennington@ku.edu), or Academic Director for the SLS certificate, Nina Vyatkina (vyatkina@ku.edu), to determine eligibility. For more information on admission to a graduate certificate program, see the policy on Graduate Certificate Programs - Eligibility and Admission Criteria (http://policy.ku.edu/graduate-studies/grad-certification-program-admission/).
Current KU Students:

A student must be in good standing with their graduate degree program in order to participate in the certificate program. The application process entails completing the online application, payment of the $30 application fee, and submitting materials required for the Second Language Studies (SLS) Certificate:

- A C.V. or Resume.
- A personal statement declaring your interest in Second Language Studies and its relationship to your graduate course of study and/or career objectives.
- One letter of recommendation from your graduate degree program.
- A KU Advising report in lieu of an official transcript.

Please see the Online Application (http://graduate.ku.edu/ku-graduate-application/) for more information.

Non-KU students or KU Alumni:

Non-KU students or KU Alumni must have a previously completed advanced degree in an applicable field. The application process entails completing the online application, submitting materials required for the Second Language Studies (SLS) Certificate:

- A C.V. or Resume.
- A personal statement declaring your interest in Second Language Studies and its relationship to your graduate course of study and/or career objectives.
- Two letters of recommendation from persons familiar with your academic work or potential for graduate study.
- Official transcripts from any institutions where coursework related to study in your second language was completed.

The certificate will be awarded to MA or Ph.D. students who successfully complete 4 graduate-level courses across disciplines (12 credits total):

1. LING 715 Second Language Acquisition I
2. LA&S 720 Introduction to Language Teaching Research or another approved* related graduate-level course offered by Linguistics, CLAS languages, literatures, and cultures departments, or by the School of Education.
3. A graduate-level course in Linguistics, or another approved* related graduate-level course offered by Linguistics, CLAS languages, literatures, and cultures departments, or by the School of Education.
4. Elective course in Second Language Studies. This could be fulfilled by a Teaching Methods course required of GTAs teaching in language departments (FREN 704, SLAV 824, SPAN 801) and by other approved related graduate-level courses, including those offered by the School of Education.

A student who has prior coursework deemed equivalent to any of the required courses may replace these with approved electives.

*Graduate-level course equivalents will be approved by the Linguistics Academic Administrator for the Second Language Studies certificate program for Linguistics students and by the Academic Director for the Second Language Studies certificate program for all other students.

Graduate Certificate in Studies in Equity and Social Diversity in the U.S.

The focus of the graduate certificate in Studies in Equity and Social Diversity in the U.S. is to (1) increase understanding of the meaning of social diversity and equity (DE) in the United States and (2) consider the application of this knowledge to real world situations such as workplace bias and fairness, teaching environments, youth sports and recreation activities, work with and for community nonprofit agencies, and more. Through interdisciplinary coursework, the main objective is to offer graduate students and working professionals the necessary tools to supplement their degrees and professional positions with a stronger understanding and historical background of core domains relevant to social differences and their meanings. These domains include but are not limited to intersectional identities of race, ethnicity, gender identities, gender expressions, sexual orientation, socioeconomic status, age, disabilities, religion, regional background, veteran status, citizenship status and nationality. Select courses will be offered with multiple partners across the College of Liberal Arts and Sciences and School of Education.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Any applicant seeking to pursue a graduate certificate in Studies in Equity and Social Diversity in the U.S. must submit the application for graduate study (https://gradapply.ku.edu/apply/). Applications are accepted on a rolling basis.

New Applicants

Applicants who are not already enrolled in a KU graduate program must have completed a bachelor’s degree. Applicants should include the following materials in their application to the certificate program.

- A statement of purpose outlining their interest in the Studies in Equity and Social Diversity in the U.S. graduate certificate
- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges and universities attended

Non-native speakers of English must meet English proficiency requirements (http://graduate.ku.edu/english-proficiency-requirements/).

Current KU Graduate Students

Applicants already in a KU graduate program must be in good standing with their home department to be eligible for admission the certificate program. Current KU graduate students should include the following materials in their online application:

- A C.V. or Resume.
- A personal statement declaring their interest in Second Language Studies and its relationship to their graduate course of study and/or career objectives.
- Two letters of recommendation from persons familiar with their academic work or potential for graduate study.
- Official transcripts from any institutions where coursework related to study in their second language was completed.

Please see the Online Application (http://graduate.ku.edu/ku-graduate-application/) for more information.
• A statement of purpose outlining their interest in the Studies in Equity and Social Diversity in the U.S. graduate certificate
• A letter of support from their faculty advisor or the Director of Graduate Studies in their home academic unit

Contact
Visit the Institute for Leadership Studies website (https://ils.ku.edu/admission-graduate-certificate/) for more detailed information about the application process.

Graduate certificate coursework focuses on the experiences of U.S. racial/ethnic minorities (e.g., African American/Black, Native American/Alaskan Native, Native Hawaiian/Other Pacific Islander, Latinx) and on U.S. marginalized populations (e.g., gender, gender expression, sexuality, disabilities). Students must take a total of 12 graduate credit hours of coursework. Courses for this certificate are categorized into three pathways.

Pathway 1: US Race and Ethnicity
Pathway 2: Women, Gender and Sexuality
Pathway 3: US Social Differences

Students must develop a plan of study in consultation with and approved by a faculty advisor. This plan of study must include a concentration consisting of at least 6 credit hours of coursework in one of the three pathways. At least one course (3 credit hours) must be taken in a pathway other than the concentration. At least two courses (6 credit hours) must be taken at the 700 level or above.

A current list of approved courses for each pathway can be found here (https://wgss.ku.edu/sites/wgss.ku.edu/files/docs/EQSCDUS%20Certificate%20Courses%20SP19.pdf).

Department of Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

The Linguistics Department at KU offers a full range of degrees: B.A. (http://linguistics.ku.edu/overview/), M.A. (http://linguistics.ku.edu/overview-2/) and Ph.D. (http://linguistics.ku.edu/overview-1/) The first linguistics courses at KU were offered in 1957. In 1968, Linguistics became a department and was authorized to offer a Ph.D. degree. Today, the unique strength of the Linguistics department is the systematic pairing of theoretical and experimental investigations of linguistic knowledge. Its nucleus of full-time faculty members in Linguistics (http://linguistics.ku.edu/faculty-1/), plus several actively involved faculty members in other departments, serves a student body of about 35 graduate students, 80 undergraduate majors, and many non-majors taking introductory and intermediate courses each semester.

Areas of special strength in the graduate program include Phonetics, Phonology, Syntax, First and Second Language Acquisition, Psycholinguistics, and Neurolinguistics, Semantics, and the study of Indigenous Languages. The department also cooperates with other departments, such as Speech-Language-Hearing (http://splh.ku.edu/), Child Language (http://cldp.ku.edu/), Indigenous Nations Studies (http://indigenous.ku.edu/), Anthropology (http://anthropology.ku.edu/), Education and Human Sciences (http://soe.ku.edu/), and Psychology (http://psyk.ku.edu/).

Research Facilities

The Department of Linguistics houses 7 research and teaching laboratories.

The Developmental Psycholinguistics Laboratory is equipped to investigate how preschool-age children acquire and use the knowledge of meaning in their first language. The lab uses various psycholinguistic tasks, such as linguistic comprehension tasks and the visual-world eye tracking paradigm, to assess children’s representation and real-time processing of meaning. The lab houses an eye tracking system with a remote camera designed specifically for children to participate in the visual-world eye tracking paradigm.

The Field Linguistics Laboratory provides an environment for on-site elicitation work with speakers as well as the processing, analysis, and archiving of field data. The laboratory is equipped with computer workstations and an assortment of audio/video recording devices suitable for a range of fieldwork projects including one-to-one interviews, audio recording and transcription, and data analysis.

The Neurolinguistics and Language Processing Laboratory is fully equipped for multi-method, cross-linguistic research on the implementation of language in the brain. The laboratory includes a 70-channel Neuroscan Synamps2 EEG system for visual and auditory ERP (event-related potentials) studies, and two dedicated testing rooms for psycholinguistic experiments including lexical decision, priming, and self-paced reading. Brain imaging studies, including MEG and fMRI, are conducted at the Hoglund Brain Imaging Center at the University of Kansas Medical Center in Kansas City.

The Phonetics and Psycholinguistics Laboratory provides an integrated environment for the experimental study of speech and language, including production, perception, and acquisition. Primary research areas in the lab are acoustic and auditory phonetics as well as spoken and written word recognition, all across a variety of languages. Software includes MultiSpeech and Praat for speech analysis and Paradigm, Superlab, and Matlab for collecting responses from up to six subjects simultaneously. Digital noise-free recordings are made in our anechoic chamber.

The Second Language Acquisition Laboratory is equipped with 5 computer workstations and 2 dedicated testing rooms. Computers are equipped with software (Paradigm) for running psycholinguistic experiments (including interpretation tasks, reaction time, self-paced reading, and speeded grammaticality judgment) and for conducting statistical analyses. Primary research areas in the lab are the acquisition and processing of syntax and semantics by adult second language learners, all across a variety of languages. Our research focuses on the linguistic and cognitive factors that impact acquisition at varying stages of development.

The Second Language Processing & Eye-Tracking Laboratory has 2 testing rooms equipped with computer stations for investigating second language speech and sentence processing as well as a head-mounted eye tracker. The research methods employed in the lab include speech perception and word recognition, cross-modal priming and masked priming, self-paced reading and sentence comprehension, and eye tracking in the visual world paradigm and in reading.
Undergraduate Programs

The department offers a broad range of courses that provide a basic understanding of human language and communication. Linguistics courses examine features of language that underlie the human capacity to express concepts and communicate ideas. The courses address the connections between language, brain, culture, mind, and history. The major gives students a basic understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

Linguistics is a superb preparation for careers that require expertise in the use of language as a means of communication, e.g., business, communications, personnel administration, teaching, health care, and social service. Many majors pursue graduate study in education, law, psychology, computer science, speech and hearing sciences, and languages.

Graduate Programs

M.A. Overview (https://linguistics.ku.edu/overview-2/)

Our M.A. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student’s research interests.

The M.A. program usually takes two years. Students in the M.A. program complete a written Research Proposal and an Oral Examination of the Research Proposal, typically in their fourth semester of study. Students are required to take an Advanced II-level course to develop their understanding of research in their area of interest.

Ph.D. Overview (https://linguistics.ku.edu/overview-1/)

Our Ph.D. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student’s research interests.

The Ph.D. program usually takes five years which includes completing an M.A. degree en route to the Ph.D. All Ph.D. students receive a five-year funding package.

Non-Degree Seeking (https://linguistics.ku.edu/overview-4/)

Students who are interested in enrolling in graduate level coursework in the Department of Linguistics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (https://linguistics.ku.edu/admission/#tab2name) for further details.

Courses

LING 106. Introductory Linguistics. 3 Credits. SC S
Introduction to the fundamentals of linguistics, with emphasis on the description of the sound system, grammatical structure and semantic structure of languages. The course will include a survey of language in culture and society, language change, computational linguistics and psycholinguistics, and will introduce students to techniques of linguistic analysis in a variety of languages including English. (Same as ANTH 106).

LING 107. Introductory Linguistics, Honors. 3 Credits. SC S
Introduction to the fundamentals of linguistics, with emphasis on the description of the sound system, grammatical structure, and semantic structure of languages. The course includes a survey of language in culture and society, language change, computational linguistics and psycholinguistics, and introduces students to techniques of linguistic analysis in a variety of languages including English. Open only to students admitted to the University Honors Program or by consent of instructor. (Same as ANTH 107.)

LING 110. Language and Mind. 3 Credits. SI S
A study of the relation between language and the human mind, focusing on language as a fundamental aspect of human cognition. Topics include what is innate and what is learned during first and second language acquisition, how we process language, and whether there are areas of the brain specialized for language.

LING 111. Language and Mind, Honors. 3 Credits. SI S
A study of the relation between language and the human mind, focusing on language as a fundamental aspect of human cognition. Topics include what is innate and what is learned during first and second language acquisition, how we process language, and whether there are areas of the brain specialized for language. Open only to students admitted to the University Honors Program, or by consent of instructor.

LING 120. The Physics of Speech. 4 Credits. N
An introduction to the acoustic structure of speech intended for nonscience majors. Emphasis will be placed on the methods and standards by which scientists measure and evaluate the physical characteristics of speech. Topics will include: simple harmonic motion, the propagation of sound waves, aerodynamic aspects of vocal fold vibration, resonance, digital speech processing, frequency analysis, and speech synthesis. Three class hours and one laboratory per week. (Same as SPLH 220.) Prerequisite: MATH 101 or 104 or equivalent.

LING 177. First Year Seminar: _____ . 3 Credits. SC
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in linguistics. May not contribute to major requirements in linguistics. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

LING 180. Study Abroad Topics in Linguistics: _____. 1-3 Credits. U
This course is designed for the study of special topics in Linguistics. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

LING 250. Introduction to Translation and Translation Theory. 3 Credits. H
This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat (oral) interpretation in detail. (Same as AAAS 250, GERM 240, SLAV 250 and SPAN 202.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

LING 305. Phonetics I. 3 Credits. S
This course provides a basic introduction to the study of human speech sounds. Topics to be covered include anatomy and physiology of the speech production apparatus, transcription and production of the world's sounds, basic acoustics, computerized methods for speech analysis, acoustic characteristics of speech sounds, stress, and intonation. A hands on laboratory project is part of the course. Prerequisite: An introductory course in Linguistics.

LING 308. Linguistic Analysis. 3 Credits. H
Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from a variety of languages of different structural types. Prerequisite: LING 106.

LING 312. Phonology I. 3 Credits. S
This course focuses on crucial phonological concepts such as contrast, alternation, neutralization, distinctive features, and the syllable. It also provides students with basic skills for phonological analysis, including the selection of underlying representations, rule notation, rule ordering, identifying phonological universals, and how to make an informed decision when multiple analyses are viable. In addition, it discusses the external motivations for phonological grammar and relates phonology to other disciplines in linguistics such as language acquisition and psycholinguistics. Not open to students who have taken LING 712. Prerequisite: LING 305.

LING 320. Language in Culture and Society. 3 Credits. SC S
Language is an integral part of culture and an essential means by which people carry out their social interactions with the members of their society. The course explores the role of language in everyday life of peoples in various parts of the world and the nature of the relationship between language and culture. Topics include world-view as reflected in language, formal vs. informal language, word taboo, and ethnography of speaking. (Same as ANTH 320.)

LING 321. Language in Culture and Society, Honors. 3 Credits. SC S
An honors section of LING 320 for students with superior academic records. Not open to students who have had ANTH 320 or LING 320. (Same as ANTH 321.) Prerequisite: Membership in the University Honors Program or consent of instructor.

LING 325. Syntax I. 3 Credits. H
An introduction to generative syntax with special attention to theory and method. The course covers such topics as phrase structure, the lexicon, transformations and derivation. Prerequisite: LING 106.

LING 338. Languages of the Jews. 3 Credits. H
From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as JWSH 338.)

LING 339. Languages of the Jews, Honors. 3 Credits. H
Honors version of LING 338 or JWSH 338, Languages of the Jews. (Same as JWSH 339.) Prerequisite: Membership in the University Honors Program or consent of instructor.

LING 343. Bilingualism. 3 Credits. S
This course is an introduction to bilingualism in the U.S. and in the world. It explores the linguistic, sociolinguistic, and psycholinguistic aspects of bilingualism. We will consider how bilingualism impacts language itself, considering the new varieties that emerge as languages come into contact. We will also consider bilingualism at the societal level, considering how language policies and notions of 'prestige' impact language communities and whether they are able to preserve their languages. Finally, we will consider bilingualism at the individual level, considering how using two or more languages on a daily basis impacts language acquisition and language processing. We will also consider whether using more than one language affords certain cognitive advantages. We will discuss these topics to better understand research in this area and think critically about what relevance this research has in real world settings such as homes, classrooms, corporations, and clinical settings. The final project will ask you to make a proposal/argument related to bilingualism based on primary research in this area. The main goal will be to consider how research findings can be used to inform a real-world problem and how to best communicate those findings to the general public.

LING 345. Language and Gender. 3 Credits. S
This course explores the relationship between language use and gender. The course will specifically focus on how gender affects the ways we use spoken language as well as how we interpret the speech of others. Topics to be discussed will include the function of language in social relationships and language variation in different social contexts.

LING 370. Introduction to the Languages of Africa. 3 Credits. NW H/W
A survey of the indigenous languages of Africa from a linguistic perspective, covering the main language families and their geographic distribution, and focusing on the features and structure of the more widely spoken and representative languages in each family (e.g., Fula, Hausa, Maninka, Swahili, Yoruba). (Same as AAAS 370.)

LING 380. Study Abroad Topics in Linguistics: _____ 1-6 Credits. S
This course is designed for the study of special topics in Linguistics at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad.

LING 415. Second Language Acquisition I. 3 Credits. H
Introduction to the study of second language acquisition: The application of theoretical linguistics to the description of the language that a learner acquires, and to the process of acquisition. Prerequisite: An introductory course in linguistics.

LING 418. Introduction to Cognitive Science. 3 Credits. S
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an interdisciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology,
anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as PHIL 418, PSYC 418, and SPLH 418.) Prerequisite: Consent of instructor.

LING 420. Capstone: Research in Language Science. 3 Credits. S

This course, an on-site practicum in Linguistics, provides a foundation for designing, conducting, and critically evaluating quantitative and qualitative research in the language sciences. Topics include formulating a research hypothesis, participant selection, ethical considerations, the scientific method, dependent and independent variables, data collection, descriptive and inferential statistics. Instruction builds discipline-specific knowledge and skills for career preparation. Students apply their knowledge of linguistics to formulate a research hypothesis and design an experiment to evaluate this hypothesis. Prerequisite: LING 305, LING 312, LING 325, and either LING 415, LING 425, LING 435, or LING 438.

LING 421. Capstone: Typology-Unity and Diversity of Human Language. 3 Credits. S

This course, an on-site practicum in Linguistics, explores the similarities and differences among the worlds' languages. Students apply their knowledge of phonetics, phonology, morphology, and syntax in describing and analyzing phenomena from a number of languages. The typological perspective that students develop is applied to topics such as word order, morphological typology, case, lexical categories, and valency. In addition to lecture instruction, students get hands on practice in collecting, transcribing, and analyzing data from different languages through face to face elicitation with native speakers. Instruction builds discipline-specific knowledge and skills for career preparation. Prerequisite: LING 305, LING 312, and LING 325.

LING 425. First Language Acquisition I. 3 Credits. S

An introductory course in the acquisition of child language. The course will cover relevant historical studies of child language but will focus primarily on recent psycholinguistic approaches toward the description of the process by which a child acquires his native language. Phonological, syntactic, semantic, cognitive, pragmatic, sociolinguistic, and anthropological aspects of the acquisition process are covered. Prerequisite: An introductory course in linguistics.

LING 430. Linguistics in Anthropology. 3 Credits. S

The study of language as a symbolic system. Exploration into the interrelatedness of linguistic systems, of nonlinguistic communicative systems, and of other cultural systems. (Same as ANTH 430.)

LING 435. Psycholinguistics I. 3 Credits. S LFE

A detailed examination of issues in the processing of language. The course provides a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes are examined. (Same as PSYC 435.) Prerequisite: An introductory course in linguistics or permission of instructor.

LING 438. Neurolinguistics I. 3 Credits. S

The course explores how language is represented and processed in the human brain. This includes a critical survey of the foundations and the current research in the cognitive neuroscience of language, focusing on the techniques of functional brain imaging (fMRI, PET, EEG, MEG, and related methods), and research on aphasia and other language disorders. This course also includes a component providing laboratory experience with brain imaging research on language. Prerequisite: An introductory course in Linguistics.

LING 440. Linguistic Data Processing. 3 Credits. H

This course introduces the tools and techniques necessary to analyze fieldwork data, including research design, recording and elicitation techniques, computational data processing and analysis, and field ethics. The course also covers field recording and data analysis technology, along with methods of phonetic transcription, grammatical annotation and analysis of language context. Practice of techniques is provided via short studies of at least one language. Prerequisite: LING 305 or permission of instructor.

LING 447. North American Indian Languages. 3 Credits. S

This course introduces students to the indigenous languages of North America. Students critically examine the structures and status of these languages, which have greatly expanded our knowledge of human language and linguistic theory. Topics include the history and future of North American languages and indigenous speech communities, the history of the field of Americanist linguistics, as well as important linguistic questions raised by phenomena from American languages in phonology, morphology, syntax, semantics, and historical linguistics. Prerequisite: An introductory course in linguistics. Not open to students enrolled in 747.

LING 470. Language and Society in Africa. 3 Credits. NW H/W

Examines issues and problems associated with language use in sub-Saharan Africa from a sociological perspective. Topics covered include an overview of the types of languages spoken on the continent: indigenous languages, colonial languages, pidgins and creoles, and Arabic as a religious language; problems associated with the politics of literacy and language planning; writing and standardization of indigenous languages; and the cultural and ideological dilemmas of language choice. (Same as AAAS 470.) Prerequisite: AAAS 103, AAAS 305, or LING 106; or consent of instructor.

LING 490. Independent Study. 1-3 Credits. U

A special research project or directed readings in an area of linguistics not covered in other courses. No more than 3 hours of LING 490 may be applied toward the requirements for the major. Prerequisite: Consent of instructor.

LING 491. Topics in Linguistics: _______. 1-3 Credits. H

The content, prerequisites, and credits of this course will vary. May be repeated.

LING 492. Topics in Linguistics: _______. 1-3 Credits. S

The content, prerequisites, and credits of this course will vary. May be repeated. (Distribution credit given for two or three hours only.) Prerequisite: Consent of instructor.

LING 496. Honors Essay in Linguistics. 1-3 Credits. H

Individual directed research and preparation of an essay on a linguistic topic. Prerequisite: A grade-point average of 3.5 in linguistics and 3.25 in all courses, and consent of the major adviser.

LING 507. Phonetics II. 3 Credits. S

This course is a continuation of Phonetics I (LING 305/705) and provides a more detailed survey of acoustic and auditory phonetics. Topics to be covered include vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, prosody, the phonetics of second language acquisition, and the production and perception of cues to gender, talker, region, and socio-economic status. In addition, a number of laboratory projects are required. Prerequisite: LING 305.

LING 514. Phonology II. 3 Credits. S

This course discusses the problems in rule-based phonology that led to the development of Optimality Theory. Discussions of Optimality Theory include its basis architecture, the nature of markedness constraints, the role of phonetics in the theory, correspondence between different levels of representation, and how variants of the theory can model free and lexical variation. A selection of the following topics will also be included depending on class interest: interface between phonology and morphology, syntax, and the lexicon, reduplication, loanword phonology,
biases in phonological learning, stress, and tone. The course has a particular focus on theory-building, with discussions on how to lay out the predictions of a theoretical proposal, and how phonological predictions can be tested using experimental methods. Not open to students who have taken LING 714. Prerequisite: LING 312 or instructor consent.

LING 516. Second Language Acquisition II. 3 Credits. S
This advanced course provides in-depth reading and discussion of several current topics including second language acquisition within a generative framework, processing approaches to second language acquisition, and the role of input and learnability principles in second language acquisition. Both theoretical and methodological issues are discussed. Prerequisite: LING 415 and LING 325; or permission of instructor.

LING 526. Syntax II. 3 Credits. S
An advanced course covering one or more current theories of syntax. The course provides in-depth reading and discussion on the major areas of syntactic theory including universal grammar, phrase structure theory; lexicon and argument structure; binding, control, locality conditions; constraints on representation and derivation; and the relation between syntax and the semantic module. Prerequisite: LING 325.

LING 527. Morphology. 3 Credits. S
An exploration of several topics in word structure and formation. Covers three broad areas: traditional morphology, morpho-phonology, and morpho-syntax. Traditional morphology includes a survey of several kinds of word formation processes, the internal structure of words, morpheme types, inflection, paradigms, derivation, and compounding. Morpho-phonology deals with phonological constraints on morphological processes and prosodic morphology. Morpho-syntax concentrates on the syntactic properties of morphological phenomena and interaction of syntactic processes and morphology. The course has a strong emphasis on cross-linguistic comparative morphology. Prerequisite: LING 312 and LING 325, or permission of instructor.

LING 531. Semantics. 3 Credits. S
This course explores how meaning works in the grammar of natural languages. Students actively learn and apply formal structures to meaning in relation to truth, logic, and morphosyntax. The course emphasizes the role of context in semantic and pragmatic interpretation, including using context-based elicitation techniques to collect semantic data. Other topics include the nature of events and argument structure, tense and aspect, reference and binding, quantification and scope, and the semantic motivation behind syntactic structures. This course is offered at the 500 and 700 level, with additional assignments at the 700 level. Not open to students with credit in LING 731. Prerequisite: LING 525 or instructor permission.

LING 537. Psycholinguistics II. 3 Credits. S
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. Prerequisite: LING 435 or consent of instructor.

LING 539. First Language Acquisition II. 3 Credits.
A second semester course in child language that explores the acquisition of morphology, syntax, and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. Prerequisite: LING 425 or consent of instructor.

LING 541. Field Methods in Linguistic Description. 3 Credits. H
The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Techniques of research design, methods of phonetic transcription, grammatical annotation, and analysis of language context. Prerequisite: LING 305, LING 312, and LING 325 or permission of instructor.

LING 542. Neurolinguistics II. 3 Credits. S
An in-depth discussion of the representation and processing of language from a cognitive neuroscience perspective. This course involves critical discussion of selected topics of current research interest in neurolinguistics. The course also includes a significant hands-on component, in which students receive training in research on the cognitive neuroscience of language by developing and implementing a new EEG study on an aspect of language, as well by completing as a series of mini-labs introducing neuroimaging methods and analyses. Prerequisite: LING 438 or permission of the instructor.

LING 543. Language and Culture in Arabic-Speaking Communities. 3 Credits. W
The course examines the links between language structure, patterns of use, language choice, and language attitudes in the diglossic and bi-lingual Arabic-speaking communities. It also explores language as a reflector and creator of Arab culture (e.g. linguistic encoding of politeness, the Quranic text as the spoken and written word, the role of tropes in Arabic rhetoric). The topics for discussion range from the micro-level language choice to the macro-level issues of national language policies and planning within the domain of government and education across the Arab world. (Same as AAAS 543)

LING 570. The Structure of Japanese. 3 Credits. H
A detailed study of the phonological and grammatical structure of Japanese and the use of the language in social/cultural contexts. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as EALC 570.)

LING 572. The Structure of Chinese. 3 Credits. H
A detailed study of the phonological and grammatical structure of Chinese and the interactions between language and culture. Depending on student interests, a unit on the pedagogy of teaching Chinese as a foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as EALC 572.)

LING 575. The Structure of: _____. 3 Credits. S
A detailed study of a language, including its phonological, morphological, syntactic and semantic characteristics. The course provides students with a linguistic knowledge of the language rather than a practical command of it. Prerequisite: A course in linguistics.

LING 700. Introduction to Linguistic Science. 3 Credits.
An introduction to the theory and techniques of linguistic science for majors and others intending to do advanced work in linguistics and linguistic anthropology. Emphasis on the sound system, grammatical structure, and semantic structure of languages. Lectures and laboratory sessions. Not open to students who have taken ANTH/LING 106 or ANTH/LING 107. Prerequisite: Graduate standing.

LING 705. Phonetics I. 3 Credits.
This course provides a basic introduction to the study of human speech sounds. Topics to be covered include anatomy and physiology of the speech production apparatus, transcription and production of the world’s sounds, basic acoustics, computerized methods for speech analysis, acoustic characteristics of speech sounds, stress, and intonation. A ‘hands on’ laboratory project is part of the course. Prerequisite: Graduate standing or consent of instructor.

LING 706. Current Linguistic Anthropology. 3 Credits.
The fundamental issues, methods, and theories in contemporary linguistic anthropology. (Same as ANTH 706.) Prerequisite: Graduate standing or consent of the instructor.

LING 707. Phonetics II. 3 Credits. LFE
This course is a continuation of Phonetics I (LING 705) and provides a more detailed survey of acoustic and auditory phonetics. Topics to be covered include vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, prosody, the phonetics of second language acquisition, and the production and perception of cues to gender, talker, region, and socio-economic status. In addition, a number of laboratory projects will be required. Prerequisite: LING 705.

LING 708. Linguistic Analysis. 3 Credits.
Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from a variety of languages of different structural type. (Same as ANTH 736.) Prerequisite: An introductory course in linguistics. Not open to students who have taken LING 308.

LING 709. First Language Acquisition I. 3 Credits.
Introduction to the study of language acquisition: the significant findings, the basic methodological procedures, and some of the more recent theoretical accounts. Not open to students who have taken LING 425. (Same as CLDP 709.) Prerequisite: Graduate standing or consent of instructor.

LING 712. Phonology I. 3 Credits.
This course focuses on crucial phonological concepts such as contrast, alternation, neutralization, distinctive features, and the syllable. It also provides students with basic skills for phonological analysis, including the selection of underlying representations, rule notation, rule ordering, identifying phonological universals, and how to make an informed decision when multiple analyses are viable. In addition, it discusses the external motivations for phonological grammar and relates phonology to other disciplines in linguistics such as language acquisition and psycholinguistics. Not open to students who have taken LING 312. Prerequisite: LING 705.

LING 714. Phonology II. 3 Credits.
This course discusses the problems in rule-based phonology that led to the development of Optimality Theory. Discussions of Optimality Theory include its basic architecture, the nature of markedness constraints, the role of phonetics in the theory, correspondence between different levels of representation, and how variants of the theory can model free and lexical variation. A selection of the following topics will also be included depending on class interest: interface between phonology and other components of the grammar (e.g., morphology, syntax, and the lexicon), reduplication, loanword phonology, biases in phonological learning, stress, and tone. The course has a particular focus on theory-building, with discussions on how to lay out the predictions of a theoretical proposal and how phonological predictions can be tested using experimental methods. Not open to students who have taken LING 514. Prerequisite: LING 712.

LING 715. Second Language Acquisition I. 3 Credits.
Introduction to the study of second language acquisition: The application of theoretical linguistics to the description of the language a learner acquires, and to the process of acquisition. Prerequisite: Graduate standing or consent of instructor.

LING 716. Second Language Acquisition II. 3 Credits.
This advanced course will provide in-depth reading and discussion of several current topics including second language acquisition within a generative framework, processing approaches to second language acquisition, and the role of input and learnability principles in second language acquisition. Both theoretical and methodological issues will be discussed. Prerequisite: LING 715; LING 725, which may be taken concurrently, or permission of instructor.

LING 720. Research Methods in Linguistics. 3 Credits.
This course provides a foundation for designing, conducting, and critically evaluating quantitative and qualitative research in the language sciences. Topics include formulating a research hypothesis, participant selection, ethical considerations, the scientific method, validity, reliability, data collection, dependent and independent variables, descriptive and inferential statistics. This course will serve students who are interested in the basics of research design and statistics for the study of language. Prerequisite: Graduate standing or consent of instructor.

LING 722. Linguistic Typology. 3 Credits.
Different languages use different linguistic mechanisms to encode meanings. This course surveys grammatical concepts and categories found in the world’s languages including tense, aspect, mood, voice, person, and number as well as case relations such as nominative, accusative, ergative, and absolutive. Basic word order typology and discourse functions such as topic, focus, and cohesion are introduced. Examples will be drawn from a wide variety of languages to illustrate how the same concept may be encoded differently, i.e., morphologically, syntactically, or lexically, in different languages. Prerequisite: Graduate standing or consent of instructor.

LING 725. Syntax I. 3 Credits.
The basics of theoretical syntax, examining the principles of universal grammar. Topics include phrase structure, relations among syntactic constituents, and the nature of syntactic rules and lexical categories. Prerequisite: Graduate standing or consent of instructor.

LING 726. Syntax II. 3 Credits.
An advanced course covering one or more current theories of syntax. The course will provide in-depth reading and discussion on the major areas of syntactic theory including universal grammar, phrase structure theory, lexical projections of argument structure, binding, control, locality condition, constraints on representation, and the relation between syntax and the semantic module. Prerequisite: LING 725.

LING 727. Morphology. 3 Credits.
An exploration of several topics in word structure and formation. Covers three broad areas: traditional morphology, morpho-phonology, and morpho-syntax. Traditional morphology includes a survey of several kinds of word formation processes, the internal structure of words, morpheme types, inflection, paradigms, derivation, and compounding. Morpho-phonology deals with phonological constraints on morphological processes and prosodic morphology. Morpho syntax concentrates on the syntactic properties of morphological phenomena and interaction of syntactic processes and morphology. The course has a strong emphasis on cross-linguistic comparative morphology. Prerequisite: LING 712, LING 725, or permission of instructor.

LING 730. Linguistics in Anthropology. 3 Credits.
The study of language as it concerns anthropology. Language systems in relation to culture, language taxonomy, semantics, linguistic analysis as an ethnographic tool. (Same as ANTH 730.)

LING 731. Semantics. 3 Credits.
This course explores how meaning works in the grammar of natural languages. Students actively learn and apply formal structures to meaning in relation to truth, logic, and morphosyntax. The course emphasizes the role of context in semantic and pragmatic interpretation, including using context-based elicitation techniques to collect semantic data. Other topics include the nature of events and argument structure, tense and aspect, reference and binding, quantification and scope, and the semantic
motivation behind syntactic structures. This course is offered at the 500 and 700 level, with additional assignments at the 700 level. Not open to students with credit in LING 531. Prerequisite: LING 725 or instructor permission.

LING 732. Discourse Analysis. 3 Credits.
This course focuses on linguistic frameworks for the analysis of discourse. Discourse is a linguistic system larger than the sentence (utterance), which connects and contextualizes speech and written text. This course focuses on current issues and theoretical frameworks in the analysis of discourse. Using oral and written data, students will examine how contexts influence and shape linguistic form. Topics covered include transcription systems, the structure and organization of different genres of language, and the performance of social actions, including stance-taking, framing, and the construction of identity. Students will also have an opportunity to perform discourse analytic research on the data of their choice. (Same as ANTH 732.) Prerequisite: ANTH 706 or permission of the instructor.

LING 735. Psycholinguistics I. 3 Credits. LFE
A detailed examination of issues in the processing of language. The course will provide a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes will be examined. (Same as PSYC 735.)

LING 737. Psycholinguistics II. 3 Credits.
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. (Same as PSYC 737.) Prerequisite: PSYC 735/LING 735 or consent of instructor.

LING 738. Neurolinguistics I. 3 Credits.
We will explore how language is represented and processed in the human brain. This will include a critical survey of the foundations and the newest state-of-the-art research in the cognitive neuroscience of language, focusing on the techniques of functional brain imaging (fMRI, PET, EEG, MEG, and related methods), and research on aphasia and other language disorders. This course will also include a laboratory component providing hands-on experience with brain imaging research on language. Prerequisite: Graduate standing or consent of instructor.

LING 739. First Language Acquisition II. 3 Credits.
A second semester course in child language which explores the acquisition of morphology, syntax and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. (Same as CLDP 739.) Prerequisite: LING 709 or permission of the instructor.

LING 740. Linguistic Data Processing. 3 Credits.
The tools and techniques necessary to analyze linguistic fieldwork data, including research design, recording and elicitation techniques, computational data processing and analysis, and field ethics. Techniques of research, field recording, and data analysis technology. Methods of phonetic transcription, grammatical annotation, and analysis of language context. Practice of techniques via short studies of at least one language. (Same as ANTH 740.) Prerequisite: LING 700 or permission of instructor.

LING 741. Field Methods in Linguistic Description. 3 Credits.
The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Techniques of research design, methods of phonetic transcription, grammatical annotation, and analysis of language context. (Same as ANTH 741.) Prerequisite: LING 705 or permission of instructor.

LING 742. Neurolinguistics II. 3 Credits.
An in-depth discussion of the representation and processing of language from a cognitive neuroscience perspective. This course involves critical discussion of selected topics of current research interest in neurolinguistics. The course also includes a significant hands-on component, in which students receive training in research on the cognitive neuroscience of language by developing and implementing a new EEG study on an aspect of language, as well by completing a series of mini-labs introducing neuroimaging methods and analyses. Prerequisite: LING 738 or permission of the instructor.

LING 747. North American Indian Languages. 3 Credits.
This course introduces student to the indigenous languages of North America. Students will critically examine the structures and status of these languages, which have greatly expanded our knowledge of human language and linguistic theory. Topics include the history and future of North American languages and indigenous speech communities, the history of the field of Americanist linguistics, as well as important linguistic questions raised by phenomena from American languages in phonology, morphology, syntax, semantics, and historical linguistics. Prerequisite: An introductory course in linguistics.

LING 748. Language Contact. 3 Credits.
Theories and case studies of languages in contact. Areal and genetic linguistics, genesis of pidgins and creoles, multilingualism. Social, political, economic, and geographic factors in language change. (Same as ANTH 748.) Prerequisite: A course in Linguistics.

LING 749. Linguistics and Ethnolinguistics of China and Central Asia: ____. 3 Credits.
Selected topics in Linguistics and Linguistic Anthropology, focusing on dominant and/or minority languages of China, Central Asia, or a particular region of Central and Eastern Eurasia. Topics may include any subfield of linguistics, including language contact, typology, dialectology, and sociolinguistics. Topic for semester to be announced. Prerequisite: A course in Linguistics.

LING 782. Research Methods in Child Language. 3 Credits.
A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as CLDP 782 and PSYC 782.)

LING 794. Proseminar. 3 Credits.
Introduction to the field of linguistics. Topics include research literature and research methods, thesis and grant writing, and ethics in linguistic research. Required for all first-year graduate students in linguistics. Graded on a satisfactory/unsatisfactory basis.

LING 799. Proseminar in Child Language. 2 Credits.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, CLDP 799, PSYC 799 and SPLH 799.)

LING 807. Seminar in Phonetics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of phonetics. Prerequisite: LING 705 or consent of instructor.

LING 810. Seminar in Ethnolinguistics: _____. 2-3 Credits.
An advanced study of the relations between language and culture. Subject will vary each semester. Students may repeat the course more than once.

LING 814. Seminar in Phonology. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of phonology. Prerequisite: LING 712 or consent of instructor.
Critical examination of recent theoretical issues and empirical findings in
the study of first language acquisition. (Same as CLDP 822.) Prerequisite:
LING 709 or consent of instructor.

LING 826. Seminar in Syntax. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in
the study of syntax. Prerequisite: LING 725 or consent of instructor.

LING 831. Seminar in Semantics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in
the study of semantics. Prerequisite: LING 731 or consent of instructor.

LING 837. Seminar in Psycholinguistics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in
the study of psycholinguistics. Prerequisite: LING 735 or consent of
instructor.

LING 842. Seminar in Neurolinguistics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in
the study of neurolinguistics. Prerequisite: LING 738 or consent of
instructor.

LING 850. Topics in Research in Experimental Linguistics: _____.
1-9 Credits.
This course is primarily for students actively engaged in experimental
linguistic research. The course provides students with the opportunity
to focus on their current research projects and involves critical analysis,
presentation, and discussion of research design, methods, statistical
analysis, and data interpretation. May be repeated. Prerequisite:
Permission of instructor.

LING 851. Research in Language Acquisition and Processing. 1-9
Credits.
This course is primarily intended for students actively engaged in
linguistic research on language acquisition, language processing,
and neurolinguistics. Students in this course present and discuss
study design, methods, data analysis and interpretation of results for
their research projects. Professional development topics such as CV
development, applications for fellowships, grants and jobs, and the
dissemination of research findings are also discussed. May be repeated.
Prerequisite: Permission of instructor.

LING 852. Research in Field and Formal Linguistics. 1-9 Credits.
This course is intended for students who are conducting field work on
syntax or morphology, typically of an understudied language. The course
is structured around a set of topics (variable by semester) which each
student will investigate in a particular language. The focus of the course
is on data collection and analysis and students will present and discuss
the results of their research projects. May be repeated. Prerequisite:
Permission of instructor.

LING 860. Seminar in Second Language Acquisition. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in
the study of second language acquisition. Prerequisite: LING 715 or
permission of instructor.

LING 899. Master's Research Project. 1-3 Credits.
A course for students working on their M.A. Research Project. Normally to
be taken during the semester in which the student is submitting the M.A.
Research Project. Students must enroll for at least one credit hour. Up to
three credits will count toward the minimum number of credits required for
the M.A. degree in linguistics.

LING 910. Linguistic Seminar: _____.
1-3 Credits.
The content and prerequisites of this course will vary. May be repeated.

LING 980. Linguistics Field Work. 3-6 Credits.
Independent field work with an informant on a language not normally
offered at the University of Kansas, or on a non-standard dialect of one
of the more accessible languages. Student must show evidence (file slips
for grammatical and phonological analysis, dictionary slips, etc.) of having
done the required amount of work without necessarily being able to turn
in a completed analysis. Normally for three credits; six credits would be
available under certain circumstances such as intensive summer work on
location away from the university. Graded on a satisfactory/unsatisfactory
basis. Prerequisite: LING 712 and LING 725.

LING 997. Ph.D. Examinations. 1-12 Credits.
A course for students writing answers to the preliminary Ph.D.
examination and/or preparing to take the Oral Comprehensive
Examination. Normally to be taken during the semester in which the
student is submitting answers to the written preliminary examination. May
be taken for a maximum of two semesters or twelve credits, whichever
comes first. Does not count toward the minimum number of credits
required for a graduate degree in linguistics. Graded on a satisfactory/
unsatisfactory basis.

LING 998. Independent Study. 1-12 Credits.
A special research project or directed readings in an area of linguistics not
covered in other courses. Prerequisite: Written consent of instructor.

LING 999. Doctoral Dissertation. 1-12 Credits.

Bachelor of Arts and Bachelor of General Studies in Linguistics

Why study Linguistics

Because language is the window into the mind. Linguistics provides an
understanding of the human capacity to acquire, perceive, and produce
language and of language's role in contemporary society.

B.A./B.G.S. Overview

The department offers a broad range of courses that provide a basic
understanding of human language and communication. Linguistics
courses examine features of language that underlie the human capacity
to express concepts and communicate ideas. The courses address
the connections between language, brain, culture, mind, and history.
The major gives students a basic understanding of the human capacity
to acquire, perceive, and produce language and of language's role in
contemporary society.

Linguistics is a superb preparation for careers that require expertise
in the use of language as a means of communication, e.g., business,
communications, personnel administration, teaching, health care, and
social service. Many majors pursue graduate study in education, law,
psychology, computer science, speech and hearing sciences, and
languages.

You can also combine your degree in Linguistics with a Global Awareness
Certification through the (http://gap.ku.edu/) Global Awareness Program
(GAP (http://gap.ku.edu/)) (https://gap.ku.edu). KU’s Global Awareness
Program (GAP) is an undergraduate certificate program in which you
can expand your cultural knowledge and navigate multiple perspectives.
GAP tracks your progress on the three components: Academic
(http://gap.ku.edu/Academic), On-Campus Activities with a global
focus (http://gap.ku.edu/co-curricular-activities/), and/or International
Experience (http://gap.ku.edu/international-experience/) (Two-out-of-
three components needed to earn the certificate.) Completion of the GAP
certificate appears on a student's official transcript. Please speak with the
Director of Undergraduate Studies, Dr. Fiorentino (fiorentino@ku.edu), if
you are interested in pursuing Global Awareness Program certification as part of your Linguistics degree.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. or B.G.S. Major

BA or BGS majors must complete the following requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

</table>

Major must complete one of the following courses (or a different LING course approved by Linguistics advisor):

- LING 308 Linguistic Analysis
- LING 320 Language in Culture and Society
- or LING 321 Language in Culture and Society, Honors
- LING 343 Bilingualism
- LING 370 Introduction to the Languages of Africa
- LING 447 North American Indian Languages
- LING 570 The Structure of Japanese
- LING 572 The Structure of Chinese
- LING 575 The Structure of: ____

Advanced Course (3 Credit Hours) 3

Major must complete one of the following courses (or LING Seminar with permission of instructor and approval by Linguistics advisor):

- LING 507 Phonetics II
- LING 514 Phonology II
- LING 516 Second Language Acquisition II
- LING 526 Syntax II
- LING 527 Morphology
- LING 531 Semantics
- LING 533 Psycholinguistics II
- LING 539 First Language Acquisition II
- LING 541 Field Methods in Linguistic Description
- LING 542 Neurolinguistics II

Capstone Experience (3 Credit Hours) 3

Majors must complete one capstone course:

- LING 420 Capstone: Research in Language Science
- or LING 421 Capstone: Typology-Unity and Diversity of Human Language

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:

Major Hours
Satisfied by 30 hours of major courses, or 33 hours required if completing departmental honors course LING 496.

Major Hours in Residence
Satisfied by a minimum of 24 junior/senior (300+) hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Linguistics can be found here: Linguistics (p. 1606), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Linguistics can be found here: Linguistics (p. 1607), or by using the left-side navigation.
Departmental Honors

The honors program allows exceptional undergraduate students to work closely with faculty members on a research project. To graduate with honors in linguistics, a student must complete all requirements for the linguistics major and LING 496 Honors Essay in Linguistics (usually taken in the fall semester of the senior year). The student must have a grade-point average of at least 3.5 in Linguistics courses. Consult the departmental honors coordinator or the director of undergraduate studies for information. Prospective honors candidates are encouraged to select a thesis topic and thesis director at the end of the junior year.

BA in Linguistics

Below is a sample 4-year plan for students pursuing the BA in Linguistics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. One course is required from a list of courses that satisfy the Acquisition & Processing requirement and the Analysis & Description requirement in the major. For a list of courses approved for each area, please review the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/linguistics/ba-bgs/#requirementstext) tab.
4. One course is required from a list of advanced courses. For a list of approved advanced courses, please review the degree requirements (https://catalog.ku.edu/liberal-arts-sciences/linguistics/ba-bgs/#requirementstext) tab.
5. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
Either LING 420 (Fall only course) or LING 421 (Spring only course) is required.

Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

## BGS in Linguistics

Below is a sample 4-year plan for students pursuing the BGS in Linguistics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

One course is required from a list of courses that satisfy the Acquisition requirement, Processing requirement, and Diversity requirement in the major. For a list of courses approved for each area, please review the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/linguistics/ba-bgs/#requirementstext) tab.

2 One course is required from a list of advanced courses. For a list of approved advanced courses, please review the degree requirements (https://catalog.ku.edu/liberal-arts-sciences/linguistics/ba-bgs/#requirementstext) tab.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

Minor Overview

The department offers a broad range of courses that provide a basic understanding of human language and communication. Linguistics courses examine features of language that underlie the human capacity to express concepts and communicate ideas. The courses address the connections between language, brain, culture, mind, and history. The minor gives students a basic understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

Linguistics is a superb preparation for careers that require expertise in the use of language as a means of communication, e.g., business, communications, personnel administration, teaching, health care, and social service. Many majors pursue graduate study in education, law, psychology, computer science, speech and hearing sciences, and languages.

You can also combine your degree in Linguistics with a Global Awareness Certification through the Global Awareness Program (GAP) (http://gap.ku.edu/). KU’s Global Awareness Program (GAP) is an undergraduate certificate program in which you can expand your cultural knowledge and navigate multiple perspectives. GAP tracks your progress on the three components: Academic (http://gap.ku.edu/Academic/), On-Campus Activities with a global focus (http://gap.ku.edu/co-curricular-activities/), and/or International Experience (http://gap.ku.edu/international-experience/) (Two-out-of-three components needed to earn the certificate.) Completion of the GAP certificate appears on a student’s official transcript. Please speak with the Director of Undergraduate Studies, Dr. Fiorentino (fiorentino@ku.edu), if you are interested in pursuing Global Awareness Program certification as part of your Linguistics degree.

Requirements for the Minor

Students can graduate with one of the two Linguistics tracks - either the General Linguistics Track or the Second Language Acquisition Track.

General Linguistics Track:

<table>

Total Hours: 18

Minor Hours & GPA

While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 12 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
Master of Arts in Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

M.A. Overview (https://linguistics.ku.edu/overview-2/)

Our M.A. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student’s research interests.

The M.A. program usually takes two years. Students in the M.A. program complete a written Research Proposal and an Oral Examination of the Research Proposal, typically in their fourth semester of study. Students are required to take an Advanced II-level course to develop their understanding of research in their area of interest.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants must submit a curriculum vitae, a statement of purpose, an official copy of transcript from baccalaureate granting institution and transcripts from institutions attended post-baccalaureate, 3 letters of recommendation, Graduate Record Examination scores, and a writing sample (optional). Non-native speakers of English must meet English proficiency requirements as described on the Graduate Admissions website (https://gradapply.ku.edu/english-requirements/).

Submit your graduate application online (https://gradapply.ku.edu/apply). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admissions (https://linguistics.ku.edu/admission/?tab2name) page of the department website, or contact the department's Graduate Program Coordinator, Corinna Johnson, cjohns@ku.edu.

M.A. Degree Requirements

The M.A. is structured as a 2 year program.

Degree Requirements

The following are minimum requirements.

Doctor of Philosophy in Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

Ph.D. Overview (https://linguistics.ku.edu/overview-1/)

Our Ph.D. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student’s research interests.

The Ph.D. program usually takes five years which includes completing an M.A. degree en route to the Ph.D. All Ph.D. students receive a five-year funding package.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants must submit a curriculum vitae, a statement of purpose, an official copy of transcript from baccalaureate granting institution and transcripts from institutions attended post-baccalaureate, 3 letters of recommendation, Graduate Record Examination scores, and a writing sample (optional). Non-native speakers of English must meet English proficiency requirements as described on the Graduate Admissions website (https://gradapply.ku.edu/english-requirements/).

Submit your graduate application online (https://gradapply.ku.edu/apply/). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admissions (https://linguistics.ku.edu/admission/#tab2name) page of the department website, or contact the department’s Graduate Program Coordinator, Corinna Johnson, cljohns@ku.edu.

Ph.D. Degree Requirements

The Ph.D. is structured as a five year program. Students will earn an M.A. en route to the Ph.D.

Research Skills

The university requires that every doctoral student have training in research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. One of the following courses with a grade of B or above fulfills the requirements for research skills:

1. A graduate-level (500 or above) course in statistics
2. A graduate-level (500 or above) course in a computer programming language
3. LING 720 Research Methods in Linguistics
4. LING 741 Field Methods in Linguistic Description
5. LING 782 Research Methods in Child Language

Responsible Scholarship

The university requires that every doctoral student have training in responsible scholarship pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. LING 794 Proseminar fulfills the requirements for responsible scholarship.

Minimum Course Requirements

57 credit hours consisting of 33 credit hours at the M.A. level and 24 hours at the Ph.D. level.

ELECTIVES (2 courses - 6 credit hours) to be determined by the student and the student’s advisor. One elective course (3 credit hours) must be taken from the Advanced II-Level course list or Linguistics Seminar course list. Electives are NOT to include LING 850, LING 851, LING 852, or LING 998. Research Seminar course (1 course - 3 credit hours) to be determined by the student and the student’s advisor. The course will include completion of a written research proposal and oral presentations.

LING 850  Topics in Research in Experimental Linguistics: _____
LING 851  Research in Language Acquisition and Processing
LING 852  Research in Field and Formal Linguistics
M.A. Research Project course (1 course - 3 credit hours) 3
LING 899  Master’s Research Project

**Advanced II-Level Courses:**

LING 707  Phonetics II
LING 714  Phonology II
LING 716  Second Language Acquisition II
LING 726  Syntax II
LING 727  Morphology
LING 731  Semantics
LING 737  Psycholinguistics II
LING 739  First Language Acquisition II
LING 742  Neurolinguistics II
LING 747  Neurolinguistics
LING 807  Seminar in Phonetics
LING 814  Seminar in Phonology
LING 822  Seminar in First Language Acquisition
LING 826  Seminar in Syntax
LING 831  Seminar in Semantics
LING 832  Seminar in Semantics
LING 837  Seminar in Psycholinguistics
LING 842  Seminar in Neurolinguistics
LING 850  Topics in Research in Experimental Linguistics: _____
LING 851  Research in Language Acquisition and Processing
LING 852  Research in Field and Formal Linguistics

**Research Presentation Requirement**

Students must give 1 research presentation each semester beginning in their second year of the program. For students who are just beginning their independent research projects, this presentation may involve the discussion of published research relevant to the student’s research interests. This requirement may be satisfied through a presentation in one of the empirical research seminars (LING 850, LING 851, LING 852), a presentation at a local, regional, or international conference, a presentation in the Linguistics colloquy series, or a presentation at any other relevant forum as determined by the faculty adviser. Students must include the titles and dates of these presentations in their annual report each year.

**M.A. Research Project for PhD Students**

The Master’s research project should consist of a detailed research proposal and include pilot results and/or preliminary analyses. Students in the Ph.D. program should be able to continue working on the project with the aim of submitting it as a qualifying paper for the Ph.D. program.

An M.A. candidate in residence who has begun work on a research project must enroll for at least 1 credit hour of LING 899 Master’s Research Project each semester (summer session excluded) until the thesis is completed.

The research project must be defended successfully in an oral examination. The oral exam is scheduled when all 3 committee members have indicated in writing their approval or disapproval of the research project for defense and at least 2 (including the chair) have approved scheduling the exam. The oral examination will typically last 1-2 hours.

Following the oral examination, the student's performance will be evaluated by the project committee and reported by a Progress-to-Degree form to Graduate Studies as the outcome of the Master’s oral examination. The committee will evaluate the M.A. research project with the following grades: 0-fail, 1-pass but cannot continue to the Ph.D. program, 2-pass and can continue to the Ph.D. program.

**Qualifying Papers**

The student needs to write 2 qualifying papers – a major paper in the area of specialization and a minor paper in a different area. Both papers should represent original work and both papers must have different advisers. The major paper may be an expanded version of the M.A. research project and should be of publishable quality. The minimum lengths of the major and minor papers are 25 pages and 15 pages, respectively.
The major and minor papers are developed in close consultation with an Advisory Committee (3 faculty members) and the 2 papers should be supervised by different faculty members. The adequacy of the papers is evaluated on the quality of the literature review, theoretical contribution, and research integration as well as the basis of their logical coherence and organization. The student does not need to orally defend the qualifying papers.

**Dissertation Proposal and the Oral Comprehensive Exam**

When the major and minor qualifying papers have been approved by the Advisory Committee, the student may form a Ph.D. committee (4 Department of Linguistics Graduate Faculty members, 1 Graduate Studies Representative member), which helps the student work on the dissertation, starting from the dissertation proposal. The proposal should clearly identify the research questions that the dissertation will address, include a comprehensive literature review, lay out the methodology for the research, discuss preliminary data and results, if any, and present a timetable for the dissertation research. The minimum length for the dissertation proposal is 10 pages.

The Oral Comprehensive Exam is the official exam required by Graduate Studies and consists of an oral defense of the dissertation proposal and the answering of any other questions related to the fields of study of the dissertation research. It must be completed the spring semester of the 4th year (at the latest). The oral examination will typically last 2 to 3 hours.

**Dissertation and Dissertation Defense**

The dissertation is developed in consultation with the Ph.D. committee. The dissertation must be orally defended in front of the Ph.D. committee. The student will be asked first to summarize his/her dissertation and evidence, and then will be questioned by the committee. The dissertation defense will typically last 1 to 2 hours.

**University Requirements**

Throughout the course of doctoral study, the student must fulfill all relevant College and University policies (http://coga.ku.edu/graduate-policies/), such as those concerning doctoral residency, time constraints, continuous post-comprehensive enrollment, human subjects review, electronic filing, and graduation.

**Department of Mathematics**

**Why study mathematics?**

Because mathematics is a framework upon which humanity builds an understanding of the world.

The mission of the Department of Mathematics is to create and teach mathematics, and to develop in all students the capacity to understand, discover, enjoy, and use mathematics.

This is a wide-ranging enterprise that involves:

- Enabling students to experience the value and power of mathematical reasoning;
- Providing for the specific mathematical needs of users of mathematics, e.g., in engineering, computer science, economics, physics, finance, education and other physical and social sciences;
- Providing statewide leadership in the mathematics education of all Kansans from K-12 through graduate school;
- Developing interdisciplinary research with other units which make extensive use of mathematics;
- Fostering a climate conducive to active faculty research and interaction with other departments.

The Mathematics Department offers two undergraduate degrees, a B.A. in Mathematics and a B.S. in Mathematics, as well as an Undergraduate Certificate in Actuarial Science. The B.A. has fewer mathematics course requirements and more general education requirements. The B.S. requires more mathematics courses, an applied mathematics concentration, and fewer general education courses. Students who wish to teach mathematics in high school should pursue a B.A. or B.S. in mathematics while participating in the UKanTeach program. The mathematics department offers two graduate degrees, an M.A. and a Ph.D., as well as a Certificate in Applied Mathematics.

**Undergraduate Programs**

**Placement**

Students who have not completed a college-level mathematics course should consult the Placement Table (see below) for Initial Enrollment in Mathematics. For information about the Early and Continuous Enrollment in Math requirement, see the CLAS Degree Requirements page (p. 752).

Students may also take the ALEKS Placement, Preparation and Learning Math assessment (http://math.ku.edu/what-aleks/) to determine their proper initial placement in mathematics courses. Students with college credit in mathematics should enroll according to the credit shown on their transcripts and the stated prerequisites for the courses.

**Courses for Nonmajors**

Students interested in mathematics as part of a background in the liberal arts should enroll in MATH 115, MATH 125, MATH 105, or MATH 365, and other courses according to their interests. Students preparing to use mathematics as a tool in another field should look at the requirements and recommendations of their schools or departments.

MATH 2 is considered a developmental course by all KU schools and is not counted in the minimum number of hours required for graduation.

**Placement Table for Initial Enrollment in Mathematics**

KU encourages all entering students to complete 4 years of mathematics in high school, including Algebra I and II, Geometry, Trigonometry, and Analytic Geometry, along the lines of the Kansas Board of Regents recommendations (https://admissions.ku.edu/freshman-requirements-deadlines/college-prep-curriculum/).

MATH 002

ACT: 0-15 or SAT: 0-450 or ALEKS: 0-29

KU does not offer a mathematics course below MATH 002. Although students with these scores are not prepared, they will be permitted to enroll in MATH 002. Before enrolling in MATH 002, these students are encouraged to prepare by self-study or by completing a beginning algebra course in high school or community college.

After their initial enrollment in mathematics, students must remain continuously enrolled until they have completed MATH 101 or MATH 104.

Preparation for Graduate Study

Students who plan to attend graduate school in the mathematical sciences should speak to an advisor about the best preparation, depending on their goals. Students planning to enter a general mathematics graduate program are encouraged to take MATH 765, MATH 766, MATH 790, and MATH 791. Some graduate degrees require a reading knowledge of French, German, or Russian.

Preparation for Graduate Study

Students who plan to attend graduate school in the mathematical sciences should speak to an advisor about the best preparation, depending on their goals. Students planning to enter a general mathematics graduate program are encouraged to take MATH 765, MATH 766, MATH 790, and MATH 791.

Graduate Programs

The department offers a graduate program leading to both the M.A. and Ph.D. degrees. A broad range of programs is possible in algebra, analysis, combinatorics, control theory, dynamical systems, geometry, numerical analysis, partial differential equations, probability and statistics.

The Department of Mathematics has a long tradition of excellence. The first Ph.D. granted at KU was in mathematics in the year 1895. Since then, the graduate program has been a central part of the department’s research and teaching mission and an important component of its long-term planning. The department’s commitment to graduate education has boosted its recent growth in size and enhanced its reputation. Prospective students are encouraged to read additional information (https://math.ku.edu/admission-graduate-program/) online.

Students who are interested in enrolling in graduate level coursework in the Department of Mathematics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (https://mathematics.ku.edu/admission-graduate-program/) webpage for further details.

Courses

MATH 2. Intermediate Mathematics. 3 Credits. U

Mathematics (primarily algebra) preparatory to MATH 101. Topics include: solving linear equations, inequalities, and system; solving quadratic, radical, and rational equations; and introduction to imaginary numbers. Qualification: Two years of high school college preparatory mathematics, algebra and geometry, and a score of 16 or more on ACT mathematics; or a qualifying score on the mathematics placement test. MATH 002 is the lowest level mathematics course offered at the University of Kansas, and does not count towards the 120 credit hours required for graduation. Students not prepared for MATH 101 will be permitted to enroll in MATH 002. However, before enrolling in MATH 002, such students are encouraged to prepare by self-study or by completing a beginning algebra course in high school, community college, or correspondence study.

MATH 101. College Algebra: Mn. 3 Credits. U

Coordinate systems, functions and their graphs; linear, quadratic, general polynomial, rational, exponential, and logarithmic functions; equations and inequalities; and linear and non-linear systems. Data Driven sections are intended for non-STEM majors and cover college algebra content with increased emphasis on context and interpretation of data, and decreased emphasis on symbolic manipulation. Enrollment in Enhanced sections will benefit students by providing additional instructional time and integrated review of some prerequisite material. Students in Enhanced sections must enroll in MATH 197 as a co-requisite. Not open to students with credit in MATH 104. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. Students with slightly lower ACT scores may be admitted to Enhanced sections based on high school GPA.

MATH 103. Trigonometry. 2 Credits. U

The circular functions and their applications. Not open to students with credit in MATH 104. May not be used to fulfill the College mathematics requirement. Prerequisite: MATH 101, or two years of high school algebra and a score of 26 or higher on enhanced ACT mathematics, or a qualifying score on the mathematics placement test.

MATH 104. Precalculus Mathematics. 5 Credits. U

An introduction to the elementary functions (polynomial, rational, exponential, logarithmic, and trigonometric) and their properties. Open for only two hours credit for students with credit in MATH 101. Not open to students with credit in MATH 103. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

MATH 105. Introductory Quantitative Reasoning. 3 Credits. N

This diverse course introduces students to foundational quantitative reasoning skills that will assist them throughout their college-level work and beyond. Topics may include logic and problem solving, personal finance, elementary statistics and data analysis, voting theory and fair division problems, basic linear programming, and network theory. Students taking this class will gain an appreciation for how mathematical thinking can be used in everyday decision making. Prerequisite: MATH 101 or MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

MATH 109. Mathematics for Elementary School Teachers I. 3 Credits. U

This course is designed to give the prospective elementary school teacher an overview of several components of the elementary school mathematics curriculum, including number systems, estimation, inequalities and order, sequences and patterns, sets, and relations and functions. The class meets each week for three one-hour instruction sessions and one two-hour laboratory session. This course may not be used to satisfy the College mathematics requirement. Prerequisite: MATH 101 or equivalent placement.

MATH 110. Mathematics for Elementary School Teachers II. 3 Credits. U

Continuation of MATH 109, including geometry (including transformations) and elementary probability and statistics. Class meets each week for three one-hour instruction sessions and one two-hour laboratory session.
This course does not serve as a prerequisite for any mathematics course. It may not be used to satisfy the College mathematics requirement. Prerequisite: MATH 109.

**MATH 115. Calculus I. 3 Credits. N**

Elementary differential and integral calculus, with applications in management and the biological sciences. Not open to students with credit in MATH 125 or MATH 145. Prerequisite: MATH 101 or MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

**MATH 116. Calculus II. 3 Credits. NM N**

Continuation of MATH 115 including exponential, logarithmic, and trigonometric functions, techniques of integration, and the calculus of functions of several variables. Not open to students with credit in MATH 127 or MATH 147. Prerequisite: MATH 115 plus a course in trigonometry, or MATH 125 or MATH 145. MATH 103 may be taken concurrently.

**MATH 125. Calculus I. 4 Credits. N**

Limits, continuity and derivatives of algebraic, trigonometric, exponential and logarithmic functions. Curve sketching, optimization and other applications of the derivative. Antiderivatives, Riemann sums, the definite integral, and the fundamental theorem of calculus. Open for only 1 hour credit to students with credit in MATH 115. Not open for credit to students with credit in MATH 116 or MATH 145. Prerequisite: MATH 103 or MATH 104, with a grade of C- or higher; or 3 years of college preparatory mathematics including trigonometry, with a score of 28 or higher on the ACT Mathematics exam.

**MATH 126. Calculus II. 4 Credits. N**

Techniques of integration, including integration by parts. Applications of integration, including volume, arc length, work and average value. Infinite sequences and series and Taylor series. Polar coordinates, vectors and the geometry of space. Open for only 2 hours of credit to students with credit in MATH 116. Not open for credit to students with credit in MATH 116 or MATH 145. Prerequisite: MATH 116, MATH 125, or MATH 145, with a grade of C- or higher.

**MATH 127. Calculus III. 4 Credits. N**

Multivariable functions, partial derivatives and their applications, multiple integrals and their applications. Vector-valued functions, line and surface integrals, Green, Gauss and Stokes Theorems. Not open for credit to students with credit in MATH 147. Prerequisite: MATH 126 or MATH 146, with a grade of C- or higher.

**MATH 145. Calculus I, Honors. 4 Credits. NM N**

Limits, continuity and derivatives of algebraic, trigonometric, exponential and logarithmic functions. Curve sketching, optimization and other applications of the derivative. Antiderivatives, Riemann sums, the definite integral, and the fundamental theorem of calculus. Open for only 1 hour credit to students with credit in MATH 115. Not open for credit to students with credit in MATH 116 or MATH 125. Prerequisite: An ACT Math score of 34 or higher, or membership in the University Honors Program and an ACT Math score of 32 or higher.

**MATH 146. Calculus II, Honors. 4 Credits. N**

Techniques of integration, including integration by parts. Applications of integration, including volume, arc length, work and average value. Infinite sequences and series and Taylor series. Polar coordinates, vectors and the geometry of space. Open for only 2 hours credit to students with credit in MATH 116. Not open for credit to students with credit in MATH 126. Prerequisite: MATH 125, or MATH 145, with a grade of C- or higher; and invitation of the Department of Mathematics.

**MATH 147. Calculus III, Honors. 4 Credits. N**

Multivariable functions, partial derivatives and their applications, multiple integrals and their applications. Vector-valued functions, line and surface integrals, Green, Gauss and Stokes Theorems. Not open for credit to students with credit in MATH 127. Prerequisite: MATH 126 or MATH 146, with a grade of C- or higher; and invitation of the Department of Mathematics.

**MATH 177. First Year Seminar: _____ 3 Credits. NM**

A limited-enrollment, seminar course for first-time freshmen, organized around current issues in math. May not contribute to major requirements in math. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**MATH 197. Mathematical Workshops: _____ 1-3 Credits. U**

Offered to provide opportunities for deeper understanding of freshman-sophomore mathematics through interactive learning. Topics will vary. May be repeated for additional credit. Prerequisite: Variable.

**MATH 209. Functions and Modeling. 3 Credits. N**

Study of the use of functions in mathematical modeling, with topics drawn from algebra, analytic geometry, statistics, trigonometry, and calculus. These topics include function properties and patterns, complex numbers, parametric and polar equations, vectors and various growth models. The course also includes inquiry methods, collaborative problem solving, the use of multiple representations and data analysis techniques, and the justification and presentation of results. Central to the course are investigative labs employing various technologies and software. The course is designed to help prepare students for secondary school mathematics teaching. (Same as PHSX 209.) Prerequisite: MATH 126 or MATH 146.

**MATH 220. Applied Differential Equations. 3 Credits. N**

Linear ordinary differential equations, Laplace transforms, systems of equations, and applications. Not open to those who have taken MATH 320. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher; previous or concurrent enrollment in MATH 290 or MATH 291 recommended.

**MATH 221. Applied Differential Equations, Honors. 3 Credits. N**

Linear Ordinary Differential Equations, Laplace Transforms, Systems of Equations, Enrichment Applications. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher, and invitation from the Department of Mathematics; previous or concurrent enrollment in MATH 290 or MATH 291 recommended. Not open to students with credit in MATH 320.

**MATH 290. Elementary Linear Algebra. 2 Credits. N**

Systems of linear equations, matrices, vector spaces, linear transformations, and applications. Not open to those who have taken MATH 590. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher.

**MATH 291. Elementary Linear Algebra, Honors. 2 Credits. N**

Systems of Linear Equations, Matrices, Vector Spaces, Linear Transformations, Enrichment Applications. Prerequisite: MATH 126 or MATH 146 with a grade of C- or higher, and invitation from the Department of Mathematics. Not open to students who have taken MATH 590.

**MATH 296. Special Topics: _____ 1-3 Credits. N**

Designed for the study of special topics in mathematics at the freshman/sophomore level. May be repeated for additional credit; does not count toward the major or minor in mathematics. Prerequisite: Variable.

**MATH 320. Elementary Differential Equations. 3 Credits. N**

Linear ordinary differential equations, series solutions. Laplace transforms. Systems of equations. Not open to those who have taken
MATH 220. Prerequisite: MATH 127 or MATH 147 with a grade of C- or higher, and MATH 290 or MATH 291.

MATH 365. Elementary Statistics. 3 Credits. N
Elementary descriptive statistics of a sample of measurements; probability; the binomial, Poisson, and normal distributions, populations and sampling from populations; simple problems of statistical inference. May not be counted for junior-senior credit toward a major in mathematics. Not open to students with credit in DSCI 202, BIOL 570, MATH 465, MATH 526, or MATH 628. Prerequisite: MATH 101, MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

MATH 409. Topics in Geometry for Secondary and Middle School Teachers. 2 Credits. N
Study of selected topics from Euclidean, non-Euclidean, and transformation geometry chosen to give breadth to the mathematical background of secondary and middle school teachers. May not be counted for junior-senior credit towards a major in mathematics. Prerequisite: MATH 126 or MATH 146. Students enrolled in MATH 409 must concurrently enroll in MATH 410.

MATH 410. Topics in History of Mathematics for Secondary and Middle School Teachers. 1 Credits. N
Study of selected topics from mathematical history chosen to provide students with knowledge of major historical developments in mathematics including individual contributions and contributions from different cultures. These topics will include a historical development of Euclidean and non-Euclidean geometry. May not be counted for junior-senior credit towards a major in mathematics. Prerequisite: MATH 126 or MATH 146. Students enrolled in MATH 410 must concurrently enroll in MATH 409.

MATH 450. Discrete Mathematics. 3 Credits. N
Basic topics in discrete mathematics including sets, logic, relations and functions, graphs and combinatorics. Advanced topics chosen from partially ordered sets and lattices, Boolean algebras, automata, game theory, coding theory, cryptography, optimization and enumeration. Prerequisite: MATH 290.

MATH 500. Intermediate Analysis. 3 Credits. N
A careful formulation of convergence and limits of sequences and functions; continuity and properties of continuous functions; differentiation; the Riemann integral; mean-value theorems and the fundamental theorem of calculus. Not open to students with credit in MATH 765. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

MATH 510. Introduction to the Theory of Computing. 3 Credits. N
Finite state automata and regular expressions. Context-free grammars and pushdown automata. Turing machines. Models of computable functions and undecidable problems. The course emphasis is on the theory of computability, especially on showing limits of computation. (Same as EECS 510.) Prerequisite: EECS 210 and upper-level EECS eligibility.

MATH 526. Applied Mathematical Statistics I. 3 Credits. NM N
A first course in statistics for students with the techniques of calculus at their disposal. The following topics are studied with illustrations and problems drawn from various fields of applications: basic notions of probability and probability distributions; classical estimation and testing procedures for one and two sample problems; chi-square test. Not open to those with credit in MATH 628. Prerequisite: MATH 127 or MATH 147 or MATH 116 (MATH 127 or MATH 147 recommended.)

MATH 530. Mathematical Models. 3 Credits. N
An introduction to mathematical models useful in a large variety of scientific and technical endeavors. Topics include: model construction, Markov chain models, models for linear optimization, graphs as models, and game theory. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

MATH 540. Elementary Number Theory. 3 Credits. N
Divisibility, primes and their distribution, the Euclidean algorithm, perfect numbers, Fermat's theorem, Diophantine equations, applications to cryptography. Prerequisite: MATH 127 or MATH 147.

MATH 542. Vector Analysis. 2 Credits. N
Vector algebra; vector and scalar fields; line and surface integrals; theorems of Gauss, Green, and Stokes. Curvilinear coordinates. Applications. Introduction to tensor analysis. Not open to those with credit in MATH 143. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

MATH 558. Introductory Modern Algebra. 3 Credits. N
Development of the number systems. Polynomials. Introduction to abstract number systems such as groups and fields. Not open to students with credit in MATH 791. Prerequisite: MATH 290 or MATH 291.

MATH 559. Modern Geometries. 3 Credits. N
Selected topics in Euclidean geometry. Synthetic and analytic projective geometry; duality, Desargues' theorem, perspectives, conics. Non-Euclidean and metric projective geometries. Prerequisite: MATH 127 or MATH 147.

MATH 581. Numerical Methods. 3 Credits. N
An introduction to numerical methods and their application to engineering and science problems. Applied treatment of elementary algorithms selected from the subject areas: finding roots of a single nonlinear equation, numerical differentiation and integration, numerical solution of ordinary differential equations. Emphasis on implementing numerical algorithms using the computer. Not open to students with credit in MATH 781 or MATH 782. Prerequisite: MATH 220 and MATH 290, or MATH 320.

MATH 582. Computational Data Science. 3 Credits. N
This course provides an introduction to topics in data science and machine learning with an emphasis on computation and applications. Programming for the course uses the student's choice of Matlab, Python, or R. Topics covered include dimension reduction, regression techniques, density estimation, machine learning, data assimilation, and clustering and classification techniques. Prerequisite: MATH 290 or equivalent.

MATH 590. Linear Algebra. 3 Credits. N
Vector spaces, linear transformations, and matrices. Canonical forms, Determinants. Hermitian, unitary and normal transformations. Not open to those with credit in MATH 791. Prerequisite: MATH 290 or MATH 291.

MATH 591. Applied Numerical Linear Algebra. 3 Credits. N
An introduction to numerical linear algebra. Possible topics include: applied canonical forms, matrix factorizations, perturbation theory, systems of linear equations, linear least squares, singular value decomposition, algebraic eigenvalue problems, matrix functions, and the use of computational software. Not open to students with credit in MATH 782. Prerequisite: MATH 290 or MATH 291. EECS 138 or equivalent recommended.

MATH 596. Special Topics: 1-3 Credits. N
Arranged as needed to present appropriate material to groups of students. May be repeated for additional credit. Prerequisite: Variable.

MATH 597. Special Topics, Honors: 1-3 Credits. N
A study of a specialized topic in mathematics. May be repeated for credit when the topic varies. Prerequisite: A previous Honors course in
Mathematics or permission of instructor. Other prerequisites depending on topic possible.

**MATH 601. Algebraic Topics in Computing**: 3 Credits. N
Topics motivated by applications in computer science, studied from a mathematical perspective, and based on methods from linear and abstract algebra. Examples of topics include error-correcting codes, cryptography, and computer algebra. May be repeated with different topics for additional credit. Prerequisite: MATH 290 or MATH 291.

**MATH 605. Applied Regression Analysis**: 3 Credits. N
This course provides an introduction to regression analysis and statistical learning with an emphasis on mathematical understanding and its software implementation. Programming uses Python, R, or Julia. Covered topics include the following. Linear regression: parameter estimation, confidence ellipsoids and prediction intervals, hypothesis tests. Classification: logistic regression, linear discriminant analysis. Basis expansion: polynomial regression, regression splines. Resampling methods: cross-validation, bootstrap. Shrinkage methods. Model selection: information criteria, forward and backward selection, lasso. Decision trees and random forests: bagging, boosting. Prerequisite: MATH 290 or MATH 291, and MATH 526 or MATH 628.

**MATH 608. Statistical Data Science**: 3 Credits. N
This course provides an introduction to main statistical concepts in data science with an emphasis on mathematical understanding and its software implementation. Programming uses Python or Julia. Covered statistical models include linear regression and linear classification for high-dimensional problems; support vector machines and flexible discriminants; Bayesian learning and the EM algorithm; Monte Carlo methods; probabilistic graphical models; unsupervised learning. Prerequisite: A calculus-based statistics course (MATH 628 or MATH 526) and a linear algebra course (MATH 290 or MATH 291). Recommended: EECS 138 or equivalent experience.

**MATH 611. Time Series Analysis**: 3 Credits. N
This course provides an introduction to time series analysis with an emphasis on mathematical understanding and its software implementation. Programming uses Python or Julia. Covered topics include the following. Modeling time series, trend, seasonality and residual process. Autocovariance function, multivariate time series, moving average and autoregression. Stationary processes, linear processes, linear filtering. Confidence intervals for the mean and the autocorrelation, hypothesis tests for a time series model. ARMA models, partial autocorrelation function, parameter estimation methods, forecasting, model selection. Stationary processes in the frequency domain, spectral density, periodogram, smoothing, spectral window. Nonstationary time series, ARIMA models. State-space representation, Kalman recursions. Recurrent neural networks as time allows. Prerequisite: MATH 290 or MATH 291, and MATH 526 or MATH 628.

**MATH 624. Discrete Probability**: 3 Credits. N
Theory and applications of discrete probability models. Elementary combinatorial analysis, random walks, urn models, occupancy problems, and the binomial and Poisson distributions. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

**MATH 627. Probability**: 3 Credits. N
Introduction to mathematical probability; combinatorial analysis; the binomial, Poisson, and normal distributions; limit theorems; laws of large numbers. Prerequisite: MATH 127 or MATH 147 and MATH 290 or MATH 291.

**MATH 628. Mathematical Theory of Statistics**: 3 Credits. N
An introduction to sampling theory and statistical inference; special distributions; and other topics. Prerequisite: MATH 267.

**MATH 630. Actuarial Mathematics**: 3 Credits. N
This course is an introduction to some of the notions and computations in actuarial mathematics. Many computations are associated with compound interest with applications to bank accounts, mortgages, pensions, bonds, and annuities. Life contingencies are considered for annuities and insurance. Some introduction to option pricing is given, particularly the Black-Scholes formula. This course provides the background material needed for some of the initial examinations given by the societies for actuaries, including the Financial Mathematics Exam. Prerequisite: MATH 526 or MATH 627 or a comparable course in probability.

**MATH 646. Complex Variable and Applications**: 3 Credits. N
Analytic functions of a complex variable, infinite series in the complex plane, theory of residues, conformal mapping and applications. Prerequisite: MATH 127 or MATH 147.

**MATH 647. Applied Partial Differential Equations**: 3 Credits. N
Boundary value problems; topics on partial differentiation; theory of characteristic curves; partial differential equations of mathematical physics. Prerequisite: MATH 127 or MATH 147 and MATH 220 or MATH 221 or MATH 320.

**MATH 648. Calculus of Variations and Integral Equations**: 3 Credits. N
Topics in the calculus of variations, integral equations, and applications. Prerequisite: MATH 127 or MATH 147 and MATH 220 or MATH 221 or MATH 320.

**MATH 650. Nonlinear Dynamical Systems**: 3 Credits. N
This course provides an introduction to nonlinear ordinary differential equations and dynamical systems theory with an emphasis on applications. Topics covered include the existence and uniqueness of solutions to initial value problems, as well as the qualitative behavior of solutions, including existence of equilibria, periodic and connecting orbits and their stability. Additional topics include an introduction to bifurcation theory and chaos. Prerequisite: MATH 127 or MATH 147, and MATH 220 or MATH 221 or MATH 320, and MATH 290 or MATH 291.

**MATH 660. Geometry I**: 3 Credits. N
An introduction to modern geometry. Differential geometry of curves and surfaces, the topological classification of closed surfaces, dynamical systems, and knots and their polynomials. Other topics as time permits. Prerequisite: MATH 127 or MATH 147 and MATH 290 or MATH 291.

**MATH 661. Geometry II**: 3 Credits. N
Continuation of Math 660. Prerequisite: MATH 660 or permission of instructor.

**MATH 696. Special Topics**: 1-3 Credits. N
Arranged as needed to present appropriate material to groups of students. May be repeated for additional credit. Prerequisite: Variable.

**MATH 699. Directed Reading**: 1-3 Credits. N
Directed reading on a topic chosen by the student with the advice of an instructor. May be repeated for additional credit. Consent of the department required for enrollment.

**MATH 724. Combinatorial Mathematics**: 3 Credits. N
An introduction to enumerative combinatorics. Topics include basic counting principles, induction and recursion, graph theory, partitions and compositions, generating functions, inclusion/exclusion, and Polya-Redfield theory. Prerequisite: MATH 290 or MATH 291 and a MATH course numbered 450 or higher.

**MATH 725. Graph Theory**: 3 Credits.
Graphs; trees; connectivity; Menger's theorem; eulerian and hamiltonian graphs; planarity; coloring of graphs; factorization of graphs; matching theory; alternating chain methods; introduction to matroids with
applications to graph theory. Prerequisite: MATH 290 and a math course numbered 450 or higher.

MATH 727. Probability Theory. 3 Credits.
A mathematical introduction to premeasure-theoretic probability. Topics include probability spaces, conditional probabilities and independent events, random variables and probability distributions, special discrete and continuous distributions with emphasis on parametric families used in applications, the distribution problem for functions of random variables, sequences of independent random variables, laws of large numbers, and the central limit theorem. Prerequisite: MATH 290, or equivalent.

MATH 728. Statistical Theory. 3 Credits.
Theory of point estimation and hypothesis testing with applications. Confidence region methodologies and relations to estimation and testing. Prerequisite: MATH 727 or equivalent.

MATH 750. Stochastic Adaptive Control. 3 Credits.
Stochastic adaptive control methods. Stochastic processes such as Markov chains and Brownian motion, stochastic integral, differential rule, stochastic differential equations, martingales and estimation techniques. Identification and control of discrete and continuous time linear stochastic systems. Specific applications and simulation results of stochastic adaptive control theory. Prerequisite: MATH 627 and some knowledge of control.

MATH 765. Mathematical Analysis I. 3 Credits.
MATH 765 and MATH 766 are theoretical courses on the fundamental concepts of analysis and the methods of proof. These two courses include the concept of a real number; limits, continuity, and uniform convergence; derivatives and integrals of functions of one and of several real variables. Prerequisite: MATH 290, or equivalent.

MATH 766. Mathematical Analysis II. 3 Credits.
A continuation of MATH 765. Prerequisite: MATH 765.

MATH 781. Numerical Analysis I. 3 Credits.
Finite and divided differences. Interpolation, numerical differentiation, and integration. Gaussian quadrature. Numerical integration of ordinary differential equations. Curve fitting. (Same as EECS 781.) Prerequisite: MATH 320 and knowledge of a programming language.

MATH 782. Numerical Analysis II. 3 Credits.

MATH 783. Applied Numerical Methods for Partial Differential Equations. 3 Credits.
Finite difference methods applied to particular initial-value problems (both parabolic and hyperbolic), to illustrate the concepts of convergence and stability and to provide a background for treating more complicated problems arising in engineering and physics. Finite difference methods for elliptic boundary-value problems, with a discussion of convergence and methods for solving the resulting algebraic system. Variational methods for elliptic problems. Prerequisite: MATH 647 or equivalent.

MATH 790. Linear Algebra II. 3 Credits.
A theoretical course on the fundamental concepts and theorems of linear algebra. Topics covered are: vector space, basis, dimension, subspace, norm, inner product, Banach space, Hilbert space, orthonormal basis, positive definite matrix, minimal polynomial, diagonalization and other canonical forms, Cayley-Hamilton, spectral radius, dual space, quotient space. Prerequisite: MATH 590.

MATH 791. Modern Algebra. 3 Credits.
This course includes the following topics: multiplicative properties of the integers and introductions to group theory, ring theory and field theory. Prerequisite: MATH 290, or equivalent.

MATH 796. Special Topics: ______. 1-3 Credits.
Arranged as needed to present appropriate material for groups of students. May be repeated for credit. Prerequisite: Variable.

MATH 799. Directed Readings. 1-3 Credits.
Directed readings on a topic chosen by the student with the advice of an instructor. May be repeated for additional credit. Consent of the department required for enrollment.

MATH 800. Complex Analysis I. 3 Credits.
Cauchy's theorem and contour integration; the argument principle; maximum modulus principle; Schwarz symmetry principle; analytic continuation; monodromy theorem; applications to the gamma function and Riemann's zeta function; entire and meromorphic functions; conformal mapping; Riemann mapping theorem; univalent functions. Prerequisite: MATH 766 or concurrently with MATH 766.

MATH 802. Set Theory. 3 Credits.
Axiomatic set theory; transfinite induction; regularity and choice; ordinal and cardinal arithmetic; miscellaneous additional topics (e.g., extra axioms such as GCH or MA; infinite combinatorics; large cardinals).
Prerequisite: MATH 765 or MATH 791, or concurrent enrollment in MATH 765 or MATH 791, or equivalent evidence of mathematical maturity.

MATH 810. Real Analysis and Measure Theory I. 3 Credits.

MATH 811. Real Analysis and Measure Theory II. 3 Credits.
Continuation of MATH 810. Prerequisite: MATH 810.

MATH 820. Introduction to Topology. 3 Credits.
General topology. Set theory; topological spaces; connected sets; continuous functions; generalized convergence; product and quotient spaces; embedding in cubes; metric spaces and metrization; compact spaces; function spaces. Prerequisite: MATH 765.

MATH 821. Algebraic Topology I. 3 Credits.
The fundamental group and covering spaces (including classification); compact surfaces; homology theory, computations (including homotopy invariance) and applications (including Brouwer fixed point theorem); introduction to cohomology theory. Prerequisite: MATH 790 and MATH 791 and MATH 820, or permission of instructor.

MATH 824. Algebraic Combinatorics. 3 Credits.
An introduction to the fundamental structures and methods of modern algebraic combinatorics. Topics include partially ordered sets and lattices, matroids, simplicial complexes, polytopes, hyperplane arrangements, partitions and tableaux, and symmetric functions. Prerequisite: MATH 724 and MATH 791, or permission of the instructor.

MATH 830. Abstract Algebra. 3 Credits.
This is an introductory course covering the basics of module theory over commutative rings. Topics include quotient modules and module homomorphisms; direct sums and free modules; tensor products of modules and exact sequences; projective, injective, and flat modules; direct and inverse limits of modules; the theory of modules over principal ideal domains, and normal forms; graded rings and modules. Prerequisite: MATH 790 and MATH 791.

MATH 831. Abstract Algebra II. 3 Credits.
This course covers foundational topics in commutative algebra not covered in MATH 830. Potential topics include integral extensions, lying over and going-up; normal rings and going-down; Noether normalization, and dimension theory for finitely generated algebras over a field; chain conditions, and Noetherian and Artinian rings and modules; local rings and Nakayama’s Lemma; rings of formal power series; completion and flatness; primary decomposition and associated primes; affine algebraic varieties and Hilbert’s Nullstellensatz; the prime spectrum of a ring and the Zariski topology. Prerequisite: MATH 830.

MATH 840. Differentiable Manifolds. 3 Credits.
Multilinear algebra of finite dimensional vector spaces over fields; differentiable structures and tangent and tensor bundles; differentiable mappings and differentials; exterior differential forms; curves and surfaces as differentiable manifolds; affine connections and covariant differentiation; Riemannian manifolds. Prerequisite: MATH 765 and MATH 790.

MATH 850. Differential Equations and Dynamical Systems. 3 Credits.
Discrete and differentiable dynamical systems with an emphasis on the qualitative theory. Topics to be covered include review of linear systems, existence and uniqueness theorems, flows and discrete dynamical systems, linearization (Hartman-Grobman theorem), stable and unstable manifolds, Poincare sections, normal forms, Hamiltonian systems, and an introduction to bifurcation theory and chaos. Prerequisite: MATH 320 and MATH 766, or permission of instructor.

MATH 851. Topics in Dynamical Systems: _____ . 3 Credits.
Topics to be covered include complex dynamical systems, perturbation theory, nonlinear analysis of time series, chaotic dynamical systems, and numerical methods as dynamical systems. Topics may vary. Course may be repeated if topic varies. Prerequisite: MATH 850 or permission of instructor.

MATH 865. Stochastic Processes I. 3 Credits.
Markov chains; Markov processes; diffusion processes; stationary processes. Emphasis is placed on applications: random walks; branching theory; Brownian motion; Poisson process; birth and death processes. Prerequisite: MATH 627 and MATH 765.

MATH 866. Stochastic Processes II. 3 Credits.
This is a second course in stochastic processes, focused on stochastic calculus with respect to a large class of semi-martingales and its applications to topics selected from classical analysis (linear PDE), finance, engineering, and statistics. The course will start with basic properties of martingales and random walks and then develop into the core program on Itô’s stochastic calculus and stochastic differential equations. These techniques provide useful and important tools and models in many pure and applied areas. Prerequisite: MATH 727 and MATH 865.

MATH 874. Statistical Decision Theory. 3 Credits.
Game theory, admissible decision functions and complete class theorems; Bayes and minimax solutions; sufficiency; invariance; multiple decision problems; sequential decision problems. Prerequisite: MATH 628 and MATH 766.

MATH 881. Topics in Advanced Numerical Linear Algebra: _____ . 3 Credits.
Advanced topics in numerical linear algebra including pseudo-spectra, rounding error analysis and perturbation theory, numerical methods for problems with special structure, and numerical methods for large scale problems. Topics may vary. Course may be repeated if topic varies. Prerequisite: MATH 781, MATH 782, MATH 790, or permission of the instructor.

MATH 882. Topics in Advanced Numerical Differential Equations: _____ . 3 Credits.
Advanced course in the numerical solution of ordinary and partial differential equations including modern numerical methods and the associated analysis. Topics may vary. Course may be repeated if topic varies. Prerequisite: MATH 781, MATH 782, MATH 783, or permission of the instructor.

MATH 890. Fourier Analysis. 3 Credits.
Introduction to modern techniques in Fourier Analysis in the Euclidean setting with emphasis in the study of functions spaces and operators acting on them. Topics may vary from year to year and include, among others, distribution theory, Sobolev spaces, estimates for fractional integrals and fractional derivatives, wavelets, and some elements of Calderón-Zygmund theory. Applications in other areas of mathematics, in particular partial differential equations and signal analysis, will be presented based on the instructor’s and the students’ interests. Prerequisite: MATH 810 and MATH 800, or instructor’s permission.

MATH 896. Master’s Research Component. 1-6 Credits.

MATH 899. Master’s Thesis. 1-10 Credits.

MATH 910. Algebraic Curves. 3 Credits.
Algebraic sets, varieties, plane curves, morphisms and rational maps, resolution of singularities, Reimann-Roch theorem. Prerequisite: MATH 790 and MATH 791.

MATH 920. Lie Groups and Lie Algebras. 3 Credits.
General properties of Lie groups, closed subgroups, one-parameter subgroups, homogeneous spaces, Lie bracket, Lie algebras, exponential map, structure of semi-simple Lie algebras, invariant forms, Maurer-Cartan equation, covering groups, spinor groups. Prerequisite: MATH 766 and MATH 790 and MATH 791.

MATH 940. Advanced Probability. 3 Credits.
Probability measures, random variables, distribution functions, characteristic functions, types of convergence, central limit theorem. Laws of large numbers and other limit theorems. Conditional probability, Markov processes, and other topics in the theory of stochastic processes. Prerequisite: MATH 810.

MATH 950. Partial Differential Equations. 3 Credits.
Introduction; equations of mathematical physics; classification of linear equations and systems. Existence and uniqueness problems for elliptic, parabolic, and hyperbolic equations. Eigenvalue problems for elliptic operators; numerical methods. Prerequisite: MATH 766.

MATH 951. Topics in Advanced Partial Differential Equations II: _____ . 3 Credits.
The course uses functional analytic techniques to further develop various aspects of the modern framework of linear and nonlinear partial differential equations. Sobolev spaces, distributions and operator theory are used in the treatment of linear second-order elliptic, parabolic, and hyperbolic equations. In particular we discuss the kind of potential, diffusion and wave equations that arise in inhomogeneous media, with an emphasis on the solvability of equations with different initial/boundary conditions. Then, we will survey the theory of semigroup of operators, which is one of the main tools in the study of the long-time behavior of solutions to nonlinear PDE. The theories and applications encountered in this course will create a strong foundation for studying nonlinear equations and nonlinear science in general. Topics may vary. Course may be repeated if topic varies. Prerequisite: MATH 950 or permission of the instructor.

MATH 960. Functional Analysis. 3 Credits.

MATH 961. Topics in Functional Analysis: ______. 3 Credits.
Continuation of MATH 960. Topics may vary. Course may be repeated if topic varies.

MATH 990. Seminar: ______. 1-10 Credits.

MATH 993. Readings in Mathematics. 1-10 Credits.

MATH 996. Special Topics: ______. 3 Credits.
Advanced courses on special topics; given as need arises. Prerequisite: Variable.

MATH 999. Doctoral Dissertation. 1-10 Credits.

Bachelor of Arts in Mathematics

Why study mathematics?

Because mathematics is a framework upon which humanity builds an understanding of the world.

The degree of Bachelor of Arts in Mathematics offers in depth training in mathematics. A B.A. degree in mathematics at KU allows you to focus on the mathematics that is most relevant and interesting to you. A total of 120 hours is required to graduate with a B.A. in the College of Liberal Arts and Sciences. The requirements for all students earning a B.A. in the College include the KU Core Curriculum (http://kucore.ku.edu), a laboratory or field experience, and proficiency in a language other than English.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Mathematics Programs

Separate programs lead to the B.A. in mathematics and the B.S. in mathematics. The B.A. has fewer mathematics course requirements and more general education requirements. The B.S. requires more mathematics courses, an applied mathematics concentration, and fewer general education courses. Students wishing to attend graduate school in mathematics or to pursue a career that makes substantial use of mathematics (as an actuary, for example) should get a B.S. in mathematics. Many students majoring in mathematics are interested in a liberal arts degree; such students may want to consider the B.A. in mathematics. Students who wish to teach mathematics in high school should pursue a B.A. or B.S. in mathematics while participating in the UKanTeach program (http://ukanteach.ku.edu/).

Math Breadth

Majors must complete a minimum of 5 mathematics courses numbered 300 and above (each at least 3 credits), excluding MATH 365, MATH 409 and MATH 410, but including the upper division courses used to satisfy the core and sequence requirements. The goals are to gain exposure to a variety of concepts and methods in mathematics, develop abstract and critical thinking, and acquire knowledge to prepare for a career using mathematics, further study of mathematics, or interdisciplinary work involving mathematics.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 29 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Mathematics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 prior to freshman year, fall semester.

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Majors must complete a 2-course sequence (http://catalog.ku.edu/liberal-arts-sciences/math/ba/#requirementstext). Courses selected to fulfill other major requirements, may also contribute to the minimum of 6 hours for the sequence. Additional options to satisfy Goal 6 includes MATH 699 or an approved core goal 6 elective.

3. Completion of four upper division mathematics courses that form two sequences in mathematics and statistics can fulfill KU Core Goal 6.

4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

For undergraduate departmental honors, the student must satisfy the College requirements for honors, attain a grade-point average of 3.5 in all mathematics courses numbered 500 and above. The student must also complete two out of the following four sequences: MATH 727 and MATH 728; MATH 765 and MATH 766; MATH 781 and MATH 782; and MATH 790 and MATH 791, with a grade no lower than B- in each of these courses. The student must make a satisfactory oral presentation to the department, preferably on a topic related to his or her mathematics course work. Preparation should include enrollment in MATH 699 Directed Reading (for 1 or more credit hours) with a faculty mentor.

### Bachelor of Science in Mathematics

#### Why study mathematics?

Because mathematics is a framework upon which humanity builds an understanding of the world.

The degree of Bachelor of Science in Mathematics offers more extensive training in mathematics and its applications than is possible in the B.A. curriculum. The requirements for the B.S. in Mathematics allow a great deal of flexibility in choice of courses and concentrations. Students should plan their programs carefully to meet individual interests and goals, and carefully check the prerequisites for all courses in their programs.

Many students have strong interests in particular areas of mathematics. The Department has created three informal tracks within the B.S. program: a statistics track, an applied mathematics track, and a track in pure mathematics. These tracks are advisory only. Students without strong interests in one of these areas are encouraged to put together a broad program within the B.S. Degree.
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Mathematics Programs

Separate programs lead to the B.A. in mathematics and the B.S. in mathematics. The B.A. has fewer mathematics course requirements and more general education requirements. The B.S. requires more mathematics courses, an applied mathematics concentration, and fewer general education courses. Students wishing to attend graduate school in mathematics or to pursue a career that makes substantial use of mathematics (as an actuary, for example) should get a B.S. in mathematics. Many students majoring in mathematics are interested in a liberal arts degree; such students may want to consider the B.A. in mathematics. Students who wish to teach mathematics in high school should pursue a B.A. or B.S. in mathematics while participating in the UKanTeach program (http://ukanteach.ku.edu/).

### Notes:

A student using at least 2 statistics courses for the applied concentration must complete MATH 627 and MATH 628 (or MATH 727 and MATH 728) as a List A sequence. (MATH 627, MATH 628, MATH 727, and MATH 728 do not count for the applied concentration.) A student using at least 2 curriculum & instruction courses for the applied concentration must complete PHSX 211 as one of the natural science courses and must complete at least 1 of the geometry courses MATH 559, MATH 660, or MATH 661.

Courses used to satisfy the core requirements can also be used to complete List A and List B sequences. However, no course can be used for 2 List A or B sequences, and courses used for the Applied Concentration requirement cannot also be counted toward the 24 credit hours of advanced mathematics courses for the B.S. degree.

Some courses satisfying the sequence requirements are taught infrequently. More advanced courses can be substituted for lower level courses in many cases. Consult the mathematics department for expected course offerings and substitutions.

Below is a sample 4-year plan for students pursuing the BS in Mathematics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 104 prior to the freshman year, fall semester.

### Freshman

#### Fall

- **Goal 1.1 Critical Thinking**
  - ENGL 102 (Goal 2.1 Written Communication, BS Writing 2) | 3 Hours

#### Spring

- **Goal 3 Natural Science**
  - 3 Hours

- **Goal 2.2 Oral Communication**
  - 3 Hours
| BA Laboratory/Field Experience (LFE) | 1 EECS 138, 168, or 169 (BS Requirement) | 3 | Senior Hours | 1 EECS 138, 168, or 169 (BS Requirement) | 3 |
| ENGL 101 (Goal 2.1 Written Communication, BS Writing 1) | 3 MATH 126 (Major Requirement) | 4 | Sophomore | 4 Second Area of Study/Elective/Degree/Junior-Senior Hours | 6 |
| MATH 125 (Goal 1.2 Quantitative Literacy, Major Requirement) | 4 Second Area of Study/Elective/Degree/Junior-Senior Hours | 6 |
|  |  |  |  |  |  |
| Senior Hours | 15 | 15 |

**Total Hours 120**

1. Students are required to select one 2-course sequence from List A and a second 2-course sequence from either List A or List B. The second course sequence completes the core goal 6 requirement. Refer to Degree Requirements tab for lists of courses and the department's website for course frequency: [https://mathematics.ku.edu/frequency-courses](https://mathematics.ku.edu/frequency-courses). Completion of four upper division mathematics courses that form two sequences in mathematics and statistics can fulfill KU Core Goal 6.

2. Select up to 2 additional 3-credit-hour courses to complete a total of 24 credit hours of mathematics courses numbered MATH 450 and above if needed. Students are required to complete a total of 24 credit hours of mathematics courses numbered MATH 450 and above. 12 of the 24 hours are completed through the Math Core Requirements: MATH 590, MATH 526 (or MATH 628 or MATH 728), MATH 500 and MATH 558.

3. The Applied Concentration consists of 3 courses, totaling at least 8 credit hours, that make significant use of mathematics. At least 2 courses must be in the same area. Courses from List C have been approved for this requirement. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

4. Most courses that count for the Applied Concentration have one or more pre-requisites that may or may not apply to other degree requirements.

5. Students using MATH 627-MATH 628 as their List A sequence need not take MATH 526; MATH 526 is required for those not taking MATH 628 or MATH 728.

6. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors**

For undergraduate departmental honors, the student must satisfy the College requirements for honors. attain a grade-point average of 3.5 in all mathematics courses numbered 500 and above. The student must also complete two out of the following four sequences: MATH 727 and MATH 728; MATH 765 and MATH 766; MATH 781 and MATH 782; and MATH 790 and MATH 791, with a grade no lower than B- in each of these courses. The student must make a satisfactory oral presentation to the department, preferably on a topic related to his or her mathematics
course work. Preparation should include enrollment in MATH 699 Directed Reading (for 1 or more credit hours) with a faculty mentor.

Students interested in graduating with departmental honors are strongly urged to inform the Associate Chair or the Chair of the departmental Honors Committee of their intention as soon as possible. Ideally, this should happen by the end of the sophomore year to ensure sufficient time to complete all the requirements.

Minor in Mathematics

Why study mathematics?

Because mathematics is a framework upon which humanity builds an understanding of the world.

Students getting a bachelor's degree (B.S., B.A., or B.G.S.) in the College of Liberal Arts and Sciences, with a major in another field, may earn a minor in mathematics. Students getting degrees in most of the other Schools of the university (including the School of Business and the School of Engineering) may also earn the mathematics minor. The requirements are the same for all students.

The minimum course requirements for the minor are completion of 18 credit hours of mathematics department courses, including MATH 127 or MATH 147, and at least 12 credit hours of courses numbered 300 and above, excluding MATH 365. The grade point average for all mathematics courses must be at least 2.0. MATH 290, while not required for the minor, is a prerequisite to most upper division mathematics courses.

A math minor allows you to focus on the mathematics that is most relevant and interesting to you. For more information or guidance on courses, make an appointment with a math department advisor.

Requirements for the Minor

The student must earn a grade point average of 2.0 in all mathematics courses attempted.

- Lower-Division Preparation: Calculus including MATH 127 or 147.
- Upper-Division Courses: 12 credit hours of courses numbered 300 and above (excluding MATH 365).

Note: Most upper-division mathematics courses have MATH 290 as a prerequisite.

Minimum Minor Requirements  18 hours

Undergraduate Certificate in Actuarial Science

Actuarial Science is the study of risk. Actuaries are employed by insurance companies, financial institutions and other businesses to plan for financial stability and manage risk. This 12 credit undergraduate certificate will prepare students majoring in different programs to enter the actuarial field. The program requires four upper division courses from an approved list. Included are courses that prepare students for two actuarial exams and other courses that satisfy the Validation by Educational Experience requirements of the Society of Actuaries.

Students who are interested in pursuing this Undergraduate Certificate should email collegeadvising@ku.edu (collegeadvising@ku.edu? subject=Undergraduate%20Certificate) to request the certificate be added to their academic record. Note students must declare their intent to earn the certificate prior to enrolling in the final course.

Master of Arts in Mathematics

Why study mathematics?

Because mathematics is a framework upon which humanity builds an understanding of the world.

Mission of the Graduate Program:

The mission of the Graduate Program of the Department of Mathematics is to prepare students for leadership roles in meeting the mathematical needs of our society and to produce professional mathematicians for positions in universities, colleges, industry, governmental agencies, and research centers.

Master of Arts in Mathematics:

The Mathematics Department offers the degree of Master of Arts (M.A.) in Mathematics. The M.A. entails study of advanced mathematics, typically culminating in a substantial thesis or final project demonstrating expertise in a particular area of mathematics. It is intended for students who plan to pursue a Ph.D. subsequently, as well as those who intend to work outside academia. A broad range of specialties is possible; research interests of department faculty include algebra, analysis, combinatorics, control theory, dynamical systems, geometry, numerical analysis, partial differential equations, probability, and statistics. The program offers three options for the M.A. degree, as detailed in the section Degree Requirements. College-wide requirements for graduate students may be found in the Graduate School Catalog (http://catalog.ku.edu/liberal-arts-sciences/#graduatetext).

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to
Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the M.A. in Mathematics**

The minimum prerequisites for admission are:

- an undergraduate degree from an accredited institution with a program of study in mathematics;
- a record of achievement that shows strong promise of success in graduate school, including a 3.0 cumulative grade-point average in undergraduate studies and a 3.0 grade-point average in mathematics (department requirement);
- course work in abstract algebra, linear algebra, and advanced calculus or introduction to analysis (comparable to KU courses MATH 500, MATH 558, and MATH 590).

It is beneficial to have preparation in probability/statistics (comparable to MATH 627/MATH 628) and/or numerical analysis (comparable to MATH 581). Although not required, it is also helpful to have taken introductory courses in complex analysis (comparable to MATH 646), partial differential equations (comparable to MATH 647), and/or topology.

The department requires the general Graduate Record Examination (GRE) for all incoming students. **This requirement has been suspended for Spring 2022 and Fall 2022 admission.** International students whose native language is not English also must fulfill English language requirements specified by university policies.

Applicants must submit a graduate application online (https://gradapply.ku.edu/apply/), including the following required materials:

- Transcript from each college or university the applicant has attended (an official transcript must be sent upon acceptance and completion of degree).
- Applicant’s résumé/curriculum vitae.
- A list of the textbooks used in mathematics courses beyond calculus.
- A statement of purpose indicating the applicant’s mathematical preferences and interests.
- 3 letters of reference.
- International applicants must fulfill the University’s requirements for English proficiency (https://gradapply.ku.edu/english-requirements/).

Incomplete applications will not be considered. Meeting the minimum admission requirements does not guarantee admission. The Department of Mathematics evaluates candidates and makes recommendations to the Office of Graduate Studies regarding admission. The number of students admitted to the program changes from year to year, and admissions are competitive based on all application materials. The Department ordinarily does not award GTA positions to students accepted to the M.A. program. Further information about applications and admissions is available from the Department of Mathematics (https://math.ku.edu/admission-graduate-program/).

kate.pleskac@ku.edu

The M.A. program is flexible and accommodates the different interests and backgrounds of students. Some of the courses required for the M.A. are common to the Ph.D. tracks, and we encourage students interested in an M.A. to take advanced Ph.D. classes among their selective course work. Many Ph.D. students earn an M.A. on the way to the doctoral degree. They have the option to do so after completing the qualifying examinations. A candidate for the M.A. must fulfill general requirements. At least 30 hours of appropriate graduate credit must be earned with at least a B average, and a research component must be included in the candidate’s program. Usually the research component is fulfilled by writing a thesis or by completing appropriate seminars, independent research, or advanced graduate courses. In addition, a candidate must complete one of these options:

**Option 1**

Pass the departmental Ph.D. written qualifying examinations and complete 30 hours of courses at the 700 level or higher, of which 12 hours are at the 800 level or higher.

**Option 2**

Complete the following courses and pass an oral examination:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 800</td>
<td>Complex Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 810</td>
<td>Real Analysis and Measure Theory I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 820</td>
<td>Introduction to Topology</td>
<td>3</td>
</tr>
<tr>
<td>MATH 830</td>
<td>Abstract Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 831</td>
<td>Abstract Algebra II</td>
<td>3</td>
</tr>
<tr>
<td>Select and at least 9 of the remaining 15 hours from courses numbered 700 or above</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

The additional 9 hours may include the credit (a minimum of 2 hours and a maximum of 6 hours) used to fulfill a research component (e.g., enrollment in MATH 896, MATH 899, MATH 990, MATH 993, or advanced courses). An M.A. candidate must demonstrate an ability to communicate mathematics both orally and in written form. An M.A. candidate not selecting the thesis option (MATH 899) is expected to write a technical report as part of his or her research component. A candidate must give a short (30 to 60 minutes) presentation of her or his research in the first part of the oral examination.

**Option 3**

Complete 36 credit hours of courses numbered 600 or above:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 727</td>
<td>Probability Theory</td>
<td>3</td>
</tr>
<tr>
<td>MATH 765</td>
<td>Mathematical Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 781</td>
<td>Numerical Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 790</td>
<td>Linear Algebra II</td>
<td>3</td>
</tr>
<tr>
<td>MATH 791</td>
<td>Modern Algebra</td>
<td>3</td>
</tr>
</tbody>
</table>

Complete a research component and pass an oral examination. At least 24 of the 36 hours must be in courses numbered 700 or above. Course equivalents to MATH 727, MATH 765, MATH 781, MATH 790, or MATH 791 may be substituted if approved by the graduate studies committee. An M.A. candidate may, with prior approval of the chair of the graduate studies committee, substitute up to 9 hours of courses taught in other departments. Also, the 36 hours may include the credit (a minimum of 2 hours and a maximum of 6 hours) used to fulfill a research
component (e.g., enrollment in MATH 896, MATH 899, MATH 990, MATH 993, or advanced courses). An M.A. candidate must demonstrate an ability to communicate mathematics both orally and in written form. In particular, an M.A. candidate not selecting the thesis option (MATH 899) is expected to write a technical report as part of his or her research component. Also, a candidate must give a short (30 to 60 minutes) presentation of her or his research in the first part of the oral examination. A proposed program of study must be submitted to the chair of the graduate studies committee at the earliest feasible time, preferably during the second semester of enrollment. The degree is awarded only on the basis of an approved program, which can, however, be revised.

**Doctor of Philosophy in Mathematics**

**Why study mathematics?**

Because mathematics is a framework upon which humanity builds an understanding of the world.

**Mission of the Graduate Program:**

The mission of the Graduate Program of the Department of Mathematics is to prepare students for leadership roles in meeting the mathematical needs of our society and to produce professional mathematicians for positions in universities, colleges, industry, governmental agencies, and research centers.

**Doctor of Philosophy in Mathematics:**

The Mathematics Department offers the degree of Doctor of Philosophy (Ph.D.) in Mathematics. The Ph.D. program provides broad and deep expertise in mathematics, culminating in a dissertation that includes significant original work. It is intended for students with a strong mathematical background who plan a career in research in academia or industry. A broad range of specialties is possible; research interests of department faculty include algebra, analysis, combinatorics, control theory, dynamical systems, geometry, numerical analysis, partial differential equations, probability, and statistics. There are two tracks: Pure Mathematics and Applied Mathematics. The requirements for each track are listed in the section Degree Requirements. College-wide requirements for graduate students may be found in the Graduate School Catalog (http://catalog.ku.edu/liberal-arts-sciences/#graduatetext).

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Ph.D. in Mathematics**

The minimum prerequisites for admission are:

- an undergraduate degree from an accredited institution with a program of study in mathematics;
- a record of achievement that shows strong promise of success in graduate school, including a 3.0 cumulative grade-point average in undergraduate studies and a 3.0 grade-point average in mathematics (department requirement);
- course work in abstract algebra, linear algebra, and advanced calculus or introduction to analysis (comparable to KU courses MATH 500, MATH 558, and MATH 590).

It is beneficial to have preparation in probability/statistics (comparable to MATH 627/MATH 628) and/or numerical analysis (comparable to MATH 581). Although not required, it is also helpful to have taken introductory courses in complex analysis (comparable to MATH 646), partial differential equations (comparable to MATH 647), and/or topology.

The department requires the general Graduate Record Examination (GRE) for all incoming students. **This requirement has been suspended for Spring 2022 and Fall 2022 admission.** International students whose native language is not English also must fulfill English language requirements specified by university policies.

Applicants must submit a graduate application online (https://gradapply.ku.edu/apply/), including the following required materials:

- Transcript from each college or university the applicant has attended (an official transcript must be sent upon acceptance and completion of degree).
- Applicant’s résumé/curriculum vitae.
- A list of the textbooks used in mathematics courses beyond calculus.
- A statement of purpose indicating the applicant’s mathematical preferences and interests.
- 3 letters of reference.
- International applicants must fulfill the University’s requirements for English proficiency (https://gradapply.ku.edu/english-requirements/).

Incomplete applications will not be considered. The minimum admission requirements do not guarantee admission. The Department of Mathematics evaluates candidates and makes recommendations to the Office of Graduate Studies regarding admission. The number of students admitted to the program changes from year to year, and admissions are competitive based on all application materials.

There are no additional application forms for financial support. Students are considered for support based on merit. Most Ph.D. students accepted by the program receive an offer of financial support in the form of a Graduate Teaching Assistantship. The number of GTAs available is limited. Further information about applications and admissions is available from the Department of Mathematics (https://math.ku.edu/admission-graduate-program/).

Ph.D. Degree Requirements

The department requires the student to meet the following requirements before being admitted to the comprehensive examination.

1. Pass 2 written qualifying examinations: one exam in either algebra or analysis and a second exam in either numerical analysis or probability/statistics. Both qualifying examinations must be completed by the beginning of the student’s fifth semester.

2. Complete the required qualifying exam coursework: MATH 727 (Probability), MATH 765 (Analysis I), MATH 781 (Numerical Analysis), MATH 791 (Abstract Algebra I). Passing a qualifying exam exempts a student from the corresponding coursework. This coursework must be completed before the preliminary examination.

3. Pass a preliminary examination in an area close to the focus of the eventual doctoral dissertation. The preliminary examination must be completed by the beginning of the student’s eighth semester.

4. Satisfy the Research Skills and Responsible Scholarship requirement.
   a. The Research Skills requirement may be met by demonstrating a working knowledge of a programming language such as C++ or Python; by completing an introductory programming language course approved by the Graduate Committee; or completing an approved computing project demonstrating competence in either a programming language or the use of specialized software that supports the student’s research.
   b. The Responsible Scholarship requirement must be met by completing the departmental training in responsible scholarship for mathematicians. The training is offered every spring semester.

5. Pass a set of requirements for a track in either Pure Mathematics or Applied Mathematics, as outlined below.

Note: Contact your department or program for more information about the qualifying exam coursework requirement, the research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the Graduate Studies section of the online catalog and in the KU Policy Library.

Pure Mathematics

This track requires:

<table>
<thead>
<tr>

Examination Preparation

Normally the work required to prepare a student for the oral comprehensive examination (and to do research) includes 1 or more semesters of advanced courses, directed readings, and seminars. In the oral comprehensive examination, a student must show proficiency in the chosen area of mathematics. Precise areas of responsibility on this examination are discussed in detail with the advisory committee (the student’s advisor and two other members of the department’s Graduate Faculty).

The student must complete 4 additional courses at the 800 level or above before the final examination. Mathematics courses numbered 896, 899, 990, 993 and 999 may not be used to satisfy this requirement.

Graduate Certificate in Applied Mathematics

The Graduate Certificate in Applied Mathematics is designed to enhance training in various aspects of applied mathematics. It is intended for students who are currently pursuing a graduate degree in a discipline outside of the Mathematics Department, or for students who wish to pursue the certificate as a stand-alone program.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Graduate Certificate in Applied Mathematics

Applicants must submit a graduate application online. (https://gradapply.ku.edu/apply/) The prerequisites for admission are:
• Current enrollment in a KU graduate program outside the Department of Mathematics, or as a non-degree-seeking student
• Completion of two MATH graduate courses from those listed in the Certificate Requirements, with a minimum 3.0 GPA. These courses can then count towards the 12 credits required for the certificate.

The Department of Mathematics evaluates candidates and makes recommendations to the Office of Graduate Studies regarding admission. The Department ordinarily does not award GTA positions to students accepted to the Graduate Certificate program. Further information about applications and admissions is available from the Department of Mathematics. (https://math.ku.edu/admission-graduate-program/)

<td>Partial Differential Equations</td>
<td>3</td>
</tr>
</tbody>
</table>

MATH 951  
Topics in Advanced Partial Differential Equations II: 3

Other courses (600 level or above) may be substituted with the approval of the Director of Graduate Studies. At least two courses must be at the 700 level or above. Courses should be selected in consultation with an advisor.

**Department of Molecular Biosciences**

**Molecular Biosciences Graduate Programs**

We are an interdisciplinary group of faculty who perform cutting edge research across a wide range of areas (https://molecularbiosciences.ku.edu/research-areas/), including biochemistry, biophysics, structural biology, bioinformatics, genetics, genomics, immunology, microbiology, virology, neurobiology, molecular, cellular and developmental biology. We work closely with postdoctoral fellows, graduate students, and undergraduates to investigate fundamental biological and biomedical problems on all levels from molecules to cells to organisms. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and education.

The department offers Doctor of Philosophy and Master of Arts graduate degrees in Biochemistry and Biophysics (http://molecularbiosciences.ku.edu/biochemistry-graduate-program/), in Molecular, Cellular, and Developmental Biology (MCDB (http://molecularbiosciences.ku.edu/mcdb-graduate-program/)), and in Microbiology (http://molecularbiosciences.ku.edu/microbiology-0/). General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website (http://molecularbiosciences.ku.edu/). Detailed information about admission (https://molecularbiosciences.ku.edu/graduate-admissions/) to our graduate program, curricula (https://molecularbiosciences.ku.edu/program-description/), and financial support (http://molecularbiosciences.ku.edu/stipend/) is also available.

Students who are interested in enrolling in graduate level coursework in the Department of Molecular Bioscience without formal admission to a graduate program at KU can apply for graduate, non-degree seeking student status. See the department's admission (https://molecularbiosciences.ku.edu/graduate-admissions/) page for further information.

**Biochemistry and Biophysics**

The biochemistry group is a dynamic community of scholars and distinguished investigators engaged in research at the forefront of areas including enzymology, structural biology, protein chemistry, proteomics, metabolic biology, and computational biology. Biochemistry researchers have access to numerous excellent core facilities and state-of-the-art equipment, and research activities are strongly supported by public and private funding sources. In addition, biochemistry researchers have close ties with biochemists, chemists and chemical engineers in several other departments at KU as well as at the KU Medical Center. The biochemistry degree track offers a challenging, stimulating and nurturing environment for PhD students. Biochemistry faculty are committed to providing exceptional scientific training through mentoring in the laboratory, classwork and teaching opportunities. Graduate-level classwork covers
advanced biochemical systems and methods, physical biochemistry, and molecular modeling.

MCDB
Graduate study in MCDB is supported by a strong interdisciplinary and collaborative group of researchers composed of noted professors and the students, postdoctoral associates, and research staff who work with them in their labs. MCDB researchers seek to address a range of fundamental biomedical questions at the molecular and cellular level. Research areas include modern cell biology, genetics, genomics, developmental biology, cancer biology and neurobiology. Researchers utilize this collaborative environment to leverage the intellectual expertise and tools from multiple labs to study problems at the cutting edge of science using novel, synthetic approaches and a wide variety of model organisms. MCDB researchers have access to numerous excellent core facilities and state-of-the-art equipment, and research activities are strongly supported by public and private funding sources. In addition, MCDB researchers have close ties with researchers in several other departments at KU as well as at the KU Medical Center. MCDB PhD graduates have a high rate of success in securing post-degree positions in academic and industrial research, teaching, law, and other careers. The MCDB degree track offers a challenging, stimulating and rigorous environment that nurtures success for PhD students. The MCDB faculty is committed to providing dynamic and modern scientific training through mentoring in the laboratory, classwork and teaching opportunities. A flexible series of graduate-level course are offered, covering advanced cell biology, genetics, developmental biology, and neurobiology, that aids the student in the development of their research program and dissertation work.

Microbiology
The microbiology group is a dynamic community of scholars and distinguished investigators engaged in research at the forefront of areas including immunology, bacterial pathogenesis and genetics, virology, and fungal secondary metabolites. Microbiology researchers have access to numerous stellar core facilities and state-of-the-art equipment. Microbiology research activities are strongly supported by public and private funding sources, and microbiology researchers have close ties with microbiologists in several other departments at KU as well as at the KU Medical Center. The microbiology degree track offers a challenging, stimulating and rigorous environment that nurtures success for PhD students. The MCDB faculty is committed to providing dynamic and modern scientific training through mentoring in the laboratory, classwork and teaching opportunities. A flexible series of graduate-level course are offered, covering advanced cell biology, genetics, developmental biology, and neurobiology, that aids the student in the development of their research program and dissertation work.

Biology Undergraduate Programs
Various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs (http://catalog.ku.edu/liberal-arts-sciences/biology/) page.

Courses
BIOL 100. Principles of Biology. 3 Credits. NB N
Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended.

BIOL 101. Principles of Biology, Honors. 3 Credits. NB N
Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 is recommended. BIOL 101 and BIOL 102 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor.

BIOL 102. Principles of Biology Laboratory. 1 Credits. U LFE
Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). Prerequisite: Concurrent enrollment in BIOL 100 is recommended.

BIOL 105. Biology Orientation Seminar. 1 Credits. N
Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about degree requirements, academic advising, research opportunities, and career options, as well as how to align academic and professional goals. Graded on a satisfactory/unsatisfactory basis.

BIOL 116. Introduction to Evolutionary Biology. 3 Credits. N LFE
An account of evolutionary thinking from classical to contemporary time. The emphasis is on mainstream developments (Darwinism, Mendelism, the Modern Synthesis, Cultural Ecology), but certain social issues will be examined (social Darwinism, creationism).

BIOL 120. Insects in Your World. 3 Credits. NB N
Students will learn about the global impact of insects on human concerns, both positive (pollination and decomposition) and negative (competition with humans for food, fiber, and shelter, and disease transmission) while developing an appreciation for the ways in which scientists work with real problems involving insects. The course will cover the overwhelming abundance and diversity of insects, and their life history, ecology, behavior, and physiology. This course is intended for both nonbiology and biology majors. Format: two lectures and one discussion section per week.

BIOL 150. Principles of Molecular and Cellular Biology. 3 Credits. NB N LFE
A course for biology majors and students planning to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. An honors section (BIOL 151) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

BIOL 151. Principles of Molecular and Cellular Biology, Honors. 3 Credits. NB N LFE
A course for students with superior academic records who are biology majors or who plan to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. Prerequisite: Membership in the University Honors Program and concurrent or prior enrollment in CHEM 130, CHEM 190 and CHEM 191, CHEM 150, or CHEM 170; or consent of instructor.

BIOL 152. Principles of Organismal Biology. 3 Credits. NB N LFE
A course for biology majors and students who plan to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. An honors section (BIOL 153) is offered for students with superior academic records. Prerequisite:
Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 153. Principles of Organismal Biology, Honors. 3 Credits. NB N**

This introductory course for non-majors focuses on the significance of the history of life and the fossil record for our understanding of evolution. Key events in the history of life are considered, including the origins of life, the eukaryotic cell, and humans, and also various mass extinctions. The focus is on general scientific and evolutionary principles and mechanisms that can be extracted from the study of the fossil record. It also uses the lessons of the fossil record to consider the prospects for our own species.

**BIOL 240. Fundamentals of Human Anatomy. 3 Credits. N**

Introduction to the gross anatomy of the human body. Covers the spatial arrangement and appearance of structures throughout the body, including visual identification of these structures. Musculoskeletal relationships, and the anatomy of major organ systems, are emphasized. Not intended for biology majors. Prerequisite: BIOL 100, or equivalent.

**BIOL 241. Human Anatomy Observation Laboratory. 2 Credits. U LFE**

One of the two laboratories in gross anatomy designed to complement BIOL 240. Emphasizes the three-dimensional appearance and spatial relationships of anatomical structures through supervised observations of pre-dissected human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy observation laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is required.

**BIOL 246. Principles of Human Physiology. 3 Credits. N**

An introduction to the physiological and biochemical processes and general physiological principles necessary to sustain life. Organ and organ system processes are emphasized. Intended for students majoring in allied health or sports related curricula who require a course in human physiology. Not intended for biology majors. Prerequisite: BIOL 100 or equivalent.

**BIOL 350. Principles of Genetics. 4 Credits. N**

Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian genetics and mapping; control of gene expression; cytogenetics; epigenetics and non-Mendelian genetics; and population and quantitative genetics. Examples are taken from a wide variety of organisms, including viruses, bacteria, plants, fungi, insects, and humans. Not open to students with credit in BSCI 350. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher in BIOL 150 or BIOL 151 with a grade of C- or higher in BIOL 152 or BIOL 153 with a grade of C- or higher; or consent of instructor.

**BIOL 360. Principles of Genetics, Honors. 4 Credits. N**

The science of genetics aims to explain why individuals differ from one another and how these differences are inherited. Honors Genetics covers all core topics in fundamental genetics: Mendelian inheritance, meiosis and recombination, mutation, molecular genetics, population genetics, quantitative genetics and genomics. Special attention given to the practice of genetics and the complex relationship between genotype, phenotype and environment. A broader goal of Honors Genetics is to provide students a framework for understanding recent advances in medical genetics and the modern era of personal genomics. Not open to students with credit in BSCI 350. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150
or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher and membership in the University Honors Program; or consent of the instructor.

BIOL 400. Fundamentals of Microbiology. 3 Credits. NB N
Fundamental principles of microbiology with emphasis on physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics, pathogenesis and immunity, industrially important microorganisms. Not open to students with credit in BSCI 400. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher and two semesters of college chemistry with a grade of C- or higher, or consent of the instructor.

BIOL 401. Fundamentals of Microbiology, Honors. 4 Credits. N
Honors section of BIOL 400 and BIOL 612, by application and invitation. Not open to students with credit in BSCI 400. Prerequisite: BIOL 150 or BIOL 151, two semesters of college chemistry, and membership in the University Honors Program, or consent of the instructor.

BIOL 402. Fundamentals of Microbiology Laboratory. 2 Credits. U LFE
Laboratory exercises designed to complement BIOL 400 or BIOL 700. Not open to students with credit in BSCI 401. Prerequisite: BIOL 400 or BIOL 612, or BIOL 400 or BIOL 612 concurrently.

BIOL 405. Laboratory in Genetics. 3 Credits. U LFE
A laboratory course that provides hands-on experience with classical genetics and modern molecular genetics. Experiments involve Mendelian genetics (dominance/recessivity, complementation, segregation, independent assortment) in eukaryotic organisms; recombinant DNA; basic bacterial genetics; polymerase chain reaction; DNA sequencing; computational genetics; and genome editing. Not open to students with credit in BSCI 351. Prerequisite: Concurrent or prior enrollment in BIOL 350.

BIOL 412. Evolutionary Biology. 4 Credits. N
Introduction to the patterns and processes of organic evolution. Considered are the history of evolutionary thought, molecular evolution, genetics and microevolution, selection and adaptation, and speciation and macroevolution. Emphasis will be placed on how scientists study and document change over time in natural populations, methods for testing hypotheses about events in evolutionary history, and how discovering evolutionary mechanisms at one level of organization can help to explicate general processes in the natural world. Prerequisite: BIOL 152 and BIOL 350, or consent of the instructor.

BIOL 413. History and Diversity of Organisms. 3 Credits. N LFE
An integrated lecture and laboratory course presenting an overview of the variety and ancestry of life on earth. Using representatives from prokaryotes, protists, plants, fungi, and animals, principles of phylogenetic reconstruction are illustrated and evolutionary trends in the life history features, functional morphology, and structural complexity of extant and extinct organisms are presented. Two hours of lecture and three hours of laboratory per week. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 414. Principles of Ecology. 3 Credits. N
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as EVRN 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 415. Field and Laboratory Methods in Ecology. 2 Credits. N
This course complements BIOL 414 with field trips and laboratory exercises that illustrate the basic concepts of ecology. Topics covered include methodologies for quantitative sampling of terrestrial and aquatic systems, design of field studies, computer simulation and digital data analysis techniques, and scientific writing. Prerequisite: Concurrent or prior enrollment in BIOL 414. A statistics course is recommended.

BIOL 416. Cell Structure and Function. 3 Credits. N
Lecture survey of molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Not open to students with credit in BSCI 416. Prerequisite: BIOL 150 or BIOL 151; BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; or consent of the instructor.

BIOL 417. Biology of Development. 3 Credits. N
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Not open to students with credit in BSCI 417. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

BIOL 418. Laboratory in: ______. 1-3 Credits. U LFE
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor.

BIOL 419. Topics in: ______. 1-3 Credits. N LFE
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs.

BIOL 420. Seminar: ______. 1-3 Credits. N
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor.

BIOL 423. Non-laboratory Independent Study. 1-9 Credits. N
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 424. Independent Study. 1-9 Credits. N
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 425. Teaching Apprenticeship in Biology. 1-9 Credits. N
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology.

BIOL 426. Laboratory in Cell Biology. 3 Credits. U LFE
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; concurrent or
prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended.

**BIOL 428. Introduction to Systematics. 3 Credits. N**
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systems background.

**BIOL 430. Laboratory in Molecular Biology. 3 Credits. U LFE**
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology.

**BIOL 435. Introduction to Neurobiology. 3 Credits. N**
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Not open to students with credit in BSCI 435. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

**BIOL 442. Human Anatomy Dissection Laboratory. 3 Credits. U**
Laboratory in gross anatomy designed to build on content from BIOL 240 and BIOL 241. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial disecting experience. Students perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Prerequisite: BIOL 240 and BIOL 241, and consent of the instructor.

**BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N LFE**
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

**BIOL 451. Ecosystems Stewardship. 3 Credits.**
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 451 and GEOG 451.)

**BIOL 454. Brain Diseases and Neurological Disorders. 3 Credits. N**
Major brain diseases and neurological disorders such as stroke, Alzheimer’s Disease, Parkinson’s Disease, Huntington’s Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 416 or BIOL 435 or BIOL 546, or consent of instructor.

**BIOL 477. Ecology and Global Change. 3 Credits. N**
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor.

**BIOL 480. Medical Parasitology. 3 Credits. N**
Introductory lecture course focused on parasites (protozoans and metazoa) causing disease in humans, including zoonotic diseases (diseases or infections that are naturally transmissible to humans from non-human vertebrates). Provides basic knowledge about the morphology, epidemiology, evolution, and ecology of parasites infecting humans globally (e.g., malaria, amoebas, hookworms, tapeworms). Emphasis is placed on life-cycles, course of infection, modes of reproduction, diagnosis, and pathology of human parasites; relevant parasites of veterinary importance are also discussed. Prerequisite: BIOL 152 or BIOL 153, or permission of instructor.

**BIOL 481. Medical Parasitology Laboratory. 1 Credits. U LFE**
Laboratory course in the study of parasites causing disease in humans, including zoonotic diseases (diseases or infections that are naturally transmissible to humans from non-human vertebrates), emphasizing their morphology and identification. One three-hour laboratory each week. Prerequisite: Concurrent or prior enrollment in BIOL 480.

**BIOL 490. Internship and Practical Applications. 1-6 Credits. N**
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor.

**BIOL 499. Introduction to Honors Research. 2 Credits. N**
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursuing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level natural sciences coursework or consent of instructor.

**BIOL 500. Biology of Insects. 3 Credits. N**
Lectures and demonstrations providing an introduction to the study of insects, including general classification, structure, phylogeny, identification, development, physiology, behavior, ecology, and relations
to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

BIOL 501. Physiological Adaptations of Plants to Extreme Environments. 3 Credits. N
Exploration of physiological adaptations of plants to bright sunlight & deep shade, drought & flooding, excess heat & subfreezing, excess elements and too few elements. Examples of adaptations include: red leaves, blue leaves, succulence, root "knees", moving leaves, frozen leaves, heavy metal plants, carnivorous plants, parasitic plants, epiphytes. Prerequisite: BIOL 150 or BIOL 152 or consent of instructor.

BIOL 502. Laboratory in Insect Biology and Diversity. 2 Credits. U LFE
Laboratory and field studies of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent.

BIOL 503. Immunology. 3 Credits. N
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness; hypersensitivity; specific immunologic tolerance. Not open to students with credit in BSCI 503. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor.

BIOL 504. Immunology Laboratory. 2 Credits. U LFE
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently.

BIOL 506. Bacterial Infectious Diseases. 3 Credits. N
Explores bacterial infectious diseases from the perspective of how disease is established and the mechanisms that underlie disease, as well as how to treat and prevent infectious disease. Not open to freshmen or sophomores. Not open to students with credit in BSCI 506. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor.

BIOL 507. Bacterial Infectious Diseases Laboratory. 2 Credits. U LFE
Laboratory to complement BIOL 506. Cultivation of pathogenic microorganisms, diagnostic procedures, and experiments to demonstrate various aspects of microbial pathogenicity and host responses. Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or consent of instructor.

BIOL 509. Biology of Spiders. 3 Credits. N
An introduction to the evolution, anatomy, physiology, behavior, and ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship and mating; predation; social behavior; and the role of spiders in natural and agricultural ecosystems. Concurrent enrollment in BIOL 511 is encouraged. Prerequisite: BIOL 152 , BIOL 153 or permission of instructor.

BIOL 511. Biology of Spiders Laboratory. 1 Credits. U LFE
Topics will include comparative biology of arachnid orders (spiders, scorpions, harvestmen, mites, and others), external and internal anatomy of spiders, identification of common spider families and genera, and spider behavior. Students will be required to make a small collection (collect, preserve, and identify specimens). Prerequisite: BIOL 509; concurrent enrollment is preferred.

BIOL 512. General Virology. 3 Credits. N
Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host cell-viral interactions; mode of replication of DNA and RNA viruses, tumor viruses. Not open to students with credit in BSCI 512. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor.

BIOL 513. Virology Laboratory. 2 Credits. U LFE
Experiments involving cultivation, quantitation, and identification of animal viruses, continuous cell culture and primary chicken embryo culture techniques. Molecular biology techniques are used to demonstrate the steps in virus replication. The value of viruses as tools to understand normal cellular processes is emphasized in experiments which demonstrate the relative simplicity of viruses and the relative complexity of eukaryotic cells. Demonstrations include transformation of cells by tumor viruses and electron microscopy of virus particles. Prerequisite: BIOL 402 and BIOL 512, or consent of instructor.

BIOL 518. Microbial Genetics. 3 Credits. N
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular biology of gene expression. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher or consent of instructor.

BIOL 519. Microbial Genetics Laboratory. 2 Credits. U LFE
A laboratory course on the genetic analysis of bacteria. Includes mutagenesis, cloning, agarose and polyacrylamide gel electrophoresis, PCR, regulation of gene expression, and computational analysis of DNA sequences and protein structures. Prerequisite: BIOL 350 or BIOL 360.

BIOL 520. Marine Biology. 3 Credits. N
This introductory course covers biological, physical, and chemical ocean sciences, with an emphasis on ecological aspects. In addition to this Lawrence campus course, students may enroll for a supplementary 1 credit field trip class to a Caribbean coral reef island offered in December or January. Prerequisite: BIOL 414 or permission of the instructor.

BIOL 524. Mammalian Paleontology. 3 Credits.
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as GEOL 524.) Prerequisite: One of the following: BIOL 225, BIOL 412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor.

BIOL 527. Primate Evolution and the Fossil Record. 3 Credits. N
This course exposes students to fundamental concepts of paleontology and evolutionary biology using the mammalian order Primates as a high-profile case study. Primates are interesting partly because humans are primates. Hence, scientific understanding of human origins and human evolution must be grounded in knowledge of our nearest relatives. This course places human origins within the broader framework of how primates have evolved over the course of the Cenozoic Era, often in response to radical changes in the Earth's physical environment. Prerequisite: BIOL 412 or BIOL 413, or consent of the instructor.

BIOL 530. Biodiversity Discovery and Assessment. 2 Credits. N
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as EVRN 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Credits. U
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as EVRN 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged.

BIOL 533. Biology of Fungi. 4 Credits. N LFE
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153.

BIOL 536. Cell Structure and Function (Honors). 3 Credits. N
BIOL 536 is the honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Not open to students with credit in BSCI 416. Prerequisite: BIOL 350 or BIOL 360 or consent of instructor.

BIOL 540. General Invertebrate Zoology. 4 Credits. N LFE
Phylogeny, physiology, and embryology; evolutionary processes; characteristics of major ecological groupings. Laboratory will consider major taxonomic categories with emphasis on functional morphology and its evolutionary modifications. Prerequisite: BIOL 152 or BIOL 153.

BIOL 541. Biology of Freshwater Invertebrates. 3 Credits. N
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 and/or BIOL 540.

BIOL 544. Comparative Animal Physiology. 3 Credits. N
An intermediate physiology course with lectures and discussions of the structures, functions, mechanisms, and interactions of vertebrate and invertebrate organ systems with a focus on the different ways in which animals adapt to their environments. Topics include digestion and nutrition, metabolism, gas exchange, circulation, excretion, neurophysiology, endocrinology, and muscle physiology. Prerequisite: BIOL 152 or BIOL 153, and CHEM 330, or consent of instructor. A college physics course is recommended but not required.

BIOL 545. Evolution of Development. 4 Credits. N
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent.

BIOL 546. Mammalian Physiology. 3 Credits. N
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Not open to students with credit in BSCI 546. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and CHEM 330 or consent of instructor.

BIOL 547. Mammalian Physiology Laboratory. 2 Credits. U LFE
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 546. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 546 or BIOL 646.

BIOL 548. Human Osteology. 4 Credits. N LFE
This course examines the structure and function of the human skeleton from an evolutionary and biomedical perspective. Students will learn to identify bones comprising the human skeleton and how osteological information aids in reconstructing sex, age, race, stature, and health status. Major transformations of the human skeleton from hominoid precursors, and some of the biomedical consequences of these transformations, will be addressed. (Same as ANTH 648.) Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

BIOL 555. General Plant Physiology. 3 Credits. N
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: Consent of instructor.

BIOL 560. Histology. 3 Credits. N
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153.

BIOL 570. Introduction to Biostatistics. 4 Credits. N LFE
Statistical concepts related to biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, emphasizing the analysis of variation. Prerequisite: College algebra and ten hours of natural science.

BIOL 582. Principles of Biogeography. 3 Credits. N
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macromolecular trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor.

BIOL 583. Herpetology. 3 Credits. N
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry.

BIOL 592. Ichthyology. 4 Credits. N LFE
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. The course is offered
at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 152 and/or BIOL 413.

BIOL 593. Ornithology. 3 Credits. N LFE
A lecture and laboratory course on the biology, evolution, and diversity of birds. Prerequisite: BIOL 412 (or BIOL 413), or permission of instructor.

BIOL 594. Forest Ecosystems. 3 Credits.
Students learn basic concepts of forest productivity, forest water relations, forest hydrology, nutrient cycling, through soils and vegetation, nutrient uptake, carbon cycling, decomposition, linkages to aquatic ecosystems, and agents of disturbance to these cycles. The class spends a significant part of the semester exploring forest soil profiles and the challenges they present to different forest ecosystems. We discuss the function of forested ecosystems in a global context and identify and understand smaller-scale processes that drive forest function. Prerequisite: CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; and BIOL 414.

BIOL 595. Human Genetics. 3 Credits. N
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350 or BIOL 360.

BIOL 598. Research Methods. 3 Credits. N LFE
An introduction to the foundational concepts that underpin scientific inquiry and problem solving. Coursework is built around three student-designed inquiries, and topics considered within that context include experimental variables, basic principles of statistics, safety and ethics of investigation, professional communication techniques, and appropriate literature review. Enrollment priority will be given to students currently admitted to the UKanTeach program.

BIOL 599. Senior Seminar: ______. 1 Credits. N
A synthesis and discussion of current trends in a discipline or disciplines related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline’s state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences.

BIOL 600. Introductory Biochemistry, Lectures. 3 Credits. N
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Not open to students with credit in BSCI 600. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry.

BIOL 601. Principles of Biochemistry Laboratory. 2 Credits.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite: Corequisite: BIOL 600; or consent of instructor.

BIOL 602. Plant Ecology. 3 Credits. N
Introduction to basic concepts, focused at community and species level. Architectural ecomorphology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession as an interaction among species differing in ecomorphology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemic defenses; genealogy; paleoecology. Prerequisite: BIOL 414 or consent of instructor.

BIOL 603. Systematic Botany. 3 Credits. N LFE
A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenetically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent.

BIOL 612. Fundamentals of Microbiology. 3 Credits. NB N
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Not open to students with credit in BSCI 612. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor.

BIOL 622. Paleontology. 3 Credits. N
A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor.

BIOL 623. Paleontology Laboratory. 1 Credits. U LFE
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.)

BIOL 625. Behavioral Ecology and Sociobiology. 3 Credits. N
The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEOL 105, or GEOL 304.

BIOL 630. Conservation and Wildlife Biology. 3 Credits. N
Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended.

BIOL 636. Biochemistry I. 4 Credits. N
First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor.

BIOL 637. Introductory Biochemistry Laboratory. 2 Credits. U LFE
The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce the student to cell constituents and biochemical
reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment.

**BIOL 638. Biochemistry II. 4 Credits. N**

Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: CHEM 335 with a grade of C or higher and BIOL 636 with a grade of C or higher, or consent of instructor.

**BIOL 639. Advanced Biochemistry Laboratory. 3 Credits. U LFE**

The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art methodology. Prerequisite: BIOL 637 and BIOL 638 (BIOL 638 may be taken concurrently).

**BIOL 640. The Biology and Evolution of Fossil Plants. 3 Credits. N**

A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. Prerequisite: BIOL 413, or permission of instructor.

**BIOL 641. Laboratory in Paleobotany. 1 Credits. U LFE**

An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. Prerequisite: BIOL 413 or permission of instructor.

**BIOL 642. Biochemistry III: Machines on Genes. 4 Credits. N**

This one-semester lecture course for biochemistry majors is designed to complement the topics covered in BIOL 636 and BIOL 638. Emphasis will be placed on the various molecular machines involved in the transmission and utilization of genetic information, providing a biochemical perspective of replication, transcription, and translation. Prerequisite: BIOL 636 and BIOL 638 with a grade of C or higher.

**BIOL 648. Systematics and Macroevolution. 3 Credits. N**

An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent.

**BIOL 650. Advanced Neurobiology. 3 Credits. N**

The course builds an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor.

**BIOL 652. Comparative Animal Behavior. 3 Credits. N**

A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite.

**BIOL 654. Comparative Animal Behavior, Laboratory. 1 Credits. U LFE**

Laboratory and field phase of BIOL 652. Students may elect sections according to their special interests. Prerequisite: Prior or concurrent enrollment in BIOL 652.

**BIOL 655. Behavioral Genetics. 3 Credits. N**

A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor.

**BIOL 660. Summer Field Ecology. 3 Credits. N**

An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as EVRN 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N).

**BIOL 661. Ecology of Rivers and Lakes. 3 Credits. N**

Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended.

**BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Credits. N**

The course focuses on the role of chemical information molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor.

**BIOL 668. Evolutionary Ecology. 3 Credits. N**

Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor.

**BIOL 672. Gene Expression. 3 Credits. N**

The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in BIOL 772. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. A course in biochemistry is recommended.

**BIOL 680. Genomics. 3 Credits. N**

Genomics is the study of the structure, function and evolution of the genome. High-throughput technologies have given us the ability to easily and quickly sequence genomes, and measure genomewide patterns of gene expression. These tools, and the vast amounts of genome-scale data they provide, have transformed biology and medicine. This course will cover the key technological and computational methods by which genomic DNA is sequenced, genomes are assembled, and how RNA and epigenetic patterns are measured. Subsequently, we will emphasize how
these genomics tools and techniques have deepened our understanding of biology, covering questions from diverse fields to illustrate the impact of genomics on evolutionary biology, molecular and developmental genetics, human medical genetics and personalized, precision medicine. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor.

**BIOL 688. The Molecular Biology of Cancer. 3 Credits.**

The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor.

**BIOL 699. Biology Honors Research Colloquium. 1 Credits.**

Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor.

**BIOL 700. Conservation Principles and Practices. 3 Credits.**

This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 701. Topics in: _____ 1-3 Credits.**

Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests.

**BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Credits.**

An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences.

**BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Credits.**

An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry.

**BIOL 706. Natural Sciences Curation and Collections Management. 3 Credits.**

This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloging, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum's paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art's ethnographic collections. Student projects will involve one of the museum's collections with the opportunity for hands-on experience. (Same as MUSE 710.)

**BIOL 712. Evolutionary Biology - Graduate. 3 Credits.**

A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent or consent of instructor.

**BIOL 714. Graduate Ecology. 3 Credits.**

A thorough survey of the discipline of ecology. Topics include elements in physiological, population, community and ecosystem ecology. Overarching themes are 1) pattern and process, 2) ecology and evolution, 3) hierarchical nature of ecology, 4) variation in space and time, and 5) human dimensions of ecology. Prerequisite: Graduate standing or consent of instructor.

**BIOL 720. Scientific Illustration. 3 Credits.**

Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor.

**BIOL 735. Scientific Communication. 3 Credits.**

Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.)

**BIOL 741. Biology of Freshwater Invertebrates. 3 Credits.**

A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Graduate students will be expected to submit either an original collection of freshwater invertebrates or write a research essay on a topic mutually agreed upon with the professor. Not open to students who have taken BIOL 541. Prerequisite: Graduate standing; recommended: undergraduate invertebrate biology class.

**BIOL 743. Population Genetics. 3 Credits.**

Description and discussion of genetic variation in natural populations. The effects and interaction of selection, migration, mutation, mating systems, and finite population size on the maintenance of genetic variation. Discussion of the interface with evolution and population ecology. Prerequisite: BIOL 350 and BIOL 412 or equivalent.

**BIOL 750. Advanced Biochemistry. 3 Credits.**

The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor.

**BIOL 752. Cell Biology. 3 Credits.**
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor.

**BIOL 754. Brain Diseases and Neurological Disorders. 3 Credits.** Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor.

**BIOL 755. Mechanisms of Development. 3 Credits.** Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor.

**BIOL 757. Carcinogenesis and Cancer Biology. 3 Credits.** This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor.

**BIOL 759. Ecosystems Stewardship. 3 Credits.** This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.)

**BIOL 772. Gene Expression. 4 Credits.** The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.)

**BIOL 782. Principles of Biogeography. 3 Credits.** A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended.

**BIOL 784. Introduction to Museum Public Education. 3 Credits.** Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 785. Museum Management. 3 Credits.** Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 786. Fundamentals of Tropical Biology. 1-8 Credits.** The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August.

**BIOL 787. Introduction to Museum Exhibits. 3 Credits.** This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 794. Mammalogy. 3 Credits.** A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413.

**BIOL 798. Introduction to Collections Management and Utilization. 3 Credits.** This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 801. Topics in: ______. 1-3 Credits.** Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests.

**BIOL 805. Scientific Integrity in Ecology and Evolutionary Biology. 1 Credit.** This course covers the responsible conduct of research to help students initiate research projects ethically. Topics covered include expectations of federal granting agencies and the university, best practices for data management and publishing, and professional development as a graduate student. Prerequisite: Admission to the graduate program in Ecology and Evolutionary Biology, or consent of instructor.

**BIOL 807. Graduate Molecular Biosciences. 3 Credits.** An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, kinetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic
bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

**BIOL 809. Graduate Molecular Biosciences for Medicinal Chemists. 4 Credits.**
An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor.

**BIOL 811. Advanced Molecular and Cellular Immunology. 2 Credits.**
Covers recent advances in immunochemistry and immunobiology. Topics include structure and function of antibodies, hybridoma systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoimmunity, and cancer. Prerequisite: BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor.

**BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Credits.**
Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesins, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in biochemistry, or consent of instructor.

**BIOL 814. Advanced Molecular Virology. 2 Credits.**
The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics and a course in virology, or consent of instructor.

**BIOL 815. Advanced Molecular Genetics. 2 Credits.**
A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor.

**BIOL 816. Careers in the Biomedical Sciences. 1 Credits.**
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor.

**BIOL 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.**
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as CHEM 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student.

**BIOL 841. Biometry I. 5 Credits.**
The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra.

**BIOL 848. Phylogenetic Methods. 4 Credits.**
A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor.

**BIOL 860. Principles and Practice of Chemical Biology. 3 Credits.**
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor.

**BIOL 895. Human Genetics. 3 Credits.**
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics.

**BIOL 899. Master's Thesis. 1-10 Credits.**
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory progress/limited progress/no progress basis.

**BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Credits.**
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission.

**BIOL 905. Advanced Molecular Genetics. 1-3 Credits.**
A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor.

**BIOL 918. Modern Biochemical and Biophysical Methods. 4 Credits.**
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 817, or permission of instructor.

**BIOL 925. Research Grant Proposal Preparation. 3 Credits.**
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

**BIOL 943. Multivariate Data Analysis. 3 Credits.**
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: Knowledge of elementary matrix algebra.
**Policies and procedures of Graduate Studies** govern the process of being admitted as either a degree-seeking or non-degree seeking student. An applicant seeking to pursue graduate study in the College may be admitted by completing the online application form at [catalog.ku.edu/liberal-arts-sciences/biology/](http://catalog.ku.edu/liberal-arts-sciences/biology/). Note that the various B.A. and B.S. undergraduate degree programs in biology are listed at the [microbiology-0/](http://microbiology-0/) and [bacteriology-0/](http://bacteriology-0/) pages. More information about the department, our faculty, and students, and alumni of our graduate programs can be found on [the Department of Molecular Biosciences website](http://molecularbiosciences.ku.edu/), including biochemistry, biophysics, structural biology, bioinformatics, cancer biology, genetics, genomics, immunology, microbiology, virology, neurobiology, molecular, cellular and developmental biology. Our researchers investigate fundamental biological and biomedical problems on all levels, from molecules to cells to organisms. Our research labs collaborate to solve complex questions using a range of approaches, and make use of the world-class core facilities at KU. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and graduate training in biology.

The department offers Master of Science degrees in Biochemistry and Biophysics ([http://molecularbiosciences.ku.edu/biochemistry-graduate-program/](http://molecularbiosciences.ku.edu/biochemistry-graduate-program/)), in Molecular, Cellular, and Developmental Biology ([http://molecularbiosciences.ku.edu/mcdb-graduate-program/](http://molecularbiosciences.ku.edu/mcdb-graduate-program/)), and in Microbiology ([http://molecularbiosciences.ku.edu/microbiology-0/](http://molecularbiosciences.ku.edu/microbiology-0/)). General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website ([http://molecularbiosciences.ku.edu/](http://molecularbiosciences.ku.edu/)). Detailed information about admission ([https://molecularbiosciences.ku.edu/graduate-admissions/](https://molecularbiosciences.ku.edu/graduate-admissions/)) to our graduate program and financial support ([http://molecularbiosciences.ku.edu/stipend/](http://molecularbiosciences.ku.edu/stipend/)) is also available.

Note that the various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs ([http://catalog.ku.edu/liberal-arts-sciences/biology/](http://catalog.ku.edu/liberal-arts-sciences/biology/)) page.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section (p. 2408) of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

The Department of Molecular Biosciences ([http://molecularbiosciences.ku.edu/](http://molecularbiosciences.ku.edu/)) recognizes the importance of investing in the careers of future biomedical scientists. We welcome graduate students into our vibrant scientific community, where they have the opportunity to become outstanding researchers and prepare for an exciting future in science.

All students seeking a graduate degree must submit a formal application to the Molecular Biosciences graduate program. Full information on the application process, and a link to apply online can be found on our website ([https://molecularbiosciences.ku.edu/graduate-admissions/](https://molecularbiosciences.ku.edu/graduate-admissions/)). Application materials for the Molecular Biosciences graduate program include:

1. An application form
2. 1 official copy of all academic transcripts (international students must also provide a translated copy);
3. A Curriculum Vitae or résumé (1 to 2 pages);
4. 3 letters of recommendation from qualified individuals using the Graduate Letter of Recommendation form;
5. A Statement of Research Interests and Goals. A strong statement will include: (a) A description of previous research experiences, if applicable, discussing how these have prepared you for graduate school both professionally and personally, (b) A discussion of your broad research interests, and (c) A description of your future career goals, discussing how a PhD from our department will help further these goals. (1-2 pages)
6. Application Fee
7. Non-native speakers of English must meet the English proficiency requirements for employment as a GTA/GRA: minimum TOEFL (iBT) SPEAKING score of 22, AND all other parts scores at least 20; or IELTS SPEAKING score of 8, with no other part score below 5.5. Scores must be less than 2 years old from the time of initial enrollment.

More information can be found here: [https://gradapply.ku.edu/english-requirements/](https://gradapply.ku.edu/english-requirements/)

GRE scores are not required for your application. You may submit your official GRE scores if you feel it will help the admissions committee better understand your academic capabilities. But electing not to submit scores will not impact your chance of admission.

Complete applications received by December 1st are reviewed by the Molecular Biosciences graduate admissions committee. Admission into our program is competitive, and we receive a large number of applications each year. Students will be informed of admission decisions early in the new year, admissions decisions are finalized by April 15, and newly admitted students matriculate in August.

---

**Master of Science in Biochemistry and Biophysics**

**Molecular Biosciences Masters Programs**

Molecular Biosciences is an interdisciplinary group of faculty, postdoctoral fellows and graduate students who perform cutting edge research across a wide range of areas ([https://molecularbiosciences.ku.edu/research-areas/](https://molecularbiosciences.ku.edu/research-areas/)), including biochemistry, biophysics, structural biology, bioinformatics, cancer biology, genetics, genomics, immunology, microbiology, virology, neurobiology, molecular, cellular and developmental biology. Our researchers investigate fundamental biological and biomedical problems on all levels, from molecules to cells to organisms. Our research labs collaborate to solve complex questions using a range of approaches, and make use of the world-class core facilities at KU. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and graduate training in biology.

The department offers Master of Science degrees in Biochemistry and Biophysics ([http://molecularbiosciences.ku.edu/biochemistry-graduate-program/](http://molecularbiosciences.ku.edu/biochemistry-graduate-program/)), in Molecular, Cellular, and Developmental Biology ([http://molecularbiosciences.ku.edu/mcdb-graduate-program/](http://molecularbiosciences.ku.edu/mcdb-graduate-program/)), and in Microbiology ([http://molecularbiosciences.ku.edu/microbiology-0/](http://molecularbiosciences.ku.edu/microbiology-0/)). General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website ([http://molecularbiosciences.ku.edu/](http://molecularbiosciences.ku.edu/)). Detailed information about admission ([https://molecularbiosciences.ku.edu/graduate-admissions/](https://molecularbiosciences.ku.edu/graduate-admissions/)) to our graduate program and financial support ([http://molecularbiosciences.ku.edu/stipend/](http://molecularbiosciences.ku.edu/stipend/)) is also available.

Note that the various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs ([http://catalog.ku.edu/liberal-arts-sciences/biology/](http://catalog.ku.edu/liberal-arts-sciences/biology/)) page.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section (p. 2408) of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

M.A. Degree Requirements:  
Biochemistry and Biophysics  
General Requirements for All M.S. Students
Refer to each discipline for specific course requirements. General requirements include

1. A minimum of 30 hours of graduate credit;
2. A minimum of 1 laboratory rotation during the first semester of graduate study;
3. Enrollment every semester in BIOL 701 Topics in Molecular Biosciences Seminar;
4. Completion of the following courses: BIOL 807 Graduate Molecular Biosciences and BIOL 817 Rigor, Reproducibility, and Responsible Conduct in Research.
5. A graduate committee established by the beginning of the spring semester of the first year;
6. A minimum of 1 annual graduate committee meeting until completion of the degree.

The following thesis options are available:

1. Write a thesis resulting from original research on a laboratory problem.
2. Publish a research paper in a national, refereed journal. Acceptance of the paper for publication constitutes publication for conferral of the degree.
3. Write a library thesis on a topic approved by the student’s graduate committee.

Specific M.S. Requirements:

**Ph.D. Degree Requirements**

**Biochemistry and Biophysics**

**General requirements for all Molecular Biosciences Ph.D. Students**

Students should be familiar with departmental expectations associated with their degree. We recommend contacting the Graduate Program Coordinator who can provide additional detail on departmental policies, recommendations, and requirements.

1. Complete a common first-year curriculum (see below). This includes BIOL 817 which satisfies both the responsible scholarship and the research skills requirements.
2. Establish a graduate advisory committee during Fall of the second year of graduate study at the latest. This committee must meet a minimum of once each year.
3. From the start of the second year of graduate study, enroll in either BIOL 701 Cellular and Molecular Proteins or BIOL 905 Advanced Molecular Genetics, every semester.
4. To assist with development and writing of the orals research proposal, enroll in BIOL 925 Research Grant Proposal Preparation during the second year of graduate study.
5. Prepare an orals research proposal. Steps include: (a) have a graduate advisory committee meeting to discuss the specific aims of the orals proposal during the semester BIOL 925 is taken, (b) following approval of the aims, write the full proposal, (c) submit a full draft of the proposal to your readers (your major advisor, the Chair of your orals committee, and one other committee member) the semester following enrollment in BIOL 925, and (d) submit the final version of the proposal to your entire committee prior to the comprehensive orals examination.
6. Schedule the comprehensive orals examination between May 1 and June 30 of the second year of graduate study.
7. Complete at least two semesters of teaching as a GTA (Graduate Teaching Assistant) during the program.
8. Write a dissertation based on original research, provide the document to your graduate advisory committee for evaluation, and describe your research in a public oral presentation.

9. Complete the degree within seven years. (Exceptions to this requirement require a recommendation from the Director of Graduate Studies.)

Our research labs collaborate to solve complex questions using a range of approaches, and make use of the world-class core facilities at KU. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and graduate training in biology.

The department offers Doctor of Philosophy degrees in Biochemistry and Biophysics (http://molecularbiosciences.ku.edu/biochemistry-graduate-program/), in Molecular, Cellular, and Developmental Biology (MCDB (http://molecularbiosciences.ku.edu/mcdb-graduate-program/), and in Microbiology (http://molecularbiosciences.ku.edu/microbiology-0/). General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website (http://molecularbiosciences.ku.edu). Detailed information about admission (https://molecularbiosciences.ku.edu/graduate-admissions/) and financial support (http://molecularbiosciences.ku.edu/stipend/) is also available.
Note that the various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs (http://catalog.ku.edu/liberal-arts-sciences/biology/) page.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

The Department of Molecular Biosciences (http://molecularbiosciences.ku.edu/) recognizes the importance of investing in the careers of future biomedical scientists. We welcome graduate students into our vibrant scientific community, where they have the opportunity to become outstanding researchers and prepare for an exciting future in science.

All students seeking a graduate degree must submit a formal application to the Molecular Biosciences graduate program. Full information on the application process, and a link to apply online can be found on our website (https://molecularbiosciences.ku.edu/graduate-admissions/).

Application materials for the Molecular Biosciences graduate program include:

1. An application form
2. 1 official copy of all academic transcripts (international students must also provide a translated copy);
3. A Curriculum Vitae or résumé (1 to 2 pages);
4. 3 letters of recommendation from qualified individuals using the Graduate Letter of Recommendation form;
5. A Statement of Research Interests and Goals. A strong statement will include: (a) A description of previous research experiences, if applicable, discussing how these have prepared you for graduate school both professionally and personally, (b) a discussion of your broad research interests, and (c) a description of your future career goals, discussing how a PhD from our department will help further these goals. (1-2 pages)

6. Application Fee
7. Non-native speakers of English must meet the English proficiency requirements for employment as a GTA/GRA: minimum TOEFL (iBT) SPEAKING score of 22, AND all other parts scores at least 20; or IELTS SPEAKING score of 8, with no other part score below 5.5. Scores must be less than 2 years old from the time of initial enrollment.

More information can be found here: https://gradapply.ku.edu/english-requirements (https://gradapply.ku.edu/english-requirements/)

GRE scores are not required for your application. You may submit your official GRE scores if you feel it will help the admissions committee better understand your academic capabilities. But electing not to submit scores will not impact your chance of admission.

Complete applications received by December 1st are reviewed by the Molecular Biosciences graduate admissions committee. Admission into our program is competitive, and we receive a large number of applications each year. Students will be informed of admission decisions early in the new year, admissions decisions are finalized by April 15, and newly admitted students matriculate in August.

Our holistic evaluation is based on several criteria, including grades, the strength of recommendation letters, previous research experience, and the fit of your career goals with our educational program.

The department is committed to enhancing diversity (https://molecularbiosciences.ku.edu/dei-statement/) in the life sciences, encourage participation from individuals with diverse life experiences, and strive to foster an inclusive research and training environment for all our faculty, students, and staff.

All supporting documentation should be uploaded online when you apply. If this is not possible, please send documentation to:

**Microbiology**

**General Requirements for all Molecular Biosciences Ph.D. Students**

Students should be familiar with departmental expectations associated with their degree. We recommend contacting the Graduate Program Coordinator who can provide additional detail on departmental policies, recommendations, and requirements.

1. Complete a common first-year curriculum (see below). This includes BIOL 817, which satisfies both the responsible scholarship and the research skills requirements.
2. Establish a graduate advisory committee during Fall of the second year of graduate study at the latest. This committee must meet a minimum of once a year.
3. From the start of the second year of graduate study, enroll in either BIO 701 Cellular and Molecular Proteins or BIO 905 Advanced Molecular Genetics, every semester.
4. To assist with development and writing of the orals research proposal, enroll in BIO 925 Research Grant Proposal Preparation during the second year of graduate study.
5. Prepare an orals research proposal. Steps include: (a) have a graduate advisory committee meeting to discuss the specific aims of the oral proposal during the semester BIO 925 is taken, (b) following approval of the aims, write the full proposal, (c) submit a full draft of the proposal to your readers (your major advisor, the Chair of your orals committee, and one other committee member) the semester following enrollment in BIO 925, and (d) submit the final version of the proposal to your entire committee prior to the comprehensive orals examination.
6. Schedule the comprehensive orals examination between May 1 and June 30 of the second year of graduate study.
7. Complete at least two semesters of teaching as a GTA (Graduate Teaching Assistant) during the program.
8. Write a dissertation based on original research, provide the document to your graduate advisory committee for evaluation, and describe your research in a public oral presentation.
9. Complete the degree within seven years. (Exceptions to this requirement require a recommendation from the Director of Graduate Studies.)

Doctor of Philosophy in Molecular, Cellular, and Developmental Biology

Molecular Biosciences Doctoral Programs

Molecular Biosciences is an interdisciplinary group of faculty, postdoctoral fellows and graduate students who perform cutting edge research across a wide range of areas, including biochemistry, biophysics, structural biology, bioinformatics, cancer biology, genetics, genomics, immunology, microbiology, virology, neurobiology, molecular, cellular and developmental biology. Our researchers investigate fundamental biological and biomedical problems on all levels, from molecules to cells to organisms. Our research labs collaborate to solve complex questions using a range of approaches, and make use of the world-class core facilities at KU. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and graduate training in biology.

The department offers Doctor of Philosophy degrees in Biochemistry and Biophysics, in Molecular, Cellular, and Developmental Biology (MCDB), and in Microbiology. General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website (https://molecularbiosciences.ku.edu/). Detailed information about admission (https://molecularbiosciences.ku.edu/graduate-admissions/) and financial support (https://molecularbiosciences.ku.edu/stipend/) is also available.

Note that the various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs (http://catalog.ku.edu/liberal-arts-sciences/biology/) page.

Specific Ph.D. Requirements: Molecular, Cellular, and Developmental Biology

In addition to the required courses listed above, all MCDB PhD students are required to take a minimum of three (3) graduate-level courses (numbered 600 and above) that are collectively worth a minimum of nine (9) credits. All such classes must be completed by the end of the second year of graduate study. A number of acceptable classes are offered each year, and the specific classes each student takes will be decided upon in consultation with their research mentor and/or graduate advisory committee. Please see the graduate handbook for an up-to-date list of possible courses.

Graduate Certificate in Chemical Biology

Graduate Certificate in Chemical Biology

Through scientific progress our understanding of cellular systems has grown leading to a more nuanced appreciation of both these systems and associated disease processes. This knowledge has led to the formulation of a myriad new questions regarding the interactions of macromolecules within cells and the regulation of these interactions. The Certificate Program in Chemical Biology (http://chembio.ku.edu/) focuses on developing molecular tools necessary to probe these systems and explore new questions. In order to employ these tools, students require wide access to technologies, databases, scientific training environments and resources that facilitate learning at the interface of biology and chemistry. Multidisciplinary curricula that unite students around common goals empower students to acquire a working knowledge of disciplines outside their area of expertise. The resulting interdisciplinary experience paves the road to collaborative science driving broad advances in
understanding human health. The program has participation of students and mentors from the College of Liberal Arts and Sciences (http://clas.ku.edu/) (primarily Chemistry (http://chem.ku.edu/) and Molecular Biosciences (http://molecularbiosciences.ku.edu/)), the School of Pharmacy (http://pharmacy.ku.edu/) (principally in Medicinal Chemistry (http://medchem.ku.edu/) and Pharmaceutical Chemistry (http://pharmchem.ku.edu/)) and the School of Engineering (https://engr.ku.edu/) (Bioengineering (https://bioengr.ku.edu/)).

About the Program
At the heart of the Certificate Program in Chemical Biology is an integrated academic curriculum that provides participating students with a working knowledge of the key concepts and methods of the interdisciplinary field of Chemical Biology. Students with strong chemical or biological backgrounds will reap the benefits of collaborative exposure to modern techniques and theories in disciplines across the chemical biology interface. Students are required to:

- Follow a defined course sequence designed to provide a working knowledge across the chemical biology interface. The curriculum includes a flagship course defining the principles and practice of chemical biology. A fundamental part of the curriculum is the seminar course entitled "Careers in the Biomedical Sciences," which highlights opportunities for doctoral graduates inside and outside academia and industry. The training also emphasizes the completion of rigorous, reproducible, transparent and ethical research.
- Organize and participate in the annual Biomedical Sciences Symposium. This symposium includes oral presentations by the students on their research and a lecture by an internationally recognized keynote speaker in a research area at the chemistry/biology interface. The students also lead an afternoon interdisciplinary poster session that is open to all students.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The Certificate Program is open to all graduate students at KU. The training platform will provide students with an integrated educational training program that hones their skills and provides a broad wealth of information for career development. This program extends beyond the standard knowledge and capabilities developed in the independent departmental doctoral programs. Candidates in this program develop a working knowledge of both advanced chemistry and advanced biochemistry/biology, which supplements the more specialized environment within the laboratory of their research mentor. Underrepresented minority students and students with disabilities are encouraged to apply. Any necessary accommodations for students with disabilities are made with the assistance of the office of Student Access Services (http://access.ku.edu/).

Please see the Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/) policy for information on admission requirements. Applications may be submitted to the office of Graduate Admissions (https://gradapply.ku.edu/apply/).

Certificate Requirements
Course requirements: Students must complete 5 courses for a total of 14-17 graduate credit hours.

Museum Studies Program

Museum Studies Graduate Program

These are exciting and challenging times for museums -- longstanding premises are being questioned, and many established practices are being reconsidered. Museum professionals today work in an environment far different than that of even a few years ago. Emerging technologies now allow museums to bring their collections and their programs to audiences well beyond the confines of museum buildings. With this expanded reach, museums are preparing for dramatic changes in the age, ethnicity, education, and economic status of their audiences. Exhibitions and public programs are evolving; more than ever, educators, curators, and designers are seeking ways to engage visitors in complex issues of broad concern. Behind the scenes, collection stewardship is being reevaluated in response to practical, political, and ethical concerns. Additionally, unprecedented scholarly attention is being directed toward the ways in which museums have acquired their collections, represented their subjects, and engaged with the public. In the midst of this transformation, long-standing assumptions about museums' public value have been called into question, requiring museum leaders to craft new collaborations and community partnerships in order to survive.

To advance and thrive in this dynamic environment, twenty-first century museum professionals will need knowledge informed by practice,
imagination tempered by rigor, and leadership stimulated by collaboration. This is what we can offer at the University of Kansas. Students take advantage of the superb facilities at KU, including the Dole Institute of Politics, Biodiversity Institute & Natural History Museum, Spencer Museum of Art, Spencer Research Library, and Wilcox Classical Museum, as well as nearby historical agencies, specialized libraries, and museums.

Our flexible, interdisciplinary M.A. degree gives you the foundations of the field plus hands-on skills and experience in your specific area of museum work. Our unique dual master’s program with African & African-American Studies allows you to earn two master's degrees in three years, and we also offer a 15-credit graduate certificate program. See our website (http://museumstudies.ku.edu/) for further details about our degree offerings.

Courses

**MUSE 177. First Year Seminar:** _____. 3 Credits.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Museum Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**MUSE 301. Museums and Society: Past, Present, Future.** 3 Credits.
An introduction to museums and the field of museum studies. Using short lectures, discussion, laboratory exercises, field trips, and guest speakers, students will explore the history, role, and function of museums including types, dimensions, creation and management of collections, exhibition development, administration, and visitor experiences. Includes instruction and practice in writing for a variety of museum contexts and audiences. Designed for students interested in museums and curious about museum careers.

**MUSE 400. Directed Readings in Museum Studies.** 1-3 Credits.
Directed reading in an area of Museum Studies for which there is no course in the Museum Studies program, or in cooperating departments and in which a member of the faculty has expertise. Prerequisite: Consent of instructor.

**MUSE 480. Special Topics in Museum Studies:** _____. 1-3 Credits.
Courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Instructor permission usually required. Prerequisite: Varies by section and instructor.

**MUSE 580. Special Topics in Museum Studies:** _____. 1-3 Credits.
Courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Instructor permission may be required. Prerequisite: Successful completion of a History, Art History, Anthropology or Museum Studies course numbered below 500, or permission of instructor.

**MUSE 699. Anthropology in Museums.** 3 Credits.
The course reviews the history of archeological, ethnographic, physical anthropological and other types of collections. It also considers current issues facing anthropologists, such as: contested rights to collections and the stories that accompany them; representation and interpretation of cultures; art and artifact; conceptualization, design and building of exhibitions; and anthropological research and education in the museum. (Same as ANTH 699.) Prerequisite: ANTH 150 or ANTH 108 or consent of instructor.

**MUSE 701. Museum Management.** 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, GEOL 783, and HIST 728.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**MUSE 703. Introduction to Museum Exhibits.** 3 Credits.
Presentation of principles and practices of exhibit management, design, and production. Topics will include developing a master plan for museum exhibits; concept development; design, installation, and maintenance of exhibits; design theory; design process; label writing and editing; selection of materials architectural requirements and building codes; cost estimating; publicity; security; and exhibit evaluation. Consideration will be given to exhibition problems in public and private museums in the areas of anthropology, art, history, natural history, and technology. (Same as AMS 700, BIOL 787, GEOL 781, and HIST 723.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**MUSE 704. Introduction to Collections Management and Utilization.** 3 Credits.
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, ANTH 798, BIOL 798, GEOL 785, and HIST 725.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

**MUSE 705. Introduction to Museum Public Education.** 3 Credits.
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, GEOL 784, and HIST 721.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**MUSE 706. Conservation Principles and Practices.** 3 Credits.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects also be considered. (Same as AMS 714, BIOL 700, GEOL 780, and HIST 722.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**MUSE 707. Practical Archival Principles.** 3 Credits.
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as HIST 727.)

**MUSE 710. Natural Sciences Curation and Collections Management.** 3 Credits.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloguing, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the
museum's paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art's ethnographic collections. Student projects will involve one of the museum's collections with the opportunity for hands-on experience. (Same as BIOL 706.)

**MUSE 780. Special Topics: _____**. 1-3 Credits.
Advanced courses on special topics in museum studies, given as need arises. Lectures, discussions, readings, and guest speakers. Topic for semester to be announced. Prerequisite: Graduate standing in Museum Studies Program or permission of instructor.

**MUSE 790. Advanced Study.** 1-3 Credits.
Individual research in a specialized topic not ordinarily treated in a Museum Studies core course for which there is a member of the graduate faculty competent and willing to direct a research project. Prerequisite: Consent of instructor.

**MUSE 792. Directed Readings.** 1-3 Credits.
Directed reading in an area of Museum Studies in which there is no particular course in the Museum Studies program or in cooperating departments but in which there is a member of the graduate faculty competent and willing to direct a program study. Prerequisite: Consent of instructor.

**MUSE 799. Museum Internship.** 1-6 Credits.
Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, ANTH 799, and GEOL 723.)

**MUSE 801. The Nature of Museums.** 3 Credits.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as HIST 720.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**MUSE 802. Culture of Museums.** 3 Credits.
Culture of Museums is the second of a 2-semester course sequence, and highlights classic texts and current directions in museum studies. It is organized around the core conceptual domains of museums - Materiality, Representation, and Engagement. The course establishes the framework for understanding changes on the horizon for museums, and enables students to be familiar with classic texts in the field. Museums of art, history, natural history, are included, as well as museums large and small. Each week the class will read assigned articles or chapters and will be prepared to discuss and analyze the assignment. In addition, each week there will be several monographs assigned that elaborate and inform the topic. One student will take responsibility for each work and will lead discussion concerning the material. The student will familiarize themselves with the work, and should meet with the instructor before class to structure their presentation. In class, the student will lead discussion and emphasize key elements in the work.

**MUSE 803. Seminar in Current Museum Topics.** 3 Credits.
This course has two core objectives: (1) to consider current issues in and around museums that will have a bearing on the field's future, and (2) to be a springboard for museum studies students to formulate and make substantial headway on their required final projects. Therefore, in addition to each week's readings assigned by the instructor, each student will have several opportunities to select the readings for the rest of the class. The student-assigned readings will be relevant to each student's research, and will (1) help students acquire a more nuanced and critical grasp of works that are key to their research by getting feedback from the rest of the class; and (2) build the class's general awareness of important scholarship in the field.

**Master of Arts in Museum Studies**

**Museum Studies M.A. Program**
The 36-hour Museum Studies M.A. curriculum provides a comprehensive overview of the discipline, opportunities for mastering core components of museum practice, avenues for exploring the interdisciplinary nature of museums, grounding in current issues facing them, and possibilities for research to develop new and innovative approaches in the field. Students also complete 500 total museum experience hours while in the program.

Our graduates work as collection managers, educators, exhibit designers, curators, archivists, directors and more at museums and historical agencies across the country and around the world.

**Admission to Graduate Studies**
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Museum Studies M.A. Program**

Students are admitted to the M.A. program only in the fall semester, and the application deadline is February 1. Only in exceptional circumstances will we consider applications submitted after the deadline.

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission, a student must hold a bachelor's degree. Non-native speakers of English must meet Graduate Studies’ English proficiency requirements for admission (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

A full list of the required application materials can be found on the Museum Studies website (http://museumstudies.ku.edu/how-apply/).

**M.A. Degree Requirements**
The M.A. degree in museum studies requires 36 credit hours at the graduate level. Students in the Museum Studies program will complete the following:

1. The Museum Studies Core - 9 credit hours
2. Museum Professional Areas - 9 credit hours
3. Museum Conceptual Domains - 6 credit hours
4. Electives - 9 credit hours
5. Museum Experience (Internship) - 3 credit hours
6. Final Product & Examination

1. Museum Studies Core (9 credit hours)
The Museum Studies Core ensures that all Museum Studies students gain a comprehensive understanding of the theories, history, techniques, and problems common to museums, historical agencies and related institutions. The Capstone course, taken in a student’s third semester of study, provides an avenue for students to conduct research or other creative activities that advance the discipline of museum studies.

Courses taken must be at the 500 level or above. The following lists program requirements based on the general relevance of the course of students, and their advisors, to ensure that individual courses meet one of which must be a Museum Studies (MUSE) course. Many courses in other departments could fulfill requirements; it is the responsibility of students, and their advisors, to ensure that individual courses meet program requirements based on the general relevance of the course and assurance that the student’s work in the class will be applicable to museum studies by meeting with instructors and examining syllabi. Courses taken must be at the 500 level or above. The following lists include examples of courses that may fulfill the professional areas requirement.

### 2. Museum Professional Areas (9 credit hours)

Students will develop expertise in one of the principal specialties of museum work by completing at least two courses in that area, at least one of which must be a Museum Studies (MUSE) course. Many courses in other departments could fulfill requirements; it is the responsibility of students, and their advisors, to ensure that individual courses meet program requirements based on the general relevance of the course and assurance that the student’s work in the class will be applicable to museum studies by meeting with instructors and examining syllabi. Courses taken must be at the 500 level or above. The following lists include examples of courses that may fulfill the professional areas requirement.

<table>

<td>3</td>
</tr>
<tr>
<td>MUSE 803</td>
<td>Seminar in Current Museum Topics</td>
<td>3</td>
</tr>
</tbody>
</table>

### 3. Courses focusing on Museum Conceptual Domains (6 credit hours)

The conceptual domains of museum work address in depth the conceptual and theoretical foundations of museums. Courses that emphasize conceptual domains will place museological subjects in broader historical and intellectual frameworks. Students may take courses which may be offered in one or several disciplines. Courses will be selected based on the general relevance of the course, and assurance that the student’s work in the class will be applicable to museum studies. Please see Museum Studies website for examples of possible courses.

### 4. Electives and Other Museum Studies Courses (9 credit hours)

Students are expected to deepen their knowledge of the field by taking courses in a subject area pertinent to their area of specialization. Courses will be selected with the approval of the student’s committee chair, as well as the course instructor.

### 5. Museum Experience (3 credit hours)

While enrolled in the Museum Studies program, students are required to gain at least 500 hours of museum experience, of which at least 250 hours must be in an approved, professionally supervised internship.

### 6. Final Product and Examination

Each student will be responsible for a final product, developed through research or other creative activity, that contributes to museum studies and demonstrates the student’s ability to engage conceptually and professionally with the discipline of museum studies.

### Course Level Requirement

Students pursuing an M.A. in Museum Studies must take 50% or more of their coursework at the 700 level or above. Core courses count toward this requirement.

### Dual Degree: MA in Museum Studies and African and African-American Studies

Museum Studies and African and African-American Studies offer dual master’s degrees with coordinated curricula so students are able to complete 2 M.A. degrees in 3 years. 15 graduate credit hours are applied to both programs, allowing students to complete a 33-credit-hour AAAS degree and a 36-credit-hour Museum Studies degree with just 54 graduate credits.

Please see Museum Studies website for examples of possible courses.
This program of study is designed to enhance and diversify opportunities for graduate students who are motivated to enter the cultural heritage field as specialists in African and African-American Studies. This 3-year dual program allows students to expand their contacts with faculty, enhance their professional networks, and deepen their knowledge of both fields of study.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Students seeking admission to the dual degree will complete just one application but must meet the admission requirements for both programs.

**Museum Studies M.A. - Admission Requirements** ([http://museumstudies.ku.edu/how-apply/](http://museumstudies.ku.edu/how-apply/))

Students who have begun coursework in either Museum Studies or African & African-American Studies can apply to be a dual degree student prior to completing all coursework requirements for the first degree. In consultation with each department’s Director of Graduate Studies, they may be able to receive credit for coursework already completed. However, the student may be required to take more than the required 54 credit hours of coursework to obtain both degrees if the application for admission to the second degree program is submitted after the student has completed courses that will not count toward the second program’s requirements.

Please see the Admission to Graduate Study ([https://policy.ku.edu/graduate-studies/admission-to-graduate-study/](https://policy.ku.edu/graduate-studies/admission-to-graduate-study/)) policy for additional information on admission requirements.

Students completing the dual degree take all of the required courses in each of the respective programs, as well as fulfilling each program’s requirements to gain a breadth of knowledge. Coordination in advising between the two programs enables students to take courses that satisfy the degree needs for both programs. To earn both degrees, students complete 54 graduate credit hours, 15 of which are applied to both programs. Because the required courses are offered regularly, students are able to complete the required courses in the first four semesters of the program, using the final two semesters to complete the remaining credit hour requirements. The programs’ curricular requirements follow; further details on program expectations are available in the respective Graduate Student Handbooks.

<td>Graduate Study for both programs.</td>
<td></td>
</tr>
<tr>
<td>7.</td>
<td>Final Project or Thesis</td>
<td></td>
</tr>
</tbody>
</table>
Students completing the dual degree program are required to defend either a final project or thesis in their final semester. The student should consult with their African & African-American Studies and Museum Studies faculty advisors to identify a project or thesis topic that effectively incorporates both areas of study. Faculty advisors from both programs will oversee and evaluate the project or thesis. Students who choose to complete a thesis must enroll in 3 credit hours of AAAS 899 in their final semester in lieu of an elective course. Students who choose to complete a final project will take 15 credit hours of dual degree electives as described above. Each student will successfully defend their final project or thesis as their final master's examination. The final exam committee, chosen by the student, must have at least four members: at least two from the Museum Studies area and at least two from the African & African-American Studies area.

If a student decides to complete only the MUSE M.A. or AAAS M.A. and withdraw from the other program, they must complete all requirements for the stand-alone degree.

Course Level Requirement

Students pursuing a Dual M.A. in Museum Studies and African & African-American Studies must take 50% or more of their coursework at the 700 level or above. Core courses and thesis hours (if applicable) count toward this requirement.

Graduate Certificate in Museum Studies

Graduate Certificate in Museum Studies

The course of study leading to the Graduate Certificate in Museum Studies comprises 15 credit hours at the graduate level. It is designed to provide students with a solid grounding in the histories, concepts, and practices of the discipline of museum studies. The certificate program enables students to integrate knowledge of museum studies into their own academic disciplines or professional training.

The certificate represents an additional credential for students from a variety of academic fields to prepare for doctoral study, as well as for employment in museums and related fields such as historic preservation, cultural resource preservation, archives, and government agencies.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Graduate Certificate in Museum Studies

Eligibility criteria for admission to the certificate program follow Graduate Studies' admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to the program, an applicant must hold a bachelor's degree. Non-native speakers of English must meet Graduate Studies' English proficiency requirements for admission (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

Application requirements differ for current KU students versus non-KU students, so please visit the Museum Studies website (https://museumstudies.ku.edu/how-apply/) for a full list of the required application materials.

The Museum Studies Graduate Certificate will require 15 hours of course work including a 3 credit (minimum) research practicum or internship. The remaining 9 hours will be selected from courses in which there is a demonstrable component that has relevance to museum studies.

1 To satisfy the requirement of 1 course in a museum conceptual domain, students must have approval of their advisor.

Department of Philosophy

Why study philosophy?

In philosophy we ask big, important questions. While asking such questions is easy, answering them is difficult. Because these questions are often abstract and vague, it is necessary to use precise reasoning and analysis to clarify what exactly it is we are asking. Only then can we attempt to develop answers. For example:

<table>
<thead>
<tr>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conservation Principles and Practices</td>
<td></td>
</tr>
<tr>
<td>Practical Archival Principles</td>
<td></td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>Total Hours</td>
<td>15</td>
</tr>
</tbody>
</table>
• What is the morally right thing to do?
• What is the nature of the mind?
• When can we know something, rather than merely believing it?
• Do the sciences exhaust what can be known about the natural world?
• What is justice?
• What assumptions do we make when we try to answer questions like these?
• Plus many, many others...

In studying philosophy, you will learn what others have thought about life’s big questions. You will also learn to challenge those views, and to develop your own thoughts in a precise, logical manner. Philosophy will help you develop critical thinking skills, enabling you to analyze the underlying logic and assumptions in arguments about a variety of topics. This is a skill that generalizes to virtually every area of life.

Undergraduate Programs

The department offers a range of courses in philosophy, both in the main systematic divisions of the subject and in its major historical periods. Philosophy courses are often suitable not only for majors but also for students whose main interests lie in other areas. Many philosophy courses satisfy requirements in other degree programs in the College and professional schools.

Argument and Reason Requirement

PHIL 148 and PHIL 310 each meet the College argument and reason requirement for the B.A. and B.G.S. degrees.

Interdisciplinary Course Work

The department offers courses in applied ethics, ethics, feminism, logic, and the philosophy of science to fit the needs and interests of nonmajors. Many of these may be taken without prerequisites. The nonmajor may wish to supplement work in other fields or schools with a series of related courses in philosophy. Some suggested programs to be supplemented with this type of interdisciplinary course work are business, prelaw, premedicine, and engineering; classics, art history, and literature; and natural sciences and mathematics. Lists of philosophy courses relating to these areas are available. Consult the director of undergraduate studies.

Graduate Programs

The department offers graduate programs in philosophy leading to M.A. and Ph.D. degrees. With the School of Law, the department also offers a joint program in law and philosophy leading to a J.D./M.A. Our faculty (http://philosophy.ku.edu/faculty/) is dynamic, professionally active, and committed to excellence in scholarship and teaching. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation.

Departmental Funding

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year (9 months) and come with a competitive salary, a 100% tuition waiver, and qualify the student for University-subsidized group health insurance. Appointments are guaranteed, based on funding availability and performance, for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training, close mentoring, and the opportunity to teach courses in a variety of fields within philosophy, providing them with a strong base of teaching experience upon entering the job market.

Additional Funding

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for KU graduate students.

Graduate Non-Degree Seeking Status

Students who are interested in enrolling in graduate-level coursework in the Department of Philosophy without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s webpage (https://philosophy.ku.edu/nds-overview/) for further details.

Courses

PHIL 140. Introduction to Philosophy. 3 Credits. HR H
An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge.

PHIL 141. Introduction to Philosophy Honors. 3 Credits. HR H
An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge. Prerequisite: Open only to students in the University Honors Program or by consent of department.

PHIL 148. Reason and Argument. 3 Credits. H
An introduction to the theory and practice of logical analysis. Special emphasis is placed upon the logical appraisal of everyday arguments.

PHIL 150. Philosophical Communication. 3 Credits. S
This course provides an introduction to philosophy, with a focus on the traditional philosophical practice of oral communication and argument. Through exploration of perennial philosophical questions (e.g., Are there different ways of knowing? What makes for a good life? Could computers have minds? Are we obligated to obey the law? What makes you the same person over time?), students develop their ability to participate in various forms of philosophical communication. In this course, students have the opportunity to teach course material to peers, engage in class debates over philosophical issues, and craft short presentations exploring a facet of the course topic.

PHIL 160. Introduction to Ethics. 3 Credits. HR H
An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice.

PHIL 161. Introduction to Ethics Honors. 3 Credits. HR H
An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice. Prerequisite: Open only to students in the University Honors Program or by consent of department.

PHIL 170. The Meaning of Life. 3 Credits. H
This course introduces central questions about the meaning of life. The question itself may be taken in a number of ways: Why is there a
universe that contains life? What is the nature or purpose of human being and persons? What is the point of our existence? Is it possible to lead a meaningful life? This course examines these and other questions relating to meaning in life, such as our place in the physical universe, the possibility and significance of God’s existence, the nature of human persons (including the relation between, and nature of, body, mind, and consciousness), what death tells us about the nature of life and whether it is appropriate to fear death, the nature of ‘the good life’ (including the import for ‘the good life’ of knowledge, success, pleasure, health, friendship, love, in both our physical and mental life, etc.), the nature of value and its relation to meaning in life, and our obligations to other beings.

PHIL 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Philosophy. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

PHIL 180. Introduction to Social and Political Philosophy. 3 Credits. HR
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty.

PHIL 181. Introduction to Social and Political Philosophy, Honors. 3 Credits. HR
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty. Prerequisite: Open only to students in the University Honors Program or by consent of department.

PHIL 200. Study Abroad Topics in Philosophy: ______. 1-6 Credits. H
This course is designed for the study of special topics in Philosophy. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

PHIL 210. Playing the Odds: Reasoning, Chance, and Probability. 3 Credits. H
Many of the things we need to think through involve uncertainty. There may be a chance that it will rain, that a flight will get canceled, that a car accident will occur, or that a team will win. Should you buy a $10 parking pass if you know there’s a 5% chance you will get a $100 fine if you don’t buy one? This course will teach you how to think through uncertainty and probability, using philosophical and mathematical techniques, logic, and critical thinking. This course presupposes knowledge of pre-algebra and basic high school algebra.

PHIL 305. The Meaning of Death. 3 Credits. HR
A number of puzzles and paradoxes surround the nature and (dis)value of death. These include: is death a bad thing? If so, when is it a bad thing? Is it rational to fear death? If so, is it rational to regret that we were not born earlier? What is death? Can a person’s death have a valuable meaning? Readings for this course will be taken from Epicurus, Derek Parfit, Fred Feldman, and many others.

PHIL 306. God, Buddhism, and the Good Life. 3 Credits. HR
This course introduces students to rigorous philosophic debates about some gripping existential questions surrounding the value of religion with God, a religion without God (focusing on Buddhism), and atheism. We will explore arguments for opposing answers regarding topics such as: whether atheism threatens the value of life; differences in how the self is viewed in Western and Eastern religions; and differences in how morality is grounded in these different traditions. We will examine the compatibility of atheism with Buddhism, and of Buddhism with belief in God. (Same as REL 306.) Prerequisite: A 100-level Philosophy course or permission of instructor.

PHIL 310. Introduction to Symbolic Logic. 3 Credits. H
An introduction to the theory and practice of elementary symbolic logic. Special emphasis will be placed upon the logical analysis of mathematical proof and upon a proof of the consistency of elementary logic.

PHIL 320. Philosophical Issues in the Life Sciences. 3 Credits. HR
A philosophical analysis of theoretical and ethical issues that arise in the practice of the life sciences. Discusses the conceptual foundation of the life sciences—evolutionary theory and genetics. Critically explores the use of statistical and non-human-animal models. Examines ethical issues including problems that arise in human and other animal experimentation, obligations to the environment, proper use of patents, and conflicts in professional duties.

PHIL 323. Philosophy of Psychology. 3 Credits. HR
The philosophy of psychology is a relatively new field of inquiry in philosophy and so the question of what the philosophy of psychology is remains an open question. In this course, we will understand the philosophy of psychology in two ways. First, it is the study of the nature of psychology and the various capacities and mechanisms that make cognition possible. We will consider whether there is a unique psychological level of explanation or whether psychology ultimately reduces to the brain. We will also explore various philosophical puzzles raised by consideration of psychological abilities like memory, attention, and emotion. Second, philosophy of psychology is a subfield of philosophy of science, where we examine a particular science—here, experimental psychology—as a way to explore broader questions about what science is, how science explains phenomena, and how values intersect with its investigations. All of this makes it an exciting time to study the philosophy of psychology—as students in this course, student’s interests will play a role in selecting topics and shaping the direction of our inquiry. (Same as PSYC 323.)

PHIL 325. Philosophy of Computation, AI, and Robots. 3 Credits. HR
Computers are everywhere, and they seem to be getting increasingly intelligent. However, it is surprisingly difficult to say what exactly a computer is, and what it means for one to be intelligent. In this course, we will examine arguments about the nature of computation, including how computation is used in science, whether computers and robots could really have minds (or could only just simulate having a mind), and whether the brain might literally be a computer. Prerequisite: An introductory course in philosophy or permission of instructor.

PHIL 330. Belief and the Social. 3 Credits. HR
This is a course in social epistemology. It explores how social phenomena within communities and between individuals bear on issues of belief, justification, and knowledge. Topics may include philosophical examinations of lies, BS (in the technical sense of Frankfurt and others), conspiracy theories, propaganda, disagreement, testimony, expertise, trust, group belief, and epistemic injustice.

PHIL 335. Philosophy of Social Groups and Identities. 3 Credits. H
This course is on social groups, which include teams and clubs as well as gender and racial groups. Topics to be covered might include whether
a group exists, in addition to its members, and if so what kind of thing it is; whether group membership in various cases is a matter of members sharing a group identity rather than having certain biological features in common or occupying a common social position; and what it is for someone to have a certain group identity in the first place. Additional topics to be covered might include whether there are different kinds of groups; whether a group can do things, and be responsible for doing things, that none of its members does individually; and whether there are ways in which we should, or shouldn't, talk about a group and its members. Groups and identities to be discussed might include those relating to gender, race, sexual orientation, and disability.

PHIL 340. Women Philosophers. 3 Credits. HR
This course will examine and evaluate the work of some of the women philosophers in the history of philosophy. The course will focus on a variety of philosophical issues, including social and political issues, such as women's equality and education and political rule; metaphysical issues, such as mind-body dualism, vitalism, and the existence of God; and issues concerning the relationship between philosophy, science, and religion.

PHIL 350. Philosophical Issues in Religion. 3 Credits. H
This course will consider, from a philosophical perspective, some of the problems in religion which arise in the development of “Natural Theology” broadly conceived. (Same as REL 380.)

PHIL 355. Moral Issues in Political Governance. 3 Credits. HR
This course offers a survey of competing ethical frameworks and applies them to issues in governmental policy and political activity. Topics may include the duties and virtues of citizenship, conflict of interest, public health policy, immigration, corruption, the value of patriotism, and conflicts between private and public morality. This course leaves aside debates about what sort of political framework to adopt and focuses on moral issues that matter from most any political perspective.

PHIL 360. Moral Issues in Business. 3 Credits. H
After a brief survey of techniques of moral argument and analysis, particular moral issues related to business will be discussed. These will include such topics as advertising, conflict of interest, personal and corporate responsibility, codes of conduct, private property, strikes, just wage, and the tension between moral ideals and business pressures.

PHIL 368. Moral Issues in Sports. 3 Credits. H
This course is a philosophical investigation of the nature and value of sports. Provides students with an overview of ethical theory and considers principled answers to questions about the values of sports and about how those values can be sustained or demeaned. Students debate a variety of live controversies in sports today such as drugs, cheating, sexism, racism, the role of sports in educational institutions, Title IX, commercialization, and violence.

PHIL 369. Moral Issues in Warfare. 3 Credits. H
This course is a philosophical investigation of the nature and ethical dimensions of warfare and the use of force. It provides students with an overview of ethical theory and considers answers to questions about the principles of just war theory, the values served by these principles, and about how those values can be sustained or demeaned. Students debate a variety of live controversies in warfare today such as just causes for war, when threats ought to be deemed imminent, collateral damage and the nature of non-civilians on the battlefield, and terrorism.

PHIL 370. Moral Issues in Medicine. 3 Credits. H
After a brief survey of techniques of moral argument and analysis, particular moral issues related to medicine will be discussed. The justification and limits of some rules of professional conduct that deal with such matters as confidentiality, truth-telling, and protection of medical research subjects will be considered. Issues relating to death and dying in medicine such as abortion, euthanasia, and the refusal of life-saving medical therapy also will be discussed.

PHIL 375. Moral Issues in Computer Technology. 3 Credits. H
After surveying the nature of ethics and morality and learning some standard techniques of moral argumentation, we shall examine such topics as: property and ownership rights in computer programs and software; privacy in computer entry and records; responsibility for computer use and failure; the “big brother” syndrome made possible by extensive personal data banks; censorship and the world-wide web; computer illiteracy and social displacement; and ethical limits to computer research.

PHIL 380. Environmental Ethics. 3 Credits. H
After a brief survey of techniques of moral argument and analysis, particular moral issues related to the environment will be discussed. These will include such topics (one of which may be dealt with in depth) as animal rights, rights of future generations, wilderness preservation, population control, endangered species, and economics and public policy. Prerequisite: EVRN 148 or consent of instructor.

PHIL 381. Feminism and Philosophy. 3 Credits. H
An examination of topics of philosophical interest that are important in the feminist movement such as the nature of sexism, the concept of sexual equality, the ethics of sexual behavior, the nature of love, feminist analyses of the value of marriage and family, the ethics of abortion, and justifications for preferential treatment of women. (Same as WGG 381.)

PHIL 382. Philosophy in Literature and Film. 3 Credits. H
A survey of topics of philosophical interest as they appear in literature, film, and the writings of philosophers. We will consider what these arts can contribute to the practice of philosophy and how philosophy might guide our engagement with literature and film.

PHIL 384. Ancient Philosophy. 3 Credits. HR H
A survey of the thought of the principal philosophers of ancient Greece, with emphasis on the pre-Socratics, Plato, and Aristotle.

PHIL 386. Modern Philosophy from Descartes to Kant. 3 Credits. HR H
A survey of the writings of such principal philosophers of the modern period as Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant.

PHIL 388. Analytic Philosophy: Frege to Quine. 3 Credits. H
An introduction to the principal figures in the philosophical tradition that forms the background to contemporary investigations in analytic philosophy of language. Particular attention will be paid to Frege, Russell, Wittgenstein, and Quine. Prerequisite: PHIL 310 or equivalent, or PHIL 310 may be taken concurrently.

PHIL 418. Introduction to Cognitive Science. 3 Credits. S
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PSYC 418, and SPLH 418.) Prerequisite: Consent of instructor.

PHIL 499. Senior Essay. 3 Credits. H
This course is required, in addition to regular major requirements, of those students wishing to work for departmental honors in Philosophy. Students wishing to enroll should first speak with the departmental adviser for majors. Prerequisite: Open to senior majors in Philosophy by consent of instructor.
PHIL 500. Studies in Philosophy: _____. 1-6 Credits. H
(Topic, instructor, and specific prerequisite to be announced in Schedule of Classes.) A study of particular philosophical problems or thinkers not covered by other courses. The course may be offered concurrently by different instructors under different subtitles, and may, with the consent of the chair, be taken more than once if content varies.

PHIL 504. Philosophy of Sex and Love. 3 Credits. H
A discussion of philosophical issues such as the relation between love, autonomy, and friendship; heterosexual and homosexual relationships; marriage and adultery; rape and sexual harassment; prostitution; and pornography.

PHIL 506. Chinese Thought. 3 Credits. NW H/W
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and HUM 524.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy.

PHIL 508. Early Greek Philosophy. 3 Credits. H/W
A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers, with some attention paid to the Sophists and the Hippocratic corpus. (Same as GRK 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor.

PHIL 551. Philosophy of Economics. 3 Credits. HR
This course surveys the central concepts, issues and debates surrounding the philosophy of economics. The course is divided into three parts. The first is focused on the nature of economic science, whether it can be separated from value judgments, along with the foundational and methodological issues that arise in economics. The second part of the course provides a survey of several central topics in the philosophy of economics including rational choice theory, game theory, social choice theory, behavioral and neuroeconomics. The third part concerns welfare economics (broadly understood), including the aims of welfare economics, the nature of well-being, the possibility of interpersonal utility comparisons, and the aims of economic institutional design. At the end of this course, students should have knowledge and understanding of central methodological and substantive debates regarding the nature of economic theories. This course should also enhance students' ability to think critically and analytically about the nature of economic theories and the key concepts in the philosophy of economics, write clearly and cogently about philosophical issues that arise in economic, incorporate the ideas, theories and techniques that arise in both philosophy and economics to understand social and economic issues. (Same as ECON 551.) Prerequisite: An introductory course in philosophy or economics, or permission of instructor.

PHIL 555. Justice and Economic Systems. 3 Credits. H
An examination of important representative theories of the justness of an economic system, with particular attention paid to such institutions as private property, a market economy, means and relationships of production, and principles of distribution to individuals. The theorists under consideration include Locke, Adam Smith, Marx and Engels, contemporary utilitarians, Rawls, and Nozick. Prerequisite: A course in ethics or an introductory course in economics or in business.

PHIL 557. Kant. 3 Credits. H
A survey of the major works of Immanuel Kant, with attention to his critical method and its application to issues in theoretical philosophy, practical philosophy, aesthetics, or the philosophy of history. Prerequisite: PHIL 386.

PHIL 558. Seventeenth Century Philosophy. 3 Credits. H
The development of philosophy in the 17th century. Special attention will be paid to such major figures as Descartes, Malebranche, Spinoza, Leibniz, Elisabeth of Bohemia, Cavendish, Conway, Astell, Hobbes, and Locke. Prerequisite: PHIL 386 or consent of instructor.

PHIL 559. Eighteenth Century Philosophy. 3 Credits. H
The development of philosophy in the 18th century. Special attention will be paid to such major figures as Hutcheson, Butler, Berkeley, Mandeville, Hume, Smith, Kant, Rousseau, Bentham, Wolstonecraft and Shepherd. Prerequisite: PHIL 386 or consent of instructor.

PHIL 560. Nineteenth Century Philosophy. 3 Credits. H
The development of philosophy in the 19th century. Special attention will be paid to such major figures as Hegel, Kierkegaard, Marx, Nietzsche, and Mill. Prerequisite: PHIL 386 or permission of instructor.

PHIL 562. Kierkegaard. 3 Credits. H
A study of the thought of Soren Kierkegaard through examination of some of his major writings. Some attention is given to his influence on the development of existentialist philosophies. Prerequisite: PHIL 384 or PHIL 386.

PHIL 570. Nietzsche. 3 Credits. H
A study of Nietzsche's major writings and ideas, with some attention to his philosophical influence. Prerequisite: PHIL 384 or PHIL 386 or permission of instructor.

PHIL 582. Existentialism. 3 Credits. H/W
A study of the main themes and leading philosophers of the existentialist movement. Prerequisite: Two courses in philosophy.

PHIL 590. Phenomenology. 3 Credits. H
A study of the main themes and leading philosophers of the phenomenological movement. Prerequisite: PHIL 386.

PHIL 592. Contemporary Continental Philosophy. 3 Credits. H
A study of selected topics in 20th century European philosophy, such as hermeneutics, critical theory, and poststructuralism. Figures to be studied could include Heidegger, Gadamer, Adorno, Habermas, and Foucault. Prerequisite: PHIL 386.

PHIL 600. Readings in Philosophy: _____. 1-6 Credits. H
Individual reading on topics not covered in course work. Prerequisite: Consent of instructor.

PHIL 605. The Philosophy of Plato. 3 Credits. H
A survey of the major works of Plato, with attention both to Plato's distinctive arguments and positions in the major areas of philosophy and to the distinctive literary form in which Plato presents his thinking. Prerequisite: PHIL 384.

PHIL 607. The Philosophy of Aristotle. 3 Credits. H
A survey of the major works of Aristotle, with the aim of understanding Aristotle's distinctive formulations of central philosophical questions, the arguments he presents for his answers to those questions, and the systematic interconnections between his positions in the different areas of philosophy. Prerequisite: PHIL 384.

PHIL 608. Hellenistic Philosophy. 3 Credits. H
Survey of Stoicism, Epicureanism, and Scepticism from their beginnings through the second century AD. Prerequisite: PHIL 384 and another course in philosophy.

PHIL 610. Metalogic. 3 Credits. H
Propositional calculus, predicate calculus, consistency, decidability of formal systems, the paradoxes and number concept will be covered. Prerequisite: PHIL 310 or EECS 210 or MATH 450 or consent of instructor.
This course is a workshop in any of a variety of topics in symbolic logic of special importance to contemporary analytic philosophy, such as modal logic, tense logic, axiomatic set theory, Goedel's theorems, model theory, etc. May be repeated for credit as topics vary. Prerequisite: PHIL 310.

PHIL 612. Modal and Non-classical Logics. 3 Credits. H
This course provides an investigation of logics beyond first-order predicate logic, including modal logic, non-classical logic, and second-order logic. Prerequisite: PHIL 310 or EECS 210 or MATH 450 or consent of instructor.

PHIL 620. Philosophy of Natural Science. 3 Credits. H
An examination of conceptual and foundational issues in the natural sciences. Topics may include the methodology of science (the nature and status of laws, the precise way in which experiment contributes to theory) and puzzles concerning the content of science (the status of space and time, the problematic nature of quantum mechanics). Prerequisite: PHIL 310 or PHIL 610, or permission of instructor.

PHIL 622. Philosophy of Social Science. 3 Credits. H
A critical examination of the methods, concepts, and practices of the social sciences. Topics to be considered may include: theories of explanation, methodological individualism vs. holism, objectivity, the role of rationality, myth and the unconscious in the explanation of behavior, and the value neutrality of science. Prerequisite: One previous course in philosophy, or permission of instructor.

PHIL 630. Philosophy of Mathematics. 3 Credits. H
An examination of varying conceptions of the role and status of mathematical arguments. Topics may include realism/anti-realism, the consequences of Goedel's Incompleteness Theorems, the role of mathematics in the sciences, and an examination of such historical thinkers as Plato, Frege, Russell, Wittgenstein, Goedel, and Hilbert. Prerequisite: PHIL 310 or PHIL 610, or permission of instructor.

PHIL 638. Philosophy of Language. 3 Credits. H
An examination of the nature of language using the methods of analytic philosophy. Topics may include meaning, truth, reference, language and thought, and the nature of linguistic rules. Prerequisite: PHIL 388 or permission of instructor.

PHIL 648. Theory of Knowledge. 3 Credits. H
An examination of the nature of knowledge. Topics may include the concept of knowledge, knowledge of the external world, induction, theories of justification, and scientific knowledge. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor.

PHIL 650. Metaphysics. 3 Credits. H
An examination of some of the central issues in metaphysics. Topics may include causation, the mind-body problem, free will and determinism, modality, natural kinds, the nature of properties, and personal identity. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor.

PHIL 654. Philosophy of Mind. 3 Credits. H
An examination of the nature of mind using the methods of analytic philosophy. Topics may include consciousness, perception, propositional attitudes, thought and language, action and intention, mind and body, the prospects for scientific psychology, and personal identity. Prerequisite: PHIL 388 or permission of instructor.

PHIL 662. Aesthetics. 3 Credits. H
A study of some of the central themes and problems in aesthetics, such as the beautiful and the sublime in nature and the arts. Prerequisite: Two courses in philosophy or graduate standing.

PHIL 666. Rational Choice Theory. 3 Credits. H
This course is an introduction to the philosophical issues surrounding individual decision theory, game theory, and social choice theory. This includes issues of scientific theory selection, the nature of preference, the uses of games to model social interaction, and the ethical and political implications of Arrow's impossibility theorem. Formal techniques of modeling and proof, akin to those used in logic and mathematics, will be used in much of the course. Prerequisite: Two courses in economics, a philosophy course numbered 500 or above, or consent of instructor.

PHIL 668. Political Philosophy. 3 Credits. H
A systematic analysis of the concepts of politics, with reference to representative political theories. Prerequisite: A course in philosophy and a course in political science.

PHIL 670. Contemporary Ethical Theory. 3 Credits. H
An examination of some major moral philosophers and some important issues in ethical theory since the beginning of the twentieth century. Topics covered typically include intuitionism, emotivism, utilitarianism, virtue ethics, and the relationship between morality and rationality. Prerequisite: PHIL 160 or PHIL 161 or two courses in philosophy.

PHIL 671. Feminist Theories in Ethics. 3 Credits. H
This course addresses the role (if any) that gender plays in constructing ethical theories. Topics include the impact of culture, affect, and the body on our understanding of gender differences and the importance of these differences for ethics. Prerequisite: PHIL 160 or PHIL 161, or two previous philosophy courses.

PHIL 672. History of Ethics. 3 Credits. H
An interpretive and critical examination of central texts in the history of moral philosophy, which may include works by Aristotle, Hume, Kant, and J.S. Mill. Prerequisite: PHIL 160 or PHIL 161 or two previous philosophy courses.

PHIL 674. Philosophy of Law. 3 Credits. H
An examination of the concept of law and of legal reasoning. In addition, the course may consider such topics as natural law, legal excuses, the relations between law and morality, civil disobedience, civil liberties, the concept of property. Prerequisite: Two courses in philosophy or one course in philosophy and one course in law or consent of instructor.

PHIL 676. Medical Ethics: Life and Death Issues. 3 Credits. H
After a brief survey of techniques of moral argument and analysis especially as they pertain to the moral impermissibility of murder, particular moral and conceptual issues relating to death and dying in medical contexts will be addressed. Topics such as abortion, infanticide, suicide, euthanasia, the definition of death, and the right to refuse life-saving medical therapy will be included. Prerequisite: Two courses in biology or consent of instructor.

PHIL 677. Medical Ethics: Professional Responsibilities. 3 Credits. H
After a brief survey of techniques of moral argument and analysis, particular moral issues related to the obligations of health care professionals and the rights of patients will be discussed. These will include such matters as confidentiality, truth-telling, informed consent, the ethics of research on human subjects, psychosurgery, the rights of the mentally ill, and the rights of the mentally retarded. Prerequisite: Two courses in biology or consent of instructor.

PHIL 800. Tutorial. 3 Credits.
Intensive supervised training in and application of the techniques of research. Required of every graduate student seeking an advanced degree in the first or second semester of enrollment. Passing this tutorial constitutes partial fulfillment of the Ph.D. RSRS requirements. Consent
of instructor required for repeating the course. Prerequisite: Graduate standing.

PHIL 805. Plato. 3 Credits.  
Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor.

PHIL 807. Aristotle. 3 Credits.  
Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor.

PHIL 820. Topics in the History of Philosophy: _____. 3 Credits. 
This course may be offered by different instructors under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: 500-600 level course as specified or permission of instructor.

PHIL 824. Hume. 3 Credits.  
Prerequisite: PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor.

PHIL 828. Kant. 3 Credits.  
Prerequisite: PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor.

PHIL 831. Hegel. 3 Credits.  
Prerequisite: PHIL 560 or 500-600 level course as specified or permission of instructor.

PHIL 833. Nietzsche. 3 Credits.  
A study of the philosophy of Friedrich Nietzsche. Prerequisite: PHIL 560 or PHIL 570 or permission of instructor.

PHIL 835. Frege. 3 Credits.  
Gottlob Frege was the founder of the analytic movement in philosophy, having done seminal work in logic, the philosophy of language, and the philosophy of mathematics. This course will focus on his primary texts as well as his influence on present-day studies. Prerequisite: PHIL 630 or PHIL 638 or permission of instructor.

PHIL 848. Wittgenstein. 3 Credits.  
Prerequisite: PHIL 638 or PHIL 650 or PHIL 654 or permission of instructor.

PHIL 850. Topics in Recent Philosophy: _____. 3 Credits.  
This course may be offered by different instructors under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in Schedule of Classes. Prerequisite: 500-600 level as specified or permission of instructor.

PHIL 860. Topics in Philosophy of Science: _____. 3 Credits.  
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 620 or PHIL 622 or PHIL 648 or PHIL 650 or permission of instructor.

PHIL 868. Topics in Philosophy of Language: _____. 3 Credits.  
This course may be offered under different subtitles and may be taken more than once if the subject matter varies sufficiently. Prerequisite: PHIL 638 or permission of instructor.

PHIL 870. Topics in Metaphysics: _____. 3 Credits.  
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 650 or permission of instructor.

PHIL 872. Topics in Theory of Knowledge: _____. 3 Credits.  
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 648 or permission of instructor.

PHIL 877. Topics in Philosophy of Mind: _____. 3 Credits.  
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 654 or permission of instructor.

PHIL 880. Topics in Ethics: _____. 3 Credits.  
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 555 or PHIL 666 or PHIL 668 or PHIL 674 or permission of instructor.

PHIL 884. Topics in Social and Political Philosophy: _____. 3 Credits.  
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 670 or PHIL 672 or permission of instructor.

PHIL 885. Topics in Law and Philosophy. 3 Credits.  
Explores various topics at the intersection of law and philosophy. Content varies but may include: What is freedom and what role should government play in a free society? What is equality and what is the best way to achieve it? What is the relationship between law and social justice? What is the source and value of human rights? Should social and economic rights be legally guaranteed? How should government redress historical injustices such as slavery, apartheid, and the Holocaust? Students must complete a substantial seminar paper.

PHIL 886. Topics in Applied Ethics: _____. 3 Credits.  
This course may be offered under different subtitles, such as professional ethics or some issue in business ethics (e.g., corporate responsibility) or in medical ethics (e.g., the definition of death); it may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in Schedule of Classes. Prerequisite: PHIL 670 or PHIL 672 or 500-600 level course as specified or permission of instructor.

PHIL 888. Topics in the Philosophy of the Social Sciences: _____. 3 Credits.  
This course may be offered under different subtitles, such as philosophy of a particular social science (e.g., economics, psychology) or a particular issue in the social sciences (e.g., ideology, reductionism), and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 622 or permission of instructor.

PHIL 890. Topics in Continental Philosophy: _____. 3 Credits.  
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topics, instructor, and specific prerequisites to be announced in the Schedule of Classes.

PHIL 899. Master's Thesis. 1-6 Credits.  
Six hours of credit will be awarded upon completion of the master's thesis, but no more than six hours of credit may be obtained in this course altogether. Graded on a satisfactory progress/limited progress/no progress basis.

PHIL 900. Research in Philosophy: _____. 1-3 Credits.  
Intensive research in philosophy. This course may be taken through individual arrangement, or in connection with small research seminars
which are offered occasionally. Students may only enroll for three hours in any given semester. May be repeated if content varies significantly. 

Prerequisite: Twelve hours of graduate work.

**PHIL 901. Ph.D. Tutorial. 3 Credits.**

Independent research on any topic that a graduate student and a faculty member shall agree on. It shall result in a tightly focused 20-30 page paper. The student's written work will be repeatedly evaluated over the semester by the director, and the final product must be defended in an oral examination conducted by a three-member faculty committee (including the director). Prerequisite: Students must be admitted to the Ph.D. program and have successfully completed the Ph.D. core courses requirement.

**PHIL 999. Dissertation. 1-12 Credits.**

This course may be taken more than once, but not for more than twelve hours of credit in any one semester. Graded on a satisfactory progress/limited progress/no progress basis.

---

**Bachelor of Arts and Bachelor of General Studies in Philosophy**

**Why study philosophy?**

In philosophy we ask big, important questions. While asking such questions is easy, answering them is difficult. Because these questions are often abstract and vague, it is necessary to use precise reasoning and analysis to clarify what exactly it is we are asking. Only then can we attempt to develop answers.

In studying philosophy, you will learn what others have thought about life's big questions. You will also learn to challenge those views, and to develop your own thoughts in a precise, logical manner. Philosophy will help you develop critical thinking skills, enabling you to analyze the underlying logic and assumptions in arguments about a variety of topics. This is a skill that generalizes to virtually every area of life.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements.

See individual department/program sections for departmental admission requirements.

**First- and Second-Year Preparation**

Although majors are not required to take courses in philosophy in their first 2 years, the department recommends that they do so. Prospective majors are encouraged to begin with one of the 100-level courses. These courses provide introductions to broad areas of philosophy, and students may apply one 100-level course toward the major requirements. PHIL 310, PHIL 384, and PHIL 386 are required prerequisites for upper-division work and should be taken early. Prospective majors should consult the director of undergraduate studies early to plan course work.

**Requirements for the B.A. or B.G.S. Major**

PHIL 608  Hellenistic Philosophy  3
**Additional Electives  12**

Satisfied by completing 12 additional hours of PHIL courses, not more than 3 credit hours can be below 300 and at least 3 credit hours must be at the 500-level or above.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:

**Major Hours**
Satisfied by 27 hours of major courses, or 33 hours required if completing departmental honors course PHIL 499.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (500+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (500+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Philosophy can be found here: Philosophy (p. 1664), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Philosophy can be found here: Philosophy (p. 1665), or by using the left-side navigation.

**Departmental Honors**

To graduate with departmental honors, undergraduates must take 6 hours in philosophy in addition to the 27 hours required for the B.A. or B.G.S., for a total of 33 hours. The 6 additional hours include

• An additional course numbered 500 or above for a total of at least 15 hours at that level, and

• PHIL 499 Senior Essay.

A committee of 3 faculty members reads the finished essay, gives the candidate an oral examination over the essay, and determines whether it warrants honors. This committee must consist of the instructor in PHIL 499, the departmental honors coordinator, and a third member of the philosophy faculty.

Honors are not awarded to anyone who receives a grade lower than B in PHIL 499, whose final grade-point average in philosophy is lower than 3.5. To be eligible for departmental honors, students must file a declaration of intent with the departmental honors coordinator no later than enrollment for the final undergraduate semester.

The most important element in departmental honors is the honors essay. Once a student has determined the area in which he or she wishes to work, he or she should arrange to write the essay under the guidance of a faculty member with appropriate expertise. Ideally, this work should be completed during a single semester. However, students often find it difficult to complete the essay in one semester. Therefore, we recommend that the essay be begun in the semester before the one in which the student intends to graduate (typically, in the fall semester of the senior year).

The honors essay should be intermediate between a master’s thesis and a term paper. It should normally be at least 20 pages (6,000 words) long. It should go beyond mere exposition, whether by criticism or by comparison of different works. Interpretations of rare or difficult texts may occasionally be accepted.

**BA in Philosophy**

Below is a sample 4-year plan for students pursuing the BA in Philosophy. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

3 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

4 One PHIL course below the 300-level may count toward the major under required PHIL elective hours (12 PHIL electives needed).

5 PHIL 638, PHIL 648, PHIL 650, and PHIL 654 options for Theoretical area requirement count toward KU Core Goal 6.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BGS in Philosophy

Please note:
Minor in Philosophy

Why study philosophy?

In philosophy we ask big, important questions. While asking such questions is easy, answering them is difficult. Because these questions are often abstract and vague, it is necessary to use precise reasoning and analysis to clarify what exactly it is we are asking. Only then can we attempt to develop answers.

Requirements for the Minor

Students selecting this option must complete at least 6 courses (18 hours) of philosophy elective courses

PHIL 384 and especially PHIL 386 are strongly recommended.

Minor Hours and Minor GPA

While completing all required courses (above), minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 junior/senior courses (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in Logic and Formal Reasoning

The certificate in Logic and Formal Reasoning provides students with the opportunity to engage in a series of courses unified around the idea that logic and formal reasoning is a general skill, useful in a wide variety of academic contexts and applications. This certificate can be completed entirely within philosophy or with a more interdisciplinary course plan. Students who complete the certificate will be well-versed in formal methods of reasoning.

The rationale is that requirement 1 is an introductory course, requirement 2 is a necessary symbolic logic course, and requirement 3 comprises two advanced courses.

The department offers thesis and non-thesis M.A. options. Both require:

- A philosophy.ku.edu/phd-admissions/application, please visit the graduate page of the required supplemental documentation to be submitted with the online application.
- For additional information, including relevant deadlines and a list of Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

For Fall admission, applications must be received by December 1st. For Spring admission, the priority deadline is October 1st. Final deadline is December 1st.

Students must apply to start the accelerated MA in the semester immediately following their graduation (Spring/Summer graduates apply to begin the next Fall; Fall graduates apply to begin in the Spring).

For Fall admission, priority deadline is February 1st. Final deadline is May 1st.

For additional information, including relevant deadlines and a list of required supplemental documentation to be submitted with the online application, please visit the graduate page of the Philosophy (https://philosophy.ku.edu/staff/) section of the online catalog.

M.A. Degree Requirements

The department offers thesis and non-thesis M.A. options. Both require:

1. **30 credit hours of graduate work in philosophy** with a grade of B- or higher, with a GPA of at least 3.0 over all courses in philosophy. At least 15 of these hours must be in courses numbered 800 or above and, for the thesis option, may include up to 6 hours of PHIL 899 Master’s Thesis.

2. Students must complete two courses at the 500 level or above (or the equivalent) in each of these areas: history of philosophy, metaphysics and epistemology (broadly construed), and value theory. Courses taken during the undergraduate career may be counted toward these area requirements, but will not count toward the overall 30-hour graduate credit requirement unless a petition to this effect is explicitly approved by the graduate faculty.

3. PHIL 800 must be taken in the first year of study.

4. A final examination:
   a. For the thesis option, the student will complete an oral defense of the thesis in accordance with Graduate Studies policy. The oral examination is held during the semester of the student’s final enrollment in course work and when the advisor approves the thesis for defense. Any philosophical issue that is relevant to the thesis may be explored in the oral exam to ensure the thesis reflects a breadth of philosophical knowledge.
   b. For the non-thesis option, the student must pass an oral examination covering the material of the M.A. program. The non-thesis option final exam can be satisfied by Ph.D. students who successfully complete PHIL 901 with a grade of B or higher.

Accelerated Master of Arts in Philosophy

The Accelerated M.A. provides KU undergraduates who have majored in Philosophy an opportunity to complete the M.A. in Philosophy within a year of completing their bachelor’s degree. Talented students who are planning to continue their studies at the doctoral level or to continue to law school will receive a competitive advantage by acquiring a master’s degree in half the time traditionally required for a terminal M.A.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. in Philosophy

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog.

Apply to the graduate program via the Office of Graduate Studies online application system (https://gradapply.ku.edu/).

For Fall admission, applications must be received by January 5th to be considered for funding support. The deadline for Fall admission is May 1st.

For additional information, including relevant deadlines and a list of required supplemental documentation to be submitted with the online application, please visit the graduate page of the Philosophy (http://philosophy.ku.edu/phd-admissions/) website, or contact the department Graduate Program (https://philosophy.ku.edu/staff/) Coordinator.

## M.A. Degree Requirements

1. **30 credit hours of graduate work in philosophy** with a grade of B- or higher, with a GPA of at least 3.0 over all courses in philosophy. At least 15 of these hours must be in courses numbered 800 or above and, for the thesis option, may include up to 6 hours of PHIL 899 Master’s Thesis.

2. Students must complete two courses at the 500 level or above (or the equivalent) in each of these areas: history of philosophy, metaphysics and epistemology (broadly construed), and value theory. Courses taken during the undergraduate career may be counted toward these area requirements, but will not count toward the overall 30-hour graduate credit requirement unless a petition to this effect is explicitly approved by the graduate faculty.

3. PHIL 800 must be taken in the first year of study.

4. A final examination:
   a. For the thesis option, the student will complete an oral defense of the thesis in accordance with Graduate Studies policy. The oral examination is held during the semester of the student’s final enrollment in course work and when the advisor approves the thesis for defense. Any philosophical issue that is relevant to the thesis may be explored in the oral exam to ensure the thesis reflects a breadth of philosophical knowledge.
   b. For the non-thesis option, the student must pass an oral examination covering the material of the M.A. program. The non-thesis option final exam can be satisfied by Ph.D. students who successfully complete PHIL 901 with a grade of B or higher.
philosophy.ku.edu/phd-admissions/) website, or contact the department Graduate Program Coordinator (https://philosophy.ku.edu/staff/).

Degree Requirements

Students must complete all of the following requirements for the Accelerated M.A. within one calendar year post-bachelor’s:

1. 24 credit hours of graduate coursework (500-level or above) in philosophy post-bachelor’s with a grade of B or higher. At least 15 of these hours must be in courses numbered 800 or above. Students must complete two courses at the 500-level or above (or the equivalent) in each of these areas: history of philosophy, metaphysics and epistemology (broadly construed), and value theory. Courses taken during the undergraduate career may be counted toward these area requirements, but such work does not count toward the overall 24-hour graduate credit requirement unless the student took this course work for graduate credit and it has department approval.

2. PHIL 800 Tutorial with a grade of B or higher

3. An M.A. exam consisting in the oral defense of a seminar paper of the student’s choosing

Time Limits and Other Restrictions

Students must maintain a minimum GPA of 3.5 in the first semester of graduate study in order to maintain eligibility for the program. They will be subject to a formal mid-year review to ensure satisfactory progress towards completion of the degree.

A student who receives a bachelor’s degree in Spring or Summer begins the M.A. portion of the degree that Fall. The student must then complete all requirements for the Accelerated M.A. by the first day of classes the following Fall.

If a student does not complete the Accelerated M.A. requirements within one year post-bachelor’s, the student may petition the department for admission to the standard 30-hour M.A. track. In extraordinary circumstances, for example, serious illness, students may petition the department to remain in the 24-hour track.

Juris Doctor and Master of Arts in Philosophy

Joint J.D.-M.A. Degree Program

The joint degree program leading to the J.D. and the M.A. in philosophy develops a student’s understanding and appreciation of the converging disciplines of law and philosophy. The program combines into 3 years and 1 summer session the normal 3-year J.D. program offered by the School of Law and the 2-year M.A. offered by the Department of Philosophy in the College of Liberal Arts and Sciences. Students complete 81 credit hours in law and 21 credit hours in philosophy.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Joint Program

The program is open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records indicate that they have the capacity to complete the program. Applicants must meet the admission requirements and prerequisites of the School of Law and the Department of Philosophy. The only exception to this is that the Law School Admission Test (LSAT) is the only required entrance examination for such applicants (GRE is not required for either program). Students must apply and be admitted to each school separately. Generally, students apply to the School of Law first, and if admitted, subsequently apply for admission to the M.A. in Philosophy. No student may enter the combined program after completing more than 30 credit hours in the School of Law or 12 hours in the Department of Philosophy.

For information about applying to the Law School, see the school website (http://www.law.ku.edu/admissions/). For information about applying to the M.A. program in Philosophy, please visit the graduate program page (http://philosophy.ku.edu/majd-admissions/) of the Philosophy department website, or contact the Graduate Program Coordinator, Aley Pennington, aleypennington@ku.edu.

**Total minimum credit hours required 102**
It is essential for the student to consult the director of graduate studies in philosophy and a representative of the School of Law about specific courses required or recommended for this program.

For additional information, see the School of Law (p. 720) and the Guidelines and Information for Graduate Students available from the Department of Philosophy (http://philosophy.ku.edu/).

Doctor of Philosophy in Philosophy

The Ph.D. degree requires 39 hours of graduate coursework, which begins with a first-year proseminar and ends with an independent research seminar that culminates in the writing and oral defense of a qualifying paper. Ph.D. candidates must also satisfy a set of course requirements in distinct areas of philosophy and the University’s Research Skills and Responsible Scholarship requirement. Students write and defend a dissertation prospectus to complete the oral comprehensive examination and advance to candidacy, after which they are expected to write and successfully defend a dissertation.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Ph.D. in Philosophy

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog.

Apply to the graduate program via the Office of Graduate Studies online application system (https://gradapply.ku.edu/).

For Fall admission, applications must be received by January 5th to be considered for funding support. The deadline for Fall admission is May 1st.

For additional information, including relevant deadlines and a list of required supplemental documentation to be submitted with the online application, please visit the graduate page of the Philosophy (http://philosophy.ku.edu/phd-admissions/) website, or contact the department Graduate Program Coordinator (https://philosophy.ku.edu/staff/).

Ph.D. Degree Requirements

1. Complete at least 39 credit hours of graduate work in philosophy (https://catalog.ku.edu/liberal-arts-sciences/philosophy/#courseinventory). Students must earn grades in each course of at least B– and an overall grade-point average of at least B in all graduate philosophy courses. At least 24 hours must be at the 800 level or above (including PHIL 800 and PHIL 901). Beyond the 39-hour requirement, additional hours in PHIL 999 Dissertation are required as appropriate in accordance with the rules of the Office of Graduate Studies and the Department.

2. Complete PHIL 800 in the first year of enrollment.

4. Distribution Requirement: Students must complete seven courses that fulfill the following distribution requirements:
   a. Value Theory – 2 courses
   b. Metaphysics & Epistemology - 2 courses
   c. History of Philosophy – 3 courses
      i. Ancient Philosophy - 1 course
      ii. Modern Philosophy - 1 course
      iii. 19th and 20th Century Philosophy - 1 course

5. PHIL 901: Taken at the end of course requirements. Independent research seminar that results in the writing and successful oral defense of a qualifying paper. Students should enroll in PHIL 901 no later than the sixth semester.

   The University requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. For Philosophy doctoral students, this requirement is met by the following:
   a. PHIL 800
   b. PHIL 901
   c. Demonstrated competence in an approved foreign language, OR completion of a faculty-approved course in a discipline related to the student’s research interests.

7. Pass the comprehensive oral examination for Ph.D. candidacy. In the philosophy department, this is done by passing a prospectus for the dissertation. This examination must be taken after all of the above requirements have been completed, or in the semester in which the requirements will be completed.

8. After satisfaction of the above requirements, the student enrolls in PHIL 999 Dissertation with their Dissertation Director.

9. Write and successfully defend a dissertation, following both Graduate School (https://policy.ku.edu/graduate-studies/doctoral-dissertation/) and Department Guidelines (http://philosophy.ku.edu/phd-graduate-handbook/).

Department of Physics and Astronomy

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the
Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse careers ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate Programs

We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational physical science and critical thinking can be useful – example teaching and medicine – and anyone seeking to include astronomy and physics as part of their general education. The department offers BS degrees in astronomy, physics, and engineering physics and BA degrees in astronomy and physics. Degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The primary degree offered is a BS in Physics. In addition to this standard BS in Physics, there are also interdisciplinary and pre-medicine versions (specializations) of the BS in Physics degree. The interdisciplinary track allows students to take elective courses in other STEM disciplines and the pre-medicine emphasis is for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in locales such as Antarctica, Chile, and CERN).

Courses for Nonmajors

ASTR 191 is a survey of contemporary astronomy, taught at a level using basic mathematics; ASTR 391 offers an introduction to physical astronomy at a calculus-based level. PHSX 111 provides a general introduction to important physics topics and is taught at a level using basic algebra. The department offers two introductory physics sequences that include laboratory work. PHSX 114 and PHSX 115 cover the major fields of physics without calculus. PHSX 211 and PHSX 212, with labs PHSX 216 and PHSX 236, provide a calculus-based foundation in physics for students in physical science, engineering, and mathematics. PHSX 313 and the laboratory course, PHSX 316, provide an introduction to modern physics for majors in physics and some engineering and physical science programs.

Students in biological sciences, health sciences, physical sciences, mathematics, engineering, and prospective elementary and secondary teachers should see appropriate sections of this catalog and major advisors for guidance about required physics course work. Chemistry majors should note that PHSX 211 and PHSX 212 are prerequisites to advanced work in chemistry.

For programs in engineering physics (p. 519), see the School of Engineering section of the online catalog.

Graduate Programs

The department offers two primary graduate programs: (i) an M.S. degree in Physics and (ii) a Ph.D. degree in Physics. The M.S. in Physics has the possibility of having a concentration in Computational Physics and Astronomy. This option requires a thesis, as does one of the M.S.-Physics options. The department does not offer a graduate-level degree in Astronomy, although students have obtained M.S. degrees in Physics by doing astronomy projects. In addition, the department has added flexibility in its course offerings to allow a student to obtain a Ph.D. in Physics while working on an astronomy or astrophysics multidisciplinary plan of study.

The department is proud to be an APS Bridge Program (https://physics.ku.edu/graduate-program/bridge-program/) partner. Information about admission, requirements, and graduate programs is also on the Department of Physics & Astronomy web page (https://physics.ku.edu/graduate-program/). Please note that the General and Subject GRE are not required for admissions to the Physics and Astronomy graduate program.

Courses

ASTR 150. Seminar in Physics, Astronomy and Engineering Physics. 0.5 Credits. N
This course is intended for all students in physics, astronomy and engineering physics. Course content includes topics of current interest in all fields of physics and astronomy and an introduction to professional ethics and frameworks for ethical decision making. Topics covered include but are not limited to nanotechnology, cosmology, nuclear and high energy physics, galactic evolution, condensed matter physics, space physics, biophysics and plasma physics. Course will include hands on demonstrations, group in-class activities and general advising information. (Same as PHSX 150.)

ASTR 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Astronomy. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

ASTR 190. Astronomy and Civilization. 3 Credits. N
A survey course that describes the interplay between the science of astronomy and cultural beliefs. It uses, among others, examples of how religious and philosophical tenets have enhanced or conflicted with scientific principles. Not for astronomy majors.

ASTR 191. Contemporary Astronomy. 3 Credits. NP N
The structure and evolution of the universe, from nearby planets to distant quasars, are examined. Topics include recent discoveries concerning planets, stars, pulsars and black holes as well as their evolution, the structure of the universe today and how it will be in the future. The emphasis is descriptive rather than mathematical. (Same as PHSX 191.) Prerequisite: Eligibility for MATH 101.

ASTR 196. Contemporary Astronomy Laboratory. 1 Credits. NP N LFE
An introduction to astronomical observations and modern data analysis methods. Students will carry out independent investigations as well as standard exercises. This is an online course, delivered through Blackboard. (Same as PHSX 196.) Prerequisite: Corequisite: ASTR 191.

ASTR 293. Astronomy Bizarre. 3 Credits. N
An exploration of physical phenomena found in astrophysical extremes. Topics may include the following: the most violent explosions in the Universe (supernovae and gamma ray bursts); the biggest collisions in nature (galaxy interactions); the densest and most bizarre forms of matter (white dwarfs, neutron stars); the strongest magnetic fields (magnetars, pulsars); the amazing range of exo-planetary properties; and the mysteries of black holes. Prerequisite: Eligibility for MATH 101.

ASTR 390. Undergraduate Problems. 1-3 Credits. N
Undergraduate observational or theoretical problems in astronomy. Maximum credit, six hours. Prerequisite: Permission of department.

ASTR 391. Physical Astronomy, Honors. 3 Credits. NP N
An honors, calculus-based introduction to astronomy and astrophysics, required for astronomy majors. Components of the Universe - from planetary systems, stellar systems, large scale structure and cosmology - are examined to illuminate the physics principles which govern their evolution. Prerequisite: MATH 125, and either permission of instructor, or participation in the University Honors Program.

ASTR 394. The Quest for Extraterrestrial Life. 3 Credits. NP N
An introduction to the search for planets around other stars and for life in the universe beyond the earth. A discussion of the astronomical conditions under which life might form and the biological conditions of life formation and evolution. Methods of searching for extraterrestrial life. Prerequisite: An introductory course in astronomy, biology, or geology.

ASTR 400. Topics in Astronomy: _______. 1-3 Credits. N
A course on special topics in astronomy. Course may be repeated for different topics. Each section may have additional prerequisites to be determined by the instructor.

ASTR 501. Honors Research. 1-4 Credits. N
This course is for students seeking Departmental Honors in Astronomy, Engineering Physics, or Physics to fulfill the undergraduate research requirement. At the completion of the required four hours of total enrollment, a written and oral report of the research is required. (Same as EPHX 501 and PHSX 501.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

ASTR 503. Undergraduate Research. 1-4 Credits. N
This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as EPHX 503 and PHSX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

ASTR 591. Stellar Astronomy. 3 Credits. N
Fundamentals of stellar astronomy including astronomical optics and techniques, coordinate and time systems, stellar spectroscopy, properties of normal, binary and variable stars. Prerequisite: PHSX 212 and PHSX 236 or PHSX 214. An introductory astronomy course is desirable.

ASTR 592. Galactic and Extragalactic Astronomy. 3 Credits. N
A study of stellar groups, the interstellar medium, galactic structure and dynamics, galaxies, and cosmology. Prerequisite: ASTR 591 or consent of instructor.

ASTR 596. Observational Astrophysics. 3 Credits. NP N
Students acquire practical experience with astronomical equipment and data reduction techniques used in research and educational contexts. ASTR 596, combined with an independent research experience, provides a pathway for students to demonstrate creativity and integration of background knowledge. Prerequisite: Corequisite: ASTR 591.

ASTR 691. Astrophysics I. 3 Credits. N
An introduction to radiation processes, thermal processes, and radiative transfer in stellar atmospheres and the interstellar medium. (Same as EPHX 691 and PHSX 691.) Prerequisite: PHSX 313 or consent of instructor.

ASTR 692. Astrophysics II. 3 Credits. N
The formation and evolution of stars, nucleosynthesis of the elements, and the physical processes of high energy physics. Prerequisite: ASTR 691 or consent of instructor.

ASTR 791. Seminar in Astrophysics. 1-3 Credits.
Seminar designed to cover current topics in the physics of the Universe beyond the solar system. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. Open to undergraduates with twelve hours of physics/astronomy courses numbered 500 or above, or consent of instructor.

ASTR 792. Topics in Advanced Astrophysics. 3 Credits.
This course will address one or more of the following advanced topics in astrophysics: high energy astrophysics, nuclear astrophysics, galactic and extragalactic astrophysics, space physics, cosmology, astrobioyphysics, and the interstellar and intergalactic media (ISM/IGM.) This course may be repeated for credit if topical content differs. (Same as PHSX 792.) Prerequisite: ASTR 692 or permission of instructor.

ASTR 795. Space Plasma Physics. 3 Credits.
The physics of fully ionized gases in magnetic fields and their application to interplanetary processes, planetary radiation belts, and the surface of the sun. The motion of charged particles in magnetic fields, magnetohydrodynamic waves, the solar wind and the magnetosphere. (Same as PHSX 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631.

ASTR 815. Computational Methods in Physical Sciences. 3 Credits.
Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document computer programs to solve physical problems. (Same as PHSX 815 and CHEM 914.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above.

Courses

PHSX 111. Introductory Physics. 3 Credits. NP N
A one-semester survey of classical and modern physics, designed primarily for liberal arts students. Typical subjects include the laws of motion, gravity, electricity and magnetism, sound, light, quantum mechanics, atomic and subatomic physics. Subjects are treated mainly conceptually with some use of basic data. Prerequisite: Eligibility for MATH 104.

PHSX 114. College Physics I. 1-4 Credits. NP N LFE
Principles and applications of mechanics, fluids, heat, thermodynamics, and sound waves. Three class hours and one laboratory per week. This course emphasizes the development of quantitative concepts and problem solving skills for students needing a broad background in physics as part of their preparation in other major programs, and for those who wish to meet the laboratory science requirement of the College. Students who enroll in this course are expected to have had 3.5 years of college-prep math, including trigonometry. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 211 or PHSX 216 or PHSX 212 or PHSX 236. Prerequisite: MATH 104 or a score of 25 or higher on ACT mathematics.
PHSX 115. College Physics II. 1-4 Credits. N LFE
A continuation of PHSX 114. Principles and applications of electricity, magnetism, light, atomic physics, and nuclear physics. Three class hours and one laboratory period per week. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 212 or PHSX 236. Prerequisite: PHSX 114.

PHSX 116. Introductory Physics Laboratory. 1 Credits. U LFE
A laboratory exploring classical and modern physics, designed primarily for liberal arts students. Experiments in motion, force, momentum, energy, wave mechanics, electricity and magnetism, sound, light, atomic and subatomic physics are designed to teach physics concepts and basic laboratory techniques. One two-hour lab period per week. Counts as a laboratory science when preceded or accompanied by PHSX 111. Prerequisite: Eligibility for MATH 104. Corequisite: PHSX 111.

PHSX 150. Seminar in Physics, Astronomy and Engineering Physics. 0.5 Credits. N
This course is intended for all students in physics, astronomy and engineering physics. Course content includes topics of current interest in all fields of physics and astronomy and an introduction to professional ethics and frameworks for ethical decision making. Topics covered include but are not limited to nanotechnology, cosmology, nuclear and high energy physics, galactic evolution, condensed matter physics, space physics, biophysics and plasma physics. Course will include hands on demonstrations, group in-class activities and general advising information. (Same as ASTR 150.)

PHSX 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Physics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

PHSX 191. Contemporary Astronomy. 3 Credits. NP N
The structure and evolution of the universe, from nearby planets to distant quasars, are examined. Topics include recent discoveries concerning planets, stars, pulsars and black holes as well as their evolution, the structure of the universe today and how it will be in the future. The emphasis is descriptive rather than mathematical. (Same as ASTR 191.) Prerequisite: Eligibility for MATH 101.

PHSX 196. Contemporary Astronomy Laboratory. 1 Credits. NP N LFE
An introduction to astronomical observations and modern data analysis methods. Students will carry out independent investigations as well as standard exercises. This is an online course, delivered through Blackboard. (Same as ASTR 196.) Prerequisite: Corequisite: ASTR 191.

PHSX 201. Calculus Supplement to College Physics I. 1 Credits. N
A calculus-based course in classical mechanics and thermodynamics for students who have had an algebra-based course in classical mechanics and thermodynamics. This course, combined with PHSX 114, covers the content of PHSX 211 or PHSX 210. Prerequisite: PHSX 114 and MATH 116 or MATH 125. Corequisite: MATH 126; and permission of the department.

PHSX 202. Calculus Supplement to College Physics II. 1 Credits. N
A calculus-based course in electricity and magnetism for students who have had an algebra-based course in electricity and magnetism. This course, combined with PHSX 115, covers the content of PHSX 212. Prerequisite: PHSX 115 and permission of the department. Corequisite: MATH 126.

PHSX 209. Functions and Modeling. 3 Credits. N
Study of the use of functions in mathematical modeling, with topics drawn from algebra, analytic geometry, statistics, trigonometry, and calculus. These topics include function properties and patterns, complex numbers, parametric and polar equations, vectors and various growth models. The course also includes inquiry methods, collaborative problem solving, the use of multiple representations and data analysis techniques, and the justification and presentation of results. Central to the course are investigative labs employing various technologies and software. The course is designed to help prepare students for secondary school mathematics teaching. (Same as MATH 209.) Prerequisite: MATH 126 or MATH 146.

PHSX 210. General Physics I for Engineers. 3 Credits. N
Introduction to classical mechanics and thermodynamics designed for students in the School of Engineering who have completed MATH 125 or MATH 145 with a grade of C or better. Students not admitted to the School of Engineering must receive permission from instructor. PHSX 210 and PHSX 211 cannot both be taken for credit. Prerequisite: MATH 125 or MATH 145 with a grade of C or better; co-requisite MATH 126 or MATH 146; courses in high school physics and/or chemistry are recommended.

PHSX 211. General Physics I. 4 Credits. NP N LFE
Introduction to classical mechanics and thermodynamics. Designed for students in engineering and physical science majors. Prerequisite: MATH 116 or MATH 125 or MATH 145. Corequisite MATH 126 or MATH 146; courses in high school physics and/or chemistry are recommended.

PHSX 212. General Physics II. 3 Credits. N LFE
Study of electricity, magnetism, waves, and optics. Prerequisite: PHSX 201, PHSX 210, PHSX 211 or PHSX 213; MATH 126 or MATH 146. Co-enrollment in MATH 127 or MATH 147 is strongly encouraged.

PHSX 213. General Physics I Honors. 1-5 Credits. NP N LFE
An honors section of PHSX 211 and PHSX 216. Credit for fewer than five hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in Astronomy, Physics, or Engineering Physics. Courses in high school physics and chemistry are required. Prerequisite: MATH 125 or MATH 145; co-requisite MATH 126 or MATH 146; and permission of instructor.

PHSX 214. General Physics II Honors. 1-4 Credits. N LFE
An honors section of PHSX 212 and PHSX 236. Credit for fewer than four hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in Astronomy, Physics, or Engineering Physics. Prerequisite: PHSX 216 together with either PHSX 211 or PHSX 210; or PHSX 213, and permission of instructor. Corequisite: MATH 127 or MATH 147.

PHSX 216. General Physics I Laboratory. 1 Credits. N LFE
Experiments in classical mechanics and thermodynamics. The course includes practice in the ethics of recording and presentation of data. Counts as a laboratory science when accompanied by PHSX 211. Prerequisite: Corequisite: PHSX 210 or PHSX 211.

PHSX 236. General Physics II Laboratory. 1 Credits. N LFE
Experiments in electricity and magnetism, waves and sound. Students will practice data reduction and error analysis in ways that are consistent with professional ethics. Prerequisite: Corequisite: PHSX 212.

**PHSX 313. General Physics III. 3 Credits. N**

This course is an introduction to modern physics. The topics covered in this course include special relativity, optics, and introductions to quantum mechanics and its applications. Prerequisite: PHSX 212 and PHSX 236, or PHSX 214, or PHSX 202, or EECS 220, or EECS 221. Corequisite: MATH 320 or MATH 220 or MATH 221.

**PHSX 315. Introduction to Computation for Physics and Astronomy. 3 Credits. N**

This course introduces the use of computational techniques as applied to solving problems in physics and astronomy. It serves as a gateway to the use of such methods in upper level classes and research. Highlighted techniques will include the use of numerical methods for the solution of differential equations encountered in physics and astronomy, the use of random numbers for simulation and modeling, data analysis using computers, and data visualization. Problems will be drawn from a wide variety of physical applications including mechanics, electromagnetism, thermodynamics, and stellar dynamics. Students will develop their own computer programs to investigate, illustrate, and report their results. Prerequisite: EECS 138 or EECS 168 or EECS 169, or permission of the instructor. Corequisite: PHSX 212 or PHSX 214.

**PHSX 316. Intermediate Physics Laboratory I. 1 Credits. U LFE**

Experiments in optics and modern physics. Development of experimental skills, data reduction, error analysis, and technical writing. One lab meeting per week and one lecture per week on topics including error analysis and experimental design, and the development of professional ethics in regard to citation and data presentation. Prerequisite: Corequisite: PHSX 313.

**PHSX 395. Physics Education Theory and Practice. 3 Credits. N**

This course focuses on how people teach, learn, and understand key concepts in physics, including an introduction to physics education research. Topics include student conceptions, assessments, impacts of student identity, metacognition, and nature of science. Current issues and tensions in science and math education will be discussed, especially as it relates to physics instruction. This course also provides students firsthand experience in planning and implementing a phenomena-based curriculum through teaching lessons in elementary or middle school classrooms. Prerequisite: Corequisite: PHSX 313.

**PHSX 400. Topics in Physics and Astronomy: _____. 1-3 Credits. N**

A course on special topics in physics and astronomy, given as the need arises. Course may be repeated for different topics. Each section may have prerequisites to be determined by the instructor.

**PHSX 420. Science and Policy. 3 Credits. N**

An introduction to the relationship between science and public policy. The mutual interactions between public policy and scientific practice are explored within an ethical framework with examples that include energy and sustainability issues. An experiential course where students will be asked to develop and implement ethical solutions and engage meaningfully on a practicum project for local, regional, national, or international partners who are working on policy decisions which have technology implications. Honors credit is available for this course. Prerequisite: Eligibility for MATH 101.

**PHSX 500. Special Problems. 1-5 Credits. N**

Work in some area of physics beyond the topics or material covered in other courses. For some problems, continued enrollment in consecutive semesters may be appropriate. Prerequisite: One junior-senior course in science in an area related to the problem and consent of instructor.

**PHSX 501. Honors Research. 1-4 Credits. N**

This course is for students seeking Departmental Honors in Astronomy, Engineering Physics, or Physics to fulfill the undergraduate research requirement. At the completion of the required four hours of total enrollment, a written and oral report of the research is required. (Same as ASTR 501 and EPHX 501.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

**PHSX 503. Undergraduate Research. 1-4 Credits. N**

This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as ASTR 503 and EPHX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

**PHSX 518. Mathematical Physics. 3 Credits. N**

Applications of modern mathematical methods to problems in mechanics and modern physics. Techniques include application of partial differential equations and complex variables to classical field problems in continuous mechanics, unstable and chaotic systems, electromagnetics, hydrodynamics, and heat flow. Applications of elementary transformation theory and group theory, probability and statistics, and nonlinear analysis to selected problems in modern physics as well as to graphical representation of experimental data. (Same as EPHX 518.) Prerequisite: PHSX 313; MATH 220 or MATH 221 or MATH 320; or permission of instructor.

**PHSX 521. Mechanics I. 3 Credits. N**

Newton's laws of motion. Motion of a particle in one, two, and three dimensions. Motion of a system of particles. Moving coordinate systems. (Same as EPHX 521.) Prerequisite: PHSX 213 or PHSX 211 and PHSX 216; MATH 127 or MATH 147; MATH 290 or MATH 291; and MATH 220, MATH 221 or MATH 320.

**PHSX 531. Electricity and Magnetism. 3 Credits. N**

This course will explore the properties of electric and magnetic fields, including electrostatics, Gauss' Law, boundary value methods, electric fields in matter, electromagnetic induction, magnetic fields in matter, the properties of electric and magnetic dipoles, and of dielectric and magnetic materials. (Same as EPHX 531.) Prerequisite: PHSX 214, or PHSX 212 and PHSX 236, or PHSX 202; PHSX 521 or EPHX 521 or special permission; MATH 127 or MATH 147; MATH 290 or MATH 291; and MATH 220, MATH 221, or MATH 320.

**PHSX 536. Electronic Circuit Measurement and Design. 4 Credits. N LFE**

A laboratory course that explores the theory and experimental techniques of analog and digital electronic circuit design and measurement. Topics include transient response, transmission lines, transistors, operational amplifiers, and digital logic. (Same as EPHX 536.) Prerequisite: PHSX 214 or PHSX 212 and PHSX 236; MATH 127 or MATH 147; and MATH 290 or MATH 291. PHSX 313 and 316 recommended.

**PHSX 594. Cosmology and Culture. 3 Credits. N**

A survey of modern physical cosmology, its recent historical roots, and creation myths from many world cultures. An examination of the effects of these stories on their parent cultures.

**PHSX 598. Research Methods. 3 Credits. N LFE**

An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling,
laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UCanTeach program. (Same as CHEM 598.) Prerequisite: At least one course at the 100 level or above in CHEM, MATH, or PHSX.

PHSX 600. Special Topics in Physics and Astrophysics: _____.
3 Credits. N
Different topics will be covered as needed. This course will address topics in physics and astrophysics not covered in regularly offered courses. May be repeated if topic differs. (Same as EPHX 600.) Prerequisite: Permission of instructor.

4 Credits. N LFE
A laboratory course emphasizing the application of physical principles to the design of systems for research, monitoring, or control. Topics include the use of microcomputers as controllers, interfacing microcomputers with measurement devices, and use of approximations and/or computer simulation to optimize design parameters, linear control systems, and noise. (Same as EPHX 601.) Prerequisite: Twelve hours of junior-senior credit in physics or engineering, including one laboratory course.

PHSX 611. Introductory Quantum Mechanics.
3 Credits. N
An introduction to quantum mechanics, emphasizing a physical overview. Topics include the formalism of nonrelativistic quantum mechanics with emphasis on linear algebra, the 3-dimensional Schrodinger equation with applications to the hydrogen atom; harmonic oscillator; and time-independent perturbation theory. (Same as EPHX 511.) Prerequisite: PHSX 313, PHSX 511 or EPHX 521, and MATH 290 or MATH 291.

3 Credits. N
An introduction to the use of numerical methods in the solution of problems in physics for which simplifications allowing closed-form solutions are not applicable. Examples are drawn from mechanics, electricity, magnetism, thermodynamics, and optics. (Same as EPHX 615.) Prerequisite: PHSX 313, MATH 320 or equivalent, and EECS 138 or equivalent.

PHSX 616. Physical Measurements.
4 Credits. N LFE
A laboratory course emphasizing experimental techniques and data analysis, as well as scientific writing and presentation skills. Experiments will explore a range of classical and modern physics topics. Students will also practice ethical decision making using case studies appropriate for the discipline. (Same as EPHX 616.) Prerequisite: PHSX 313, PHSX 316 or EPHX 316, and PHSX 521 or EPHX 521. (PHSX 521 or EPHX 521 may be taken concurrently.)

PHSX 621. Mechanics II.
3 Credits. N
Continuation of PHSX 521. Lagrange's equations and generalized coordinates. Mechanics of continuous media. Tensor algebra and rotation of a rigid body. Special relativity and relativistic dynamics. (Same as EPHX 621.) Prerequisite: EPHX 521 or PHSX 521.

3 Credits. N
Maxwell's equations, wave propagation, optics and waveguides, radiation, relativistic transformations of fields and sources, use of covariance and invariance in relativity. Normally a continuation of PHSX 531. (Same as EPHX 631.) Prerequisite: EPHX 531 or PHSX 531.

PHSX 641. Introduction to Nuclear Physics.
3 Credits. N
Experimental methods in nuclear physics, elementary concepts and simple considerations about nuclear forces, alpha and beta decay, gamma radiation, nuclear structure, and reaction systematics. (Same as EPHX 641.) Prerequisite: PHSX 313 and PHSX 511.
application. Intended for early career graduate students and advanced undergraduate students.

**PHSX 711. Quantum Mechanics I. 3 Credits.**

**PHSX 717. Graduate Seminar. 1 Credits.**
First year graduate students meet to survey research opportunities in the department and develop skills in giving oral presentations in physics and related areas. Students will also learn about topics in responsible scholarship that may include: the origin of ideas and the allocation of credit, the treatment of data, scientific misconduct, intellectual property and entrepreneurship, the researcher in society, collaborative research, mentor/trainee responsibilities, and safe practices.

**PHSX 718. Mathematical Methods in Physical Sciences. 3 Credits.**
Review of complex variable theory; introduction to the partial differential equations of physical systems; Fourier analysis; special functions of mathematical physics; and chemistry. (Same as CHEM 718.) Prerequisite: Two semesters of junior-senior mathematics.

**PHSX 719. Physics and Astronomy Graduate Problem Solving. 1 Credits.**
This course teaches students skills in solving graduate level physics and astronomy problems. Graded on a satisfactory/unsatisfactory basis.

**PHSX 721. Chaotic Dynamics. 3 Credits.**
Topics covered may include the following: dynamical systems, attractors, sensitive dependence on initial conditions, chaos, one-dimensional maps, strange attractors and fractal dimensions, fat fractals, the horseshoe map, symbolic dynamics, linear stability of periodic orbits, stable and unstable manifolds, Lyapunov exponents, topological entropy, quasiperiodicity, strange nonchaotic attractors, nonattracting chaotic sets, fractal basin boundaries, renormalization group analysis, intermittency, crisis and chaotic transients. Prerequisite: Mechanics (PHSX 521, or its equivalent), ordinary differential equations (MATH 320, or its equivalent), and some computer programming knowledge.

**PHSX 727. Advanced Geophysics: ______. 1-3 Credits.**
Topics to vary with demand and include heat flow, wave propagation, synthetic seismograms, groundwater exploration, geothermal exploration, electrical methods in exploration, rock mechanics-geotechnophysics, rock magnetism, geomagnetism, paleomagnetism, geophysical inverse theory, and others upon sufficient demand. May be repeated for different topics. (Same as GEOL 771.) Prerequisite: GEOL 572 or consent of instructor.

**PHSX 731. Molecular Biophysics. 3 Credits.**
Methods and concepts in contemporary molecular biophysics are discussed. Particular emphasis is placed on the thermodynamics of macromolecular interactions and quantitative methods of data analysis. Basic enzymology and biophysical spectroscopy will also be reviewed. Prerequisite: PHSX 212, MATH 125, and either CHEM 135 or CHEM 175.

**PHSX 741. Nuclear Physics I. 3 Credits.**
Experimental methods in nuclear physics, elementary concepts and simple considerations about nuclear forces, alpha and beta decay, gamma radiation, nuclear structure, and reaction systematics. Prerequisite: PHSX 511.

**PHSX 761. Elementary Particles I. 3 Credits.**
Particle accelerators and detectors; quarks and leptons; invariance principles and conservation laws; strong, electromagnetic, and weak interactions of elementary particles; unification of electroweak and other interactions. Prerequisite: Corequisite: PHSX 711.

**PHSX 781. Solid State Physics I. 3 Credits.**
Classification of solids, structure and symmetry of crystals; lattice vibrations and thermal properties of solids; electric and magnetic properties; electron theory of metals and semiconductors; electronic and atomic transport processes; theory of ionic crystals. Prerequisite: PHSX 511 (or CHEM 648) and PHSX 671 (or CHEM 646).

**PHSX 791. Seminar in Astrophysics, Cosmology, and Space Physics. 1-3 Credits.**
Seminar designed to cover current topics in the physics of the Universe beyond the solar system. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. Open to undergraduates with twelve hours of physics/astronomy courses numbered 500 or above, or consent of instructor.

**PHSX 792. Topics in Advanced Astrophysics. 3 Credits.**
This course will address one or more of the following advanced topics in astrophysics: high energy astrophysics, nuclear astrophysics, galactic and extragalactic astrophysics, space physics, cosmology, astrobiophysics, and the interstellar and intergalactic media (ISM/IGM). This course may be repeated for credit if topical content differs. (Same as ASTR 792.) Prerequisite: ASTR 692 or permission of instructor.

**PHSX 793. Physical Cosmology. 3 Credits.**
Discussion of how fundamental laws of physics govern the evolution of the universe as a whole along with its structure. Survey of cosmogenic clues in the observable universe, including observed structures, cosmic background radiation and evidence for dark matter. Development of the universe, including theories of initial conditions; cosmological phase transitions; generation of possible relics and dark matter; symmetry breaking; baryon asymmetry; nucleosynthesis; recombination, gravitational instability and the formation of structure; current experimental techniques. Prerequisite: PHSX 718. Recommended: PHSX 693.

**PHSX 795. Space Plasma Physics. 3 Credits.**
The physics of fully ionized gases in magnetic fields and their application to interplanetary processes, planetary radiation belts, and the sun. The motion of charged particles in magnetic fields, magnetohydrodynamic waves, the solar wind, the ionosphere, and the magnetosphere. (Same as ASTR 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631.

**PHSX 800. Graduate Problems. 1-5 Credits.**
Advanced laboratory problems, special research problems, or library reading problems. Repeated enrollments are permitted.

**PHSX 801. Advanced Topics. 1-3 Credits.**
Lectures on advanced material not covered by regular courses. The topics are not limited but generally address recent experimental or theoretical developments in subjects such as superconductivity, nuclear physics, elementary particle physics, quantum field theory, gauge and unified theories, nonlinear or chaotic systems, space plasma physics, and astrophysics and cosmology. Repeated enrollments are permitted.

**PHSX 811. Quantum Mechanics II. 3 Credits.**
This advanced course in quantum mechanics covers scattering theory, time dependent perturbation theory, density-matrix formalism, entanglement, and relativistic quantum mechanics, e.g. Klein-Gordon and Dirac equations. Additional advanced topics may be covered at the discretion of the instructor. Prerequisite: PHSX 711.

**PHSX 815. Computational Methods in Physical Sciences. 3 Credits.**
Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document computer programs to solve physical problems. (Same as ASTR 815 and CHEM 914.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above.

PHSX 821. Classical Mechanics. 3 Credits.
Vector and tensor notation; review of Newtonian mechanics; Lagrangian mechanics; linear vector spaces and matrix theory with applications to the theory of small oscillations; rigid bodies; Hamiltonian formalism. Special relativity. Prerequisite: Twelve hours of junior-senior courses in physics.

PHSX 831. Electrodynamics I. 3 Credits.
Electrostatics and magnetostatics; Maxwell's equations; plane waves; waveguides. Prerequisite: PHSX 718 and PHSX 821.

PHSX 841. Nuclear Physics II. 3 Credits.
Nuclear forces and the two-body problem; nuclear models; phenomenological treatment of nuclear reactions and decay processes. Prerequisite: PHSX 741 and PHSX 811.

PHSX 855. Advanced Optics. 3 Credits.
Advanced topics in optics that may include: Laser principles and techniques, light propagation in dielectrics, absorption and luminescence, interaction of light with free electrons and phonons, nonlinear optics, photonic devices, and optical spectroscopy.

PHSX 861. Elementary Particles II. 3 Credits.
Theoretical analysis of the standard model of strong and electroweak interactions. Applications to decay and scattering processes with comparison to experiments. Selected topics in non-perturbative physics. Examples of tests to probe beyond the standard model. Prerequisite: PHSX 761. Corequisite: PHSX 911.

PHSX 871. Statistical Physics I. 3 Credits.
Review of and advanced topics in thermodynamics; the Maxwell relations; the third law; phase transitions. Kinetic theory: the Boltzmann equation; transport phenomena. Statistical mechanics: ideal Maxwell-Boltzmann, Fermi-Dirac and Bose-Einstein gases; ensemble theory; derivation of the laws of thermodynamics. Prerequisite: PHSX 711 and PHSX 821. PHSX 671 is recommended.

PHSX 881. Solid State Physics II. 3 Credits.
More advanced topics in solid state physics that may include: diamagnetism, paramagnetism, ferromagnetism, and antiferromagnetism; electron and nuclear spin magnetic resonance; dielectric properties and ferroelectricity; photoconductivity and luminescence. Prerequisite: PHSX 631 and PHSX 711 (or CHEM 750).

PHSX 895. Plasma Physics. 3 Credits.
Magnetohydrodynamics, including discussion of shocks, waves, and stability theory; statistical mechanical foundations; kinetic theory; microinstability; non-linear phenomena. Prerequisite: PHSX 795.

PHSX 899. Master's Research/Thesis. 1-10 Credits.
Research work (either experimental or theoretical) in physics for students working toward the master's degree. Repeated enrollments are permitted. Graded on a satisfactory progress/limited progress/no progress basis.

PHSX 911. Quantum Mechanics III. 3 Credits.

PHSX 912. Quantum Field Theory. 3 Credits.

PHSX 915. Relativity. 3 Credits.
Reviews of special relativity, manifolds, tensors, and geometry. General coordinate covariance and general relativity. Applications to classical theory of gravitation: weak field tests, isotropic, homogeneous cosmology, Schwarzschild solution. Selected advanced topics. Prerequisite: A total of 10 hours of junior/senior work in physics and mathematics, including at least concurrent enrollment in MATH 646.

PHSX 917. Seminar in Theoretical Physics. 1-3 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 931. Electrodynamics II. 3 Credits.
Inhomogeneous Maxwell's equations and multipole radiation fields; special theory of relativity; radiation from accelerated charges; scattering and dispersion. Prerequisite: PHSX 831.

PHSX 947. Seminar in Nuclear Physics. 1-3 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 957. Seminar in Physics Education Research. 1-3 Credits.
Seminar designed to cover current topics in physics education research. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course.

PHSX 967. Seminar in Particle Physics. 1-3 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 971. Advanced Statistical Mechanics. 3 Credits.
Advanced equilibrium statistical mechanics and introduction to nonequilibrium statistical mechanics. Topics include: the theory of liquids, critical phenomena, linear response theory and time correlation functions, Langevin dynamics, and molecular hydrodynamics. (Same as CHEM 950.) Prerequisite: PHSX 871 or CHEM 917.

PHSX 987. Seminar in Solid State Physics. 1-3 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 999. Ph.D. Dissertation Research. 1-12 Credits.
Research work (either experimental or theoretical) in physics for students working toward the Ph.D. degree. Repeated enrollments are permitted. Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Arts in Astronomy

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department's research and education missions range from the size of the smallest atom to the size of the universe. Our goal is to understand the physical universe. The questions addressed by our department's research and education missions range from the size of the smallest atom to the size of the universe.
Undergraduate programs in astronomy

Astronomy degrees are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, biology, or geology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

Undergraduate Admission

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Advising

Students considering a major in astronomy should confer early with a departmental representative about the selection of courses. The B.A. degree is appropriate for students who want a general education in astronomy as part of a broadly structured liberal education. The B.S. is a more specialized program with a substantial emphasis on physics content as well as astronomy. It provides preparation for a professional career or graduate work in astronomy, astrophysics, or related fields. A total of 120 credit hours is required for graduation.

First- and Second-Year Preparation

All major programs in physics and astronomy share requirements in basic physics and mathematics including PHSX 150, a seminar course for majors. Completion of MATH 125 and MATH 126 in the first year allows students to start calculus-based physics foundation courses (PHSX 211 and PHSX 216 or PHSX 213, followed by PHSX 212 and PHSX 236 or PHSX 214) by the second semester. Majors are encouraged to take PHSX 213 and PHSX 214, the honors versions of PHSX 211 and PHSX 212. Students should take these courses and ASTR 391 in their first two years. B.S. astronomy majors normally complete additional course work in mathematics (M [http://catalog.ku.edu/search/?P=MATH +127]ATH 127, MATH 290, and MATH 320), as well as PHSX 313 and PHSX 316, in the second year.

Requirements for the B.A. Major in Astronomy

All students pursuing the Bachelor of Arts in Astronomy must complete the KU Core requirements and the College BA specific requirements, listed in the KU Core and College sections of the catalog.

Additional astronomy, astrophysics, or physics courses required for major

In addition to the above specifically required courses, Astronomy BA candidates must complete at least 4 additional credits in physics or astronomy at the 300+ level. Students may enroll in ASTR 390 for undergraduate programs for 1 or more credit hours and in ASTR 503 (ASTR 501 honors) for research credit. ASTR 394 is highly recommended. Other recommended courses include ASTR 691 and 692, PHSX 594, GEOL 572, PHSX 313/316 and other PHSX courses 500 and above; most of these course have pre-requisites that may require additional preparation in mathematics and/or physics.

**Major Hours & Major GPA**

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 25.5 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 16 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of 16 hours from junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Major Junior/Senior Graduation GPA (https://degreeprogress.ku.edu/node/2/).

Below is a sample 4-year plan for students pursuing the BA in Astronomy. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have completed MATH 104, or equivalent prior to the freshman year, fall semester.

**Total Hours 120.5**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CHEM 130 requires MATH 115 eligibility for enrollment.
Majors are required to complete a minimum of 5 hours of 300+ level electives in Physics or Astronomy.

Course Timing is interchangeable between Junior and Senior years and is dependent on course offering/availability. ASTR 591 is taught in fall semesters of odd-numbered years and ASTR 592 is taught in spring semesters of even-numbered years.

Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors in Physics and Astronomy**

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate’s final semester, achieve a GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503.

A grade of B or better must be earned in one of the following: ASTR 503, PHSX 501 or PHSX 503. All of our department’s honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. Students planning to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.

**Bachelor of Science in Astronomy**

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

**Undergraduate programs in astronomy**

Astronomy degrees are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

**Courses for Nonmajors**

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, biology, or geology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Advising**

Students considering a major in astronomy should confer early with a departmental representative about the selection of courses. The B.A. degree is appropriate for students who want a general education in astronomy as part of a broadly structured liberal education. The B.S. is a more specialized program with a substantial emphasis on physics content.
as well as astronomy. It provides preparation for a professional career or graduate work in astronomy, astrophysics, or related fields. A total of 120 credit hours is required for graduation.

**First- and Second-Year Preparation**

All major programs in physics and astronomy share requirements in basic physics and mathematics including PHSX 150, a seminar course for majors. Completion of MATH 125 and MATH 126 in the first year allows students to start calculus-based physics foundation courses (PHSX 211 and PHSX 216 or PHSX 213, followed by PHSX 212 and PHSX 236 or PHSX 214) by the second semester. Majors are encouraged to take PHSX 213 and PHSX 214, the honors versions of PHSX 211/PHSX 216 and PHSX 212/PHSX 236. Students should take these courses and ASTR 391 in their first two years. B.S. astronomy majors normally complete additional course work in mathematics (MATH 127, MATH 290, and MATH 320), as well as PHSX 313 and PHSX 316, in the second year.

**Requirements for the B.S. Degree in Astronomy**

All students pursuing the Bachelor of Science in Astronomy must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the KU Core requirements, please see the KU Core section of the catalog.

**PHSX 531**  
Electricity and Magnetism  
3

**PHSX 671**  
Thermal Physics  
3

**Thermal Physics.** Satisfied by the following:

**PHSX 671**  
Thermal Physics  
3

**Physics Elective.** Satisfied by any PHSX lecture or laboratory course numbered 500 or higher (PHSX 693 recommended) (with the exception of PHSX 594), including:

- **ASTR 792**  
Topics in Advanced Astrophysics  
- **ASTR 795**  
Space Plasma Physics  
- **PHSX 693**  
Gravitation and Cosmology (recommended)

### Major Hours & Major GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**  
Satisfied by 30 hours of major courses.

**Major Hours in Residence**  
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**  
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**  
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BS in Astronomy. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have completed MATH 104, or its equivalent, prior to the freshman year, fall semester.

### Freshman

**Fall**  
4 ASTR 391 (Major Requirement SPRING ONLY)  
3

MATH 125 (Goal 1.2 Quantitative Literacy, Major Requirement)  
4

PHSX 150 (Major Requirement)  
0.5

CHEM 130 or 170 (Goal 3 Natural Science, Major Requirement)  
5

Goal 2.1 Written Communication (1 of 2)  
3

Goal 3 Social Science  
3

**Hours**  
15.5

### Sophomore

**Fall**  
3 ASTR 592 (Major Requirement)  
3

ASTR 591 (Major Requirement)  
3

**Hours**  
15-16

### Junior

**Fall**  
4 ASTR 692 (Major Requirement)  
3

ASTR 596 (Goal 6 Integration & Creativity, Major Requirement)  
3

ASTR 592 (Major Requirement)  
3

PHSX 521 (Major Requirement)  
3

PHSX Math Elective 300+ (Major Requirement)  
3

Goal 2.2 Communication  
3

**Hours**  
16

### Senior

**Fall**  
3 ASTR 692 (Major Requirement)  
3

PHSX 313 (Goal 3 Natural Science, Major Requirement)  
3

PHSX 127 (Pre-requisite for Major Requirement)  
4

PHSX 290 (Major Requirement)  
2

Goal 2.1 Written Communication (2 of 2)  
3

PHSX 611 (Major Requirement)  
4

PHSX Math Elective 300+ (Major Requirement)  
3

Goal 2.2 Communication  
3

**Hours**  
16

### Total Hours 120.5-121.5

1. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
2. Offered odd-numbered years.
3. Offered even-numbered years.
4. PHSX 150, PHSX 521, ASTR 591, ASTR 596, ASTR 691, PHSX 531, and PHSX 671 are Fall only courses. PHSX 611, ASTR 592, and ASTR 692 are Spring only courses.
5. Majors are encouraged to take PHSX 213.
6. Majors are encouraged to take PHSX 214.
Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate’s final semester, achieve a minimum GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 503, PHSX 501 or PHSX 503. All of our department’s honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. Students intending to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.

Bachelor of Arts in Physics

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse careers ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate programs in physics and astronomy

We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational scientific knowledge can be useful – examples include teaching and medicine – and anyone seeking to include astronomy and physics as part of their general education. The department offers BA degrees in astronomy and physics and BS degrees in astronomy, physics, and engineering physics. Degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The primary degree offered is a BS in Physics. In addition to this standard BS in Physics, there are also interdisciplinary and pre-medicine versions (specializations) of the BS in Physics degree. The interdisciplinary track allows students to take elective courses in other STEM disciplines and the pre-medicine emphasis is for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in locales such as Antarctica, Chile, and CERN).

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.
Requirements for the B.A. Major in Physics

All students pursuing the Bachelor of Arts in Physics must complete the KU Core requirements and the College BA specific requirements, listed in the KU Core and College sections of the catalog.

This degree plan assumes students will have the equivalent of KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/) prior to freshman year, fall semester.

**Physics Core Knowledge and Skills**

Majors must complete a course in each of the following areas:

- Seminar in Physics, Astronomy, and Engineering Physics. Satisfied by:
  - PHSX 150 Seminar in Physics, Astronomy and Engineering Physics
- General Physics I. Satisfied by one of the following:
  - PHSX 211 General Physics I
  - & PHSX 216 General Physics I Laboratory
- General Physics II. Satisfied by one of the following:
  - PHSX 212 General Physics II
  - & PHSX 236 General Physics II Laboratory
  - PHSX 214 General Physics II Honors
- General Physics III and Intermediate Physics Laboratory. Satisfied by:
  - PHSX 313 General Physics III
  - & PHSX 316 and Intermediate Physics Laboratory I

**Mechanics I. Satisfied by:**
- PHSX 521 Mechanics I

**Electricity and Magnetism. Satisfied by:**
- PHSX 531 Electricity and Magnetism

**Advanced Physics Lab. Satisfied by one of the following:**
- PHSX 536 Electronic Circuit Measurement and Design
  - or PHSX 516 Physical Measurements

**Special Problems. Satisfied by:**
- PHSX 500 Special Problems

**Numerical and Computational Methods in Physics. Satisfied by:**
- PHSX 615 Numerical and Computational Methods in Physics

Below is a sample 4-year plan for students pursuing the BA in Physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to freshman year, fall semester.

### Total Hours 120.5

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 Prerequisite for MATH 125: MATH 104; or MATH 103; or three years of college preparatory mathematics including trigonometry and a score of 28 or higher on ACT mathematics; or a qualifying score on the mathematics placement test.

3 MATH 320 or MATH 220 (or MATH 221) is a pre-requisite for PHSX 313.

4 Either PHSX 536 or PHSX 616 is required for the major, not both. A 500+ level Physics laboratory or lecture elective is required for the major.

5 It is recommended that students fulfill Goal 6 with a course from within their major. PHSX 503: Undergraduate Research is not required by the major, but is an encouraged course to fulfill Goal 6 and to fulfill research experience.

6 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

7 For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note: All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/ Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate’s final semester, achieve a minimum GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 503, PHSX 501 or PHSX 503. All of our department’s honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. Students planning to graduate with honors must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.

### BA in Physics with concentration in Computational Physics

Below is a sample 4-year plan for students pursuing the BA in Physics with a concentration in Computational Physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to freshman year, fall semester.

# Bachelor of Science in Physics

**Why study physics and astronomy?**

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the size of the atom to the size of the universe, from the potential energy in a solar cell to the gravity of a black hole. Our research covers a broad range of topics, from fundamental questions in cosmology to applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse careers ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

## Undergraduate program in physics and astronomy

We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational physical science and critical thinking can be useful – examples include teaching and medicine – and anyone seeking to include astronomy and physics as part of their general education. The department offers BA degrees in astronomy and physics and BS degrees in astronomy, physics, and engineering physics. Degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The primary degree offered is a BS in Physics. In addition to this standard BS in Physics, there are also interdisciplinary and pre-medicine versions (specializations) of the BS in Physics degree. The interdisciplinary track allows students to take elective courses in other STEM disciplines and the pre-medicine emphasis is for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in locales such as Antarctica, Chile, and CERN).

## Undergraduate Admission

### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Prerequisite for MATH 125: MATH 104; or MATH 103; or three years of college preparatory mathematics including trigonometry and a score of 28 or higher on ACT mathematics; or a qualifying score on the mathematics placement test.

3. MATH 320 or MATH 220 (or MATH 221) is a pre-requisite for PHSX 313.

4. Either PHSX 536 or PHSX 616 is required for the major, not both.

5. Hour requirements (incl. 45 hr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Requirements for the B.S. Degree in Physics**

Physics Bachelor of Science (B.S.) General Education Requirements

All students pursuing the Bachelor of Science in Physics must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the KU Core requirements, please see the KU Core section of the catalog.

**BS in Physics with Interdisciplinary Specialization 25-30**

Computing and Programming. Satisfied by:
- E ECS 138 Introduction to Computing: _____
- or E ECS 16 Programming I
- or E ECS 16 Programming I: Honors

Advanced Physics Labs. Satisfied by one of the following:
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design

Advanced Physics. Satisfied by two of the following:
- PHSX 621 Mechanics II
- PHSX 631 Electromagnetic Theory
- PHSX 711 Quantum Mechanics I
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design

Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher and not part of the other specific requirements for the major.

Math Elective. Satisfied by one of the following:
- PHSX 518 Mathematical Physics
- PHSX 718 Mathematical Methods in Physical Sciences
- MATH 526 Applied Mathematical Statistics I
- MATH 530 Mathematical Models
- MATH 558 Introductory Modern Algebra
- MATH 581 Numerical Methods
- MATH 590 Linear Algebra
- MATH 628 Mathematical Theory of Statistics
- MATH 646 Complex Variable and Applications
- MATH 647 Applied Partial Differential Equations
- MATH 648 Calculus of Variations and Integral Equations
- MATH 660 Geometry I
- MATH 661 Geometry II

any 700-level MATH lecture course

Allied Science Fields. Satisfied by the completion of 2 advanced courses in 1 allied science field chosen from the following:

Biology. Satisfied by two of the following:
- BIOL 400 Fundamentals of Microbiology
- BIOL 412 Evolutionary Biology
- BIOL 416 Cell Structure and Function
- BIOL 595 Human Genetics
- BIOL 600 Introductory Biochemistry, Lectures
- BIOL 636 Biochemistry I
- BIOL 638 Biochemistry II
- BIOL 546 Mammalian Physiology

Chemistry. Satisfied by two of the following:
- CHEM 598 Research Methods (UKanTeach students only)
- CHEM 330 Organic Chemistry I

**BS in Physics with Pre-Medicine Specialization 65**

Advanced Physics Labs. Satisfied by one of the following:
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design

Introductory Biology. Satisfied by the following:
- BIOL 150 Principles of Molecular and Cellular Biology
- BIOL 152 Principles of Organismal Biology
- BIOL 154 Introductory Biology Lab for STEM Majors
- BIOL 240 Fundamentals of Human Anatomy
- or BIOL 546 Mammalian Physiology

Genetics. Satisfied by the following:
- BIOL 350 Principles of Genetics

Advanced Biology. Satisfied by:
- BIOL 400 Fundamentals of Microbiology
- BIOL 503 Immunology

Biochemistry. Satisfied by the following:
- BIOL 600 Introductory Biochemistry, Lectures

General Chemistry II. Satisfied by:
- CHEM 135 General Chemistry II
- or CHEM 17:Chemistry for the Chemical Sciences II
- or CHEM 19:Foundations of Chemistry II, Honors
- & CHEM 19 and Foundations of Chemistry II Laboratory, Honors

Organic Chemistry. Satisfied by:
- CHEM 330 Organic Chemistry I
- CHEM 331 Organic Chemistry I Laboratory
- CHEM 335 Organic Chemistry II
- CHEM 336 Organic Chemistry II Laboratory

Physical Chemistry. Satisfied by:
- CHEM 520 Biological Physical Chemistry with Laboratory
- or CHEM 53:Physical Chemistry I
- & CHEM 53 and Physical Chemistry Laboratory

Additional Requirements

Soc 104 Elements of Sociology Also satisfies KU Core Goal 4.1
- or SOC 105 Elements of Sociology, Honors
- PSYC 104 General Psychology Also satisfies KU Core Goal 3.5
- or PSYC 105 General Psychology, Honors
### Physics Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate's final semester, achieve a minimum GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 503, PHSX 501 or PHSX 503. All of our department's honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. Students planning to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.

### BS in Physics with specialization in Interdisciplinary Physics

Below is a sample 4-year plan for students pursuing the BS in Physics with Interdisciplinary specialization. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

| SPAN 104 | Elementary Spanish I  
| or SPAN 111 | Intensive Elementary Spanish |

1. This course will not count as one of the two Advanced Physics Courses if it has already counted toward the one required Advanced Physics Lab.

BS in Physics with specialization in Pre-Medicine

The BS in Physics, Pre-Medicine specialization, provides coursework and training necessary for students interested in pursuing a career in medicine, medical physics, or biophysics. The requirements of this degree program are designed to meet the admission requirements of regional medical schools.

This degree plan assumes students will be ready to jump into pre-med curriculum.

Below is a sample 4-year plan for students pursuing the BS in Physics with Pre-Medicine specialization. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120.5

1. It is recommended that students fulfill Goal 6 with a course from within their major. PHSX 503 Undergraduate Research counts toward KU Core Goal 6 if taken for at least 3 credit hours.

2. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BS in Physics with specialization in Standard Physics

Below is a sample 4-year plan for students pursuing the BS in Physics. This degree provides coursework and training necessary for students interested in pursuing graduate study in physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

</table>

| Goal 4.1 US Diversity | 3 Goal 4.2 Global Awareness | 3 |
| Second Area of Study/ Elective/Degree/Junior-Senior Hours | 3 Second Area of Study/ Elective/Degree/Junior-Senior Hours | 3 |
| Total Hours 120.5 | 3 | 3 |

1. It is recommended that students fulfill Goal 6 with a course from within their major. PHSX 503 Undergraduate Research counts toward KU Core Goal 6 if taken for at least 3 credit hours.
2. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Minor in Astrobiology

#### Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate...
Undergraduate programs in astronomy

Astronomy degrees are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, biology, or geology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

Requirements for the Minor in Astrobiology

Students selecting this minor must complete courses as specified in each of the following areas:

Minor in Astronomy

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department's research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

21-22

**Minor Hours & Minor GPA**

While completing all required courses (above), minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**
Satisfied by 21 hours of major courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the major.
Minors Junior/Senior (300+) Hours
Satisfied by a minimum of 13 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in Astrophysics of Origins

The undergraduate certificate, Astrophysics of Origins, offers an exposure to the wonders of the Universe and the possible future of space exploration in the 21st century. Building on foundational coursework in physics, the certificate course offerings provide exposure to astrophysics and the search for life in the Universe as well as a cultural appreciation of origin stories from many cultures.

1. PHSX 210 (General Physics I for Engineers, 3 credit hours) or PHSX 211 (General Physics I, 4 credit hours) or PHSX 213 (General Physics I, Honors, 5 credit hours).
2. PHSX 212 (General Physics II, 3 credit hours)
3. Any two of the following courses: ASTR 391 (Physical Astronomy, Honors, 3 credit hours); ASTR 394 (Quest For Extraterrestrial Life, 3 credit hours); PHSX 594 (Cosmology and Culture, 3 credit hours).

This certificate thus requires between 12 and 14 credit hours.

Master of Science in Physics

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Physics and Astronomy Graduate Program

Most admitted students have an undergraduate grade-point average of at least a B (3.0 on a 4.0 scale), overall and in the major. A baccalaureate degree with a major in physics is desirable but not required. Recommended preparation consists of courses in mechanics, electromagnetic theory, thermal physics, introductory quantum mechanics, advanced laboratory, and at least one course in mathematics beyond differential equations. Working knowledge of computers and of an advanced programming language is helpful. A student with less than the recommended preparation may enroll in these courses for graduate credit.

The General and Subject GRE are not required for admissions to the Physics and Astronomy graduate program. Submit your graduate application online (https://gradapply.ku.edu/apply/). Send all other requested application materials to the department:

The University of Kansas
Department of Physics and Astronomy
Graduate Coordinator
1251 Wescoe Hall Dr.
1082 Malott Hall
Lawrence, KS 66045

M.S. Degree in Physics

Candidates must complete a minimum of 30 credit hours of advanced lecture courses (numbered 500 or above) in physics and related subjects within a period of 7 years. Credit toward the 30 required hours is not given to students who take courses at a lower level after having completed similar upper level courses (as determined by the department) with a grade of B- or higher.

Program requirements include

1. Within 12 months of entering the program the student must fulfill the requirements of the individualized plan of study (https://physics.ku.edu/graduate-program/additional-requirements/) for all graduate degrees to certify an undergraduate knowledge of Physics. Visit the Department’s website for more information on these requirements and the process of certification.
2. 4 basic courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHSX 711</td>
<td>Quantum Mechanics I</td>
<td>3</td>
</tr>

<td>3</td>
</tr>
</tbody>
</table>
4. A minimum of 2 hours in PHSX 899 Master’s Research/Thesis is required, with a maximum of 6 hours that count toward the master’s degree. No more than 3 hours will be allowed unless directed towards completion of a thesis on original research or a written report. Students must consult with the research advisor before enrolling in more than 3 credit hours.

5. The remaining 6 to 10 hours of advanced electives must be either advanced lecture courses or advanced undergraduate laboratory courses. (This proviso excludes seminars and special problems courses.)

6. All graduate students, after their first semester, will deliver at least 1 oral presentation (https://physics.ku.edu/graduate-program/additional-requirements/) per semester.

7. General Examination: Candidates must pass a general oral examination in physics. The examination is given shortly before completion of other work for the degree. A master’s thesis is not required but may be submitted if the candidate and the director of the candidate’s research believe it to be appropriate.

Please visit the departmental web page (https://physics.ku.edu/graduate-program/) for additional information, e.g., milestones.

Please visit the University’s policy library website (https://policy.ku.edu/graduate-studies/ma-program-time-constraints/) for information on time constraints.

M.S. with emphasis in Computational Physics and Astronomy

This degree is a subspecialty program for students with a background in physics, astronomy, computer science, mathematics, or engineering who wish to become familiar with computer-based approaches to problems in these fields. This degree is intended as a terminal MS that can be completed in two years. Minimum preparation expected includes a year’s course in general physics, mathematics through differential equations, and a knowledge of python, FORTRAN, C++ or another programming language suited to scientific applications. Students pursuing this degree with an applied mathematics emphasis may wish to consider also earning a Graduate Certificate in Applied Mathematics (https://catalog.ku.edu/liberal-arts-sciences/math/applied-mathematics-gradcert/#text).

Degree Requirements

A total of at least 33 hours of credits including 30 hours of graduate credit is required for the degree. At least 50% of these hours must be at the 700 level or above. Courses numbered 500 or above count for graduate credit. Some of the courses listed below are undergraduate level EECS courses that do not count as graduate credit. Students entering the program may have satisfied several of these requirements but a total of 30 hours of graduate credit is still required. No more than the required 6 hours of PHSX 899 (Master’s Research/Thesis) may be counted toward the degree.

1. Within 12 months of entering the program the student must fulfill the requirements of the individualized plan of study (https://physics.ku.edu/graduate-program/additional-requirements/) for all graduate degrees to certify an undergraduate knowledge of Physics. Visit the Department’s website for more information on these requirements and the process of certification.

2. Required Courses (24 credit hours)

Footnote 1: Courses below the 500 level do not count towards the required 30 hours of graduate credit.

4. All graduate students, after their first semester, will deliver at least 1 oral presentation (https://physics.ku.edu/graduate-program/additional-requirements/) per semester.

5. An important component of this degree is the completion and documentation of a successful computer project. A thesis must be
presented that describes the basic physics involved in the project, the method of implementing the project, and a discussion of the results. An oral defense of the thesis is required before a committee of at least 3 members of the graduate faculty.

Please visit the departmental web page (https://physics.ku.edu/graduate-program/) for additional information, e.g., milestones.

Doctor of Philosophy in Physics

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department's research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog. Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Physics and Astronomy Graduate Program

Most admitted students have an undergraduate grade-point average of at least a B (3.0 on a 4.0 scale), overall and in the major. A baccalaureate degree with a major in physics is desirable but not required. Recommended preparation consists of courses in mechanics, electromagnetic theory, thermal physics, introductory quantum mechanics, advanced laboratory, and at least one course in mathematics beyond differential equations. Working knowledge of computers and of an advanced programming language is helpful. A student with less than the recommended preparation may enroll in these courses for graduate credit.

The General and Subject GRE are not required for admissions to the Physics and Astronomy graduate program. Submit your graduate application online (https://gradapply.ku.edu/). Send all other requested application materials to the department:

The University of Kansas
Department of Physics and Astronomy
Graduate Coordinator
1251 Wescoe Hall Dr.
1082 Malott Hall
Lawrence, KS 66045-7572

Ph.D. Degree Requirements

Undergraduate Preparation

All students must adhere to the General Requirements for all Graduate Degrees (https://physics.ku.edu/graduate-program/additional-requirements/), which are part of each student's Individualized Plan for ensuring student preparation.

Course Requirements

What follows are the default set of requirements for all Ph.D. candidates.

1. A total of 10 advanced lecture courses (30 hours of level 700 and above) is required. This excludes all seminars, classes taken as part of the Individualized Plan, and colloquia.

2. Core Courses

<table>
<thead>
<tr>

<td>Electrodynamics II</td>
<td>3</td>
</tr>
</tbody>
</table>

4. Two additional PHSX lecture courses numbered 700 or above. This excludes PHSX 815 (computational physics) and PHSX 717 (graduate seminar). The 2 courses must be in different sub-fields of physics and they may not be used to simultaneously satisfy other degree requirements. (For example: if PHSX 911 is being used to satisfy the PHSX 811 core requirement, it may not also be used for this requirement.)

5. One credit hour of Colloquium is required (PHSX 700). See Department website (https://physics.ku.edu/graduate-program/physics-PhD/course-requirements/) for explanation.

6. All graduate students, after their first semester, will deliver at least 1 oral presentation per semester.

The courses listed above comprise the Department course requirements common to all students except those pursuing a multi-disciplinary plan of study, which is described below. Subsequent work, consisting of advanced courses in appropriate fields and seminars, will be selected by the student and the advisor on the basis of the student's need and intended field of specialization. The student's dissertation committee will
determine the adequacy of the student's courses and seminars and will specify the total course requirements.

Students who wish to pursue a more multidisciplinary plan of study may incorporate coursework from up to two other natural science, engineering, or mathematics (SEM) departments at KU by substituting non-PHSX/PHSX/ASTR courses at the 600 level and above from these other disciplines for the two additional electives previously described. The research advisor, or in the absence of one, the Departmental Graduate Advisor (who is the default advisor for all students without a research advisor), shall approve all such outside course choices and provide documentation for the student file on the approved courses and their rationale.

Students who wish to take courses in the social sciences, humanities, or professional schools must submit a detailed plan of study that must be approved by the Physics and Astronomy Graduate Committee. Please note that while these unique plans involving non-STEM fields will be approved by the Physics and Astronomy Graduate Committee, please consult the departmental web page for more information on those requirements and the process of certification.

Preliminary Candidacy

To be admitted to preliminary candidacy, each graduate student must satisfy the following department requirements:

1. Within 12 months of entering the program the student must fulfill the requirements of the individualized plan of study (https://physics.ku.edu/graduate-program/additional-requirements/) for all graduate degrees to certify an undergraduate knowledge of Physics. Visit the Department's website for more information on those requirements and the process of certification.

2. Achieve a minimum core course grade point average of 3.2. The core course GPA is computed from the following equally weighted elements:
   a. Grade obtained in PHSX 711 Quantum Mechanics I
   b. Grade obtained in PHSX 811 Quantum Mechanics II
   c. Grade obtained in PHSX 821 Classical Mechanics
   d. Grade obtained in PHSX 831 Electrodynamics I
   e. Average grade of 2 other PHSX lecture courses numbered 700 or higher, excluding PHSX 815 (computational physics) and PHSX 717 (graduate seminar).

3. Students may repeat of the core courses (PHSX 711, PHSX 811, PHSX 821, PHSX 821, and PHSX 831) once for the purpose of improving the core GPA. In calculating the core GPA, the Department will use only the better of the two grades.

4. The two additional 700 level or higher PHSX lecture courses (#4 under course requirements) must be taken at KU, but students entering with graduate credit from other institutions may petition the Graduate Committee for a waiver for any of the 4 named core courses. For the purposes of the core GPA, grades (of "B" or better) from the previous institution may be used for at most 3 of the 4 named courses.

5. Graduate students are normally expected to complete all core courses by the end of their second year of enrollment.

Decision on Preliminary Candidacy

Once requirements for Preliminary Candidacy have been met, the Graduate Committee will decide whether or not to admit the student to Preliminary Candidacy. Once requirements for Preliminary Candidacy have been met and confirmed by the Graduate Committee, the Graduate Committee Chair will report this result to the Graduate Faculty.

Research Skills and Responsible Scholarship

By the end of 1 year after being admitted to preliminary candidacy, the student must complete PHSX 815/ASTR 815, Computational Physics and Astronomy, with a grade of "B" or higher in order to satisfy the Research Skills requirement. Note that this course has significant prerequisites in undergraduate Computer Science. The Responsible Scholarship requirement is filled via completion of PHSX 717.

Pedagogical Instruction

Every student who receives a GTA appointment will be required to complete PHSX 702 at the first offering of the course starting with the semester of the student's initial GTA appointment. Failure to complete this class at the first opportunity may affect consideration for subsequent GTA appointments.

Comprehensive Examination

After completing a major portion of the required course work and satisfying the computing skills requirement, the student must pass the comprehensive examination.

As a written component of the exam, the student will write a 2,000 to 4,000 word paper on a topic in their chosen sub-field that is relevant to their thesis work. There is also an oral component of the exam in which the student makes an oral research presentation to a committee of faculty. This committee then asks the students questions both on their presentation and on general physics and astronomy.

Post-Comprehensive Requirements

Upon passing the comprehensive examination, the student becomes a candidate for the Ph.D. degree. Each candidate must complete a research project that has been approved by the dissertation committee. The committee establishes the candidate's course requirements and directs the research.

At least once each year after passing the comprehensive examination, the student must schedule a meeting with his or her dissertation committee to discuss progress towards the completion of the dissertation and any other concerns.

Final Oral Examination

To be awarded the PhD in Physics, a candidate for the degree must complete a dissertation and pass a final oral examination.

Please consult the departmental web page (https://physics.ku.edu/graduate-program/) for additional information.

Department of Political Science

Why study political science?

Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought of today, as one of the social sciences, is a comparatively new discipline. It developed in
the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with the origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

Ask yourself, Am I interested in public affairs? Am I a good analytical and critical thinker? Am I curious about the world and its workings? Do I communicate well orally and in writing? Do I want to be a knowledgeable citizen? Am I interested in the relationship between government and the people? Am I curious about how decisions are made and how conflicts are resolved?

Undergraduate Programs

Course work is for students studying contemporary political processes as part of their general education, for students majoring in allied social sciences, for students planning to enter professions such as law and teaching, and for majors in political science.

Courses for Nonmajors

Political Science offers several introductory courses that may be used as electives, to fulfill KU Core requirements, or to prepare for study in advanced topics in the same area.

Public Affairs Internship Program

The department supervises integrated internships for majors who are second-semester juniors or seniors. They are offered during the spring semester in Topeka and Washington, D.C. Programs consist of up to 12 hours in political science—an internship, participation in an intern seminar, and directed readings. Students serve as interns in Topeka or Washington at least 4 days each week and attend weekly seminars. Students also may enroll in a directed readings course with a faculty member on campus. Readings provide a theoretical and analytical study program related to the internship and the seminar. Contact the department early in the fall semester.

Graduate Programs

The department offers M.A. and Ph.D. degrees for students interested in academic work in political science leading to teaching and research careers. Political science graduates also have found careers in the public, private, and not-for-profit sectors. Ph.D. students can pursue concentrations in U.S. politics, comparative politics, international relations, political theory, and public policy.

Students who are interested in enrolling in graduate level coursework in the Department of Political Science without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status.

Fields of Graduate Study

For graduate study, courses in the department are divided into the following fields:

- U.S. political institutions and processes
- Comparative politics
- International relations
- Public policy
- Political philosophy and empirical theory

Courses

POLS 102. Introduction to Political Science as a Career. 1 Credits. S
Provides an overview of the discipline of political science; emphasizes developing an understanding of opportunities in political science at the University of Kansas and careers with a political science degree. Major sub-fields within the discipline are discussed as well as the benefits of particular tracks within the departmental coursework. The course helps students plan their goals for their education and match those goals to career goals. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Enrollment by permission of the instructor only.

POLS 110. Introduction to U.S. Politics. 3 Credits. SF S
An introduction to basic American governmental institutions, political processes, and policy.

POLS 111. Introduction to U.S. Politics Honors. 3 Credits. SF S
Open only to students in the College Honors Program or by consent of instructor.

POLS 125. Intelligence: Supporting National Security. 3 Credits. S
This course examines the evolution of the U.S. Intelligence Community and how it is adapting to new international security challenges. The course discusses the historical background of U.S. intelligence and how political ideology, domestic policies, technology, and the threat have shaped today’s U.S. Intelligence Community. The course provides an overview of the roles, missions, and structure of the U.S. Intelligence Community and how the various components support national security decision makers. The course also provides an overview of diplomacy and intelligence as tools of statecraft. Course looks at foreign intelligence services, their targets, and operational successes and failures. Finally, the course addresses emerging national security issues potentially shaping future U.S. intelligence operations. On completion of the course, students will have an in-depth understanding of the U.S. Intelligence Community, how it supports national security decision makers, and how it can influence policy development.

POLS 130. US Intelligence Community. 3 Credits. S
This course provides a comprehensive look at the roles, missions, and structure of the U.S. Intelligence Community. Students will develop an understanding of the components of the intelligence process used by the U.S. Intelligence Community: (1) planning and direction, (2) collection, (3) processing, (4) analysis and production, and (5) dissemination. This course also addresses the various polices and executive orders shaping intelligence collection both domestically and abroad, such as, intelligence oversight and restrictions on sharing and dissemination of information within and between local, state, and federal government agencies and the private sector. On completion of the course, students will have an in-depth understanding of the roles of the various components of the U.S. Intelligence Community and the intelligence processes used to support national security decision makers. Prerequisite: POLS 125.

POLS 150. Introduction to Comparative Politics. 3 Credits. SF S
An introduction to the comparative study of political systems emphasizing governmental structures, parties, electoral techniques, and recent trends in the field. The course also considers major differences between (1) representative and autocratic systems, and (2) developed and underdeveloped nations.

POLS 151. Introduction to Comparative Politics Honors. 3 Credits. SF S
Open only to students in the College Honors Program or by consent of instructor.

POLS 170. Introduction to International Politics. 3 Credits. SF S
A study of the nation-state system including the role of nationalism, sovereignty, and power. Patterns of state action including neutralism, collective security, war, and cooperation through international organizations are stressed. Specific examples of contemporary international problems are also analyzed and discussed.

**POLS 171. Introduction to International Politics Honors. 3 Credits. SF S**
Open only to students in the College Honors Program or by consent of instructor.

**POLS 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Political Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**POLS 199. Data I: Dealing with Data. 3 Credits. S**
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as ECON 199, PSYC 199 and SOC 199.)

**POLS 249. Study Abroad Topics in Political Science: _____ 1-6 Credits. S**
This course is designed for the study of special topics in Political Science at the freshman/sophomore level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**POLS 301. Introduction to Political Theory. 3 Credits. S**
An examination of the perennial issues and major concepts in political philosophy. Ideas such as community, liberty, equality, justice, and democracy are examined in order to understand the various meanings given to these concepts in political discourse and to understand the role of these ideas in various political theories.

**POLS 306. Political Science Methods of Inquiry. 3 Credits. S**
An introduction to the social science methods of investigation and analysis that are used in political science as a discipline and, in many cases, in public and private sector analytical work as well. The nature of political science data sources and methods of data collection, the logic of social scientific inquiry, and key methods of data analysis are emphasized. Prerequisite: POLS 110 or POLS 150 or POLS 170 (or their Honors equivalents), or consent of instructor.

**POLS 308. Topics in Social Justice: _____ 3 Credits.**
The study of selected problems in social justice or equity. Course is repeatable for different topics.

**POLS 310. Contemporary Issues in U.S. Politics. 3 Credits. S**
An examination of issues and problems concerning government and politics in American society. This course is intended primarily for non-majors, and does not meet the junior/senior level course field distribution requirement.

**POLS 320. Introduction to Public Policy. 3 Credits. S**
Offers an introduction to the policy-making process covering policy formulation, adoption, and implementation. Overview of major theories of the policy-making process, the actors involved in the process, and the constraints and enhancements offered by the broader political environment. The theoretical frameworks are applied to several substantive policy areas.

**POLS 325. Intelligence Analytics. 3 Credits. S**
This course develops advanced critical thinking, writing, oral communication skills by enhancing the student's ability to apply analytic tradecraft methods to intelligence products. Course emphasizes in-class, hands-on exercises to enhance the student's ability to apply structured analytic techniques, critically assess bias and logical fallacies in information sources, critiquing analytical products, and applying sound analytical tradecraft to individual and team writing exercises and oral presentations. Course also emphasizes the team-oriented environment of the intelligence profession, specifically focusing on standards of practice found in US intelligence agencies. On completion of the course, students will have an understanding of the analytic processes and guidelines the U.S. Intelligence Community uses to create intelligence products for national security decision makers. Prerequisite: POLS 125 and POLS 130.

**POLS 330. Introduction to Public Administration. 3 Credits. S**
Introduction to administration, public policy and policy makings is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 330.) Prerequisite: POLS 110.

**POLS 331. Introduction to Public Administration, Honors. 3 Credits. S**
Introduction to administration, public policy and policy making, for honors students, is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 331.) Prerequisite: POLS 110.

**POLS 345. Counterintelligence. 3 Credits. S**
This course provides an overview and history of the counterintelligence discipline; the structure and operations of the U. S. counterintelligence community including its legal foundation; and the privacy and civil liberties implications of counterintelligence operations. Course discusses how counterintelligence has evolved from the Cold War-era, with its focus on counter espionage, to 21st Century challenges such as threats from non-state actors and to our cyber networks. Course also addresses the emerging national security issues which will shape future U.S. counterintelligence operations. On completion of the course, students will have an understanding of how the U.S. counterintelligence capabilities and programs work to detect and neutralize the impact of espionage against US interests. Prerequisite: POLS 125 and POLS 130.

**POLS 350. Contemporary Issues in Comparative Politics. 3 Credits. S**
This course will survey selected current political issues around the globe. The focus of the course will be on understanding and analyzing the wide diversity of political phenomena that mark countries around the world. Topics may include such things as elections and electoral politics; political parties; government stability; democratization; ethnic, racial, caste, or religious conflict; protest and revolutionary movements; social movements (environmental, feminist, and others); and the politics of economic reform. This course is intended primarily for non-majors, and does not meet the junior/senior level course field distribution requirement.

**POLS 360. Ancient Roots of Modern Politics. 3 Credits. S**
This course examines the political thought and practice of Ancient Greece and Rome, and the enduring impact of these cultures upon contemporary
political institutions. Students will consider topics such as origins of democracy in Ancient Athens; the Roman Republic as a model for the constitution of the United States; and the causes and results of Rome's transition from Republic to monarchy. The course will also introduce students to key perspectives in the analysis of ancient and modern politics, for example constitutional theory, political psychology, and source criticism. All readings will be in English; no knowledge of any ancient languages is required. (Same as CLSX 360.)

POLS 370. Contemporary Issues in International Politics. 3 Credits. S
A survey of selected issues in current international relations. Topics include global economic interdependence, regional conflicts and nationalism, United States military and economic policy in the post-Cold War era, the role of international organizations such as the United Nations and the European community, global environmental problems and the contemporary role of international law. This course is intended primarily for non-majors and does not meet the junior/senior level course field distribution requirement.

POLS 399. Data 2: Foundations of Data Science. 3 Credits. S
Data science empowers its users to provide data-driven solutions to problems and questions in the world. This course provides foundational skill and knowledge behind this power. This knowledge and skill includes learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. (Same as ECON 399 and PSYC 399.) Prerequisite: PSYC 199/POLS 199/ECON 199 or EECS 138; and PSYC 201 or MATH 365 or ECON 426 or POLS 306 or SOC 380 or MATH 101 or MATH 104 or MATH 115 or MATH 121.

POLS 471. Politics of Human Trafficking. 3 Credits. S
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 714, POLS 714, or GIST 714. (Same as GIST 471 and WGSS 514.) Prerequisite: Sophomore standing or consent of instructor.

POLS 492. Field Work in Politics and Policy-Making. 3-6 Credits. S
This offering provides course credit for field work in politics and policy-making that takes place outside the department's Spring Semester internship programs in Washington, D.C. and Topeka. Consent of Instructor is required prior to enrollment.

POLS 493. Directed Readings. 1-3 Credits. U
Individual and supervised readings in selected areas of political science. Course is repeatable for different areas; however, only 3 hours of directed readings can be applied to the major. Prerequisite: Junior level and consent of department.

POLS 494. Washington Semester Intern Seminar. 3 Credits. S
Intern seminar in Washington, D.C. Students meet weekly during Washington Semester program, in speaker/seminar format. Participation is expected, and a term paper is a requirement. Prerequisite: Consent of instructor.

POLS 495. Topeka Semester Intern Seminar. 3 Credits. S
Intern seminar at statehouse in Topeka. Students meet weekly during this program, in speaker/seminar format. Participation is expected, and a term paper is a requirement. Prerequisite: Consent of instructor.

POLS 496. Washington Semester Field Work. 3-6 Credits. S
Supervised internships in public and private agency offices in the Washington, D.C. area. This course is open only to students who are participating in the department's organized, supervised, semester-long Washington internship program. In order to be eligible for the program, students must have junior or senior standing, an overall grade-point average of 2.75, must have completed POLS 110 and have a 3.0 grade point average in all political science courses. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor is required prior to enrollment.

POLS 497. Topeka Semester Field Work. 3-6 Credits. S
Supervised internships in public and private agency offices in the Topeka area. This course is open only to students who are participating in the department's organized, supervised, semester-long Topeka internship program. In order to be eligible for the program, students must have junior or senior standing, an overall grade point average of 2.75, must have completed POLS 110 and have a 3.0 grade point average in all political science courses. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor is required prior to enrollment.

POLS 498. Honors Thesis. 3-6 Credits. S
Political science majors who in their senior year who wish to become candidates for graduation with honors in political science must enroll in and successfully complete six hours of honors thesis work. Consent of the department is required and candidate must have minimum grade point averages of 3.5 in political science courses and 3.25 in all courses, in both in-residence and combined work.

POLS 499. Capstone Research/Field Work Experience. 3 Credits. S
Capstone research and/or field work experience project for political science majors. Project specified under the direction of a faculty mentor and approved by the undergraduate director. Prerequisite: Senior standing and 12 hours of upper division credit in POLS.

POLS 501. Contemporary Political Thought. 3 Credits. S
An examination of the major theoretical questions concerning citizenship and government in modern society. Major ideologies and important contemporary philosophers are examined to determine how they address such issues as the meaning of the public interest, the just distribution of power and privilege, the proper role of government in society, and legitimate methods for making collective decisions. Prerequisite: POLS 301, or consent of instructor.

POLS 502. History of Political Thought. 3 Credits. S
A survey of major concepts and theories in political philosophy from Plato to Marx. The emphasis is on understanding major classics in western political thought. Prerequisite: Sophomore level or consent of instructor.

POLS 503. Politics in Literature. 3 Credits. S
An examination and analysis of the portrayal of politics and political problems in literature. Classical and modern texts will be considered, including dramas, poems, and novels. Prerequisite: Sophomore level or consent of the instructor.

POLS 512. Latino Politics in the U.S.. 3 Credits. S
An overview of the political position of Latinas/os in the United States. The focus is on the three largest Latino groups in the U.S.: Mexican-Americans, Cuban-Americans, and Puerto Ricans; as well as an examination of other South American and Central American populations in the U.S. The main topics include identity formation, the political circumstances of Latinos, relationship to the electoral process, political behavior, and the policy process.

**POLS 515. American Political Parties. 3 Credits. S**
Survey of the development of the American political party system, stressing party organization, nominating systems, campaigns, elections, role of mass media, and party finances. Prerequisite: Sophomore level or consent of the instructor.

**POLS 516. Public Opinion and American Democracy. 3 Credits. S**
This course examines the construction, administration, and interpretation of public opinion polls. The course will also examine the role of public opinion in the democratic process and the formation of public opinion.

**POLS 520. Political Campaigns. 3 Credits. H**
This course will examine the communication involved in political campaigns. Students will be exposed to theories and ideas related to campaigns and will apply this knowledge to current political activity. Although the primary focus of the course is politics, students interested in public relations and strategic communication will also benefit from learning and practicing media relations strategies. The mediated nature of modern political communication, as well as the communication strategies of campaigns and journalists, will be examined in a semester-long simulated campaign. By the end of the semester, students will become more informed users and consumers of political campaign messages. (Same as COMS 607.) Prerequisite: COMS 130.

**POLS 521. Mass Media and Politics. 3 Credits. H**
The primary goal of this course is to critically examine the role of mass media in U.S. politics. Students learn how information makes it into news coverage, as well as how media content affects individuals, political campaigns, and governing decisions. The course covers media effects theories, news bias and polarization, political entertainment, and other topics. Although the primary focus of the course is politics, students interested in public relations and strategic communication will also benefit from learning about U.S. journalism. By the end of the semester, students will become able to critically evaluate political and media systems in the U.S. (Same as COMS 335.) Prerequisite: COMS 130.

**POLS 528. Environmental Justice and Public Policy. 3 Credits. S**
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several different public policy areas that have been impacted by the environmental justice movement: hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as EVRN 528.) Prerequisite: POLS 306 or a statistics class or consent of instructor.

**POLS 561. Liberation in Southern Africa. 3 Credits. W**
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and HIST 561.)

**POLS 562. Women and Politics. 3 Credits. S**
This course exposes students to contemporary research on women and politics by surveying the sub-fields of political science. Topics include women’s representation in the U.S., women and U.S. public policy, gender and legal theory, international women’s movements, women and revolution, and women as political elites. We will examine the ways in which feminist theory and women’s activism have challenged the narrow focus of the discipline as well as redefined women’s place in society. (Same as WGSS 562.) Prerequisite: Sophomore level or consent of the instructor.

**POLS 563. Comparative Political Economy. 3 Credits. S**
This course studies fiscal, monetarist, and trade policies to assess the usefulness and problems posed by these policy instruments across countries. This includes examining exchange rates, interest rates, budget deficit, trade deficit, and debt, to understand their composition and relevance to domestic economy, employment, investment, development, and international trade, the problems they pose, and how these may be overcome. We then examine when, how, and why government enacts these instruments across countries and regions. Prerequisite: Sophomore level or consent of the instructor.

**POLS 564. Elections and Political Parties Around the World. 3 Credits. S**
An examination of the diverse forms of election rules and their consequences for political parties, politicians, and voters. The course will survey election rules in theory and practice; the design and re-design of election rules in new and established democracies; and how elections affect party strategies or governance and representation, and the types of party systems that emerge. The course will also incorporate intensive studies of election campaigns occurring during the semester that the course meets. Prerequisite: Sophomore level or consent of the instructor.

**POLS 565. Political Change in Asia. 3 Credits. S**
This course focuses on three periods of major political changes in Asia since 1945: independence from colonization; adoption of governance; and steps toward democratization. The focus on political change is to help students see that a) many countries initiate political reforms domestically; b) the ability to implement changes is correlated to ability to win support; c) the institutional process may favor some groups over others; d) the ability to mediate political stability depends on (a), (b), and (c). Prerequisite: Sophomore level or consent of the instructor.

**POLS 582. Transnational Terrorism. 3 Credits. S**
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is tortue warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism. (Same as GIST 585.) Prerequisite: Sophomore level or consent of instructor.

**POLS 600. Contemporary Feminist Political Theory. 3 Credits. S**
A detailed introduction to feminist thought post-1960. Examines feminism in relation to the categories of political theory: liberal feminism, socialist feminism, radical feminism, and postmodern feminism. Within these categories and separately, we will also consider feminism as it is
influenced by women traditionally excluded from mainstream feminist thought, namely U.S. woman of color and women of post-colonial societies. This course is a service learning course that provides students with on-site practicum, mentoring, and networking skills. (Same as WGSS 600.) Prerequisite: Sophomore level or consent of the instructor.

POLS 603. Democratic Theory. 3 Credits. S
Detailed study of the typical and perennial dilemmas that arise in theories of democratic governance with an emphasis on contemporary analytical investigations of democratic systems. Prerequisite: Sophomore level or consent of the instructor.

POLS 606. Introduction to Political Computing. 3 Credits. S
This course allows student to learn the major software programs associated with data analysis in politics, including R and STATA. Students also learn the major sources of political and policy data. Students will conduct data collection and analysis for specific political research activities like public opinion surveys, voting behavior, Congressional behavior, comparisons of political processes in different countries, and the evaluation of public policies. Prerequisite: POLS 306.

POLS 607. Modern Political Theory. 3 Credits. S
An analysis of works by various authors, with the intention of exploring the political ideas that emerge in conjunction with the appearance of modern science, the Enlightenment, the Industrial Revolution, and Romanticism. Topics will include the modern conceptions of the nature of being, truth, justice, and the relationship of the individual to the community. Prerequisite: Sophomore level or consent of the instructor.

POLS 609. Topics in Political Theory: ____. 3 Credits. S
A study of selected theorists in relation to a topic in political theory. Sample topics include: revolution; authority and community; elements of political power; political elites: ideology, human nature in politics, political conflict, etc. Theorists will range from ancient to contemporary. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor.

POLS 610. Constitutional Law: Governmental Powers. 3 Credits. S
The Supreme Court viewed as a political branch of our government. Special emphasis on the Court's role in determining powers of government and their relationships. Prerequisite: Junior level or consent of instructor.

POLS 611. Constitutional Law: Civil Liberties. 3 Credits. S
The constitutional limits on governmental powers are studied with special emphasis on constitutional guarantees of individuals freedom. Prerequisite: Junior level or consent of instructor.

POLS 612. Psychology in Politics. 3 Credits. S
An examination of psychological perspectives on political phenomena. Topics include political personality, foreign policy decision making, international conflict and cooperation, voting behavior, and political participation and socialization. Prerequisite: Sophomore level or consent of the instructor.

POLS 613. Comparative U.S. State Politics. 3 Credits. S
A systematic comparative analysis of structures, functions, and policies of state political systems. Prerequisite: Junior level or consent of the instructor.

POLS 614. Urban Politics. 3 Credits. S
A survey of the social, cultural, economic, and structural differences among cities and an investigation into how these factors affect urban politics and policies. Specific topics include leadership, governmental reform, citizen participation, inter-ethnic conflict, and economic development. Prerequisite: Sophomore level or consent of the instructor.

POLS 615. Campaigns and Elections. 3 Credits. S
This course examines the behavior of candidates, campaigns, and voters in the electoral process. Topics will include the role of media, the impact of money, the operations of political campaigns and the effect of campaign laws.

POLS 616. Interest Group Politics. 3 Credits. S
Study of internal group organization and the politics of interests within the U.S. policy-making process. Prerequisite: Sophomore level or consent of the instructor.

POLS 617. The Congress. 3 Credits. S
Descriptive and comparative analysis of legislative institutions and processes in the United States, covering Congress and state legislatures. Prerequisite: Sophomore level or consent of the instructor.

POLS 618. The Presidency. 3 Credits. S
The office of the President of the United States, its place in the constitutional and political system. Emphasis is given to modern experience and current problems. Prerequisite: Sophomore level or consent of the instructor.

POLS 619. Topics in American Politics: ______. 1-3 Credits. S
A study of selected contemporary problems of policy or politics in the United States. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor.

POLS 620. Formulation of Public Policy. 3 Credits. S
Analysis and evaluation of the structures and processes involved in the formulation of public policy at all levels of government. Prerequisite: Sophomore level or consent of the instructor.

POLS 621. Public Policy Analysis. 3 Credits. S
An introduction to the study and analysis of public policy with emphasis on the concepts and techniques of policy thinking. The methods of policy description, explanation, evaluation, and choice will be applied to a variety of policy topics, e.g. health care, defense, environmental protection, education, etc. Prerequisite: Sophomore level or consent of the instructor.

POLS 622. The Politics of Social Policy. 3 Credits. S
An examination of the formulation and execution of key social policies in the United States, such as welfare policy, crime and drug control policy, disability rights policy, education policy, and social regulatory policy concerning controversial social issues such as abortion and gun control. Prerequisite: Sophomore level or consent of the instructor.

POLS 624. Environmental Politics and Policy. 3 Credits. S
Analysis of environmental politics and the formulation and implementation of environmental policy. Examines the history and development of environmental politics as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as EVRN 620.)

POLS 625. Extremist Groups and Government Response. 3 Credits. S
Examines left- and right-wing extremist political groups in America and how the government has developed policies and respond to these groups. Special attention will be given to the process of policy adoption and implementation and how the government might respond to extremist groups in the future. Issues and themes will include groups such as the left-wing terrorists of the 1960s and 1970s, right-wing anticomunist groups of the 1950s and 1960s, international terrorists acting in the U.S., hate crime, ecoterrorism, citizen militia groups, and pro- and anti-abortion extremist groups. Prerequisite: Sophomore level or consent of the instructor.

POLS 626. Political Polling and Survey Research. 3 Credits. S
This course focuses on the role of polling in the political process and introduces the theory and methods used in survey research. Topics include the role of polling in campaigns and the policy process, how survey research firms produce polls, analysis of polling for campaigns and public opinion, the psychology of survey response, survey construction, and sampling. Other data collection techniques commonly used in politics and political science such as focus groups and experiments will be covered. Students will conduct original surveys. Prerequisite: Junior level or consent of instructor.

**POLS 628. The Politics of Public Health. 3 Credits. S**
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation's public health, explore the role of government in reducing risk and promoting well being, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as EVRN 628.) Prerequisite: POLS 110 and POLS 306 are recommended.

**POLS 629. Topics in Public Policy: __________. 1-3 Credits. S**
Examination of the U.S. political system and policy formulation and administration through intensive analysis of selected current public policy problems. Sample topics include the environment, education, and economic well-being. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor.

**POLS 630. Politics of Identity. 3 Credits. S**
This seminar explores the nature of identity and how identity is relevant to politics and policy with a focus on political attitudes and behavior, institutions, and public policy. Topics include individual and group identity, identities such as gender, racial, sexual orientation, and partisan, and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. (Same as WGSS 630.) Prerequisite: Sophomore level or consent of the instructor.

**POLS 633. Iran, Turkey, and the Kurds. 3 Credits. NW S**
This course examines the contemporary political and social dynamics within these three communities residing along the northern stretch of what is commonly referred to as the Middle East. Using social and political theory as a starting point, students will comparatively study critical elements and issues facing the members of these societies. Issues and themes for comparison will include the structure and institutions of politics, nation-building and nationalism, Islam and politics, women and politics, and regional and global engagement. (Same as GIST 633.) Prerequisite: GIST 220, POLS 150, SOC 130, or consent of instructor.

**POLS 640. Politics of Reproductive Policy. 3 Credits. S**
Reproductive policy has historically been a highly politicized policy arena, which has elicited attention from the political community as well as the public. This course moves beyond the popular rhetoric associated with reproductive issues, by critically investigating the history, development, implementation and the relative success of various reproductive policies in the United States. These policies are compared to, and assessed against, policies governing similar topics in various countries. This course is a service learning course that provides students with on-site practicum, mentoring, and networking skills. (Same as WGSS 640.) Prerequisite: Sophomore level or consent of the instructor.

**POLS 643. The European Union. 3 Credits. S**
This course will introduce students to the politics of the European Union. The course will cover three closely connected topics. First, it will discuss the institutional make-up of the EU, such as the European commission, the European parliament, the European Council, and the European court of justice. It will assess how well these institutions deal with the growing importance of transnational issues, such as migration and economic policy issues. Second, the course will examine how national governments pursue national interests at the level of the European Union. Third, the class will study how well the EU represents the citizens of European countries. Finally, the course will assess the extent to which the EU has successfully developed into a supra-national federation. (Same as EURS 604.) Prerequisite: Sophomore standing or consent of instructor.

**POLS 644. Justice and Public Policy in Democratic Societies. 3 Credits. S**
Examines the ethical and philosophical choices that inform public policy in democratic societies. The guiding idea of the course is that public policies reflect underlying decisions about the nature of state authority and the just use of that authority. The theoretical focus is on modern European and American liberal democratic thought; the empirical focus is global. Among the policy issues examined in the course are public education, immigration, gender equality, same-sex marriage, and drugs. Prerequisite: Sophomore level or consent of the instructor.

**POLS 645. Corruption, Crisis and Scandal. 3 Credits. S**
This course investigates political events and decisions that are considered illegal or illegitimate. Cases from the U.S. and around the world are considered. Issues discussed include the misuse of governmental power and funds, electoral fraud, and bribery. Conditions under which problems arise and reforms that address them are considered. Prerequisite: Junior level or consent of instructor.

**POLS 648. Western European Politics. 3 Credits. W**
This class is an introductory course to European politics which pursues three goals. First, the class is designed to introduce you to a variety of different aspects of European political systems, their main political actors, and basic historical traditions. A second objective consists of discussing the enormous transformation of European politics that is currently underway in Europe. Third, you will become acquainted in some detail with the institutions and operating procedures of four political systems that we focus on: France, Germany, Great Britain, and the European Union. These systems represent the range of traditions we encounter in Western and Central Eastern Europe so they serve as an example of how European politics work. Prerequisite: POLS 150.

**POLS 650. Palestinians and Israelis. 3 Credits. S**
Examines the international relations, political institutions, and social politics of these two ethonational communities in relation to each other. Specific topics include the historical evolution of the Israeli-Palestinian conflict, prospects for conflict resolution, electoral systems and political parties in the two nations, state-society relations, social movements, and roles of gender and religion. Prerequisite: Nine hours of Political Science, including POLS 150/POLS 151 or POLS 170/POLS 171, or permission of instructor.

**POLS 652. Politics in Europe. 3 Credits. S**
The study of the politics and government of Europe. Major countries are covered in depth, while smaller democracies are grouped according to political concepts. Prerequisite: Sophomore level or consent of the instructor.

**POLS 653. Gender, War, and Peace. 3 Credits. S**
This course explores ways in which militarization and warfare are gendered processes. We ask, what does war tell us about gender, and what does gender tell us about war? Though the majority of fighters are men, women are essential to war efforts. They also represent a high proportion of the casualties of war. Yet women are rarely examined in relation to war; thus we work to uncover women's experiences of war. We also look to women's contributions to the peace movement in terms of both theory and practice, asking: Is peace a feminist issue? Should
feminists support women's access to combat positions or oppose the military? What if women ruled the world—would that end wars? Does militarized masculinity harm men more than benefit them? How do states mobilize citizens to war and how is the process gendered? (Same as WGSS 653.) Prerequisite: Sophomore level or consent of the instructor.

POLS 654. Politics and Government of Russia and the Central Eurasian States. 3 Credits. S/W
The collapse of the Soviet system and the problems of transforming a central planned authoritarian state into a free market democracy. The roles of ethnic and national tensions, economic decay, and cultural factors. Prerequisite: Sophomore level or consent of the instructor.

POLS 655. Politics of East-Central Europe. 3 Credits. S/W
This course analyzes Communist political theory in its application to the countries of East-Central Europe with consideration of their traditional backgrounds and their patterns of political, social, and economic developments. It constructs a theoretical model of the communist state and discusses its variations by description and comparison of the governments and political processes of Albania, Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Romania, and Yugoslavia. Prerequisite: Sophomore level or consent of the instructor.

POLS 656. Government and Politics of East Asia. 3 Credits. NW S/W
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. (Same as EALC 656.) Prerequisite: Junior level or consent of the instructor.

POLS 657. Government and Politics of Southeast Asia. 3 Credits. NW S/W
An evaluation of the traditional and contemporary political institutions, behavior and ideas of the countries of Southeast Asia. Prerequisite: Sophomore level or consent of the instructor.

POLS 658. Theories of Politics in Latin America. 3 Credits. S/W
This course examines how political science can be used to explain the political dynamics of Latin America. The course will be devoted to understanding different theories about politics -- many of which have been devised by political scientists whose primary focus of study is not Latin America -- and examining their uses and limitations in understanding Latin America. Among the themes we will be examining are the relationships between economic growth, political culture, and democracy, the role of the military in politics, the political impact of new social movements (such as the women's movement and religious movements), theories of revolution, and understanding the prevalence of political corruption in the region. Along the way, we will analyze how political scientists attempt to develop hypotheses, gather data, and test theories. Prerequisite: Sophomore level or consent of the instructor.

POLS 659. Political Dynamics of Latin America. 3 Credits. S/W
Study of the institutions, processes, and special problems of selected Latin American countries. Prerequisite: Sophomore level or consent of the instructor.

POLS 660. Politics of Development: Latin America, Africa, and Asia. 3 Credits. NW S/W
A focus on topics pertinent to all of the underdeveloped areas such as the role of the military, styles of political leadership, land tenure systems, the role of the middle sectors, the nature of bureaucracy, the activity of the students, and foreign policy attitudes. Prerequisite: Sophomore level or consent of the instructor.

POLS 661. Politics of the Middle East. 3 Credits. NW S/W
Survey of domestic and international political developments in the Middle East. Topics include: emergence of the modern nation-state, the role of Islam, leadership patterns, competing political ideologies, prospects for democratization, foreign policy relations, and regional conflicts. Prerequisite: Sophomore level or consent of the instructor.

POLS 662. Gender and Politics in Africa. 3 Credits. S
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political roles during the pre-colonial and colonial society. Next, we examine the impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender and development, HIV/AIDS and women's health, gender and militarism. We also explore women's roles in political institutions, civil society organizations, trade and labor unions, and transnational movements. We also examine contemporary constructions of masculinity and femininity in African states and explore how these constructions affect social policy and national political agendas. (Same as AAAS 662 and WGSS 662.) Prerequisite: Sophomore level or consent of instructor.

POLS 663. Populism and Nationalism. 3 Credits. S
This course will acquaint students with the various understandings and manifestations of the important phenomena of populism and nationalism around the world, including the United States. These political phenomena and their existence around the world and at home highlight the importance of the concepts of identity, citizenship, and practices of exclusion among others. While nationalism and populism are far from synonymous, they both underscore the challenges in the dynamic interaction between politics, society and culture(s). Prerequisite: Junior/Senior standing or consent of instructor.

POLS 665. Politics in Africa. 3 Credits. W
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. (Same as AAAS 600.) Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor.

POLS 666. Political Economy of East Asia. 3 Credits. S
This course provides basic understanding of fiscal, monetarist, and trade politics; how governments in East Asia use them to pursue growth; the extent to which these governments follow or controvert economics to pursue growth; and how the performances of economies in East Asia relate to the U.S. and global economies. (Same as EALC 666.) Prerequisite: POLS 150.

POLS 667. Islam and Politics. 3 Credits. W
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as compatibility of political Islam and democratic politics, political economy in Muslim societies, fundamentalism in Islam, gender relations, identity politics and questions on clash of civilizations are explored. (Same as GIST 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

POLS 668. Reform in Contemporary China. 3 Credits. NW H/W
Examines the epochal changes that have occurred in China from Deng Xiaoping's rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 "prodemocracy" movement at Tiananmen. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and
POLS 669. Topics in Comparative Politics: _____. 2-3 Credits. S
A study of selected contemporary problems of policy or politics affecting several countries. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor.

POLS 670. United States Foreign Policy. 3 Credits. S
An evaluation of the formulation of United States foreign policy in the post-World War II period. Economic, military, and diplomatic dimensions of policy; internal and external influences on policy; theories of foreign policy decision-making. Prerequisite: Nine hours of political science.

POLS 671. International Cooperation. 3 Credits. S
An examination of the gains possible from international cooperation and the barriers to achieving cooperation. Theoretical perspectives on international cooperation will be explored along with cases such as trade, the environment, arms control, and the European community. Prerequisite: Sophomore level or consent of the instructor.

POLS 672. International Political Economy. 3 Credits. S
Structural theories of the international political economy provide the framework for a consideration of the nature of hegemony, the management problem of multinational corporations, the role of international regimes and organizations, development, and dependency. Prerequisite: Junior level or consent of instructor.

POLS 673. International Organization. 3 Credits. S
International organizations are examined with special emphasis devoted to the United Nations. A central theme of the course rests upon the question of whether strengthened international organization offers the only alternative to further world wars. Prerequisite: Junior level or consent of instructor.

POLS 674. Global Justice and Foreign Policy. 3 Credits. H
This course reviews how philosophical perspectives elucidate the role ethics plays in foreign policy. It covers human rights doctrines, issues of economic and political justice, just war theory (jus ad bellum) and just conduct of war (jus en bello) and humanitarian intervention. Prerequisite: Junior level or consent of instructor.

POLS 675. Russian Foreign Policy. 3 Credits. S/W
Examination of the history of Soviet and Russian foreign policy and current issues of foreign policy in the Post-Soviet era. Analysis of foreign policy making in Russia and the other Post-Soviet states. Emphasis on the changed nature of international security problems after the cold war and on the role of foreign policy in economic development. Prerequisite: Junior level or consent of instructor.

POLS 676. International Relations of Asia. 3 Credits. S/W
An intensive study of the problems of ideological conflict, diplomatic relations, strategic arrangements, economic cooperation, and cultural exchange in East and Southeast Asia with special emphasis upon the roles of major world powers. (Same as EALC 676.) Prerequisite: Sophomore level or consent of the instructor.

POLS 677. U.S. National Security Policy. 3 Credits. S
An investigation into (1) how security policy is made; (2) the evolution of changing assumptions, strategies and goals since 1945; and (3) the present policy and its alternatives. Prerequisite: Sophomore level or consent of the instructor.

POLS 678. Chinese Foreign Policy. 3 Credits. S/W
In-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. (Same as EALC 678 and GIST 678.) Prerequisite: Sophomore level or consent of the instructor.

POLS 679. International Conflict. 3 Credits. S
Examination of the historical and theoretical issues surrounding the sources and control of international conflict. Topics will include political and anthropological theories of conflict, the role of force in the international system, international law and just war approaches, nuclear conflict, arms control, and nonviolent alternatives to conflict. Prerequisite: Sophomore level or consent of the instructor.

POLS 680. International Relations in Political Philosophy. 3 Credits. S
A consideration of classical and modern theories of the international system, such as the writing of Thucydides, Machiavelli, twentieth-century realists, and others. Topics include, theories of the state, the role of ethics and normative judgments in the world order, the nature and use of power, the relationship between domestic and international politics. Prerequisite: Sophomore level or consent of the instructor.

POLS 682. Trafficking, Organized Crime and Terrorism: U.S. Government Response. 3 Credits. S
The course addresses multiple ways, in which international terrorism, organized crime, and trafficking intersect and new challenges that the trafficking-terrorism nexus poses to national and international security. It surveys national and international responses by the U.S. government to the crime-terror nexus. Prerequisite: POLS 110, or POLS 170, or POLS 150, or POLS 582, or POLS 625 or consent of instructor.

POLS 684. International Law: The State and the Individual. 3 Credits. S
International law has assumed an increasingly significant role in international life. This course will examine major law including (but not limited to): the changing status and role of the state; rights of minorities and self-determination; the environment; and human rights. The course will examine the central questions and the relevant international legal principles associated with each issue. Prerequisite: Junior level or consent of instructor.

POLS 685. International Law: Laws of Armed Conflicts. 3 Credits. S
This course examines the principles, roles, and functions of international law in the conduct of war. As the course reviews the development and application of the basic rules of armed conflict, several current issues and conflicts are addressed including: the legitimate use of force; the proper definitions of combatants and civilians; actions that constitute war crimes, the legality of new weapons technology, and, if the laws of armed conflict apply to the current “war on terrorism.” Prerequisite: Junior level or consent of instructor.

POLS 686. International Human Rights. 3 Credits. S
The course introduces students to historical and philosophical bases of contemporary human rights, theoretical approaches and methodological challenges to studying human rights questions, and acquaints them with the main topics, controversies, and tensions in the scholarship, practice and politics of human rights. (Same as GIST 686.) Prerequisite: Sophomore level or consent of instructor is required.

POLS 687. Introduction to Cyber Intelligence. 3 Credits. S
Course will provide instruction about the fundamental principles, impact and issues of cyber intelligence. Course will focus on cyber intelligence supporting operations in cyberspace (to include risk management functions, cyber defense, cyber espionage, and cyber-attack) as well as intelligence developed through cyberspace. Topics include cyber-threats, cyber defense, and cyber warfare as well as ethical and legal considerations. In addition to providing a foundation of understanding
The course will cover U.S. counterterrorism policy and practices historically and in the current era. For international (multinational) terrorism, the course will focus on how the historical actions of western powers contributed to the rise of terrorist groups, as well as the evolution of U.S. responses to these groups. Groups examined could include Hamas and Al-Qaeda. For domestic terrorism, the course will focus on the evolution of counterterrorism responses within the U.S., with particular attention to far-right terrorism, including the Oklahoma City Bombing. We will examine U.S. counterterrorism policy in the law, as well as in the practices of Intelligence, Department of Defense, and law enforcement. Prerequisite: POLS 125 or POLS 130 or permission from the instructor.

POLS 689. Topics in International Relations. 3 Credits. 
A study of selected problems in international relations. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor.

POLS 690. Research and Diplomacy Lab. 3 Credits. S 
This course is designed to provide students with basic tools and an understanding of interdisciplinary social science research and to simultaneously partner with an innovative program implemented by the US Department of State. While learning about the research process and research design, students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer with whom they have contact through videoconferencing throughout the semester. The team engages in extensive and systematic research to address the problem and presents their finding in a formal report presented to the State Department in the desired format. Prerequisite: GIST 220 or POLS 150 or POLS 170 or instructor permission.

POLS 691. Diplomacy Lab. 1 Credits. S 
This course is a supplemental research lab designed to partner with an sr level course offering an innovative program implemented by the US Department of State. Students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer. This one-credit hour course is intended to function as a special lab project and must be taken in conjunction with a standard course that has a diplomacy lab option. Prerequisite: Instructor permission required.

POLS 692. International Security and Migration Policy. 3 Credits. S 
This course examines the politics of migration in receiving and sending states with special attention to the policies of developed democracies, including the US and UK, and the member states of the European Union and Schengen zone. It aims to introduce students to the theories of international migration with special attention to the migration-security nexus. Toward this end, topics cover neoclassical economic models of international migration, the effects of globalization on migration policies, and how perceived economic and security interests shape migration policies. Second, the course will cover the political consequences of migration for sending and receiving states, the economics and politics of migration, including remittances, public opinion, interest group politics, and the role of institutions. Third, the course encompasses different types of migration policies including visas, asylum and refugee admissions, and citizenship and naturalization. Finally, the course examines the foreign policy consequences of international migration, giving special consideration to the migration-security nexus. Throughout the course students are exposed to two major questions: (1) what are the effects of migration on both the states that receive immigrants and the states that send emigrants and (2) how do policymakers respond to these effects? Prerequisite: POLS 170.

POLS 705. Research Design for Political Science. 3 Credits. 
Introduction to the discipline of political science, the philosophy of science, research design, and data acquisition. Prerequisite: Graduate standing or consent of instructor.

POLS 706. Research Methods I. 3 Credits. 
An introduction to quantitative research methods, including probability theory, hypothesis-tests, and multiple regression. Includes regression diagnostics, the treatment of numeric and categorical predictors, interaction effects and elementary nonlinear models. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and lab sessions where computing applications are taught.

POLS 707. Research Methods II. 3 Credits. 
This course covers basic techniques for multivariate analysis, focusing on multiple regression. Topics include interpretation of regression statistics, diagnostics for common problems, dummy variables, instrumental variables, basic time series methods including adjustment for autocorrelated error, logistic models, and nonlinear modeling; additional techniques may be covered at the discretion of the instructor. Prerequisite: POLS 706.

POLS 708. Advanced Qualitative Research Methods. 3 Credits. 
An examination of qualitative research approaches frequently employed within political science. Topics may include the use of case studies, archival and documentary research, content analysis, interviewing and focus group techniques, ethnographic fieldwork, narrative and discourse analysis, and others. The course will examine the strengths and limitations of these methods in relation to major research traditions such as culturalist approaches, historical institutionalism, rational choice, and constructivism. Prerequisite: POLS 705 and either graduate standing or consent of instructor.

POLS 712. The Electoral Process. 3 Credits. 
A study of the characteristics of voting behavior and the influences upon such behavior in the United States. Emphasis is placed upon relevant research findings concerning partisanship and participation in politics, and on the methodology employed in the study of political behavior. Prerequisite: Twelve hours of political science and consent of instructor.

POLS 714. Politics of Human Trafficking. 3 Credits. 
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level.
POL 719. Topics in the American Political Institutions: ______. 3 Credits.
A seminar to be offered as occasion demands, dealing with, but not limited to special topics in the presidency, congress, and judicial processes. Prerequisite: Graduate standing or consent of instructor.

POL 754. Politics and Government of Russia and the Central Eurasian States. 3 Credits.
The collapse of the Soviet system and the problems of transforming a central planned authoritarian state into a free market democracy. The roles of ethnic and national tensions, economic decay, and cultural factors. Prerequisite: Eight hours in the social sciences and/or history, including POLS 150, or consent of instructor.

POL 782. Transnational Terrorism. 3 Credits.
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism.

POL 789. Topics in International Relations: ______. 2-3 Credits.
A study of selected problems in international relations. Prerequisite: Consent of instructor.

POL 810. American Politics. 3 Credits.
A survey and critical examination of recent theoretical developments and research focusing on national institutions, electoral behavior, and policy-making processes. Emphasis is given to conceptualizing and analyzing the changing nature of the American political system.

POL 812. Political Psychology. 3 Credits.
A critical examination of the principal areas in current literature in political psychology, including psychological perspectives on mass political behavior, elite decision making, and international relations. Attention will be given to articulating and evaluating theories, constructing research questions and programs, and comparing methodologies.

POL 820. Policy Formulation and Adoption. 3 Credits.
Survey of the literature on the institutional, socioeconomic, and political forces influencing the formulation and adoption of public policy, as well as policy change, at all levels of government. Topics include problem definition, agenda setting, and the methods of decision-making. This is a research seminar so students will be required to conduct an original research project.

POL 825. Urban Policy and Administration. 3 Credits.
This course explores the development, implementation and evaluation of public policy in the local government context. It examines a variety of policy tools used to address urban problems and applies theories of the policy process, intergovernmental relations, and institutions to municipal governance. In so doing, the course examines a range of current substantive policy and administrative issues facing urban communities and governments. (Same as PUAD 825.)

POL 850. Introduction to Comparative Politics. 3 Credits.
This course provides a graduate level introduction to the field of Comparative Politics. Among topics it will survey are: the history and development of the field; classic works and major founding concerns of the field; methodological and epistemological debates; competing paradigms which had characterized Comparative Politics (structural-functionalist, culturalists, state-centrists, institutionalists, rational choice, and other); theory building and the role of area studies.

POL 851. Comparative Institutions and Government. 3 Credits.
This course provides a survey of the subfield of political institutions within Comparative Politics. Among the topics it will cover are: identifying regime types (democracy vs. non-democracy); comparative electoral systems; party systems; presidential vs. parliamentary systems; comparative legislatures; constitutional engineering and democratic transitions, and others. Prerequisite: POLS 850.

POL 857. Comparative Political Behavior. 3 Credits.
The course introduces students to the vast literature on comparative elections and comparative political parties. It pursues a twofold goal. First, the course surveys the large comparative electoral behavior literature. The themes covered in the first half include a discussion of why voters participate in elections, how voters form preferences, how psychological processes affect mass views, and how these, in turn, influence party preferences. Second, the course introduces students to the supply-side of politics and the role of political parties. This second part of the course, therefore, examines why parties form in the first place, what motives they have, what choices they offer in short, how and why parties compete. Together, the way voters form preferences and the logic of party formation illuminate a central element of the democratic process.

POL 870. International Relations. 3 Credits.
Critical evaluation of the major approaches to international relations and their application to conflict and conflict resolution, foreign policy, and international political economy.

POL 878. Conducting and Analyzing Fieldwork in Developing Countries. 3 Credits.
An introduction to fieldwork and surveys conducted in developing and non-democratic countries. The course covers the challenges of conducting interviews and surveys in these countries. The intent is to develop the research skills necessary for data collection and fieldwork as well as evaluating an analyzing survey data collected by other researchers in developing countries. Prerequisite: POLS 705 or equivalent or consent of the instructor.

POL 899. Thesis. 1-6 Credits.
Enrollment for writing thesis for master's degrees. Graded on a satisfactory progress/limited progress/no progress basis.

POL 904. Statistical Computing Foundations. 3 Credits.
This is an interdisciplinary course for social science researchers who need to develop routines to estimate and evaluate statistical models. It introduces tools for software development, primarily with the statistical programming language R (and related languages like C). Topics include
code organization and optimization, concurrent version management, LaTeX document preparation, and high-performance computing on the KU Linux cluster. Examples from various fields are considered. Prerequisite: Two courses in graduate level statistics and familiarity with R.

**POLS 906. Advanced Regression. 3 Credits.**
Covers topics appropriate for a second course in regression analysis. The content will vary according to the interest of the instructor and students, but will generally include such topics as multiple imputation of missing data, the generalized linear model (GLM), and specialized models for longitudinal data. The course will include a review of the principles of maximum likelihood estimation and applications of matrix algebra and differential calculus in statistical applications.

**POLS 909. Topics in Methodology: _____ 3 Credits.**
An intensive seminar in a method (or a variety of relevant methods) of theoretical or empirical research designed for Ph.D. students only. Emphasis is on deepening the understanding and ability to use advanced methods of analysis. Prerequisite: Admission to the Ph.D. program or consent of instructor.

**POLS 910. Research Seminar in American Government. 2-3 Credits.**
A faculty and advanced graduate student collegial research experience focusing on American politics, policy-making and administration, with faculty and students engaged in the production of scholarly research articles, books and conference papers. Topics will be chosen by individual students with consent of the seminar professor.

**POLS 911. The U.S. Congress. 3 Credits.**
This seminar employs various theoretical and methodological perspectives to explore the burgeoning post-1960 literature on Congress. Traditional subjects such as committees, parties, and elections are examined through applications of formal models, behavioral analyses, and participant observation.

**POLS 913. State and Local Politics. 3 Credits.**
A survey of the theories and research findings dealing with political parties in American politics, including third and minor parties. Topics to be covered include the development and evolution of the party system, the nature of party organization and the recruitment of party activists, the role of parties in the electoral process, the impact of parties upon public policy, and party reform.

**POLS 919. Topics in U.S. Government and Politics: _____ 2-3 Credits.**
A seminar to be offered as occasion demands, dealing with, but not limited to, bureaucracy, legislative policy, federalism, and special problems in U.S. politics.

**POLS 940. Teaching Political Science. 1 Credit.**
A discussion of teaching methods and approaches. Students are expected to develop a personal teaching portfolio that describes their outlook on teaching political science and provides sample teaching materials. This course must be taken by all graduate teaching assistants and assistant instructors during the first year of their appointment. Grades are issued on a pass/fail basis.

**POLS 954. Politics in Post-Soviet States. 3 Credits.**
In-depth study of the politics of Russia, Ukraine, and the other Post-Soviet states. Focus on the problems of transforming a centrally planned authoritarian system to a free market democracy.

**POLS 955. Politics of Advanced Industrial Societies. 3 Credits.**
Theory and research on the patterns of behavior that characterize the politics of North America, Europe, and developed regions of Asia. Topics include corporatism and alternative forms of interest intermediation, economic theories of socialization and electoral choice, and the role of the state; its finances, adaptation, and the problem of power and legitimacy. Prerequisite: POLS 850 or permission of instructor.

**POLS 959. Topics in Comparative Politics: _____ 1-3 Credits.**
Study of selective topics in comparative government and politics.

**POLS 960. Politics of Developing Countries. 2-3 Credits.**
Designed to acquaint students with the principal theories, approaches and types of empirical analysis generally employed to explain and interpret the creation and implementation of foreign policy. Topics include rational actor models, collective and bureaucratic processes, societal influences, cognitive and psychological factors, and comparative foreign policy. Prerequisite: POLS 870. An undergraduate United States foreign policy class is recommended.

**POLS 972. Theories of International Conflict. 3 Credits.**
An in-depth survey of theories and research on international conflict. Topics will range from anthropological studies of conflict in primitive societies to contemporary theories of nuclear conflict. The course will also cover current empirical research methodology and results of research on international conflict, as well as models of conflict processes. Prerequisite: POLS 870.

**POLS 973. International Political Economy. 3 Credits.**
Provides an eclectic survey of major developments in the field. Topics include the intellectual origins of IPE; the historical evolution of the international system; North-South and Western trade, investment, and monetary relations; foreign aid, debt technology transfer, development, international economic institutions (e.g., IMF, IBRD, MNCs, etc.). (Same as SOC 873.) Prerequisite: POLS 870 or consent of instructor.

**POLS 977. Ethics in International Relations Theory. 3 Credits.**
This course examines how issues of International Ethics have been treated in International Relations theory. This course begins by reviewing several theoretical perspectives of International Relations and how these perspectives have historically understood the role ethics plays in international politics. By the end of the semester, students should have a firm understanding of (1) the salient issues of international ethics in world politics and (2) whether and how IR scholars have (theoretically and methodologically) placed those issues in their research paradigms. The issues areas the course will cover include, but are not limited to, human rights doctrines, issues of economic and political justice, just war theory (jus ad bellum) and just conduct of war (jus in bello), and humanitarian intervention. The course will assess the role international law has played in stemming and/or punishing human rights abuses. Students will review several historical cases of genocide, as well as several cases of truth and reconciliation commissions.

**POLS 979. Topics in International Relations: _____ 3 Credits.**
To be offered periodically when topics of special interest arise.

**POLS 980. International Organizations. 3 Credits.**
Considers theoretical and empirical work on international governmental and non-governmental organizations (IOs). Specifically highlights the evolving scholarly debates regarding the function, design, and delegation of authority to IOs as well as their behavior and change.
Explores these questions in depth through a wide range of cases, including comprehensive coverage of the United Nations, Bretton Woods Institutions, and the European Union, and their activities in issue areas concerning international security, trade, finance, development, humanitarian aid, and the environment.

**POLS 993. Directed Readings. 1-5 Credits.**
Designed to meet the needs of graduate students whose study in political science cannot be met with present course. Prerequisite: Consent of instructor.

**POLS 997. Preparation for the Comprehensive Examination. 1-6 Credits.**
An independent reading course for students preparing to take the Ph.D. comprehensive examination. May be taken for two semesters or six credits, whichever comes first. Graded A, B, C, D, or F depending on the results of the comprehensive examination.

**POLS 999. Doctoral Dissertation. 1-15 Credits.**
Enrollment for writing doctoral dissertations. Graded on a satisfactory progress/limited progress/no progress basis.

## Bachelor of Arts and Bachelor of General Studies in Political Science

### Why study political science?
Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political Science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought today, as one of the social sciences, is a comparatively new discipline. It developed in the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

Ask yourself, Am I interested in public affairs? Am I a good analytical and critical thinker? Am I curious about the world and it's workings? Do I communicate well orally and in writing? Do I want to be a knowledgeable citizen? Am I interested in the relationship between government and the people? Am I curious about how decisions and made and how conflicts are resolved?

## Undergraduate Admission

### Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

## Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

</tr>
<tr>
<td>POLS 498</td>
<td>Honors Thesis</td>
</tr>
<tr>
<td>POLS 499</td>
<td>Capstone Research/Field Work Experience</td>
</tr>
</tbody>
</table>

### Honors Experience
Recommended for students with a minimum grade point average of 3.5 in Political Science coursework and 3.25 overall. These averages must be achieved before the final semester.

### Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Departmental Honors

1. Eligibility:

Undergraduate majors in the department with senior standing, a minimum 3.5 GPA in Political Science and a minimum 3.25 overall GPA are eligible to enroll in departmental honors work. These GPA levels also must be achieved at the end of the candidates’s final semester for both in-residence and combined work.

2. Procedures:

Majors wishing to pursue the honors program must file a declaration of intent form with the department’s Undergraduate Studies Coordinator no later than at enrollment for the final semester of undergraduate study. Normally students will be expected to enroll at the beginning of their senior year of study, for two consecutive semesters.

Students pursuing honors will enroll in POLS 498, Honors Thesis, with an individual faculty member who has agreed to serve as thesis adviser, thus accepting responsibility for directing the honors research project. Enrollment for 3 hours for two consecutive semesters in POLS 498 is usually expected. In unusual cases students may enroll for 6 hours in one semester, doing all the thesis work in that period.

3. Requirements for graduation with honors:

Completion of a written research project which has been read and approved by a committee of at least three members of the College faculty (of whom at least two must be political science faculty, including thesis advisor). The committee will then certify successful completion of the honors thesis enrollment. Work considered by the project director to be less than “A” quality will not be considered for honors and will not be presented to the committee for approval. The written report is expected to be more than an extended term paper, while something less than a graduate-level thesis. It must reflect analysis and perceptive understanding of the subject matter being studied.

4. Research timetable:

It is strongly recommended that students follow a relatively strict schedule in completing their research studies, in order to avoid having the honors oral examination come very late in the final semester. The following timetable is recommended:

1. A research design should be submitted by the middle of the first semester of enrollment.
   a. At the latest, the first draft of the written report should be completed approximately 2 months before the end of the semester in which honors are to be awarded (e.g., March 15, or October 15)
   b. At the latest, the final draft of the written report should be completed 1 month before the end of the semester in which honors are to be awarded.

BA in Political Science

---

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. For a list sub-fields and courses used to fulfill the sub-field requirements, and POLS 400+ elective requirements, review the degree requirements tab in the catalog, or see your advisor.
3. A student may count no more than 6 hours toward the major from the following courses combined: POLS 493, POLS 494, POLS 495, POLS 496, POLS 497, or POLS 498.
4. POLS 493, POLS 494, POLS 495, POLS 496, POLS 497, and POLS 498 are recommended capstone courses for majors.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
opportunities to explore other majors and/or minors. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Goal 6 Integration and Creativity 3,4 3 Second Area of Study/ Elective/Degree/Junior-Senior Hours
BGS Career Course (BGSC - may be met by POLS 494, 495, 496, 497, 600, or 640) 3 Second Area of Study/ Elective/Degree/Junior-Senior Hours

Total Hours 120

1 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

2 For a list of sub-fields and courses used to fulfill the sub-field requirements, and POLS 300+ elective requirements, review the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/political-science/ba-bgs/#requirementstext) tab in the catalog, or see your advisor.

3 A student may count no more than 6 hours toward the major from the following courses combined: POLS 493, POLS 494, POLS 495, POLS 496, POLS 497, or POLS 498.

4 POLS 493, POLS 494, POLS 495, POLS 496, POLS 497, and POLS 498 are recommended capstone courses for majors.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.

Minor in Intelligence and National Security Studies

The minor in Intelligence & National Security Studies in Political Science supports the Defense Intelligence Agency’s (DIA) Intelligence Community Centers for Academic Excellence mission, which is to enhance the recruitment & retention of an ethically and culturally diverse workforce with capabilities critical to U.S. national security interests. DIA has identified specific core courses as fundamental to the academic preparation for entry-level positions within the U.S. Intelligence Community. This minor directly supports these core requirements. Students complete six courses (18 hours), four of which are the required core for the INSS minor (12 hours).

• To complete the INSS minor in Political Science, students complete six courses (18 hours), four of which are the required core for the INSS minor (12 hours) and available through KU Online

</tbody>
</table>

Additionally, participation in 10 hours of campus activities with INSS focus, such as lectures, workshops and other events, will be required. As designed, the INSS minor will fulfill the majority of the required ICCAE Knowledge Units within the core and optional intelligence topics categories. Upon completion of the minor, students will have in-depth knowledge of the intelligence community, intelligence collection, intelligence analysis, and threats the United States faces in the public and private sectors.
Minor in Political Science

The minor is a general political science minor that allows students to take coursework across the different subfields in political science. This provides options to students beyond the major to broaden student learning and understanding in an important discipline that will impact their lives beyond college. Students in more than one minor offered through the political science department cannot overlap more than one course between two minors.

Requirements for the Minor

Students in more than one minor offered through the Political Science department cannot overlap more than one course between two minors. (See also general regulations for minors in the Undergraduate tab of the Liberal Arts and Sciences section of the catalog)

General Option

18 credit hours of coursework in Political Science, 12 of which must be taken at the junior/senior level.

Global Security Option

Minor Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Minor in Public Policy in the United States

Students majoring in various social science disciplines are encouraged to minor in Public Policy. Students earning a BA or BGS can obtain a minor; the minor consists of 18 credit hours.

Requirements for the Public Policy in the U.S. Minor

The Public Policy in the U.S. minor involves course work focused on domestic U.S. public policy and the political environment surrounding the making and implementation of policy.

*NOTE - Students in more than one minor offered through the political science department cannot overlap more than one course between two minors.

scientists are concerned with the origins and sources of governmental ability to make increasingly scientific observations of government. Political science, as a comparatively new discipline, developed in the social sciences. It developed in the late 19th century as a distinct field of inquiry. However, the study of government and governance, which involves understanding the processes and structures that govern human interactions, has a much longer history, dating back to ancient civilizations.

Political science is as old as civilization, because people always have been interested in their government and their leaders. But political science as it is thought of today, as one of the social sciences, is a comparatively new discipline. It developed in the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with the origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

What's special about the Political Science graduate program?
Our medium size allows faculty to teach seminars on a variety of topics with individualized mentoring in and out of the classroom. Graduate students work closely with faculty on research and themselves publish independent papers and win fellowships and awards. This productivity is complemented by a diverse group of students, many coming from around the world. In addition, by the time of graduation most of our graduate students will teach their own classes. We believe teaching is important part of a graduate education and serves our students well in an increasingly competitive job market. Our unique Thompson Summer Scholarship Research Program offers students the opportunity to engage in a genuine collaborative research project with selected faculty. Working with faculty on a variety of research topics, students maximize their potential by earning a competitive stipend and sharpening their research skills across the summer months. The program has generated many conference papers and publications as well. Our department therefore offers unparalleled access to our faculty and valuable opportunities in both research and teaching.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
The MA program in Political Science accepts applications for the fall semester only. Applications and all required supplemental materials must be submitted by the deadlines listed on the program's website (https://kups.ku.edu/admissions/) to be considered for admission.

Application Materials
Applicants should upload the supporting application documents listed below to the online application (https://gradapply.ku.edu/apply/). There is no need to send copies of application materials directly to the Department of Political Science.

- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges or universities attended
- Statement of purpose (no longer than two pages, single spaced)
- Resume or CV
- Official GRE score report no more than five years old (this requirement is waived for applicants who will hold an MA from an institution which conducts all instruction entirely in English by the beginning of their first term in the program)
- Three letters of recommendation (preferably from faculty members)

Minor Hours & Minor GPA
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Junior/Senior Hours in Residence
Satisfied by a minimum of 12 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in Intelligence and National Security Studies
The undergraduate certificate in Intelligence & National Security Studies (INSS) introduces students to the highly desired skills and competencies necessary to work within the US Intelligence Community. Combining courses and extracurricular activities, the INSS certificate demonstrates to future employers that you are knowledgeable about the dynamic, multidisciplinary field of intelligence, it's role in security and diplomacy, and the ethics and laws governing intelligence collection and dissemination. Open only to undergraduates.

Students must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 125</td>
<td>Intelligence: Supporting National Security</td>
<td>3</td>

<td>Intelligence Analytics</td>
<td>3</td>
</tr>
<tr>
<td>POLS 345</td>
<td>Counterintelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

Students enrolled in the certificate program are also required to participate in 20 hours of campus activities through workshops, lectures, etc. that have an intelligence/national security focus (the effort to complete these experience points will not exceed 2 credit hours).

Master of Arts in Political Science
Why study political science?
Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought of today, as one of the social sciences, is a comparatively new discipline. It developed in the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with the origins and sources of governmental
Non-native speakers of English must meet KU's English proficiency ([https://gradapply.ku.edu/english-requirements/](https://gradapply.ku.edu/english-requirements/)) requirements.

**Contact**

Visit the Admissions ([https://kups.ku.edu/admissions/](https://kups.ku.edu/admissions/)) page on the Department of Political Science website for detailed information about the application process.

**M.A. Degree Requirements**

All candidates for the M.A. degree must complete, at a satisfactory level,

1. 30 semester hours of graduate credit, 21 of which must be earned in courses at the 700 level or above;  
2. Research methods through POLS 706; and  
3. A comprehensive master’s oral examination.

The student selects a principal advisor from the Graduate Faculty by the end of the first year to choose courses and prepare for the comprehensive examination. The examination is administered by a 3-person M.A. committee that includes the student’s principal advisor and 2 other members of the KU Graduate Faculty selected by the student in consultation with the principal advisor. One member of the committee may be from another department (including Special Status members of the Graduate Faculty).

Directed readings courses in excess of 5 hours cannot be counted toward the 30 hours required for the degree. With prior written approval, candidates may count up to 6 graduate hours taken outside the department (either at KU or at another institution accredited by the North Central Association of Colleges and Schools) toward the 30 hours required for the degree.

Applicants who have not completed at least 15 undergraduate credit hours in political science may be admitted with the provision that they complete additional hours of course work.

All candidates must fulfill the requirements of either the thesis or the non-thesis option for the Master of Arts degree.

**Thesis Option**

Upon completion and certification of an acceptable thesis, candidates may count 6 credit hours of thesis enrollment toward the 30 credit hours required for the M.A. degree.

**Non-thesis Option**

Candidates may substitute a minimum of two 800- or 900-level research courses plus satisfactory performance on a comprehensive written examination administered by the three-person M.A. committee before the oral examination.

**Doctor of Philosophy in Political Science**

**Why study political science?**

Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought of today, as one of the social sciences, is a comparatively new discipline. It developed in the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with the origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

**What’s special about the Political Science graduate program?**

Our medium size allows faculty to teach seminars on a variety of topics with individualized mentoring in and out of the classroom. Graduate students work closely with faculty on research and themselves publish independent papers and win fellowships and awards. This productivity is complemented by a diverse group of students, many coming from around the world. In addition, by the time of graduation most of our graduate students will teach their own classes. Our department therefore offers unparalleled access to our faculty and valuable opportunities in both research and teaching.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

The PhD program in Political Science accepts applications for the fall semester only. Applications and all required supplemental materials must be submitted by the deadlines listed on the program's website ([https://kups.ku.edu/political-science-graduate-program/](https://kups.ku.edu/political-science-graduate-program/)) to be considered for admission.

**Application Materials**

Applicants should upload the supporting application documents listed below to the online application ([https://gradapply.ku.edu/apply/](https://gradapply.ku.edu/apply/)). There is no need to send copies of application materials directly to the Department of Political Science.

- Copy of official transcripts ([http://graduate.ku.edu/transcripts/](http://graduate.ku.edu/transcripts/)) from all colleges or universities attended  
- Statement of purpose (no longer than two pages, single spaced)  
- Resume or CV
Ph.D. Degree Requirements

Students who complete the Master of Arts degree may be eligible to pursue the PhD degree. Students must complete coursework in two major subfields, one minor subfield, and research methods.

Major Subfields

The major subfields must be drawn from the four subfields listed below (American Politics, Comparative Politics, International Relations, and Public Policy). Before their first attempt at the written preliminary examination in any subfield, all doctoral students must complete at least four graduate level courses courses in that field, three of which are at the 700 level or above. Enrollment in directed research covering a particular subfield may be substituted for one of the four courses/seminars. Students should consult their faculty advisor to plan a schedule of courses in each of their major subfields to provide adequate preparation for the written preliminary examination based on the requirements outlined below.

American Politics

<tr>
<td>two elective courses selected in consultation with faculty advisor</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Minor Subfield

The minor subfield may be another of the major subfields, a related field from an outside department, or an interdisciplinary program. If the choice is not an additional major subfield, the student must obtain written approval of their faculty advisor and the Director of Graduate Studies. Students must complete at least four graduate level courses in the minor subfield, three of which are at the 700 level or above. Enrollment in directed research covering a particular subfield may be substituted for one of the four courses. Students should select courses for their minor subfield in consultation with their faculty advisor. Courses for the minor subfield may not be applied to another examination field.

Research Skills & Responsible Scholarship

Doctoral students must complete the three courses listed below to meet the Research Skills & Responsible Scholarship requirement.

Research Methods

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 705</td>
<td>Research Design for Political Science</td>

<td>POLS 707</td>
<td>Research Methods II</td>
<td>3</td>
</tr>
</tbody>
</table>

Additionally, doctoral students must supplement this coursework with one of the following options, to be approved at any time prior to registering for written preliminary examinations:

- An additional research methods course selected in consultation with their faculty advisor
- Proficiency in a foreign language approved by the student's faculty advisor and the Director of Graduate Studies as demonstrated by one of the following options
  - Two semesters of a single foreign language completed no more than five years prior to the time of approval
  - Native speaker of a foreign language

Written Preliminary Examinations

All doctoral students are required to complete written preliminary examinations in their two major subfields prior to completing their comprehensive oral examination. Students must complete all courses in their major subfields, the research skills and responsible scholarship requirement, the doctoral residency requirement, and resolve any grades of Incomplete before registering for the written preliminary examinations.

Comprehensive Oral Examination

To become a doctoral candidate, the student must satisfactorily complete a comprehensive oral examination. No student may attempt the comprehensive oral examination until they have passed the two written preliminary examinations.

Dissertation

After passing the comprehensive oral examination, the doctoral candidate must write a dissertation approved by a departmental dissertation committee and pass a final oral defense of the dissertation to qualify for the doctoral degree.

Additional Information

Additional information about course and degree requirements for the Political Science doctoral program is located in the department's graduate

Prelaw Preparation

Preparing for Law School

For admission to law school, an applicant must complete a bachelor’s degree and, most often, take the Law School Admission Test (LSAT). No particular course of undergraduate study is recommended; this comports with the views of the American Bar Association (http://www.americanbar.org/groups/legal_education/resources/pre_law.html) (ABA). However, the program should be sufficiently rigorous to provide the skills of comprehension and analysis essential to the study of law.

To prepare for law school, students should take courses that challenge and interest them, but no specific courses are required or recommended. The ABA recommends the development of numerous skills in preparation for a legal education—including analytical and problem solving skills; critical reading, writing, oral communication and listening skills; general research, task organization and management skills. Filling or exceeding general education and major requirements satisfies many of these objectives. Consult an academic advisor about undergraduate courses beyond general education and major requirements.

Students should submit law school applications the fall semester one academic year before entering law school. For most students, this is fall of the senior year. Admission is competitive, and law schools examine a number of factors. The undergraduate grade-point average and score on the LSAT are particularly important in this process. All grades on the transcript, including transfer work, are reported to the Law School Admission Council (LSAC) and used by them to calculate their version of the applicant's cumulative grade point average. The LSAT tests skills in reading comprehension, logical reasoning, and analytical reasoning. It is offered 6 times during the academic year: June, July, September/October, November, January and March. Most applicants take the June, July or September/October test to submit applications early in the review process. The September/October test date sometimes coincides with midterm examinations, so, many students prefer to take the LSAT in the summer after their junior year. Students can register for the LSAT online through the Law School Admission Council (http://www.lsac.org/). Law schools also consider personal statements, letters of recommendation, extracurricular activities, and the rigor of the academic curriculum in determining admission.

Many academic policy options, such as the Credit/No Credit (http://www.policy.ku.edu/) option and the course-repeat policy (http://www.policy.ku.edu/), have different consequences for law school applicants. For example, LSAC doesn’t recognize the course repeat policy, and calculates both grades as part of your cumulative grade point average. And although NC isn’t factored into your KU gpa, LSAC treats it like an F and calculates that as part of your gpa. Therefore, it can be helpful to consult the Pre-Law advisor before electing such options.

If you have questions about the Legal Education Accelerated Degree (LEAD) Program, please visit their information page (https://collegeadvising.ku.edu/lead/).

If you have questions about KU's Law School, view the School of Law (p. 720) section of the online catalog.

Premedical Professions Preparation

Premedical Professions Advising

Predentistry, premedicine, preoptometry, and preveterinary medicine are career interests, usually developed together with completing a bachelor’s degree. Students prepare by taking courses required for entry, studying to learn concepts and perform well academically, volunteering and shadowing to get experience, taking a standardized admissions test, and applying for admission to graduate-level professional schools.

For more information, visit the website (https://prehealth.ku.edu/).

Predentistry

Predentistry is a career interest, usually developed together with completing a bachelor’s degree and major. Students prepare by taking courses to meet dental school entry requirements, studying to learn concepts and perform well academically, shadowing or working in dental practices, and volunteering to serve people in need. They take the Dental Admission Test (https://www.ada.org/education/testing/exams/dental-admission-test-dat/) (DAT) and apply for admission to dental schools, usually in the summer between the junior and senior year.

Dental schooling is four years of graduate-level, professional education and training. There is no dental school in Kansas, however, there is an agreement for some seats for Kansas residents at the University of Missouri—Kansas City (UMKC) School of Dentistry.

Most dental schools require:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>
Most medical schools require:

- A bachelor’s degree and major in a science field.
- Completion of prerequisite courses, typically by the end of the junior year.
- Performance well academically, volunteering or working in health care settings, and serving people in need.
- Taking the Medical College Admission Test (MCAT).

Medical schooling is four years of graduate-level, professional education between the junior and senior year. Some also require:

- Calculus.
- Organic Chemistry I or II.
- Biology I or II.
- Anatomy.
- Psychology.

For more information, visit the website (https://prehealth.ku.edu/dentistry/).

Premedicine

Premedicine is a career interest, usually developed together with completing a bachelor's degree and major. Students prepare by taking courses to meet medical school entry requirements, studying to learn concepts and perform well academically, volunteering or working in health care settings, and serving people in need. They take the Medical College Admission Test (MCAT) and apply for admission to medical schools, usually in the summer between the junior and senior year.

Medical schooling is four years of graduate-level, professional education and training, followed by a three- to six-year residency program. The only medical school in Kansas is the KU School of Medicine.

Most medical schools require:
Genetics. Satisfied by:
- BIOL 350 Principles of Genetics
- or BIOL 360 Principles of Genetics, Honors

Statistics. Satisfied by one of the following:
- PSYC 210 Statistics in Psychological Research
- PSYC 211 Statistics in Psychological Research, Honors
- MATH 365 Elementary Statistics
- BIOL 570 Introduction to Biostatistics

The MCAT also requires knowledge from:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 600</td>
<td>Introductory Biochemistry, Lectures</td>
<td>3-7</td>
</tr>
<tr>
<td>BIOL 636</td>
<td>Biochemistry I</td>
<td></td>
</tr>
<tr>
<td>&amp; BIOL 638</td>
<td>and Biochemistry II</td>
<td></td>
</tr>
</tbody>
</table>

Psychology. Satisfied by one of the following:
- PSYC 104 General Psychology
- or PSYC 105 General Psychology, Honors

Sociology. Satisfied by one of the following:
- SOC 104 Elements of Sociology
- SOC 105 Elements of Sociology, Honors
- SOC 160 Social Problems and American Values
- SOC 161 Social Problems and American Values, Honors

And, the KU School of Medicine also strongly encourages candidates to complete an immunology course before entering medical school:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 503</td>
<td>Immunology</td>
<td>3</td>
</tr>
</tbody>
</table>

BIOL 503 has a pre-requisite of BIOL 400: Fundamentals of Microbiology, which is also recommended by most medical schools.

For more information, visit the website [https://prehealth.ku.edu/medicine/](https://prehealth.ku.edu/medicine/).

Preoptometry

Preoptometry is a career interest, usually developed together with completing a bachelor's degree and major. Students prepare by taking courses to meet optometry school admission requirements, studying to learn concepts and perform well academically, shadowing or working in optometry practices, and volunteering to serve people in need. They take the Optometry Admission Test [http://www.ada.org/en/oat/)](http://www.ada.org/en/oat/) (OAT) and apply for admission to optometry schools, usually in the summer between the junior and senior year.

Optometry schooling is four years of graduate-level, professional education and training. There is no optometry school in Kansas, however, there are agreements for some seats for Kansas residents at the University of Missouri - St. Louis School of Optometry, Northeastern State University of Oklahoma College of Optometry, and the Southern College of Optometry in Tennessee.

Most optometry schools require:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101</td>
<td>Composition</td>
<td>3</td>
</tr>
</tbody>
</table>

Most also require or recommend:
The Kansas State College of Veterinary Medicine requires:

- Kansas State College of Veterinary Medicine.
- Education and training. The only veterinary school in Kansas is the Veterinary schooling is four years of graduate-level, professional study, usually in the summer between the junior and senior year.

For more information, visit the website (https://prehealth.ku.edu/).

**Preveterinary Medicine**

Preveterinary medicine is a career interest, usually developed together with completing a bachelor's degree and major. Students prepare by taking courses to meet veterinary school admission requirements, studying to learn concepts and perform well academically, shadowing or working in veterinary practices, and volunteering to help people and other animals in need. They take the Graduate Record Examination (http://www.ets.org/gre/) (GRE) and apply for admission to veterinary schools, usually in the summer between the junior and senior year.

Veterinary schooling is four years of graduate-level, professional education and training. The only veterinary school in Kansas is the Kansas State College of Veterinary Medicine.

The Kansas State College of Veterinary Medicine requires:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Some require additional mathematics, psychology, and/or other courses.

For more information, visit the website (https://prehealth.ku.edu/veterinary/).

**Department of Psychology**

**The Psychology Department at the University of Kansas**

Our mission is to further our understanding of behavior and the physiological, cognitive, and social processes associated with behavior. Psychology is also the profession that applies the science of behavior to practical problems, such as clinical, psychological disorders. This mission includes the discovery and dissemination of principles pertaining to both individual and group psychological functioning and its development. In addition to doing this critical research, we expend great effort in training students at both the undergraduate and graduate levels so that these students will be well equipped with the knowledge and methods that will place them at the forefront of progress across a broad range of the psychological disciplines.

**Psychology Undergraduate Program**

Students have many reasons for wanting to major in psychology. Some are simply fond of observing the behavior of others around them, fascinated with the results of their observations and curious to learn why people behave as they do. Some plan to become psychologists.
themselves or to enter one of the many professions where a background in psychology can be useful -- such as, business, teaching, medicine, nursing, law, social work, the ministry, counseling, student services, child development, administration, or human resources.

**Psychology Graduate Program**

We offer a single doctoral degree which may be earned in one of the following programs: brain, behavior, and quantitative science, clinical psychology, or social psychology. Students admitted to one of these programs enter with the expectation of continuing graduate study through the Ph.D. as the department does not admit terminal master's students.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child psychology program, please visit their website (https://ccpp.ku.edu/).

**Undergraduate Programs**

Undergraduate courses are designed as part of a general education, for students preparing for careers in professional fields, and for students majoring in psychology, including those anticipating graduate work.

**Preparation for Graduate Study**

Students who plan to apply for graduate work in psychology should supplement their beginning course in methodology (PSYC 200/PSYC 201) and statistics (PSYC 210/PSYC 211) with a laboratory course (e.g., PSYC 618, PSYC 620, PSYC 622, PSYC 624, or PSYC 625). Methods (PSYC 200/PSYC 201) and Statistics (PSYC 210/PSYC 211) should be taken as early as possible in the undergraduate education. The laboratory course should be completed during the junior or senior year.

**Graduate Programs**

We offer a single doctoral degree in psychology which may be earned in one of the following programs: brain, behavior, and quantitative science, clinical psychology, and social psychology. Please visit our Psychology Graduate Program (http://psych.ku.edu/overview-phd/) webpage for more details.

All of our programs boast distinguished and award-winning faculty, notable research publications, and a deep foundation in the historical progress of psychological advances.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child psychology program, please visit their website (https://ccpp.ku.edu/).

**Non-Degree Seeking**

Students who are interested in enrolling in graduate level coursework in the Department of Psychology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s Non-Degree Seeking (http://psych.ku.edu/overview/) webpage for further details.

Questions regarding the our graduate programs can be directed to our graduate coordinator, Katie Williams, ktwilliams@ku.edu.

**Courses**

**PSYC 102. Orientation Seminar in Psychology. 1 Credits. S**
Provides an overview of the discipline of psychology. Emphasizes developing an understanding of opportunities in psychology at the University of Kansas, exploring service-learning options related to the major, and helping students plan goals for their education through an understanding of their personal values and options within and outside the discipline. Open to KU-degree-seeking students only. Contact the Psychology Department to enroll in the course. Non-degree-seeking and non-KU students may enroll in the course by signing up with KU Continuing Education. Graded on a satisfactory/unsatisfactory basis.

**PSYC 104. General Psychology. 3 Credits. SI S**
A basic introduction to the science of psychology.

**PSYC 105. General Psychology, Honors. 3 Credits. SI S**
Open to students in College or Departmental Honors programs or by permission of instructor.

**PSYC 177. First Year Seminar: _____ 3 Credits. SI**
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in psychology. May not contribute to major requirements in psychology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**PSYC 199. Data I: Dealing with Data. 3 Credits. S**
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as ECON 199, POLS 199 and SOC 199.)

**PSYC 200. Research Methods in Psychology. 3 Credits. S**
An examination of the scientific "ways of knowing" employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Prerequisite: PSYC 104.

**PSYC 201. Research Methods in Psychology, Honors. 3 Credits. S**
An examination of the scientific "ways of knowing" employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Open to students in University and Departmental Honors programs or by permission of instructor. Not open to students taking PSYC 200. Prerequisite: PSYC 104.

**PSYC 202. Study Abroad Topics in: _____ 1-6 Credits. S**
This course is designed for the study of special topics in Psychology equivalent to courses at the 100 and 200 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**PSYC 210. Statistics in Psychological Research. 3 Credits. S**
An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Prerequisite: PSYC 104.

**PSYC 211. Statistics in Psychological Research, Honors. 3 Credits. S**
An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Open only to student in University and Departmental Honors programs or by permission of
instructor. Not open to students who have taken PSYC 210. Prerequisite: PSYC 104.

**PSYC 250. Human Development. 3 Credits. S**
This course examines the psychological, social, and physical development of humans across the lifespan from conception through infancy, childhood, adolescence, adulthood and death. The course will explore the broad array of factors that contribute to development including cognitive, emotional, social, neurological, physical, genetic, and environmental influences. (Same as ABSC 250.) Prerequisite: PSYC 104 or PSYC 105.

**PSYC 318. Cognitive Psychology. 3 Credits. S**
An introduction to contemporary research and theory in human learning and memory, relevant perceptual processes, and higher functions such as language. Prerequisite: PSYC 104.

**PSYC 319. Cognitive Psychology, Honors. 3 Credits. S**
Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.

**PSYC 320. Personality. 3 Credits. S**
A survey of personality theories, development, assessment and current research. Prerequisite: PSYC 104.

**PSYC 321. Personality, Honors. 3 Credits. S**
Honors version of PSYC 320. Open to students in College or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.

**PSYC 323. Philosophy of Psychology. 3 Credits. HR**
The philosophy of psychology is a relatively new field of inquiry in philosophy and so the question of what the philosophy of psychology is remains an open question. In this course, we will understand the philosophy of psychology in two ways. First, it is the study of the nature of psychology and the various capacities and mechanisms that make cognition possible. We will consider whether there is a unique psychological level of explanation or whether psychology ultimately reduces to the brain. We will also explore various philosophical puzzles raised by consideration of psychological abilities like memory, attention, and emotion. Second, philosophy of psychology is a subfield of philosophy of science, where we examine a particular science-here, experimental psychology–as a way to explore broader questions about what science is, how science explains phenomena, and how values intersect with its investigations. All of this makes it an exciting time to study the philosophy of psychology as students in this course, student’s interests will play a role in selecting topics and shaping the direction of our inquiry. (Same as PHIL 323.)

**PSYC 333. Child Development. 3 Credits. S**
A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Prerequisite: PSYC 104.

**PSYC 334. Child Development, Honors. 3 Credits. S**
A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Open to students in University or Departmental Honors Programs or by permission of instructor. Prerequisite: PSYC 104.

**PSYC 350. Psychological Disorders. 3 Credits. S**
A broad survey of psychopathology, with a focus on the primary symptoms, causes, consequences, and treatments of its major manifestations, including: anxiety disorders, mood disorders, trauma-related disorders, eating disorders, substance-use disorders, personality disorders, and psychotic-spectrum disorders. Relevant scholarship from neuroscience, cognitive science, medicine, behavioral science, and sociocultural perspectives will be integrated throughout. Prerequisite: PSYC 104.

**PSYC 351. Psychological Disorders, Honors. 3 Credits. S**
Open to students in College or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.

**PSYC 360. Social Psychology. 3 Credits. S**
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Prerequisite: PSYC 104.

**PSYC 361. Social Psychology, Honors. 3 Credits. S**
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.

**PSYC 370. Behavioral Neuroscience. 3 Credits. N**
A survey of topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

**PSYC 371. Behavior Neuroscience, Honors. 3 Credits. N**
A survey of basic topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology, an introductory course in Biology and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

**PSYC 375. Cognitive Neuroscience. 3 Credits. N**
A survey of topics related to the biological processes underlying cognition in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and functional neuroanatomy. Selected topics within the area of cognitive neuroscience also covered, such as sensory processing, hearing, vision, learning and memory, attention, motor control, language, hemispheric asymmetry, executive function, and neuroplasticity. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

**PSYC 380. Clinical Neuroscience. 3 Credits. N**
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dyskinetic movement disorders, and senile dementia. Prerequisite: An introductory course in Psychology,
an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 381. Clinical Neuroscience, Honors. 3 Credits. N
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dyskinetic movement disorders, and senile dementia. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology, an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 385. Social Neuroscience. 3 Credits. S
This course is designed to acquaint students with the Social Neuroscience approach as well as recent findings using this approach. The class will focus on particular social phenomena and (a) evaluate the utility of current social neuroscience research examining these phenomena and (b) consider future experimental designs using the Social Neuroscience approach to further inform our understanding of each phenomenon. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 390. The Psychology of Aging. 3 Credits. S
Social, psychological, and economic adjustments required by aging; changes in cognition, role and personality necessitated by advancing age. Not open to students with credit in PSYC 691. Prerequisite: PSYC 104.

PSYC 399. Data 2: Foundations of Data Science. 3 Credits. S
Data science empowers its users to provide data-driven solutions to problems and questions in the world. This course provides foundational skill and knowledge behind this power. This knowledge and skill includes learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. (Same as ECON 399 and POLS 399.) Prerequisite: PSYC 199/POLS 199 or ECON 199 or EECS 138; and PSYC 210 or MATH 365 or ECON 426 or POLS 306 or SOC 380 or MATH 101 or MATH 104 or MATH 115 or MATH 121.

PSYC 402. Study Abroad Topics in: 1-6 Credits. S
This course is designed for the study of special topics in Psychology equivalent to courses at the 300 to 600 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

PSYC 410. Intimate Relationships. 3 Credits. S
A social psychological perspective on adult intimate relationships, examining friendship, dating, committed relationships, and the dissolution of committed relationships. Topics include romance, jealousy, self-disclosure, power, loneliness, and social support. Discussion of heterosexual and homosexual relationships, traditional forms (e.g., marriage) of relationships as well as alternative lifestyles (e.g., cohabitation) and gender-linked differences in relationships. (Same as WGS 410.) Prerequisite: PSYC 104.

PSYC 412. Introduction to Motivation and Emotion. 3 Credits. S
An examination of contemporary issues, theories, and research in motivation and emotion. Prerequisite: PSYC 360 or PSYC 361, or consent of instructor.

PSYC 415. Social and Cultural Sources of Self. 3 Credits. S
An interdisciplinary exploration of the social and cultural sources of self-experience. The first part of the course emphasizes a general process: how the development and experience of self, though it might seem essentially personal, is shaped by social interaction. The second part of the course highlights particular cases: how self-experience may be constructed differently depending on the particular social and cultural settings a person inhabits. Cases include influences of gender, socioeconomic status, and age group on the construction of self-experience within societies from around the world, and ethnic-identity groups within the USA. Prerequisite: PSYC 104.

PSYC 418. Introduction to Cognitive Science. 3 Credits. S
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PHIL 418, and SPLH 418.) Prerequisite: Consent of instructor.

PSYC 430. Cognitive Development. 3 Credits. S
A basic survey course in the development of thinking and understanding in normal children. The course will cover Piaget's theory and information processing theories at the advanced undergraduate level. Topics include perception, attention, learning, memory, language, problem solving, and individual differences from birth to the mid-teens. Prerequisite: PSYC 104 or ABSC 160.

PSYC 435. Psycholinguistics I. 3 Credits. S
A detailed examination of issues in the processing of language. The course provides a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes are examined. (Same as LING 435.) Prerequisite: An introductory course in linguistics or permission of instructor.

PSYC 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N LFE
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, BIOL 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

PSYC 453. Psychological Foundations of Musical Behavior. 3 Credits. S
Study of human musical behavior, including basic psychoacoustic phenomena, musical taste, functional music, musical ability, cultural organization of musical sounds, and the affective response. Prerequisite: General Psychology, MENT 370, or consent of instructor.

PSYC 460. Honors in Psychology. 1-2 Credits. S
A seminar for juniors and seniors in the Honors Program in Psychology. Students who have been admitted to the Honors Program in Psychology may enroll for one credit for one or both semesters of their junior year and are required to enroll for two credits for both semesters in their senior year.

PSYC 465. Stereotyping and Prejudice Across Cultures. 3 Credits. S
This course covers a variety of theoretical views concerning the origins of stereotypes and the factors that maintain them, as well as how and when the revision of such beliefs take place. Analysis of various stereotypes
Students who are preparing to enter the workforce are introduced to current challenges and trends in professional development and workforce psychology. In addition to discussion of interdisciplinary research centered around career management topics such as preventing burnout, recognizing and eliminating bias in interviews, or predictors of job satisfaction and productivity, emphasis is placed on the creation of a job dossier and tools to help bridge skills from the classroom and their place in an individual's career. Prerequisite: Junior or senior status.

PSYC 492. Psychology and Social Issues. 3 Credits. S
A study of psychological aspects of selected social issues in contemporary American society. Race relations and the civil rights movement. Political extremism. Public opinion and social change. Social psychological approaches to a variety of social problems. Prerequisite: PSYC 360 or 361, or consent of instructor.

PSYC 499. Conceptual Issues in Psychology. 3 Credits. S
This course examines classic issues in psychology--free-will and determinism, nature and nurture, the mind-body problem, approaches to human action, cultural influences on psychological theories, the evolution of intellectual paradigms, and inductive and deductive approaches to social scientific research--from multiple perspectives within psychology and related social sciences. Prerequisite: PSYC 104 or equivalent.

PSYC 500. Intermediate Statistics in Psychological Research. 3 Credits. U
A second course in statistics with emphasis on applications. Analysis of variance, regression, analysis, analysis of contingency tables; possibly selected further topics. Prerequisite: Grade of B- or better in PSYC 210 or PSYC 211.

PSYC 502. Human Sexuality. 3 Credits. S
An introduction to the field of human sexuality. Topics to be covered include sexual anatomy and physiology, fertilization, pregnancy, birth and lactation, human sexual response, sexuality across the life cycle, love, marriage, alternatives to marriage, sexual orientation, sex differences in behavior, parenthood, sexually transmitted diseases, sex and the law, and sex education. (Same as WGSS 502.) Prerequisite: Any previous coursework in either WGSS or PSYC.

PSYC 513. Behavioral Economics. 3 Credits.
Decisions link our thoughts to our actions and as a result define who we are and who people think we are. This makes decision making a fundamental life skill. But, can we make better decisions? This course will introduce you to the science of decision making that has developed as scholars including biologists, economists, mathematicians, philosophers, psychologists, and others have sought to answer this very question.

Over the course of the semester we will examine what we have learned so far such as how people predict and mispredict events, how people make decisions and how their decisions can be quite irrational from one perspective but simultaneously appear quite reasonable, how people bargain and why they sometimes choose to cooperate and other times not, and why negotiating can be so difficult. (Same as ECON 513.) Prerequisite: PSYC 104 or ECON 142; MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126.

PSYC 518. Human Memory. 3 Credits. S
In-depth coverage of human memory phenomena, including phenomena concerning acquisition, storage and retrieval, unconscious forms of memory, memory monitoring and control, and practical aspects of memory such as autobiographical memory, mnemonic techniques and eyewitness memory. Prerequisite: PSYC 104.

PSYC 520. Memory and Eyewitness Testimony in Children. 3 Credits. S
A review of the literature on the development of memory in young children, and the implications of this research for understanding children's eyewitness testimony. The course will present current
research on children's long-term memory abilities, the impact of stress on recall performance, the effectiveness of various types of interviewing techniques, and the suggestibility of children's recollections. Policy issues and potential guidelines for the elicitation and evaluation of children's memory reports in both clinical and legal arenas will be discussed. Prerequisite: PSYC 104 or ABSC 160, or consent of instructor.

**PSYC 521. Women and Violence. 3 Credits. S**

An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. The nature, prevalence, causes, and consequences of violence against women are discussed. (Same as WGSS 521.) Prerequisite: PSYC 104.

**PSYC 533. The Psychology of Addictive Behaviors. 3 Credits. S**

The course will take an in-depth look at addiction processes using an interdisciplinary perspective. The course will cover processes that lead to the development of substance use disorders, as well as advanced topics in prevention and treatment. Addiction is a behavioral disorder, and the seminar will focus heavily on learning theory and conditioning processes that can yield problem substance use. Readings will be derived from a variety of sources, including both animal and human studies. This seminar is appropriate for graduate students from a variety of disciplines, as well as advanced undergraduate students who satisfy the prerequisite requirements. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in PSYC 823. Prerequisite: PSYC 104.

**PSYC 535. Developmental Psychopathology. 3 Credits. S**

A review of contemporary psychological and developmental disorders of children and youth. Course presents current models of psychopathology, classification systems, assessment methods, and treatment approaches designed for the individual, the family, and the community. Specific attention is given to age, gender, and cultural differences and similarities. Topics include: anxiety disorders, oppositional behavior disorders, physical/sexual abuse, learning disabilities, depression, chronic physical illness, and autism. (Same as ABSC 535.) Prerequisite: ABSC 160 or PSYC 333, or instructor permission.

**PSYC 545. Culture and Psychology. 3 Credits. S**

The course considers the relationship between culture and psyche. One theme throughout the course involves revealing the cultural grounding of psychological functioning. The second and complementary theme involves identifying the psychological processes involved in the phenomenon of culture. Prerequisite: PSYC 333, 334, 360 or 361 or consent of instructor.

**PSYC 555. Evolutionary Psychology. 3 Credits. S**

A review of evolutionary theory and its application to human personality, cognition, interpersonal relationships, family dynamics, and development. Prerequisite: PSYC 104 and at least 3 additional hours in Psychology, or consent of instructor.

**PSYC 565. Applied Developmental Psychology. 3 Credits. S**

An advanced study of the application of theories and concepts of developmental and behavioral psychology to a range of specific issues and problems of childhood and adolescence. This course relies heavily on the empirical research literature. Topics include contemporary social issues and child development, research in applied settings, assessment, intervention, and prevention, as well as program evaluation. Prerequisite: ABSC 160 or PSYC 333, and ABSC/PSYC 535.

**PSYC 566. Psychology and the Law. 3 Credits. S**

An application of psychological processes and concepts to the American legal system. Among the topics covered are the socialization of legal attitudes, opinions about the purposes of the criminal justice system and especially of prisons, the concept of "dangerousness," the nature of jury decision making, and the rights of prisoners, patients, and children.

**PSYC 570. Group Dynamics. 3 Credits. S**

A study of the processes underlying the dynamics of the group, including the observation of group phenomena and a consideration of their relation to research findings. Prerequisite: PSYC 360 or 361, or consent of instructor.

**PSYC 572. Psychology and International Conflict. 3 Credits. S**

A study of psychological approaches to analysis and intervention in the field of international conflict and peace-making. Focus on major contributions and important paradigms for explanation and action. Prerequisite: PSYC 360 or consent of instructor. Background study in international relations or recent world history desirable.

**PSYC 578. Social Attitudes. 3 Credits. S**

An introduction to the study of attitudes focusing on problems of measurement and on empirical findings and theories of attitude acquisition and change. Prerequisite: PSYC 360, 361, or consent of instructor.

**PSYC 580. Research Lab. 1-5 Credits. S**

Supervised research under the guidance of a faculty member in the Department of Psychology. Students will be part of a collaborative laboratory environment, and will be involved in research design, data collection, and data analysis, and will take part in regularly scheduled laboratory meetings. Prerequisite: Permission of instructor.

**PSYC 590. Nonverbal Communication. 3 Credits. S**

Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems. (Same as COMS 590.) Prerequisite: COMS 356 or PSYC 210 or PSYC 211.

**PSYC 592. Psychological Significance of Physical Illness and Disability. 3 Credits. S**

A lecture course to help students become more aware of and responsive to the psychological needs of persons with physical illnesses or disabilities. Emphasis is upon the meanings of such conditions in individuals' lives and the effects of treatment and rehabilitation settings on psychological adaptation. Prerequisite: PSYC 104.

**PSYC 595. Eating and Weight Disorders. 3 Credits.**

This course is an intensive seminar in which students will critically examine up-to-date research and theoretical models on eating and weight disorders. Content will include diagnosis and assessment, as well as psychological, social, cognitive, biological, and "addiction" model influences/perspectives. Students will gain exposure to literature on treatment and prevention of eating disorders and obesity. Class will include critical discussion, brief lecture, and active-learning strategies to facilitate learning during class. Students will also participate in group work. Prerequisite: PSYC 350 or instructor permission.

**PSYC 598. Positive Psychology. 3 Credits. S**

An introduction to the core assumptions and research findings associated with human strengths and positive emotions. Also an exploration of interventions and applications informed by positive psychology in counseling and psychotherapy, and its application to school, work, family and other close relationships. (Same as EPSY 580.) Prerequisite: PSYC 104 or consent of instructor.

**PSYC 605. Health Psychology. 3 Credits. S**

Review of research and theory concerning the role of psychological factors in the development of physical illness and the contribution
of psychologists to the treatment and prevention of physical illness. Prerequisite: PSYC 104.

**PSYC 618. Experimental Psychology: Human Learning. 6 Credits. S**

Lectures and laboratory research on human information processing as related to theories of word recognition, reading, and language comprehension. Major emphasis on experimental design, data analysis, interpretation, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor.

**PSYC 620. Experimental Psychology: Sensation, Perception, and Cognition. 6 Credits. S**

Lectures and laboratory work on human sensory processes and how they result in perceptions of the environment. Experience is provided in designing and implementing research as well as in the skills necessary for statistical analysis, interpretation of data, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor.

**PSYC 622. Experimental Psychology: Social Behavior. 6 Credits. S**

Lectures, laboratory and field work on various issues in research in social psychology (e.g., conformity, attitude change, social processes). Two two-hour periods a week and appointment for research. Prerequisite: PSYC 104, PSYC 360, and PSYC 210 or PSYC 211 or consent of instructor.

**PSYC 624. Experimental Psychology: Clinical Psychology. 6 Credits. S**

Lectures and laboratory research on contemporary issues in clinical psychology. Emphasis on experimental design, data analysis, interpretation of data, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor.

**PSYC 625. Experimental Psychology: Methods in Psychophysiology and Neuroscience. 6 Credits. S**

Lectures and laboratory work on psychophysiology and neuropsychology research methods. Overview of psychophysiological tools to measure the central and peripheral nervous systems. Experience designing and implementing neuropsychology and psychophysiology research. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor.

**PSYC 626. Adolescent Behavior and Development. 3 Credits. S**

Impact of factors of social environment and physical growth upon psychological development from puberty to young adulthood. (Same as ABSC 626; Prerequisite: PSYC 104, PSYC 333, or ABSC 160.

**PSYC 630. Clinical Psychology. 3 Credits. S**

The historical and empirical foundations of clinical psychology. Significant trends in theory, research, and social organization which have shaped clinical practice. A review of clinical practice. Prerequisite: PSYC 104.

**PSYC 632. Advanced Child Behavior and Development. 3 Credits. S**

An advanced course in child development that includes a survey of the field's principles and theoretical approaches, and current issues in research and practice. Topics will include: prenatal development, cognition and language, social-emotional development, socialization influences in childhood, developmental psychopathology, and social policies. (Same as ABSC 632.) Prerequisite: ABSC 160, PSYC 333, or instructor permission, and senior or graduate status.

**PSYC 644. Behavioral Pharmacology. 3 Credits. S**

Addresses psychological and behavioral effects of drugs, including psychotropic medications. A central theme is that effects of drugs frequently cannot be characterized solely from a pharmacological perspective. Thus, emphasis is placed on examining the interaction of pharmacological and behavioral variables. For example, how do psychological factors moderate responses to drugs? The nature of this area assumes some knowledge of general psychology, research methods, biology, chemistry, neurophysiology, and the nervous system. Prerequisite: PSYC 104 or consent of instructor.

**PSYC 650. Statistical Methods in Behavioral and Social Science Research I. 4 Credits. S**

Elementary distribution theory, t-test; simple regression and correlation; multiple regression and multiple correlation; curvilinear regression; logistic regression; general linear model. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 790 will have different course requirements. Prerequisite: A grade of B- or better in a beginning course in statistics (e.g., PSYC 210 or PSYC 211, MATH 365, POLS 306, COMS 356, SOC 380, or equivalent) is recommended, or consent of instructor.

**PSYC 651. Anova and Other Factorial Designs. 4 Credits. S**

Course covers one-way analysis of variance, linear trends, contrasts, post hoc tests; multi-way analysis of variance for crossed, blocked, nested, and incomplete designs; analysis of covariance; repeated measures analysis of variance; general linear model. Applications across the social, educational, and behavior sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 791 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

**PSYC 678. Drugs and Behavior. 3 Credits. S**

A survey of the methods used to study the effects of drugs on behavior, and of the effect of selected drugs on behavior, particularly the narcotics, hallucinogens, and drugs used in the treatment of mental illness. Prerequisite: PSYC 104.

**PSYC 687. Factor Analysis. 4 Credits. S**

This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 887 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

**PSYC 689. Conceptual Issues in Human Sexuality. 3 Credits. S**

An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 689.) Prerequisite: Any previously completed course in PSYC or WGSS.

**PSYC 690. Seminar: _____. 1-5 Credits. U**
Discussion of current problems in psychological theory and research. Prerequisite: PSYC 104 and sophomore status.

PSYC 691. The Psychology of Aging. 3 Credits. S
Social, psychological, and economic adjustments required by aging; changes in cognition, role and personality necessitated by advancing age. Not open to students with credit in PSYC 390. Prerequisite: PSYC 104 or consent of instructor.

PSYC 693. Multivariate Analysis. 4 Credits. S
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 893 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 694. Multilevel Modeling I. 4 Credits. S
Introduction to statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. Emphasis will be on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 894 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 695. Multilevel Modeling II. 4 Credits. S
Introduction to statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, and hierarchical CFA. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 895 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 697. Longitudinal Data Analysis. 3 Credits. S
Reviews and contrasts various statistical models for the analysis of change. Course focuses on techniques to analyze longitudinal (repeated measures) data beyond the repeated-measures ANOVA framework. Applications across the behavioral and social sciences are emphasized. Students taking this course as PSYC 991 will have different course requirements. Prerequisite: PSYC 696 or equivalent, or consent of instructor.

PSYC 698. Bayesian Data Analysis. 3 Credits. S
This course will provide a tutorial introduction to doing Bayesian data analysis. The course is intended to make advanced Bayesian methods accessible to all students in the behavioral and social sciences. During the course we will cover the fundamental of Bayesian methods and work from the simplest model up through hierarchical or multilevel models for all types of data from binary to continuous to count data. By the end of the course each student should be able to carry out their own Bayesian data analysis for nearly any question they might ask in the social and behavioral sciences. Open only to undergraduate students. Not open to students with credit in PSYC 797. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 704. Research Practicum in Clinical Child Psychology. 3 Credits.
This course provides students in the Clinical Child Psychology Program with the opportunity to enhance and consolidate their research activities by fulfilling one of the elective cluster course requirements. This practicum involves a contract with a research advisor and the program director. The contract includes definable products and dates for completion to prepare research for submission for publication, develop a grant proposal, or conduct additional research project independent of other requirements in the program. The course is not to be taken as an overload, but is to be part of a full-time course schedule. May be repeated. (Same as ABSC 704.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 706. Special Topics in Clinical Child Psychology: ______. 3 Credits.
A course offering detailed discussion of the literature and research methods of a special topic within clinical child and pediatric psychology. Topic and instructor may change by semester and will be announced in the Schedule of Classes. May be repeated. (Same as ABSC 706.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 710. Feminist Issues in Psychology. 3 Credits.
Detailed examination and discussion of psychological theory and research from a feminist perspective. Specific topics will vary. The goal of the course is to facilitate students’ ability to develop feminist critiques of existing research and theory as well as to generate nonsexist alternative approaches. Open to advanced undergraduates with consent of instructor. Prerequisite: Some familiarity with research methods in the social sciences.

PSYC 723. Advanced Cognitive Psychology. 3 Credits.
Advanced cognitive psychology reviewing theories of pattern recognition, attention, working memory, language comprehension and problem solving. Emphasis will be placed upon the application of these theories to real-life situations. Prerequisite: PSYC 104 and six additional credit hours in psychology, or permission of the instructor.

PSYC 725. Cognitive Neuroscience. 3 Credits.
A survey of the critical issues within cognitive and behavioral neuroscience. The course will provide information about neuronal physiology, functional neuroanatomy, and psychophysiological research methods. Human cognition and the neurophysiology that subserves the primary cognitive functions will be discussed.

PSYC 735. Psycholinguistics I. 3 Credits. LFE
A detailed examination of issues in the processing of language. The course will provide a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processing will be examined. (Same as LING 735.)

PSYC 737. Psycholinguistics II. 3 Credits.
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. (Same as LING 737.) Prerequisite: PSYC 735/LING 735 or consent of instructor.

PSYC 750. Advanced Seminar in Gender Identity and Sexual Orientation. 3 Credits.
Design and execution of research on the causes and consequences of variations in gender identity, sexual orientation or affectional preference, sex roles, and sex-linked behaviors. Prerequisite: Consent of instructor.

**PSYC 757. Theories of Perception. 3 Credits.**
A consideration of the facts and theories of human perception. The emphasis will be on vision, although hearing, smell, pain, and other senses will also be discussed. Of particular concern is the question of perceptual modifiability and the response of the human observer to unusual sensory environments. Prerequisite: PSYC 104.

**PSYC 774. Advanced Social Psychology I. 3 Credits.**
First semester of a two-semester course. Designed to provide a thorough background in social psychology and to motivate a continuing exploration of theoretical problems and issues in the field. Combines examination of historical development of theories and methods in social psychology with analysis of theoretical and methodological approaches to a variety of contemporary topics.

**PSYC 775. Advanced Social Psychology II. 3 Credits.**
A continuation of PSYC 774.

**PSYC 777. Social Psychology: Theory, Research, and Clinical Applications. 3 Credits.**
Basic theories in social psychology, as well as their applications to the process of coping with life events. The focus is on the nature of each theory, including the history and more recent developments; however, where clinical applications have been made of a particular theory, these will be discussed.

**PSYC 780. Research Lab. 1-5 Credits. S**
Supervised research under the guidance of a faculty member in the Department of Psychology. Students will be part of a collaborative laboratory environment, and will be involved in research design, data collection, and data analysis, and will take part in regularly scheduled laboratory meetings. Prerequisite: Permission of instructor.

**PSYC 782. Research Methods in Child Language. 3 Credits.**
A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as CLDP 782 and LING 782.)

**PSYC 787. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.**
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, COMS 787, and SOC 767.)

**PSYC 790. Statistical Methods in Psychology I. 4 Credits.**
Elementary distribution theory; t-test; simple regression and correlation; multiple regression and multiple correlation; curvilinear regression; logistic regression; general linear model. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: A beginning course in statistics and graduate standing, or consent of instructor.

**PSYC 791. Statistical Methods in Psychology II. 4 Credits.**
Continuation of PSYC 790. One-way analysis of variance, linear trends, contrasts, post hoc tests; multi-way analysis of variance for crossed, blocked, nested, and incomplete designs; analysis of covariance; repeated measures analysis of variance; general linear model. Applications across the social, educational, and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

**PSYC 795. Computing and Psychology. 3 Credits.**
Introduction to the use of personal computers to facilitate and standardize administration of research protocols and to automate data collection. Lectures and projects emphasize direct application to research in the behavioral sciences. Prerequisite: Graduate standing in the Department of Psychology and consent of instructor.

**PSYC 796. Computer Models of Brain and Behavior. 3 Credits.**
An introduction to the techniques of computer modeling with applications in the study of brain-behavior mechanisms. Early and contemporary efforts to simulate the neuron, neural networks, and neural processes which regulate behavior, are reviewed. Application of modeling techniques in sample brain-behavior problem areas are used to illustrate the operation of thresholds, feedback, dynamic equilibrium, redundancy, plasticity, network structure, and similar constructs. Programming skill in a high-level language available on personal computers or mainframe is required. Prerequisite: EECS 128 or EECS 138 or PSYC 795, and PSYC 370, or equivalent courses or experience.

**PSYC 797. Bayesian Data Analysis. 3 Credits.**
This course will provide a tutorial introduction to doing Bayesian data analysis. The course is intended to make advanced Bayesian methods accessible to all students in the behavioral and social sciences. During the course we will cover the fundamental of Bayesian methods and work from the simplest model up through hierarchical or multilevel models for all types of data from binary to continuous to count data. By the end of the course each student should be able to carry out their own Bayesian data analysis for nearly any question they might ask in the social and behavioral sciences. Not open to students with credit in PSYC 698. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

**PSYC 798. Introduction to Mathematical Methods in Psychology. 3 Credits.**
A first course in scaling and modeling psychological processes. Substantive areas treated selected from sensation, perception, learning, memory, preference, choice and decision processes, problem solving, games, social interaction, and individual differences. May be repeated with permission. Prerequisite: Previous course work beyond the introductory level in psychology or a closely related area, a course in statistics, and a course in calculus.

**PSYC 799. Proseminar in Child Language. 2 Credits.**
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, CLDP 799, LING 799, and SPLH 799.)

**PSYC 800. Experimental Psychology: ______. 3 Credits.**
An advanced survey of theory and research in a selected area of experimental psychology. Continual enrollment for four semesters is required of entering graduate students in experimental psychology. Open to other students with graduate standing in psychology or a closely related field. May be repeated with permission.

**PSYC 802. Social-Psychological Aspects of Health, Disability, and Associated Life Stress. 3 Credits.**
Disabling myths; perception of causes and effects of disease and disability; attitudes and interpersonal relations; hoping, coping, and reality issues; values; professional-client relations; public media and societal rehabilitation. A departmental core course for graduate students.
PSYC 803. Fundamentals of Psychological Assessment and Intervention with Children. 3 Credits.
Lecture and supervised experience covering the theoretical and empirical literature on assessment and intervention methods for children, adolescents, and families. Students will learn and demonstrate evidence-based clinical interviewing skills, behavioral observation techniques, risk assessment techniques, therapeutic communication approaches, strategies for providing assessment feedback to families, and ethical principles related to the provision of assessment and psychotherapy (including client file and resource management.) The course requires interaction with clinical populations and communication with referral sources. (Same as ABSC 803.) Prerequisite: Graduate student in clinical child psychology program.

PSYC 805. History of Psychology. 3 Credits.
A historical survey of basic concepts and theories in psychology with emphasis on their relationship to contemporary issues in theory.

PSYC 809. Professional Issues: Clinical Child Psychology. 1 Credit.
Consideration of special problems confronting the child and family oriented scientist-practitioner, and in the development of a professional identity. Topics include critical issues, including ethical, legal, cultural, empirical, and clinical aspects of research and practice. May be repeated. (Same as ABSC 809.) Prerequisite: Graduate standing in clinical child psychology.

PSYC 810. History and Ethics in Psychology. 3 Credits.
A historical survey of basic concepts and theories in psychology with emphasis on their relationship to contemporary issues. Examination of historical and contemporary code of ethics and its application to the conduct of clinical psychologists.

PSYC 811. Achievement and Intellectual Assessment in Clinical Child Psychology. 3 Credits.
Course covers the basic theory, research, administration, and reporting of psychological assessment of development, intelligence, and achievement for children, adolescents, and adults within cultural and developmental contexts. The range of psychological instruments examined includes, for example, WIAT, K-ABC, W-J, S-B, WISC, WAIS, and WPPSI. (Same as ABSC 811.) Prerequisite: Graduate standing in clinical child psychology.

PSYC 812. Behavioral and Personality Assessment of Children. 3 Credits.
Lecture, laboratory, field work, and supervision. Theory and applications in the psychological evaluation of children with standardized assessment techniques. The administration, scoring, interpretation, and reporting of behavioral and personality functioning in children. (Same as ABSC 812.) Prerequisite: Graduate standing in clinical child psychology.

PSYC 814. Advanced Child and Family Assessment. 3 Credits.
Lecture, laboratory, field work, and supervision. Supervised experience in specialized psychological assessment approaches for children and families. Emphasis on interviewing, observation, psychometric scales, consultation, rationale, administration, analysis, and reporting of mental health functioning of children and families. Experience with clinical populations, and communication with referral sources. Prerequisite: Graduate student in clinical child psychology.

PSYC 815. Design and Analysis for Developmental Research. 3 Credits.
Coverage of the philosophy and basic principles of group-design research, with a special emphasis on designs that are appropriate for developmental studies. Designs for both experimental and quasi-experimental research are covered, and appropriate statistical procedures are presented concomitantly with the designs. Individual-difference analyses and statistical control issues are also addressed.

PSYC 816. Design and Analysis for Neuroimaging Research. 3 Credits.
Course covers research design and analysis issues for event-related potential (ERP) and functional magnetic resonance imaging (fMRI) studies. Repeated measures, statistical parametric mapping, principal components analysis, and independent components analysis techniques are covered. Both practical and theoretical aspects of these statistical techniques will be explored in Matlab environment. Matrix algebra recommended but not required. Prerequisite: PSYC 790 and 791 or equivalent are required.

PSYC 818. Experimental Research Methods in Social Psychology. 3 Credits.
Systematic discussion of the techniques of research in social psychology, with practice in the utilization of selected methods. Prerequisite: One course in social psychology in addition to introductory social psychology.

PSYC 819. Field and Evaluation Research Methods in Social Psychology. 3 Credits.
Basic principles and practices of field methods in basic and applied research in social psychology and related fields; relationships between field and laboratory studies; special emphasis on survey and evaluation research methods and study designs; client and respondent relationships; research and public policy.

PSYC 820. Advanced Child Development. 3 Credits.
A survey of the basic empirical research in the field of child development, covering intelligence, cognition, perception, personality, social behavior, and socialization processes. These literatures are integrated and their implications for social application are addressed. Prerequisite: A course in child development or equivalent.

PSYC 821. Women and Violence. 3 Credits.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. Research on the nature, prevalence, causes, and consequences of violence against women is discussed. (Same as WGSS 821.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

PSYC 823. The Psychology of Addictive Behaviors. 3 Credits.
The course will take an in-depth look at addiction processes using an interdisciplinary perspective. The course will cover processes that lead to the development of substance use disorders, as well as advanced topics in prevention and treatment. Addiction is a behavioral disorder, and the seminar will focus heavily on learning theory and conditioning processes that can yield problem substance use. Readings will be derived from a variety of sources, including both animal and human studies. This seminar is appropriate for graduate students from a variety of disciplines, as well as advanced undergraduate students who satisfy the prerequisite requirements. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in PSYC 533. Prerequisite: PSYC 104 or equivalent.

PSYC 825. Social Development. 3 Credits.
A lecture and discussion course in social development. It includes such topics as theoretical approaches to the study of social development, as well as the literature on family processes, peer relations, aggression and prosocial behavior, child abuse and neglect, family violence, child care, and the media. (Same as ABSC 825.) Prerequisite: A course in child psychology or development.

PSYC 831. Advanced Human Learning and Memory. 3 Credits.
An in-depth analysis of current research and theory. Focus will be on experimental methodology in these areas.

**PSYC 832. Clinical Health Psychology: Health Promotion and Disease Prevention. 3 Credits.**

An overview of the field of health psychology as applied to health promotion and disease prevention. Content areas include history and current research regarding behavioral and psychosocial risk factors for disease, as well as empirically supported assessment and therapeutic techniques for risk factor reduction and health promotion. Prerequisite: Graduate student in psychology or health-related fields, or permission of instructor.

**PSYC 833. Clinical Health Psychology: Acute and Chronic Illness. 3 Credits.**

An overview of the field of health psychology as applied to acute and chronic illness in adult, adolescent, and child populations. Content areas include psychological aspects of acute and chronic illness, including relevant empirically supported assessment and intervention strategies, adherence to medical regimens, pain, and enhancement of the psychologist's role in medical settings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

**PSYC 834. Clinical Health Psychology: Physical Aspects of Health and Disease. 3 Credits.**

An overview of physical manifestations of health and disease. Content areas include overview of anatomy and physiology of each body system, description of how deviations form normal anatomical development and physiological function result in common disorders, methods for distinguishing psychological from organic etiologies, indications of side effects of medications for common disorders, and description of roles of key members of health care team members. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

**PSYC 835. Clinical Practicum IV: Health. 3 Credits.**

Supervised assessment and treatment of individuals and families within a medical setting, as well as multidisciplinary consultation. Inpatient and outpatient clinical health psychology rotations may include pediatrics, oncology, pain, rehabilitation, and other health psychology related fields. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 970 and graduate student in clinical health psychology specialty.

**PSYC 836. Clinical Practicum V: Health. 3 Credits.**

Continuation of PSYC 835. Prerequisite: Graduate student in clinical health psychology specialty.

**PSYC 838. Assessment and Management of Chronic Pain Across the Life Span. 3 Credits.**

Focuses on chronic pain affecting a person’s life span from childhood to older adults. Topics include traditional versus modern biopsychosocial models along with treatments/measurements of chronic pain. In addition to medical and non-medical (mainly cognitive-behavioral) treatments for chronic pain. Also discussed will be experimental designs/determining significance in pain research and ethical/policy issues related therein. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

**PSYC 839. Palliative Care in Health Psychology. 3 Credits.**

Based on the biopsychosocial model, this course focuses on the current practice of palliative care in community and hospital settings by health care professionals. Classes will be discussion based, centered on current issues and controversies in care of the chronically ill and dying. Recent research will be highlighted, as will cultural perspectives on death. Students will be expected to identify applicable literature for presentation and class discussion, along with assigned readings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

**PSYC 840. Psychology of Women's Health. 3 Credits.**

A seminar devoted to examination of psychosocial and behavioral factors in women's health. Content areas include women and the health care system, social roles and health, gender differences, and similarities in morbidity and mortality, gynecologic health, chronic diseases, and health-related behaviors. Prerequisite: Graduate student in psychology or health-related field, or by permission of instructor.

**PSYC 841. Stress and Coping. 3 Credits.**

Theories and research on conceptualization, assessment, and effects of stress. Focus on coping processes and other determinants of adjustment to stressful conditions. Discussion of psychological interventions for managing stress and trauma. Prerequisite: Graduate student in psychology or related fields.

**PSYC 842. Specialized Health Psychology Practicum. 1-3 Credits.**

Specialized advanced practicum in clinical health psychology, with an area of emphasis mutually defined by student and instructor. Prerequisite: Consent of instructor.

**PSYC 843. Behavioral Pharmacology. 3 Credits.**

Addresses psychological and behavioral effects of drugs, including psychotropic medications. A central theme is that effects of drugs frequently cannot be characterized solely from a pharmacological perspective. Thus, emphasis will be placed on examining the interaction of pharmacological and behavioral variables. For example, how do psychological factors moderate responses to drugs? The nature of this area assumes some knowledge of general psychology, research methods, biology, chemistry, neurophysiology, and the nervous system. Specific course structure will be modified to suit student interests. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

**PSYC 844. Mental Health and Aging. 3 Credits.**

Reviews recent research and application in the field of mental health and aging. Theoretical perspectives appropriate for understanding mental health issues with increased age are discussed. The epidemiology, assessment, diagnosis, and treatment methods associated with a variety of mental health conditions are surveyed. The community mental health resources available for older adults are discussed as well as practically-related issues such as evaluations of functional independence and competency among older adults. Prerequisite: Graduate student in psychology or related health field, or permission of instructor.

**PSYC 845. Impression Formation and Interpersonal Behavior. 3 Credits.**

Intensive investigations of the processes involved in impression formation and of the effects of established impressions upon interpersonal communications. (Same as COMS 835.) Prerequisite: PSYC 670 or COMS 535.

**PSYC 846. Practicum in Clinical Child Psychology I. 1-3 Credits.**

Introductory practicum experience for the Clinical Child Psychology Program. Orientation to psychological evaluation and treatment of children, adolescents, and their families and initial development of professional self-assessment skills. Students acquire specific clinical competencies through shadowing cases, assisting with interpretation of test of intelligence and academic achievement, conducting behavioral observations in field settings, and performing co-therapy of cases presenting to the KU Child and Family Services Clinic. May be taken in
more than one semester. (Same as ABSC 846.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

**PSYC 847. Practicum in Clinical Child Psychology II. 1-3 Credits.**
Intermediate practicum experience for the Clinical Child Psychology Program. Development of specific competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire specific clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic. Students develop ability to identify specific treatment goals and select therapeutically interventions that are conceptually congruent with clients' presenting problems and are based on sound empirical evidence. Students also develop the ability to integrate and synthesize test results, interview material, and behavioral observations into coherent case conceptualizations. May be taken in more than one semester. (Same as ABSC 847.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

**PSYC 848. Clinical Practicum VI: Health. 3 Credits.**
Intensive clinical psychology practice, including group and individual supervision that may be taken either through Clinical Psychology or an approved site outside of the university. Focus is on the acquisition and demonstration of advanced therapy skills with a focus on acquiring core Health Psychology competencies. Graded on a satisfactory/unsatisfactory basis. Prerequisite: PSYC 835 and PSYC 836 and graduate student in clinical health psychology specialty.

**PSYC 849. Clinical Practicum VII: Health. 3 Credits.**
Continuation of PSYC 848. Graded on a satisfactory/unsatisfactory basis. Prerequisite: PSYC 848 and graduate student in clinical health psychology specialty.

**PSYC 850. Assessment I: Foundations of Psychological Assessment. 3 Credits.**
Introduction to the history, methods and theory underlying psychological assessment techniques and methods. Students learn to administer, score, and interpret mental status exams and intelligence tests for children, adolescents and adults. Structured diagnostic assessments are introduced and practiced. Psychological report writing is introduced and practiced. The psychometric theory underlying the construction and validation of personality assessment instruments is reviewed. Prerequisite: Graduate student in clinical psychology or consent of instructor.

**PSYC 855. Assessment II: Integrative Psychological Assessment. 3 Credits.**
Lecture, laboratory and field work. Students learn to administer, score and interpret various personality assessment instruments. Students apply skills acquired in previous coursework to write integrated psychological assessment reports based on anamnesis, structured interview data, intelligence tests, and both objective and projective personality assessment instruments. Prerequisite: PSYC 850 or consent of instructor.

**PSYC 860. Affective Science. 3 Credits.**
An in-depth analysis of current research and theory in affective bases of psychological science. Emphasis will be placed on basic research on emotion, culture, and psychopathology using a broad range of experimental, psychophysiological, and neural methods to test theories about affective psychological mechanisms underlying human behavior. Prerequisite: Graduate student in psychology or health-related fields.

**PSYC 863. Clinical Neuropsychology Across the Lifespan. 3 Credits.**
Reviews neural development and the brain-behavior relationships in intact, injured, and diseased brain systems. Details basic issues in clinical assessment and reporting of cognitive impairment resulting from developmental disorders, stroke, traumatic brain injury, and brain-disease. Selected topics include perception, speech, memory/dementia, judgment, and attention. Prerequisite: Graduate status and PSYC 961 or consent of instructor.

**PSYC 864. Clinical Neuropsychology. 3 Credits.**
Brain-behavior relationships in humans; structure and function of the brain; evaluation of function; the interpretation of neuropsychological data. Lecture and laboratory.

**PSYC 865. Advanced Psychological Assessment: Interview Based Techniques. 3 Credits.**
Lecture and fieldwork. Advanced clinical interviewing. Structured diagnostic interviewing. Coverage of specialized areas of clinical interviewing (e.g., motivational interviewing). Report writing focused on documentation of clinical and structured interviewing. Prerequisite: PSYC 855 or consent of instructor.

**PSYC 870. Cognitive Development. 3 Credits.**
A lecture/discussion course in cognitive development. The course will contrast the theory and research of Jean Piaget and his followers, with an information processing or cognitive psychology approach to issues. Topics include development of perception, attention and information getting; memory and metamemory; problem solving; discrimination learning and concept formation; and individual differences in cognitive styles and strategies. Prerequisite: A course in child psychology or development, a course in cognitive psychology, or consent of instructor.

**PSYC 872. Attention, Perception, and Learning in Infancy. 3 Credits.**
Coverage of the basic literatures on perceptual-cognitive behavior during the first three years of life, as assessed by measures of attention, perception, learning, and memory. Course material is approached from an information-processing framework.

**PSYC 875. Advanced Assessment: Integration of Assessment Techniques. 3 Credits.**
Lecture and fieldwork on selection, administration, scoring and interpretation and integration of data from personality and abilities tests. Focus on assessments includes history, theory and application in psychological assessment batteries. Emphasis on advanced training in objective personality assessment, projective personality assessment, psychometric theory and integrated report writing. Prerequisite: PSYC 855 or consent of instructor.

**PSYC 879. Applied Nonparametric Statistical Methods. 4 Credits.**
This course covers nonparametric statistical methods for testing hypotheses when the assumptions of ordinary parametric statistics are not met. Topics include a review of parametric statistics, sampling distributions, the logic of hypothesis testing, and motivations for using nonparametric techniques. In-depth coverage will be given to distribution-free procedures, sign tests, contingency tables, median tests, chi-square and other goodness-of-fit tests, rank correlations, randomness tests, Monte Carlo methods, resampling methods, tests of independence, 1-sample, 2-sample, and k-sample methods, permutation tests, and function smoothing and splines. There will be an emphasis on the theory underlying nonparametric methods. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 and 791 or equivalent, or consent of instructor.

**PSYC 881. Proseminar in Quantitative Behavioral and Social Sciences. 1 Credit.**
This course is an open forum discussion of issues, topics, and presentations in quantitative behavioral and social sciences. The course can be repeated for credit and is open to any graduate student in any discipline across the behavioral and social sciences.

**PSYC 882. Theory and Method for Research of Human Environments. 3 Credits.**
Conceptual and technical methods for analysis of behavioral environments; theory and research utilization of behavior settings and other ecobehavioral units. Prerequisite: Nine hours of social science including at least one course dealing with research methods and consent of instructor.

**PSYC 885. Altruism and Helping Behavior. 3 Credits.**
Review of contemporary research of prosocial behavior. Topics to be covered include the existence of altruism, why people do and do not help others, and the effect of institutional roles on the behavior of service professionals such as therapists, counselors, and social workers.

**PSYC 887. Factor Analysis. 4 Credits.**
This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

**PSYC 888. Diversity Issues in Clinical Psychology. 3 Credits.**
Review of individual differences pertaining to culture, ethnicity, race, gender, sexual orientation, age, etc., as these have an impact upon theory, research, assessment, and treatment issues in clinical psychology. (Same as ABSC 888.) Prerequisite: Graduate status in clinical psychology, or instructor permission.

**PSYC 889. Conceptual Issues in Human Sexuality. 3 Credits.**
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 889.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

**PSYC 890. Foundations of the Mind. 3 Credits.**
Advances in cognitive psychology have illuminated the way in which we understand mind and mental processes and have the power to affect how we conduct our lives as moral beings (e.g., Are human beings alone in the animal kingdom in possessing minds?). In this graduate course, we will cover key historical and social events that shaped the field; when and how cognitive psychology became a science; and future directions of studying the mind, especially in light of cognitive neuroscience. Students will analyze and critically evaluate cognitive psychological theory, empirical research, and practice in a historical context, as well as develop ideas, critique, and conclusions of their own on the accomplishments and prospects of the science of cognitive psychology. Readings and discussion include an analysis of significant theoretical, historical, and empirical work of topics in cognitive psychology, as well as the cognitive and brain sciences more generally.

**PSYC 891. Intelligence and Cognition. 3 Credits.**
This course concerns the nature of intelligence. Theory and research on cognitive abilities, reasoning, and complex problem-solving are surveyed. Special emphasis is given to contemporary cognitive ability research that applies both experimental and correlation methods to understand the nature of intelligence.

**PSYC 892. Test Theory. 4 Credits.**
This course begins with recommendations for how to write a test (with or without correct answers, for assessing a wide variety of constructs of interest in social and behavioral sciences), covers basics of classical test theory, and then emphasizes modern statistical methods for analyzing item data. Methods include factor analysis of categorical responses, methods for identifying measurement invariance (differential item functioning), and item response theory. Lectures and Laboratory. This course is offered at the 600 and 800 levels, with additional assignments at the 800 level. Prerequisite: PSYC 790/650 or equivalent, or consent of instructor.

**PSYC 893. Multivariate Analysis. 4 Credits.**
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

**PSYC 894. Multilevel Modeling. 4 Credits.**
Statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. There will be a heavy emphasis on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the social, educational, and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

**PSYC 895. Categorical Data Analysis. 4 Credits.**
Multivariate analyses of count data. Error models, statistical inference, loglinear models, logit models, logistic regression. Homogeneity, symmetry, and selected other topics. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

**PSYC 896. Structural Equation Modeling I. 4 Credits.**
Introduction to statistical methods for modeling latent variables. Topics include a review latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, Hierarchical CFA, and Multi-trait Multi-Method SEM. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

**PSYC 897. Master's Thesis in Clinical Child Psychology. 1-10 Credits.**
Supervised research experience completing thesis leading to master's degree. (Same as ABSC 897.)
PSYC 930. Research Seminar on Intimate Relationships. 3 Credits.
Consideration of current psychological theory and research on adult intimate relationships: friendship, dating, committed relationships, dissolution of committed relationships. Students will be expected to be involved in on-going empirical research in the area. Prerequisite: Graduate level courses in research design and statistics.

PSYC 933. Seminar: The Measurement of Attitudes. 3 Credits.
An examination of the concept of attitude and the methods developed to assess the various aspects of attitudes. Prerequisite: PSYC 578 or consent of instructor.

PSYC 934. Developmental Theory. 3 Credits.
An intensive study of traditional and recent developmental theories with an emphasis upon the role of heredity, early stimulation, reinforcement, and modification as each affects the course of the development of children.

PSYC 935. Seminar in Group Dynamics. 3 Credits.
Intensive examination of selected problems in the functioning of small groups. May be taken for two semesters.

PSYC 936. Group Therapeutic Techniques. 3 Credits.

PSYC 943. Advanced Practicum in Clinical Child Psychology III. 1-3 Credits.
Advanced practicum experience for the Clinical Child Psychology Program. Development of advanced competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., formal case presentation), and modeling of clinical competencies for junior students. Students will demonstrate the ability to implement empirically derived therapeutic interventions in consideration of individual differences, cultural values, and individual preferences. Students in external practicum sites will demonstrate an understanding of evidence-based models of consultation and provision of consultation to care providers in professional contexts. May be taken in more than one semester. (Same as ABSC 943.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 944. Advanced Practicum in Clinical Child Psychology IV. 1-3 Credits.
Advanced practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies in assessment, intervention, and consultation with children, adolescents, and their families through didactics, field experience, and supervision in the semester(s) prior to required clinical internship. Students demonstrate advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., integrated case presentation), and modeling of clinical competencies for junior students. Course requirements include the development of portfolios for demonstration of clinical competencies and application to clinical internships. May be taken in more than one semester. (Same as ABSC 944.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 946. Theories and Methods of Psychotherapy. 3 Credits.
Comparative examination and analysis of major theories and approaches to psychotherapeutic interventions, core principles of therapeutic change, scientific approaches to establishing treatment efficacy, current intervention issues. Prerequisite: Nine hours in graduate clinical psychology or consent of instructor.

PSYC 947. Advanced Practicum in Clinical Child Psychology V. 1-5 Credits.
Specialized practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies related to supervision and consultation in clinical psychology. With faculty supervision, students will develop and demonstrate the ability to provide effective supervision to less advanced students in the program in selected cases appropriate to the service setting. Further development of advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum, and modeling of clinical competencies for junior students. May be taken in more than one semester. (Same as ABSC 947.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 949. Evidence Based Practice in Psychology. 3 Credits.
This course provides an overview of theoretical and applied issues germane to evidence-based treatment in clinical psychology. The course will include an in-depth examination of several psychotherapy protocols which have been identified as empirically supported, with considerable attention accorded to implementation of techniques within the context of evidence-based practice.

PSYC 950. Clinical Supervision and Consultation: Theory & Research. 1 Credits.
Lecture, readings, and discussion of theory and research related to the practices of clinical supervision and consultation. Developmental and competency based approaches to supervision with exposure to other approaches. Professional issues, ethics, and multicultural aspects of supervision and consultation. Prerequisite: Previous or concurrent enrollment in PSYC 969 or consent of instructor.

PSYC 951. Clinical Supervision Practicum. 1-3 Credits.
Fieldwork in supervision under direction of instructor. Practice in supervision of clinical work, assessment, psychotherapy, and documentation. Prerequisite: Previous or concurrent enrollment in PSYC 950 and PSYC 969, or consent of instructor.

PSYC 955. Close Relationships and Adult Attachment: Theory, Research, and Current Controversies. 3 Credits.
Review of attachment theory literature and the research it has generated in clinical developmental, personality, and social psychology. The course will allow discussion of a wide range of issues including the evolution of behavioral systems that underlie close human relationships, the developmental roots of relational styles and affect-regulation processes, the role of mental representations in interpersonal behavior, and some of the attachment and close relationship processes involved in good and poor mental health. Prerequisite: Graduate standing or consent of instructor.

PSYC 956. Social Neuroscience. 3 Credits.
Acquaint students with the Social Neuroscience approach as well as recent findings using this approach. The course will focus on particular social phenomena and (a) evaluate the utility of current social neuroscience research examining these phenomena and (b) consider future experimental designs using the Social Neuroscience approach to further inform our understanding of each phenomenon. After being acquainted with foundational concepts, students will analyze findings in a number of core content domains (including emotions, emotion regulation, self, stereotyping, attitudes and beliefs, social decision making, cooperation, close relationships), focusing on neuroscience's contribution beyond traditional methods. Prerequisite: Graduate standing or consent of instructor.

PSYC 960. Advanced Psychopathology. 3 Credits.
Review of current nosology of adult psychopathological syndromes emphasizing development of diagnostic skills. Critical survey of recent research and theory related to the etiology, course, prognosis, and treatment of adult psychopathological conditions. Prerequisite: Graduate student status in clinical psychology, clinical child psychology, or counseling psychology.

PSYC 961. Biological Foundations of Psychopathology. 3 Credits.
A review of fundamental topics in the neurosciences and their relevance to selected psychopathological disorders. The fundamental topics are taken from genetics, neuroanatomy, neurophysiology, and neurochemistry. The disorders include schizophrenia, depression, anxiety disorders, Alzheimer's disease, Parkinson's disease, and Huntington's disease. Prerequisite: Graduate student in clinical psychology or consent of instructor.

PSYC 962. Advanced Personality. 3 Credits.
A survey of selected advanced topics in the area of personality. Includes review of theoretical and research issues in the area of personality. Prerequisite: Consent of instructor.

PSYC 963. Clinical Child Psychology Internship. 1 Credits.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by qualified clinical child psychology faculty and field staff clinicians. Required of all clinical child psychology program students. An intensive guided experience in application of clinical child psychology theory, methods, and practices. Integrates scientific and clinical aspects of field. (Same as ABSC 963.) Prerequisite: Completion of Ph.D. comprehensive examinations, graduate standing in clinical child psychology, and permission of clinical child psychology faculty.

PSYC 964. Clinical Practicum I. 3 Credits.
Lecture, laboratory and field work, and supervision appointment. Psychological evaluation and treatment of individuals, couples, families, and groups; supervised, progressive experience in psychological treatment and in the clinical evaluation of intellectual, personality, and social functioning. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: Graduate student in clinical psychology program.

PSYC 965. Clinical Practicum II. 3 Credits.
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964 or permission of instructor.

PSYC 966. Clinical Practicum III. 1-3 Credits.
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964 or permission of instructor.

PSYC 967. Psychotherapy with Families. 3 Credits.
Clinical approaches to marriage and family therapy. Intensive consideration of the theoretical positions, research findings, clinical methods, and technical problems in marriage and family therapy. Prerequisite: PSYC 946.

PSYC 968. Research Methods in Clinical Psychology. 3 Credits.
Systematic consideration of research methods in clinical psychology including identification of a research problem, selection of the research design and assessment strategies, and methods of evaluating the results. The principles, pitfalls, artifacts, biases, and sources of controversy in research in this area are also covered. Prerequisite: Graduate standing in clinical or counseling psychology.

PSYC 969. Clinical Practicum IV. 1-3 Credits.
Lecture, laboratory, field work, and supervision appointment. Advanced psychological treatment of the individual, couple, family, and group client; supervised, progressive experience in the clinical application of psychotherapeutic treatment methods with emphasis on the use of empirically supported interventions where possible. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 966 or consent of instructor.

PSYC 970. Clinical Practicum V. 3 Credits.
A continuation of PSYC 969. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 969 or consent of instructor.

PSYC 974. Clinical Internship. 1 Credits.
Clinical Internship.

PSYC 975. Clinical Child Psychology Internship. 3 Credits.
Clinical Child Psychology Internship.

PSYC 976. Clinical Psychology Internship. 1-3 Credits.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by clinical psychology faculty and field staff clinical psychologists. Required of all clinical psychology program students. An intensive guided experience in the application of clinical psychology theory, methods, and practices. An emphasis upon the relationships between scientific and
clinical functions. Integrations between research and clinical practice. Prerequisite: Completion of Ph.D. comprehensive examinations and consent of clinical psychology faculty.

**PSYC 975. Professional and Ethical Problems in Clinical Psychology. 3 Credits.**
Interprofessional relationships, case security, legal aspects, ethical code of practice, clinic administration, and problems in the clinical practice of psychology. Issues involving ethics in research will also be explored. Prerequisite: Consent of instructor.

**PSYC 976. Therapeutic Interventions with Children. 3 Credits.**
Clinical approaches to the therapeutic treatment of children with special emphasis on research findings and laboratory (practicum) experience. A survey of relationship therapies, operant strategies, system approaches, parent education and play therapy by the right therapist for a specific child with a particular problem. (Same as ABSC 976.) Prerequisite: Instructor permission.

**PSYC 977. Specialized Clinical Practicum. 1-4 Credits.**
Lecture; laboratory and field work, and supervision appointment. Specialized psychological services for the evaluation and/or treatment of the individual client or the group or the institution. Investigation of and experience in a specialized practicum area not covered in regular courses. Prerequisite: Students must consult with members of the clinical faculty and propose an acceptable project in advance of enrollment.

**PSYC 980. Special Problems in Psychology. 1-5 Credits.**
Investigation of a special research problem or directed reading in an area not covered in regular courses. Prerequisite: Consent of instructor.

**PSYC 981. Teaching Psychology. 1 Credit.**
Discussion of the problems and techniques of teaching psychology at the undergraduate level. A minimum of one credit of this course must be taken by all assistant instructors during the two semesters of the first year of their appointment in the department. Only three hours may count toward the Ph.D. degree.

**PSYC 982. Issues in Scientific Conduct. 3 Credits.**
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equality, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as CLDP 982 and SPLH 982.)

**PSYC 983. Methods & Professional Issues in the Cognitive & Brain Sciences. 3 Credits.**
Methodology, inferential problems, and professional issues in the cognitive and brain sciences. Prerequisite: PSYC 790 and PSYC 791 or consent of instructor.

**PSYC 986. Interprofessional and Integrated Behavioral Health Care. 3 Credits.**
Overview of current interprofessional care models in primary care. Review integrated behavioral health care approaches to common mental health disorders and approach to lifestyle issues, such as smoking, exercise and poor sleep, and how they impact health. Learn how medical and behavioral health services come together within primary care at an interprofessional level to deliver health care. Review research emerging on integrated and interprofessional care models. Prerequisite: Graduate student in psychology, health related field, or permission of instructor.

**PSYC 990. Methods for Clustering and Classification. 3 Credits.**
Statistical methods for identifying classes, clusters, and taxa. Topics include k-means, discriminant analysis, hierarchical clustering algorithms, additive trees, neural network models for clustering, latent class models, finite mixture models, and models for skills/cognitive diagnosis. Applications across the social and behavior sciences are emphasized. Prerequisite: PSYC 790 and PSYC 791 or equivalent, or consent of instructor.

**PSYC 991. Longitudinal Data Analysis. 3 Credits.**
Reviews and contrasts various statistical methods for the analysis of change. Course focuses on various techniques to analyze longitudinal (repeated-measures) data beyond the repeated-measures ANOVA framework. Techniques covered included latent change scores, latent difference scores, individual-differences modeling of latent residual and change scores, intra-individual differences modeling (e.g., growth curve, mixed modeling) and growth mixture modeling. Applications across the behavioral and social sciences are emphasized. Prerequisite: PSYC 896 or equivalent, or consent of instructor.

**PSYC 993. Seminar: _____. 1-5 Credits.**

**PSYC 996. Structural Equation Modeling II. 3 Credits.**
Continuation of PSYC 896. Advanced applications of modern methods for testing hypotheses on multivariate correlational data in the behavioral and social sciences. Topics include advanced confirmatory factor analysis, mediation and moderation among latent variables, latent growth curve modeling, and other latent variable mean and covariance structures analysis techniques. Applications across the behavioral and social sciences are emphasized. Prerequisite: PSYC 896 or equivalent, or consent of instructor.

**PSYC 998. Doctoral Dissertation in Clinical Child Psychology. 1-10 Credits.**
Research experience making original contribution to literature in clinical child psychology. (Same as ABSC 998.)

**PSYC 999. Dissertation. 1-12 Credits.**
Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis.

---

**Bachelor of Arts and Bachelor of General Studies in Psychology**

**Bachelor of Arts and Bachelor of General Studies in Psychology**

See here for more information ([https://catalog.ku.edu/liberal-arts-sciences/#undergraduatetext](https://catalog.ku.edu/liberal-arts-sciences/#undergraduatetext)) on the difference between a BA and a BGS.

Psychology examines all aspects of human behavior: Why do people behave the way they do? What makes people happy or unhappy? What are the relationships between the mind and the brain? Majoring in psychology allows you to explore the behavior of people and how their minds work, and then apply that knowledge to the modern world.

Students have many reasons for wanting to major in psychology. Some are simply fond of observing the behavior of others around them, fascinated with the results of their observations and curious to learn why people behave as they do. Some plan to become psychologists themselves or to enter one of the many professions where a background in psychology can be useful – such as, business, teaching, medicine, nursing, law, social work, the ministry, counseling, student services, child development, administration, or human resources.

Our department offers a wide variety of psychology courses (p. ___) from which to choose and additional experiences and opportunities are available beyond the classroom. There are many chances
to engage in extracurricular enrichment, including Psi Chi (http://psych.ku.edu/psi-chi), a research-focused Honors Program (http://honors.ku.edu/), research assistantships and volunteer opportunities in faculty labs (http://psych.ku.edu/undergraduate-research/).

Our scientific approach to understanding human behavior equips students with a solid foundation of analytical, research and interpersonal skills for careers in many fields with a human service emphasis.

Learn more about career paths available to psychology majors:
What are you going to do with that degree? (http://benschmidt.org/jobs/

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Requirements for the B.A. or B.G.S. Major**

**B.A. or B.G.S. Major in Psychology**

**Psychology Required Electives**

Majors must complete 9 hours, at least 6 of these hours must be completed with courses numbered 300 or higher.

**Psychology Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 37 hours of major courses. Note: No more than 3 hours of PSYC 480, PSYC 481, or PSYC 483 may count toward the minimum hours required for the major. (No more than a 6-hour combination of these courses may be counted toward the major.)

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Psychology can be found here: Psychology (p. 1737), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Psychology can be found here: Psychology (p. 1739), or by using the left-side navigation.

**Departmental Honors**

Students may inquire about departmental honors as soon as they are admitted to the undergraduate major. The department website (http://psych.ku.edu/babgs-honors/) has details. Participation usually begins in the senior year. A 3.5 grade-point average in psychology courses is required. Students follow individualized courses of study arranged through the director. Students who complete PSYC 460, individual research, and a paper under the direction of an instructor may graduate with departmental honors.

**BA in Psychology**

Below is a sample 4-year plan for students pursuing the BA in Psychology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120-121

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. An introductory course in Biology is required for the Biological Psychology course requirement in the major. Choose to take either BIOL 100 and BIOL 102, or BIOL 150 which will also fulfill the lab science requirement.
4. There are six core courses that must be taken for the PSYC major: PSYC 318/PSYC 319, PSYC 333/PSYC 334, PSYC 350/PSYC 351, PSYC 360/PSYC 361, one of the following: PSYC 370, PSYC 371, PSYC 375, PSYC 380, or PSYC 381 as well as one of the following: PSYC 465, PSYC 492, PSYC 545, or PSYC 592.
5. Both PSYC 200 and PSYC 210 are required for the major. Take whichever one has not already been taken.
6. LA&S 490: Internship Exploration is recommended for PSYC majors to fulfill Goal 6 Integration & Creativity. If LA&S 490 is not taken, be sure to choose another Goal 6 course, or approved experience, to fulfill the requirement.
7. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
8. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
BGS in Psychology

Below is a sample 4-year plan for students pursuing the BGS in Psychology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1. An introductory course in Biology is required for the Biological Psychology course requirement in the major. Choose to take either BIOL 100 or BIOL 150.
2. Hour requirements (incl. 45 Jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours.
3. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
4. There are six core courses that must be taken for the PSYC major: PSYC 318/PSYC 319, PSYC 333/PSYC 334, PSYC 350/PSYC 351, PSYC 360/PSYC 361. Also, one of the following: PSYC 370, PSYC 371, PSYC 375, PSYC 380, or PSYC 381 as well as one of the following: PSYC 465, PSYC 492, PSYC 545, or PSYC 592. PSYC 360 is recommended to take first because it is a major pre-requisite for the Diversity, Equity, and Ethical Behavior requirement.
5. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

### Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### IMPORTANT COURSE SEQUENCING NOTES:

Typically offered FALL ONLY - PSYC 333, PSYC 370, PSYC 375
Typically offered SPRING ONLY - PSYC 380
Bachelor of Science in Behavioral Neuroscience

B.S. in Behavioral Neuroscience Overview

Behavioral Neuroscience is a new major in Psychology at the University of Kansas. The concentration in behavioral neuroscience is designed for students with a focused interest in the biological bases of behavior and thought. The concentration is well suited for students who are contemplating professional or mainly research careers in medicine, pharmacology, veterinary medicine, animal science, neurology, neurobiology, and neuroscience. It is also suitable as a degree for those headed into other health-related fields or graduate school in other areas of psychology. As a behavioral neuroscience major, you will take courses in many different departments because, as you explore the neural basis of behavior and prepare to enter the neuroscience research field, you will need to acquire knowledge in the realms of chemistry, biology, psychology, statistics, and even computer science.

For additional information and advising for the BS Major please contact:

Dr. Michael Vitevitch
Director, BS Major in Behavioral Neuroscience
mvitevit@ku.edu

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.S. Degree

B.S. in Behavioral Neuroscience

In addition to degree and major requirements, all students must complete the KU Core.

### Behavioral Neuroscience Major Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 41-42 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by 31-32 hours of junior/senior level major coursework.

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BS in Behavioral Neuroscience. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Minor in Psychology

Why Minor in Psychology?

A Minor in Psychology will add a strong emphasis to any degree plan at the University of Kansas. Our courses offer real world and practical applications to enhance your major(s) of choice and demonstrate to graduate programs and employers that you bring a unique understanding of statistical and research methodology, critical analysis, and the complexities of human nature.

We invite you to explore our minor further by visiting our department site (http://psych.ku.edu/ba-behavioral-neuroscience-honors/) and our advisors site (https://psych.ku.edu/staff/). Students on the KU Edwards Campus in Overland Park should contact Alyson Germinder (agerminder@ku.edu).

Declaring a Psychology Minor

To declare the Psychology minor, you will need to meet with your advisor.

Requirements for the Minor

Students selecting this minor must complete each of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 104</td>
<td>General Psychology</td>
<td>3</td>
</tr>
<tr>
<td>or PSYC 105</td>
<td>General Psychology, Honors</td>
<td></td>
</tr>
</tbody>
</table>

Psychology Required Electives - Choice Electives

Satisfied by 2 courses chosen from:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 318</td>
<td>Cognitive Psychology</td>
</tr>
<tr>
<td>or PSYC 311</td>
<td>Cognitive Psychology, Honors</td>
</tr>
<tr>
<td>PSYC 333</td>
<td>Child Development</td>
</tr>
<tr>
<td>or PSYC 334</td>
<td>Child Development, Honors</td>
</tr>
<tr>
<td>PSYC 350</td>
<td>Psychological Disorders</td>
</tr>
<tr>
<td>or PSYC 351</td>
<td>Psychological Disorders, Honors</td>
</tr>
<tr>
<td>PSYC 360</td>
<td>Social Psychology</td>
</tr>
<tr>
<td>or PSYC 361</td>
<td>Social Psychology, Honors</td>
</tr>
<tr>
<td>PSYC 370</td>
<td>Behavioral Neuroscience</td>
</tr>
<tr>
<td>or PSYC 371</td>
<td>Behavior Neuroscience, Honors</td>
</tr>
<tr>
<td>PSYC 375</td>
<td>Cognitive Neuroscience</td>
</tr>
<tr>
<td>PSYC 380</td>
<td>Clinical Neuroscience</td>
</tr>
<tr>
<td>or PSYC 381</td>
<td>Clinical Neuroscience, Honors</td>
</tr>
</tbody>
</table>

Psychology Minor Remaining Electives

The remaining elective courses may include any undergraduate courses offered by the Department of Psychology including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 480</td>
<td>Independent Study</td>
</tr>
<tr>
<td>PSYC 481</td>
<td>Research Practicum</td>
</tr>
<tr>
<td>PSYC 483</td>
<td>Undergraduate Internship in Psychology</td>
</tr>
</tbody>
</table>

A maximum of 3 hours of PSYC 480 or PSYC 481 or PSYC 483, or any combination of these 3 courses totaling 3 hours may count toward the minor.

Psychology Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Hours in Residence

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Students may inquire about departmental honors as soon as they are admitted to the undergraduate major. The department website (http://psych.ku.edu/ba-behavioral-neuroscience-honors/) has details. Participation usually begins in the senior year. A 3.5 grade-point average in psychology courses is required. Students follow individualized courses of study arranged through the director. Students who complete PSYC 460, individual research, and a paper under the direction of an instructor may graduate with departmental honors.

Minor in Psychology

<td></td>
</tr>
</tbody>
</table>

Total Hours 120-121

1. Students are required to complete 4 hours minimum towards the Applied Research Experience. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

2. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

3. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

Departmental Honors

Students may inquire about departmental honors as soon as they are admitted to the undergraduate major. The department website (http://psych.ku.edu/ba-behavioral-neuroscience-honors/) has details. Participation usually begins in the senior year. A 3.5 grade-point average in psychology courses is required. Students follow individualized courses of study arranged through the director. Students who complete PSYC 460, individual research, and a paper under the direction of an instructor may graduate with departmental honors.

Minor in Psychology

Why Minor in Psychology?

A Minor in Psychology will add a strong emphasis to any degree plan at the University of Kansas. Our courses offer real world and practical applications to enhance your major(s) of choice and demonstrate to graduate programs and employers that you bring a unique understanding of statistical and research methodology, critical analysis, and the complexities of human nature.

We invite you to explore our minor further by visiting our department site (http://psych.ku.edu/ba-behavioral-neuroscience-honors/) and our advisors site (https://psych.ku.edu/staff/). Students on the KU Edwards Campus in Overland Park should contact Alyson Germinder (agerminder@ku.edu).

Declaring a Psychology Minor

To declare the Psychology minor, you will need to meet with your advisor.
Minor in Social and Behavioral Sciences Methodology

Minor in Social and Behavioral Sciences Methodology (SBSM)

Are you interested in psychology but have a different academic path in mind? Would you like to enhance your current major for more attention in the workforce?

The Minor in Quantitative Behavioral and Social Sciences is a program that provides undergraduate students a broadened and coordinated platform for advanced training in research methodology and practical research experience.

Students electing to minor in SBSM are provided with an opportunity to receive advanced training in quantitative and qualitative methods as applied in the behavioral and social sciences. This Minor allows students to develop graduate-level expertise in applied statistical methods. Students who graduate with this Minor acquire skills that will significantly enhance their career opportunities in areas related to their primary major (e.g., sociology, political science, psychology, a foreign language).

We invite you to explore this unique minor further by visiting our department site (http://quantitative.ku.edu/minor-requirements/) and meeting with our advisors (https://psych.ku.edu/staff/).

Declaring a Psychology Minor

To declare the Psychology minor, you will need to meet with your advisor.

Requirements for the Social and Behavioral Sciences Methodology Minor

Social and Behavioral Science Methodology Minor Course Requirements

Students selecting this minor must complete each of the following:

Prerequisite Knowledge for Minor

Satisfied by a course in elementary statistics with a B- or better grade (e.g., COMS 356; MATH 365, MATH 526; POLS 306; PSYC 210; PUAD 332; SOC 380). This prerequisite does not count towards the SBSM minor hours.

Undergraduate Certificate in Data Science

We are awash in data, models, and predictions. This flood of data has opened up seemingly unlimited possibilities: it allows businesses to make
informed recommendations for their clients, health officials to use text and image processing to track and classify health information, or community organizers to help spread the news and civic information through social networks. Whatever your field of study, you need to deal with data. This interdisciplinary data science certificate prepares students to harness data and help realize some of its many possibilities. Students will receive training in mathematics, computation, and statistics; data collection, management, description, and analysis; communication and project management; and ethics, problem-solving, and judgment and decision making.

**Undergraduate Certificate in Mind and Brain**

The Mind & Brain certificate provides students majoring in different fields with cross-disciplinary training in several ancillary fields that study various aspects of the mind and brain. The program requires two introductory courses from two different fields (LING, PHIL, PSYC), and two junior/senior level electives.

### Requirements for the Undergraduate Certificate in Mind and Brain

12 credit hours, of which at least 6 must be taken at the junior/senior level.

<table>

</tbody>
</table>

*Note: Individual courses, including special topics courses, can be approved as counting toward this requirement per the data science steering committee. They may contact the current chair of the data science steering committee to evaluate its potential inclusion as an elective course towards the certificate.

## Master of Arts in Psychology

### Department of Psychology Master's Overview

Our department does not admit terminal master's students.

We offer a single doctoral degree in psychology which may be earned in one of the following programs: brain, behavior, and quantitative science (http://bbq.ku.edu/), clinical psychology (https://psychology.ku.edu/clinical/), and social psychology (http://social.ku.edu/). Please visit our department website (https://psychology.ku.edu/) for more information on these programs. Students admitted to one of these programs enter with the expectation of continuing graduate study through the Ph.D.

All of our programs boast distinguished and award-winning faculty, notable research publications, and a deep foundation in the historical progress of psychological advances.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child graduate program, please visit their website (https://ccpp.ku.edu/).

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of
Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The department does not admit students seeking the terminal master’s degree, as students enter the department with the expectation of earning the Ph.D. For further information regarding the application process for our program, including department-specific deadlines and required supplemental documentation, please visit the Admissions ([https://psychology.ku.edu/psychology-graduate-program/](https://psychology.ku.edu/psychology-graduate-program/)) page of the department website, or contact the department's graduate program coordinator.

M.A. Degree Requirements

Within 2 years of first enrollment in the Ph.D. program, the student must earn at least 30 graduate credit hours, no more than 6 of which may be in courses offered by other departments. Courses required for the M.A. degree are determined in consultation with faculty of the program in which the student is enrolled as part of the process of development of an individualized program. No more than 6 thesis hours may be applied to the 30 hours required for the M.A. At least 50% of coursework for the master’s degree must be taken at the 700 level or above. The student must complete an acceptable thesis based on an empirical study and pass an oral examination. The oral examination may cover the thesis as well as more general material.

Doctor of Philosophy in Psychology

The Department of Psychology Graduate Program at the University of Kansas

We offer a single doctoral degree in Psychology which may be earned in one of the following programs: brain, behavior, and quantitative science, clinical psychology, and social psychology. Admission decisions are made separately within each program. Students admitted to one of these programs enter with the expectation of continuing graduate study through the Ph.D. as the department does not admit terminal master's students.

All of our programs boast distinguished and award-winning faculty, notable research publications, and a deep foundation in the historical progress of psychological advances.

Please visit our department website ([https://psychology.ku.edu/](https://psychology.ku.edu/)) for more information on these programs.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child graduate program, please visit their website ([https://ccpp.ku.edu/](https://ccpp.ku.edu/)).

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student.

Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The department does not admit students seeking the terminal master’s degree, as students enter the department with the expectation of earning the Ph.D.

In addition to the general admissions requirements ([http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=](http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=)) from the Office of Graduate Studies, applicants are required to have completed 15 credit hours in psychology or a closely related field, including a first course in statistics and a course in experimental psychology or psychological research methods.

Submit your graduate application online ([https://gradapply.ku.edu/apply/](https://gradapply.ku.edu/apply/)). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admission ([https://psychology.ku.edu/psychology-graduate-program/](https://psychology.ku.edu/psychology-graduate-program/)) page of the department website, or contact the department's graduate program coordinator.

Ph.D. Degree Requirements

Although graduate education is offered through separate programs, each student prepares an individualized plan of study in consultation with faculty members. These plans indicate how the student proposes to fulfill the requirements for the M.A. and Ph.D. degrees, including all general requirements and conditions.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Social Psychology

The social psychology program is an intensive research training experience seeking students who are committed to empirical, scholarly work. The major research interests of faculty members are stereotyping, prejudice, intergroup relations, person perception, close relationships, emotion and motivation, self and identity, culture.

In addition to course work, the central requirement of the program is continuous involvement in research. Research opportunities range from laboratory experimentation to field research. Depending on backgrounds and goals, students may move from one research setting to another or concentrate on a particular type of research throughout their training.

Requirements

Students are guided by individually tailored plans called contracts. These describe sequences of learning experiences developed by the student and a 3-member faculty committee. Beginning students are urged to enroll in basic courses in theory and research in social
psychology and statistics. The contract specifies students' long-range goals, specialties, other fields of psychology or related disciplines in which they will become proficient, proposed sequence of course work, research and teaching experiences they hope to obtain, plans for the M.A. proposal, comprehensive requirements and dissertation landmarks, and an approximate timetable. Contract details can be changed by agreement of the student and faculty committee.

The contract is a general framework that permits students' graduate work to be adapted to their interests and abilities and provides a standard against which progress can be assessed. Students' contracts must specify how the research skills and responsible scholarship requirement is to be met. The research skills requirement typically is met by completion of 6 graduate courses in statistics and research design. The responsible scholarship requirement is met via coursework as specified in the contract, completion of online tutorials, and attendance at ethics proseminars. All contracts must comply with other departmental and general rules including residence and time limits.

**Brain, Behavior, and Quantitative Science**

The Brain, Behavior, and Quantitative Science program provides instruction and research training for students pursuing careers in the academic, public, and private sectors that draw on the research and scholarly interests of the core faculty. These interests include behavioral economics, cognitive neuroscience, cognitive science, developmental science, learning, and quantitative and computational methods. Across all areas, a strong emphasis is placed on students developing a fundamental understanding of psychological theory, acquiring advanced statistical and computational skills and expertise, and learning how to apply this science to improve the development and/or well-being of individuals in society. Toward this end, the program requires both coursework and sustained involvement in the research endeavor, whether in the laboratory or in the field, and (where appropriate) active engagement in opportunities to translate basic science into practice or application.

**Requirements**

Students are guided by individually tailored plans, or contracts. These contracts are a mutual agreement between the student and a faculty committee that describe a set of learning experiences designed to allow the student to establish a career in the behavioral sciences whether that is within or outside of academia. In general, each contract specifies a set of courses tailored to each student that provides the student training in core substantive areas of psychology, quantitative and computational psychology, and training in translational science that are relevant to the goals of the degree on which the faculty and student agree. In addition, the contract specifies a student's long-term goals, planned research activities, other professional development necessary for the student to achieve his/her goals, a plan for the evaluation of progress in the program, and a timeline with proposed completion dates. As a part of this contract system students are evaluated annually on their progress within the program.

The contract is a general framework that permits students to adapt their graduate work to their interests, strengths, and weaknesses. It also provides a standard against which progress can be assessed. Students contracts must specify how the research skills and responsible scholarship requirement will be met; the research skills requirement typically is met by completion of a set of graduate courses in statistics and research design and work in a research laboratory, while the responsible scholarship requirement is met via (a) coursework as specified in the contract, (b) completion of online tutorials associated with obtaining IRB certification, and (c) attendance at ethics proseminars. All contracts must comply with other departmental and general rules including residence and time limits.

Students will complete 36-60 total credit hours including at least 18 credit hours of research. For more information on course requirements please visit the Brain, Behavior, and Quantitative Science website (http://bbq.ku.edu/) and view our curriculum (http://bbq.ku.edu/curriculum/) page.

**Clinical Science**

The clinical psychology program educates students to master knowledge in the field of scientific psychology so that they can generate new scientific knowledge and theory related to the field of clinical psychology, and can make independent contributions to the evolving base of skills and scientific knowledge required for clinical practice. All students take basic course work and practica in academic/research and clinical application. Students may take electives or practica to augment either aspect of training. About half the graduates pursue academic/research-oriented careers, and the rest undertake careers emphasizing applied activities (e.g., psychotherapy in community mental health centers or hospitals). Information is available from the graduate admission secretary or online (http://psych.ku.edu/clinical/).

**Major Area of Study in Health and Rehabilitation Psychology**

Work centers on the psychosocial and biomedical aspects of physical health, illness, and disability. Students apply the knowledge and techniques to problems of prevention, assessment, treatment, and rehabilitation. A detailed overview is available from the graduate admission secretary or online (http://psych.ku.edu/clinical/).

**Requirements**

Individual plans of study are designed to meet the standards established by state licensing boards and professional organizations. Individualization is achieved by selecting among alternate ways of meeting specific requirements and by selected electives or choosing the health and rehabilitation emphasis. The plan of study constitutes an agreement between the student and the entire clinical faculty. Program requirements:

**Research Skills and Responsible Scholarship**

The research skills requirement is met by completion of 2 graduate courses in statistics and 1 research design course. The responsible scholarship requirement is met by 1 course in research design, 1 course in ethics, and completion of online tutorials.

**Thesis and Dissertation (18 hours)**

The student must complete a master’s thesis based on an empirical study (minimum of 6 hours) and an empirical doctoral dissertation (minimum of 12 hours) and defend each in separate oral examinations. The thesis should be completed by the end of the second year and written in a form suitable for journal submission.

**Electives/Independent Study (6 credit hours, minimum)**

Because a minimum of 86 hours of graduate credit is required for the degree, the hours not included in the requirements above may be elective courses selected by the student and his or her advisor.

**Examinations: Task**

Each student must propose and demonstrate competence in one task or project. This task typically is done in the third year. It may be in applied/clinical, research/methodology, or program evaluation. A complete description is available from the clinic office or online (http://psych.ku.edu/clinical/).

Upon completion of all degree requirements except the dissertation and internship, the student must pass the oral comprehensive examination. This examination addresses a proposal for the dissertation as well as related, general questions in the field. It should be taken before completion of 4 calendar years for students entering with the B.A. and 3 years for students entering with the M.A. The faculty believes that the student is best served by completing the entire dissertation before the internship.

**Internship (3 hours)**

Students must complete a 12-month predoctoral internship at a setting approved by the clinical psychology faculty. Clinical students may complete their internships at any setting approved by the American Psychology Association.

---

**Graduate Certificate in Health Psychology**

**Benefits of a Graduate Certificate in Health Psychology**

Health psychology is involved in many professions, including psychology, educational psychology, allied health professions, exercise science, sociology, social welfare, and many others. Today’s health care is an inter-professional approach to service and health psychology is
part of patient contact and research being conducted in all health areas. Researchers and providers that have education and training in health psychology are in high demand with the changes in health care emerging. Our graduate certificate supplies broad and specific education in health psychology theory, research, and clinical applications. For more information regarding our program, please visit our graduate certificate program (https://psychology.ku.edu/graduate-certificate-health-psychology-overview/) website.

From the very beginning, health psychology has always been a “hybrid” discipline. Following from those interdisciplinary roots, the health psychology certificate would welcome students from a broad range of programs who have a variety of educational goals.

Students in Health Service Delivery Programs. Course offerings provide students the option of selecting classes that could be used to inform practice with patients with chronic or acute health problems. Practicum training is NOT offered, but didactic work can be used to inform training offered in other programs that prepare students to deliver mental or physical health related services (e.g., counseling psychology, social welfare, physical therapy, and nursing).

Students interested in Health Promotion. Course offerings provide students the option of selecting classes that could be used by students interested in careers related to health promotion or primary prevention, or careers that involve communication about health care (e.g., health, sport, and exercise science, public policy, health care administration).

Students interested in Transdisciplinary Research. Course offerings provide students the option of selecting classes with an applied focus in other domains of social science (e.g., social psychology, cognitive psychology, quantitative psychology, philosophy/ethics).

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Current Department of Psychology GRADUATE STUDENTS
Psychology department graduate students who wish to pursue a Health Psychology Graduate Certificate should consult with Dr. Nancy Hamilton. The Department will then request that the College/school add a certificate to a graduate degree-seeking student’s plan.

Current KU Graduate Students Outside of THE Department of Psychology
Current KU graduate students outside of the Department of Psychology who wish to pursue the certificate will complete an application (https://gradapply.ku.edu/apply/) through Graduate Studies. Students must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission.

Application requirements include:
• Statement of one’s interest in Health Psychology
• Current Degree Progress Report (DPR) or Advising Report; a current graduate GPA of 3.0 or higher is required
• Letter of support from home academic department

Non-KU Students
Non-KU graduate students must complete an application (https://gradapply.ku.edu/apply/) through Graduate Studies for admissions to the certificate program. Students must have earned a bachelor’s degree.

Application requirements include:
• One letter of recommendation from persons familiar with your academic work or potential for graduate school
• Official Graduate Record Examination (GRE) scores – University of Kansas institutional code is 6871.
• Transcripts from all institutions from which a degree was obtained, or any institutions attended post-bachelors. Copies of official transcripts that you have opened may be uploaded to the application online and used for admissions consideration. If you are admitted, sealed, or official electronic transcripts showing degree conferral, if applicable, must be provided by the end of your first semester at KU. Send official, sealed transcripts to:

KU Visitor Center
1502 Iowa St.
Lawrence, KS 66045
OR
graduateadm@ku.edu

• Applicants who indicate English is not their native language: Proof of English proficiency, (https://gradapply.ku.edu/english-requirements/) as required by the Office of Graduate Studies.

Application Deadline:
Applications for the program are accepted on a rolling basis. For more information on admission to a graduate certificate program, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Questions? Please contact our graduate program coordinator.

Health Psychology Graduate Certificate Program Requirements
Students must maintain a 3.0 or higher GPA in courses taken in the certificate program and maintain good standing in any University program of study for which they are enrolled.

For more information regarding program requirements and a complete list of approved electives, please visit our health psychology graduate
**Course Requirements:**

To complete the health psychology graduate certificate, 12 credit hours of graduate work must be completed, including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 832</td>
<td>Clinical Health Psychology: Health Promotion and Disease Prevention</td>
<td>3</td>
</tr>
<tr>
<td>PSYC 833</td>
<td>Clinical Health Psychology: Acute and Chronic Illness</td>
<td>3</td>
</tr>
<tr>
<td>PSYC 834</td>
<td>Clinical Health Psychology: Physical Aspects of Health and Disease</td>
<td>3</td>
</tr>
</tbody>
</table>

*Students who wish to take more than one of these courses may count the other course(s) as an elective.

**Elective Courses**

Certificate students must also complete three electives chosen from the program’s list of approved courses or petition the director and co-director to take an alternative course offered and not approved (example: pediatric psychology, courses at KUMC in MPH, or other areas).

**Total Hours**

*Only one course outside of the department of psychology can be included in these 12 credit hours.

**Department of Religious Studies**

**Why study religious studies?**

Religions have been and remain among the most powerful forces shaping human history. Their discourses and practices inform the way we perceive ourselves, those around us, and existence at large, even when we are not actively religious. They are central to understanding both what divides us and what unites us. The academic study of religion is a trans-disciplinary endeavor to understand from an objective perspective how religious traditions shape the lives of their adherents, without seeking to promote or disapprove any specific belief system. Religious Studies acquaints students with the diversity of religious cultures and introduces them to key methods and theories employed in their examination as "religion."

**Undergraduate Programs**

The undergraduate degree in the Department of Religious Studies is a research, analysis, and writing intensive program that features close work with faculty in small classroom settings. It seeks to develop a foundational knowledge of the world’s diversity of religious cultures and critical awareness of the ways in which religion shapes how we see and act toward ourselves, others, and the environment around us. Through the study of specific religious traditions and settings, students come away with a background that is invaluable to understanding and working with people of other cultures, whether in international business or simply as an informed global citizen.

**Graduate Programs**

**IMPORTANT:** The department is not accepting applications for the 2022-2023 academic year.

The department offers a graduate program leading to the Master's of Arts, as well as a Graduate Certificate program. Both programs enable students to pursue specialized advanced work that builds on the interests of the students in tandem with the specializations of the faculty. At all levels, interdepartmental and interdisciplinary cooperation is encouraged as important to a comprehensive program. Continuing research in religious studies is indispensable and intimately related both to teaching and to the wider exchange and advancement of knowledge.

A library of some 15,000 volumes, owned by the Friends of the Department of Religious Studies at the University of Kansas, is housed with and used by the department in Smith Hall's Moore Reading Room. The Department of Religious Studies at KU is also generally able to provide substantial financial support for students seeking the M.A. degree in the department. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in Religious Studies.

**Courses**

**REL 100. Introduction to Religious Ethics. 3 Credits.**

In this class we will learn how religious values are used to make ethical judgments, but we will also ask if and how those judgments influence practices or the behavior of people in their everyday lives. What causes a disjunction between norms and behavior? What is the tension between different values when deciding how to act? What about differences of opinion between and even within different religious traditions? What happens when societal expectations conflict with religious values or vice versa? Or when ethical reasoning leads to two different conclusions about how to act? Using specific cases, such as human rights, environmental and sexual ethics, race and violence students will learn how ethical reasoning unfolds in different religious traditions, what values support that reasoning and what happens in society when those values compete.

**REL 102. Violence and Religious Ethics. 3 Credits.**

This course will examine the connection between violence and religion from an ethical perspective. It will focus primarily on Jewish, Christian and Muslim ethical theories, which will be compared and applied to specific cases. We will also consider the ethical justifications for inter-religious conflict and the impact violence has had on targeted religious communities. The course will begin with an interrogation of the meaning of religion, ethics and religious violence-exploring questions like: Are religions inherently violent? Are theories derived from religious ethics used to justify violence? How are acts of violence morally justified? We will then consider these questions in more depth by comparing ethical theories within Judaism, Christianity and Islam, such as just war theory and jihad theory, to see whether religions encourage or seek to curb violence. In addition, each moral theory will be studied in light of specific historical or present cases. Case studies include the Crusades, Medieval Spain, ISIS, white nationalism in America, and recent killings in places of worship. The course will end on a positive note, by examining ethical theories within religions that promote peace, and comparing theories that justify peace with theories that justify war.

**REL 104. Introduction to Religious Studies. 3 Credits.**

This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Not open to students who have taken REL 105.
REL 105. Introduction to Religious Studies, Honors. 3 Credits. HR
This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 104.

REL 106. Asian Religions. 3 Credits. HR/NW H/W
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. (Same as EALC 105.)

REL 107. Jews, Christians, Muslims. 3 Credits. HR H
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Not open to students who have taken JWSH 109. (Same as JWSH 107.)

REL 124. Understanding the Bible. 3 Credits. HR H
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as JWSH 124.)

REL 125. Understanding the Bible, Honors. 3 Credits. HR H
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as JWSH 125.)

REL 130. Myth, Legend, and Folk Belief in East Asia. 3 Credits. NW H/W
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the world view of the ordinary peoples of East Asia. (Same as ANTH 293, EALC 130.)

REL 137. Religious Ethics and Moral Decisions. 3 Credits. H
When faced with ethical dilemmas how do we decide what is the right course of action? In what ways are our decisions affected by religious ideas about morality? In this class we examine the ethical problems we encounter every day in light of the solutions offered from various religious traditions. Cases to be examined include issues of life and death, war and peace, sexual morals, torture, the treatment of animals and the environment.

REL 138. Religion and Moral Decisions, Honors. 3 Credits. H
Honors version of REL 137. Introduction to religious viewpoints on individual and social ethics. This course examines the influence of religious thought on the making of moral decisions, and on value development in relation to specific moral issues. Open only to students who have been admitted to the University Honors Program or by permission of instructor.

REL 171. Religion in American Society. 3 Credits. HR H
A broad introduction to religion in American culture. This class emphasizes the well-established religions with large followings (viz. Judaism, Catholicism, Eastern Orthodoxy, and Protestantism). Some attention is also given to other religions active in America. Other topics covered include the relationship of church and state, religion in ethnic and racial minority groups, and women and religion. (Same as AMS 290.)

REL 177. First Year Seminar: _____ . 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Religious Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

REL 200. Study Abroad Introductions to: _____ . 1-4 Credits. H
This course is designed for the study of special topics in Religious Studies. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

REL 306. God, Buddhism, and the Good Life. 3 Credits. HR
This course introduces students to rigorous philosophic debates about some gripping existential questions surrounding the value of religion with God, a religion without God (focusing on Buddhism), and atheism. We will explore arguments for opposing answers regarding topics such as: whether atheism threatens the value of life; differences in how the self is viewed in Western and Eastern religions; and differences in how morality is grounded in these different traditions. We will examine the compatibility of atheism with Buddhism, and of Buddhism with belief in God. (Same as PHIL 306.) Prerequisite: A 100-level Philosophy course or permission of instructor.

REL 315. Miracles, Martyrs, and Heretics. 3 Credits. H/W
A study of ancient Christian culture and religion employing the popular categories of miracles, martyrs and heretics as entry points into the basic features of religious thought and practice. Prerequisite: An undergraduate course in the humanities.

REL 316. Ancient Magic and Witches. 3 Credits. H
This course provides a survey of magic and witchcraft in ancient Greece and Rome and interprets these practices through anthropological theories of magic and witchcraft. Emphasized topics may include magicians, witches, ghosts, spirits, demons, divination, and spells. This course considers issues such as how magic works, how people engage with the divine, the marginalization of magical practitioners, and the difference between magic, witchcraft and religion. All readings will be in English; no knowledge of any ancient languages is required. (Same as CLSX 316.)

REL 320. The Bible Then and Now. 3 Credits.
An introduction and survey of the history and interpretation of the Jewish and Christian bibles from their first formation to the present day. Students will explore the way the text, interpretation and format of the Bible have adjusted over time to accommodate religious, political, social and technological changes. Class will occasionally meet in the university’s rare book collection to study rare bibles. (Same as JWSH 320.)

REL 323. The Jewish World of Jesus. 3 Credits. H
An introduction to the figure of Jesus in his ancient Jewish context. What was Jewish life like in Jesus’s time? What did the early Jesus movement share with other forms of Judaism, and how did it differ? Evidence from the New Testament, the Dead Sea Scrolls, and other textual and archaeological sources will be used to explore the first-century Jewish society of which both Jesus and the first Christians were a part. (Same as JWSH 323.)

REL 325. Introduction to Judaism. 3 Credits. H
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as JWSH 325.)

REL 326. The Talmud: Its Origins, Nature, and Evolution. 3 Credits. H
This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries.
REL 327. Religious Zionisms. 3 Credits. H
A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required.

REL 329. Mystical Tradition in Judaism. 3 Credits. H
Mystical experiences and supernatural encounters in Jewish texts and tradition: Dybbuks and demons, angels and Elijah; from ecstatic enlightenment to succumbing to satan - Jewish texts and tradition are riddled with the arcane, the occult and the mystical. This course will mine the sources for a deep exploration of these aspects of Judaism that are most often obscured by "normative" teachings and practices, yet remain deeply embedded in the customs and beliefs of Jews around the world. (Same as JWSH 330.)

REL 330. Native American Religions. 3 Credits. NW H
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative (myth), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Not open to students who have completed REL 331.

REL 331. Native American Religions, Honors. 3 Credits. NW H
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative (myth), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have completed REL 330.

REL 333. Magic, Mysteries, Mummies in Ancient Egypt. 3 Credits. H
A study of ancient Egyptian culture and religion employing the popular categories of magic, mysteries and mummies as entry points into the basic features of religious belief and practice. Prerequisite: Any course in the Humanities or Social Sciences.

REL 334. Studies in Ritual: _______. 3 Credits. H
A study of ritual theory and a comparative study of ritual activity among selected religious traditions. May be repeated if topic varies.

REL 339. History of Religion in America. 3 Credits. H
Survey of the development of religious institutions and ideas in America from colonial times to the present. Emphasis is given to the mainstream religious traditions (Protestant, Catholic, Jewish), but attention is also paid to other phenomena, including nonwestern and native American religions.

REL 341. Mysticism. 3 Credits. H
The nature of mystical experience and reflection as expressed in selected mystical literature of the world's religions.

REL 345. Christianity. 3 Credits. H
An introductory examination of the history, doctrines, and practices of Christianity. Selected readings from the creeds, papal decrees, and major Christian theologians.

REL 350. Islam. 3 Credits. NW H/W
Islam's Origins, the prophet Muhammed, the Holy Koran, religious symbols and moral mandates, and historical developments. (Same as AAAS 349.)

REL 355. Muslim Societies. 3 Credits. H
In this class we study Muslim societies throughout the world. We examine variation between regions by looking at Muslim history and culture in different countries, such as Pakistan, Indonesia, Mali, Bosnia, Egypt, Yemen, and others.

REL 357. Women and Gender in Islam. 3 Credits. H
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. (Not open to students who have taken REL 657.)

REL 360. The Buddhist Tradition in Asia. 3 Credits. W
A historical and geographical survey of the Buddhist tradition from its origins in India to modern day developments in the three major regional Buddhist cultures of Southeast Asia, Tibet, and East Asia (China, Korea, and Japan). Prerequisite: Prior coursework in Asian studies or permission of instructor.

REL 373. The Supreme Court and Religious Issues in the United States. 3 Credits. H
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Not open to freshmen. (Same as HIST 373.)

REL 374. Religious Perspectives on Selfhood and Sexuality. 3 Credits. H
The nature of the self in its individual and social dimensions. Self experienced and expressed in sexuality. Survey of viewpoints in religious literature. (Same as WGSS 374.)

REL 376. American Judaism: Life and Thought. 3 Credits. H
A study of the conflicts between secularists and religiousists, between Zionists and synagogue representatives, and the patterns of compromise in American Jewish life. Questions of Americanism and Jewish survival, support for the State of Israel, and the bureaucratic structure of rabbincal training and philanthropy in America will be raised.

REL 379. Prophets and Profits. 3 Credits. H
The course will examine what religious traditions have had to say about controversies in economic ethics, focusing on how religious thinkers develop arguments on the basis of methods particular to their traditions. At the same time, it presents these traditions alongside secular approaches to economic ethics. Judaism, Christianity, Islam, Hinduism, and Buddhism will be considered, as will liberalism, Marxism, feminism, and natural law theory. Topics include economic inequality, wealth accumulation, licit and illicit commerce, slavery, and profit. Attention will also be paid to the methodological challenges of the study of the topic, which necessarily brings together political economy, ethics, economic history, and hermeneutics. Students will work with a diverse array of primary sources, from ancient scriptures to modern thinkers. The ultimate goal will be to understand how it is possible for thinkers within the same religious tradition to take differing stances on economic ethics, while considering themselves wholly grounded in tradition, depending on their relationships to the modern secular approaches we discuss.

REL 380. Philosophical Issues in Religion. 3 Credits. H
This course will consider, from a philosophical perspective, some of the problems in religion which arise in the development of "Natural Theology" broadly conceived. (Same as PHIL 350.)

REL 382. Jerusalem Through the Ages. 3 Credits. H
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading
of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, HIST 382 and JWSH 382.)

REL 387. Enemies of Ancient Israel. 3 Credits. H
An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called “Bad Guys of the Bible” using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as HIST 381 and JWSH 387.)

REL 400. Study Abroad Special Topics: ____. 1-4 Credits. H
This course is designed for the study of special topics in Religious Studies equivalent to courses at the 300 to 600 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

REL 404. Undergraduate Seminar in Religion: ____. 1-3 Credits. H
Topic, instructor, prerequisite, and hours of credit to be announced in Schedule of Classes. Particular subject matter may vary given semester responding to student interest and taking advantage of special faculty competence. Class discussion, readings, and individual projects.

REL 405. Directed Study in Religion. 1-4 Credits. H
Investigation of a special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences may be repeated, with maximum cumulative credit of four hours. Course taken for one hour of credit may not be used to fulfill College distribution requirement. Prerequisite: One previous course in religious studies at the University of Kansas and permission of instructor.

REL 425. Religion and Film. 3 Credits. H
An examination of the treatment of religious themes through the medium of film and an examination of the attitudes of religious organizations toward films and film production. Selected films will be viewed and analyzed from the perspectives taken within religious studies.

REL 450. Popular Culture in the Muslim World. 3 Credits. NW H
A study of pop songs, television, comics, and other idioms of popular culture from different parts of the Muslim world, with attention to Muslims’ sense of humor, tragedy, aesthetics, and pertinent issues of the day. (Same as AAAS 450.)

REL 477. Gender and Religion. 3 Credits. H
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as HUM 477 and WGSS 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender & Sexuality Studies.

REL 490. Senior Seminar in Theories and Methods. 3 Credits. H
A capstone course for religious studies majors to survey methods and theories in religious studies. Prerequisite: Religious Studies major or permission of the instructor.

REL 494. Research Internship. 1-3 Credits. S
Practical research experience in Religious Studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis. May be used as a component of the Research Experience Program (REP). Prerequisite: Permission of the instructor.

REL 499. Undergraduate Honors Research. 1-3 Credits. H
Required for Departmental Honors. May be taken more than once; total credit not to exceed 6 hours. Prerequisite: Open only to candidates for degree with departmental honors and with consent of the student's research supervisor.

REL 500. Readings in Non-English Religious Texts. 1-4 Credits. H
This course provides directed readings for students in either primary or secondary texts related to religious studies utilizing material in languages other than English.

REL 502. Special Topics in Religion: ____. 3 Credits. H
Topic and instructor to be announced in Schedule of Classes. May be offered by different instructors under different subtopics, and may be taken more than once if subject matter varies sufficiently. Prerequisite: One previous course in Religious Studies or instructor permission.

REL 507. Religion in India. 3 Credits. NW H/W
Survey of religious thought and practice in India from the Vedic period to the present.

REL 509. Religion in Japan. 3 Credits. NW H/W
Survey of religious thought and practice in Japan from the Jomon period to the present. (Same as EALC 509.)

REL 510. Religion in Korea. 3 Credits. W
Survey of religious thought and practice in Korea from the Three Kingdoms period to the present. Prerequisite: REL 106/EALC 105; EALC 104; or permission of instructor.

REL 511. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist architecture, painting, sculpture and illuminated scriptures in Korea from the 4th through the 19th centuries, with particular emphasis on their stylistic, geographical, social, devotional and literary contexts. Not open to students who have taken HA 361 or HA 561. Work requirements will be greater for graduate students. (Same as HA 561.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

REL 523. The Dead Sea Scrolls. 3 Credits. H
A study of the archeological evidence and texts from the Dead Sea area that provide primary evidence for Jewish religious belief and practice in the Greek and Roman periods (ca. 250 B.C.E. - 135 C.E.). Prerequisite: REL 124 or JWSH 124 or consent of instructor.

REL 525. Jews and Christians. 3 Credits. H/W
This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as JWSH 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor.

REL 557. Modern Islamic Reform Movements. 3 Credits. H
This course examines movements of renewal and reform in the Islamic world today. Also studies the conditions that gave rise to calls for reform throughout the Muslim majority world, as well as the impact reform movements have had on the practices and beliefs of Muslims today.

REL 560. Modern Jewish Thought. 3 Credits. H
This course examines how a number of prominent Jewish thinkers from the seventeenth century through the present have encountered and engaged the special challenges posed by modernity to religious traditions, including the challenge of science to the validity of miracles, the challenge of the secular state to religious authorities, and the challenge of historical studies to the integrity of scripture. Thinkers covered may include Spinoza, Mendelssohn, Frankel, Hirsch, Geiger, Hermann Cohen, Buber, Rosenzweig, Arendt, Scholtem, Leo Strauss, Levinas, and Derrida. Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor.

REL 570. Studies in Judaism. 3 Credits. H
A study of the major intellectual sources of the Jewish tradition from the Mishna, Talmud, Midrash, prayerbook, philosophers, the Zohar, and the Shulchan Aruch. Prerequisite: A course in Religious Studies or Jewish Studies numbered 300 or above.

REL 572. Judaism and Political Theology. 3 Credits. H
A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization, pluralism, democracy, and revolution. (Same as JWSH 562.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor.

REL 573. Judaism and Sexuality. 3 Credits. H
An exploration of the complex interactions of Judaism, Jewishness, and sexuality. The course serves as a basic introduction to traditional Jewish understandings of gender and power, love and sex, and the body and embodiment. It also introduces the changes undergone by this tradition under the impact of contemporary feminism and queer theory. Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor.

REL 585. New Religious Movements (Western). 3 Credits. H
A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, rooted primarily in Christianity and Judaism.

REL 586. New Religious Movements (Nonwestern). 3 Credits. H/W
A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, which have developed primarily from sources other than Christianity and Judaism.

REL 650. Sufism. 3 Credits. NW H
A survey of developments in Sufi (Islamic Mystical) thought, poetry, and ritual throughout Muslim history and across the Muslim world. Prerequisite: AAAS 349/REL 350 or permission of instructor.

REL 657. Women and Gender in Islam. 3 Credits. W
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. It examines how Muslim women have impacted these developments. (Not open to students who have taken REL 357.) (Same as AAAS 657.) Prerequisite: AAAS 349/REL 350, graduate standing, or permission of instructor.

REL 671. American Communes. 3 Credits. H
An examination of utopian communities in North America from the seventeenth century to the present. The course will survey the history, literature, and social dynamics of representative communal societies and movements including the Shakers, the Hutterites, the Oneida Community, Catholic religious communities, egalitarian communities, and other religious and secular communities.

REL 701. Approaches to the Study of Religion. 3 Credits.
An introduction to the various methods by which social scientists, historians, philosophers, and theologians study the meaning, influence, and significance of religion as an integral part of society and its cultural heritage. Prerequisite: Graduate student or permission of instructor.

REL 704. Russian Orthodoxy in Historical Perspective. 3 Credits.
This course examines Russian Orthodoxy as a religious system and the institution of the Russian Orthodox Church from its first appearance in Russia to the present. It focuses on beliefs and practices of the clergy and laity; institutional structures; the relationships between Church and State; interactions with non-Orthodox religious communities; responses to Soviet atheist policies; Orthodox influences on political theory, philosophy, literature, and the fine arts. (Same as REES 704.)

REL 724. Magic and Myth in Ancient Egypt. 3 Credits.
A study of the basic features of ancient Egyptian culture and religion, with an emphasis on magic, myth and archaeology. Prerequisite: An introductory course in Religious Studies or consent of instructor.

REL 731. Studies in Christianity. 3 Credits.
Study of religious thought, practice, and institutions of Christianity with an emphasis on the examination of primary documents.

REL 734. Studies in Ritual: ______. 3 Credits.
A study of ritual theory and a comparative study of ritual activity among selected religious traditions. May be taken more than once if topic varies.

REL 742. Seminar in Western Religious Thought: ______. 3 Credits.
An analysis of the thought of selected thinkers of the Christian, Jewish, and/or Islamic traditions. May be taken more than once if subject matter varies sufficiently. Prerequisite: REL 512, REL 539, or REL 570 or permission of the instructor.

REL 800. Readings. 1-4 Credits.

REL 827. Seminar in Religion, Text and Textuality. 3 Credits.
This seminar explores issues surrounding the production and use of authoritative religious texts (sacred texts) in religious traditions, including such topics as scripturality and canon, scriptural hermeneutics, and material and ritual dimensions of scriptural practice. Specific case studies and content to be selected by the instructor.

REL 837. Seminar in Religion, Media and Performance. 3 Credits.
This seminar explores aspects of performance and the media of performance in lived religion, which might include such topics as ritual, the body, mass media and the internet, and visual and material culture. Specific case studies and content to be selected by the instructor.

REL 847. Seminar in Religion, Society and Social Change. 3 Credits.
This seminar explores issues regarding the social dimensions of religiosity/lived religion, ranging from aspects of religious institutionalization, authority, and normativity to alternative religiousities and alterity. Specific case studies and content to be selected by the instructor.

REL 857. Seminar in Religious Subjectivity, Experience, and Narrative. 3 Credits.
This seminar explores issues regarding the subjective and experiential dimension of lived religiosity, including such things as religious experience and mysticism, modes of personal religious expression and embodiment, and dynamics of personal and collective religious narrative and identity. Specific case studies and content to be selected by the instructor.

REL 899. Thesis. 1-3 Credits.

Bachelor of Arts and Bachelor of General Studies in Religious Studies

The undergraduate degree in the Department of Religious Studies is a research, analysis, and writing intensive program that features close work with faculty in small classroom settings. It seeks to develop a foundational knowledge of the world’s diversity of religious cultures and critical awareness of the ways in which religion shapes how we see and act toward ourselves, others, and the environment around us. Through the study of specific religious traditions and settings, students come away with a background that is invaluable to understanding and working with
people of other cultures, whether in international business or simply as an informed global citizen.

Career Opportunities

Religious studies majors and minors develop expertise and skills that serve them well wherever life takes them. Our graduates have been successful in many different areas. Studying religion provides a solid foundation for work in fields as diverse as journalism, law, politics, nongovernmental organizations, ministry, and education. No matter what their intended careers, students benefit from the critical reading, writing, and analytical skills that the academic study of religion instills.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Admission to the Major

There are no departmental prerequisites for admission to the major. However, once the major is declared, careful attention should be paid to the requirements of the major itself.

Religious Studies Program

The Religious Studies major consists of required courses, distribution requirements, and electives. The required introductory course and capstone seminar focus on theoretical and methodological issues in the study of religion. Distribution requirements encourage students to approach the study of religion from a variety of angles, from a focus on individual religions to the interaction between religions in specific regions to the exploration of comparative issues and themes. Electives allow students to tailor their course of study to their specific interests and pursue a depth of knowledge in particular aspects of the study of religion.

Requirements for the B.A. or B.G.S. Major

The major consists of at least 27 hours in religious studies. 15 hours must be in courses numbered 300 and above, and 8 of these junior/senior hours must be completed in residence at KU. The 27 hours may include no more than 12 transfer hours, no more than 12 hours from study abroad, and no more than 15 hours in combination of the two.

Religious Studies Required Electives
Satisfied by 4 courses (12 hours) within, or cross-listed with, the Religious Studies Department course offerings.

**Capstone Experience**
Satisfied by:
- REL 490 Senior Seminar in Theories and Methods

**Religious Studies Major Hours & Major GPA**
While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

### Major Hours
Satisfied by 27 hours of major courses.

### Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major, of which 9 must be at the junior/senior level (300+).

### Major Junior/Senior (300+) Hours
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Religious Studies can be found here: Religious Studies (p. 1755), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Religious Studies can be found here: Religious Studies (p. 1756), or by using the left-side navigation.

### Departmental Honors
To be eligible for honors in religious studies, an undergraduate student must have a minimum grade-point average of 3.5 in the department. The student must also complete and defend an individual research project, as evidenced by completion of at least 3 hours of REL 490: Undergraduate Honors Research with a grade of B or better. Interested students should contact the Undergraduate Director for more information.

### BA in Religious Studies
Below is a sample 4-year plan for students pursuing the BA in Religious Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BGS in Religious Studies

Below is a sample 4-year plan for students pursuing the BGS in Religious Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
1 Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

2 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Religious Studies

The undergraduate minor in the Department of Religious Studies is a research, analysis, and writing intensive program that features close work with faculty in small classroom settings. It seeks to develop a foundational knowledge of the world’s diversity of religious cultures and critical awareness of the ways in which religion shapes how we see and act toward ourselves, others, and the environment around us. Through the study of specific religious traditions and settings, students come away with a background that is invaluable to understanding and working with people of other cultures, whether in international business or simply as an informed global citizen.

Career Opportunities

Religious studies majors and minors develop expertise and skills that serve them well wherever life takes them. Our graduates have been successful in many different areas. Studying religion provides a solid foundation for work in fields as diverse as journalism, law, politics, nongovernmental organizations, ministry, and education. No matter what their intended careers, students benefit from the critical reading, writing, and analytical skills that the academic study of religion instills.

Religious Studies Minor

The Religious Studies minor consists of a required course, distribution requirements, and electives. The required introductory course focuses on theoretical and methodological issues in the study of religion. Distribution requirements encourage students to approach the study of religion from a variety of angles, from a focus on individual religions to the interaction between religions in specific regions to the exploration of comparative issues and themes. Electives allow students to tailor their course of study to their specific interests and pursue a depth of knowledge in particular aspects of the study of religion.

</tr>
</thead>
</table>

Religious Studies Minor Hours & Minor GPA

While completing all required courses (above), minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours

Satisfied by 18 hours of major courses.

Minor Hours in Residence

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

---

**Master of Arts in Religious Studies**

**Why study Religious Studies?**
Religions have been and remain among the most powerful forces shaping human history. Their discourses and practices inform the way we perceive ourselves, those around us, and existence at large, even when we are not actively religious. They are central to understanding both what divides us and what unites us. The academic study of religion is a trans-disciplinary endeavor to understand from an objective perspective how religious traditions shape the lives of their adherents, without seeking to promote or disprove any specific belief system. Religious Studies acquaints students with the diversity of religious cultures and introduces them to key methods and theories employed in their examination as "religion."

For those interested in working towards a Ph.D. in Religious Studies and a career in academics, or embarking on an equivalent level of training in a related profession, the Department of Religious Studies is equipped to help the individual student acquire the skills needed for advanced levels of study, whether it be specialized work in languages, methodological approaches, or area studies. The study of religion being an inherently interdisciplinary field, and department faculty share synergies with colleagues and programs across the campus that enable students to seek specialized training in a diversity of regions, cultures, and approaches to the study of religion. Our faculty is committed to help students articulate the intellectual and professional objectives that have brought them to study of religion, and to acquire the training to see these goals to fruition.

The Department of Religious Studies at KU is able to provide substantial financial support for students seeking the MA degree.

---

**Admission to Graduate Studies**
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

---

**Graduate Admission**
Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/) set by Graduate Studies. A Bachelor’s degree in Religious Studies is not required for admission, but the department expects applicants to demonstrate experience in the humanities and social sciences.

For all domestic or international M.A. applicants, please check the application requirements through the Religious Studies website (https://religiousstudies.ku.edu/).

Potential students must submit a complete online graduate application (https://gradapply.ku.edu/apply/). For additional questions regarding program requirements and application processes, please contact the Director of Graduate Studies, Dr. Jackie Brinton (https://religiousstudies.ku.edu/jacqueline-brinton/). Applicants may also contact the department directly:

**M.A. Degree Requirements**
The department offers thesis and non-thesis M.A. options. The requirements for these are:

1. 30 (thesis) or 33 (non-thesis) graduate credit hours, chosen in consultation with the student’s advisor or the Graduate Director.
   - Coursework must include the following:
     - (a) REL 701 Approaches to the Study of Religion (3 hrs)
     - (b) Three graduate seminars (courses numbered 700 or above, excluding REL 800 Readings and REL 899 Thesis), of which two must be chosen from the following set of theory and method-oriented seminars (9 hrs):
       | Code | Title                                           | Hours |
       |------|-------------------------------------------------|-------|
       | REL 727 | Seminar in Religion, Text and Textuality | 3     |
       | REL 737 | Seminar in Religion, Media and Performance   | 3     |
       | REL 747 | Seminar in Religion, Society and Social Change | 3     |
       | REL 757 | Seminar in Religious Subjectivity, Experience, and Narrative | 3   |
     - (c) One course focusing on Western Religious Traditions and one course focusing on Non-Western Religious Traditions (see Table above). (6 hrs)
     - (d) At least 12 hours (4 courses) in an articulated concentration of the student’s own design. These courses may overlap with those in (b) and (c) above.
     - (e) For thesis students, 1-3 credit hours of REL 899 Thesis.
     - (f) A total of at least 18 (thesis) or 21 (non-thesis) graduate credit hours in Religious Studies, including (a)–(e) above, plus electives if applicable. Remaining hours may be taken outside of the department.

2. A final examination:
(a) For the thesis option, the student must write and orally defend a thesis that meets minimum department and University requirements.

(b) For the non-thesis option, the student must produce and orally defend a research portfolio.

**Graduate Handbook:** Further information on fulfillment of degree requirements and other department and University policies and procedures can be found in the Department of Religious Studies Graduate Handbook.

**Graduate Certificate in Religious Studies**

The Graduate Certificate in Religious Studies (https://religiousstudies.ku.edu/graduate-certificate-religious-studies) is designed to provide students with a solid grounding in the academic study of religion, including exposure to key theoretical and methodological issues within the interdisciplinary field of Religious Studies. The certificate program enables students to integrate Religious Studies methodologies, as well as deeper knowledge of particular religious traditions, into their own academic interests or professional training.

Completion of the certificate in Religious Studies represents an additional credential for graduate students from a variety of academic disciplines and fields of study. The certificate will enhance the qualifications of students seeking careers in research and teaching, journalism, the nonprofit sector, government, the arts, or any other field in which understanding the breadth of human cultural diversity is useful.

Enrollment in the program is open to students admitted to a regular KU graduate program as well as students who are not currently enrolled at KU.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Eligibility criteria for admission to the graduate certificate program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study). Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements) set by Graduate Studies. A Bachelor’s degree in Religious Studies is not required for admission, but the department expects applicants to demonstrate experience in the humanities and social sciences.

For all applicants (current graduate students and non-KU students), please check the application requirements on the Religious Studies website (https://religiousstudies.ku.edu). Potential students must submit a complete online graduate application (https://gradapply.ku.edu/apply/). For additional questions regarding program requirements and application processes, please contact the Director of Graduate Studies, Dr. Jackie Brinton (https://religiousstudies.ku.edu/jacqueline-brinton). Applicants may also contact the department directly:

**The University of Kansas**

**Department of Religious Studies**

Smith Hall, Room 109A
1300 Oread Ave. | Lawrence, KS 66045

785-864-4341 | rstudies@ku.edu

The Graduate Certificate in Religious Studies requires 12 hours of coursework:

- REL 701 Approaches to the Study of Religion (3 hrs);
- 9 additional hours of graduate-level coursework in Religious Studies.

Up to 3 hours of appropriate coursework in other departments may be substituted in consultation with the Graduate Director.

**Department of Slavic, German, and Eurasian Studies**

The department offers three degrees: the B.A., the M.A., and the Ph.D. The Bachelor of Arts degree program offers fundamental training in language, linguistics, second language acquisition, as well as interdisciplinary studies in the areas of Russia, German-speaking Europe, Eastern Europe, as well as Eurasia.

Our interdisciplinary department is deeply invested in helping students navigate a geopolitically complex and evolving world through rigorous language study, paired with the interdisciplinary study of culture, linguistics, literature, history, political science, art history, and other disciplines. Our program is characterized by interdisciplinary flexibility, a variety of co-curricular activities, and personalized academic advising and mentoring. On and off we teach 10 languages on a regular basis and expose students to major European and Eurasian languages like Russian and German, as well as specialized training in unique less commonly taught languages like Persian, Polish, Serbo-Croatian and others. All these languages, within the interdisciplinary curriculum of SGES can open up new career pathways for students, and help them bring tangible skills and a unique global approach to their careers in a range of fields from business, to law, medicine, intelligence, as well as traditional academic paths. Our students tend to have a second major or a minor in foreign languages, within the interdisciplinary curriculum of SGES can open up new career pathways for students, and help them bring tangible skills and a unique global approach to their careers in a range of fields from business, to law, medicine, intelligence, as well as traditional academic paths. Our students tend to have a second major or a minor in
such as Global & International Studies, History, Business, Environmental Studies, Music, Microbiology, and Linguistics.

Our graduates have pursued their passion for language and culture in many ways: working for a non-profit organization affiliated with the U.S. Department of State; translating for a medical software company; intelligence; serving on the human resources team of a global sporting goods company; politics; teaching high school; working as copy editor of a newspaper; and pursuing academic graduate work, social welfare, law, and speech pathology.

The department offers several study abroad programs to Germany, Russia, Ukraine.

Graduate training at the Masters and Doctoral levels focuses on Russian literature and culture, Russian, East European, and Eurasian Studies, Slavic linguistics, and/or Slavic language pedagogy.

Working closely with KU’s Center for Russian, East European, and Eurasian Studies (CREES), the department offers a variety of Slavic-related events throughout the year, including visiting distinguished lecturers, exhibits, and musical and theatrical performances. Students participate in an active Slavic East European and Eurasian Studies Club, and multiple language tables.

The Max Kade Center for German-American Studies houses collections on German ethnic culture in the United States and fosters scholarship and student engagement in German-American and transatlantic studies. For further information, contact german@ku.edu.

Undergraduate Programs

The undergraduate major in Slavic, German, & Eurasian Studies prepares students to pursue a range of careers connected with Russia and Central Europe, including those related to international work in business, government, nonprofit organizations, etc. The undergraduate major serves equally as solid preparation for graduate study in Slavic languages and literatures and related fields and for entrance to professional schools such as law or journalism. Students learn these languages to pursue careers with international dimensions; enhance job opportunities; connect with their heritage, family, and communities; explore other literatures and cultures; and pursue personal interests.

The undergraduate program gives students solid functional language skills in speaking, reading, listening, and writing. Students develop the strategies and linguistic awareness to continue language study throughout their lives. The program acquaints undergraduates with the most significant works of the literature and culture of the Slavic region and gives them the tools and frameworks necessary to understand, analyze, and critique those works and place them in their cultural context. Students work with sources in English and in the original languages to develop transferable reading and analytical skills.

The department strongly encourages students to plan a substantial study abroad experience (at least a summer but preferably a semester or an academic year) as part of the major. Study abroad experience contributes to mastery of the language and facilitates students’ encounters with the people, practices, and attitudes of the culture in ways that can never be replicated on an American university campus.

Placement

Students may establish eligibility for enrollment in the second course in Polish, Russian, or Bosnian/Croatian/Serbian by having earned college credit in the first course in that language or by having studied the language in high school. Students with previous study should contact the department to arrange a consultation about enrollment at the appropriate level.

Retroactive Credit

Students with no prior college or university Russian course credit are eligible for retroactive credit according to this formula:

- 3 hours of retroactive credit are awarded to a student with 2 or 3 years of high school Russian who enrolls initially at KU in a third-level Russian course (RUSS 204) and receives a grade of C or higher.
- 6 hours of retroactive credit are awarded to a student with 3 or 4 years of high school Russian who enrolls initially at KU in a fourth-level Russian course (RUSS 208) and receives a grade of C or higher.
- 9 hours of retroactive credit are awarded to a student with 4 years of high school Russian who enrolls initially at KU in a Russian course with a fourth-level course as a prerequisite and receives a grade of C or higher.

Courses for Nonmajors

Some courses in Slavic literatures and cultures are taught in English and fulfill various goals and learning outcomes related to the KU CORE, as well as existing B.A. requirements in the humanities and non-Western culture.

Students may fulfill the College language requirement for the B.A. degree by taking 2 years in one of the following languages: Russian, Polish, Bosnian/Croatian/Serbian, Slovene, Ukrainian, or Turkish.

Courses are available in Russian for special purposes (Russian for Reading, Russian for the Professions). RUSS 110 Intensive Elementary Russian (10 credit hours) frequently is offered in the summer.

Graduate Programs

The department offers programs leading to Master of Arts and Doctor of Philosophy degrees in Slavic Languages and Literatures.

Master of Arts

The Master of Arts degree in Slavic and Eurasian Languages & Literatures provides students with foundational knowledge of the language, literature, culture, and linguistics in a region of study (Russian, Polish, Bosnian-Croatian-Serbian). Working in a collegial and supportive environment, M.A. students extend their foundational knowledge of the field, while being encouraged to grow intellectually and develop new and innovative interpretive frameworks. Some of the work done at the M.A. level includes: reading key literary works in their historical, cultural, stylistic, and genre contexts; familiarization with literary theory; work on professionalization and job market readiness; learning technological and Digital Humanities skills; language testing and coursework to improve language capacity.

Doctor of Philosophy

Building on the M.A. foundational base, the KU Ph.D. degree program encourages students to develop their particular intellectual interests in collaboration with KU faculty in their areas of specialization. Ph.D. students also learn a second Slavic language and develop knowledge of a secondary field. For the secondary field, students are encouraged to choose from philosophy, linguistics, religion, history, theater and cinema, literary theory, comparative literature, and folklore.
Two concentrations are offered in the Ph.D. Program:

- Russian Literature
- Slavic Linguistics (including language pedagogy)

Ph.D. students who focus their studies on Russian literature and Slavic linguistics have a full-service curriculum from which to choose their courses. Ph.D. Doctoral students who wish to pursue a Ph.D. concentration in another literature that the department offers, such as Bosnian/Croatian/Serbian, Polish, or Ukrainian may develop an individualized program of study in consultation with faculty.

Ph.D. students interested in Russian culture, intellectual history, or Slavic folklore pursue their studies through the Russian literature Ph.D. concentration.

**Departmental Funding**

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year, .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Programs overview (http://slavic.ku.edu/ma-slavic-overview/) page of our departmental website.

**Additional Funding**

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/ku-funding/) for KU graduate students.

**Graduate Non-Degree Seeking Status**

Students who are interested in enrolling in graduate-level coursework in the Department of Slavic and Eurasian Languages & Literatures without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s webpage (http://slavic.ku.edu/nds-overview/) for further details.

**Courses**

**BCRS 104. Elementary Bosnian/Croatian/Serbian I. 5 Credits. U F1**

Beginning language course. Development of basic communicative and cultural competencies with interactive approach. Students acquire communicative skills for elementary personal and social needs. They are introduced to the basic Bosnian/Croatian/Serbian language rules and to the cultural context in which Bosnian/Croatian/Serbian discourse occurs. Through regular engagement with authentic multimedia materials they learn to recognize differing aspects of Bosnian/Croatian/Serbian and American life, culture, and values.

**BCRS 105. Elementary Bosnian/Croatian/Serbian I, Honors. 5 Credits. U F1**

Similar to BCRS 104 but with additional work aimed at accelerating the student’s progress to proficiency and widening understanding of cultural context. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor.

**BCRS 108. Elementary Bosnian/Croatian/Serbian II. 5 Credits. U F2**

Second-semester language course, continuation of BCRS 104. Further development of basic communicative and cultural competencies with interactive approach. Students continue the acquisition of communicative skills for elementary personal and social needs and their introduction to the basic Bosnian/Croatian/Serbian language rules and cultural context in which Bosnian/Croatian/Serbian discourse occurs. Through regular engagement with authentic multimedia materials they learn to recognize differing aspects of Bosnian/Croatian/Serbian and American life, culture, and values. Prerequisite: BCRS 104 or BCRS 105, or placement by examination.

**BCRS 109. Elementary Bosnian/Croatian/Serbian II, Honors. 5 Credits. U F2**

Continues BCRS 105. Similar to BCRS 108 but with additional work aimed at accelerating the student’s progress to proficiency and widening understanding of cultural context. Prerequisite: BCRS 104 or 105. Open only to students admitted to the University Honors Program, or by permission of instructor.

**BCRS 150. Beginning Bosnian/Croatian/Serbian I. 3 Credits. H**

Fundamentals of B/C/S grammar, reading, speaking, and writing. Introduction to the cultural context in which B/C/S discourse occurs. Online course, designed to accommodate the needs of students regardless of age, educational background, or occupation who want to acquire basic communicative skills in B/C/S. No previous knowledge of BCS or other foreign languages required. The course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Not open to students with credit in BCRS 104 or BCRS 105.

**BCRS 177. First Year Seminar: _____. 3 Credits. U**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Bosnian/Croatian/Serbian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**BCRS 204. Intermediate Bosnian/Croatian/Serbian I. 3 Credits. U F3**

Second-year language course. Further development of communicative and cultural competencies with a content-based, interactive approach. Students develop the ability to understand and produce short written and spoken texts in BCS through engagement with a variety of authentic materials representative of cultural diversity of the studied area. They contrast and compare features of individual BCS-speaking countries and their cultures as well as differing aspects of B/C/S and American life, culture, and values. Prerequisite: BCRS 108 or permission of the instructor.

**BCRS 205. Intermediate Bosnian/Croatian/Serbian I, Honors. 3 Credits. U F3**

Similar to BCRS 204 but with additional work aimed at accelerating the student’s progress to proficiency and widening understanding of cultural context. Prerequisite: Open only to students who have received an A
in BCRS 108 or an A or B in BCRS 109, and who are admitted to the University Honors Program, or by permission of instructor.

**BCRS 208. Intermediate Bosnian/Croatian/Serbian II. 3 Credits. U F4**
A continuation of BCRS 204. Prerequisite: BCRS 204.

**BCRS 209. Intermediate Bosnian/Croatian/Serbian II, Honors. 3 Credits. U F4**
Similar to BCRS 208 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: BCRS 204 or 205. Open only to students admitted to the University Honors Program, or by permission of instructor.

**BCRS 380. Intensive Croatian. 6 Credits. U**
This program consists of a six-week intensive language course in intermediate and advanced Croatian phonetics, conversation, and grammar, and is offered each summer in Croatia. In addition to the practical language work, there is a program of lectures on modern Croatian history, literature, and other cultural topics. Various excursions and tours bring the students into first-hand contact with the people, natural beauty and culture of Croatia. This program is a cooperative effort between the University of Kansas and faculty of the University of Zadar.

**BCRS 504. Advanced Bosnian/Croatian/Serbian I. 3 Credits. H/W FP**
A practical Bosnian/Croatian/Serbian course involving the advanced study of the grammar, reading of texts on a variety of subjects, conversation and composition. Taught in Bosnian/Croatian/Serbian. Designed for students who have had two or more years of Bosnian/Croatian/Serbian language. Prerequisite: BCRS 208, or equivalent.

**BCRS 508. Advanced Bosnian/Croatian/Serbian II. 3 Credits. H/W FP**
A practical Bosnian/Croatian/Serbian course involving the advanced study of the grammar, reading of texts on a variety of subjects, conversation and composition. Taught in Bosnian/Croatian/Serbian. Designed for students who have had two and one-half or more years of Bosnian/Croatian/Serbian language. Prerequisite: BCRS 504, or equivalent.

**BCRS 675. Readings in Bosnian/Croatian/Serbian. 1-6 Credits. H/W FP**
Individually tailored readings and independent work in Bosnian/Croatian/Serbian language and culture. Prerequisite: Two years of Bosnian/Croatian/Serbian, and consent of instructor.

**Courses**

**GERM 100. German Reading Course I. 3 Credits. U**
Primarily for graduate students in other departments but also open to seniors planning to pursue graduate study. Fundamentals of grammar and reading texts of medium difficulty. Does not count toward undergraduate language requirement. Previous study of German not necessary. Not open to native speakers of German.

**GERM 101. German Reading Course II. 3 Credits. U**
Continuation of GERM 100. Advanced grammar and reading advanced texts in the students’ respective fields. Does not count toward undergraduate language requirement. Not open to native speakers of German. Prerequisite: GERM 100 or permission of instructor.

**GERM 104. Elementary German I. 5 Credits. U F1**
Introductory German; no previous German required. Development of students’ balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on everyday topics and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 108.

**GERM 108. Elementary German II. 5 Credits. U F2**
Continuation of GERM 104. Further development of students’ balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on everyday topics and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 201. Prerequisite: GERM 104 or placement by examination.

**GERM 111. Introduction to German I. 3 Credits. U**
Introduction to German for special purposes; no previous German required. Provides basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Introduction to the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement.

**GERM 112. Introduction to German II. 3 Credits. U**
Continuation of GERM 111. Further development of basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Continued exploration of the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 111 or permission of instructor.

**GERM 113. Introduction to German III. 1.5 Credits. U**
Continuation of GERM 112. Further development of basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Continued exploration of the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 112 or permission of instructor.

**GERM 124. German Cinema in Context. 3 Credits. HL H**
Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the
films' sources, ideologies, techniques, and artistic achievements. Does not count toward the German major or minor.

GERM 125. German Cinema in Context (Honors). 3 Credits. HL
Course content similar to GERM 124. Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the films' sources, ideologies, techniques, and artistic achievements. Does not count toward German major or minor.

GERM 128. Introduction to the Arts in German-Speaking Europe. 3 Credits. H
Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 328.

GERM 130. Today's Challenges in German-Speaking Europe. 3 Credits. H
This course explores significant political, social, and cultural challenges facing German-speaking Europe today. Specific issues may include migration, the environment, national identity, European integration, business, remembering the past, and technology. Focus on Germany, Austria, and Switzerland and to a lesser extent Belgium, Luxembourg, and Liechtenstein. Taught in English. Does not count toward the German Studies major or minor.

GERM 132. The City of Berlin in German Culture. 3 Credits. H/W
Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 332.

GERM 148. Germanic Mythology, Religion, and Folklore. 3 Credits. H/W
Taught in English. Introduction to the pagan myths and beliefs of Teutonic antiquity and their survival in the popular traditions of Germanic countries, within the framework of comparative mythology, archaeology, and anthropology. Does not count toward the German major or minor.

GERM 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in German. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

GERM 201. Intermediate German I. 3 Credits. U F3
Continuation of GERM 108. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 202. Prerequisite: GERM 108 or placement by examination.

GERM 202. Intermediate German II. 3 Credits. U F4
Continuation of GERM 201. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who successfully complete this course should take GERM 301. Prerequisite: GERM 201 or placement by examination.

GERM 203. Introduction to Business German: Deutsch im Berufsalltag. 3 Credits. H F4
Continuation of GERM 201; completes language proficiency sequence. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on the topics related to professional communication and to interpret, compare, and contrast German and American business cultural phenomena. Emphasis on interaction. Recommended for students planning to take GERM 352 and GERM 462. Not open to native speakers of German. Prerequisite: GERM 201 or placement by examination.

GERM 220. Study Abroad Topics in the German Language. 1-5 Credits. U
This course is for elementary- and intermediate-level instruction in the German language while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies.

GERM 222. Study Abroad Topics in German Studies: ______. 1-3 Credits. H/W
This course is for elementary- and intermediate-level German Studies courses taught in German taken while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies.

GERM 233. Introduction to German Conversation. 3 Credits. H/W
Students learn basic techniques and strategies, expand vocabulary and idiomatic usage, and improve accuracy in grammar and pronunciation. Prerequisite: Only open to students in the KU Summer Language Institute in Eutin, Germany and GERM 108. Corequisite: GERM 201 and GERM 202.

GERM 240. Introduction to Translation and Translation Theory. 3 Credits. H
This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat (oral) interpretation in detail. (Same as AAAS 250, LING 250, SLAV 250 and SPAN 202.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

GERM 250. Migrants and New Media in 21st-century Germany. 3 Credits. H
This course investigates the phenomenon of human migration through the lens of New Media (documentaries, film essays, digitized political performance art, gallery installations) in Germany. Drawing also on cinematic, historical, and legal texts, we will uncover the complex layers of existence that result when migrants cross a national border. Students will better understand the nuanced aesthetics and sociopolitical context of Germany's New Media production. Ultimately, we will analyze how
German productions inform the global debate on migration and our understanding of migrant experiences.

**GERM 301. High Intermediate German I. 3 Credits.** H/W FP
Continuation of GERM 202. Further development of students' use of German through reading and discussion of literary and non-literary texts (spoken, written, multimedia), combined with intensive grammar review. Introduction to expressive functions of German with emphasis on spoken and written communication. Not open to native speakers of German. Students who complete this course successfully should take GERM 302. Prerequisite: GERM 202 or placement by examination.

**GERM 302. High Intermediate German II. 3 Credits.** H/W FP
Continuation of GERM 301. Refinement and expansion of students’ use of German. Reading and discussion in German of literary and non-literary texts (spoken, written, multimedia), combined with continued intensive grammar review. Emphasis on better understanding German grammatical structures and acquisition of vocabulary. Not open to native speakers of German. Students who complete this course successfully should take GERM 401. Prerequisite: GERM 301 or placement by examination.

**GERM 315. Magic, Murder, Monsters: German Literature and the Modern Era. 3 Credits.** H
Introduction in English to German writers 1750-present featuring texts about the supernatural and monstrous. Students examine how encounters with magic and construction of monsters reflect particular cultural anxieties, fears, and ideals as relating to historical developments, industrialization, and scientific advancement. Discussion of themes such as gender, sexuality, class, race, empire, war, politics, and technology in German-speaking Europe. Readings include works in translation by influential German writers. Open to first-year students and non-majors. GERM 315 is required for admission to all courses beyond GERM 402 except GERM 462. (Same as EARS 315.)

**GERM 320. Border Crossings in German Culture. 3 Credits.** HT
Taught in English. Exploration of writers, filmmakers, and artists who have emigrated from, or migrated to German-speaking Europe. Emphasis on both their transnational impact and their representations of border crossings. Topics may include exile communities before, during, and after World War II and multiculturalism in contemporary Germany, Austria, and Switzerland.

**GERM 322. Study Abroad Topics in German Studies: _____ 1-5 Credits.** H
This course is for 300-level German Studies courses taught in German taken while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies. Prerequisite: GERM 302 or the equivalent.

**GERM 328. The Arts in German-Speaking Europe. 3 Credits.** HL
Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 128.

**GERM 330. Topics in: _____ 3 Credits.** H
Taught in English. Interdisciplinary study of selected aspects of the society or culture of German-speaking Europe or of the European experience. Does not count toward the German major or minor.

**GERM 332. Berlin in German Culture. 3 Credits.** HL
Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 132.

**GERM 333. German Conversation and Idioms. 3 Credits.** H
Intensive practice in conversational German with instruction in proper pronunciation as well as an introduction to idiomatic usage. Only for students in the KU Summer Language Institute in Holzkirchen, Germany or in courses offered through the KU Language Training Center. Prerequisite: GERM 202 or equivalent fourth-semester German course.

**GERM 334. Review of German Grammar. 3 Credits.** H
Intensive review and practice of select topics in German grammar. Offered only for students in the KU Summer Language Institute in Holzkirchen, Germany or in courses offered through the KU Language Training Center. Prerequisite: GERM 202 or equivalent fourth-semester German course.

**GERM 336. The German Transatlantic Experience. 3 Credits.** U
Introduction to the migration of German-speaking Europeans to North America, 17th century-present. Consideration of European and North American factors motivating migration, the journey to the New World, the experiences of immigrants and their descendants, and the ways in which German-speaking Europeans shaped the multicultural history of America. Taught in English.

**GERM 350. Studies in German Language, History, and Culture. 3 Credits.** SC H
Students visit museums and cultural sites in Cologne, Berlin, Munich, and other locations, with a focus on the 20th century. Discussion and written assignments in German. Offered only for the KU Summer Language Institute in Holzkirchen, Germany. Prerequisite: GERM 202 or equivalent fourth-semester German course.

**GERM 353. German Conversation. 3 Credits.** H/W FP
Further development of practical conversational skills for students with intermediate proficiency in German. Discussion of topics from everyday German life and current affairs, based on German newspapers and magazines. May be repeated but counts only once toward the major or minor. Not open to native speakers of German. Prerequisite: GERM 202.

**GERM 362. German and Germany in Global Business Culture I. 3 Credits.** H/W
High-intermediate content-based course with focus on the language skills needed to engage actively with the German business world, including applying for internships and jobs. Introduction to common cultural practices in the German business environment. Use of multimedia sources to explore current events and issues in Germany and their significance within a global business context. Not open to native speakers of German. Prerequisite: GERM 202.

**GERM 370. German Studies Topics: _____ 3 Credits.** H
Exploration of German Studies topics such as literature, film, philosophy, social institutions, language, the arts, media. Topics vary, and course may address topics across a narrow or broad time frame. Course conducted in German. May be repeated if content varies. Prerequisite: GERM 302.

**GERM 375. Topics in Film of German-Speaking Europe: _____ 3 Credits.** H
Examination of topics such as Expressionism, Turkish-German culture in contemporary German film, popular filmmaking, post-unification film,
German literature as film, German film and national identity. Topics and periods vary. Prerequisite: GERM 302.

GERM 400. Introduction to German Literary Masterpieces. 3 Credits. H/W FP
For students enrolled in the KU Summer Language Institute in Germany. Selected works of major German Language writers of the 19th and 20th centuries. Not open to native speakers of German. Prerequisite: GERM 302.

GERM 401. Advanced German I. 3 Credits. H FP
Continuation of GERM 302. Expansion and refinement of proficiency in German (speaking, listening, reading, writing), increased understanding of German grammatical structures, development of a more sophisticated vocabulary, and introduction to stylistics through discussion and analysis of literary and nonliterary texts. Students successfully completing GERM 401 may take all other GERM courses at the 400 and 500 levels. Prerequisite: GERM 302.

GERM 402. Advanced German II. 3 Credits. H FP
Continuation of GERM 401. Development of advanced proficiency in German through analysis and discussion of literary and nonliterary texts and practice in advanced composition. Emphasis in both discussions and papers on style and rhetoric and on developing skill in textual analysis. Focus on advanced German grammar and on style and idiomatic expression in spoken and written German. Prerequisite: GERM 401.

GERM 411. German Culture 1150-1750. 3 Credits. H FP
Exploration of major cultural periods and movements within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 315 and GERM 401.

GERM 412. German Culture 1750-Present. 3 Credits. H FP
Exploration of major cultural periods and movements 1750-present within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 315 and GERM 401.

GERM 421. Exiles, Migrants, and Refugees in German Literature and Film. 3 Credits. H
What does it mean to cross a border in today's world? This course explores different examples of "border crossing" in German-speaking Europe and in their broader European and transatlantic context. Engaging with literature, film, and works of art from the 20th to 21st centuries, we will address topics such as fictional representations of America; exile literature before and during World War II; the Berlin Wall and divided Germany; and migration and multiculturalism in contemporary Germany, Austria, and Switzerland. This course is taught in German. Prerequisite: GERM 302.

GERM 453. Investigation and Conference: _____ 1-3 Credits. H/W FP
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work is required. Not open to native speakers of German.

GERM 462. German and Germany in Global Business Culture II. 3 Credits. H/W FP
Advanced content-based course with focus on the language skills needed to examine the German social market economy, legal forms of companies, and the business planning process. Use of multimedia sources to explore current German business and economic issues in international, transatlantic, and global contexts. Team research project and presentation. Prerequisite: GERM 362 or permission of instructor.

GERM 475. Topics in German Studies: _____ 3 Credits. H FP
Exploration of cultural forms such as literature, film, philosophy, social institutions, linguistics, the arts, and the press. Examination of how cultural meaning is produced and interpreted. Topics vary, and course may address topics across a narrow or broad time frame. May be repeated if content varies. Prerequisite: GERM 315 and GERM 401.

GERM 480. Literature and Culture of German-Speaking Europe 1150-1750. 3 Credits. H FP
Exploration of medieval and early modern literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401.

GERM 481. Literature and Culture of German-Speaking Europe 1750-1830. 3 Credits. H FP
Exploration of literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401.

GERM 482. Literature and Culture of German-Speaking Europe 1830-1918. 3 Credits. H FP
Exploration of literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401.

GERM 483. Literature and Culture of German-Speaking Europe 1918-Present. 3 Credits. H FP
Exploration of literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401.

GERM 501. Advanced German III. 3 Credits. H FP
Focus on usage-based grammar of contemporary German. Extensive reading and analysis of grammatical structures in context and integration of form, meaning, and use. Exploration of grammatical structures using contemporary electronic textual analysis tools. Prerequisite: GERM 402.

GERM 550. History of the German Language. 3 Credits. H FP
Introduction to basic concepts of German philology and historical linguistics and exploration of the development of a national German language. Prerequisite: GERM 315 and GERM 401.

GERM 550. Structure of the German Language. 3 Credits. H FP
This course provides an overview of the structure of modern standard German. Students will explore different levels of the linguistic system of German (including phonology, morphology, and syntax) and complete practical exercises. Prerequisite: GERM 315 and GERM 401.

GERM 575. Topics in Genre: _____ 3 Credits. H FP
Study of the definition, style, form, and content of a specific literary genre in German-language literature and the social, cultural, political, and economic factors that led to its emergence. Consideration of the genre's suitability for particular writers or periods. Topic and period vary. May be repeated if content varies. Prerequisite: GERM 315 and GERM 401.

GERM 579. Investigation and Conference: _____ 1-3 Credits. H/W FP
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work required. Prerequisite: GERM 315 and GERM 401.

GERM 580. Senior Capstone Course: German-Speaking Europe Today. 3 Credits. H FP
Students write and present a research paper on an aspect of contemporary German-speaking Europe. Focus on learning or refining the linguistic and research-related skills needed to produce a research
paper. Students synthesize their knowledge of German Studies with coursework they have completed in other disciplines. Conducted in German and English. Required of all German Studies majors in senior year. Prerequisite: GERM 315, GERM 401, and senior standing.

**GERM 598. Research for Departmental Honors. 3 Credits. H FP** Research for a departmental honors project, on a topic chosen in conjunction with the faculty advisor. Emphasis on independent study and writing. Open to students with previous coursework in German at the 400 level, an overall 3.0 GPA, and at least a B+ average in advanced work in German. Prerequisite: GERM 315, GERM 401, senior standing, and permission of Undergraduate Advisor.

**GERM 599. Departmental Honors Project. 3 Credits. H FP** Continuation of GERM 598. Course consists of completion of Departmental Honors project. Quality of project determines whether student receives credit only or Honors in German. Prerequisite: GERM 598.

**GERM 616. Topics in German Literature: ___. 3 Credits. H/W** Readings and discussions in German of selected literary works on a particular topic or theme (e.g., nature, women, art and literature, etc.). May be repeated. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416, and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent.

**GERM 618. Topics in German Language and Linguistics: ___. 3 Credits. H/W** Readings and discussions in German in an area of specialized language or linguistic study (e.g., lexical fields, modern German dialects, etc.). May be repeated. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416, and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent.

**GERM 620. Topics in German Culture and Folklore: ___. 3 Credits. H/W** Readings and discussions in German on some aspect of German culture or folklore, including Landeskunde (study of contemporary Germany). May be repeated. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416, and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent.

**GERM 626. Idiomatic Usage in Modern Colloquial and Literary German. 3 Credits. H/W** Practical exercises in the systematic study of idioms and synonyms, designed to foster a more discriminating and effective usage of German. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent.

**GERM 630. Advanced German Grammar. 3 Credits. H/W** Recommended for students intending to teach German. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent.

**GERM 700. Introduction to Graduate Studies in German. 3 Credits.**

An introduction to the skills required of students enrolled in graduate degree programs in German Studies; areas covered include 1) introduction to literary theory and criticism, 2) bibliography and research methods, including database management software, 3) preparation and presentations of a research/conference paper, 4) technology training, including web design, on-line portfolio, and digital humanities, and 5) professional ethics and awareness of the academic market and alternative careers. We will also be working on practical, professionally useful goals, such as how to (better) make use of technology, how to create a CV and modify it for different positions, how to write an abstract, and how to produce a conference paper. Course requirements will include a variety of smaller assignments and two larger projects, a web-based professional portfolio and an 8 to10-page conference paper.

**GERM 701. Introduction to the Study of Literature. 3 Credits.**

Introduction to methods of literary research and presentation of seminar papers. Exercises in the use of basic guides to the study of German language and literature, in the documentation of scholarly research, and in the writing of interpretive essays, based on reading and discussion of selected works from different periods of the departmental "Basic Reading List.

**GERM 710. Workshop for M.A. Students. 1 Credits.**

Discussion of policies in the M.A. program, examinations, thesis proposals, writing of theses, grant proposals, conference presentations, publications of scholarship, and entrance into the academic job market. Required of all M.A. students in the first year in the program. Does not count toward completion of 30 hours of course work for the M.A.

**GERM 712. The Structure of Modern Standard German. 3 Credits.**

A comprehensive introduction to the structure and usage of contemporary German, including phonetics, phonology, morphology, syntax, text linguistics, semantics, pragmatics, and language variation. Students will listen to lectures, read texts on German linguistics, participate in discussions, and work extensively on linguistic problems involving German.

**GERM 716. Topics in German Literature: ___. 3 Credits.**

Intensive study of a selected topic in German literature. May be repeated. Offered only in conjunction with GERM 616 when taught by a Max Kade Distinguished Visiting Professor. Graduate students will be assigned additional work.

**GERM 734. Age of Goethe. 3 Credits.**

Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history.

**GERM 736. Post-Romantic Nineteenth Century. 3 Credits.**

Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history.

**GERM 738. Twentieth Century. 3 Credits.**

Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history.

**GERM 751. Topics in German Studies: ___. 3 Credits.**

Course covers key topics in German Studies and represents the expertise of faculty in the department as well as department-affiliated faculty. Topics will vary from semester to semester and instructor to instructor to allow flexibility for in-depth analysis of particular topics. May be repeated as topics vary.

**GERM 753. Investigation and Conference: ___. 1-6 Credits.**

To be taken only in exceptional cases. Permission of the instructor who will supervise the student's work is required.

**GERM 756. Studies in Enlightenment Literature: ___. 3 Credits.**

**GERM 800. Seminar: Teaching German as a Second Language. 3 Credits.**

Introduction to selected aspects of second-language acquisition, foreign-language pedagogy, and contrastive grammar, with the major concentration on practical guidance in teaching elementary German, in test preparation and grading, and in the use of equipment.
GERM 801. Practicum in GTAs. 1 Credits.
Discussion of matters relating to the teaching of German in specific courses. Required of all GTAs in each semester of teaching, unless enrolled in GERM 800. Does not count toward completion of 30 hours of course work for the M.A. or 27 hours of course work for the Ph.D.

GERM 855. Introduction to German Applied Linguistics. 3 Credits.
Introduction to theories and topics in German applied linguistics.

GERM 860. Introduction to Modern German Dialects. 3 Credits.
Introduction to modern German dialects, methods of dialect research and aspects of linguistic assimilation and loss as well as a survey of German-American dialects. Prerequisite: Permission of instructor required.

GERM 899. Master's Thesis. 3 Credits.
May not be repeated.

GERM 900. Workshop for Ph.D. Students. 1 Credits.
Discussion of policies in the Ph.D. program, research specializations, examinations, dissertation proposals, writing of dissertations, grant proposals, conference presentations, publication of scholarship, and entrance into the academic job market. Required of all Ph.D. students in the first year in the program. Does not count toward completion of 27 hours of course work for the Ph.D.

GERM 953. Investigation and Conference: _____ 1-6 Credits.
To be taken only in exceptional cases. Permission of the instructor who will supervise the student's work is required.

GERM 960. Seminar on Writers of the Age of Goethe: _____ 3 Credits.

GERM 962. Seminar in Romanticism: _____ 3 Credits.

GERM 967. Seminar in Special Topics: _____ 3 Credits.

GERM 999. Doctoral Dissertation. 1-10 Credits.

Courses

PERS 110. Elementary Iranian/Dari/Tajik Persian I. 5 Credits. U F1
Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Five hours of class per week.

PERS 120. Elementary Iranian/Dari/Tajik Persian II. 5 Credits. F2
Continuation of PERS 110. Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Five hours of class per week. Prerequisite: PERS 110 or departmental permission.

PERS 210. Intermediate Iranian/Dari/Tajik Persian I. 3 Credits. U F3
A continuation of PERS 120. Course emphasizes oral and written work in Persian. Systematic review of grammar and introduction to reading in cultural texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 120 or departmental permission.

PERS 220. Intermediate Iranian/Dari/Tajik Persian II. 3 Credits. U F4
A continuation of PERS 210. Course emphasizes oral and written work in Persian. Systematic review of grammar and introduction to reading in cultural texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 210 or departmental permission.

PERS 310. Advanced Iranian/Dari/Tajik Persian I. 3 Credits. U FP
Enhancement of speaking, comprehension, reading and writing abilities in Persian. Readings from Persian literature introduced. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 220 or placement exam that establishes a level of proficiency in Persian suited to Advanced Persian I.

PERS 320. Advanced Iranian/Dari/Tajik Persian II. 3 Credits. U FP
Enhancement of speaking, comprehension, reading and writing abilities in Persian. Readings from Persian literature introduced. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 310 or placement exam that establishes a level of proficiency in Persian suited to Advanced Persian II.

PERS 593. Directed Study in Persian Culture and Literature: _____ 1-3 Credits. U FP
This course is designed for students seeking proficiency in Persian beyond PERS 320. The instructor directs the student through readings and materials in Persian that add to the student's substantive knowledge of Persian culture in Iran, Afghanistan, and Tajikistan. May be taken multiple semesters for credit with varying content. Prerequisite: PERS 320 and consent of instructor.

Courses

PLSH 104. Elementary Polish I. 5 Credits. U F1
First Semester. Essentials of grammar, practice in reading, writing, and speaking Polish.

PLSH 105. Elementary Polish, Honors. 5 Credits. U
Honors version of PLSH 104, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor.

PLSH 108. Elementary Polish II. 5 Credits. U F2
Second semester. A continuation of PLSH 104. Prerequisite: PLSH 104.

PLSH 109. Elementary Polish II, Honors. 5 Credits. U
A continuation of PLSH 105. Honors version of PLSH 108, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: PLSH 104 or PLSH 105. Open only to students admitted to the University Honors Program, or by permission of instructor.

PLSH 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Polish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

PLSH 204. Intermediate Polish I. 3 Credits. U F3
Second-year course in the language with emphasis on reading, composition, and conversation. Prerequisite: PLSH 108.

**PLSH 208. Intermediate Polish II. 3 Credits. U F4**
A continuation of PLSH 204. Prerequisite: PLSH 204.

**PLSH 504. Advanced Polish I. 3 Credits. H/W FP**
A practical Polish language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Polish. Designed for students who have had two or more years of Polish language. Prerequisite: PLSH 208 or equivalent.

**PLSH 508. Advanced Polish II. 3 Credits. H/W FP**
A practical Polish language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Polish. Designed for students who have had two and one-half or more years of Polish. Prerequisite: PLSH 504 or equivalent.

**PLSH 675. Readings in Polish Language and Literature. 1-6 Credits. H/W FP**
Directed individual readings on various topics concerning Polish literature and/or language. Prerequisite: Two years or four semesters of Polish, and consent of instructor.

## Courses

**REES 110. Understanding Russia and Eastern Europe. 3 Credits. SC H/W**
A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students will watch a movie every two weeks as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 310.

**REES 111. Understanding Russia and Eastern Europe, Honors. 3 Credits. H/W**
A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students in the course watch one feature film from Russia or Eastern Europe per week as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 111.

**REES 220. Societies and Cultures of Eurasia. 3 Credits. W**
The purpose of this course is to acquaint students with the societies and cultures of Eurasia (primarily Central Asia, Russia, and the Caucasus region). This interdisciplinary course reviews the geography, history, economics, social and political structures, religion, literature, music, and art of the region. The focus is mainly on the twentieth-century and topics of interest include the collapse of empires, the rise and fall of communism, the disintegration of the USSR and rise of authoritarianism, nationalism, and various forms of Islam in the region.

**REES 221. Societies and Cultures of Eurasia, Honors. 3 Credits. W**
The purpose of this course is to acquaint students with the societies and cultures of Eurasia (primarily Central Asia, Russia, and the Caucasus region). This interdisciplinary course reviews the geography, history, economics, social and political structures, religion, literature, music, and art of the region. The focus is mainly on the twentieth-century and topics of interest include the collapse of empires, the rise and fall of communism, the disintegration of the USSR and rise of authoritarianism, nationalism, and various forms of Islam in the region. Open only to students admitted to the University Honors Program or by permission of instructor.

**REES 310. Understanding Russia and Eastern Europe. 3 Credits. NW S/W**
A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students in the course watch one feature film from Russia or Eastern Europe per week as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 110.

**REES 311. Understanding Russia and Eastern Europe, Honors. 3 Credits. SC S**
A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students in the course watch one feature film from Russia or Eastern Europe per week as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 111.

**REES 480. Topics in Russian and East European Studies: _____. 1-3 Credits. H**
Interdisciplinary examination of topics involving two or more disciplines in Russian, East European, and Eurasian studies.

**REES 492. Research Methods in Russian, East European, and Eurasian Studies. 3 Credits. H**
Development of interdisciplinary research skills and familiarity with resources and issues in the study of Russian, East European, and Eurasian Studies. Preparation for REES 496.

**REES 496. Capstone Research Seminar in Russian and East European, and Eurasian Studies. 3 Credits. H**
Interdisciplinary original research conducted using at least one REES language and resulting in a research paper. Prerequisite: REES 492.

**REES 498. Directed Readings. 1-3 Credits. H**

Individual and supervised readings in selected areas of Russian, East European, and Eurasian Studies. Prerequisite: Prior permission of instructor and either CREES director or associate director.

**REES 499. Capstone Research Seminar in Russian, East European, and Eurasian Studies, Honors. 3 Credits. H**

Research and writing of a substantial paper, involving interdisciplinary original research and use of sources in at least one REES language, and presentation of this paper to an Honors committee of three REES faculty members. This thesis must be substantially different from any other Honors thesis. Prerequisite: REES 492.

**REES 510. Understanding Central Asia. 3 Credits. NW S/W**

An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in REES 710. (Same as GEOG 590.) Prerequisite: One previous interdisciplinary area studies course or the instructor's permission.

**REES 704. Russian Orthodoxy in Historical Perspective. 3 Credits.**

This course examines Russian Orthodoxy as a religious system and the institution of the Russian Orthodox Church from its first appearance in Russia to the present. It focuses on beliefs and practices of the clergy and laity; institutional structures; the relationships between Church and State; interactions with non-Orthodox religious communities; responses to Soviet atheist policies; Orthodox influences on political theory, philosophy, literature, and the fine arts. (Same as REL 704.)

**REES 710. Understanding Central Asia. 3 Credits.**

An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in REES 710. (Same as GEOG 590.)

**REES 799. Directed Readings in Russian and East European Studies. 1-5 Credits.**

**REES 895. Special Problems in Area Studies: _____ 3 Credits.**

Interdisciplinary examination of topics involving two or more of the cooperating disciplines in Russian and East European studies.

**REES 897. Research. 1 Credits.**

Enrollment to fulfill Masters continuous enrollment rule. Prerequisite: Completion of all degree requirements except submission of seminar paper or comprehensive examination.

**REES 898. Seminar in Russian and East European Studies. 3 Credits.**

Mastery of interdisciplinary research skills, and knowledge of resources and scholarship on the study of Russian, east European, and Eurasian Studies.

**REES 899. Capstone Research Seminar in Russian, East European, and Eurasian Studies. 3 Credits.**

Research, write, and present a professional-quality paper, involving interdisciplinary original research, consultation with REES faculty, and substantial use of sources in at least one REES language. Prerequisite: REES 898.

**Courses**

**RUSS 104. Elementary Russian I. 5 Credits. U**

First semester. Five hours of basic language acquisition and oral practice per week. Essentials of grammar, practice in comprehending, speaking, reading, and writing Russian.

**RUSS 105. Elementary Russian I, Honors. 5 Credits. U**

Honors version of RUSS 104, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor.

**RUSS 108. Elementary Russian II. 5 Credits. U F2**

Second semester. Five hours of basic language acquisition and oral practice per week. Essentials of grammar, practice in comprehending, speaking, reading, and writing Russian. A continuation of RUSS 104. Prerequisite: RUSS 104.

**RUSS 109. Elementary Russian II, Honors. 5 Credits. U**

A continuation of RUSS 105. Honors version of RUSS 108, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: RUSS 104 or RUSS 105. Open only to students admitted to the University Honors Program, or by permission of instructor.

**RUSS 110. Intensive Elementary Russian. 10 Credits. U F1/F2**

Intensive course in elementary Russian providing the student with a complete survey of Russian grammar, and proficiency in understanding, reading, and speaking basic Russian. Twenty contact hours per week. Same content as RUSS 104 and RUSS 108 combined.

**RUSS 150. Beginning Russian I. 3 Credits. U**

Fundamentals of Russian grammar, reading, speaking, and writing. Course designed to accommodate the needs of students regardless of age, educational background, or occupation. No previous knowledge of Russian or other foreign languages required.

**RUSS 152. Beginning Russian II. 3 Credits. U**

Continuation of RUSS 150. Does not fulfill BA foreign language requirement. Prerequisite: RUSS 150 or equivalent.

**RUSS 177. First Year Seminar: _____ 3 Credits. U**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Russian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**RUSS 204. Intermediate Russian I. 5 Credits. U F3**

This course is designed to develop speaking, reading, and listening proficiency within the context of a review of grammar. Prerequisite: RUSS 108, RUSS 110, or equivalent.

**RUSS 208. Intermediate Russian II. 5 Credits. U F4**

Continuation of RUSS 204. Completes the undergraduate foreign language requirement. The course is designed to develop speaking, reading, and listening proficiency within the context of detailed grammatical review. Prerequisite: RUSS 204 or equivalent.

**RUSS 212. Second Year Russian I. 3 Credits. U F3**
A review of Russian and further development of all four language skills. This course is intended for non-specialists and for students fulfilling the language requirement. Prerequisite: RUSS 108 or RUSS 110.

RUSS 216. Second Year Russian II. 3 Credits. U F4
Continuation of RUSS 212. More focused development of students' oral skills and reading abilities. This course fulfills the college foreign language requirement. Prerequisite: RUSS 204 or RUSS 212.

RUSS 250. Continuing Russian I. 3 Credits. U
Fundamentals of Russian grammar, reading, speaking, and writing. Course designed to accommodate the needs of students regardless of age, educational background, or occupation. Does not count towards the fulfillment of the undergraduate language requirement. Does not count towards the undergraduate major in Slavic. Prerequisite: RUSS 152 or equivalent.

RUSS 252. Continuing Russian II. 3 Credits. U
A continuation of RUSS 250. Does not count towards the fulfillment of the undergraduate language requirement. Does not count towards the undergraduate major in Slavic. Prerequisite: RUSS 250 or equivalent.

RUSS 504. Advanced Russian I. 3 Credits. H/W FP
A practical Russian language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Russian. Designed for students who have had four semesters of Russian. Prerequisite: RUSS 208 or RUSS 216.

RUSS 508. Advanced Russian II. 3 Credits. H/W FP
A practical Russian language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Russian. Designed for students who have had two and one-half or more years of Russian language. Prerequisite: RUSS 504.

RUSS 512. Russian for the Professions I. 3 Credits. U FP
This course focuses on the active mastery of language structures and vocabulary needed for people using Russian in professional capacities, particularly such as business and journalism. Materials will be drawn from the current Russian press and electronic media. Designed for students who have had basic language training and want to develop specialized language skills. Prerequisite: RUSS 208 or RUSS 216.

RUSS 516. Russian for the Professions II. 3 Credits. U FP
A continuation of RUSS 512. Prerequisite: RUSS 504, RUSS 512, or RUSS 522.

RUSS 522. Problems in Translating Russian into English I. 3 Credits. H/W FP
Introduction to the process of translating texts from Russian, focusing on kinds of translation, lexical and textual factors, and the revision process. Prerequisite: Two years minimum of Russian language courses.

RUSS 550. Advanced Conversation, Composition, and Grammar in Russian: Summer Program. 6 Credits. H/W FP
 Held in Russia. Twenty-four hours of class work weekly, plus lectures and excursions, for six weeks at St. Petersburg University. Prerequisite: RUSS 208 or the equivalent of twenty-two hours of Russian language courses.

RUSS 675. Readings in Russian. 1-6 Credits. H/W FP
Prerequisite: Two years of Russian, and consent of instructor.

RUSS 700. Classics of Russian Culture. 3 Credits.
This advanced Russian language class explores the monuments of Russian culture (1700-1980) in the context of the country's history, customs, artistic traditions and literary trends. It is designed to develop reading, writing, and speaking skills of advanced language students and includes the preparation of written and oral reports in Russian.

Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

RUSS 704. Contemporary Russian Culture. 3 Credits.
This advanced Russian language class explores issues in contemporary Russian culture (literature and the arts, societal trends and issues, politics, and national life) based on Russian film, television, and print materials. It is designed to develop reading, writing, and speaking skills of advanced language students who wish to develop high levels of fluency, accuracy, and idiomatic expressiveness. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

RUSS 708. Russian Phonetics and Grammar. 3 Credits.
A survey of fundamental issues in Russian phonetics, morphology, and syntax. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing the major linguistic categories of Russian. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

RUSS 712. Introduction to Russian Literature. 3 Credits.
Readings for this advanced Russian language class will be drawn from representative prose, poetry, and drama of 19th or 20th century authors. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing the major texts and literary trends of the Russian tradition. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

RUSS 716. Stylistics. 3 Credits.
Practical examination of the features of stylistic registers available in contemporary Russian, ranging from slang to colloquial speech to educated journalistic, scientific, and literary styles. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing stylistic registers. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

Courses

SLAV 101. Introduction to Slovene. 1 Credits. H
Teaches skills for survival communication in Slovene and basic orientation in Slovene culture. Blended short course, designed to give a student rudimentary linguistic and cultural preparation for functioning in Slovene-speaking environment. Recommended for participants of study abroad in Slovenia. No previous knowledge of Slovene or other foreign languages required. The course does not count toward undergraduate language requirement.

SLAV 104. Elementary Slavic Language I: ____. 5 Credits. U F1
First semester. Essentials of grammar, practice in speaking and writing a Slavic language. Simple readings from selected texts. Course may be used to teach the fundamentals of any Slavic language, for example, Slovenian, Macedonian, Slovak, etc.

SLAV 140. Understanding Russia. 3 Credits. HT H/W
An introduction to literature, history, political systems, spirituality, and the visual arts from a Russian perspective.

SLAV 141. Understanding Russia, Honors. 3 Credits. HT H/W
An introduction to literature, history, political systems, spirituality, and the visual arts from a Russian perspective.

SLAV 144. Survey of Russian Literature in Translation. 3 Credits.
HL H/W
A survey of the principal works of Russian literature including such authors as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Pasternak, Solzhenitsyn, and others.

**SLAV 145. Survey of Russian Literature in Translation, Honors. 3 Credits.** HL H/W
A survey of the principal works of Russian literature including such authors as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Pasternak, Solzhenitsyn, and others.

**SLAV 148. Introduction to Slavic Folklore. 3 Credits.** HL H/W
An introduction to the various forms of folklore among the Slavic peoples, with particular emphasis on the folk literature, customs, and artifacts of Russia, Poland, and the South Slavic countries.

**SLAV 149. Introduction to Slavic Folklore, Honors. 3 Credits.** HL H/W
An introduction to the various forms of folklore among the Slavic peoples, with particular emphasis on the folk literature, customs, and artifacts of Russia, Poland, and the South Slavic countries.

**SLAV 152. Robots, Rockets, Radios: Progress and Technology in 20th-Century Slavic Literatures. 3 Credits.** HL
This course introduces students to masterworks of literature written in response to the technological advances of the 20th century by some of the best authors in Czech, Polish, Russian, Ukrainian, and formerly Yugoslav literatures. The writers covered include Karel Capek, Yuri Olesha, Valerian Pidmohylny, Ivo Andric, Stanislav Lem, Vaclav Havel, and Oksana Zubzhiko. Literary readings are supplemented with screenings of several films from the region. The course analyzes the ideological contexts in which these texts appeared, such as Soviet communism's dependence on technology and industrialization, post-World War II disillusionment with ideas of progress, and the Space Race.

**SLAV 177. First Year Seminar: ______. 3 Credits.** U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Slavic. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**SLAV 205. Muslim Lives: Politics, Culture, and Society. 3 Credits.** S
The course provides a general introduction to Muslim communities and societies by surveying some of the major aspects of Muslims' lived experiences from the early Islamic period to the modern globalized world. It will challenge the essentialized notion of a "Muslim world," which is usually presented as a monolithic society. Through the course, students will develop a basic understanding of the rich diversity of Muslim communities in terms of cultural mores, religious practices, and sociopolitical conditions. Religious and sociopolitical practices will be analyzed in their ethical and moral perspectives. (Same as GIST 205.)

**SLAV 230. The Vampire in Literature, Film, and Television. 3 Credits.** H
The vampire has been a fascinating and terrifying imagined other in human society for centuries. This course begins with the historical development of the vampire legend in Eastern Europe leading up to its contemporary Russian and English literary and cinematic variations. We will contextualize the various incarnations of the vampire and endeavor to consider the ethical significance of such a figure, through questions such as: What are the moral implications of becoming or being a vampire subject? Are there different ethical rules at play? Are vampires always unethical?

**SLAV 250. Introduction to Translation and Translation Theory. 3 Credits.** H
This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat (oral) interpretation in detail. (Same as AAAS 250, GERM 240, LING 250 and SPAN 202.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

**SLAV 305. Language, Gender, and Sexuality. 3 Credits.** S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and Considerations of power, hegemony, and imperialism. (Same as ANTH 325, GIST 303, JWSH 305 and WGSS 325.)

**SLAV 310. Modern Turkey: Culture and Society. 3 Credits.** H/W
As a country that is geographically in the middle of a strategic global region, a key NATO ally, a candidate for EU membership, and representing a mix of democratic traditions, military coups, and authoritarian leaders combined with periods of rapid and drastic socioeconomic transformation, for one reason or another, Turkey seems to always be a country under the spotlight. This course is designed to give an overview of Modern Turkey and familiarize the student with its history, society and culture. Topics to be covered include the early republican period, ethnic and religious minorities, religion and secularism, music, cuisine, women, gender and sexuality, religious and national holidays, cinema and TV, among others. The primary purpose of this course is to help students develop necessary analytical and interpretive skills to identify, compare, and analyze Turkish cultural practices, products and perspectives as they relate to basic social, political, and historical contexts. No background knowledge of Turkey or the Turkish language is required. (Same as GIST 310 and TURK 310.)

**SLAV 316. The Peoples and Cultures of Southeastern Europe Through Film. 3 Credits.** HL H
This course presents an introduction to the study of the culture of the South Slavs and other peoples of Southeastern Europe, combining background modules in geography, linguistic culture, history, folklore and contemporary cultural criticism with critical viewings of artistic films. The course serves as an introduction to humanistic inquiry about the peoples and cultures of Southeastern Europe.

**SLAV 317. The Peoples and Cultures of Southeastern Europe Through Film, Honors. 3 Credits.** HL H
This course is similar in content to SLAV 316, but with an additional honors project. Prerequisite: Eligibility for or admission to the university Honors Program.

**SLAV 318. Jews and Slavs in Eastern Europe. 3 Credits.** H
Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups have shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. “Jews and Slavs” examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both groups.
Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as JWSH 318.)

SLAV 320. Graphic Novels as Memory. 3 Credits. H
This course examines the interaction between literature and memory, in particular how authors respond to major historical events and contribute to shaping the collective memory of those events. Students will read graphic novels inspired by memories of the Holocaust and Communism. Through the visual and textual mix of the graphic novel, we will consider the impact of historical upheavals on the lives of ordinary individuals, drawing connections to contemporary national and global socio-political problems. Students will write on these topics in a variety of academic and non-academic genres, including: journal, article summary, synthetic essay, analytical essay, and reflection essay/creative writing. (Same as GiST 321.)

SLAV 322. Soviet and Post-Soviet Russian Cinema. 3 Credits. H
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. (Same as FMS 322.)

SLAV 330. Russian Business Culture. 3 Credits. H
The course examines how geography, history, and traditions of Russia impact its contemporary business practices. It addresses influence of Russian culture on business communication (verbal and nonverbal), relationship building, the role of manager, the functioning of teams, negotiation, and decision making. Topics also include cultural aspects of relationship between businesses and the state, entrepreneurship, advertising, and consumerism. Students examine business practices that foreign businessmen encounter in Russia.

SLAV 340. The Language Landscape of Eastern Europe. 3 Credits. HT H
Topics include current events, such as the resurgence of ethnonationalism, in which language and identity projects are aided by the internet and social media as well as case studies of emergent language-based nations. Students will gain an appreciation of the key role that languages play in creating a diverse Eastern Europe. This course will help prepare students for careers in international business, diplomacy, and politics, among others. This course is offered at the 300 and 500 level with additional assignments as the 500 level. Not open to students with credit in SLAV 341 or SLAV 540. Prerequisite: Membership in the College Honors Program or consent of instructor.

SLAV 340. The Language Landscape of Eastern Europe, Honors. 3 Credits. HT H
Topics include current events, such as the resurgence of ethnonationalism, in which language and identity projects are aided by the internet and social media as well as case studies of emergent language-based nations. Students will gain an appreciation of the key role that languages play in creating a diverse Eastern Europe. This course will help prepare students for careers in international business, diplomacy, and politics, among others. This course is offered at the 300 and 500 level with additional assignments as the 500 level. Not open to students with credit in SLAV 340 or SLAV 540. Prerequisite: Membership in the College Honors Program or consent of instructor.

SLAV 370. War and Violence Russian Literature and Film. 3 Credits. H
This course focuses on artistic representations of violence resulting from historical events such as World War II, Soviet collectivization, the Gulag, and political purges. We consider Soviet literature and film, including works by Isaac Babel, Andrei Platonov, Anna Akhmatova, and Alexander Solzhenitsyn. Readings in English. The course is offered at the 300 and 500 levels, with additional assignments at the 500 level.

SLAV 379. Topics in: ________. 1-3 Credits. H
Exploration of Slavic cultural forms such as literature, film, linguistics, arts, and press. Topics vary, and course may address topics across a narrow or broad time frame. May be repeated if content varies.

SLAV 494. Research Internship. 1-3 Credits. H
Practical research experience in Slavic Studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or digital project. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Declaration of a Slavic Languages and Literatures major and permission of instructor.

SLAV 495. Senior Capstone Seminar. 3 Credits. H
The Senior Capstone Seminar offers undergraduate majors an opportunity to define, design and execute a substantial research/creative project under the mentorship of a faculty member. The project integrates the knowledge and skills gained in the coursework for the major and across the undergraduate curriculum, and demonstrates the students competence in the field of Slavic studies. Prerequisite: Slavic major status, senior standing.

SLAV 499. Honors Thesis. 3 Credits. H/W
Independent study and preparation of honors thesis. Required of all students working for a degree with honors in Slavic languages and literatures.

SLAV 500. Russia Today. 3 Credits. H/W
Study and discussion of contemporary problems in Russia and the former Soviet Union; readings in Russian, based on articles in newspapers, journals, etc. Conducted in Russian. Prerequisite: RUSS 208 or equivalent.

SLAV 503. Post-Soviet Communication. 3 Credits. H
The course is designed to acquaint students with the shifting manner of public discourse in Post-Soviet Russia and help them to explore in some depth cross-cultural communication between America and Russia. In addition to contemporary and historical background on Russian communicative practices, students examine discourse in business development, mass media, marketing, and advertising. All readings in English. (Same as OOMS 503.)

SLAV 506. Masterworks of Polish and Czech Literature. 3 Credits. H/W
A survey of West Slavic Literature and Civilization (Polish and Czech) from its beginnings to the present with emphasis on the most important trends: Renaissance, Romanticism, Positivism/Realism, Modernism and Avant-guard; Socialist realism, and Post-modernism. The course combines lecture, discussion and small group activities. Movie clips, recordings, and slides are used to reflect various cultural dimensions of West Slavic Civilization. No knowledge of Polish or Czech is required. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 706. Prerequisite: Any previous course in SLAV or RUSS.
SLAV 508. South Slavic Literature and Civilization. 3 Credits. H/W
An introductory survey of the literature and culture of the South Slavic peoples: the Slovenes, Croats, Bosniacs, Serbs, Montenegrins, Macedonians and Bulgarians. No language required.

SLAV 510. The Russian Literary Genius. 3 Credits. H/W
Topics and problems in Russian cultural history as treated in the masterworks of Russian literature. Readings selected from the works of Pushkin, Tolstoy, Dostoevsky, Pasternak, Bulgakov, Solzhenitsyn, and other great Russian writers. Readings in English, no prerequisite for non-Russian majors. Russian majors will do some of the readings in Russian.

SLAV 516. Love, Lust and Liberty: Polish and Czech Film Adaptations. 3 Credits. H
A comparative study of several most representative and best works of 19th- and 20th-century Polish and Czech fiction and drama and their film adaptations. By providing a broad cultural and historical background of the works, the course offers a thorough introduction to modern culture of Poland and the Czech Republic. Readings and discussions are in English, and no knowledge of Polish or Czech is required.

SLAV 522. The Grammatical Categories of Russian: Linguistic Units, Functions and Meanings. 3 Credits. H/W
This course covers the main grammatical categories of Russian, including word formation, case, animacy, voice and reflexive verbs, imperatives, aspect, and word order. It is intended not only for linguists but anyone seeking a better understanding of the grammatical systems of Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 722. Prerequisite: Two years of Russian language study or the equivalent.

SLAV 526. The Pragmatics of Slavic Languages. 3 Credits. H
This course introduces students to the study pragmatics: the relationship between utterances, the contexts in which these utterances were produced, and their reception and interpretation by the speakers. It investigates how grammatical choices on the sentence level (such as case, aspect, impersonalization, and more) affect and are influenced by the context in which utterances are produced, and how social variables such as gender, age, peer pressure, institutional power, and other factors are influential in production and interpretation of meaning. Other topics include extra-linguistic elements such as gesture and prosody, (im)politeness expressions, the pragmatics of narratives, and cross-cultural differences in contexts and reception of specific speech genres. Prerequisite: RUSS 508 or consent of instructor.

SLAV 530. Introduction to Russian Poetry. 3 Credits. H/W
An introduction to the principles of Russian versification and to masterpieces of Russian poetry selected from the 18th, 19th, and 20th centuries. Students will learn to read, translate, and analyze poems in terms of rhyme, meter, euphony, metaphor, and other prosodic features. Emphasis will be placed upon preparing students for independent study and appreciation of Russian poetry in the original. Prerequisite: Language proficiency.

SLAV 532. Dostoevsky. 3 Credits. H/W
A study of the life and works of Fyodor Dostoevsky. In translation. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 732. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 534. Tolstoy. 3 Credits. H/W
A study of the life and works of Leo Tolstoy. In translation. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 734. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 540. The Language Landscape of Eastern Europe. 3 Credits. H
Topics include current events, such as the resurgence of ethnonationalism, in which language and identity projects are aided by the internet and social media as well as case studies of emergent language-based nations. Students will gain an appreciation of the key role that languages play in creating a diverse Eastern Europe. This course will help prepare students for careers in international business, diplomacy, and politics, among others. This course is offered at the 300 and 500 level with additional assignments as the 500 level. Not open to students with credit in SLAV 340 or SLAV 341.

SLAV 550. The Russian Novel in the Age of Realism. 3 Credits. H/W
This course traces the evolution of the Russian novel from its beginnings with Pushkin and through the novels of Turgenev, Goncharov, Dostoevsky, Tolstoy, and others. In translation. Russian majors will read most works in Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 760. Prerequisite: Two years of Russian language or consent of the instructor.

SLAV 555. Readings in Slovene. 1-6 Credits. H
Individually tailored coursework in Slovene, from beginning to advanced level. Can include development of all four skills depending on the needs of the student. Prerequisite: Consent of instructor.

SLAV 564. The Woman Question in Nineteenth-Century Russian Literature. 3 Credits. H
An exploration of the "woman question" in nineteenth-century Russia as treated in literary texts. Authors to be included are: Tolstoy, Turgenev, Dostoevsky, Chekhov, as well as women writers such as Karolina Pavlova and Evgeniia Tur, and prominent literary and social critics. Readings in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 764. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 567. Post-Soviet Literature. 3 Credits. H
A survey of post-Soviet literary art, from approximately 1985 to the present, dealing with a range of subjects including the emergence of literature from the strictures of socialist realism and its relationship to postmodernism and postcolonialism. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 767. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 570. War and Violence Russian Literature and Film. 3 Credits. H
This course focuses on artistic representations of violence resulting from historical events such as World War II, Soviet collectivization, the Gulag, and political purges. We consider Soviet literature and film, including works by Isaac Babel, Andrei Platonov, Anna Akhmatova, and Alexander Solzhenitsyn. Readings in English. The course is offered at the 300 and 500 levels, with additional assignments at the 500 level.

SLAV 572. Russian and East European Science Fiction. 3 Credits. H
A comprehensive introduction to Russian, Soviet, and East European science fiction as it emerged in dialogue with utopian thinking, fantasy writing, and other cultural trends, and to how it responded to wider social contexts. Particular emphasis will be placed on the unique features of the Slavic science fiction tradition and its relationship the dominant Western forms of the genre. This course is offered at the 500 and 700 level with
additional assignments at the 700 level. Not open to students with credit in SLAV 772. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 600. Biography of a City: ______. 3 Credits. H/W
Examination in depth of the historical, social, intellectual, and artistic development of one or more major Slavic urban centers.

SLAV 626. The Cultural Impact of Ottoman Empire on the South Slavs. 3 Credits. H
An examination of the cultural development of the South Slavs in the context of the Ottoman invasions and subsequent rule (14th-19th century), focusing on the frontier aspects of the Balkans, military culture, religion, economics and banditry, as well as other aspects of material and folk culture. No language requirement. Prerequisite: SLAV 316 or SLAV 508; or consent of instructor.

SLAV 630. Slavic Folklore. 3 Credits. H/W
Introduction to the phenomena and problems of Slavic folklore. Prerequisite: Two years of Russian on the college level.

SLAV 664. Soviet Russian Literature: 1930-1990. 3 Credits. H/W
Readings in the period, in all genres. In translation; no prerequisite for non-Russian majors. Russian majors are required to have senior standing and read most works in Russian.

SLAV 668. Nabokov. 3 Credits. H/W

SLAV 675. Readings in Slavic Studies (English). 1-3 Credits. H
Directed readings on Slavic culture in English. For non-majors. Prerequisite: Instructor permission.

SLAV 678. Readings in Slavic Linguistics. 1-6 Credits. H/W
Directed individual readings on various topics concerning Slavic linguistics. Prerequisite: Proficiency in at least one Slavic language, and consent of instructor.

SLAV 679. Topics in: ______. 1-6 Credits. H
Intensive study of a selected topic from Slavic languages, literatures, linguistics, or pedagogy.

SLAV 706. Masterworks of Polish and Czech Literature. 3 Credits.
A survey of West Slavic literature and civilization (Polish and Czech) from its beginnings to the present with emphasis on the most important trends: Renaissance, Romanticism, Positivism/Realism, Modernism and Avant-guard; Socialist realism, and Post-modernism. The course combines lecture, discussion and small group activities. Movie clips, recordings, and slides are used to reflect various cultural dimensions of West Slavic Civilization. No knowledge of Polish or Czech is required. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 506.

SLAV 710. Introduction to Slavic Languages and Linguistics. 3 Credits.
The Slavic languages and peoples, including briefly: their origin, prehistory, and early culture. Basic linguistic methodology as applied to Slavic material from the beginnings of Slavic linguistics to the present.

SLAV 712. Russian Poetry: Twentieth Century. 3 Credits.
Readings from the works of the major poets, in Russian. Prerequisite: Language proficiency.

SLAV 722. The Grammatical Categories of Russian: Linguistic Units, Functions and Meanings. 3 Credits.
This course covers the main grammatical categories of Russian, including word formation, case, animacy, voice and reflexive verbs, imperatives, aspect, and word order. It is intended not only for linguists but anyone seeking a better understanding of the grammatical systems of Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 522. Prerequisite: Two years of Russian language study or the equivalent.

SLAV 723. Soviet and Post-Soviet Russian Cinema. 3 Credits.
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. Not open to students with credit in SLAV 322/FMS 322. (Same as FMS 722.) Prerequisite: Graduate standing or instructor permission.

SLAV 726. Chekhov. 3 Credits.
A study of the life and works of Anton Chekhov. Open to senior Russian majors and graduate students. Readings in Russian. Prerequisite: Three years of Russian or the equivalent.

SLAV 732. Dostoevsky. 3 Credits.
A study of the life and works of Fyodor Dostoevsky. In translation. No prerequisite. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 532.

SLAV 734. Tolstoy. 3 Credits.
A study of the life and works of Leo Tolstoy. In translation. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 534.

SLAV 740. Introduction to Graduate Studies in Slavic Languages and Literatures. 3 Credits.
This course is an introduction to the skills required of students doing graduate degrees in Slavic languages and literatures; areas covered include 1) introduction to literary theory and criticism, 2) bibliography and research methods, including database management software, 3) preparation and presentations of a research/conference paper, 4) technology training, including web design, on-line portfolio, and digital humanities, and 5) professional ethics and awareness of the academic market and alternative careers. We will also be working on practical, professionally useful goals, such as how to (better) make use of technology, how to create a CV and modify it for different positions, how to write an abstract, and how to produce a conference paper. Course requirements will include a variety of smaller assignments and two larger projects, a web-based professional portfolio and an 8 to 10-page conference paper.

SLAV 748. Old Church Slavic. 3 Credits.
A course in the first written language of the Slavs (9-12th centuries AD), with discussion of Indo-European, Baltic and Common Slavic background. Prerequisite: Two years of Russian or the study of another ancient Indo-European language.

SLAV 754. Seminar in Slavic Verbal Aspect. 3 Credits.
A detailed examination of the morphology and usage of verbal aspect in Russian and other Slavic languages, which is a particularly troublesome area for foreign learners of Russian. Prerequisite: SLAV 522.

SLAV 760. The Russian Novel in the Age of Realism. 3 Credits.
This course traces the evolution of the Russian novel from its beginnings with Pushkin and through the novels of Turgenev, Goncharov, Dostoevsky, Tolstoy, and others. In translation. Russian majors will read most works in Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 550. Prerequisite: Two years of Russian language or consent of the instructor.

SLAV 762. Russian Theatre and Drama from Stanislavski and Chekhov to the Present. 3 Credits.
A study of the development of Russian theatre and dramatic literature from 1898 to the present. Lectures and readings in English. (Same as THR 725.)

SLAV 764. The Woman Question in Nineteenth-Century Russian Literature. 3 Credits.
An exploration of the "woman question" in nineteenth-century Russia as treated in literary texts. Authors to be included are: Tolstoy, Turgenev, Dostoevsky, Chekhov, as well as women writers such as Karolina Pavlova and Evgenia Tur, and prominent literary and social critics. Readings in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 564.

SLAV 767. Post-Soviet Literature. 3 Credits.
A survey of post-Soviet literary art, from approximately 1985 to the present, dealing with a range of subjects including the emergence of literature from the strictures of socialist realism and its relationship to concepts of postmodernism and postcolonialism. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 567.

SLAV 772. Russian and East European Science Fiction. 3 Credits.
A comprehensive introduction to Russian, Soviet, and East European science fiction as it emerged in dialogue with utopian thinking, fantasy writing, and other cultural trends, and to how it responded to wider social contexts. Particular emphasis will be placed on the unique features of the Slavic science fiction tradition and its relationship the dominant Western forms of the genre. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 572.

SLAV 804. Comparative Slavic Linguistics. 3 Credits.
An examination of the development of the Slavic languages from the Common Slavic period to the present, proceeding from Indo-European. Prerequisite: Graduate standing in Russian.

SLAV 824. Proseminar in Methods of Teaching Slavic Languages I. 1-3 Credits.
Required for all teaching assistants, assistant instructors engaged in the teaching of Slavic languages and persons planning for careers in teaching Slavic languages. Combines discussion of theoretical teaching concepts with practical solution of problems arising concurrently in Slavic language courses. Students enrolled for two or three hours will study advanced Slavic grammar topics and stylistics as they apply to the teaching of Slavic languages.

SLAV 899. Ph.D. Seminar Slavic Linguistics. 3 Credits.
Topics in Slavic linguistics. Content will vary. May be repeated. Prerequisite: Ph.D. student in Slavic Languages and Literatures.

SLAV 999. Dissertation. 1-9 Credits.
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis.

Courses

TURK 104. Elementary Turkish I. 5 Credits. U F1
Basic language acquisition, including essentials of grammar, speaking, and writing standard (Osmanli) Turkish.

TURK 108. Elementary Turkish II. 5 Credits. U F2
Continuation of TURK 104. Prerequisite: TURK 104.

TURK 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Turkish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

TURK 204. Intermediate Turkish I. 3 Credits. U F3
Second-year course in Turkish language with emphasis on reading, composition, and conversation. Prerequisite: TURK 108.

TURK 208. Intermediate Turkish II. 3 Credits. U F4
Continuation of TURK 204. Prerequisite: TURK 204.

TURK 310. Modern Turkey: Culture and Society. 3 Credits. H/W
As a country that is geographically in the middle of a strategic global region, a key NATO ally, a candidate for EU membership, and representing a mix of democratic traditions, military coups, and authoritarian leaders combined with periods of rapid and drastic socioeconomic transformation, for one reason or another, Turkey seems to always be a country under the spotlight. This course is designed to give an overview of Modern Turkey and familiarize the student with its history, society and culture. Topics to be covered include the early republican period, ethic and religious minorities, religion and secularism, music, cuisine, women, gender and sexuality, religious and national holidays, cinema and TV, among others. The primary purpose of this course is to help students develop necessary analytical and interpretive skills to identify, compare, and analyze Turkish cultural practices, products and perspectives as they relate to basic social, political, and historical contexts. No background knowledge of Turkey or the Turkish language is required. (Same as GIST 310 and SLAV 310.)

TURK 314. Turkish Culture Through Film and Literature. 3 Credits. H
This course introduces the student to Turkish culture, with a focus on the 20th and 21st centuries, mainly through films and literature. Among the topics are Turkey's geography, politics, history, religion, feminism, poetry, music and cuisine. This interdisciplinary course does not require any previous knowledge of Turkey or the Turkish Language; it is open to both undergraduate and graduate students. Representative works of major authors and film directors will be discussed and analyzed in their historical, political and theoretical contexts. The course is offered at the 300 and 500 levels, with additional assignments at the 500-level.

TURK 514. Turkish Culture Through Film and Literature. 3 Credits. H
This course introduces the student to Turkish culture, with a focus on the 20th and 21st centuries, mainly through films and literature. Among the topics are Turkey's geography, politics, history, religion, feminism, poetry, music and cuisine. This interdisciplinary course does not require any previous knowledge of Turkey or the Turkish Language; it is open to both undergraduate and graduate students. Representative works of major authors and film directors will be discussed and analyzed in their historical, political and theoretical contexts. The course is offered at the 300 and 500 levels, with additional assignments at the 500-level. Prerequisite: REES 550 or permission of instructor.

TURK 675. Readings in Turkish: _____ 3 Credits. U FP
Bachelor of Arts in German Studies

Why study German Studies?

Knowledge of the language and culture of German-speaking Europe provides students with linguistic and transcultural competence that will enable them to participate productively in a rapidly changing world. German is an official language in six central European countries and the most widely spoken language in the European Union. The United States maintains important economic, political, security, and cultural ties with the German-speaking countries. About 50 million people in the United States claim German ancestry.

Our students complete a diverse and challenging program that encompasses not only the German language but also courses that explore literature, the arts, history, business, and politics. Our program is characterized by interdisciplinary flexibility, a variety of co-curricular activities, and personalized academic advising and mentoring.

Courses

UKRA 104. Elementary Ukrainian I. 5 Credits. U F1
First semester. Five hours per week of recitation and drill in the spoken language. Essentials of grammar, practice reading, writing and speaking Ukrainian.

UKRA 108. Elementary Ukrainian II. 5 Credits. U F2
Second semester. Continuation of UKRA 104. Prerequisite: UKRA 104.

UKRA 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Ukrainian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

UKRA 204. Intermediate Ukrainian I. 3 Credits. U F3
Second year course in Ukrainian language with emphasis on reading, composition, and conversation. Prerequisite: UKRA 108.

UKRA 208. Intermediate Ukrainian II. 3 Credits. U F4
Second semester. Continuation of UKRA 204. Prerequisite: UKRA 204.

UKRA 504. Advanced Ukrainian I. 3 Credits. H
This is a practical Ukrainian language course that will help students acquire advanced-level proficiency in the skills of speaking, reading, writing, and listening. Cultural understanding and pragmatic competence are given special emphasis. Taught in Ukrainian. Designed for students who have had two or more years of Ukrainian language. Prerequisite: UKRA 208 or consent of instructor.

UKRA 508. Advanced Ukrainian II. 3 Credits. H
This is a practical Ukrainian language course that will help students acquire advanced-level proficiency in the skills of speaking, reading, writing, and listening. Cultural understanding and pragmatic competence are given special emphasis. Taught in Ukrainian. Designed for students who have had two-and-a-half or more years of Ukrainian language. Prerequisite: UKRA 504 or consent of instructor.

UKRA 675. Readings in Ukrainian Language. 1-6 Credits. H FP
Directed individual readings on various topics concerning the Ukrainian language. Prerequisite: Two years of Ukrainian.

The College of Liberal Arts and Sciences is no longer admitting students to this degree.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

The following should be completed as early as possible:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 104</td>
<td>Elementary German I</td>
<td>5</td>

</tbody>
</table>
Requirements for the B.A. Major

Required Courses

After completion of GERM 202 Intermediate German II, students must complete 15 credits as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 301</td>
<td>High Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 302</td>
<td>High Intermediate German II</td>
<td>3</td>
</tr>
<tr>
<td>GERM 315</td>
<td>Magic, Murder, Monsters: German Literature and the Modern Era</td>
<td>3</td>
</tr>
<tr>

<td>Advanced German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 580</td>
<td>Senior Capstone Course: German-Speaking Europe Today</td>
<td>3</td>
</tr>
</tbody>
</table>

GERM 315 must be completed before students can take a course beyond GERM 402 (except GERM 462).

Admission to 400- and 500-level courses after GERM 402 (except GERM 462) without completion of GERM 315 is only with permission of the Undergraduate Advisor.

Elective Courses

A minimum of 15 credit hours at the 300, 400, and 500 levels must be completed beyond the required courses. 12 of these credit hours must be at the 400 or 500 level. In exceptional cases, undergraduates may take courses at the 600 level with permission of the Undergraduate Advisor and the instructor.

With permission of the Undergraduate Coordinator, 6 credit hours (300-500 level) may be counted toward the major by completing two approved courses offered in English by German Studies or offered by other departments with significant content related to German-speaking Europe.

German studies majors are strongly encouraged to study abroad and should discuss this opportunity with the Undergraduate Coordinator early in their undergraduate career.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:

Major Hours

Satisfied by 30 hours of major courses.

Major Hours in Residence

At least 15 hours of coursework at the 300, 400, and 500 levels, including the senior capstone course, GERM 580, must be completed in residence at KU.

Major Junior/Senior Hours

Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in German Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

To qualify for the B.A. in German Studies with departmental honors, the student must have a minimum grade point average of 3.5 in German Studies at graduation. Students must complete an honors research project during their final year at KU. Topics are selected in consultation with the faculty thesis director from German Studies. Applications for departmental honors are normally during the fall of senior year. Upon acceptance of an application, the student registers for the GERM 401 (Major Requirement) in the fall and the GERM Elective 300-500+ (Major Requirement) in the spring. The student presents the completed research project to the Departmental Honors Committee about one month before concluding his or her final semester at KU. A grade of B or higher in GERM 598 and GERM 599 is required for departmental honors. GERM 598 and GERM 599 may not be used to satisfy other course requirements.

**Study Abroad**

German Studies conducts two Summer Language Institutes in Germany for students in second-, third-, and fourth-year German. Students normally enroll for 6-9 credit hours and live with German families.

Juniors and seniors are encouraged to spend a semester or a full academic year at a university in Germany. Consult with the Office of Study Abroad and the Undergraduate Advisor early in your undergraduate career.

German Studies offers competitive study abroad scholarships. Graduating seniors may apply for Direct Exchange Program fellowships at universities in Germany. For information, consult the department (http://germanic.ku.edu/) or the Office of International Programs (http://www.studyabroad.ku.edu/).

**Bachelor of Arts in Slavic, German, and Eurasian Studies**

**Why study Slavic languages and literatures?**

If you have turned on a TV set or logged on Twitter lately, you probably have seen a news item on Russia or Ukraine, not to mention countries like Turkey and Iran. From Russian, Polish, Ukrainian, to Bosnian/Croatian/Montenegrin/Serbian (BCMS), to Czech, Turkish, Persian/Tajik/Dar/Farsi, you probably have seen a news item on Russia or Ukraine, not to mention countries like Turkey and Iran. From Russian, Polish, Ukrainian, to Bosnian/Croatian/Montenegrin/Serbian (BCMS), to Czech, Turkish, Persian/Tajik/Dar/Farsi, to Yiddish, our department offers only critical languages. In fact, the US government classifies these languages as critical (https://www.nsep.gov/content/critical-languages) for national security interests, and there are a number of federal scholarships that you can apply for to study them.

Think about how Russia has become a power player even in just US politics the last few years through hacking or other cybersecurity threats. With the end of the Cold War, the study of languages like Russian has considerably decreased in the US, and as this language has become more important to national security and the global economy, there are not nearly enough Americans who speak it. The US government and national and international employers need individuals with specialized language skills. Some of these languages can be more challenging, but we commit to helping students advance in them. You do not need to have special language abilities to study a language like Russian, you just have to come to class and do the same things you would in any other class, just with a more fun alphabet. And if you consider how many people study more commonly taught languages like Spanish and French, you could take in to these beautiful, off-the-beaten path places! You can go to Moscow, Russia and study at the Higher School of Economics for a
semester. Or you can spend your summers in Nur-Sultan, Kazakhstan, or Zadar, Croatia and Lviv, Ukraine.

And we don’t just offer language learning. Our department is multi-disciplinary and we want our students to come out with strong cultural awareness of the region, but also core critical thinking and writing skills. So you can study a language, but also learn about vampires in Slavic and American culture, or robots and scifi writings, explore the linguistic reflections of identity, while reading about socialism, Marxism, and other varieties of Russian political thought.

We welcome applicants from all backgrounds to consider a Slavic major or minor in combination with another field of study.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Requirements for the B.A. Major**

The student completes a minimum of 30 hours of study (29 hours for Russian emphasis) in one of 5 concentrations: German, Polish, Russian, South Slavic (Bosnian/Croatian/Montenegrin/Serbian), and Russian, East European, and Eurasian Studies. The department encourages students to fulfill core requirements from courses in the SLAV 140/SLAV 141, SLAV 144/SLAV 145, and SLAV 148/SLAV 149 series, GERM general education courses, or the REES 110/REES 111/REES 310 or REES 220/REES 221 series. Beyond the minimum required hours, students are strongly encouraged to take additional courses in the Slavic, German, and Eurasian Studies department and appropriate background courses in the history, philosophy, and political science of the respective regions.

**German Studies Concentration**

We offer students a diverse and challenging program in the language and culture of German-speaking Europe, including literature, the arts, history, business, and politics. Courses at the 100, 200, and 300 levels emphasize student involvement with the aim of developing students’ use of the German language, including the ability to comprehend, interpret, and produce spoken, written, and multimedia texts in different genres.

Cultural topics are integrated into instruction starting in the first semester. At the 400 and 500 levels, survey courses provide students with a broader perspective on German cultural traditions, while other advanced courses often have a thematic focus. Courses taken in departments such as the history of art, philosophy, political science, sociology, and theatre will enhance students’ study of the language and culture of German-speaking Europe.

**First- and Second-Year Preparation**

The following should be completed as early as possible:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 104</td>
<td>Elementary German I</td>
<td>5</td>
</tr>
<tr>
<td>GERM 108</td>
<td>Elementary German II</td>
<td>5</td>
</tr>
<tr>
<td>GERM 201</td>
<td>Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 202</td>
<td>Intermediate German II</td>
<td>3</td>
</tr>
</tbody>
</table>

**Required Courses**

After completion of GERM 202 Intermediate German II, students must complete 15 credits as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 301</td>
<td>High Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 302</td>
<td>High Intermediate German II</td>
<td>3</td>
</tr>
<tr>
<td>GERM 315</td>
<td>Magic, Murder, Monsters: German Literature and the Modern Era</td>
<td>3</td>
</tr>
<tr>
<td>GERM 401</td>
<td>Advanced German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 580</td>
<td>Senior Capstone Course: German-Speaking Europe Today</td>
<td>3</td>
</tr>
</tbody>
</table>

GERM 315 must be completed before students can take a course beyond GERM 402 (except GERM 462).

Admission to 400- and 500-level courses after GERM 402 (except GERM 462) without completion of GERM 315 is only with permission of the Undergraduate Advisor.

**Elective Courses**

A minimum of 15 credit hours of GERM courses at the 300, 400, and 500 levels must be completed beyond the required courses. 12 of these credit hours must be at the 400 or 500 level. In exceptional cases, undergraduates may take courses at the 600 level with permission of the Undergraduate Advisor and the instructor.

With permission of the Undergraduate Coordinator, 6 credit hours (300-500 level) may be counted toward the emphasis by completing two approved courses offered in English by Slavic, German, and Eurasian Studies or offered by other departments with significant content related to German-speaking Europe.

German studies students are strongly encouraged to study abroad and should discuss this opportunity with the Undergraduate Coordinator early in their undergraduate career.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:
Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
At least 15 hours of coursework at the 300, 400, and 500 levels, including the senior capstone course, GERM 580, must be completed in residence at KU.

Major Junior/Senior Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

</table>
While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Slavic, German, and Eurasian Studies with concentrations in the following can be found here: German Studies, (p. 1784) Polish (p. 1784), Russian (p. 1785), Russian, East European, and Eurasian Studies (p. 1786), South Slavic Studies (p. 1787) or by using the left-side navigation.

**Departmental Honors**
Undergraduates with a grade-point average of 3.5 in Slavic courses are eligible for departmental honors. Before enrolling, students must consult an undergraduate advisor to formulate an appropriate topic. Students complete SLAV 499 Honors Thesis (3 hours above the major requirements) during 1 semester of the senior year. The honors thesis is evaluated by a committee of 3 faculty members. The candidate makes an oral defense before this committee.

**Study Abroad**
The department offers a semester study abroad program at the Higher School of Economics in Moscow, Russia, and in conjunction with the Center for Russian, East European, and Eurasian Studies, conducts summer institutes at universities in:
- Nur-Sultan, Kazakhstan (for Russian)
- Lviv, Ukraine (for Ukrainian)
- Zadar, Croatia (for Croatian)
- Almaty, Kazakhstan (internship program)

Consult the Slavic department office or the Office of Study Abroad. Credit for non-KU programs is not automatic and is evaluated in consultation with the Slavic department undergraduate director.

Undergraduate and graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

**Slavic Language Programs in Russia and Eastern Europe**
KU students may take intermediate or advanced Bosnian/Croatian/Serbian at a 6-week summer institute in Croatia or attend a summer language program in Poland.

Graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.
### BA in Slavic, German, and Eurasian Studies with concentration in German Studies

#### Total Hours 120

1. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
2. The Polish emphasis requires 4 courses (12 hours) of electives. Visit the degree requirements (p. 1779) tab for a list of approved electives.
3. Typically Goal 6 is fulfilled with a major course. If a major course is not approved for Goal 6, plan to take a course outside of the major. A free elective may need to be used to fulfill pre-requisites.
4. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Total Hours 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (https://catalog.ku.edu/search/?P=ENGL %20102) (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. The BA degree requires 4th-semester language proficiency. The REES major requires 4th-semester language proficiency in a Russian, Eastern European, or Eurasian language.

4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

5. 21 hours of interdisciplinary area studies courses focusing on Russia, Eastern Europe, and Eurasia. Most courses offered by the Department of Slavic, German, and Eurasian Studies count as electives. CREES posts a list of eligible courses on its website prior to enrollment each semester, and other courses may be approved in consultation with CREES.

6. Capstone Options:
   - GIST Option: GIST 610 and GIST 698
   - HIST Option: HIST 301 and HIST 696
   - Literature, Linguistics and Culture Option: SLAV 495 and SLAV 510 or SLAV 600 or SLAV 710
   - Politics Option: POLS 306 and POLS 493 or POLS 498

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours, of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BA in Slavic, German, and Eurasian Studies with concentration in South Slavic Studies

Below is a sample 4-year plan for students pursuing the BA in Slavic, German, and Eurasian Studies with a concentration in South Slavic Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. The South Slavic Studies emphasis requires 5 courses (15 hours) of electives. For a list of approved electives visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/slavic-languages-literature/ba/#requirements#text) tab.
4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

### Major in Russian, East European, and Eurasian Studies

**Why study Russian, East European, and Eurasian Studies?**

The University of Kansas Russian, East European, and Eurasian Studies (REES) program covers a broad geographic region, home to rich and diverse cultures that have had an enormous impact on today's world. Interdisciplinary study of Russia, Eastern Europe, and Eurasia creates informed citizens with in-depth understanding of this geopolitically and culturally critical world region, which plays a central role in today's political, economic, cultural, and environmental issues.

The KU REES program is collaborative and interdisciplinary in nature, and offers a unique opportunity to study contemporary politics and medieval history, environmental problems and great works of literature and art, as well as multiple other related subjects. It offers opportunities to study abroad in a variety of culturally rich, exciting places. Crucially, it prepares students for a wide range of careers in research, business, government, and the nonprofit sector, with the opportunity to make a profound impact on both national and international levels.

The College of Liberal Arts and Sciences is no longer admitting students to this degree.

### Undergraduate Admission

#### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

#### Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.
Requirements for the Major
Bachelor of Arts in Russian, East European, and Eurasian Studies Course Requirements

Students take intensive REES language and course work to enhance their traditional disciplinary study. The most common REES major combinations are with Global & International Studies, Slavic Languages & Literatures, Political Science, and History.

Prerequisite Language Skills

Students selecting this major must complete 4th semester proficiency in a Russian, East European, or Eurasian language. This entails completion of one of the following courses:

- Bosnian-Croatian-Serbian:
  - BCRS 208 Intermediate Bosnian/Croatian/Serbian II
- Czech:
  - CZCH 208 Intermediate Czech II
- Polish:
  - PLSH 208 Intermediate Polish II
- Iranian/Dari/Tajik Persian:
  - PERS 210 Intermediate Iranian/Dari/Tajik Persian I
- Russian:
  - RUSS 208 Intermediate Russian II
- Turkish:
  - TURK 208 Intermediate Turkish II
- Uyghur:
  - UYGR 202 Intermediate Uyghur II
- Ukranian:
  - UKRA 208 Intermediate Ukrainian II

Introductory Course

Satisfied by one of the following:

- REES 110 Understanding Russia and Eastern Europe
- REES 111 Understanding Russia and Eastern Europe, Honors
- REES 310 Understanding Russia and Eastern Europe
- REES 311 Understanding Russia and Eastern Europe, Honors
- REES 220 Societies and Cultures of Eurasia
- REES 221 Societies and Cultures of Eurasia, Honors
- SLAV 140 Understanding Russia
- SLAV 141 Understanding Russia, Honors
- HIST 117 Russia, An Introduction

REES Area Studies Electives

21 hours of interdisciplinary area studies courses focusing on Russia, Eastern Europe, and Eurasia, taken in consultation with the advisor. Out of the 21 distribution hours, 12 should be upper-division area studies courses (300 level and higher).

Research Methods and Capstone Experience

Satisfied by one of the following tracks, typically completed in the senior year, culminating in a final capstone paper. Students are encouraged to select a track based on their interests and the availability of courses. Students taking a methods/capstone sequence in another department may petition to substitute that sequence.

Global and International Studies Track:

Majors are strongly encouraged to study abroad. Please see your advisor about this opportunity.

Russian, East European, and Eurasian Major Hours & GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the major in Russian, East European, and Eurasian Studies (REES). The REES major requires 4th-semester language proficiency in a REES language, plus one additional semester of an advanced language course (i.e. 5th semester language course).

To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. The BA degree requires 4th-semester language proficiency. The REES major requires 4th-semester language proficiency especially in a Russian, Eastern European, or Eurasian language.

3. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

4. The REES major requires 18.0 hours of elective course work from each of the following geographic distribution categories: Russia & Eastern Europe, South & Central Europe, and Europe & Central Eurasia; and each of the following disciplinary distribution areas: Arts, Culture, & Religion, History, and Social Sciences. There is not a specific order these must be taken, but it is recommended to take Jr/Sr level courses when possible.

5. A list of courses that fulfills this requirement can be found under the degree requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours, of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Honors

#### Departmental Honors

Honors in Russian, East European, and Eurasian Studies is open to REES majors who have earned, both at the time of entry into the program and at graduation, a grade-point average of 3.5 or higher in courses that satisfy requirements for the REES major.

Students must complete REES 492 Research Methods in Russian, East European, and Eurasian Studies and REES 499 (Honors) Capstone Seminar in Russian, East European, and Eurasian Studies with a grade of B or better. The research paper produced in REES 499 must demonstrate the student’s proficiency in at least one of the REES languages through the use of foreign language sources. The paper is evaluated by an honors committee of at least three REES faculty members who have read and commented on the research paper and heard its oral defense. The committee is constituted by the student in consultation with either the director or associate director of CREES.

### Study Abroad

Though not required, study abroad is strongly encouraged. Courses taken abroad may count toward the major if approved by the REES advisor.

Consult the Center for Russian, East European, and Eurasian Studies (http://www.crees.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information about programs.

### Minor in German Studies

#### Why study German Studies?

Knowledge of the language and culture of German-speaking Europe provides students with linguistic and transcultural competence that will enable them to participate productively in a rapidly changing world. German is an official language in six central European countries and the most widely spoken language in the European Union. The United States maintains important economic, political, security, and cultural ties with the German-speaking countries. About 50 million people in the United States claim German ancestry.
Our students complete a diverse and challenging program that encompasses not only the German language but also courses that explore literature, the arts, history, business, and politics. Our program is characterized by interdisciplinary flexibility, a variety of co-curricular activities, and personalized academic advising and mentoring. German Studies majors and minors acquire research skills they need to study issues relevant to our field. Many German Studies majors and minors study abroad for a summer, semester, or year, often supported by departmental scholarships, and some complete internships in Germany. All German Studies students have opportunities to make use of the rich resources available at KU, including the Spencer Museum of Art, KU Libraries, Max Kade Center for German-American Studies, Office of Study Abroad, Center for Undergraduate Research, and Career Center. Our students tend to have a second major or a minor in fields such as Global & International Studies, History, Business, Environmental Studies, Music, Microbiology, and Linguistics.

Our graduates have pursued their passion for language and culture in many ways: working for a non-profit organization affiliated with the U.S. Department of State; translating for a medical software company; serving on the human resources team of a global German sporting goods company; teaching high school German; working as copy editor of a newspaper; and pursuing graduate work in Germanic Languages & Literatures, social welfare, law, and speech pathology.

Requirements for the Minor

The minor requires 18 hours in courses numbered 300 and above. The prerequisite is completion of the proficiency sequence in German (GERM 202 or equivalent).

German Studies Minor Course Requirements

Required Courses

After completion of GERM 202: Intermediate German II, students must complete the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 301</td>
<td>High Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 302</td>
<td>High Intermediate German II</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses

12 additional hours at the 300, 400, and 500 levels. GERM 315 is strongly encouraged because it is a prerequisite for courses above GERM 402 (except GERM 462).

With permission of the Undergraduate Coordinator, one approved 3-credit course offered in English by German Studies or by another department with significant content related to German-speaking Europe (300-500 level) may be counted toward the German minor. A 600-level course may be counted only with approval of the Undergraduate Coordinator.

Minor Hours & GPA

While completing required courses, minors must also meet each of the following hour and grade point average minimum standards:

| Minor Hours                              | 18 hours of minor courses. |
| Minor Hours in Residence                 | Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor. |

Minor Junior/Senior Hours

Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Minor in Russian, East European, and Eurasian Studies

Why study Russian, East European, and Eurasian Studies?

The University of Kansas Russian, East European, and Eurasian Studies (REES) program covers a broad geographical region, which is home to rich and diverse cultures that have had an enormous impact on today's political, economic, cultural, and environmental issues. The interdisciplinary study of Russia, Eastern Europe, and Eurasia creates culturally informed citizens who can act on national and international issues.

The REES minor is highly flexible. It complements traditional disciplinary study in another field with REES coursework and general area knowledge.

Minor in Slavic Languages and Literatures

Why study Slavic languages and literatures?

The study of Russia, Eastern Europe, and Eurasia studying their languages and cultures gives you a different perspective on the world we live in and allows you to pursue in demand professional opportunities in business and national security.

The Department of Slavic, German, and Eurasian Studies offers comprehensive undergraduate programs in Russian, Polish, and Bosnian/Croatian/Serbian and their literatures, and cultures. For each language, we offer a core curriculum of 3+ years of language study emphasizing all four skills (speaking, listening, reading and writing), supplemented by courses in culture, literature and linguistics. We also offer intensive Russian in the summer. For study abroad, we offer summer and semester options at the Higher School of Economics in Moscow, Russia, as well as a summer study abroad programs in Lviv, Ukraine.

The minor can add a unique global aspect to another career choice and field of study. It prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as translation, international business, art, art history, and travel.

Requirements for the Minor

6 minor tracks are offered.

Polish Studies Track

Students choosing this minor track must complete courses as indicated in following areas:

Slavic Culture, Satisfied by two of the following:

- SLAV 140/141 | Understanding Russia | 6 |
- SLAV 144/145 | Survey of Russian Literature in Translation | 6 |
- SLAV 148/149 | Introduction to Slavic Folklore | 6 |
- SLAV 340/341 | The Language Landscape of Eastern Europe | 6 |

**Junior/Senior Slavic Literature and Culture. Satisfied by 3 junior/senior (300+) SLAV courses (9 hours) from the following:**

- SLAV 318 | Jews and Slavs in Eastern Europe | 9 |
- SLAV 510 | The Russian Literary Genius | 9 |
- SLAV 516 | Love, Lust and Liberty: Polish and Czech Film Adaptations | 9 |
- SLAV 532 | Dostoevsky | 9 |
- SLAV 534 | Tolstoy | 9 |
- SLAV 564 | The Woman Question in Nineteenth-Century Russian Literature | 9 |
- SLAV 626 | The Cultural Impact of Ottoman Empire on the South Slavs | 9 |
- SLAV 664 | Soviet Russian Literature: 1930-1990 | 9 |
- SLAV 667 | Post-Soviet Literature | 9 |
- SLAV 668 | Nabokov | 9 |
- SLAV 762 | Russian Theatre and Drama from Stanislavski and Chekhov to the Present | 9 |

### Minor Hours & Minor GPA
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.
Minor Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Slavic Jewish Studies Track

Students choosing this minor track must complete courses as indicated in following areas:

9 hours in South Slavic languages, history, cultures, or literatures at the 300 level or above, chosen from courses in the South Slavic studies emphasis

Required Electives. Satisfied by 3 courses (9 hours) chosen from the following: 9

Geography
- GEOG 590 Understanding Central Asia
Undergraduate Certificate in Slavic and Eurasian Languages

BCRS 380  Intensive Croatian (summer in Croatia)
BCRS 675  Readings in Bosnian/Croatian/Serbian
ECON 560  Economic Systems
HIST 377  Everyday Communism in Eastern Europe
SLAV 316  The Peoples and Cultures of Southeastern Europe Through Film
SLAV 340/341  The Language Landscape of Eastern Europe
SLAV 558  Readings in Slovene
SLAV 626  The Cultural Impact of Ottoman Empire on the South Slavs
SLAV 630  Slavic Folklore
SLAV 679  Topics in: _____ (Slavic Culture)

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the field of study including F’s and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Study Abroad

The department offers a semester study abroad program at the Higher School of Economics in Moscow, Russia, and in conjunction with the Center for Russian, East European, and Eurasian Studies, conducts summer institutes at universities in

- Nur-Sultan, Kazakhstan (for Russian)
- L’viv, Ukraine (for Ukrainian)
- Zadar, Croatia (for Croatian)
- Almaty, Kazakhstan (internship program)

Consult the Slavic department office or the Office of Study Abroad. Credit for non-KU programs is not automatic and is evaluated in consultation with the Slavic department undergraduate director.

Undergraduate and graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

Slavic Language Programs in Russia and Eastern Europe

KU students may take intermediate or advanced Bosnian/Croatian/Serbian at a 6-week summer institute in Croatia or attend a summer language program in Poland.

Graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

Undergraduate Certificate in Slavic and Eurasian Languages

The language certificate, which consists of the equivalent of two years of language study, aims to give students basic intermediate level proficiency in any of the languages in the department, a training that can serve as a helpful professional credential to be paired with another degree.

Generally, completion of two elementary and two intermediate language courses in a single language offered in the department. The table below shows the courses that will be part of this certificate. The actual course list will be maintained on a website so that the courses counting toward the certificate can be updated routinely as the languages available at KU change, which could occur with changes in Title VI funding and with changes in departmental faculty. Any language taught by the department will be added to the website list of languages that satisfy the requirements of this certificate.

Complete one of the language sequences below.

Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year; .50 full-time equivalent (FTE) appointments come with:
- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed, based on funding availability and performance, for up to 3 years for M.A. students, and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs receive thorough training in language instruction, close mentoring, and the opportunity to teach at a variety of levels, which provides a strong base of teaching experience upon entering the job market.

### Additional Funding

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/funding/) for KU graduate students.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Graduate Admission

Apply to the graduate program via the Graduate Studies online application system (https://gradapply.ku.edu/apply).

For additional information regarding departmental admissions requirements, deadlines and the application process, please visit the graduate page of the Slavic and Eurasian Languages and Literatures (http://slavic.ku.edu/) website.

### Slavic Languages and Literatures Concentration

#### Requirements

1. At least 30 hours of graduate work in Slavic languages and literatures including SLAV 710 and SLAV 824, and a minimum of 3 courses in Slavic literature and 3 courses in Slavic linguistics.
2. A written and oral examination.

At least 50% of coursework for the master’s degree must be taken at the 700 level or above.

For students who plan to continue in the graduate program, the M.A. written and oral examination serves as a qualifying examination for advancement to Ph.D. work. For students who seek only the M.A. degree, successful completion of the M.A. written and oral examination signals the end of the program.

---

### Master of Arts in Slavic Languages and Literatures

#### M.A. Program Overview

The Master of Arts degree in Slavic Languages & Literatures provides students with foundational knowledge of the language, literature, culture, and linguistics of a region of study (Russian, Polish, Bosnian-Croatian-Serbian). Working in a collegial and supportive environment, M.A. students learn the general contours and common ground of the field; read key works embedded in their historical, cultural, stylistic, and genre contexts; learn various methodological and theoretical frameworks and strategies; improve their language capacity, and develop research, writing, interpretive, and technological skills.

The M.A. prepares students for several career pathways. While completion of the M.A. is most often the gateway to Ph.D. work in the field, many students use the M.A. to build skills for a professional career. KU Slavic M.A. students go on to satisfying work in the public and private sectors, in the U.S. and abroad.

#### Departmental Funding

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year; .50 full-time equivalent (FTE) appointments come with:
- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed, based on funding availability and performance, for up to 3 years for M.A. students, and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs receive thorough training in language instruction, close mentoring, and the opportunity to teach at a variety of levels, which provides a strong base of teaching experience upon entering the job market.

For additional information regarding departmental admissions requirements, deadlines and the application process, please visit the graduate page of the Slavic and Eurasian Languages and Literatures (http://slavic.ku.edu/) website.
Students planning to work toward the Ph.D. may begin study of a second Slavic language during their M.A. work. Such study does not count toward M.A. degree requirements.

Students completing the M.A. degree without intent to continue to Ph.D. work have the opportunity, in consultation with the graduate advisor, to adjust their program to meet specific career goals.

**Russian, East European, and Eurasian Studies Concentration**

Requirements for the degree include 30 credit hours with at least 50% of coursework at or above the 700 level. The requirements for the degree are distributed as follows:

1. At least 1 course in a REES-area advanced foreign language (500-level or higher) for 3 credit hours.

2. 7 graduate-level area studies courses focusing on the REES region for a total of 21 credit hours, taken in consultation with the advisor.

3. Successful completion of one of the following research methods and capstone sequences, totaling 6 credit hours and culminating in a research paper using materials in the student’s chosen target language. Students may choose a given track based on their interests and the availability of courses. Students taking an equivalent methods/capstone sequence in another department may petition to substitute that sequence. Prior to enrolling in the second course in their selected sequence, students must have completed an advanced language course in the target language.

4. Pass a comprehensive examination in addition to regular course examinations. Information about opportunities and requirements for graduate work with a Russian or East European concentration in any department at KU may be obtained from the department.

Requirements may be modified in special cases with the director’s approval, particularly for students with special needs such as Experienced

Teacher Fellows, Foreign Area Officers, or candidates for degrees in the professional schools. All students are encouraged to study abroad.

**Study Abroad**

The department offers a semester study abroad program at the Higher School of Economics in Moscow, Russia, and in conjunction with the Center for Russian, East European, and Eurasian Studies, conducts summer institutes at universities in

- Nur-Sultan, Kazakhstan (for Russian)
- L’viv, Ukraine (for Ukrainian)
- Zadar, Croatia (for Croatian)
- Almaty, Kazakhstan (internship program)

Consult the Slavic department office or the Office of Study Abroad. Credit for non-KU programs is not automatic and is evaluated in consultation with the Slavic department undergraduate director.

Undergraduate and graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

**Slavic Language Programs in Russia and Eastern Europe**

KU students may take intermediate or advanced Bosnian/Croatian/Serbian at a 6-week summer institute in Croatia or attend a summer language program in Poland.

Graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

**Doctor of Philosophy in Slavic Languages and Literatures**

**Overview of Doctoral Program**

The Doctor of Philosophy degree in Slavic Languages & Literatures builds further on the foundational knowledge and the structured classroom learning that students engaged in during M.A. work. Working under the close mentorship of their advisors, Ph.D. students develop a minor in a related field, learn advanced pedagogical and interpretive strategies, continue to improve language skills, and engage in self-motivated, independent study to develop an area of specialization.

While most KU Ph.D. students find positions as academics, some choose to pursue professional positions in academic support, digital humanities, research, and government service. See Ph.D. Alumni ([http://slavic.ku.edu/doctor-philosophy-alumni-ku-slavic-department/) on the Department’s website.

**Areas of Concentration**

Two concentrations are offered in the Ph.D. program:

- Russian Literature
- Slavic Linguistics

Additional information regarding academic opportunities in culture, intellectual history, folklore, or language pedagogy is available on the departmental Ph.D. Overview ([http://slavic.ku.edu/phd-slavic-overview/]).
Departmental Funding
The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year; .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed, based on funding availability and performance, for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach at a variety of levels, providing them with a strong base of teaching experience upon entering the job market.

Additional Funding
There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for KU graduate students.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
Apply to the graduate program via the Graduate Studies online application (https://gradapply.ku.edu/) system.

For additional information regarding departmental admissions requirements, deadlines and the application process, please visit the graduate page of the Slavic and Eurasian Languages and Literatures (http://slavic.ku.edu/) website.

Ph.D. Degree Requirements
Students admitted to Ph.D. work in Russian literature or Slavic linguistics must fulfill M.A. requirements and pass the qualifying examination. Students also must fulfill all specific requirements in the concentration, master a western European language, complete and defend a professional Ph.D. portfolio, and write a dissertation.

All Ph.D. students are expected to enroll in courses in their concentrations numbered 500 and above offered in a given semester

1. If they have not previously had the courses or their equivalent,
2. If it is judged that the course material aids in preparation for the defense of the professional Ph.D. portfolio, and

3. If it is feasible to incorporate such courses into a given semester’s program.

Requirements for Ph.D. Concentration in Russian Literature
- Detailed knowledge of the history and development of Russian literature
- Oral and written competence in Russian language plus an orientation in its structure and history
- Reading competence in a second Slavic language and a general knowledge of the history of its literature
- A minimum of 9 graduate credit hours in a minor subject inside the department; some outside coursework may be considered with program approval.
- An acceptable dissertation

Requirements for Ph.D. Concentration in Slavic Linguistics
- Detailed knowledge of the structure and history of two Slavic languages, one of which is considered the student’s major language, plus reading competence in a third Slavic language (Knowledge of a third Slavic language is not required for students with a sub-concentration in second language studies).
- Oral and written competence in the major Slavic language
- A minimum of 9 graduate semester credit hours in a minor subject inside the department; some outside coursework may be considered with program approval.
- Basic knowledge of general and comparative linguistics
- An acceptable dissertation

Examinations
Qualifying Examination
All students must take the qualifying examination to be admitted to Ph.D. work. For KU students, the M.A. examination serves as the qualifying examination. Students who hold the M.A. degree from another institution but begin Ph.D. work at KU are required to take the qualifying examination within 2 semesters of entry into the program.

Research Skills & Responsible Scholarship Requirement
The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Graduate students in Slavic Languages and Literatures must demonstrate (through course work or examination) reading competence in a western European language, preferably French or German. The student must also take part in all required graduate colloquia. These cover a variety of topics intended to promote and model responsible scholarship and professional development. Faculty and graduate students participate in these colloquia each semester. Issues of responsible scholarship are also imbedded in the curriculum.

Professional ph.d. portfolio Examination
Students must pass an oral comprehensive examination consisting of their presentation and defense of their professional Ph.D. portfolio after fulfilling all other requirements for the Ph.D., with the exception of the dissertation. The professional Ph.D. portfolio includes the dissertation
prospectus as well as other materials that document the student's command of major and minor fields, ability to undertake research, and the skills necessary to traverse the profession independently.

**Dissertation Defense**

Students demonstrate satisfactory completion of the Ph.D. program in their final oral defense of the dissertation and its field and by prompt submission of the thesis.

**Study Abroad**

The department offers a semester study abroad program at the Higher School of Economics in Moscow, Russia, and in conjunction with the Center for Russian, East European, and Eurasian Studies, conducts summer institutes at universities in:

- Nur-Sultan, Kazakhstan (for Russian)
- L'viv, Ukraine (for Ukrainian)
- Zadar, Croatia (for Croatian)
- Almaty, Kazakhstan (internship program)

Consult the Slavic department office or the Office of Study Abroad. Credit for non-KU programs is not automatic and is evaluated in consultation with the Slavic department undergraduate director.

Undergraduate and graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

**Slavic Language Programs in Russia and Eastern Europe**

KU students may take intermediate or advanced Bosnian/Croatian/Serbian at a 6-week summer institute in Croatia or attend a summer language program in Poland.

Graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

**Department of Sociology**

**Why study sociology?**

The study of sociology provides valuable insights into the social institutions and processes that shape human behaviors, histories, and opportunities. Sociologists focus on the actions, beliefs, values, norms, organizations, institutions, and other social forces that characterize a society and shape people's lives. It directs attention to how the parts of society fit together as well as the causes and consequences of social change. The insight gained from the study of sociology leads to a greater understanding of how formal and informal rules of society contribute to different opportunities and constraints for different groups of individuals, and how these change over time. As a scientific discipline, sociology teaches students how to use empirical data to understand current social realities and act effectively on the central issues of our time. Few academic disciplines have such a broad scope and relevance.

**Undergraduate Programs**

The department educates sociologists for careers in teaching, research, and some applied fields. Undergraduate course work in sociology can contribute to professional training in architecture, business, education, journalism, law, medicine, public health, and social work.

Sociology majors can earn a Bachelor of Arts (BA) or Bachelor of General Studies (BGS). Both the BA and the BGS require a generous sampling of courses in the humanities, social sciences, and natural sciences. Because of its compatibility with other majors, many of our students earn double majors. For example, many sociology undergraduates also major in history, philosophy, political science, or anthropology, or earn a second degree in journalism.

Students majoring in a wide range of disciplines will find a minor in Sociology enhances their perspective on their field. Sociology is often the minor of choice for students majoring in Psychology, Anthropology, American Studies, Economics, Applied Behavioral Science, History, Political Science, and Global and International Studies and those in professional schools such as Journalism, Business, or Education.

**Graduate Programs**

The department offers a full graduate program in sociology leading to the M.A. and Ph.D. degrees, educating sociologists for careers in teaching and research and for fields of practical application. It also contributes to professional education in such fields as social welfare, social policy, architecture, education, journalism, personnel administration, business, and medicine. Aside from professional interests, the department offers instruction to assist students in deepening their understanding of social relations and, hence, of the social context of their own lives.

Students who are interested in enrolling in graduate level coursework in the Department of Sociology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s non-degree seeking webpage (https://sociology.drupal.ku.edu/non-degree-seeking/) for further details.

**Courses**

**SOC 104. Elements of Sociology. 3 Credits. SC S**

The study of social life, including how human groups are organized, how they change, and how they influence individuals. Consideration is given to a variety of human organizations and social institutions and how these groups and institutions both determine, and are determined by, human beings. This course may not be taken for credit by those who have taken SOC 304.

**SOC 105. Elements of Sociology, Honors. 3 Credits. SC S**

The study of social life, including how human groups are organized, how they change, and how they influence individuals. Consideration is given to a variety of human organizations and social institutions and how these groups and institutions both determine, and are determined by, human beings. Open only to students on dean's honor roll or enrolled in Honors Program, or consent of instructor. May not be taken by those who also have credit for SOC 304.

**SOC 130. Comparative Societies. 3 Credits. NW S/W**

Description and analysis of the culture, structure, and development of societies that are historically unrelated to the traditions of Western civilization.

**SOC 131. Comparative Societies, Honors. 3 Credits. NW S**

Description and analysis of the culture, structure, and development of societies that are historically unrelated to the traditions of Western Civilization. Open only to students enrolled in the University Honors program or by consent of instructor. May not be taken by students who have credit in SOC 130.
SOC 150. Self and Society. 3 Credits. SI S
Discuss the way our identities, values, and behavior have been and continue to be shaped by social and situational factors. Attention is paid to the influence of factors like language, culture, social roles, specific social institutions, and broad structures of inequality and power on how we see ourselves and others. May not be taken by anyone who has completed SOC 305 or its equivalent.

SOC 160. Social Problems and American Values. 3 Credits. SF S
This course is designed to explore competing explanations for the causes of, and cures for, the enduring problems of American society. The course critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. May not be taken by anyone who has already completed SOC 306 or its equivalent.

SOC 161. Social Problems and American Values, Honors. 3 Credits. SF S
Explores competing explanations for the causes of, and cures for, the enduring problems of American society. Critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. This course may not be taken for credit by those who have taken SOC 160 or SOC 306. Open only to students admitted to the University Honors Program or by consent of instructor.

SOC 177. First Year Seminar: ____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Sociology. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

SOC 199. Data I: Dealing with Data. 3 Credits. S
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as ECON 199, POLS 199 and PSYC 199.)

SOC 200. Sociological Introduction to: _____. 3 Credits. S
A sociological introduction to selected topics of current interest in Sociology. Please refer to the schedule of classes for current topics offered. Check the Sociology Department website for course descriptions of current special topics course offerings. May be repeated for credit as topics vary.

SOC 220. Sociology of Families. 3 Credits. SC S
Analysis of the family as a social institution primarily in the U.S. context. Topics considered are: current and historical changes in how the family is constituted, contrasting sociological theories of family relationships, sexuality in relation to family life, the coexistence of love and hate in families, family dissolution and reformation, and the care of children. A key theme is diversity: social class, gender, race/ethnicity, and age. May not be taken by anyone who has already taken SOC 308 or its equivalent.

SOC 230. Introduction to Social Inequality in the U.S.. 3 Credits. S
By the end of this course, students will be able to describe the major dimensions of inequality in the U.S. (including race, class, and gender), understand the structural basis of inequality, critically assess how inequality exists in major social institutions, and understand how inequalities in race, class, and gender shape social interaction.

SOC 280. Introduction to Social Research. 3 Credits. S
An introduction to the nature and methods of social research, including both qualitative and quantitative approaches. Topics may include: hypothesis formulation and testing; how to design a research project, collect and analyze data; elementary statistical procedures; and ethical issues. Prerequisite: Six hours of Sociology credit, including SOC 104/ SOC 105/SOC 304. A minimum GPA of 2.3 in all Sociology courses is strongly recommended for students planning to enroll in this course.

SOC 295. Study Abroad Topics in: _____. 1-6 Credits. S
This course is designed for the study of special topics in Sociology at the freshman/sophomore level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. No more than 6 hours of SOC 295 or SOC 495 may count towards the Sociology major or minor.

SOC 304. Principles of Sociology. 3 Credits. SC S
An introduction to sociological concepts, methods, and substantive findings more intensive than that provided in SOC 104. Students may take this course in lieu of SOC 104 to satisfy requirements for the major and the minor. This course may not be taken for credit by those who have taken SOC 104.

SOC 305. Principles of Self and Society. 3 Credits. SI S
Discusses the way our identities, values, and behavior have been and continue to be shaped by social and situational factors. Attention is paid to the influence of factors like language, culture, social roles, specific social institutions, and broad structures of inequality and power on how we see ourselves and others. This course provides a more intensive coverage of the subject matter than that provided in SOC 150. May not be taken by anyone who has already taken SOC 150 or its equivalent.

SOC 306. Principles of Social Problems. 3 Credits. SF S
This course is designed to explore competing explanations for the causes of, and cures for, the enduring problems of American society. The course critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. This course provides a more intensive coverage of the subject matter than that provided in SOC 160. May not be taken by anyone who has already completed SOC 160 or its equivalent.

SOC 308. Principles of Family Sociology. 3 Credits. SC S
Analysis of the family as a social institution primarily in the U.S. context. Topics considered are: current and historical changes in how the family is constituted, contrasting sociological theories of family relationships, sexuality in relation to family life, the coexistence of love and hate in families, family dissolution and reformation, and the care of children. A key theme is diversity: social class, gender, race/ethnicity, and age. This course provides a more intensive coverage of the subject matter than that provided in SOC 220. May not be taken by anyone who has already taken SOC 220 or its equivalent.

SOC 312. Population and Society. 3 Credits. S
An examination of the causes and consequences of population change in the United States and around the world with special focus on the impact of changes in populations on social institutions. We use social demographic perspectives to explore patterns of birth, illness, death, population concentration, population migration and immigration, and changes in these over time. Prerequisite: One of the following: SOC 104, SOC 110, SOC 150, SOC 160, or SOC 220.

SOC 320. Organizations in Society. 3 Credits. S
An analysis of complex organizations in modern societies. Attention is given to the rise of bureaucracy in business and government; the way organizations influence and respond to their social cultural environments;
and the various roles that individuals play in organizations. Prerequisite: A principal course in sociology.

SOC 321. Wealth, Power, and Inequality. 3 Credits. S
This class focuses on economic inequality and the political and social forces that create and sustain it in the United States and internationally. The variables of race, ethnicity, status, and gender are analyzed as they relate to the differences in the distribution of wealth and power, and attention is paid to how these multiple variables shape opportunities.

SOC 324. Being Deviant in America. 3 Credits. S
In this course students will study traits, conditions, actions, and behaviors that violate social norms and elicit negative societal reactions. This includes the social, cultural, and individual factors that explain deviance; motivations behind deviant behavior; and efforts by society to control deviants. In short, you will undertake a sociological examination of those on the margins of society and societal efforts to “deal with” them. (Same as AMS 324.)

SOC 326. Health, Gender, and Society. 3 Credits. S
Comparative examination of the health status of men and women in relation to key elements of contemporary societies, including not only medicine and health care services, but also systems of social inequality and stratification, cultural constructions of gender, and social policies. Emphasis will be placed on the U.S.; however, the course also will provide international comparisons and an overall global context.

SOC 330. American Society. 3 Credits. S
The social structure and organization of American society with special reference to long-term and recent social changes. (Same as AMS 330.) Not open to students with credit for SOC 132. Prerequisite: A principal course in sociology.

SOC 332. The United States in Global Context. 3 Credits. S
Examines the influence abroad of U.S. culture, policies and practices and the impact of other countries on U.S. culture, society, and politics. Among the topics that may be examined are race, ethnicity, colonialism, imperialism, migration, technology, communications and media, popular culture, language, health, domestic and transnational organizations, as well as economic, political, religious, military and educational institutions. (Same as AMS 332.)

SOC 335. American Society, Honors. 3 Credits. SC S
The social structure and organization of American society with special reference to long-term and recent social changes. Not open to students who have credit for AMS 330 or SOC 330. Open to students in the University Honors Program, students on the dean's honor roll, and by permission of the department.

SOC 340. The Community. 3 Credits. S
Structures, functions, and processes of change in local communities; interrelations of towns and small cities with rural areas and metropolitan centers with their hinterlands. Prerequisite: A principal course in sociology or ANTH 108 or ANTH 308.

SOC 341. Urban Sociology. 3 Credits. S
Examination of the process of urbanization in modern societies, including the size, growth, functions, and ecology of cities and systems of cities; such urban social institutions as the economy, politics, and the family; and major contemporary urban policies and problems. Each topic will be analyzed from several sociological perspectives. Prerequisite: A principal course in sociology.

SOC 342. Sociology of Immigration. 3 Credits. S
International migration reshapes politics, economics, social relations, and racial/ethnic identities. Using the United States and other countries as case studies, we explore the variations among immigrant groups and their experiences in social institutions such as the family, religion, education, labor market, and government. We consider the influence of national origin, gender, class, and culture on immigration and reception experiences, as well as issues of assimilation, transnationalism and identity. Prerequisite: SOC 104.

SOC 343. American Racial and Ethnic Relations. 3 Credits. S
Race is an ever-present feature of American life. It is a polarizing topic in our politics and a prism through which we perceive social differences. In this course, we examine the major institutions and societal forces that shape the reality of race in thought and in material reality. Moving from past to present, we consider how slavery, segregation, the urban ghetto, and mass incarceration contribute to the social construction of race. By reviewing traditions of research on race in the U.S. and abroad, students will analyze how legacies of race and racism in the U.S. continue to influence our identities, culture, politics, and relations of power and inequality.

SOC 350. Transnational Migration. 3 Credits. S
A historically-conscious, sociological exploration of political, cultural and health issues involved in transnational migration, this course invites the student to situate current transnational migration within specific historical social processes within both postcolonial Africa and the postcolonial West. The course examines parallels from the experience of migration in other parts of the world, specifically Asia and Latin America. The aim is an understanding and appreciation of both the interconnectedness of the world's peoples and, crucially, of the world's histories.

SOC 352. Sociology of Sex Roles. 3 Credits. S
An examination of sex roles, sex stereotypes, and major issues involved in sex-role research. Emphasizes explanations of inequality between American males and females in the family and at work. The course is designed around lectures, panels, workshops, and films.

SOC 355. Protest, Activism, and Dissent. 3 Credits. S
This course explores theories and concepts related to collective behavior and social movements. We will examine why people protest, what strategies and tactics activists use and why, and the conditions under which protest succeeds or fails. We will focus on contemporary social movements in the United States, examining dissent and activism of both the political left and right.

SOC 360. Sociology of Social Control. 3 Credits. S
This course examines changing methods of social control in society. Social control can be formal (e.g., law and criminal justice system) or informal (e.g., families, peer groups). This course examines the ways that we, as a society, attempt to respond to matters such as deviance, illness, crime, and poverty. This course will survey the many varieties of formal and informal social control faced by individuals in society, and the ways in which individuals resist and conform to various disciplinary and control regimes. Prerequisite: a principal course in Sociology.

SOC 363. The Sociology of Culture. 3 Credits. S
This class explores the role of cultural forms (music, film, fashion, food, and art) in everyday life. Throughout the semester, we will critically engage with core topics in cultural sociology, including, how culture reflects the social order, the role of culture in reproducing race, gender, and class inequality, the processes by which cultural forms are socially created and received, and the relationship between culture and historical change.

SOC 364. Society, Popular Culture, and the Media. 3 Credits. S
An overview of sociological theory and research on culture created and distributed through the mass media and its role in shaping our common sense interpretations of our daily lives. Topics include the social organization of the media, the relation between popular culture and the
media, themes communicated in various elements of popular culture, and how various groups interpret cultural messages and incorporate them in their lives.

SOC 380. Elementary Statistics and Data Analysis. 3 Credits. S
An introduction to social scientific data analysis, with an emphasis on descriptive and inferential statistics. Specific topics include sampling, measures of association and correlation, significance testing, the logic of causal inference, the use of computer programs for data analysis, multivariate analysis, and the critical evaluation of social science research findings. Prerequisite: MATH 101.

SOC 385. Environmental Sociology. 3 Credits. S
This course invites students to study society and its impact on the environment. Environmental problems are social problems. This course will address such items as social paradigms, theories, inequalities, movements, and research. (Same as EVRN 385.)

SOC 386. Sociology of Global Food. 3 Credits. U
The Sociology of Global Food offers a critical examination of the global food system since the Industrial Revolution. Topics include the industrialization of agriculture, sustainable agriculture, and the role of food and agriculture in organizing society. This course discusses the emergence of current debates around food and agriculture including food activism, technological developments, human/environmental relationships, and labor issues. There is a lab component to this course. (Same as EVRN 386.) Prerequisite: Junior standing.

SOC 400. Sociology Special Topics: _____ 3 Credits. S
The study of selected topics of current interest in Sociology. Check the notes section in the schedule of classes for the description of this course. May be repeated for credit as topics vary.

SOC 401. Sociology Special Topics, Honors: _____ 3 Credits. S
The study of selected topics of current interest in Sociology. Contact department for course descriptions of current offerings. May be repeated for credit as topics vary. Open only to students in the University Honors Program, or consent of the instructor. Prerequisite: Enrollment in the University Honors Program, or consent of the instructor.

SOC 405. Sociology of Aging and the Life Course. 3 Credits. S
A survey of theory and research in social gerontology, giving primary attention to aging and the aged as affected by social organization, including such social institutions as familial, economic, political, and health care; organizational processes such as social stratification; and living environments including community and housing. In these contexts, certain demographic, cross-cultural, social-psychological, and physiological aspects of aging will also be considered.

SOC 410. Sociology of Death and Dying. 3 Credits. S
The primary purpose of this course is to provide an understanding of the ways in which the experiences of death and dying are shaped by social structures. This course will also acquaint the student with the social implications of death and dying and to examine death-related behaviors, both individual and collective, through which these aspects of life are experienced. This course covers theoretical, practical, cross-cultural and historical aspects of death and dying. Social, psychological, biomedical, economic and legal issues surrounding death and dying are explored. Students examine their own ideas, feelings and attitudes towards death and dying, and reflect on the origins and significance of those beliefs. Prerequisite: Junior or Senior Standing.

SOC 424. Sociology of Health and Medicine. 3 Credits. S
This introductory course in medical sociology examines how social factors influence health and the organization of medical services. Students explore the distribution and experiences of illnesses across key social categories (e.g., gender, social class, etc.) The course also addresses contemporary issues in health and medicine, such as how health care systems vary cross-nationally, the training of health care workers, patient-physician relationships, and the use of medical technologies.

SOC 425. Sociology of Global Health. 3 Credits. S
The course explores social dimensions of health throughout the world. It examines how infectious and degenerative diseases have reflected and affected the demographics, social structure, economy, and culture of societies, and how societies have mobilized their political, economic, social and cultural resources to deal with health challenges. It focuses in particular on the role of socioeconomic inequality—both within and across countries—in shaping the emergence, spread, prevention, and treatment of disease. Prerequisite: A sociology course at the 100 or 200-level.

SOC 427. School and Society. 3 Credits. S
This course examines education as a social institution and the reciprocal relationship between schools and society. It focuses particularly on the relationship between education and inequality and on education in the U.S., but also includes international comparisons. Prerequisite: Junior or Senior standing or permission of instructor.

SOC 430. Cross-Cultural Sociology. 3 Credits. W
A systematic introduction to cross-cultural issues from the standpoint of sociology, designed to acquaint students with the full range of substantive and methodological issues that arise in comparative sociological inquiry, with a primary focus on non-western societies. Specific topics to be addressed may include war and peace, stratification and inequality, race and ethnicity, and political authority and power, all viewed in the light of cross-cultural research and theory.

SOC 436. Ethnicity in the United States: _____. 3 Credits. S
An examination of the history, sociology, and culture of U.S. ethnic categories (e.g., American Indians, Latinos, Asian Americans, Jewish Americans, Irish Americans). The specific group studied varies from semester to semester. Course may be repeated for credit with different topics. (Same as AMS 436.)

SOC 437. Global Ethnic and Racial Relations. 3 Credits. W
This course uses written and visual materials to examine race, ethnicity, and nationalism around the world. Emphasis is on ways in which social forces, gender roles, sexual practices, cultural patterns, and political organization work together to construct and reinforce ethnic, racial, and national identities, boundaries, movements, and conflicts. Historical and contemporary comparisons are made between the U.S. and countries in Africa, Asia, the Americas, the Caribbean, Europe, the Pacific Islands, and the Middle East. (Same as AAAS 437 and AMS 437.)

SOC 450. Gender and Society. 3 Credits. S
An overview of sociological theory and research on the social practices constructing men and women as “opposites” and creating systematic inequality between them in class-, race-, and nation-specific ways. We consider arguments and evidence that gender is something we are, something we do, a part of every social institution, and a major aspect of how we are organized as a society.

SOC 454. Women and Work. 3 Credits. S
Sociological investigation of women’s changing relationship to paid and unpaid labor in the economy and the family. Several theories are compared in these contexts: Characteristics of employed women, including occupational distribution and pay; women’s experiences in “traditional” and “nontraditional” occupations, including professions and management; socialization and education for employment; integration of marriage, housework, and child care; anti-discriminatory laws and policies. Prerequisite: A principal course in Sociology.

SOC 455. Society and the Economy. 3 Credits. S

SOC 455. Society and the Economy. 3 Credits. S

SOC 455. Society and the Economy. 3 Credits. S
An analysis of how economic organizations such as firms and markets are embedded within broader social structures with attention being given to such topics as: world economic crises and their social bases; capitalist and socialist economies; primitive and advanced economic systems; multinational corporations; the nature of housework; and the transformation of economic systems.

SOC 461. Competing Perspectives on Crime and Deviance. 3 Credits. S
Advanced analysis of the social organization and cultural processes of deviance, including crime, violence, and social control. The course surveys and applies sociological, as well as criminological, theoretical perspectives in deviance. Particular attention is paid to the economic, gender, sexual, and racial inequalities and diversity of experience that shapes, and is shaped by, deviance in American society.

SOC 462. Violence and Society. 3 Credits. S
This class applies a sociological perspective to the various forms of violence that beset modern society. We will consider a range of behavior and practices commonly considered violent, including suicide, harassment, sexual assault, street crime, gun violence, terrorism, and genocide. We will address the extent, impact, and sociological significance of these forms of violence. We will also consider the failures and successes of various organizational, institutional, and legal solutions to violence.

SOC 463. Sociology of Surveillance. 3 Credits. S
An overview of social science theory and research on the practices for keeping close watch on people. Surveillance strategies are adopted in the interests of security, governance, and commerce, but also for personal care, empowerment, resistance, and even play. We consider a host of social, political, ethical, and legal questions related to long-standing notions of privacy, civil liberties, and personal autonomy.

SOC 480. Sociological Theory. 3 Credits. S
An introduction to the principal texts in sociological theory and the ideas that made them important. Primary materials are emphasized, ranging from medieval to the current age. The goal of the course is to show continuity and change in the theoretical tradition of sociology, and to demonstrate the continued importance of classical ideas. Prerequisite: SOC 104 or SOC 105 or SOC 304 or permission of instructor.

SOC 490. Internship in Sociology. 3 Credits. S
The purpose of this course is to encourage students to think sociologically about social issues by working as volunteer interns for non-profit community or campus organizations. Enrollment must be approved by a faculty mentor and the departmental Undergraduate Studies Committee. For additional information go to the Sociology department website. Prerequisite: 21 credits in sociology with a 3.0 GPA and permission of the instructor.

SOC 495. Study Abroad Advanced Topics in: _____ 1-6 Credits. S
This course is designed for the study of special topics in Sociology at the junior/senior level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. No more than 6 hours of SOC 295 or SOC 495 may count towards the Sociology major or minor.

SOC 499. Honors Course. 3-6 Credits. S
Intensive study and research under faculty direction including the writing of a thesis. Enrollment may be split between two semesters, but no grade will be given until completion of the thesis. Admission to honors candidacy is open only to majors who have shown a marked capability for independent study and have completed either SOC 280 or SOC 480.

SOC 525. Sociology of Work. 3 Credits. S
A consideration of problems in the conceptual and empirical definition of occupations and professions. It will involve the examination of the process of professionalization, the differentiation and integration of labor, career patterns, the work situation, the study of leisure, and the social consequences of changes in occupations and professions. Prerequisite: A principal course in sociology.

SOC 529. Globalization. 3 Credits. S
Addresses sociological aspects of the growth of transnational economic, cultural, institutional, and political interconnections, the freer and faster movement of goods, images, ideas, people, and institutional forms across national borders, and the consequences and problems of these processes. The focus is on recent (later 20th century to the present) global restructuring in the context of historical shifts in capitalist development. (Same as GIST 529.) Prerequisite: SOC 104 or GIST 220.

SOC 532. Sociology of the Middle East. 3 Credits. NW S
The sociological analysis of social, historical, and contemporary issues pertaining to the Middle East and to relations between the Middle East and other regions of the world. We use sociological theoretical perspectives to address such topics as nationalism and identity; religion, race and ethnicity; gender, socioeconomic development, and sociopolitical and economic relations with the United States. Prerequisite: One of the following: SOC 104, SOC 110, SOC 150, SOC 160, or SOC 220.

SOC 560. Law and Criminal Justice. 3 Credits. S
An analysis of the sources and procedures of development of the criminal law and analysis of the practices of law enforcement, prosecution, and judicial action, principally in the United States. Prerequisite: A principal course in sociology.

SOC 600. Sociological Perspectives: _____ 3 Credits. S
Analysis of various sociological perspectives and/or the application of various perspectives to a given social phenomenon. May be repeated as topics vary. Prerequisite: A principal course in sociology.

SOC 617. Women and Health Care. 3 Credits. S
Critical analysis of the current health status and health needs of women, exploring how lay, medical, and research assumptions have influenced both the clinical/scientific literature and the organization of health services. The course includes a focus on historical patterns in women's health issues and social change actions. (Same as HP&M 620.)

SOC 619. Political Sociology. 3 Credits. S
The study of politics and society in the United States and abroad, including power and authority-who has them, how are they acquired, when are they challenged; state formation, the expansion of central governments, and patterns of political domination; political and nationalist movements; the politics of gender, class, race, and ethnicity; political culture and ideology; ethnic and nationalist conflict; revolution and political change. Prerequisite: A principal course in sociology or consent of instructor.

SOC 625. Work Roles in Health and Medicine. 3 Credits. S
A sociological examination of medical and health-care occupations and professions. The selection of careers, socialization processes, and the development of professional identities. Interactions among practitioners, health-care teams, consumers, and professional and community power structures. Control and coordination of work. The impact of increasing specialization and changes in the demographic makeup of client and professional populations. Coping with medical failure and other problems inherent in medical and health-care work.

SOC 629. Sociology of Sport. 3 Credits. S
Examination of organized sport as a social institution and its relation to other social institutions (e.g., political, economic, educational, and religious), with special emphasis on American society. Analysis of the
social correlates of sports participation and a consideration of the role of sport in social change. Prerequisite: A principal course in American studies or sociology, or consent of instructor.

**SOC 640. Islam and Politics. 3 Credits. W**
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as compatibility of political Islam and democratic politics, political economy in Muslim societies, fundamentalism in Islam, gender relations, identity politics and questions on clash of civilizations are explored. (Same as GIST 667 and POLS 667.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

**SOC 660. Sociology of Mental Illness. 3 Credits. S**
The sociology of mental illness concerns itself with the study of mental disorders as social phenomena. The course will be concerned with (1) the social factors and social processes that contribute to mental disorders, (2) the social definitions of mental disorders as forms of social deviance, (3) the social facets in the treatment and care of disordered persons, and (4) the social aspects of the prevention of mental disorders. Prerequisite: A principal course in sociology.

**SOC 662. Corrections. 3 Credits. S**
Legal systems for handling offenders and the development of the laws creating these systems. Emphasis on the various parts (police, courts, probation, penitentiary institutions, and parole) of the system will vary. Prerequisite: A principal course in sociology.

**SOC 698. Individual Undergraduate Research. 1-12 Credits. S**
Library or field research either as part of an ongoing project or as an independent study project. One to twelve hours. May be taken from one or more faculty during one or more semesters, the total hours not to exceed 12. No more than 3 credits may be applied to satisfy requirements for the sociology major. Prerequisite: Two courses in sociology and consent of instructor.

**SOC 707. Seminar in Historical Sociology. 1-4 Credits.**
Each seminar will explore problems at the intersection of sociology and history. Topic, instructors, and hours of credit will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics and students may take more than one topic. No prerequisite.

**SOC 722. Sociology of Gender. 3 Credits.**
This course will offer a range of sociological perspectives on the role of gender in society. The particular substantive focus will vary each semester to allow flexibility for in-depth analysis of gender relationships in such areas as politics, health and aging, and work.

**SOC 760. Social Inequality. 3 Credits.**
A comprehensive review of the major theoretical and empirical approaches used in the study of institutionalized social inequality. Reference to the origins, forms, cultural and structural variations and their changes over time, consequences and ideologies of social inequality. Prerequisite: A distribution course in sociology.

**SOC 767. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.**
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, COMS 787, and PSYC 787.)

**SOC 780. Advanced Topics in Sociology: ______. 3 Credits.**
Topics will vary from semester to semester and instructor to instructor to allow flexibility for in-depth analysis of particular topics.

**SOC 802. Classical Social Theory. 3 Credits.**
This seminar will focus on the later 19th and early 20th century "theories of society," addressing the origins and developmental tendencies of Western modernity and their relation to premodern social orders. Primary texts of the major theorists (e.g. Marx, Durkheim, Nietzsche, Weber, Simmel, and Mead) will be studied in historical context. The tradition's analytical and critical resources and problematic features will also be explored. Finally, the connections between this tradition and contemporary sociological approaches will be explored.

**SOC 803. Issues in Contemporary Theory: ______. 3 Credits.**
A critical examination of recent trends and debates in sociological theory. This is a thematically oriented course in which classical as well as contemporary views will be explored. Attention will be directed to theoretical issues under discussion in fields such as symbolic interactionism, semiology, ethnology, critical theory, macrosociology, and others.

**SOC 810. Sociological Inquiry. 3 Credits.**
The goals of this course are to understand the characteristics of sociologically interesting and rigorous research and to design a research proposal that shares those characteristics. Students will read books and articles representing a variety of research approaches (ethnographies, surveys, interviews, document analyses, historical studies, comparative research, etc.), and will analyze those approaches in order to understand their theoretical and methodological significance. Students will also distribute their proposals to the other students in the course for comment and critique. Assignments will include a research proposal such as a draft for an external grant proposal, M.A. thesis proposal for students at the M.A. level or a dissertation proposal draft for students at the Ph.D. level. Course may be repeated for credit toward graduate degree. Prerequisite: The course is open only to students enrolled in the Sociology graduate program.

**SOC 811. Sociological Research. 3 Credits.**
The use of the scientific method to study social phenomena including: the formulation and testing of hypotheses; techniques for collecting data; measuring social variables; interpreting research findings; the relationship of theory and facts. Course may be repeated for credit toward graduate degree. Prerequisite: The course is open only to students enrolled in the Sociology graduate program.

**SOC 812. Analytic Methods in Sociology. 3 Credits.**
Consideration of quantitative methods of analysis including both parametric and non-parametric techniques. Prerequisite: A course in statistics.

**SOC 820. Political Sociology. 3 Credits.**
This course offers an overview of the different perspectives and key arguments comprising the field of political sociology, including both classical and contemporary readings. The issues studied in this field include the nature of power and the nature of the state, relations between state and society, and social movements, political organization and civic participation, political culture, voting behavior, comparative political systems, warfare, democracy and economic development, citizenship, nationalism, revolutions, and globalization.

**SOC 824. Health and Social Behavior. 3 Credits.**
This course provides students with an analytic understanding of the organization, professional, and interpersonal behavior that characterizes
contemporary health and health care. Emphasis is placed on examination and integration of conceptual frameworks, theories, and research findings bearing on basic behavioral/managerial issues such as authority relations in health care settings, models of illness behavior and health services utilization, the impact of organizational structure on employee and client attitudes and behavior, and the culture of professional medicine in relation to patient care.

SOC 873. International Political Economy. 3 Credits. Provides a broad survey of major developments in the field. Topics include the intellectual origins of international political economy; the historical evolution of the international system; North-South and Western trade, investment, and monetary relations; foreign aid, debt technology transfer, development, international economic institutions (e.g., International Monetary Funds, World Bank, Multinational Corporations, etc.). (Same as POLS 973.)

SOC 891. Individual Master’s Readings. 1-6 Credits. Individual study of special topics or problems by students working on a master’s degree.

SOC 892. Teaching Seminar. 1-3 Credits. Seminar on sociology course design and development. Topics covered include syllabus design, exam strategies and design, course design, content of and approaches to teaching introductory and other sociology courses, student grading and evaluation. Required of all teaching assistants assigned to courses in sociology. May not be repeated for credit toward graduate degree.

SOC 893. Leading Discussion Sections in Sociology. 1 Credits. This course covers matters relating to the teaching of discussion sections in sociology. Topics covered will include the current week’s reading assignments, material that will be covered in the lecture, upcoming exams or other assignments, and potential activities for discussion sections. This course does not count toward completion of 54 hours of graduate credit hours required for the PhD program in sociology. Graded on a satisfactory/unsatisfactory basis. Prerequisite: A current GTA appointment to lead discussion sections in sociology.

SOC 899. Thesis. 1-8 Credits. Thesis hours. Graded on a satisfactory progress/limited progress/no progress basis.

SOC 900. Seminar on Special Topics in Theory: _____ 1-4 Credits. Each seminar will explore problems of theory in sociology. Topic, instructor, and hours of credit will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics, and a student may take more than one topic.

SOC 920. Seminar on Special Topics in Social Organizations: _____ 1-4 Credits. Each seminar will explore problems of social organization in sociology. Topic, instructor, and hours of credit will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics, and a student may take more than one topic.

SOC 991. Individual Doctoral Readings. 1-6 Credits. Individual study of special topics or problems by students working on a doctorate.

SOC 995. Professionalization Proseminar. 3 Credits. The main objective of this course is to help students understand and deal with several "nuts and bolts" professional issues regarding the discipline of sociology and being a professional sociologist. This course is for advanced doctoral students who are close to being on the job market, whether they are pursuing academic or non-academic careers.

SOC 999. Dissertation. 1-12 Credits. Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Arts and Bachelor of General Studies in Sociology

Why study sociology?
The study of sociology provides valuable insights into the social institutions and processes that shape human behaviors, histories, and opportunities. Sociologists focus on the actions, beliefs, values, norms, organizations, institutions, and other social forces that characterize a society and shape people's lives. It directs attention to how the parts of society fit together as well as the causes and consequences of social change. The insight gained from the study of sociology leads to a greater understanding of how formal and informal rules of society contribute to different opportunities and constraints for different groups of individuals, and how these change over time. As a scientific discipline, sociology teaches students how to use empirical data to understand current social realities and act effectively on the central issues of our time. Few academic disciplines have such a broad scope and relevance.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.
Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Introduction to Social Research. Satisfied by:

| SOC 280    | Introduction to Social Research            | 3     |
| Elementary Statistics & Data Analysis. Satisfied by: | |
| SOC 380    | Elementary Statistics and Data Analysis    | 3     |

Sociology Theory. Satisfied by:

| SOC 480    | Sociological Theory                       | 3     |

Sociology Required Electives

Majors must complete an additional 21 hours of sociology courses beyond the core courses above. At least 15 hours of these must be at the junior/senior (300+) level. Up to 3 hours may be chosen from SOC 490 or SOC 698, and up to 6 hours from SOC 499, to be applied to this requirement.

| Upper-level sociology electives. Satisfied by 15 sociology hours at the Junior/Senior (300+) level | |
| Additional sociology electives. Satisfied by 6 additional sociology hours at the upper or lower level | |

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

| Major Hours | Satisfied by 33 hours of major courses. |
| Major Hours in Residence | Satisfied by a minimum of 15 hours of KU resident credit in the major. At least 15 credit hours at the 300+ level, including SOC 280, SOC 380, and SOC 480, must be taken at KU. |
| Major Junior/Senior Hours | Satisfied by a minimum of 21 hours from junior/senior courses (300+) in the major. |
| Major Junior/Senior Graduation GPA | Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/). |

Graduation Plan

With careful planning and commitment to a full-time course load, you can graduate in 4 years. Download a sample 4-year plan (p. 1807) for sociology.

Double Majors

Sociology majors may want to consider a second major in philosophy; history; women’s studies; area studies; or one of the natural or social sciences; or a second degree in journalism or other professional disciplines.

A sample 4-year plan for a BA degree in Sociology can be found here: Sociology (p. 1807), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Sociology can be found here: Sociology (p. 1808), or by using the left-side navigation.

Departmental Honors

Working under the supervision of a faculty mentor, the undergraduate student must complete 6 hours of work in SOC 499 culminating in a superior thesis. The thesis must be certified by 3 members of the College faculty, at least 2 of whom must be from sociology, nominated by the candidate and approved by the departmental honors coordinator. The student also must achieve a grade-point average of at least 3.5 in sociology.

BA in Sociology

Below is a sample 4-year plan for students pursuing the BA in Sociology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120

1  The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2  MATH 101 is a prerequisite for SOC 380, which is a required course for the Sociology Major.
3  Up to 3 hours of hours of SOC 490 or SOC 698, and 6 hours of SOC 499 are allowed to count toward the major.
4  Check the KU Core website to see which Sociology electives fulfill this goal. If a Sociology elective already taken is being used to fulfill this Core Goal, an alternative elective course will need to be taken to fulfill your total hours requirement.
5  Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors. A number of Sociology electives can be used to fulfill KU Core Goals 1.1, 4.1, 4.2, or 5.1.

BGS in Sociology

Below is a sample 4-year plan for students pursuing the BGS in Sociology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses/) A number of Sociology electives are eligible to fulfill KU Core Goals 1.1, 4.1, 4.2, or 5.1.

Minor in Sociology

Why study sociology?

The study of sociology provides valuable insights into the social institutions and processes that shape human behaviors, histories, and opportunities. Sociologists focus on the actions, beliefs, values, norms, organizations, institutions, and other social forces that characterize a society and shape people’s lives. It directs attention to how the parts of society fit together as well as the causes and consequences of social change. The insight gained from the study of sociology leads to a greater understanding of how formal and informal rules of society contribute to different opportunities and constraints for different groups of individuals, and how these change over time. As a scientific discipline, sociology teaches students how to use empirical data to understand current social realities and act effectively on the central issues of our time. Few academic disciplines have such a broad scope and relevance.

Requirements for the Minor

| Sociology Minor |
|-----------------|-----------------|
| Code | Title | Hours |
| SOC 104 | Elements of Sociology | 3 |

Sociology Minor Electives

Satisfied by 15 hours required, 12 hours at the 300-level or above.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Hours in Residence

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Doctor of Philosophy in Sociology

Sociology Graduate Program

Sociology offers a distinct perspective on understanding the social world. Our discipline emphasizes how institutions and structural forces outside the individual—the family, organizations, politics, economics, culture—shape individual and group behavior, opportunities, and histories. As a major teaching and research unit, we seek to ensure that the knowledge imparted to our students is current and that they learn the skills of critical inquiry, analytical evaluation, and historical sensibilities.

### Minor in Sociology

#### Why study sociology?

The study of sociology provides valuable insights into the social institutions and processes that shape human behaviors, histories, and opportunities. Sociologists focus on the actions, beliefs, values, norms, organizations, institutions, and other social forces that characterize a society and shape people’s lives. It directs attention to how the parts of society fit together as well as the causes and consequences of social change. The insight gained from the study of sociology leads to a greater understanding of how formal and informal rules of society contribute to different opportunities and constraints for different groups of individuals, and how these change over time. As a scientific discipline, sociology teaches students how to use empirical data to understand current social realities and act effectively on the central issues of our time. Few academic disciplines have such a broad scope and relevance.

**Sociology Minor Electives**

Satisfied by 15 hours required, 12 hours at the 300-level or above.

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Doctor of Philosophy in Sociology**

**Sociology Graduate Program**

Sociology offers a distinct perspective on understanding the social world. Our discipline emphasizes how institutions and structural forces outside the individual—the family, organizations, politics, economics, culture—shape individual and group behavior, opportunities, and histories. As a major teaching and research unit, we seek to ensure that the knowledge imparted to our students is current and that they learn the skills of critical inquiry, analytical evaluation, and historical sensibilities.

---

1. MATH 101 is a prerequisite for SOC 380, which is a required course for the Sociology Major.
2. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
3. Up to 3 hours of hours of SOC 490 or SOC 698, and 6 hours of SOC 499 are allowed to count toward the major.
4. Check the KU Core website to see which Sociology electives fulfill this goal. If a Sociology elective already taken is being used to fulfill this Core Goal, an alternate elective course will need to be taken to fulfill your total hours requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The Department of Sociology at the University of Kansas offers a Ph.D. program in sociology. Upon admission, all students are enrolled as Ph.D. students, but must complete all requirements for a M.A. degree during their progress toward the Ph.D. degree.

To be considered for admission, applicants must have completed 15 credit hours in sociology, including a course in sociological theory, and a course in statistics.

Applications also must include:

- A statement of academic interests and professional goals
- 3 recommendation rating forms and letters from individuals who can evaluate the applicant’s academic performance
- 1 complete set of transcripts from all colleges and universities attended
- A current résumé/curriculum vitae
- A writing sample (senior or master's thesis preferred)
- A nonrefundable application fee
- Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/) set by KU Graduate Studies.
- GRE scores are optional for applicants for Fall 2022 admission.

The applicant’s record should indicate considerable academic promise and a high level of motivation.

Submit your graduate application online (https://gradapply.ku.edu/apply/). Most application materials can be attached to the online application.

Ph.D. Degree Requirements

For the Ph.D., students must complete 54 hours of graduate coursework, which includes both M.A. and Ph.D. coursework requirements. Thesis and dissertation hour enrollments are also required.

1. Within the first 2 years of the program, students must complete all M.A. level requirements, including coursework, portfolio, thesis, and a final exam. If a student does not complete all the M.A. level requirements within the first 2 years of the program, s/he will not be eligible for the renewal of his/her GTA/GRA funding. 36 hours of graduate credit are required for the M.A., including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 810</td>
<td>Sociological Inquiry</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Methods (Must include SOC 812)</td>
<td>6</td>
</tr>
</tbody>
</table>

2. During their first year in the program, students must begin compiling portfolios of their professional work.

3. Students must complete an M.A. thesis under the direction of a sociology faculty member of the student’s choosing, an oral defense of the thesis, and a final exam for the M.A. Degree.

4. After completing the requirements for the M.A. degree above, students must attain the requisite levels of competence in the history and theory of sociology and in methods of sociological research by completing the courses listed below. Students must complete an additional 18 graduate credit hours from the coursework list above. This should include:

- An additional 3 credit hours of theory (must be SOC 802 or SOC 902 if not completed during M.A. level work)
- An additional 3 credit hours of methods
- An additional 9 credit hours of electives

*Individual Doctoral Readings courses (SOC 891) may not be used to meet these requirements except by approved petition.

5. Students must complete the Research Skills and Responsible Scholarship (RSRS) requirement. The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Doctoral students in sociology meet this requirement by completion of the following courses: SOC 810, SOC 812, SOC 910. Additional information about this requirement can be found under Doctoral Degree Requirements, Doctor of Philosophy (http://catalog.dept.ku.edu/201314/...
schools/gs/programs/#docreqs), Research Skills in the Graduate Studies section of the online catalog.

6. Students must compile portfolios of their professional work successfully demonstrating command of 2 fields of specialization within sociology and preparation to undertake dissertation research.

7. Students must pass an oral comprehensive examination and defense of dissertation proposal, within the first 6 semesters post-M.A. degree. The oral comprehensive examination and dissertation proposal defense occur at the same time. The oral comprehensive examination refers to an oral examination of the student’s understanding of the 2 fields of specialization. The dissertation committee must consist of at least 5 members, 4 of whom are members of the sociology department.

8. The candidate must continue to enroll in accordance with the Office of Graduate Studies Post-comprehensive Enrollment policy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/) until all Ph.D. degree requirements have been met.

**Non-thesis (Terminal) M.A. Option**

A student who wishes to complete a master's degree but does not wish to continue on to the doctoral level of the program may choose the non-thesis, terminal M.A. option. Completion of these requirements leads to the M.A. degree but does not allow the student to proceed to doctoral study. Non-thesis students must complete 30 hours of graduate credit. Coursework requirements are the same as listed above for the thesis-option M.A., but thesis hours (SOC 899) are not required.

A final oral examination over course work in sociology is also required.

**Handbook for Graduate Students**

A more detailed account of advising procedures, degree requirements, and program options is set forth in the department’s *Manual of Graduate Study in Sociology*, which is available on the department's website (https://sociology.ku.edu/).

**Department of Spanish and Portuguese**

**Why study Spanish and Portuguese?**

Spanish, the second most spoken language in the world with approximately 559 million speakers, is the official language in 21 countries. The United States ranks second behind Mexico in the number of Spanish speakers. Similarly, Portuguese, the sixth most spoken language with approximately 210 million people, is the official language in 9 nations. Fluency in more than one language and an understanding of literary and cultural texts prepare students to become global citizens. In the Department of Spanish and Portuguese, we hone students' oral and written skills of global languages and enrich their critical understanding of the world today.

**Undergraduate Programs**

The department offers course work for students seeking proficiency in a foreign language and for majors in Spanish or a related field.

**Placement**

Students who have not studied Spanish in high school should seek permission to enroll in SPAN 104. For permission to enroll in this course, a student must show his or her high school transcript to the advising specialist in the Department of Spanish and Portuguese. Students who have had limited study of Spanish (1 to 3 years in high school or 1 semester of Spanish at another institution of higher learning, equivalent to SPAN 104) and are not placed in the intermediate level should enroll in SPAN 111. Only students who complete SPAN 104 at KU are eligible to enroll in SPAN 108.

Students with 2 to 4 years of high school Spanish can be placed in the intermediate level (SPAN 212, SPAN 216, SPAN 220, or SPAN 324) by taking the placement examination and consulting the advising specialist. Heritage speakers should take the placement test and consult with the department's advising specialist about the next steps for placement.

Students registered with Disability Resources (http://www.disability.ku.edu/) should contact them for placement advising.

**Retroactive Credit**

Students with no prior college or university Spanish course credit are eligible for retroactive credit according to this formula:

- 3 hours of retroactive credit are awarded to a student who enrolls initially at KU in a third-level Spanish course (SPAN 212) and receives a grade of C or higher.
- 6 hours of retroactive credit are awarded to a student who enrolls initially at KU in a fourth-level Spanish course (SPAN 216) and receives a grade of C or higher.
- 9 hours of retroactive credit are awarded to a student who enrolls initially at KU in a 3-credit-hour Spanish course with a fourth-level course as a prerequisite and receives a grade of C or higher.

Students interested in retroactive credit should consult the department before enrolling.

Students entering KU with previous study of Portuguese should take the Portuguese placement examination administered by the department.

**Courses for Nonmajors**

Students may fulfill the College foreign language requirement by

1. Passing the proficiency examination or
2. Completing SPAN 216 or PORT 216 or
3. Completing a course in Spanish or Portuguese that has SPAN 216 or PORT 216 as a prerequisite.

Minors may consult with the department's advising specialist and their faculty advisor in the department if they have questions about their program of study.

Candidates for the B.S. in education who are majoring in Spanish or minoring in Brazilian Studies should consult the School of Education and Human Sciences.

**Graduate Programs**

The department offers a full graduate program leading to the M.A. and the Ph.D. degrees. Students who complete their graduate studies with the M.A. degree are well prepared to enter a variety of fields, including...
international business, teaching, and government. The Ph.D. program takes advantage of the literature specialties of the faculty, and Ph.D. recipients generally go on to university or college teaching.

A detailed description is available from the departmental office as well as the department's website (http://www2.ku.edu/~spanport/). This includes specific distribution requirements, fields of specialization, and information on the comprehensive examinations. Students should request information and application forms as early as possible, especially if they plan to apply for financial aid.

Students who are interested in enrolling in graduate level coursework in the Department of Spanish & Portuguese without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department's admission (http://spanport.ku.edu/graduate-admissions/) webpage for further details.

Courses

PORT 104. Elementary Brazilian Portuguese I. 5 Credits. U F1
This course introduces students to the essential vocabulary and fundamentals of grammar of Brazilian Portuguese through practice in speaking, listening comprehension, reading and writing. Active preparation and participation required. Classes conducted in Portuguese. Emphasis on conversation.

PORT 106. Elementary Brazilian Portuguese, Accelerated I. 3 Credits. U F1
Designed for students with intermediate proficiency in Spanish (or with previous work in Portuguese) to acquire proficiency in Portuguese more rapidly. Covers the same material as PORT 104 and PORT 108 and prepares students to intermediate level study of Portuguese. Prerequisite: SPAN 111 or Span 108 or consent of instructor.

PORT 108. Elementary Brazilian Portuguese II. 5 Credits. U F2
A continuation of PORT 104. Prerequisite: PORT 104.

PORT 110. Elementary Brazilian Portuguese, Accelerated II. 3 Credits. U F2
A continuation of PORT 106. Prerequisite: PORT 106.

PORT 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Portuguese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

PORT 212. Intermediate Brazilian Portuguese I. 3 Credits. U F3
A review of Brazilian Portuguese grammar, with practice in reading, composition, and conversation. Prerequisite: PORT 108 or PORT 110 or consent of instructor.

PORT 216. Intermediate Brazilian Portuguese II. 3 Credits. U F4
A continuation of PORT 212. Prerequisite: PORT 212.

PORT 220. Intensive Intermediate Brazilian Portuguese. 3-6 Credits. U F3/F4
The course is designed for students who have completed the first year of Portuguese language studies at KU or equivalent. This course covers the same material as PORT 212 and PORT 216. Prerequisite: PORT 110, PORT 108, or consent of the instructor.

PORT 300. Brazilian Culture. 3 Credits. HT H
Prehistoric and colonial Portuguese origins of Brazil and its independent development in the nineteenth and twentieth centuries. Key aspects of economic, political, and social factors; special attention to intellectual history. Readings in English.

PORT 320. Introduction to Portuguese and Brazilian Literatures. 3 Credits. H/W FP
Advanced reading course and an introduction to the study of Luso-Brazilian literature. Discussions in Portuguese. Prerequisite: A fourth semester course in Portuguese or consent of instructor.

PORT 340. Textual Analysis and Critical Reading. 3 Credits. HL H FP
Introduction to Brazilian cultural and literary studies. Critical readings and interpretation of Brazilian cultural expressions with emphasis on acquiring the skills and vocabulary for discussing and writing critical analyses. Conducted in Portuguese. Not open to students who have taken PORT 540. Prerequisite: Grade of A or B in PORT 216 or consent of instructor.

PORT 347. Brazilian Studies: _____ 3 Credits. H FP
A topics course dedicated to the study of special historical moments, authors, or themes in Brazilian literary and cultural history. Topics studied always lead to an examination of Brazilian culture and society through the critical study of literature, film, and music, in contrast with aspects of U.S. culture or other Latin American societies. Although the course may cover multiple genres and periods, it always emphasizes the plurality of Brazilian people, its history of slavery and immigration, diverse ethnic composition, rich religious milieu, and complex class system. Students also discuss the differences between the geographical regions in the country, and discuss controversial topics such as racism and religion. Given the historical similarities between the two societies, students must confront the experiences they learn about in Brazil to similar ones in the United States. Course conducted in Portuguese and may be repeated for credit as the topic varies. Not open to students who have taken PORT 547. Prerequisite: PORT 216 or consent of instructor.

PORT 348. Portuguese Language and Brazilian Culture for Business. 3 Credits. H FP
Cultural studies approach to contemporary Brazilian society for students interested in business. Explores how Brazilians negotiate their place in a global cultural context and how they perceive business. Readings include selections from literature, history, journalism, social analysis, and popular culture and business. Exercises help English speakers develop analytical skills, as well as vocabulary and communication skills related to business and professional life in Brazil. Not open to students who have taken PORT 548. Prerequisite: PORT 216 or consent of instructor.

PORT 350. Portuguese Language and Brazilian Culture for International Business. 3 Credits. H/W FP
A topics course dedicated to the study of special historical moments, authors, or themes in Brazilian literary and cultural history. Topics studied always lead to an examination of Brazilian culture and society through the critical study of literature, film, and music, in contrast with aspects of U.S. culture or other Latin American societies. Although the course may cover multiple genres and periods, it always emphasizes the plurality of Brazilian people, its history of slavery and immigration, diverse ethnic composition, rich religious milieu, and complex class system. Students also discuss the differences between the geographical regions in the country, and discuss controversial topics such as racism and religion. Given the historical similarities between the two societies, students must confront the experiences they learn about in Brazil to similar ones in the United States. Course conducted in Portuguese and may be repeated for credit as the topic varies. Not open to students who have taken PORT 547. Prerequisite: PORT 216 or consent of instructor.

PORT 354. Cultural Studies in Brazilian Film: _____ 3 Credits. H FP
A theoretical and historical approach to Brazilian film with particular attention to thematic concerns, such as cultural and national identity, and of literary discourse. Given in Portuguese or English. May be repeated for credit as topic varies. Students will be expected to attend film screenings in addition to regular class meetings. Not open to students who have taken PORT 545. Prerequisite: PORT 216 or consent of instructor.

PORT 355. Studies in Brazilian Film: _____ 3 Credits. H FP
A theoretical and historical approach to Brazilian film with particular attention to thematic concerns, such as cultural and national identity, and of literary discourse. Given in Portuguese or English. May be repeated for credit as topic varies. Students will be expected to attend film screenings in addition to regular class meetings. Not open to students who have taken PORT 545. Prerequisite: PORT 216 or consent of instructor.

PORT 388. Intermediate Brazilian Portuguese Conversation. 1 Credits. U
Conversational reinforcement with an emphasis on oral communication skills in a cultural context. Two class meetings per week. Prerequisite: PORT 212 or consent of instructor.

PORT 394. Special Readings in Brazilian Studies. 1-3 Credits. H FP
Direct readings in (a) fields not covered by student's course work, and/or
(b) field of student's special interest approved by the department. May be repeated for credit if content varies. Prerequisite: PORT 216 and three-hours upper-division credit in Portuguese, or consent of instructor.

PORT 471. Studies in Brazilian Culture and Civilization: _____ 1-3 Credits. H FP
A study of Brazilian culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. May be repeated for credit if content varies.

PORT 475. Studies in Brazilian Literature: _____ 1-3 Credits. H FP
A study of the literature of a particular author, group of authors, period, genre, region, or theme. Available only to study-abroad participants. May be repeated for credit if content varies.

PORT 488. Advanced Brazilian Portuguese Conversation. 1 Credits. U
Two recitations weekly. More advanced than PORT 388. Prerequisite: PORT 216 or consent of the instructor.

PORT 490. Intensive Advanced Portuguese. 3-6 Credits. H/W FP
This is a composition course for students with an intermediate level of the language to develop control of written communication at an advanced level. Advanced composition, conversation, and stylistics, plus an introduction to Brazilian literature. Prerequisite: Four semesters of Portuguese, or consent of instructor.

PORT 509. Portuguese Phonetics and Phonology. 3 Credits. H/W FP
An analytical and practical study of contemporary Portuguese phonetics. Prerequisite: PORT 490 and PORT 488, or consent of instructor.

PORT 540. Textual Analysis and Critical Reading. 3 Credits. HL H FP
A more intensive treatment of the content of PORT 340. Not open to students who have taken PORT 340. Prerequisite: Consent of instructor.

PORT 547. Brazilian Studies: _____ 3 Credits. H FP
A more intensive treatment of the content of PORT 347. Not open to students who have taken PORT 347. Prerequisite: PORT 216 or consent of instructor.

PORT 548. Portuguese Language and Brazilian Culture for Business. 3 Credits. H FP
A more intensive treatment of the content of PORT 348. Course conducted in Portuguese. Not open to students who have taken PORT 348. Prerequisite: Consent of instructor.

PORT 560. Survey of Portuguese Literature. 3 Credits. H/W FP
Emphasis on Gil Vicente, Camoes, Eca de Queiroz, and Fernando Pessoa. Prerequisite: A fourth semester course in Portuguese or consent of instructor.

PORT 565. Studies in Brazilian Film: _____ 3 Credits. H FP
A more intensive treatment of the content of PORT 365. Not open to students who have taken PORT 365. Prerequisite: Consent of instructor.

PORT 611. Accelerated Basic Portuguese for Spanish Speakers. 3 Credits. U
Contrastive phonological and morphological analysis of standard Spanish and the major dialect of Brazilian Portuguese, followed by a presentation of major grammatical and phonological stumbling blocks for Spanish speakers. Drills on grammar, syntax, and pronunciation emphasize those areas in which Brazilian Portuguese differs most significantly from Spanish. Prerequisite: Graduate student status in Spanish. Undergraduates in Spanish may be admitted with consent of instructor.

PORT 612. Accelerated Basic Portuguese for Spanish Speakers II. 3 Credits. U
A continuation of PORT 611, with special emphasis on reading and writing skills. Prerequisite: PORT 611.

PORT 740. Survey of Brazilian Literature. 3 Credits.
A survey of Brazilian literature from 1500 to present. Prerequisite: A fourth semester course in Portuguese or consent of instructor.

PORT 742. The Brazilian Novel. 3 Credits.
The development of the novel in Brazil and analysis of representative works of the nineteenth and twentieth centuries. Prerequisite: A fourth semester course in Portuguese or consent of instructor.

PORT 746. The Brazilian Short Story. 3 Credits.
The development of the short story in Brazil and analysis of representative works of the nineteenth and twentieth centuries. Prerequisite: A fourth semester course in Portuguese or consent of instructor.

PORT 750. Brazilian Poetry. 3 Credits.
A study of the principal movements and an analysis of representative works from the colonial period to the present. Emphasis on modernists and post-modernists. Prerequisite: A fourth semester course in Portuguese or consent of instructor.

PORT 760. Contemporary Brazilian Literature. 3 Credits.
A survey of Brazilian cultural expressions and literature in the Twentieth Century. Conducted in Portuguese. Prerequisite: PORT 216 or consent of instructor.

PORT 780. Special Readings in Portuguese and Brazilian Literature. 1-3 Credits.
May be taken more than once; total credit not to exceed five hours. Directed private readings with conferences with instructor. Prerequisite: Consent of department.

PORT 785. Special Topics in Brazilian Cultural and Literary Studies: _____ 3 Credits.
Topics vary by semester. The course may be taken more than once, with full credit, provided there is no duplication in the material covered. Conducted in Portuguese.

PORT 970. Seminar in Brazilian Literature: _____ 3 Credits.

Courses

SPAN 100. Spanish Reading Course. 3 Credits. U
A special course for candidates for advanced degrees designed to aid them in obtaining a reading knowledge of Spanish. Intensive study of the fundamentals of grammar, proceeding to the reading of material of medium difficulty. Open to graduate students and to seniors who are applying for entrance to a graduate school. The course does not satisfy any part of the undergraduate language requirement. This course is primarily for graduate students who are fulfilling their language requirement(s) for advanced degrees.

SPAN 101. Orientation Seminar in Spanish and Portuguese. 1 Credits. H
Provides an overview of the field of Hispanic Studies. Emphasizes developing an understanding of opportunities in Spanish and Portuguese at KU and the Spanish and Portuguese program curricula, exploring service-learning and other extracurricular options available at KU and beyond, and helping students plan goals for their education through an understanding of their personal values and aspirations as they relate to the field. Graded on a satisfactory/unsatisfactory basis.

SPAN 104. Elementary Spanish I. 5 Credits. U F1
For beginning students of Spanish who do not place into SPAN 111. Active preparation and participation required. Classes conducted in Spanish. Not open to native speakers of Spanish.
SPAN 107. Elementary Spanish Conversation. 1-4 Credits. U
Activities to improve elementary level conversation skills. Does not fulfill any portion of the College of Liberal Arts and Sciences foreign language requirement. Available only to study abroad participants.

SPAN 108. Elementary Spanish II. 5 Credits. U F2
Only for students who have completed SPAN 104 at the University of Kansas. This course prepares students for Intermediate level study of Spanish. Active preparation and participation is required. Classes conducted in Spanish. Not open to native speakers of Spanish. Offered in spring semester. Prerequisite: SPAN 104.

SPAN 111. Intensive Elementary Spanish. 5 Credits. U F1/F2
For students who have had some previous study of Spanish, but who do not place into the Intermediate level. This course prepares students for Intermediate level study of Spanish. Active preparation and participation required. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: At least one previous high school or college course in Spanish or placement. See departmental guidelines.

SPAN 170. Hispanic Language, Culture and Civilization I-A: _____ 1-3 Credits. U
For students in their first year of language study or the equivalent.
An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies.

SPAN 171. Hispanic Language, Culture and Civilization I-B: _____ 1-3 Credits. U
A continuation of SPAN 170. For students in their first year of language study or the equivalent. An intensive orientation of the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies.

SPAN 177. First Year Seminar: _____ 3 Credits. HL
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in Spanish. May not contribute to major requirements in Spanish. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

SPAN 202. Introduction to Translation and Translation Theory. 3 Credits. H
This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat (oral) interpretation in detail. (Same as AAAS 250, GERM 240, LING 250 and SLAV 250.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

SPAN 212. Intermediate Spanish I. 3 Credits. U F3
A fully integrated content-based and form-focused approach to intermediate-level Spanish. Students process and practice a wide range of vocabulary and grammatical structures in order to complete tasks that promote critical exploration of the Spanish-speaking world and the development of listening, reading, speaking, writing, and intercultural competencies. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111 or placement. See departmental guidelines.

SPAN 213. Honors Intermediate Spanish I. 3 Credits. U F3
Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111 with grade of A, or permission of the department.

SPAN 216. Intermediate Spanish II. 3 Credits. U F4
A continuation of SPAN 212. A fully integrated content-based and form-focused approach to intermediate-level Spanish. Students process and practice a wide range of vocabulary and grammatical structures in order to complete tasks that promote critical exploration of the Spanish-speaking world and the development of listening, reading, speaking, writing, and intercultural competencies. Emphasis on process writing. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: SPAN 212 or placement.

SPAN 217. Honors Intermediate Spanish II. 3 Credits. U F4
Not open to native speakers of Spanish. Prerequisite: SPAN 212 or SPAN 213 with a grade of A, or permission of the department.

SPAN 220. Intensive Intermediate Spanish. 6 Credits. U F3/F4
This course is designed for students who would like to acquire proficiency in Spanish more rapidly. The material covered in the course is the same as in SPAN 212 and 216. Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111, with a grade of A or B.

SPAN 270. Hispanic Language, Culture and Civilization II-A: _____ 1-3 Credits. U
For students in their second year of language study or the equivalent.
An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies.

SPAN 271. Hispanic Language, Culture and Civilization II-B: _____ 1-3 Credits. U
A continuation of SPAN 270. For students in their second year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies.

SPAN 300. Developments in Hispanic Cultures. 3 Credits. HL H
The development of social and cultural patterns in the Spanish-speaking world, including the intersection of those patterns with issues related to politics, economics and/or personal values. Assigned readings may be in English or in Spanish. Does not count toward the Spanish major. Prerequisite: SPAN 108, SPAN 109, or SPAN 111; or two years of high school Spanish.

SPAN 302. The Spanish Inquisition. 3 Credits. H
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HIST 325 and JWSH 315.)

SPAN 322. Spanish Grammar: Form and Meaning in Context. 3 Credits. U FP
Analysis of the most important morphological and syntactic phenomena with an emphasis on their form and function through a review of salient grammatical points in preparation for advanced work in Spanish.
Recommended for students who have completed Spanish 216, 217, or 220 with a grade of C or higher, or placement through examination. Course does not count toward the Major. Prerequisite: Four semesters of college-level Spanish or the equivalent. Students who have taken SPAN 324 or SPAN 325 may take this course with the permission of the instructor.

SPAN 323. Spanish Composition and Cultural Analysis. 3 Credits. U FP
Systematic review of writing in Spanish, intensive study of vocabulary and stylistics for formal written communication, and development of essential writing and analytical skills for advanced courses in Spanish. Prerequisite: SPAN 216 or SPAN 217 or SPAN 220 with a grade of C or higher; or SPAN 322, or consent of instructor.

SPAN 324. Grammar and Composition. 3 Credits. U FP
Systematic grammar review and development of essential writing skills for advanced courses in Spanish. Recommended for students with a grade of B or better in SPAN 216, SPAN 217, or SPAN 220. Concurrent enrollment in SPAN 328 is strongly recommended, and completion of both SPAN 324 and SPAN 328 is required for enrollment in SPAN 340 and SPAN 346. Prerequisite: SPAN 216 or SPAN 217 or SPAN 220 with a grade of C or higher; or SPAN 322.

SPAN 325. Spanish for Heritage Learners. 3 Credits. H FP
A comprehensive review of the Spanish language for students whose personal or cultural ties to the language do not include extensive formal academic study, with an emphasis on the development of skills tied to cultural analysis and communication (written and oral) necessary for success in more advanced courses in Spanish. Prerequisite: SPAN 216, or SPAN 217, or SPAN 220, or appropriate placement test score as defined by the Department of Spanish & Portuguese, or consent of the Department of Spanish & Portuguese, or consent of instructor.

SPAN 326. Spanish for Health Care Workers. 3 Credits. FP
This course is designed to provide students with the linguistic and cultural competencies necessary to communicate with and help treat Spanish speaking patients with limited English proficiency. Includes a general review of pertinent grammar, specific vocabulary groups relating to assessment and care of patients, vocabulary to establish rapport, and discussions leading to cultural competencies. Students who have completed SPAN 424 or above may take the course with the permission of the instructor. Prerequisite: Completion of SPAN 216 with a grade of C or better.

SPAN 328. Intermediate Spanish Conversation. 2 Credits. U FP
Conversational reinforcement of topics presented in SPAN 323 or SPAN 324 with an emphasis on oral communication skills in a cultural context. Concurrent enrollment in SPAN 324 is strongly recommended. Completion of both 324 and 328 is required for enrollment in SPAN 340 and SPAN 346. Two class meetings per week. Not available to study abroad participants. Prerequisite: SPAN 216 or SPAN 217 or SPAN 220 with a grade of C or higher; or SPAN 322.

SPAN 329. Intermediate Spanish Conversation II: ______. 1 Credit. U FP
Open to students who have completed SPAN 328 and heritage speakers. Native speakers may take the course with permission of the instructor. The course topic will focus on Spanish conversation in a particular professional setting, such as business, theater, law, film, medicine, and fine arts. Course may be repeated for credit if the topic varies. Prerequisite: SPAN 328 or consent of instructor.

SPAN 330. Service Learning Internship Spanish. 1-3 Credits. U FP
An opportunity for students to utilize and improve their Spanish language skills in an internship or volunteer work in business, schools, government, hospitals, churches, and various types of service organizations. Students must have approval of instructor to register and must provide written confirmation of acceptance for volunteer work in an agency that provides service to a Spanish-speaking public before the course begins. Periodic supervisor evaluations and a reflection journal in Spanish are required, in addition to other materials requested by the instructor. Class format may be an independent internship taken for variable credit under instructor supervision. Will not count toward Spanish major. Prerequisite: Students must have completed a minimum of 12 hours of Spanish in courses at the 200-level or above, and completion of SPAN 324 with a grade of B or better.

SPAN 340. Textual Analysis and Critical Reading. 3 Credits. HL H/W FP
Critical readings and interpretation of Hispanic literatures, with emphasis on acquiring the skills and vocabulary necessary for discussing and writing literary analyses. Taught in Spanish. Prerequisite: SPAN 323, or SPAN 324 and SPAN 328, or SPAN 325. A grade of B- or higher in SPAN 344 is strongly recommended for students enrolling in this course. Concurrent enrollment in SPAN 346 is strongly recommended.

SPAN 345. Transatlantic Hispanic Cultures. 3 Credits. H FP
This course offers an introductory overview of Hispanic cultures, focusing on the political, economic, social, linguistic, and artistic development that shaped the historical and cultural bonds between Latin America and Spain. Enhances the cultural competence acquired in previous Spanish classes and prepare students for upper-level work in the major. Taught in Spanish. Prerequisite: SPAN 323, or SPAN 324 and SPAN 328, or SPAN 325. A grade of B- or higher in SPAN 323 or SPAN 324 or SPAN 325 is strongly recommended for students enrolling in this course. Concurrent enrollment in SPAN 340 is strongly recommended.

SPAN 370. Hispanic Language, Culture and Civilization III-A: ______. 1-3 Credits. U FP
An intensive orientation to the culture of Spanish-speaking countries. Also includes elements of grammar, conversation, and composition. Available only to study-abroad participants. Will not count toward the Spanish major. May be repeated for credit if content varies.

SPAN 371. Hispanic Language, Culture and Civilization III-B: ______. 1-3 Credits. U FP
A continuation of SPAN 370. An intensive orientation to the culture of Spanish-speaking countries. Also includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major. May be repeated for credit if content varies.

SPAN 390. Interpretation of Hispanic Literature. 3 Credits. H
A study of selected works in literary theory that are pertinent to the field of Hispanism and of selected problems in literary interpretation and comparative literature methodology, designed to examine and apply systematically basic critical principles and approaches to the field of Hispanic literature. Discussion of these approaches is related to the previous study of literature and deepened through individual papers written by participants and presented to the group. Does not count toward the major in Spanish. Prerequisite: Completion of one junior-senior course in a language and literature department.

SPAN 424. Advanced Spanish Composition and Grammar. 3 Credits. H/W FP
Extensive practice in writing, with attention to vocabulary, grammar usage, and discourse structure. Thorough review of syntax and grammar. Conducted in Spanish. Concurrent enrollment in SPAN 428 is strongly recommended.
topics, authors, or themes in literary and cultural history. Readings may include selections from both Spain and the countries of Spanish America, but the Spanish American content will be significant and the course will count toward the Latin American literature requirement in the Spanish major. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 430 or consent of instructor. A grade of "C" or better in SPAN 430 is strongly recommended for students enrolling in this course.

SPAN 442. Advanced Spanish Conversation. 2 Credits. U FP
Emphasis on developing fluid expression of opinions, ideas, and points of view through discussion of selected texts and cultural materials. Two class meetings per week. Taught in Spanish. Concurrent enrollment in SPAN 424 is recommended. Prerequisite: SPAN 420 or consent of instructor. A grade of C or higher in SPAN 420 is strongly recommended for students enrolling in this course.

SPAN 429. Spanish Phonetics. 3 Credits. H/W FP
An analytical and practical study of contemporary Spanish phonetics. Prerequisite: SPAN 424 and SPAN 428, or consent of instructor.

SPAN 440. Topics in Transatlantic Hispanic Studies: ____. 3 Credits. H/W FP
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 430 or consent of instructor. A grade of "C" or better in SPAN 430 is strongly recommended for students enrolling in this course.

SPAN 441. Special Topics in Spanish Literature and Culture: ____. 1-3 Credits. H FP
A topics course dedicated to the study of special historical moments, topics, authors, or themes in Spanish literature and cultural history. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. This course may be used to partially or fully fulfill 400-level peninsular Spanish literature requirement. Prerequisite: SPAN 430 or consent of instructor. A grade of C or better in SPAN 430 is strongly recommended for students enrolling in this course.

SPAN 442. Special Topics Latin American Literature and Cultures: ____. 1-3 Credits. H FP
A topics course dedicated to the study of special historical moments, topics, authors, or themes in Latin American literary and cultural history. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. This course may be used to partially or fully fulfill 400-level peninsular Latin American literature requirement. Prerequisite: SPAN 430 or consent of instructor. A grade of C or better in SPAN 430 is strongly recommended for students enrolling in this course.

SPAN 443. Topics in Hispanic Studies - Peninsular Emphasis: ____. 3 Credits.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. Readings may include selections from both Spain and the countries of Spanish America but the peninsular content will be significant and the course will count toward the Peninsular literature requirement in the Spanish major. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 430 or consent of instructor. A grade of "C" or better in SPAN 430 is strongly recommended for students enrolling in this course.

SPAN 444. Topics in Hispanic Studies - Latin American Emphasis: ____. 3 Credits.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. Readings may include selections from both Spain and the countries of Spanish America, but the Spanish American content will be significant and the course will count toward the Latin American literature requirement in the Spanish major. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 430 or consent of instructor. A grade of "C" or better in SPAN 430 is strongly recommended for students enrolling in this course.
SPAN 453. Twentieth Century Spanish Studies: ______. 3 Credits. H FP
Reading and analysis of the literature and culture of Spain from 1900 to the present. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of “C” or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 460. Colonial Spanish-American Studies: ______. 3 Credits. H FP
Reading and analysis of Spanish-American literature and culture from the Conquest to Independence, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of “C” or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 461. Nineteenth Century Spanish-American Studies: ______. 3 Credits. H FP
Reading and analysis of Spanish-American literature and culture from Independence to 1900, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of “C” or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 462. Twentieth Century Spanish-American Studies: ______. 3 Credits. H FP
Reading and analysis of Spanish-American literature and culture from 1900 to the present, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of “C” or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 463. National Traditions in Spanish America: ______. 3 Credits. H FP
Reading and analysis of Spanish-American literature and cultural history from the perspective of a selected nation or nations. The course explores the role of literature and cultural expression in constructing the modern nation and local traditions. Readings may cover selections from multiple genres, authors, and periods. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of “C” or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 464. Reading and Analysis of U.S. Latino/a Literatures: ______. 3 Credits. H FP
The course covers multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of C or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 470. Studies in Spanish Culture and Civilization: ______. 1-3 Credits. H FP
A study of Spanish culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. May be repeated for credit if content varies.

SPAN 471. Studies in Spanish-American Culture and Civilization: ______. 1-3 Credits. H FP
A study of Spanish American national or regional culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. May be repeated for credit if content varies.

SPAN 474. Studies in Spanish Literature and Culture: ______. 1-3 Credits. H FP
A study of the literature and cultural production of a particular author, group of authors, period, genre, region, or theme. Available only to study-abroad participants. May be repeated for credit if content varies.

SPAN 475. Studies in Latin-American Literature and Culture: ______. 1-3 Credits. H FP
A study of the literature and cultural production of a particular author, group of authors, period, genre, country, region, or theme. Available only to study-abroad participants. May be repeated for credit if content varies.

SPAN 494. Special Readings in Spanish. 1-3 Credits. H/W FP
Directed reading in (a) fields not covered by student's course work, and/or (b) field of student's special interest approved by the department. Conferences. May be repeated for credit if content varies. Prerequisite: Twenty-five hours of Spanish.

SPAN 496. Honors in Spanish. 3 Credits. H/W FP
Honors seminar. May be repeated for credit. Required of all students working for a degree with honors in Spanish.

SPAN 500. Hispanic Literature in Translation: ______. 3 Credits. H A study of the literature in English translation of a particular author, period, genre, country, region, or theme. Discussion in English and frequent critical papers. All course readings and writing assignments are also in English. May be repeated for credit as the topic varies. Will not count toward the Spanish major. Prerequisite: Completion of one junior-senior level literature course in any language.

SPAN 501. Studies in Hispanic Literature: ______. 3 Credits. H A study of the literature of a particular author, period, genre, country, region, or theme. May be repeated for credit as the topic varies. May be taken for elective credit in the Spanish major. Will not count toward the Latin American literature requirement in the Spanish major. Prerequisite: SPAN 340, plus completion of one junior-senior level literature course in any language.

SPAN 520. Structure of Spanish. 3 Credits. H/W FP
A study of the Spanish language as it is spoken today, from perspectives of contemporary linguistics. Reading and analysis of recent publications in the field. Prerequisite: SPAN 424 and SPAN 428, or consent of the instructor.

SPAN 522. Advanced Studies in Spanish Language: ______. 3 Credits. H/W FP
Extensive language analysis and practice on one topic such as stylistics, translation, conversation/spoken discourse, or creative writing. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 424 and SPAN 428, or consent of the instructor.

SPAN 540. Colloquium on Hispanic Studies: ______. 3 Credits. H FP
An advanced course dedicated to the critical study of special historical moments, topics, authors or themes in literary and cultural history. This course is designed to provide sophistication, focus, and analytical depth in literary and cultural study through exploration of secondary sources as well as theoretical material. Reading may include selections from both Spain and the countries of Spanish America and may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and
may be repeated for credit as the topic varies. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses.

SPAN 550. Colloquium on Spanish Film. 3 Credits. H FP
A theoretical and historical exploration of Spanish cinema. Students will be expected to attend film screenings in addition to regular class meetings. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses.

SPAN 560. Colloquium on Latin American Film. 3 Credits. H FP
An overview of Latin American cinema from its origins to the present with particular attention to thematic concerns, such as cultural and national identity, and of literary discourse. Students will be expected to attend film screenings in addition to regular class meetings. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses.

SPAN 570. Studies in Hispanic Linguistics: ____. 3 Credits. U FP
Theoretical and applied analysis of one or more of the following components of the Spanish language: phonology/phonetics, morphology, syntax, semantics, pragmatics. May be repeated for credit if content varies. Prerequisite: SPAN 424 and SPAN 428.

SPAN 681. Language Teaching for Oral Proficiency. 1 Credits. U FP
A summer course designed principally for secondary school language teachers. Provides an orientation to proficiency-based models in foreign language instruction, national standards in the rating of foreign language proficiency, and curriculum development sessions which address issues of articulation in foreign language curricula. (Not applicable toward a major or graduate degree in German.)

SPAN 722. Special Topics in Spanish Literature: ____. 2-3 Credits.
The content of this course will vary, and the course may be taken more than once with full credit, provided there is no duplication in the material studied. Prerequisite: A survey course in Spanish peninsular literature taught in Spanish.

SPAN 730. Topics in the Literature of 13th- and 14th-Century Iberia: ____. 3 Credits.
A theoretically informed study of representative works from 13th- and 14th-century Iberia. Course may be repeated for credit provided that the topic changes.

SPAN 733. Print Culture in Early Modern Spain. 3 Credits.
A study of the literature produced during the period of early printed books with emphasis on the diffusion of new literary forms during the late 15th- and early 16th-centuries.

SPAN 739. Topics in Early Modern Spanish Drama: ____. 3 Credits.
Selected plays of such authors as Lope de Vega, Tirso de Molina, Calderón, and María de Zayas. Course may be repeated for credit provided that the topic changes.

SPAN 745. Don Quixote. 3 Credits.
Linguistic and literary study. Examination of traditional interpretations. The life and thought of Cervantes. Theoretical readings.

SPAN 755. 19th Century Spanish Novel. 3 Credits.
The rise and development of realism. Prerequisite: A survey course in Spanish literature from the 18th century to the present.

SPAN 762. The Spanish Novel Since the Civil War. 3 Credits.
A study of the major works and movements occurring since the Spanish Civil War.

SPAN 764. Modern Spanish Poetry. 3 Credits.
Modern poetry of Spain, beginning with Becquer and ending with the "Generation of the 1920's." Close study of the works of the major poets; readings in poetic theory. Prerequisite: A general survey course of the literature of Spain of the 18th, 19th, and 20th centuries.

SPAN 770. Spanish-American Drama. 3 Credits.
Study of several exceptional plays of 20th century Spanish America in light of critical methodologies, national theatre movements, and performance aspects.

SPAN 772. The Modern Spanish-American Novel, 1900-1950. 3 Credits.
A study of selected novels in Spanish America from the 1900 to 1950. Topics may vary. Prerequisite: A survey course in Spanish American literature.

SPAN 774. Spanish-American Poetry. 3 Credits.
A study of the twentieth century poetic tradition in Spanish America, including major movements and a range of poets who represent the variety of writing in the genre until the 21st century.

SPAN 780. Introduction to Hispanic Studies. 3 Credits.
What does the field of Hispanic Studies encompass? How do we understand our roles as scholars, as teachers, and as members of our communities? How does the field of Hispanic Studies reflect and act upon the dialectics between our thoughts, our actions, our words, and our worlds? With specific attention to incoming graduate students, this course serves to show how Hispanic Studies is a venue to engage in transdisciplinary work and through a variety of methods and approaches. SPAN 780 invites students to reflect on their current career path, and on their role as beginning scholars in Hispanic Studies. The course combines theoretical texts with various forms of cultural expression -including the literary- providing incoming graduate students with a glimpse at the multiple directions and possibilities in the field. In addition, it exposes incoming students to resources available to them at KU, both in and outside the department. Prerequisite: Graduate student status in Spanish. Undergraduates in Spanish may be admitted with consent of instructor.

SPAN 781. Colonial Identities. 3 Credits.
This course centers on the dynamics of identity of Creoles, Amerindians, Blacks and members of the castes in colonial Spanish America. It concentrates on how members of these racial and ethnic groups relate to coloniality, space, place and gender.

SPAN 785. Special Topics in Spanish-American Literature: ____. 2-3 Credits.
The content of this course will vary, and the course may be taken more than once with full credit provided there is no duplication in the material covered. Prerequisite: A survey course in Spanish American literature.

SPAN 795. Literary Theory and Criticism. 3 Credits.
Systematic study of the development of theories of literature. Emphasis usually placed on twentieth century although scope may vary. Prerequisite: 700-level course in Spanish or concurrent enrollment.

SPAN 801. Teaching Spanish in Institutions of Higher Learning. 3 Credits.
Required of all teaching assistants who teach beginning Spanish at the University of Kansas for the first time. Instruction in classroom procedures for first year Spanish, demonstration of teaching techniques, and survey of current methodology.

SPAN 802. Colloquium in Methods of Teaching Spanish Language. 1-3 Credits.
Combines discussion of theoretical teaching concepts and development of pedagogical materials with practical solutions arising concurrently in Spanish languages courses.
Bachelor of Arts in Spanish

Why pursue a major in Spanish?

Spanish, the second most spoken language in the world with approximately 559 million speakers, is the official language in 21 countries. Moreover, according to the Instituto Cervantes, the United States ranks second behind Mexico in the number of Spanish speakers. Similarly, Portuguese, the official language in 9 nations, is spoken by approximately 210 million people over the world (the sixth most spoken language). Fluency in more than one language and an understanding of literary and cultural texts create educated citizens who can contribute to the betterment of our society.

A major in Spanish demonstrates to future employers and/or graduate schools that you have the ability to communicate effectively in Spanish, a high level of cultural competency, and carefully refined analytical and writing skills. Our curriculum is designed to help students hone their oral and written language skills and to learn more about Spanish, Spanish American, and Luso-Brazilian cultures through literary and cultural studies. (See the degree requirements section for the Portuguese courses that can be counted toward the Spanish major). This knowledge is highly beneficial if you plan a career path with an international component or with an orientation toward the predominantly Hispanic populations in the United States. The major is useful in such diverse careers as advertising, marketing, journalism, health services, government, social welfare, and public administration (to name only a few). See the University Career Center's page (https://career.ku.edu/foreign-languages-international-studies/) for foreign language and international studies careers for more information about careers in which you can use your Spanish major.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

### Requirements for the B.A. Major

**Spanish Major Core Knowledge and Skills**

Majors must complete at least 1 course (3 hours) in each of the following areas:

**Literature:** Peninsular Spanish Literary and Cultural Studies. Satisfied by 1 of the following:
- SPAN 440 Topics in Transatlantic Hispanic Studies: _____
- SPAN 441 Special Topics in Spanish Literature and Culture: _____
- SPAN 443 Topics in Hispanic Studies - Peninsular Emphasis: _____
- SPAN 450 Medieval Spanish Studies: _____
- SPAN 451 Early Modern Spanish Studies: _____
- SPAN 452 Nineteenth Century Spanish Studies: _____
- SPAN 453 Twentieth Century Spanish Studies: _____

**Language:** Advanced Spanish Composition and Grammar. Satisfied by 1 of the following:
- SPAN 428 Advanced Spanish Composition and Grammar: 3
- SPAN 429 Spanish Phonetics
- SPAN 448 Spanish Language and Culture for Business
- SPAN 520 Structure of Spanish
- SPAN 522 Advanced Studies in Spanish Language: _____
- SPAN 570 Studies in Hispanic Linguistics: _____

**Literature:** Latin American Literary and Cultural Studies. Satisfied by 1 of the following:
- SPAN 440 Topics in Transatlantic Hispanic Studies: _____
- SPAN 442 Special Topics Latin American Literature and Cultures: _____
- SPAN 444 Topics in Hispanic Studies - Latin American Emphasis: _____
- SPAN 460 Colonial Spanish-American Studies: _____
- SPAN 461 Nineteenth Century Spanish-American Studies: _____
- SPAN 462 Twentieth Century Spanish-American Studies: _____
- SPAN 463 National Traditions in Spanish America: _____
- SPAN 464 Reading and Analysis of U.S. Latino/a Literatures: _____

**Language:** Advanced language, linguistics, or Portuguese. Satisfied by 1 of the following:
- SPAN 520 Structure of Spanish
- SPAN 522 Advanced Studies in Spanish Language: _____
- SPAN 570 Studies in Hispanic Linguistics: _____
- PORT 212 Intermediate Brazilian Portuguese I
- PORT 216 Intermediate Brazilian Portuguese II
- PORT 220 Intensive Intermediate Brazilian Portuguese
- PORT 320 Introduction to Portuguese and Brazilian Literatures
- PORT 340 Textual Analysis and Critical Reading
- PORT 347 Brazilian Studies: _____

**Spanish Major Required Electives.** Majors must complete 2 additional courses (6 hours) from the following courses: any Spanish 400+ or 500-level course (literature, language or culture), or PORT 212 or higher (except PORT 300, PORT 346, and PORT 611).

- SPAN 428 Advanced Spanish Composition and Grammar: 2
- SPAN 429 Spanish Phonetics
- SPAN 448 Spanish Language and Culture for Business
- SPAN 520 Structure of Spanish
- SPAN 522 Advanced Studies in Spanish Language: _____
- SPAN 570 Studies in Hispanic Linguistics: _____
- PORT 212 Intermediate Brazilian Portuguese I
- PORT 216 Intermediate Brazilian Portuguese II
- PORT 220 Intensive Intermediate Brazilian Portuguese
- PORT 320 Introduction to Portuguese and Brazilian Literatures
- PORT 340 Textual Analysis and Critical Reading
- PORT 347 Brazilian Studies: _____

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 32 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Spanish. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Initial SPAN placement determined by online Spanish placement module or previous SPAN college-credit. The Spanish department recommends that students with some prior Spanish experience begin with SPAN 111 or higher, by placement. Only students with no prior Spanish experience should begin in SPAN 104 and discussion with an advisor is recommended.

3. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

4. Spanish majors must have completed 6 credit hours of Hispanic Literature (SPAN 440 or above) coursework before taking the Spanish Capstone course.

5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

6. Advanced Language or Portuguese (Choose one): SPAN 520, SPAN 522, SPAN 570, PORT 212 or higher Portuguese language course.

7. Latin American Literature (Choose one): SPAN 440, SPAN 442, SPAN 460, SPAN 461, SPAN 462, SPAN 463

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Departmental Honors

Undergraduates contemplating honors work should consult their advisers. A declaration of intent form must be submitted to the department. The department notifies students of acceptance to candidacy. At graduation, the student must have a minimum grade-point average of 3.5 in Spanish. 6 hours in SPAN 496 Honors in Spanish generally are required, which may be fulfilled in a variety of ways as described here: each 3-hour SPAN 496 course will include a major research paper. While enrolled in SPAN 496, the student completes 2 courses, one in Peninsular literature and the other in Spanish American literature, from the following options:

1. Graduate courses at the 700 level;
2. Upper-division literature courses at the 500 level, including SPAN 540, SPAN 550, and SPAN 560 (only available to students who have already completed the 500-level capstone course);
3. An independent study course (may only be taken once for SPAN 496 credit).

The student attends 2 courses for SPAN 496 credit and writes 2 honors papers under the supervision of 1 or more faculty members. A committee of 3 faculty members evaluates these papers, and the student makes an oral summary of their content.

Study Abroad

The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina, Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica, Buenos Aires, Argentina, and Salamanca, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu/).

Graduate students have the opportunity to teach and conduct research during summer sessions in Buenos Aires, Argentina; or Barcelona, Spain. The department also has a graduate exchange agreement with the Universidade de Santiago de Compostela, Spain.

Minor in Brazilian Studies

Why pursue a minor in Brazilian Studies?

Portuguese is the official language of nine countries. It is one of the official languages of the European Union and it is also an official language in the Americas, Africa, and Asia. In 1958, it was declared one of the six critical languages by the National Defense Education Act. Within the U.S., it is spoken within the Portuguese, Brazilian, and Cape Verdean communities in states like Massachusetts, Rhode Island, New York, New Jersey, Connecticut, Pennsylvania, California, Florida, Georgia, Louisiana, Iowa, and Kansas.

Brazil is home to the Amazon Forest and River and is the most biodiverse country in the world. It is the fifth-largest country in the world by land area and sixth largest by population. It is also a multicultural and diverse country. Afro-Brazilians constitute the largest black population outside of Africa; the largest Japanese population outside of Japan also lives in Brazil. It has one of the world’s largest economies and the United States is its second trading partner.

A minor in Brazilian Studies is the ideal complement for those studying Portuguese and/or Spanish, as well as for anyone interested in Latin America from a professional or personal perspective. Our interdisciplinary minor will allow you to improve your Portuguese language skills and to learn about the culture, history, politics, and economy of Brazil, South America’s largest country.

See the University Career Center’s page (https://career.ku.edu/foreign-languages-international-studies/) for foreign language and international studies careers for more information about careers in which you can use your Brazilian Studies minor.

Requirements for the Brazilian Studies Minor

This program consists of 6 3-credit-hour courses (for a total of 18 credit hours) in which students pursue Brazilian studies beyond the 3 first semesters of basic language classes. In consultation with departmental advisors, students combine their course work in several academic areas, such as language, business, economics, film and media studies, geography, history, political science, and theatre.

Brazilian Studies Minor Course Requirements

Students selecting this minor must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
</table>
| Prerequisite Knowledge

Satisfied by Intermediate Brazilian Portuguese I-PORT 212 or equivalent placement.

Requirements for the Minor

Satisfied by 3 courses from each of the following groups:

Group I: 9

| PORT 216 | Intermediate Brazilian Portuguese II                               | 3     |
| PORT 220 | Intensive Intermediate Brazilian Portuguese (Open only to students abroad) | 3     |
| PORT 300 | Brazilian Culture                                                  | 3     |
| PORT 320 | Introduction to Portuguese and Brazilian Literatures               | 3     |

| PORT 490 | Intensive Advanced Portuguese (Open only to students abroad)       | 3     |

Group II: 9

| HIST 579 | The History of Brazil                                              | 3     |
| PORT 347 | Brazilian Studies:                                                 | 3     |
| PORT 348 | Portuguese Language and Brazilian Culture for Business             | 3     |
| PORT 365 | Studies in Brazilian Film:                                         | 3     |
| PORT 394 | Special Readings in Brazilian Studies                              | 3     |
| PORT 471 | Studies in Brazilian Culture and Civilization:                    | 3     |
| PORT 475 | Studies in Brazilian Literature:                                  | 3     |
| PORT 565 | Studies in Brazilian Film:                                         | 3     |

Depending on their content, the following courses may substitute for required or elective courses by petition:

| ECON 582 | Economic Development                                              |       |
| HIST 580 | Economic History of Latin America (with at least 1/3 of focus on Brazil and a paper on Brazil) |       |
| POLS 659 | Political Dynamics of Latin America (with at least 1/3 of focus on Brazil and a paper on Brazil) |       |
Minor in Spanish

Why pursue a minor in Spanish?

The Spanish minor provides students the opportunity to achieve cultural and linguistic competency and complements many majors within the College of Liberal Arts & Sciences as well as other degree programs across the university.

Spanish, the second most spoken language in the world with approximately 559 million speakers, is the official language in 21 countries. Moreover, according to the Instituto Cervantes, the United States ranks second behind Mexico in the number of Spanish speakers. Fluency in more than one language and understanding culture and analytical understandings of literary and cultural texts create educated citizens who can contribute to the betterment of our society.

A minor in Spanish demonstrates to future employers and graduate schools that you have achieved a certain level of linguistic ability and understanding of Hispanic cultures. Our curriculum is designed to help students hone their oral and written language skills and to learn more about Spanish and Spanish American cultures through literary and cultural studies. This knowledge is highly beneficial if you plan a career path with an international component or with an orientation toward the predominantly Hispanic populations in the United States. The minor is useful in such diverse careers as advertising, marketing, journalism, health services, government, social welfare, and public administration (to name only a few). See the University Career Center’s page (https://career.ku.edu/foreign-languages-international-studies/) for foreign language and international studies careers for more information about careers in which you can use your Spanish minor.

Requirements for the Spanish Minor

The minor requires 18-20 hours, as well as prerequisite knowledge.

Minor Hours & GPA

While completing required courses, minors must also meet each of the following hour and grade point average minimum standards:

<table>
<thead>
<tr>
<th>Minor Hours</th>
<th>Satisfied by 18 hours of minor courses.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minor Hours in Residence</td>
<td>Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.</td>
</tr>
<tr>
<td>Minor Junior/Senior Hours</td>
<td>Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.</td>
</tr>
<tr>
<td>Minor Graduation GPA</td>
<td>Satisfied by a minimum of 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (<a href="http://clas.ku.edu/undergrad/tools/gpa/">http://clas.ku.edu/undergrad/tools/gpa/</a>).</td>
</tr>
</tbody>
</table>

Study Abroad

The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina, Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica, Buenos Aires, Argentina, and Salamanca, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu/).
Graduate students have the opportunity to teach and conduct research during summer sessions in Buenos Aires, Argentina; or Barcelona, Spain. The department also has a graduate exchange agreement with the Universidade de Santiago de Compostela, Spain.

**Master of Arts in Spanish**

The master’s degree program provides students with the opportunity to study the major movements and writers in Iberia and Latin America, acquire the critical and theoretical tools necessary to engage literary and cultural analysis with sophistication, and develop communicative competence through pedagogical and scholarly formation.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

1. In addition to the general admission requirements (https://gradapply.ku.edu/apply/) from the Office of Graduate Studies, which includes holding (or anticipate completing by the time of admission) a B.A. or B.S. degree from an accredited U.S. college or university or the equivalent degree from a foreign university, the applicant must have 15 semester hours of literature courses at the survey level or above in Spanish or the equivalent of the undergraduate major in Spanish at KU.

2. The selection committee gives strong consideration to letters of recommendation, the breadth and depth of preparation, and Graduate Record Examination scores, if available. Deficiencies in preparation specified by the selection committee may be made up early in the graduate program, although the time required to complete the degree is correspondingly greater.

Submit your graduate application online (https://gradapply.ku.edu/apply/). Send all other requested application materials to the department:

The University of Kansas
Department of Spanish and Portuguese
Wescoe Hall
1445 Jayhawk Blvd., Room 2650
Lawrence, KS 66045

**M.A. Degree Requirements**

At least 50% of coursework for the master’s degree must be taken at the 700 level or above.

1. A minimum of 30 hours of graduate credit in literature, including one seminar in Peninsular literature or in Spanish-American literature.

2. A minimum of one course with a focus on each of the following:
   a. Medieval/Early Modern Peninsular
   b. Colonial Latin America (prior to 19th Century)
   c. Modern/Contemporary Peninsular (19th-21st Century)
   d. Modern/Contemporary Latin/o America

3. Students in the MA considering pursuing a Ph.D. should enroll in SPAN 795, or an alternative course with a focus in literary theory.

4. It is highly recommended that students take at least one course with a focus on film studies or cultural studies.

5. Two of the required 30 hours of coursework may be taken outside of the department with the approval of the graduate advisor.

6. SPAN 801: Teaching Spanish in Institutions of Higher Learning—required of all GTAs during their first semester of teaching.

7. Reading knowledge of another foreign language as approved by the department.

8. A portfolio defense or general examination based on the appropriate department reading lists, partly written and partly oral.

For additional information, please see our Graduate Handbook (https://spanport.ku.edu/academics/).

**Study Abroad**

The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina, Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica, Buenos Aires, Argentina, and Salamanca, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu/).

Graduate students have the opportunity to teach and conduct research during summer sessions in Buenos Aires, Argentina; or Barcelona, Spain. The department also has a graduate exchange agreement with the Universidade de Santiago de Compostela, Spain.

**Doctor of Philosophy in Spanish**

The Department of Spanish and Portuguese has developed a Ph.D. to address the needs of a new generation of doctoral students in the humanities. The program provides a rigorous and comprehensive education in the traditional disciplines of Iberian and Latin American literary studies, while also allowing for engagement with larger issues relating to the role of the humanities in the contemporary world. Students admitted to the doctoral program will have the opportunity to develop research interests under the guidance of diverse faculty and to acquire the skills to teach successfully at the University level.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission**

1. The applicant must hold (or anticipate completing by the time of admission) an M.A. or M.S. degree from an accredited U.S. college or university or the equivalent degree from a foreign university and must
meet the general admission requirements (https://gradapply.ku.edu/apply/) from the Office of Graduate Studies.

2. Strong consideration is given to letters of recommendation, breadth and depth of preparation, and Graduate Record Examination scores, if available.

Submit your application online (https://gradapply.ku.edu/). Send all other requested application materials to

The University of Kansas
Department of Spanish and Portuguese
Wescoe Hall
1445 Jayhawk Blvd., Room 2650
Lawrence, KS 66045-7594

Ph.D. Degree Requirements

The degree of Doctor of Philosophy is offered with emphasis on Spanish or Spanish-American literature.

Requirements

Once admitted, the aspirant must

1. Present a reading knowledge of 2 foreign languages, other than Spanish, appropriate to the specialization;
2. Complete all course work prescribed by the advisory committee (this course work is to include a minimum of 5 seminars, at least 4 at KU, one literary theory course, and a guideline of a minimum of 24 hours in Hispanic literatures at KU beyond the 30 hours required for the M.A. degree);
3. Present a minor in a field other than Spanish or Spanish-American literature. Minimum of one minor (9 credits), either through courses outside the department, or a minor in Lusophone Studies that includes courses in our department. Please see our Graduate Student Handbook (https://spanport.ku.edu/academics/) for more information;
4. Complete a minimum of 2 semesters of quarter-time teaching or 1 semester of half-time teaching in the Department of Spanish and Portuguese;
5. Research Skills and Responsible Scholarship Requirement. The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Please contact your advisor or the director of graduate studies for specific requirements.
6. Pass a comprehensive examination, partly written and partly oral; and
7. Write and defend a dissertation.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

See also the general requirements for the Doctor of Philosophy degree in Graduate Studies (p. 2408) section of the online catalog and in the KU Policy Library.

Study Abroad

The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina, Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica, Buenos Aires, Argentina, and Salamanca, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu/).

Graduate students have the opportunity to teach and conduct research during summer sessions in Buenos Aires, Argentina; or Barcelona, Spain. The department also has a graduate exchange agreement with the Universidade de Santiago de Compostela, Spain.

Department of Speech-Language-Hearing: Sciences and Disorders

Why study speech, language, and hearing?

Because communication is central to human behavior, and the treatment of communication disorders requires specialized knowledge and skills.

Career Opportunities

An undergraduate degree in SPLH contributes to preparation for careers in a range of fields related to communication disorders including neuroscience, medicine and related health professions, education, and assistive technology. In addition, an undergraduate degree in speech-language hearing is an entry point for graduate study in speech-language pathology or audiology. Most states have laws mandating that speech-language pathologists and audiologists be licensed to practice their profession. The minimum requirement for licensure in most states is a master’s degree for speech-language pathology and the Au.D. for audiology. Speech-language pathologist and audiologists are in high demand with job growth expected to continue into the future. Individuals with bachelor degrees may work as an assistant to licensed professionals in settings such as schools and clinics, or may pursue employment in related fields.

Undergraduate Programs

Basic study in speech, language, and hearing is provided through B.A. and B.G.S. programs. Undergraduates study the basic processes of human communication. Programs are designed for the student who seeks a career related to speech, language, or hearing or to communication development and communication disorders. The majority of undergraduate courses are offered both fall and spring semester to maintain a smaller class size and facilitate timely graduation. Courses are taught using interactive and flexible formats that provide ample opportunity for hands-on experiential learning. There are numerous opportunities to engage in learning outside the classroom through faculty-mentored research projects, collaborative clinical experiences, and study abroad opportunities. Courses and experiences set the stage for a successful career in audiology, speech-language pathology, neuroscience, medicine and related health professions, education, and assistive technology.

Qualified KU undergraduates may earn both a B.A. in Speech-Language-Hearing: Sciences and Disorders and M.A. in Speech-Language Pathology in approximately 5 years through the Accelerated M.A. program (p. 1837).

Graduate Programs

Graduate study at KU is offered through the Intercampus Program in Communicative Disorders, which is a partnership between the Department of Speech-Language-Hearing on the Lawrence campus and the Department of Hearing and Speech on the medical center campus in
Kansas City. Degrees offered include a clinical doctorate in audiology, a master’s degree in speech-language pathology, a post-master’s clinical doctorate in speech-language pathology, and Ph.D. degrees in audiology and speech-language pathology. Students engage in classes, research, and clinical work in Lawrence and at KU Medical Center in Kansas City.

Students who are interested in enrolling in graduate level coursework in the Department of Speech-Language-Hearing without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. Admission is highly selective and non-degree seeking students must consult with an advisor on class selection prior to enrollment. See the Department’s website (http://www.kumc.edu/school-of-health-professions/hearing-and-speech.html) for further details.

Courses

**SPLH 161. Survey of Communication Disorders. 3 Credits. SI S**
Provides a general understanding of normal and deviant speech, language, and hearing in adults and children. This course considers the normal development of communication behavior, the nature of communication disorders, and the interaction of speech pathology and audiology with allied fields (e.g., education, medicine, psychology, special education).

**SPLH 177. First Year Seminar: ______. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Speech-Language and Hearing. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**SPLH 220. The Physics of Speech. 4 Credits. N**
An introduction to the acoustic structure of speech intended for nonscience majors. Emphasis will be placed on the methods and standards by which scientists measure and evaluate the physical characteristics of speech. Topics will include: simple harmonic motion, the propagation of sound waves, aerodynamic aspects of vocal fold vibration, resonance, digital speech processing, frequency analysis, and speech synthesis. Three class hours and one laboratory per week. (Same as LING 120.) Prerequisite: MATH 101 or 104 or equivalent.

**SPLH 250. Study Abroad Topics in: ______. 1-5 Credits. S**
A course designed to enhance international experience in topic areas related to speech-language-hearing at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

**SPLH 418. Introduction to Cognitive Science. 3 Credits. S**
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PHIL 418, and PSYC 418.) Prerequisite: Consent of instructor.

**SPLH 430. Communication in Autism. 3 Credits.**
This course will provide you with an introduction to the characteristics and communication of individuals with Autism Spectrum Disorder (ASD). This course will focus on diagnostic criteria, early identification, communication assessment and intervention considerations, and partnering with families who have family members with ASD. This course is offered at the 400 and 800 levels with additional assignments at the 800 level. Not open to students with credit in SPLH 830.

**SPLH 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N**
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercialancestortest. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, BIOL 449, and PSYC 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

**SPLH 450. Study Abroad Topics in: ______. 1-5 Credits. S**
A course designed to enhance international experience in topic areas related to speech-language-hearing at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

**SPLH 451. Directed Study Abroad in Speech-Language-Hearing. 1-3 Credits. S**
An independent study designed to enhance international experience in topic areas related to speech-language-hearing. Investigation of special topic or project selected by the student with advice, approval, and supervision by a KU SPLH instructor and an authorized agent of the study abroad site. Experience must be arranged through the Office of KU Study Abroad. Such study may take the form of directed reading and/or directed research/clinical observation. A daily journal and final report is required. A maximum of six hours of credit may be counted, with no more than three in a single area of study. Prerequisite: Consent of instructor

**SPLH 452. Examining Global Perspectives in Speech-Language-Hearing: ______. 3 Credits.**
For students enrolled in an SPLH-sponsored Study Abroad program. Students participate in 12 hours of meetings in preparation for the Study Abroad experience. Pre-trip meetings focus generally on multi-cultural issues relevant to speech-language-hearing practice as well as specific cultural, linguistic, and service delivery issues for the target country. Students spend two weeks abroad, visiting sites to observe different types of service delivery for people with disabilities and places that are culturally and historically relevant. Periodic debriefing and small group discussions are conducted during the time abroad. A daily journal and post-visit reflection paper is required. Prerequisite: Instructor permission required.

**SPLH 462. Principles of Speech Science. 3 Credits. N**
Survey of the physiology of speech production, and the physics of sound. Emphasis upon methodologies in the laboratory study of normal speech. Prerequisite: SPLH 120, or concurrent enrollment in SPLH 120 or consent of instructor.

**SPLH 463. Principles of Hearing Science. 3 Credits. N**
This class discusses the concepts and principles relevant to normal hearing processing: anatomy, psychophysical methods, and basic subjective correlates of the auditory system. Prerequisite: SPLH 120, or concurrent enrollment in SPLH 120, or consent of instructor.

**SPLH 464. Undergraduate Seminar in: ______. 1-3 Credits. S**
Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion,
readings, and individual projects. (Distribution credit given for two-three hours only.)

**SPLH 465. Fundamentals of Clinical Phonetics. 1 Credits. S**
Introduction to classification of American English speech sounds based on articulatory phonetics. Practice in phonetic transcription and analysis of normal and abnormal speech. Laboratory exercises to give students hands-on experience with selected topics from lecture. Prerequisite: Corequisite: SPLH 120.

**SPLH 466. Language Science. 3 Credits. S**
Introduction to structure/function of human languages as it relates to language development and disorders; processes involved in the expression and reception of language and the methodologies employed to study these processes.

**SPLH 479. Mentored Research Experience. 2-8 Credits. S**
Study may be directed toward either reading for integration of knowledge and insight in Speech-Language-Hearing, or original research in the field. Student creates a plan of activities at the beginning of each semester under the mentor’s guidance. Student and mentor review this plan at the end of each semester to evaluate progress. In the final semester of enrollment, student must complete a written report or a public oral presentation detailing the purpose, methods, results, and impact of the research. This final product partially meets the requirements for Research Experience Certification. (Eight hours maximum credit, which may be distributed through 4 semesters. No student may enroll for less than two hours credit or more than 4 hours of credit in a given semester). Prerequisite: Consent of Departmental Research Experience Coordinator.

**SPLH 498. Departmental Honors Research. 2-8 Credits. S**
Study may be directed toward either reading for integration of knowledge and insight in Speech-Language-Hearing, or original research in the field. Student creates a plan of activities at the beginning of each semester under the mentor’s guidance. Student and mentor review this plan at the end of each semester to evaluate progress. In the final semester of enrollment, student must complete a written report or a public oral presentation detailing the purpose, methods, results, and impact of the research. This final product partially fulfills the requirements for Departmental Honors. (Eight hours maximum credit, which may be distributed through 4 semesters. No student may enroll for less than two hours credit or more than 4 hours of credit in a given semester). Prerequisite: Consent of Departmental Honors Coordinator.

**SPLH 499. Directed Study in Speech-Language-Hearing. 1-3 Credits. S**
Investigation of special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading and/or directed research/clinical observation. Individual reports and conferences. (Distribution credit given for two-three hours only.) A maximum of six hours of credit may be counted, with not more than four in a single area of study.) Prerequisite: Consent of instructor.

**SPLH 516. Speech Perception. 2 Credits. S**
Acoustic and perceptual characteristics of phonemes, words, and connected speech for normal-hearing adults and infants; how speech perception is assessed clinically and is affected by hearing loss, aging, use of amplification, talker differences, and linguistic factors. Prerequisite: SPLH 120 Physiology of Speech. Prerequisite or Corequisite: SPLH 463 Principle of Hearing Science.

**SPLH 565. Language Sample Analysis Lab. 1 Credits. S**
The study of the analysis of language produced by children with respect to its phonological, lexical, morphological, syntactic, and pragmatic characteristics. Prerequisite: Corequisite: SPLH 566.
reviews of research paper drafts. Prerequisite: 9 credits of SPLH course work; English 101 and ENGL 102 (or course meeting core skill in written communication); or consent of instructor.

SPLH 668. Introduction to Audiological Rehabilitation. 2 Credits.
Introduction to methods for treating hearing disorders in adults and children, as well as conditions that result in hearing loss. Course includes clinical observation and extensive hands-on experience with clinical techniques. This course should only be taken by graduate students in SPLH who have not completed this prerequisite. Not open to students with credit in SPLH 568. Prerequisite: Graduate standing.

SPLH 670. Beginning Clinical Practice in Audiology. 1-3 Credits.
Testing of hearing using pure tone air and bone conduction tests with both normal and hearing-impaired individuals. Prerequisite: SPLH 568, or concurrent enrollment in SPLH 568, overall GPA 3.0 and consent of instructor.

SPLH 672. Clinical Practice in Speech-Language Pathology. 3 Credits.
Clinical practice with children and adults. Group and individual conferences with staff required. Repeatable once for credit. Prerequisite: SPLH 571 and overall GPA of 3.0.

SPLH 716. Speech Perception. 2 Credits.
Acoustic and perceptual characteristics of phonemes, words, and connected speech for normal-hearing adults and infants; how speech perception is assessed clinically and is affected by hearing loss, aging, use of amplification, talker differences, and linguistic factors. (Same as AUD 816.)

SPLH 736. Foundations of Early Intervention. 3 Credits.
This course explores evidence-based principles and practices of providing early intervention services, including requirements of IDEA Part C, mission and key principles of early intervention and recommended practices and standards. Students will engage in guided field observations of assessment, intervention and collaborative practices, reflective practice and teaching/coaching activities. (Same as SPED 736.)

SPLH 737. Infants and Toddler with Significant Needs. 3 Credits.
This course explores the challenges infants and toddlers with significant developmental needs face and how to best support their participation in daily activities. Challenges faced by medical, physical, communication, social-emotional, hearing, vision, and mental health issues will be discussed along with how to support these needs across disciplines and in the home and community activities. This course will provide in-depth review of the unique challenges these children and families face and how providers from various backgrounds can work together to best support children and families. Environmental adaptations and direct instructional techniques to maximize independence tailored to the infant and toddler’s strengths and needs will be explored. Information is also provided on assistive technology designed to provide supports. Functional behavioral assessment procedures, proactive intervention strategies and psycho-educational approaches as well as the development of collaborative support plans will be studied. (Same as SPED 737.)

SPLH 752. Examining Global Perspectives in Speech-Language-Hearing: ______. 3 Credits.
For students enrolled in an SPLH-sponsored Study Abroad program. Students will participate in 12 hours of meetings in preparation for the Study Abroad experience. Pre-trip meetings will focus generally on multicultural issues relevant to speech-language-hearing practice as well as specific cultural, linguistic, and service delivery issues for the target country. Students may be required to facilitate discussions or prepare presentations for these meetings. Students will spend two weeks abroad, visiting sites to observe different types of service delivery for people with disabilities and places that are culturally and historically relevant. Students may partner with undergraduates to facilitate any clinically focused experiences. Periodic debriefing and small group discussions will be conducted during the time abroad. A daily journal and post-visit reflection paper will be required.

SPLH 764. Seminar in: ______. 1-3 Credits.
The subject matter of this seminar will be special topics from speech pathology and audiology. Special prerequisite may be established for a given topic.

SPLH 799. Proseminar in Child Language. 2 Credits.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, CLDP 799, LING 799 and PSYC 799.)

SPLH 816. Language Development. 3 Credits.
Study of language acquisition in children, including the morphologic, syntactic, and semantic components. Methods of language measurement, the role of comprehension, and pragmatic aspects of language use will be included. Not open to students who have credit for SPLH 566. Laboratory by appointment.

SPLH 820. Developmental Phonological Disorders. 2 Credits.
Focuses on speech and non-speech characteristics of children with developmental phonological disorders. Emphasis placed on collection and phonetic transcription of speech samples, phonological analysis of transcribed data, and decision-making processes in assessment and intervention.

SPLH 822. Dysarthria/Apraxia. 2 Credits.
This course describes the neuroanatomic bases of motor-speech processes, the diagnosis, classification, assessment, prognosis, and treatment of dysarthria(s) and apraxia(s).

SPLH 824. Fluency Disorders. 2 Credits.
The nature of stuttering in children and adults is discussed. Theories regarding etiology, development, and maintenance of the disorder are presented. Emphasis is placed on various clinical approaches to assessment, measurement, and treatment.

SPLH 826. Phonatory Disorders. 2 Credits.
This course reviews the function of the laryngeal and respiratory mechanisms including the parameters and processes of phonation. Primary content addresses diagnosis, description, and treatment of organic and non-organic disorders of phonation.

SPLH 828. Speech Disorders in Special Populations. 2 Credits.
This course reviews anatomy and physiology of the velopharyngeal mechanism. Diagnosis and management of velopharyngeal dysfunction and associated problems considered. Anatomy, physiology, and rehabilitation associated with certain oral, pharyngeal, and laryngeal abnormalities discussed. Emphasis is on the speech problems of adults following medical management. Populations include individuals with laryngectomies, glossectomies, and tracheotomies.

SPLH 830. Communication in Autism. 3 Credits.
This course will provide an introduction to the characteristics and communication of individuals with Autism Spectrum Disorder (ASD). This course will focus on diagnostic criteria, early identification, communication assessment and intervention considerations, and partnering with families who have family members with ASD. This course is offered at the 400 and 800 levels with additional assignments at the 800 level. Not open to students with credit in SPLH 430.

SPLH 832. Dysphagia. 2 Credits.
This course covers normal and disordered swallowing. Evaluation and treatment of swallowing disorders, the dysphagia team, and dysphagia in special populations are considered.

**SPLH 833. Dysphagia Treatment in Adults. 2 Credits.**
This course is designed to build critical thinking and analysis skills for developing and implementing appropriate treatment plans for adults with dysphagia. Foundations of non-instrumental swallow assessment, rehabilitation, and compensation will be addressed. This course will also cover issues of ethics, cultural considerations in dysphagia management, and professional communication. Learning experiences will include evidence-based curriculum, hands-on practice, and critical thinking activities. Prerequisite: SPLH 832.

**SPLH 834. Augmentative and Alternative Communication and Literacy. 2 Credits.**
This course is designed to provide resources and information to prepare students to collaborate with others in increasing the literacy opportunities and skills of individuals with complex communication needs, particularly those who use augmentative and alternative communication.

**SPLH 838. Augmentative and Alternative Communication in Schools. 2 Credits.**
This course provides information about augmentative and alternative communication (AAC) services in school settings. Students will participate in readings and activities that will provide information concerning the roles, responsibilities, and contributions of school speech-language pathologists relative to AAC.

**SPLH 840. Language Disorders of Children: Infants and Toddlers. 2 Credits.**
This course examines factors relating to language disorders in the birth to three population. At-risk populations, as well as those with known etiologies, are considered. Information on assessment, intervention, and service delivery models is addressed. Issues relating to Public Law 99-457 are also examined.

**SPLH 842. Language Disorders of Children: Preschool. 2 Credits.**
This course examines language disorders of preschool-age children in the late preschool years. The course includes information on incidence, characteristics, assessment, and intervention. Theoretical issues and their implication for language intervention are also examined.

**SPLH 844. Language Disorders of Children: School Age. 2 Credits.**
This course examines language development during the school years and how problems in this development interact with school performance. Emphasis is placed on the role of the speech-language pathologist in the early identification, assessment, and remediation of language-learning problems.

**SPLH 846. Language Disorders of Adults. 2 Credits.**
Neurological aspects of language processes, classification of aphasia, and assessment of language deficits are discussed. Management approaches including intervention strategies and rehabilitation are also considered.

**SPLH 848. Language Disorders of Special Populations. 2 Credits.**
This course focuses on communication differences in individuals with intellectual disabilities, autism, cerebral palsy, dual sensory impairments, and other conditions affecting communication competence. Communication characteristics as well as assessment and intervention strategies are studied.

**SPLH 850. Cognitive-Linguistic Disorders of Adults. 2 Credits.**
This course will prepare students to work with adults with acquired cognitive-linguistic disorders, with a focus on: Alzheimer's Disease, Traumatic Brain Injury, and Right Hemisphere Disorder, including etiologies and disease processes. Theoretical and practical knowledge will be presented regarding the primary cognitive domains of attention, memory, and executive function, as well as their impact on discourse-level language. The course will cover neuroanatomy, assessment procedures, interventions, family/communication partner training, and psychosocial aspects of cognitive-linguistic disorders.

**SPLH 852. Augmentative and Alternative Communication. 2 Credits.**
This course describes augmentative and alternative communication (AAC) assessment and intervention issues as they apply to children and adults with both congenital and acquired speech and/or language disabilities. Areas of study include AAC systems, assessment strategies and procedures, intervention strategies, and AAC information resources.

**SPLH 853. Augmentative and Alternative Communication and Adult Acquired Disorders. 2 Credits.**
This course will discuss the concepts and evidence related to assessment and intervention in the area of augmentative and alternative communication for adults with acquired disorders. Content will be related specifically to adults with acquired communication disorders and focus more on high tech than low tech but information and evidence related to both will be presented. Information about AAC systems appropriate for adults, assessment protocols, approaches to intervention, and advocacy will be applied in a case-based format.

**SPLH 854. Reading Disorders. 2 Credits.**
This course addresses the perceptual, linguistic, and cognitive processes utilized in written communication. Acquired and developmental disorders of written language are examined in relation to issues concerning characteristics, etiology, early identification, assessment, and remediation.

**SPLH 860. Evaluation of Speech and Language. 2 Credits.**
Provides a general framework for speech and language evaluations. Issues related to initiation and termination of treatment are discussed. Practice is provided in evaluating norm- and criterion-referenced information used in diagnostic, referral, and treatment decisions.

**SPLH 861. Seminar in Research Methodology in Speech Pathology and Audiology: _____ 3 Credits.**
This seminar is concerned with the design, instrumentation, execution, and reporting of research in audiology and speech pathology. SPLH 760 or its equivalent and some statistics are recommended before entering this seminar.

**SPLH 862. Clinical Processes. 1 Credits.**
Orients student to clinical procedures, policies, requirements, and expectations of program. Therapy models, planning, and philosophies are discussed along with implementation and evaluation of therapy procedures. Professional issues are also considered. May be repeated for credit.

**SPLH 864. Advanced Clinical Practice in Speech-Language Pathology. 1-6 Credits.**
Students conduct supervised clinical work in a variety of settings. May be repeated for credit. Prerequisite: Department approval. Group and individual conferences with staff required.

**SPLH 866. Field Study in Speech-Language Pathology. 5-12 Credits.**
The field study provides work experiences in clinical and/or research activities. The student takes this course near the end of the degree.
SPLH 868. Professional Issues. 1 Credits.
Forum for the presentation and discussion of scientific and professional issues by faculty and advanced graduate students. May be repeated for credit. Prerequisite: Advisor’s consent.

SPLH 874. Master’s Research Practicum. 1-3 Credits.
This course is designed to give students experience in conducting research. Students apply and extend their knowledge and skills by participating in a research project under the supervision of a mentor. Students may assist with or independently conduct research in speech, language, or hearing. Prerequisite: SPLH 660 or equivalent research methods course.

SPLH 876. Independent Study in Problems of Speech, Language, and Hearing. 1-6 Credits.
Investigation of special topics by individual master’s level students. Paper required. Prerequisite: Consent of instructor.

SPLH 888. Multicultural Considerations in Speech-Language-Hearing I. 1 Credits.
This course introduces foundational concepts of culture and diversity, bilingualism, bias, and components and processes leading to cultural competency. Students explore health and educational disparities in the United States and beyond. Students will reflect on their cultural identity, and how their experiences and perspectives may differ from others, and how their experiences can influence service delivery in speech-language pathology and audiology. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level.

SPLH 889. Multicultural Considerations in Speech-Language-Hearing II. 1 Credits.
This course builds on foundational concepts from SPLH 888 by exploring potential cultural and linguistic characteristics of populations that are typically underrepresented in many sectors of the Unites States, including education and health care. Case studies are implemented to examine cultural and linguistic influences on assessment and treatment processes in speech-language pathology and audiology. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. Prerequisite: SPLH 888 or consent of instructor.

SPLH 899. Master’s Thesis. 1-6 Credits.
Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis.

SPLH 900. Proseminar in Communicative Disorders. 1 Credits.
A weekly forum for students and faculty to discuss professional issues and interdisciplinary research in communicative disorders and related fields. May be repeated for credit. Limited to two hours credit counted toward an MA or AuD degree. Limited to four hours credit counted toward the PhD degree. Graded on a satisfactory/unsatisfactory basis.

SPLH 964. Seminar in: ___. 1-3 Credits.
The subject matter of this seminar will be special topics from speech pathology and audiology, including those related to research methodology and research or academic careers. Special prerequisites may be established for a given topic.

SPLH 970. Independent Study in Problems of Speech and Hearing. 1-6 Credits.
Investigation of special topics by individual students. Paper required.

SPLH 974. Doctoral Research Practicum. 1-6 Credits.
Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting an experimental investigation in speech or hearing.

SPLH 975. Directed Teaching: Speech Pathology and Audiology. 1-3 Credits.
Provides experiences in classroom and laboratory instruction under supervision of graduate faculty. Variable credit to reflect amount of instructional responsibility assumed. May be repeated up to a maximum of six semester hours.

SPLH 976. Independent Study in Grant Writing. 1-3 Credits.
Students will identify a funding agency appropriate for their research, learn the application procedures for that agency, and draft a grant application following the identified agency’s format. The faculty mentor will arrange for a review of the grant application following the agency’s review criteria and format. May be repeated up to a maximum of three credits.

SPLH 982. Issues in Scientific Conduct. 3 Credits.
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as CLDP and PSYC 982.)

SPLH 998. Investigation and Conference (For Doctoral Candidates). 1-8 Credits.
(Limited to eight hours credit towards the Ph.D. degree.) Readings, critical thinking, and scientific writing in preparation for the oral comprehensive exam.

SPLH 999. Doctoral Dissertation. 1-12 Credits.
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Arts and Bachelor of General Studies in Speech-Language-Hearing

Why study speech, language, and hearing?

Communication is central to human behavior, and the treatment of communication disorders requires specialized knowledge and skills.

Undergraduates in the Department of Speech-Language-Hearing: Sciences and Disorders study the basic processes of human communication. Programs are designed for the student who seeks a career in speech, language, or hearing or is interested in normal communication development and communication disorders.

Beginning with the undergraduate experience, you’ll find stimulating course work, clinical observation, and a variety of hands-on laboratory projects. To practice as a speech-language pathologist, you will need to earn a master’s degree. Plan to pursue doctoral studies if you want to practice audiology or do research in speech, language, and hearing processes and disorders.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year
students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

Both the B.A. and the B.G.S. aspirant should fulfill the College general education requirements. Students also should complete SPLH 161, SPLH 220, SPLH 463 SPLH 465, SPLH 466, and elective courses in human physiology, psychology, and linguistics during their first 2 years. College Academic Advisors and Faculty members can help students select appropriate course work.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 35 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 28 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of
study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Please refer to the sample 4-year plan of the BA degree in Speech-Language-Hearing (p. 1832) for more information.

Please refer to the sample 4-year plan of the BGS degree in Speech-Language-Hearing (p. 1833) for more information.

**Departmental Honors**

The honors program offers exceptional undergraduates the opportunity to work closely with individual faculty members on scholarly projects over an extended period of time. Students are admitted to the program and matched with faculty through an application process that occurs each semester during course enrollment. Contact the Honors Coordinator for details. The following are required:

1. A grade-point average at graduation of at least 3.5 in the major.
2. Completion of 6 to 8 credit hours in SPLH 498 Departmental Honors Research. Students work under the direction of faculty members. Students may change areas of interest or faculty supervisors at the beginning of a semester with the consent of the honors coordinator. In the final semester of SPLH 498 enrollment, students also must complete a written report or public oral presentation detailing the purpose, methods, results, and impact of the research. Academic credit but no honors designation is given to students who meet the requirements for any semester but do not complete all requirements for departmental honors.

**BA in Speech-Language-Hearing**

Below is a sample 4-year plan for students pursuing the BA in Speech-Language-Hearing. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. MATH 101 is the pre-requisite course for SPLH 220.
3. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
4. SPLH 463 is only offered in the spring.
5. SPLH 463 is a pre-requisite for SPLH 568.
6. Recommended electives for SPLH majors are SPLH 497/SPLH 498 (SPLH 498 requires major GPA 3.5 or higher and consent of honors coordinator); SPLH 670 and SPLH 672 (both require completion of major requirements and a 3.0 GPA or higher).
7 For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

8 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

9 ASHA (American Speech-Language-Hearing Association) Recommendations: BIOL 100 recommended KU Core Goal 3N, BIOL 102 recommended for BA LFE, MATH 365 recommended for BA Quantitative Reasoning, SOC 104 recommended for KU Core 4.1, PSYC 104 recommended for an elective.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to pursue additional majors and/or minors.

### BGS in Speech-Language-Hearing

Below is a sample 4-year plan for students pursuing the BGS in Speech-Language-Hearing. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1 MATH 101 is the pre-requisite for SPLH 220.

2 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

3 SPLH 463 is only offered in the spring.

4 SPLH 463 is the pre-requisite for SPLH 568.

5 Recommended electives for SPLH majors are SPLH 497/SPLH 498 (SPLH 498 requires major GPA 3.5 or higher and consent of honors coordinator); SPLH 670 and SPLH 672 (both require completion of major requirements and a 3.0 GPA or higher).

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Speech-Language-Hearing

Why study speech, language, and hearing?

Communication is central to human behavior. A minor in SPLH can be combined with a variety of majors to better prepare students to work in careers related to normal speech-language-hearing processing and development as well as careers that serve individuals with communication disorders. Typical related careers include neuroscience, medicine, health related professions, education, and assistive technology. Careful course selection can allow you to focus on a theme within SPLH that is well-suited to your career aspirations. Themes include: communication neuroscience, speech-language development and disorders, and hearing science and disorders. Alternatively, a student who wants to get to know the field better can sample a variety of courses to take a more generalist approach to the minor.

Requirements for the Minor: General Track

Students who would rather create their own area of focus may take SPLH 261 for a broad overview of the discipline. Students then select a minimum of 9 credits of foundational coursework followed by a minimum of 6 credits of applied coursework. Across foundational and applied coursework, students need to obtain a minimum of 12 credits at the junior/senior level. Total required hours = 18

Courses with clinical content can be taken as directed study with the permission and support of a faculty mentor.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours in Residence

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Undergraduate Certificate in Learning and Communication in Children with Autism

This is an opportunity to gain formal recognition for completing courses and experiences specifically focused on learning and communication in children with autism. Students completing this certificate program will learn about communication development in children with Autism Spectrum Disorders (ASD) and learn about behavioral intervention strategies. It is designed to promote interest in undergraduates who may be considering careers such as education or becoming a therapist. An additional goal is to promote awareness of some of the communication challenges faced by individuals with ASD so that participants in the certificate program will become more informed citizens in our increasingly diverse world. Completion of the certificate will be noted on student’s transcripts.
Master of Arts in Speech-Language Pathology

The master's degree in speech-language pathology is designed to produce highly skilled clinicians seeking to enter the field and is typically completed in five full-time semesters (including a summer semester). The program length may vary, for example, for the student requiring prerequisites to be completed or one pursuing additional thesis or coursework. A master's degree from KU will, in most circumstances, satisfy the American Speech-Language-Hearing Association's certification standards for continuing on to the clinical fellowship year. A certificate of clinical competence in speech-language pathology is awarded upon completion of a successful clinical fellowship.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. Program

Prospective students are admitted to the M.A. program for the summer or fall semester. The deadline to submit applications is January 5th.

Eligibility criteria for admission to the M.A. program follow Graduate Studies' admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission in the program, a student must hold a bachelor's degree.

Ideally students will have completed an undergraduate degree in speech pathology or a related field. Individuals who have not completed prerequisite coursework may apply and be admitted on an exceptional basis if they have exceptionally strong academic credentials. For a full list of the prerequisite course work please see our prerequisite (http://splh.ku.edu/academics/degrees/pre-req/) page.

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Requirements for the M.A. Degree with a Major in Speech-Language Pathology

Students with undergraduate degrees in other fields (e.g., psychology, linguistics) typically need to complete undergraduate prerequisite coursework in communication sciences and disorders before applying and/or being admitted to a graduate program in speech-language pathology or audiology.

Prerequisite Course Work for the MA SLP Graduate Program

- An acceptable bachelor's degree
- Coursework in speech-language-hearing must include the following: Physics of Speech; Principles of Speech Science; Principles of Hearing Science; Fundamentals of Clinical Phonetics; Language Analysis Lab; Language Development; Introduction to Audiological Assessment and Rehabilitation; Introduction to Speech-Language Pathology; Research Methods in Speech-Language-Hearing; Statistics.
- Additional requirements for ASHA Certification include coursework in biological sciences, physical sciences, and social/behavioral sciences. Courses in biological and physical sciences specifically related to communication sciences and disorders cannot be applied to this requirement.

Degree Requirements

The program requires 34 credit hours of experiences for breadth and an additional 12 to 16 hours for depth. All of these credit hours are at the 700-level or above, with the exception of the Advanced Elective hours. Advanced Electives can include any approved graduate courses.

Technical Standards

The master's degree in speech-language pathology signifies the holder will satisfy the academic and practicum requirements as stated by the American Speech-Language-Hearing Association to be eligible to continue on to the clinical fellowship year. It follows that graduates must have the knowledge and skills to practice in the area of speech-language pathology. Therefore, all individuals admitted to the University of Kansas Intercampus Program in Communicative Disorders must meet the following abilities and expectations with or without accommodation(s). KU is an AA/EQ/Title XI institution.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide appropriate documentation of disability and submit a request for accommodation to one of the following offices:

Cynthia Ukoko  
Senior Coordinator for Academic Accommodations  
3901 Rainbow Boulevard, MS 4029  
Kansas City, KS 66160  
cukoko@kumc.edu  
913-588-7035; 711 TTY

Andrew Shoemaker  
Director  
Student Access Center  
1450 Jayhawk Blvd., Room 22  
Lawrence, KS 66045  
shoe@ku.edu  
785-864-4064; 711 TTY

The culminating activity in the preparation of a speech-language pathologist is clinical reasoning. Therefore, a candidate for the master's degree must be able to make correct observations and have the skills of measurement, calculation, reasoning, analysis, and synthesis.

All students admitted to the KU Intercampus Program in Communicative Disorders must be able to meet the following requirements and expectations with or without accommodation(s).

Observation/Sensory Motor

• Observe demonstrations and learn from experiences in the classroom, laboratory, and clinical situations.
• Carry out speech/language/hearing assessments and intervention strategies/techniques including the operation of complex, electronic instrumentation. Diagnosis, assessment, and intervention of speech/language/hearing problems typically necessitates the functional use of the senses of vision, hearing, and touch such as palpating certain areas of the patient's head and neck.
• Comprehend text, numbers, images and graphs.
• Observe and respond to subtle cues of patient's moods, temperament, and social behavior.

Physical/Psychomotor

• Perform actions requiring coordination of both gross and fine muscular movement, equilibrium and use of tactile, hearing, and visual senses.
• Respond quickly in clinic situations, not only for safety, but also therapeutically.
• Travel to numerous clinical sites for practical experience.
• Use an electronic keyboard to operate instruments and to calculate, record, evaluate, and transmit information.

Communication

• Be able to share and to elicit information from patients/clients, supervisor, peers and other health professionals verbally and in a recorded format.
• Effectively, confidently, and sensitively converse with patients and their families.
• Comprehend technical and professional materials.
• Prepare papers, produce reports, and complete documentation for patient records.
• Assimilate papers, produce reports, and complete documentation for patient records.
• Take paper, computer, and laboratory examinations and prepare scholarly papers.

Judgment

• Demonstrate judgment in the classroom, laboratory, and clinical situations that shows the intellect and emotional health necessary to make mature, sensitive, and effective decisions in the following areas:
  • relationships with professors, supervisors, peers, and patients/clients
  • professional and ethical behavior
  • effectiveness of diagnostic, assessment, and intervention strategies.
• Demonstrate an understanding of the rationale and justification for one's performance.
• Critically evaluate one’s own performance and be flexible toward change to promote professional and clinical process.
• Recognize and correct behaviors disruptive to classroom teaching, research, and patient care.
• Manage the use of time to complete clinical and academic assignments within realistic constraints.
• Recognize potentially hazardous materials, equipment, and situations and proceed in a manner to minimize risk of injury to those in the area.
• Make correct observations and have the problem solving skills necessary for measurement, calculation, reasoning, analysis, and synthesis.

**Accelerated Master of Arts in Speech-Language Pathology**

The accelerated master’s degree in speech-language pathology is designed to produce highly skilled clinicians seeking to enter the field. This program enables qualified students to earn a Bachelor’s degree in Speech-Language-Hearing: Sciences and Disorders and count 12 hours of 700-level or above course work in the major completed in Year 4 of study for both the Bachelor’s and M.A. Speech-Language Pathology degrees. The M.A. is completed in the fifth year or beyond.

An accelerated master’s degree from KU will, in most circumstances, satisfy the American Speech-Language-Hearing Association (http://www.asha.org/)’s certification standards for continuing on to the clinical fellowship year. A certificate of clinical competence in speech-language pathology is awarded upon completion of a successful clinical fellowship.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the approximate 5-year time-frame. All prospective students should discuss their interest in admission to the Accelerated M.A. program (https://gradapply.ku.edu/apply/) and proceed in a manner to minimize risk of injury to those in the area. A certificate of clinical competence in speech-language pathology is awarded upon completion of a successful clinical fellowship.

Prospective students are eligible to apply to the graduate program in Spring semester (Jan 5th deadline) of their third year. The following program requirements must be met by this time:

- Major and cumulative GPA of at least 3.00;
- On track to complete all requirements for a BA or BGS degree in SPLH from KU by the end of the Spring semester of the fourth year;
- The following courses must be complete at the time of application: SPLH 161, SPLH 220, SPLH 462, SPLH 463, SPLH 465, SPLH 466, SPLH 568, SPLH 571

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

**Accelerated M.A. Degree Progression Requirements**

Upon review of the Application for Admission, SPLH will notify the student of his or her eligibility to begin coursework in the program. Final acceptance to the graduate program will be contingent upon the following:

- Successful completion of all requirements for the bachelor’s degree;
- Grades of B- or above in all SPLH graduate-level coursework taken in Year 4;
- A cumulative GPA of 3.0 for all coursework completed in Years 1-4;
- A GPA of 3.0 for all graduate coursework completed in Year 4.

Please note that admission to the graduate program through the traditional process is highly competitive. Students applying to the Accelerated M.A. program will be reviewed with other students applying to the M.A. SLP program. Similar criteria will be used to select students for both programs. If a student is not admitted to the Accelerated M.A. program, they are encouraged to meet with their undergraduate advisor to discuss undergraduate activities to pursue in Year 4 to become more competitive and to re-apply to the M.A. SLP program through the traditional process in Year 4.

The course requirements for this accelerated program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5 (and beyond). Numerous graduate-level courses are regularly offered that fulfill distribution requirements for both the Bachelor’s and M.A. degrees.

The student must be approved to begin coursework toward the Accelerated M.A. program prior to enrolling in any 700 level or above courses that are to count for both undergraduate and graduate credit.

During the Senior Year (Year 4), the student must take the following SPLH courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPLH 860</td>
<td>Evaluation of Speech and Language</td>
<td></td>
</tr>
<tr>
<td>SPLH 862</td>
<td>Clinical Processes</td>
<td></td>
</tr>
<tr>
<td>SPLH 864</td>
<td>Advanced Clinical Practice in Speech-Language Pathology</td>
<td></td>
</tr>
</tbody>
</table>
SPLH 700+ level basic electives, as defined by the MA SLP handbook  6
SPLH 588 Multicultural Considerations in Speech-Language-Hearing I  1
SPLH 589 Multicultural Considerations in Speech-Language-Hearing II  1

These courses, taken in the fall and spring term of year 4, (11-12 credit hours) will count toward the master's degree and the 120 hour requirement for the undergraduate degree.

In addition to the 11-12 credit hours of graduate coursework taken during Year 4, students must complete an additional 34-39 credit hours of graduate study to obtain a total of 46-50 graduate credits. This will consist of an additional 22-23 credits in breadth and 12-16 in depth as defined by the MA SLP handbook (https://www.kumc.edu/school-of-health-professions/academics/departments/hearing-and-speech/academics/student-handbooks.html). All of these credit hours are at the 700-level or above, with the exception of 6 Advanced Elective hours. These 6 Advanced Electives can include any approved graduate courses. All requirements outlined in the MA SLP handbook must be met to confer the MA degree and be eligible for ASHA certification as a speech-language pathologist.

Comprehensive Examination

All candidates for the M.A. degree, including students enrolled in the Accelerated M.A. program, must maintain a portfolio of work, pass both formative and summative exams, and complete a research requirement (thesis or non-thesis option). Typically, the formative exam will occur in the summer between Year 4 and Year 5, and the summative exam will occur in the last semester of enrollment.

Progression Requirements

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Upon approval to begin coursework toward the Accelerated M.A. track, the student must meet with their assigned SPLH faculty mentor to plan the final year of undergraduate study (Year 4). Performance in graduate coursework during Year 4 must meet the academic standing and student performance expectations outlined in the MA SLP handbook (https://www.kumc.edu/school-of-health-professions/academics/departments/hearing-and-speech/academics/student-handbooks.html) or the consequences detailed in the handbook will be enacted (e.g., remediation plan created).

2. In the final semester of undergraduate work and prior to being formally admitted, the student must meet with their assigned SPLH faculty mentor to review the student’s performance in SPLH courses. The student must earn a grade of “B-” or better in these courses and have a cumulative GPA of 3.0 to be eligible for admission to the master’s program. If these conditions are not met, then the following actions are possible:
   a. For grade(s) of C+ or C: Students may be admitted with monitoring by the Advising Committee;
   b. For grade(s) of C, D, F: Students may be admitted with monitoring by the Advising Committee and will need to re-take the course(s) because grades below C cannot count towards graduate requirements;
   c. For students that fail to meet progression criteria in year four, the program may deny formal admission to the graduate program.

3. During Year 5 (and beyond), performance must meet the academic standing and student performance expectations outlined in the MA SLP handbook (https://www.kumc.edu/school-of-health-professions/academics/departments/hearing-and-speech/academics/student-handbooks.html) or the consequences detailed in the handbook will be enacted (e.g., remediation plan created).

4. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.

5. Students should complete all requirements for the Accelerated M.A. within 1-1.5 years of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

Accelerated M.A. Sample Academic Plan.

Please consult with an advisor for an individual program plan. Students will apply to the Accelerated M.A. program during the spring semester (Jan 5th deadline) of their third year. Students complete their undergraduate degree at the end of the spring term in Year 4. If progression criteria is met, students will be admitted and begin their graduate coursework in the summer following undergraduate degree conferral. Please see the admissions tab of the catalog for further details.

The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3 For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

4 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Accelerated M.A. Sample Academic Plan.

Please consult with an advisor for an individual program plan. Students will apply to the Accelerated M.A. program during the spring semester (Jan 5th deadline) of their third year. Students complete their undergraduate degree at the end of the spring term in Year 4. If progression criteria is met, students will be admitted and begin their graduate coursework in the summer following undergraduate degree conferral. Please see the admissions tab of the catalog for further details.
### Doctor of Audiology

The Doctor of Audiology (Au.D.) degree is intended to produce audiologists for clinical practice and is designed to be completed in four years (including summers).

This program has been planned to meet the academic and clinical requirements of the American Speech-Language-Hearing Association (ASHA). The ASHA Council on Academic Accreditation in Audiology and Speech-Language Pathology accredits this program.

A combined Au.D./Ph.D. track also is available. This track facilitates the completion of both degrees in a 6-year post-baccalaureate period. Students who wish to earn both Au.D. and Ph.D. degrees should contact an advisor.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

A bachelor's degree is required. It is expected students will have obtained a broad general education to serve as a background prior to graduate study. Undergraduate course work in mathematics and in basic and applied sciences is strongly encouraged.

If the bachelor's degree is not in the area of audiology or communication sciences and disorders, applicants should have 12 hours of basic sciences and mathematics in addition to courses in the following content areas (or their equivalents):

- Physics of Speech
- Principles of Speech Science

• Intro to Aud Assessment and Rehab
• Intro to Speech-Language Pathology

Background Check
The Joint Commission requires all incoming students to obtain a background check (p. 2415). This one-time fee must be paid directly to the company performing the background investigation and the report provided to KU after acceptance into the program. For more information, please see the School of Health Professions background check instructions. (http://www.kumc.edu/school-of-health-professions/background-checks-and-drug-screening-for-students.html) A drug screening may be required prior to work in clinical settings.

International Students:
An applicant is considered an international student if he or she requires a visa, or currently resides in the U.S. with non-immigrant status, or currently resides in the U.S. while applying for permanent residency. Additional requirements and documentation, such as proof of English language proficiency, are required for international students to become eligible for KU programs. Please review the information for international students (http://www.kumc.edu/school-of-health-professions/information-for-international-applicants.html) before applying.

All students, both domestic and foreign, must meet minimum English proficiency (p. 2414) requirements.

For more information or to contact the program, please visit the IPCD website (http://hearing.kumc.edu).

The Au.D. program prepares students to meet the academic and clinical requirements for the ASHA Certificate of Clinical Competence. The degree is designed to be completed in 4 years (including summers, with a common entry point in fall semester). A minimum of 98 credit hours including academic course work, independent research, and clinical practicum is required.

Specific guidelines for certification are contained in the ASHA Certification and Membership Handbook, available on the ASHA website http://www.asha.org/.

The culminating activity in the preparation of an audiologist is clinical reasoning. Therefore, a candidate for the Au.D. degree must be able to make correct observations and have the skills of measurement, calculation, reasoning, analysis, and synthesis.

All students admitted to the KU Intercampus Program in Communicative Disorders must be able to meet the following requirements and expectations with or without accommodation(s).

### Observation/Sensory Motor
- Observe demonstrations and learn from experiences in the classroom, laboratory, and clinical situations.
- Carry out speech/language/hearing assessments and intervention strategies/techniques including the operation of complex, electronic instrumentation. Diagnosis, assessment, and intervention of speech/language/hearing problems typically involves the functional use of the senses in order to palpate certain areas of the patients' head and neck.
- Interpret and comprehend text, numbers, and graphs displayed in print and video.
- Observe and respond to subtle cues of patient's moods, temperament, and social behavior.

### Physical/Psychomotor
- Perform actions requiring coordination of both gross and fine muscular movement, equilibrium and use of the senses.
- Respond quickly in clinic situations, not only for safety, but also therapeutically.
- Travel to numerous clinical sites for practical experience.
- Use an electronic keyboard to operate instruments and to calculate, record, evaluate, and transmit information.

### Communication
- Be able to share and to elicit information from patients/clients, supervisor, peers and other health professionals verbally and in a recorded format.
- Effectively, confidently, and sensitively converse with patients and their families.
- Interpret and comprehend technical and professional materials.
- Prepare papers, produce reports, and complete documentation for patient records.
• Assimilate information from written sources (texts, journals, medical/school records).
• Take paper, computer, and laboratory examinations and prepare scholarly papers.

Judgment
• Demonstrate judgment in the classroom, laboratory, and clinic situations that shows the intellect and emotional health necessary to make mature, sensitive, and effective decisions in the following areas:
  • Relationships with professors, supervisors, peers, and patients/clients
  • Professional and ethical behavior
  • Effectiveness of diagnostic, assessment, and intervention strategies.
• Demonstrate an understanding of the rationale and justification for one’s performance.
• Critically evaluate one’s own performance and be flexible toward change to promote professional and clinical process.
• Recognize and correct behaviors disruptive to classroom teaching, research, and patient care.
• Manage the use of time to complete clinical and academic assignments within realistic constraints.
• Recognize potentially hazardous materials, equipment, and situations and proceed in a manner to minimize risk of injury to those in the area.
• Make correct observations and have the problem solving skills necessary for measurement, calculation, reasoning, analysis, and synthesis.

Doctor of Philosophy in Speech-Language Pathology or Audiology

The Intercampus Program in Communicative Disorders offers Ph.D. programs in both speech-language pathology and in audiology for post-baccalaureate study of normal and disordered aspects of communication. These programs are designed to prepare suitably qualified individuals for leadership positions in research and academia. A major focus of these programs is to advance the science of these fields, and to elucidate the scientific basis for the procedures and processes used in clinical practice.

Students may pursue the Ph.D. in conjunction with entry-level clinical graduate degrees. As a result, the program offers both a combined M.A./Ph.D. and a combined Au.D./Ph.D. track. These tracks facilitate the completion of both degrees (the clinical graduate degree and the Ph.D.) in approximately a 6-year post-baccalaureate period. Students interested in the M.A./Ph.D track are encouraged to contact the program for information about the application process. Students who wish to earn both Au.D. and Ph.D. degrees should contact their advisor.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student.

Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Ph.D. Program

Although applications may be submitted at any time, January 5th is the deadline for priority status, as it aligns with funding and scholarship availability.

Eligibility criteria for admission to the Ph.D. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to graduate status in the program, a student must hold a bachelor’s degree.

Because PhD students pursue an individualized plan of study, a faculty mentor is a critical requirement of the program. Potential applicants should investigate faculty mentor possibilities by (1) reviewing faculty bios and laboratory information (http://ipcd.kumc.edu/), and (2) reading recent research articles written by KU faculty. Applicants are strongly encouraged to contact faculty who may be a good match to their interests prior to applying.

All students are expected to have strong command of the English Language. Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Upon admission, the student and his or her adviser choose a doctoral advisory committee. The committee is responsible for guiding the student’s progress through the selected program of study.

Incoming students who have not completed a substantive graduate research project (e.g., a master’s thesis, Au.D. research project, etc.) must initiate a thesis-equivalent research project, under the direction of a three-member committee, during the first year of enrollment. This project must be completed before the comprehensive oral examination.

Doctor of Philosophy in Speech-Language Pathology

Acquiring a doctorate in speech-language pathology at a minimum requires the following:

• Completion of academic coursework
  A minimum of 24 graduate hours in a major area of interest
  A minimum of 12 graduate hours in a correlative area
  A minimum of 15 graduate hours in research skills/responsible scholarship
Doctor of Philosophy in Audiology

Acquiring a doctorate in audiology at a minimum requires the following:

- Completion of academic coursework
  - A minimum of 24 graduate hours in a major area of interest
  - A minimum of 12 graduate hours in a correlative area
  - A minimum of 15 graduate hours in research skills/responsible scholarship
- Completion of a preliminary research experience
- Satisfactory performance on annual reviews
- Satisfactory performance on written and oral comprehensive examinations
- Satisfactory completion of a dissertation including written and oral prospectus, and written dissertation and oral defense of the dissertation
- Submission of the dissertation to the KU Office of Graduate Studies

Note that the above are the MINIMUM requirements. Each student's plan of study will vary depending on entry skills (i.e., relevant knowledge and skills acquired through prior training, work or research experience), chosen specialization, and career aspirations.

Students in this program must meet the general requirements of the university including the research skills and responsible scholarship requirement (http://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/) and fulfill the basic program requirements to receive the Ph.D. degree.

Technical Standards

The Ph.D. degrees in audiology and speech-language pathology signifies that the holder is ready to engage in a research career. Therefore, all individuals admitted to the University of Kansas Intercampus Program in Communicative Disorders must meet the following abilities and expectations with or without accommodation(s). KU is an AA/EO/Title XI institution.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose a disability are considered for the program if otherwise qualified. Qualified students with a disability who wish to request accommodations should provide appropriate documentation of disability and submit a request for accommodation to one of the following offices:

Cynthia Ukoko
Senior Coordinator for Academic Accommodations
3901 Rainbow Boulevard, MS 4029
Kansas City, KS 66160
cukoko@kumc.edu
913-588-7035; 711 TTY

Andrew Shoemaker
Director
Student Access Center
1450 Jayhawk Blvd., Room 22
Lawrence, KS 66045
shoe@ku.edu
785-864-4064; 711 TTY

The culminating activity in the preparation of a researcher is the ability to formulate, conduct and disseminate research. In the academic arena, teaching skills usually also are required. Therefore, a candidate for the Ph.D. degree must be able to make correct observations and have the skills of measurement, calculation, reasoning, analysis, and synthesis.

All students admitted to the KU Intercampus Program in Communicative Disorders must be able to meet the following requirements and expectations with or without accommodation(s).

Observation/Sensory Motor

- Observe demonstrations and learn from experiences in the classroom, laboratory, and other research settings.
• Carry out research techniques including the operation of complex, electronic instrumentation. Some types of research may involve the functional use of the senses in order to palpate certain areas of the patients’ head and neck or to observe the function of the head and neck.
• Interpret and comprehend text, numbers, and graphs displayed in print and video.
• Observe and respond to subtle cues of participant’s moods, temperament, and social behavior.

Physical/Psychomotor
• Perform actions requiring coordination of both gross and fine muscular movement, equilibrium and use of the senses.
• Respond quickly in research situations, not only for safety, but also therapeutically.
• Travel to numerous research sites for practical experience.
• Use an electronic keyboard to operate instruments and to calculate, record, evaluate, and transmit information.

Communication
• Be able to share and to elicit information from participants, mentors, peers and other research collaborators verbally and in a recorded format.
• Effectively, confidently, and sensitively converse with participants and their families.
• Interpret and comprehend technical and professional materials.
• Prepare papers, produce reports, and complete documentation for research purposes.
• Assimilate information from written sources (texts, journals, medical/school records).
• Take paper, computer, and laboratory examinations and prepare scholarly papers.

Judgment
• Demonstrate judgment in the classroom, laboratory, and other research situations that shows the intellect and emotional health necessary to make mature, sensitive, and effective decisions in the following areas:
  • Relationships with professors, collaborators, peers, and participants
  • Professional and ethical behavior
  • Effectiveness of research approaches.
• Demonstrate an understanding of the rationale and justification for one’s performance.
• Critically evaluate one’s own performance and be flexible toward change to promote professional and research process.
• Recognize and correct behaviors disruptive to classroom teaching, and research.
• Manage the use of time to complete research and academic assignments within realistic constraints.
• Recognize potentially hazardous materials, equipment, and situations and proceed in a manner to minimize risk of injury to those in the area.
• Make correct observations and have the problem solving skills necessary for measurement, calculation, reasoning, analysis, and synthesis.

Department of Women, Gender, and Sexuality Studies

About the Department
Founded in 1972, the Department of Women, Gender, and Sexuality Studies fosters the interdisciplinary study of women, gender, and sexuality through a rich multicultural and internationally informed academic environment. Our department seeks to produce intellectually rigorous, analytical and creative work that embodies the perspective of gender in its local and global dimensions through teaching, research, and outreach activities.

Undergraduate Programs
The Department of Women, Gender, and Sexuality Studies offers five undergraduate programs — two majors, two minors, and a certificate.

All majors and minors complete an interdisciplinary introductory course, a research methods class, and a range of topically and theoretically related courses from across the College. Majors take additional courses and culminate their studies in an independent research project supervised in the senior capstone seminar.

Our new undergraduate certificate provides a focused investigation of issues in Gender, Law & Policy in a four course sequence designed to complement other major and minor programs in the liberal arts and professional schools.

Graduate Programs
The Department of Women, Gender and Sexuality Studies supports interdisciplinary research on topics pertaining to women, gender, and sexuality and administers an interdisciplinary program leading to a graduate certificate, M.A. and Ph.D. degree. Additional cross-referenced courses are available to complete requirements for the graduate certificate and doctoral degree. Students may pursue the graduate certificate in addition to a KU graduate degree or as a standalone program.

Students who are interested in enrolling in graduate level coursework in the Department of Women, Gender, & Sexuality Studies without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s non-degree seeking admission webpage (http://wgss.ku.edu/admission-nds/) for further details.

Courses
WGSS 101. Introduction to Women, Gender, and Sexuality Studies. 3 Credits. SC S
This course examines the extensive role of gender in human life and examines the ways that gender structures power relations among individuals and within economic, political, educational and other social structures, with special attention paid to women’s issues and movements in the United States and globally. Through readings drawn from the fields of women’s studies, gender studies, and sexuality studies, this course examines and explores alternatives to traditional and/or normative constructions of gender and sexuality, and also considers other markers of difference, such as disability, race, class, and religion, which intersect with gender identity and sexual identity.

WGSS 102. Introduction to Women, Gender, and Sexuality Studies, Honors. 3 Credits. SC S
This course examines the extensive role of gender in human life and examines the ways that gender structures power relations among individuals and within economic, political, educational and other social structures, with special attention paid to women's issues and movements in the United States and globally. Through readings drawn from the fields of women's studies, gender studies, and sexuality studies, this course examines and explores alternatives to traditional and/or normative constructions of gender and sexuality, and also considers other markers of difference, such as disability, race, class, and religion, which intersect with gender identity and sexual identity. Similar in content to WGSS 101. Open only to students in the University Honors Program or by consent of the instructor.

WGSS 111. Introduction to Human Sexuality Studies. 3 Credits. S This interdisciplinary introduction to the study of human sexuality. We will consider some of the many ways that human sexuality has been understood and explained, drawing examples from multiple historical and contemporary sources. We will discuss how these understandings have changed over time and how they can vary depending on whose sexuality is being considered.

WGSS 177. First Year Seminar: ____. 3 Credits. U A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Women, Gender and Sexuality Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

WGSS 196. Study Abroad Topics in: ____. 1-6 Credits. S This course is designed for the study of special topics in Women's Studies. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

WGSS 305. Women, Gender, and Sexuality in the North American West. 3 Credits. H This course will provide students with an overview of how the history of women have profoundly shaped and given meaning to the development of the North American West (which includes present-day states and provinces in the U.S., Canada, and Mexico). The class will examine the lives of women who represent diverse backgrounds, lands, and time periods in this western region. In addition to women, lectures, readings, and discussion will focus on the themes of gender, masculinity, class, race, ethnicity, sexuality, labor, and environment. Broad in chronological scope that spans pre-contact into the twenty-first century, this course is not a comprehensive survey. Rather, the class will examine how women and groups of women across the region defined, survived, explored, cultivated, and imagined the West as a place that defined their homes, migrations, settlement patterns, as well as sites of captivity, displacement, war, and development. (Same as HIST 405.)

WGSS 311. Sex in History. 3 Credits. HT H This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, "perversions" (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as AMS 323, HIST 332, and HUM 332.)

WGSS 319. History, Women, and Diversity in the U.S.. 3 Credits. H This survey course explores the history of being female in America through a focus on the ways differences in race, sexuality, ethnicity, class, and life cycle have shaped various aspects of women's lives. Themes to be explored could include, but are not limited to: social and political activism; intellectual developments; family; women's communities; work; sexuality; and culture. (Same as HIST 319.)

WGSS 320. From Goddesses to Witches: Women in Premodern Europe. 3 Credits. HT H This course examines the social, cultural, and political contexts of women's spirituality and their relations to gender relations in Europe from about 30,000 B.C.E. to the 16th century Protestant Reformation. Lectures move both chronologically and topically, covering such subjects as goddess-worshiping cultures, women's roles in Christian and Jewish societies, symbols of women, and male attitudes toward women. Students will be able to participate in weekly discussions of primary and secondary source readings about women. (Same as HIST 320.)

WGSS 321. From Mystics to Feminists: Women's History in Europe 1600 to the Present. 3 Credits. HT H This survey of women's history in Europe looks at changing patterns of women's economic roles and family structures in preindustrial and industrial society, the importance of women in religious life, cultural assumptions underlying gender roles, and the relationship of women to political movements, including the rise of feminism. (Same as HIST 321.)

WGSS 322. LGBTQ U.S. History, 1900-1900. 3 Credits. H This course will take students on the first part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The first part of this two course sequence begins in the colonial period and ends around 1900 as modern categories of sexuality and sexual orientation came into existence. We will examine the ways in which individuals who craved intimacy with members of the same sex understood and negotiated their desires in an often hostile world. And we will consider how Early America's remarkable diversity shaped this history of same-sex love and desire. (Same as HIST 322.)

WGSS 323. LGBTQ U.S. History, 1900-Present. 3 Credits. H This course will take students on the second part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The second part of this two course sequence focuses on the twentieth and twenty-first centuries. We will examine the changing understanding of non-normative sex, love, and desire; the political tactics, framings, and fights around sexual identities and rights; and the intersection of structural inequalities including, but not limited to, race, class, ability, and gender with LGBTQ histories. Please note that WGSS 322 or HIST 322 is not a prerequisite for WGSS 323 or HIST 323, though students interested in LGBTQ history should consider taking both. (Same as HIST 323.)

WGSS 324. History of Women and the Body. 3 Credits. H This course examines different notions about women and their bodies from a historical perspective. It discusses the arguments and circumstances that have shaped women's lives in relation to their bodies, and women's responses to those arguments and circumstances. This course covers a wide geographical and chronological spectrum, from
Ancient societies to the present, from Latin America and the Middle East, to North America and Western Europe. (Same as HIST 324.)

WGSS 325. Language, Gender, and Sexuality. 3 Credits. S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, GIST 303, JWSH 305 and SLAV 305.)

WGSS 327. Perspectives in Lesbian, Gay, Bisexual, and Transgender Studies. 3 Credits. S
An exploration of the experiences and histories of people who identify as lesbian, gay, bisexual, and/or transgender (LGBT); of the influences on these experiences by individuals, the state, and artistic, legal and medical discourses; and of the intersections between sexual orientation, sexuality, ethnicity, class, and religion.

WGSS 329. Introduction to Queer Theory: Tools for Deconstructing Gender. 3 Credits. H
In the 1970s and 1980s, LGBT activists began questioning basic knowledge about sexuality and the body, challenging rigid identity categories, and offering new ways to think about gender. We now call this approach “queer theory,” and this course will introduce students to the texts and debates that have shaped this intellectual tradition. From ancient eunuchs to drag kings and queens, queer theory highlights how gender norms operate as forms of violence and oppression. We will explore how queer theory helps us understand difference, including its intersections with theories of feminism, race, and disability.

WGSS 330. Women in Contemporary African Literature. 3 Credits. NW H
A critical study of issues and questions raised about women in contemporary African literature and implications for the larger society through the analysis of theme, language, characterization, roles and functions of women in selected works. (Same as AAAS 340.)

WGSS 331. Sex and Gender in New Media. 3 Credits.
How do gender and sexuality shape digital worlds, and how do these spaces shape our understanding of ourselves? This course analyzes new media like social networking sites, gaming, and dating apps. Students will explore the identities, relationships, and communities that have emerged across these platforms, with a focus on the possibilities and challenges they offer for gender and sexual expression.

WGSS 333. The Politics of Physical Appearance. 3 Credits. S
An interdisciplinary analysis of standards of physical attractiveness and cultural conceptions of women’s bodies. Includes analysis of how these standards change across time and cultural groups, and of the impact of these standards on women as individuals and on social and political outcomes.

WGSS 335. History of Jewish Women. 3 Credits. H
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women’s gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women’s lives in both Jewish and non-Jewish society. There are no prerequisites for this course. (Same as HIST 335, JWSH 335.)

WGSS 339. Feminism and Social Change. 3 Credits.
How do feminists go about fighting for social change? From social media hashtags to citywide protests, what methods do they use, and how do they justify them? Where have they been effective, and what lessons can we learn from those successes? This course investigates historical and contemporary efforts to change the world, with an emphasis on movements for women’s rights and queer liberation in the United States.

WGSS 344. Black Feminist Theory. 3 Credits. HL H
This course will study the critical discourse produced by black female intellectuals, writers, and activists about their race, gender, sexual, and class identities. Students will explore black women’s distinct positionality through an examination of their theory as well as their praxis from the nineteenth century to the contemporary moment. By tracing the evolution of black feminist thought, the class will explore black women’s initiation of and engagement with political, social, and artistic conversations in various fields of scholarly inquiry including but not limited to literature, history, sociology, political science, and the law. (Same as AAAS 344 and ENGL 344.) Prerequisite: WGSS 101, AAAS 104, or prior completion of one 200-level English course.

WGSS 350. Black Love and Romance. 3 Credits. H
This course will examine representations of love and romance in African American literature and culture. In addition to the romance novel genre, the course studies different kinds of cultural texts, such as art, film, and music. It explores romantic relationships among black people, including related topics such as sex, desire, marriage, and singleness, and how these interpersonal relationships build families, communities, and collective bonds. The class will consider both the content and aesthetics of diverse texts in order to think about how black people connect intimately as well as how various social and cultural politics underline the nature of those intimacies.

WGSS 351. Women and Leadership: The Legislative Process. 3 Credits. S
Examines current and historical roles and impacts of women involved in legislatures. Explores what difference women make when they are public officials. Students meet with local women legislators, lobbyists and political officials. Students learn how to analyze issues, access power, lobby, and organize at the grassroots. The course is designed to prepare students for an optional legislative internship during the subsequent semester.

WGSS 355. International Women’s Rights. 3 Credits. SC
Women face discrimination and abuse around the world: at home, in the workplace, and in the public sphere. How are these systems of oppression connected? How are women working together for change, and what can you do to support their efforts? This course will investigate what feminist solidarity looks like around the world, with an emphasis on connections across different cultural and political contexts. (Same as GIST 355.)

WGSS 361. Youth, Sex, and Romance in Post-WWII United States. 3 Credits. H
Most people don’t think of sex and romance as having a history. And youth seems just a natural stage of life. But the nature of “courtship,” the definitions of sex, and the meaning of “youth” have changed dramatically over time, and people struggle over these definitions right up to the current day. In this class we try to make historical sense of those struggles by focusing on a volatile and complicated period in U.S. history: the years from World War II through the recent past. (Same as HIST 361.)

WGSS 364. Pregnancy in Modern Literature. 3 Credits. HL
An examination of pregnancy, childbirth and reproductive control as depicted in literature from various national traditions in the twentieth and twenty-first centuries. This course draws together voices from literature,
history, and feminist theory to deepen students’ understanding of the ways nationality, class, race, ability, and gender affect the aesthetics surrounding reproduction. Special attention is given to the relationship between society and the pregnant/postpartum individual. Other topics may include: eugenics, contraception, male pregnancy, and speculative reproduction. (Same as HUM 364.)

**WGSS 365. Angry White Male Studies. 3 Credits. H**
This course charts the rise of the “angry white male” in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HIST 364 and HUM 365.)

**WGSS 366. Fat, Food and the Body in Global Perspective. 3 Credits. H**
An examination of fat and food as they relate to human embodiment in a variety of world locations. Bringing into a dialogue a number of disciplinary voices, including anthropology, fat studies, feminist theory, food studies, history, medicine, and psychology, the course applies theories of culture and embodiment to select global case studies as a means of approaching the pleasures, anxieties, health implications, and symbolic functions of ingesting food and drink. Topics may include the cultural and gender politics of fatness and thinness; anorexia and feederism; food, sex, and animality; vegetarianism, food scares and food purity movements; neoliberalism and the consuming body; and the material and symbolic aspects of fats and oils. (Same as HUM 366.)

**WGSS 374. Religious Perspectives on Selfhood and Sexuality. 3 Credits. H**
The nature of the self in its individual and social dimensions. Self experienced and expressed in sexuality. Survey of viewpoints in religious literature. (Same as REL 374.)

**WGSS 376. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL H**
An examination of Japanese attitudes toward love, sexuality and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students who have taken EALC 575/ WGSS 576. (Same as EALC 375.)

**WGSS 380. African Art and Gender. 3 Credits. HL H**
How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." (Same as AAAS 380.)

**WGSS 381. Feminism and Philosophy. 3 Credits. H**
An examination of topics of philosophical interest that are important in the feminist movement such as the nature of sexism, the concept of sexual equality, the ethics of sexual behavior, the nature of love, feminist analyses of the value of marriage and family, the ethics of abortion and justifications for preferential treatment of women. (Same as PHIL 381.)

**WGSS 389. The Anthropology of Gender: Female, Male, and Beyond. 3 Credits. NW W**
This course will introduce students to cultural constructions and performances of masculinity, femininity, and alternative genders across time and space. Topics and cases will be drawn from primarily non-Western cultures, ranging from Japanese markets to Pacific Rim gardens, and from Haitian voudou to Maya royal politics. This course uses research by archeologists, linguists, biological anthropologists, and sociocultural anthropologists. (Same as ANTH 389.)

**WGSS 396. Studies in: ______. 3 Credits. H**
The interdisciplinary study of selected and different aspects of women's studies in different semesters.

**WGSS 397. Study Abroad Topic in: ______. 1-6 Credits.**
This course is designed for the study of special topics in Women's Studies at the junior/senior level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**WGSS 410. Intimate Relationships. 3 Credits. S**
A social psychological perspective on adult intimate relationships, examining friendship, dating, committed relationships, and the dissolution of committed relationships. Topics include romance, jealousy, self-disclosure, power, loneliness, and social support. Discussion of heterosexual and homosexual relationships, traditional forms (e.g., marriage) of relationships as well as alternative lifestyles (e.g., cohabitation) and gender-linked differences in relationships. (Same as PSYC 410.) Prerequisite: PSYC 104.

**WGSS 418. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Credits. NW H**
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women’s literature, and erotic literature. Recommended: A course in East Asian studies. Not open to students who have taken EALC 618. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. (Same as EALC 418.) Prerequisite: One course in EALC or WGSS.

**WGSS 440. Communication and Gender. 3 Credits. S**
Focuses attention on the relationship between communication and gender, including both physical and psychological dimensions. Topics include: sex role orientations and stereotypes; perceived and actual differences in verbal and nonverbal communication behaviors; the influence of gender on communication in a variety of contexts. (Same as COMS 440.) Prerequisite: COMS 130, or COMS 230.

**WGSS 468. Psychology of Women. 3 Credits. S**
A survey of the psychological theories about women; similarities and differences in the behavior of women and men; the effects of biological and social factors on the behavior of women and men; and issues of concern to women of different races, sexual orientations, ages, and so forth. (Same as PSYC 468.) Prerequisite: Any previously completed course in PSYC or WGSS.

**WGSS 477. Gender and Religion. 3 Credits. H**
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as HUM 477 and REL 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender & Sexuality Studies.

**WGSS 498. Independent Study. 1-3 Credits. S**
Intensive reading or research under faculty supervision culminating in the writing of a paper or research report. Can be used in two-course sequence for departmental honors in WGSS, followed by WGSS 499. Prerequisite: Permission of instructor required.
WGSS 499. Honors in Women, Gender and Sexuality Studies. 3 Credits. S
An individual research or creative project under the direction of a specialist in the area of the student's interest. May be counted towards the total hours required for the major. Prerequisite: WGSS 498 with a grade of an A or B, or equivalent independent study/research credits with approval of the project adviser and the Women, Gender and Sexuality Studies honors coordinator. Majors only.

WGSS 501. Doing Feminist Research. 3 Credits. S
How is feminist research more than research that just focuses on women? What does it mean to do research in a feminist way? This course explores feminist critiques of traditional methods and asks how we can build knowledge that is more just, collaborative, and politically engaged. Students practice basic skills in qualitative research methods like interviewing and participant observation, and they learn how to design their own research project using these methods. Suggested for the junior year. Prerequisite: Any previous coursework in WGSS or by permission of instructor.

WGSS 502. Human Sexuality. 3 Credits. S
An introduction to the field of human sexuality. Topics to be covered include sexual anatomy and physiology, fertilization, pregnancy, birth and lactation, contraception, human sexual response, sexuality across the life cycle, love, marriage, alternatives to marriage, sexual orientation, sex differences in behavior, parenthood, sexually transmitted diseases, sex and the law, and sex education. (Same as PSYC 502.) Prerequisite: Any previous coursework in either WGSS or PSYC.

WGSS 510. History of American Women: Colonial Times to 1870. 3 Credits. H
A survey of women's history in the United States, which will consider women's roles as housewives, mothers, consumers, workers, and citizens in pre-industrial, commercial and early industrial America. (Same as AMS 510 and HIST 530.)

WGSS 511. History of American Women: 1870 to Present. 3 Credits. H
A survey of women's history in the United States, which includes radical and reform movements, the impact of war and depression, professionalization, immigration, women's work, and the biographies of leading figures in women's history. (Same as AMS 511 and HIST 531.)

WGSS 514. Politics of Human Trafficking. 3 Credits. S
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 714, POLS 714, or GIST 714. (Same as GIST 471 and POLS 471.) Prerequisite: Sophomore standing or consent of instructor.

WGSS 515. Gender and Sexuality in Greek Culture. 3 Credits. H
This course explores various approaches to the study of gender and sexuality in Greek antiquity. Contents will vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as CLSX 515.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

WGSS 516. Gender and Sexuality in Roman Culture. 3 Credits. HL H
This course explores various approaches to the study of gender and sexuality in Roman antiquity. Contents vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as CLSX 516.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

WGSS 517. Policing the Womb. 3 Credits. S
Women's reproductive bodies have at times been made hypervisible, subject to medical, legal, and social surveillance and intervention, while at other times invisible. Across these practices, gender and race have been socially constructed in particularly limited ways, which the state has used to justify restrictive case law rulings and policies governing reproductive outcomes. This course is designed to critically examine the history, development, and outcomes of policies and cultural practices related to reproduction that have limited people's decisional autonomy. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 717. Prerequisite: Any previous course in WGSS.

WGSS 521. Women and Violence. 3 Credits. S
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. The nature, prevalence, causes, and consequences of violence against women are discussed. (Same as PSYC 521.) Prerequisite: PSYC 104.

WGSS 533. Rococo to Realism: Painting in Europe c. 1750-1848. 3 Credits. H
This course considers European painting c. 1750 to 1848 within the context of dramatic political and industrial revolutions. Exploring the power of the visual to engage with broader circumstances and to effect change, we will examine the ways in which shifting constructions of gender, empire, colonialism, race, slavery, and class were addressed by such artists as Watteau, David, Vigée-Lebrun, Delacroix, Géricault, Goya, Turner, Constable, Ingres, Daumier, Bonheur, and Courbet. Graduate students will complete additional assignments. (Same as HA 533.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

WGSS 534. Impressionism and Post-Impressionism: 1848-1900. 3 Credits. H
This course considers French painting 1848 to 1900, a period marked by unprecedented technological advancements, the restructuring of Paris, and the rise of consumer culture. As large sections of the city were leveled to make way for broad boulevards, cafés, and department stores, some artists strove to represent the ever-changing spectacle of urban life; others found their inspiration away from the city. Focusing on Manet, Degas, Caillebotte, Morisot, Cassatt, Monet, Renoir, Seurat, Gauguin, Van Gogh, and Cézanne, we will explore how artists engaged with shifting constructions of modernity, gender, fashion, public and private, empire, race, class, and consumer and leisure cultures. Graduate students will complete additional assignments. (Same as HA 534.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

WGSS 540. Skin, Sex, and Disease. 3 Credits. H
This course explores the complex historical relationships between gender, race, health, sickness, and oppression over time. Students examine the impact race and gender have on structuring experiences of health,
sickness and health care; and examine the political activism surrounding definitions and concepts of health. Prerequisite: Any previous course in WGSS or by permission of instructor.

**WGSS 549. History of Feminist Theory. 3 Credits. H**
This discussion course will cover the development of feminist theories from the late Middle Ages to the 1970s. Reading will include Pisan, Wollstonecraft, Mill, Freud, Woolf, Beauvoir, Friedan, Daly, Kristeva, and others. (Same as HIST 649.) Prerequisite: Any previous course in WGSS or HIST or permission of instructor.

**WGSS 552. The Rhetoric of Women's Rights. 3 Credits. H**
An analysis of the themes and rhetorical strategies of the women's rights movement in America. The course will view the struggle for women's rights from a historical perspective and will conclude with contemporary issues concerning the role of women in society. (Same as COMS 552.) Prerequisite: COMS 130 or COMS 230.

**WGSS 553. Making a Pandemic: The History and Politics of HIV/AIDS. 3 Credits. H**
HIV/AIDS is a global pandemic fueled as much by political and historical forces as by epidemiology. This course will chart the disease's emergence, evolution of medical understanding and treatment, and spread of the pandemic through the lens of global structural inequalities, attitudes around sexuality, racism, and the lasting impact of colonialism. Through readings, assignments, films, and discussion, this course will lay bare for students the ways in which the current AIDS epidemic results as much from the disease's design itself as from the social and political world in which it operates. With HIV/AIDS as the focus, students will analyze and gain understandings of how different countries/communities/regions have experienced and responded to the disease, how those responses are informed by local cultural, historical, and political landscapes, and how larger global political forces have created the pandemic of today. Prerequisite: Any previous course in WGSS or by permission of instructor.

**WGSS 560. Race, Gender and Empire. 3 Credits. NW**
This course considers how colonialism has shaped race and gender, historically and today. It explores how Europeans justified colonial rule through sexist beliefs about Native peoples and how sexual exploitation was built into colonial occupation. Film, literature, and political essays help us examine the lasting legacies of these ideas and resistance against them - a field known as postcolonial studies. We use this lens to trace historical attitudes about the white man's burden into contemporary issues in international politics, asking how human rights programs and military intervention maintain global inequality and produce new kinds of empires. (Same as AAAS 560.) Prerequisite: Any WGSS or AAAS course, or permission of the instructor.

**WGSS 562. Women and Politics. 3 Credits. S**
This course exposes students to contemporary research on women and politics by surveying the sub-fields of political science. Topics include women's representation in the U.S., women and U.S. public policy, gender and legal theory, international women's movements, women and revolution, and women as political elites. We will examine the ways in which feminist theory and women's activism have challenged the narrow focus of the discipline as well as redefined women's place in society. (Same as POLS 562.) Prerequisite: Sophomore level or consent of the instructor.

**WGSS 563. Gender, Sexuality and the Law. 3 Credits. H**
This course provides a broad introduction to Western legal systems (especially the American legal system) and then focuses on how sex, gender, and sexuality operate in and are understood by those systems and how the law is a site of social and political struggle. Topics may include intimate relations, First Amendment law, sexual harassment and employment discrimination; reproduction policies and governance; rape and sexual assault; gender identity discrimination; and the legal understandings and constructions of equal protection and due process. No prior knowledge of legal concepts is necessary. Prerequisite: Any previous course in WGSS or by permission of instructor.

**WGSS 565. Gender, Culture, and Migration. 3 Credits. S**
This course examines the gendered experiences of transnational migration through a combination of ethnography, literature, film, and news media. How do different people experience the desire to migrate, the logistics of movement, and life in a faraway place? How does mobility shape ideas of family, community, and nation? How do class, race, sexuality, and legal status also influence these experiences, especially in rendering certain groups vulnerable to abuse and exploitation? Attention will also be paid to gendered thinking against migration, including the ways gender and sexuality influence xenophobia, border enforcement, refugee recognition, deportation policy, and contemporary political debates. (Same as GIST 565.) Prerequisite: Any 100 level AAAS course, WGSS 101, AMS 100, AMS 110, or GIST 220.

**WGSS 567. Native Feminisms. 3 Credits. SC H/W**
This course examines the foundation of Native feminist scholarship and the history of Native feminist activism. The class will begin by considering whether feminist theory can support contemporary Native women Native Two-Spirit (LGBTQ+) in their struggles against settler colonialism and heteropatriarchy. While the course begins by examining the North American experience, the course will also cover a range of international indigenous contexts, with a focus on the Global South and the Indigenous Pacific. Topics explored include the history of settler-colonialism, cultural revitalization and gender roles, change and continuity under cycles of settler-colonialism, the connection between colonialism and sexual violence in Native communities, debates over citizenship and sovereignty, and contemporary Native gender roles and identities. During the conclusion of the course, students will learn to identify how Native feminism informs activism and practice. (Same as ISP 567.) Prerequisite: Any previous course in WGSS or ISP, or by permission of instructor.

**WGSS 570. Men and Masculinities. 3 Credits. H**
An intensive examination of the history and theory of masculinities in the Western world. Students become acquainted with some of the key theories of men and masculinities, and develop research projects on a topic negotiated with the instructor. (Same as HUM 570.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor.

**WGSS 575. The Body, Self and Society. 3 Credits. H**
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HIST 625, HUM 575.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor.

**WGSS 576. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL H**
An examination of Japanese attitudes toward love, sexuality, and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students with credit in EALC 375/ WGSS 376. (Same as EALC 575.) Prerequisite: One course in EALC or WGSS.

**WGSS 583. Love, Sex, and Globalization. 3 Credits. S**
Escalating transnational flows of information, commodities, and people have created innumerable kinds of “intimate” contacts on a global scale, such as mail order brides, child adoption, sex tourism, commodified romance, and emotional labor. Exploring the ways that cultural artifacts of
intimacy are rendered, fetishized, and reified in a free market economy, this course examines how discourses on love and sex encounter, confront, and negotiate the logics of the capitalist market, the discrepant narratives of (colonial) modernity, and the ethics of pleasure. In so doing, this course navigates the treacherous interplay among emotions—specifically love, sex, and money, seeking the potential and limits of cultural politics of emotions. (Same as ANTH 583.) Prerequisite: Any previous course in ANTH or WGSS.

WGSS 598. Sexuality and Gender in African History. 3 Credits. W

An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project in consultation with the instructor. (Same as AAAS 598 and HIIST 598.)

WGSS 600. Contemporary Feminist Political Theory. 3 Credits. S

A detailed introduction to feminist thought post-1960. Examines feminism in relation to the categories of political theory: liberal feminism, socialist feminism, radical feminism, and postmodern feminism. Within these categories and separately, we will also consider feminism as it is influenced by women traditionally excluded from mainstream feminist thought, namely U.S. woman of color and women of post-colonial societies. This course is a service learning course that provides students with on-site practicum, mentoring, and networking skills. (Same as POLS 600.) Prerequisite: Sophomore level or consent of the instructor.

WGSS 601. Seminar in Women, Gender and Sexuality Studies. 3 Credits. S

Investigation of a topic related to women, gender or sexuality from an interdisciplinary perspective. Open only to majors in Women, Gender & Sexuality Studies and majors in Human Sexuality. Suggested for the senior year. Prerequisite: WGSS 501.

WGSS 618. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Credits. NW H

This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. (Same as EALC 618.) Prerequisite: A course in East Asian studies. Not open to students who have taken EALC 418. This course is taught at the 400 and 600 levels with additional assignments at the 600-level.

WGSS 630. Politics of Identity. 3 Credits. S

This seminar explores the nature of identity and how identity is relevant to politics and policy with a focus on political attitudes and behavior, institutions, and public policy. Topics include individual and group identity, identities such as gender, racial, sexual orientation, and partisan, and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. (Same as POLS 630.) Prerequisite: Sophomore level or consent of the instructor.

WGSS 640. Politics of Reproductive Policy. 3 Credits. S

Reproductive policy has historically been a highly politicized policy arena, which has elicited attention from the political community as well as the public. This course moves beyond the popular rhetoric associated with reproductive issues, by critically investigating the history, development, implementation and the relative success of various reproductive policies in the United States. These policies are compared to, and assessed against, policies governing similar topics in various countries. This course is a service learning course that provides students with on-site practicum, mentoring, and networking skills. (Same as POLS 640.) Prerequisite: Sophomore level or consent of the instructor.

WGSS 650. Service Learning in Women, Gender and Sexuality Studies. 3 Credits. S

This course, to be taken in the senior year, is designed to give students the opportunity to apply women's studies knowledge and ideas gained through course work to real-life situations in various agencies and women's centers. Open to Women's Studies majors and others with significant Women's Studies backgrounds. Prerequisite: Permission of instructor is required.

WGSS 652. Jazz and American Culture. 3 Credits. H

This course considers cultural and social histories of jazz, from the 1920s through the present day, as sites for exploring ideological struggles over such fields as race, class, gender, sexuality, democracy, capitalism, freedom, community, Americanness, and globalization in the U.S. The course will explore such questions as the following: What music was called jazz at what times and places? What did it mean to whom? Who played it? Who wrote about it? Who listened to it? Who danced to it? Who policed it? Who produced it? Who used it to rebel? Who used it to survive? What did all of these practices mean to participants? The course will examine struggles over social meanings in the U.S. through a study of jazz performance, labor, representation, marketing, consumption, censorship, and historiography. Prerequisite: A course in American studies, American history, or consent of instructor. (Same as AMS 650.)

WGSS 653. Gender, War, and Peace. 3 Credits. S

This course explores ways in which militarization and warfare are gendered processes. We ask, what does war tell us about gender, and what does gender tell us about war? Though the majority of fighters are men, women are essential to war efforts. They also represent a high proportion of the casualties of war. Yet women are rarely examined in relation to war; thus we work to uncover women's experiences of war. We also look to women's contributions to the peace movement in terms of both theory and practice, asking: Is peace a feminist issue? Should feminists support women's access to combat positions or oppose the military? What if women ruled the world—would that end wars? Does militarized masculinity harm men more than benefit them? How do states mobilize citizens to war and how is the process gendered? (Same as POLS 653.) Prerequisite: Sophomore level or consent of the instructor.

WGSS 662. Gender and Politics in Africa. 3 Credits. S

This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political roles during the pre-colonial and colonial society. Next, we examine the impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender and development, HIV/AIDS and women's health, gender and militarism. We also explore women's roles in political institutions, civil society organizations, trade and labor unions, and transnational movements. We also examine contemporary constructions of masculinity and femininity in African states and explore how these constructions affect social policy and national political agendas. (Same as AAAS 662 and POLS 662.) Prerequisite: Sophomore level or consent of instructor.

WGSS 664. Women, Health, and Healing in Africa. 3 Credits. H

The course explores the values, practices, cultural systems and social-economic conditions that influence the sickness and health of women in Africa. The focus is on theoretical and applied debates and issues including: contraception, infertility, and reproduction; HIV/AIDS and other sexually transmitted infections; spiritual suffering and mental
illness; trauma and violence; chronic illness, disability, and aging; pharmaceuticals, biotechnologies, and clinical research. Prerequisite: 6 hours of coursework in Anthropology and/or Women's Studies and/or African American Studies.

WGSS 689. Conceptual Issues in Human Sexuality. 3 Credits. S
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as PSYC 689.) Prerequisite: Any previously completed course in PSYC or WGSS.

WGSS 696. Studies in: _____ 3 Credits. S
Interdisciplinary study of different aspects of women's studies in different semesters.

WGSS 701. Seminar in: _____ 3 Credits.
A research seminar in women's studies. Instructor and topic will vary.

WGSS 710. History of American Sexuality. 3 Credits.
This graduate seminar examines the history and significance of sexuality in American history from colonial times to the present. It will employ gender as an analytic category to explore the lived experiences of both men and women, as well as to question the formation of economic, political, and social institutions. Of necessity the class will examine the ways in which race, class, religion, and region, affect ideas about sexuality and its practice. Subjects will include abortion, contraception, prostitution, illegitimacy, homosexuality, rape, marriage, and the "sexual revolution." Prerequisite: Graduate standing.

WGSS 711. Feminist Jurisprudence. 3 Credits.
This seminar examines the role of law in perpetuating and remedying inequities against women. After studying the historical emergence of sexual equality law in the United States, we discuss several paradigmatic feminist legal theories, including formal equality, MacKinnon's "dominance" theory, relational/cultural feminism, intersectionality and queer theory. We then proceed to apply these analytical structures to various substantive areas of law of particular concern to women, including but not limited to pregnancy, sexual assault, domestic violence, and employment discrimination. Students will also present their own research to the class.

WGSS 713. The Politics of Marriage. 3 Credits.
This course focuses on the history and contemporary politics of the institution of marriage, concentrating primarily on the US context, but with exploration of marriage in other countries as well. We will consider how the law regulates marriage as well as the lived reality of marriage for the couples who enter it. Topics include romance, engagement, gender roles in marriage, divorce, child marriage, arranged marriage, same-sex marriage, and polygamy. Prerequisite: Graduate standing.

WGSS 714. Politics of Human Trafficking. 3 Credits.
This course examines the politics of human trafficking-both labor and sex trafficking-using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GIST 471, POLS 471, or WGSS 514. (Same as GIST 714 and POLS 714.) Prerequisite: Graduate standing.

WGSS 717. Policing the Womb. 3 Credits.
Women's reproductive bodies have at times been made hypervisible, subject to medical, legal, and social surveillance and intervention, while at other times invisible. Across these practices, gender and race have been socially constructed in particularly limited ways, which the state has used to justify restrictive case law rulings and policies governing reproductive outcomes. This course is designed to critically examine the history, development, and outcomes of policies and cultural practices related to reproduction that have limited people's decisional autonomy. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 517.

WGSS 770. Research in Men and Masculinities. 3 Credits.
An intensive examination of the history and theory of masculinities in the Western World since the sixteenth century. Students will become acquainted with some of the key theories of men and masculinities, examine in depth the interplay between manhood and modernity, and develop research projects on a topic negotiated with the instructor. May be repeated if content varies sufficiently. (Same as HUM 770.)

WGSS 775. Advanced Study in the Body and Senses. 3 Credits.
An intensive examination of the role of the human body in the creation of personal and social identities in the West since the sixteenth century. Emphasis is on understanding how contemporary theories of embodiment are applied to concrete historical or contemporary problems. May be repeated if course content varies sufficiently. (Same as HUM 775.)

WGSS 797. Directed Readings. 1-3 Credits.
Directed reading in an area of women's studies in which there is no appropriate course in the offerings of the Women's Studies Program, but in which there is a member of the cooperating graduate faculty competent and willing to direct the program of study.

WGSS 800. History of Women, Gender and Sexuality Studies. 3 Credits.
An introduction to the field of women, gender, and sexuality studies, paying particular attention to its development, its reception by and influence on academic disciplines, and its institutionalization. Prerequisite: Graduate standing and consent of the instructor.

WGSS 801. Feminist Theory. 3 Credits.
A survey of contemporary feminist theories produced within and across disciplines (including but not limited to, eco-feminism, and liberal, cultural, materialist, psychoanalytic, radical, and black feminist thought). Prerequisite: Graduate standing and consent of the instructor.

WGSS 802. Feminist Methodologies. 3 Credits.
How is feminist research more than just research on feminist topics? What, if any, implications do various feminist theories have for how we execute research and for what we count as knowledge? This graduate seminar explores the joint epistemological and methodological foundations of feminist research in the humanities and social sciences. We will practice different research methods, assess their strengths and limitations, and learn how to integrate them in project design. Prerequisite: Graduate standing and consent of the instructor.

WGSS 803. Feminist Pedagogy. 1.5 Credits.
The goal of the course is to teach students to teach. By reading core texts of feminist pedagogy, understanding critical theories, and attending seminars at the Center for Teaching Excellence selected by instructor
and student, students will learn how to present knowledge and stimulate learning in the classroom, as well as such practical skills as leading discussion sections, preparing and presenting class sessions, developing syllabi, devising fair grading and helpful advising, and solving pedagogical problems like maintaining civility in the classroom and coping with academic misconduct. Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students.

WGSS 804. Professionalization Seminar in Women, Gender, and Sexuality Studies. 1.5 Credits.
The goal of this course is to train students in the skills essential to becoming effective scholars and educators, and successful members of the profession. The material to be covered by these three iterations includes 1) the ethics and practice of feminist research (e.g., protection of human subjects, conflicts of interest, confidentiality, legal strictures); 2) the practical aspects of producing knowledge (e.g., writing research papers, proper citation methods, conference presenting, responding to peer reviews); and 3) acquiring and securing a place in the work force (e.g., CV preparation, job interviews, grant writing, getting promotion [and, in the academy, tenure]). Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students.

WGSS 811. Black Feminist Theory. 3 Credits.
This course surveys black feminist theory and thought across various disciplines. It examines the critical figures, texts, interventions, and debates constituting this evolving discourse, which centers black women’s social, political, and cultural praxis as well as considers their intersectional positionalities. Prerequisite: Graduate standing.

WGSS 812. Affect and Queer Theory. 3 Credits.
Since the mid-1990s affect has become central to the study of affective labor, anticipatory temporality, and neoliberal biopolitics across the social sciences and humanities. Exploring feminist epistemology of the lived experience, queer theory of nonnormative temporality, and postcolonial studies of the body politic, this course interrogates the interrelation of affect, knowledge, and power in and outside scholarly knowledge production, and rethinks pervasive binaries such as epistemology/ontology, discourse/materiality, and reason/emotion. It will also examine the possibilities and limitations of dominant affect theory and seek methodology to study affect more inclusively and critically.

WGSS 821. Woman and Violence. 3 Credits.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. Research on the nature, prevalence, causes, and consequences of violence against women is discussed. (Same as PSYC 821.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

WGSS 835. Colloquium in the History of Gender. 3 Credits.
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as AMS 835 and HIST 895.)

WGSS 889. Conceptual Issues in Human Sexuality. 3 Credits.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as PSYC 889.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

WGSS 999. Doctoral Dissertation. 1-12 Credits.
Original research that is to be incorporated into a PhD dissertation. Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Arts and Bachelor of General Studies in Human Sexuality

Why study human sexuality?
- Explore the diverse range of human sexual practices and taboos
- Compare scientific, historical, and creative understandings of sexual desire
- Learn to analyze and address problems of sexual violence, reproductive justice, and LGBTQ inclusivity.

Human Sexuality students focus on the social, political, and medical constructions of human sexuality. They draw from interdisciplinary methods, theories, and research to better understand how the social construction and lived experiences of sexuality relate to society, politics, medicine, and social movements.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First and Second Year Preparation
Students are encouraged to take WGSS 111 and meet with the academic advisor.

Requirements for the B.A. or B.G.S. Major
Students must complete 10 courses (30 hours) in the major, including a maximum of 2 courses (6 hours) at the 100 or 200 level and a minimum of 4 courses (12 hours) at the 500+ level.

In addition, students must complete coursework in the following areas:

**Other Courses That May Count for Major Requirements:**

The topics in the following courses vary by semester. If the majority of the course content addresses sexuality, this course may count toward a specific requirement within this program. Confirm with the major advisor.

| WGSS 177 | First Year Seminar: ________ |
| WGSS 196 | Study Abroad Topics in: ________ |
| WGSS 396 | Studies in: ________ |
| WGSS 397 | Study Abroad Topic in: ________ |
| WGSS 498 | Independent Study |
| ENGL 572 | Women and Literature: ________ |
| WGSS 650 | Service Learning in Women, Gender and Sexuality Studies |
| WGSS 696 | Studies in: ________ |

**Methods**

3

Satisfied by: (suggested for the junior year)

| WGSS 501 | Doing Feminist Research (Fall Only) |

**Capstone Project**

3

Satisfied by one course (3 credit hours) dedicated to completing a summative capstone project (WGSS 499 is completed as part of a sequence with WGSS 498. When completed as a sequence, 498 fulfills an elective and 499 fulfills the capstone requirement). Suggested for the senior year.

| WGSS 499 | Honors in Women, Gender and Sexuality Studies (By permission of honors supervisor) |
| WGSS 601 | Seminar in Women, Gender and Sexuality Studies (Spring Only) |

**Total Hours**

30

---

**Human Sexuality Major Hours & Major GPA**

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**

Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Overlap Policies**

Students who wish to pursue more than one program offered by the department of Women, Gender, and Sexuality Studies may do so with the following restrictions: No more than four courses may be used to fulfill requirements for both the Women, Gender, and Sexuality Studies major and the Human Sexuality major – two of which would be specifically WGSS 501 and WGSS 601. No more than two courses may overlap between any of our majors and minors, or between our two minors – one of which would be WGSS 501. Students earning an undergraduate certificate in addition to another WGSS program can overlap one course – the introductory-level requirement.

For students pursuing a Bachelors of Arts degree, refer to this sample 4-year plan for a BA in Human Sexuality (p. 1856) or use the left-side navigation.

For students pursuing a Bachelor of General Studies degree, refer to this sample 4-year plan for a BGS in Human Sexuality (p. 1857) or use the left-side navigation.

**Summary**

- 3.5 GPA in the Human Sexuality major
- A senior honors thesis related to Human Sexuality written over two semesters (two three-credit courses)
- **Double majors:** earn Honors in both majors with one thesis that is relevant to both programs.

**GPA Requirements**

Students need a 3.5 GPA in their Human Sexuality major.

**Honors Thesis**

Students write an honors thesis that is pertinent to the study of Human Sexuality. An honors thesis is a piece of original research or other project supervised by a faculty member of any department. In most cases, the result will be a written document of some length, but this could vary depending on the topic and what the student and thesis advisor agree on.

The senior honors thesis or honors project must be approved by a three-member thesis committee (the thesis advisor and two other faculty members)
members, at least one of whom must be either in WGSS or serve as WGSS affiliate faculty).

Students take 6 credit hours of honors thesis work (3 hours per semester for 2 semesters) and they must earn a A or B in the first semester and a A the second. For these 6 hours, students can enroll in:

- WGSS 498 Independent Study in WGSS
- WGSS 499 Honors in Women, Gender and Sexuality Studies
  or
- WGSS 498 Independent Study in WGSS
- WGSS 601—Senior Capstone in WGSS
  or
- Two Honors Research or Independent Studies courses in any department

**Typical Timeline**

- Fall of the Junior Year: Take WGSS 501 to develop research interests and an idea for your thesis. Enroll in other courses that let you develop expertise in this area.
- Spring of the Junior Year: Get to know faculty members who share similar research interests by enrolling in their courses or visiting them in office hours. Identify a professor willing to supervise the thesis. **Inform the WGSS Honors Coordinator!**
- Fall Semester of the Senior Year: Enroll in 3 credit hours of WGSS 498 or in an Independent Study of another department. Begin researching the thesis topic. The student and thesis advisor should form a three-person faculty committee (the thesis advisor and two other faculty members, at least one of whom must be either in WGSS or serve as WGSS affiliate faculty). **Submit an Honors Intent Form** by 1 March to College Advising and Student Services, 109 Strong.
- Spring Semester of the Senior Year: In consultation with your thesis advisor, enroll in 3 credit hours of WGSS 499 or WGSS 601 or in an Independent Study of another department. Finish the thesis. Have the thesis committee read the thesis and vote to award Honors (or not). If the thesis is passed, the thesis advisor needs to **sign the Honors Certification Form**, which can be obtained by the student in the College Advising and Student Services office, 109 Strong; after the advisor signs this form, it is then submitted back to the College Advising and Student Services, 109 Strong, at least a week before the end of the graduation term. The thesis advisor should also notify the Honors Coordinator of the result.

**Double Majors**

Students who are satisfying double majors and pursuing Honors in both majors may use one honors thesis for both majors if they get approval from both departments. The thesis must be related to both majors, and the thesis committee must include faculty members from both departments. Students must fulfill both departments’ requirements for honors.

**BA in Human Sexuality**

Below is a sample 4-year plan for students pursuing the BA in Human Sexuality. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
### BGS in Human Sexuality

Below is a sample 4-year plan for students pursuing the BGS in Human Sexuality. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Total Hours 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

3. A list of courses that fulfill each requirement in the major can be found on the degree requirements (https://catalog.ku.edu/liberal-arts-sciences/women-gender-sexuality-studies/human-sexuality-ba-bgs/) tab of the catalog.

4. WGSS 501 is only offered in the fall semester, it is typically recommended for the fall of 3rd or 4th year.

5. WGSS 601 is only offered in the spring semester.

6. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

be a great fit for you.

Why study women, gender and sexuality?

• Confront social problems around gender and sexuality
• Collaborate with students and faculty from across the social sciences and humanities
• Build expertise on issues that matter most to you

If you are interested in how gender, race, class, and sexuality structure our world and interactions with one another, and if you are passionate about issues of social justice and inequality, then a degree in WGSS may be a great fit for you.

Students in Women, Gender, and Sexuality Studies develop a broad set of skills to critically analyze social issues from multiple disciplinary perspectives, including anthropology, history, law, literature, political science, psychology, and sociology. They learn to employ different methods and modes of analysis to better identify, critique, and

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

General Electives

Satisfied by all WGSS courses.

Eligible courses include all those listed above and the following:

WGSS 111 Introduction to Human Sexuality Studies

WGSS 177 First Year Seminar: _____

WGSS 196 Study Abroad Topics in: _____

WGSS 327 Perspectives in Lesbian, Gay, Bisexual, and Transgender Studies

WGSS 331 Sex and Gender in New Media

WGSS 333 The Politics of Physical Appearance

WGSS 339 Feminism and Social Change

WGSS 396 Studies in: _____ (Can be designated as social science or humanities perspective by petition.)

WGSS 397 Study Abroad Topic in: _____

WGSS 498 Independent Study

WGSS/ISP 567 Native Feminisms

WGSS 563 Gender, Sexuality and the Law

WGSS 650 Service Learning in Women, Gender and Sexuality Studies

WGSS 696 Studies in: _____

Research Methods

3

Satisfied by: (suggested for the junior year)

WGSS 501 Doing Feminist Research (Fall Only)

Capstone Project

3
For students pursuing a Bachelor of Arts degree, refer to this requirement. Another WGSS program can overlap one course— the introductory-level WGSS 501 and the Human Sexuality major—two of which would be requirements for both the Women, Gender, and Sexuality Studies major and the department of Women, Gender, and Sexuality Studies may do so with the left-side navigation. Confirm with the major advisor.

Women, Gender, and Sexuality Studies Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Hours at Advanced Levels**

Satisfied by a maximum of 6 hours at the 100-200 level and a minimum of 12 credit hours 500+ level.

- 100 & 200 level: maximum 6 hours (1 requirement and up to 1 elective)
- 300 & 400 level: remaining credit hours (up to 5 electives)
- 500 & 600 level: minimum 12 credit hours (2 requirements and at least 2 electives)

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Overlap Policies

Students who wish to pursue more than one program offered by the department of Women, Gender, and Sexuality Studies may do so with the following restrictions: No more than four courses may be used to fulfill requirements for both the Women, Gender, and Sexuality Studies major and the Human Sexuality major—two of which would be WGSS 501 and WGSS 601. No more than two courses may overlap between any of our majors and minors, or between our two minors—one of which would be WGSS 501. Students earning an undergraduate certificate in addition to another WGSS program can overlap one course—the introductory-level requirement.

For students pursuing a Bachelor of Arts degree, refer to this sample 4-year plan for a BA in Women, Gender, & Sexuality Studies (p. 1862) or use the left-side navigation.

GPA Requirements

Students need a 3.5 GPA in their WGSS major.

Honors Thesis

Students write an honors thesis that is pertinent to Women, Gender and Sexuality Studies. An honors thesis is a piece of original research or other project supervised by a faculty member of any department. In most cases, the result will be a written document of some length, but this could vary depending on the topic and what the student and thesis advisor agree on.

The senior honors thesis or honors project must be approved by a three-member thesis committee (the thesis advisor and two other faculty members, at least one of whom must be either in WGSS or serve as WGSS affiliate faculty).

Students take 6 credit hours of honors thesis work (3 hours per semester for 2 semesters) and they must earn an A or B in the first semester and an A the second. For these 6 hours, students can enroll in:

- WGSS 498 Independent Study in WGSS
- WGSS 498 Honors in Women, Gender and Sexuality Studies or
- WGSS 498 Independent Study in WGSS
- WGSS 601—Senior Capstone in WGSS or
- Two Honors Research courses or two Independent Studies in any department

Summary

- 3.5 GPA in the WGSS major
- A senior honors thesis related to WGSS written over two semesters (two three-credit courses)
- Double majors: earn Honors in both majors with one thesis that is relevant to both programs.

Typical Timeline

- Fall of the Junior Year: Take WGSS 501 to develop research interests and an idea for your thesis. Enroll in other courses that let you develop expertise in this area.
- Spring of the Junior Year: Get to know faculty members who share similar research interests by enrolling in their courses or visiting them in office hours. Identify a professor willing to supervise the thesis. Inform the WGSS Honors Coordinator!
- Fall Semester of the Senior Year: Enroll in 3 credit hours of WGSS 498 or in an Independent Study of another department. Begin researching the thesis topic. The student and thesis advisor should form a three-person faculty committee (the thesis advisor and two other faculty members, at least one of whom must be either in WGSS or serve as WGSS affiliate faculty). Submit an Honors Intent Form by 1 March to College Advising and Student Services, 109 Strong.
• Spring Semester of the Senior Year: In consultation with your thesis advisor, enroll in 3 credit hours of WGSS 499 or WGSS 601 in an Independent Study of another department. Finish the thesis. Have the thesis committee read the thesis and vote to award Honors (or not). If the thesis is passed, the thesis advisor needs to sign the Honors Certification Form, which can be obtained by the student in the College Advising and Student Services office, 109 Strong; after the advisor signs this form, it is then submitted back to the College Advising and Student Services, 109 Strong, at least a week before the end of the graduation term. The thesis advisor should also notify the Honors Coordinator of the result.

Double Majors

Students who are satisfying double majors and pursuing Honors in both majors may use one honors thesis for both majors if they get approval from both departments. The thesis must be related to both majors, and the thesis committee must include faculty members from both departments. Students must fulfill both departments’ requirements for honors.

BA in Women, Gender, and Sexuality Studies

Below is a sample 4-year plan for students pursuing the BA in Women, Gender, and Sexuality Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 15

### Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
3. A list of courses that fulfill each requirement in the major can be found on the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/women-gender-sexuality-studies/ba-bgs/#requirementstext) tab of the catalog.
WGSS 501 is only offered in the fall semester.

WGSS 601 is only offered in the spring semester.

Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BGS in Women, Gender, and Sexuality Studies

Below is a sample 4-year plan for students pursuing the BGS in Women, Gender, and Sexuality Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

#### Total Hours 120

1. A list of courses that fulfill each requirement in the major can be found on the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/women-gender-sexuality-studies/ba-bgs/#requirements) tab of the catalog.

2. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

3. WGSS 501 is only offered in the fall semester. Recommended for the fall of the 3rd or 4th year.

4. WGSS 601 is only offered in the spring semester.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Minor in Human Sexuality**

**Why study human sexuality?**
- Explore the diverse range of human sexual practices and taboos
- Compare scientific, historical, and creative understandings of sexual desire
- Learn to analyze and address problems of sexual violence, reproductive justice, and LGBTQ inclusivity.

Human Sexuality students focus on the social, political, and medical constructions of human sexuality. They draw from interdisciplinary methods, theories, and research to better understand how the social construction and lived experiences of sexuality relate to society, politics, medicine, and social movements.

**Requirements for the Minor**

**Human Sexuality Minor Course Requirements**

The minor requires 18 hours. At least 12 hours must be at the junior/senior (300+) level or higher. Students with a major in WGSS and a minor in Human Sexuality may only overlap two courses.

Students selecting this minor must complete the following:

<table>

**Overlap Policies**

Students who wish to pursue more than one program offered by the department of Women, Gender, and Sexuality Studies may do so with the following restrictions: No more than four courses may be used to fulfill requirements for both the Women, Gender, and Sexuality Studies major and the Human Sexuality major – two of which would be WGSS 501 and WGSS 601. No more than two courses may overlap between any of our majors and minors, or between our two minors – one of which would be WGSS 501. Students earning an undergraduate certificate in addition to another WGSS program can overlap one course – the introductory-level requirement.

**Minor in Women, Gender, and Sexuality Studies**

**Why study women, gender and sexuality?**

- Confront social problems around gender and sexuality
- Collaborate with students and faculty from across the social sciences and humanities
- Build expertise on issues that matter most to you

If you are interested in how gender, race, class, and sexuality structure our world and interactions with one another, and if you are passionate about issues of social justice and inequality, then a WGSS program may be a great fit for you.

Students in Women, Gender, and Sexuality Studies develop a broad set of skills to critically analyze social issues from multiple disciplinary perspectives, including anthropology, history, law, literature, political science, psychology, and sociology. They learn to employ different methods and modes of analysis to better identify, critique, and productively understand the status of women in society and how structures of inequality interact with gender and sexuality.

**Requirements for the Minor**

**Women, Gender, and Sexuality Studies Minor Course Requirements**

The minor requires 18 hours. At least 12 hours must be at the junior/senior (300+) level or higher.

Students selecting this minor must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduction</td>
<td></td>
<td></td>
</tr>
<tr>
<td>WGSS 101</td>
<td>Introduction to Women, Gender, and Sexuality Studies or</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>WGSS 101 Introduction to Women, Gender, and Sexuality Studies, Honors</td>

</tr>
</tbody>
</table>

**Human Sexuality Minor Hours**

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

WGSS/CLSX 516 Gender and Sexuality in Roman Culture
Courses with a blank (___) vary by semester and may be repeated for credit. These courses all always count as general electives. If they include significant theoretical material, they may count toward specific requirements within the program as well. Confirm with the major advisor.

Women, Gender, and Sexuality Studies Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Overlap Policies

Students who wish to pursue more than one program offered by the department of Women, Gender, and Sexuality Studies may do so with the following restrictions: No more than four courses may be used to fulfill requirements for both the Women, Gender, and Sexuality Studies major and the Human Sexuality major – two of which would be WGSS 501 and WGSS 601. No more than two courses may overlap between any of our majors and minors, or between our two minors – one of which would be WGSS 501. Students earning an undergraduate certificate in addition to another WGSS program can overlap one course – the introductory-level requirement.

Undergraduate Certificate in Gender, Law and Policy

Why study gender, law & policy?

• Learn how gender and sexuality shape access to justice
• Use scientific, historical, cross-cultural, and literary tools to analyze the law from a critical perspective
• Build better policy solutions to real social problems

The Department of Women, Gender & Sexuality Studies now offers an undergraduate certificate investigating how legal institutions address gender, race, class and sexuality. This focused program is only four courses, with popular electives on topics such as intimate partner violence, human trafficking, reproductive justice, LGBTQ rights, electoral politics, feminist jurisprudence, and sex education. Available online and in-person, it is designed to fit alongside other major and minor programs from across campus.

This certificate requires 12 unique credit hours, including:

• One Introductory Course
• Two Electives
• One Capstone:
  • WGSS 563 Gender, Sexuality and the Law (available online)

Other relevant courses, including WGSS 396 Studies in: _____, may be approved by WGSS chair or undergraduate director.

WGSS 563 Gender, Sexuality and the Law

Total Hours 12

Courses with a blank (__) vary by semester. If the course directly addresses issues in law and policy, this course may count toward a specific requirement within this program. Confirm with the major advisor.

Overlap Policies:

Students earning the undergraduate certificate in Gender, Law, and Policy in addition to another WGSS program (major or minor) can overlap one course — the 100-level Introduction.

Master of Arts in Women, Gender, and Sexuality Studies

Overview of Women, Gender, & Sexuality Studies

WGSS was built out of the dual goals of examining inequalities resulting from gender, race, sexual orientation and class using an interdisciplinary lens, and translating this research into meaningful, tangible knowledge that contributes to the betterment of communities. Our interdisciplinary faculty members are engaged in research that examines many of the cutting edge issues vexing contemporary times, both domestically and globally, such as discrimination, violence, human trafficking, health and inequality, and migration, to name a few. The common thread throughout these different areas of research is the focus on investigating the factors that create and contribute to vulnerability across time and geography.

Women, Gender, and Sexuality Studies is one aspect of feminism, one where academic discussion and learning go on. WGSS students learn about the ways in which people’s roles in society have been constructed and the ways in which these roles have changed and continue to change. WGSS courses will make you informed about, and sensitive to issues of gender in relation to education, lifestyle, social roles and status, sexuality, legal status and equity. You will face these issues at work; WGSS courses will help you to deal with them in an informed, responsible, and just manner.

What will women, gender, & sexuality studies give me?

• Awareness of the issues facing people of all genders – and the world – today
• Knowledge of many different academic fields
• Critical thinking and problem-solving skills
• Strong writing and researching abilities
• A solid base on which to enter the workforce, pursue further education and have an impact in the world
• Graduates of WGSS go on to do many different things, and the possibilities are endless

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.
Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The Women, Gender, & Sexuality Studies MA program accepts applications for fall admission only. All applications and admissions materials must be received by the deadline listed on the department's website (http://wgss.ku.edu/admission-ma/) to be considered for admission for the following fall semester.

Application Materials

Applicants should upload the supporting application documents listed below to the online application (https://gradapply.ku.edu/apply/). There is no need to send copies of application materials directly to the Women, Gender, & Sexuality Studies department.

- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges or universities attended
- Resume or CV
- Statement of purpose (no longer than two pages, single spaced)
- Three letters of recommendation

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Contact

Visit the Department of Women, Gender, & Sexuality Studies website for detailed information about MA admission requirements (http://wgss.ku.edu/admission-ma/).

The Master of Arts in Women, Gender, & Sexuality Studies requires 30 credit hours of coursework and a written comprehensive exam. At least 50% of coursework for the master's degree must be taken at the 700 level or above.

Core Courses (9)

WGSS 800 History of Women, Gender and Sexuality Studies (offered every fall)
WGSS 801 Feminist Theory (offered every fall)
WGSS 802 Feminist Methodologies (offered every spring)

Elective Theory (3)

1 course selected by the student and advisor which provides theoretic support for the student’s research

Elective Methods (3)

1 course selected by the student and advisor which provides methodological support for the student’s research

Elective Courses (15)

Five graduate level courses selected by the student and advisor with at least 50% of content related to gender and/or sexuality

MA Exam

In the last semester of course enrollment, students will complete a written comprehensive exam based on MA program content. A committee of three faculty members evaluates the exam upon completion.

Handbook

Further details about meeting the degree requirements can be found in the WGSS Graduate Student Handbook (https://wgss.ku.edu/sites/wgss.ku.edu/files/docs/WGSS%20Graduate%20StudentHandbook.pdf).

Doctor of Philosophy in Women, Gender, and Sexuality Studies

Why study women, gender and sexuality studies?

WGSS was built out of the dual goals of examining inequalities resulting from gender, race, sexual orientation and class using an interdisciplinary lens, and translating this research into meaningful, tangible knowledge that contributes to the betterment of communities. Our interdisciplinary faculty members are engaged in research that examines many of the cutting edge issues vexing contemporary times, both domestically and globally, such as discrimination, violence, human trafficking, health and inequality, and migration, to name a few. The common thread throughout these different areas of research is the focus on investigating the factors that create and contribute to vulnerability across time and geography.

Women, Gender, and Sexuality Studies is one aspect of feminism, one where academic discussion and learning go on. WGSS students learn about the ways in which people’s roles in society have been constructed and the ways in which these roles have changed and continue to change. WGSS courses will make you informed about, and sensitive to issues of gender in relation to education, lifestyle, social roles and status, sexuality, legal status and equity. You will face these issues at work; WGSS courses will help you to deal with them in an informed, responsible, and just manner.

What will women, gender, & sexuality studies give me?

- Awareness of the issues facing women, men, and non-binary people -- and the world -- today.
- Knowledge of many different academic fields.
- Critical thinking and problem-solving skills.
- Strong writing and researching abilities.
- A solid base on which to enter the workforce, pursue further education and have an impact in the world.
- Graduates of WGSS go on to do many different things, and the possibilities are endless.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.
Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The Women, Gender, & Sexuality Studies PhD program accepts applications for fall admission only. All applications and admissions materials must be received by the deadline listed on the department's website (http://wgss.ku.edu/admission-phd/) to be considered for admission for the following fall semester.

Application Materials

Applicants should upload the supporting application documents listed below to the online application (https://gradapply.ku.edu/apply/). There is no need to send copies of application materials directly to the Women, Gender, & Sexuality Studies department.

- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges or universities attended
- Resume or CV
- Statement of purpose (no longer than two pages, single spaced)
- Writing sample (no longer than 30 pages)
- Three letters of recommendation

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Contact

Visit the Department of Women, Gender, & Sexuality Studies website for detailed information about PhD admissions requirements (https://wgss.ku.edu/admission-phd/).

Ph.D. Degree Requirements

The Ph.D. program requires completion of core and elective courses and demonstration of depth in a chosen concentration or track. Students must complete a minimum of 12 credit hours of core courses in WGSS, 15 credit hours of elective courses in WGSS, and 18 credit hours of coursework in an approved concentration or track as outlined below. The Research Skills and Responsible Scholarship requirement is satisfied by WGSS 802, WGSS 803, WGSS 804, and theory and methods coursework. All coursework within WGSS and within the concentration should be selected in consultation with a faculty advisor.

Qualifying Exam

Students will take a qualifying exam after completing (or enrolling in enough hours to complete) 30 credit hours of coursework, typically in their fourth semester of the program. The exam is administered by instructors of WGSS 800, WGSS 801, and WGSS 802. Students who successfully pass this exam will be awarded the MA degree in WGSS. The committee will also weigh the quality of the performance on the exam to determine if the student will be approved to continue on to the Ph.D. Awarding of the MA degree does not guarantee approval to continue to the Ph.D.

Comprehensive Oral Exam

After completion of all required coursework (or in the final semester of coursework), students will take a comprehensive oral examination, the centerpieces of which are a portfolio of all major written work (exams, papers, syllabi), three annotated bibliographies, and a dissertation prospectus.

Dissertation

After passing the comprehensive oral examination, students will write a dissertation approved by a departmental dissertation committee and pass a final oral defense of the dissertation to complete the doctoral degree.

Additional Information

Additional information about course and degree requirements for the Women, Gender, & Sexuality Studies doctoral program is located in the department's graduate student handbook (http://wgss.ku.edu/sites/wgss.ku.edu/files/docs WGSS%20Graduate%20Student Handbook.pdf).

Graduate Certificate in Women, Gender, and Sexuality Studies

Why study women, gender, and sexuality studies?

WGSS was built out of the dual goals of examining inequalities resulting from gender, race, sexual orientation and class using an interdisciplinary lens, and translating this research into meaningful, tangible knowledge that contributes to the betterment of communities. Our interdisciplinary faculty members are engaged in research that examines many of the cutting edge issues vexing contemporary times, both domestically and
globally, such as discrimination, violence, human trafficking, health and inequality, and migration, to name a few. The common thread throughout these different areas of research is the focus on investigating the factors that create and contribute to vulnerability across time and geography.

Women, Gender, and Sexuality Studies is one aspect of feminism, one where academic discussion and learning go on. WGSS students learn about the ways in which people’s roles in society have been constructed and the ways in which these roles have changed and continue to change. WGSS courses will make you informed about, and sensitive to issues of gender in relation to education, lifestyle, social roles and status, sexuality, legal status and equity. You will face these issues at work; WGSS courses will help you to deal with them in an informed, responsible, and just manner.

What will women, gender, & sexuality studies give me?

• Awareness of the issues facing women, men, and non-binary people -- and the world -- today.
• Knowledge of many different academic fields.
• Critical thinking and problem-solving skills.
• Strong writing and researching abilities.
• A solid base on which to enter the workforce, pursue further education and have an impact in the world.
• Graduates of WGSS go on to do many different things, and the possibilities are endless.

Admission to Graduate Studies

Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Any applicant seeking to pursue a graduate certificate in Women, Gender, & Sexuality Studies must submit an application at https://gradapply.ku.edu/apply. Applications are accepted on a rolling basis.

New Applicants

Applicants who are not already enrolled in a KU graduate program should include the following materials in their application to the certificate program.

• Statement of purpose (no longer than one page, single spaced)
• Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges and universities attended
• Two letters of recommendation

Graduate Certificate Requirements

The Graduate Certificate in Women, Gender, and Sexuality Studies requires completion of 12 credit hours of graduate work, including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>WGSS 800</td>
<td>History of Women, Gender and Sexuality Studies</td>
<td>6</td>
</tr>
<tr>
<td>WGSS 801</td>
<td>Feminist Theory</td>
<td></td>
</tr>
<tr>
<td>WGSS 802</td>
<td>Feminist Methodologies</td>
<td></td>
</tr>
</tbody>
</table>

Certificate students must complete two of the following three core courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>WGSS 800</td>
<td>History of Women, Gender and Sexuality Studies</td>
<td>6</td>
</tr>
<tr>
<td>WGSS 801</td>
<td>Feminist Theory</td>
<td></td>
</tr>
<tr>
<td>WGSS 802</td>
<td>Feminist Methodologies</td>
<td></td>
</tr>
</tbody>
</table>

Certificate students must also complete two electives chosen from the department’s list of recommended graduate courses or courses approved by the department’s Director of Graduate Studies.

Total Hours 12

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Current KU Graduate Students

Applicants already in a KU graduate program must be in good standing with their home department to be eligible for admission the certificate program. Current KU graduate students must provide the following materials in their online application.

• Statement of purpose (no longer than one page, single spaced)
• Letter of support from home academic department
• Current KU advising report

Contact

Visit the Department of Women, Gender, & Sexuality Studies website for detailed information about graduate certificate admissions requirements (https://wgss.ku.edu/graduate-certificate-admission/).
--Arts (in CLAS)

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details). Other years' catalogs» (http://catalog.ku.edu/archives/)

Film and Media Studies (p. 1906)
- Bachelor of Arts and Bachelor of General Studies in Film and Media Studies (p. 1912)
- Minor in Film and Media Studies (p. 1918)
- Undergraduate Certificate in Media Cultures (p. 1918)
- Master of Arts in Film and Media Studies (p. 1918)
- Doctor of Philosophy in Film and Media Studies (p. 1919)
- Graduate Certificate in Film and Media Studies (p. 1920)

Theatre and Dance (p. 1921)
- Bachelor of Fine Arts in Dance (p. 1929)
- Bachelor of Arts in Dance (p. 1931)
- Bachelor of Arts and Bachelor of General Studies in Theatre (p. 1933)
- Bachelor of Fine Arts in Theatre Design (p. 1939)
- Minor in Dance (p. 1941)
- Minor in Theatre (p. 1942)
- Master of Arts in Theatre (p. 1942)
- Master of Fine Arts in Theatre Design/Scenography Concentration (p. 1943)
- Doctor of Philosophy in Theatre (p. 1944)

Visual Art (p. 1945)
- Bachelor of Fine Arts in Visual Art (p. 1956)
- Bachelor of Fine Arts in History of Art (p. 1961)
- Bachelor of Arts in Visual Art (p. 1964)
- Bachelor of Art Education in Visual Art Education (p. 1969)
- Minor in Visual Art (p. 1971)
- Master of Fine Arts in Visual Art (p. 1972)
- Master of Arts in Visual Art Education (p. 1973)

Introduction

The School of the Arts in the College of Liberal Arts and Sciences is composed of 3 departments:
- Film and Media Studies (p. 1906),
- Theatre and Dance (p. 1921), and
- Visual Art (p. 1945).

The school acquaints students with the arts as an important field of a liberal culture, either as members of a discriminating public or as trained practitioners. It prepares students for careers in dance, film and media, theatre, and visual art and promotes scholarship and research in the arts. It offers curricula for teachers of art in public schools and institutions of higher education.

The school makes a substantial contribution to the cultural life of the campus, community, and state by providing a center for the best of theatre and dance performance and the exhibition of works of art and film.

Undergraduate Degree Requirements

Undergraduate Degree Programs
- The degree of Bachelor of Arts (B.A.) is granted with majors in dance, film and media studies, theatre, and visual art.
- The degree of Bachelor of Fine Arts (B.F.A.) is granted with majors in dance, history of art, theatre design, and visual art.
- The degree of Bachelor of General Studies (B.G.S.) is granted with majors in film and media studies and theatre.
- The Bachelor of Art Education (B.A.E.) offers a major in art education.

Requirements for Graduation

All undergraduate degrees from the University of Kansas require completion of the KU Core Curriculum. In addition to the KU Core, students must satisfy the degree specific and major requirements of the degree they are pursuing.

Degrees from the School of the Arts are conferred on candidates who have satisfactorily completed a minimum of 120 credit hours for the B.A., B.G.S., and B.F.A. degrees, including required subjects. The B.A.E. degree requires additional hours in student teaching, internship, and graduate credit for Kansas licensure and therefore requires a minimum of 139 hours.

45 credit hours must be in junior/senior-level courses, numbered 300 and above. 2.0 grade-point averages in KU courses and in junior/senior hours in the major are required for graduation. 4 hours of the total in each case except B.A.E. degrees may be in physical education activity courses. Art appreciation courses are not accepted toward art history requirements for students majoring in any field of art or design. HA 100 and HA 300 are not accepted toward any requirement for students majoring in any field of art or design.

Remedial Courses

Remedial courses listed in the catalog and Schedule of Classes are numbered below 100. Such courses include, but are not limited to MATH 2. Such courses do not count toward graduation in the School of the Arts and may not be counted as distribution courses.

Facilities

Art and Design Building

View a slide show in the School of the Arts brochure.

The 130,000-square-foot Art and Design Building houses all major art and design programs, including studios and offices. The building houses the 2,100-square-foot Art and Design Gallery (https://art.ku.edu/edgar-heap-birds-family-gallery/); this space features new exhibitions every 2
weeks and serves as an important component of the teaching mission. Each major program offers all students spacious work areas and a range of equipment, from traditional to the newest digital technology. Students have access to multiphase computer labs with the most commonly used current software for photography, animation, CAD, 3-D, video production, desktop publishing, scanning, illustration, large- and medium-format plotters, and color and black-and-white laser printers. Unique satellite computer areas are dedicated to textiles, metalsmithing and jewelry, expanded media, and printmaking. Students have access to a traditional **Photography Laboratory**, including a dark room for black-and-white photography, a digital processing lab, dedicated spaces for project photography, and an equipment checkout facility. The 6,400-square-foot **Common Shop** includes a range of woodworking equipment, a plastic vacuum former, metalworking equipment, and classroom space. All labs and the shop have technical support staff.

There are 3 large, well-equipped **painting studios**. The **print studios** consist of 8,000 square feet of workspaces and a dedicated computer lab for serigraphy, lithography, and intaglio. The intaglio studio has 5 presses and a separate acid room. The lithography studio has 3 presses and various sizes of stones. The serigraphy studio has 12 printing stations, a separate wash-out room, and a large exposure unit, available for a variety of photo-based processes. The **sculpture studio** is divided into 5 general work areas with appropriate equipment: woodworking, metal fabrication, foundry, an open courtyard, and individual studios. The foundry contains equipment necessary for casting with a variety of kilns, 3 gas-fired furnaces, and an overhead crane. There is an induction furnace with a lift-swing unit for bronze and a tilt box unit for iron and steel.

The 3,800-square-foot **metalsmithing and jewelry studio** has 8 rooms with separate areas for soldering, metalsmithing, plating/electro-forming, a finishing room, casting, gas and TIG welding, enameling, and a student-operated supply store. Matrix GemVision computer software is available for students to develop 3-dimensional jewelry models. The **ceramics area** includes 5,300 square feet of studio space in the Art and Design building as well as separate west campus Chamney barn facilities. Kilns include salt, soda, cross-draft wood, anagama wood-fired, raku, an electric test kiln, and several kinds of gas and electric kilns. The **textile design area** has separate weaving, screen-printing, sewing, and dye areas. The weaving studios are equipped with 4-, 8-, and 16-harness floor looms and two 16-harness AVL compu-dobby looms. The weaving area includes traditional machines, sergers, and a computer-aided embroidery machine. The textile Mac computer lab offers numerous software applications specific to weaving and surface design including jacquard weaving CAD software.

**Murphy Hall**

**Murphy Hall** houses all major theatre programs and facilities ([http://theatre.ku.edu/facilities/](http://theatre.ku.edu/facilities/)) for University Theatre ([http://www.kutheatre.com/](http://www.kutheatre.com/)) productions. **Crafton-Preyer Theatre** is a large proscenium theatre seating 1,181. It is equipped with a full-stage turntable, a hydraulic orchestra pit elevator, cutting-edge lighting and sound control equipment, and a recently renovated counterweight line system. **William Inge Memorial Theatre** is a 50-foot by 50-foot black box theatre with flexible seating for approximately 120. It is also equipped with excellent lighting and sound control equipment. Well-equipped shops for scenery, costume, and props construction, as well as a lighting maintenance laboratory serve the production areas. **Crafton-Preyer** is also used as **Stage Too**! The audience is built onto the large stage of the theatre for a more intimate setting. **4 main studios** are used as rehearsal halls and classrooms. The **Thomas Gorton Music and Dance Library** is in Murphy Hall.

### Summerfield Hall

The Film and Media Studies facilities are located in Summerfield Hall and right in the center of campus with easy access to parking and the KU bus system. Our facilities reside on the 1st, 2nd and 4th floors and provide over 14,000 sq/ft of production and studio space. Students have access to a state of the art sound recording studio, soundstage, animation studio, computer lab, and production classroom.

### Robinson Center

The dance department is housed in **Robinson Center**, which contains 3 large, well equipped dance studios. One of the studios converts into the **Elizabeth Sherbon Theatre**, an informal, black box theatre. Dance students have performance opportunities ([https://theatredance.ku.edu/](https://theatredance.ku.edu/)) with the University Dance Company, New Dance, and in School of Music and Department of Theatre productions. The **Thomas Gorton Music and Dance Library** is in Murphy Hall.

### Spencer Museum of Art

The **Helen Foresman Spencer Museum of Art** ([http://www.spencerart.ku.edu/](http://www.spencerart.ku.edu/)) is regarded as one of the most innovative university museums and has long been considered one of the top teaching museums in the country. 5 galleries display selections from the permanent collection of more than 36,000 works of art. Areas of special strength include medieval art; European and American paintings, sculpture, and prints; photography; Japanese Edo-period paintings and prints; 20th-century Chinese paintings; and an ethnographic collection that includes 10,000 Native American, African, Latin American, and Australian works. Spencer Museum sponsors exhibitions, lectures, films, workshops, and activities that support curricular instruction in the arts. The also museum houses the Kress Foundation Department of Art History and the **Murphy Art and Architecture Library**, with more than 170,000 volumes and 600 current journals documenting the visual arts, design, and architecture from all cultures, from antiquity to the present.

### Lied Center

The **Lied Center of Kansas** ([http://www.lied.ku.edu/](http://www.lied.ku.edu/)) is a multipurpose performing arts facility with a 2,000-seat performing arts hall. It offers outstanding presentations of music, dance, and theatre, as well as lectures by artists and scholars. The Lied Center is a major regional presenter and provider of performing arts. The Department of Visual Art, **Spencer Museum of Art**, **Thomas Gorton Music and Dance Library**, and the **Lied Center present active visiting artist programs**.

### Undergraduate Programs

- The Department of Theatre and Dance (p. 1921) offers the Bachelor of Fine Arts degree and the Bachelor of Arts in Dance degree.
- The departments of Film and Media Studies (p. 1906) and Theatre and Dance (p. 1921) offer Bachelor of Arts and Bachelor of General Studies degrees.
- The Department of Visual Art (p. 1945) offers the Bachelor of Fine Arts degree, the Bachelor of Arts degree, and the Bachelor of Art Education degree.
- The program leading to the Bachelor of Fine Arts degree in theatre design is offered cooperatively by the School of the Arts and the Department of Theatre and Dance (p. 1921).
Courses for Nonmajors
Students in other KU schools may enroll in dance, film and media studies, theatre, and visual art courses for credit, subject to the availability of instructional time and the completion of necessary prerequisites. Qualifications are determined by course instructors.

Minors in dance, film and media studies, theatre, and visual art are offered for students in other disciplines.

University Honors Program
The school encourages qualified undergraduates to participate in the University Honors Program (http://www.honors.ku.edu/).

Art Exhibitions
A number of exhibitions are sponsored by the Department of Visual Art. These are shown in department galleries and the Kansas Union. Each year, there are exhibitions of work by students in the school, representing the disciplines of art and design.

Performances
The University Dance Company (https://rockchalkcentral.ku.edu/organization/universitydancecompany/) performs a varied repertoire of ballet, modern, and jazz dance. It presents 2 major programs on campus each year as well as numerous presentations on tour.

The University Theatre (http://www.kutheatre.com/) gives students a chance to act in, direct, design, and crew theatre productions. Each year, the University Theatre mounts about 8 fully staged productions. Students gain experience in children’s theatre, musicals, operas, and a range of classical and contemporary plays.

Graduate Programs
The School of the Arts is part of the College of Liberal Arts and Sciences (called the College or CLAS). The College is KU’s largest academic unit with more than 50 departments and programs. Graduate programs in the liberal arts and sciences include disciplines in the arts, humanities, social and behavioral sciences, and natural and mathematical sciences, as well as many interdisciplinary degree programs where often disciplines come together to offer students a unique graduate experience. Each graduate program’s page contains program-specific information about admission, course curriculum, and advising.

The College’s participation in graduate education reflects a long and distinguished commitment to higher learning and research across the liberal arts and sciences. The College takes full advantage of KU’s role as an international research institution to ensure that the knowledge imparted to students is current and that they learn the skills of inquiry and critical evaluation. Graduate students are central to the research and teaching missions of the College. They are also the next generation of scholars, artists, and skilled professionals who will make contributions to our communities and production of knowledge for many years to come.

School of the Arts Graduate Degrees
The School of the Arts offers graduate programs in 3 departments. The Master of Arts (M.A.) degree can be earned in film and media studies, theatre, and visual art education. The Master of Fine Arts degree is offered in visual art and in theatre design with a concentration in scenography. For students whose academic and professional goals can best be achieved through investigations at the interface of 2 or more disciplines, the School of the Arts offers master’s degree programs in interdisciplinary studies.

The School of the Arts offers the Doctor of Philosophy degree in film and media studies and theatre, and a Graduate Certificate in film and media studies.

Art Exhibitions
A number of exhibitions are sponsored by the Department of Visual Art. These are shown in department galleries and the Kansas Union. Each year, there are exhibitions of work by students in the school, representing the disciplines of art and design.

Performances
The University Dance Company performs a varied repertoire of ballet, modern, and jazz dance. It presents 2 major programs on campus each year as well as numerous presentations on tour.

The University Theatre gives students a chance to act in, direct, design, and crew theatre productions. Each year, the University Theatre mounts about 8 fully staged productions. Students gain experience in children’s theatre, musicals, operas, and a range of classical and contemporary plays.

Ceremonies
At the end of each Spring semester, the College holds a master’s hooding ceremony for master’s graduates in the College and Graduate Studies organizes the annual campus-wide doctoral hooding ceremony. The School of the Arts also hosts a ceremony for SOTA graduates. University Commencement information is available in the KU Commencement section of the KU website.

Attendance at these ceremonies is optional. Please consult the Graduate Studies (http://graduate.ku.edu/) and COGA website (http://coga.ku.edu/) for more information.

The School of the Arts (http://sota.ku.edu/) is home to three departments: theatre and dance, film and media studies, and visual art. It is housed within the College of Liberal Arts and Sciences, the broadest and most diverse academic unit on campus.

Students in the School of the Arts create, perform, and interpret works of art that contribute to our culture and history. As part of the College, students have access to ideas across the spectrum of arts, humanities, sciences and mathematics, social and behavioral sciences, and international studies. This partnership offers fresh possibilities for collaboration, paving the way for innovations and ideas.

Students interested in pursuing an undergraduate major or minor in the School of the Arts should contact College Advising and Student Services at 785-864-3500 for assistance in advising.

Graduate Advising & Mentoring Overview
Advising of graduate students is primarily conducted within the graduate programs by program staff members and the individual faculty members who act as mentors and advisors.

A faculty member in the academic unit, typically with the title of Director of Graduate Studies (DGS), has primary responsibility for the regular
assessment of students’ progress towards degree, as well as for the development and oversight of broad scale graduate initiatives. In many units, the DGS has primary oversight of department graduate committees and processes related to recruitment, admissions, new program development or program changes, graduate student annual evaluations, and graduate student petitions. Students are encouraged to work with the DGS regarding course selections and individual program requirements to ensure that all program milestones are reached as expected by the academic unit.

The majority of academic units in the College also receive advising support from a professional staff member called their graduate program coordinator. CLAS graduate program coordinators (https://coga.ku.edu/people/staff/) are team members of the College Office of Graduate Affairs (COGA) that are assigned to a specific CLAS unit(s) to advise graduate students and faculty on policies and processes related to graduate education at KU. Students are encouraged to work closely with their graduate program coordinator to ensure that all University and College requirements are met as expected. Graduate program coordinators also work closely with faculty in their assigned academic units(s), the COGA office, and other campus partners to collaborate on key initiatives related to graduate education and to connect students to services and opportunities to facilitate successful progression throughout their graduate career. Students in units without an assigned graduate program coordinator from COGA should contact the DGS regarding University and College policies and procedures.

Mentoring Best Practices

Graduate mentors, including a student’s graduate advisor(s), others at the university, and external professionals, provide professional and general insights, advice, and assistance to graduate students. Good graduate mentoring makes a vital contribution to the academic and professional success of individual students, advances the disciplines represented in the College, and contributes to the mission of the College as a whole. A positive mentoring relationship depends on the cooperation of both mentor and mentee; both should therefore work together in creating appropriate expectations for their mentoring relationship and in implementing those expectations in practice. (See here (https://www.ithinkwell.com.au/for-research-supervisors/) and here (https://coga.ku.edu/mentoring-and-advising/) for help with this.) With this in mind, here are best practices for graduate mentors and mentees in the College:

Mentors:

1. Graduate mentors should conscientiously supervise, encourage, and support students in their academic endeavors and assist them in securing research support.
2. Graduate mentors should respond effectively, respectfully, and in a timely manner to requests for guidance and support from mentees.
3. Graduate mentors should advise students concerning professional ethics, encourage the practice of research and publication consistent with ethical standards, and help students avoid ethically questionable situations.
4. Graduate mentors should strive to enhance the educational value of teaching and research assistantships of the students under their supervision. To do so they should provide discipline-specific guidance for new and experienced GTA sand GRAs.
5. Graduate mentors should be objective in the evaluation of research and academic performance and communicate that evaluation fully and honestly to their students. Graduate mentors should report accurately on the competence of students to other professionals who require such evaluations.
6. When engaged in teaching, research, or supervision, graduate mentors should recognize the power they hold and should avoid engaging in conduct that exploits or demeans students or that could be construed as an abuse of that power.
7. Graduate mentors should not permit personal animosities or intellectual differences with colleagues to impede student access to those colleagues or interfere with students’ research or progress toward a degree.
8. Graduate mentors should aid and advise graduate students in seeking professional employment inside and outside of academia, taking into account the current state of the job market and the particular situation of the student. This includes directing students towards appropriate resources (see for example here (http://cogaprofessional.ku.edu/getting-started-0/) and advising students about career opportunities and implications associated with their participation in particular research projects or degree programs.
9. Graduate mentors should be sensitive to the specific challenges faced by international students and students who identify as members of one or more underrepresented group. This may include directing students towards appropriate resources, including the following: Office of Multicultural Affairs (https://oma.ku.edu/), International Support Services (https://iss.ku.edu/), Office of Diversity & Equity (http://diversity.ku.edu/), Emily Taylor Center (https://emilytaylorcenter.ku.edu/), Center for Sexuality & Gender Diversity (https://sgd.ku.edu/), Support Services for Undocumented Students (https://undocumented.ku.edu/), as well as DEI resources in the College (https://college.ku.edu/dei/).

Mentees:

1. Graduate students should be open and willing to discuss their professional goals, aspirations, and areas where they need guidance with their mentor.
2. Graduate students should be open to guidance and criticism from their mentors.
3. Graduate students should respond effectively, respectfully, and in a timely manner to communication and guidance from mentors.
4. Graduate students should come to scheduled meetings prepared and on time. Templates are available here (https://www.ithinkwell.com.au/resources/meeting-agenda/) for students to prepare for meetings.
5. Graduate students are strongly encouraged to establish and maintain multiple mentoring relationships or develop a network of mentors that can provide support and guidance throughout their graduate career and beyond. Graduate students are encouraged to include, as part of this network, colleagues or interfere with students’ research or progress toward a degree.
6. Graduate students are strongly encouraged to take advantage of resources across campus to develop short-term and long-term academic, research, and other professional goals and be willing to discuss these with their mentor.

Change of Advisor

Graduate mentoring relationships can break down. If so, the formation of new mentoring relationships should be encouraged without prejudice. (For more information about what to do when a mentoring relationship breaks down, see Chapter 6 of the University of Michigan’s How to

All departments in the College are required to have a policy in place to govern the process of switching advisors. Please see your department’s graduate student handbook or consult with the Director of Graduate Studies for more information.

Students seeking information on specific policy or procedures should review the relevant content in the KU Policy Library (http://policy.ku.edu/) as well as the College and Graduate Studies (p. 2408) sections and the relevant Department or Program section of the online catalog. The College Office of Graduate Affairs (http://coga.ku.edu/), 102 Strong Hall, coga@ku.edu, is also available for assistance.

Students who have completed all degree requirements and are preparing to graduate should refer to the graduation checklists available on the COGA website (http://coga.ku.edu). Graduating students are also welcome to schedule a Graduation Appointment with the College Office of Graduate Affairs.

**Undergraduate University Regulations**

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

**Academic Integrity**

The College of Liberal Arts and Sciences strictly enforces KU and College policies on academic misconduct. Academic integrity requires honest performance of academic responsibilities by students. These include preparation of assignments, reports and research papers, taking examinations, completing administrative requirements, and a sincere and conscientious effort by students to abide by the policies set forth by instructors.

**Academic Standing**

**Good Standing**

Students with a KU cumulative GPA of a 2.00 or higher are in good academic standing.

**Notice**

Students who fall below a 2.00 KU cumulative GPA for the first time will be placed on notice. During the notice semester students are required to participate in all programming. Students failing to return to good academic standing at the end of the notice semester will be placed on probation. Students will only receive one notice semester.

Students who have previously returned to good academic standing will be placed on probation should their KU cumulative GPA fall below a 2.00.

**Probation**

Students on probation must meet their required KU Term GPA (see chart below) every semester until their KU cumulative GPA reaches or exceeds a 2.00. Students are allowed to continue on probation provided they meet their KU term GPA every fall and spring semester until their KU cumulative GPA reaches or exceeds a 2.00. While on probation students are required to participate in all programming. The required KU term GPA increases to a 2.50 after attempting 45 or more hours at KU to help students on probation return to good academic standing before they are at risk of being unable to raise their KU cumulative GPA in time for graduation. Failure to meet the required KU Term GPA during a fall or spring semester will result in academic dismissal.

**Academic Dismissal**

Students on probation who fail to meet their probation requirements during a fall or spring semester will be academically dismissed and are not allowed to continue in the College of Liberal & Sciences until they meet their readmission after dismissal requirements. Students are not dismissed at the end of summer.

**Readmission after Dismissal**

Students can be readmitted back to KU after a first and a second dismissal but they must complete their readmission requirement. If all requirements for the KU Core 1 - 5 goals are completed, no coursework is required. Students returning after an academic dismissal will be readmitted on probation and must meet their required term GPA requirements to avoid another dismissal.

**Terms for Readmission after Dismissal**

First Dismissal - Sit out one fall or spring semester; complete at least one 3 credit hour course that transfers to KU to meet KU Core 1-5 Goals; earn a 2.50 in all courses taken since dismissal.

Second Dismissal - Sit out one academic year; complete at least one 3 credit hour course that transfers to KU to meet KU Core 1-5 Goals; earn a 2.50 in all courses taken since dismissal.

Third Dismissal - a third dismissal is final.

**Change of School**

Students with a KU cumulative GPA of 2.00 or higher (or in their first semester) can fill out a Change of School Form requesting to be admitted to the College of Liberal Arts and Sciences and/or School of the Arts, from a KU professional school, through the last day of class for the current semester. Requests made after that will be for admission in the upcoming semester. This process is for active KU students. Students not admitted to KU follow the University’s admission policy.

Students with a KU cumulative GPA of less than a 2.00 will be evaluated according to the College’s academic standing policy and may not be admissible based on past academic performance at KU. Students who have been dismissed from another KU School will need to submit a change of school request one week or earlier prior to classes starting. Non-dismissed students may request to change schools through the 20th day of the current semester; after that date requests will be considered for the next semester.

- Change of school requests will not be reviewed until current semester grades are posted.
- Students admitted to the College on probation will need to meet the College’s academic probation requirements during the semester they are admitted or face an academic dismissal.
- The College reserves the right to deny admission to students who have had consecutive semesters of failing grades (or multiple
semester withdrawals) regardless of their KU cumulative GPA in previous semesters.

- Students dismissed from another school at KU and are found to be inadmissible to the College can follow our readmission after dismissal policy to return to KU for a future semester.
- Students admitted to the College via a Change of School request will go by the requirement term of their original matriculation to the University of Kansas. A student may petition the College of Liberal Arts & Sciences to request to change to the term requirements based on the term they requested entry into the College. This should be considered in consultation with their academic advisor, and a petition should be submitted to College Advising & Student Services.

To change from one school to another, a student must submit a Change of School form in the dean's office of the school they plan to enter or in College Advising & Student Services (https://collegeadvising.ku.edu/) if they plan to enter the College. Deadlines are included on the form. See the school's requirements for admission.

Students applying for admission to the College from other schools in the university must meet the same minimum grade-point average requirements in KU attempted course work as continuing College students. Consult College Advising & Student Services, Strong Hall, 1450 Jayhawk Blvd., Room 109, Lawrence, KS 66045-7518, 785-864-3500.

**Credit/No Credit**

A Credit/No Credit option is available to all degree-seeking undergraduates. A student may enroll in 1 course a semester under the option, if the course is not in their major or minor. To exercise the option, the student must fill out the online form via the Registrar's website during the fifth and sixth weeks of the semester (or the third week of summer session and 8-week courses). See the Academic Calendar (http://registrar.ku.edu/calendar/) for current dates for electing this option. After the close of the option period, the choice cannot be changed. Under the option, a grade of Credit is recorded for grades of A, B, or C; No Credit is recorded for grades of D or F. Courses graded Credit or No Credit do not count in computing the grade-point average. Courses graded Credit are included in the total hours counted toward graduation. Courses graded No Credit do not count toward graduation. For more information, visit the KU Policy Library (http://policy.ku.edu/).

**Warning:** Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

The university-established timeline for exercising this option is strictly enforced.

**Enrollment**

See the Enrollment Guide (http://www.registrar.ku.edu/enrollment/) for complete enrollment information.

**New and Readmitted Student Enrollment**

Immediately before the beginning of classes each term, an enrollment session is scheduled for new students. New students admitted for summer or fall term have an additional option of enrolling in fall courses during one of several summer orientation sessions. Invitations to orientation are sent automatically to newly admitted and readmitted students who applied for the spring, summer, or fall terms (except non-degree-seeking students). Readmitted students may attend a special abbreviated orientation session, may enroll during continuing enrollment, or may attend the enrollment sessions immediately before the start of the semester. Readmitted students whose readmission applications are completed by a designated date also may enroll during continuing enrollment, after meeting with an advisor. All students must preregister for orientation and enrollment sessions.

International students must complete the required check-in processes before enrollment and are encouraged to attend International Student Orientation, which includes advising and enrollment sessions.

**Continuing Enrollment**

This enrollment allows students who are currently enrolled during one term to enroll for the next term. Spring-enrolled students enroll in April for the following summer session or fall semester or both. Fall-enrolled students enroll in October or November for the following spring semester.

**Late Enrollment**

Each semester, the Academic Calendar (http://registrar.ku.edu/calendar/) announces dates for late enrollment and the last day to submit a Petition to Late Enroll. Petitions are evaluated based on past academic performance. A student may enroll in a course or change class sections after the semester has been in session for 4 weeks only if the course has met fewer than 25 percent of the class sessions. For most classes, the faculty have established earlier dates for beginning class attendance and participation. A fee is assessed for late enrollment.

**Grading**

The letters A, B, C, D, S (satisfactory), and Credit indicate passing work. The letters F and U (unsatisfactory) and No Credit indicate that the quality of work was such that, to obtain credit, the student must repeat regular course work. P represents satisfactory progress (an interim grade pending completion of a subsequent term's course work). See the KU Policy Library (http://policy.ku.edu/) for more information.

**Graduation with Honors**

Undergraduates may earn honors upon graduation in 3 ways. The student may graduate with distinction or highest distinction, earn departmental honors in the major, or complete the University Honors Program (http://www.honors.ku.edu/). It is possible to earn honors in 1 of these areas, any combination of them, or all 3. The award of honors is noted on the student's transcript and in the Commencement program. Distinction and highest distinction are noted on the diploma.

**Graduation with Distinction or Highest Distinction**

The top 10 percent of each year's graduating class is designated as graduating with distinction. Of these, the top one-third is designated as graduating with highest distinction.

Students must have completed at least 60 hours graded A through F in residence at KU (including the hours in which they are enrolled during the semester of graduation). Awards of distinction and highest distinction are based solely on the grade-point average determined by KU residence credit hours unless the overall grade-point average (including transfer hours) is lower than the residence grade-point average. In this case, the award is determined by the overall grade-point average. Students who rank in the upper 10 percent of their graduating class graduate with...
distinction. The upper third of those awarded distinction graduate with highest distinction.

Potential candidates are determined in mid-April and invited to a recognition ceremony during Commencement weekend in May. Final designation is determined in mid-July.

Graduation with Departmental Honors

Most departments and programs allow qualified majors to work toward graduation with departmental honors. Graduation with departmental honors is awarded in recognition of exceptional performance in the major, completion of a program of independent research or an alternative project, and a strong overall academic record.

In addition to the requirements of individual departments and programs (which must be approved by the College committee on undergraduate studies and advising), the College requires the following for graduation with departmental honors:

1. Candidates must declare the intention to work for departmental honors with the appropriate departmental honors coordinator(s) no later than the time of enrollment for the final undergraduate semester, but sooner if required by the department(s). Copies of the intent form should be returned to College Advising and Student Services.

2. At the end of the final undergraduate semester, the candidate must have achieved a grade-point average of at least 3.5 in the major, and some departments may also require an additional overall minimum GPA. This includes work completed at other institutions, as well as at KU. No minimum grade-point average is required to declare candidacy for graduation with departmental honors unless specified by the department.

3. Each candidate’s departmental honors work must include independent research or an acceptable alternative project. The results of research are presented in a form appropriate to the requirements of the major department. Equivalents to the independent research component are established by approved departmental honors programs. In courses meeting the independent research requirement, the candidate must earn a grade of B or higher. Successful completion of all departmental honors requirements must be certified to the departmental honors coordinator(s) by a panel composed of at least three members of the College faculty who have read the report of the independent research and heard the oral presentation, where required.

Petitions

A department or program may petition to award graduation with departmental honors to deserving students who, for good reason, do not meet every College and departmental requirement. Send petitions to the committee on undergraduate studies and advising, College Advising & Student Services (https://collegeadvising.ku.edu/).

Late Completion of Honors Requirement

Requirements for graduation with honors may be completed after the date on which certifications are requested from departments, and in some cases, requirements, if not needed for graduation, may be completed after a student has graduated. However, the Incomplete policy does apply and grades would lapse at the time of graduation. When a candidate finishes all requirements, departments must notify College Advising & Student Services (https://collegeadvising.ku.edu/) in writing.

Honor Roll

Undergraduates with grade-point averages of 3.5 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Honors Program

The University Honors Program (http://www.honors.ku.edu/) provides opportunities for outstanding and creative undergraduates in all schools at KU to develop their full potential during their undergraduate years. See Honors in this section of the online catalog for further information.

Incompletes

The letter I indicates incomplete work, such as may be completed without re-enrollment in the course. The letter I should not be used when a definite grade can be assigned for the work done. It is not given for the work of a student in any course except to indicate that some part of the work has, for reasons beyond the student’s control, not been done, while the rest has been satisfactorily completed. At the time an I is reported on the electronic roster, the character and amount of work needed, as well as the date required for completion and lapse grade if further work is not completed by this date, should be indicated.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed 1 calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule automatically converts to a grade of F or U, or the lapse grade assigned by the course instructor, and appears on the student’s record.

Extensions to the time limit may be granted by the dean’s representative upon submission of a petition from the student containing the endorsement of the course instructor who assigned the I grade, or the department chairperson if the instructor is unavailable, prior to the expiration of the Incomplete. After the I grade is converted to a grade of F or U, the grade may only be changed in accordance with USRR Article II, Section 3. (http://policy.ku.edu/governance/USRR/)

Maximum and Minimum Undergraduate Semester Enrollment

No undergraduate may enroll for more than 20 hours a semester except by permission of the Director of College Advising & Student Services. Summer enrollment is limited to 10 hours. Permission is not considered unless the student has demonstrated high levels of academic ability in previous semesters.

Prerequisites and Co-requisites

Students are advised to enroll according to prerequisites and co-requisites noted in individual course descriptions. These prerequisites are enforced in a variety of ways including blocking enrollment, administrative drops without notice, etc.

Required Undergraduate Work in Residence

Junior/Senior Hours Required for Graduation

KU requires all students pursuing bachelor’s degrees to complete a minimum of 45 credit hours at the junior/senior level (courses numbered
Additionally, students are responsible for understanding the requirements well as the requirements of the College outlined in this catalog section. (catalog.ku.edu/graduate-studies/) include the university requirements for graduate study at KU outlined (in the College and Graduate Studies sections of the online catalog). It is the students' responsibility to comply with all requirements that are unique to individual graduate programs outlined in the graduate handbooks of individual academic units and the Departments & Programs (https://catalog.ku.edu/graduate-studies/) sections of the online catalog.

In general, the student is subject to the regulations in place at the time of matriculation as a degree-seeking student. If degree requirements change, the student may opt to follow the new requirements or to continue under the regulations in place at the time of admission. Any student readmitted 10 years or more after his or her initial term as a degree-seeking student must fulfill the requirements in effect on the date of readmission to the graduate program.

Information presented on this page is limited to the most frequently consulted policies and key milestones in the graduate career. Students should also consult the academic unit's handbook, Graduate Studies and College sections of the KU Policy Library, and the Graduate Studies and University of Kansas Regulations sections of the online catalog.

**Degree Requirements**

Requirements for the completion of master's and doctoral degrees in the College are governed by department- or program-specific policy, College policies and procedures, Graduate Studies policies, and the University Senate Rules and Regulations.

**Master’s Degree Requirements**

**Coursework**

At least 50% of required coursework for a master’s program must be numbered 700 or above. Specific coursework requirements for the Master’s degree are established and tracked by the department or program. The College then verifies that completed coursework meets all College and University requirements for master's students. Please consult with your advisor, the academic unit’s graduate handbook, and the relevant Departments & Programs section of the online catalog for further information on specific courses or course sequences required for the degree.

**Thesis**

Master’s students complete either a thesis or an equivalent enrollment in research, capstone/portfolio, independent investigation, or seminar. Students earning a master’s thesis degree must have completed at least 1 hour of thesis enrollment. General rules for the preparation of a thesis are available on the Graduate Studies website (https://graduate.ku.edu/electronic-thesis-and-dissertation/).

**Final Examination**

A final general examination or thesis defense in the major subject is required for MA and MS degrees. The examination, which may be oral, written, or both, is held during the semester of the student’s final enrollment in coursework and, in the case of thesis students, when the thesis has been substantially completed. All master's exams must be approved by the College in advance of the scheduled exam date.

See also Master’s Degree Requirements (https://catalog.ku.edu/graduate-studies/#programstext) and M.A. and M.S. Degrees (https://catalog.ku.edu/graduate-studies/#programstext) in the Graduate Studies section of the online catalog.
Doctor of Philosophy Degree Requirements

Coursework

Coursework requirements for the doctoral degree are established and tracked by the department or program. The College then verifies that completed coursework meets all College and University requirements for doctoral students. Please consult with your advisor, the academic unit's graduate handbook, and the relevant Departments & Programs section of the online catalog for further information on specific courses or course sequences required for the degree.

Research Skills and Responsible Scholarship

Graduate Studies requires that all doctoral students meet the Research Skills and Responsible Scholarship requirement before proceeding to the Comprehensive Exam. Specific requirements are determined by each department or program in consultation with Graduate Studies. Information on these requirements is contained in the department or program's approved research skills requirement plan. Consult with your advisor and the Departments & Programs section of the online catalog for further information.

Enrollment Requirement

Prior to the comprehensive oral exam, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by the Full-Time Enrollment for Graduate Students policy in the Graduate Studies section of the KU Policy Library
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Please see the Engagement and Enrollment in Doctoral Programs policy in the Graduate Studies section (https://catalog.ku.edu/graduate-studies/#programstext) of the online catalog and the KU Policy Library (https://policy.ku.edu/) for more information about this requirement.

Comprehensive Oral Examination

The comprehensive oral examination covers the major field and any additional content for which the academic unit wishes to hold the student responsible. The examination is expected to be broader than a mere defense of the dissertation proposal. Exams must be approved by the College in advance of the scheduled exam date. Refer to the Graduate Studies section (https://catalog.ku.edu/graduate-studies/) of the online catalog for further information on the regulations governing the final oral examination, including committee composition and attendance regulations.

Guidelines for preparing and submitting the final copies of the dissertation are available on the KU Libraries' ETD website (https://guides.lib.ku.edu/etd).

Enrollment

Full-time, Half-Time and Part-Time Enrollment

There are multiple definitions for what constitutes full-time enrollment for graduate students at KU, including variations for doctoral candidates enrolled in dissertation hours, students with GTA/GRA/GA appointments, and active duty military. Please see the Full-Time Enrollment policy in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for the definitions of full-time, half-time, and part-time enrollment.

Maximum enrollment for graduate students in the College of Liberal Arts & Sciences, except in rare instances, is 16 hours in Fall or Spring semester and 9 hours in the summer session.

At a minimum, all graduate students must be continuously enrolled in the Fall and Spring semesters while completing the requirements for fulfillment of their degree. Please consult the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for other enrollment regulations.

Continuous Enrollment for Master's Students

The College requires that all master's students who have completed the required coursework for their degrees must be continuously enrolled in the Fall and Spring semesters until all remaining requirements for the degree, including the thesis when applicable, are completed. No enrollment is required during the summer session unless it is the semester during which the student will graduate, in which case enrollment is required. Certain academic units have additional rules governing summer enrollment.

Post-Comprehensive Enrollment for Doctoral Students

After passing the Comprehensive Oral Exam, doctoral candidates must be continuously enrolled. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester (Fall and Spring). At least one of these hours each semester must be in dissertation or approved dissertation-equivalent coursework.

Upon completion of the 18-hour requirement, a student's level of enrollment should reflect, as accurately as possible, the faculty time he or she utilizes. This may be as little as one dissertation (or approved equivalent) hour per semester.

In addition, Graduate Studies requires a period of at least 1 month to elapse between the comprehensive oral exam and the final exam. Students that have completed all degree requirements before completing 18 hours are still required to continue enrollment until this 1-month requirement has been met.

Special enrollment requirements apply to those with GTA/GRA/GA appointments. Please consult the Graduate Studies (p. 2408) section of the online catalog and the KU Policy Library (http://policy.ku.edu/).
Lapses in Enrollment
Generally, no student is allowed to enroll in full term courses with an established meeting time after the first 4 weeks of a semester or the first 2 weeks of a summer session. Non-standard dated courses, or "short courses," as well as research or independent study courses with a "by appointment only" meeting time have different deadlines. Students should consult the academic calendar (https://registrar.ku.edu/calendar/) and short courses listing (https://registrar.ku.edu/short-courses/) for deadlines.

The student may elect to Voluntarily Discontinue from the program, and must inform the department or program in writing of this decision. The department will submit the necessary forms to the College. This option requires the student to seek re-admission to the program if they choose to return at a future date. They also remain eligible to seek admission to another department or program in the College.

The student may also petition for a Leave of Absence of up to one calendar year. If granted, the Leave of Absence maintains the student's place in the program. Leave of Absence petitions must be submitted by the department or program and provide evidence of the department or program's endorsement of the student's petition. Students interested in this option should begin by consulting with their advisor.

The time spent on Leave of Absence does not count against the student's time to degree, and therefore does not shorten the time available to complete their degree requirements. Similarly, if a student that has elected to Voluntarily Discontinue subsequently returns to the program, the time that has elapsed since his or her discontinuance does not count against the time to degree.

Students who fail to enroll without completing the Voluntary Discontinuance process or without being granted a Leave of Absence are reviewed by the College Office of Graduate Affairs and the students' academic units for possible dismissal. Any time that accrues during these lapses of enrollment in which the student does not occupy any approved enrollment category (i.e., Enrolled, Voluntarily Discontinued, or Leave of Absence) is counted against the time to degree.

International students seeking a Leave of Absence must consult with the International Support Services office prior to any change in enrollment status to determine how the change may affect their legal status.

Please see Graduate Studies policies governing Leave of Absence and Voluntary Discontinuance in the Graduate Studies (p. 2408) section of the online catalog and in the KU Policy Library (http://policy.ku.edu/).

Dual Enrollments
Students enrolled in two schools or working on two degrees at the same time must complete the work for both degrees. Courses may not be counted toward both degrees, except in the joint degree programs that have been established (e.g., M.P.A./J.D., M.A. in Economics/J.D., M.B.A./M.A. in Area Studies, etc.). Please refer to the Combined Degrees information in the Graduate Studies (p. 2408) section of the online catalog for a complete list of approved joint degree programs.

Examinations
Students must be enrolled during the semester in which they complete their oral comprehensive or final examinations. Additionally, no graduate student will be allowed to take oral comprehensive or final examinations, or to go forward with a thesis or dissertation defense, if a waiting grade (WG) placeholder or an incomplete (I) grade is listed on the student's transcript.

University Regulations on Grading
Article II of the University Senate Rules and Regulations provides detailed information on regulations governing the grading of graduate coursework. Students should also consult the Graduate Studies (p. 2408) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for more information on the Grading Policy.

The following are of particular relevance for graduate students in the College:

**Passing Grades for Graduate Coursework**
Only courses graded C or above are considered passing and may be counted for graduate credit. Courses graded C-, D or F may not be used to fulfill degree requirements.

**Incomplete (I) and Waiting Grades (WG)**
Incomplete (I) grades are used to note, temporarily, that a student's work has been satisfactory to date, but that they have been unable to complete a portion of the required course work during that semester due to circumstances beyond their control. Incomplete work must be completed within the time period prescribed by the course instructor, at which point a permanent grade will be assigned. After one calendar year from the original grade due date, an Incomplete (I) grade will automatically convert to a grade of F or U, or the lapsed grade assigned by the course instructor.

The I grade is not appropriate for enrollments in thesis, dissertation, or research hours or the first semester of a two semester sequence.

Waiting Grades (WG) are placeholders and should only be used in rare instances when, for reasons beyond his or her control, an instructor is not able to assign a course grade by the deadline. WG should not be used to delay evaluation of thesis or dissertation hour enrollments. This practice often leads to difficulties with timely graduation processing. WG is also not appropriate for students who are unable to submit their work by the grade deadline. In these cases an Incomplete may be more appropriate. Instructors should follow their unit's internal guidelines for use of Incompletes.

In accordance with USR 2.2.3.4, any incomplete (I) or waiting grade (WG) on the student's transcript must be resolved before the College will preapprove the doctoral oral comprehensive exam. Additionally, the College will not approve an application for graduation if a waiting grade (WG) or an incomplete (I) grade remains on the student's transcript.

**Credit/No Credit (CR/NC)**
The University establishes a time period each term during which students may elect a Credit/No Credit grading option for an individual course. Graduate students may elect the CR/NC option only for those courses that do not fulfill a degree requirement. Degree requirements include those courses used to fulfill the Research Skills and Responsible Scholarship requirement. CR/NC is elected via the Registrar’s electronic form (https://registrar.ku.edu/credit-no-credit/). Students should consult with their advisor prior to electing the CR/NC option.
College-Specific Grading Policy

A-F Plus/Minus (+/-) Grades
Plus/minus (+/-) grades may be used in the College. The plus or minus sign describes intermediate levels of performance between a maximum of A and a minimum of F. Intermediate grades are calculated as 0.3 units above or below the corresponding letter grade.

Participation (P) Grades
Use of the Participation (P) grade is restricted in the College. It is only approved for a limited number of courses for which special permission has been sought. When permission is granted, P is only used to indicate participation in thesis, dissertation, or research enrollments (related to thesis or dissertation), or in the first semester enrollment of a two-semester sequence course. In any semester when there is evidence about performance available, the instructor may elect to assign a letter grade of A, B, C, D, or F. A letter grade (A, B, C, D, or F) must be assigned in the last semester of enrollment to characterize the quality of the final product.

If a department or program has a course for which the P grading system may be more appropriate than the A-F or S/U grading system, it must seek special approval from the College.

Grading of Thesis and Dissertation Hours (and Approved Equivalents)
The SP/LP/NP grading scale is restricted to thesis and dissertation hours, as well as those research courses approved by Graduate Studies as equivalents. It is the preferred scale for the grading of these courses in the College and is applied in the following manner:

- SP - Satisfactory Progress. Progress is consistent with the goals for the semester as agreed upon with the advisor; supports timely completion of the degree.
- LP - Limited Progress. Progress is less than what was agreed upon with the advisor; may cause delays in timely degree completion. Academic probation may be warranted.
- NP - No Progress. The student has provided no evidence of progress on the thesis or dissertation work, or work completed was insufficient to move the thesis or dissertation project forward. Probation is strongly encouraged and dismissal may be warranted.

To be eligible for graduation, the final semester of dissertation/thesis enrollment must be graded SP.

The College strongly encourages the use of the SP/LP/NP grading scale for thesis and dissertation courses. However, programs may elect to use any A-F scale. In no case is the S/U scale to be used for thesis or dissertation hours or their equivalents. Per Graduate Studies policy, no more than 6 credit hours graded S/U may count toward a graduate degree.

College-specific Admission Policy

Admission Deadlines
For all graduate programs in the College of Liberal Arts & Sciences, no deadlines for the submission of applications for graduate study may fall on a weekend or on a University-observed holiday.

During calendar years when an established admission deadline falls during one of these times CLAS graduate programs must either:

- Allow the online application to remain open and applications to be accepted through the end of the first business day following the established deadline; or,
- Adjust the department’s established deadline for those years.

Probation and Dismissal Guidelines in the College

To be in good standing, a student must maintain a 3.0 cumulative grade-point average and be making satisfactory progress toward the degree, as determined by Graduate Studies’ Good Academic Standing policy and the department or program’s internal guidelines. The Good Academic Standing policy may be found in the Graduate Studies (p. 2408) section of the online catalog and the KU Policy Library. (http://policy.ku.edu/)

Probation Due to GPA
In any semester, a student whose cumulative GPA has fallen below a 3.0 is automatically placed on academic probation for the following semester (Fall or Spring). Students are notified by the College of their probationary status. The student has one semester (not including the summer term) in which to raise the cumulative GPA to a 3.0 or the College will dismiss the student. Refer to the Graduate Studies’ Academic Probation policy for more details. Departments may petition the College for the student to be granted a one-semester extension of the probation.

If a student’s cumulative GPA falls below a 2.5 as a result of the second or a subsequent semester of enrollment, the College will dismiss the student without eligibility for probation. Students whose GPA falls below 2.5 in the first semester of enrollment are eligible for probation with department recommendation. In the absence of this recommendation, the College will dismiss the student.

Probation Due to Unsatisfactory Progress
Upon recommendation of the department or program, a student may be placed on probation for failing to make satisfactory progress toward the degree. This may include, but is not limited to, failed exams or failure to make adequate and timely progress on the dissertation or thesis. See the Good Academic Standing policy in the Graduate Studies (p. 2408) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for more information on what constitutes satisfactory progress.

Dismissal
It is the academic unit’s responsibility to ensure that students who are not demonstrating academic achievement sufficient to meet the requirements of a College graduate degree or who are failing to make timely progress to the degree are dismissed from their programs. This typically occurs when a student fails to meet the terms of the probationary period. Academic dismissal should occur immediately following a student’s failure to meet the terms of the probationary period. If dismissal occurs during the semester, the dismissal is effective immediately and the student is administratively withdrawn from coursework. The department or program will notify the student in writing of the reasons for their dismissal. This will be followed by a letter from the College confirming the student’s dismissal from graduate study at KU.

A student who has been dismissed from a graduate program at KU is not eligible for readmission to graduate study in any department or program at the University of Kansas. A student may petition for an exception. The petition must be approved by the department to which the student intends to apply, the graduate division of the
College, and the Dean of Graduate Studies. Such petitions are rarely approved.

Time Limits

The University and the College have established time limits governing various stages of the graduate student career.

Maximum Time to Count Required Course Work

Courses completed at the University of Kansas, or transfer credits from another university, are valid for a period of 10 years. Courses that were completed more than 10 years before the scheduling of the final defense may not be used to fulfill graduate degree requirements in the College of Liberal Arts and Sciences.

With the endorsement of their graduate programs, students may petition the College to accept out-of-date course work to fulfill the requirements for their graduate degrees, provided they are able to justify why this course work meets the current standards of scholarship in the discipline.

Maximum Time to Submit Thesis or Dissertation

The College requires that students make all final revisions and complete the electronic submission of the final version of the thesis or dissertation manuscript to UMI within 6 months of the date of final presentation and/or defense of the thesis or dissertation work. Until the final manuscript of a thesis or dissertation is submitted, the student must be enrolled in accordance with enrollment policy. Graduate students in the College who do not submit the final manuscript within the 6-month time limit must enroll in 3 hours a semester until the thesis or dissertation is completed and submitted.

Maximum Time to Complete the Degree

Graduate Studies has established time limits on master’s and doctoral degree completion. Please see Graduate Studies policies on Engagement and Enrollment in Doctoral Programs and Master’s Program Time Constraints in the Graduate Studies (p. 2408) sections of the online catalog and in the KU Policy Library (http://policy.ku.edu/) for full details.

Master’s degree students have a total of seven calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, in which to complete the work for a master’s degree.

Doctoral degree students have a total of 8 calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, to complete the Ph.D. This includes students who enter with a master’s degree from an institution other than KU and bachelor’s degree holders who bypass the master’s and are admitted directly to a Ph.D. program.

Students who complete a master’s and doctoral degree within the same academic unit at KU have a maximum of 10 years to complete both degrees.

A time limit extension may be granted by the College. All extension petitions require the department to prepare and submit a Graduate Degree Completion Agreement, which must then be approved by a designated subcommittee of the Committee on Graduate Studies. Per Graduate Studies policy, extensions may be granted for up to 1 year. However, additional time may be requested in the Completion Agreement. If a Completion Agreement with a timeline greater than one year is approved, the department must submit a renewal petition annually after the first year until the Completion Agreement has ended.

Renewal petitions must indicate the student’s progress on the Completion Agreement and will receive expedited review.

Academic units may set their own, more rigorous time limits. Consult with your advisor and review your academic unit’s handbook and the relevant Departments and Programs section of the online catalog for program-specific information, requirements, and restrictions.

Academic and Research Integrity

The College of Liberal Arts and Sciences strictly enforces KU and College policies on academic and scholarly misconduct. Academic integrity requires honest performance of academic and research responsibilities by students. These include, but are not limited to, ethical preparation of assignments, reports, and research papers; completion of examinations; ethical treatment of human and animal subjects; execution of administrative requirements; and a sincere and conscientious effort by students to abide by the policies set forth by instructors and research advisors.

Graduation

All graduate students must be enrolled the semester they complete all degree requirements.

Graduate Studies establishes an early deadline for degree completion for each semester and summer session, usually occurring at the end of the first 2 weeks of a semester or the end of the first week of summer session. If the student was enrolled the previous semester and meets all degree requirements including the submission of all required documentation by the early deadline, they are not required to enroll for that semester.

The final Graduate Application for Graduation Deadline is set by the Registrar for each semester. Please consult the official Academic Calendar for specific dates. To be eligible for graduation, an application for degree must be submitted and all degree requirements met by this deadline. This includes the submission of all required documentation to the College Office of Graduate Affairs. See the Graduation section of the COGA (https://coga.ku.edu/graduation/preparing-to-graduate/) website for more information.

Undergraduate Graduation with Honors

Undergraduates may earn honors upon graduation in 3 ways. The student may graduate with distinction or highest distinction, earn departmental honors in the major, or complete the University Honors Program (http://www.honors.ku.edu/). It is possible to earn honors in 1 of these areas, any combination of them, or all 3. The award of honors is noted on the student’s transcript and in the Commencement program. Distinction and highest distinction are noted on the diploma.

Graduation with Distinction or Highest Distinction

The top 10 percent of each year's graduating class is designated as graduating with distinction. Of these, the top one-third is designated as graduating with highest distinction. To be eligible, students must have completed at least 60 credit hours, graded A through F, in residence at KU (including the hours in which they are enrolled during the semester of graduation). Awards of distinction and highest distinction are based solely on the grade-point average determined by KU residence credit hours unless the overall grade-point average (including transfer hours) is...
lower than the residence grade-point average. In this case, the award is determined by the overall grade-point average.

**Graduation with Departmental Honors**
Most departments and programs allow qualified majors to work toward graduation with departmental honors. Graduation with departmental honors is awarded in recognition of exceptional performance in the major and completion of a program of independent research or an alternative project.

In addition to the requirements of individual departments and programs (which must be approved by the College committee on Undergraduate Studies and Advising - CUSA), the College requires the following for graduation with departmental honors:

1. **Candidates must declare the intention to work for departmental honors with the appropriate departmental honors coordinator(s) no later than the time of enrollment for the final undergraduate semester, but sooner if required by the department(s).** The intent form should be submitted to College Advising & Student Services.

2. **At the end of the final undergraduate semester, the candidate must have achieved a grade-point average of at least 3.5 in the major, including work completed at other institutions, as well as at KU.** No minimum grade-point average is required to declare candidacy for graduation with departmental honors unless specified by the department.

3. **Each candidate's departmental honors work must include independent research or an acceptable alternative project.** The results of research are presented in a form appropriate to the requirements of the major department. Equivalents to the independent research component are established by approved departmental honors programs. In courses meeting the independent research requirement, the candidate must earn a grade of B or higher. Successful completion of all departmental honors requirements must be certified to the departmental honors coordinator(s) by a panel composed of at least three members of the College faculty who have read the report of the independent research and heard the oral presentation, where required.

**Petitions**
A department or program may petition to award graduation with departmental honors to deserving students who, for good reason, do not meet every College requirement. Petitions for exceptions should be submitted to the Committee on Undergraduate Studies and Advising (CUSA), via College Advising & Student Services (http://collegeadvising.ku.edu/).

**Late Completion of Honors Requirement**
Requirements for graduation with honors may be completed after the date on which certifications are requested from departments. In fact, requirements—for example, the completion of an honors thesis for which the credit hours are not needed to graduate—may be completed after a student has graduated. When a candidate finishes all requirements, departments must notify College Advising & Student Services (https://collegeadvising.ku.edu/) in writing.

University Honors Program
The University Honors Program (http://www.honors.ku.edu/) provides opportunities for outstanding and creative undergraduate students in all schools at KU to develop their full potential during their undergraduate years. The Honors Program brings talented students together in honors classes and seminars to benefit from mutual interests and association. It brings students and faculty members together in a teaching and research environment that ensures high academic achievement and standards. The program also coordinates merit-based scholarship opportunities for qualified students, including KU awards such as the University Scholars Program, and Undergraduate Research Awards. The Honors Student Association and the Honors Ambassador Program provide opportunities for student leadership.

In general, honors classes are small, oriented to discussion, and taught by full-time members of the faculty. Most honors courses fulfill requirements and deal with introductory fundamentals and principles, but they are likely to do so in more depth than their non-honors equivalents. Honors courses are distinguished by the energetic atmosphere and critical thinking generated by the students in them and the faculty members who teach them.

Honors students are interested in expanding their knowledge and take a broad range of liberal arts and sciences courses. This is true of students in the professional schools (architecture, engineering, business, etc.) as well as students in the College of Liberal Arts and Sciences. Honors program advisors typically recommend that students explore their interests through the broad curriculum choices KU has to offer.

A first-year, semester-long tutorial experience provides an introduction to an academic area of study in an informal setting that allows students to get to know one another and the instructor. The tutorial explores the research methods of a discipline and acquaints the student with the research resources at KU. Honors advising is personalized in meetings with honors staff, faculty fellows, and specially selected advisors from across the university. The program’s advising committee facilitates early and frequent contact with academic advisors in the students’ areas of interest. Honors students benefit from priority enrollment, which provides flexibility in planning one’s academic curriculum.

The program does not require a minimum number of honors courses a semester. However, students in the program quickly discover that honors courses engage the intellect, hold the interest, and create the enthusiasm for learning they seek at a university. Students in the professional schools are particularly encouraged to seek out honors course opportunities early, while their curricula still have breadth and flexibility.

Honors students are strongly encouraged to include research, study abroad experiences, internships, and community service in their academic programs. Consult Honors Program staff about applying these activities toward completion of honors requirements.

**Admission**
Students with strong high school curricula and excellent academic records are encouraged to apply to the University Honors Program. Admission is highly competitive. Although no ACT/SAT composite score or high school grade-point average guarantees that a student will or will not be admitted to the University Honors Program, this year’s average ACT composite for accepted students is a 32.4, and the average unweighted GPA for an accepted student is 3.96. Applications are evaluated on the basis of high school curriculum, grades, an essay, activities, and standardized test scores. Applications from first- and second-year students currently attending KU, as well as incoming transfer students, are evaluated on the basis of college course work, an essay, and college activities. Review of applications begins in October and continues through April. Send inquiries to the University Honors Program, 1506 Engel Road, Lawrence,
Completion of the Program

Students graduate from the program by completing 8 honors units and the first-year, semester-long tutorial. The 8 units must be completed as follows:

1. 6 honors courses (may include graduate-level courses numbered 700 and above).
2. 1 out-of-classroom experience such as study abroad, departmental honors, documented research experience, approved and documented internship experience, or approved and documented community service.
3. The eighth unit may be from either category 1 or category 2. Students also must maintain a minimum 3.25 grade-point average.

Nunemaker Center

This unique building, with its modern architectural design, is the home of the Honors Program, near the Daisy Hill residence halls at 15th Street and Engel Road. The Honors Program is home to several faculty fellows who serve the program and bring additional resources to the program to complement the full-time staff. Faculty fellows are available for advising, consultation about majors and careers, guiding research projects, and work with the Honors Council to develop programmatic initiatives.

Students are encouraged to take advantage of the spaces available at Nunemaker, including several classrooms and study areas, a kitchen, comfortable lounges that include 2 fireplaces, and wireless Internet access. Nunemaker also serves as a gallery for undergraduate art. The center is open days and evenings.

View Honors (http://catalog.dept.ku.edu/201314/schools/clas/honors/) courses in the online catalog.

Graduate Awards

The College of Liberal Arts and Sciences offers several awards to recognize outstanding graduate students, faculty service, teaching excellence, and exemplary advising. Below, you will find a brief description of each award. More specific information about eligibility and the call for nominations each year can be found on the College’s website under Awards & Opportunities (https://coga.ku.edu/awards-funding/).

Graduate Student Awards

Chancellor's Doctoral Fellowship

Each year selected doctoral programs award a Chancellor’s Doctoral Fellowship to an incoming doctoral student of exceptional promise. Fellows receive five years of fellowship support for their doctoral work, including a $25,000 stipend plus resident rate tuition and required fees.

Dean's Doctoral Fellowship

Each year selected doctoral programs in the College award a Dean’s Doctoral Fellowship to an incoming doctoral student of exceptional promise. Fellows receive up to five years of fellowship support for their doctoral work, including a stipend ranging from $20,000-22,000 plus resident rate tuition and required fees. Fellows must submit an application for external funding to be eligible for a fifth year of support.

Outstanding Thesis/Research Project Award

The Committee on Graduate Studies in the College has established this award for students receiving a master’s degree. The bi-annual award carries a $500 stipend, and either a thesis or research project awardee is selected in each cycle. Students are nominated for the award by their advisors.

Graduate Faculty Awards

Byron A. Alexander/John C. Wright Graduate Mentor Awards

Graduate students (current or those who have graduated since May of the calendar year prior to the award deadline) may nominate any tenured or tenure-track faculty member in the College of Liberal Arts and Sciences who has served as an outstanding mentor. The award amounts are up to $1,000.

Career Achievement Teaching Award

This annual award recognizes a retired faculty member in the College of Liberal Arts and Sciences who has made a significant contribution to the teaching of College students at either the undergraduate or graduate level and who has distinguished him/herself through excellence in teaching. The award amount is $1,000.

Film and Media Studies Courses

FMS 100. Introduction to Film and Media. 3 Credits. HL H

An introduction to analyzing and thinking critically about film and other media. Students will learn to read and interpret the basic signs, syntaxes, and structures of cinematic language. Through direct analysis of selected films, television, and new media, students will evaluate and construct evidentiary arguments about the aesthetic strategies creators use to make meaning for audiences. In addition, this course will familiarize students with the historical and industrial dimensions of film and media, as well as the influence technology has on their development into the twenty-first century.

FMS 177. First Year Seminar: ______. 3 Credits. U

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Film and Media Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

FMS 200. Film and Media Aesthetics. 3 Credits. HL H

An introduction to film and media aesthetics, including basic film/media theories and their practical applications. Students will be introduced to the concepts of time, space, composition, movement, editing, light, color, and sound. A key feature of the course will be a practical emphasis on learning how to see creatively by applying elements of design, camera lens and sound recording principles. Examples of these aspects of film and associated media will be examined and discussed in depth. Should be taken before or concurrently with FMS 275.

FMS 204. Study Abroad Topics in: ______. 1-6 Credits. H

This course is designed for the study of special topics in Film at the freshman/sophomore level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

FMS 273. Basic Screenwriting. 3 Credits. H
An introduction to the craft and principles of screenwriting, from inspiration to writing a complete first act. Emphasis on factors relevant to the creation of a treatment and a screenplay. Prerequisite: Consent of instructor.

FMS 275. Basic Video Production. 4 Credits. H
Theory and practice of video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. Lecture-laboratory. Prerequisite: FMS 100, completion of or concurrent enrollment in FMS 200.

FMS 301. Undergraduate Professional Development Seminar. 1 Credit. H
Provides an overview of opportunities for professional development in Film and Media Studies, and helps students plan goals for their education through an understanding of professional practices. The course also covers practical exercises in professional development, including writing resumes, finding internships and entry-level work, and other aspects of establishing a career in Film and Media Studies. Graded on a satisfactory/unsatisfactory basis. Prerequisite: FMS 275 or equivalent. Open to FMS Majors only.

FMS 302. Undergraduate Studies Seminar in: ____. 1-6 Credits. H
Course organized any given semester to examine a particular studies topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

FMS 303. Undergraduate Production Seminar in: ____. 1-3 Credits. H
Course organized any given semester to study a particular production topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

FMS 304. Study Abroad Topics in: ____. 1-6 Credits. H
This course is designed for the study of special topics in Film at the junior/senior level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

FMS 307. Undergraduate Film/Media Internship. 1-6 Credits. H
Supervised study with an approved film/media company or project. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Prerequisite: Consent of instructor and at least seven hours credit in the department.

FMS 310. History of the Silent Film. 3 Credits. H
A survey of the artistic, economic and sociological development of the narrative cinema with emphasis on the American studio system, German Expressionism, and Soviet Expressive Realism. Analysis of selected films.

FMS 311. History of the American Sound Film. 3 Credits. HL H
A study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television. Analysis of selected films.

FMS 312. History of the International Sound Film to 1950. 3 Credits. H

FMS 313. History of the International Sound Film Post 1950. 3 Credits. H
A survey of the artistic, economic, and sociological development of the international sound film from 1950 to the present. Emphasis on Free Cinema, New Wave, and other emerging post-war cinemas.

FMS 314. History of African-American Images in Film. 3 Credits. HL H
A history and critical assessment of the diverse images of African-Americans in American cinema and the impact of those images on American society. Screenings of feature and independent films, including those by African-Americans.

FMS 315. Survey of Japanese Film. 3 Credits. NW H
This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, Survey of Japanese Film introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this institution shapes gender, class, ethnic, and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and film style over the last century. Through secondary readings, lectures, and discussions students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 315.)

FMS 316. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Credits. H
This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression during dictatorship, globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity, immigration and identity in contemporary cinema. Other themes in common are financing issues, such as co-production agreements, film production under the regional trade pact Mercosur and issues of circulation, distribution and marketing of national films. Most films will be feature length narrative, but a few documentaries will be shown. May be taken as FMS 716, but with additional requirements.

FMS 318. Anti-war Film. 3 Credits. H
An overview and exploration of the history of anti-war film and media themes to show how attitudes regarding war and political policy can be affected by positive and negative depictions of conflict. Course includes analysis of selected films.

FMS 322. Soviet and Post-Soviet Russian Cinema. 3 Credits. H
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. (Same as SLAV 322.)

FMS 323. War and Memory in Asian Film. 3 Credits. H
This course explores how the film industries of key East Asian nations have constructed, imagined, debated, and commemorated their experiences of the major wars fought during the 20th century (i.e. The Greater East Asian War, the Chinese Civil War, the Korean War, and the Vietnam War). We will examine the intersection of various historical, political, cultural, and economic factors with the production of mainstream commercial film to consider how individual and collective memories of wars in Asia have transformed over time in different contexts. Films are
particularly useful for examining how the cultural memory of wars survives and is conveyed from one era to another with each new generation reinventing and superimposing new layers of memory on the original phenomenon from a range of multiple perspectives. A central goal of this course is to provide students with various historical perspectives, cultural contexts, and analytical methods to develop your ability to apply visual literacy and critical thinking skills to contemporary Asian films about the major wars of the last century.

FMS 330. Cinematic Rome. 3 Credits. H
A study of cinematic representations of daily life, diversity, urban landscape, and social and political issues in modern and contemporary Rome as presented in different genres. Taught in English. (Same as ITAL 330.)

FMS 331. Mafia Movies. 3 Credits. H
This course investigates representations of the Italian mafia in Italian and American cinema since the 1960s, placing emphasis on conventions of the gangster genre and its evolution. We will examine films in relation to their socio-historical contexts and special attention will be dedicated to Italian films that deglamorize the Italian mafia and champion the anti-mafia struggle. Taught in English. (Same as ITAL 331.)

FMS 345. New Media and Society. 3 Credits. H
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in research-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key research skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level.

FMS 350. Indigenous Film and Media. 3 Credits. H
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum—including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 750 or ISP 755. (Same as ISP 355.)

FMS 355. Storytelling with Digital Media. 3 Credits. HL H
In this course, students will utilize digital tools and platforms to create online and mobile stories based on the theories and histories of interactive storytelling discussed in class. Through a survey of digital storytelling examples and concepts, students will create interactive projects to add to their portfolio and learn how to think critically and write analytically about digital media.

FMS 373. Intermediate Screenwriting. 3 Credits. H
Emphasis on writing a full-length screenplay. Explores genre, character, dialogue, and the development of a personal writing style. Prerequisite: FMS 273 (students will be selected based on writing samples).

FMS 374. Animation. 3 Credits. H
A survey that combines animation history, theory, and production by examining animated works of all kinds and exploring various styles utilizing both hands-on techniques and digital animation programs. Lecture-laboratory.

FMS 375. Intermediate Video Production. 3 Credits. H
Theory and practice of longer-form video production with emphasis on scripting, talent coordination and editing in preproduction, production and postproduction. Lecture-laboratory. Prerequisite: FMS 275.

FMS 376. Cinematography. 3 Credits. H
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. Prerequisite: FMS 275.

FMS 377. Post-Production. 3 Credits. H
Students become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: FMS 275.

FMS 380. American Popular Culture of: ______. 3 Credits. HL H
An interdisciplinary examination of popular cultural forms and their relationships with the social, political and economic dynamics of America, with emphasis on film, media, music, literature (including magazines and newspapers) and the graphic arts. The decade or other specific topic to be studied changes as needs and resources develop. May be repeated for credit for different decades or topics.

FMS 410. US Diversity in Visual Culture. 3 Credits. H
This course examines the way in which diversity in the United States, including race, class, gender, and sexuality, are represented through visual culture, historically and in the present. The study of visual culture analyzes the way in which visual images communicate systems of beliefs, contribute to identity formation, and have an influence on our thinking about diversity. Course looks at United States visual objects (i.e., film, television, photography, art, advertisements, and theatre as well as visual practices, i.e., in public and private spaces.

FMS 425. Ethics in Storytelling. 3 Credits. H
This course considers the ethics of telling stories with film and media. Using a framework of rhetorical criticism and postmodern ethics, the students will evaluate the ethical and social responsibility challenges of fiction and non-fiction writing, films, television and online projects from a variety of fields: anthropology, sociology, journalism, political rhetoric and documentary filmmaking. Through readings, case studies and application, students will explore the fundamentals of rhetorical ethics, and the questions raised my new and emerging forms of storytelling.

FMS 474. Videogame Theory and Design. 3 Credits. H
This course surveys the history and aesthetics of videogames and then provides a deep dive into the theory, design principles and techniques of game development on the Unity platform. Through assignments geared toward critical design, students gain the skills necessary for game-building in the areas of visual, narrative, game, level and sound design that comprise a typical development team. Although no prior coding experience is necessary, students may benefit from prior knowledge of C#, 3D modeling, or animation.

FMS 475. Advanced Video Production. 3 Credits. H
Special projects in video production, using both studio and remote locations. Prerequisite: FMS 375.

FMS 477. Sound Design. 3 Credits. H
Students will study and produce film and video work with an emphasis on sound design theory and practice. Course projects consist of several short works in response to readings and screenings, which include a survey of sound in cinema, internet and radio. Students will also become
conversant with related equipment, software and techniques. Prerequisite: FMS 275.

FMS 478. Experimental Production. 3 Credits. H
Students will produce experimental film and video projects, including installation art and performance art pieces, in both collaborative and a collaborative production modes. Practical production aspects of historical experimental works will be studied, with emphasis on creation of works inspired by these earlier artists and their work. Unorthodox video and film production concepts and modes will also be studied and used in the creation of original works. The incorporation of experimental elements in the creation of mainstream works, and the creation of such projects, will also be a key area of study and experimentation. By pushing their individual creative limits, students will gain an appreciation for the experimental film and video genre, as well as an expansion of their production skills. Prerequisite: FMS 275.

FMS 479. Documentary Production. 3 Credits. H
This is a hands-on production course in which students will research, plan and produce short-form non-fiction documentaries. The class is dedicated to training young professionals in the principles, skills, techniques, habits and practices of documentary production. We will focus also on the aesthetics of our craft and the documentary form. The objective is to ground students in the fundamental skills of good non-fiction storytelling-conceptualization, research, story structure, theme development, writing, producing and directing. The goal is the production of several short-form compositions (videos) where storytelling is employed to communicate a concept or idea effectively. Students will form into teams to research, develop and produce a course-long short-form documentary. Prerequisite: FMS 275.

FMS 480. Music Video Production. 3 Credits. H
This course will cover elements of the history, aesthetics, and business of music video and music video production. Students will view and discuss many different types of music videos, and will learn how to classify and critique these videos in a professional manner. Students will gain familiarity with the genres, themes, forms, and iconography of music video; an understanding of the place of music video in media culture; an exploration of the ideological, cultural, and historical contexts of music video; and an ability to create or assist in the creation of professional-quality music videos. Prerequisite: FMS 275.

FMS 498. Honors Seminar. 2-6 Credits. H
Study may be directed toward either (a) reading for integration of knowledge and insight in film and media, or (b) original research (i.e., investigation of a specific problem in film and media). Six hours maximum credit. Prerequisite: Consent of Departmental Honors Coordinator.

FMS 499. Directed Study in Film. 1-6 Credits. H
Investigation of a special topic or project selected by the student with advice, approval, and supervision by an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. A maximum of six hours credit may be counted toward a degree. Prerequisite: At least seven hours credit in the department and consent of instructor.

FMS 530. Film and Media Theory. 3 Credits. H
Comprehensive examination of most significant theories and theorists of film. Organized around specific questions, e.g., what qualities make film art unique, and how is film related to other visual and literary arts? Class discussion, individual projects. Prerequisite: FMS 100 or equivalent (determined by instructor).

FMS 543. Contemporary Japanese Film. 3 Credits. NW H
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 543.) Prerequisite: Junior status.

FMS 544. African Film. 3 Credits. W
A critical study of Africa and its peoples as depicted in films. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films are examined. (Same as AAAS 555.)

FMS 585. Capstone in Film and Media Studies. 4 Credits. H
This course integrates the knowledge and skills acquired across the curriculum of Film & Media Studies including academic studies, but also production and other related disciplines to enable the student to demonstrate achievement through the production of a major creative research project. Prerequisite: Must be admitted to the Film and Media Studies B.A. or B.G.S. degree. Must have completed one FMS production course.

FMS 592. Documentary Film and Video. 3 Credits. H
An historical and theoretical survey of that major genre of film and video typically termed “documentary.” The course will trace the main historical developments from documentary’s beginnings through contemporary innovations. Prerequisite: FMS 100 and FMS 310, FMS 311, or consent of instructor.

FMS 593. Experimental Film and Video. 3 Credits. H
A history of experimental film and video through an examination of major artists, movements, theories, and films/tapes. Prerequisite: FMS 100 and FMS 310, or consent of instructor.

FMS 620. International Women Filmmakers. 3 Credits. H
This course examines films made by women around the world. Mainstream and independent fiction, documentary, and experimental works will be screened and discussed. The objectives of the course are: 1) to learn the variety of films made by women and the conditions of their production, distribution and reception. 2) to interrogate the idea of women’s cinema as ‘counter-cinema’. We will acquire tools for analyzing films in terms of economic, aesthetic, cultural, and political circumstance by women of different countries, classes, races, ethnicities, genders, and sexual preferences.

FMS 673. Problems in Basic Screenwriting. 3 Credits. U
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structure of a full-length, three-act screenplay. In addition to the class sessions taught with FMS 273 Basic Screenwriting, separate consultations and specific research assignments for graduate students in FMS 673 are also required.

FMS 675. Problems in Basic Video Production. 3 Credits. U
Theory and practice of single-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. In addition to the class sessions taught with FMS 275 Basic Video Production, separate consultations and specific research assignments for graduate students in FMS 675 are also required. Lecture-laboratory.

FMS 702. Graduate Seminar in: ______. 1-3 Credits.
Course organized any given semester to study particular subject matter or to take advantage of special competency by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

FMS 704. Study Abroad Topics in: ______. 1-6 Credits.
This course is designed for the study of special topics in Film. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

FMS 707. Film/Media Internship. 3-12 Credits.
Study with an approved film or media company. Emphasis may be in one or all of the following areas: acting, directing, or promotion management. No more than six hours may be applied to an M.A. degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

FMS 715. Survey of Japanese Film. 3 Credits.
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth century Japanese film. Through secondary readings, lectures, and discussions students will examine how Japanese cinema, as an institution, responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 715.)

FMS 716. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Credits.
This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression during dictatorship, globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity, immigration and identity in contemporary cinema. In addition to the lecture sessions taught in tandem with FMS 316, additional research component, lecture presentation, and class meeting are also required.

FMS 718. Anti-war Films. 3 Credits.
An overview and exploration of the history of the portrayal of anti-war film and media themes to show how anti-war attitudes and political policy can be affected by positive and negative depictions of conflict. Analysis of selected films. FMS 318 and FMS 718 will meet concurrently, though separate consultations and specific research assignments for FMS 718 are also required.

FMS 722. Soviet and Post-Soviet Russian Cinema. 3 Credits.
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. Not open to students with credit in SLAV 322/FMS 322. (Same as SLAV 723.) Prerequisite: Graduate standing or instructor permission.

FMS 743. Contemporary Japanese Film. 3 Credits.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 743.)

FMS 745. New Media and Society. 3 Credits.
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in production-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key digital skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level.

FMS 750. Indigenous Film and Media. 3 Credits.
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum-including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 350 or ISP 355. (Same as EALC 750.)

FMS 773. Problems in Intermediate Screenwriting. 3 Credits.
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structuring of a full-length, three act screenplay. In addition to the class sessions taught with FMS 373 Intermediate Screenwriting, separate consultations and specific research assignments for graduate students in FMS 773 are also required.

FMS 775. Problems in Intermediate Video Production. 3 Credits.
Theory and practice of multiple-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation, and audio. In addition to the class sessions taught with FMS 375 Intermediate Video Production, separate consultations and specific research assignments for graduate students in FMS 775 are also required. Lecture-laboratory.

FMS 776. Problems in Cinematography. 3 Credits.
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. FMS 776 meets concurrently with FMS 376; students enrolled in the graduate-level course will have separate consultations and specific research assignments. Lecture-laboratory. Prerequisite: Consent of instructor and FMS 675.

FMS 777. Post-Production. 3 Credits.
Students will become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: Consent of instructor.

FMS 800. Introduction to Graduate Study in Film/Media. 3 Credits.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in film and television. The course should be taken at the beginning of the graduate student's program.

FMS 801. Professional Development Seminar. 1 Credits.
Preparation and training for faculty careers in film and related fields, including research skills and methods, responsible scholarship, teaching, and service. Other topics vary from semester to semester. May be repeated for credit.
FMS 811. Development of the American Sound Film. 3 Credits.
Intensive study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television.

FMS 813. Development of the International Sound Film. 3 Credits.
Intensive study of the artistic, economic, and sociological development of the international sound film with emphasis on the cinemas of England, France, Italy, Germany, Sweden, and Eastern Europe.

FMS 814. Development of African-American Images in Film. 3 Credits.
A history and critical assessment of the development of diverse images of African-Americans in American cinema and the impact of those images of African society. Screenings of feature and independent films, including those by African-Americans. In addition to the lecture/screening sessions taught in tandem with FMS 314, a separate discussion section and specific research assignments for graduate students enrolled in FMS 814 are also required.

FMS 862. Survey of Film and Media History. 3 Credits.
This seminar will be primarily international in scope and will concentrate on the following: technological and production issues relating to the transition in 1927-1931 of silent to sound film; the constructions of national identity, including those of recently emerging cultures; a comparison and contrast of the censorial agencies in America and abroad; and current revisionist perspectives on received film and media history.

FMS 863. Survey of Documentary and Experimental Film and Media. 3 Credits.
Surveys the important historical and theoretical issues pertinent to both the documentary and experimental approaches as expressed in film, video and new technologies. Includes major documentary and experimental genres, directors, national schools, artistic movements, and landmark works. Screenings reflect a chronology from origins to present-day.

FMS 865. Film and Media Theory. 3 Credits.
This seminar is a comprehensive survey of the major classical and contemporary film and media theories and theorists, such as Munsterberg, Eisenstein, Bazin, and Adorno. The course includes film and media theory since the 1970s, moving through structuralism and into the post-structuralism, modernism, postmodernism, and beyond. Within these broad paradigms some of the theories examined in depth are cinesemiotics, Marxism, cinematic apparatus, feminist film theory, reception theory, new media and virtual reality.

FMS 875. Problems in Advanced Video Production. 3 Credits.
Special projects in video production, using both studio and remote locations. In addition to the class sessions taught with FMS 475 Advanced Video Production, separate consultations and specific research assignments for graduate students in FMS 875 are also required. Prerequisite: FMS 775 or consent of instructor.

FMS 880. Development of American Popular Culture in the: 3 Credits.
Intensive interdisciplinary examination of popular culture forms and their relationships with the social, political, and economic dynamics of America in a specific decade, with emphasis on film, broadcasting, theatre, music literature (including magazines and newspapers), and the graphic arts. Decade to be studied changes as resources and needs develop.

FMS 888. Special Problems in Film History and Criticism. 1-4 Credits.

FMS 895. Intensive Film Project Seminar. 1-4 Credits.

The student plans and executes an intensive special project which requires the professional skills of investigation and performance appropriate to radio, television and/or film. May be repeated for credit up to a maximum of six credit hours. (This seminar is to the special project program what "thesis" is to the traditional program.)

FMS 897. Practicum in Film. 1-3 Credits.
Various approaches to the illustration of principles of production in film and/or video through the supervision of laboratory exercises and subsequent evaluation by the Theatre and Film graduate faculty.

FMS 898. Investigation and Conference (for Master's Students). 1-8 Credits.
Directed research and experimentation in film or media. Limited to eight hours credit toward the Master's degree.

FMS 899. Master's Thesis. 1-6 Credits.
FMS 902. Film Seminar in: 3 Credits.
A graduate seminar devoted to selected historical, theoretical, or critical issues. Prerequisite: Consent of instructor.

FMS 998. Investigation and Conference (for Doctoral Students). 1-8 Credits.

FMS 999. Doctoral Dissertation. 1-12 Credits.

Theatre and Dance Courses

DANC 100. Introduction to the Dance Major. 1 Credits. H
This is a 6 week online course designed to identify what is unique about the KU Dance experience, and to introduce students to the requirements for a BA or BFA degree. The course examines issues of academic integrity, informs students about academic support available to them, familiarizes students with the expectations of a dance major and suggests career opportunities for dance majors. Students complete five modules: Getting Started, Programs and Degrees, Academic Integrity and Support, Expectations and Career Pathways to provide a foundation for academic success in the major.

DANC 101. Ballet I. 2 Credits.
Classical and modern approaches to the language of ballet for beginners. May be repeated for credit. Does not count toward the dance major requirements.

DANC 103. Modern Contemporary I. 2 Credits.
Dance technique for beginners with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphreys, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for credit. Does not count toward the dance major requirements.

DANC 105. Jazz I. 2 Credits.
Dance technique for beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Does not count toward the dance major requirements.

DANC 150. Choreography I. 2 Credits. H
The introductory-level course in a series of four composition courses (DANC 150, 250, 350 and 550). Includes basic exploration of improvisation: movement studies for solo figure, movement themes for duet, trio, and larger groups; and dances for non-traditional performing spaces both indoors and outdoors. Students will learn fundamental ingredients of dance (space, time, weight, and energy flow) and how to organize them into short compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: Consent of instructor.

DANC 177. First Year Seminar: 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Dance. Course is designed to meet the critical
thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

DANC 210. Rhythms and Structures of Music. 3 Credits. H
An introduction to the analysis and use of rhythms and the compositional forms of music for dance.

DANC 211. Ballet II. 2 Credits.
Classical and modern approaches to ballet technique for low intermediate dancers. May be repeated for credit. Counts toward the B.A. in Dance and Dance Minor requirements. Prerequisite: DANC 101 or consent of instructor.

DANC 213. Modern Contemporary II. 2 Credits.
Dance technique for low intermediate dancers with precedents in the movement vocabularies of classical modernists and contemporary choreographers of dance. May be repeated for credit. Counts toward the B.A. and the Minor in dance requirements. Prerequisite: DANC 103 or permission of instructor.

DANC 215. Jazz II. 2 Credits.
Dance technique for experienced beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Counts toward the B.A. and Minor in dance requirements. Prerequisite: DANC 105 or consent of instructor.

DANC 250. Choreography II. 2 Credits. H
The intermediate course in a series of four composition courses (DANC 150, DANC 250, DANC 350 and DANC 550.) Includes more complex exploration of improvisation; movement studies for solo figure, movement themes for duet, trio, and larger groups; and dances for non-traditional performing spaces both indoors and outdoors. Students will further develop the ingredients of dance (space, time, weight, and energy flow) and how to organize them into studies including compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: DANC 150 or consent of instructor.

DANC 260. Musical Theatre Dance. 3 Credits.
This course focuses on the dance and movement vocabulary uniquely associated with musical theatre productions, as well as a variety of popular dance styles from the 1920s to the present. Performance techniques for the stage are emphasized.

DANC 290. Sophomore Review. 0 Credits. H
The Sophomore Review of all majors in the BA program in Dance provides an assessment of student progress in the degree. Transfer students to the BA program participate in the year following their admission to KU. The review process consists of: verification that students are making academic progress; Students should have an overall GPA of 2.0; a self-evaluation composed of written responses to a series of questions about their own artistic, technical and discipline-specific academic progress in the program; a faculty evaluation comprised of written feedback on each student's artistic, technical and discipline-specific academic progress in the program; and participation in at least one speedback session prior to the end of the second year. Speedback is a feedback process modeled on the speed dating format. All majors sit with faculty members for 5-minute intervals to receive individual feedback. Students engage with professors with whom they have been in technique class or rehearsal for the current year. There are no prerequisites for entry into the course. The completion of the course will be a prerequisite for enrollment in DANC 550 Senior Project.

DANC 307. Pointe and Pas de Deux. 2 Credits.
An introduction to pointe and classical partnering work for the intermediate/advanced female ballet dancer, with equal emphasis on pointe technique and style, and on classical repertory for couples. May be repeated for credit. Prerequisite: Consent of instructor.

DANC 308. Pas de Deux. 1 Credits.
The exploration of classical ballet partnering (pas de deux) including supported poses, lifts, turns, and their coordination between the partners. For men only. Women enroll in Pointe and Pas Deux, DANC 307. May be repeated for credit. Prerequisite: Consent of instructor.

DANC 311. Ballet III. 3 Credits. H
Advanced level technique in classical and modern approaches to the language of ballet. May be repeated for credit. Prerequisite: Instructor consent.

DANC 313. Modern/Contemporary III. 3 Credits. H
Dance technique for intermediate/advanced dancers with precedents in the movement vocabularies of classical modernists and contemporary choreographers of dance. May be repeated for credit. Counts toward the B.A., B.F.A., and the Minor in dance requirements. Prerequisite: Consent of instructor.

DANC 315. Jazz III. 3 Credits. H
Dance technique for intermediate dancers based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for variable credit. Prerequisite: DANC 105 or consent of instructor.

DANC 317. Hip Hop Fundamentals. 3 Credits.
Basic fundamentals of hip-hop dance. Students will learn basic steps for choreography and freestyle based on all urban street styles. They will learn the origins and history of the hip hop movement and all urban street styles through lectures and class participation.

DANC 319. Tap Fundamentals. 3 Credits. SC H
Introduces the principles of tap dance including rhythm, clarity of sound, syncopation and weight shift. Emphasis is placed on proper execution of basic tap technique, step knowledge, weight distribution, and the development of basic rhythm and syncopation skills. The course will be based on "stomp tap" and "rhythm tap". working with/without the music to make clear patterned sounds.

DANC 320. University Dance Company. 0-1 Credits.
A dance repertory, performance and production class. Emphasis is on the development of skills for performing and/or producing dance concerts. Admission by audition only. May be repeated for credit.

DANC 330. Approaches to World Dance. 3 Credits. HL H
This course examines dance forms from throughout the world and how they relate to the times and cultures in which they evolved. Dance forms such as African, East Indian classical, European court dance, ballet, modern, and jazz will be studied through readings, master classes, live performances, videotapes, and films. Prerequisite: 200-level English course.

DANC 334. Introduction to African Dance Theatre. 2 Credits. NW U
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as AAAS 334 and THR 334.)

DANC 350. Choreography III. 3 Credits. H
The advanced course in a series of four composition courses (DANC 150, DANC 250, DANC 350 and DANC 550.) Includes in-depth development of improvisation: movement studies for solo figure, movement themes for duet, trio, and larger groups; and dances for non-traditional performing spaces both indoors and outdoors. Students will develop increasingly complex studies of dance (space, time, weight, and energy flow) including...
compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: DANC 250 or consent of instructor.

DANC 375. Anatomy and Injury Prevention. 3 Credits. H Basic concepts of neuromuscular and skeletal education through the use of specific imagery (ideokinesis). Based on the work of Mabel Todd, Lulu Sweigard, and Irmgard Barteneiff, the emphasis is on body connectedness and dynamic alignment. The aim is to realize full movement potential in the most efficient way through intrinsic body awareness. Injury prevention is addressed by introducing principles of conditioning (strength, flexibility, endurance) and factors leading to injury such as muscular imbalances or postural deviations.

DANC 411. Ballet IV. 3 Credits. H Advanced level technique in classical and modern approaches to the language of ballet. Prerequisite: Consent of instructor.

DANC 413. Modern Contemporary IV. 3 Credits. H Dance technique for advanced dancers with precedents in the movement vocabularies of classical modernists and contemporary choreographers of dance. May be repeated for credit. Counts toward the B.A., B.F.A., and the Minor in dance requirements. Prerequisite: Consent of instructor.

DANC 417. Hip Hop II. 3 Credits. SC H Intermediate/advanced hip hop dance. Students will learn intermediate/advanced hip hop skills, combinations, and choreography. Greater focus will be placed on intermediate/advanced steps, isolations, and body control. Prerequisite: Hip Hop Fundamentals or permission of instructor.

DANC 419. Tap II. 3 Credits. SC H Intermediate/advanced tap dance. A continuation of the principles introduced in Tap Fundamentals including rhythm, clarity of sound, syncopation and weight shift. Proper execution of intermediate/advanced tap technique including step knowledge, weight distribution, and the development of rhythm and syncopation skills is emphasized. Prerequisite: Tap Fundamentals or permission of instructor.

DANC 420. Introduction to Videography and Website Design for Dance. 3 Credits. H This is a hands-on course exploring digital video technology for dance. Students are introduced to video and website production as well as the time management skills necessary to engage the multi-faceted project that is dance video. We will cover video techniques for recording dance; video editing; collaborating with national and international sites and artists; and self-promotion and marketing strategies with video and websites. The final project will be the creation of a video website for each student. No previous video editing experience is required. Prerequisite: Basic computer literacy.

DANC 440. Introduction to Classical East Indian Dance. 3 Credits. W Classical East Indian dance has an extensive movement vocabulary that emphasizes the coordination of rhythmic foot patterns with intricate hand gestures. Students will learn the mudras (hand gestures) and their significance and integration within each dance. Readings will include excerpts from the Natya Sastra and other treatises of East Indian dance and culture.

DANC 460. Dance History: Research and Reconstruction. 3 Credits. HL H Through research and reconstruction, students will examine major topics in dance history, such as the meaning and function of dance in pre-industrial societies, communal and court dance in Europe from the 14th to the 19th centuries, and the transformation and development of dance as a theatre art in the modern world. Texts by dance historians and treatises by dancing masters will be supplemented by readings from fields, such as anthropology, philosophy, art history, and literature, that indicate the different ways of approaching the history of dance.

DANC 475. Career Preparation in the Arts. 3 Credits. H Designed to provide an overview of key areas in career preparation in the arts, including resume writing, audition skills, professional speaking, grant writing and development, publicity and marketing strategies, developing relationships with presenters and funders, and audience education. Through readings, class discussion, guest lectures with professionals, and projects based on real-life scenarios, students develop tools to further their careers in the arts. This focused study also provides individuals with the direction and means to employ their training in the field of performing arts administration and management at many different levels. This course prepares students for their entry into the professional arts marketplace.

DANC 490. Introduction to Flamenco Dance Technique. 3 Credits. Using the basic compas (rhythmic structures) of Flamenco, we will explore the different components of flamenco dance technique: floreo (spiralizing fingers), brazeo (arm movements), palmas (rhythmic hand-clapping), marajeo (marking, or movement through space), vuetlas (turns) and zapateada (footwork). We will cultivate an awareness of flamenco's unique posture, learn the structure of the different rhythmic forms and introduce the possibilities for personal expression and improvisation.

DANC 498. Directed Study in: ____. 1-3 Credits. Investigation of a special topic or project in aesthetics, dance history, movement analysis, production, or a creative project. A maximum of six hours may be counted toward graduation. Prerequisite: At least seven hours of credit in dance courses.

DANC 520. Pedagogy. 3 Credits. H Methods and materials designed to address the needs of teaching artists across genres of dance (ballet, modern/contemporary, jazz, creative movement) among children, adults and special populations. Lessons are prepared and tested in the classroom among peers. Prerequisite: Consent of Instructor.

DANC 530. Practicum in: ____. 1 Credits. Supervised experience in teaching beginning level dance technique in the styles of ballet, jazz, or modern dance. Different approaches are analyzed, discussed, and tested in the studio. Prerequisite: Intermediate level of dance technique in the style of the practicum.

DANC 540. Field Experience in Dance Teaching. 3 Credits. Teaching ballet, modern, or jazz dance technique to children or adults with faculty supervision in an academic or community program. Prerequisite: Consent of Instructor.

DANC 550. Senior Project. 3 Credits. In-depth research project in dance theory or history, or choreography project involving the complete development and presentation of a dance idea. Prerequisite: Performance option: DANC 320, DANC 350, DANC 290 (for BA students only) and permission of the dance division. Research option: DANC 340, DANC 370, DANC 375, DANC 460, DANC 462, DANC 290 (for BA students only) and permission of the dance division.

DANC 580. Special Topics in Dance: ____. 3 Credits. A study of current developments in dance with an emphasis on performance or research. May be repeated for credit. Prerequisite: Junior or senior standing or consent of instructor.

DANC 898. Directed Study in: ____. 1-3 Credits. Directed study in some aspect of aesthetics, dance history, movement analysis, production, or an advanced creative project. Prerequisite: Consent of instructor.
Theatre and Dance Courses

THR 100. Introduction to the Theatre. 3 Credits. HL H
Designed to help students by means of experience with theatre as well as study about it to achieve an understanding of its cultural role in contemporary society, to develop a sensitive and informed appreciation of its art, and to make it an integral part of their cultural lives. Lectures, discussion groups, special interest groups, theatre attendance.

THR 101. Theatre Practicum I. 1 Credits. H
One crew assignment in a University Theatre & Dance production qualifies for 1 credit hour. May be repeated for credit.

THR 105. Improvisation. 3 Credits. H
Designed to free the beginning actor, develop creativity and imagination. Fundamentals of improvisation technique and skills through physical work, deep listening and focus. Ensemble building emphasized with exercises and games, the work will progress to sketch writing and performance.

THR 106. Acting I. 3 Credits. HL H
Fundamental techniques in acting. Practice in character creation, body language, and effective stage speech.

THR 111. Make-Up. 1 Credits. H
The techniques in application of make-up for specific characterizations, both straight and character. Study of the structure of the face and hands for stage make-up. Should be taken concurrently with THR 106, if possible.

THR 116. Scenographic Techniques. 3 Credits. H
Emphasis on drafting, model building, and presentational techniques for the theatrical designer or art director. Some work in computer drafting for the designer-technician. Lecture and laboratory periods.

THR 120. Public Speaking as Performance. 3 Credits. H
This course offers a unique approach to public speaking grounded in theatre practice and performance studies. A combination of speech assignments and theatre exercises teaches students to integrate body and mind while speaking across social, cultural, and disciplinary boundaries.

THR 177. First Year Seminar: ______. 3 Credits. HT
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in Theatre. May not contribute to major requirements in theatre. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

THR 201. Theatre Practicum II. 1 Credits. H
One crew assignment in a University Theatre & Dance production qualifies for 1 credit hour. May be repeated for credit. Prerequisite: THR 101.

THR 204. Study Abroad Topics in: ______. 1-6 Credits. H
This course is designed for the study of special topics in Theatre at the freshman/sophomore level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

THR 206. Acting II. 3 Credits. H
The study of roles and scenes from plays. Practice in character analysis, creation of roles, rehearsal of scenes, and ensemble work. Prerequisite: THR 106.

THR 210. Musical Performance for the Actor I. 3 Credits. H
Beginning Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance.

THR 212. Beginning Voice and Speech for Actors. 3 Credits. H
A foundation course; introduction to phonetics; training in Standard American Stage Speech; articulation skills; resonance and voice placement.

THR 213. Movement I: The Acting Instrument. 3 Credits. H
A foundational course in discovering ease and efficient use of the body in a performance context, developing non-verbal communication and partnering skills, and establishing the connection of movement to voice production. Trains actors in proper warm-up technique, alignment and balance, physical safety, and basic tumbling skills.

THR 215. Approaching Design. 3 Credits. HL H
Conceptualization and visualization of the elements involved in creative design for theatre, dance, television, and film.

THR 216. Scenic Production. 2 Credits. H
Introduction to the planning, construction, and mounting of scenery for theatre, television, and film. Concentration on the technical organization of scenic production. Lecture, discussion, and laboratory periods.

THR 220. Costume Production. 2 Credits. H
Introduction to techniques of costume construction, including study of fabrics, color, fundamentals of pattern making, and draping of costumes for theatre, television, and film. Concentration on the technical organization of costume production. Lecture, discussion, and laboratory periods.

THR 224. Lighting Production. 2 Credits. H
Introduction to the planning and execution of lighting for theatre, television, and film. Concentration organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

THR 301. Theatre Practicum III. 1 Credits. H
One crew assignment in a University Theatre & Dance production qualifies for 1 credit hour. May be repeated for credit. Prerequisite: THR 201.

THR 302. Undergraduate Seminar in: ______. 3 Credits. H
Course organized any given semester to study a particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

THR 304. Study Abroad Topics in: ______. 1-6 Credits. H
This course is designed for the study of special topics in Theatre at the junior/senior level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

THR 306. Acting III. 3 Credits. H
Advanced projects in acting. Character and scene analysis, scoring the role, rehearsal, and performance. Prerequisite: THR 206.

THR 307. Undergraduate Theatre Internship. 1-3 Credits. H
Supervised study with an approved theater company or project. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Prerequisite: Consent of instructor and at least seven hours credit in the department.

THR 308. Script Analysis. 3 Credits. H
This course provides knowledge and methods enabling students to conduct in-depth study of dramatic scripts. Emphasis is given to the analysis skills appropriate to practitioners of stage and screen arts.

THR 310. Musical Performance for the Actor II. 3 Credits. H
THR 313. Movement II: Physical Characterization. 3 Credits. H
The study of diverse physical acting techniques, and an investigation into creating a character through manipulation of the acting instrument. Actor training in performance neutrality, mask work, age, and gender distinctions. Prerequisite: THR 213 and permission of instructor.

THR 316. Beginning Scene Design. 3 Credits. H
Study of scenic design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor.

THR 320. Beginning Costume Design. 3 Credits. H
Study of the costume design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 215.

THR 324. Beginning Lighting Design. 3 Credits. H
Study of the lighting design process with beginning problems in textual analysis, style, historical research, with preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor.

THR 326. African Theatre and Drama. 3 Credits. NW H/W
A study of the origin and development of continental African theatre and its affinity to the Levant. Traditional, colonial and contemporary dramatic theories and experiments will be examined in play selections. (Same as AAAS 355.)

THR 327. African-American Theatre and Drama. 3 Credits. H
A historical study of Black Theatre in the U.S.A. from its African genesis to its contemporary Americanness. Epochs in African-American dramaturgy will be critically examined. (Same as AAAS 356.)

THR 334. Introduction to African Dance Theatre. 2 Credits. NW U
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as AAAS 334 and DANC 334.)

THR 345. Theatre and Genocide. 3 Credits. H
This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in JWSH 645 or THR 645. (Same as JWSH 345.)

THR 380. Popular Culture: ______. 3 Credits. HL H
Interdisciplinary examination of popular culture oriented around a specific genre or theme. Objects of study may include popular forms of live performance such as musicals or vaudeville, as well as media-based performances (radio, television, film, internet). Specific topic to be studied changes as needs and resources develop. May be repeated for credit for different topics.

THR 401. Stage Management and Assistant Direction. 1 Credits. H
Majors are assigned to stage manage or assistant direct a University Theatre production, or to take related workshops in stage management or assistant directing. May be repeated for credit

THR 406. Audition Techniques. 3 Credits. H
This course prepares students for all types of audition experiences. It includes study in techniques of prepared auditions, cold readings, interviews, and the musical audition for actors. Emphasis is placed upon developing resumes and photo portfolios as well as concentrated study in professional contracts, unions, and agent acquisition. Prerequisite: THR 206.

THR 407. Advanced Acting Special Topic: ______. 3 Credits.
This course is designed for the study of special topics in performance techniques involving advanced skills for the actor at the junior/senior level. Specific topic to be studied changes as needs and resources develop. May be repeated for credit for different topics. Prerequisite: THR 306. Theatre major or minor students.

THR 410. Musical Performance for the Actor III. 3 Credits. H
Advanced Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance. Prerequisite: THR 106, THR 210, and THR 310.

THR 413. Stage Combat Skills. 3 Credits. U
Study of the illusion of violence in a dramatic context and the special skills necessary for creating believable and safe stage fights. Actor training in armed and unarmed combat, including one or more of the following: rapier and dagger, broadsword, and quarter staff. Prerequisite: THR 313 and permission of instructor.

THR 429. Postcolonial Theatre and Drama. 3 Credits. NW H
The course develops an understanding of the postcolonial concept and its different manifestations in theatre and drama across nations and cultures. It approaches postcolonialism as a way of reading theatre, and as a genre within theatre by exploring how the "colonial project" has reconfigured the concept, content, and context of theatre in both colonized and colonizing cultures. In addition to the study of postcolonial playwrights and their works, the course is also an introduction to postcolonial theory and its critics. (Same as AAAS 429.)

THR 498. Honors Directed Study in Theatre. 3 Credits. H
Individual creation of an original product that integrates theatre knowledge and skills. Selected in advance with advice, approval, and supervision by an instructor. Prerequisite: Consent of instructor, senior level status, and 3.5 GPA in Theatre and 3.25 GPA overall at the time of enrollment.

THR 499. Directed Study in Theatre. 3 Credits. H
Individual creation of an original product that integrates theatre knowledge and skills. Selected in advance with advice, approval, and supervision by an instructor. Prerequisite: Consent of instructor and junior or senior level status.

THR 506. Acting for the Camera. 3 Credits. H
A study of acting techniques appropriate to the requirements of the camera. Emphasis is placed on developing audition skills necessary to compete for roles in dramatic features, corporate videos, and commercials. Actors acquire skills essential to the transition from stage to camera. Prerequisite: Permission of instructor.

THR 508. Fundamentals of Directing. 3 Credits. H
Offered as an initial approach to play directing, this course introduces students to practical and theoretical aspects of the craft of stage directing. Prerequisite: THR 308.

THR 512. A Vocal Approach to the Classics. 3 Credits. H
This is an advanced voice and speech course for actors aiming to further increase their command over tone, rhythm, pacing, and diction. Their
range and power will be extended. Through discovery of the demands of a variety of classical texts, the actor will be challenged both in verse and in prose to develop the skills necessary to fully interpret that material. Prerequisite: THR 212.

**THR 516. Scenic Painting Techniques. 3 Credits. H**
Study of painting equipment, tools, pigments, binders, and vehicles, and their relationship to the surfaces to be painted. Instruction in basic painting techniques. Prerequisite: THR 116 and THR 215.

**THR 517. Computer-Aided Design. 3 Credits. U**
Study of new media in theatre and film/video production, primarily computer technologies and methods for the theatrical designer or art director. Emphasis on computer 3-D modeling and color rendering. Prerequisite: THR 116, THR 215, or permission of instructor.

**THR 518. Scenography and the Classic Script. 3 Credits. H**
Holistic production design, including lighting, scenery, and costumes, for classic theatre scripts. Contrasts historical styles of production with styles for contemporary spaces and audiences. Projects tailored to the needs and level of the students. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in THR 720. Prerequisite: Consent of instructor.

**THR 520. History of Period Style I. 3 Credits. H**
A survey of Western style from ancient Egypt to the Restoration. Focus is placed on developing a comprehensive understanding of the stylistic relationships between art, architecture, clothing, decor, manners, and social and political history. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor.

**THR 521. History of Period Style II. 3 Credits. H**
Continuation of THR 520, from the Restoration to the present day. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor.

**THR 525. History of Theatre. 3 Credits. H**
Study of developments in world theatre and drama from the ancient world to the eighteenth century. Prerequisite: THR 308.

**THR 526. History of Theatre II. 3 Credits. H**
Study of developments in world theatre and drama since the eighteenth century. Prerequisite: THR 308.

**THR 528. History of U.S. Theatre and Drama. 3 Credits. H**
Historical approach to the development of theatre and performing arts in the United States. Prerequisite: THR 308.

**THR 560. Collaborative Production. 3 Credits. H**
Seniors collaborate as a theatre company to create an original production that integrates several of the following areas: improvisation, playwriting, acting, directing, dramaturgy, design, technical production, and stage management. Collaboration of group project approved in advance with advice, approval, and supervision by at least one instructor. Prerequisite: Senior level and consent of at least one instructor.

**THR 599. Special Topics in Scenography. 1-6 Credits. U**
Individual studio activity. Course content to be determined by the student under the supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor.

**THR 603. Theatre for Young Audiences. 3 Credits. U**
A survey of theories, history, literature, criticism, production methods, and audience research about theatre performed by adults for children and adolescents. Emphasis is on child development and community outreach. Prerequisite: THR 308 or consent of instructor.

**THR 617. Computer-Aided Design II. 3 Credits. U**
Continuation of THR 517. Emphasis on computer-generated images as scenic media in production situations. Prerequisite: THR 517, or permission of instructor.

**THR 618. Scenography and the Musical Theatre. 3 Credits. H**
Holistic production design, including lighting, scenery, and costumes, for musical theatre, opera, and dance. Examines development and changes in design styles in the evolution of musical theatre, opera, and dance and the special requirements of these forms. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 820. Prerequisite: Consent of instructor.

**THR 619. Scenography and the Contemporary Script. 3 Credits. H**
Holistic production design, including lighting, scenery, and costumes, for contemporary scripts. Examines contemporary episodic scripts written for the stage that are based on a filmic structure, the special problems of these kinds of scripts, and the respective problems of designing for theatre and film. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 821. Prerequisite: Consent of instructor.

**THR 620. Scenography and the Experimental Production. 3 Credits. H**
Holistic production design, including lighting, scenery, and costumes, for experimental scripts/scenarios. Examines experimental approaches to a variety of script/scenarios, including mixed-media production. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 822. Prerequisite: Consent of instructor.

**THR 626. Myth and the Dramatist. 3 Credits. U**
This seminar critically explores myths in dramatic literature from ancient times to contemporary times, using select authors from different cultures. Analysis of the works will be based on both conventional and post-structuralist theories and specific emphasis will be on myths that have been adapted cross-culturally and/or in different time perspectives.

**THR 645. Theatre and Genocide. 3 Credits.**
This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to student with credit in JWSH 345 or THR 345. (Same as JWSH 645.) Prerequisite: Graduate standing or consent of instructor.

**THR 702. Graduate Seminar in: _____. 3 Credits.**
Course organized any given semester to study particular subject matter or to take advantage of special competency by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.
THR 703. Directed Readings in Theatre. 1-3 Credits.
Research reading and presentation of reports on specific subjects related to the students major area of specialization. May be repeated up to a total of six credits on petition. Required of all MFA Scenography students.

THR 704. Study Abroad Topics in: ______. 1-6 Credits.
This course is designed for the study of special topics in Theatre. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

THR 707. Theatre Internship. 3-12 Credits.
Study with an approved theatre company. Emphasis may be in one or all of the following areas: acting, directing, stage management, technical theatre, promotion management. No more than six hours may be applied to an M.A. degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

THR 710. The Art of Directing. 3 Credits.
Offered as an advanced course in play directing. Theory is combined with practical application to explore the craft of directing using a variety of styles in classic and contemporary theatre. Lecture and laboratory periods.

THR 715. Problems and Techniques of Direction. 3 Credits.
Practical experience in directing.

THR 719. M.F.A. Production Seminar. 3 Credits.
To be taken by M.F.A. candidates during those semesters in which they are assigned to design one or more elements in a production to be mounted on one of our stages. Weekly critique and discussion of solutions to practical design problems from conception through execution. May be repeated for a total of no more than six hours credit. Prerequisite: Consent of instructor.

THR 720. Scenography and the Classic Script. 3 Credits.
Holistic production design, including lighting, scenery, and costumes, for classic theatre scripts. Contrasts historical styles of production with styles for contemporary spaces and audiences. Projects tailored to the needs and level of the students. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in THR 518. Prerequisite: Consent of the instructor.

THR 721. Scenography and the Modern Script. 3 Credits.
Holistic production design, including lighting, scenery, and costumes, for modern theatre scripts. Examines modern styles of production. Projects tailored to the needs and level of the students. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in THR 519. Prerequisite: Consent of instructor.

THR 725. Russian Theatre and Drama from Stanislavski and Chekhov to the Present. 3 Credits.
A study of the development of Russian theatre and dramatic literature from 1898 to the present. Lectures and readings in English. (Same as SLAV 762.)

THR 800. Introduction to Graduate Study in Theatre. 3 Credits.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in theatre and performance studies. The course should be taken at the beginning of the graduate student's program.

THR 801. Professional Development Seminar. 1-3 Credits.
Preparation for faculty careers in theatre and related fields, including issues of research, teaching, and service. At least three hours per semester will be devoted to training in responsible scholarship. May be repeated for credit.

THR 815. Advanced Play Production. 1-3 Credits.
Individually supervised advanced directing of theatre pieces for public presentation. In special cases, credit may be given for musical direction, dramaturgy, choreography, or stage management.

THR 817. Theory of Acting and Directing. 3 Credits.
Readings, lectures, discussions and papers on acting and directing theory; is concerned with the divergence between presentational and representational acting methods and the emergence of directing art.

THR 819. Advanced M.F.A. Production Seminar. 3 Credits.
Continuation of THR 719, but production design assignments will be more complex and larger in scope. May be repeated for maximum of six hours credit. Prerequisite: Six hours of THR 719 and consent of instructor.

THR 820. Scenography and the Musical Theatre. 3 Credits.
Holistic production design, including lighting, scenery, and costumes, for musical theatre, opera, and dance. Examines developments and changes in design styles in the evolution of musical theatre, opera, and dance and the special requirements of these forms. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 618. Prerequisite: Consent of instructor.

THR 821. Scenography and the Contemporary Script. 3 Credits.
Holistic production design, including lighting, scenery, and costumes, for contemporary scripts. Examines contemporary episodic scripts written for the stage that are based on a filmic structure, the special problems of these kinds of scripts, and the respective problems of designing for theatre and film. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 619. Prerequisite: Consent of instructor.

THR 898. Investigation and Conference (for Master's Students). 1-8 Credits.
Directed research and experimentation in theatre. Limited to eight hours credit toward the Master's degree.

THR 899. Master's Thesis. 1-6 Credits.

THR 901. Theatre Seminar in: ______. 3 Credits.
A graduate seminar devoted to selected historical, theoretical, or critical issues in theatre. Prerequisite: Consent of instructor.

THR 914. Theories of Race and Performance. 3 Credits.
Theories of Race and Performance is an inter-textual graduate course that explores interdisciplinary scholarship on race and performance. It seeks to translate these theories into practical application in various visual, audio and performance texts in popular culture. The course is divided into modules aimed at gaining an understanding of the shifting meaning of race over time and its relationship to ethnicity, gender, sexuality, class, nation, and power. How do we perform our identities? How is race constructed and maintained through performance? To begin to answer these questions, we will examine the ways in which racial identities are created through performance.

THR 917. Dramatic Theory I. 3 Credits.
Advanced study in the history of critical theory relating to dramatic literature, theatre, and performance.

THR 922. Theatre Historiography. 3 Credits.
This course focuses on the advanced study of research methods, subjects, interpretative paradigms, theoretical frameworks, and philosophies of history employed in contemporary approaches to writing and teaching theatre history.

THR 998. Investigation and Conference (for Doctoral Students). 1-8 Credits.

THR 999. Doctoral Dissertation. 1-12 Credits.

Visual Art Courses

ART 101. Drawing I. 3 Credits. H
Introductory study of Drawing with emphasis on tools, techniques and observational development. Studio class includes intensive in-class exercises, lectures, images, and assignments. Students develop a formal fine arts vocabulary and gain verbal and written skills in critical analysis through individual and group critiques. Six hours scheduled studio activity and approximately six hours outside work weekly. Prerequisite: Must be a major or minor in the Department of Visual Art or receive instructor permission.

ART 102. Drawing II. 3 Credits. H
Continuation of ART 101: Drawing I. Prerequisite: ART 101 or instructor permission.

ART 103. Art Concepts and Practice. 3 Credits. H
A companion course to ART 104. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. Prerequisite: Must be a major or minor in the Department of Visual Art or receive instructor permission.

ART 104. Art Principles and Practice. 3 Credits. H
A companion course to ART 103. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. Prerequisite: Must be a major or minor in the Department of Visual Art or receive instructor permission.

ART 105. Visual Art Seminar. 1 Credits.
An introduction to campus and community resources for students interested in Visual Arts. Resources in the Department, the University and the larger community will be discussed and explored.

ART 120. Fundamentals of Painting. 3 Credits.
Open to all university students. An exploration of basic technical and expressive possibilities in painting. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 121. Fundamentals of Printmaking. 3 Credits.
Open to all university students. An exploration of basic technical and expressive possibilities in printmaking, including woodcut, etching, lithography and silk screen; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 122. Fundamentals of Sculpture. 3 Credits.
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in three-dimensional form and space, including sculpture, modeling, carving, and construction; materials include wood, stone, clay, metal; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 123. Fundamentals of Expanded Media. 3 Credits. U
Open to all university students. An exploration of basic technical and expressive possibilities in Expanded Media, including Installation, Performance, Video and other Digital technologies; may include field trips, films, and/or visiting lecturers. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 131. Fundamentals of Ceramics. 3 Credits.
Open to all university students. An introduction to ceramic techniques and conceptual development. The course will investigate historical and contemporary ceramic art, develop skills in wheel throwing, hand-building, glazing, clay-mixing, and firing. Through practice and research, students will build an integrated understanding of ceramics as a continuum of cultural expression. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 132. Fundamentals of Metalsmithing/Jewelry. 3 Credits.
Open to all university students. A comprehensive study of the field of jewelry and metalsmithing with an emphasis on the tools, processes, and techniques used in the design and fabrication of objects from metals such as aluminum, brass, copper, bronze, sterling and related materials. Studio experience will include lectures, slide presentations, demonstrations, visiting artist, and student projects. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 133. Fundamentals of Fibers. 3 Credits. U
Open to all university students. Studio exploration of fibers as an art form and means of personal expression. A variety of dyeing, construction, and surface embellishment techniques will be introduced. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

ART 300. Special Topics in Visual Art: ______. 3 Credits.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. This course is offered at the 300 and 500 levels, with ART 500 serving as a continuation of study in the topic area. Prerequisite: ART 101, ART 102, ART 103, or ART 104; or permission of instructor.

ART 375. Directed Readings in Visual Art. 1-3 Credits. U
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor.

ART 395. Study Abroad Topics in: ______. 1-6 Credits. H
This course is designed for the study of special topics in Visual Art. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to all students.

ART 500. Advanced Special Topics in Visual Art: ______. 3 Credits.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. This course is offered at the 300 and 500 levels, with ART 500 serving as a continuation of study in the topic area. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and ART 300 (same topic), or permission of instructor.

ART 540. Professional Activities Seminar. 3 Credits.
Comprehensive development of skills and strategies needed to pursue a career as a professional studio artist. Prerequisite: Twenty-four hours of departmental electives or permission of instructor.

**ART 575. Advanced Directed Reading in Visual Art. 1-3 Credits.**
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor.

**ART 590. Internship in Visual Art. 1-3 Credits.**
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and permission of instructor.

**ART 595. Advanced Study Abroad Topics in: _____ 1-6 Credits.**
This course is designed for the study of special topics in Visual Art at the senior/graduate level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to seniors and graduate level students.

**ART 599. Individual Studies in Visual Art. 1-6 Credits.**
Individual studio activity. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and twelve hours of Visual Art courses; and permission of instructor.

**ART 650. Senior Seminar I. 3 Credits.**
This course explores issues and themes in creative practice while critically examining works of visual art and culture; capstone experience. Concurrent enrollment in at least one upper level Visual Art studio course is required. Typically taken during a student's final two semesters. Prerequisite: 30 hours of departmental electives and instructor permission. Corequisite: Any 300 level or above Visual Art studio course.

**ART 660. Senior Seminar II. 3 Credits.**
Continuation of ART 650; capstone experience. Participation in BFA exhibition required. Concurrent enrollment in at least one upper level Visual Art studio course is required. Prerequisite: ART 650 and instructor permission. Corequisite: Any 300 level or above Visual Art studio course.

**ART 695. Directed Study I. 3 Credits.**
Individual studio activity under direction of faculty advisor; capstone experience. Prerequisite: Thirty hours of departmental electives, consent of department, and permission of instructor.

**ART 696. Directed Study II. 3 Credits.**
Continuation of ART 695; capstone experience. May be repeated for credit in subsequent semesters. Prerequisite: ART 695.

**ART 801. Directed Study III. 2-5 Credits.**
Individual studio activity under the direction of faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of graduate director and enrollment in the Visual Art MFA program.

**ART 802. Directed Study IV. 2-5 Credits.**
Continuation of Directed Study III. Prerequisite: Enrollment in the Visual Art MFA Program.

**ART 803. Directed Study V. 2-5 Credits.**
Continuation of Directed Study IV. Prerequisite: Enrollment in the Visual Art MFA Program.

**ART 805. Graduate Studio. 1-3 Credits.**
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: Graduate standing in The School of The Arts and permission of the instructor.

**ART 861. Directed Reading in Visual Art. 1-3 Credits.**
Research reading and presentation of reports on specific subjects related to the student's major area of specialization. Prerequisite: Enrollment in the MFA Program in the Department of Visual Art.

**ART 877. Graduate Seminar. 3 Credits.**
The graduate seminar emphasizes professional preparation for contemporary artists focusing on writing skills, oral presentations, critiques of individual creative research/artwork, critical thinking about and visual analysis of current art forms and contemporary approaches to the teaching of studio art. Prerequisite: Admission to the Graduate Program in Visual Art.

**ART 898. Special Topics: Studio Theory and Criticism. 3 Credits.**
Lecture, discussion, and supervised research in current topics related to contemporary studio theory and criticism. May be repeated for credit as topics vary. This course will be counted as a graduate level academic elective in course and credit distribution.

**ART 906. Graduate Studio. 1-3 Credits.**
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: ART 805 and permission of the instructor.

**ART 950. Thesis in Visual Art. 1-6 Credits.**
Original research in visual art culminating in a thesis exhibition. May be repeated for credit. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Thirty-six credit hours of graduate credit and permission of the graduate review committee.

**Visual Art Courses**

**CER 208. Ceramics I. 3 Credits.**
The development of form and surface through the use of handbuilding and wheel thrown techniques. Stoneware and Raku are explored.

**CER 300. Special Topics in Ceramics: _____ 1-4 Credits.**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 131 or CER 208; or permission of instructor.

**CER 301. Concepts and Methods: Wheel Throwing. 3 Credits.**
Intermediate ceramics course focusing on the potters' wheel as a tool. Coursework focuses on throwing skills and three-dimensional design concepts related to the functional ceramic vessel, wheel thrown sculpture, and creative problem-solving. Technical information supports an understanding of forming, surface development, glazing, and firing. Prerequisite: ART 131 or CER 208.

**CER 302. Concepts & Methods: Hand Building. 3 Credits.**
Intermediate ceramics course using hand-building techniques and processes supported by design and idea development. Techniques will include press molding, slab construction and coil-building, color and surface development through glazing and firing. Emphasis is placed on creative expression and communication of personal ideas. Prerequisite: ART 131 or CER 208.

**CER 402. Mold Making and Slip Casting. 3 Credits.**
Intermediate ceramics course focusing on the production of plaster molds and the slipcasting process. Students will make molds and prototypes, produce porcelain casting slip, and develop strategies in casting as well
as consider the use of the slipcasting technique as a conceptual tool. Undergraduate students who wish to take this for a second/continuing semester should enroll in CER 502. Prerequisite: ART 131 or CER 208.

CER 403. Advanced Topics in Ceramics. 3 Credits.
Advanced ceramics course using traditional and non-traditional approaches to ceramic art-making. Topics may include: wood firing, ephemeral art, large-scale sculpture, and/or digital technologies. This course can be repeated if topic varies. If same topic is repeated, students should enroll in CER 503. Prerequisite: CER 301 or CER 302 or permission of instructor.

CER 500. Advanced Special Topics Ceramics: ______. 1-4 Credits. U
Course to be offered in an area of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. This course is offered at the 300 and 500 levels, with CER 500 serving as a continuation of study in the topic area. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and CER 300 (same topic), or permission of instructor.

CER 502. Advanced Mold Making and Slip Casting. 3 Credits.
Advanced ceramics course focusing on the production of plaster molds and the slipcasting process. Students will make molds and prototypes, produce porcelain casting slip, and develop strategies in casting as well as consider the use of the slip-casting technique as a conceptual tool. Prerequisite: ART 131 or CER 208, and CER 402. Graduate students may enroll without prerequisites by instructor permission.

CER 503. Advanced Topics in Ceramics. 3 Credits.
Advanced ceramics course using traditional and non-traditional approaches to ceramic art-making. Topics may include: wood firing, ephemeral art, large-scale sculpture, and/or digital technologies. This course is intended as a continuation for a specific topic course in CER 403. Graduate students should enroll in CER 503 with no prerequisite required. Prerequisite: CER 301 or CER 302, CER 403, or permission of instructor.

CER 504. Kilns. 3 Credits.
The principles in kiln design, including up-draft, down-draft, cross-draft, and electric kilns, and burner technology. Prerequisite: ART 131, or CER 208, or CER 301, or permission of instructor.

CER 505. Clay and Glaze Formulation. 3 Credits.
Formulation of the various clay bodies and glazes associated with ceramics. Prerequisite: ART 131, or CER 208, or CER 301, or permission of instructor.

CER 510. History of Ceramics. 3 Credits.
This course examines historical ceramics across the globe. Emphasis will be placed on the development and transmission of design, materials, and technique across various traditions. This course number is intended for undergraduate students. Graduate students should enroll in CER 710 History of Ceramics. Prerequisite: CER 131 or CER 208, or permission of instructor.

CER 515. Advanced Ceramics I. 3-6 Credits.
Development of individual direction in ceramics based on experience, research, and skills acquired in previous courses; capstone experience. May be repeated for credit. Prerequisite: CER 301 and CER 402.

CER 520. Advanced Ceramics II. 3-6 Credits. U
Continuation of CER 515; capstone experience. May be repeated for credit. Prerequisite: CER 515.

CER 590. Internship in Ceramics. 1-3 Credits. U
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses; and permission of instructor.

CER 599. Individual Studies in Ceramics. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Ceramics courses or permission of instructor.

CER 710. History of Ceramics. 3 Credits.
This course examines historical ceramics across the globe. Emphasis will be placed on the development and transmission of design, materials, and technique across various traditions. This course is for Graduate students. Undergraduate students should enroll in CER 510 History of Ceramics.

CER 715. Ceramics. 2-6 Credits.
Individual research. Prerequisite: CER 515 or equivalent.

CER 815. Ceramics. 2-6 Credits.
Continuation of CER 805.

Visual Art Courses

DRWG 203. Drawing III. 3 Credits.
Advanced problems in drawing. Prerequisite: ART 102.

DRWG 213. Life Drawing I. 3 Credits.
Figure drawing. Prerequisite: ART 102 and ART 103 or ART 104.

DRWG 300. Special Topics in Drawing: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

DRWG 304. Drawing IV. 3 Credits.
Continuation of DRWG 203. Prerequisite: DRWG 203.

DRWG 314. Life Drawing II. 3 Credits.
Continuation of DRWG 213. Prerequisite: DRWG 213.

DRWG 318. Life Drawing II, Honors. 3 Credits.
Figure drawing, a continuation of DRWG 213. Prerequisite: DRWG 213; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

DRWG 500. Advanced Special Topics in Drawing: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor.

DRWG 515. Life Drawing III. 3 Credits.
Continuation of DRWG 515. Prerequisite: DRWG 514.

DRWG 516. Life Drawing IV. 3 Credits.
Continuation of DRWG 515. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515.

DRWG 518. Life Drawing III, Honors. 3 Credits.
Figure drawing, a continuation of DRWG 314 or DRWG 318. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 314 or DRWG 318; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**DRWG 519. Life Drawing IV, Honors. 3 Credits.**
Figure drawing, a continuation of DRWG 515 or DRWG 518. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515 or DRWG 518; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**DRWG 599. Individual Studies in Drawing. 1-6 Credits. U**
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor.

**DRWG 817. Life Drawing V. 3 Credits.**
Individual research in figure drawing. Prerequisite: DRWG 516.

**DRWG 918. Life Drawing VI. 3 Credits.**
Continuation of DRWG 817. Prerequisite: DRWG 817.

**Visual Art Courses**

**EXM 274. Expanded Media. 3 Credits. U**
Beginning course to introduce the fundamental concepts, strategies, and technologies that comprise the Expanded Media area of the Department of Visual Art: Installation, Performance, and Digital Image. Emphasis is placed on forming ideas and strategies, and creating artwork that considers the core connections within Expanded Media: time, space, the body, the viewer, and society at large. Computer-based technologies and time-based media that are inherent to Expanded Media practice support studio assignments. Coursework includes the investigation and discussion of historic precedents and the development of an appropriate critical dialogue with which to discuss their work. Prerequisite: ART 102, ART 103, and ART 104.

**EXM 300. Special Topics in Expanded Media: _____ . 3 Credits. U**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

**EXM 301. The Digital Image I. 3 Credits.**
Introduction to various still digital processes and skills that encourage the use of digital imagery within a variety of other media. Focus on content issues as they relate to development of artwork incorporating digital imagery. Prerequisite: ART 102, ART 103 or ART 104 or permission of instructor.

**EXM 302. Performance Art I. 3 Credits. U**
An introduction to the understanding and production of performance art. Students gain proficiency in conceptualization and production of performance time-based art in an Interdisciplinary art-making environment. Prerequisite: ART 102, ART 103 or ART 104; or permission of instructor.

**EXM 304. Digital Photography I. 3 Credits.**
This course explores Digital Photography as a tool and resource with a wide range of expressive and creative interests. Digital processes such as image capturing, editing, and printing will be the main focus. Issues pertaining the circulation and distribution of digital imagery in contemporary culture will be addressed. DSLRs, Point and Shoot Cameras, and Camera Phones will be used. Prerequisite: ART 101, ART 103, or ART 104; and any introductory art studio, or permission of instructor. This course is offered at the 300 and 500 levels, with the 500 level serving as a continuation of study in the topic area.

**EXM 307. Installation Art I. 3 Credits. U**
This course is an exploration of art making with an emphasis on space, site, installation, and the viewer's experience surrounding art making. Students will research, discuss, and produce temporary art installations using a variety of mediums in an atmosphere of interdisciplinary and experimentation. Major topics include time/space specifically: the collaboration process; body-space dynamics, and art-making as part of a social/cultural dynamic. Prerequisite: ART 101, ART 103, or ART 104, or permission of instructor.

**EXM 326. Video and Time-Based Media I. 3 Credits. U**
An introduction to the understanding and production of video and time-based art. Students gain proficiency in conceptualization and production of video and time-based art in an interdisciplinary art-making environment. Prerequisite: EXM 274.

**EXM 500. Advanced Special Topics in Expanded Media: _____ . 3 Credits. U**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103 or ART 104; 12 hours of courses in Visual Art, or permission of instructor.

**EXM 501. The Digital Image II. 3 Credits.**
Continuation of EXM 301, The Digital Image I. May be repeated for credit. Prerequisite: EXM 301.

**EXM 504. Digital Photography II. 3 Credits.**
This course will explore Digital Photography as a tool and resource with a wide range of expressive and creative interests. Students will explore how digital photographs are ‘captured’, edited, printed, and distributed in contemporary culture. DSLRs, Point and Shoot Cameras, and Camera Phones will be used. Advanced techniques in Picture Editing, File Management, Printing, Digital Delivery, and Studio Photography of Artwork will be explored. May be repeated for credit. Prerequisite: EXM 304.

**EXM 526. Video and Time-Based Media II. 3 Credits. U**
Continuation of EXM 326. Prerequisite: EXM 326.

**EXM 535. Intermediate Expanded Media. 3 Credits.**
Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses.

**EXM 536. Intermediate Expanded Media, Honors. 3 Credits.**
Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department.

**EXM 537. Advanced Expanded Media. 3 Credits.**
Continuation of EXM 535. May be repeated for credit. Prerequisite: EXM 535 or EXM 536.

**EXM 538. Advanced Expanded Media, Honors. 3 Credits.**
Continuation of EXM 536. May be repeated for credit. Prerequisite: EXM 535 or EXM 536; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department.

**EXM 543. Graduate: The Digital Image. 3 Credits.**
Advanced work focusing on content issues as they relate to development of artwork incorporating digital imagery. Prerequisite: Permission of instructor.

**EXM 546. Graduate Expanded Media V. 3 Credits.**
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor.

**EXM 573. Performance Art II. 3 Credits. U**
Continuation of EXM 302. Prerequisite: EXM 302.

**EXM 577. Installation Art II. 3 Credits. U**
Continuation of EXM 307. Prerequisite: EXM 307.

**EXM 578. Installation Art II, Honors. 3 Credits. U**
Continuation of EXM 307. Prerequisite: EXM 307; and membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department.

**EXM 599. Individual Studies in Expanded Media. 1-6 Credits. U**
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Expanded Media courses, of permission of instructor.

**EXM 846. Graduate Expanded Media VI. 3 Credits.**
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor.

**EXM 946. Graduate Expanded Media VII. 3 Credits.**
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor.

**Visual Art Courses**

**METL 300. Special Topics in Metalsmithing: _____ 3 Credits. U**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

**METL 301. Introduction to Casting for Jewelry. 3 Credits.**
Introduction to casting and mold making processes used for jewelry and small sculpture. Students explore various methods and materials for creating models for casting in bronze or silver including wax carving, wax modeling, and the use of natural and synthetic materials as models. Models are cast using centrifugal and vacuum casting processes. Basic mold making in clay and silicone are also explored. Prerequisite: ART 132 or permission of instructor.

**METL 360. Holloware. 3 Credits.**
Problems related to specific smithing techniques such as raising, stretching, shell structures and seam fabrications. Metal manipulation on a large scale. Prerequisite: Six hours of metalsmithing or consent of the instructor.

**METL 362. Metalsmithing. 3-6 Credits. H**
Intermediate metalworking with an emphasis on the refinement of design and techniques. Processes may include soldering and fabrication, mechanisms, and surface embellishment. Prerequisite: Six hours of metalsmithing or consent of the instructor.

**METL 363. Intermediate Jewelry. 3 Credits.**
Lectures and demonstrations on traditional techniques of jewelry construction and embellishment, such as stone setting, chasing, repoussé, and die forming. Prerequisite: Six hours of metalsmithing or consent of the instructor.

**METL 364. Enameling. 3-6 Credits.**
Introduction to enameling as applied to jewelry design and metalsmithing objects. Exploration of major enameling techniques such as wet packing, cloisonné, champlevé, basse-taille, and limoges. Prerequisite: Six hours of metalsmithing or consent of instructor.

**METL 500. Advanced Special Topics in Metalsmithing: _____ 3 Credits. U**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

**METL 503. Gemology. 3 Credits. H**
Students study the optical and physical characteristics of gemstones in order to identify them using gemological instruments. This laboratory and discussion class explores related topics including the principles of optics that support this methodology, history and geographical distribution of gemstones, gemstone cutting and pearl farming, the history of DeBeers and the development of the world demand for diamond, quality analysis of diamond, colored gemstones and pearls, including the history of diamond grading, the development and identification of synthetics, imitations and laboratory enhancements as well as the use of gemstones in designing jewelry. Prerequisite: ART 132.

**METL 504. A History of Jewelry. 3 Credits. H**
This course explores the history from Sumeria to the 21st century of the use of metals and gemstones in the creation of decorative art for personal adornment. Students explore the evolution of the role of jewelry in ancient culture and modern society and survey individuals whose ideas and work influenced generations of goldsmiths and jewelers around the globe. The class studies primitive tools and modern manufacturing techniques, the history of gemstone cutting and setting and the origin and development of gemstones as symbols. Prerequisite: ART 132.

**METL 505. Digital Jewelry Design I. 3 Credits. H**
Matrix is a 3-D CAD program based on Rhino developed by Rhino, specifically for jewelry design. The goal of this course is to instruct beginners in the Matrix design program. Students learn to transform their 2-D designs from their sketchbooks into 3-D models in Matrix, which can be milled in wax, and cast in metal. Students also learn how to render their 3-D Matrix models to appear as if they were a finished object. The class time is structured as a combination of instructor-led tutorials and working labs. Prerequisite: ART 132.

**METL 506. Digital Jewelry Design II. 3 Credits. H**
The second semester of Matrix increases the operating and design skills building on the knowledge of DG I. The focus of the class is producing wax models on the Revo Digital Mill.Digi II covers the advanced modeling skills including T-spline and Rhino. Students also learn how to make a customized tool path for Revo C mill program and how to solve milling problems. Students also learn how to convert Rhino files to produce a 3D printed for outsourcing to other 3D modeling programs. Prerequisite: ART 132, METL 301, METL 505.

**METL 515. Advanced Metals I. 3-6 Credits. H**
Development of individual direction in Metalsmithing/Jewelry based on experience, research and skills acquired in preceding courses. This course serves as a capstone experience. General BFA students, non-majors or minors may enroll in this course with consent of the instructor. Students who are off track in sequence may be eligible to enroll in this
course with consent of the instructor. Prerequisite: METL 360, METL 362, METL 363 & METL 364 or consent of the instructor.

**METL 520. Advanced Metals II. 3-6 Credits.**
Continuation of METL 515 with emphasis on individual design aesthetic through intensive designing, rendering, and model making that leads to a professional and unified body of Metalsmithing/Jewelry work. This course requires a final presentation of a complete portfolio including resume, renderings and photographs of the finished work. This is a capstone course. Prerequisite: METL 515.

**METL 590. Internship in Metalsmithing/Jewelry. 1-3 Credits.**
U Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Grade on a satisfactory/unsatisfactory basis. Prerequisite: ART 102, and ART 103, and ART 104; and fifteen hours of Visual Art Courses; and permission of instructor.

**METL 715. Metals/Jewelry. 2-6 Credits.**
Individual research. Prerequisite: Graduate standing.

**METL 815. Metals/Jewelry. 2-6 Credits.**
Continuation of METL 715.

**Visual Art Courses**

**PNTG 263. Painting I. 3 Credits.**
Basic problems in painting. Prerequisite: ART 102, and ART 103 or ART 104.

**PNTG 300. Special Topics in Painting: _____ 3 Credits.**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Painting courses, or permission of instructor.

**PNTG 337. Watercolor. 3 Credits.**
Sessions deal with the preparation of watercolor paints and equipment, but the main emphasis is placed on relational concepts affecting tone, structure, and unity in work. While the students are expected to explore some of the traditional approaches to watercolor, they also are encouraged to work with new and innovative ones. Prerequisite: ART 120 or permission of instructor.

**PNTG 338. Landscape Painting. 3 Credits.**
An introduction to landscape painting. Considerable work is done out-of-doors. Emphasis is placed upon experiencing the environment and the development of individual approach. May be repeated for credit. Prerequisite: PNTG 263 and permission of instructor.

**PNTG 364. Painting II. 3 Credits.**
Continuation of PNTG 263. Prerequisite: PNTG 263.

**PNTG 366. Painting IV. 3 Credits.**
Continuation of PNTG 364. Prerequisite: PNTG 364.

**PNTG 369. Painting III. Honors. 3 Credits.**
A continuation of art practice in landscape painting. Considerable work is done out-of-doors. Emphasis is placed upon experiencing the environment and the development of individual approach. May be repeated for credit. Prerequisite: PNTG 338.

**PNTG 555. Painting III. 3 Credits.**
Continuation of PNTG 364. Prerequisite: PNTG 364.

**PNTG 566. Painting IV. 3 Credits.**
Continuation of PNTG 555. May be repeated for credit. Prerequisite: PNTG 555.

**PNTG 567. Painting III, Honors. 3 Credits.**
Continuation of PNTG 364 or PNTG 368. Prerequisite: PNTG 364 or PNTG 368; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**PNTG 569. Painting IV, Honors. 3 Credits.**
Continuation of PNTG 555 or PNTG 556. Prerequisite: PNTG 556 or PNTG 558; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**PNTG 599. Individual Studies in Painting. 1-6 Credits.**
U Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Painting courses, or permission of instructor.

**PNTG 667. Painting V. 3 Credits.**
Continuation of PNTG 566. Prerequisite: PNTG 566.

**PNTG 668. Painting VI. 3 Credits.**
Continuation of PNTG 667. May be repeated for credit in subsequent semesters. Prerequisite: PNTG 667.

**PNTG 869. Painting VII. 3 Credits.**
Individual research in painting. Prerequisite: PNTG 668.

**PNTG 970. Painting VIII. 3 Credits.**
Continuation of PNTG 869. Prerequisite: PNTG 869.

**Visual Art Courses**

**PRNT 223. Intaglio I. 3 Credits.**
Introduction to intaglio. Prerequisite: ART 102, and ART 103 or ART 104.

**PRNT 233. Lithography I. 3 Credits.**
Introduction to lithography. Prerequisite: ART 102, and ART 103 or ART 104.

**PRNT 243. Serigraphy I. 3 Credits.**
Introduction to serigraphy. Prerequisite: ART 102, and ART 103 or ART 104.
PRNT 300. Special Topics in Printmaking: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

PRNT 324. Intaglio II. 3 Credits.
Continuation of PRNT 223. Prerequisite: PRNT 223, or permission of instructor.

PRNT 328. Intaglio II, Honors. 3 Credits.
Continuation of PRNT 223. Prerequisite: PRNT 223; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

PRNT 334. Lithography II. 3 Credits.
Continuation of PRNT 233. Prerequisite: PRNT 233 or permission of instructor.

PRNT 338. Lithography II, Honors. 3 Credits.
Continuation of PRNT 233. Prerequisite: PRNT 233; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

PRNT 344. Serigraphy II. 3 Credits.
Continuation of PRNT 243. Prerequisite: PRNT 243 or permission of instructor.

PRNT 349. Serigraphy II, Honors. 3 Credits.
Continuation of PRNT 243. Prerequisite: PRNT 243; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

PRNT 500. Advanced Special Topics in Printmaking: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor.

PRNT 523. Printmaking III A (Intaglio). 3 Credits.
Prerequisite: PRNT 324 or permission of instructor.

PRNT 524. Printmaking III B (Lithography). 3 Credits.
Prerequisite: PRNT 334 or permission of instructor.

PRNT 525. Printmaking III C (Serigraphy). 3 Credits.
Prerequisite: PRNT 344 or permission of instructor.

PRNT 526. Printmaking IV A (Intaglio). 3 Credits.
Prerequisite: PRNT 523 or permission of instructor.

PRNT 527. Printmaking IV B (Lithography). 3 Credits.
Prerequisite: PRNT 524 or permission of instructor.

PRNT 528. Printmaking IV C (Serigraphy). 3 Credits.
Prerequisite: PRNT 525 or permission of instructor.

PRNT 599. Individual Studies in Printmaking. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor.

PRNT 662. Printmaking V. 3 Credits.
Individual research in printmaking. Prerequisite: PRNT 526 or PRNT 527 or PRNT 528.

PRNT 663. Printmaking VI. 3 Credits.

Extension of PRNT 662. Prerequisite: PRNT 662.

PRNT 802. Special Problems in Printmaking. 3 Credits.
Individual research in printmaking; course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: PRNT 579 and permission of instructor.

PRNT 827. Printmaking VII. 3 Credits.
Continuation of PRNT 663. Prerequisite: PRNT 663.

PRNT 903. Special Problems in Printmaking. 3 Credits.
Individual research in printmaking; course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: PRNT 802 and permission of instructor.

PRNT 928. Printmaking VIII. 3 Credits.
Continuation of PRNT 827. Prerequisite: PRNT 827.

Visual Art Courses

SCUL 253. Sculpture I. 3 Credits.
Introduction to sculpture. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor.

SCUL 300. Special Topics in Sculpture: ______. 3 Credits.
Course to be offered in an area of studio activity of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

SCUL 330. Sculpture Intercepting the Waste Stream. 3 Credits. N
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art.) Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as EVRN 330.) Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 349. Metal and Glass Casting. 3 Credits.
A course in foundry techniques as related to sculpture. Both traditional and experimental procedures for casting bronze, aluminum, and iron sculpture are explored. This course is taught at the 300 and 500 levels, with additional assignments at the 500 level.

SCUL 353. The Figure 3D: Modeling and Molding. 3 Credits. H
Sculpting a figure is radically different form drawing one! You will develop a more comprehensive understanding of the human form while creating art addressing contemporary aesthetic concerns. Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 354. Sculpture II. 3 Credits.
Continuation of SCUL 253. Prerequisite: SCUL 253.

SCUL 355. Sculpture III. 3 Credits.
Continuation of SCUL 354. Prerequisite: SCUL 354.

SCUL 356. Public Art. 3 Credits. H
Students in this class investigate the nature of contemporary public art as well as creating their own artworks. Public Art covers a wide spectrum of art making from interventions, to street art, to murals and on to monumental sculpture. This class also covers how to present for commissions, budgeting, and legal liability. Previous work created in this class has won national awards. Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 358. Sculpture II, Honors. 3 Credits.
Continuation of SCUL 253. Prerequisite: SCUL 253; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

SCUL 359. Sculpture III, Honors. 3 Credits.
Continuation of SCUL 354 or SCUL 358. Prerequisite: SCUL 354 or SCUL 358; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

SCUL 360. Build Smart. 3 Credits. H
An introductory woodworking course that emphasizes planning, fabricating, and assembly techniques. Material handling and best practice building methods are introduced and reinforced through a series of individual woodworking projects that expose the student to the properties of wood, as well as, hand and machine woodworking tools. Significant out of class work required. Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 362. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as EVRN 362.) Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 500. Advanced Special Topics in Sculpture: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor.

SCUL 549. Metal and Glass Casting. 3 Credits. U
A course in foundry techniques as related to sculpture. Both traditional and experimental procedures for casting bronze, aluminum, and iron sculpture are explored. May be repeated for credit. This course is taught at the 300 and 500 levels, with additional assignments at the 500-level. Prerequisite: SCUL 253.

SCUL 556. Sculpture IV. 3 Credits.
Continuation of SCUL 355. May be repeated for credit. Prerequisite: SCUL 355.

SCUL 558. Sculpture IV, Honors. 3 Credits.
Continuation of SCUL 355 or SCUL 359. May be repeated for credit. Prerequisite: SCUL 355 or SCUL 359; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

SCUL 599. Individual Studies in Sculpture. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor.

SCUL 630. Sculpture Intercepting the Waste Stream. 3 Credits. N
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art). Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as EVRN 630.) Prerequisite: Graduate standing or permission of instructor.

SCUL 653. The Figure 3D: Modeling and Molding. 3 Credits. H
Sculpting a figure is radically different form drawing one! Students will develop a more comprehensive understanding of the human form while creating art addressing contemporary aesthetic concerns. Prerequisite: Graduate standing or permission of instructor.

SCUL 656. Public Art. 3 Credits. H
Students in this class investigate the nature of contemporary public art as well as creating their own artworks. Public Art covers a wide spectrum of art making from interventions, to street art, to murals and on to monumental sculpture. This class also covers how to present for commissions, budgeting, and legal liability. Previous work created in this class has won national awards. Prerequisite: Graduate standing or permission of instructor.

SCUL 657. Sculpture V. 3 Credits.
Continuation of SCUL 556. Prerequisite: SCUL 556.

SCUL 658. Sculpture VI. 3 Credits.
Continuation of SCUL 657. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 657.

SCUL 660. Build Smart. 3 Credits. H
This course is an introductory woodworking course that emphasizes planning, fabricating, and assembly techniques. Material handling and best practice building methods are introduced and reinforced through a series of individual woodworking projects that expose the student to the properties of wood, as well as, hand and machine woodworking tools. Significant out of class work required. Non Visual Art students require permission number from Department. Prerequisite: Graduate standing or permission of instructor.

SCUL 662. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as EVRN 662.) Prerequisite: Graduate standing or permission of instructor.

SCUL 804. Special Problems in Sculpture. 3 Credits.
Individual research in sculpture: course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 559 and permission of instructor.

SCUL 859. Sculpture VII. 3 Credits.
Individual research in sculpture. Prerequisite: SCUL 658.

SCUL 905. Special Problems in Sculpture. 3 Credits.
Individual research in sculpture: course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 804 and permission of instructor.

SCUL 960. Sculpture VIII. 3 Credits.
Continuation of SCUL 859. Prerequisite: SCUL 859.

Visual Art Courses

TD 300. Special Topics in Textiles/Fibers: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor.
TD 313. Fiber Forms. 3 Credits.
Studio exploration of fibers as an art form. Techniques include feltmaking, papermaking, basketry, and dyeing. Prerequisite: ART 101, and ART 133.

TD 314. Introduction to Weaving. 3 Credits. U
Application of art and design principles to four-harness loom structures. Emphasis on the use of color and texture in loom controlled and weaver controlled techniques. Prerequisite: ART 101, and ART 133.

TD 315. Textile Handprinting and Resist Processes. 3 Credits. U
Fundamentals of resist and dye techniques on textiles: batik, tie-dye, discharge, and direct application. Prerequisite: ART 101, and ART 133.

TD 316. Screenprinting Textiles. 3 Credits.
Design problems in textile printing with emphasis on screenprinting and photo techniques. Prerequisite: ART 101, and ART 133.

TD 401. Weave Structures. 3 Credits. U
Continuation of TD 314. Research and analysis of multiple-harness weave structures. Weave drafts. Design problems to develop the use of color, form, and surface in simple and compound weaves. Prerequisite: TD 314.

TD 402. Techniques in Weaving. 3 Credits. U
Development of individual art and design concepts in relation to woven structures and/or forms. Emphasis on weaver-controlled techniques used to create images and composition. Prerequisite: TD 314.

TD 403. Intermediate Textile Printing. 3 Credits.
Individual problems in textile printing and dyeing processes. Prerequisite: TD 316.

TD 404. Surface Design. 3 Credits.
Textile pattern design for art and/or industry. Prerequisite: Twelve hours in Visual Art or Design, or permission of the instructor.

TD 500. Advanced Special Topics in Textiles/Fibers: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor.

TD 504. History of Textiles, Lecture. 3 Credits.
Study of historical textiles, their design development, and the techniques employed. Prerequisite: Junior standing in department or permission of instructor.

TD 506. Advanced Fiber Forms. 1-6 Credits. U
Directed study of three-dimensional and off-loom methods and techniques. May be repeated for credit. Prerequisite: TD 313.

TD 514. Advanced Techniques in Weaving. 1-6 Credits. U
Directed study of advanced loom-controlled and weaver-controlled methods. May be repeated for credit. Prerequisite: TD 401 or TD 402, or permission of instructor.

TD 515. Advanced Textiles/Fibers I. 3-6 Credits.
Development of individual direction in textiles based on experience, research, and skills acquired in preceding courses; capstone experience. Prerequisite: Twenty-four credits in Textiles/Fibers and consent of instructor.

TD 520. Advanced Textiles/Fibers II. 3-6 Credits.
Continuation of TD 515, capstone experience. Prerequisite: TD 515.

TD 590. Internship in Textiles/Fibers. 1-3 Credits. U
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses.

TD 599. Individual Studies in Textiles/Fibers. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor.

TD 715. Textile Design in Weaving, Printing, and Dyeing. 2-6 Credits.
Individual research. Prerequisite: Graduate standing.

TD 815. Textile Design in Weaving, Printing, and Dyeing. 2-6 Credits.
Continuation of TD 715.

Visual Art Courses

VAE 300. Special Topics in Visual Art Education: ______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor.

VAE 320. Instruction and Curriculum I. 3 Credits.
This methods course provides an overview of the professional practices of K-12 art educators. Course content deals with the art education program, K-12, in relationship to the rest of the curriculum. This encompasses goals, objective sequence, courses offered at various levels, finance, staffing and administration. Prerequisite: Junior standing or consent of the instructor.

VAE 341. Instructional Strategies in Art for Elementary Classroom Teachers. 2 Credits.
Child growth and development in art. Materials as they relate to a sequential art education curriculum in the elementary school. Prerequisite: Admission to the School of Education or the education division of the graduate school.

VAE 395. Community Collaborations in Art Education. 3 Credits. U

A focused examination of existing community organizations, models, and resources alongside collaborative strategies for working with these entities to achieve common goals for art education. Students in this class will learn of collaborative community models, explore entrepreneurial and other educational initiatives that contribute to the general purpose of art education, and recognize the role of families and other community members in contributing to the arts.

VAE 410. Instruction and Curriculum II. 3 Credits.
This methods course provides an overview of the professional practices of K-12 art educators. Course content deals with the art education program, K-12, in relationship to the rest of the curriculum. This encompasses goals, objective sequence, courses offered at various levels, finance, staffing and administration. Prerequisite: Junior standing or consent of the instructor.

VAE 420. Artistic Media and Processes in Art Education. 3 Credits.

Building on course content in VAE 320, this course concentrates on instructional strategies and presentation models in art education. Students
examine and explore the media appropriate to teaching art in various settings and levels as well as how art program budgets are derived and impact overall curriculum development. Prerequisite: VAE 320 or permission of instructor.

VAE 497. Independent Study. 1-3 Credits.
Only one enrollment permitted each semester; a maximum of four hours will apply toward the bachelor's degree. Prerequisite: Recommendation of advisor and consent of instructor.

VAE 500. Student Teaching. 9 Credits.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Individual activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor's degree. Prerequisite: Admission to the student teaching program; and ART 102, ART 103, and ART 104; and twelve hours of Visual Art Education courses, or permission of instructor.

VAE 520. Instructional Technology in Art Education. 3 Credits.
This course addresses technology that is pertinent to professional art educators. Students use technology to develop a professional portfolio and technology-related resources for teaching art in PreK-12 schools and community settings.

VAE 596. Practicum in Teaching Art. 2 Credits.
A supervised art teaching practicum in which students will learn to employ different teaching strategies with children pre-school through high school in the school or museum setting. Prerequisite: VAE 320, VAE 410, VAE 795 or consent of instructor.

VAE 598. Special Course: ____. 1-5 Credits.
A special course of study to meet current needs of education students; primarily for undergraduates.

VAE 599. Community Based Project in Art Education. 1-6 Credits. U
Individual activity and project that serves as an alternate capstone experience to VAE 500 (Student Teaching). Will involve the development of an independent, community-based arts education project developed by the student under the supervision of a VAE faculty member. Prerequisite: Forty credits of Visual Art, fifteen credits of Visual Art Education Courses, and permission of the instructor.

VAE 680. Internship in Teaching Art. 5-16 Credits.
A supervised internship experience leading to initial art teacher certification. The student assumes the total professional role as a teacher of art in an approved school setting.

VAE 800. Visual Art Education Curriculum Development. 1-3 Credits.
A study of research, resources, and media as they relate to learning goals in a sequential art curriculum for use by teachers. The amount of credit reflects the extent of the curriculum being developed and the amount of work involved in the development process.

VAE 890. Preparation for the M.A. Examination. 1 Credits.
An independent reading course in preparation for the M.A. Examination. The grade will be an S or U, as determined by the performance on the examination. The examination will be evaluated separately. Prerequisite: Permission of the instructor.

VAE 897. Independent Study. 1-4 Credits.
Prerequisite: Consent of advisor and instructor.

VAE 898. Master’s Project. 1-4 Credits.

VAE 899. Master’s Thesis. 1-6 Credits.
should ask a faculty member to serve as their advisor and should notify the Graduate Academic Advisor of the faculty member identified. The faculty advisor will work closely with the student to develop a coherent plan of study and select courses ahead of each term in preparation for their thesis or dissertation. Graduate students will meet with their advisor at least once a year to evaluate their course performance and timely progress toward the degree.

Non-Degree Seeking

Students who are interested in enrolling in graduate level coursework in the Department of Film and Media Studies without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s Non-Degree Seeking page for more information.

Courses

FMS 100. Introduction to Film and Media. 3 Credits. HL
An introduction to analyzing and thinking critically about film and other media. Students will learn to read and interpret the basic signs, syntaxes, and structures of cinematic language. Through direct analysis of selected films, television, and new media, students will evaluate and construct evidentiary arguments about the aesthetic strategies creators use to make meaning for audiences. In addition, this course will familiarize students with the historical and industrial dimensions of film and media, as well as the influence technology has on their development into the twenty-first century.

FMS 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Film and Media Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

FMS 200. Film and Media Aesthetics. 3 Credits. HL
An introduction to film and media aesthetics, including basic film/media theories and their practical applications. Students will be introduced to the concepts of time, space, composition, movement, editing, light, color, and sound. A key feature of the course will be a practical emphasis on learning how to see creatively by applying elements of design, camera lens and sound recording principles. Examples of these aspects of film and associated media will be examined and discussed in depth. Should be taken before or concurrently with FMS 275.

FMS 204. Study Abroad Topics in: _____ 1-6 Credits. H
This course is designed for the study of special topics in Film at the freshman/sophomore level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Prerequisite: Consent of instructor and at least seven hours credit in the department.

FMS 273. Basic Screenwriting. 3 Credits. H
An introduction to the craft and principles of screenwriting, from inspiration to writing a complete first act. Emphasis on factors relevant to the creation of a treatment and a screenplay. Prerequisite: Consent of instructor.

FMS 275. Basic Video Production. 4 Credits. H
Theory and practice of video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. Lecture-laboratory. Prerequisite: FMS 100, completion of or concurrent enrollment in FMS 200.

FMS 301. Undergraduate Professional Development Seminar. 1 Credits. H
Provides an overview of opportunities for professional development in Film and Media Studies, and helps students plan goals for their education through an understanding of professional practices. The course also covers practical exercises in professional development, including writing resumes, finding internships and entry-level work, and other aspects of establishing a career in Film and Media Studies. Graded on a satisfactory/unsatisfactory basis. Prerequisite: FMS 275 or equivalent. Open to FMS Majors only.

FMS 302. Undergraduate Studies Seminar in: _____. 1-3 Credits. H
Course organized any given semester to examine a particular studies topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

FMS 303. Undergraduate Production Seminar in: _____. 1-3 Credits. H
Course organized any given semester to study a particular production topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

FMS 304. Study Abroad Topics in: _____. 1-6 Credits. H
This course is designed for the study of special topics in Film at the junior/senior level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

FMS 307. Undergraduate Film/Media Internship. 1-6 Credits. H
Supervised study with an approved film/media company or project. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Prerequisite: Consent of instructor and at least seven hours credit in the department.

FMS 310. History of the Silent Film. 3 Credits. H
A survey of the artistic, economic and sociological development of the narrative cinema with emphasis on the American studio system, German Expressionism, and Soviet Expressive Realism. Analysis of selected films.

FMS 311. History of the American Sound Film. 3 Credits. HL
A study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television. Analysis of selected films.

FMS 312. History of the International Sound Film to 1950. 3 Credits. H

FMS 313. History of the International Sound Film Post 1950. 3 Credits. H
A survey of the artistic, economic, and sociological development of the international sound film from 1950 to the present. Emphasis on Free Cinema, New Wave, and other emerging post-war cinemas.

FMS 314. History of African-American Images in Film. 3 Credits. HL
A history and critical assessment of the diverse images of African-Americans in American cinema and the impact of those images on American society. Screenings of feature and independent films, including those by African-Americans.

FMS 315. Survey of Japanese Film. 3 Credits. NW
This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, Survey of Japanese Film introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this
institution shapes gender, class, ethnic, and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and film style over the last century. Through secondary readings, lectures, and discussions, students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth-century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 315.)

FMS 316. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Credits. H
This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression during dictatorship, globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity, immigration and identity in contemporary cinema. Other themes in common are financing issues, such as co-production agreements, film production under the regional trade pact Mercosur and issues of circulation, distribution and marketing of national films. Most films will be feature length narrative, but a few documentaries will be shown. May be taken as FMS 716, but with additional requirements.

FMS 318. Anti-war Film. 3 Credits. H
An overview and exploration of the history of anti-war film and media themes to show how attitudes regarding war and political policy can be affected by positive and negative depictions of conflict. Course includes analysis of selected films.

FMS 322. Soviet and Post-Soviet Russian Cinema. 3 Credits. H
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. (Same as SLAV 322.)

FMS 323. War and Memory in Asian Film. 3 Credits. H
This course explores how the film industries of key East Asian nations have constructed, reimagined, debated, and commemorated their experiences of the major wars fought during the 20th century (i.e. The Great East Asian War, the Chinese Civil War, the Korean War, and the Vietnam War). We will examine the intersection of various historical, political, cultural, and economic factors with the production of mainstream commercial film to consider how individual and collective memories of wars in Asia have transformed over time in different contexts. Films are particularly useful for examining how the cultural memory of wars survives and is conveyed from one era to another with each new generation inventing and superimposing new layers of memory on the original phenomenon from a range of multiple perspectives. A central goal of this course is to provide students with various historical perspectives, cultural contexts, and analytical methods to develop your ability to apply visual literacy and critical thinking skills to contemporary Asian films about the major wars of the last century.

FMS 330. Cinematic Rome. 3 Credits. H
A study of cinematic representations of daily life, diversity, urban landscape, and social and political issues in modern and contemporary Rome as presented in different genres. Taught in English. (Same as ITAL 330.)

FMS 331. Mafia Movies. 3 Credits. H
This course investigates representations of the Italian mafia in Italian and American cinema since the 1960s, placing emphasis on conventions of the gangster genre and its evolution. We will examine films in relation to their socio-historical contexts and special attention will be dedicated to Italian films that de glamorize the Italian mafia and champion the anti-mafia struggle. Taught in English. (Same as ITAL 331.)

FMS 345. New Media and Society. 3 Credits. H
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in research-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key research skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level.

FMS 350. Indigenous Film and Media. 3 Credits. H
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum-including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 750 or ISP 755. (Same as ISP 355.)

FMS 355. Storytelling with Digital Media. 3 Credits. HL H
In this course, students will utilize digital tools and platforms to create online and mobile stories based on the theories and histories of interactive storytelling discussed in class. Through a survey of digital storytelling examples and concepts, students will create interactive projects to add to their portfolio and learn how to think critically and write analytically about digital media.

FMS 373. Intermediate Screenwriting. 3 Credits. H
Emphasis on writing a full-length screenplay. Explores genre, character, dialogue, and the development of a personal writing style. Prerequisite: FMS 273 (students will be selected based on writing samples).

FMS 374. Animation. 3 Credits. H
A survey that combines animation history, theory, and production by examining animated works of all kinds and exploring various styles using both hands-on techniques and digital animation programs. Lecture-laboratory.

FMS 375. Intermediate Video Production. 3 Credits. H
Theory and practice of longer-form video production with emphasis on scripting, talent coordination and editing in preproduction, production and postproduction. Lecture-laboratory. Prerequisite: FMS 275.

FMS 376. Cinematography. 3 Credits. H
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. Prerequisite: FMS 275.

FMS 377. Post-Production. 3 Credits. H
Students become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is
offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: FMS 275.

**FMS 380. American Popular Culture of: _____ 3 Credits. HL H**
An interdisciplinary examination of popular cultural forms and their relationships with the social, political and economic dynamics of America, with emphasis on film, media, music, literature (including magazines and newspapers) and the graphic arts. The decade or other specific topic to be studied changes as needs and resources develop. May be repeated for credit for different decades or topics.

**FMS 410. US Diversity in Visual Culture. 3 Credits. H**
This course examines the way in which diversity in the United States, including race, class, gender, and sexuality, are represented through visual culture, historically and in the present. The study of visual culture analyzes the way in which visual images communicate systems of beliefs, contribute to identity formation, and have an influence on our thinking about diversity. Course looks at United States visual objects (i.e., film, television, photography, art, advertisements, and theatre as well as visual practices, i.e., in public and private spaces.

**FMS 425. Ethics in Storytelling. 3 Credits. H**
This course considers the ethics of telling stories with film and media. Using a framework of rhetorical criticism and postmodern ethics, the students will evaluate the ethical and social responsibility challenges of fiction and non-fiction writing, films, television and online projects from a variety of fields: anthropology, sociology, journalism, political rhetoric and documentary filmmaking. Through readings, case studies and application, students will explore the fundamentals of rhetorical ethics, and the questions raised my new and emerging forms of storytelling.

**FMS 474. Videogame Theory and Design. 3 Credits. H**
This course surveys the history and aesthetics of videogames and then provides a deep dive into the theory, design principles and techniques of game development on the Unity platform. Through assignments geared toward critical design, students gain the skills necessary for game-building in the areas of visual, narrative, game, level and sound design that comprise a typical development team. Although no prior coding experience is necessary, students may benefit from prior knowledge of C#, 3D modeling, or animation.

**FMS 475. Advanced Video Production. 3 Credits. H**
Special projects in video production, using both studio and remote locations. Prerequisite: FMS 375.

**FMS 477. Sound Design. 3 Credits. H**
Students will study and produce film and video work with an emphasis on sound design theory and practice. Course projects consist of several short works in response to readings and screenings, which include a survey of sound in cinema, internet and radio. Students will also become conversant with related equipment, software and techniques. Prerequisite: FMS 275.

**FMS 478. Experimental Production. 3 Credits. H**
Students will produce experimental film and video projects, including installation art and performance art pieces, in both collaborative and a collaborative production modes. Practical production aspects of historical experimental works will be studied, with emphasis on creation of works inspired by these earlier artists and their work. Unorthodox video and film production concepts and modes will also be studied and used in the creation of original works. The incorporation of experimental elements in the creation of mainstream works, and the creation of such projects, will also be a key area of study and experimentation. By pushing their individual creative limits, students will gain an appreciation for the experimental film and video genre, as well as an expansion of their production skills. Prerequisite: FMS 275.

**FMS 479. Documentary Production. 3 Credits. H**
This is a hands-on production course in which students will research, plan and produce short-form non-fiction documentaries. The class is dedicated to training young professionals in the principles, skills, techniques, habits and practices of documentary production. We will focus also on the aesthetics of our craft and the documentary form. The objective is to ground students in the fundamental skills of good non-fiction storytelling-conceptualization, research, story structure, theme development, writing, producing and directing. The goal is the production of several short-form compositions (videos) where storytelling is employed to communicate a concept or idea effectively. Students will form into teams to research, develop and produce a course-long short-form documentary. Prerequisite: FMS 275.

**FMS 480. Music Video Production. 3 Credits. H**
This course will cover elements of the history, aesthetics, and business of music video and music video production. Students will view and discuss many different types of music videos, and will learn how to classify and critique these videos in a professional manner. Students will gain familiarity with the genres, themes, forms, and iconography of music video; an understanding of the place of music video in media culture; an exploration of the ideological, cultural, and historical contexts of music video; and an ability to create or assist in the creation of professional-quality music videos. Prerequisite: FMS 275.

**FMS 498. Honors Seminar. 2-6 Credits. H**
Study may be directed toward either (a) reading for integration of knowledge and insight in film and media, or (b) original research (i.e., investigation of a specific problem in film and media). Six hours maximum credit. Prerequisite: Consent of Departmental Honors Coordinator.

**FMS 499. Directed Study in Film. 1-6 Credits. H**
Investigation of a special topic or project selected by the student with advice, approval, and supervision by an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. A maximum of six hours credit may be counted toward a degree. Prerequisite: At least seven hours credit in the department and consent of instructor.

**FMS 530. Film and Media Theory. 3 Credits. H**
Comprehensive examination of most significant theories and theorists of film. Organized around specific questions, e.g., what qualities make film art unique, and how is film related to other visual and literary arts? Class discussion, individual projects. Prerequisite: FMS 100 or equivalent (determined by instructor).

**FMS 543. Contemporary Japanese Film. 3 Credits. NW H**
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 543.) Prerequisite: Junior status.

**FMS 544. African Film. 3 Credits. W**
A critical study of Africa and its peoples as depicted in films. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films are examined. (Same as AAAS 555.)

**FMS 585. Capstone in Film and Media Studies. 4 Credits. H**
This course integrates the knowledge and skills acquired across the curriculum of Film & Media Studies including academic studies, but also production and other related disciplines to enable the student to demonstrate achievement through the production of a major creative
research project. Prerequisite: Must be admitted to the Film and Media Studies B.A. or B.G.S. degree. Must have completed one FMS production course.

**FMS 592. Documentary Film and Video. 3 Credits. H**
An historical and theoretical survey of that major genre of film and video typically termed "documentary." The course will trace the main historical developments from documentary's beginnings through contemporary innovations. Prerequisite: FMS 100 and FMS 310, FMS 311, or consent of instructor.

**FMS 593. Experimental Film and Video. 3 Credits. H**
A history of experimental film and video through an examination of major artists, movements, theories, and films/tapes. Prerequisite: FMS 100 and FMS 310, or consent of instructor.

**FMS 620. International Women Filmmakers. 3 Credits. H**
This course examines films made by women around the world. Mainstream and independent fiction, documentary, and experimental works will be screened and discussed. The objectives of the course are: 1) to learn the variety of films made by women and the conditions of their production, distribution, reception. 2) to interrogate the idea of women's cinema as 'counter-cinema'. We will acquire tools for analyzing films in terms of economic, aesthetic, cultural, and political circumstance by women of different countries, classes, races, ethnicities, genders, and sexual preferences.

**FMS 673. Problems in Basic Screenwriting. 3 Credits. U**
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structure of a full-length, three-act screenplay. In addition to the class sessions taught with FMS 273 Basic Screenwriting, separate consultations and specific research assignments for graduate students in FMS 673 are also required.

**FMS 675. Problems in Basic Video Production. 3 Credits. U**
Theory and practice of single-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. In addition to the class sessions taught with FMS 275 Basic Video Production, separate consultations and specific research assignments for graduate students in FMS 675 are also required. Lecture-laboratory.

**FMS 702. Graduate Seminar in: _____ 1-3 Credits.**
Course organized any given semester to study particular subject matter or to take advantage of special competency by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

**FMS 704. Study Abroad Topics in: _____ 1-6 Credits.**
This course is designed for the study of special topics in Film. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**FMS 707. Film/Media Internship. 3-12 Credits.**
Study with an approved film or media company. Emphasis may be in one or all of the following areas: acting, directing, or promotion management. No more than six hours may be applied to an M.A. degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

**FMS 715. Survey of Japanese Film. 3 Credits.**
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth century Japanese film. Through secondary readings, lectures, and discussions students will examine how Japanese cinema, as an institution, responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 715.)

**FMS 716. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Credits.**
This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression during dictatorship, globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity, immigration and identity in contemporary cinema. In addition to the lecture sessions taught in tandem with FMS 316, additional research component, lecture presentation, and class meeting are also required.

**FMS 718. Anti-war Films. 3 Credits.**
An overview and exploration of the history of the portrayal of anti-war film and media themes to show how anti-war attitudes and political policy can be affected by positive and negative depictions of conflict. Analysis of selected films. FMS 318 and FMS 718 will meet concurrently, though separate consultations and specific research assignments for FMS 718 are also required.

**FMS 722. Soviet and Post-Soviet Russian Cinema. 3 Credits.**
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. Not open to students with credit in SLAV 322/FMS 322. (Same as SLAV 723.)
Prerequisite: Graduate standing or instructor permission.

**FMS 743. Contemporary Japanese Film. 3 Credits.**
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 743.)

**FMS 745. New Media and Society. 3 Credits.**
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in production-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key digital skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level.

**FMS 750. Indigenous Film and Media. 3 Credits.**
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum-including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools.
FMS 773. Problems in Intermediate Screenwriting. 3 Credits.
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structuring of a full-length, three act screenplay. In addition to the class sessions taught with FMS 373 Intermediate Screenwriting, separate consultations and specific research assignments for graduate students in FMS 773 are also required.

FMS 775. Problems in Intermediate Video Production. 3 Credits.
Theory and practice of multiple-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation, and audio. In addition to the class sessions taught with FMS 375 Intermediate Video Production, separate consultations and specific research assignments for graduate students in FMS 775 are also required. Lecture-laboratory.

FMS 776. Problems in Cinematography. 3 Credits.
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. FMS 776 meets concurrently with FMS 376; students enrolled in the graduate-level course will have separate consultations and specific research assignments. Lecture-laboratory. Prerequisite: Consent of instructor and FMS 675.

FMS 777. Post-Production. 3 Credits.
Students will become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: Consent of instructor.

FMS 800. Introduction to Graduate Study in Film/Media. 3 Credits.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in film and television. The course should be taken at the beginning of the graduate student's program.

FMS 801. Professional Development Seminar. 1 Credits.
Preparation and training for faculty careers in film and related fields, including research skills and methods, responsible scholarship, teaching, and service. Other topics vary from semester to semester. May be repeated for credit.

FMS 811. Development of the American Sound Film. 3 Credits.
Intensive study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television.

FMS 813. Development of the International Sound Film. 3 Credits.
Intensive study of the artistic, economic, and sociological development of the international sound film with emphasis on the cinemas of England, France, Italy, Germany, Sweden, and Eastern Europe.

FMS 814. Development of African-American Images in Film. 3 Credits.
A history and critical assessment of the development of diverse images of African-Americans in American cinema and the impact of those images of American society. Screenings of feature and independent films, including those by African-Americans. In addition to the lecture/screening sessions taught in tandem with FMS 314, a separate discussion section and specific research assignments for graduate students enrolled in FMS 814 are also required.

FMS 862. Survey of Film and Media History. 3 Credits.
This seminar will be primarily international in scope and will concentrate on the following: technological and production issues relating to the transition in 1927-1931 of silent to sound film; the constructions of national identity, including those of recently emerging cultures; a comparison and contrast of the censorial agencies in America and abroad; and current revisionist perspectives on received film and media history.

FMS 863. Survey of Documentary and Experimental Film and Media. 3 Credits.
Surveys the important historical and theoretical issues pertinent to both the documentary and experimental approaches as expressed in film, video and new technologies. Includes major documentary and experimental genres, directors, national schools, artistic movements, and landmark works. Screenings reflect a chronology from origins to present-day.

FMS 865. Film and Media Theory. 3 Credits.
This seminar is a comprehensive survey of the major classical and contemporary film and media theories and theorists, such as Munsterberg, Eisenstein, Bazin, and Adorno. The course includes film and media theory since the 1970s, moving through structuralism and into the posts: -structuralism, -modernism, -colonialism, and beyond. Within these broad paradigms some of the theories examined in depth are cinesemiotics, Marxism, cinematic apparatus, feminist film theory, reception theory, new media and virtual reality.

FMS 875. Problems in Advanced Video Production. 3 Credits.
Special projects in video production, using both studio and remote locations. In addition to the class sessions taught with FMS 475 Advanced Video Production, separate consultations and specific research assignments for graduate students in FMS 875 are also required. Prerequisite: FMS 775 or consent of instructor.

FMS 880. Development of American Popular Culture in the: _____ 3 Credits.
Intensive interdisciplinary examination of popular culture forms and their relationships with the social, political, and economic dynamics of America in a specific decade, with emphasis on film, broadcasting, theatre, music literature (including magazines and newspapers), and the graphic arts. Decade to be studied changes as resources and needs develop.

FMS 888. Special Problems in Film History and Criticism. 1-4 Credits.

FMS 895. Intensive Film Project Seminar. 1-4 Credits.
The student plans and executes an intensive special project which requires the professional skills of investigation and performance appropriate to radio, television and/or film. May be repeated for credit up to a maximum of six credit hours. (This seminar is to the special project program what “thesis” is to the traditional program.)

FMS 897. Practicum in Film. 1-3 Credits.
Various approaches to the illustration of principles of production in film and/or video through the supervision of laboratory exercises and subsequent evaluation by the Theatre and Film graduate faculty.

FMS 898. Investigation and Conference (for Master's Students). 1-8 Credits.
Directed research and experimentation in film or media. Limited to eight hours credit toward the Master's degree.

FMS 899. Master's Thesis. 1-6 Credits.

FMS 902. Film Seminar in: ______. 3 Credits.
A graduate seminar devoted to selected historical, theoretical, or critical issues. Prerequisite: Consent of instructor.
FMS 998. Investigation and Conference (for Doctoral Students). 1-8 Credits.
FMS 999. Doctoral Dissertation. 1-12 Credits.

Bachelor of Arts and Bachelor of General Studies in Film and Media Studies

Why study film and media?
The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

The FMS major does not require an application, however, if a student decides to add the FMS major or change their major from an area of study outside of the School of the Arts, they will need to submit a Change of School form before the major can be added to their degree plan.

Film and Media Studies Programs
The film and media studies department is housed in Summerfield wherein students will gain experience in film/video production in newly renovated studio spaces. B.A. and B.G.S. requirements are quite different, so it is important to check with a department advisor. The B.A. in film and media studies introduces students to the overall field of film and media studies and prepares them for graduate study. The B.G.S. in film and media studies prepares students broadly in film/video production.

Requirements for the Culture & Studies Emphasis

Majors must complete each of the following areas:

Cultural Studies (choose one of the following) 3
- FMS 315 Survey of Japanese Film
- FMS 316 Cinemas of the Southern Cone: Argentina, Chile, and Uruguay

Anti-war Film 3
- FMS 318

Indigenous Film and Media 3
- FMS 350

International Women Filmmakers 3
- FMS 620

New Media and Society 3
- FMS 345

Storytelling with Digital Media 3
- FMS 355

Videogame Theory and Design 3
- FMS 474

Documentary Film and Video 3
- FMS 592

Experimental Film and Video 3
- FMS 593

Basic Screenwriting 3-4
- FMS 273

Basic Video Production 3
- FMS 275

Animation 3
- FMS 374

History of the Silent Film 3
- FMS 310

History of the American Sound Film 3
- FMS 311

History of the International Sound Film to 1950 3
- FMS 312

History of the International Sound Film Post 1950 3
- FMS 313

History of African-American Images in Film 3
- FMS 314

Capstone 4
- FMS 585

Film and Media Electives
Satisfied by 6 hours from courses in the Film & Media Studies department (any course with an FMS prefix) 6

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 40-41 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major, of which 8 must be at the junior/senior (300+) level.
Major Junior/Senior Hours
Satisfied by a minimum of 25 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Graduation Plan
With careful planning and commitment to a full-time course load, you can graduate in 4 years. For details please consult the department.

Capstone
- FMS 585 Capstone in Film and Media Studies 4

Film and Media Studies Electives
Satisfied by 6 hours elected from courses in the Film & Media Studies 6 department (any course with an FMS prefix).

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 41 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major, of which 8 must be at the junior/senior (300+) level.

Major Junior/Senior Hours
Satisfied by a minimum of 22 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Film & Media Studies with the following concentrations can be found here: Culture and Studies (p. 1914) and Production (p. 1915), or by using the left-side navigation.

Sample 4-year plans for the BGS degree in Film & Media Studies with the following concentrations can be found here: Culture and Studies (p. 1916) and Production (p. 1917), or by using the left-side navigation.

Departmental Honors
An undergraduate interested in honors in film and media studies must present a written declaration of intention to the department’s honors coordinator as early as possible in the junior or senior year. The following are required:

1. A grade-point average at the time of declaration and at graduation of at least 3.5 in film and media studies courses.
2. Six hours in FMS 498 Honors Seminar. Enrollment in this course must be approved by the honors coordinator. Students in the honors seminar work under the direction of one instructor for each semester. The instructor conducts an examination at the end of each semester’s work and assigns a grade. Credit only is given to students who complete the work assigned for any semester but do not complete the requirements for honors. Students may change area of interest or instructor at the beginning of a semester with the consent of the honors coordinator.
3. Satisfactory performance in a final oral examination given approximately one month before graduation.

### BA in Film & Media Studies with concentration in Culture and Studies

Below is a sample 4-year plan for students pursuing the BA in Film and Media Studies with a Culture and Studies concentration. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

---

¹ The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

² BA in Film & Media Studies with concentration in Culture and Studies

³ Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

⁴ The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

⁵ Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

⁶ For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

---

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

Please note:

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

- FMS Elective can be any Film (FMS-coded) course (Production or Culture and Studies)
- FMS 380, FMS 302, and FMS 303 are topics courses meaning they can be repeated for credit as long as the topic differs.
• FMS 273 Basic Screenwriting offered in the Fall only (satisfies Production requirement).
• FMS Options for KU Core Goal 4.1 and Goal 4.2. See FMS Advisor for more details.
• FMS 275 and FMS 585 are in the process of being upgraded to 4 credit hours.
• FMS 301 will be discontinued across FA22-SP23 Academic Year.

**BA in Film & Media Studies with concentration in Production**

Below is a sample 4-year plan for students pursuing the BA in Film and Media Studies with a production concentration. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 FMS Intermediate Production Offerings: FMS 273, FMS 303, FMS 373, FMS 374, FMS 375, FMS 376, FMS 474, FMS 478, FMS 477, FMS 478, FMS 479, FMS 480
3 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
4 FMS Options for Goal 4.2 // Some language study satisfies Goal 4.2 as well
5 FMS Options for Goal 4.1 // Some language study satisfies Goal 4.1 as well
6 FMS 425 Ethics in Storytelling satisfies KU Core Goal 5
7 FMS 593 Experimental Film and Video offered in FALL ONLY, and FMS 592 Documentary Film and Video offered in SPRING ONLY
8 This sample plan assumes all FMS Electives/Intermediate Production selections will be 300-level or above.
9 Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
10 For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific
BGS in Film & Media Studies with concentration in Culture and Studies

Below is a sample 4-year plan for students pursuing the BGS in Film & Media Studies with concentration in culture and studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

¹ FMS Culture and Studies Offerings: FMS 315, FMS 316, FMS 318, FMS 350, FMS 620
² FMS Options for Goal 4.1 (Contact FMS Advisor for more information)
³ Media Requirement classes not on set rotation.
⁴ FMS Options available for Goal 4.2 (Contact FMS Advisor for more information)
⁵ FMS 425 Ethics in Storytelling satisfies KU Core Goal 5
⁶ FMS 593 Experimental Film and Video offered in FALL ONLY and FMS 592 offered in SPRING ONLY.
⁷ Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
⁸ Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, two certificates, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

- The FMS department recommends no more than two production classes a semester.
- FMS Elective can be any Film (FMS-coded) course (Production or Culture and Studies)
- FMS 380, FMS 302, FMS 303 are all topics courses meaning they can be repeated for credit as long as topic differs.
- Screenwriting Sequence: FMS 273 Basic Screenwriting offered in the Fall and FMS 373 Intermediate Screenwriting in the Spring. FMS 273 is the pre-req for FMS 373

Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, two certificates, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

- FMS Elective can be any 300+ Film (FMS-coded) course (Production or Culture and Studies).
- FMS 380, FMS 302, and FMS 303 are all topics courses meaning they can be repeated for credit as long as the topic differs.
BGS in Film & Media Studies in Production

Below is a sample 4-year plan for students pursuing the BGS in Film and Media Studies, Production concentration. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

4. FMS Options for Goal 4.2 (Contact FMS advisor for more information)
5. FMS 593 offered FALL ONLY and FMS 592 offered SPRING ONLY
6. This sample plan assumes all FMS Electives/Intermediate Production selections will be 300-level or above.
7. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
8. Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, two certificates, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be these additional major requirements.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

- The FMS Department recommends no more than two production classes per semester.
- FMS Elective can by any 300+ Film (FMS-coded) course (Production or Culture and Studies)
- FMS 380, FMS 303, and FMS 302 are all topics courses meaning they can be repeated for credit as long as the topic differs.
• Screenwriting Sequence: FMS 273 Basic Screenwriting offered in the Fall and FMS 373 Intermediate Screenwriting in the Spring. FMS 273 is the pre-req for FMS 373.

**Minor in Film and Media Studies**

**Why study film and media?**

The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Please note, FMS Production coursework is reserved for FMS Majors.

**Undergraduate Certificate in Media Cultures**

The Undergraduate Certificate in Film & Media studies offers an examination of media strategies for analysis and storytelling in contemporary culture. The certificate is structured around five courses that integrate theory and application, designed for non-residential, non-traditional, and professional students. These courses offer a global perspective through an analytical, ethical and creative framework for evaluating media in a diversity of contexts.

To be awarded the certificate, students must successfully complete four of the following five courses:

**Master of Arts in Film and Media Studies**

**Why study film and media?**

The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

The affiliation of the Department with the College of Liberal Arts and Sciences (http://clas.ku.edu/) and the School of the Arts (http://sota.ku.edu/) reflects a liberal arts perspective towards the study of film and media as well as hands-on production elements. We see film and media as ways of ordering, clarifying, and understanding human experience.

We are humanists, sharing the general goal of discovering and putting into communicable form hypotheses about human beings and the world as they interact with it. We are scholars and practitioners, and our work includes the creation of film and media, teaching, and scholarship. As a result we serve our disciplines, the University, and the surrounding community in our capacities as teachers, scholars, and artists.

Discover how film and media can change your life. In KU Film and Media Studies you’ll find a community that shares your passion for film and media and is dedicated to helping you succeed in today’s changing media landscape. You’ll find your place here within the School of the Arts’ creative community.

The M.A. degree is an academic degrees but students are also expected to complete courses in film and video production. All M.A. students in Film and Media Studies must write a thesis as the culmination of their degree.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2408) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admissions

A full list of application materials and deadlines is available on The Department of Film and Media Studies admission pages (https://film.ku.edu/admission/#Graduate%20Admission). The Department of Film and Media Studies does not admit new students for the Spring or Summer terms.

The completed application should be submitted online (https://gradapply.ku.edu/apply/).

M.A. Degree Requirements

The Master of Arts in film and media is an academic degree, but students are expected to complete 3 hours in film and video production. All M.A. students must write a thesis as the culmination of the degree.

To be admitted, a student ordinarily is expected to have a Graduate Record Examination score of at least 160 (verbal), 144 (quantitative), and 4.5 analytical writing.

To complete the M.A., the student must sustain a grade-point average of 3.0 or higher through 33 graduate credit hours.

Requirements for the M.A. in Film and Media Studies

A total of 30 hours is required. Students will complete 9 credits of Film and Media Studies Core, 3 credits of Production courses, 3 credits of FMS 902, 3 credits of Film and Media electives, 6 credits of non-FMS electives related to their chosen thesis topic and 6 credits of thesis hours.

A full list of application materials and deadlines is available on The Department of Film and Media Studies admission pages (https://film.ku.edu/admission/#Graduate%20Admission). The Department of Film and Media Studies does not admit new students for the Spring or Summer terms.

The completed application should be submitted online (https://gradapply.ku.edu/).
Ph.D. Degree Requirements

Film and Media Studies Core Requirements
18 hours of core courses are required. Doctoral students in film and media studies must take a core of courses aimed at strengthening methodological, historical, and theoretical grounding. 1 graduate-level production course is required, and 1 course in FMS 902 Film Seminar is mandatory.

Film and Media Studies Professional Development Requirement
6 hours of FMS 801 are required. This will be satisfied by attending the FMS colloquia throughout the semester. (1 day per week each semester)

Film and Media Studies Elective Requirements
9 hours of electives are required. Elective courses focus on the academic study of history, international cinema, popular culture, and digital media, among other areas. These courses are selected with a graduate advisor to reflect the student's special interest. The advisor may increase the number of hours, depending on the student's academic needs.

Film and Media Studies Production Requirements
3 hours of production courses are required. Production courses give students an understanding of the production process in making film, video, or animation pieces. On graduation, doctoral students can perform as competent artisans in addition to research scholars. Production courses are selected with a graduate advisor to reflect the student's specific interest. The advisor may increase the number of hours, depending on the student's academic needs.

Secondary Field Requirements
9 hours of secondary field courses at the graduate level from outside the Department of Film and Media Studies are chosen to assist the student in writing the dissertation. They are related to the student's proposed area of specialization. Examples include English; History; Women, Gender, and Sexuality Studies; American Studies; Education; and Social Welfare.

Additionally, students will select their second Research Skills and Responsible Scholarship from their secondary field.

Research Skills and Responsible Scholarship (RSRS) Requirements
KU requires all doctoral students to meet the Research Skills requirement before proceeding to comprehensive exams. Compliance with this policy requires all graduate students to receive training in responsible scholarship pertinent to the field of research and obtain research skills pertinent to the doctoral level of research in their field(s).

Research Skills requirements may be satisfied by:

<table>

<td>3</td>
</tr>
</tbody>
</table>

An additional RSRS course outside of the department, approved by the Director of Graduate Study, preferably from the student's secondary field

Comprehensive Examination
2 publishable papers are due at the time of the examination. The examination includes written responses to questions in history, theory, and area of specialization, followed by an oral examination.

Dissertation
Students who have completed the comprehensive exam are required to enroll in accordance with the post-comprehensive enrollment policy. (https://coga.ku.edu/progress-to-degree/enrollment/post-comprehensive-enrollment/) The finished dissertation must constitute a palpable contribution to knowledge in the candidate’s chosen field. After its completion, an oral defense must be held no less than 4 weeks before the graduation deadline. The exam committee must meet Doctoral Student Oral Exam Committee composition requirements (https://policy.ku.edu/graduate-studies/oral-exam-committee-composition/).

Graduate Certificate in Film and Media Studies
The Graduate Certificate in Film and Media Studies (https://film.ku.edu/gc-overview/) provides a concentration in core film and media theory and history courses. This certificate is designed for graduate students whose research includes analysis of media text and technologies, and provides training in methodologies and a basic familiarity with critical and
to engage in all aspects of production onstage and backstage. Students have opportunities to continue study year-round working with union actors, choreographers, directors, and designers with our critically acclaimed Kansas Repertory Theatre (KRT) and the Summer Dance Intensive, in partnership with the Lawrence Arts Center.

Internationally Recognized Faculty Scholars and Artists

The faculty of the Department of Theatre and Dance is creative artists and researchers working in the areas of theatre stagecraft, choreography, performance, design, dramatic literature, dramaturgy, and pedagogy, as well as the historical, literary, and cultural study of theatre, dance, and performance. Our faculty includes award-winning teachers, scholars, and artists working in professional theatre and dance, authoring books and establishing nationally and internationally recognized research and outreach programs.

Support for Students

The Department of Theatre and Dance offers students financial aid in the form of dozens of scholarships, awards, and teaching assistantships each year to graduate and undergraduate students. Friends of the Theatre (FROTH), a community group dedicated to supporting the mission of the University Theatre, provides a fantastic support network for our student shows and curricular enrichment opportunities. Donors to the Dance Division endow support for guest choreographer residencies each semester and special opportunity funds. Once students graduate our program, they join an extensive network of theatre and dance alumni and Professional Advisory Board members that work in all aspects of academe, the entertainment industry, and non-profit organizations.
