An introduction to the nature of theory and theory building in the study of human communication. Research methods include experimentation, survey, content analysis, and field description. An introduction to statistics and statistical tests is included as well. Prerequisite: MATH 101 and admission to the Communication Studies major or consent of instructor.

COMS 357. Introduction to Rhetoric and Social Influence, Honors. 3 Credits. H
This course examines in detail the texts of speeches and essays on controversial issues in order to illustrate the varied forms of rhetorical action and the diverse modes of analysis and evaluation that can be applied to them. Examples are drawn from the rhetorical literature of contemporary U.S. speakers and prose writers. Prerequisite: COMS 130
or COMS 230. Open only to students admitted to the University Honors Program, or by consent of the instructor.

**COMS 405. Speech Writing. 3 Credits. H**

Emphasis is on actual practice in preparing speech manuscripts for oneself and others. Model speeches are examined to better understand language, evidence, and stylistic choices available to speech writers. The ethical dimensions of writing for others in corporate and political positions are stressed. Students are required to prepare a variety of speeches and analyses of others' speeches. Prerequisite: COMS 130, COMS 150, or COMS 230.

**COMS 410. Micro-Level Organizational Communication. 3 Credits. S**

An examination of dyadic level communication in organizations, with emphasis on contexts of superior-subordinate and peer communication. The course also addresses contexts of organizational entry and exit, perception and judgment, information seeking, feedback, and organizational attachment. This course also explores social identities (gender, race, social class, sexuality, ability, and age) and the way they are relevant to communication in contemporary workplaces. Prerequisite: COMS 310.

**COMS 415. Communication, Leadership, and Conflict Management. 3 Credits. S**

This course introduces students to theories of conflict management from a variety of academic perspectives and the role leadership plays in managing conflict across multiple contexts. Students will learn how to successfully assess and command situations and effectively resolve interpersonal, organizational, and systemic conflict while doing the work of leadership. (Same as LDST 420.)

**COMS 420. Communication, Technology and Globalization. 3 Credits. H**

Examines the social, cultural, and economic challenges and opportunities advanced communication technologies and globalization pose to processes such as democratic deliberation, urban governance, and environmental sustainability. Prerequisite: COMS 130.

**COMS 425. Communication and the American Presidency. 3 Credits. H**

Examination of the ways in which American presidents communicate with the American people and how such communication influences the public. Emphasis is on a number of approaches to better understanding presidential communication, including rhetorical, historical, and content analysis. Prerequisite: COMS 130 or COMS 230.

**COMS 440. Communication and Gender. 3 Credits. S**

Focuses attention on the relationship between communication and gender, including both physical and psychological dimensions. Topics include: sex role orientations and stereotypes; perceived and actual differences in verbal and nonverbal communication behaviors; the influence of gender on communication in a variety of contexts. (Same as WGSS 440.) Prerequisite: COMS 130, or COMS 230.

**COMS 441. Health Communication. 3 Credits. H**

This course is a survey of the many disciplines found in the field of health communication, including persuasion that targets health-related behavior, negotiation of treatment with health care providers, emotional support of patients, news media coverage of medical research, and health campaign principles. Prerequisite: COMS 130.

**COMS 447. Intercultural Communication: The Afro-American. 3 Credits. H/W**

An examination of the barriers to effective communication between black Americans and non-black Americans. (Same as AAAS 420.) Prerequisite: COMS 130 or COMS 230.

**COMS 450. Ethical Issues in Political Communication. 3 Credits. H**

Application of ethical standards to the evaluation of political communication. Examination of value questions related to advocacy in modern society (propaganda, demagoguery, credibility). Analysis of First Amendment rights and other issues pertaining to censorship and freedom of speech (defamation, dissent, incitement, public morals, privacy). Prerequisite: COMS 130 or COMS 230.

**COMS 454. Rhetoric of Popular Culture. 3 Credits. H**

A study of the social and cultural importance of popular culture. Emphasis is on using rhetorical analysis and a number of important theoretical perspectives to help examine popular culture's often unnoticed influence. Prerequisite: COMS 130 or COMS 230.

**COMS 460. Undergraduate Seminar in: _____ 1-3 Credits. S**

Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (Distribution credit given for two or three hour enrollments only.)

**COMS 496. Capstone in: _____ 3 Credits. S**

In the capstone course students synthesize and apply knowledge and skills gained through the major. Capstone coursework requires students to integrate practices and theories learned in their areas of concentration. Topics within each concentration change as needs and resources develop. Prerequisite: Senior standing, COMS 130 or COMS 131, and completion of COMS 355 and COMS 356.

**COMS 498. Honors Thesis. 2-6 Credits. H**

(Six hours maximum credit, which may be distributed through two semesters.) Study should include readings directed toward original research, i.e., an intensive investigation of a specific problem in this field. Prerequisite: Consent of the Department Honors Committee.

**COMS 499. Directed Study in Communication Studies. 1-3 Credits. H**

(A maximum of six hours of credit may be counted, with not more than four in a single area of study.) Investigation of a special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading, or special research, individual reports and conferences. (Distribution credit given for two-three hours only.) Prerequisite: At least seven hours of credit in the department and consent of instructor.

**COMS 503. Post-Soviet Communication. 3 Credits. H**

This course is designed to acquaint students with the shifting manner of public discourse in Post-Soviet Russia and help them to explore in some depth cross-cultural communication between America and Russia. In addition to contemporary and historical background on Russian communicative practices, students examine discourse in business development, mass media, marketing, and advertising. All readings in English. (Same as SLAV 503).
are required. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission of instructor; admission to COMS major.

COMS 535. American Public Address, Puritans to 1900. 3 Credits. H
A history of American public address from the Puritans to about 1900. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 355.

COMS 536. American Public Address, 1900-Present. 3 Credits. H
A history of American public address from 1900 to the present. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 355.

COMS 537. Communication in Conflict Resolution. 3 Credits. S
An examination of conflict situations and the manner in which communication can serve as a vehicle for their intensification or resolution. The focus is on the theory of games as it applies to conflict within interpersonal situations; implications will be drawn for larger social systems. Prerequisite: COMS 130 or COMS 230.

COMS 538. Persuasion Theory and Research. 3 Credits. S
This course focuses on the social scientific study of persuasion. Traditional theories of attitude change and persuasion research are studied along with techniques of measuring attitudes. Attention is also given to the attitude-behavior relationship and the production of compliance-gaining messages. Prerequisite: COMS 130 or COMS 230.

COMS 539. Argumentation. 3 Credits. S
Analysis of the theory and techniques of argumentation in historical and contemporary writings, with special emphasis on the works of Aristotle, John Stuart Mill, Richard Whately, and Stephen Toulmin. Application of argumentation theory to political and legal discourse. Opportunity for student performances in the preparation and criticism of argument. Prerequisite: Four hours in the department.

COMS 543. Rhetoric of Sports in America. 3 Credits.
An examination of the way in which communication about sport in America functions to influence social relations in society. Students apply the tools of rhetorical criticism to study communication about sport in public address, mass media, and social media. The intent is to develop an understanding of communication theories and apply them to the world of sports. The course examines the relationship between sport and race, gender, class, violence, and community. It explores the ways that we talk about sports and the rhetorical and sociological implications of those conversations. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 130, COMS 230, COMS 355, or by instructor permission.

COMS 544. Advanced Interpersonal Communication: Theories and Research. 3 Credits. S
Intensive exploration of contemporary theories and research in the field of interpersonal communication; emphasis on an array of theoretical models and research exemplars; comparative analysis of major theoretical and research paradigms. Prerequisite: COMS 244 or instructor consent.

COMS 545. Rhetoric of War in America. 3 Credits.
An examination of the rhetoric of war throughout American history including in depth analysis of public address surrounding America’s involvement in wars from the War of 1812 through the War on Terror. We will apply the tools of Rhetorical Criticism to an analysis of public communication about war with a focus on justifications for war, war movies, the rhetoric of war protest movements, media coverage of warfare and public debates about issues of war and peace. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 130, COMS 230, COMS 355, or by instructor permission.

COMS 547. Communication and Culture. 3 Credits. S
A study of the systematic relationship between communication and culture. Emphasis is on culture as a variable in communicative situations: cultural aspects of attitude and cognition, language interchange, cultural differences in extra-verbal behavior, interaction between oral traditions and mass media. Prerequisite: COMS 130, COMS 230, or an introduction course in anthropology.

COMS 548. Advanced Interviewing Skills and Strategies. 3 Credits. S
Comprehensive study of communication processes in dyadic, face-to-face situations commonly encountered in organizations and professional environments. Intensive analysis of simulated and real-life interviews. Prerequisite: COMS 130 and COMS 330.

COMS 551. The Rhetoric of Black Americans. 3 Credits. H
A study of the rhetoric of Black Americans, from their earliest protest efforts to the contemporary scene, with the focus on the methods and themes employed to alter their status in American society. (Same as AAAS 534.) Prerequisite: COMS 130. Skills in basic composition essential.

COMS 552. The Rhetoric of Women’s Rights. 3 Credits. H
An analysis of the themes and rhetorical strategies of the women’s rights movement in America. The course will view the struggle for women’s rights from a historical perspective and will conclude with contemporary issues concerning the role of women in society. (Same as WGSS 552.) Prerequisite: COMS 130 or COMS 230.

COMS 555. Family Communication. 3 Credits. S
An examination of trends and theory related to the scientific study of the family, with a focus on issues related to family interaction, functioning, relationships, and communication. Research and theories from communication, sociological, and psychological perspectives are employed to examine topics such as family violence, mental health problems, marital satisfaction, divorce, courtship, and the impact of the family on its children (and vice versa). Prerequisite: COMS 130 or COMS 230.

COMS 557. East Asian Communication. 3 Credits. S
Explores the major communication theories and research in the East Asian cultural contexts by focusing on the Chinese, Japanese, and Korean cultures. Examines, from a broader perspective, certain cultural values (e.g. harmony, hierarchy, conservatism, and modernism) upheld in East Asian cultures and their influences on people's communicative behaviors in an age of globalization. Students explore issues of history, identity, verbal and non-verbal symbols, stereotypes, prejudice, values and thought patterning systems in the East Asian cultural context from a communicative perspective. This course is designed as a bridge course and meets with a graduate level section of the same title. Prerequisite: COMS 130.

COMS 560. Seminar in: ____. 3 Credits. S
Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (May be repeated for credit if content varies).

COMS 590. Nonverbal Communication. 3 Credits. S
Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems.
This course examines the theoretical and philosophical underpinnings of organizational communication research. Course topics cover variable analytic traditions and systems theory, as well as cultural, critical, and various interpretive approaches to understanding communication in organizational contexts.

**COMS 835. Impression Formation and Interpersonal Behavior. 3 Credits.**
Intensive investigation of the processes involved in impression formation and of the effects of established impressions upon interpersonal communication. (Same as PSYC 845.) Prerequisite: COMS 535 or PSYC 670.

**COMS 844. Seminar in Interpersonal Communication. 3 Credits.**
This class will address current theory and research in interpersonal communication. Issues addressed may include verbal or nonverbal communication in families, close relationships, initial interactions, and the like.

**COMS 851. Communication Research: Historical and Descriptive. 3 Credits.**
An introduction to types of historical and descriptive research in human communication. Library resources and methods of research will be covered. Emphasis will be placed upon preparing a research prospectus and upon writing the research report.

**COMS 852. Communication Research: Behavioral and Social Science. 3 Credits.**
An introduction to the process of research in communication studies, including consideration of basic principles in research design, methods of observation and measurement, and the application of appropriate statistical techniques.

**COMS 855. Qualitative Research Methods in Communication Studies. 3 Credits.**
Study of strategies for describing communication behavior in particular contexts, emphasizing ethnography and specific observational and interview data gathering and analysis methods. Prerequisite: COMS 755 or equivalent.

**COMS 856. Communication Research: Quantitative Analysis. 3 Credits.**
An intermediate overview of statistical techniques commonly used in communication research. Content will include a review of univariate statistical tests such as t-test, correlation, chi-square, and other nonparametric techniques of data analysis. Additionally, factorial analysis of variance, multiple regression, and factor analysis will be covered, along with the application of appropriate statistical techniques. Prerequisite: An introductory course in statistics.

**COMS 859. Proseminar in Communication Studies. 3 Credits.**
An overview and integration of communication studies based upon an examination of selected basic writings in the discipline.

**COMS 898. Investigation and Conference (For Master's Candidates). 1-8 Credits.**
(Limited to eight hours credit toward the M.A. degree.) Directed research and experimentation for M.A. students in some phase of speech science or the teaching of speech and drama.

**COMS 899. Master's Thesis. 1-6 Credits.**
Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis.

**COMS 907. Seminar in Political Communication. 3 Credits.**
This course will focus on contemporary political communication theory and illustrate how such theories are exemplified in modern political contexts: political arguments and developing consensus, communication
strategies in Congressional and bureaucratic decision-making, the rhetorical presidency, the dissemination of political information, political narrative, and political campaigns.

COMS 910. Organizing Identity, Identification, and Stigma. 3 Credits.
Students who take this course will: 1) deepen their knowledge about communicating with diverse populations, 2) enhance their understanding of gender, race, social class, sexuality, ability, and age, and 3) apply and advance their critical thinking, research, analysis, and writing skills. This course explores ideas and implications about identity, identification, and stigma within organized contexts like school, work, and nonprofit organizations. This seminar will focus on theoretical and practical issues relevant to identity and communication in contemporary organizations. Whether we realize it or not, we spend the majority of our lives in organizations like educational institutions and the workforce where we are continually interacting with diverse groups of people. Yet, many identities are stigmatized in organizational settings and those individuals often experience ostracism, stereotyping, and marginalization. The purpose of this course is to explore the power of communication to construct, reproduce, and transform social identities for ourselves and for others, within organizational contexts and acts of organizing.

COMS 920. Introduction to Teaching Oral Communication. 3 Credits.
This seminar prepares new graduate teaching assistants for their first teaching experience. Students will develop course materials including lectures, discussion prompts, assignments, exams based on pedagogical best practices. Students will apply theoretical concepts related to teaching, learning and assessment, and apply those theories to their own classrooms.

COMS 930. Seminar in Speech: ____. 1-4 Credits.
Special problems in speech.

COMS 933. Theories of Rhetoric: Neo-Classical. 2-3 Credits.
A study of the development of rhetorical theory from 325 A.D. to the twentieth century. Notable departures from the classical tradition will be examined. Special concentration on the writings of Augustine and the tradition of medieval preaching. Alcuin, Ramus, Bacon, Campbell, Whately, Blair, John Quincy Adams, and the elocutionary movement.

COMS 936. Seminar in Language and Discourse. 3 Credits.
This seminar uses interdisciplinary readings to examine central theoretical questions regarding language and communication. The course moves from considering major theoretical positions to current research in communication on discourse. Methodological issues in the study of language and discourse are also addressed.

COMS 939. Seminar in Argumentation. 2-3 Credits.
Examination of special problems in argumentation, with emphasis on the relationship of systems of argumentation to their philosophic presuppositions. Discussion of the writings of Toulmin, Natason, Johnstone, Perelman, Dewey. Prerequisite: COMS 539 or equivalent.

COMS 945. Seminar in Social Support. 3 Credits.
This course is a survey of the many disciplines of the fundamental form of communication known as social or emotional support or comforting. Emphases include message-, receiver-, and interactionally-oriented approaches, as well as support contexts, dilemmas, structures, features, and positive effects on physical and mental health.

COMS 946. Seminar in Communication and Intergroup Relations. 3 Credits.
Conceptual and theoretical frameworks for exploring and understanding relations between individuals from different societal groups (e.g., cultural/ ethnic, gender, age). Focus on issues of identity, power relations as manifested in interpersonal, mass media, and organizational contexts. The course will include methodological and applied implications for studying different groups, both within the USA and around the world.

COMS 948. Seminar in Organizational Communication. 2-3 Credits.
Analysis of speech communication functions in the organizational structures of business, industry, labor, military, education, government, and professional agencies. Development of conceptual schemes for conducting research and training programs on speech systems which characterize the operation of organized groups.

COMS 951. Seminar in Movement Theory and Genre Criticism. 3 Credits.
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on social movements and rhetorical genres. It will review existing theory on these topics, develop a methodological approach to both forms of critical analysis, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor.

COMS 952. Seminar in Mythic and Narrative Approaches to Rhetorical Criticism. 3 Credits.
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on narrative rhetoric, with a special emphasis on myth as a type of narrative. It will review existing theory on these topics, consider a number of alternative methodological approaches, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor.

COMS 955. Seminar in Rhetorical Criticism. 3 Credits.
A study of contemporary and historical writings on rhetorical criticism. Emphasis is placed upon the development of critical methodology for future research and writing. Prerequisite: COMS 755.

COMS 958. Comparative Theories of Speech Communication. 3 Credits.
A descriptive and comparative analysis of theories of communication applicable to speech behavior. Prerequisite: COMS 859 or equivalent.

COMS 959. Theories of Rhetoric: Contemporary. 3 Credits.
A study of the writings on rhetorical theory in the twentieth century. Principal emphasis will be on the psychological treatment of rhetoric. I.A. Richards and Kenneth Burke, and the relationship in the twentieth century between rhetoric and dialectic, rhetoric and poetic. Prerequisite: COMS 859 or equivalent.

COMS 997. Research in: ____. 1-6 Credits.
Supervised research under the direction of a faculty member on a topic of mutual interest to the faculty and graduate student.

COMS 998. Investigation and Conference (For Doctoral Candidates). 1-8 Credits.
(Limited to eight hours credit towards the Ph.D. degree.) Directed research and experimentation for Ph.D. students in some phase of speech science or the teaching of speech and drama.

COMS 999. Doctoral Dissertation. 1-12 Credits.
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis.
Bachelor of Arts and Bachelor of General Studies in Communication Studies

The Communication Studies undergraduate major equips students with a diversity of skill sets by investigating communication in various cultural contexts, including relational, organizational, intercultural, political, and more.

In an increasingly globalized world, competent communication is crucial for career advancement, interpersonal relationships, and public democratic participation. Here’s what we know: humans rely on communication, and the creation and translation of symbols, language, and messages are integral to daily interactions. In other words, communication connects us.

The major expands on fundamental public speaking principles from the introductory course through emphasizing theories, methods, performances that apply to everyday communication practices.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Students should meet with departmental academic advisor or faculty member to declare a Communication Studies major.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

**Major Hours**

Satisfied by 33 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
A sample 4-year plan for the BA degree in Communication Studies can be found here: Communication Studies (p. 1262), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Communication Studies can be found here: Communication Studies (p. 1263), or by using the left-side navigation.

Departmental Honors
Outstanding undergraduates may earn departmental honors if they meet the following criteria:

1. A grade-point average at the time of graduation of at least 3.5 in Communication Studies courses.
2. Completion of an honors thesis involving independent research — either a single comprehensive project or an integration of several related projects. Completion requires satisfactory defense of the thesis in an oral examination and submission of a satisfactory thesis manuscript to the department office by one month before graduation. Independent research for the thesis must be conducted under the direction of a faculty member. The student must be enrolled with that instructor in 2 to 6 hours of COMS 498, usually over two semesters.

BA in Communication Studies
Below is a sample 4-year plan for students pursuing the BA in Communication Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120-123

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 The COMS 130/COMS 131 requirement can also be fulfilled by exemption (http://kucore.ku.edu/exemptions/).
3 COMS 356 is required for the major and requires admission to the BA in Communication Studies.
4 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
5 See degree requirements (p. 1261) for list of eligible courses.
6 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BGS in Communication Studies

Below is a sample 4-year plan for students pursuing the BGS in Communication Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1. The COMS 130/COMS 131 requirement can also be fulfilled by exemption.
2. Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
3. See degree requirements (p. 1261) for list of eligible courses
4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Minor in Communication Studies

Why study communication studies?

The Communication Studies undergraduate major equips students with a diversity of skill sets by investigating communication in various cultural contexts. Students will learn to appreciate the social, cultural, and technological dimensions of communication, as well as the ethical and legal implications of communication practices. The minor in Communication Studies is designed to complement a variety of majors and to enhance students' understanding of communication in various contexts.
contexts, including relational, organizational, intercultural, political, and more.

In an increasingly globalized world, competent communication is crucial for career advancement, interpersonal relationships, and public democratic participation. Here’s what we know: humans rely on communication, and the creation and translation of symbols, language, and messages are integral to daily interactions. In other words, communication connects us.

The major expands on fundamental public speaking principles from the introductory course through emphasizing theories, methods, performances that apply to everyday communication practices.

Requirements for the Minor

Students selecting the communication studies minor must complete 6 COMS courses (18 hours).

Prerequisite Knowledge. Minors must complete a public speaking requirement. These hours do not contribute to the minimum number of hours required for the minor.

(All courses available online)

**Master of Arts in Communication Studies**

The Communication Studies program offers a Masters of Arts at the Lawrence campus. The program in Communication Studies at the University of Kansas is research intensive and primarily designed to train students for careers doing research and teaching in the field of human communication at institutions of higher education. More specifically, our graduate program expects students to focus on one of the department’s two primary areas of research, with a narrower focus on one or two of the research subareas:

- Relationships & Social Interaction, with an emphasis on digital media, interpersonal, intercultural, and organizational communication.
- Rhetoric & Political Communication, with an emphasis on argumentation, democratic inclusion, digital media, political institutions, and public memory.

Across both areas of research, our department collectively focuses on communication as it relates to gender, race, social class, national identity, and other cultural indices. Moreover, the department offers training in qualitative, quantitative, and rhetorical methods.

Almost all Communication Studies graduate students are funded through the department as either Graduate Teaching Assistants (GTA) or Graduate Research Assistants (GRA), which both include competitive stipends, tuition coverage, and health care benefits. In addition, all GTAs and GRAs are provided annual travel assistant to attend academic conferences, and the department awards approximately $25,000 a year in graduate awards for research, teaching, and service.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of
Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy ([https://policy.ku.edu/graduate-studies/admission-to-graduate-study/](https://policy.ku.edu/graduate-studies/admission-to-graduate-study/)). Non-native speakers of English must meet Graduate Admissions’ English proficiency requirements ([https://gradapply.ku.edu/english-requirements/](https://gradapply.ku.edu/english-requirements/)).

Potential students must submit a complete online graduate application ([https://gradapply.ku.edu/apply/](https://gradapply.ku.edu/apply/)). For all domestic or international M.A. applicants, please check the application requirements and deadline on the MA Admissions webpage ([https://coms.ku.edu/admissions-ma/](https://coms.ku.edu/admissions-ma/)).

For additional questions regarding program requirements and application processes, please contact the Director of Graduate Studies, Dr. Yan Bing Zhang ([https://coms.ku.edu/people/yan-bing-zhang/](https://coms.ku.edu/people/yan-bing-zhang/)), or the Graduate Program Coordinator, Alec Graham ([https://coms.ku.edu/staff/](https://coms.ku.edu/staff/)).

**M.A. Degree Requirements**

**Communication Studies**

The Master of Arts in Communication Studies is a 30-credit hour program. Both a thesis and an exam option are available to M.A. students.

**THESIS Option**

This option is designed for students who are primarily interested in acquiring knowledge and skills that they can apply in the areas of their professional activities. Students finish a minimum of 30 credit hours of coursework and then must pass a written and oral examination.

**Exam Option**

This option is designed for students who are primarily interested in acquiring knowledge and skills that they can apply in the areas of their professional activities. Students finish a minimum of 30 credit hours of coursework and then must pass a written and oral examination.

**Code** | **Title** | **Hours**
--- | --- | ---
COMS 851 | Communication Research: Historical and Descriptive | 3
or COMS 852 | Communication Research: Behavioral and Social Science | 3

A second methodology course chosen in consultation with your advisor | 3

COMS 859 | Proseminar in Communication Studies | 3

COMS 899 | Master's Thesis | 6

Select at least 6 hours in each of 2 areas of communication | 12

Select 3 additional credit hours from any communication studies courses or from outside the department | 3

Final oral examination

**Total Hours** | **30**

**Thesis and Final Oral Examination**

M.A. students who have selected the thesis option are required to complete a written thesis in consultation with their faculty advisor and two additional committee members. In addition to the written thesis, students will be required to pass a final oral examination (thesis defense) conducted by their committee.

**Doctor of Philosophy in Communication Studies**

The Communication Studies program offers a Doctor of Philosophy (PhD) at the Lawrence Campus. The program in Communication Studies at the University of Kansas is research intensive and primarily designed to train students for careers doing research and teaching in the field of human communication at institutions of higher education. More specifically, our graduate program expects students to focus on one of the department’s two primary areas of research, with a narrower focus on one or two of the subareas:

- Relationships & Social Interaction, with an emphasis on digital media, interpersonal, intercultural, and organizational communication.
- Rhetoric & Political Communication, with an emphasis on argumentation, democratic inclusion, digital media, political institutions, and public memory.

Across both areas of research, our department collectively focuses on communication as it relates to gender, race, social class, national identity, and other cultural indices. Moreover, the department offers training in qualitative, quantitative, and rhetorical methods.

Almost all Communication Studies graduate students are funded through the department as either Graduate Teaching Assistants (GTA) or Graduate Research Assistants (GRA), which both include competitive stipends, tuition coverage, and health care benefits. In addition, all GTAs and GRAs are provided annual travel assistance to attend academic events.

Select at least 9 hours in each of 2 areas of communication | 18

Select 6 hours of electives | 6

General examination structured as follows: 1

1 hour written over required courses
2 hours written over the first major area of communication
2 hours written over the second major area of communication
1 hour oral examination

1 Each student must complete an examination over the 2 course work concentrations.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Eligibility criteria for admission to the Ph.D. program follow Graduate Studies' admission policy. Non-native speakers of English must meet Graduate Admissions' English proficiency requirements. Potential students must submit a complete online application. For all domestic and international Ph.D. applicants, please check the most updated application requirements and deadline on the COMS PhD Admissions page.

For additional questions regarding program requirements and application processes, please contact the Director of Graduate Studies, Dr. Yan Bing Zhang, or the Graduate Program Coordinator, Alec Graham.

Ph.D. Degree Requirements

The Communication Studies Ph.D. program is designed for students who have previously completed a Master’s degree in communication. Students are required to complete 42 credit hours of coursework, with at least 30 of those credit hours taken within Communication Studies. In addition to coursework, doctoral students will complete a comprehensive exam including both written and oral components. Following the comprehensive exam, doctoral candidates will complete a written dissertation and defend the dissertation in an oral defense.

Requirements include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 859</td>
<td>Proseminar in Communication Studies</td>
<td>3</td>
</tr>
<tr>
<td>COMS 851</td>
<td>Communication Research: Historical and Descriptive</td>
<td>3</td>
</tr>
<tr>
<td>or COMS 852</td>
<td>Communication Research: Behavioral and Social Science</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives

Electives may be chosen from another department or any phase of the program. These hours need not be all in the same department. They may be used to broaden or intensify the program, as long as they constitute a meaningful course of study. A list of potential electives is available to students on the COMS Graduate Studies Canvas page.

Research Skills & Responsible Scholarship requirement:

- The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the Comprehensive Oral Exam.
- This requirement may be fulfilled by taking either COMS 851 Communication Research: Historical & Descriptive or COMS 852 Communication Research: Behavioral & Social Science, in addition to four graduate research methods courses as approved by the Director of Graduate Studies.

Successful candidates will satisfactorily complete both a written and an oral comprehensive examination over communication theory, research methodology, and the student’s two areas of emphasis. All students must enroll in dissertation hours (COMS 999) in accordance with the University policy on Doctoral Candidacy.
Doctoral students will complete a written dissertation in consultation with their faculty advisor & committee members and must successfully defend this work in a final oral examination.

**Approved Methodology Courses**

The following lists identify methods courses taught in and outside of the department for the two main research areas: Relationships & Social Interaction and Rhetoric & Political Communication. The faculty of the Communication Studies Department agrees that these courses qualify as methods courses toward the course requirements for doctoral candidates.

Three caveats:

1. These lists are not comprehensive. Other courses may count as methods courses provided the student receives approval from the advisor.
2. The courses on these lists are not required. These are recommended courses for training in each methods type.
3. All methods courses should be chosen with the advisor's input.

Rhetorical methods courses include but are not limited to:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 930</td>
<td>Seminar in Speech: _____ (Postmodern Rhetorical Theories)</td>
<td>1-4</td>
</tr>
<tr>
<td>COMS 930</td>
<td>Seminar in Speech: _____ (Contemporary Theories in Public Address)</td>
<td>1-4</td>
</tr>
<tr>
<td>COMS 930</td>
<td>Seminar in Speech: _____ (Critical Theory as Critical Method)</td>
<td>1-4</td>
</tr>
<tr>
<td>COMS 930</td>
<td>Seminar in Speech: _____ (Feminist Theory)</td>
<td>1-4</td>
</tr>
<tr>
<td>COMS 951</td>
<td>Seminar in Movement Theory and Genre Criticism</td>
<td>3</td>
</tr>
<tr>

<td>Seminar in Mythic and Narrative Approaches to Rhetorical Criticism</td>
<td>3</td>
</tr>
<tr>
<td>COMS 955</td>
<td>Seminar in Rhetorical Criticism</td>
<td>3</td>
</tr>
</tbody>
</table>

Please consult with your advisor and other relevant faculty members about courses that may meet the research methods requirement. Courses that may be used to meet a Methods requirement instead of Theory, because they involve systematic and explicit reflection on research methods including appropriate research questions, objects of study, and units of analysis include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 933</td>
<td>Theories of Rhetoric: Neo-Classical</td>
<td>2-3</td>
</tr>
</tbody>
</table>

Courses outside of COMS may qualify as a rhetorical methods course subject to advisor approval.

**Qualitative Methods Graduate Courses at KU that are Not in Communication Studies:**

Courses with an asterisk have been recommended by our graduate students or affiliate faculty. Please review all course selections with your advisor prior to enrolling.

Computational Biology Program

Computational Biology Graduate Program

Computational Biology is an interdisciplinary science at the interface of biology, chemistry, medicine, mathematics, and computer science. Its goal is development and application of computational approaches to studies of life processes and improvement of human health. The Computational Biology Graduate Program recruits students with bachelor’s or master’s degrees who made a choice to pursue a career in computational biology. The Ph.D. degree in Computational Biology requires successful completion of formal courses and demonstration of accomplishments in basic research, qualifying examinations, scientific writing, and formal presentations of research data.

Courses

BINF 701. Computational Biology I. 5 Credits.
First semester of a two-semester course in bioinformatics and computational biology. Topics include basic concepts of bioinformatics and molecular modeling, bioinformatics databases, computational tools and modeling methods, protein sequence and structure alignment, conformational analysis, secondary structure determination, tertiary structure modeling (homology, threading, ab initio, protein folding and dynamics), networks, data mining and machine learning, as well as student presentations of material from current papers in the field of study and their own on-going research for discussion and critique. Students will also learn responsible scholarship, including allocation of credit, treatment of data, scientific misconduct, collaborative research, and mentor/trainee responsibilities. Prerequisite: College introductory biochemistry (no requirement for specific courses), math, and computer courses or concurrent enrollment in such courses and consent of instructor.

BINF 702. Computational Biology II. 5 Credits.
Second semester of a two-semester course in bioinformatics and computational biology. Topics include protein quaternary structure modeling (protein-protein/DNA/small ligand docking, binding, computer-aided drug design), protein structure-function relationships, modeling of genome-wide protein interaction networks based on structure, systems biology, mathematical and computational modeling of complex systems, synthetic biology and dynamics of chemical reaction networks as well as student presentations of material from current papers in the field of study and their own on-going research for discussion and critique. Students will also learn responsible scholarship, including allocation of credit, treatment of data, scientific misconduct, collaborative research, and mentor/trainee responsibilities. Prerequisite: BINF 701.

BINF 703. Advanced Computational Biology I. 5 Credits.
This is the first semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 701 and BINF 702, or consent of instructor.

BINF 704. Advanced Computational Biology II. 5 Credits.
This is the second semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 703.

BINF 709. Topics in: 1-3 Credits.
Advanced courses on special topics in Bioinformatics, given as need arises, including lectures, discussions, readings, or laboratory. Students may select sections according to their special interests.

BINF 999. Doctoral Dissertation. 1-12 Credits.
Original research that is to be incorporated into a PhD dissertation.

Doctor of Philosophy in Computational Biology

Computational Biology Graduate Program

Computational biology is an interdisciplinary science at the interface of biology, chemistry, medicine, mathematics, and computer science. Its goal is development and application of computational approaches to studies of life processes and improvement of human health. The Computational Biology Graduate Program recruits students with bachelor’s or master’s degrees who made a choice to pursue a career in computational biology. The Ph.D. degree in Computational Biology requires successful completion of formal courses and demonstration of accomplishments in basic research, qualifying examinations, scientific writing, and formal presentations of research data.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog. Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Ph.D. Admission

Admission Requirements

Applicants must have a bachelor’s or master’s degree in natural sciences, mathematics, engineering, or another relevant field. Applications are accepted online (https://gradapply.ku.edu/apply/).

Non-Degree Seeking Admission

Students who are interested in enrolling in graduate level coursework in the Department of Computational Biology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (http://compbio.ku.edu/apply-0/) for further details.

Ph.D. Degree Requirements

Students must earn credit in each of the following courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BINF 701</td>
<td>Computational Biology I</td>
<td>5</td>
</tr>
<tr>
<td>BINF 702</td>
<td>Computational Biology II</td>
<td>5</td>
</tr>
</tbody>
</table>
By the end of the second year, the student should have completed the formal course work to fulfill requirements for the degree. The student completes and submits a research proposal for the comprehensive oral examination. The proposal must develop a research topic related to the general areas of computational biology. The topic of the research proposal is decided upon by the student in consultation with the thesis advisor. Upon completion of the comprehensive oral examination, the student aggressively carries out research in the laboratory of the thesis advisor. In addition, the student continues attending the weekly Computational Biology seminar series and participating in the Computational Biology student seminar series. A Ph.D. degree is awarded once the student has written a final dissertation and carried out a successful defense of it before a committee.

The research skills training and responsible scholarship requirements are met through BINF 701/BINF 702 coursework, as well as through collaborations in the Center for Computational Biology, student research presentations and individual mentorship.

Department of East Asian Languages and Cultures

Why study East Asian languages and cultures?

We cover China, Japan, and Korea, three of the oldest continuous civilizations in the world. Study of these languages and cultures opens the door to immensely rich traditions in literature, philosophy, and art, as well as contemporary global phenomena such as Anime, K-pop, popular cuisines, and martial arts. And, with its long tradition of invention and creativity, East Asia is at the forefront of technological innovation today. Mainland China and Japan have the world’s largest economies after the United States, and, along with South Korea and Taiwan, are key U.S. trading partners. Thousands of US companies do business with East Asia. Economic and political relations with East Asia are of critical importance to the US and are becoming more significant every year.

Studying with us will prepare you for today’s interconnected world, open up opportunities for travel and adventure, and give you a competitive edge when you enter the job market. Learning an East Asian language and culture at KU is a fun, rewarding experience, and many students also study-abroad in East Asia while at KU. Students often pair an EALC major or minor with a second major to widen their skill-set and increase their competitiveness as they enter the global marketplace. Our graduates have gone on to successful positions in business, government, finance, non-profit organizations, teaching, research, and many other fields.

Undergraduate Programs

The department offers a full program of instruction in the languages, literatures, and cultures of China, Japan, and Korea.

With an EALC B.A., students can pursue a range of careers in business, government, education, nonprofit organizations, and many other fields, or continue on to graduate study in East Asian languages and literatures or related fields. Many students pair an EALC major or minor with a second major to widen their skill-set and increase their competitiveness as they enter the global marketplace. Some students choose an EALC B.A. to fulfill personal interests or connect with their heritage.

Placement

If students have already learned Chinese, Japanese, or Korean to some degree, whether at home, in a classroom, or elsewhere, they must take a placement test before enrolling in a language class. For more information on placement and proficiency exams see the department website (https://languages.ku.edu/placement-exams/) or contact the department administrator at 785-864-9250, email: ealc@ku.edu. (ealc@ku.edu) There is no fee for a placement test. To be eligible for enrollment in intermediate Chinese, Japanese, or Korean, a student must have earned college credit for the first year, or have earned 2 years of high school credit in that language, or have permission from the department based on the results of the placement test.

Retroactive Credit

Students with no prior college or university Chinese, Japanese, or Korean course credit are eligible for retroactive credit according to this formula:

- Students who place into second-semester Chinese, Japanese, or Korean (CHIN 108, JPN 108, KOR 108) and earn grades of C or higher may receive 2 hours of retroactive credit.
- Students who place into third-semester Chinese, Japanese, or Korean (CHIN 204, JPN 204, KOR 204) and earn grades of C or higher may receive 5 hours of retroactive credit.
- Students who place into fourth-semester Chinese, Japanese, or Korean (CHIN 208, JPN 208, KOR 208) and earn grades of C or higher may receive 7 hours of retroactive credit.
- Students who place into fifth-semester Chinese, Japanese, or Korean (CHIN 504 CHIN 504CHIN 504, JPN 504 JPN 504 JPN 504, KOR 504) and earn grades of C or higher may receive 10 hours of retroactive credit.

Students who want to be considered for retroactive credit must:

- Meet with their language faculty advisor to discuss previous study and familiarity of the language.
- Take a placement test to confirm language placement.
- Then, upon completion of the course, reach out to the EALC undergraduate advisor to receive credit:
  - Nicole Evans (nicoleevans@ku.edu)

Regardless of the number of credits received, students will be charged $50.00 by the Bursar’s office after the credits have been applied to their transcript.

Courses for Non-majors

Courses in English, suitable for non-degree seeking students, are listed under “EALC” (East Asian Languages and Cultures).

EALC also offers elementary and intermediate language courses in Tibetan (TIB 101, TIB 102, TIB 201, TIB 202) and Uyghur (UYGR 101, UYGR 102, UYGR 201, UYGR 202). Tibetan and Uyghur language
studies can be used to fulfill the CLAS second language requirement necessary to complete the B.A. degree.

**Graduate Program**

**M.A. in East Asian Languages & Cultures**

The Department of East Asian Languages and Cultures (EALC) is the only department in Kansas offering a regular program of instruction in the languages, literatures, and cultures of East Asia.

The EALC M.A. program trains students who will devote themselves to becoming effective links between the Far East and the United States.

Students concentrate in Chinese, Japanese, Korean, or East Asian Cultures, usually entering the program with at least two years of college-level language. The program typically takes two years to complete, including the defense of a Master's thesis or oral defense for non-thesis students.

**Graduate Non-Degree Seeking Status**

Students who are interested in enrolling in graduate-level coursework in the Department of East Asian Languages and Cultures without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department's webpage (https://ealc.ku.edu/graduate-nds/) for further details.

**Center for East Asian Studies**

The Center for East Asian Studies (http://www.ceas.ku.edu/) is a National Resource Center funded by the U.S. Department of Education. CEAS promotes East Asian language and area studies; coordinates interdisciplinary activities; works with the East Asian Library; advises students in East Asian studies; awards Foreign Language and Area Studies Fellowships in Chinese, Japanese, Korean, Uyghur, and Tibetan; and arranges special events related to East Asia on campus. CEAS also offers outreach to schools, businesses, and the community and serves as a regional resource for information about East Asia.

**Courses**

**CHIN 100. Elementary Conversational Chinese I. 3 Credits. U**

Three hours of class per week plus outside use of recorded text materials. Basic spoken language instruction intended primarily for beginners planning travel or work in China and Taiwan. Introduction to basic written characters. Does not fulfill College of Liberal Arts and Sciences foreign language distribution requirements or department major and minor requirements.

**CHIN 101. Elementary Conversational Chinese II. 3 Credits. U**

Continuation of CHIN 100. Prerequisite: CHIN 100 or equivalent.

**CHIN 102. Beginning Chinese I. 4 Credits. U**

Taught mainly in the summer, this course covers about 75% of the material in CHIN 104, upon which this course is modeled.

**CHIN 104. Elementary Chinese I. 5 Credits. U F1**

Three hours of lecture and three hours of spoken drill each week. An introduction to spoken and written modern standard Chinese (Mandarin). Not open to students with native ability in Mandarin or Chinese dialect. Students who have any previous knowledge of Chinese must take a placement exam before enrolling in Chinese classes at K.U. Consult Department of East Asian Languages and Cultures for details.

**CHIN 106. Elementary Chinese for Advanced Beginners. 3 Credits. U**

This course is designed for students who have already acquired some elementary Chinese language abilities (in high school or from family), but cannot be placed in CHIN 108, Elementary Chinese II. The course focuses on perfectioning listening, speaking, reading and writing skills, and prepares students for CHIN 108. For admission to the class, students must take the EALC Chinese placement exam, be interviewed by designated instructors, and approved.

**CHIN 108. Elementary Chinese II. 5 Credits. U F2**

Continuation of CHIN 104. Prerequisite: CHIN 101, CHIN 104, or equivalent.

**CHIN 177. First Year Seminar: _____ 3 Credits. U**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Chinese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**CHIN 204. Intermediate Chinese I. 5 Credits. U F3**

Continuation of CHIN 108. Three hours of lecture and three hours of spoken drill. Prerequisite: CHIN 108 or equivalent.

**CHIN 206. Intermediate Chinese Conversation. 2 Credits. U**

Practice in speaking, presentation of prepared talks, and guided discussions. This course is primarily used to award transfer credit and does not fulfill any portion of the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: CHIN 204 or equivalent.

**CHIN 208. Intermediate Chinese II. 5 Credits. U F4**

Continuation of CHIN 204. Prerequisite: CHIN 204.

**CHIN 251. Reading and Writing Chinese I. 3 Credits. H**

Designed for students, Chinese heritage speakers as well as second-language Chinese learners, who wish to learn or improve their abilities in reading and writing Chinese characters. Focuses on the 500 most commonly used Chinese characters and the major concepts essential for reading and writing Chinese characters. Chinese culture, customs and history that are reflected in Chinese characters will also be introduced.

**CHIN 252. Reading and Writing Chinese II. 3 Credits. H**

Continuation of CHIN 251. Focuses on another 500 most commonly used Chinese characters and the major concepts essential for learning to read and write Chinese characters, preparing students for possible entry into advanced courses in Chinese, e.g. CHIN 504 (Advanced Modern Chinese I), or, after appropriate testing, for possible exemption from the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: CHIN 251 or permission of the instructor.

**CHIN 290. Accelerated Chinese. 3 Credits. U**

Instruction in reading and writing Chinese for students who already possess a degree of oral/aural proficiency. This course will prepare students for enrollment in CHIN 504, Advanced Modern Chinese I. No prerequisites. Consent of instructor required.

**CHIN 342. Introduction to Classical Chinese. 3 Credits. H/W FP**

An introduction to Classical Chinese through detailed analysis of short original passages from a variety of early Chinese texts. Students gain a foundation in the grammar and vocabulary of Classical Chinese, preparing them for CHIN 544. The course is offered at the 300 and 500 levels, with additional requirements for students taking the 500 level. Prerequisite: A basic knowledge of Chinese characters (e.g. from CHIN 108 or JPN 108) and consent of the instructor, or CHIN 208 or JPN 208. Not open to students who have completed CHIN 542.

**CHIN 386. Advanced Chinese Conversation. 2 Credits. U FP**

Guided discussions designed to increase fluency and further improve pronunciation. Prerequisite: CHIN 504 or equivalent.
CHIN 498. Directed Readings in Chinese. 1-4 Credits. H/W FP
Readings in Chinese on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor.

CHIN 504. Advanced Modern Chinese I. 5 Credits. H/W FP
Five hours of class and two of drill. Readings in selected modern Chinese literary texts and discussion in Chinese of recordings of stories and dramas. Prerequisite: CHIN 208 or equivalent.

CHIN 508. Advanced Modern Chinese II. 5 Credits. H/W FP
Continuation of CHIN 504. Prerequisite: CHIN 504 or equivalent.

CHIN 512. Advanced Chinese I. 2 Credits. H/W FP
Readings in modern Chinese texts on a variety of subjects and discussion in Chinese. Prerequisite: CHIN 218 or equivalent.

CHIN 513. Advanced Chinese II. 2 Credits. H/W FP
Continuation of CHIN 512. Prerequisite: CHIN 512 or equivalent.

CHIN 542. Introduction to Classical Chinese. 3 Credits. H/W FP
An introduction to Classical Chinese through detailed analysis of short original passages from a variety of early Chinese texts. Students gain a foundation in the grammar and vocabulary of Classical Chinese, preparing them for CHIN 544. The course is offered at the 300 and 500 levels, with additional requirements for students taking CHIN 542. Prerequisite: A basic knowledge of Chinese characters (e.g. from CHIN 108 or JPN 108) and consent of instructor, or CHIN 208 or JPN 208. Not open to students who have completed CHIN 342.

CHIN 544. Readings in Classical Chinese: ______. 3 Credits. H/W FP
Classical Chinese is the language of the most famous works of Chinese philosophy, and most Chinese literature before the twentieth century. This topics course introduces readings on a specific theme or genre, for example: Early Chinese Philosophy, Poetry, Religion, Confucian Philosophical Texts, Daoist Philosophical Texts, etc. Primary-text readings are in original Classical Chinese while secondary readings are in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 544. May be repeated for credit if topic varies. Prerequisite: CHIN 342 or CHIN 542 or consent of the instructor.

CHIN 762. Modern Chinese Texts I. 3 Credits.
Readings and interpretation of varied modern Chinese texts. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 562. Prerequisite: CHIN 504 or equivalent.

CHIN 764. Modern Chinese Texts II. 3 Credits.
A continuation of CHIN 762 with materials of increasing difficulty. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 564. Prerequisite: CHIN 762.

CHIN 801. Directed Readings and Research in Chinese. 1-4 Credits. H/W FP
Advanced language training for the study of Chinese sources in the humanities or social science field of the student. Prerequisite: Consent of instructor.

Courses

EALC 105. Asian Religions. 3 Credits. HR/NW H/W
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. (Same as REL 106.)

EALC 121. Introduction to Contemporary China. 3 Credits. NW H/W
An overview of contemporary Chinese culture and society since the economic reforms and opening up launched in 1978, through the study of changes in politics, the economy, society, culture and everyday life in China. The course is taught in English. No prior knowledge of Chinese language is required.

EALC 130. Myth, Legend, and Folk Beliefs in East Asia. 3 Credits. NW H/W
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the traditional world view of the peoples of East Asia. (Same as ANTH 293, REL 130.)

EALC 142. Ethics in Chinese Philosophy. 3 Credits. H
How can ethical codes help us lead a better life? What principles of government will ensure an ordered and harmonious society? What responsibilities do we have to others and to the natural world? Thinkers in early China asked these questions and came to a variety of different conclusions, ranging from a goal of spontaneous harmony, to a rigid law-and-order ethic. Their ideas are still relevant today and in this course we will both survey these different ethical perspectives and also apply them to contemporary social, political, and environmental issues.

EALC 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in East Asian Languages and Cultures. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

EALC 198. Studies in: ______. 1-5 Credits. H
Special purpose subject in East Asia and contiguous regions.

EALC 231. Introduction to: ______. 1-3 Credits. NW H/W
Topics are various aspects of Chinese and Japanese cultures.

EALC 298. Studies in: ______. 1-5 Credits. H
Special purpose subject in East Asia and contiguous regions.

EALC 303. Happiness in East Asia. 3 Credits. 
This course explores culture-specific methods that people in East Asia employ to enhance their wellbeing and happiness and the creative ways in which they weave together different perspectives and practices (old and new, native and foreign, lay and expert) to deal with emotional and psychological distress. This course draws upon a multi-disciplinary approach to happiness, utilizing the subfields of social sciences (e.g., anthropology, sociology, and psychology) and humanities (e.g., philosophy and religion). Knowledge of Korean, Japanese, or Chinese language is not required.

EALC 312. Japan's Literary Legacy. 3 Credits. H/W
A survey of the major works of Japan's long literary heritage. Readings from such classics as the Tale of Genji, the world's first novel, No drama, and poetry will acquaint the student with one of the world's great literary traditions.

EALC 315. Survey of Japanese Film. 3 Credits. NW H
This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, the course introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this institution shapes gender, race, class, ethnic and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and film style over the last century. Through secondary readings, lectures, and discussions students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 315.)

EALC 316. Modern Japanese Fiction and Film. 3 Credits. H/W
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others are covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 716.

EALC 317. Contemporary Japanese Fiction and Film. 3 Credits. HL H/W
A survey of major literary and cinematic works of Japan's post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. Novels by Dazai Osamu, Mishima Yukio, Oe Kenzaburo, Murakami Haruki and Yoshimoto Banana and films by Imamura Shohei, Ozu Yasujirō, Teshigahara Hiroshi and others will be covered. Course format is a combination of lecture and discussion. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 716.

EALC 318. Modern Chinese Fiction and Film. 2-3 Credits. H/W
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 518. This course is taught at the 300 and 500 levels with additional assignments at the 500-level.

EALC 319. Contemporary Chinese Fiction and Film. 3 Credits. H
A general survey of important Chinese fiction and film from the late 20th century to the present. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 519.)

EALC 320. Modern East Asia: Multiple Perspectives. 3 Credits. NW H
A survey of the major political changes in China, Japan, Korea and Tibet in the 20th century. Students will learn about the changes that swept through East Asia as it rapidly modernized via documentary films and lectures and will study the impact of these changes on individuals by reading autobiographies.

EALC 325. Minorities in Japan. 3 Credits. S
This course offers a sociological and historical exploration of Japan's minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan’s minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels with additional assignments required at the 600-level.

EALC 330. China's Cultural Legacy. 3 Credits. H/W
An examination of Chinese literature, history, philosophy, and religion from ancient times to the end of the last dynasty in 1911. Focus on key values, ideas, customs, and ways of living through Chinese history. Lectures, readings, and discussions in English. Knowledge of Chinese not required. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Not open to students who have taken EALC 530.

EALC 331. Studies In: _____ 1-3 Credits. H/W
Topics in the Chinese and Japanese cultures.

EALC 332. Asian Literature in Translation: _____ 3 Credits. NW H/W
Introduction to Asian culture and society through close reading and analysis of important works of Asian literature. Themes and issues to be focused upon will vary (e.g., traditional or modern literature of China, Japan, or Korea, and special topics of interest). Lecture and discussion format. Knowledge of Asian languages is not required.

EALC 333. Asian Literature in Translation, Honors: _____ 3 Credits. NW H/W
An honors course that may be cross-listed with an existing EALC literature course. Students are required to do additional work. Open only to students in the University Honors Program or by permission of instructor.

EALC 344. Manga: Histories and Theories. 3 Credits. H
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 544. (Same as HA 344.)
EALC 353. Language and Society in East Asia. 3 Credits. NW/SC S
This course examines the cultures of East Asian countries through the lens of language. We will discuss the interactions of language and ideology, government policies, gender and education in East Asia. The course will be relevant for students interested in East Asian anthropology, politics, religion, philosophy, linguistics and language learning. The class has no prerequisites and requires no prior knowledge of East Asian languages or cultures. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students who have earned credit in EALC 553.

EALC 354. Japanese Prints. 3 Credits. NW H/W
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500 level. (Same as HA 354.)

EALC 356. Politics of East Asia. 3 Credits. NW S/W
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. Formerly known as EALC/POLS 656. Not open to students with credit in EALC 656 or POLS 656. (Same as POLS 356.)

EALC 360. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-screens in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 561 or REL 511. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as HA 361.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

EALC 361. Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of Korea from the end of Choson dynasty through the Colonial period (1910-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. Not open to students with credit in EALC 561.

EALC 362. Post-Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of South Korea from the time of its liberation from Japan in 1945 to the present in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in EALC 562.

EALC 366. Political Economy of East Asia. 3 Credits. S
This course provides basic understanding of fiscal, monetarist, and trade policies; how governments in East Asia use them to pursue growth; the extent to which these governments follow or controvert economics to pursue growth; and how the performances of economies in East Asia relate to the U.S. and global economies. Formerly known as POLS/EALC 666. Not open to students with credit in POLS/EALC 666. (Same as POLS 366.)

EALC 367. Art and Culture of Japan. 3 Credits. NW H/W
The history of Japanese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Japanese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as HA 367.)

EALC 368. The Peoples of China. 3 Credits. NW S/W
An analysis of the cultural origin, diversity, and unity of the peoples of China. Emphasis on historical development, social structure, cultural continuity and change, and ethics. (Same as ANTH 368.)

EALC 369. Art and Culture of Korea. 3 Credits. NW H/W
The history of Korean art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Korean art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art.

EALC 372. Ceramics of Korea. 3 Credits. H
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 562. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as HA 362.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

EALC 373. Modern Korean Art and Culture. 3 Credits. H
This course is a thematic introduction to Korean art and culture with an emphasis on modern and contemporary Korea. Pre-modern works are contextualized with respect to contemporary issues. Students learn how to conduct a comprehensive analysis of an artwork by considering the political, historical and social conditions of its time within a broader East Asian cultural framework. (Same as HA 363.) Prerequisite: An introductory course in art history at the college level, or consent of instructor.

EALC 375. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL H
An examination of Japanese attitudes toward love, sexuality and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students who have taken EALC 575/ WGSS 576. (Same as WGSS 375.)

EALC 376. Art and Culture of China. 3 Credits. NW H/W
The history of Chinese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions between different ethnic groups, and the roots of modernism in Chinese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as HA 368.)

EALC 380. Popular Cultures of East Asia. 3 Credits. NW H
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. Not open to students who have taken EALC 580.
EALC 385. The Art of Buddhism. 3 Credits. H/W
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 585. (Same as HA 385.)

EALC 386. Japanese Painting. 3 Credits. NW H/W
A survey covering the development of Japanese painting from the seventh century to the early twentieth century. Topics include Buddhist and other religious paintings, narrative handscrolls, ink painting, decorative folding screens, ukiyo-e prints, and western-style paintings from the late eighteenth through early twentieth centuries. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 586. (Same as HA 386.) Prerequisite: An introductory course in Asian art or consent of instructor.

EALC 388. Modern and Contemporary Visual Arts of Japan. 3 Credits. H
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 588. (Same as HA 388.)

EALC 408. Music in East Asia. 3 Credits.
Survey of selected East Asian forms of musical theater and classical, popular, and traditional musics, with emphasis on historical, stylistic, and cultural considerations. Open to all KU students. (Same as MUSC 408.)

EALC 418. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Credits. NW H
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. Recommended: A course in East Asian studies. Not open to students who have taken EALC 618. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. (Same as WGSS 418.) Prerequisite: One course in EALC or WGSS.

EALC 420. Daily Life in China From the Opium War to 1911. 3 Credits. NW H/W
This course examines everyday life in China from the mid-19th century to the end of the last dynasty in 1911. The focus is on living conditions, social customs, and gender relations of people of all social levels, from emperors and empresses to servants, prostitutes, and concubines. Other topics include: the culture of drugs in the form of opium smoking, including how opium served as a key point of contact between China and the Euro-west; sexual culture, especially in the form of the history of prostitution and gender roles and values in China on the verge of modernity; interactions in daily life between Chinese and Westerners in China; and the experience of China's last imperial rulers. These topics are weighed against the backdrop of the decline of China's last dynasty and the concurrent impact of modernity in the form of social, political and technological change, especially as effected by the intrusion of the Euro-west. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EALC 720.

EALC 431. Studies in: _____. 1-3 Credits. H/W
Topics in the Chinese and Japanese traditions.

EALC 476. International Relations of Asia. 3 Credits. S/W
An intensive study of the problems of ideological conflict, diplomatic relations, strategic arrangements, economic cooperation, and cultural exchange in East and Southeast Asia with special emphasis upon the roles of major world powers. Formerly known as POLS/EALC 676. Not open to students with credit in POLS/EALC 676. (Same as POLS 476.) Prerequisite: POLS 170 or consent of the instructor.

EALC 498. Directed Readings in East Asian Languages and Cultures. 1-4 Credits. H/W
Readings in English on an East Asian subject, selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: ECIV 104 or ECIV 304 and consent of instructor.

EALC 499. Honors Thesis. 3 Credits. H/W
Required of all students working for a degree with honors. May be repeated for a total of nine semester hours.

EALC 509. Religion in Japan. 3 Credits. NW H/W
Survey of religious thought and practice in Japan from the Jomon period to the present. (Same as REL 509.)

EALC 518. Modern Chinese Fiction & Film. 3 Credits. H
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 318. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor.

EALC 519. Contemporary Chinese Fiction and Film. 3 Credits. H
A general survey of important Chinese fiction and film from the late 20th century to the present. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor. Not open to students with credit in EALC 519.

EALC 530. China's Cultural Legacy. 3 Credits. NW H/W
An examination of Chinese literature and culture from earliest times to the modern period. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course, such as ECIV 104 or ECIV 304 or EALC 105; or consent of the instructor. Not open to students with credit in EALC 530.

EALC 543. Contemporary Japanese Film. 3 Credits. NW H
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as FMS 543.) Prerequisite: Junior status.

EALC 544. Manga: Histories and Theories. 3 Credits. H
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging
narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 344. (Same as HA 544.) Prerequisite: A college level introduction to Asian art history or Asian studies, or consent of instructor.

EALC 553. Language and Society in East Asia. 3 Credits. S
This course examines the cultures of East Asian countries through the lens of language. We will discuss the interactions of language and ideology, government policies, gender and education in East Asia. The course will be relevant for students interested in East Asian anthropology, politics, religion, philosophy, linguistics and language learning. The class requires no prior knowledge of East Asian languages or cultures. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students who have earned credit in EALC 353. Prerequisite: Any EALC course, or any CHIN, JPN, KOR language course, or any Linguistics course.

EALC 561. Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of Korea from the end of the Choson dynasty through the colonial period (1920-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature and film. Prerequisite: An introductory East Asian studies course, such as ECHI 104 or ECHI 304, or EALC 105; or consent of instructor. There are additional readings and more extensive writing assignments than in EALC 361. Not open to students with credit in EALC 361.

EALC 562. Post-Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of South Korea from the time of its liberation from Japan in 1945 to the present in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in EALC 362. Prerequisite: One course on Korea or East Asia.

EALC 563. Cultural History of Korea. 3 Credits. H
This course examines the cultural history of Korea in periods prior to the 19th Century. Special attention is given to varying constructions of cultural value, heritage, and identity, together with the historically specific factors that engendered them.

EALC 570. The Structure of Japanese. 3 Credits. H
This course will explore Japanese, discovering the phonetic, phonological, morphological, syntactic and semantic features of the language, and discussing the actual use of Japanese in social-cultural contexts. The course will also discuss the acquisition of Japanese, both in children and adult learners. This course will be primarily for students who want to learn about the linguistic aspects of Japanese, rather than to gain a practical command of it. (Same as LING 570.) Prerequisite: A previous LING, JPN, or EALC course.

EALC 572. The Structure of Chinese. 3 Credits. H
A detailed study of the phonological and grammatical structure of Chinese and the interactions between language and culture. Depending on student interests, a unit on the pedagogy of teaching Chinese as a foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as LING 572.)

EALC 575. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL
An examination of Japanese attitudes toward love, sexuality, and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students with credit in EALC 375/ WGSS 376. (Same as WGSS 576.) Prerequisite: One course in EALC or WGSS.

EALC 580. Popular Cultures of East Asia. 3 Credits. NW H/W
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. More extensive writing requirements than 380. Not open to students who have taken EALC 380.

EALC 584. Modern China. 3 Credits. NW H/W
An intensive survey of China's history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as HIST 584.)

EALC 585. Politics and Society in China. 3 Credits. NW H/W
Examines the epochal changes that have occurred in China from Deng Xiaoping's rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 "pro-democracy" movement and the events at Tiananmen Square. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and economic decentralization, and leadership succession. A previous course on China is helpful, but not mandatory. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 468. (Same as POLS 668.)

EALC 587. Age of Shoguns: Early Modern Japan. 3 Credits. NW H/W
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as HIST 587.) Prerequisite: An earlier course in history or east Asian languages and cultures, or permission of the instructor.

EALC 588. Japan, 1853-1945. 3 Credits. NW H/W
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as HIST 588.)

EALC 589. Japan Since 1945. 3 Credits. NW H/W
This course provides an overview of Japanese history from the end of World War II to the present day. Among the topics covered will be the Allied Occupation, postwar politics and social change, the economic "miracle," popular culture, women and the family, crime and punishment, the educational system, and Japan's place in the world.
EALC 590. Topics in East Asian Languages and Cultures: 1-9 Credits. H/W
Specific topical courses will be offered every year covering a number of disciplines. Credit, description, and prerequisites will vary. Note: May be repeated for credit up to the stated limit.

EALC 591. Topics in East Asian Languages and Cultures: 1-9 Credits. S/W
Specific topical courses will be offered every year covering a number of disciplines. Credit, descriptions, and prerequisites will vary. Note: May be repeated for credit up to the stated limit.

EALC 610. Minorities in Japan. 3 Credits. S
This course offers a sociological and historical exploration of Japan's minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan's minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels, with additional assignments required at the 600-level. (Same as CEAS 610.) Prerequisite: An introductory East Asian Studies course or consent of the instructor.

EALC 618. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Credits. NW H/W
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. Not open to students who have taken EALC 418. This course is taught at the 400 and 600-level with additional assignments at the 600 level. Prerequisite: A course in East Asian studies.

EALC 642. Chinese Thought. 3 Credits. NW H/W
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as HUM 524 and PHIL 506.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy.

EALC 678. Chinese Foreign Policy. 3 Credits. S/W
An in-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 378. (Same as GIST 678 and POLS 678.) Prerequisite: Sophomore level or consent of the instructor.

EALC 701. Practicum in Teaching Chinese. 1 Credits.
This course is required every semester for graduate teaching assistants in the Chinese language program in EALC. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Chinese classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department.

EALC 702. Practicum in Teaching Japanese. 1 Credits.
This course is required every semester for graduate teaching assistants in the Japanese language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Japanese language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department.

EALC 703. Practicum in Teaching Korean. 1 Credits.
This course is required every semester for graduate teaching assistants in the Korean language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Korean language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department.

EALC 704. Contemporary East Asia. 3 Credits.
This graduate seminar explores rapidly changing societies in contemporary East Asia, particularly China, Japan, and Korea. The course provides a critical overview of East Asia and its diversity and complexity using cross-cultural perspectives and interdisciplinary social science approaches, and situates East Asian societies in the context of globalization. (Same as CEAS 704.)

EALC 715. Survey of Japanese Film. 3 Credits.
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth century Japanese film. Through secondary readings, lectures, and discussions students will examine how Japanese cinema as an institution responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 715.)

EALC 716. Fiction and Film in Japan. 3 Credits.
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others will be covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 316.

EALC 717. Contemporary Japanese Literature in Translation: 1945-Present. 3 Credits.
A survey of major literary works of Japan's post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. An individual research project in an area of the student's special interest will be required. Not open to students who have completed EALC 317.

EALC 718. Readings in Modern Chinese Literature. 2-3 Credits.
A general survey of the important writers of the 20th century and their works. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 318.)

EALC 720. Daily Life in China from the Opium War to 1911. 3 Credits.
This course examines everyday life in China from the mid-19th century to the end of the last dynasty in 1911. The focus is on living conditions, social customs, and gender relations of people of all social levels, from emperors and empresses to servants, prostitutes, and concubines. Other topics include: the culture of drugs in the form of opium smoking, including how opium served as a key point of contact between China and the Euro-west; sexual culture, especially in the form of the history
of prostitution and gender roles and values in China on the verge of modernity; interactions in daily life between Chinese and Westerners in China; and the experience of China’s last imperial rulers. These topics are weighed against the backdrop of the decline of China’s last dynasty and the concurrent impact of Modernity in the form of social, political, and technological change, especially as effected by the intrusion of the Euro-west. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EALC 420. Prerequisite: An upper-level course on China or East Asia or consent of instructor.

EALC 725. Ancient China. 3 Credits.
A survey of ancient Chinese culture to the Qin period. Major archaeological discoveries and the literary tradition will be taken as the primary evidence through which a number of topics are introduced (for example: environment, food, writing, art, thought, ritual). A knowledge of Chinese is not required.

EALC 743. Contemporary Japanese Film. 3 Credits.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as FMS 743.)

EALC 790. Topics in East Asian Languages and Cultures: _____ 1-3 Credits.
Special topical courses covering a number of disciplines. Credit descriptions and prerequisites will vary. NOTE: May be repeated for up to 12 total credits.

EALC 801. Directed Readings. 1-5 Credits.
Designed to meet the needs of advanced students whose study in East Asian studies cannot be met with regular courses. Prerequisite: Consent of instructor.

EALC 899. Thesis. 1-6 Credits.
An inquiry into the source material upon a specific subject.

Courses

ECIV 104. Eastern Civilizations. 3 Credits. HL/NW H/W
This course acquaints the student with the broad outlines of the traditional cultures and literatures of East Asia, and explores the interaction between these regions and cultures as well as their continuities and disparities. Course materials include translations and discussions of original sources. The course is most appropriate for students with no background in Asian culture. Not open to students with credit in ECIV 104. If majoring in EALC and have completed ECIV 104, see major advisor about completing the ECIV 304 major requirement.

ECIV 305. Eastern Civilizations Honors. 3 Credits. HL/NW H/W
An introductory course designed to acquaint the student with the broad outlines of the traditional cultures and literatures of East Asia. By reading translations of original source materials, the student is able to see the interaction among the various cultures as well as their essential continuity. The course is most appropriate for students without any background in Asian culture. Similar to ECIV 304, but reading and writing assignments reflect the fact that this is an honors course. Open only to students in the University Honors Program or by permission of instructor.

Courses

HNDI 110. Beginning Hindi I. 5 Credits. U F1
An introduction to modern standard Hindi that emphasizes acquisition of basic language skills (speaking, comprehension, reading and writing) through a combination of lecture, drill, and work with the Devanagari script.

HNDI 120. Beginning Hindi II. 5 Credits. U F2
A continuation of Beginning Hindi I that builds on basic skills of speaking and comprehension, and the writing and reading of the Devanagari script developed in Beginning Hindi I. Prerequisite: HNDI 110 or placement exam that establishes a level of proficiency in Hindi suited to Beginning Hindi II.

HNDI 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hindi. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

HNDI 210. Intermediate Hindi I. 3 Credits. U F3
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 120 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi I.

HNDI 220. Intermediate Hindi II. 3 Credits. U F4
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 210 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi II.

HNDI 301. Topics in Hindi Culture, Language and Literature: _____ 3 Credits. U
Investigation of special topics on Hindi culture, language and literature at the undergraduate level. May be repeated for credit when topic varies.

HNDI 310. Advanced Hindi I. 3 Credits. U FP
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 220 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi I.

HNDI 320. Advanced Hindi II. 3 Credits. U FP
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 310 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi II.

HNDI 593. Directed Study in Hindi Culture and Literature: _____ 1-3 Credits. H
This course is designed for students seeking proficiency in Hindi beyond HNDI 320. Instructor will direct the student through readings and materials in Hindi that will add to the students substantive knowledge of India and culture in the Hindi language. May be taken multiple semesters for credit with varying content. Prerequisite: HNDI 320, and consent of instructor.

Courses

JPN 100. Beginning Japanese I. 3 Credits. U
An introduction to Japanese. Familiarity with the basic structural patterns of the language through conversation is stressed. The hiragana and katakana syllabaries are introduced and a few characters are learned. Usually offered as part of a Summer Study Abroad Program.

JPN 101. Beginning Japanese II. 3 Credits. U
Continuation of JPN 100. Available to students who took JPN 100 as part of the Summer Study Abroad Program. Not available for credit for students who have previously completed JPN 104. Prerequisite: JPN 100 or equivalent.

JPN 104. Elementary Japanese I. 5 Credits. U F1
Three hours of lecture, three hours of drill per week. Acquisition of basic language skills (listening, speaking, reading, writing). Not available for credit for students who have previously completed JPN 101.

JPN 108. Elementary Japanese II. 5 Credits. U F2
Continuation of JPN 104. Prerequisite: JPN 101, JPN 104, or equivalent.

JPN 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Japanese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

JPN 204. Intermediate Japanese I. 5 Credits. U F3
Three hours of lecture, three hours of drill. Prerequisite: JPN 108 or equivalent.

JPN 206. Intermediate Japanese Conversation. 2-4 Credits. U
Enhancement of conversational ability at the intermediate level. Used primarily to accommodate transfer credits. Prerequisite: JPN 204 or equivalent.

JPN 208. Intermediate Japanese II. 5 Credits. U F4
Continuation of JPN 204. Prerequisite: JPN 204.

JPN 226. Japanese in Context - Intermediate. 3 Credits. U
Supervised and individualized study and practice of language skills through direct experience in interviews and guided practical applications in various public settings in Japan. Some conventional classroom instruction in grammar included. Offered only during the Summer Institute in Hiratsuka, Japan. Prerequisite: Two semesters or the equivalent of Japanese language study.

JPN 233. Special Skills in Japanese: _____ 1-4 Credits. U
Instruction in special skills in Japanese, such as pronunciation, recognition of Chinese characters, comprehension of broadcast media, etc. at the freshman/sophomore level. Course work must be arranged through the office of KU Study Abroad and approved by the Department of East Asian Languages and Cultures. May be repeated for credit if content varies.

JPN 333. Special Skills in Japanese: _____ 1-4 Credits. U
Instruction in special skills in Japanese, such as recognition and writing of Chinese characters, comprehension of broadcast media, etc. at the junior/senior level. If part of a Study Abroad program, approval by the Department of East Asian Languages and Cultures is required. May be repeated for credit if content varies.

JPN 386. Advanced Japanese Conversation III. 1-3 Credits. U FP
Instruction in discussion in formal contexts and speech making. Prerequisite: JPN 504 or equivalent.

JPN 498. Directed Readings in Japanese. 1-4 Credits. H/W FP
Readings in Japanese on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor.

JPN 504. Advanced Modern Japanese I. 5 Credits. H/W FP
Readings in selected modern Japanese texts on various topics: history, education, society, and business. Includes oral discussion and written short essays. Meets five hours per week. Prerequisite: JPN 208 or equivalent.

JPN 508. Advanced Modern Japanese II. 5 Credits. H/W FP
Continuation of JPN 504. Prerequisite: JPN 504 or equivalent.

JPN 562. Modern Japanese Texts I. 3 Credits. H/W FP
Readings and interpretation of modern Japanese texts from various fields. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 762. Prerequisite: JPN 508.

JPN 564. Modern Japanese Texts II. 3 Credits. H/W FP
A continuation of JPN 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 764. Prerequisite: JPN 562 or equivalent.

JPN 598. Readings in: _____. 1-3 Credits. H/W FP
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: JPN 564 or permission of instructor.

JPN 690. Seminar in: _____. 1-3 Credits. H/W FP
Varying topics with varying prerequisites.

JPN 762. Modern Japanese Texts I. 3 Credits.
Readings and interpretation of modern Japanese texts from various fields. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 562. Prerequisite: JPN 508.

JPN 764. Modern Japanese Texts II. 3 Credits.
A continuation of JPN 762. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 564. Prerequisite: JPN 562 or equivalent.

JPN 801. Directed Readings and Research in Japanese. 1-4 Credits. FP
Advanced language training for the study of Japanese sources in the humanities or social science field of the student. Prerequisite: JPN 564 or consent of instructor.

Courses

KOR 100. Beginning Korean I. 3 Credits. U
Introduction to basic communication skills in Korean and Korean culture; Korean alphabet, survival Korean expressions, cultural etiquette and norms; speaking, listening, reading, and writing in basic Korean. Does not
fufill College of Liberal Arts and Sciences foreign language requirements or department major and minor requirements.

KOR 101. Beginning Korean II. 3 Credits. U
Continuation of KOR 100. Basic communicative skills in Korean. Speaking, listening, reading, writing, and culture are equally emphasized throughout the course. Does not fulfill College of Liberal Arts and Sciences foreign language requirements or department major and minor requirements. Prerequisite: KOR 100 or equivalent.

KOR 104. Elementary Korean I. 5 Credits. U F1
Five hours of class and two hours of drill in the spoken language each week. Grammar and readings in selected texts.

KOR 108. Elementary Korean II. 5 Credits. U F2
Continuation of KOR 104. Prerequisite: KOR 104.

KOR 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Korean. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

KOR 204. Intermediate Korean I. 5 Credits. U F3
Five hours of class and two hours of spoken drill. Readings in selected texts in modern Korean. Prerequisite: KOR 108 or equivalent.

KOR 208. Intermediate Korean II. 5 Credits. U F4
Continuation of KOR 204. Prerequisite: KOR 204.

KOR 498. Directed Readings in Korean. 1-4 Credits. H/W FP
Readings in Korean on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor.

KOR 504. Advanced Modern Korean I. 5 Credits. H/W FP
Readings in and discussion of selected modern Korean texts on various topics: history, literature, society, and language. Prerequisite: KOR 208 or equivalent.

KOR 508. Advanced Modern Korean II. 5 Credits. H/W FP
Readings and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. Prerequisite: KOR 504 or equivalent.

KOR 562. Modern Korean Texts I. 3 Credits. H FP
Readings and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in KOR 762. Prerequisite: KOR 508 or equivalent.

KOR 564. Modern Korean Texts II. 3 Credits. H FP
Continuation of KOR 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in KOR 762. Prerequisite: KOR 562 or equivalent.

KOR 598. Readings in: _____ 1-3 Credits. U
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: KOR 564 or permission of instructor.

KOR 762. Modern Korean Texts I. 3 Credits.
Readings and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level.

KOR 764. Modern Korean Texts II. 3 Credits.
Continuation of KOR 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in KOR 564. Prerequisite: KOR 562 or equivalent.

KOR 798. Readings in: _____ 1-3 Credits. U
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: KOR 564 or permission of instructor.

Courses

MONG 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Mongolian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

Courses

TIB 101. Elementary Tibetan I. 3 Credits. U F1
An introduction to the Tibetan language in both its literary and colloquial forms according to the Central Tibetan dialects. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 102. Elementary Tibetan II. 3 Credits. U F2
A continuation of TIB 101. Prerequisite: TIB 101 or equivalent. Four semesters of 3 credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Tibetan. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

TIB 201. Intermediate Tibetan I. 3 Credits. U F3
Continuation of TIB 102. Prerequisite: TIB 102 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 202. Intermediate Tibetan II. 3 Credits. U F4
Continuation of TIB 201. Prerequisite: TIB 201 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 301. Advanced Tibetan I. 1-3 Credits. H
This course focuses on developing reading fluency in classical and modern Tibetan with continued practice in the spoken language as well. Prerequisite: Tibetan 202 or permission of the instructor.

TIB 302. Advanced Tibetan II. 1-3 Credits. H
This course focuses on more advanced reading fluency in classical and modern Tibetan with continued practice in the spoken language as well. Prerequisite: TIB 301 or permission of the instructor.

Courses

UYGR 101. Elementary Uyghur I. 3 Credits. U F1
Uyghur is an important Central Asian Turkic language spoken by nine million people in China. The first semester is designed to give the
student basic communicative competency, including pronunciation and intonation, structure, and syntax. Effective oral and written communication is stressed.

**UYGR 102. Elementary Uyghur II. 3 Credits. U F2**  
Continuation of UYGR 101. Prerequisite: UYGR 101 or the equivalent.

**UYGR 177. First Year Seminar: _____ 3 Credits. U**  
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Uyghur. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**UYGR 201. Intermediate Uyghur I. 3 Credits. U F3**  
Continuation of UYGR 102. Prerequisite: UYGR 102 or equivalent.

**UYGR 202. Intermediate Uyghur II. 3 Credits. U F4**  
Continuation of UYGR 201. Prerequisite: UYGR 201 or equivalent.

### Bachelor of Arts in East Asian Languages and Cultures

**Why study East Asian languages and cultures?**

China, Japan, and Korea are three of the oldest continuous civilizations in the world, offering rich literary and philosophical traditions, vibrant contemporary cultures, and cutting-edge technological innovation. Mainland China and Japan have the world’s largest economies after the United States and, along with South Korea and Taiwan, are key U.S. trading partners. Thousands of US companies do business with East Asia. The economic and political relationships between the U.S. and East Asia are likely to be among the most important for the U.S. in the 21st century.

With an EALC B.A., students can pursue a range of careers in business, government, education, nonprofit organizations, to name a few, or continue on to graduate study in East Asian languages and cultures. Many students pair an EALC major or minor with a second major to widen their skill-set and increase their competitiveness as they enter the global marketplace. Some students choose EALC-related courses to connect with their heritage or to fulfill personal interests.

---

### Undergraduate Admission

#### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

---

### Major and Concentrations

For undergraduates in the department, the B.A. degree in East Asian languages and cultures is available in the following concentrations:

1. Chinese language and literature.
2. Japanese language and literature.
3. East Asian studies with Chinese language.
4. East Asian studies with Japanese language.
5. East Asian studies with Korean language.
6. Double language Concentration: Chinese and/or Japanese and/or Korean.

#### First- and Second-Year Preparation

Students considering a major in EALC should begin language training as soon as possible, starting with CHIN 104/JPN 104/KOR 104-CHIN 108/JPN 108/KOR 108 in the first year and advancing to the intermediate 204-208 level. Students are encouraged to take ECIV 104/ECIV 304/ECIV 305 as soon as possible.

Students are encouraged to complete EALC 142 to fulfill the KU Core goal 5.1. Talk to the undergraduate advisor in the target language to plan a 4-year course of study. Email ealc@ku.edu or call 785-864-9250 for information about advisors to contact.

### Requirements for the B.A. Major

#### Chinese Language and Literature Concentration

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**East Asian Languages and Cultures Prerequisite Knowledge**

**East Asian Languages and Cultures Core Knowledge and Skills**

Majors choosing this concentration must complete a course or courses in each of the following areas:

Eastern Civilizations. Satisfied by one of the following:
Bachelor of Arts in East Asian Languages and Cultures

ECIV 104 Eastern Civilizations 3
or ECIV 304 Eastern Civilizations Honors
or ECIV 305 Eastern Civilizations Honors

Advanced Language. Satisfied by:
JPN 504 Advanced Modern Japanese I 10
& JPN 508 and Advanced Modern Japanese II
JPN 562 Modern Japanese Texts I 3
And one of the following: 3
JPN 564 Modern Japanese Texts II
EALC 570 The Structure of Japanese
or LING 570 The Structure of Japanese

East Asian Languages and Cultures Required Electives 12

Majors choosing this concentration must complete a course in each of the following areas (a course cannot be used in more than 1 area). Please consult an EALC advisor for additional courses that may fulfill the requirements.

Pre-Modern Japanese Literature. Satisfied by one course, e.g.:
EALC 312 Japan’s Literary Legacy
EALC 375 Love, Sexuality and Gender in Japanese Literature
Modern or Contemporary Japanese Literature or Film. Satisfied by one course, e.g.:
EALC 315 Survey of Japanese Film
EALC 316 Modern Japanese Fiction and Film
EALC 317 Contemporary Japanese Fiction and Film
or EALC 717 Contemporary Japanese Literature in Translation: 1945-Present
EALC 543 Contemporary Japanese Film
or FMS 543 Contemporary Japanese Film

Pre-Modern Japan or Pre-Modern East Asia. Satisfied by one of the following:
EALC 312 Japan’s Literary Legacy
EALC 367 Art and Culture of Japan
or HA 367 Art and Culture of Japan
EALC 375 Love, Sexuality and Gender in Japanese Literature
EALC 385 The Art of Buddhism
or HA 385 The Art of Buddhism
or HA 585 The Art of Buddhism
EALC 509 Religion in Japan
or REL 509 Religion in Japan
EALC 587 Age of Shoguns: Early Modern Japan
or HIST 587 Age of Shoguns: Early Modern Japan
HA 347 Ceramics of East Asia
or HA 547 Ceramics of East Asia
HA 354 Japanese Prints
or HA 554 Japanese Prints
HA 586 Japanese Painting
HA 587 Japanese Sculpture
HIST 395 History of Sushi
HIST 398 Introduction to History of Japan: Anime to Zen
HIST 399 The Samurai
HIST 585 Beer, Sake, Tea-Beverages in Japan History
REL 360 The Buddhist Tradition in Asia

Modern Japan or Modern East Asia. Satisfied by one of the following:
COMS 557 East Asian Communication
EALC 308 Music in East Asia
or MUSC 308 Music in East Asia
EALC 315 Survey of Japanese Film
EALC 316 Modern Japanese Fiction and Film
or EALC 716 Fiction and Film in Japan
EALC 317 Contemporary Japanese Fiction and Film
or EALC 717 Contemporary Japanese Literature in Translation: 1945-Present

</tbody>
</table>

**Pre-Modern Culture**
Choose 2 of the following 3, matching language choices (6 credits combined - must be in the same two languages as chosen to fulfill the language sequences):

China: Please choose from the list above.
Japan: Please choose from the list above.
Korea: Please choose from the following:
  - EALC 563 Cultural History of Korea
  - HA 361 Buddhist Art of Korea
    or HA 561 Buddhist Art of Korea
  - HA 362 Ceramics of Korea
    or HA 562 Ceramics of Korea
  - REL 310 Religion in Korea

Modern Culture
Choose 2 of the following 3, matching language choices (6 credits combined - must be in the same two languages as chosen to fulfill the language sequences):
  - China: Please choose from the list above.
  - Japan: Please choose from the list above.
  - Korea: Please choose from the following:
    - EALC 361 Colonial Korea
    - EALC 362 Post-Colonial Korea
    - HA 363 Modern Korean Art and Culture
    - HIST 350 The Korean War, 1950-1953

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30-32 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 30-32 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in East Asian Languages and Cultures with the following concentrations can be found here: Chinese Language & Literature (p. 1289), Japanese Language & Literature (p. 1290), East Asian Studies-Chinese Language (p. 1291), East Asian Studies-Japanese Language (p. 1292), East Asian Studies-Korean Language (p. 1293), Double Language (p. 1294), or by using the left-side navigation.

**Departmental Honors**
The department awards honors to undergraduates who demonstrate exceptional academic achievement. Students should make their intentions known in writing before the final undergraduate semester, preferably during the junior year. The candidate must achieve a minimum of 3.5 in the major and complete EALC 499 with a grade of B or higher. In EALC 499, the student writes an honors thesis under the supervision of a faculty member. Two faculty members evaluate the thesis.

**Study Abroad**
Students are strongly encouraged to undertake a study-abroad experience as part of the major. Studying abroad allows students to dramatically increase their foreign-language proficiency and affords them cultural understanding far beyond what can be conveyed in a classroom. Employers greatly value study-abroad experience in job candidates, making KU graduates with such experience more competitive as they enter global society.

Students are encouraged to talk to an EALC study-abroad advisor (https://ealc.ku.edu/study-abroad) about the many options available for study abroad in the language they are studying. Study-abroad programs vary in length from several weeks to a full year. They include language-intensive programs (some allowing one to complete a year’s worth of US-college course credit in Chinese, Japanese or Korean in just eight weeks), programs that include non-language courses taught in English, and programs that offer an internship experience. We work with students to find a program that fits their requirements and degree plan. Credit from study-abroad programs can be transferred and can almost always be used to fulfill requirements for the major.

Scholarships are available for study-abroad programs to China, Japan, and South Korea, and EALC often offers a three-week study abroad program in Japan during the summer. The Office of Study Abroad (https://studyabroad.ku.edu/) provides help with the practical aspects of study abroad, as well as advice about programs and scholarships.

| Total Hours 120 |

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Hour requirements (incl. 45 j/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

### Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Electives for EALC must be taken at the 300+ level.

For clarification: when asked for a class on East Asia, classes on East Asia broadly (so, a course on Japan, China, and Korea broadly)

| Total Hours | 120 |

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3 Typically Goal 6 is fulfilled using a course required by the major. Review the list of Goal 6 courses (https://kucore.ku.edu/goal-6/) that may apply to the major, or choose another course. A free elective may need to be used to fulfill pre-requisites if a course within the major is not chosen. Note - KOR 562 is not approved for KU Core Goal 6.

4 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Electives for EALC must be taken at the 300+ level.

For clarification: when asked for a class on East Asia, classes on East Asia must be on East Asia broadly (so, a course on Japan, China, and Korea broadly)

**BA in East Asian Languages & Cultures with concentration in Double Language**

Below is a sample 4-year plan for students pursuing the BA in East Asian Languages & Culture with a concentration in Double Language. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. ECIV 104 is recommended to complete KU Core 4.2, but most EALC 300+ electives count towards KU Core 4.2, so KU Core 4.2 will be fulfilled through completion of the major.
4. Double Language majors must complete a two-semester sequence of Advanced Language in two languages chosen from: Japanese (JPN 504 and JPN 508), Chinese (CHIN 504 and CHIN 508), or Korean (KOR 504 and KOR 508).
5. Typically Goal 6 is fulfilled using a course required by the major. Review the list of Goal 6 courses (https://kucore.ku.edu/goal-6/) that may apply to the major, or choose another course. A free elective may need to be used to fulfill pre-requisites if a course within the major is not chosen.
6. EALC major electives will be chosen in conjunction with languages being studied and must be at the 300+ level.
7. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Electives for EALC must be taken at the 300+ level.

For clarification: when asked for a class on East Asia, classes on East Asia broadly (so, a course on Japan, China, and Korea broadly)

Minor in East Asian Languages and Cultures

Why study East Asian languages and cultures?

China, Japan, and Korea are three of the oldest continuous civilizations in the world, offering rich literary and philosophical traditions, vibrant contemporary cultures, and cutting-edge technological innovation.
Mainland China and Japan have the world’s largest economies after the United States and, along with South Korea and Taiwan, are key U.S. trading partners. Thousands of US companies do business with East Asia. The economic and political relationships between the U.S. and East Asia are will be among the most important for the U.S. in the 21st century.

With an EALC B.A., students can pursue a range of careers in business, government, education, nonprofit organizations, to name a few, or continue on to graduate study in East Asian languages and cultures. Many students pair an EALC major or minor with a second major to widen their skill-set and increase their competitiveness as they enter the global marketplace. Some students choose EALC related courses to connect with their heritage or to fulfill personal interests.

### Requirements for the Minor

Students selecting this minor must complete one of the following options:

#### East Asian Languages and Cultures Minor with Advanced Language

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 18-19 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by 12-16 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Master of Arts in East Asian Languages and Cultures**

**Why study East Asian languages and cultures?**

The areas of East Asia covered represent 3 of the oldest continuous civilizations of the world. The great historical contributions of China, Japan, and Korea in literature, philosophy, and art are widely recognized and studied throughout the world. Today, the highly advanced industries of Japan, the enormous human resources of China, and the rapidly growing economies of Korea and Taiwan have contributed to the development of extremely valuable socio-political and economic ties between these areas and the United States.

**M.A. Program Overview**

The Department of East Asian Languages and Cultures (EALC) is the only department in Kansas offering a regular program of instruction in the languages, literatures, and cultures of East Asia.

The EALC Thesis M.A. program trains students who will devote themselves to becoming effective links between the Far East and the United States. Students concentrate in Chinese, Japanese, Korean, or East Asian Cultures, usually entering the program with at least two years of college-level language. The program typically takes two years to complete, including the defense of a required Master's thesis.
**FLAS Fellowships**

Students in the M.A. program may also be eligible for a Foreign Language and Area Studies (FLAS) ([http://flas.ku.edu/](http://flas.ku.edu/)) fellowship through the Center for East Asian Studies. FLAS fellowships include:

- Summer award - up to $5,000 for tuition and a stipend of $2,500 for living expenses for summer language study equivalent to one full year of language study
- Academic Year award - up to $18,000 for tuition and a stipend of $15,000 for living expenses for academic year study that includes two semesters of language and six credits or more of East Asian culture courses.

Students in the joint J.D./M.A. or who are also admitted to other programs are strongly encouraged to apply ([https://flas.ku.edu/apply/](https://flas.ku.edu/apply/)) for this funding.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies ([p. 2449](#)) section of the online catalog.

Please consult the Departments & Programs ([p. 747](#)) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the M.A. program**

Apply to the EALC M.A. program via the Office of Graduate Studies online application system ([https://gradapply.ku.edu/](https://gradapply.ku.edu/)). For additional information regarding departmental admissions requirements, deadlines, and the application process, please visit the graduate admissions page ([https://ealc.ku.edu/graduate-admission/](https://ealc.ku.edu/graduate-admission/)) of the EALC Department website, or contact the EALC Department Graduate Program directly at ealc@ku.edu.

**Master’s Program**

The department offers a master’s degree in East Asian languages and cultures. The student declares a concentration in 1 of 4 options.

- Chinese language and literature
- Japanese language and literature
- Korean language and literature
- East Asian cultures

Students of Chinese, Japanese, or Korean language and literature gain in-depth knowledge of these ancient civilizations, which have produced some of the world’s greatest literature.

Students of East Asian cultures develop a broad interdisciplinary knowledge of East Asia. This concentration is for students pursuing professional or noncollege teaching careers, for students in the early stages of language training, or for students who have already acquired competence in an East Asian language.

At least 50% of coursework for the master’s degree must be taken at the 700 level or above.

**Prerequisites**

Entrance requirements for a concentration in either Chinese, Japanese, or Korean language and literature include:

- 3 years of the modern language and, for Chinese language students, one year of classical Chinese or the demonstrated equivalent. Students not meeting this prerequisite may be admitted with deficiencies provided they achieve this level of proficiency outside the minimum of 30 graduate credit hours required for the degree.”
- 2 lecture courses dealing with East Asia.

Entrance requirements for a concentration in East Asian cultures are:

- At least 2 years of an East Asian language. Students not meeting this prerequisite may be admitted with deficiencies provided they achieve this level of proficiency outside the minimum of 30 graduate credit hours required for the degree.”
- 2 lecture courses dealing with East Asia.

**Requirements for Chinese, Japanese, or Korean Language and Literature Concentration**

1. A minimum of 30 graduate credit hours:
   - a. Fourth-year level of language.”
   - b. While students may apply credit hours from study abroad toward their degree, at least 18 credit hours must be taken in residence at KU.
   - c. No more than 6 hours of directed readings courses may be included in the required 30 hours.
   - d. A course involving research methods, to be determined in consultation with the Thesis/Faculty Advisor and the Director of Graduate Studies.
   - e. Students are expected to take at least one course at the 500 level or above in the literature of their concentration.

2. Thesis Option
   a. A thesis that will demonstrate in-depth research on a topic in the area of concentration, typically completed over 1 or 2 semesters (EALC 899, 3 to 6 credit hours). Students are expected to make significant use of primary and secondary sources in the language of concentration.
   b. In the final semester of study, the DGS, faculty advisor, and student will work together to assemble a committee of three graduate faculty and the student will be required to complete an oral defense of their thesis.

3. Portfolio Option
   a. Must write three substantial research papers on East Asian topics (15-20 pages).
      i. At least one of the papers must be completed by the end of the second semester in the program.
      ii. The papers will be evaluated and graded by the instructor of the class in which the paper is submitted. The grade must be A or B.
      iii. The student will submit each paper to the Director of Graduate Studies (DGS), plus an abstract (no more than 500 words) summarizing each. The student will submit the original copy with the instructor’s remarks and grade. The DGS may require revisions be made before final acceptance.
   b. With the permission of the DGS, students may include relevant courses in non-East Asian areas (such as linguistics, language
pedagogy, anthropology, political science, and literary theory). A paper for such a course would generally not be used to fulfill the above requirements unless it was on an East Asian topic approved beforehand by the DGS.

c. Students will meet regularly with the DGS (at least once a semester) to determine course selection, progress to degree, and designation of courses in which papers are to be submitted for the degree.

d. With approval of the DGS, students with a specific focus of study will work with a faculty member with knowledge of that field as their faculty advisor. The DGS will liaise with the advisor on all matters listed above.

e. In the final semester of study, the DGS, faculty advisor, and student will work together to assemble an oral defense committee of three graduate faculty. The student will select one of the three papers to present and defend for their exam. The committee may also ask general questions about the two other research papers that were submitted to meet the portfolio requirements.

Requirements for East Asian Cultures Concentration

1. A minimum of 30 graduate credit hours:
   a. Third-year level of language.**
   b. While students may apply credit hours from study abroad toward their degree, at least 18 credit hours must be taken in residence at KU.
   c. A course involving research methods, to be determined in consultation with the Thesis/Faculty Advisor and the Director of Graduate Studies.
   d. Students are expected to select 1 of the East Asian cultures for their concentration and to include in their programs at least 2 courses dealing wholly with an East Asian culture outside the concentration or broadly on East Asia.
   e. Students may not take more than 6 hours of directed readings.
   f. Students may, in consultation with the department graduate director, take other credit hours in a discipline or disciplines closely related to their studies. The balance between courses in EALC and related departments must be determined with the student's thesis advisor and the director of graduate studies. East Asian area courses are offered in anthropology, business, film and media studies, geography, history, history of art, linguistics, political science, religious studies, and sociology.
   g. Students must take 1 literature or culture course with an EALC department graduate faculty member at the 500 level or above in the country of their concentration.

2. Thesis Option
   a. A thesis that will demonstrate in-depth research on a topic in the area of concentration (China, Japan, or Korea), typically completed over 1 or 2 semesters (EALC 899, 3 to 6 credit hours).
   b. In the final semester of study, the DGS, faculty advisor, and student will work together to assemble a committee of three graduate faculty and the student will be required to complete an oral defense of their thesis.

3. Portfolio Option
   a. Must write three substantial research papers on East Asian topics (15-20 pages).
      i. At least one of the papers must be completed by the end of the second semester in the program.
      ii. The papers will be evaluated and graded by the instructor of the class in which the paper is submitted. The grade must be A or B.
      iii. The student will submit each paper to the Director of Graduate Studies (DGS), plus an abstract (no more than 500 words) summarizing each. The student will submit the original copy with the instructor’s remarks and grade. The DGS may require revisions be made before final acceptance.
   b. With the permission of the DGS, students may include relevant courses in non-East Asian areas (such as linguistics, language pedagogy, anthropology, political science, and literary theory). A paper for such a course would generally not be used to fulfill the above requirements unless it was on an East Asian topic approved beforehand by the DGS.
   c. Students will meet regularly with the DGS (at least once a semester) to determine course selection, progress to degree, and designation of courses in which papers are to be submitted for the degree.
   d. With approval of the DGS, students with a specific focus of study will work with a faculty member with knowledge of that field as their faculty advisor. The DGS will liaise with the advisor on all matters listed above.
   e. In the final semester of study, the DGS, faculty advisor, and student will work together to assemble an oral defense committee of three graduate faculty. The student will select one of the three papers to present and defend for their exam. The committee may also ask general questions about the two other research papers that were submitted to meet the portfolio requirements.

**A language course result lower than ‘B’ may result in a departmental recommendation for probation status. If language coursework performance does not improve after one semester, the student may be recommended for dismissal.

For additional courses in the above disciplines, see appropriate sections of the online catalog. Elective courses within EALC can be found on the department’s website (https://ealc.ku.edu/academic-overview/#Courses).

Degree Requirements
To receive the J.D./M.A. EALC, a student must successfully complete a minimum of 106 credit hours, 81 in the School of Law and 25 in the Department of East Asian Languages and Cultures. The School of Law requires a 2.0 grade point average, while the office of Graduate Studies requires a 3.0 GPA for all courses counting toward the M.A. in EALC portion of the degree.

J.D. Requirements
Students must complete all required first year School of Law courses (29 credit hours) prior to enrolling in courses for the joint degree. In addition to these course requirements, the School of Law has an upper-class writing requirement, a residence requirement, and a time limit for completion of the degree.

In addition to the 44 TOTAL credit hours of coursework required of all law students, students in the joint J.D./M.A. EALC program must complete an additional 12 credit hours of coursework consisting of courses in any two of the following four areas of concentration:

<table>
<thead>
<tr>

<td>3</td>
</tr>
<tr>
<td>LAW 918</td>
<td>Islamic Law</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may choose courses to complete the remaining hours necessary to reach the total of 81 hours of law school credit needed for the joint degree from any part of the Law School curriculum.

Please refer to the current School of Law Catalog for further details about the requirements for the J.D. portion of the degree.

EALC Requirements
Students shall consider the degree in East Asian Cultures to be interdisciplinary in nature:

1. A minimum of 22 graduate credit hours plus 1 of the 2 options listed in part 6.
2. Each student is expected to select 1 of the East Asian Cultures (Japan, China, or Korea) for concentration and to include in his or her program at least two courses dealing wholly with an East Asian culture outside of his or her concentration. Up to 2 courses can be pan-East Asian courses including the student’s country of concentration.
3. Students must complete a third year of language of the country of concentration.**
4. No more than 6 hours of directed reading in a language may count toward the M.A. degree.

For information about applying to the Law School, see the school website (http://www.law.ku.edu/admissions/). For information about applying to the EALC Department, please visit the graduate admissions page (https://ealc.ku.edu/graduate-admission/) of the EALC Department website, or contact the EALC Department Graduate program directly at ealc@ku.edu.
5. Students must take 1 literature or culture course with an EALC department graduate faculty member at the 500 level or above in the country of their concentration.

6. Students are required to fulfill 1 of the following requirements:
   a. Write and defend a thesis (3 credit hours of EALC 899) which must deal with a subject within the concentration chosen by the student, or
   b. Practical thesis: Hold an internship or job in the country of concentration for a period of at least 8 weeks, at the advisor's approval, and write a 40 page analysis of the cultural aspects of the experience (3 credits of EALC 801)

Elective courses within EALC can be found on the department's website (https://ealc.ku.edu/academic-overview/#Courses).

Students MUST consult with the EALC Director of Graduate Studies (DGS) immediately upon admission to the joint program to determine an enrollment plan and obtain a list of current approved joint courses. Joint students must also consult with the DGS during advising periods each semester.

First and second year language courses do not count toward the 25 credits required for M.A. degree completion in the J.D./M.A. program. Third year language is 6-10 credits and counts toward the degree. Third and fourth year Chinese, Japanese, and Korean language courses fulfill the requirements, as well.**

** A language course result lower than B may result in a departmental recommendation for probation status. If language coursework performance does not improve after one semester, the student may be recommended for dismissal.

**Graduate Certificate in East Asian Cultures**

Students pursuing the Graduate Certificate in East Asian Cultures will specialize in one of three areas of East Asia, and have the flexibility to study the country through the scope of other disciplines (Art History, Business, Film, History, Linguistics, Political Science, Religious Studies, Women, Gender & Sexuality Studies). Understanding the culture of China, Japan, or Korea is increasingly important in more and more fields - from environmental studies to supply chain management, from international finance to military affairs. This certificate enables students to document valuable expertise gained from the many faculty members at KU who conduct research and teach about East Asia by choosing one of the following tracks:

- China Studies
- Japan Studies
- Korea Studies

Please contact Graduate Program Coordinator, Aley Pennington, at aleypennington@ku.edu for more information.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (p. 1300).

Applicants must submit the following materials for the East Asian Cultures Certificate:

1. A C.V. or Resume
2. A personal statement declaring your interest in East Asian Cultures and its relationship to your graduate course of study and/or career objectives.
3. 2 letters of recommendation from your graduate degree program.
4. A KU Advising report or an official transcript.

The East Asian Languages & Cultures Department offers an East Asian Cultures certificate for specialized study through three different tracks:

- China Studies
- Japan Studies
- Korea Studies

Students are required to complete 12 credits of graduate-level coursework to successfully earn an East Asian Cultures certificate in the area of concentration.

**Required Course:**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EALC 704</td>
<td>Contemporary East Asia</td>
<td>3</td>
</tr>
</tbody>
</table>

**Elective Courses:** In consultation with the department's Director of Graduate Studies, students must choose three additional 3-credit courses from either:

- East Asian Languages and Cultures (EALC) graduate-level courses
- Approved additional Elective courses (see the EALC Graduate Student Handbook for current listing)

*One language course at 4th year level or above (500+) may fulfill one of the three elective course requirements

The following restrictions apply to the choice of electives:

- Two courses must concentrate on the country the student is studying.
- The third elective course may either concentrate on the country of study, OR on East Asia in general.

**Department of Ecology and Evolutionary Biology**

**Ecology and Evolutionary Biology Graduate Programs**

The department comprises a large number of biologists with a variety of research interests. 3 broad overlapping themes capture the interests
and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the EEB website (https://eeb.ku.edu/). Students who are interested in enrolling in EEB graduate-level coursework without admission to a graduate program are encouraged to apply for graduate non-degree seeking student status. See the EEB admission page (https://eeb.ku.edu/how-apply/) for further details.

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1153).)

Facilities

Departmental physical facilities include laboratories, natural history collections, and field-study sites near the university. Most laboratory facilities are in Dyche Hall, Higuchi Hall, McGregor Herbarium, Haworth Hall, and the Public Safety Building. Special facilities in Haworth include controlled-environment rooms, greenhouses, and various instrument rooms, including an excellent microscopy and analytical imaging facility (https://mai.ku.edu/).

The natural history collections are housed by the Biodiversity Institute (https://biodiversity.ku.edu/) and include approximately 8 million specimens, including mammals, birds, reptiles, amphibians, fishes, arthropods and other invertebrates, parasites, and plants, as well as fossils of vertebrates, arthropods, other invertebrates, and plants. Collections support diverse research in evolutionary biology, paleobiology, and ecology including systematics, phylogenetics, biogeography, morphology, behavior, biodiversity informatics, and biotic surveys and inventories. The BI also has leading facilities for diverse analyses of biodiversity information, including well-equipped spatial analysis laboratories, and extensive facilities for molecular systematics.

The Kansas Biological Survey (https://biosurvey.ku.edu/) is a KU research and service unit and a non-regulatory state agency, whose mission is to gather information on the kinds, distribution, and abundance of plants and animals in Kansas, and to compile, analyze, interpret, and distribute this information broadly. KBS is a nationally recognized leader in several fields of environmental research and maintains a strong tradition of natural history studies. Scientists at KBS study terrestrial ecosystem ecology, aquatic ecology, water quality, evolution, biodiversity, ecology and population biology of animals and plants, and conservation and restoration of natural communities. KBS researchers routinely use technologies such as satellite and airborne remote sensing, aerial photography, and Geographic Information Systems.

KBS administers the University of Kansas Field Station (https://biosurvey.ku.edu/field-station/), 3,700 acres of field-sites dedicated to environmental research and education, and is part of the prestigious National Ecological Observatory Network. KUFS sites are in the transition zone between the Eastern Deciduous Forest and Tallgrass Prairie biomes and include woodland, prairie, old fields, and wetlands. The Flitch Natural History Reservation and Baldwin Woods are used primarily to study unmanipulated ecological processes in undisturbed habitats. The John H. Nelson Environmental Study Area is used for experimental ecological studies and has experimental ponds, a dedicated lake and watershed, a common garden, small-mammal enclosures, and a succession facility.

Courses

BIOL 100. Principles of Biology. 3 Credits. NB N

Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended.

BIOL 101. Principles of Biology, Honors. 3 Credits. NB N

Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 is recommended. BIOL 101 and BIOL 102 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor.

BIOL 102. Principles of Biology Laboratory. 1 Credits. U LFE

Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). Prerequisite: Concurrent enrollment in BIOL 100 is recommended.

BIOL 105. Biology Orientation Seminar. 1 Credits. N

Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about degree requirements, academic advising, research opportunities, and career options, as well as how to align academic and professional goals. Graded on a satisfactory/unsatisfactory basis.

BIOL 116. Introduction to Evolutionary Biology. 3 Credits. N LFE

An account of evolutionary thinking from classical to contemporary time. The emphasis is on mainstream developments (Darwinism, Mendelism, the Modern Synthesis, Cultural Ecology), but certain social issues will be examined (social Darwinism, creationism).

BIOL 120. Insects in Your World. 3 Credits. NB N

Students will learn about the global impact of insects on human concerns, both positive (pollination and decomposition) and negative (competition with humans for food, fiber, and shelter, and disease transmission) while developing an appreciation for the ways in which scientists work with real problems involving insects. The course will cover the overwhelming abundance and diversity of insects, and their life history, ecology, behavior, and physiology. This course is intended for both nonbiology and biology majors. Format: two lectures and one discussion section per week.

BIOL 150. Principles of Molecular and Cellular Biology. 3 Credits. NB N LFE

A course for biology majors and students planning to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. An honors
section (BIOL 151) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 150; CHEM 170; or consent of instructor.

**BIOL 151. Principles of Molecular and Cellular Biology, Honors. 3 Credits. NB N LFE**
A course for students with superior academic records who are biology majors or who plan to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. Prerequisite: Membership in the University Honors Program and concurrent or prior enrollment in CHEM 130, CHEM 190 and CHEM 191, CHEM 150, or CHEM 170; or consent of instructor.

**BIOL 152. Principles of Organismal Biology. 3 Credits. NB N LFE**
A course for biology majors and students who plan to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. An honors section (BIOL 153) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 153. Principles of Organismal Biology, Honors. 3 Credits. NB N LFE**
A course for students with superior academic records who are biology majors or planning to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170 and membership in the University Honors Program; or consent of instructor.

**BIOL 154. Introductory Biology Lab for STEM Majors. 2 Credits. N LFE**
A hybrid laboratory course for majors in science, technology, engineering and math fields. This course will use online modules (~ 3 hours per week) to introduce students to key core competencies (e.g., critical thinking, quantitative reasoning, scientific communication, collaboration, etc.) that are applicable to all STEM fields. Three hours of face-to-face instruction will provide students hands-on opportunities to apply these core competencies and skills to research questions in the biological sciences. Students will apply research skills and engage in an authentic research activity during the second half of the course and will present the results to their peers in an oral format.

**BIOL 155. Principle Lab in: ____. 1-3 Credits. U LFE**
This introductory laboratory exposes the students to basic principles in biology and modern experimental techniques through an open-ended authentic research experience directed by a faculty member. Prerequisite: Consent of instructor.

**BIOL 177. First Year Seminar: ____. 3 Credits. NB**
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in biology. Does not contribute to major requirements in biology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**BIOL 200. Basic Microbiology. 3 Credits. NB N**
Introduction to bacteria and viruses. Topics include historical development of microbiology, bacterial structure and growth, enzymes and energy production, disinfection, antibacterial drugs, gene transfer, viral replication, infection and immunity, with emphasis on infectious diseases. Can be substituted for BIOL 201 as a prerequisite for other microbiology courses by consent of department. Not open to those with credit in BIOL 400, or BIOL 401. Prerequisite: A course in high school biology and a course in high school chemistry. This course is not recommended for first semester freshmen.

**BIOL 203. Introductory Microbiology Laboratory. 2 Credits. U LFE**
Laboratory exercises to complement BIOL 200. Prerequisite: BIOL 200. May be taken concurrently.

**BIOL 210. Introduction to Clinical Laboratory Sciences. 1 Credits. U**
An introductory overview of the professions of Clinical Laboratory Sciences including types of analyses performed, specialties, interrelationships in the health care system and a visit to a clinical laboratory. This course will enable those considering a major in the Clinical Laboratory Sciences to have a clear definition of the professions. (Same as CLS 210.)

**BIOL 225. Evolution and the History of Life. 3 Credits. N**
This introductory course for non-majors focuses on the significance of the history of life and the fossil record for our understanding of evolution. Key events in the history of life are considered, including the origins of life, the eukaryotic cell, and humans, and also various mass extinctions. The focus is on general scientific and evolutionary principles and mechanisms that can be extracted from the study of the fossil record. It also uses the lessons of the fossil record to consider the prospects for our own species.

**BIOL 240. Fundamentals of Human Anatomy. 3 Credits. N**
Introduction to the gross anatomy of the human body. Covers the spatial arrangement and appearance of structures throughout the body, including visual identification of these structures. Musculoskeletal relationships, and the anatomy of major organ systems, are emphasized. Not intended for biology majors. Prerequisite: BIOL 100, or equivalent.

**BIOL 241. Human Anatomy Observation Laboratory. 2 Credits. U LFE**
One of the two laboratories in gross anatomy designed to complement BIOL 240. Emphasizes the three-dimensional appearance and spatial relationships of anatomical structures through supervised observations of pre-dissected human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy observation laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is required.

**BIOL 246. Principles of Human Physiology. 3 Credits. N**
An introduction to the physiological and biochemical processes and general physiological principles necessary to sustain life. Organ and organ system processes are emphasized. Intended for students majoring in allied health or sports related curricula who require a course in human physiology. Not intended for biology majors. Prerequisite: BIOL 100 or equivalent.

**BIOL 247. Principles of Human Physiology Laboratory. 2 Credits. U LFE**
Designed to complement BIOL 246. Uses experiments and simulations to demonstrate laboratory techniques and representative processes in areas of human physiology. Concurrent or prior enrollment in BIOL 246 required.

**BIOL 350. Principles of Genetics. 4 Credits. N**
Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian
Introduction to the patterns and processes of organic evolution. Considered are the history of evolutionary thought, molecular evolution, genetics and microevolution, selection and adaptation, and speciation and macroevolution. Emphasis will be placed on how scientists study and document change over time in natural populations, methods for testing hypotheses about events in evolutionary history, and how discovering evolutionary mechanisms at one level of organization can help to explicate general processes in the natural world. Prerequisite: BIOL 152 and BIOL 350, or consent of the instructor.

BIOL 413. The Tree of Life. 4 Credits. N
A tour of the tree of life that introduces the major groups of organisms on Earth, their important traits, phylogenetic relationships, life histories, roles in global ecosystems, and interactions with humanity. Our primary guide to this tour is the “Tree of Life,” a branching diagram (phylogenetic tree) that illustrates how life evolved over the few billion years. Learning to read and interpret phylogenetic trees is central to the course, with lessons addressing general tree literacy, as well as advanced topics like mapping traits onto trees and reconstructing their evolution, interpreting fossils and timetrees, and biogeography. Weekly in-person and virtual labs offer opportunities for students to interact directly with physical specimens while also gaining practical experience with simple algorithms and software applications that can be used to reconstruct and interpret how major groups of organisms evolved over time. Two of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 414. Principles of Ecology. 3 Credits. N
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as EVRN 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 415. Field and Laboratory Methods in Ecology. 2 Credits. N
This course complements BIOL 414 with field trips and laboratory exercises that illustrate the basic concepts of ecology. Topics covered include methodologies for quantitative sampling of terrestrial and aquatic systems, design of field studies, computer simulation and digital data analysis techniques, and scientific writing. Prerequisite: Concurrent or prior enrollment in BIOL 414. A statistics course is recommended.

BIOL 416. Cell Structure and Function. 3 Credits. N
Lecture survey of molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Not open to students with credit in BSCI 416. Prerequisite: BIOL 150 or BIOL 151; BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; or consent of the instructor.

BIOL 417. Biology of Development. 3 Credits. N
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Not open to students with credit in BSCI 417. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

BIOL 418. Laboratory in: ____. 1-3 Credits. U LFE
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts
of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor.

BIOL 419. Topics in: ____. 1-3 Credits. N LFE
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs.

BIOL 420. Seminar: ____. 1-3 Credits. N
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor.

BIOL 423. Non-laboratory Independent Study. 1-9 Credits. N
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 424. Independent Study. 1-9 Credits. N
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 425. Teaching Apprenticeship in Biology. 1-9 Credits. N
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology.

BIOL 426. Laboratory in Cell Biology. 3 Credits. U LFE
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; concurrent or prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended.

BIOL 428. Introduction to Systematics. 3 Credits. N
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systematics background.

BIOL 430. Laboratory in Molecular Biology. 3 Credits. U LFE
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology.

BIOL 435. Introduction to Neurobiology. 3 Credits. N
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Not open to students with credit in BSCI 435. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

BIOL 442. Human Anatomy Dissection Laboratory. 3 Credits. U
Laboratory in gross anatomy designed to build on content from BIOL 240 and BIOL 241. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial dissecting experience. Students perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Prerequisite: BIOL 240 and BIOL 241, and consent of the instructor.

BIOL 446. Biology of Sleep. 3 Credits. N LFE
The course integrates the impact of sleep across all of biology including physiology, endocrinology, health, neurobiology, learning and memory, evolution, and behavior. Students are expected to apply concepts from previous courses to understanding the role of sleep in well-being. Prerequisite: BIOL 150 or BIOL 151, or BIOL 152 or BIOL 153, and one BIOL course 300-level or above.

BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N LFE
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

BIOL 451. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 451 and GEOG 451.)

BIOL 454. Brain Diseases and Neurological Disorders. 3 Credits. N
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 416 or BIOL 435 or BIOL 546, or consent of instructor.

BIOL 477. Ecology and Global Change. 3 Credits. N
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as
Biology of Insects. 3 Credits. N

BIO 511. Biology of Spiders. 1 Credit. N

Lectures and discussions focusing on the ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship and mating; predation; social behavior; and the role of spiders in natural and agricultural ecosystems. Concurrent enrollment in BIOL 511 is encouraged. Prerequisite: BIOL 152, BIOL 153 or permission of instructor.

BIO 512. General Virology. 3 Credits. N

Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host cell-viral interactions; mode of replication of DNA and RNA viruses, tumor viruses. Not open to students with credit in BSCI 512. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor. BIOL 416 is recommended but not required.

BIO 513. Virology Laboratory. 2 Credits. U LFE

Experiments involving cultivation, quantitation, and identification of animal viruses, continuous cell culture and primary chicken embryo culture techniques. Molecular biology techniques are used to demonstrate the steps in virus replication. The value of viruses as tools to understand normal cellular processes is emphasized in experiments which demonstrate the relative simplicity of viruses and the relative complexity of eukaryotic cells. Demonstrations include transformation of cells by tumor viruses and electron microscopy of virus particles. Prerequisite: BIOL 402 and BIOL 512, or consent of instructor.

BIO 518. Bacterial Genetics. 3 Credits. N

Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transduction, and recombination. Molecular
biology of gene expression. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher or consent of instructor.

BIOL 519. Bacterial Genetics Laboratory. 2 Credits. U LFE
A laboratory course on the genetic analysis of bacteria. Includes mutagenesis, cloning, agarose and polyacrylamide gel electrophoresis, PCR, regulation of gene expression, and computational analysis of DNA sequences and protein structures. Prerequisite: BIOL 350 or BIOL 360.

BIOL 520. Marine Biology. 3 Credits. N
This introductory course covers biological, physical, and chemical ocean sciences, with an emphasis on ecological aspects. In addition to this Lawrence campus course, students may enroll for a supplementary 1 credit field trip class to a Caribbean coral reef island offered in December or January. Prerequisite: BIOL 414 or permission of the instructor.

BIOL 524. Mammalian Paleontology. 3 Credits.
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as GEOL 524.) Prerequisite: One of the following: BIOL 225, BIOL 412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor.

BIOL 527. Primate Evolution and the Fossil Record. 3 Credits. N
This course exposes students to fundamental concepts of paleontology and evolutionary biology using the mammalian order Primates as a high-profile case study. Primates are interesting partly because humans are primates. Hence, scientific understanding of human origins and human evolution must be grounded in knowledge of our nearest relatives. This course places human origins within the broader framework of how primates have evolved over the course of the Cenozoic Era, often in response to radical changes in the Earth's physical environment. Prerequisite: BIOL 412 or BIOL 413, or consent of the instructor.

BIOL 530. Biodiversity Discovery and Assessment. 2 Credits. N
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, including species and their natural history, how museum collections are made, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as EVRN 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Credits. U
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as EVRN 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged.

BIOL 533. Biology of Fungi. 4 Credits. N LFE
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153.

BIOL 536. Cell Structure and Function (Honors). 3 Credits. N
BIOL 536 is the honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Not open to students with credit in BSCI 416. Prerequisite: BIOL 350 or BIOL 360 or consent of instructor.

BIOL 540. General Invertebrate Zoology. 4 Credits. N LFE
This course will cover the diversity and evolution of freshwater and marine invertebrate animals. The class includes an overview of phylogenetic relationships, focusing on understanding patterns of key evolutionary innovations in the history of life. Throughout this course, students will have the opportunity to examine living and preserved specimens and identify unique and convergent features across non-terrestrial invertebrates. Students will gain an appreciation of the remarkable diversity of invertebrate morphologies, function and life cycles. Two of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153.

BIOL 541. Biology of Freshwater Invertebrates. 3 Credits. N LFE
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 and/or BIOL 540.

BIOL 544. Comparative Animal Physiology. 3 Credits. N
An intermediate physiology course with lectures and discussions of the structures, functions, mechanisms, and interactions of vertebrate and invertebrate organ systems with a focus on the different ways in which animals adapt to their environments. Topics include digestion and nutrition, metabolism, gas exchange, circulation, excretion, neurophysiology, endocrinology, and muscle physiology. Prerequisite: BIOL 152 or BIOL 153, concurrent or prior enrollment in CHEM 330 or CHEM 380, or consent of instructor. A college physics course is recommended but not required.

BIOL 545. Evolution of Development. 4 Credits. N
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent.

BIOL 546. Mammalian Physiology. 3 Credits. N
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Not open to students with credit in BSCI 546. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and concurrent or prior enrollment in CHEM 330 or CHEM 380, or consent of instructor.

BIOL 547. Mammalian Physiology Laboratory. 2 Credits. U LFE
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 546. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 546 or BIOL 646.

BIOL 548. Human Osteology. 4 Credits. N LFE
This course examines the structure and function of the human skeleton from an evolutionary and biomedical perspective. Students will learn
to identify bones comprising the human skeleton and how osteological information aids in reconstructing sex, age, race, stature, and health status. Major transformations of the human skeleton from hominoid precursors, and some of the biomedical consequences of these transformations, will be addressed. (Same as ANTH 648.) Prerequisite: Consent of instructor.

BIOL 555. General Plant Physiology. 3 Credits. N
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: Consent of instructor.

BIOL 560. Histology. 3 Credits. N
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153.

BIOL 582. Principles of Biogeography. 3 Credits. N
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macroevolutionary trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor.

BIOL 583. Herpetology. 4 Credits. N
Herpetology introduces students to the global diversity of amphibians and reptiles. Students will learn about the major groups of frogs, salamanders, snakes, lizards, crocodiles and turtles through classroom lectures and hands-on laboratories built around the world-class specimen collections housed in the KU Biodiversity Institute. We will also cover a broad range of other important topics through a herpetological lens, including systematics, evolution, ecology, conservation, life histories, biogeography, communication, locomotion, physiology, diet, behavior, and reproduction. One of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors.

BIOL 592. Ichthyology. 4 Credits. N LFE
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 152 and/or BIOL 413.

BIOL 593. Ornithology. 3 Credits. N LFE
A lecture and laboratory course on the biology, evolution, and diversity of birds. One of the three credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153 and BIOL 154, or permission of instructor.

BIOL 594. Forest Ecosystems. 3 Credits.
Students learn basic concepts of forest productivity, forest water relations, forest hydrology, nutrient cycling, through soils and vegetation, nutrient uptake, carbon cycling, decomposition, linkages to aquatic ecosystems, and agents of disturbance to these cycles. The class spends a significant part of the semester exploring forest soil profiles and the challenges they present to different forest ecosystems. We discuss the function of forested ecosystems in a global context and identify and understand smaller-scale processes that drive forest function. Prerequisite: CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; and BIOL 414.

BIOL 595. Human Genetics. 3 Credits. N
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350 or BIOL 360.

BIOL 598. Research Methods. 3 Credits. N LFE
An introduction to the foundational concepts that underpin scientific inquiry and problem solving. Coursework is built around three student-designed inquiries, and topics considered within that context include experimental variables, basic principles of statistics, safety and ethics of investigation, professional communication techniques, and appropriate literature review. Enrollment priority will be given to students currently admitted to the UKanTeach program.

BIOL 599. Senior Seminar: ______. 1 Credits. N
A synthesis and discussion of current trends in a discipline or disciplines related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline’s state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences.

BIOL 600. Introductory Biochemistry, Lectures. 3 Credits. N
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Not open to students with credit in BSCI 600. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry.

BIOL 601. Principles of Biochemistry Laboratory. 2 Credits.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite: Corequisite: BIOL 600; or consent of instructor.

BIOL 602. Plant Ecology. 3 Credits. N
Introduction to basic concepts, focused at community and species level. Architectural ecomorphology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession as an interaction among species differing in ecomorphology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemic defenses; genecology; paleoecology. Prerequisite: BIOL 414 or consent of instructor.

BIOL 603. Systematic Botany. 3 Credits. N LFE
A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent.

BIOL 606. Ecological Plant Physiology. 3 Credits. N
Physiological responses of higher plants to environmental factors are discussed. Major topics are: water relations, heat transfer, resistance to water and temperature stress, dormancy, photoperiodism, photosynthesis
and respiration under natural conditions, and effects of environmental pollution. Prerequisite: Consent of instructor.

**BIOL 612. Fundamentals of Microbiology. 3 Credits.** NB N Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Not open to students with credit in BSCI 612. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor.

**BIOL 616. Medical Entomology. 3 Credits.** N A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor.

**BIOL 622. Paleontology. 3 Credits.** N A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as GEOL 521.) Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEOL 105, or GEOL 304.

**BIOL 623. Paleontology Laboratory. 1 Credits.** U LFE Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.)

**BIOL 625. Behavioral Ecology and Sociobiology. 3 Credits.** N The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 152; either BIOL 350, BIOL 412 or BIOL 414 recommended; or consent of instructor.

**BIOL 630. Conservation and Wildlife Biology. 3 Credits.** N Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended.

**BIOL 636. Biochemistry I. 4 Credits.** N First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor.

**BIOL 637. Introductory Biochemistry Laboratory. 2 Credits.** U LFE The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce the student to cell constituents and biochemical reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment.

**BIOL 638. Biochemistry II. 4 Credits.** N Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: CHEM 335 with a grade of C or higher and BIOL 636 with a grade of C or higher, or consent of instructor.

**BIOL 639. Advanced Biochemistry Laboratory. 3 Credits.** U LFE The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art methodology. Prerequisite: BIOL 637 and BIOL 638 (BIOL 638 may be taken concurrently).

**BIOL 640. The Biology and Evolution of Fossil Plants. 3 Credits.** N A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. Prerequisite: BIOL 413, or permission of instructor.

**BIOL 642. Biochemistry III: Machines on Genes. 4 Credits.** N This one-semester lecture course for biochemistry majors is designed to complement the topics covered in BIOL 636 and BIOL 638. Emphasis will be placed on the various molecular machines involved in the transmission and utilization of genetic information, providing a biochemical perspective of replication, transcription, and translation. Prerequisite: BIOL 636 and BIOL 638 with a grade of C or higher.

**BIOL 648. Systematics and Macroevolution. 3 Credits.** N An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Baysian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent.

**BIOL 650. Advanced Neurobiology. 3 Credits.** N The course builds an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor.

**BIOL 652. Comparative Animal Behavior. 3 Credits.** N A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite.

**BIOL 655. Behavioral Genetics. 3 Credits.** N A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor.

**BIOL 660. Summer Field Ecology. 3 Credits.** N
An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as EVRN 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N).

**BIOL 661. Ecology of Rivers and Lakes. 3 Credits. N**
Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended.

**BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Credits. N**
The course focuses on the role of chemical communication molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor.

**BIOL 668. Evolutionary Ecology. 3 Credits. N**
Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor.

**BIOL 672. Gene Expression. 3 Credits. N**
The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in BIOL 772. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. A course in biochemistry is recommended.

**BIOL 680. Genomics. 3 Credits. N**
Genomics is the study of the structure, function and evolution of the structure, function and evolution of the genome. High-throughput technologies have given us the ability to easily and quickly sequence genomes, and measure genomewide patterns of gene expression. These tools, and the vast amounts of genome-scale data they provide, have transformed biology and medicine. This course will cover the key technological and computational methods by which genomic DNA is sequenced, genomes are assembled, and how RNA and epigenetic patterns are measured. Subsequently, we will emphasize how these genomics tools and techniques have deepened our understanding of biology, covering questions from diverse fields to illustrate the impact of genomics on evolutionary biology, molecular and developmental genetics, human medical genetics and personalized, precision medicine. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor.

**BIOL 688. The Molecular Biology of Cancer. 3 Credits. N**
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor.

**BIOL 699. Biology Honors Research Colloquium. 1 Credits. U**
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor.

**BIOL 700. Conservation Principles and Practices. 3 Credits.**
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 701. Topics in: __________. 1-3 Credits.**
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests.

**BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Credits.**
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences.

**BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Credits.**
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry.

**BIOL 706. Natural Sciences Curation and Collections Management. 3 Credits.**
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloging, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum's paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art's ethnographic collections. Student projects will involve one of the museum's collections with the opportunity for hands-on experience. (Same as MUSE 710.)

**BIOL 712. Evolutionary Biology - Graduate. 3 Credits.**
A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent or consent of instructor.

**BIOL 714. Graduate Ecology. 3 Credits.**
A thorough survey of the discipline of ecology. Topics include elements in physiological, population, community and ecosystem ecology. Overarching themes are 1) pattern and process, 2) ecology and evolution, 3) hierarchical nature of ecology, 4) variation in space and time, and 5)
human dimensions of ecology. Prerequisite: Graduate standing or consent of instructor.

BIOL 720. Scientific Illustration. 3 Credits.
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor.

BIOL 735. Scientific Communication. 3 Credits.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.)

BIOL 741. Biology of Freshwater Invertebrates. 3 Credits.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Graduate students will be expected to submit either an original collection of freshwater invertebrates or write a research essay on a topic mutually agreed upon with the professor. Not open to students who have taken BIOL 541. Prerequisite: Graduate standing; recommended: undergraduate invertebrate biology class.

BIOL 743. Population Genetics. 3 Credits.
Description and discussion of genetic variation in natural populations. The effects and interaction of selection, migration, mutation, mating systems, and finite population size on the maintenance of genetic variation. Discussion of the interface with evolution and population ecology. Prerequisite: BIOL 350 and BIOL 412 or equivalent.

BIOL 750. Advanced Biochemistry. 3 Credits.
The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor.

BIOL 752. Cell Biology. 3 Credits.
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor.

BIOL 754. Brain Diseases and Neurological Disorders. 3 Credits.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor.

BIOL 755. Mechanisms of Development. 3 Credits.
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor.

BIOL 757. Carcinogenesis and Cancer Biology. 3 Credits.
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor.

BIOL 759. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.)

BIOL 772. Gene Expression. 4 Credits.
The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in BIOL 672. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. A course in biochemistry is recommended.

BIOL 782. Principles of Biogeography. 3 Credits.
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended.

BIOL 784. Introduction to Museum Public Education. 3 Credits.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 785. Museum Management. 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 797, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 786. Fundamentals of Tropical Biology. 1-8 Credits.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August.

BIOL 787. Introduction to Museum Exhibits. 3 Credits.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first-hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 794. Mammalogy. 3 Credits.
A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413.

BIOL 798. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

BIOL 801. Topics in: ______. 1-3 Credits.
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests.

BIOL 805. Scientific Integrity in Ecology and Evolutionary Biology. 1 Credits.
This course covers the responsible conduct of research to help students initiate research projects ethically. Topics covered include expectations of federal granting agencies and the university, best practices for data management and publishing, and professional development as a graduate student. Prerequisite: Admission to the graduate program in Ecology and Evolutionary Biology, or consent of instructor.

BIOL 807. Graduate Molecular Biosciences. 3 Credits.
An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, kinetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

BIOL 809. Graduate Molecular Biosciences for Medicinal Chemists. 4 Credits.
An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor.

BIOL 811. Advanced Molecular and Cellular Immunology. 2 Credits.
Covers recent advances in immunochemistry and immunobiology. Topics include structure and function of antibodies, hybridoma systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoreactivity, and cancer. Prerequisite: BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor.

BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Credits.
Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesins, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in biochemistry, or consent of instructor.

BIOL 814. Advanced Molecular Virology. 2 Credits.
The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics and a course in virology, or consent of instructor.

BIOL 815. Advanced Molecular Genetics. 2 Credits.
A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor.

BIOL 816. Careers in the Biomedical Sciences. 1 Credits.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor.

BIOL 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.
This course addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as CHEM 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student.

BIOL 841. Biometry I. 5 Credits.
The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra.

BIOL 848. Phylogenetic Methods. 4 Credits.
A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor.

BIOL 860. Principles and Practice of Chemical Biology. 3 Credits.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of
peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor.

BIOL 895. Human Genetics. 3 Credits.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics.

BIOL 899. Master's Thesis. 1-10 Credits.
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory/unsatisfactory basis.

BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Credits.
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission.

BIOL 902. Advanced Molecular Cellular Biology Seminar. 1 Credits.
Seminar presentation and discussion opportunity for advanced Molecular, Cellular, and Developmental Biology graduate students. Graded on a satisfactory/unsatisfactory basis.

BIOL 905. Advanced Molecular Genetics. 1-3 Credits.
A review of current literature in molecular genetics.

BIOL 916. Modern Biochemical and Biophysical Methods. 4 Credits.
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 817, or permission of instructor.

BIOL 925. Research Grant Proposal Preparation. 3 Credits.
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantsmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

BIOL 943. Multivariate Data Analysis. 3 Credits.
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: Knowledge of elementary matrix algebra.

BIOL 952. Introduction to Molecular Modeling. 3 Credits.
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. Prerequisite: Graduate standing or consent of instructor.

BIOL 985. Advanced Study. 1-10 Credits.
 Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis.

BIOL 999. Doctoral Dissertation. 1-12 Credits.
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory progress/limited progress/no progress basis.

Master of Arts in Ecology and Evolutionary Biology

Ecology and Evolutionary Biology Graduate Programs

The department comprises a large number of biologists with a variety of research interests. Three broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the EEB website (https://eeb.ku.edu/).

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g., BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1153).)

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The departmental graduate admissions committee reviews the record of each applicant. Admission is based on background, preparation, test scores, and academic performance. The committee considers each candidate’s overall undergraduate record in the context of the institution(s) from which the record was received. A graduate student should have a broad undergraduate background in natural science and math, including calculus, physics, chemistry, organismal biology, genetics, ecology, and evolutionary biology. Faculty recommendations, honors, awards, undergraduate research experience, publications, and professional experience also are considered. Enthusiasm, scientific expertise, and
clarity of writing as evidenced by the applicant’s essay are particularly important.

The master’s degree is not a prerequisite for entering a Ph.D. program. Non-native speakers of English must meet English proficiency requirements as described on the English Proficiency Requirements page. For more details on admission requirements, visit the EEB website.

Applicants are encouraged to seek a faculty sponsor through correspondence with one or more faculty members prior to the application process. Prospective doctoral students who would prefer to do rotations with two or three faculty members in their first year should indicate a general field of interest and a short list of prospective faculty mentors on their application. Interested students are encouraged to visit campus to meet faculty members and graduate students. Graduate school is critically important in beginning a career, and the choice of a program in which to enroll should be made carefully.

The number of students admitted is limited. Qualified candidates may be denied admission because of lack of a faculty sponsor, financial support, or research facilities.

Applications and supplemental materials may be submitted online. Applications from underrepresented groups are encouraged. For a detailed description of the application process, visit the EEB website. All application requirements, including the deadline for application receipt, can be found on the EEB Admissions page. Only complete applications are considered. Send inquiries to the graduate academic advisor listed on the EEB Staff page.

M.A. Degree Requirements:

Ecology and Evolutionary Biology

Options I (Thesis) and II (Nonthesis)

Two options leading to the M.A. degree are offered. Option I (Thesis) is research-oriented and requires a thesis. Option II (Nonthesis) emphasizes broader graduate training without a concentration on research. For each option, the advisory committee must have at least 3 Graduate Faculty members, 2 of whom must be in EEB. No faculty member outside the department is required. A faculty member from a different department with a courtesy appointment in the student’s home department may serve in fulfillment of the committee majority.

Required Course Work

Most course work requirements are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements during annual meetings. Listed below are specific course requirements for all master’s students in the EEB department:

1. Students must complete BIOL 805 Scientific Integrity in Ecology and Evolutionary Biology during the first year of graduate education in the fall semester. Students are expected to attend departmental seminars in subsequent semesters.

2. Students must complete BIOL 801 Core Topics in Current EEB Research Seminar during the first year of graduate study in the spring semester.

3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.

4. Students pursuing Option I (Thesis) must complete a minimum of 1 credit hour of BIOL 899 Master’s Thesis.

5. 50% of the coursework required for the master’s degree must be taken at the 700 level or above.

Master’s students must meet a credit-hour-completion requirement. Those in the thesis program must complete a minimum of 30 graduate-level credit hours with no more than 14 of the 30 from enrollment in thesis, research, or advanced study hours. Those in the nonthesis program must complete a minimum of 36 graduate level credit hours with no more than 16 of the 36 from enrollment in thesis, research, or advanced study hours.

Master’s Defense for Option I (Thesis)

Students

During the final semester of enrollment, students pursuing the Option I (Thesis) master’s degree must present the results of thesis research in a public forum and complete a thesis defense. The thesis presentation should follow the standard departmental seminar format. The master’s thesis defense consists of a substantive test of the student’s knowledge of the field and the thesis topic, with approximately 50 percent of the time devoted to questions in the general examination realm, covering the full breadth of the candidate’s field of study (i.e., general knowledge of ecology and evolutionary biology). At the discretion of the student and advisor, the exam may be held on the same day as the thesis presentation, or the events may be held on separate days. The defense examining committee must be composed of 3 members of the Graduate Faculty, the majority of which must be tenured, or tenure-track EEB faculty with regular or dissertation status on the Graduate Faculty. In some cases it may be possible for committee members to attend the examination via mediated means such as tele/video-conferencing (for details view the exam attendance policy).

To pass the thesis defense, a student must receive a majority of passing votes from the examining committee. Students must contact the EEB graduate program coordinator 2 weeks prior to the anticipated presentation and defense to request departmental and College permission to schedule the events.

Students planning to defend a master’s thesis must submit copies of the thesis to the entire examining committee and to the GPC no less than 2 weeks (or longer if requested by the student’s committee) in advance of the planned defense. The thesis should meet general formatting regulations.

Master’s Final Examination for Option II (Nonthesis) Students

During the final semester of enrollment in course work when nonthesis program activities are nearing completion, students pursuing the Option II (Nonthesis) master’s degree must successfully complete a general oral examination. The examination’s structure is similar to that of the doctoral oral comprehensive examination; however, the examination is shorter, and depth and breadth of knowledge required of the student are less comprehensive than expected of a successful doctoral aspirant. The examining committee must be comprised of at least 3 members of the Graduate Faculty, the majority of which must be tenured or tenure-track EEB faculty with regular or dissertation status on the Graduate Faculty. In some cases it may be possible for committee members to attend the examination via mediated means such as tele/video conferencing.
Doctor of Philosophy in Ecology and Evolutionary Biology

Ecology and Evolutionary Biology Graduate Programs

The department comprises a large number of biologists with a variety of research interests. 3 broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the EEB website (https://eeb.ku.edu/).

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1153).)

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The departmental graduate admissions committee reviews the record of each applicant. Admission is based on background, preparation, test scores, and academic performance. The committee considers each candidate’s overall undergraduate record in the context of the institution(s) from which the record was received. A graduate student should have a broad undergraduate background in natural science and math, including calculus, physics, chemistry, organismal biology, genetics, ecology, and evolutionary biology. Faculty recommendations, honors, awards, undergraduate research experience, publications, and professional experience also are considered. Enthusiasm, scientific expertise, and clarity of writing as evidenced by the applicant’s essay are particularly important.

The master’s degree is not a prerequisite for entering a Ph.D. program. Non-native speakers of English must meet English proficiency requirements as described on the English Proficiency Requirements policy (https://policy.ku.edu/graduate-studies/english-proficiency-
Studies to respond to the need for training in Research Skills and Responsible Scholarship experiences may be approved by the student's advisory committee. All students aspiring to the Ph.D. are required by the Office of Graduate Research Skills and Responsible Scholarship.

Students in the EEB department: Appearing regularly with or without scheduled meetings. Listed below are specific course requirements for all doctoral students in the EEB department:

- **Ph.D. Degree Requirements:**
  - Ecology and Evolutionary Biology
  - Required Course Work
    Most course work requirements for EEB graduate students are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements to a student’s degree program during annual meetings. Listed below are specific course requirements for all doctoral students in the EEB department:

1. Students must complete BIOL 805 Scientific Integrity in Ecology and Evolutionary Biology during the first year of graduate education in the fall semester. They are expected to attend departmental seminars in subsequent semesters.
2. Students must complete the BIOL 801 Core Topics in Current EEB Research seminar course during the first year of graduate study in the spring semester.
3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.
4. Students pursuing the doctorate must complete at least 1 credit hour of BIOL 999 Doctoral Dissertation.

**Assistantships**

Doctoral students must complete at least 2 semesters of half-time supervised teaching, curatorial, or research assistantships. Alternative experiences may be approved by the student’s advisory committee.

**Research Skills and Responsible Scholarship**

All students aspiring to the Ph.D. are required by the Office of Graduate Studies to respond to the need for training in Research Skills and Responsible Scholarship (see the Research Skills and Responsible Scholarship requirement policy for additional details). As such, requirements in EEB include training in responsible scholarship (BIOL 805 Scientific Integrity in Ecology and Evolutionary Biology). In addition, students must develop, in consultation with their preliminary advisory committees, a list of additional research skills that will be necessary for successful completion of the doctoral program; these skills may include fluency in English (if not the native language); fluency (reading or speaking) in other foreign languages; and skills such as scientific illustration, phylogenetic methods, genomic analysis, geographic information systems, advanced mathematics and statistics, computer programming, biochemical analyses, advanced microscopy, and others. These research skills will be determined initially by the student’s Preliminary Advisory Meeting and Research Advisory committees, with the potential for modification as specific dissertation plans evolve, proposed in a letter to the graduate academic advisor of the department, and approved by the Graduate Program Committee; successful fulfillment will be determined by the student’s Research Advisory Committee, documented in a letter to the graduate academic advisor of the department.

**Ph.D. Degree Requirements: Ecology and Evolutionary Biology**

**Required Course Work**

Most course work requirements for EEB graduate students are identified during the student’s preliminary advisory meeting. 2. Students must complete the BIOL 801 Core Topics in Current EEB Research seminar course during the first year of graduate study in the spring semester.
3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.
4. Students pursuing the doctorate must complete at least 1 credit hour of BIOL 999 Doctoral Dissertation.

**Assistantships**

Doctoral students must complete at least 2 semesters of half-time supervised teaching, curatorial, or research assistantships. Alternative experiences may be approved by the student’s advisory committee.

**Research Skills and Responsible Scholarship**

All students aspiring to the Ph.D. are required by the Office of Graduate Studies to respond to the need for training in Research Skills and Responsible Scholarship (see the Research Skills and Responsible Scholarship requirement policy for additional details). As such, requirements in EEB include training in responsible scholarship (BIOL 805 Scientific Integrity in Ecology and Evolutionary Biology). In addition, students must develop, in consultation with their preliminary advisory committees, a list of additional research skills that will be necessary for successful completion of the doctoral program; these skills may include fluency in English (if not the native language); fluency (reading or speaking) in other foreign languages; and skills such as scientific illustration, phylogenetic methods, genomic analysis, geographic information systems, advanced mathematics and statistics, computer programming, biochemical analyses, advanced microscopy, and others. These research skills will be determined initially by the student’s Preliminary Advisory Meeting and Research Advisory committees, with the potential for modification as specific dissertation plans evolve, proposed in a letter to the graduate academic advisor of the department, and approved by the Graduate Program Committee; successful fulfillment will be determined by the student’s Research Advisory Committee, documented in a letter to the graduate academic advisor of the department.

**Engagement and Enrollment in Doctoral Programs**

Graduate Studies requires all doctoral students to complete 2 semesters of full-time study at KU or the equivalent spread over several part-time semesters prior to the semester in which the Comprehensive Oral Examination is held. See the Engagement and Enrollment in Doctoral Programs policy for more details.

**Comprehensive Oral Examination**

The comprehensive oral examination tests the depth and breadth of the student’s knowledge and explores the student’s ability to synthesize information and think critically. The examination should include, but is not limited to, questions relating to ecology and evolutionary biology, as well as information directly relevant to the proposed field of dissertation research. Examination committee members determine the questions, but the following is a suggested outline for oral comprehensive exams, in roughly equal proportions:

1. General ecology and evolutionary biology
2. Research area (e.g., ecology, systematics, or evolutionary genetics)
3. Specific research foci (e.g., sub-fields of research areas, taxonomic specialization, specific analytical methods)

Examinations are conducted in English. Students are encouraged to take the examination within four semesters of entering the program and are expected to complete the examination within five semesters. To be eligible to take the examination, both the Research Skills and Responsible Scholarship requirement and the Engagement and Enrollment requirement must be fulfilled and documented. Students must acquire approval to take the comprehensive oral examination from (1) dissertation adviser(s), (2) remaining Research Advisory Committee (RAC) members, and (3) Graduate Program Committee. Students must contact the EEB graduate program coordinator no later than 2 weeks prior
to the anticipated examination date to request departmental and College permission to schedule the event.

Doctoral committees must comply with the Graduate Studies policy on doctoral committee composition (https://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/).

Exam outcomes are pass or fail; honors is not an option. A majority vote of the committee is required to pass the examination. If the adviser or committee members wish, secret ballots may be used. If the student fails the comprehensive oral examination, another examination may be scheduled a minimum of 90 days after the first examination, but under no circumstances may a student take the examination more than twice.

A successful pass of the comprehensive oral examination is considered valid by the university for 5 years. Doctoral candidates who do not complete the dissertation within 5 years may be required to take the examination again to demonstrate current knowledge in the field.

All doctoral students must prepare a dissertation proposal of 5–8 pages, with detail and clarity on par with NSF, NIH, or comparable proposals. Chapters should be described in sufficient detail that RAC members can assess scientific merit, feasibility, and whether the doctoral dissertation will fulfill the scope and requirements for a Ph.D. Dissertation proposals must be approved by the student’s RAC by the time the student submits their second annual report to the department (end of 5 semesters). Failure to obtain approval of a dissertation proposal may result in an “unsatisfactory” annual evaluation. A suggested time frame would entail: Proposals distributed to the RAC committee at least two weeks prior to the second RAC meeting (end of 5 semesters). At this RAC meeting, students defend their proposal in the form of a presentation and must address any questions or concerns, before being approved by the RAC (majority) committee. Approval of dissertation proposal must be reported in the annual RAC report. Students are encouraged to develop the proposal ideas with their mentor and advisory committee well in advance of the meeting.

Research Progress, Final Oral Examination, and Dissertation Defense

After passing the comprehensive oral examination and advancing to degree candidacy, doctoral students are expected to focus on completing original research and writing of the dissertation. Although opportunities for taking valuable courses may arise, the majority of a doctoral candidate’s enrollment should be in dissertation credits (BIOL 999 Doctoral Dissertation).

It is generally expected that the dissertation should be completed two to three years after advancing to candidacy. During these years, the student should continue to meet with his or her advisory committee on an annual basis to receive guidance on research progress. Committee membership should follow university requirements.

When the student and the faculty advisor are able to reasonably predict when the dissertation research and writing will be done, the dissertation defense and final oral examination may be scheduled. At least 5 months must have elapsed between successful completion of the oral examination and the date of the defense. Students must contact the EEB graduate program coordinator at least 2 weeks prior to the anticipated defense date to request departmental and university approval of the defense.

A complete dissertation must be provided to the EEB Graduate Program Committee and to the student’s entire dissertation committee no less than 2 weeks (or longer if requested by the student’s committee) in advance of the planned defense. All members of the dissertation committee are required to read and comment on the work. 3 members are designated readers and provide a more detailed review. Students must follow the instructions for dissertation formatting (http://graduate.ku.edu/etd-formatting-and-working-multimedia-files/) and the instructions for submitting the dissertation (http://graduate.ku.edu/submitting/).

The dissertation defense and final oral examination include a presentation of the candidate’s dissertation as a formal, public lecture. Whenever possible, the presentation should be part of the regular departmental seminar series. The presentation is followed by a question period, after which the final oral examination committee meets with the student for further discussion of the dissertation. A majority vote of the committee is required for the student to pass the examination; 80 percent of the committee must agree to award a student Honors. Both the dissertation and the presentation are considered in the decision. In rare cases it may be possible for committee members to attend the defense and examinations via mediated means such as tele/video-conferencing (for details view the exam attendance policy statement (http://www.policy.ku.edu/graduate-studies/oral-exam-attendance/)). After passing the final oral examination, the student will make any corrections to the dissertation that are required. Along with the title and acceptance pages, the final version will be submitted for approval to the department and the University.

Time Constraints

A student beginning graduate study with only a bachelor’s degree is expected to complete all work for the master’s degree in 2 or 3 years after initial enrollment at KU. A student beginning graduate study with a master’s degree in the biological sciences should complete all work for the doctoral degree within 4 or 5 years. A student beginning graduate study with only a bachelor’s degree in the biological sciences should complete all work for the doctoral degree within 5 or 6 years.

The maximum tenure for EEB graduate students varies according to degree program. The policy for master’s program length (http://policy.ku.edu/graduate-studies/ma-program-time-constraints/) allows a maximum of 7 years to complete the degree program, and the policy for doctoral program length (https://policy.ku.edu/graduate-studies/engagement-enrollment-doctoral-programs/) allows 8 years for completion. Students earning both an M.A. and Ph.D. from the same academic department have a total of 10 years to complete both degrees. Petitions to extend the time limits must be approved by the student’s advisory committee and forwarded to the EEB Graduate Program Committee for consideration before being forwarded to the College for final approval.

EEB requires that doctoral students must complete the equivalent of at least 3 academic years of full-time graduate study. This may include the time spent earning a master’s degree.

Department of Economics

Why study economics?

Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit "Big Data" to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among
aggregate output, interest rates, inflation, unemployment levels and international exchange rates.

Undergraduate Programs

The study of economics offers students insight into some of the most fundamental issues facing societies today. What goods and services should we produce? How should they be produced? How should they be distributed around the world? Economics is outstanding preparation for a career in finance, business, policy analysis, international relations, or any other field that requires rigorous analytic thinking. It also makes an excellent foundation for graduate study in economics, business, law, political science, or public administration.

Courses for Nonmajors

ECON 104 is recommended for students who want only an introductory course. Students planning to teach social sciences should consult the School of Education. Students who plan to enter the School of Business in the junior year should consult the School of Business. Students who plan to enter the School of Journalism should consult the School of Journalism and Mass Communications.

Graduate Programs

The economics department offers a Master of Arts degree and a Doctor of Philosophy degree and, in conjunction with the School of Law, a program in which one can earn the Master of Arts and Juris Doctor degrees. These programs help students prepare for careers in education, government, and business.

Students who are interested in enrolling in graduate level coursework in the Department of Economics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (https://economics.ku.edu/graduate-admission/) webpage for further details.

Courses

ECON 104. Introductory Economics. 4 Credits. SF S
An introduction to modern economics designed primarily for students who do not plan to major in economics. Topics include economic history, the operation of economic institutions, and the formation and execution of economic policies to meet the current problems of the domestic and international economy. Course may be offered in lecture or online format. Prerequisite: MATH 101 or MATH 104, or LA&S 108, or eligibility for MATH 115 or MATH 125. 3 Credits.

ECON 105. Introductory Economics, Honors. 4 Credits. SF S
An introduction to modern economics designed primarily for students who do not plan to major in economics. Topics include economic history, the operation of economic institutions, and the formation and execution of economic policies to meet the current problems of the domestic and international economy. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 104, or eligibility for MATH 115 or MATH 125. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. 3 Credits.

ECON 110. The Economics of Globalization. 3 Credits. SF S
The course emphasizes the application of economic methods of analysis to the public policy issues that globalization creates. Topics covered may include the following: winners and losers from trade; links between trade and labor markets; links between trade and foreign investment; the international financial system and exchange rates; outsourcing and multinational corporations; international institutions and regional trade agreements.

ECON 142. Principles of Microeconomics. 3 Credits. SF S
An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. 3 Credits.

ECON 143. Principles of Microeconomics, Honors. 3 Credits. SF S
An honors section of ECON 142. An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. 3 Credits.

ECON 144. Principles of Macroeconomics. 3 Credits. SF S
An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. 3 Credits.

ECON 145. Principles of Macroeconomics, Honors. 3 Credits. SF S
An honors section of ECON 144. An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. 3 Credits.

ECON 177. First Year Seminar: ____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Economics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. 3 Credits.

ECON 199. Data I: Dealing with Data. 3 Credits. S
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as POLS 199, PSYC 199 and SOC 199.) 3 Credits.

ECON 250. Study Abroad Topics in: ____. 1-5 Credits. S
This course is designed for the study of special topics in economics at the freshman/sophomore level. Coursework must be arranged by the office of KU Study Abroad and approved by the Economics Department. This course may be repeated for credit if content varies. 1-5 Credits.

ECON 310. Topics in Applied Economics: ____. 3 Credits. S
(Topic, instructor, and specific prerequisites to be announced in the Schedule of Classes.) This course will focus on an area of applied economics of current interest. This course cannot be used to fulfill the
elective course requirements for the Economics major or the Economics minor.

ECON 315. Income Distribution and Inequality. 3 Credits. S
An analysis of the distribution of income and wealth in the United States and a few other developed countries. The concepts of economic inequality, economic justice, statistical measures of inequality and their applications will be discussed. Various theories of income distribution (e.g., Ricardian, Marxian, neoclassical, and neo-Keynesian) will be covered. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

ECON 399. Data 2: Foundations of Data Science. 3 Credits. S
Data science empowers its users to provide data-drive solutions to problems and questions in the world. This course provides foundational skill and knowledge behind this power. This knowledge and skill includes learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. (Same as POLS 399 and PSYC 399.) Prerequisite: PSYC 199/POLS 199/ECON 199 or EECS 138; and PSYC 210 or MATH 365 or ECON 426 or POLS 306 or SOC 380 or MATH 101 or MATH 104 or MATH 115 or MATH 121.

ECON 426. Statistics and Data Analysis for Economics. 3 Credits. S
An introduction to probability and statistical methods for empirical work in economics. Probability, random variables, sampling, descriptive statistics, probability distributions, estimation hypothesis testing, introduction to the regression model. Prerequisite: MATH 115 or MATH 125.

ECON 450. Study Abroad Topics in: ______. 1-5 Credits. S
This course is designed for the study of special topics in economics at the junior/senior level. Coursework must be arranged by the office of KU Study Abroad, approved by the Economics Department, and may count as an economics elective for economics majors. This course may be repeated for credit if content varies.

ECON 505. History of Economic Analysis. 3 Credits. S
The history of intellectual efforts to understand economic phenomena and the impact of these efforts on the social and economic development of the modern world. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

ECON 510. Energy Economics. 3 Credits. S
The application of basic economic concepts and methods to the analysis of energy markets, regulation, and policies. Topics covered include energy trends and projections, economic growth and resource exhaustion, the organization and regulation of fossil fuel industries, nuclear power and non-conventional energy technologies, the world oil market, energy conservation, environmental pollution, and national energy policies in the U.S. and other developed as well as developing countries. Prerequisite: ECON 142 or ECON 143.

ECON 513. Behavioral Economics. 3 Credits.
Decisions link our thoughts to our actions and as a result define who we are and who people think we are. This makes decision making a fundamental life skill. But, can we make better decisions? This course will introduce you to the science of decision making that has developed as scholars including biologists, economists, mathematicians, philosophers, psychologists, and others have sought to answer this very question. Over the course of the semester we will examine what we have learned so far such as how people predict and mispredict events, how people make decisions and how their decisions can be quite irrational from one perspective but simultaneously appear quite reasonable, how people bargain and why they sometimes choose to cooperate and other times not, and why negotiating can be so difficult. (Same as PSYC 513.) Prerequisite: PSYC 104 or ECON 142; MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126.

ECON 520. Microeconomics. 3 Credits. S
The theory of consumption, production, pricing, and resource allocation. Not open for credit to students with credit in ECON 524. Prerequisite: ECON 142 or ECON 143; and MATH 115 or MATH 125.

ECON 522. Macroeconomics. 3 Credits. S
The theory of national income and employment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 144 or ECON 145; and MATH 115 or MATH 125.

ECON 523. Macroeconomics Honors. 3 Credits. S
The theory of national income and unemployment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 144 or ECON 145; and MATH 115 or MATH 125. Open only to students who have been admitted to the University Honors Program, or by consent of instructor.

ECON 526. Introduction to Econometrics. 3 Credits. S
An introduction to the statistical analysis of economic data and its application to economic inquiry. Includes extensive use of statistical software. Prerequisite: MATH 115 or MATH 125; ECON 426, MATH 526, or EEC5 461.

ECON 535. Economic History of Europe. 3 Credits. S/W
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as HIST 528.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

ECON 536. Economic Issues of the European Union. 3 Credits. S
A survey of the economies of the European Union, with a focus on the economic development of the member states since World War II, and an examination of the various economic issues confronting them today. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

ECON 550. Environmental Economics. 3 Credits. U
This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as EVRN 550.) Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143.

ECON 551. Philosophy of Economics. 3 Credits. HR
This course surveys the central concepts, issues and debates surrounding the philosophy of economics. The course is divided into three parts. The first is focused on the nature of economic science, whether it can be separated from value judgments, along with the foundational and methodological issues that arise in economics. The second part of the course provides a survey of several central topics in the philosophy of economics including rational choice theory, game theory, social choice theory, behavioral and neuroeconomics. The third part concerns welfare economics (broadly understood), including the aims of welfare
economics, the nature of well-being, the possibility of interpersonal utility comparisons, and the aims of economic institutional design. At the end of this course, students should have knowledge and understanding of central methodological and substantive debates regarding the nature of economic theories. This course should also enhance students’ ability to think critically and analytically about the nature of economic theories and the key concepts in the philosophy of economics, write clearly and cogently about philosophical issues that arise in economic, incorporate the ideas, theories and techniques that arise in both philosophy and economics to understand social and economic issues. (Same as PHIL 551.) Prerequisite: An introductory course in philosophy or economics, or permission of instructor.

**ECON 560. Economic Systems. 3 Credits. S**
Critical analysis of economic theories underlying such economic systems as capitalism, different types of socialism, communism, and fascism. Comparative study of economic planning, production, distribution, price formation, economic institutions, and forms of government in countries under different economic systems. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 562. The Russian Economy. 3 Credits. S/W**
An analytical survey of Russian economic development, with emphasis on the structure and operation of the Russian economy and transition issues. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 563. Current Economic Issues of East Europe. 3 Credits. S**
An institutional and theoretical analysis of the issues arising from the transition from a command economy to a free market-oriented economy. With emphasis on the former Soviet Union, topics will include: assessment of the central planning experience; changes in property rights and their effect on resource allocation; market mechanisms and how they work when market institutions are at the formative stage; and public interest under privatization. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 564. Topics in Applied Economics: _____, 3 Credits. S**
This course will focus on an area of applied economics of current interest. This course can be used to fulfill the elective course requirement for the Economics major. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143 or ECON 144 or ECON 145 or ECON 426.

**ECON 582. Economic Development. 3 Credits. S**
An introduction to economic growth and development in high and low income countries, problems of development, and development policy. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143.

**ECON 584. Economic Development of Latin America. 3 Credits. S**
This course explores development strategies followed in the countries of Latin America and the Caribbean, and analyzes current debates over development strategy. Topics covered include: debt, structural adjustment, and multilateral lending agencies; trade policy, and regional or hemispheric integration; state intervention in the economy; the role of elites; environmental degradation and sustainable development; land reform and agricultural policy; transnational enterprises and foreign investment; women in work and the household; migration (rural-urban, and international); and grassroots development projects. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 586. Economic Issues in China. 3 Credits. S**
This course studies the Chinese economy, especially during the post-1979 reform period, and its relationship to the development of the Greater China Circle (China, Hong Kong, and Taiwan). Topics to be covered include economic development during the pre-1979 reform period, economic reform, and its impacts on China, Hong Kong, Taiwan, and lessons from the Chinese economic reforms. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 587. Economic Development of Africa. 3 Credits. S**
This course studies current economic issues facing African countries. It studies the general characteristics of several African economies and examines the impact of economic development policies, including those of international organizations, on the economies of Africa. Topics include poverty, income inequality, debt, foreign investment policies, trade policies, and government regimes. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 590. Game Theory. 3 Credits. S**
Analysis of strategic choice problems. Firms, voters, bargainers, animals, sports competitors, and persons in everyday life choose alternative options with the outcomes depending on the choices of one or more other similar decision makers. Strategies of rational choices will be derived and analyzed in economic and other environments. Prerequisite: ECON 142 or ECON 143.

**ECON 597. Research in Economics. 1-3 Credits. S**
A directed reading and research course for economics majors. The course involves the preparation of a research paper under the supervision of a faculty member whose area of interest and specialization corresponds with the area of study selected by the student. Note that a maximum of 3 credits total of ECON 597 and ECON 697 can count for the elective requirements of any economics degree. Prerequisite: Completion of ECON 520 or ECON 522 or ECON 526, along with approval of the Director of Undergraduate Studies and selected faculty member.

**ECON 600. Money and Banking. 3 Credits. S**
The basic principles of money, credit, and banking and their relation to prices and business fluctuations; a study of commercial and central banking and the problems of credit control. Prerequisite: ECON 522 or ECON 523, and MATH 115 or MATH 125.

**ECON 604. International Trade. 3 Credits. S**
An introduction to the nonmonetary theory of international trade, the cause and pattern of trade, the gains from trade, and the contemporary issues in international economic policy. Prerequisite: ECON 520, and MATH 115 or MATH 125.

**ECON 605. International Finance. 3 Credits. S**
This course surveys theories of exchange rate and balance of payments determination. Included are the elasticity approach, Keynesian models, and the monetary approach. The mechanics of foreign exchange trading, balance of payments accounting, and the working of the international monetary system are also discussed. Prerequisite: ECON 522 or ECON 523, and MATH 115 or MATH 125.

**ECON 609. Sports Economics. 3 Credits. S**
The course covers the microeconomics of the sports industry. Topics include analysis of teams, leagues, players, incomes, strategies, history, and government policy. Prerequisite: ECON 520, and MATH 115 or MATH 125 or permission of instructor.

**ECON 610. Resource Economics and Environmental Policy. 3 Credits.**
Survey of the economics of natural resources, designed to introduce the student to the economic models and analytical methods commonly used in natural resource problems and policy issues. Topics covered include environmental pollution and regulation, environmental case studies and applications of cost-benefit analysis, theoretical models, policy issues in the utilization of renewable and nonrenewable resources, sustainable
development, and global environmental problems. Prerequisite: ECON 520, and MATH 115 or MATH 125 or permission of instructor.

ECON 620. Elements of Mathematical Economics. 3 Credits. S
Selected aspects of mathematical theory in emphasis on those parts where the spirit of mathematical analysis, rather than dexterity, is utilized. The simplification of the subject matter is accomplished by stressing complete treatment of special cases such as a two commodity-two individual world. Prerequisite: ECON 520; MATH 116 or MATH 126.

ECON 622. Public Finance. 3 Credits. S
A general introduction to the science of public finance. Topics covered include public expenditures, public revenues and public credit, and the shifting and incidence of taxation. Prerequisite: ECON 520, and MATH 115 or MATH 125.

ECON 630. Industrial Organization and Antitrust Policy. 3 Credits. S
An examination of the structure, conduct and performance of American industry applying the concepts and techniques of economic analysis. Topics covered include the theories of monopoly, competition and oligopoly, concentration, barriers to entry, price-fixing and other restrictive practices, mergers, technological change, and public regulation. The course will also focus on the historical development of American antitrust law. Prerequisite: ECON 520, and MATH 115 or MATH 125.

ECON 640. Labor Economics. 3 Credits. S
Analysis of labor markets and differences in wage rates and incomes. Topics include returns to education and training, labor unions, unemployment, anti-poverty programs, and other government policies influencing the labor market. Not open to students with credit in ECON 641. Prerequisite: ECON 520; MATH 115 or MATH 125.

ECON 641. Labor Economics - Capstone. 3 Credits. SI S
This course covers the analysis of labor markets and differences in wage rates and incomes. The course covers various topics, such as returns to education and training, labor unions, unemployment, anti-poverty programs, and other government policies influencing the labor market. This course represents the capstone version of Labor Economics (ECON 640) by exploring a package of economic studies in the primary literature. Not open to students with credit in ECON 640. Prerequisite: ECON 520; ECON 526; MATH 115 or MATH 125; ECON 426 or MATH 526.

ECON 664. Topics in Economics: ______. 3 Credits.
This course focuses on a particular area of applied economics reflecting the current interests of students. Students can use this course to fulfill the elective course requirement for the Economics major. Repeatable for credit if topic varies. Prerequisite: ECON 520 or ECON 522 or ECON 523 or ECON 526.

ECON 669. The Economics of Financial Markets. 3 Credits. S
This course introduces the fundamentals of derivatives pricing, leading to the celebrated Black-Scholes formula—a discovery that led to the Nobel Prize for Robert Merton and Myron Scholes in 1997. Students will derive explicitly the formula for themselves. To achieve this objective, the course introduces and applies a wide array of important concepts drawn from economics, finance, mathematics, and statistics, including no-arbitrage, stochastic calculus, self-financing portfolios, risk-neutral measures, hedging, and the fundamental equations for pricing. Prerequisite: MATH 126; MATH 526.

ECON 680. Economic Growth. 3 Credits. S
This course studies growth with an emphasis on national evidence and macroeconomic policy issues. Classic and modern growth theories are developed and evaluated on the basis of how well they fit empirical evidence. Theories are developed in which productivity growth results from endogenous changes in technology or in the efficiency with which factors are utilized. The fundamental factors that affect productivity are examined, and they may include government policies, income inequality, geography, climate, resources and other factors. Prerequisite: ECON 522 or ECON 523, and MATH 115 or MATH 125.

ECON 696. Research Methods in Economics. 3 Credits. S
The course effectively considers research methods employed in microeconomic studies, macroeconomic studies, and econometric studies. As important, the course focuses strongly on research methods common to any type of economic study, such as effective literature reviews and technical writing tools. This course distinguishes across theoretical methods, empirical methods, and experimental methods. To the extent relevant, the course explores the links between theoretical methods and the other two methods. The course considers common theoretical methods (e.g., utility maximization), established empirical methods (e.g., difference-in-difference estimation), and standard experimental methods (e.g., blocked random assignment). Prerequisite: ECON 520; ECON 522 or ECON 523; and ECON 526.

ECON 697. Senior Research Honors. 1-3 Credits. S
A directed reading and research course for qualifying seniors. Involves preparation of a research paper under the supervision of a faculty member whose area of interest and specialization corresponds with the area of study selected by the student. Note that a maximum of 3 credits total of ECON 597 and ECON 697 can count for the elective requirements of any economics degree. Prerequisite: ECON 696 and approval of the selected faculty member and the Director of Undergraduate Studies.

ECON 700. Survey of Microeconomics. 3 Credits.
A comprehensive survey of microeconomics, including the theories of consumption, production, distribution, pricing, and resource allocation. Prerequisite: ECON 520; MATH 116 or MATH 126. Students approved to begin coursework in the Accelerated Master's program are exempt from the ECON 520 prerequisite.

ECON 701. Survey of Macroeconomics. 3 Credits.
A comprehensive survey of the modern theory of national income determination with particular emphasis on the foundation of macroeconomic models and their empirical implementation. Prerequisite: ECON 522; MATH 116 or MATH 126. Students approved to begin coursework in the Accelerated Master's program are exempt from the ECON 522 prerequisite.

ECON 705. Development of Economic Thought. 3 Credits.
The development of economic thought from the time of the physiocrats through the modern period. Consideration is given to the works of the English Classical school, the school of Vienna, the historical school, the Lausanne school, and Cambridge school. In addition, the development of economic thought in the United States during the period is treated. Prerequisite: ECON 520 and ECON 522.

ECON 715. Elementary Econometrics. 3 Credits.
An elementary analysis of the problems of estimation, prediction, and hypothesis testing in the context of general linear, stochastic difference equation and simultaneous equations models. Applications of econometric theory to practical economic problems will be emphasized. Prerequisite: ECON 526 or MATH 526; MATH 116 or MATH 126.

ECON 716. Econometric Forecasting. 3 Credits.
An analysis of econometric forecasting techniques, including time-series models, single-equation regression models, and multiple-equation regression models. The course will examine forecasts of (a) macroeconomic variables, such as interest rates, investment, GNP, and the rate of inflation; and (b) market variables, such as price and quantity. Prerequisite: ECON 526 or ECON 715 or permission of instructor.
ECON 718. Elementary Financial Econometrics. 3 Credits.
This course covers a set of econometric tools widely used by academics and practitioners in quantitative areas such as risk management, investment management, and financial engineering. Financial Econometrics is a young and rapidly evolving discipline that emphasizes the use of advanced econometric/statistical techniques for analyzing price and return data and managing financial risks as well as predicting future price trends. In particular, the course will focus on making the transition from an economic model of asset return behavior to an econometric model using financial data. Topics covered include (1) specification of a financial economic model; (2) estimation of an econometric model for financial data; (3) testing of the assumptions of the econometric model; (4) testing the implications of the econometric model; (5) forecasting from the econometric model. The modeling process requires the use of economic theory, probability models, optimization techniques, and statistical analysis. Students will develop programming skills in R, a popular statistical analysis package in the financial sector. Prerequisite: ECON 715 or ECON 716 or consent of instructor.

ECON 719. Digital Economics. 3 Credits.
The digitization of the economy is one of the most critical issues of our time. Digital technologies have transformed businesses and people's lives and will continue to do so in the future. This course studies digital economics and how the digital economy influences markets and society. Students will learn how the internet, mobile communications, the sharing economy, social media, blockchains, and cryptocurrencies impact global businesses. The course has two main parts: 1) Basic theory in digital economics, including network effects, value creation models, digital business models and market modeling; 2) How the digital economy influences privacy, regulations, and strategy. Through a combination of theoretical modeling and empirical evidence, the course will analyze key features of digital markets, including network effects, two-sided markets, search and matching, reputation systems, and the use of data. Attention will also be given to individual markets, such as search engines, e-commerce platforms, and the gig economy. Prerequisite: ECON 526 and ECON 700 or consent of instructor.

ECON 730. Topics in Industrial Organization. 3 Credits.
Advanced study of recent research in applied microeconomics and business behavior. Topics include vertical integration, collusion, multi-plant and multi-product operations, regulated industries, tying arrangements, and the empirical links between monopoly power and profitability. Prerequisite: ECON 630.

ECON 740. Theory of Economic Growth and Development. 3 Credits.
Advanced study of the theory of economic growth and development. Recent growth models, theory of underdevelopment, programming, policies and plans for development. Prerequisite: ECON 520 and ECON 522.

ECON 769. Financial Economics. 3 Credits.
An introduction to the economic analysis of choice under uncertainty and asset pricing theory. Topics include the general equilibrium Arrow-Debreu model of complete markets; capital asset pricing model; stochastic dominance; portfolio frontiers; mutual fund separation theorems; arbitrage pricing theory; valuation of derivative securities. Both single-period models and multi-period models will be discussed. Students should have some background in elementary linear algebra, calculus, and probability theory. Prerequisite: MATH 127; ECON 526 or MATH 526; MATH 290 recommended.

ECON 770. Economics of the Labor Market. 3 Credits.
A theoretical and empirical analysis of labor supply and demand, human capital, information and labor mobility, unemployment, discrimination, and union behavior and influence. Prerequisite: ECON 520; MATH 116 or MATH 126.

ECON 780. Topics in Economics: ______. 1-3 Credits.
Selected topics in economics. Prerequisite: Consent of instructor.

ECON 790. Game Theory and Applications. 3 Credits.
This course covers basic game theory and applications. Topics covered include strategic games with complete information, Bayesian games (with incomplete information), extensive games with perfect information, and extensive games with imperfect information. Equilibrium concepts covered include Nash equilibrium, mixed-strategy Nash equilibrium, rationalizability, Bayesian Nash equilibrium, sub-game perfect Nash equilibrium, and sequential equilibrium. Depending on availability of time, additional topics may include strictly competitive games and repeated games. The course may include diverse applications such as in business strategy, auctions, voting, international trade, military conflicts, contracts, regulation, and industrial organization. Prerequisite: MATH 127; ECON 526 or MATH 526; MATH 290 recommended.

ECON 791. Game Theory and Applications II. 3 Credits.
This course is a continuation of game theory and applications (ECON 790). Topics may include rationality and common knowledge, multi-stage games and repeated games, coalitional games and the core, and sequential rationality, including possible applications such as signaling, reputation, and information transmission. Additional topics may include, among others, strictly competitive games, auctions, and evolutionary game theory. The course may include diverse applications within and outside economics. Prerequisite: ECON 790.

ECON 800. Optimization Techniques I. 3 Credits.
Economic models involving the maximization of a scalar (vector) function subject to equality and inequality constraint where the variables are in a finite dimensional Euclidean space. Characterization of optimal points by way of first and second order derivatives and by way of saddle points. Duality theorems of mathematical programming. Prerequisite: Consent of instructor.

ECON 801. Microeconomics I. 3 Credits.
An advanced course in price and distribution theory. Prerequisite: ECON 800 or consent of instructor.

ECON 802. Microeconomics II. 3 Credits.
The study of the operation of the economic system taking into account the diversity of goods and services. Primary attention is centered upon the competitive economy. A study is made of the existence, uniqueness, stability, and comparative statics of equilibrium positions. In addition, a study is made of ways of evaluating alternative states of the economy in terms of systems of value judgments. This includes a discussion of the Arrow Impossibility Theorem; the notion of a Pareto-satisfactory process is introduced and the relationship between Pareto-optimal states and competitive equilibrium positions is studied. Prerequisite: ECON 800 and ECON 801.

ECON 805. Teaching Methods in Economics. 3 Credits.
The goal of the course is to enhance undergraduate student learning by refining and expanding the teaching techniques in the teaching assistant's arsenal. The course starts by discussing and illustrating the importance of setting the tone on the first day of class. Then the course turns to ways of creating intellectually exciting lectures and discussion sections. Active learning comes next as the course presents techniques to involve actively the students in their learning experience. Then the course examines ways for recognizing and broadening our teaching styles to include different learning styles. The course also discusses the evaluation of students by emphasizing the importance of matching the assessment of students
This course will examine the process and policies of economic development from a macroeconomic perspective. Topics will include the theory of growth in the dual economy, the role of foreign trade in economic development, inflation and stabilization in developing economies, the problem of foreign debt, the relationship between financial and real development, and various development policies. Prerequisite: ECON 810 or consent of instructor.

**ECON 851. The Theory of International Trade. 3 Credits.**

The study of the pure theory of international trade; factor-price equalization, trade and welfare, general equilibrium in the international economy, comparative statics, and stability conditions. Prerequisite: ECON 700 and ECON 701.

**ECON 854. Advanced Environmental Economic Theory. 3 Credits.**

This course covers advanced theoretical models used in the economic analysis of environmental issues. Students learn to apply the criteria of cost-effectiveness, efficiency, and social welfare to the evaluation of environmental policies. Topics explored in the course include market failures stemming from environmental externalities, emission standards, market-based policy instruments (e.g., taxes, subsidies, cap and trade), voluntary approaches, legal liability, and enforcement. Prerequisite: ECON 801 or consent of instructor.

**ECON 855. Natural Resources. 3 Credits.**

Advanced analysis of the economic relationships between natural resources, population, and environment. Emphasis is on the analytical techniques useful for solving the economic problems of natural resource allocation over time. Prerequisite: ECON 700.

**ECON 869. Advanced Financial Economics. 3 Credits.**

This course presents an analysis of financial markets and instruments, together with the quantitative tools essential for research in the field. The material will be presented in a discrete time setting and will stress the link between financial economics and equilibrium theory. Topics will include securities pricing in the absence of arbitrage, the theory of risk and utility in the basic portfolio problem, mean variance analysis and the CAPM, the Martingale properties of security prices, restricted participation, in the basic portfolio problem, mean variance analysis and the CAPM, the Martingale properties of security prices, and recent research results. Prerequisite: ECON 802 or consent of instructor.

**ECON 870. Applied Microeconomics. 3 Credits.**

This course introduces students to the data and empirical methods used in the fields of applied economics such as labor economics, public finance, and industrial organization. The course will focus on how to adjust for self-selection and identify causal relationships in applied microeconomic fields. Topics covered include economic data and statistical programming, instrumental variables, difference-in-differences, regression discontinuity, count data, sample selection, treatment effects, and duration models. Attention will be given to the suitability of the methods to the research question under consideration. Each topic will emphasize the proper application of the methods using the standard textbook treatment as well as assigned papers that examine the basic economic issues, the econometric techniques, and the applications to data. Prerequisite: ECON 817 and ECON 818, or consent of instructor. ECON 915 is recommended.

**ECON 880. Advanced Topics in Economic Theory: ______. 1-3 Credits.**

Selected topics in economics covered at an advanced level. Prerequisite: Consent of instructor.

**ECON 899. Master’s Thesis. 1-10 Credits.**

**ECON 901. Advanced Economic Theory I. 3 Credits.**
Advanced study of current general equilibrium analysis, the mathematical tools involved in such analysis, and some applications to other branches of economic theory. Prerequisite: ECON 802 and ECON 810.

ECON 910. Economic Theory Seminar-Workshop. 1-3 Credits. This seminar-workshop is designed to study advanced research topics in the areas of macroeconomic and microeconomic theory, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in these areas of specialization.

ECON 911. Applied Macroeconomics. 3 Credits. This course studies tools for applied macroeconomic research. It uses modern analytical methods to investigate economic theories. Econometric techniques to identify structure from time series data are emphasized. The goal is for each student to be able to use this tool kit to answer important macroeconomic questions. Prerequisite: ECON 810.

ECON 912. Advanced Macroeconomics. 3 Credits. An analysis of economic policy in dynamic economic models. The effects of various policies on the equilibrium, stability, and adjustment paths of the models will be considered. Both open and closed economies will be analyzed. Prerequisite: ECON 810. MATH 320 is recommended.

ECON 913. Monetary Economics. 3 Credits. This course examines how money, monetary policy, and monetary institutions influence the macroeconomy. Modern theories of money demand are presented and critiqued. The function of commercial banks, non-bank financial intermediaries, and central banks in the money supply process is addressed. Interrelationships between the tools, the instruments, the operating procedures, the intermediate targets, and the goals of policy are examined. Additional topics may include the monetary transmission mechanism, the effect of uncertainty on optimal policy decisions, the rules versus discretion debate, the monetary implications of fiscal policy, the term structure of interest rates, the causes and consequences of bank runs and financial panics, and the optimal method of constructing weighted monetary aggregates. Prerequisite: ECON 811 or consent of instructor.

ECON 914. Computational Methods for Economics. 3 Credits. This is a course in the basic tools of numerical analysis that can be used to derive theoretical results from economic models without analytical solutions, to assess the quantitative implications of economic theory and to estimate statistical models. While most examples will come from macroeconomics and some from econometrics, the generality with which the techniques will be presented in this course will make them applicable to a wide range of fields like financial economics, marketing, and microeconomics. To enable the efficient application of numerical tools, this course endeavors to explain not only when and how to use various numerical algorithms but also how and why they work; in other words, the intention of the course is to open up some "black boxes" and provide the students with a versatile toolset. The course will cover numerical algorithms for large systems of equations, complicated optimization problems, functional approximation, numerical integration and simulation. The course will then focus on solving numerically differential equations and dynamic programming problems that do not have analytical solutions through iterative methods. Subsequent advanced topics will include efficient algorithms for diverse high-dimensional heterogeneous agent DSGE models, Bayesian estimation and inference, non-parametric estimation and network studies. Prerequisite: ECON 810, ECON 811, ECON 817, and ECON 818 or consent of instructor.

ECON 915. Advanced Econometrics I. 3 Credits. The study of selected topics in applied cross-section econometrics for uses mainly in applied microeconomics, public finance, and labor economics. Topics include traditional econometrics of production and demand, latent variable models, panel data studies, probabilistic choice models, censored and truncated models, sample selection, disequilibrium models, duration studies, and semi- and non-parametric models. Prerequisite: ECON 818, or consent of instructor.

ECON 916. Advanced Econometrics II. 3 Credits. A study of selected topics in applied time-series econometrics for use mainly in applied macroeconomics, international finance, and development economics. Topics include empirical applications of ARCH models, VAR models (study of impulse response function and variance decomposition), unit-root cointegration and long memory models. Bayesian unit root analysis, estimation and inference of dynamic general equilibrium models, model calibration and simulation are also possible topics of this course. Prerequisite: ECON 818, or consent of instructor.

ECON 917. Advanced Econometrics III. 3 Credits. A study of structural and nonlinear time series approaches to econometric modeling and inference. The course emphasizes techniques needed to use economic theory in system-wide econometrics. Emphasis is placed on selection of functional form for approximation to theoretical functions and the use of duality theorems for derivation of the resulting econometric systems of equation. Inference with those models will be by nonlinear parametric, semi-parametric, and nonparametric methods. Prerequisite: ECON 818.

ECON 918. Financial Econometrics. 3 Credits. This course is designed to provide a variety of new econometric tools useful to investigate financial data. It discusses how to measure and forecast financial volatility using models such as Stochastic Volatility, multivariate GARCH, and Dynamic Conditional Correlation models. It also covers Dynamic Factor models and State Space models, which can be used in many financial data analyses. The course will be particularly helpful for the students preparing dissertations in the field of finance, macro-finance, monetary economics, international finance, and development economics. It will also benefit the students interested in more practical use of tools in the field such as financial risk management, insurance, and commercial banking. Prerequisite: ECON 818. ECON 916 is recommended.

ECON 919. Health Economics. 3 Credits. An advanced course in the mathematical and graphical representations and classic and current literature in health economics. Students will be asked to read multiple academic papers per lecture. Topics may include measurement of health (height, infant mortality, life expectancy), health insurance, selection, Medicare, Medicaid, geographic variation, household finances, the Affordable Care Act, productivity of spending, international comparisons, health over the business cycle, hospitals, competition, physicians, nurses, health behaviors (alcohol, smoking, obesity, wellness), HIV/AIDS, pollution, malpractice, reproductive health, children, pharma, opioids, and machine learning. Prerequisite: ECON 802 and ECON 818. ECON 870 recommended.

ECON 940. Economic Seminar-Workshop in: _____. 1-3 Credits. This seminar-workshop is designed to study advanced research topics in the specified area of applied economics (public finance, monetary analysis, environment-energy, economic growth and development, urban economics, health care economics, natural resources, labor-manpower, international trade and finance, comparative economic systems, Soviet economics), and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates with dissertations in a specific area of applied economics.

ECON 950. Special Problems in Economics. 1-3 Credits.

ECON 999. Doctoral Dissertation. 1-10 Credits.
Bachelor of Arts and Bachelor of General Studies in Economics

Why study economics?
Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit “Big Data” to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among aggregate output, interest rates, inflation, unemployment levels and international exchange rates.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Economics Majors
The economics department offers 3 degrees.

- The B.A. or B.G.S. major in economics is designed for the majority of students who will attend professional graduate schools or enter the work force.
- The Bachelor of Science degree in economics is designed for the student interested in attending graduate school in economics or a closely related field. It requires the minimum amount of preparation in economics and mathematics required to be successful in graduate study. Students interested in pursuing a Ph.D. in economics are encouraged to double major in economics and mathematics.

First- and Second-Year Preparation
Students considering an economics major should enroll in ECON 142 (or ECON 143) Principles of Microeconomics or ECON 144 (or ECON 145) Principles of Macroeconomics no later then the end of the sophomore year. Students should also have completed at least 1 course in the calculus sequence (MATH 115 or MATH 125) by the end of the sophomore year.

</table>
A sample 4-year plan for the BA degree in Economics can be found here: Economics (p. 1328), or by using the left-side navigation.

Sample 4-year plan for the BGS degree in Economics can be found here: Economics (p. 1329), or by using the left-side navigation.

**Departmental Honors**

Graduation with honors in economics is limited to undergraduate majors who have fulfilled these requirements:

1. Completed all economics major requirements and achieved a grade-point average of 3.5 or above in all economics courses at the time of graduation.
2. Completed ECON 697 Senior Research Honors
3. Submitted and defended a research paper before at least 3 faculty members of the Department of Economics.

Honors candidates should consult the department honors coordinator before enrolling in the first semester of the senior year and file a declaration of intent form with the coordinator at that time.

**BA in Economics**

Below is a sample 4-year plan for students pursuing the BA in Economics.

To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120-122

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
3. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific...

15 15

Total Hours 120

¹ Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Science in Economics

Why study economics?

Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit “Big Data” to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among aggregate output, interest rates, inflation, unemployment levels and international exchange rates.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Economics Majors**

The economics department offers 3 degrees.

- The Bachelor of Science degree in economics is designed for the student interested in attending graduate school in economics or a closely related field. It requires the minimum amount of preparation in economics and mathematics required to be successful in graduate study. Students interested in pursuing a Ph.D. in economics are encouraged to double major in economics and mathematics.

- The B.A. or B.G.S. major in economics is designed for the majority of students who will attend professional graduate schools or enter the work force.

**First- and Second-Year Preparation**

**Economics Prerequisite or Co-Requisite Knowledge**

Majors must complete courses as specified in each of the following areas. These hours do not contribute to the minimum number of hours required for the major.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

Second Area of Study/
3 3
Senior Hours2

15 15

Total Hours 120

1 Majors must complete 2 courses (6 hours) in economics outside of the core courses at the 500-level or above, 3 courses (9 hours) in economics at the 600-level or above, and 2 courses (6 hours) in economics at the 700-level or above.

2 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Graduation with honors in economics is limited to undergraduate majors who have fulfilled these requirements:

1. Completed all economics major requirements and achieved a grade-point average of 3.5 or above in all economics courses at the time of graduation.
3. Completed ECON 697 Senior Research Honors in spring term of senior year.
4. Submitted and defended a research paper before at least 3 faculty members of the Department of Economics.

Honors candidates should consult the department honors coordinator before enrolling in the first semester of the senior year and file a declaration of intent form with the coordinator at that time.

Minor in Economics

Why study economics?

Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit “Big Data” to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among aggregate output, interest rates, unemployment levels and international exchange rates.

<td></td>
</tr>
</tbody>
</table>

Economics Required Electives. Minors must complete 4 ECON courses (12 hours) electives at the 500 level or above. A maximum of 3 credits total from ECON 597 and ECON 697 may count toward this requirement.

Undergraduate Certificate in Macroeconomics

The economics department has two certificates: one in microeconomics and one in macroeconomics. They are best for students who have strong math backgrounds (e.g., MATH 115) but limited space in their schedules to complete a major or minor in economics. The course requirements and acceptable electives for each certificate are listed below. The certificates are mutually exclusive—a student can complete either or both.

<table>

Master of Arts in Economics

Economists gather and analyze data, evaluate and report on statistical trends, and make recommendations based on collected insights. In our program, you will develop these analytical skills and gain experience using statistical analysis software. An Economics M.A. degree is an ideal foundation for jobs in data science, analytics, government, and policy.

Financial Aid

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

Facilities and Services

In addition to KU computing and library facilities, students in the M.A. and Ph.D. programs may use the department’s computer laboratory, which
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants to the M.A. and M.A./J.D. programs should have taken a minimum of 2 courses in calculus (6 to 10 semester hours) and a statistics course. Students with little background in economics may be advised to take ECON 520 Microeconomics and/or ECON 522 Macroeconomics and/or ECON 526 Introduction to Econometrics as preparation for M.A. courses. ECON 520, ECON 522, and ECON 526 do not count toward completion of M.A. degree requirements.

Applications submitted before May 1 receive first consideration for fall or summer admission. Applications submitted before November 1 receive first consideration for spring admission.

Submit your graduate application online (https://gradapply.ku.edu/apply/).

English Proficiency

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

M.A. Degree Requirements

The Master of Arts degree program serves students with little previous background in economics as well as students who majored in economics as undergraduates. The program provides maximum flexibility for students to pursue their own special interests.

Candidates for the M.A. degree must complete a minimum of 30 semester hours of graduate work—at least 18 hours of this coursework must be 700+ level. Economics has three required core classes—ECON 700, ECON 701, ECON 715—that count toward the 18 hours of 700+ level coursework required. Students must take at least 21 hours in economics, with the option of taking up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. At initial enrollment, each candidate must discuss a preliminary plan of study with his or her graduate advisor. This plan may be revised over time.

Thesis and Nonthesis Options

Candidates may pursue either a thesis or a nonthesis track. Students electing the thesis track must complete 24 hours of formal course work and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Students electing the nonthesis track must complete 30 hours of formal course work.

Written Comprehensive Examination

All candidates for the M.A. degree, including students enrolled in the M.A./J.D. program, must demonstrate proficiency in the application of economic theory through a written examination taken during the last semester of enrollment.

Plan of Study

Most M.A. students complete the program in 1.5 academic years. Unless they must complete prerequisites, new M.A. students enroll in ECON 700 Survey of Microeconomics and 2 electives during the first fall semester. In the first spring semester, M.A. students enroll in ECON 701 Survey of Macroeconomics, ECON 715 Elementary Econometrics, and 1-2 electives. Note: Doctoral level theory courses (ECON 801, ECON 810, ECON 817) can be substituted for—or taken in addition to—the corresponding master’s level courses (700, 701, 715 respectively). Enrollments in subsequent semesters are electives until 30 credit hours are complete.

Accelerated Masters of Arts in Economics (BA or BS/MA)

Accelerated undergraduate-graduate degree tracks are increasingly becoming more common. A Master’s in Economics provides not only professional skills but also deeper foundational knowledge. This combination attract employers and strengthens the profiles of students preparing for further study in doctoral programs. As a result, many students see a master’s degree as essential to their future success.

KU’s Accelerated MA program is available to KU undergraduates only. Please see Admissions to learn more.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time frame. All prospective students should discuss their interest in admission to the Accelerated Master’s program with their undergraduate advisor and the department’s graduate advisor no later than the student’s Junior year, the first semester of Year 3.

Admission’s checklist

• KU student earning Economics BA;
• on-track to complete all undergraduate degree requirements by the second semester of Senior year (Year 4);
• Major and cumulative GPA of at least 3.25; and
• has submitted an online application for the Accelerated MA program in the second semester of Junior year (Year 3)

After review of the application for admission, the Economics Department will notify the student on their eligibility to begin coursework in the program.

Final acceptance to the graduate program will occur following the completion of Year 4 and be contingent upon the following:

• Successful completion of all requirements for the bachelor’s degree;
• an undergraduate cumulative GPA of at least 3.25;
• a GPA of at least 3.25 in graduate-level coursework taken in Year 4; and
• grades of B or above in all graduate-level coursework taken in Year 4.

This accelerated program uses a carefully planned combination of prerequisite coursework, graduate-level courses taken for both undergraduate and graduate credit in Academic Year 4 (defined as when a student has completed 90 credit hours and therefore has senior standing), and graduate credit courses taken in Academic Year 5 (defined as after a student has been awarded an undergraduate degree). At initial enrollment in graduate coursework, each candidate must discuss a preliminary plan of study with their graduate advisor. This plan may be revised over time. The student must be approved to begin coursework toward the master’s prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

Students may choose between a BA/MA combination or a BS/MA combination.

**BA Degree Option**

**First- and Second-Year Preparation for the BA Degree**

Students considering an economics major should enroll in ECON 142 (or ECON 143) Principles of Microeconomics or ECON 144 (or ECON 145) Principles of Macroeconomics no later than the end of the sophomore year. Students should also have completed at least 1 course in the calculus sequence (MATH 115 or MATH 125) by the end of the sophomore year.

**Additional math requirements**

Calculus 2 (MATH 116 or MATH 126) is needed by the end of Junior year, MATH 526 is needed in the first semester of Senior year or prior to ECON 715.

**BA Degree Requirements**

</tbody>
</table>

Of the requirements listed above, ECON 700, ECON 701, ECON 715 and one elective course at the 500-level or above must be completed after the student has been approved to begin coursework toward the MA. ECON 700 is typically offered in the fall. ECON 701 and ECON 715 are typically offered in the spring. These courses will count toward both undergraduate and graduate degrees. The elective course may be in Economics or a related area (e.g., Business, Computer Science, Political Science, Psychology, Public Policy, or Mathematics). ECON 520 and ECON 522, which are listed as prerequisites for ECON 700 and ECON 701, are not required for those in the Accelerated Master’s program.
or Mathematics). ECON 520 and ECON 522, which are listed as prerequisites for ECON 700 and ECON 701, are not required for those in the Accelerated Master’s program.

**MA Degree Requirements**

**Coursework**
Upon completion of the bachelor’s degree, students must complete an additional 18 credit hours (6 courses) of graduate electives for a total of 30 graduate credit hours. At least 21 of the 30 hours must be in economics; but students may take up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. In total, 18 hours of coursework (out of 30 hours) must be 700 level or higher.

**Thesis and Nonthesis Options**
Candidates may pursue either a thesis or a nonthesis track. Students electing the thesis track must complete 24 hours of formal coursework and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Accelerated Master’s students electing the thesis option may take longer than 5 years to complete the full program.

Students electing the nonthesis track must complete 30 hours of formal course work and demonstrate proficiency in the application of economic theory through a written examination taken during the last semester of enrollment.

**Progression Requirements**
Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Once authorized to begin coursework in the Accelerated Master’s, the student must meet with the DGS to plan the final year of undergraduate study.
2. In the final semester of undergraduate study (Year 4), the student must meet with the DGS to review the student’s performance in ECON courses. The student must earn a grade of “B” or better in each of these courses to be eligible for regular admission to the master’s degree.
3. Following completion and award of the undergraduate degree (end of final semester of undergraduate study), the admitted student will again meet with the DGS to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.25 for these courses, as well as a cumulative undergraduate GPA of 3.25.
4. For those students who do not meet the minimum GPA requirement of 3.25, an alternative plan of study to address the student’s deficiencies may be developed, at the department’s sole discretion.
5. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in additional courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the Accelerated Master’s within one year of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

**Accelerated Masters & Co-Enrollment**

Students, with the explicit approval of the Director of Undergraduate Studies and the Masters’ Advisor in the Department of Economics, may combine this program with the existing program on co-enrollment (https://policy.ku.edu/graduate-studies/seniors-and-grad-study/), which permits undergraduate students to enroll in graduate courses toward a future graduate degree while simultaneously enrolling in undergraduate courses toward an undergraduate degree.

This would not increase the number of undergraduate credit hours taken in Academic Year 4 that count toward both the undergraduate and graduate degrees (i.e., 12 credit hours: ECON 700, ECON 701, ECON 715, and one elective course at the 500-level or above). It would, though, enable a student to take additional graduate credit hours in the second semester of Academic Year 4, enabling the student to potentially finish the M.A. degree with only one additional semester of graduate enrollment.

Beyond the co-enrolled semester the student will not be permitted to enroll in additional courses in a subsequent semester for graduate credit toward the Master’s degree until the baccalaureate degree has been conferred. Any graduate credits successfully completed during co-enrollment would remain on the student’s record and could be potentially applied toward a future graduate degree after the student has completed a baccalaureate degree.

The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Upon completion of the bachelor's degree, students must complete an additional 18 credit hours (6 courses) of graduate electives for a total of 30 graduate credit hours. At least 21 of the 30 hours must be in economics; but students may take up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. In total, 18 hours of coursework (out of 30 hours) must be 700 level or higher.

Students electing the thesis track must complete 24 hours of formal coursework and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Accelerated Master's students electing the thesis option may take longer than 5 years to complete the full program.

### Total Hours 139-144

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
5. Upon completion of the bachelor’s degree, students must complete an additional 18 credit hours (6 courses) of graduate electives for a total of 30 graduate credit hours. At least 21 of the 30 hours must be in economics; but students may take up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. In total, 18 hours of coursework (out of 30 hours) must be 700 level or higher.
6. Students electing the thesis track must complete 24 hours of formal coursework and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Accelerated Master's students electing the thesis option may take longer than 5 years to complete the full program.
Our Minor/Accelerated MA program is available to KU undergraduate students minoring in Economics. The ideal candidate will have a strong math foundation and have a complementary major (e.g., Engineering or similar math-intensive major).

Accelerated undergraduate-graduate degree tracks are increasingly becoming more common. A Master’s degree in Economics provides not only professional skills but also deeper foundational knowledge. This combination attracts employers and strengthens the profiles of students preparing for further study in doctoral programs. As a result, many students see a master’s degree as essential to their future success.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time frame. All prospective students should discuss their interest in admission to the Accelerated MA program with their undergraduate advisor and the department’s graduate advisor no later than the student’s Junior year, the first semester of Year 3.

Admission’s checklist

- KU student earning bachelor’s degree and Economics minor;
- on-track to complete all undergraduate degree requirements by the second semester of Senior year (Year 4);
- Major and cumulative GPA of at least 3.25; and
- has submitted an online application for the Accelerated MA program in the second semester of Junior year (Year 3)

After review of the application for admission, the Economics Department will notify the student on their eligibility to begin coursework in the program.

Final acceptance to the graduate program will occur following the completion of Year 4 and be contingent upon the following:

- Successful completion of all requirements for the bachelor’s degree and Economics minor;
- an undergraduate cumulative GPA of at least 3.25;
- a GPA of at least 3.25 in graduate-level coursework taken in Year 4; and
- grades of B or above in all graduate-level coursework taken in Year 4.

This accelerated program uses a carefully planned combination of prerequisite coursework, graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. At initial enrollment in graduate coursework, each candidate must discuss a preliminary plan of study with his or her graduate advisor. This plan may be revised over time. The student must be approved to begin coursework toward the master’s prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

Principles of Microeconomics. Satisfied by:
Upon completion of the bachelor's degree, students must complete an additional 18 credit hours (6 courses) of graduate electives for a total of 30 graduate credit hours. At least 21 of the 30 hours must be in economics; but students may take up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. In total, 18 hours of coursework (out of 30 hours) must be 700 level or higher.

**Thesis and Nonthesis Options**

Candidates may pursue either a thesis or a nonthesis track.

Students electing the thesis track must complete 24 hours of formal coursework and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Accelerated Master's students electing the thesis option may take longer than 5 years to complete the full program.

Students electing the nonthesis track must complete 30 hours of formal coursework and demonstrate proficiency in the application of economic theory through a written examination taken during the last semester of enrollment.

**Progression Requirements**

Given the accelerated nature of this program, each student's progress will be closely monitored at various points during the program:

1. Once authorized to begin coursework in the Accelerated Master's, the student must meet with the DGS to plan the final year of undergraduate study.
2. In the final semester of undergraduate study (Year 4), the student must meet with the DGS to review the student's performance in ECON courses. The student must earn a grade of “B” or better in these courses to be eligible for regular admission to the master's degree.
3. Following completion and award of the undergraduate degree (end of second semester Year 4), the admitted student will again meet with the DGS to review the course plan for the fifth year of study and update as needed. The student's performance in the graduate-level courses taken as an undergraduate will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.25 for these courses, as well as a cumulative undergraduate GPA of 3.25.
4. For those students who do not meet the minimum GPA requirement of 3.25, an alternative plan of study to address the student's deficiencies may be developed, at the department's sole discretion.
5. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in additional courses for graduate credit toward the master's degree until the baccalaureate degree has been conferred.
6. Students should complete all requirements for the Accelerated Master's within one year of receiving the bachelor's degree. If unforeseen circumstances prevent the timely completion of the master's degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

Visit the department's website to view sample degree plans (https://economics.ku.edu/accelerated-masters-program/).

**M.A.-J.D. Degree Program**

A dual degree in economics and law can be applied to virtually any area of legal practice and is especially valuable in corporate law, tort law, contract law, civil procedure, and international law. Additional career options include mergers & acquisitions consultant, policy advisor, legislator, regulatory investigator, and several options in the financial services sector.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Application Timeline**

Students must first be accepted to the University of Kansas Law School before applying to the Economics M.A. program. In the spring semester (Year 1) of law school, students can apply for the Economics M.A./J.D. degree. The application deadline for a summer or fall start is May 1. The Graduate Program Coordinator in Economics can assist with questions.
M.A.-J.D. Degree Program

In this program a student can earn both the Juris Doctor (p. 718) and the Master of Arts in economics in 3 years and 1 summer session. The requirements for the combined degree are as follows:

1. Admission to the M.A./J.D. degree program must be approved by the School of Law (http://www.law.ku.edu/), the Department of Economics (http://www.economics.ku.edu/), and the College of Liberal Arts and Sciences (http://clas.ku.edu/).
2. The program requires 100 credit hours of course work, of which 82 hours must be completed in the law school and 18 hours in the Department of Economics. The department gives credit toward the M.A. degree for 12 hours of pertinent work in the law school, and the law school counts 8 credit hours in economics toward the J.D. degree. The 8 hours of economics courses that count toward the J.D. degree can be chosen from certain courses numbered 500-799 and from all 800-900 level courses. Prerequisites continue to apply, as does the requirement that all students seeking the M.A. degree must have taken several foundation courses that do not count toward a graduate degree in economics: microeconomics, macroeconomics, and calculus. In addition, ECON 700, ECON 701, and ECON 715 must be included in the M.A. program. The student takes only law classes the first year and spreads out the 18 hours of credit in economics in the following semesters (e.g., one course per semester).
3. The M.A./J.D. degree is a nonthesis degree in economics.
4. A written comprehensive examination in economics is required of all candidates for the M.A./J.D. degree.

Doctor of Philosophy in Economics

The Ph.D. program in economics provides a solid foundation in modern economic analysis, develops expertise in two fields in economics, provides milestones and incentives for dissertation research, and supports graduate student professional development and placement. The department has a long-standing tradition of producing Ph.D. economists with strong foundational skills and expertise. Please visit the department website (https://economics.ku.edu/phd-program/) for additional information.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The economics department seeks well-trained economists with strong quantitative skills for its Ph.D. program. In particular, applicants should have taken the equivalent of a minimum of three courses in calculus and a course in linear algebra (twelve to fifteen semester hours). A course in real analysis is not required, but exposure to logical mathematical derivation is very useful.

The department strives to provide a comprehensive financial aid package to strong applicants. This typically includes a paid graduate teaching assistant (GTA) position for up to five years. A GTA position also includes a full tuition waiver and other benefits such as subsidized health insurance. Outstanding applicants may receive a fellowship that reduces or eliminates teaching commitment for one or two semesters and may include funding for summer research. The department also strives to provide some financial support for students to present research at academic conferences every year.

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/). Please note that the requirements for admission are different from those for a teaching/research assistant.

The deadline for an applicant to be considered for admission and financial aid is January 5. Applicants should submit a graduate application online (https://gradapply.ku.edu/apply/).

Ph.D. Degree Requirements

Course Requirements

In addition to meeting general requirements, the Ph.D. candidate in economics must complete a minimum of 48 credit hours of course work in economics and at least 1 credit hour of ECON 999 Doctoral Dissertation in addition to meeting general requirements, the Ph.D. candidate in economics must complete a minimum of 48 credit hours of course work in economics and at least 1 credit hour of ECON 999 Doctoral Dissertation

1. All Ph.D. candidates must complete these core courses in economic theory and quantitative methods.

Qualifying Examinations

Each Ph.D. student is required to pass written qualifying examinations in microeconomics and macroeconomics after completion of the core courses in these areas. A student who does not pass a qualifying examination may be permitted one retake, ordinarily within a few weeks of the first attempt.

In order to demonstrate competency in econometrics, each Ph.D. student must complete ECON 817 and ECON 818, with a combined grade point average of 3.0. A student who does not achieve the 3.0 combined grade point average is required to pass, without retake, a written comprehensive examination in econometrics.

Fields of Specialization and Electives

Each student must demonstrate competence in at least 2 fields of specialization in economics by completing 2 courses in each of their chosen fields. In addition, each student takes 3 elective courses in
economics. Fields of specialization and elective courses are selected in consultation with the advisor.

**Seminar Workshops**
Beginning in Year 3, each student is required to enroll in ECON 910 and attend the weekly department seminars for 5 continuous semesters or until graduation (whichever is earlier).

**Second-Year Paper**
Each student is required to complete a second-year paper by the end of the fourth semester (second year) of study.

**Third-Year Paper**
Each student is required to complete a third-year paper by the end of the sixth semester (third year) of study.

**Research Skills and Responsible Scholarship**
Every doctoral student is required to have training in research skills and responsible scholarship pertinent to economics research. Enrollment in one semester of ECON 910 and successfully completing the third year paper requirement satisfies these requirements.

**Comprehensive Oral Examination**
Each student is required to pass the comprehensive oral examination by the end of the eighth semester (fourth year) of study. It is strongly recommended that a student pass this exam by the end of the seventh semester.

**Dissertation**
Following the comprehensive oral examinations, the candidate must organize and write a dissertation on his or her chosen topic under the supervision of a dissertation committee.

**Final Oral Examination**
The candidate must defend the dissertation successfully in a final oral examination.

**Department of English**

**Why study English language and literature?**
KU’s English Department is at the core of the humanities, highlighting the "human" through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

**A commitment to teaching and learning.**
Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 15-25 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

**A variety of career and life paths.**
English students at all levels graduate and embark upon a variety of careers, including law, teaching, scholarship, publishing, library science, and journalism—as well as medicine, politics, design, and any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

**Engaged and innovative scholarship.**
KU’s English Department has several core strengths that cross tracks and periods, including Global and Cross-Cultural Approaches; Literature, Rhetoric, and Social Action; Diversity Studies; Language, Literature and Science; and Popular Expressive Forms.

In the KU English Department, students work closely with nationally-renowned writers and researchers. Our faculty have won national awards that recognize excellence in research, including grants from the National Endowment for the Humanities, the American Philosophical Society, and the Newberry Library, among others. English Department faculty members have also received major research funding from the University of Kansas, including the Hall Center for the Humanities Research fellowships and Keeler Intra-University Fellowships for interdisciplinary work. Undergraduate students can work one-on-one with faculty mentors in the Honors Program, McNair Scholars Program, and Dean's Scholars Program, as well as through independent Directed Studies. Advanced graduate students have the opportunity to work collaboratively with faculty members as research assistants.

**Undergraduate Programs**
The English major prepares undergraduates for engagement with the world through language by helping them

- to cultivate the craft of writing in a variety of rhetorical contexts,
- to read and interpret a broad range of texts,
- to develop and sustain critical arguments, and
- to produce independent research.

The major is crafted to ensure students’ familiarity with

- written forms and genres;
- a range of literary histories and writers;
- multiple regional and historical contexts of literature and language;
- the theories, methodologies, and terminology of English Studies; and
- the relationship between literature, language, and the larger culture.

**Courses for Non-majors**
Many English courses fulfill KU Core requirements; see catalog course listings for details. All students are encouraged to take a 200-level English course before enrolling in 300+ level English courses. For students
following University requirements prior to Fall 2013, please consult the principal and non-Western course lists. English principal courses under the Literature and the Arts heading are designated HL. Prospective English teachers in the public schools should consult the requirements of the School of Education.

**Transfer Credit**

English undergraduate majors may take up to 6 hours out of residence with the prior approval of the Director of Undergraduate Studies.

**Double Majors**

Double majors within the College or dual-degree programs are encouraged.

**Placement in English courses**

In general, entering KU students should enroll in ENGL 101, with the following exceptions:

**ACT English Scores:**

- 31-36 — Enroll in ENGL 105. 1/2 of KU Core Goal 2.1 (Written Communication, 6 hours) complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

- 27-30 — Enroll in ENGL 102 and petition for honors placement for possible admittance to ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 102 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

- 00-26 — Enroll in ENGL 101. ENGL 101 + ENGL 102 fulfill KU Core Goal 2.1 and CLAS BA-specific writing requirement.

**SAT Verbal Scores:**

- 650 or higher — Enroll in ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 105 + an additional KU Core 2.1 course will fulfill CLAS BA-specific writing requirement.

- 600-649 — Enroll in ENGL 102 and petition for honors placement for possible admittance to ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

- 00-599 — Enroll in ENGL 101. ENGL 101 + ENGL 102 fulfill KU Core Goal 2.1 and CLAS BA-specific writing requirement.

**Advanced Placement Scores — Literature and Composition Exam:**

- AP 5 — Enroll in ENGL 205; 3 hours of credit given. KU Core Goal 2.1 complete. ENGL 205 satisfies both KU Core Goal 2.1 and CLAS BA-specific writing requirement.

- AP 4 — Enroll in ENGL 205; 3 hours of credit given. 1/2 of KU Core Goal 2.1 complete. ENGL 205 satisfies both KU Core Goal 2.1 and CLAS BA-specific writing requirement.

- AP 3 — Enroll in ENGL 105 or ENGL 102*. No credit is given for ENGL 101 or ENGL 102. KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

- AP 2 — Enroll in ENGL 101 and petition for honors placement. If the petition is successful, it admits the student to ENGL 105. ENGL 101 + ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course fulfill KU Core Goal 2.1 and CLAS BA-specific writing requirement.

**Advanced Placement Scores — Language and Composition Exam:**

- AP 4 or 5 — Enroll in ENGL 205; 3 hours of credit given; KU Core Goal 2.1 complete. ENGL 205 satisfies both KU Core Goal 2.1 and CLAS BA-specific writing requirement.

- AP 3 — Enroll in ENGL 105 or ENGL 102*. No credit is given for ENGL 101 or ENGL 102. 1/2 of KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

- AP 2 — Enroll in ENGL 101 and petition for honors placement. If the petition is successful, it admits the student to ENGL 105. ENGL 101 + ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course fulfill KU Core Goal 2.1 and CLAS BA-specific writing requirement.

**International Baccalaureate Scores:**

- IB 5 and up — Enroll in ENGL 101. 1/2 of KU Core Goal 2.1 complete; ENGL 101 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

- IB 4 — Enroll in ENGL 102. 1/2 of KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

*If you choose to take ENGL 102, you will need to petition if you want to enroll in ENGL 205 next. You could also choose to take ENGL 203, or ENGL 209, ENGL 210, or ENGL 211 for a second English course, or another KU Core Goal 2.1 course to fulfill the KU Core and the CLAS BA-specific requirements.

**Graduate Programs**

The department offers a full graduate program, leading to the Master of Arts (Literature, Literature & Literary Theory, Rhetoric & Composition, and English Language Studies), Master of Fine Arts in Creative Writing, and Doctor of Philosophy degrees with specializations in Literature, Rhetoric and Composition, English Language Studies, and Creative Writing.

The M.A./M.F.A. may be pursued as a terminal degree or as preparation to apply for specialized doctoral studies at KU or elsewhere. The Ph.D. may be pursued by students already holding an M.A. in English or a related field.

We also offer an accelerated doctoral program in Rhetoric, Composition intended for students who want to pursue a Ph.D. in this field at KU but who do not yet hold the M.A. degree in English.

All applicants are considered for competitive funding packages and GTA, GRA, and GA positions.

Students who are interested in enrolling in graduate level coursework in the Department of English without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department webpage for non-degree student admission for further details.

**Courses**

**ENGL 100. Introduction to Literature. 3 Credits. H**

An introduction to critical thinking skills through the study of works of literature drawn from a variety of genres and methods of critical inquiry. This course does not fulfill any KU writing requirement.

**ENGL 101. Composition. 3 Credits. U**
Instruction and practice in writing in a variety of rhetorical contexts, including academic ones.

**ENGL 102. Critical Reading and Writing.** 3 Credits. U
Builds upon the instruction in writing of ENGL 101, emphasizing critical thinking through careful, thoughtful reading and writing. Also instructs in the evaluation and use of secondary sources. Prerequisite: Completion of ENGL 101 or its equivalent, or an ACT score of 27-31, or an SAT score of 600-649, or an AP exam score of 3 on either the Literature and Composition exam or the Language and Composition exam, or an IB score of 5.

**ENGL 105. Honors Introduction to English.** 3 Credits. U
Study of significant works of world literature. The primary aims are to develop reading and writing skills and to introduce the students to works of literature drawn from a variety of genres and historical periods. Prerequisite: An ACT score of 31-36, or an SAT score of 650 or higher, or an AP exam score of 3 on either the Literature and Composition exam or the Language and Composition exam, or membership in the University Honors Program, or by consent of the instructor.

**ENGL 177. First Year Seminar: _____**. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in English. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ENGL 199. Orientation to English Studies.** 1 Credits. H
Provides an overview of English Studies at the University of Kansas. Students learn about degree requirements and specializations; research, extracurricular, and study abroad opportunities; and career and internship options. Graded on a satisfactory/unsatisfactory basis.

**ENGL 200. Study Abroad Topics in: _____**. 1-6 Credits. H
This course is designed for the study of special topics in English. Coursework is completed through a KU study abroad program. Available only to KU study abroad participants. May be repeated for credit if content varies. Does NOT fulfill any part of the Freshman-Sophomore requirement.

**ENGL 203. Topics in Reading and Writing: _____**. 3 Credits. H
In-depth reading and writing on a significant topic, theme, or genre. Includes a variety of textual types or a range of historical periods. Continued practice in critical reading and writing. May include but will not be limited to writing in literary genres. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 205. Freshman-Sophomore Honors Proseminar: _____**. 3 Credits. H
Study of a major movement, topic, or theme in literature and culture. The primary aims are to further develop reading and writing skills and to consider significant cultural and artistic issues. Prerequisite: ENGL 105 or an AP exam score of 4 on either the Literature and Composition exam or the Language and Composition exam, or membership in the University Honors Program, or permission of instructor.

**ENGL 209. Introduction to Fiction.** 3 Credits. H
In-depth reading of and writing about prose fiction with emphasis on critical analysis of a variety of narrative types from different historical periods. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 210. Introduction to Poetry.** 3 Credits. H
In-depth reading of and writing about poetry with emphasis on critical analysis of a variety of forms and techniques used in poems from different historical periods. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 211. Introduction to the Drama.** 3 Credits. H
Study of plays selected to familiarize the student with dramatic masterpieces and with the drama as a literary type. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 220. Introduction to Creative Writing.** 3 Credits. H
In-depth reading and writing in multiple genres (e.g., poetry, fiction, creative nonfiction, playwriting). Creative assignments combine with critical analysis to help students identify, analyze, and employ forms and techniques across various genres, audiences, and contexts. Written assignments include creative works in multiple genres and critical responses to reading. Prerequisite: ENGL 101 and ENGL 102, or their equivalents.

**ENGL 300. Introduction to English Studies.** 3 Credits. H
An introduction to English Studies and its methods and areas, including literary studies, cultural studies, creative writing, rhetoric and composition, and language studies. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 301. Topics in British Literature to 1800: _____**. 3 Credits. H
Study of British literary works before 1800. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 302. Topics in British Literature Since 1800: _____**. 3 Credits. H
Study of British literary works since 1800. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 305. World Indigenous Literatures.** 3 Credits. NW H
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as GIST 305/ISP 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 306. Global Environmental Literature.** 3 Credits. H
An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as EVRN 306 and GIST 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 308. Introduction to Literary Criticism and Theory.** 3 Credits. H
Study of significant problems in literary interpretation and methodology, in which basic critical principles and approaches are systematically examined and applied. These approaches might include, but are not limited to, feminism, Marxism, deconstruction, psychoanalysis, and cultural studies. Prerequisite: Prior completion of the KU Core Written
Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 309. The British Novel. 3 Credits. HL H**
Study of five or more significant novels representative of developments in the British novel of the eighteenth, nineteenth, and twentieth centuries. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 310. Literary History I. 3 Credits. H**
A study of literature in English, including major forms and movements, from the medieval period to Romanticism. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 312. Major British Writers to 1800. 3 Credits. H**
Outstanding works of British literature, from the earliest times to the close of the eighteenth century, studied in chronological sequence and with some attention to the characteristics of the various periods of English literary history embraced. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 314. Major British Writers after 1800. 3 Credits. H**
Outstanding works of British literature, from 1800 to the present, studied in chronological sequence and with some attention to the characteristics of the various periods of English literary history embraced. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 315. Studies in British Literature. 3 Credits. HL H**
For students enrolled in the annual summer Study Abroad program, an interdisciplinary program conducted with other humanities departments. British literature is studied in the context of visits to relevant sites such as London, the Lake District, and Edinburgh. Prerequisite: Prior completion of the KU Core Written Communication requirement. Approval for enrollment in the Summer Institute through the Study Abroad office is required. Recommended: Prior completion of one 200-level English course.

**ENGL 317. Topics in American Literature to 1865: _____ . 3 Credits. H**
Study of American literary works before 1865. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 318. Topics in American Literature Since 1865: _____ . 3 Credits. H**
Study of American literary works since 1865. Topics may focus on a particular genre, theme, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 320. American Literature I. 3 Credits. H**
From the beginnings to 1865, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 322. American Literature II. 3 Credits. H**
From 1865 to the present, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 323. Twentieth Century Literature and Culture. 3 Credits. H**
The study of British and American literature, emphasizing important figures and movements since World War I. On occasion, the study of literature will be enriched with an investigation of other arts, such as music, film, and painting. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 324. Contemporary Authors: _____ . 3 Credits. H**
Study of one or more recent British and/or American authors. (Different authors in different semesters.) May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 325. Recent Popular Literature. 3 Credits. HL H**
Study of recent best sellers or other works of popular interest. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 326. Introduction to African Literature. 3 Credits. NW H/W**
Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention is paid to historical development and to traditional literature. (Same as AAAS 332.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 327. Studies in Twentieth-Century Drama: _____ . 3 Credits. H**
A survey of major twentieth-century playwrights and theatre groups, to be selected by the instructor. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 328. Literature and Film: _____ . 3 Credits. H**
The comparative study of the literary and film treatments of a particular topic or theme, with special attention to the generic qualities of literature and film. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 329. Topics in Forms and Genres: _____ . 3 Credits. H**
An introductory study of a selected topic focused on a literary or rhetorical form or genre (e.g., Lyric Poetry, Captivity Narratives, Genre Theory). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 330. Literary History II. 3 Credits. H**
A study of literature in English, including major forms and movements, from the Romantics to the present. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 331. Chaucer. 3 Credits. H**
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 332. Shakespeare. 3 Credits. H**
A study of ten to fourteen of Shakespeare's plays. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 334. Major Authors: _____**. 3 Credits. H

Study of one or two major British and/or American authors. Different authors in different semesters. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 336. Jewish American Literature and Culture. 3 Credits. H**

An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folklore, music, film, and visual art. (Same as JWISH 336.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 337. Introduction to U.S. Latino/a Literature. 3 Credits. H**

An historical survey of literature by U.S. Latina/o writers of Mexican, Puerto Rican, Cuban, Dominican, and Central/South American descent. Various genres, including oral forms such as corridos as well as novels, poetry, essays, and autobiographical writing, will be considered. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 338. Introduction to African-American Literature. 3 Credits. H**

An introduction to prominent works of African-American literature from the 18th century to the present as well as to the basic approaches to study and principles of this body of work, including its connection with African sources. Literature will include a wide variety of genres, and course materials may be supplemented by folklore, music, film, and visual arts. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 339. Introduction to Caribbean Literature. 3 Credits. H**

Reading, analysis, and discussion of fiction, poetry, and drama from the Caribbean, including a small selection of Spanish, French, and Dutch Antillean works in translation. (Same as AAAS 333.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 340. Topics in U.S. Ethnic Literature: _____**. 3 Credits. H

A study of literature by authors from one or more ethnic groups within the U.S., including but not limited to Asian American, African American, American Indian, Jewish American, Italian American, U.S. Latina/o. Different topics in different semesters. May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 341. American Literature of Social Justice. 3 Credits. H**

An examination of U.S. literature that addresses situations of political and economic oppression or repression with the potential function of enlisting readers' sympathies in a project of social justice. The course focuses on U.S. literary texts dealing with social injustice and the curtailment of human and civil rights and addresses debates surrounding cultural authority and authenticity, identity politics, attempts to represent the voice of the "oppressed," revision of strategies used in slave narrative or in testimonio, and ethical and rhetorical appeals to an assumed readership. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 342. Topics in Transcultural Literature, Language, or Rhetoric: _____**. 3 Credits. H

An introduction to a topic in the literatures, languages, or rhetorics of diverse cultural groups in the US or the world. A supermajority of the works considered were originally written in English. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 344. Black Feminist Theory. 3 Credits. HL H**

This course will study the critical discourse produced by black female intellectuals, writers, and activists about their race, gender, sexual, and class identities. Students will explore black women's distinct positionally through an examination of their theory as well as their praxis from the nineteenth century to the contemporary moment. By tracing the evolution of black feminist thought, the class will explore black women's initiation of and engagement with political, social, and artistic conversations in various fields of scholarly inquiry including-but not limited to-literature, history, sociology, political science, and the law. (Same as AAAS 344 and WGSS 344.) Prerequisite: WGSS 101, AAAS 104, or prior completion of one 200-level English course.

**ENGL 351. Fiction Writing I. 3 Credits. H**

A study of narrative techniques and practice in the writing of fiction. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 352. Poetry Writing I. 3 Credits. H**

A study of prosody and practice in the writing of verse. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 353. Screenwriting I. 3 Credits. H**

An introduction to the practice of writing and evaluating scripts for film. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 354. Playwriting I. 3 Credits. H**

An introduction to the practice of writing and evaluating scripts for stage. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 355. Nonfiction Writing I. 3 Credits. H**

An introduction to the literary techniques of nonfiction and practice in the writing of one or more of the genre's subtypes, such as the personal essay, the familiar essay, the lyric essay, the memoir, nature writing, or travel writing. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 356. Topics in Writing: _____**. 3 Credits. H

A writing course that helps students continue their writing practices at an advanced level, with a focus on particular varieties, purposes, audiences,
media, or other issues in rhetorical writing. Topics vary (e.g., Writing for Social Action, Writing with Confidence, Writing Online, Writing for Style). May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 362. Foundations of Technical Writing. 3 Credits. H**

Introduces students to the principles of technical communication. Students learn to organize, develop, write, and revise various technical documents (e.g., letters, manuals, presentations, proposals, reports, resumes, websites) often needed in business, engineering and scientific settings. Includes an introduction to technical-writing software. This course fulfills the prerequisite for English 562 and English 564. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 380. Introduction to Rhetoric and Composition. 3 Credits. H**

Introduces students to rhetoric and composition, a field that investigates questions about the nature, processes, teaching and historical, social and cultural contexts of writing. Students survey the themes, debates, and trends that inform the work of scholars in this field. Students also become acquainted with the historical traditions of discourse instruction, and the relevance of those traditions to our current understandings of writing. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 381. Topics in Rhetoric and Composition: _____ 3 Credits. H**

An introductory study of a selected topic in rhetoric or writing studies (e.g., Multimedia Rhetoric, Rhetoric of Social Action, Teaching Writing). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 382. Composing Cultures. 3 Credits. H**

In this course, we will explore how texts are culturally situated and will carry out our own investigations of a subculture. Through analysis of the rhetorical and social situations that motivate writing and ethnographic investigation of a culture’s discursive interactions, we will explore how a group’s purposes and actions are shaped by cultural contexts for writing. We will complete a range of related writing projects (an observation of a place/setting for a culture’s interactions; an analysis of a culture’s language or cultural artifacts; interviews with participants in a culture or oral histories), culminating in a longer field study or ethnography—a descriptive and analytical account of a culture or subculture. We will also critically read and respond to multiple interdisciplinary texts and genres, including ethnographies and overviews of ethnographic research methods. As we explore the cultural embeddedness of writing, we will focus, in particular, on the positioning of the researcher and the ethics of conducting cultural research. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 383. Cultural Rhetorics. 3 Credits. H**

In this course, we will engage in the interdisciplinary study of cultural rhetorics, which is an approach to rhetorical study that considers the role of cultural forces in shaping the rhetorical practices of individuals, communities, and politics. Emphasizing feminist, queer, critical race, and/or disability studies work in rhetorical studies, this course will focus on the following questions: How does rhetoric enable the functioning of power, oppression, and resistance? How are cultural, political, economic, and ideological notions of identity, of the body, and even of the human rhetorically constructed? What counts as rhetoric, and who gets to decide what is worthy of rhetorical study? How do rhetorics of space, place, home, diversity/identity, and the nation influence culture, politics, and institutions? Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 385. The Development of Modern English. 3 Credits. H**

An introduction to the history of the English language, with special attention to general structural changes throughout its history, especially changes in vocabulary and meaning, and past influences of other languages upon present usage. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 386. Language and Social Justice in the US. 3 Credits. H**

In this course, we consider the social implications of using different varieties and dialects of the English language in the US. Questions covered may include (but are not limited to): different social characteristics attributed to different varieties (dialects, ethnolects, genderlects) and their users; features of language that carry stigma and how such stigma is socially and historically constructed; and the role of media (news outlets, movies, “the internet”) in conveying what is seen as acceptable or unacceptable in language. We also explore how these language attitudes and evaluations impact different groups of people in their daily lives, and what possible recourses we have to address language injustice. As we discuss these issues, you will not only gain an understanding of the social nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 387. Introduction to the English Language. 3 Credits. HL H**

A survey of the English language, its historical development, and its grammatical structure. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 388. Topics in English Language Studies. 3 Credits. H**

An introductory study of a selected topic in English language studies (e.g., World Englishes, Language and Literary Style, The Secret Life of English Words.) Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 389. Postcolonial and World Englishes. 3 Credits. H**

In this course, we explore the complex landscape of varieties of English or Englishes around the world. We chart the history of English and its spread through colonization and through the cultural and economic influence of especially the US and the UK. We get a sense of the diversity of Englishes by focusing on a selection of countries from various continents (including Africa and Asia), looking at the linguistic characteristics of these Englishes as well as the attitudes towards the Englishes within and outside the countries. This survey of Englishes leads us to consider broader questions such as how people evaluate different Englishes, who "owns" English, and similar issues. As we discuss these topics, you will not only gain an understanding of the variable and changeable nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of the KU Core Written Communication requirement.

**ENGL 390. Studies in: ______ 3 Credits. H**

A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 400. Teaching and Tutoring Writing. 3 Credits. U**

Students explore theories and strategies of teaching and tutoring writing across academic disciplines. They learn more about themselves as writers as they build a repertoire of writing techniques useful in their studies, in the workplace, and in their personal lives. By observing and consulting in the writing center, they understand how reflection leads to responsive, ethical, and engaged practice. (Same as LA&S 400.) Prerequisite: ENGL 102 or equivalent.
ENGL 466. Literature for Children. 3 Credits. H
Wide reading in the great literature of the past and present suitable for children: epics and epics, mythology, modern fantasy, fiction, poetry. Emphasis on extending the student's background and developing critical judgment. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 479. The Literature of: ____. 3 Credits. H
A study of the literary treatment of a particular aspect of British and/or American society. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 492. The London Review. 3 Credits. H
This class meets one day a week throughout the semester and includes a nine-day visit to London over the spring break period. Students spend the early part of the semester selecting special interests, researching places to visit and study, and exchanging information. After the trip, students compile and publish a journal entitled "The London Review", which is comprised of essays, photos, art work, and other reflections about their experience in London. Prerequisite: Admission to University Honors Program or permission of instructor.

ENGL 494. Research Internship. 1-3 Credits. H
Practical research experience in English studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. May be used as a component of the Research Experience Program (REP). Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level English course, declaration of English major, and permission of instructor.

ENGL 495. Directed Study: ____. 1-3 Credits. H
Work for advanced majors in fields or on topics not covered in course work. May be repeated for a total of up to six hours. Does not satisfy specific course requirements for the English major. May be counted as part of the total junior-senior credit hours required. Prerequisite: Completion of three junior-senior courses in English and consent of instructor.

ENGL 496. Internship. 1-3 Credits. H
Practical experience in the use of English skills in supervised academic or professional settings. Credit hours are graded according to the written evaluation provided by the supervisor to the director. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level English course, declaration of English major, and permission of Undergraduate Director.

ENGL 497. Service Learning Internship. 1-3 Credits. H
Practical experience in the use of English skills in a non-profit or advocacy context. Credit hours are graded according to the written evaluation student provided by the on-site supervisor and on the student's written reflective component assigned and evaluated by the supervising faculty member. May be used as a component of the Service Learning certification program. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level English course, declaration of English major, and permission of instructor.

ENGL 506. Science Fiction. 3 Credits. H
The development of science fiction as a literary genre, and as a literature of ideas for a future-oriented society. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 507. Science, Technology, and Society: Examining the Future through a Science-Fiction Lens. 3 Credits. H
Science and technology offer many benefits to individuals and to societies, yet they also present many challenges. This course explores the past, present, and possible future effects of science and technology on society through readings and discussions of nonfiction articles in conjunction with science-fiction stories and novels. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 508. Contemporary Literary Theory. 3 Credits. H
Study of selected works of literary theory and of current issues in literary studies. The course is designed for advanced undergraduates who intend to continue their study of literature in graduate school and for new graduate students who require a grounding in literary theory. According to each instructor's interest, the course may survey contemporary literary theory or may focus on a particular topic (e.g., authorship, canon formation, creativity, metaphor, narrative, rhetoric) or on a theoretical position (e.g., cultural studies, deconstruction, feminism, historicism, Marxism, psychoanalysis). A student may repeat the course with the permission of the appropriate director. Prerequisite: Completion of three junior-senior courses in English (or their equivalent) or graduate standing.

ENGL 520. History of the Book. 3 Credits. H
Brief history of writing materials and handwritten books; history of printed books from the fifteenth century as part of cultural history; technical progress and aesthetic change. (Same as HIST 500.)

ENGL 521. Advanced Topics in British Literature 1800: ____. 3 Credits. H
A study of texts written before 1800. May be organized around a particular genre, historical period, or theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 522. Advanced Topics in British Literature After 1800: ____. 3 Credits. H
A study of texts written after 1800. May be organized around a particular genre, historical period, group of writers, or a theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 525. Shakespeare: ____. 3 Credits. H
Intensive study of selected works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 530. Irish Literature and Culture: ____. 3 Credits. H
Study of topics in Irish literature and culture. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 534. Major Authors (Capstone): ____. 3 Credits. H
Study of one or two major authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 545. Methodologies in Digital Humanities, Honors. 3 Credits. H
This course addresses research possibilities and ongoing debates in the field of Digital Humanities. Students will examine how digital technologies and methodologies can enhance or suggest new modes of Humanities research. The course focuses on core topics in the field, including text analysis, data visualization, digital mapping, archiving and (digital) cultural studies. We will take a hands-on and critical approach to investigating the benefits and limitation of different digital methods. Course assignments will consist of blog posts and mini projects conducted throughout the semester. At the end of the semester, students will develop a proposal for
a project that brings digital methodologies to bear on a research inquiry related to the student's discipline. No prior experience in digital work or technical skills required. Prerequisite: Instructor permission.

**ENGL 551. Fiction Writing II. 3 Credits. H**
Continuation of ENGL 351. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 351 or equivalent.

**ENGL 552. Poetry Writing II. 3 Credits. H**
Continuation of ENGL 352. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 352 or its equivalent.

**ENGL 553. Screenwriting II. 3 Credits. H**
A continuation of ENGL 353. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 353 or its equivalent.

**ENGL 554. Playwriting II. 3 Credits. H**
A continuation of ENGL 354. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 354 or its equivalent.

**ENGL 555. Nonfiction Writing II. 3 Credits. H**
Continuation of ENGL 355. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 355 or its equivalent.

**ENGL 560. British Literature of the 20th Century: ______. 3 Credits. H**
Study of twentieth-century literary works. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 565. The Gothic Tradition. 3 Credits. H**
This course explores and defines the Gothic tradition in British and American literature from its beginnings in the late eighteenth century to more recent twentieth-century texts in literature and film. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 567. Modern Drama: ______. 3 Credits. H**
A study of American, British, or comparative drama from the late nineteenth century to the present. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of the freshman-sophomore English requirement or its equivalent.

**ENGL 569. Modernism. 3 Credits. H**
This course will explore some of the definitions, texts, and aesthetics associated with literary modernism, especially transatlantic modernism, as well as some of the writers and artists in dialogue with modernist approaches. Prerequisite: Prior completion of the freshman-sophomore English requirement or its equivalent.

**ENGL 570. Topics in American Literature: ______. 3 Credits. H**
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 572. Women and Literature: ______. 3 Credits. H**
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 574. African American Literature: ______. 3 Credits. H**
A study of the literature written by African Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of African American literature as well as on a critical analysis of major autobiographical, poetic, and fictional works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 576. Advanced Topics in American Literature to 1865: ______. 3 Credits. H**
Study of American literary works before 1865. Topics may focus on a particular genre, theme, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 577. Advanced Topics in American Literature Since 1865: ______. 3 Credits. H**
Study of American literary works after 1865. Topics may focus on a particular genre, theme, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 578. Poetry, 1900-1945. 3 Credits. H**
A study of English-language poetry of the early twentieth century. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 579. Poetry since 1945. 3 Credits. H**
A study of English-language poetry from the mid-twentieth century to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 580. Rhetoric and Writing: ______. 3 Credits. H**
A study of selected broad topics in rhetoric and writing, including such topics as the rhetoric of law, the rhetoric of education, persuasion in literature, literacy, and rhetorical genres. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 581. English Language Studies: ______. 3 Credits. H**
A study of selected topics in English language studies (e.g. World Englishes, Language and Literary Style, and The Secret Life of English Words). May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 582. Multimedia/Multimodal Rhetorics. 3 Credits. H**
Digital culture and new media have transformed reading, writing, and research practices, revealing the multidimensionality of texts, blurring the roles of writer and audience, and creating new spaces for dialogue, collaboration, and participation in rhetorical acts. In this course, we will apply rhetorical principles across a variety of media genres-from blogs, to YouTube videos, to podcasts, to Tweets, to Instagram and Facebook posts-and will address the complex realities and challenges of composing ethical, persuasive, and effective arguments in the 21st century. The course will explore how traditional processes of writing and reading texts are challenged by communication across a range of diverse new media genres that employ multiple modes of communication (linguistic, visual, spatial, gestural, and aural ways of making meaning). We will examine the impact of multimedia/multimodal discourse on ourselves and our culture, and through our analysis and production of multimodal texts, we will explore how medium and mode shape the message, work to persuade multiple audiences, and alter the way that we understand, structure, and process knowledge. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 586. Language and Style. 3 Credits. H**
When we talk about a writer's style, or the style of a text or genre, what exactly do we mean? How do we identify, define, and analyze the elements that make up a style? What is it that makes us think that one style is "better" than another style? This is what we will explore in this course. We draw on a number of frameworks and theories from English language studies that can be used to discuss and analyze linguistic choices and strategies in texts; in other words, we will take apart the language of a text or writer (including your own!) in order to understand how it has been put together. As we approach language, text, and style
from this perspective, you will not only gain an understanding of the flexible, yet structured nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of a 300- or 400-level English course.

**ENGL 587. American English. 3 Credits. H**
A study of the structure, history, and varieties of the English language in the United States from the period of colonization to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 590. Studies in: _____ 1-3 Credits. H**
A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of the first-and second-year English requirement or its equivalent, and at least one 300- or 400-level ENGL course; or permission of instructor.

**ENGL 598. Honors Proseminar: _____ 3 Credits. H**
Directed reading and participation in small discussion groups, each formed to consider a specific and limited subject during the semester. Written work will be required, and will be judged on both content and form. The course is part of a departmental program leading to Honors in English. Prerequisite: Admission must be approved by the departmental director of undergraduate studies.

**ENGL 599. Honors Essay. 3 Credits. H**
Independent study, culminating in a substantial essay prepared under the direction of a member of the Department of English who is a specialist in the area of the student's interest. Prerequisite: Admission must be approved by the departmental director of undergraduate studies.

**ENGL 610. The Literature of England to 1500. 3 Credits. H**
A survey of the literature of medieval England (in translation). Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 620. Renaissance English Literature: _____ 3 Credits. H**
A broad view of literary works written between 1485 and 1660. Surveys may be offered with focus on a particular genre (poetry, drama, or prose), historical period (16th- or 17th-century literature), or group of authors (women writers). May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 633. Milton. 3 Credits. H**
A close reading of Paradise Lost, Paradise Regained, Samson Agonistes, and the minor poems, with illustrative selections of prose. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 640. British Literature, 1600-1800: _____ 3 Credits. H**
Study of literary works from the Restoration and eighteenth century. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 650. Romantic Literature: _____ 3 Credits. H**
Study of literary works from the British Romantic period. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 655. Victorian Literature: _____ 3 Credits. H**
Study of literary works from the Victorian period. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 674. African Literature: _____ 3 Credits. NW H**
An advanced study of a topic, genre, or area of written and/or oral African literature. Emphasis is placed on the critical analysis of major works, as well as their cultural and historical contexts. The course also addresses central critical and theoretical debates in the field. May be repeated for credit as the topic changes. Prerequisite: At least one 300- or 400-level English course, or permission of instructor.

**ENGL 690. Studies in: _____ 3 Credits. H**
A study of a major topic of concern to English literature. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 709. Critical Theory: Problems and Principles: _____ 3 Credits.**
Study of a topic (such as mimesis, influence, deconstruction) that is important in critical theory. May be repeated for credit as topic varies.

**ENGL 714. Middle English Literature. 3 Credits.**
Reading of selected works in Middle English (exclusive of the works of Chaucer).

**ENGL 725. Shakespeare: _____ 3 Credits.**
Intensive study of selected plays. May be repeated for credit as the topic changes.

**ENGL 730. Topics in Early Modern Literature: _____ 3 Credits.**
Intensive study of texts written between 1485 and 1800. The course may be organized around a particular genre (poetry, prose, drama), historical period (e.g. Elizabethan literature), a major author (e.g. Milton), group of authors (e.g. women writers), or theme (e.g. literature and politics 1660-1800). Students will be expected to read and apply relevant criticism and theory as well as study primary texts. May be repeated for credit as topic varies.

**ENGL 750. British Literature of the19th Century: _____ 3 Credits.**
Intensive study of British literary works of the 1800s. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

**ENGL 751. Fiction Writing III. 3 Credits.**
Practice in the writing of fiction under the direction of a member of the department working in conjunction with one or more writers in residence. Membership is limited to students who submit, well in advance enrollment, manuscripts showing unusual ability. May be repeated for credit.

**ENGL 752. Poetry Writing III. 3 Credits.**
Practice in the writing of poetry under the direction of a member of the department working in conjunction with one or more writers in residence. Membership is limited to students who submit, well in advance of enrollment, manuscripts showing unusual ability. May be repeated for credit.

**ENGL 753. Writers Workshop. 3 Credits.**
An intensive course in writing prose fiction and/or verse. Criticism (NEW) of manuscripts through group meetings and individual conferences with the instructor. Membership limited to students who submit manuscripts showing special ability in at least one of the creative writing forms. May be repeated for credit.

**ENGL 756. Forms: _____ 3 Credits.**
A study of literary works belonging to a particular genre or to multiple genres (fiction, nonfiction, poetry, drama etc.), either in a particular form (short story, essay, sonnet, etc.), concerned with a particular topic, or illustrative of a particular element of craft (voice, point of view, character
ENGL 757. Speculative Fiction Writing Workshop. 3 Credits.
An intensive, 2-week course in writing speculative fiction, including genres such as slipstream, magical realism, fantasy, horror, and science fiction. The course is part of the Center for the Study of Science Fiction Summer Institute. Application period: January 1 - April 15. Application includes note to instructor expressing interest and one story. May be repeated for credit with instructor’s permission.

ENGL 760. British Literature of the 20th Century: _____. 3 Credits.
Intensive study of British literary works written during the 20th century. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

ENGL 767. Studies in Modern Drama: _____. 3 Credits.
Reading of selected works in modern and contemporary drama. May be repeated for credit as the topic changes.

ENGL 770. Studies in Life Writing: _____. 3 Credits.
This course focuses on or surveys individual writers in the tradition of life writing; or intensively examines topics such as "Autobiography," "Memoir and Diary," "Biography," "Slave Narrative," "Letters," "Personal Essays," or "Autobiographical Fictions." Special emphasis within a topic, such as period, gender, or ethnicity, are possible. May be repeated for credit up to a maximum of six hours.

ENGL 774. Topics in Literatures of Africa and the African Diaspora: _____. 3 Credits.
An intensive study of the literatures of Africa and/or African diaspora (people of African descent dispersed around the world). This study will focus on the major characteristics of a particular period, genre, mode, and/or theme in literatures such as African, Caribbean, Afro-Brazilian, African American, African Canadian, Black British. Critical theories pertinent to writers and their work will be covered. Topics may include studies in drama, poetry, or the novel; migration narratives; literature of a particular era, such as the Harlem Renaissance, Ngritute, or the Black Arts Movement; representations of gender, etc. As topics vary by semester, the course may be repeated for credit. (Same as AAAS 774.)

ENGL 776. American Literature to 1900: _____. 3 Credits.
Intensive study of North American literary works before 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

ENGL 777. American Literature after 1900: _____. 3 Credits.
Intensive study of North American literary works after 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

ENGL 779. U.S. Poetries Since 1900. 3 Credits.
A colloquium for graduate students, sampling the range of poetries and poetical pursuits in the United States in the twentieth and twenty-first centuries.

ENGL 780. Composition Studies. 3 Credits.
This course surveys the field of composition studies, examining major issues and theories in the study of writing. The course may include theories from classical to contemporary rhetoric, composition theory from the twentieth century, and the most current debates in the study of writing.

ENGL 785. History of the English Language. 3 Credits.
Historical study of the phonology, morphology, syntax, vocabulary, and semantics of English; the relation between linguistic and cultural change.

ENGL 787. Modern English Grammar. 3 Credits.
A study of contemporary English: phonology, morphology, syntax, and usage. The emphasis is structural, but "traditional" grammar is referred to for contrast, example, and clarification.

ENGL 790. Studies in: _____. 3 Credits.
Examination of a significant topic in literature or the English language. May be repeated for credit as the topic varies.

ENGL 800. Methods, Theory, and Professionalism. 1-3 Credits.
Acquaintance with resources and practice in techniques that are essential to other graduate courses. Major concerns include the writing and documentation of scholarly papers; basic reference and bibliographical aids; critical approaches to literature and literary historiography; and the place of language and rhetoric in English studies today.

ENGL 801. Study and Teaching of Writing. 1-3 Credits.
A survey of major concepts and issues in the study of writing, especially as applied to teaching composition. Practices in writing pedagogy are also discussed, and students’ teaching of composition is observed and explored. Required of and enrollment limited to new teachers of English 101. May not be repeated for credit toward graduate degree.

ENGL 802. Practicum in the Teaching of College English. 1 Credits.
A course concerned primarily with the pedagogy and practice of teaching English 102. Includes weekly group meetings, individual conferences, and class visitations. Required of and enrollment limited to new teachers of English 102. May not be repeated for credit toward graduate degree. Course graded on a satisfactory/unsatisfactory basis.

ENGL 803. Topics in Composition Studies and Rhetoric: _____. 3 Credits.
Examination of selected topics in composition and rhetoric, such as literary studies, genre theory, dialogism, or writing across the curriculum. May be repeated for credit as the topic varies. Prerequisite: ENGL 780 or equivalent.

ENGL 896. Internship. 1-3 Credits.
Practical experience under professional supervision with the Writing Center, in editing, in theatrical production, or other activities relevant to the completion of an advanced degree in English. Prerequisite: Permission of Director of Graduate Studies.

ENGL 897. Preparation for the M.A. Examination. 1-6 Credits.
An independent reading course for students preparing to take the M.A. examination. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of the Director of Graduate Studies.

ENGL 898. M.A. Portfolio. 1-6 Credits.
An independent reading and writing course for students preparing the M.A. portfolio. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of the Director of Graduate Studies.

An independent reading and writing course for students researching and writing the M.A./M.F.A. thesis. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of the Director of Graduate Studies.

ENGL 904. Seminar in Composition Theory: _____. 3 Credits.
Intensive study of one or more theoretical aspects of composition in English (e.g., rhetoric, text grammar, stylistics). Prerequisite: ENGL 800.

ENGL 905. Seminar in the English Language: _____. 3 Credits.
Close study of the English language in a particular period. Prerequisite: ENGL 800.

ENGL 908. Seminar in Literary Criticism: _____. 3 Credits.
Close study of one or more major critics, of a major critical school, or of a topic important in literary criticism. Prerequisite: ENGL 800.
ENGL 915. Seminar in Medieval English Literature: ______. 3 Credits.
Study may center on either Old or Middle English language and literature.
Prerequisite: ENGL 800.

ENGL 920. Seminar in Renaissance English Literature: ______. 3 Credits.
Close study of one or two major authors or of a group of related works.
Prerequisite: ENGL 800.

ENGL 950. Seminar in 19th Century British Literature: ______. 3 Credits.
Concentrated study of one or two major figures, or a group of significant
writers, or an aspect of the literary scene. Prerequisite: ENGL 800.

ENGL 970. Seminar in American Literature: ______. 3 Credits.
Concentrated study of one or two authors or of historical periods or
important movements. Prerequisite: ENGL 800.

ENGL 974. Seminar in Literatures of Africa and the African Diaspora: ______. 3 Credits.
Advanced study in a topic related to literature, language, and cultures of
Africa and the African Diaspora, such as a concentrated study of one or
two authors, a group of significant writers, an historical period or important
movement, or an aspect of the literary or cultural scene of Black writing.
May be repeated for credit as the topic varies.

ENGL 980. Seminar In: ______. 3 Credits.
Advanced study in a topic related to literature, language, theory, or
a special skill such as analytical bibliography or editing. Prerequisite:
ENGL 800.

ENGL 997. Preparation for the Doctoral Examination. 1-12 Credits.
An independent reading course for students preparing to take the Ph.D.
comprehensive examination. May normally be taken in the semester
or summer session immediately preceding the semester in which the
comprehensive examination is taken. Does not count toward the
residence requirement. Graded on a satisfactory/unsatisfactory basis.
Prerequisite: Consent of the Director of Graduate Studies.

ENGL 998. Investigation and Conference: ______. 1-6 Credits.
Individual work in (a) language, (b) literature, (c) composition, or (d) the
teaching of English, by properly qualified graduate students under the
direction of appropriate members of the Graduate Faculty as assigned
by the Graduate Director. Limited to 6 hours of credit toward the M.A. or
Ph.D. degree; only on three-hour enrollment may substitute for a formal
course in satisfying a field distribution requirement. Normally offered for
only up to three credit hours in any one enrollment. Permission of the
supervising faculty member and of the Graduate Director required for
enrollment.

ENGL 999. Doctoral Dissertation. 1-12 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Arts and Bachelor of General Studies in English

Why study English language and literature?
Because reading and writing shape the world.

KU's English Department is at the core of the humanities, highlighting the
“human” through our individual, one-on-one interactions with our students,
our emphasis on community and global engagement, and our abiding
interest in our shared humanity through the stories of others. We seek
to challenge the mind and to engage the imagination of our students, to
teach them to ask questions and to seek for answers. We encourage
them to grapple with the complexity of a culturally and commercially
interconnected world and the global networks and processes of cultural
exchange. We believe that words and ideas will shape the world. We
teach our students life-long skills, so that they learn to write clearly,
creatively, and effectively—discovering themselves even as they lay a
solid foundation for professional success.

A commitment to teaching and learning.
Our department is renowned for its tradition of excellence in teaching.
The vast majority of our undergraduate classes have 20-35 students, and
much of the class time is dedicated to active learning and engagement
with texts and ideas. In the last ten years, faculty members in the
department of English have won ten Kemper Fellowships for Excellence
in Teaching, two Chancellors Club Teaching Professorships, a Career
Achievement Teaching Award, and a wide variety of other university-
level teaching and advising awards, and the department as a whole
received the Center of Teaching Excellence (CTE) award for Department
Excellence in Teaching at the University of Kansas.

A variety of career and life paths.
English majors graduate to a variety of careers, including law, teaching,
scholarship, publishing, library science, and journalism—as well as
medicine, politics, design, and any number of other fields that value clear
communication, interpretive skill, and critical and creative thinking.

Engaged and innovative scholarship.
KU's English Department has several core strengths that cross tracks
and periods, including Global and Cross-Cultural Approaches; Literature,
Rhetoric, and Social Action; Diversity Studies; Language, Literature and
Science; and Popular Expressive Forms.

At the KU English Department, students work closely with nationally-
renowned writers and researchers. Our faculty have won national awards
that recognize excellence in research, including grants from the National
Endowment for the Humanities, the American Philosophical Society,
and the Newberry Library, among others. English Department faculty
members have also received major research funding from the University
of Kansas, including the Hall Center for the Humanities Research
fellows and Keeler Intra-University Fellowships for interdisciplinary
work. Undergraduate students can work one-on-one with faculty mentors
in the Honors Program, McNair Scholars Program, and Dean's Scholars
Program, as well as through independent Directed Studies.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college
transcripts to the Office of Admissions. Prospective first-year students
should be aware that KU has qualified admission requirements that all
new first-year students must meet to be admitted. Consult the Office
of Admissions (http://admissions.ku.edu/) for application deadlines and
specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for
information about international admissions.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Undergraduate First- and Second-Year Preparation

Prospective English majors and minors are encouraged to complete their KU Core Goal 2.1 requirements and their BA degree-specific written communication requirements with English Department coursework (i.e., ENGL 101, ENGL 102 or ENGL 105, and 200-level ENGL courses).

Students are strongly encouraged to take a 200-level English course before taking 300- and 400-level coursework in English. Prospective English majors are encouraged to consult with the Director or Associate Director of Undergraduate Studies in order to declare the major, review major and degree requirements, and become familiar with departmental opportunities.

Requirements for the B.A. or B.G.S. Major

The major in English requires 30 hours (33 for Honors English).

ENGL 300 Introduction to English Studies (3 hours – must be taken within first year of declaring the English major):

English Studies Coursework (21 hours, 300 or above)

This includes at least one course chosen from:
- Rhetoric, Language and Writing studies
- Literature, Language, or Rhetoric prior to 1850
- Diverse identities, communities, and texts

The remaining courses may be chosen from any 300-level or above English course offerings. For students who are interested in focusing on a specific area of study, they may follow the optional emphases path outlined below.

- One 200-level course may be counted toward English Studies coursework.

Capstone Requirements (6 hours, 500 or above)

- Students must complete ENGL 300 and 2 other 300-level courses before they proceed to the capstone requirements. All 500-level or above English courses count as capstone courses.
- Students pursuing departmental honors may use ENGL 598 to fill one capstone requirement, and must also enroll in ENGL 599: Thesis hours.

Optional Emphases within the Major
• Students may pursue an emphasis in a particular field by taking at least 3 courses in it.
• These emphases include:
  • Literary Studies: one literary history course, one theory course, and one literary studies capstone
  • Creative Writing: 300-level workshops in two genres, and one creative writing capstone
  • Language, Culture, and Rhetoric: 380 or 387, another RCL course, and one RCL capstone
  • Students may also designate their own ‘custom’ emphasis, in consultation with a departmental advisor.

• 27 hours must be at the junior/senior level.
• No 100-level ENGL courses count toward major requirements.

Notes:
• Up to 6 credits combined of ENGL 494 Research Internship or ENGL 495 Directed Study: ______ may be applied as major electives.
• Up to 3 credit hours of ENGL 496 Internship or ENGL 497 Service Learning Internship may be applied as a major elective.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses (33 for Honors English).

Major Hours in Residence
Satisfied by a minimum of 25 hours of KU resident credit in the major; exceptions by permission of Director of Undergraduate Studies only.

Major Junior/Senior Hours
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in English with the following concentrations can be found here: English General Track (p. 1352), Creative Writing (p. 1353), and Rhetoric, Language, and Writing (p. 1354).

Sample 4-years plans for the BGS degree in English with the following concentrations can be found here: English General Track (p. 1355), Creative Writing (p. 1356), and Rhetoric, Language, and Writing (p. 1358), or by using the left-side navigation.

Departmental Honors
To be admitted to the English Honors major program, an undergraduate must have a 3.5 grade-point average in English courses.

Honors English majors must complete at least 1 section of ENGL 598 Honors Proseminar: ______ and ENGL 599 Honors Essay. This requirement, in effect, adds 3 hours of capstone-level coursework to the student’s emphasis.

BA in English

#### Notes:

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Before beginning 300+ level English courses it is recommended that students take a 200-level English course. One 200-level course may be counted toward English Studies coursework. ENGL 203, ENGL 205, ENGL 209 and ENGL 210 fulfill KU Core Goal 3 Arts & Humanities.

4. Students may pursue an emphasis in a particular field by taking at least 3 courses in it (including a capstone). These emphases include:
   - Literary Studies: one literary history course, one theory course, and one literary studies capstone
   - Creative Writing: 300-level workshops in two genres, and one creative writing capstone
   - Language, Culture, and Rhetoric: ENGL 380 or ENGL 387, another RCL course, and one RCL capstone
   - Students may also designate their own ‘custom’ emphasis, in consultation with a departmental advisor.

5. Capstone Requirements (6 hours, 500 or above): Students must complete ENGL 300 and 2 other 300-level courses before they proceed to the capstone requirements. All 500-level or above English courses count as capstone courses. Students pursuing departmental honors may use ENGL 598 to fill one capstone requirement, and must also enroll in ENGL 599: Thesis hours.

6. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Below is a sample 4-year plan for students pursuing the BA in English - Rhetoric, Language, and Writing Track. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. ENGL 203, ENGL 205, ENGL 209, and ENGL 210 fulfill KU Core Goal 3 Arts & Humanities. It is strongly recommended that students complete an ENGL 200-level course before attempting a 300-level.
4. Creative writing students complete workshops in at least two genres. For the purposes of the Creative Writing Tracks, the four major genres are: Fiction; Poetry; Playwriting, Screenwriting, and/or Scriptwriting; and Creative Non-Fiction.
5. Two ENGL courses must be taken at the 500+ level per major requirement.
6. Choose at least one of the required ENGL 500+ level courses, as required by the major, from the list of approved ENGL courses for Goal 6 of the KU Core.
7. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. English majors are encouraged to take a 200-level English course before beginning 300+ level English courses.
4. Two ENGL 500 level courses are required by the major. Attempt to choose at least one of the ENGL 500 courses from the list of approved Goal 6 courses for the KU Core.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. For Rhetoric, Composition, and Language Area course, see the Degree Requirements (p. 1351) in the Catalog.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Below is a sample 4-year plan for students pursuing the BGS in English with concentration in Creative Writing.

### Total Hours 120

1. Students must complete ENGL 101 and ENGL 102, or their equivalents to be eligible for 200-level and higher ENGL courses.
2. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
3. Before beginning 300+ level English courses it is recommended that students take a 200-level English course. One 200-level course may be counted toward English Studies coursework.
4. Students may pursue an emphasis in a particular field by taking at least 3 courses in it (including a capstone). These emphases include:
   - Literary Studies: one literary history course, one theory course, and one literary studies capstone
   - Creative Writing: 300-level workshops in two genres, and one creative writing capstone
   - Language, Culture, and Rhetoric: ENGL 380 or ENGL 387, another RCL course, and one RCL capstone
   - Students may also designate their own ‘custom’ emphasis, in consultation with a departmental advisor.
5. Capstone Requirements (6 hours, 500 or above): Students must complete ENGL 300 and 2 other 300-level courses before they proceed to the capstone requirements. All 500-level or above English courses count as capstone courses. Students pursuing departmental honors may use ENGL 598 to fill one capstone requirement, and must also enroll in ENGL 599: Thesis hours.
6. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
7. ENGL 203, ENGL 205, ENGL 209 and ENGL 210 fulfill Goal 3 Arts & Humanities
8. ENGL 362, ENGL 496 and ENGL 497 may fulfill BGS Career Course requirement when taken for 3 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Total Hours 120

1. English majors are encouraged to take a 200-level English course before beginning 300+ level English courses.
2. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
3. ENGL 203, ENGL 205, ENGL 209, and ENGL 210 fulfill Goal 3 Arts & Humanities.
4. For Rhetoric, Composition, and Language area courses see catalog under Degree Requirements. (p. 1351)
5. ENGL 362, ENGL 496, and ENGL 497 fulfill the BGS Career Course requirement.
6. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
7. Two ENGL 500+ level courses are required by the major. Attempt to choose at least one of the ENGL 500+ level courses from the list of approved Goal 6 courses for the KU Core.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific...
requirements is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Arts and Bachelor of General Studies in Literature, Language, and Writing

Why study English language and literature?

Because reading and writing shape the world.

KU's English Department is at the core of the humanities, highlighting the "human" through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

A commitment to teaching and learning.

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 20-35 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

A variety of career and life paths.

The Literature, Language, and Writing program at the Edwards campus helps to prepare undergraduate students for a variety of professions, including law, scholarship, publishing, library science, and marketing—as well as any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

English Required Elective
Majors must complete 3 courses (9 hours) of junior/senior level ENGL courses. Up to 6 credits combined of ENGL 494 (Research Internship) or ENGL 495 (Directed Study) may be applied as major electives; they may not count as English core equivalents. Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) can be applied as major elective credit. In addition, the following courses offered in other CLAS departments may be selected: HUM 304, HUM 308, HUM 312, FMS 373, FMS 773.

Total Hours 30

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Literature, Language, and Writing can be found here: Literature, Language and Writing (p. 1360), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Literature, Language, and Writing can be found here: Literature, Language and Writing (p. 1362), or by using the left-side navigation.

Departmental Honors
To be admitted to the English Honors major program, an undergraduate student must have earned a 3.5 grade-point average in English courses. The student should declare an English major, if enrolled in the College of Liberal Arts and Sciences, or an English concentration, if enrolled in the School of Business or the School of Education.

Honors English majors must complete at least 1 section of ENGL 598 Honors Proseminar: ______ and ENGL 599 Honors Essay. This requirement, in effect, adds 3 hours of capstone-level coursework to the student’s emphasis.

BA in Literature, Language & Writing
Below is a sample 4-year plan for students pursuing the BA in Literature, Language, & Writing. A 4-year plan for the BGS in Literature, Language, and Writing is coming soon. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
The Literature, Language & Writing major is only available to Edwards campus students.

### Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Major must complete 3 courses (9 hours) in writing and/or English language courses.
3. Majors must complete 3 courses (9 hours) of junior/senior level ENGL courses. Up to 6 credits combined of ENGL 494 (Research Internship) or ENGL 495 (Directed Study) may be applied as major electives; they may not count as English core equivalents. Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) can be applied as major elective credit.
4. At least one major course must be taken at the 500+ level.
5. At least one major course should be chosen from the list of English courses approved to fulfill KU Core Goal 6 (http://kucore.ku.edu/courses/).
6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
7. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

**Please Note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
BGS in Literature, Language & Writing

Below is a sample 4-year plan for students pursuing the BGS in Literature, Language & Writing. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

The Literature, Language & Writing major is only available to Edwards campus students.

### Minor in English

**Why study English language and literature?**

Because reading and writing shape the world.

KU's English Department is at the core of the humanities, highlighting the "human" through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially
interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

**A commitment to teaching and learning.**

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 15-25 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellor’s Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

**A variety of career and life paths.**

The English minor is an excellent complement to any major or professional degree. English students graduate to a variety of careers, including law, teaching, scholarship, publishing, library science, and journalism—as well as medicine, business, politics, design, and any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

**Engaged and innovative scholarship.**

KU’s English Department has several core strengths that cross tracks and periods, including Global and Cross-Cultural Approaches; Literature, Rhetoric, and Social Action; Diversity Studies; Language, Literature and Science; and Popular Expressive Forms.

At the KU English Department, students work closely with nationally-renowned writers and researchers. Our faculty have won national awards that recognize excellence in research, including grants from the National Endowment for the Humanities, the American Philosophical Society, and the Newberry Library, among others. English Department faculty members have also received major research funding from the University of Kansas, including the Hall Center for the Humanities Research fellowships and Keeler Intra-University Fellowships for interdisciplinary work. Undergraduate students can work one-on-one with faculty mentors in the Honors Program, McNair Scholars Program, and Dean’s Scholars Program.

**Requirements for the Minor**

The minor in English requires students to complete 18 hours of English coursework in one of three tracks: Regular, Creative Writing, or Rhetoric, Language, and Writing.

**Requirements for the English Minor, Regular Track**

18 hours, of which 12 hours must be selected from 4 of the following categories that comprise the common requirements of the English major, and of which at least 15 must be jr/sr hours. No more than 1 creative writing course may count for the regular track. ENGL 494, ENGL 495, ENGL 496, and ENGL 497 may not be applied to English minor requirements.

**Categories:**

1. Individual Authors orMovements
2. Literary Theory
3. English Language or Rhetoric
4. Transcultural Approaches to Language, Literature, or Writing
5. Writing
6. Forms and Genres
7. Literary History

For full course lists for each category, see the General Track of the English Major (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/#Gen).

**Requirements for the Creative Writing Track of the English Minor**

18 hours, of which 12 hours must be creative writing workshops (see below) in at least two genres, and of which at least 15 must be jr/sr hours. For the purposes of the creative writing tracks of the major and minor, genres are 1) fiction; 2) poetry; 3) playwriting, screenwriting, and/or scriptwriting; and 4) non-fiction. At least one workshop must be at the 500 level or above. ENGL 494, ENGL 495, ENGL 496, and ENGL 497 may not be applied to English minor requirements.

**Creative Writing workshops:**

professional writing skills and critical analysis abilities with the Critical Writing certificate. If you’re more technically minded, develop your creative side and critical thinking skills with the Creative and Analytical world, and add a valuable KU qualification to your resume. Develop your writing and critical thinking skills for the professional

The KU Edwards Campus offers two undergraduate certificate programs

approaching problems in a constructive, unique way that helps you stand out from the crowd.

Creativity and innovation are how businesses move forward and gain a competitive edge. They also present ways to explore your abilities and develop practical skills that help you see the big picture, while approaching problems in a constructive, unique way that helps you stand out from the crowd.

The KU Edwards Campus offers two undergraduate certificate programs that develop your writing and critical thinking skills for the professional world, and add a valuable KU qualification to your resume. Develop your creative side and critical thinking skills with the Creative and Analytical Writing certificate. If you’re more technically minded, develop your professional writing skills and critical analysis abilities with the Critical Thinking and Writing certificate.

Each certificate can be completed in three semesters, and offers a light course load and flexible curriculum that you can take at your own pace. Apply the skills and thought processes you learn to the work you’re already doing and become the innovative, constructive leader you’ve always wanted to be.

This certificate is designed to enhance written communication with an emphasis on strengthening creativity. The curriculum’s fiction and poetry writing classes allow you to stretch your creative muscles, while also developing critical thinking and feedback skills through the process of workshopping. Literature courses strengthen critical thinking and analysis skills through studying works in historical and cultural context.

The Creative and Analytical Writing certificate is 12 credits, to include two courses in each of the following categories. All 12 hours must be at the JR/SR level.

Undergraduate Certificate in Creative and Analytical Writing

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 12 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator.

Undergraduate Certificate in Creative and Analytical Writing

The Opportunity

Creativity and innovation are how businesses move forward and gain a competitive edge. They also present ways to explore your abilities and develop practical skills that help you see the big picture, while approaching problems in a constructive, unique way that helps you stand out from the crowd.

The KU Edwards Campus offers two undergraduate certificate programs that develop your writing and critical thinking skills for the professional world, and add a valuable KU qualification to your resume. Develop your creative side and critical thinking skills with the Creative and Analytical Writing certificate. If you’re more technically minded, develop your professional writing skills and critical analysis abilities with the Critical Thinking and Writing certificate.

Each certificate can be completed in three semesters, and offers a light course load and flexible curriculum that you can take at your own pace. Apply the skills and thought processes you learn to the work you’re already doing and become the innovative, constructive leader you’ve always wanted to be.

This certificate is designed to enhance written communication with an emphasis on strengthening creativity. The curriculum’s fiction and poetry writing classes allow you to stretch your creative muscles, while also developing critical thinking and feedback skills through the process of workshopping. Literature courses strengthen critical thinking and analysis skills through studying works in historical and cultural context.

The Creative and Analytical Writing certificate is 12 credits, to include two courses in each of the following categories. All 12 hours must be at the JR/SR level.

already doing and become the innovative, constructive leader you’ve always wanted to be.

This certificate pairs technical writing and research courses with literature courses that study works in context. The program works directly on professional writing and critical analysis skills, honing your abilities and strengthening your capacity to accurately critique ideas and understand diverse points of view.

The certificate will require 12 credits and will require students to include two courses in each of the following two categories. All 12 hours must be at the JR/SR level.

Choose two courses (a total of 6 hours) from at least two of the following areas: 6

- Rhetoric, Language, and Writing
  - ENGL 359 English Grammar
  - ENGL 360 Topics in Writing: ______
  - ENGL 380 Introduction to Rhetoric and Composition
  - ENGL 381 Topics in Rhetoric and Composition: ______
  - ENGL 385 The Development of Modern English
  - ENGL 387 Introduction to the English Language
  - ENGL 388 Topics in English Language Studies
  - ENGL 400 Teaching and Tutoring Writing
  - ENGL 580 Rhetoric and Writing: ______
  - ENGL 587 American English

- Creative Writing
  - ENGL 351 Fiction Writing I
  - ENGL 352 Poetry Writing I
  - ENGL 354 Playwriting I
  - ENGL 355 Nonfiction Writing I

- Writing in the Professions
  - ENGL 203 Topics in Reading and Writing: ______ ("Writing for Engineering")
  - ENGL 362 Foundations of Technical Writing
  - BUS 305 Business Writing
  - COMS 330 Effective Business Communication
  - Digital and Multimedia Writing
  - COMS 320 Communication on the Internet
  - ENGL 580 Rhetoric and Writing: ______ ("Digital Rhetoric" or "Multimedia Rhetoric")

---

**Master of Arts in English**

The M.A. in Literature and the M.A. in Literature & Literary Theory provide students with a broad knowledge of literatures in English across a range of time periods, as well as an introduction to the basic concepts and methods of the discipline. This program has special strengths in ecocriticism and posthuman studies, African American & African diaspora literatures, nineteenth-century U.S. literature, science fiction & fantasy, and Victorian literature.

The M.A. in Rhetoric & Composition provides students with a broad knowledge of writing and the teaching of writing, including the study of
composing across multiple genres, media and situations. This program has special strengths in genre and language theory, multimodality and digital rhetorics, public rhetoric, and writing pedagogy.

The M.A. in English Language Studies provides students with a broad introduction to empirical approaches to the study of the English language. This program has special strengths in historical linguistics, sociolinguistics, pragmatics, and discourse analysis.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

To be admitted to any of the department’s graduate degree tracks, a student must have a strong undergraduate record, particularly in the humanities. Applicants are expected to have some familiarity with British and American literary history and the work of the major writers in English. Applicants for graduate work in literary studies and rhetoric-composition studies should be able to demonstrate, with writing samples, their ability to produce advanced analytical and interpretive scholarly writing. For complete admission information, see the English department website (https://english.ku.edu/).

All applicants must submit their graduate application online (https://gradapply.ku.edu/apply/). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas  
Department of English  
Graduate Applications  
1445 Jayhawk Blvd., Room 3001  
Lawrence, KS 66045

**M.A. Degree Requirements**

While continuously enrolled, a student has a total of 7 years to complete the master’s degree; however, the expected time to degree is 2.5 to 3 years. The candidate’s program should be arranged in consultation with the director of graduate studies or a member of the departmental committee on graduate studies.

Students who elect to write a master’s thesis must enroll in ENGL 899. M.A. candidates in Options 1a, 1b, 2a and 2b must take at least 18 hours of their course work, in addition to ENGL 800, at the 700, 800, and 900 levels.

**Option 1a—Literature**

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. **Exam option** students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. **Thesis option** students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). **Portfolio option** students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily 708, 709, 800, or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 1 course must be pre-1700; at least 1 must be 1700-1900; and at least 1 must be after 1900. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

5. Exam option (3 hours): the student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on a 30-item exam list of literary and / or theoretical texts, including at least 6 items from before 1700; at least 6 items from 1700-1900; and at least 6 items from 1900-present. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

6. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

7. Portfolio Option (6 hours): The student must enroll in 6 hours of ENGL 898 (MA portfolio) over 2 semesters of work: (1) a first semester with the portfolio director, deciding on the shorter scholarly pieces to be included in the portfolio and drafting the cover essay (3-5 pages); and (2) a writing semester for crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).

**Option 1b—Literature and Literary Theory**

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. **Exam option** students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. **Thesis option** students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). **Portfolio option** students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily 708, 709, 800, or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.
4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 1 course (3 hours) must be pre-1800; at least 1 (3 hours) must be post-1800. At least 2 courses (6 hours), besides the course used to fulfill requirement 2 (Methods or Theory) must focus primarily on Literary Theory. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

5. Exam option (3 hours): the student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on 2 lists developed in consultation with advisors: a) a 15-item exam list of works in English Language Studies, and b) a 15-item exam list of works in a second area: literature, literary theory, or rhetoric and composition. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

6. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

7. Portfolio Option (6 hours): The student must enroll in 6 hours of ENGL 898 (MA portfolio) over 2 semesters of work: (1) a first semester with the portfolio director, deciding on the shorter scholarly pieces to be included in the portfolio and drafting the cover essay (3-5 pages); and (2) a writing semester for crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).

Option 2a—Rhetoric and Composition

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). Portfolio option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Rhetoric and Composition, ordinarily 780 (Composition Studies), or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, 781, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 6 hours in English Language Studies courses (including at least 1 seminar) beyond the courses used to fulfill requirements 2 (Methods and Theory) and 3 (Pedagogy).

5. 6 hours of elective courses

6. For students selecting the exam option, 6 hours in second exam area (rhetoric and composition, literature, literary theory), including at least 1 seminar.

7. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

8. Exam option (3 hours): The student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on 2 lists developed in consultation with advisors: a) a 15-item exam list of works in rhetoric and composition, and b) a 15-item exam list of works in a second area: literature, literary theory, English Language Studies, or specialty within rhetoric and composition.

Option 2b—English Language Studies

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). Portfolio option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Rhetoric and Composition, ordinarily 780 (Composition Studies), or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, 781, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 6 hours in Rhetoric and Composition courses (including at least 1 seminar) beyond the courses used to fulfill requirements 2 (Methods and Theory) and 3 (Pedagogy).

5. 6 hours of elective courses

6. For students selecting the exam option, 6 hours in second exam area (rhetoric and composition, literature, literary theory), including at least 1 seminar.

7. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

8. Exam option (3 hours): The student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on 2 lists developed in consultation with advisors: a) a 15-item exam list of works in rhetoric and composition, and b) a 15-item exam list of works in a second area: literature, literary theory, English Language Studies, or specialty within rhetoric and composition.
composition. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

9. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

10. Portfolio Option (6 hours): The student must enroll in 6 hours of ENGL 898 (MA portfolio) over 2 semesters of work: (1) a first semester with the portfolio director, deciding on the shorter scholarly pieces to be included in the portfolio and crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).

**Accelerated Master of Arts in English**

The 4+1 B.A.-M.A. program will offer our best undergraduate majors the opportunity to earn both the bachelor’s and master’s degrees in a focused and accelerated manner. The program enables qualified KU students to count 12 hours of graduate-level coursework toward the major requirements and the master’s degree, which will be completed in the 5th year.

The course requirements for the accelerated M.A. program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4, fulfilling both B.A. major requirements and M.A. degree requirements, and graduate credit courses taken in Year 5.

- Students must be approved to begin coursework toward the 4+1 program prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

Only current KU undergraduate students are eligible to apply to the Accelerated MA program. If you are not a current undergraduate student at KU, please review the admission requirements for the regular MA program.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

ADMISSION REQUIREMENTS:

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year timeframe. All prospective students should discuss their interest in admission to the accelerated master’s track with both the Undergraduate Director (UGD) and the Director of Graduate Studies (DGS) no later than the Fall of the student’s Junior year (Year 3).

Prospective students are eligible to apply to the graduate program in the Fall semester of their Senior Year. The following program requirements must be met by this time:

- Major GPA of at least 3.5
- Overall GPA of at least 3.25
- On track to complete all requirements for a BA degree in English from KU by the spring semester of Senior year (Year 4).

GRE scores are **not** required.

Applicants must complete an Application for Graduate Study online (https://gradapply.ku.edu/apply/). The following information should be gathered in advance and uploaded with the application:

- 3 letters of recommendation (at least one from an English faculty member);
- resume or curriculum vitae (CV);
- one-page Statement of Purpose (maximum 750 words);
- writing samples (15 to 20 pages total; more than one paper preferred).

Upon review of the application for admission, the English Department will notify the student of her or his eligibility to begin coursework in the program. Final acceptance to the graduate program will be contingent upon the following:

- grades of B or above in all English graduate-level coursework taken in Year 4;
- successful completion of all requirements for the BA/BGS degree.

Application and admission procedures for the Accelerated Master’s program are different from the regular master’s program. For more information, please contact the Director of Undergraduate Studies.

DEGREE REQUIREMENTS:

The course requirements for the accelerated MA program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4, fulfilling both BA major requirements and MA degree requirements, and graduate credit courses taken in Year 5.

The student must be approved to begin coursework toward the accelerated program prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

REQUIREMENTS for the BA MAJOR:

The major in English requires 30 hours (33 for Honors English). Students in the accelerated program must take 6 credit hours at the 590 level or above, and 6 credit hours at the 700 level or above. These courses may be selected from those that count toward major distribution requirements or major electives. (See the 590+ level options in the course lists below).

ENGL 300 Introduction to English Studies (3 hours – must be taken within first year of declaring the English major):

**English Studies Coursework (21 hours, 300 or above)**

This includes at least one course chosen from:

- Rhetoric, Language and Writing studies
Literature, Language, or Rhetoric prior to 1850

Diverse identities, communities, and texts

The remaining courses may be chosen from any 300-level or above English course offerings. For students who are interested in focusing on a specific area of study, they may follow the optional emphases path outlined below.

- One 200-level course may be counted toward English Studies coursework.

**Capstone Requirements (6 hours, 500 or above)**

- Students must complete ENGL 300 and 2 other 300-level courses before they proceed to the capstone requirements. All 500-level or above English courses count as capstone courses.
- Students pursuing departmental honors may use ENGL 598 to fill one capstone requirement, and must also enroll in ENGL 599: Thesis hours.

| ENGL 574 | African American Literature: _____             |       |
| ENGL 674 | African Literature: _____                      |       |

**Total Hours** 9

**Optional Emphases within the Major**

- Students may pursue an emphasis in a particular field by taking at least 3 courses in it.
- These emphases include:
• Literary Studies: one literary history course, one theory course, and one literary studies capstone
• Creative Writing: 300-level workshops in two genres, and one creative writing capstone
• Language, Culture, and Rhetoric: ENGL 380 or ENGL 387, another RCL course, and one RCL capstone
• Students may also designate their own ‘custom’ emphasis, in consultation with a departmental advisor
• 27 hours must be at the junior/senior level.
• No 100-level ENGL courses count toward major requirements.

Notes:
• Up to 6 credits combined of ENGL 494 Research Internship or ENGL 495 Directed Study: _____ may be applied as major electives.
• Up to 3 credit hours of ENGL 496 Internship or ENGL 497 Service Learning Internship may be applied as a major elective.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses (33 for Honors English).

Major Hours in Residence
Satisfied by a minimum of 25 hours of KU resident credit in the major; exceptions by permission of Director of Undergraduate Studies only.

Major Junior/Senior Hours
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

MA DEGREE REQUIREMENTS:

In addition to the 12 graduate credit hours completed during the senior year, MA students must complete an additional 18 hours of graduate-level coursework. The candidate’s program should be arranged with the Graduate Director of Graduate Studies (DGS) or a member of the departmental committee on graduate studies. At least 12 hours of the 18 hours of graduate-level coursework for the MA must be taken at the 700 level or above, and the remaining hours may be taken at the 590-600 level or above. The following requirements also apply:

3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily ENGL 709 or ENGL 800, or another course appropriately designated by the Graduate Director. A ENGL 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3 hours on Pedagogy: ENGL 780, or other appropriate course as approved by the Graduate Director.

21 distribution hours to be selected in consultation with advisors. Two options are available:

• Option 1a, Literature: At least 1 course (3 hours) must be pre-1700; at least 1 must be 1700-1900; and at least 1 must be after 1900. 2 courses (6 hours) outside the department may be included in the distribution hours with approval of the Graduate Director.
• Option 1b, Literature and Literary Theory: At least 1 course (3 hours) must be pre-1800; at least 1 (3 hours) must be post-1800. At least 2 courses (6 hours), besides the course used to fulfill requirement 2 (Methods or Theory) must focus primarily on Literary Theory. 2 courses (6 hours) outside the department may be included in the distribution hours with approval of the Graduate Director.

ENGL 899: Portfolio Preparation: This course is completed during the last semester of the MA year (Year 5). Students prepare a portfolio of work from their graduate courses over which they will be examined at an oral defense, not to exceed 90 minutes.

PROGRESSION REQUIREMENTS:
Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

• Once approved to begin graduate coursework, the student must meet with the DGS to plan the final year of undergraduate study;
• At the end of the final semester of undergraduate study (Year 4), the department will review the student’s performance in graduate-level English courses taken in Year 4. The student must earn a grade of B or better in each course to be eligible to continue in the accelerated program;
• Following the completion and award of the BA or BGS degree, the accelerated masters student will meet again with the DGS to review the course plan for the 5th year of study and update it as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated;
• For students who do not meet the minimum GPA requirement of 3.0 in the first semester of Year 5, the department may, at its discretion, devise a plan of study to address the student’s deficiencies, or may dismiss the student from the program;

The program is designed so that students can complete all requirements for the accelerated masters degree within one year of receiving the BA/BGS degree.

If unforeseen circumstances prevent the timely completion of the MA degree, the student must consult with the DGS and her or his graduate advisor to develop an alternative plan for finishing the program. Similarly, a student may decide to discontinue in the graduate program after finishing the bachelor’s degree, or while still completing undergraduate requirements; the student should notify the DGS of this decision. Those still completing requirements for the BA should also contact their undergraduate advisor as soon as possible to ensure timely completion of the bachelor’s degree.

If a student performs poorly in graduate coursework in Year 4 (receiving lower than a B in any graduate classes), the student will be advised to withdraw from the accelerated program. As long as the BA requirements have been met, the student will be able to graduate with a bachelor’s degree.

If the student performs poorly in Year 5 (dropping below a 3.0 GPA/B average in English classes), the student will fall out of Good Standing. The student’s name will be forwarded to the College and the student will be put on academic probation for one semester. The DGS and Graduate Committee senior staff will review the student’s progress regularly. If
satisfactory progress is not being made, the student may be dismissed from the accelerated program. The student can also withdraw voluntarily.

**Total Hours 136-139**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
3. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
4. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Master of Fine Arts in Creative Writing

The M.F.A. in Creative Writing provides students with a balance between the study of literature and intensive workshop experience. In the final year, students receive support and substantial feedback on a creative thesis.

Our award-winning faculty and alumni have received international recognition for their creative work; distinctions include the Pushcart Prize, the Nebula Award, the Hugo Award, the Kennedy Center Gold Medallion, the Gertrude Stein Award, the Kenyon Review Prize. Recent visiting writers include Sherman Alexie, Julia Alvarez, Margaret Atwood, Michael Chabon, Rita Dove, Naruddin Farah, Kent Haruf, Cherrie Moraga, Paul Muldoon, Salman Rushdie, George Saunders, and Natasha Trethewey. Graduate students also run a professional literary journal called Landlocked.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

To be admitted to any of the department’s graduate degree tracks, a student must have a strong undergraduate record, particularly in the humanities. Creative writing applicants need to submit writing samples that demonstrate an advanced level of writing skills in their respective genres. For complete admission information, see the English Graduate Admissions website (https://english.ku.edu/graduate-admission/).

All applicants must submit their graduate application online (https://gradapply.ku.edu/apply/). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas
Department of English
Graduate Applications
1445 Jayhawk Blvd., Room 3001
Lawrence, KS 66045

Master of Fine Arts in Creative Writing Degree Requirements

Requirements for the M.F.A. in Creative Writing (http://www2.ku.edu/~englishmfa/) include

1. 4 graduate courses (12 hours) in literature, English or American.
2. 4 graduate courses (12 hours) in creative writing.
3. No more than 2 classes (6 hours) may be taken at the 600-level and no classes at the 500-level or below.
4. 7 to 9 hours in electives or practica, chosen from graduate courses in the Department of English, or approved courses in another department.
5. ENGL 899, Thesis (15 hours required). Original writing in prose fiction, poetry, drama, or nonfiction prose.

Doctor of Philosophy in English

The Ph.D. degree offers the opportunity for advanced and concentrated research to students who hold an M.A. degree in English or a related field, from KU or elsewhere.

Our Literature and Literary Theory program has special strengths in ecocriticism and posthuman studies, African American & African diaspora literatures, nineteenth-century U.S. literature, science and technology studies, and Victorian literature.

Our Rhetoric & Composition program has special strengths in genre and language theory, public and professional discourses, multimodality and digital rhetorics, translingualism, writing pedagogy, and global writing research.

Our English Language Studies program has special strengths in historical linguistics, sociolinguistics, pragmatics, and discourse analysis.

Our Creative Writing program has special strengths in the novel, environmental writing, drama, mixed-genre work, and short story collections.

All of our programs boast distinguished and award-winning faculty with notable research publications and a deep foundation in their areas of specialization.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

To be admitted to any of the department’s graduate degree tracks, a student must have a strong undergraduate record, particularly in the humanities. Applicants are expected to have some familiarity with British and American literary history and the work of the major writers in English. Most importantly, applicants for graduate work in literary studies and rhetoric-composition studies should be able to demonstrate, with writing samples, their ability to produce advanced analytical and interpretive scholarly writing. Similarly, creative writing applicants need to submit writing samples that demonstrate an advanced level of writing skills in their respective genres. For complete admission information, see the English department website (https://english.ku.edu/).
All applicants must submit their graduate application online (https://gradapply.ku.edu). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas
Department of English
Graduate Applications
1445 Jayhawk Blvd., Room 3001
Lawrence, KS 66045

Ph.D. in English Degree Requirements

Students entering the program with the B.A. have, while being continuously enrolled, 10 years to complete the M.A. and Ph.D. combined. Students entering with the M.A. have 7 years to complete the Ph.D.; however, the expected time to degree is 6-7 years for the M.A. plus Ph.D., and 4-5 years for the Ph.D.

Ph.D. Requirements: Literature and Creative Writing

1. At least 24 hours of credit in appropriate formal graduate courses beyond the M.A. or M.F.A. At least 15 hours (in addition to introduction to ENGL 800 if not taken for the M.A.) of this course work must be taken from among courses offered by the Department of English at the 700 level and above. ENGL 997 and ENGL 999 credits cannot be included among the 24 hours. Students may petition to take up to 6 hours outside the department.

2. Required courses: ENGL 800 and 2 seminars (courses numbered 900 or above) offered by the Department of English at KU beyond the M.A. ENGL 998 does not fulfill this requirement. Students with master’s degrees earned elsewhere may be required by the director of graduate studies, acting on behalf of the graduate committee, to take additional course work.

3. A reading knowledge of 1 of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).

4. ENGL 999, Dissertation (at least 12 hours).

5. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of three areas of study.

6. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.

7. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Ph.D. Requirements: Composition and Rhetoric, M.A. to Ph.D., standard track

1. At least 24 hours of credit in appropriate formal graduate courses beyond the M.A. or M.F.A. At least 15 hours (in addition to introduction to ENGL 800 if not taken for the M.A.) of this course work must be taken from among courses offered by the Department of English at the 700 level and above. ENGL 997 and ENGL 999 credits cannot be included among the 24 hours. Students may petition to take up to 6 hours outside the department.

2. An introduction to the field: either ENGL 800 or ENGL 780.

3. 2 seminars (courses numbered 900 or above) offered by the Department of English at KU beyond the M.A., at least one of which should be in Rhetoric and Composition. ENGL 998 does not fulfill this requirement.

4. A reading knowledge of 1 of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).

5. ENGL 999, Dissertation (at least 12 hours).

6. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of three areas of study.

7. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.

8. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Ph.D. Requirements: Composition and Rhetoric, B.A. to Ph.D. accelerated track

Each student admitted to the Ph.D. program in composition and rhetoric is assigned a graduate advisor from among the faculty in composition and rhetoric, who will help the student plan an initial course of study. After the first semester, students may ask other faculty members in the field to serve as their graduate advisors, depending on availability. The students and their graduate advisors together design and monitor a coherent program of study, individualized to serve each student’s goals within current expectations for a Ph.D. in composition and rhetoric. As an interdisciplinary field, study in composition and rhetoric might involve work in other departments, programs, or schools as well as English, including, for example, communication studies, linguistics, education, psychology, American studies, women’s studies, or history.

Each student’s individualized program of study must meet the minimum requirements detailed below.

1. At least 36 hours of credit in appropriate formal graduate courses beyond the B.A. At least 30 hours of this course work must be taken from among courses offered at the 700 level and above. ENGL 997 and ENGL 999 credit hours cannot be included among the 36 hours.
Environmental Studies Program

Why study environmental studies?

The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous degree that balances learning in the physical and social sciences along with the arts and humanities. Learning Pathways (https://esp.ku.edu/learning-pathways/), thematic areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.

The program provides students with the tools they need to investigate environmental phenomena, including soil sampling and freshwater ecology to policy-making and social science. Environmental Studies students learn how to put together what other disciplines take apart.

Our pedagogy is focused on engaged learning. Learning Pathways (https://esp.ku.edu/learning-pathways/) concentrations provide options for a deeper dive within our major, with recommended courses, faculty, and experiences. In addition to a vibrant classroom curriculum (https://esp.ku.edu/degrees/), Environmental Studies students are encouraged to participate in the many exciting experiential learning opportunities that KU offers, including undergraduate research (https://esp.ku.edu/undergraduate-research/), co-curricular projects (http://esp.ku.edu/projects/), and internships (http://esp.ku.edu/internships/).

Environmental Studies equips students to get involved in the intellectual life of the university and to connect to environmental projects in the surrounding community. These experiences enhance the success of students along their path to graduation and rewarding careers.

Undergraduate Programs

This interdisciplinary major gives students a fundamental knowledge of the human environment, the dimensions of human impact on the environment, and holistic approaches to solving problems resulting from this impact. The human environment includes all facets of human activity affecting the environment, such as philosophical and ethical issues, environmental resource use and misuse, population biology, and the chemistry of the atmosphere.

Electives

The goals of the program are

1. To provide a holistic view of the environment, one in which the synergistic nature of perturbations, natural and anthropogenic, can be understood and
2. To provide the technical and evaluative skills for active participation in an environmental career.

The environment is the central theme around which a liberal arts education is focused.

Students may declare an interest in environmental studies or a major in environmental studies by filling out the appropriate forms. CLAS Interest Code and Major Declaration forms are available from College Undergraduate Academic Services (https://collegeundergrad.ku.edu/), 109 Strong Hall, or in the environmental studies office. Students are strongly encouraged to declare an environmental studies major as soon as possible.

Electives provide the opportunity to specialize, and these can be chosen by consulting the various pathways in the major (https://esp.ku.edu/learning-pathways/), which contain a list of faculty members associated with the pathway who are available to help decide on electives and environmental careers. An elective approval form must be submitted to 109 Strong Hall before a student is allowed to graduate. Forms may be obtained from the environmental studies office. Except for study abroad, a maximum of 8 hours of non-classroom course work may be counted toward electives (e.g., internship or research).

Exceptions and Substitutions

All substitutions must be approved by a student's environmental studies faculty advisor. A student must submit a requirement substitution form to the environmental studies faculty advisor. Forms can be obtained from the environmental studies office.

Internships

Internships allow majors to develop new skills and test their abilities and educational backgrounds. Students can assess their career objectives in professional settings. Internships are done in city, county, state, and federal agencies and in environmental organizations and private companies or agencies. Students are encouraged to participate at the end of the sophomore or junior year. Completion of an internship by the end of the junior year provides an opportunity to make career changes.
and final elective selections before the senior year. It is not possible to participate in an internship after graduation. The applicant must have a grade-point average of 2.5 or above, must have completed 12 hours of required environmental studies courses, and must have a suitable internship opportunity. A maximum of 3 hours may be applied to the 12 hours of required electives.

Professional Science Masters

The Professional Science Masters professional graduate degree is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed or wanting to be employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

The P.S.M. degree is a unique professional degree grounded in natural science, technology, engineering, mathematics and/or computational sciences and designed to prepare students for direct entry into a variety of career options in industry, business, government, or non-profit organizations. P.S.M. programs prepare graduates for high-level careers in science that have a strong emphasis on such skill areas as management, policy, entrepreneurship, communication and project management. P.S.M. programs consist of 2 years of academic training in an emerging or interdisciplinary area, along with a professional component that may include internships and "cross-training" in workplace skills.

Graduate Certificate in Environmental Assessment

The Certificate in Environmental Assessment is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

Graduate Certificate in Environmental Justice

The Certificate in Environmental Justice is designed for graduates of bachelor’s programs in environmental studies or related fields who want to address issues such as social, economic, and political marginalization of minorities and low income populations. Key foci in the curriculum of this program are environmental law, governance, policy and planning, sustainability, development, and political ecology.

For admissions and application information for the P.S.M. and the Graduate Certificates in Environmental Assessment and Environmental Justice, go to the KU Edwards Campus website (https://edwardscampus.ku.edu/professional-science-masters-concentration-environmental-assessment-graduate-certificate/).

Students who are interested in enrolling in graduate level coursework in the Environmental Studies Program without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (https://esp.ku.edu/admissions/) webpage for further details.

Courses

EVRN 103. Environment and History. 3 Credits. H
Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as HIST 103.)

EVRN 140. Global Environment I: The Discovery of Environmental Change. 3 Credits. U LFE
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 140 and HIST 140.)

EVRN 142. Global Environment II: The Ecology of Human Civilization. 3 Credits. U
This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as GEOG 142 and HIST 142.)

EVRN 144. Global Environment I: Discovery of Environmental Change, Honors. 3 Credits. U LFE
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor.

EVRN 145. Global Environment II: The Ecology of Human Civilization, Honors. 3 Credits. U
This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics will include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of
This course is designed for the study of special topics in Environmental Studies. Coursework must be arranged through the Office of Study Abroad. May be repeated for credit if content varies.

EVRN 300. Geographic Adventures in Climate Change. 3 Credits. N

This course considers how climate change is altering particular things such as coffee and chocolate production, the electricity grid and nuclear energy, wild salmon and sharks, rare earth minerals and ice shelves, and many other aspects of life on earth. This course looks at how environmental processes and human systems interact at different spatial scales. This geographic framework is applied to a range of topics to assess climate change impacts as well as approaches to longstanding and emerging problems. Students will identify human systems (cultural, political, economic, justice, technology, etc.) and physical systems (biosphere, atmosphere, lithosphere, cryosphere, ecosystems, etc.). They will assess how human and environmental systems interact and the various spatial scales of these interactions. Students will analyze how climate change is interacting with these systems, their interactions, and spatial implications. Students will demonstrate critical thinking to create possible responses to specific contexts where human-environment interactions are altered by climate change and evaluate the impact of those responses. Student learning outcomes emphasize the demonstration of geographic systems thinking and critical analysis towards solution options. (Same as GEOG 300.)

EVRN 304. Environmental Conservation. 3 Credits. NE N

A survey of current methods of describing and modeling the function, structure, and productivity of natural and anthropogenically modified earth resource systems, along with a discussion of contemporary views of what constitutes a natural landscape. Fundamental natural science principles about the interplay among lithospheric, atmospheric, hydrospheric, and biospheric components of earth systems are emphasized. Uses of natural resources, including fossil fuels, minerals, and water, are described with attention to the earth's total energy budget. Human activities that affect preservation, conservation, and multiple uses of earth regions receive attention. Systems under stress through population and other contemporary forces serve as examples. (Same as GEOG 304.)

EVRN 306. Global Environmental Literature. 3 Credits. H

An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as ENGL 306 and GIST 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

EVRN 320. Environmental Policy Analysis. 3 Credits. N

An historical and analytical study of the formulation, implementation, and consequences of environmental policy in the United States. Attention will be directed at relevant interest groups, issues specific to both rural and urban populations, relationships between national policies and international organizations concerned with environmental problems. Prerequisite: EVRN 140/GEOG 140/HIST 140 or EVRN 142/GEOG 142/HIST 142; or EVRN 144/GEOG 144/HIST 144 or EVRN 145/GEOG 145/HIST 145; or EVRN 148/GEOG 148; or concurrent enrollment.

EVRN 330. Sculpture Intercepting the Waste Stream. 3 Credits. N

An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art.) Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same
as SCUL 330.) Prerequisite: Visual Art major or minor, or instructor permission.

**EVRN 332. Environmental Law. 3 Credits. U**
An introduction to how the American legal process improves, transforms, and damages the natural environment. Emphasizes and compares shifting responsibilities of legal forces and institutions; judges and litigants, legislators and statutes, agencies and administrations, and citizens and regulated entities. Prerequisite: EVRN 140/GEOG 140/HIST 140 or EVRN 142/GEOG 142/HIST 142; or EVRN 144/GEOG 144/HIST 144 or EVRN 145/GEOG 145/HIST 145; or EVRN 148/GEOG 148; or concurrent enrollment.

**EVRN 335. Introduction to Soil Geography. 4 Credits. N LFE**
This course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body; genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between solid, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken EVRN 535 or GEOG 535. (Same as GEOG 335.) Prerequisite: GEOG 104 or GEOL 101 or consent of instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended.

**EVRN 336. Ethics, Ideas and Nature. 3 Credits. H**
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state in managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and rights ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent in human-centered environmental ethics and nature-centered environmental ethics. (Same as HIST 336.)

**EVRN 338. Permaculture Design. 6 Credits. N**
Students learn how a local, sustainable design system known as permaculture design creates an ecologically sound and economically viable way of living. The course consists of lecture, field, and practicum sessions. Lecture topics include food security, permaculture ethics, ecological principles, system design, sustainable soils, food production, food forests, earth works, and construction of human habitats.

**EVRN 347. Environmental History of North America. 3 Credits. H**
A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialization, urbanization, and such technologies as the automobile and the origins of conservation. (Same as HIST 347.)

**EVRN 350. Global Environmental Justice. 3 Credits.**
Drawing on interdisciplinary fields of study, this course surveys a wide range of situated environmental injustices and environmental justice movements associated with toxic dumping, oil extraction and mining, climate change, deforestation, agri-business, and tourism. As students gain an understanding of the connections and differences among specific situations, and between environmental justice and other forms of environmentalism, they engage with salient theoretical and practical questions. The content of the course will also be shaped by the interests of students. For example, each student will present on an environmental justice movement of her/his own choosing, on the connections between it and other movements we have been studying, and on the ways this movement can help us understand some of the key practical and theoretical questions raised by environmental justice struggle. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in EVRN 650. Prerequisite: EVRN 140 or EVRN 142 or EVRN 144 or EVRN 145 or EVRN 336; or permission of instructor.

**EVRN 360. Environmental Solutions. 1 Credits. NE N LFE**
These labs are designed to explore the physical, social, and cultural dimensions of environmental systems. Students will engage in hands-on activities and field experiences about a range of current and historical environmental issues affecting both the United States and other parts of the world. This course will broaden your understanding of important foundational concepts and skills including basic scientific principles and processes that govern the functioning of environmental systems, ways to apply this understanding to case studies and field experiences, and how to use these perspectives to eventually make informed, just decisions about climate change, the future flourishing of humans and non-humans. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students with credit in EVRN 160. Prerequisite: This course requires previous or concurrent enrollment in EVRN 140/144 (or cross-listed and transfer equivalents).

**EVRN 361. Environmental Solutions, Honors. 1 Credits. NE N LFE**
These labs are designed to explore the physical, social, and cultural dimensions of environmental systems. Students will engage in hands-on activities and field experiences about a range of current and historical environmental issues affecting both the United States and other parts of the world. This course will broaden your understanding of important foundational concepts and skills including basic scientific principles and processes that govern the functioning of environmental systems, ways to apply this understanding to case studies and field experiences, and how to use these perspectives to eventually make informed, just decisions about climate change, the future flourishing of humans and non-humans. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students with credit in EVRN 160. Prerequisite: This course requires previous or concurrent enrollment in EVRN 140/144 (or cross-listed and transfer equivalents).

**EVRN 362. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N**
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as SCUL 362.) Prerequisite: Visual Art major or minor, or instructor permission.

**EVRN 363. Introduction to Environmental Hydrology and Water Resources. 3 Credits. N**
Water is vital to life on earth. In this course we cover components of the water or "hydrologic" cycle, how management has altered them, and how they are predicted to change with the changing climate. We discuss the evolution of water policy, its implications for managements and the economic impact of human perturbation on water. We study the physical processes that govern the water cycle, learn how they are measured, and estimate hydrologic fluxes. (Same as GEOG 336.) Prerequisite: GEOG 104 or GEOL 101.

**EVRN 365. Invention of the Tropics. 3 Credits. H**
This course surveys the history of the tropical environment and its diverse peoples from early European encounters until the current boom in extractivism and ecotourism. It focuses on portrayals of the tropics in
historical travel accounts and films. Through these sources, we will seek to understand cross-cultural interactions, and the ways in which science, technology, and tourism have reconstructed these environments over time. Case studies are drawn from Latin America, Africa, Oceania, and/or Asia. (Same as HIST 365.)

EVRN 371. Environmental Geopolitics. 3 Credits. S
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as GEOG 371 and GIST 371.)

EVRN 372. Religion and the Environment in the United States. 3 Credits. HR H
This class examines the variety of ways religious and environmental attitudes intersect in US culture, and how religious traditions can be (and have been) used both to alienate people from the environment and to foster an ethic of environmental responsibility. The course will focus on appreciating the diversity within and across religious traditions when it comes to attitudes on the environment, and understanding the different contexts and assumptions that lead to such diversity. Amidst all this diversity, similarities will also be noted in how people from all different backgrounds are drawing on the resources of their religious traditions to promote more sustainable ways of being. (Same as REL 372.)

EVRN 374. Vulnerability and Adaptation. 3 Credits. S
The course objective is to understand and analyze human adaptation to environmental change by focusing on disasters and climate change. Each semester, the course rotates topics ranging from oil spills, hurricanes, sea-level rise to infectious disease. It provides undergraduate students with research experience and service learning, and offers opportunities for certificates through the Center for Undergraduate Research and the Center for Civic and Service Responsibility at KU. Students learn theories relevant to the case study, work in groups to generate research themes, conduct literature search and review, learn research methods, and write and present their work.

EVRN 375. Radical Environmentalism in the United States. 3 Credits. H
This course will focus on the historical context of radical environmentalism in late-twentieth-century America, including an examination of organizations such as Earth First!, but it will also focus more broadly on American ideas in the 1900s that contributed to the rise of a dissident environmental consciousness. It will focus primarily, though not solely, on the period after World War II, and it will examine time periods such as the Cold War, the countercultural 1960s, and so-called "environmental decade of the 1970s," and the Reagan 80s and beyond. It will touch upon many themes, such as the relationship between science, technology, and ethics; the controversies over population growth and economic growth; the morality or immorality of economically and politically destructive environmental actions; the philosophical underpinnings of radical animal rights organizations; and the place of people of color and the poor within the radical environmentalist tradition.

EVRN 377. Resilient and Resistant Futures: Global Perspectives in Climate Change Literature. 3 Credits. H
Climate change presents a contemporary crisis that literature, broadly defined, increasingly grapples with, and so much so, that scholars now refer to "cli-fi," or literature that examines the impacts of human-caused climate change during the Anthropocene. These impacts will be experienced disproportionately, and the social inequalities that will continue to emerge raise questions about justice and responsibility. In this class, we will examine novels, films, short stories, and non-fiction essays that offer global perspectives on the climate crisis. The texts use narrative techniques to shape our conceptions of global warming and just or unjust futures. We will address debates surrounding ethical human-non-human interactions and will reflect on the social and geopolitical conflicts that are heightened by climate change.

EVRN 384. Environment, Power, and Justice. 3 Credits.
This course is focused on the relationships between human beings and the planet (the environment, resources, places). We explore the major insights of sociology (primarily how to understand power and inequality) and apply them to our relationship with climate change, environmental justice, water, land, soil, food, viruses, animals, each other, and the future. Using the concept of the sociological imagination that connected one's biography with one's historical and class context as a starting point, this course expands C. Wright Mills' foundational insight to incorporate both the background knowledge of environmental relationships between society and the planet. This course also builds a research skillset to understand, debate, and develop them at the same time. Skill-building assignments develop research skills related to library searching, research question formation, assessing and using valid sources, sociological observation, interviewing, and data analysis. Combined with a diverse set of readings, we explore the social, cultural, political, legal, and ethical debates that shape the contemporary and unfolding environmental issues. Topics may include environmental justice, environmental social movements, science communication, sustainability, biodiversity, environmental ethics, policy, land use change, and greenwashing. (Same as SOC 384.)

EVRN 385. Environmental Social Problems. 3 Credits. S
This course introduces key concepts in environmental sociology. The core goal of environmental sociology is to understand the relationship between society and the planet. Environmental sociology explores the relationships between social systems and the ecosphere, including interdisciplinary work that explores interactions within and between institutions, social groups, and natural and built environments. Environmental Sociology also includes study of the origins and impacts of technology, the social causes of environmental change, the environmental causes of social change, and the consequences of social inequalities and power relationships for socio-environmental dynamics. As human beings we live in the natural world and use its resources including the air, soil and water, yet we often separate ourselves from nature. Environmental sociology opens a dialogue between people and nature that will be explored through readings, discussion and assignments related to important environmental issues in Kansas and beyond, including climate change, energy production and consumption, material inequality, environmental justice, transportation, food and agriculture, and ethical frameworks. In particular this course uses sociological theory and sociological environmental research to illuminate the identification, evolution, and potential solution pathways to environmental social problems. (Same as SOC 385.)

EVRN 386. Sociology of Global Food. 3 Credits. U
The Sociology of Global Food offers a critical examination of the global food system since the Industrial Revolution. Topics include the industrialization of agriculture, sustainable agriculture, and the role of food and agriculture in organizing society. This course discusses the emergence of current debates around food and agriculture including food activism, technological developments, human/environment relationships, and labor issues. There is a lab component to this course. (Same as SOC 386.) Prerequisite: Junior standing.

EVRN 390. Disaster and Culture. 3 Credits.
This class explores representations of environmental disasters within various forms of cultural expression. Cultural beliefs and practices not only influence the ways environmental disasters are understood.
and responded to, but also shape the social dynamics that determine a population's vulnerability and resilience to hazards. Thus, while an earthquake may trigger a disaster, its impact largely will be influenced by social factors that pre-date the actual seismic event. The course will apply cultural materials (e.g., film, science writing, literature, policy statements, etc.) that emerge from specific case studies to analyze the social causes and effects of disaster, while drawing on an interdisciplinary set of tools and perspectives (from sociology, literary studies, science, economics, etc.) that animates inquiry.

EVRN 400. Study Abroad Topics in: ______. 1-5 Credits. U
This course is designed for the study of special topics in Environmental Studies. Coursework must be arranged through the Office of Study Abroad. May be repeated for credit if content varies.

EVRN 405. Kansas Power. 3 Credits.
Where does our energy come from? How can we optimize our use of renewable and nonrenewable sources of energy? What are the drivers moving us to more renewable sources of energy? What are the impediments? In this course we will explore the use of fossil fuels, nuclear, wind, geothermal and solar energy in Kansas. We will visit nearby power plants, and alternative energy companies. Students will be expected to design an energy plan for a local entity, and present their ideas. Prerequisite: EVRN 140 and EVRN 142.

EVRN 410. Environmental Applications of Geographic Information Systems. 3 Credits. N
An introduction to the use, display, and analysis of spatial data. Students will acquire a foundational skill-set in geographic information systems and remote sensing using industry-standard GIS software and will apply these skills using environmental data and case studies. Prerequisite: EVRN 148 or GEOG 148; EVRN 103 or HIST 103, EVRN 150 or GEOG 150 or EVRN 347 or HIST 347.

EVRN 412. Ecology: Fundamentals and Applications. 3 Credits.
An introduction to the principles of ecology, with an emphasis on environmental applications. Major topics include physiological and functional ecology, population and community dynamics, biogeography, and ecosystems ecology. Intended for students seeking B.A. or B.G.S. degrees. Prerequisite: EVRN 140 or EVRN 144 or EVRN 148 or consent of the instructor.

EVRN 414. Principles of Ecology. 3 Credits. N
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as BIOL 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

EVRN 420. Topics in Environmental Studies: ______. 1-6 Credits. N LFE
Courses on special topics in Environmental Science and/or Policy. These courses may be lecture, discussions, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once.

EVRN 440. Soil Science for Environmental Assessment. 3 Credits. NE N
This course provides students with a solid understanding of soils in the environment, particularly as it relates to environmental assessment. Topics include soil geomorphology, soil physics/chemistry/biology, management of soils, and soil contaminants. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 740. Prerequisite: CHEM 130 or CHEM 170 or CHEM 190 recommended or consent of the instructor.

EVRN 445. Introduction to Environmental Health. 3 Credits.
This course is designed to provide a foundation for understanding how the natural and built environment affect human health in industrialized and developing countries by examining the impact of physical, chemical, and biological factors external to humans. Students will gain an understanding of the interaction of individuals and communities with the environment, the potential impact on health of environmental agents, and specific applications of concepts of environmental health. (Same as HSCI 445.)

EVRN 450. Epidemics, Pandemics, and Pestilence. 3 Credits.
This course examines origins, responses, and consequences of major epidemics and pandemics that have affected humanity over time. Spanning from antiquity to present day, this global survey investigates environmental and biological origins of disease, the role of commerce, urbanization, and transportation in the spread of disease, and responses to controlling disease and pandemics. Key diseases and epidemics covered include plague, smallpox, malaria, cholera, influenza, typhus, typhoid, leprosy, and tuberculosis. (Same as HSCI 450.)

EVRN 451. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 451 and GEOG 451.)

EVRN 453. Community Resilience. 3 Credits.
This applied research course approaches resilience from a community and regional perspective. Defined broadly and proactively, resilience integrates and mutually-strengthens natural and human systems to capitalize on nature's regenerative potential. Resilient communities can stand against nature in times of crisis, adapt to changing conditions, and are more efficient, livable, prosperous, and sustainable. Students will identify resilience approaches through directed readings, case study research, and presentations by subject matter experts. Teams will then survey and prioritize the challenges and opportunities facing real-world communities, apply and expand a resilience framework to grade the communities, and develop a screening-level resilience plan for community use. In doing so, students will: 1) Understand and apply resilience concepts and theories; 2) Identify and prioritize natural and human-made threats and challenges facing Great Plains and Midwestern U.S. communities over short- and long-term horizons; 3) Assess community capital stocks and resilience properties; 4) Compile research on resilient communities and develop tools and strategies; 5) Engage key community stakeholders; and 6) Develop and apply a vulnerability assessment and resilience framework for real-world application. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to freshmen or sophomores, or students with credit in EVRN 753.

EVRN 460. Field Ecology. 3 Credits. N LFE
An introduction to research methods for environmental science. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). It emphasizes the development of skills in data analysis and interpretation that are essential to a full understanding of environmental issues. Enrollment limited to environmental studies majors, or by instructor permission. Prerequisite: Junior or Senior standing, completion of the natural sciences requirement of the KU Core (GE3N), and either EVRN 320 or EVRN 332.

EVRN 490. Environmental Studies Internship. 1-4 Credits. N
Supervised practical experience in an environmental area relevant to the student's career goals. The internship must include opportunity to apply knowledge and skills from diverse disciplines, and require a minimum of 150 hours of work during the semester. At the start of the semester the student will work with the internship supervisor and instructor to prepare a written description of the expectations and educational goals of the internship. Course assignments will be individualized, designed to be relevant to the internship and the student's learning goals. The instructor will schedule regular evaluations to evaluate progress. At the end, the student will prepare a written reflection on their experience and the supervisor will be asked to provide an evaluation of the student's internship performance. Prerequisite: Junior standing and consent of program director. Restricted to declared Environmental Studies majors.

EVRN 491. Capstone Internship. 3 Credits. N
Supervised practical experience in an environmental area relevant to the student's career goals. The internship must include opportunity to apply knowledge and skills from diverse disciplines, and require a minimum of 150 hours of work during the semester. At the start of the semester the student will work with the internship supervisor and instructor to prepare a written description of the expectations and educational goals of the internship. Course assignments will be individualized, designed to be relevant to the internship and the student's learning goals. The instructor will schedule regular evaluations to evaluate progress. At the end, the student will prepare a written reflection on their experience and the supervisor will be asked to provide an evaluation of the student's internship performance. Prerequisite: Junior standing and consent of program director. Restricted to declared Environmental Studies majors.

EVRN 498. Kansas Road Trip. 1 Credits.
Kansas Road Trip (Part 1 of the Kansas Abroad Program) will allow students to explore the state as an environmental studies “living laboratory.” This course provides an immersive and hands-on look at the state’s reliance on environmental resources, creative and entrepreneurial solutions, and space for students to develop research skills related to Kansas' environmental future. The trip will include visit with key decision makers and innovators and explore unique environmental features. With an emphasis on urban and rural relationships and the story of how soil and water lead to wealth in Kansas, the Kansas Abroad program offers students a chance to explore and encounter differences within the state and leverage those experiences into knowledge. Students will build skills in interviewing, listening and developing research questions on the future of Kansas, and the role people in shaping it. Prerequisite: EVRN 140 and 142 or equivalents and a full academic year as an EVRN major.

EVRN 499. Kansas Environmental Futures. 2 Credits.
Kansas Environmental Futures (Part 2 of the Kansas Abroad Program) asks: What will the future of Kansas' environment look like? To that end, this course (following the completion of the two-week road trip) offers a research-based experience where students select a specific environmental theme to research for the semester. The project concludes with a written document and public presentation. Students will develop research and interviewing skills, expertise in an interdisciplinary environmental topic, public presentation skills, and demonstrate capstone-level integration of diverse kinds of evidence into a coherent argument related to their topic. With an emphasis on urban and rural relationships and the story of how soil and water lead to wealth in Kansas, the Kansas Abroad program offers students a chance to explore and encounter differences within the state and leverage those experiences into knowledge. Students will build skills in interviewing, listening and developing research questions on the future of Kansas, and the role of people in shaping it. Prerequisite: EVRN 498.

EVRN 510. Advanced Environmental Applications in Geospatial Techniques. 3 Credits. H/N
This course focuses on applying advanced geospatial mapping and analysis techniques to "real-world" environmental issues. Course content may include lecture/lab time on advanced geospatial topics; a major class project, small-group projects, or individual projects; or half-semester internships with state agencies or campus entities that will culminate in an individual project. The specific nature of projects will be driven largely by student interest and ability, as well as agency/center needs. Prerequisite: EVRN 410 or equivalent course; or permission of the instructor.

EVRN 528. Environmental Justice and Public Policy. 3 Credits. S
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several different public policy areas that have been impacted by the environmental justice movement: hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as POLS 528.) Prerequisite: POLS 306, or a statistics class, or consent of instructor.

EVRN 530. Biodiversity Discovery and Assessment. 2 Credits. N
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as BIOL 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

EVRN 531. Tropical Fieldwork in Biodiversity Discovery. 1 Credits. U
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as BIOL 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged.

EVRN 535. Soil Geography. 4 Credits. N LFE
A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as GEOG 535.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended.

EVRN 536. Environmental Remote Sensing. 3 Credits. NE
Covers fundamentals of remote sensing, including electromagnetic radiation principles and data collection and processing, followed by an introduction to the various remote sensing techniques and their application in understanding and managing environmental systems. Exercises are provided for students to be actively involved in evaluating, critically analyzing and interpreting images and data to determine implications for practice. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 736. Prerequisite: Junior or Senior standing.

EVRN 537. Water Resource Sustainability. 3 Credits. NE
Provides a framework for learning about our water future and ways we might define and achieve sustainability in water use and management. Concerns of ethics, culture, economics, politics, and environmental health will be discussed within the contexts of issues such as the global water crisis, water footprints, water pollution, human water systems, water security, and sustainable water technologies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 737. Prerequisite: Junior/senior standing.

**EVRN 540. Ecohydrology. 3 Credits. N**

Ecohydrology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key concepts, methodological approaches and analytical techniques utilized in ecohydrology to understand and quantify: plant water use, evolution of hydrologic properties, groundwater-surface water interactions, controls on landscape patterns, spatial and temporal patterns of soil moisture and nutrient concentrations, and vegetation competition. Students should leave the class having developed critical skills in: 1) reviewing scientific literature, 2) collecting environmental samples, 3) analyzing ecohydrologic data, 4) writing a scientific research paper, 5) working collaboratively and independently. (Same as GEOG 540.) Prerequisite: GEOG 104 or GEOL 101 or EVRN 363 or GEOG 336 or permission of instructor.

**EVRN 542. Ethnobotany. 3 Credits. S**

Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as ANTH 582 and ISP 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor.

**EVRN 543. Natural Hazards and Environmental Risks. 3 Credits. NE**

This course investigates the geophysical processes of the earth-atmospheric system that can create disastrous impacts on human life, society, and economics. Hazards, including earthquakes, tsunamis, floods, hurricanes, mass movements, wildfires, and many others, are examined by analyzing spatial and temporal dynamics as well as any precursory indicators that may be present. Attention is also given to management and mitigation strategies. Case studies are utilized to examine interaction between society and natural hazards. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 743. Prerequisite: Junior/senior standing.

**EVRN 545. Advanced Environmental Health. 3 Credits.**

This course will build upon principles acquired in the introductory course by presenting advanced concepts on environmental health as novel factors that may constitute a risk to humans. The course provides an advanced understanding of concepts and issues of environmental health, including environmental toxicology and risk assessment, and an in-depth study of urban and rural environmental health issues and agents of environmental health impairment. Students will develop a research project or investigation of an environmental health topic. (Same as HSCI 545.) Prerequisite: HSCI 445 or EVRN 445 or consent of instructor.

**EVRN 550. Environmental Economics. 3 Credits. U**

This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as ECON 550.) Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143.

**EVRN 555. Energy and Environment. 3 Credits. NE**

This interdisciplinary course provides students with a broad understanding of the current energy system, including its challenges, with focus on changing global energy needs, current energy sources, developing and emerging renewable energy sources, and their economic, environmental, and societal implications. Analysis of energy fundamentals, fossil fuel exploration and use, nuclear energy, renewable energy sources, and subsequent environmental impacts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 755. Prerequisite: Junior/senior standing.

**EVRN 563. U.S. Environmental Thought in the 20th Century. 3 Credits. H**

Explores both leading and dissident ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as HIST 563.) Prerequisite: EVRN 148 or HIST 129, or by permission of instructor.

**EVRN 577. The Andean World. 3 Credits. H**

The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as HIST 577, ISP 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

**EVRN 611. Water Quality, Land Use, and Watershed Ecosystems. 3 Credits. N**

Water quality issues are integrated with land use planning and the development of watershed management strategies. Interrelationships among the hydrologic cycle, atmospheric deposition, nutrient transformations and pesticide use are examined in regards to stream, lake, and groundwater quality. Prerequisite: CHEM 110 or CHEM 130 and BIOL 414, or consent of instructor.

**EVRN 615. Capstone Project. 3 Credits. N**

The capstone project provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their environmental studies major. It rejoins the cohort that has separately pursued the BA/BGS and BS tracks and places them in situations in which they address real world environmental issues with a team approach and produce professionally
meaningful analytical reports. Prerequisite: Junior standing; EVRN 320, EVRN 332, and EVRN 460. Restricted to declared Environmental Studies majors.

**EVRN 616. Environmental Impact Assessment. 3 Credits. N**
This course provides an overview of environmental laws and regulations. Additional focus is given to the process described in the National Environmental Policy Act (NEPA). Students will learn when NEPA is triggered, the difference between Environmental Impact Statements (EIS) and Environmental Assessments (EIA), and how to write an EIS/EIA. Prerequisite: An introductory course in environmental law, or consent of instructor.

**EVRN 620. Environmental Politics and Policy. 3 Credits. S**
Analysis of environmental politics and the formulation and implementation of environmental policy. Examines the history and development of environmental politics as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as POLS 624.)

**EVRN 624. Independent Study. 1-9 Credits. N**
A research course, in any of the fields of environmental studies, consisting of either experimental research, original policy analysis, or the preparation of an extensive paper based on library investigation. Project topic to be agreed upon in advance with supervising faculty member. Prerequisite: Consent of instructor.

**EVRN 625. Honors Research in Environmental Studies. 3 Credits. N**
A course giving eligible majors the opportunity to earn Departmental Honors by engaging in an intensive program of study leading to an original piece of research. Prerequisite: Senior standing, approval of the Environmental Studies Program, the Honors Project Director, and an overall 3.25 cumulative grade point average during the semester of enrollment. Restricted to declared Environmental Studies majors.

**EVRN 628. The Politics of Public Health. 3 Credits. S**
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation's public health, explore the role of government in reducing risk and promoting well being, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as POLS 628.) Prerequisite: POLS 110 and POLS 306 are recommended.

**EVRN 630. Sculpture Intercepting the Waste Stream. 3 Credits. N**
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on the waste stream and natural resources, local ecologies and cultural traditions and beliefs of Indigenous peoples and communities. Prerequisite: EVRN 140 and EVRN 142; or EVRN 144 and EVRN 145.

**EVRN 645. Native and Western Views of Nature. 3 Credits.**
This course emphasizes comparison of the attitudes and perspectives towards the natural world that have been developed by different cultural traditions. The primary example with which most of us are familiar is the contemporary Western attitude which emerges from traditions derived from Western European philosophy, i.e. the assumption that humans are autonomous from, and in control of, the natural world. A different approach is presented by Traditional Ecological Knowledge (TEK) of Indigenous peoples of the world, which are based on close observation of nature and natural phenomena; combined with a concept of community membership, which differs from that of Western political and social thought. Prerequisite: EVRN 140 and EVRN 142; or EVRN 144 and EVRN 145.

**EVRN 650. Global Environmental Justice. 3 Credits.**
Drawing on interdisciplinary fields of study, this course surveys a wide range of situated environmental injustices and environmental justice movements associated with toxic dumping, oil extraction and mining, climate change, deforestation, agri-business, and tourism. As students gain an understanding of the connections and differences among specific situations, and between environmental justice and other forms of environmentalism, they engage with salient theoretical and practical questions. The content of the course will also be shaped by the interests of students. For example, each student will present on an environmental justice movement of her/his own choosing, on the connections between it and other movements we have been studying, and on the ways this movement can help us understand some of the key practical and theoretical questions raised by environmental justice struggle. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in EVRN 350. Prerequisite: EVRN 140 or EVRN 142 or EVRN 144 or EVRN 145 or EVRN 336; or permission of instructor.

**EVRN 660. Summer Field Ecology. 3 Credits. N**
An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as BIOL 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N).

**EVRN 662. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N**
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as SCUL 630.) Prerequisite: Graduate standing or permission of instructor.

**EVRN 673. Environmental Justice. 3 Credits. NW U**
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping, and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. (Same as ISP 673.) Prerequisite: Permission of instructor.

**EVRN 700. The Anthropocene: Interdisciplinary Perspectives on Environmental Change. 3 Credits.**
Have human activities become so pervasive that we have initiated a unique human epoch of earth history? This introductory, interdisciplinary graduate seminar will explore this question while examining the ways that different disciplines approach the understanding of environmental change, its impact on natural and human systems, and how these understandings have changed over time.

**EVRN 701. Climate Change, Ecological Change and Social Change.** 3 Credits.
This interdisciplinary graduate seminar examines the history of climate change from natural and physical science, social science, and humanities perspectives. The class explores the ways that different disciplines approach understanding climate change and its impact on natural and human systems and how these understandings have changed over time. The course is team-taught. Students will write a research paper on a climate change topic of their choice that reflects the historical and interdisciplinary approaches of the seminar. Prerequisite: Consent of instructor.

**EVRN 720. Topics in Environmental Studies:** _____. 1-6 Credits.
Courses on special topics in Environmental Studies. These courses may be lecture, seminars, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once.

**EVRN 721. Environmental Regulation and Policy.** 3 Credits.
This course provides a survey of the environmental regulations, environmental problems, and environmental solutions that must be dealt with by environmental scientists in agencies and industry. Considers both theoretical and practical/applied aspects of environmental practices.

**EVRN 725. Environmental Security.** 3 Credits.
This course examines environmental issues, concerns, and policy as they relate to security through the framework of geopolitics. National security and conflict are increasingly discussed in relation to the environment, such as concerns regarding environmental change as well as stresses and demands on natural resources, e.g., water, energy, deforestation, desertification. The course will examine key contributions to the environmental security, resource conflicts, climate security and related literatures.

**EVRN 730. Environmental Toxicology.** 3 Credits.
Examines the effects of toxic chemicals on individuals, populations, communities and ecosystems. Topics include major classes of pollutants, movement, distribution and fate of pollutants in the environment, mechanisms of action, toxicity testing, and environmental assessment.

**EVRN 735. Scientific Communication.** 3 Credits.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as BIOL 735.)

**EVRN 736. Environmental Remote Sensing.** 3 Credits.
Covers fundamentals of remote sensing, including electromagnetic radiation principles and data collection and processing, followed by an introduction to the various remote sensing techniques and their application in understanding and managing environmental systems. Exercises are provided for students to be actively involved in evaluating, critically analyzing and interpreting images and data to determine implications for practice. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 536. Prerequisite: Graduate standing.

**EVRN 737. Water Resource Sustainability.** 3 Credits.
Provides a framework for learning about our water future and ways we might define and achieve sustainability in water use and management. Concerns of ethics, culture, economics, politics, and environmental health will be discussed within the contexts of issues such as the global water crisis, water footprints, water pollution, human water systems, water security, and sustainable water technologies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 537. Prerequisite: Graduate standing.

**EVRN 740. Soil Science for Environmental Assessment.** 3 Credits.
Provides students with a solid understanding of soils in the environment, particularly as it relates to environmental assessment. Topics include soil geomorphology, soil physics/chemistry/biology, management of soils, and soil contaminants. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 440. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor.

**EVRN 743. Natural Hazards and Environmental Risks.** 3 Credits.
This course investigates the geophysical processes of the earth-atmospheric system that can create disastrous impacts on human life, society, and economics. Hazards, including earthquakes, tsunamis, floods, hurricanes, mass movements, wildfires, and many others, are examined by analyzing spatial and temporal dynamics as well as any precursory indicators that may be present. Attention is also given to management and mitigation strategies. Case studies are utilized to examine interaction between society and natural hazards. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 543. Prerequisite: Graduate standing.

**EVRN 745. Environmental Data Analysis and Statistics.** 3 Credits.
Survey of common statistical methods for analyzing environmental data. Includes techniques for environmental monitoring, impact assessment, and site reclamation, as well as methods for handling censored data, time series, and spatial analysis. Sampling design, data interpretation, and presentation of statistical results will be emphasized. Prior coursework or practical experience in statistics is expected. Prerequisite: Permission of instructor.

**EVRN 747. Fluvial Geomorphology.** 3 Credits.
This course develops an understanding of the research processes as applied to river systems by means of qualitative and quantitative research methods and approaches to solve problems. Applications of fluvial principles to river management and stream restoration are examined, as well as interactions between land use and geomorphic processes. Prerequisite: Graduate standing.

**EVRN 748. Wetland Delineation.** 3 Credits.
This course provides training in the technical guidelines for the wetland delineation process as specified by the United States Army Corp of Engineers (USACE). This process includes a site investigation to determine field indicators of hydric vegetation, wetland hydrology, and hydric soils for wetland determination and delineation, and the compilation of data and site mapping to create a wetland delineation technical report. Students must find an accessible wetland area near their location for the site visits that are required for this course. Prerequisite: Graduate standing or consent of the instructor.

**EVRN 750. Environmental Air Quality Assessment.** 3 Credits.
Addresses scientific, regulatory, and technical aspects of air quality monitoring, including pollutant formation and dispersion, pollution control, national emissions standards, and methods for monitoring pollutants.
and air quality. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor.

**EVRN 751. Ecosystems Stewardship. 3 Credits.**
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 759 and GEOG 759.)

**EVRN 753. Community Resilience. 3 Credits.**
This applied research course approaches resilience from a community and regional perspective. Defined broadly and proactively, resilience integrates and mutually-strengthens natural and human systems to capitalize on nature’s regenerative potential. Resilient communities can stand against nature in times of crisis, adapt to changing conditions, and are more efficient, livable, prosperous, and sustainable. Students will identify resilience approaches through directed readings, case study research, and presentations by subject matter experts. Teams will then survey and prioritize the challenges and opportunities facing real-world communities, apply and expand a resilience framework to grade the communities, and develop a screening-level resilience plan for community use. In doing so, students will: 1) Understand and apply resilience concepts and theories; 2) Identify and prioritize natural and human-made threats and challenges facing Great Plains and Midwestern U.S. communities over short- and long-term horizons; 3) Assess community capital stocks and resilience properties; 4) Compile research on resilient communities and develop tools and strategies; 5) Engage key community stakeholders; and 6) Develop and apply a vulnerability assessment and resilience framework for real-world application. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to freshmen or sophomores, or students with credit in EVRN 453.

**EVRN 755. Energy and Environment. 3 Credits.**
This interdisciplinary course provides students with a broad understanding of the current energy system, including its challenges, with focus on changing global energy needs, current energy sources, developing and emerging renewable energy sources, and their economic, environmental, and societal implications. Analysis of energy fundamentals, fossil fuel exploration and use, nuclear energy, renewable energy sources, and subsequent environmental impacts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 555.

**EVRN 760. Soil Ecology & Restoration. 3 Credits.**
This course reviews the scientific principles of environmental restoration, focusing on soil biological processes. It introduces concepts of soil ecosystem structure and functions, including soil biodiversity, nutrient cycling, plant-soil interactions, and soil ecosystem response to disturbance and degradation. The understanding of processes in the soil system will be used to inform our review of practices that can be used to restore naturally and anthropogenically disturbed sites in a wide range of environments. Prerequisite: Graduate standing or consent of the instructor.

**EVRN 814. Professional Science Masters Environmental Assessment Capstone I. 1 Credits.**
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student’s place of employment for full-time employees, or an internship or similar individual project for full-time students or students who are not employed in the area of study. This course will initiate the process of project development and will be taken prior to a student’s final semester. This project is to be continued in EVRN 815 in the last semester of the student’s graduate career. Prerequisite: Minimum 20 credit hours completed in program.

**EVRN 815. Professional Science Masters Environmental Assessment Capstone II. 2 Credits.**
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student’s place of employment for full-time employees, or an internship or similar individual project for full-time students or students who are not employed in the area of study. This course will initiate the process of project development and will be taken prior to a student’s final semester. This project is to be continued in EVRN 815 in the last semester of the student’s graduate career. Prerequisite: Minimum 20 credit hours completed in program.

**EVRN 915. Capstone. 3 Credits.**
The goal of this research seminar is to discuss individual students’ research, culminating in the completion of a paper in Environmental Studies for presentation at a professional meeting and/or publication in a professional journal.

**Bachelor of Arts and Bachelor of General Studies in Environmental Studies**

**Why study environmental studies?**
The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous interdisciplinary degree that balances learning in the physical and social sciences along with the arts and humanities. Learning Pathways (https://esp.ku.edu/learning-pathways/), thematic areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.

**Undergraduate Admission**

**Admission to KU**
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.
Requirements for the B.A. or B.G.S. Major

Environmental Studies Introduction to Science and Culture
Majors must complete the following:

- EVRN 140 Global Environment I: The Discovery of Environmental Change 3
- or EVRN 144 Global Environment I: Discovery of Environmental Change, Honors

- EVRN 142 Global Environment II: The Ecology of Human Civilization 3
- or EVRN 145 Global Environment II: The Ecology of Human Civilization, Honors

- EVRN 160 Environmental Solutions 1
- EVRN 336 Ethics, Ideas and Nature (Environmental Social Science and Policy) 3

Statistics. Satisfied by one of the following: 3-4
- MATH 365 Elementary Statistics
- GEOG 316 Methods of Analyzing Geographical Data
- BIOL 370 Introduction to Biostatistics

Environmental Studies Core Knowledge and Skills
Majors must complete a course in each of the following areas:

- Environmental Social Science and Policy Satisfied by: 3
  - EVRN 320 Environmental Policy Analysis
  - EVRN 371 Environmental Geopolitics
  - EVRN 384 Environmental, Power, and Justice
  - EVRN 385 Environmental Social Problems
  - EVRN 386 Sociology of Global Food
  - EVRN 528 Environmental Justice and Public Policy
  - EVRN 537 Water Resource Sustainability
  - EVRN 542 Ethnobotany
  - EVRN 543 Natural Hazards and Environmental Risks

Environmental Humanities and Arts Satisfied by: 3
- EVRN 306 Global Environmental Literature
- EVRN 330 Sculpture Intercepting the Waste Stream
- EVRN 332 Environmental Law
- EVRN 347 Environmental History of North America
- EVRN 362 Art and Ecology: Inhabiting the Ecosphere
- EVRN 375 Radical Environmentalism in the United States
- EVRN 377 Resilient and Resistant Futures: Global Perspectives in Climate Change Literature
- EVRN 563 U.S. Environmental Thought in the 20th Century
- EVRN 630 Sculpture Intercepting the Waste Stream
- EVRN 662 Art and Ecology: Inhabiting the Ecosphere

Field Ecology. Satisfied by: 3
- EVRN 460 Field Ecology
- or EVRN 660 Summer Field Ecology

Capstone Experience. Satisfied by one of the following: 3-6
- EVRN 491 Capstone Internship
- EVRN 615 Capstone Project
- EVRN 624 Independent Study
- or EVRN 625 Honors Research in Environmental Studies (Completion of EVRN 624 AND 625 required for Capstone experience.)

Environmental Studies Required Electives/Options
Majors must select an option or design their own. Self-designed emphases must be approved in entirety by an environmental studies advisor and the undergraduate studies director before implementation. Each option requires 5 courses at the 300+ level. Students completing the honors capstone sequence (EVRN 624 & EVRN 625) may count 3 hours of that sequence toward the elective requirement.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**
  - Satisfied by 40-41 hours of major courses.

- **Major Hours in Residence**
  - Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Junior/Senior Hours**
  - Satisfied by a minimum of 33 hours from junior/senior courses (300+) in the major.

- **Major Junior/Senior Graduation GPA**
  - Satisfied by a minimum of 3.5 in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Environmental Studies can be found here: Environmental Studies Sample 4-year BA plan (p. 1385), or by using the left-side navigation.

Sample 4-year plans for the BGS degree in Environmental Studies can be found here: Environmental Studies Sample 4-year BGS plan (p. 1386), or by using the left-side navigation.

Departmental Honors
To graduate with honors in environmental studies, an undergraduate must maintain a minimum grade-point average of 3.5 in the major. The student must also complete an individual honors research project in cooperation with a faculty mentor. This project normally represents 2 semesters of original work, the completion of 3 credit hours of EVRN 624 Independent Study, and 3 credit hours of EVRN 625 Honors Research in Environmental Studies. All 6 hours may be applied to the 12 hours of environmental studies electives required for the major. Upon completion of the research project, honors candidates are required to present the results of their work at the department’s Undergraduate Research Colloquium.

BA in Environmental Studies
Below is a sample 4-year plan for students pursuing the B.A. in Environmental Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120-121**

1. The B.A. requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. The B.A. degree requires an additional Quantitative Reasoning course with MATH 101 as a pre-requisite. MATH 365 fulfills this requirement as do the courses on this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/). BIOL 370 and GEOG 316 do not, and will require another Quantitative Reasoning course to fulfill the B.A. degree requirements.
3. EVRN 460 is fall only; EVRN 142 is spring only; EVRN 660 is summer only.
4. A total of 12 hours of EVRN 300+ electives are required for the major. Students are encouraged to choose courses based on an emphasis area in consultation with an advisor.
5. Research Methods can be fulfilled by ECON 550/EVRN 550, EVRN 410, EVRN 510, or GEOL 351.
6. Hour requirements (incl. 45 j/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
7. Environmental Social Science and Policy Choices are: EVRN 320, EVRN 371, EVRN 384, EVRN 385, EVRN 386, EVRN 528, EVRN 530, EVRN 539, and EVRN 543.
8. Environmental Humanities and Arts choices are: EVRN 306, EVRN 330, EVRN 332, EVRN 347, EVRN 362, EVRN 375, EVRN 510, and EVRN 630.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120-123

1 A total of 12 hours of EVRN 300+ electives are required for the major. Students are encouraged to choose courses based on an emphasis area in consultation with an advisor.
2 Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
3 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
4 EVRN 140 and EVRN 460 are Fall only courses. EVRN 142 is a Spring only course. EVRN 660 is a summer only course.
5 Environmental Social Science and Policy choices are: EVRN 320, EVRN 371, EVRN 384, EVRN 385, EVRN 386, EVRN 528, EVRN 542, EVRN 543
6 Environmental Humanities and Arts choices are EVRN 306, EVRN 330, EVRN 332, EVRN 347, EVRN 362, EVRN 375, EVRN 542, and EVRN 630.
7 Capstone Experience choices are EVRN 491, EVRN 615, or EVRN 624 and EVRN 625

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Science in Environmental Studies

Why study environmental studies?

The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous interdisciplinary degree that balances learning in the physical and social sciences along with the arts and humanities. Learning Pathways (https://esp.ku.edu/learning-pathways/), thematic areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Requirements for the B.S. Degree

General Education Requirements

In addition to degree and major requirements, all students must complete the KU Core.

Environmental Studies Prerequisite or Co-requisite Knowledge

Environmental Studies Core Knowledge and Skills

Majors must complete a course in each of the following areas:

Environmental Social Science and Policy. Satisfied by:

- EVRN 320 Environmental Policy Analysis
- EVRN 371 Environmental Geopolitics
- EVRN 384 Environment, Power, and Justice
- EVRN 385 Environmental Social Problems
- EVRN 386 Sociology of Global Food
- EVRN 528 Environmental Justice and Public Policy
- EVRN 537 Water Resource Sustainability
- EVRN 542 Ethnobotany
- EVRN 543 Natural Hazards and Environmental Risks

Environmental Humanities and Arts Satisfied by:

- EVRN 306 Global Environmental Literature
- EVRN 330 Sculpture Intercepting the Waste Stream
- EVRN 332 Environmental Law
- EVRN 347 Environmental History of North America
- EVRN 362 Art and Ecology: Inhabiting the Ecosphere
- EVRN 375 Radical Environmentalism in the United States
- EVRN 377 Resilient and Resistant Futures: Global Perspectives in Climate Change Literature
EVRN 563 U.S. Environmental Thought in the 20th Century
EVRN 630 Sculpture Intercepting the Waste Stream
EVRN 662 Art and Ecology: Inhabiting the Ecosphere

Field Ecology. Satisfied by:
EVRN 460 Field Ecology 3
or EVRN 660 Summer Field Ecology
Capstone Experience. Satisfied by:
EVRN 615 Capstone Project 3

Environmental Studies Required Electives/Options
Majors must select an option or design their own. Self-designed emphases must be approved in their entirety by an environmental studies advisor and the undergraduate studies director before implementation. Each option requires 4 courses at the 300+ level.

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours
Satisfied by 31 hours of major courses.

#### Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior Hours
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior Graduation GPA
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BS in Environmental Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

#### Total Hours 120-121

1 Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
2 A total of 12 hours of EVRN 300+ electives are required for the major. Students are encouraged to choose courses based on an emphasis area in consultation with an advisor.
3 EVRN 460 is a Fall only course. EVRN 142 is a Spring only course. EVRN 660 is a Summer only course.
Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

To graduate with honors in environmental studies, an undergraduate must maintain a minimum grade-point average of 3.5 in the major. The student must also complete an individual honors research project in cooperation with a faculty mentor. This project normally represents 2 semesters of original work, the completion of 3 credit hours of EVRN 624 Independent Study, and 3 credit hours of EVRN 625 Honors Research in Environmental Studies. All 6 hours may be applied to the 12 hours of environmental studies electives required for the major. Upon completion of the research project, honors candidates are required to present the results of their work at the department’s Undergraduate Research Colloquium.

Minor in Environmental Studies

Why study environmental studies?

The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous interdisciplinary degree that balances learning in the physical and social sciences along with the arts and humanities. Learning Pathways (https://esp.ku.edu/learning-pathways/), thematic areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.

Environmental Studies electives at the Junior/Senior Level. Satisfied by 2 additional (3 ch each) EVRN course at the Junior/Senior Level (300+).

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours
Satisfied by 18 hours of major courses.

Minor Hours in Residence
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the major.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
BA in Environmental Studies/ Accelerated Master of Urban Planning

Only current KU undergraduate students are eligible to apply to the Accelerated Master of Urban Planning/B.A. in Environmental Studies program. If you are not a current undergraduate student at KU, please review the admission requirements the Master of Urban Planning.

The Accelerated Master of Urban Planning/B.A. in Environmental Studies is designed for students who have a passion for sustaining both our natural and built environments. It allows well-qualified students to earn a bachelor’s and a master’s degree in five years, rather than the six years it would take to earn each degree separately. This program combines in-depth training in environmental studies and analysis with a professional degree in urban planning. Graduates are prepared for careers in environmental planning in the public, private and not-for-profit sectors.

Only current KU undergraduate students are eligible to apply to the Accelerated Master of Urban Planning/B.A. in Environmental Studies. If you are not a current undergraduate student at KU, please review the admission requirements for the Master of Urban Planning.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time frame. All prospective students should discuss their interest with the undergraduate advisor for Environmental Studies and the Urban Planning Program director as soon as possible. A meeting with the Urban Planning Program director should take place no later than the student’s junior year to discuss possible admission to the accelerated master’s program.

Prospective students are eligible to apply to the graduate program in spring semester of their junior year. The following requirements must be met by this time:

- On track to complete all requirements for a B.A. or B.G.S. degree in Environmental Studies from KU by the spring semester of the senior year
- Successful completion of all requirements for the bachelor’s degree;
- Grades of B or above in all Urban Planning graduate-level coursework taken in year 4

Any student who does not meet this minimum grade requirement may continue in the program but must repeat any graduate course for which they did not earn a B or above. Students should still aim to complete all requirements by the end of year 5. Students may also elect to earn only the bachelor’s degree and re-apply to the graduate program at a later time.

This accelerated masters program uses a carefully planned combination of prerequisite coursework, graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. The student must be approved to begin coursework toward the master’s prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

Students should seek guidance from their advisor and refer to the degree plan for the specific enrollment sequence.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 40 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Requirements for the Master's Degree

The M.U.P degree consists of core courses, specialization courses, elective courses, courses and a Master's degree final exam. While completing the following degree requirements, students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing. During the Senior Year (Year 4), the student must take the following Urban Planning graduate coursework, in addition to the Major Requirements noted above:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

In Year 5, after the conferral of the undergraduate degree, the student will complete a total of 24 post-baccalaureate graduate credit hours, consisting of the following:
Each student’s progress will be monitored at various points during the program:

1. Upon pre-admission acceptance to the accelerated masters, the student will meet with the UBPL Chair to plan the final year of undergraduate courses, graduate UBPL courses to be taken for elective undergraduate credit, and to outline the schedule of courses.

2. In the final spring semester of undergraduate study (Year 4), the student will meet with the UBPL Chair to review the student’s performance in UBPL courses. The student must earn a grade of “B” or better in these courses to be eligible for regular admission to the Master of Urban Planning degree.

3. Following completion and award of the undergraduate degree (end of Spring Semester Year 4), the admitted student will again meet with the UBPL Chair to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.25 for these courses. At this time, the student will select a specialization area within the planning degree, and will meet with a faculty advisor who is overseeing that specialization to ensure the course plan is accurate.

4. For those students who do not meet the minimum GPA requirement of 3.25 in the first semester of Year 5 an alternative plan of study to address the student’s deficiencies may be developed, at the department’s sole discretion. Students may also be dismissed from the program.

5. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in courses for graduate credit toward the MUP degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the master’s degree within one year of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

**M.U.P. Electives:**

Elective coursework can be selected from the department’s graduate course offerings focusing in the areas of housing, transportation, or sustainable land use. Additional detail of elective course and completion options can be found on the MUP Degree Requirements page (https://catalog.ku.edu/public-affairs-administration/mup/#degreerequirementstext). Students are encouraged to consult the UBPL Program Director when choosing elective courses.

**M.U.P. Final Exam**

Students in the accelerated masters must successfully pass a comprehensive exam. The examination provides a learning experience that encourages the student to synthesize the knowledge gained through course work and tests the student’s competence as a generalist/specialist planner. The examination consists of the preparing a written response to a scenario or case study in which one is asked to synthesize knowledge gained in one’s course work and apply it within a particular context. No academic credit is given for the examination. Two Urban Planning faculty members assess and grade the exam with Honors, Pass, or Retake. Up to two retake attempts are permitted. The department will determine an appropriate minimum interval between exam attempts.

**Progression Requirements**

Each student’s progress will be monitored at various points during the program:

Graduate Certificate in Environmental Assessment

Industries ranging from architecture, engineering and public policy require continued professional education for a variety of roles. The environmental assessment certificate provides certified specialization that professionals in these and other fields can add to existing credentials. Those in the field of environmental assessment identify possible environmental effects of a project or program, propose measures to decrease adverse effects and predict those effects. This certificate can be completed in its entirety online, or with an elective course option taken on campus.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Graduate Admission

Individuals interested in applying to the Graduate Certificate in Environmental Assessment should have a bachelor’s degree from an accredited institution in one of the following areas: natural, physical, or applied sciences, engineering, or related fields, OR coursework of at least 20 credit hours in the natural and applied sciences (biology, chemistry, geology, physical geography, environmental sciences, or engineering).

For those without the necessary background courses in undergraduate science, some additional coursework would need to be completed prior to the start of the graduate certificate program. Additional contact information can be found at the KU Edwards Campus website.

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

- A Statement of Interest in the environmental assessment certificate program. This 1-2 page narrative should summarize your education, employment history, your long-term career goals, and how this certificate will help you achieve these goals.
- Official undergraduate transcript.
- Resume recommended, but not required.
- A letter of recommendation from someone familiar with your academic work or qualified to offer judgment on your ability to undertake graduate-level work (former professor or instructor, workplace supervisor).
- Resume recommended, but not required.

Current KU graduate students wishing to enroll in the Graduate Certificate in Environmental Assessment program will apply through the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. Completion of the certificate will appear on the graduate transcript. KU graduate students should submit the following materials:

- A Statement of Interest in the environmental assessment certificate program and its relationship to your graduate course of study.
- An unofficial copy of your KU transcript.
- A letter of support from your graduate degree program (your advisor or graduate director).

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be

Certificate Requirements

The Certificate in Environmental Assessment is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

At least 50% of the coursework counted toward the certificate must be 700 level or above.

Code | Title | Hours
--- | --- | ---
EVRN 611 | Water Quality, Land Use, and Watershed Ecosystems | 3
EVRN 616 | Environmental Impact Assessment | 3
EVRN 721 | Environmental Regulation and Policy | 3
1 graduate-level elective, preferably in EVRN, selected in consultation with the advisor | 3

Total Hours | 12

Graduate Certificate in Environmental Justice

Broadly defined, “Environmental Justice” is an interdisciplinary field of study that includes (but is not limited to) theories of the environment, theories of justice, environmental law and governance, environmental policy and planning, philosophy, development, sustainability, and political ecology. More narrowly, the United States Environmental Protection Agency defines environmental justice as “the fair treatment and meaningful involvement of all people regardless of race, color, sex, national origin, or income with respect to the development, implementation and enforcement of environmental laws, regulations, and policies.”

Environmental justice emerged from an increased awareness of the disproportionately high impacts of environmental change and degradation on economically and politically disadvantaged communities. It addresses issues such as social, economic and political marginalization of minorities and low income populations.

The Graduate Certificate in Environmental Justice emphasizes the causes and consequences of the distribution of environmental problems. Students focus on why some poor and minority communities are more likely to experience a host of environmental burdens, as well as exploring the impact of that disproportionate environmental exposure. Understanding why some neighborhoods, communities, regions and countries benefit from environmental protection, while others do not, provides students with a concrete skill set and a critical perspective on environmental problems, community organizing and public participation, good governance, and research methods. Students who pursue this certificate will be well situated for careers in public policy, international relations, environmental advocacy, and environmental research.

The Environmental Justice Graduate Certificate can be completed at either Lawrence or Edwards Campus locations.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

- A Statement of Interest in the environmental justice certificate program. This 1-2 page narrative should summarize your education, employment history, your long-term career goals, and how this certificate will help you achieve these goals.
- Official undergraduate transcript.
- A letter of recommendation from someone familiar with your academic work or qualified to offer judgment on your ability to undertake graduate-level work (former professor or instructor, workplace supervisor).

Current KU graduate students wishing to enroll in the Graduate Certificate in Environmental Justice program must apply through Graduate Studies (https://gradapply.ku.edu/apply/) and submit the required fee. A student must be in good standing with their graduate degree program in order to participate in the certificate program. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Office of Graduate Studies. Completion of the certificate will appear on the graduate transcript. KU graduate students should submit the following materials:

- A Statement of Interest in the environmental justice certificate program and its relationship to your graduate course of study.
- An unofficial copy of your KU transcript.
- A letter of support from your graduate degree program (your advisor or graduate director).

Please see the Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/) policy and the KU Edwards Campus page for additional information on admission.

Certificate students must complete 12 graduate credit hours.

EVRN 528 | Environmental Justice and Public Policy | 3
or EVRN 650 | Global Environmental Justice | 3
study abroad option in Paris, and a full semester study abroad program in Angers. Our summer and semester-long study abroad programs in Paris and Angers offer a wide variety of levels to students at all stages of linguistic competence. The major prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as interpreting, international business, art, art history, and travel. We encourage applicants from traditional and non-traditional backgrounds to investigate French as a major or as a minor field.

**Undergraduate Italian**

The Department of French, Francophone, and Italian Studies offers a comprehensive undergraduate program in Italian language, literature, and culture, leading to the BA in French with the Italian Option or the Minor in Italian. Italian offers courses in basic grammar, composition and conversation, literature and culture. Our summer study abroad program in Florence offers a wide variety of levels to students at all stages of linguistic competence. The major prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as interpreting, international business, art, art history, architecture, and travel. We encourage applicants from traditional and non-traditional backgrounds to enrich their time at KU through the study of Italian.

**Graduate French**

The Department of French, Francophone, and Italian Studies offers M.A. and Ph.D. degrees in French and Francophone language, literature, and culture. Graduate study is supported through teaching assistantships offered to qualified candidates, who receive thorough training in language instruction. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation.

**Undergraduate Programs**

Course work in the Department of French, Francophone, and Italian Studies gives undergraduates a valuable and useful linguistic tool; offers cultural training for students specializing in other fields; trains majors in linguistic competence. The major prepares students for a variety of linguistic competence. The major prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as interpreting, international business, art, art history, architecture, and travel. We encourage applicants from traditional and non-traditional backgrounds to enrich their time at KU through the study of Italian.

## Department of French, Francophone, and Italian Studies

### Why study French and/or Italian?

Speakers of French and Italian span five continents. French is spoken by over 220 million people. Italian is spoken by over 65 million people. By 2050, it is estimated that there will be over 750 million French speakers, 80% of whom will live in Africa, becoming the world’s most spoken language. French and Italian are the international languages of cooking, fashion, theater, the visual arts, dance and architecture. Thousands of US companies do business with Italy and the Francophone world. In an increasingly mobile and interconnected planet, the study of language, literature and culture has never been more crucial for our students’ success. It provides students with a competitive edge in an increasingly internationalized workplace; for example, four out of five new jobs in the US are created as a result of foreign trade. Above all, learning a second language enables a greater understanding of other cultures while enhancing your own.

### Undergraduate French

The Department of French, Francophone, and Italian Studies offers a comprehensive undergraduate program in French language, literature, and culture, as well as Francophone literature and culture from around the world. In addition to first and second year courses in basics of grammar and conversation, advanced undergraduate courses in composition, literature, and culture are offered every semester. We offer a summer
Any student with past course work or experience in Italian should contact the Italian program director in the Department of French, Francophone, and Italian Studies to determine which Italian course is appropriate for his or her level.

**Retroactive Credit**

Students with no prior college or university French or Italian course credit are eligible for retroactive credit according to this formula:

- 3 hours of retroactive credit are awarded to a student with 2 or 3 years of high school French or Italian who enrolls initially at KU in a third-semester French or Italian course (FREN 230 or FREN 231 or ITAL 230) and receives a grade of C– or higher.
- 6 hours of retroactive credit are awarded to a student with 3 or 4 years of high school French or Italian who enrolls initially at KU in a fourth-semester French or Italian course (FREN 240 or FREN 241 or ITAL 240) and receives a grade of C– or higher.
- 9 hours of retroactive credit are awarded to a student with 4 years of high school French or Italian who enrolls initially at KU in a French or Italian course with a fourth-semester course as a prerequisite and receives a grade of C– or higher.

**Courses for Nonmajors**

All courses are open to nonmajors who meet requirements. Candidates for the B.S. degree in education who want to major or minor in French (p. 225) should consult the School of Education and Human Sciences. Special concentrations in French and Italian are also available through business and journalism.

**Graduate Program in French**

The Department of French, Francophone, and Italian Studies offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (https://frenchitalian.ku.edu/affiliated-faculty/) is dynamic, professionally active, and committed to excellence in scholarship and teaching. The major emphasis of teaching and research is French and Francophone literature. The department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on all periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (https://frenchitalian.ku.edu/phd-curriculum/) of the department website for additional information.

**Departmental Funding**

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, forming a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://frenchitalian.ku.edu/ma-funding-opportunities/) of our departmental website.

**Additional Funding**

Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

**Graduate Non-Degree Seeking Status**

Students who are interested in enrolling in graduate-level coursework in the Department of French, Francophone, and Italian Studies without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s webpage (https://frenchitalian.ku.edu/graduate-degrees-french/) for further details.

**Courses**

- **FREN 104. Elementary French, Overseas.** 1-5 Credits. U
  - Basic language instruction in French for beginners participating in study abroad programs in France or a French-speaking country. Graded on a satisfactory/unsatisfactory basis.

- **FREN 107. Elementary French I for the Professional Schools.** 3 Credits.
  - Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement.

- **FREN 110. Elementary French I.** 5 Credits. U F1
  - Introduction to the basics of French language and Francophone cultures. A balanced approach that focuses on all skills: listening, speaking, reading, writing and intercultural competence. Conducted in French; no previous French required. Not open to native speakers of French or those scoring over 300 on the KU French language placement test.

- **FREN 111. Introduction to French I.** 3 Credits. U
  - Introduction to French for special purposes; no previous French required. Provides basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Introduction to the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: Instructor permission required.

- **FREN 112. Introduction to French II.** 3 Credits. U
  - Continuation of FREN 111. Further development of basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Continued exploration of the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: FREN 111 or permission of instructor.
FREN 120. Elementary French II. 5 Credits. U F2
Continuation of FREN 110. Further development of the basics of French language and Francophone cultures. A balanced approach that focuses on all skills: listening, speaking, reading, writing and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 350 on the KU French language placement test. Prerequisite: FREN 110 or or placement by examination.

FREN 130. Critical Issues in Contemporary France. 3 Credits.
France is a society in transition. Profoundly altered by two World Wars and the aftermath of a colonial past, French culture has been propelled, in the last century, into the complexities of a modern, globalized world. While we have faced many similar challenges in United States to those confronted by our French counterparts, this course will help us think through the often drastically different outcomes of our respective approaches to such questions as immigration, national identity, education, and the perennial struggle between state and individual rights. This course is offered completely in English. It does not satisfy any requirements of the French major or minor.

FREN 150. Zombies, Aliens, Monsters. 3 Credits.
A comprehensive, interdisciplinary survey of French culture that may include vampires, zombies, fairy tales, villains and anti-heroes, the macabre, alien encounters, dystopias and utopias, and deviancy, with particular attention to literature, film and TV, and thought. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 152. France and the French. 3 Credits. HL H
A comprehensive, interdisciplinary survey of French culture that may include topics ranging from the earliest times to the present, with particular attention to literature, the arts, thought, politics, society, food, and customs. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 153. Global Cultures: The French Connection. 3 Credits. H/ W
A comprehensive, interdisciplinary and critical survey of the French-speaking cultures outside France in North America, the Caribbean, Africa, the Middle East, and Southeast Asia. Will include a variety of cultural topics, with particular attention to, and critique of, French colonization, the effects of empire on indigenous cultures, and postcolonial interactions today between France and its former colonies and protectorates. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in French. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

FREN 205. French Literature in Translation: ______. 3 Credits. HL H
Readings and discussions of representative great masterpieces of French and/or francophone literature from the medieval Arthurian romances and chansons de geste to the present, with particular emphasis on the question of the interrelations of form and content. Includes such authors as Rabelais, Montaigne, Racine, Moliere, Voltaire, Balzac, Flaubert, Baudelaire, Proust, Gide, Camus, and Beckett. Conducted in English. A reading knowledge of French is extremely useful but not a requirement.

FREN 230. Intermediate French I. 3 Credits. U F3
First intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 400 on the KU French language placement test. Prerequisite: FREN 120 or placement by examination.

FREN 231. Intermediate French I, Honors. 3 Credits. U F3
Honors version of FREN 230. First intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 400 on the KU French language placement test. Prerequisite: Grade of B or A in FREN 120 or departmental permission.

FREN 234. Intermediate French I and II. 6 Credits. U F4
Intensive intermediate-level course meeting five times a week for six hours credit. Covers the material in FREN 230 and FREN 240 in one semester. (FREN 234, FREN 240, FREN 241--each completes the CLAS foreign language requirement.) Not open to native speakers of French or those scoring over 400 on the KU French language placement test. Prerequisite: FREN 120 or placement by examination.

FREN 238. Intermediate French II. 3 Credits. U F4
Continuation of FREN 230; intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 500 on the KU French language placement test. Prerequisite: FREN 230 or 231 or placement by examination.

FREN 241. Intermediate French II, Honors. 3 Credits. U F4
Honors version of FREN 240. Intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 500 on the KU French language placement test. Prerequisite: Grade of B or A in FREN 230 or FREN 231 or departmental permission.

FREN 285. Headless Men: Conquest and Cultural Exchange Before the Age of Exploration. 3 Credits. HL H
In fourteen hundred and ninety-two, Columbus sailed the ocean blue. But what happened before Columbus' great journey? And, more to the point, why did he and his contemporaries feel entitled to simply claim whatever land they found? This course proposes to explore the medieval experiences of cultural and racial Otherness in order to better understand the roots of some of the assumptions about difference (interpersonal, intercultural, and international) that continue to play out in American society today. Taught in English. (Same as HIST 285.)

FREN 301. French Written and Oral Communication 1. 3 Credits. H/ W FP
Designed to prepare students for oral and written work in advanced-level French. Prerequisite: FREN 234, or FREN 240, or FREN 241, or by departmental permission.

FREN 302. French Written and Oral Communication 2. 3 Credits. H/ W FP
Designed to further students' proficiency in oral and written expression for work in advanced-level French. Prerequisite: FREN 301, or by departmental permission.

FREN 310. French Phonetics. 3 Credits. H/W FP
A course in practical phonetics with exercises stressing rhythm, intonation, and individual sounds. Prerequisite: FREN 240, FREN 241, or by departmental permission.

FREN 315. Le Francais Pratique. 1-6 Credits. H/W FP
Supplementary non-major language course that can be a sequel to the first four semesters of French. Primarily for students studying abroad. Covers vocabulary study, oral exercises, discussion of texts, writing, and free conversation. Prerequisite: FREN 230/231 or FREN 234, FREN 240/241.

FREN 326. Introduction to French Literature. 3 Credits. H/W FP
Analysis of selected texts from various genres; special emphasis on explication de texte. Prerequisite: FREN 301.

FREN 330. French Language and Civilization I. 3 Credits. H/W FP
A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad programs.

FREN 340. French Language and Civilization II. 3 Credits. H/W FP
A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad Programs.

FREN 350. Applied French Grammar and Composition I. 3 Credits. H/W FP
Systematic grammar review with extensive practice in writing French. Prerequisite: FREN 301 or FREN 326.

FREN 352. Business French/Le Français Professionnel. 3 Credits. H/W FP
This course helps students develop a set of linguistic and cultural competencies specific to business in the Francophone world. Students practice oral and written professional communication and complete a variety of specific tasks connected to professional careers in France. Students explore the primary industries in the Francophone world, with a particular focus on marketing, global health, diplomacy, and sustainability. Students prepare a complete job portfolio and participate in job interviews, all in French. Prerequisite: FREN 301.

FREN 375. Intermediate French Conversation. 3 Credits. H/W FP
Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and acquire vocabulary. Sections limited to twelve students. Prerequisite: FREN 301 or concurrent enrollment in FREN 301.

FREN 376. Advanced French Conversation. 3 Credits. H/W FP
Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and knowledge of French culture and language. Classes have centered around topics such as the French Revolution, the Arts, Renaissance Festivals, and French cinema. Sections limited to twelve students. May be designated a KULAC class at the discretion of the instructor. Prerequisite: FREN 375.

FREN 380. The Middle Ages in the Modern Imagination. 3 Credits. H
Presents authentic French and non-French medieval literary and cultural content in the context of reflection on its role in modern popular culture. Themes may include Joan of Arc, Arthurian legend, the Chronicles of Narnia, Game of Thrones, and troubadour lyric. Taught in English.

FREN 401. Paris, City of Lights and Legends. 3 Credits. H/L H
An exploration of the French capital from its origins to present as emblem and icon of the social, literary, cultural, and political development of the French nation and of French ideals. Topics include great persons, events, works, symbols, and myths since the founding of the city to the present. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 410. Survey of French Culture I. 3 Credits. H/W FP
A survey of the historical, philosophical, literary, and artistic development of France, from the beginning through the 17th century. Prerequisite: FREN 301 and FREN 326.

FREN 420. Survey of French Culture II. 3 Credits. H/W FP
Continuation of FREN 410, from the 18th century to the present. Prerequisite: FREN 301 and FREN 326.

FREN 430. La France d’Aujourd’Hui. 3 Credits. H/W FP
Social, political, and economic trends from 1939 to present, with emphasis on period since 1968. Prerequisite: FREN 301 and FREN 326.

FREN 431. French-Speaking World (Outside France). 3 Credits. H/W FP
Cultures of the some 235 million persons in the five world areas whose everyday and/or official language is French: Canada; Caribbean (e.g., Haiti, Guadeloupe, Martinique); Europe (e.g., Belgium, Switzerland); Africa and Indian Ocean (23 former French or Belgian colonies); Pacific (e.g., Tahiti, New Caledonia). Also French-speaking settlers in the United States (Louisiana, South Carolina, New England, Kansas). French presence in Indochina and the Near East. Prerequisite: FREN 301 and FREN 326. (May be taken concurrently with FREN 301 and/or FREN 326.)

FREN 432. Francophone African Literature. 3 Credits. NW H/W
This course is an introduction of 20th Century African literature written in French, covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include neigitude, African identity in the wake of colonialism, Islam, and women's writing. Classes will be conducted in English. Students may read the texts in French or in translation. (Same as AAAS 432.) Prerequisite: ENGL 102 and a 200-level English course.

FREN 433. French Global Culture Through Film. 3 Credits. H/W
Discussion of great masterpieces of modern postcolonial Francophone and French global film, with a particular emphasis on how film portrays and conveys important aspects of the cultures of former French colonies and peoples in Quebec, the Caribbean, Africa, and Southeast Asia during and since independence, including immigrant populations in mainland France itself today. The works of a variety of French and indigenous filmmakers and cultures will be covered. Prerequisite: FREN 301, FREN 302, and FREN 326.

FREN 435. Introduction to Translation Studies. 3 Credits. H
This course delves deeply into the theory and practice of French-to-English and English-to-French translation from both analytical and applied perspectives. Students will work to perfect both English and French style while also gaining a theoretical grounding in the growing field of translation studies. Each week, students will work alternately on an English > French translation or a French > English translation while contextualizing practical work within a broad theoretical context of critical, literary, and philosophical readings. This class is bilingual; as we alternate between working languages, our dialogue will alternate from French to English. Prerequisite: FREN 301, FREN 302, and FREN 326.

FREN 440. Studies in French Culture: ______. 3 Credits. H/W FP
Representative topics are: History of Paris, Role of Women in French Literature and Culture, Interrelationships of the Arts, French-speaking African Culture, Culture of French Canada. May be repeated for credit with departmental permission; may also be repeated as part of major in French language and culture. Prerequisite: FREN 301 and FREN 326.
FREN 441. The Story of French. 3 Credits. H/W
This course provides an overview of the historical development of the French language and an introduction to different varieties of French, as well as some current language-related issues in the French-speaking world. The history of the French language is considered both from an external perspective, by examining important historical events in the language's history, and from an internal perspective, by looking at specific ways the language has changed over time. Variation is examined: how French differs geographically (i.e. dialects and regional varieties in France and in the French-speaking world), socially (i.e. how social groups such as socioeconomic class or sex are reflected in language use), and situationally (i.e. language modification depending on formality, context, etc.). Will include comparisons of spoken versus written French, slang, and le français populaire, as well as current issues, e.g., les néologismes (word creation), les anglicismes (English influence) and feminization of language. Taught in French. Prerequisite: FREN 301.

FREN 443. French Inside Out. 3 Credits. H/W
This course provides an introduction to the structure of modern French and the various subfields of French linguistics. Topics will include major aspects of phonetics/phonology (the sounds/sound system), morphology (word formation), syntax (sentence structure), semantics, pragmatics (language use) and sociolinguistic variation (social, stylistic, geographical), as well as language attitudes and policies in France and other Francophone regions. Students will be introduced to different theoretical approaches to the study of French linguistics and will work on linguistic analyses of first- and second-language data. Taught in French and no prior study of linguistics is necessary to take this course. Prerequisite: FREN 301.

FREN 450. French Literature of the Middle Ages. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 455. French Literature of the Renaissance. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 460. Identity, Absolutism, and Power in France, 1589-1715. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 462. French Literature of the Eighteenth Century. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 465. French Literature of the 19th Century. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 470. French Literature of the Twentieth Century. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 471. Transcending Borders: Migrations, Identities, Voices, Narrative. 3 Credits. H/W
Study the themes of borders, migrations, and search for individual and collective identity and voice which define modern French and French-speaking cultures in continental France and around the globe. Authors, cultural movements and themes of the period, with an emphasis on twentieth- and twenty-first centuries. Introduce the student to the principal elements of the cultural, intellectual and artistic climate of the time, including literature, film, and other cultural documents and artefacts, print and electronic, visual and aural. May be taught in French or English. Prerequisite: FREN 301, FREN 302, and FREN 326.

FREN 480. Studies in French Literature: ____. 3 Credits. H/W FP
A study of a period, theme, group of authors, or movement. Subject matter will vary; may be taken more than once if subject differs. Prerequisite: FREN 301 and FREN 326.

FREN 481. Science-Fiction and Fantasy in French. 3 Credits. H/W
Study of the key works in different media in French dealing with the theme and traces the development of science-fiction and fantasy from its beginnings to the present day. Prerequisite: FREN 326.

FREN 494. Research Internship. 1-3 Credits. H
Practical research experience in French and Francophone studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. May be used as a component of the Research Experience Program (REP). Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level French course and permission of instructor.

FREN 495. Directed Readings in French. 1-15 Credits. U FP
May be taken more than once, total credit not to exceed fifteen hours. Fields not covered by course work, and/or field of student's special interest. Conferences. Counts as humanities when taken for two or three hours. Prerequisite: Twenty-five hours of French and consent of instructor.

FREN 496. Internship. 1-3 Credits. H
Practical experience in the use of French skills in supervised academic, professional, or study-abroad setting. Credit hours are graded according to the written evaluation provided by the supervisor to the director. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level French course and permission of instructor.

FREN 499. Honors in French. 3 Credits. H/W FP
Various topics in French or Francophone literature, language, culture, or film. May be repeated for credit, total credit not to exceed six hours. Six hours of FREN 499 required for B.A. with Honors in French. Before enrolling, the student must obtain the approval of the faculty member who will direct the Honors project.

FREN 500. Advanced French Phonetics. 3 Credits. H/W FP
Advanced theory and practice of French pronunciation. Not open to students who have taken FREN 310, except by departmental permission. Prerequisite: FREN 301 or FREN 326 or graduate standing.

FREN 530. Studies in Film: ____. 3 Credits. H/W FP
Studies in an aspect of film, a director or group of directors. Emphasis on French film. Given in French or English.

FREN 550. Capstone Seminar in French and Francophone Language, Literature, and Culture. 3 Credits. H/W
Small discussion groups, each designed to consider a specific, clearly defined topic, using an interdisciplinary approach and requiring the demonstration of a comprehensive knowledge of the fundamentals in the field as appropriate to the topic. Class discussion based on student presentation. A final comprehensive project required. All discussion and coursework will be in French. Prerequisite: Senior majors; special department permission for other students.

FREN 601. French for Reading Knowledge. 3 Credits.
Special course for candidates for advanced degrees in other departments. Fundamentals of grammar and reading of material of medium difficulty. Intended primarily for graduate students, but open also to seniors planning graduate study. Does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of French.
Conducted in English. Prerequisite: Graduate status or instructor permission.

FREN 610. Theme et Version. 3 Credits. H/W FP
Exercises in English-French and French-English translation, designed to enable the student to write with greater clarity and precision in both languages.

FREN 700. Old French. 3 Credits.
Introduction to grammar and structure through the reading of representative works.

FREN 703. Structure of Modern French. 3 Credits.
Linguistic analysis of the phonological, morphological, and syntactic structure of modern French. Description in terms of current theories and models. Application of linguistic analyses to the teaching of French.

FREN 704. Methods in Foreign Language Instruction. 3 Credits.
This course provides an overview of current and historical approaches to foreign language teaching. Past and current trends and methodologies of language instruction are examined in order to acquaint students with various classroom approaches. Research findings in second language acquisition are explored and their implications discussed so as to show how these findings lead to more effective classroom practices.

FREN 705. Colloquium in Methods of Teaching French Language. 1-3 Credits.
Discussion of theoretical teaching concepts and their application in the development of pedagogical materials and assessments for the French language classroom. Does not count toward completion of the 30-hour minimum for the M.A. or Ph.D. Prerequisite: FREN 704 and department permission.

FREN 720. Introduction to Graduate Studies in French. 3 Credits.
This course is an introduction to the skills required of students doing graduate degrees in French; areas covered include 1) introduction to literary theory and criticism, 2) bibliography and research methods, including database management software, 3) preparation and presentations of a research/conference paper, 4) technology training, including web design, on-line portfolio, and digital humanities, and 5) professional ethics and awareness of the academic market and alternative careers.

FREN 732. Francophone Studies. 3 Credits.
Selected movements, themes, genres, topics in the cultures and/or literatures of the French-speaking world outside France. May be repeated for credit.

FREN 785. French Romantic Movement. 3 Credits.
Major Romantic writers viewed in context of intellectual, esthetic, and social milieu of period 1800-1850.

FREN 795. Investigation and Conference. 1-3 Credits.
Readings and research projects in French language, literature, and culture for students at the MA level. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Maximum credit for M.A.: Three hours. By special departmental permission only.

FREN 799. Masters Seminar. 1 Credit.
To meet Masters degree requirement for continual enrollment. Graded on a satisfactory/unsatisfactory basis.

FREN 800. Studies in: _____ 3 Credits.
Study of topics not limited to one century. May be repeated for credit.

Selected topics to be specified. Study of form, movements, or themes in the French Novel, not limited to one century. May be repeated for credit.

FREN 848. Studies in Medieval French Literature: ____. 3 Credits.
Various movements, themes, or genres. May be repeated for credit. Prerequisite: FREN 700.

FREN 858. Studies in Sixteenth Century French Literature: ____. 3 Credits.
Various movements, themes, or genres. May be repeated for credit.

FREN 878. Studies in Eighteenth Century French Literature: ____. 3 Credits.
Various movements, themes, or genres. May be repeated for credit.

FREN 889. Studies in Twentieth Century French Literature: ____. 3 Credits.
Various movements, themes, or genres. May be repeated for credit.

FREN 899. M.A. Thesis. 1-6 Credits.

FREN 900. Seminar in French: ____. 3 Credits.
Topics in literary, linguistic, and cultural research. May be repeated for credit.

FREN 995. Investigation and Conference. 1-3 Credits.
Readings and research projects in French language, literature, and culture for PhD students. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Prerequisite: By Special Departmental Permission only.

FREN 999. Ph.D. Dissertation. 1-12 Credits.

Courses

ITAL 101. Studying Abroad: Italy at a Glance. 1 Credit. W
Online one-credit course which aims to prepare students for the study abroad experience in Italy. The course is taught in English and has no prerequisites. Students will improve their knowledge of Italy and gain a better understanding of the environment that they will find abroad. The course includes an overview of Italian habits and practices, a cross-cultural analysis of differences between Italy and the U.S., and an introduction to essential Italian vocabulary for daily usage while studying abroad. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Instructor permission.

ITAL 103. Elementary Italian Language and Civilization. 3 Credits. H
A systematic review of the fundamentals of Italian grammar through practice in conversation and writing, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. No prerequisite.

ITAL 107. Elementary Italian Conversation I. 3 Credits. U
First part of a two-course sequence (with 108) for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120.

ITAL 108. Elementary Italian Conversation II. 3 Credits. U
A continuation of ITAL 107, second part of a two-course sequence for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation
required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120. Prerequisite: ITAL 107 or Italian Coordinator's approval.

ITAL 110. Elementary Italian I. 5 Credits. U F1
Introduction to Italian language and culture. Essentials of grammar and practice in speaking, understanding, reading, and writing. Active participation required. Five hours of class per week.

ITAL 111. Accelerated Elementary Italian I. 3 Credits. U F1
This accelerated course covers the same content as ITAL 110 in three hours rather than five and prepares students to move on to ITAL 120 or ITAL 121. Students engage in activities and assignments that help them develop listening, speaking, reading and writing skills. Designed for students who have previous experience studying another foreign language or for those who desire to work at a faster pace. Active participation required.

ITAL 120. Elementary Italian II. 5 Credits. U F2
Five hours of class. Reading of simple texts; diction; speaking; elementary composition. Prerequisite: ITAL 110.

ITAL 121. Accelerated Elementary Italian II. 3 Credits. U F2
This accelerated course covers the same content as ITAL 120 in three hours rather than five and prepares students to move on to ITAL 230. Students engage in activities and assignments that help them develop and reinforce listening, speaking, reading and writing skills. Designed for students who completed ITAL 111 or who excelled in ITAL 110. Active participation required.

ITAL 152. Studies in Italian Heritage. 3 Credits. H
A comprehensive, interdisciplinary survey of the ways in which the historical culture of Italy can be found in Lawrence, KS. Emphasis is on politics, sciences, philosophy, media, and immigration. Uses materials from various KU collections. Taught in English. Does not fulfill any requirement in the Italian major or minor.

ITAL 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Italian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

ITAL 203. Intermediate Italian Language and Civilization. 3 Credits. H
A systematic review of Italian grammar through practice in conversation and composition, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: ITAL 120.

ITAL 230. Intermediate Italian I. 3 Credits. U F3
Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 120 or ITAL 156.

ITAL 240. Intermediate Italian II. 3 Credits. U F4
Continuation of ITAL 230. (ITAL 240 completes foreign language requirement.) Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 230.

ITAL 300. Composition and Conversation. 3 Credits. H/W FP
Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 240 or permission of instructor.

ITAL 301. Introduction to Italian Literature and Textual Analysis. 3 Credits. H/W FP
Readings, textual analysis, and writing on a broad selection of Italian texts from different genres and periods, ranging from the medieval origins to contemporary literary culture. This course develops cultural and critical literacy as well as oral and written proficiency, and is a gateway to upper-division courses in the major and minor. Emphasis on study of Italian literature in its cultural context, history, politics, and society. Prerequisite: ITAL 240 or reading knowledge of Italian.

ITAL 303. Italian Language and Civilization I. 3 Credits. U FP
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 240.

ITAL 304. Italian Language and Civilization II. 3 Credits. U FP
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 303.

ITAL 315. Advanced Composition and Conversation. 3 Credits. H/ W FP
Continuation of ITAL 300. Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 300 or permission of instructor.

ITAL 330. Cinematic Rome. 3 Credits. H
A study of cinematic representations of daily life, diversity, urban landscape, and social and political issues in modern and contemporary Rome as presented in different genres. Taught in English. (Same as FMS 330.)

ITAL 331. Mafia Movies. 3 Credits. H
This course investigates representations of the Italian mafia in Italian and American cinema since the 1960s, placing emphasis on conventions of the gangster genre and its evolution. We will examine films in relation to their socio-historical contexts and special attention will be dedicated to Italian films that deglamorize the Italian mafia and champion the anti-mafia struggle. Taught in English. (Same as FMS 331.)

ITAL 333. Italian Food Culture. 3 Credits. W
An interdisciplinary course on Italian cultural studies with a focus on Italian cuisine, its history and its representation in literature and movies. The history of Italian cuisine, its consumption and production are investigated from multiple disciplinary perspectives with the goal of studying what Roland Barthes called the “polysemia of food” as a feature of modernity. Taught in English.

ITAL 336. Italy and the Italians. 3 Credits. H
Survey of Italian culture with study of art and architecture, literary masterpieces in translation, science, culinary arts, and cinema. Taught in English.

ITAL 340. Studies in Italian Culture: ______. 3 Credits. H
A study of particular aspects of and/or periods in Italian culture. May be repeated for credit with departmental permission. Prerequisite: ITAL 240 or permission of instructor.

ITAL 405. Italian Literature in Translation: ______. 3 Credits. H/W
Major works representing various movements, themes, or genres. May be repeated with departmental permission. All work done in English.
ITAL 410. 19th and 20th Century Short Stories. 3 Credits. H/W FP
A survey of representative short stories of the 19th and 20th Centuries, including Verga, Panzini, Pirandello, Guareschi, Moravia, Calvino, Landolfi, and Bigiaretti. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor.

ITAL 420. 19th and 20th Century Poetry. 3 Credits. H/W FP
A survey of 19th and 20th century poets and their works, including Leopardi, Pascoli, d'Annunzio, Govoni, Palazzeschi, Gozzano, Marinetti, Bocchioni, Ungaretti, Montale, Quasimodo, and Pasolini. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor.

ITAL 450. Studies in Italian Cinema. 3 Credits. H/W A survey of significant moments in Italian film history, including analysis of themes, genres, styling, directors, and film culture. May be repeated for credit with departmental permission. Prerequisite: ITAL 336 or ITAL 340 or permission of instructor.

ITAL 466. 19th and 20th Century Novels. 3 Credits. H/W FP
This course is a survey of representative 19th and 20th century novels including those of Manzoni, Pirandello, Svevo, Deledda, Vittorini, Moravia, Pavese, Pratolini, Buzzati, Ginzburg, and Calvino. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor.

ITAL 480. Studies in Italian Literature: ____. 3 Credits. FP
A study of a period, theme, group of authors, or cultural movement. Subject matter will vary; may be taken more than once if subject differs. Prerequisite: ITAL 300 or demonstrated knowledge of Italian.

ITAL 495. Directed Readings in Italian. 1-3 Credits. U FP
May be taken more than once, total credit not to exceed nine hours. Various fields of Italian literature. Prerequisite: Consent of instructor, given only to those having demonstrated ease in reading Italian.

ITAL 499. Honors in Italian. 3 Credits. H FP
Various topics in Italian literature or culture. Minimum of three hours of Italian 499 required for a B.A. with Honors in the Italian option of the French degree. Students must discuss Honors eligibility and their topic with a faculty member before enrolling. Honors paper must be written in Italian.

ITAL 601. Italian for Reading Knowledge. 3 Credits.
Special course for candidates for advanced degrees. Fundamentals of grammar and reading of material of medium difficulty. Open to graduate students and to seniors planning graduate study. Does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of Italian. Conducted in English. Prerequisite: Graduate status or instructor permission.

ITAL 695. Graduate Directed Readings in Italian. 1-3 Credits. U FP
May be taken more than once, total credit not to exceed nine hours. Directed readings, conferences with instructor. Prerequisite: ITAL 495 or consent of instructor.

Bachelor of Arts in French, Francophone and Italian Studies

Why study French and/or Italian?
Speakers of French and Italian span five continents. French is spoken by over 220 million people. Italian is spoken by over 65 million people. By 2050, it is estimated that there will be over 750 million French speakers, 80% of whom will live in Africa, becoming the world’s most spoken language. French and Italian are the international languages of cooking, fashion, theater, the visual arts, dance and architecture. Thousands of US companies do business with Italy and the Francophone world. In an increasingly mobile and interconnected planet, the study of language, literature and culture has never been more crucial for our students’ success. It provides students with a competitive edge in an increasingly internationalized workplace; for example, four out of five new jobs in the US are created as a result of foreign trade. Above all, learning a second language enables a greater understanding of other cultures while enhancing your own.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

French and Italian Programs

The department offers the major in French, an option in Italian, and an option in French and Italian studies. Prospective majors should consult the department during or before the second semester of the sophomore year.

Students pursuing a major in French or an option in Italian are encouraged to take courses in European studies, European history, art history, and philosophy, as well as English and foreign languages, literatures, and linguistics. Students often combine a major in French or the option in Italian with majors in business, humanities, journalism, the sciences, premedicine, or prelaw.

Language majors are useful in a variety of careers. The study of languages, literatures, and cultures enhances personal growth and broadens professional horizons, allowing fuller participation in an increasingly global community.

First- and Second-Year Preparation

The normal course progression for first- and second-year students considering a major in French is FREN 110, FREN 120, FREN 230, and FREN 240. FREN 230 and FREN 240 may be replaced by FREN 234. Eligible students are encouraged to enroll in honors sections of third-semester French (FREN 231) and fourth-semester French (FREN 241). FREN 301 is the prerequisite for all other 300-level courses. FREN 326 is the prerequisite for all 400-level courses. The normal course progression for first- and second-year students considering the option in Italian is ITAL 110, ITAL 120, ITAL 230, and ITAL 240. Eligible students are encouraged to enroll in intensive sections of first-semester Italian (ITAL 155) and second-semester Italian (ITAL 156).

French and Italian Studies Core Knowledge and Skills

Majors choosing this option must complete courses as indicated in following areas:

French Grammar and/or Composition. Satisfied by one of the following:
- FREN 301 French Written and Oral Communication 1
- FREN 350 Applied French Grammar and Composition I
- FREN 352 Business French/Le Français Professionnel

French Conversation. Satisfied by one of the following:
- FREN 375 Intermediate French Conversation
- FREN 376 Advanced French Conversation

Italian Grammar and Composition. Satisfied by two courses (6 hours):
- ITAL 300 Composition and Conversation
- ITAL 315 Advanced Composition and Conversation

French Literature. Satisfied by two courses:
- FREN 326 Introduction to French Literature
- And an additional course chosen from the following:
  - FREN 432 Francophone African Literature
  - FREN 440 Studies in French Culture:
  - FREN 450 French Literature of the Middle Ages
  - FREN 455 French Literature of the Renaissance
  - FREN 460 Identity, Absolutism, and Power in France, 1589-1715
  - FREN 462 French Literature of the Eighteenth Century
  - FREN 465 French Literature of the 19th Century
  - FREN 470 French Literature of the Twentieth Century
- FREN 480 Studies in French Literature: _____

Italian Literature. Satisfied by one course (3 hours):
- ITAL 301 Introduction to Italian Literature and Textual Analysis

French Culture. Satisfied by one course (3 hours) chosen from the following:
- FREN 410 Survey of French Culture I
- FREN 420 Survey of French Culture II
- FREN 430 La France d’Aujourd’Hui
- FREN 431 French-Speaking World (Outside France)
- FREN 440 Studies in French Culture: _____

Italian Culture. Satisfied by one course (3 hours) chosen from the following:
- ITAL 336 Italy and the Italians
- ITAL 340 Studies in Italian Culture: _____

Majors are strongly encouraged to study abroad. Please see your advisor about this opportunity.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 24 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in French and Italian are available here: French & Francophone Studies (p. 1406), Italian Studies (p. 1407), or French, Francophone and Italian Studies (p. 1408), or by using the left-side navigation.
Departmental Honors in French
Undergraduate students may graduate with honors in French by completing 6 hours of FREN 499, intensive honors tutorials on limited areas of French or Francophone literature or culture. Consult the department early in the junior year. To begin honors work and to graduate with honors, students must have minimum grade-point average of 3.5 in French.

Departmental Honors in Italian
Undergraduate students may graduate with honors in Italian by completing 3 hours of ITAL 499 and one approved 3-hour course in a relevant field in addition to the 24-hour requirement for the option. Consult the department early in the junior year. To begin honors work and to graduate with honors, students must have minimum grade-point average 3.5 in Italian.

Summer Language Institute in Paris
The department conducts a 4-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend four days touring Normandy. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Summer Program in Florence, Italy
The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Semester and Year Programs in France
A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l'Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/).

Semester Program in Rome, Italy
The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3 For a list of courses to fulfill the Italian required electives, visit the KU Core Website (https://kucore.ku.edu/courses/).

4 ITAL 301 satisfies either Goal 3 Social Science or Goal 4.2 Global Awareness. ITAL 301 is offered once a year. This course is recommended to be paired with ITAL 315 in the spring, but it may be offered in the fall some years. In that case, the student can take ITAL 300 and ITAL 301 together.

5 Typically KU Core Goal 6 is fulfilled by taking a major course approved for this goal. See the list of Italian courses available to fulfill Goal 6 by visiting the KU Core Website (https://kucore.ku.edu/courses/).

6 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BA in French, Francophone and Italian Studies**

Below is a sample 4-year plan for students pursuing the BA in French, Francophone and Italian Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
greater understanding of other cultures while enhancing your own. A result of foreign trade. Elective Courses

Students choose from among the courses already approved for the major in French. At least two of the four elective courses must be at the 400-level. Minors may include one course taught in English within the department, when available.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Summer Language Institute in Paris

The department conducts a 4-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend four days touring Normandy. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Summer Program in Florence, Italy

The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Semester and Year Programs in France

A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.
Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/).

**Semester Program in Rome, Italy**
The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live in shared apartments with other students at the institute. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

**Semester Program in Florence, Italy**
The department conducts a semester program in Florence for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

**Minor in Italian Studies**

**Why study Italian?**
Italian is spoken by over 65 million people. Italian is the international language of cooking, fashion, theater, the visual arts, dance and architecture. Thousands of US companies do business with Italy. In an increasingly mobile and interconnected planet, the study of language, literature and culture has never been more crucial for our students’ success. It provides students with a competitive edge in an increasingly internationalized workplace; for example, four out of five new jobs in the US are created as a result of foreign trade. Above all, learning a second language enables a greater understanding of other cultures while enhancing your own.

**Requirements for the Minor in Italian**
The department offers minors in both French and Italian. Consult an advisor in the appropriate language.

**Minor in Italian**
18 credit hours are required, as follows:

**Undergraduate Certificate in Francophone Studies**

There are currently over 300 million French-speakers worldwide, 60% of whom live outside France. By 2050, there will be an estimated 750 million French-speakers, 80% of whom will live in Africa (“France Diplomatie”). The certificate provides linguistic and cultural cross-disciplinary training, not available in other programs, for students majoring in French and Francophone Studies, African and African-American Studies, and related programs, who wish to learn about interactions between French-speaking and indigenous peoples across the Francophone world, from Africa, North America, Indian Ocean, Southeast Asia, and Polynesia. The certificate requires one three-hour gateway course in FREN introducing the student to French-speaking global cultures; one course in an indigenous language (Arabic, Haitian Creole, Wolof, taught by AAAS); and two junior-/senior-level elective courses from related fields.

</table>
The Department of French, Francophone, and Italian Studies offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (https://frenchitalian.ku.edu/affiliated-faculty/) is dynamic, professionally active, and committed to excellence in scholarship and teaching. The major emphasis of teaching and research is French and Francophone literature. The department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally students from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (https://frenchitalian.ku.edu/graduate-admission/) of the department website for additional information.

**Departmental Funding**

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed, based on funding availability and performance, for 2 years for M.A. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://frenchitalian.ku.edu/ma-funding-opportunities/) of our departmental website.

**Additional Funding**

Other funding opportunities for graduate students include the Office of Study Abroad's Springer award; the department's Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**M.A. Degree Requirements**

</tr>
</tbody>
</table>

As part of the 30-hour requirement, students may also take: "In the event that a required course cannot be offered during the
time when the student completes coursework, the student will take a substitute course in consultation with the DGS.

- A maximum of two graduate-level courses (up to 6 hours) outside the department. (e.g. Women, Gender and Sexuality Studies, Linguistics, Art History, Film Studies, etc.) This selection should be determined in consultation with the Director of Graduate Studies.
- A maximum of 3 hours of FREN 795 Investigation and Conference.
- Current elective offerings can be found on the departmental website (https://frenchitalian.ku.edu/graduate-course-offerings/).

2. A reading knowledge of a second Romance language, Greek, Latin, German, Arabic, or other relevant language.

3. Comprehensive written and oral examinations.
   a. Students are expected to complete their M.A. written and oral examinations in the fourth semester of their studies. No graduate student who has an outstanding “Incomplete” in a course will be allowed to take the qualifying exams. The exam is given two times a year: in the spring semester before April 1 and in the fall semester before November 1. Students have 5 hours to complete the written examination, which is based on a reading list covering all periods of French and Francophone literature. The first day will include identifications and short essay questions (2 hrs.); the second day will be devoted to long essay questions (3 hrs.). Exams are taken on computer. Students will not be allowed to use any other electronic devices, the internet, or any outside resources while taking the exam. Any violation of this rule will result in a charge of academic misconduct, which could result in a failing grade for the exam. The examination is graded as follows: “Strong pass,” “Pass,” “Weak pass,” or “Fail.” Once the candidate’s exam has been read and graded (normally within 7 to 10 days), the DGS confers with the graduate faculty to discuss and confirm the evaluations, and then informs the student of the results.
   b. After the written examination is passed, an oral exam will be scheduled (typically within 2 to 3 weeks), with a committee of 3 faculty members. The oral exam lasts approximately 2 hours and consists of (a) the candidate’s commentaire de texte, followed by discussion, and (b) questions covering all areas of French and Francophone literature. One week before the oral examination, the candidate, in consultation with the graduate director, will choose the author for the commentaire de texte. The Director of Graduate Studies, in consultation with the members of the examination committee, will choose the short text or passage to be analyzed and will give a copy of the text to the student 2 hours prior to the examination. The commentaire de texte must be given in French. In the discussion and question period that follows, the candidate should expect to speak both French and English and normally should answer in the language in which a question is asked.
   c. Grading categories for the oral exam: “Honors,” “Pass,” or “Fail.”
   d. A student who passes the M.A. exams and who wishes to pursue a doctorate at the University of Kansas should so inform the Director of Graduate Studies, who will convene the graduate faculty. The student will submit a 15-20 page writing sample, a statement of intent, a transcript, and one letter of recommendation from a department faculty member. The graduate faculty will evaluate the materials and vote to admit or deny admission into the Ph.D. program.

At least 50% of coursework for the master’s degree must be taken at the 700 level or above.

Handbook for Graduate Students
A detailed presentation of departmental processes and regulations is included in the department’s Graduate Student Handbook.

Summer Language Institute in Paris
The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Graduate Study Abroad
Graduate students have the opportunity to serve as program assistants for the department’s Paris Summer Language Institute. The department also has a graduate exchange agreement with the Université de Franche-Comté, Besançon, France.

Doctor of Philosophy in French and Francophone Studies
The Department of French, Francophone, and Italian Studies offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (https://frenchitalian.ku.edu/faculty/) is dynamic, professionally active, and committed to excellence in scholarship and teaching. The major emphasis of teaching and research is French and Francophone literature. The department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (https://frenchitalian.ku.edu/phd-curriculum/) of the department website for additional information.

Departmental Funding
The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year, .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
• payment of up to 3 hours of student fees
• optional University-subsidized group health insurance

The appointments are guaranteed, based on funding availability and performance, for up to 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. Additional Funding

Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Ph.D. Program in French

In addition to the general admission requirements (https://gradapply.ku.edu/apply/) from the Office of Graduate Studies, applicants should have the equivalent of the M.A. in French offered at KU.

Submit your graduate application online (https://gradapply.ku.edu/apply/). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admissions (https://frenchitalian.ku.edu/graduate-admission/) page of the department website, or contact the department’s Graduate Program Coordinator, Aley Pennington, aleypennington@ku.edu.

Ph.D. Degree Requirements

In addition to the general requirements for the Doctor of Philosophy (http://www.policy.ku.edu/graduate-studies/doctoral-degree-requirements/), a student must complete the following departmental requirements:

1. 24 hours of post-M.A. work (exclusive of dissertation hours). Ph.D. students who did not receive their MA in French at KU must complete a total of 30 post M.A. hours, including*:

   FREN 704 Methods in Foreign Language Instruction
   FREN 720 Introduction to Graduate Studies in French

   *Ph.D. students who have taken equivalent courses for either or both of these requirements as part of their M.A. studies elsewhere may petition the department for a waiver of FREN 704 and/or FREN 720 to reduce the total required hours. To determine equivalency, the student must submit course materials from the previous institution. Students petitioning this requirement should first consult with the DGS.

   Current elective offerings can be found on the departmental website (https://frenchitalian.ku.edu/graduate-course-offerings/).

2. 6 hours of graduate-level coursework taken outside the department as an interdisciplinary minor field of concentration. These hours will count towards the 24 to 30 hours of post-MA coursework. Students may also apply these 6 hours of graduate-level coursework outside the department toward one of KU’s Graduate Certificates (e.g. African Studies, Women, Gender and Sexuality Studies, etc.).

3. During their last semester of coursework, Ph.D. students must enroll in 3 hours of FREN 995 Investigation and Conference, with the faculty member who typically will become the student’s dissertation director. These hours will count towards the 24 to 30 hours of post-MA coursework.

4. A successful written and oral comprehensive exam, which will be based on a portfolio containing the following items:
   • The 3 reading lists, highlighting which works have already been read
   • Prospectus draft and bibliography
   • Website. The website will include a professional profile, a CV, and pedagogical materials
   • A research paper that has been published or is publishable

5. At least 1 year of teaching in the department

6. A dissertation prospectus which should clearly state the topic of the proposed research and what questions and problems the work proposes to address and answer. Since the dissertation must be an original contribution to the discipline of French and Francophone studies, the prospectus should make clear how the proposed work develops, challenges, or departs from previously published research. It should demonstrate that the student has a sufficient and critical command of the literature and the present state of the field. A tentative outline of chapters should provide some sense of the work’s overall plan and structure. Finally, the prospectus should include a substantial bibliography.

7. A successful dissertation defense. When the dissertation has been approved by the dissertation committee, the final examination (or defense) may take place. The dissertation is accepted or rejected (or accepted subject to revision) by a majority of the faculty members on this five-person committee. At least three weeks prior to the scheduled defense, the candidate must provide copies of the dissertation in essentially final form (and the dissertation abstract) to members of the committee. At the final examination, questions and discussion will normally center on the dissertation, but may also...

range beyond it, to related material, to the general literary area or genre, etc.

For additional information, please see our Graduate Handbook.

Research Skills & Responsible Scholarship Requirement

The university also requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before attempting the comprehensive oral exam. For French doctoral students, this requirement is met by the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 704</td>
<td>Methods in Foreign Language Instruction</td>
<td>3</td>
</tr>
<tr>
<td>FREN 720</td>
<td>Introduction to Graduate Studies in French</td>
<td>3</td>
</tr>
</tbody>
</table>

Proficiency in a second language, which can be a second Romance language, Latin, Greek, German, Arabic, or another language pertinent to the student's career path and approved by the faculty. (Students specializing in medieval or Renaissance literature are strongly encouraged to take Latin. Students specializing in Francophone Studies are strongly encouraged to take Arabic, Wolof, or Haitian Creole.) Proficiency may be demonstrated by completion of the fourth-semester course (or equivalent) or by examination.

Departmental new graduate student orientation, held each Fall semester during the week prior to the first instructional week of classes.

Handbook for Graduate Students

A detailed presentation of departmental processes and regulations may be found in the department's Graduate Student Handbook.

Summer Language Institute in Paris

The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L'Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Graduate Study Abroad

Graduate students have the opportunity to serve as program assistants for the department’s Paris Summer Language Institute. The department also has a graduate exchange agreement with the Université de Franche-Comté, Besançon, France.

Graduate Certificate in Medieval and Early Modern Studies

The graduate certificate in Medieval and Early Modern Studies (ca. 500-1700) offers valuable training to students who specialize in Medieval, Early Modern, or Medieval & Early Modern fields. The program integrates important methodologies (in archival research, book history, digital humanities, for example) and a broad spectrum of specialized content. The aim is to enrich the interdisciplinary training of graduate students and foster an intellectual community of students and faculty supporting education and research. We offer a variety of courses from which students tailor electives to best enhance their degree program. This can be especially valuable for doctoral students as humanities faculty positions in early periods ask increasingly for competence across fields, especially in contingent periods.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

For admissions requirements to the Medieval and Early Modern Studies Graduate Certificate, please see our website (https://frenchitalian.ku.edu/medieval-graduate-certificate-course-menu/). For additional information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted via the Graduate Admissions website (https://gradapply.ku.edu/apply/).

The Graduate Certificate in Medieval and Early Modern Studies requires the completion of 12 credits of coursework in the student’s area of research interest chosen from the list of approved elective courses available on the Department of French, Francophone & Italian Studies website (https://frenchitalian.ku.edu/medieval-graduate-certificate-course-menu/). The choices must be approved by a Medieval Studies advisor in the home department in advance. Courses not on the list but may be compatible must be approved by the certificate administrators. Please note that reading and conference courses do not count for the certificate.

At least 50% of coursework counted towards the certificate must be 700 level or above.

Geography and Atmospheric Science

Geography as an academic discipline studies the spatial dimensions of, and links between, culture, society, and environmental processes. The study of Atmospheric Science involves weather and climate and how those affect human activity and life on earth. At the University of Kansas, our department's programs work to understand human activity and the physical world.

Why study geography?

Because people, places, and environments interact and evolve in a changing world. From conservation to soil science to the power of geographic information science data and more, the study of geography at the University of Kansas prepares future leaders. The study of geography encompasses landscape and physical features of the planet and human activity, the environment and resources, migration, and more. Our program (http://geog.ku.edu/degrees/) has a unique cross-disciplinary nature with pathway options and diverse faculty (http://geog.ku.edu/faculty/) who are passionate about teaching and research. Our students
are engaged through internships, undergraduate and graduate research, departmental organizations, and events. Alumni work in a variety of fields including academia, business, conservation, environmental regulation, GIS, regional planning, resource management, soil science, urban planning, and more. A variety of scholarship opportunities are offered through both the University of Kansas and the Department of Geography and Atmospheric Science for qualified undergraduate and graduate students.

Why study atmospheric science?

The study of atmospheric processes enables us to understand human interactions with the environment and generate solutions that make a real difference in people’s lives. The atmospheric science program at the University of Kansas is the only one of its kind in the state, following national meteorological guidelines set by both the American Meteorological Society (AMS) and the National Weather Service (NWS). Our program provides students with a solid foundation, but also options. Our students are engaged through research, internships, and several student organizations including the KU Chapter of the American Meteorological Society (AMS), which sponsors an annual Douglas County Severe Weather Symposium, in addition to monthly events. We recently partnered with the National Weather Service to provide opportunities for students to explore work in a variety of NWS regional offices through the Student Career On-Site Training (SCOOut) program.

Facilities

The Department of Geography and Atmospheric Science is housed in Lindley Hall on the KU Lawrence campus, which includes multiple laboratories, computer labs, and a weather station. Additionally, the KU Field Station just north of Lawrence provides students an outdoor lab for field work, research projects and more. The station, established in 1947, is part of the National Ecological Observatory Network (NEON), a National Science Foundation initiative. Classes are held in both Lindley Hall and the new Earth, Energy, and Environment Center.

Geography labs include multiple computer labs and those for Soils and Geomorphology, Palynology, and Pedology. Additional campus resources include the map collections of the Spencer Research Library and University Map Library. The University of Kansas Undergraduate Research Center is another great resource. The center aids undergraduates interested in doing research, offers funding opportunities, and provides step-by-step workshops which provide students the skills necessary to explore, investigate, and excel.

Atmospheric Science labs include a Meteorology and Climate Hub (MACH) with state-of-the-art AWIPS II software used by the National Weather Service and computer lab and collaborative space dedicated to students doing research. Students also get hands-on experience, from forecasting and providing reports to university radio (KJHK 90.7 FM) and television (KUJH-TV) to research project opportunities through our department and the University of Kansas Undergraduate Research Center.

Undergraduate Programs

Geography

Geography integrates information from a variety of sources to study the nature of culture areas, the emergence of physical and human landscapes, and problems of interaction between people and the environment. Mapping and other techniques for gathering and displaying spatial information are integral parts of the field. We offer BA, BGS, and BS undergraduate degrees in Geography as well as a minor with an emphasis in General Geography or Geographical Information Science (GIS). We also offer an undergraduate GIS Geographical Information Science Certificate.

Geography Pathways include:
- Geopolitics and Political Geography, Geospatial Analytics/Geoinformatics, Climate and People, Soils and Ecohydrology, Urban/Economic Geography, and People, Migration, and Globalization.

Atmospheric Science

The atmospheric science program offers undergraduates a fundamental knowledge of the atmosphere and the weather it generates. Interactions between weather phenomena and human decisions and activities give the subject important applications. Several pathways lead to a Bachelor of Science degree, with concentration options in General Meteorology, Air Pollution Meteorology, Hydrometeorology, and News Media Forecasting. A Minor in Atmospheric Science is also available.

Students from other disciplines such as biology, math, psychology, environmental studies, and other subjects, have chosen to have a double major, adding Atmospheric Science to enhance their education, skills, and career options.

Courses for Nonmajors

All geography courses below the 500 level are open to nonmajors, as are several above that level.

Graduate Programs

Geography

The graduate curriculum emphasizes broad geographic training while encouraging in-depth commitment to specialized concentrations. Students also are encouraged to take coursework outside the department that complements their degree programs. Programs are tailored by the student and advisor to conform to the student’s interests and needs, as well as to fulfill the general degree requirements.

The central thrust of the department and the chief capabilities and interests of the faculty fall within these research-teaching areas:

1. Human geography including cultural geography, place, regional development, economic geography, health, diaspora, border conflicts, and environmental policy;
2. Geoinformatics including cartography, geographic information systems (GIS), and remote sensing;
3. Physical geography including geomorphology, soils, ecohydrology, and biogeography;
4. Regional geography including Africa, East Asia, Russia, Latin America, and the United States; and
5. Climatology.

Atmospheric Science

The purpose of the program is to expand the student’s knowledge of fundamental atmospheric processes and how the atmosphere interacts with other parts of the environment. Students become familiar with quantitative research methods and how these various approaches can be used to address different problems in atmospheric science. Students gain an in-depth ability to learn specific skills and apply them toward thesis work. These skills consist of, for example, statistical analysis techniques,
numerical modeling, or work with atmospheric instrumentation. The breadth of the program and the diverse research topics explored by the faculty are able to accommodate students with a variety of interests.

**Graduate Non-Degree Seeking Students**

Students who are interested in enrolling in graduate level coursework in the Department of Geography and Atmospheric Science without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking status. See the department’s Admission webpage (https://geog.ku.edu/admission/) for further details.

## Courses

**ATMO 105. Introductory Meteorology. 5 Credits. NE N LFE**

A lecture and laboratory course introducing students to the atmosphere, weather and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting.

**ATMO 106. Introductory Meteorology, Honors. 5 Credits. NE N LFE**

Honors version of ATMO 105. A lecture and laboratory course introducing students to the atmosphere, weather and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting. Prerequisite: Membership in University Honors Program or by permission of instructor.

**ATMO 177. First Year Seminar: _____. 3 Credits. U**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Atmospheric Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ATMO 220. Unusual Weather. 3 Credits. NE N**

An introductory lecture course which surveys the general principles and techniques of atmospheric science and illustrates their application through discussions of natural but unusual weather phenomena such as blizzards, hurricanes, tornados, and chinooks, of the effects of air pollution on weather, and of intentional human alteration of the atmosphere.

**ATMO 321. Climate and Climate Change. 3 Credits. N**

This course is designed to introduce students to the nature of the Earth’s physical climate. It introduces the basic scientific concepts underlying our understanding of our climate system. Particular emphasis is placed on energy and water balances and their roles in evaluating climate change. The course also evaluates the impact of climate on living organisms and the human environment. Finally, past climates are discussed and potential future climate change and its impact on humans is evaluated. (Same as GEOF 321.) Prerequisite: ATMO 105 or GEOG 104.

**ATMO 499. Honors Course in Atmospheric Science. 2-3 Credits. N**

Open to students with nine hours of upper level credit in Atmospheric Science, an average of at least 3.5 in all Atmospheric Science courses, and an overall average of at least 3.25. Includes the preparation of an honors paper and its defense before a committee of a least two regular faculty members.

**ATMO 505. Weather Forecasting. 3 Credits. N**

A first course in synoptic meteorology designed to introduce students to weather analysis and forecasting through the application of hydrodynamic and thermodynamic principles to operational analysis and forecasting. Topics include analysis and interpretation of surface and upper-air observations and data from satellites, radars, and wind profilers; chart and sounding analysis; and three-dimensional, conceptual models of weather systems. The course includes student-led weather briefings and analysis exercises. Prerequisite: ATMO 105 and MATH 125 or MATH 115.

**ATMO 521. Microclimatology. 3 Credits. N**

A study of climatic environment near the earth-atmosphere interface. Consideration of rural climates in relation to agriculture and urban climates as influenced by air pollution and other factors. Emphasis is on physical processes in the lower atmosphere, distribution of atmospheric variables, the surface energy budget and water balance. (Same as GEOF 521.) Prerequisite: ATMO 105 and MATH 125.

**ATMO 525. Air Pollution Meteorology. 3 Credits. N**

A study of background levels and concentrated sources of atmospheric pollution together with considerations of pollution buildup in urban areas as related to particular weather conditions. Inadvertent weather modifications and effects of atmospheric pollution on particular weather events and general climate will be discussed. Prerequisite: ATMO 105, MATH 125, EECS 138 and CHEM 130.

**ATMO 531. Topics in Atmospheric Science: _____. 1-3 Credits. N**

An investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs.

**ATMO 605. Operational Forecasting. 2 Credits. N**

Students enhance their forecasting expertise by preparing forecasts for presentation to the public through a variety of media. Classroom activities include weekly map discussions and analysis of current weather situations. Forecasting topics such as forecast verification, aviation forecast products, severe weather, flash floods and watches and warnings are examined. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: ATMO 505 and ATMO 640.

**ATMO 606. Forecasting Practicum - Private Industry. 2 Credits. N**

Practical experience in private industry working with current and/or archived meteorological data. Possibilities include the preparation of forecasts for TV stations and meteorological consulting firms, and working with environmental consulting firms to assess air pollution hazards. May be repeated two times for credit. Prerequisite: ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: Instructor permission.

**ATMO 607. Forecasting Intern - National Weather Service. 2 Credits. N**

Practical experience working in a National Weather Service forecasting center in analyzing weather data and preparing weather forecasts. May be repeated two times for credit. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: Instructor permission.

**ATMO 615. Tropical Meteorology. 3 Credits. N**

This course presents an undergraduate survey of tropical meteorology with an emphasis on clouds and convection ranging from fair-weather cumulus to hurricanes. Specific topics include the general circulation (climatology, air-sea interactions, Hadley and Walker circulation), convective processes in the topics (diurnal cycles, mesoscale convective systems, convectively coupled waves), and tropical variability (El Nino,
Madden-Julian oscillation, monsoons, climate change). The genesis, thermodynamics, dynamics, and other topics related to tropical cyclones and hurricanes are also discussed. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in ATMO 715. Prerequisite: ATMO 640 and/or instructor permission.

ATMO 630. Synoptic Meteorology. 3 Credits. N
Interpretation, development, and analysis of synoptic charts. Prerequisite: ATMO 505 and ATMO 640.

ATMO 634. Physical Climatology. 3 Credits. N
Atmospheric processes are described and discussed in relation to the climate of the earth's surface. Such topics as the greenhouse effect, ozone depletion, and the effect of solar irradiance on climatic change will be included. The physical processes and relationships between various climatic features will be studied. Prerequisite: ATMO 505 and DSCI 301 or MATH 526.

ATMO 640. Dynamic Meteorology. 3 Credits. N
This course introduces the student to the fundamentals of fluid dynamics necessary for understanding large scale atmospheric motions. Fundamental physical laws of conservation of mass, momentum and energy are examined and applied to atmospheric flows. Rotation in the atmosphere is examined quantitatively in terms of both circulation and vorticity. Prerequisite: MATH 127 and PHSX 214 or PHSX 212 and PHSX 226.

ATMO 642. Remote Sensing. 3 Credits.
This course is designed to prepare students to effectively use remotely sensed data in operational or research settings for further work in this field. Topics include radiation and radiation transfer applied to active and remote sensing; radiative properties of space, sun, earth and atmosphere; instrument design considerations and operational characteristics; inversion methods for temperature or concentration profiling; surface temperature measurement; cloud top height determination; rain rate and wind velocity measurement; severe weather detection; satellite photograph interpretation. Prerequisite: ATMO 680, MATH 581.

ATMO 650. Advanced Synoptic Meteorology. 3 Credits. N
Analysis and interpretation of synoptic weather charts including treatment of numerical weather forecasting. Prerequisite: ATMO 630 and ATMO 660.

ATMO 660. Advanced Dynamic Meteorology. 3 Credits. N
Advanced study of the atmosphere including treatment of the vorticity equation. Prerequisite: ATMO 640 and MATH 220 or MATH 320.

ATMO 680. Physical Meteorology. 3 Credits. N
This course is designed to enhance the student's understanding of atmospheric processes through the study of these processes at molecular through micro scales. Topics include the properties and behavior of gases; transfer processes; phase change; solar and earth radiation; cloud drop, ice crystal and precipitation formation; atmospheric electricity; stratospheric chemistry. Prerequisite: MATH 127; PHSX 214, or PHSX 212 and PHSX 236.

ATMO 690. Special Problems in Meteorology. 1-3 Credits. N
Prerequisite: Nine hours in meteorology.

ATMO 697. Seminar for Seniors. 1 Credits. N
Current research in atmospheric science will be discussed. May be repeated for a total of two credit hours. Prerequisite: Senior level in atmospheric science.

ATMO 699. Undergraduate Research. 2 Credits. U
Work on a research project under the supervision of a faculty member. Prerequisite: Nine credit hours in atmospheric science. May be taken up to three times for credit.

ATMO 710. Atmospheric Dynamics. 3 Credits.
Presentation of contemporary approaches to the study of atmospheric dynamics. May include methodologies that provide insight into global, synoptic, mesoscale or microscale motions. Prerequisite: ATMO 660 or equivalent.

ATMO 715. Tropical Meteorology. 3 Credits.
This course presents a survey of tropical meteorology at the graduate level with an emphasis on clouds and convection ranging from fair-weather cumulus to hurricanes. Specific topics include the general circulation (climatology, air-sea interactions, Hadley and Walker circulation), convective processes in the topics (diurnal cycles, mesoscale convective systems, convectively coupled waves), and tropical variability (El Nino, Madden-Julian oscillation, monsoons, climate change). The genesis, thermodynamics, dynamics, and other topics related to tropical cyclones and hurricanes are also discussed. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in ATMO 615. Prerequisite: Instructor consent.

ATMO 720. Atmospheric Modeling. 3 Credits.
Illustration and application of contemporary approaches to mathematical and statistical description of atmospheric phenomena. Prerequisite: Consent of instructor.

ATMO 725. Clouds, Climate and Precipitation. 3 Credits.
This course includes seminar-style lectures and discussions bridging cloud physics, physical climatology, and climate dynamics with a central theme regarding how clouds and precipitation interact with the Earth's climate system. Specific topics include aerosol-cloud interactions, large-scale convective organization in the tropics, mid-latitudes, and polar regions, diabetic feedbacks on the general circulation, natural climate variability, and cloud effects in global climate models. How cloud systems have changed in recent decades, in addition to future model scenarios, are also discussed.

ATMO 731. Advanced Topics in Atmospheric Science: ___. 1-3 Credits.
Advanced investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs.

ATMO 898. Readings in Atmospheric Science. 1-4 Credits.
Independent readings of special problems in Atmospheric Science.

ATMO 899. Master's Thesis. 1-10 Credits.
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis.

ATMO 998. Research in Atmospheric Science. 1-5 Credits.
Individual investigation of special problems in Atmospheric Science.

ATMO 999. Doctoral Dissertation. 1-10 Credits.
Enrollment course for writing doctoral dissertation in Atmospheric Science. Graded on a satisfactory progress/limited progress/no progress basis.

Courses

GEOG 100. World Regional Geography. 3 Credits. SC S
An introductory survey of the environmental setting, historically formative periods, and present-day issues that distinguish the major culture areas of the world.

GEOG 102. People, Place, and Society. 3 Credits. SC S
An examination of the relationships between humans and their environments. The course introduces students to basic concepts in human geography relating to economic activities, landscapes, languages, migrations, nations, regions, and religions. Serves as the basis for further course work in cultural, economic, political, population, and urban geography.

GEOG 103. People, Place, and Society, Honors. 3 Credits. SC S
An introduction to how human societies organize space and modify the world about them. Resultant patterns on the landscape are interpreted through principles of space perception, cultural ecology, diffusion, land use, and location theory. Comparisons are made between urban and rural areas and between subsistence and commercial societies. Open to students who have been accepted into the College Honors Program.

GEOG 104. Introduction to Physical Geography. 3 Credits. NE N
The components of the physical environment are discussed in order to familiarize the student with their distributions and dynamic nature. Major topics include the atmosphere, landforms, soils, and vegetation together with their interrelationships and their relevance to human activity. This course and GEOG 105 together satisfy the laboratory science requirement. Both courses are required for geography majors.

GEOG 105. Introductory Laboratory in Physical Geography. 2 Credits. U LFE
A laboratory course designed to complement GEOG 104 in satisfying the laboratory science requirement. It is required for geography majors. Laboratory exercises include a wide variety of analyses using data on the atmosphere, hydrosphere, biosphere, and lithosphere. Prerequisite: GEOG 104, which may be taken concurrently.

GEOG 111. Mapping Our Changing World. 4 Credits. N LFE
This course is an introduction to geospatial technologies. It focuses on the conceptual and technical aspects of mapping technologies that transform information about locations, people, objects, environments, events, and phenomena to digital representations of the world and as end-products of geospatial analysis. Topics covered include surveying, aerial photography and photogrammetry, satellite remote sensing, global positioning systems (GPS), geographic information systems (GIS), and thematic mapping. Students will learn how to acquire and develop geospatial data as the sources for mapping, the skills of analyzing and interpreting spatial information, and how geovisualization can be used in addressing real-world problems. (Same as GIST 111.)

GEOG 140. Global Environment I: The Discovery of Environmental Change. 3 Credits. U LFE
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as EVRN 140 and HIST 140.) Open only to students admitted to the University Honors Program or by permission of instructor.

GEOG 144. Global Environment I: Discovery of Environmental Change, Honors. 3 Credits. U LFE
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as EVRN 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor.

GEOG 145. Global Environment II: The Ecology of Human Civilization, Honors. 3 Credits. U
This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as EVRN 145 and HIST 145.) Open only to students admitted to the University Honors Program or by permission of instructor.

GEOG 146. Scientific Principles of Environmental Studies. 3 Credits. NB N
This course provides the scientific knowledge necessary to understand the changing relationships between humans and the natural environment, with an emphasis on the assessment of current environmental problems and critical evaluation of potential solutions. Major topics include fundamental scientific concepts and principles, interactions among the biological and physical components of the environment, implications of a growing human population, water resources, the atmosphere, climate, and energy sources. (Same as EVRN 148.)

GEOG 150. Environment, Culture and Society. 3 Credits. SC S
An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere, and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as EVRN 150.)

GEOG 160. Environmental Solutions. 1 Credits. N LFE
These labs are designed to explore the physical, social, and cultural dimensions of environmental systems. Students will engage in hands-on activities and field experiences about a range of current and historical environmental issues affecting both the United States and other parts of the world. This course will broaden your understanding of important foundational concepts and skills including basic scientific principles and processes that govern the functioning of environmental systems, ways to apply this understanding to case studies and field experiences, and how to use these perspectives to eventually make informed, just decisions about climate change, the future flourishing of humans and
non-humans. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students with credit in EVRN 360/361. (Same as EVRN 160.) Prerequisite: This course requires previous or concurrent enrollment in EVRN 140/144 (or cross-listed and transfer equivalents).

GEOG 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Geography. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

GEOG 201. Culture and Health. 3 Credits. H/W
This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 203 and GIST 210.)

GEOG 202. Culture and Health, Honors. 3 Credits. H/W
Honors version of AAAS 203. GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 204 and GIST 211.)

GEOG 205. Disaster, Disease, and Mapping. 3 Credits.
Disaster, Disease, and Mapping investigates the intricate interactions between both the physical and human causalities of infectious disease transmission by examining multiple pathogens, their reservoirs, and their transmission modes. Maps are used to critically ascertain the spatial distribution of disasters and how human and physical actions, promote or reduce, disease transmission. We will study actions affecting transmission including physical factors such as environmental degradation, natural hazards, and climate change as well as social/human factors of globalization, inequity of access to healthcare, and regional and global responses.

GEOG 335. Introduction to Soil Geography. 4 Credits. N LFE
This course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body; genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between solid, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken EVRN 535 or GEOG 535. (Same as EVRN 335.) Prerequisite: GEOG 104 or GEOL 101, or consent of instructor.
GEOG 336. Introduction to Environmental Hydrology and Water Resources. 3 Credits. N
Water is vital to life on earth. In this course we cover components of the water or "hydrologic" cycle, how management has altered them, and how they are predicted to change with the changing climate. We discuss the evolution of water policy, its implications for management and the economic impact of human perturbation on water. We study the physical processes that govern the water cycle, learn how they are measured, and estimate hydrologic fluxes. (Same as EVRN 363.) Prerequisite: GEOG 104 or GEOL 101.

GEOG 339. Topics in Physical Geography: _____ 1-3 Credits. N
An investigation of special topics in Physical Geography. May include coursework under headings of soils, vegetation, climate, or geomorphology. May be repeated if topic differs.

GEOG 351. Africa's Human Geographies. 3 Credits. NW S/W
An introduction to historical, cultural, social, political, and economic issues in Africa from a geographic perspective. The course begins with the historical geography of humanity in Africa, from ancient times through to the present. Other topics include cultural dynamics, demography, health, rural development, urbanization, gender issues, and political geography. Case studies from Eastern and Southern Africa will be used to illustrate major themes. (Same as AAAS 351.)

GEOG 352. Economic Geography. 3 Credits. S
This course offers an overview of contemporary economic geography with an underlying theme of uneven regional development. Topics examined include: the historical context in which capitalism emerged; the major theoretical approaches used to understand the temporal and spatial dynamics of capitalist society; a series of case studies of different economic sectors; and the global economy, including its development with respect to colonialism, neocolonialism, international trade, third world development, and population growth.

GEOG 354. Globalization: A Geographic Approach. 3 Credits. S
This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as GIST 354.)

GEOG 358. Introduction to Geographic Information Systems. 4 Credits. N LFE
An introduction to computer-based analysis of spatial data. Covers basic principles of collecting, storing, analyzing, and displaying spatial data. Emphasis is on problem-solving activities using common spatial analytical techniques (e.g., map overlay). The student will gain extensive hands-on experience with state-of-the-art GIS software.

GEOG 360. Computer Programming for Mapping and Spatial Analysis. 3 Credits. N
This course teaches basic computer programming concepts and skills for mapping and spatial analysis using various scripting languages. The goal is to enable students to write computer programs, develop mapping applications, and perform spatial data analysis. This course will lay the foundation for computerized problem solving skills that can be applied in later courses. This course assumes no previous programming experience.

GEOG 370. Introduction to Cultural Geography. 3 Credits. H
Charts some of the major lines of research in cultural geography, including critical theory, political economy, poststructuralist thought, feminism, and global consumption. Through fieldwork, diverse research methods are applied to issues such as community development, cultural patterns on the landscape and global impacts on local economies. Prerequisite: GEOG 100, GEOG 102 or GEOG 103; or consent of instructor.

GEOG 371. Environmental Geopolitics. 3 Credits. S
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GIST 371.)

GEOG 372. Environmental Policy. 3 Credits. N
An historical and analytical study of the formulation, implementation, and consequences of environmental policy in the United States. Attention is directed at relevant interest groups, issues specific to both rural and urban populations, relationships between national policies and international organizations concerned with environmental problems. Prerequisite: GEOG 148 or EVRN 148; and either EVRN 103 or HIST 103, EVRN 347 or HIST 347, or GEOG 150 or EVRN 150.

GEOG 373. Borders, Politics, and Territory. 3 Credits. S
This course considers how humans wield power in the geographical form of borders and territories. At the international level this is called geopolitics, while at the national, provincial, and local levels it is political geography. Rare is a day when headlines fail to portray ongoing negotiations for influence over the places and spaces through which people live and the very lines that divide them. This course traces the historical evolution of borders and territory before exploring contemporary practices of bordering and border crossing in relation to trade, migration, maritime, outer space, air space, environment, cyberspace, governance, and human rights. Prerequisite: GEOG 100 or GEOG 102 or equivalent or consent of instructor.

GEOG 374. Vulnerability and Adaptation. 3 Credits. S
The course objective is to understand and analyze human adaptation to environmental change by focusing on disasters and climate change. Each semester, the course rotates topics ranging from oil spills, hurricanes, sea-level rise to infectious disease. It provides undergraduate students with research experience and service learning, and offers opportunities for certificates through the Center for Undergraduate Research and the Center for Civic and Service Responsibility at KU. Students learn theories relevant to the case study, work in groups to generate research themes, conduct literature search and review, learn research methods, and write and present their work.

GEOG 377. Urban Geography. 3 Credits. S
This course explores the city from the multiple perspectives of its inhabitants. The cultural viewpoints of place, gender, age, and ethnicity are stressed. Traditional topics such as urban hierarchy, functions of the city, suburbanization, and ongoing changes in core and peripheral areas also receive attention. The distinctive landscapes of individual North American cities are emphasized, but examples also are drawn from throughout the world.

GEOG 390. Geography of the United States and Canada. 3 Credits. S
A study of the different physical, economic, and cultural settings in the United States and Canada which form the basis for the various forms of livelihood. Emphasis on the United States. (Same as AMS 390.) Prerequisite: An introductory geography course or background in the United States or Canadian history, social science, or culture or consent of instructor.

GEOG 395. Environmental Issues of: _____ 3 Credits. S
This regional geography course examines contemporary environmental issues of a particular region of the world based on the expertise of the professor. Course emphasis is on the interaction of natural,
socio-economic, and cultural factors of development that give rise
to environmental problems. Students learn how local, national, and
international government and non-governmental stakeholders address
environmental problems. Course may be repeated with different
professors.

GEOG 396. East Asia. 3 Credits. NW S/W
This course is an introduction to the contemporary politics, economy,
and culture of Korea, China, and Japan in the context of globalization. In
addition to the discussion of individual countries, the course examines the
cross-cutting themes such as international relations, cultural exchange,
and economic development in the region of East Asia.

GEOG 397. Geography of Kansas and the Plains. 3 Credits. S
A study of the different physical, economic, and cultural settings in Kansas
and the Plains that form the basis for various kinds of livelihood.

GEOG 399. Topics in Regional Studies: _____ 1-3 Credits. S
An investigation of special topics in Regional Studies. May include
coursework related to a specific country or region. May be repeated if
topic differs.

GEOG 451. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology
and the practice of stewardship, specifically the Indigenous Knowledge
that is born from these landscapes over millennia in place. Students
will interact with research that establishes scientific foundations as a
method to engage environmental problems in the anthropocene. The
concept of stewardship is a core tenet of this course, students will engage
with many approaches of stewardship, centering primarily on humans
as a part of, not apart from, the environment. This course is offered at the
400 and 700 level with additional assignments at the 700 level. Not
open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or
GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 451 and EVRN 451.)

GEOG 458. Geographical Information Systems: _____ 1-6 Credits. N
An introduction to the organization and components of geographic
information systems and their software. Fundamental concepts and their
implementation with applications to physical and human systems.

GEOG 490. Geographic Internship. 1-6 Credits. N
Supervised practical experience. The student submits a proposal
describing the internship prior to enrollment. Upon acceptance, regularly
scheduled meetings with the advisor provide assistance, guidance and
evaluation of progress in the professional experience. A written summary
of the experience or outcomes of the research project are prepared
independently by the student, a representative of the host agency, and
the advisor. Total credit not to exceed six hours. Prerequisite: Fifteen
hours of geography and permission of instructor.

GEOG 498. Special Topics in Geography: _____ 1-5 Credits. U
Prerequisite: Fifteen hours of geography.

GEOG 499. Honors Course in Geography. 2-3 Credits. U
Open to students with nine hours of upper level credit in geography, an
average of at least 3.5 in all geography courses, and an overall average of
at least 3.25. Includes the preparation of an honors paper and its
defense before a committee of at least two regular faculty members.

GEOG 500. Senior Capstone in Geography. 3 Credits. N
The capstone project provides students with a broad-based,
interdisciplinary educational experience and allows them to integrate
and synthesize the knowledge they have gained in their studies. The
major goals of this course are to help students synthesize an integrated
view of geography, advance steps toward career preparation, and
develop networking and professional skills. The course will provide an
overview of geography as a unified, coherent discipline with multiple
perspectives, emphasize writing and analytical skills, introduce students to
a major research project that integrates elements of physical and human
geography, cultivate knowledge for future professional development,
and introduce students to professional organizations. Students will gain
experience applying and/or interviewing for professional positions and
be introduced to multiple professional development and career services
on campus. Graduate students may take this course by permission only.
Prerequisite: Nine hours in Geography and status as a senior major in the
department; or permission of instructor.

GEOG 512. Advanced Cartography and Geovisualization. 4 Credits. N
This is an advanced computer-based scientific cartography course. It
covers mapping techniques such as dasymetric mapping, multivariate
mapping, cartogram and flow map, map animation, geovisual analytics,
web and interactive mapping, and mapping from remotely sensed
imagery. This course focuses on practical and hands-on experience.
Students will learn theoretical concepts, principles, and design examples,
and produce a cartographic portfolio of well-designed and professional
maps. Prerequisite: GEOG 311 or equivalent; or consent of instructor.

GEOG 518. Geoinformatics Internship. 1-3 Credits.
Real world experience with geospatial technologies is not only essential
for understanding and using geospatial knowledge but also beneficial
for students to start a career path in geospatial technologies. Approved
internships are supervised development and applications of geospatial
technologies in business, government, non-profit, educational or other
related fields. They can involve field work, data collection, processing, and
analysis. Internship supervisors must agree to mentor the student and
to complete necessary evaluations within a timely manner. Prerequisite:
GEOG 358 or consent of instructor.

GEOG 521. Microclimatology. 3 Credits. N
A study of climatic environments near the earth-atmosphere interface.
Consideration of rural climates in relation to agriculture and urban
climates as influenced by air pollution and other factors. Emphasis is on
physical processes in the lower atmosphere, distribution of atmospheric
variables, the surface energy budget, and water balance. (Same as
ATMO 521.) Prerequisite: ATMO 105 and MATH 125.

Introduction to study of the environment through air photos and
satellite imagery, including principles of remote sensing, interactions of
electromagnetic energy with the atmosphere and earth's surface, aerial
photography, satellite systems, and sensors (electro-optical, thermal,
and radar). Emphasis in the latter part of the course is on such applications
as global monitoring, land cover mapping, forestry, agriculture, and
oceanography. Laboratory emphasizes visual interpretation of aerial
photography and satellite imagery and an introduction to digital
image processing in the department's NASA Earth Science Remote
Sensing Laboratory. Prerequisite: MATH 101 or equivalent. GEOG 358
recommended.

GEOG 528. Spatial Databases. 3 Credits. N
This course covers concepts in spatial databases and their relevance in
geographic information systems (GIS) and spatial analysis. It introduces
the fundamental theories of data management behind Geographic
Information Systems and imparts hands-on experience with mainstream
spatial database management systems (DBMS), standard query
languages and necessary tools to query/transform geospatial data, and
perform spatial and network analysis. The course provides more in-depth
coverage on database-oriented approaches for GIS geospatial analysis.
Prerequisite: GEOG 358; or instructor permission.

GEOG 531. Topics in Physical Geography: _____ 1-3 Credits. N
An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated, if topic differs.

GEOG 532. Geoarchaeology. 3 Credits. N
Application of the concepts and methods of the geosciences to interpretation of the archeological record. The course will focus primarily on the field aspects of geoarchaeology (e.g., stratigraphy, site formational processes, and landscape reconstruction), and to a lesser extent on the array of laboratory approaches available. (Same as ANTH 517.) Prerequisite: GEOG 104, ANTH 110, or ANTH 310.

GEOG 535. Soil Geography. 4 Credits. N LFE
A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as EVRN 535.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended.

GEOG 540. Ecohydrology. 3 Credits. N
Ecohydrology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key concepts, methodological approaches and analytical techniques utilized in ecohydrology to understand and quantify: plant water use, evolution of hydrologic properties, groundwater-surface water interactions, controls on landscape patterns, spatial and temporal patterns of soil moisture and nutrient concentrations, and vegetation competition. Students should leave the class having developed critical skills in: 1) reviewing scientific literature, 2) collecting environmental samples, 3) analyzing ecohydrologic data, 4) writing a scientific research paper, 5) working collaboratively and independently. (Same as EVRN 540.) Prerequisite: GEOG 104 or GEOL 101 or EVRN 363 or GEOG 336 or permission of instructor.

GEOG 541. Geomorphology. 4 Credits. N LFE
A critical study of land forms in relation to tectons, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEOG 541.) Prerequisite: GEOG 101 and GEOG 103, GEOG 104 and GEOG 105, or GEOG 103 and GEOG 304.

GEOG 550. Environmental Issues in Africa. 3 Credits. S
Acquaints students with the complexities of debates on environmental problems in Sub-Saharan Africa. Topics addressed may include deforestation, desert expansion, wildlife conservation, soil erosion, climate change, coral reef destruction, water resources development, mangrove preservation, the environmental effects of war, industrialization, and urbanization. Class presentations and projects synthesize the perspectives of both human and physical geography. (Same as AAAS 551.) Prerequisite: GEOG 104 or permission of instructor.

GEOG 552. Topics in Urban/Economic Geography: ______. 1-3 Credits. S
An investigation of special topics in urban/economic geography. May include specific course work under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated.

GEOG 553. Geography of African Development. 3 Credits. W
Acquaints students with the values and social parameters of African agricultural and pastoral practice. Topics include customary land rights, African perspectives on the natural world, gender issues in African agriculture, and the urbanization of African cultures. The course also contrasts African views with those of Western development practitioners and donor agencies. Case studies from different countries are used to highlight the continent's regional differences. (Same as AAAS 553.)

GEOG 556. Geography of the Energy Crisis. 3 Credits. S
A discussion and analysis of the basic facts and causes of energy problems on a national and world scale. Examines current production, consumption, efficiency, reserves, conservation, and other energy policy options, including adjustments that will affect consumer use, national politics, and strategic issues. Prerequisite: GEOG 102.

GEOG 558. Intermediate Geographical Information Systems. 4 Credits. N LFE
An intermediate level course in geographic information science designed for advanced undergraduate and graduate level students who already have an introductory understanding of GIS. Emphasis will be placed on the application of spatial analytical techniques to geographical problem-solving. Topics include spatial data structures, interpolation techniques, terrain analysis, cost surfaces, and database management technique. Students will apply knowledge gained in lecture and reading to natural resource, urban, and scientific applications using state-of-the-art GIS software. Prerequisite: GEOG 358 or consent of instructor.

GEOG 560. GIS Application Programming. 3 Credits. N
This course teaches programming within Geographic Information Systems. Students learn how to customize GIS applications to automate data processing and spatial analysis through programming languages. GIS programming concepts and methods are introduced from the aspects of spatial data management and analysis covering both the vector and raster data models. Prerequisite: GEOG 558 and a course in programming languages.

GEOG 570. Geography of American Indians. 3 Credits. NW S
A survey of the culture and history of selected indigenous peoples of the Americas. Emphasis is placed on the environmental setting, the settlement and subsistence patterns, and the impact of European colonization. Discussion includes present-day ethnic and resource issues.

GEOG 571. Topics in Cultural Geography: ______. 1-3 Credits. S
An investigation of special topics in cultural geography. May include specific course work under the headings of cultural theory and methodology, material culture, foodways, religion, and similar topics. May be repeated, if topic differs.

GEOG 577. Human Dimensions of Global Change. 3 Credits. S
This class introduces concepts such as coupled human and natural systems, social-ecological resilience, and sustainability science, examines people's responses to major climate, land, water, and coastal change, and discusses case studies. One hour of each seminar will be devoted to individual needs that address topical or methodological issues. Class requirements include presentations, biweekly papers, and a term paper. (Same as GIST 577.) Prerequisite: One of the following: GEOG 100, GEOG 104, GEOG 374, or an Environmental Studies introductory course.

GEOG 582. Geopolitics and Genocide. 2-3 Credits. S
Explores the inherently geographical and geopolitical nature of genocide and related mass violence and introduces an overarching concept, territorial cleansing, that foregrounds the spatial and territorial nature of these events. Detailed studies of cases at a range of scales and locales provide the major context for critical examination and comparison of territorial cleansing concepts. Students enrolling for 3 credits will prepare and present a substantial independent research paper. (Same as GIST 582.) Prerequisite: GEOG 102 or GEOG 103; or ANTH 108 or ANTH 109; or permission of instructor.
GEOG 583. Migration, Diasporas and Development. 3 Credits. S
This course introduces students to key concepts in global migration and its implications on development in migrant sending states particularly those on the African continent. It will explore the various migration patterns from Africa (e.g., migration between North Africa and Europe in the aftermath of the Arab Spring), South-South migration, the 'brain drain' of skilled professionals and its implications for development, and the role of diasporas in development. The course will also assess the integration of migrants in major migrant destination regions. Finally, the course will provide students with an opportunity to critically examine the relationship between migration and development in a particular national context of their choice. (Same as AAAS 583.) Prerequisite: GEOG 102 or consent of instructor.

GEOG 586. Sustainable Food Systems and Food Security in the Global South. 3 Credits. S
The course adopts an interdisciplinary approach to study food systems and food security in the Global South. It incorporates multiple perspectives ranging from the local to the global level to explore the cultural, ecological/environmental, economic, sociopolitical, and ethical dimensions connected to the global food system. It also examines several dimensions of food insecurity. Students will also examine the impact of food insecurity on health as well as racial and economic disparities in access to food. The course will also examine the research and conceptualization of food systems and analyze concepts such as "food deserts," "food oases," "food swamps," and "food grasslands." We will examine food production and food acquisition strategies in low-income areas. Case studies will be drawn on experiences from diverse regions particularly Southern Africa even though other regions such as Latin America and Southeast Asia will be considered. Prerequisite: GEOG 102 or consent of instructor.

GEOG 590. Understanding Central Asia. 3 Credits. NW S/W
An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in REES 710. (Same as REES 510.) Prerequisite: One previous interdisciplinary area studies course or the instructor's permission.

GEOG 591. Geography of Latin America. 3 Credits. SC S/W
A study of the different physical, economic, and cultural settings in Latin America which form the basis for the various forms of livelihood.

GEOG 597. Geography of Brazil. 3 Credits. S
Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary and cultural geography of Brazil. Course also includes a survey of Brazil's South American neighbors.

GEOG 601. Indigenous Peoples of the World. 3 Credits. S
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GIST 601 and ISP 601.) Prerequisite: Permission of instructor.

GEOG 648. Location Modeling. 3 Credits. N
This course provides an overview of advanced location analysis and modeling in the context of GIS. Introduces students to principles of location analysis, methods for making strategic location decisions as well as existing classic location problems. Demonstrates analytical approaches by which location problems can be solved using mathematical programming, GIS and other optimization software. This course is a specialized course with an emphasis on the spatial analysis function of Geographic Information Systems, which covers many concrete applications of GIS geospatial analysis in urban planning, transportation, and service systems planning, ranging from firefighting stations to forestry management to transportation facilities. Prerequisite: GEOG 358; or instructor permission.

GEOG 658. Topics in Geospatial Technologies: 1-6 Credits. LFE
An investigation of special topics in geoinformatics. May include specific coursework under the headings of methodology, basic research, thematic or regional applications, geographic information systems (GIS), Global Positioning System (GPS), and geostatistics. May be repeated if topic differs. Prerequisite: GEOG 111 or GEOG 358 or consent of instructor.

GEOG 716. Advanced Geostatistics. 3 Credits.
An introduction to the practical application of advanced geospatial statistical techniques. Potential topics include: spatial regression, interpolation, clustering, and advanced nonparametric statistics. Knowledge of a statistical package and GIS is assumed. Prerequisite: GEOG 358 or equivalent.

GEOG 719. Development of Geographic Thought. 2-3 Credits.
Critical analysis of the growth of geographic thought from antiquity to the present: emphasis on structure of modern geography. Prerequisite: Twenty hours of geography or consent of instructor.

GEOG 726. Remote Sensing of Environment II. 4 Credits.
An overview of techniques for computer analysis of digital data from earth orbiting satellites for environmental applications. Topics covered include: data formats, image enhancements and analysis, classification, thematic mapping, and environmental change detection. The laboratory exercises provide hands-on experience in computer digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. Prerequisite: Introductory statistics and GEOG 526 or equivalent.

GEOG 731. Topics in Physical Geography: 1-3 Credits.
An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated.

GEOG 752. Topics in Urban/Economic Geography: 1-3 Credits.
An investigation of special topics in urban/economic geography. May include specific coursework under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated.

GEOG 759. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not
open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 759 and EVRN 751.)

GEOG 771. Topics in Cultural Geography: _____. 1-3 Credits.
An investigation of special topics in cultural geography. May include specific course methodology, material culture, foodways, religion, and similar topics. May be repeated.

GEOG 781. Environmental Geopolitics. 3 Credits.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. This course is a more advanced and rigorous version of the undergraduate version of this course. It is not open to students who have taken or are enrolled in GEOG 371 or EVRN 371, Environmental Geopolitics.

GEOG 805. Perspectives in Geography. 2 Credits.
This course provides background on the discipline of geography and how it is practiced by the faculty in the department. It provides a foundation of knowledge of geography's role within the human and physical sciences as well as the humanities. Students will gain a critical perspective into the breadth of geography, including the ways in which geographers view the world through the lenses of place, space, and scale and the debates and approaches within the changing landscape of geographic inquiry.

GEOG 806. Proposal Writing and Research Design. 2 Credits.
The course is designed to assist graduate students in developing their research project, including refining research questions, creating a literature review, and defining appropriate methods to aid in successfully answering their questions. Learning outcomes include the production of an individual draft research proposal based upon the student's research design.

GEOG 875. Qualitative Research Methods. 3 Credits.
This course provides background on qualitative research methods used in human geography. Students will gain a critical perspective into relevant issues of qualitative methods with specific regard to ethical concerns related to human subjects research within the social sciences and humanities and the debates and approaches within the changing landscapes of qualitative methods. Students will have the opportunity to practice these techniques and strategies in a group research project. Prerequisite: GEOG 805 or consent of instructor.

GEOG 890. Geographic Internship. 1-6 Credits.
Supervised professional experience. The student submits to the program committee a proposal describing the internship prior to enrollment. Upon acceptance, regularly scheduled meetings with the advisor provide assistance, guidance and evaluation of progress in the professional experience. A written summary of the experience or outcomes of the research project are prepared independently by the student, a representative of the host agency, and the advisor. Total credit not to exceed six hours. Prerequisite: Twelve hours of graduate level geography courses and consent of program committee.

GEOG 898. Readings in Geography. 1-4 Credits.

GEOG 899. Master's Thesis. 1-10 Credits.
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis.

GEOG 980. Seminar in Geography: _____. 1-3 Credits.

GEOG 998. Research in Geography. 1-5 Credits.

GEOG 999. Doctoral Dissertation. 1-10 Credits.
Dissertation credit. Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Arts and Bachelor of General Studies in Geography

Why study geography?
The BA and BGS degrees each offer a different educational experience and students should carefully consider which degree is most appropriate to meet their educational goals.

Bachelor of Arts (BA)
The Bachelor of Arts in Geography provides a broad liberal arts education and touches on all aspects of Geography. Study includes a minimum of 33 credit hours in Geography: a core of eighteen hours in regional, physical, human, and statistical geography plus another fifteen hours of electives. Students need to meet the KU Core requirements and/or requirements set by the College of Liberal Arts and Sciences including a non-English language. Students taking the B.A. degrees should note that most Geography graduate programs require a statistics course, e.g., GEOG 316, and we highly recommend a basic course in GIS, e.g., GEOG 358.

Bachelor of General Studies (BGS)
The Bachelor of General Studies degree allows for more specialization in a student’s main area of interest while still providing a solid foundation. There are fewer principal courses required, but students must complete a concentration (three upper division courses) or a minor in a second field of study (usually 18 hours). There is no non-English language requirement for the BGS. Please note that most geography graduate programs require a statistics course, e.g., GEOG 316, and we highly recommend a basic course in GIS, e.g., GEOG 358.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

First- and Second-Year Preparation
Students should begin the major by meeting the core requirements and preparing for major courses.

Requirements for the B.A. or B.G.S. Major

Introductory Physical Geography. Satisfied by one of the following: 4-5
The student presents the results of this paper in an oral examination to a committee of at least 2 faculty members, normally from the geography department, chaired by the GEOG 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 grade-point average.

**BA in Geography**

Below is a sample 4-year plan for students pursuing the BA in Geography.

To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

However, overlap of a KU Core course with a major or degree-specific level.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BGS in Geography**

Below is a sample 4-year plan for students pursuing the BGS in Geography. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses/)

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Students can also choose to complete GEOG 140 or GEOG 144 instead of GEOG 104 and GEOG 105.

3 Students will earn Goal 3 Social Science credit if they take GEOG 102, GEOG 103, GEOG 142 or GEOG 145, but if a student chooses GEOG 100 then they will fulfill Goal 4.2 Global Awareness and should plan to take a course that fulfills Goal 3 Social Science in place of the planned goal 4.2 Global Awareness.

4 8-10 additional credit hours selected from any GEOG 177 First Year Seminar: ________ course, and from any 300-600 level GEOG classes for a total of at least 33 credit hours in major courses.

5 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

6 For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
# Bachelor of Science in Geography

## Why study geography?

A much more specialized degree, the Bachelor of Science offers concentrated specializations in one of two aspects of Geography: physical geography or geographic information science (GIS). The BS has fewer general education requirements and require solid backgrounds in mathematics and basic science.

There are two B.S. degree options:

## Bachelor of Science in Geography

### Junior

### Total Hours 120

1. MATH 101 or higher recommended as some elective options have a MATH pre-requisite.
2. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
3. 8-10 additional credit hours selected from any GEOG 177 First Year Seminar: _____ course, and from any 300-600 level GEOG classes for a total of at least 33 credit hours in major courses.
4. Students can also choose to complete GEOG 140 or GEOG 144 instead of GEOG 104 and GEOG 105.
5. Students will earn Goal 3 Social Science credit if they take GEOG 102, GEOG 103, GEOG 142 or GEOG 145, but if a student chooses GEOG 100 then they will fulfill Goal 4.2 Global Awareness and should plan to take a course that fulfills Goal 3 Social Science in place of the planned goal 4.2 Global Awareness.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
Physical Geography Option
Students prepare for a career in environmental assessment and problem solving. Basic requirements include preparation in chemistry, biology, physics and mathematics. Advanced course work includes the study of the processes that affect the physical environment (soils, vegetation, climate and geomorphology), and techniques for performing statistical and computational analysis of these processes (statistics, GIS and remote sensing).

Geographical Information and Analysis Option
Students prepare for a career in the area of geographic information science and problem solving using a variety of spatial analysis techniques. Basic requirements include preparation in mathematics, science and computer science. Advanced course work includes work in cartography, GIS, remote sensing, spatial statistics, spatial analysis and data presentation and visualization. In addition, students are expected to take some coursework in one of the other areas of geography (physical, human, and regional).

Beyond the basic requirements listed under each option, both Geography B.S. degrees have a common set of general education requirements, including courses in English, mathematics, communications, humanities, social sciences and a history or philosophy of science course. Some courses are shared by the two options; however, different course selection menus apply for the remaining requirements.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

First- and Second-Year Preparation
Students should begin the major by meeting the core requirements and preparing for major courses.

Other 300-level or above courses in Physical Geography

Physical Geography Option Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 44 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 36 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Geographical Information and Analysis Option

Geography Prerequisite or Co-requisite Knowledge

Calculus I. Satisfied by one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 125</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>

</tbody>
</table>

GEOG 104 | Introduction to Physical Geography | 3 |
or MATH 146
Calculus II, Honors

General Physics I. Satisfied by one of the following: 4-5

PHSX 211 General Physics I
PHSX 114 College Physics I
& PHSX 201 and Calculus Supplement to College Physics I

General Physics II. Satisfied by one of the following: 3-5

PHSX 212 General Physics II
PHSX 115 College Physics II
& PHSX 202 and Calculus Supplement to College Physics II

Computing Fundamentals. Satisfied by: 3

GEOG 360 Computer Programming for Mapping and Spatial Analysis
or EECS 138 Introduction to Computing:_____  

Overview Geography Courses 17-18
Principles of Physical Geography or Scientific Principles of Environmental Studies. Satisfied by one of the following:

GEOG 104 Introduction to Physical Geography
& GEOG 105 and Introductory Laboratory in Physical Geography
GEOG 140 Global Environment I: The Discovery of
& GEOG 160 Environmental Change
and Environmental Solutions

Maps and Mapping or Computers, Maps, and Geographical Analysis. Satisfied by:

GEOG 111 Mapping Our Changing World
or GEOG 353 Introduction to Geographic Information Systems

Principles of Human Geography. Satisfied by:

GEOG 102 People, Place, and Society
or GEOG 103 People, Place, and Society, Honors

2 GEOG 300+ courses. One in Physical and one in Human and/or Regional Geography

Core Geographic Information Science Courses 21
Six courses, at least one from each category:
Cartography and Visualization. Satisfied by:

GEOG 311 Introductory Cartography and Geovisualization
GEOG 512 Advanced Cartography and Geovisualization

Geographical Information Systems. Satisfied by:

GEOG 558 Spatial Data Analysis
GEOG 560 GIS Application Programming

Remote Sensing. Satisfied by:

GEOG 526 Remote Sensing of Environment I
GEOG 726 Remote Sensing of Environment II

Statistics. Satisfied by:

GEOG 316 Methods of Analyzing Geographical Data
GEOG 716 Advanced Geostatistics

Senior Capstone in Geography 3
Satisfied by:

GEOG 500 Senior Capstone in Geography

Geographic Information Science Electives 6
Two other courses (300-level or above) from geographic information science

Allied Field

Three courses and nine hours minimum (300-level or above) in one field (or a minor) (area studies, atmospheric science, biology, computer science, design, environmental studies, engineering, geology, psychology, urban planning).

Geographical Information and Analysis Option Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 56 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 45 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Departmental Honors in Geography
To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in geography with a grade-point average of 3.5 in all geography courses. In addition to outstanding work in geography, the program requires GEOG 499, an independent study course consisting of an honors paper.

The student presents the results of this paper in an oral examination to a committee of at least 2 faculty members, normally from the geography department, chaired by the GEOG 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 grade-point average.
Bachelor of Science in Atmospheric Science

The Bachelor of Science in Atmospheric Science (B.S.) is designed to meet the recommendations of the American Meteorological Society for a bachelor’s degree in meteorology/atmospheric science. There are four options, each of which meet these recommendations.

1. General Option

This option is for students who want a broad background in atmospheric science. It is also the most suitable option for those who are aiming at a career in weather forecasting. It includes a third semester of synoptic meteorology as well as an air pollution course.

2. Air Pollution Option

Students prepare for a career emphasizing environmental aspects of meteorology. This option includes an additional semester of chemistry as well as environmental studies.

3. Hydrometeorology Option

Students prepare for a career involving the interface between meteorology and hydrology. These studies have important applications to flash floods, droughts and water supply. This option includes additional courses on fluid flow and hydrology from the School of Engineering.

4. News Media Option

This option is for students who wish to enter careers whose main function is to provide information to the general public. It requires additional courses from the School of Journalism.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Advising

Students who may decide to major in atmospheric science should confer early with a departmental representative about the selection of courses.

Requirements for the B.S. Degree in Atmospheric Science

4 specialized options are available for students who plan professional careers in meteorology or atmospheric science. The general meteorology option satisfies all the traditional professional meteorology requirements for employment with the National Weather Service, airlines, or other agencies. The air pollution meteorology option meets the need for trained specialists. The hydrometeorology option may lead to a career as a meteorologist in one of the many water-related activities in private and governmental agencies. The news media forecasting option can lead to a career forecasting the weather on television or radio. The B.S. degree with any of these specialties also prepares students to begin graduate programs in meteorology or atmospheric science.

Meteorology Option

Students selecting this major must select one of the following options:

General Meteorology Option

This option satisfies all the traditional professional meteorology requirements for employment with the National Weather Service, airlines, or other agencies.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 526</td>
<td>Applied Mathematical Statistics I</td>
<td>3</td>
</tr>
<tr>
<td>or BSAN 202</td>
<td>Statistics</td>
<td></td>
</tr>
</tbody>
</table>

Air Pollution Meteorology Option

This option meets the need for trained specialists.
### BS in Geography with concentration in Geographical Information & Analysis

#### Hydrometeorology Option
This option may lead to a career as a meteorologist in one of the many water-related activities in private and governmental agencies.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

### Major Hours & Major GPA
While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours
Satisfied by 33 hours of major courses.

#### Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior (300+) Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Departmental Honors in Atmospheric Science
To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in atmospheric science with a grade-point average of 3.5 in all atmospheric science courses. In addition, the program requires ATMO 499, an independent study course consisting of the creation of an honors paper. The student presents the results of this paper in an oral examination to a committee of a minimum of 2 faculty members, normally from the geography department, and chaired by the ATMO 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 grade-point average.

### BS in Geography with concentration in Geographical Information & Analysis
Below is a sample 4-year plan for students pursuing the BS in Geography with a concentration in Geographical Information & Analysis. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1. Geography BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
2. Geography BS majors are required to take a course in History or Philosophy of Science. A list of possible courses can be found under the Degree Requirements tab.
3. All major required Geography courses and most Geography elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term
4. Six Geographic Information Science Core courses are required with at least one from each of the following categories: Cartography and Visualization, Geographical Information Systems, Remote Sensing, and Statistics. A list of courses for each can be found under the Degree Requirements tab.
5. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120

1 ATMO 521 and ATMO 642 are taught only in the even or odd years and must be planned carefully. Students will need to adjust what year they take the course as well as the prerequisites for the course based on when they start the above plan. Please consult with your advisor.

2 ENGL 362 does not count as a Goal 3 Arts and Humanities requirement and if that course is opted for then the student will need to complete their Goal 3 Arts and Humanities in another way.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
BS in Atmospheric Science with concentration in News Media Forecasting

Below is a sample 4-year plan for students pursuing the BS in Atmospheric Science with a concentration in News Media Forecasting. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120

1 ATMO 521 and ATMO 642 are taught only in the even or odd years and must be planned carefully. Students will need to adjust what year they take the course as well as the prerequisites for the course based on when they start the above plan. Please consult with your advisor.

2 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
**Minor in Geography**

**Why study geography?**

We offer an undergraduate minor with two options, which augment other fields of study and broaden career opportunities: General Geography or Geographical Information Science (GIS). A minor in Atmospheric Science is also available from the Department. You should carefully consider which minor best meets your academic goals before choosing one.

**Minor in Geography - General Geography Option:**

Students selecting this minor must complete 6 GEOG courses (18 hours), 12 hours of which must be taken at the 300 level or above. Students must have a minimum grade point average of 2.0 in courses taken for the minor.

**Minor in Geography - Geographic Information Science (GIS) Option:**

The minor requires GEOG 111, GEOG 316, and GEOG 358. Three additional courses from the geographic information science group (at 300 or above), and a minimum grade point average of 2.0 in the courses taken for the minor.

**Requirements for the Minor in Geography**

The department offers 2 minor options. The first is a general option in geography. The second option is specifically designed to give students a background in geoinformatics. Students should carefully consider which option best meets their academic goals before choosing one.

**Geography General Option**

Students selecting this minor must complete 6 GEOG courses (18 hours), 12 hours of which must be taken at the 300 level or above.

**Geoinformatics**

**Geography Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 18 - 21 hours of minor courses. Students choosing the Geoinformatics option will complete a minimum of 21 hours.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Minor in Atmospheric Science**

**Why study atmospheric science?**

The minor in Atmospheric Science (https://geog.ku.edu/atmospheric-science-minor/) augments other fields of study and broadens career opportunities. The minor requires ATMO 105, ATMO 321, and ATMO 505 plus three courses from the following: ATMO 521, ATMO 525, ATMO 630, ATMO 640, ATMO 642, or ATMO 680. Students must have a minimum grade point average of 2.0 in courses taken for the minor.

Undergraduate Certificate in Climate and Climate Change

Climate Change is an increasingly important societal issue since it will impact how we secure water, energy, and food in the near future. The primary cause of current trends in global climate are emissions of carbon dioxide and other greenhouse gases into the atmosphere since the start of the Industrial Revolution and the rise of fossil fuels as primary energy sources. In 2013 the Intergovernmental Panel on Climate Change concluded that "the human influence on the climate system is clear. This is evident from the increasing greenhouse gas concentrations in the atmosphere, positive radiative forcing, observed warming, and understanding of the climate system."

The potential impacts from a changing climate are widespread and range from increases in ocean sea level as ocean waters are heated and ice stores on land transfers to the oceans at increasing rates; increasing surface temperatures; more widespread drought events of longer duration; and the possibility of more frequent and intense hurricanes making landfall in the region surrounding the Gulf of Mexico. To cope with these consequences, and to build a more resilient society and infrastructure, there is an urgent need for an informed citizenry. It is critical to educate future decision makers who can influence national and international policies and adopt a more rational approach to dealing with impacts of climate change.

General requirements:

Students must maintain a 2.0 GPA in courses taken in the certificate program and maintain good standing in any University program of study for which they are enrolled. Students are encouraged to meet with the certificate Director to discuss progress in the program.

Course requirements:

To complete the certificate, 12-13 credit hours must be completed. Among them 6 credit hours are from two required core courses and the additional 6-7 credit hours are from electives.

Undergraduate Certificate in Geographic Information Science

"Everything is related to everything else, but near things are more related than distant things," said renowned geographer and cartographer Waldo Tobler. A certificate in Geographic Information Science (GIS) capitalizes on this by blending field equipment, computer hardware and software, data, and people to capture, manage, display, analyze, and distribute all forms of geographically referenced information. Through the application of GIS and its principles, you can perform quantitative analyses to make informed decisions and provide logistical support in virtually any field. Effective use of GIS has evolved into a requisite skill for most agencies in both the public and private sectors, and provides a transformative tool to address academic research. Students from such diverse disciplines as geography, atmospheric science, biology, engineering, economics, urban planning, landscape architecture, and sociology benefit from applying GIS and related technologies such as global positioning systems (GPS), remote sensing, spatial statistics, and computer programming to use location-based data. GIS has found wide applications in the sciences and engineering, as well as in business, government, military, and consumer areas. The director of the certificate program is available to meet with each student and design a curriculum that best meets your interests, goals, and academic level.

The certificate program is designed to provide undergraduate students with the knowledge and skills necessary to succeed in the rapidly expanding field of geographic information science (GIscience) or apply GIScience concepts in their own fields of study. A certificate in GIS shows employers you have the critical skills necessary to perform in public, private, and academic settings.

Students interested in pursuing the certificate should review the requirements and meet with Undergraduate Academic Advisor, or the GIS program director, Professor Xingong Li (ilix@ku.edu). The University of Kansas is a member of University Consortium for Geographic Information Science (UCGIS).

General requirements:
Students must maintain a 2.5 GPA in courses taken in the certificate program. A student pursuing the certificate can take no longer than 7 years to pursue the certificate unless a leave of absence or other extenuating circumstances are present.

Course requirements:

To complete the certificate, 14 credit hours must be completed within 7 academic years. Among them 8 credit hours are from two required core GIS courses and additional 6 credit hours are from electives. Only one course outside of the department can be included in these 14 credit hours.

Courses may be waived in consultation with the Director if the student can demonstrate satisfactory completion of similar coursework. If transfer courses are to be used to meet program requirements, the student must furnish the program director with a certified university transcript and, in some instances, a copy of the class syllabus. A maximum of 6 transfer credit hours may be used to meet program requirements.

Courses may be waived in consultation with the Director if the student can demonstrate satisfactory completion of similar coursework. If transfer courses are to be used to meet program requirements, the student must furnish the program director with a certified university transcript and, in some instances, a copy of the class syllabus. A maximum of 6 transfer credit hours may be used to meet program requirements.

The MA program develops a concentration in preparation for a career or further study. The student takes courses in several areas of the discipline, as well as at least three courses in an acceptable concentration. Our faculty are integral to graduate studies and have expertise in Human and Cultural Studies with a particular emphasis on Place, Economic Geography, Health and Diaspora, Environmental Policy, Borders and Border Conflicts, and more. Learn more about our faculty (http://geog.ku.edu/faculty/) on our website.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees.

The following items must be received to complete the application file:

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply/) found on the Graduate Admission website.
2. A current resume/CV.
3. A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geography or atmospheric science and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography & Atmospheric Science helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.
4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant’s possession as official.
5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

Master of Arts in Geography

Why study geography?

The MA program develops a concentration in preparation for a career or further study. The student takes courses in several areas of the discipline,
**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

**ADDITIONAL REQUIREMENTS**

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

**NON-DEGREE SEEKING STUDENTS**

Non-degree seeking students (NDS) are admitted on a rolling basis and must submit an application (https://gradapply.ku.edu/apply/). Applications are accepted on a rolling basis. Applicants must include the materials below in their application.

1. Copy of official transcripts including proof of a bachelor’s degree.
2. Proof of English proficiency, if it is a second language.

Submit your graduate application online (https://gradapply.ku.edu/apply/). For questions, contact:

The Graduate Program Coordinator

GEOG 875 | Qualitative Research Methods                |       |

Graduate Level coursework, chosen in consultation with an advisor. 6-17 credit hours of which must be in the home department.

Total Hours 30-31

For elective course options, please review the 500 level or above Geography courses listed in the academic catalog (https://catalog.ku.edu/liberal-arts-sciences/geography/#courseinventory).

**Proposal Defense**

The proposal defense should happen when the faculty advisor and the student agree that they have made enough progress and are ready to present their proposal to the entire committee. The proposal defense involves a presentation and a line of questioning from all committee members. The committee will be made up of at least 3 members in compliance with the Master’s Student Oral Exam Committee Composition policy.

Two grades are possible for the proposal defense: “satisfactory” and “unsatisfactory”. If the student receives a grade of unsatisfactory, the defense may be repeated once on the recommendation of the advisory committee. If the student receives an unsatisfactory grade a second time, they will be recommended for dismissal from the program. A minimum of 90 days must pass before the defense may be redone.

**Thesis Oral Defense**

The student must complete an oral defense of their thesis. The committee will be made up of at least 3 members in compliance with the Master’s Student Oral Exam Committee Composition policy. A majority of the committee members must approve the defense with an assessment of “satisfactory”, “unsatisfactory”, or “honors”. Students that fail the defense on their first attempt may repeat the defense at the recommendation of the degree program one more time. A minimum of 90 days must pass before the defense may be redone.

While completing degree requirements, graduate students are expected to understand and follow Office of Graduate Studies policies (https://ogs.ku.edu/policies/) relevant to their student status and academic standing.

**Handbook for Graduate Students**

Detailed information on department regulations can be found in the Geography and Atmospheric Science Graduate Student Handbook.

**Master of Urban Planning and Master of Arts in Geography**

**Dual Degree for Master of Arts in Geography and Master of Urban Planning**

Urban planning is a professional field that addresses the health, welfare, and sustainability of our cities, towns, regions, natural, and rural areas. Planners are problem-solvers. They deal with both short- and long-range planning projects at scales from small to large. Planners seek to enhance overall quality of life by addressing aspects of communities such as housing, land use, transportation, and responsible development that preserves the natural environment. The Master of Urban Planning is an accredited, professional degree that prepares students to excel in planning practice. It is the normal academic qualification for planning and planning-related positions. Graduates are prepared for careers in the public sector (local, state, national, international governments and agencies), private sector (consulting firms, development companies), and not-for profits (housing authorities, nonprofits) helping make communities better places.

The Master of Arts in Geography program develops a concentration in preparation for a career or further study. The student takes courses in several areas of the discipline. Our faculty are integral to graduate studies and have expertise in Human and Cultural Studies with a particular emphasis on Place, Economic Geography, Health and Diaspora, Environmental Policy, Borders and Border Conflicts, and more. Learn more about our faculty (http://geog.ku.edu/faculty/) on our website.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Dual Degree application for Master of Arts in Geography and Master of Urban Planning

Admission details, including required application materials for the M.A. in Geography (https://geog.ku.edu/admission/) and Master of Urban Planning (https://urbanplanning.ku.edu/application/), can be found on their respective web pages. Entering students should submit separate applications to each program.

Applicants without prior training in Geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees.

The following items must be received to complete the application file for the Geography MA application:

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply/) found on the Graduate Admission website.
2. A current resume/CV.
3. A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geography or atmospheric science and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography & Atmospheric Science helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.
4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant’s possession as official.
5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

ADDITIONAL REQUIREMENTS

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

M.U.P. Degree Requirements

The M.U.P. portion of the dual degree requires 36 credit hours. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://policy.ku.edu/office/Graduate-Studies/) relevant to their student status and academic standing.

M.U.P. Required Core Courses

M.U.P. Specializations

Master of Urban Planning Electives:

Elective coursework can be selected from the department’s graduate course offerings focusing in the areas of housing, transportation, or sustainable land use. Additional detail of elective courses and completion requirements can be found on the MUP Degree Requirements page. Students are encouraged to consult the UBPL Program Director when choosing elective courses.

M.A. in Geography Degree Requirements

The M.A. in Geography portion of the dual degree requires a minimum of 22 credit hours. A maximum of 6 credits of 500 and 600 level courses may be included in the program. If a 500 or 600 level course is taken to fulfill the required Techniques/Research Methods course, those credits will not count toward this maximum.

Elective coursework should be chosen in consultation with your advisor. For course options, please review the 500 level or above Geography courses listed in the academic catalog (https://catalog.ku.edu/liberal-arts-sciences/geography/#courseinventory).

The proposal defense should happen when the faculty advisor and the student agree that they have made enough progress and are ready to present their proposal to the entire committee. The proposal defense involves a presentation and a line of questioning from all committee members. The committee must be in compliance with the Master's Oral Exam Committee Composition policy. The chair of the committee must come from the Department of Geography and Atmospheric Science. At least one committee member must come from the Department of Urban Planning.

Two grades are possible for the proposal defense: “satisfactory” and “unsatisfactory”. If the student receives a grade of unsatisfactory, the defense may be repeated once on the recommendation of the advisory committee. If the student receives an unsatisfactory grade a second time, they will be recommended for dismissal from the program. A minimum of 90 days must pass before the defense may be redone.

**Thesis Oral Defense**

The student must complete an oral defense of their thesis. The committee will be made up of at least 3 members and will be in compliance with the Master’s Student Oral Exam Committee Composition policy. The chair of the committee must come from the Department of Geography and Atmospheric Science. At least one committee member must come from the Department of Urban Planning.

A majority of the committee members must approve the defense with an assessment of “satisfactory”, “unsatisfactory”, or “honors”. Students that fail the defense on their first attempt may repeat the defense at the recommendation of the degree program one more time. A minimum of 90 days must pass before the defense may be redone.

While completing degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies found on the Graduate Admissions website.

**Handbook for Graduate Students**

Detailed information on department regulations can be found in the Geography and Atmospheric Science Graduate Student Handbook.

**Master of Science in Atmospheric Science**

**Atmospheric Science Graduate Program**

The MS program in Atmospheric Science expands the student’s knowledge of fundamental atmospheric processes and how the atmosphere interacts with other parts of the environment. Atmospheric Science at KU is the only one of its kind in the state and has a unique interdisciplinary nature that pursues cutting-edge research and quality education that combines theory, modeling, diagnostic studies, and applications to generate solutions that make a real difference in people’s lives. Our faculty (http://geog.ku.edu/faculty/) provide a rigorous educational experience through several specialized pathways for the undergraduate degree and through funded research opportunities for graduate students.

Check out our website (http://geog.ku.edu/) for more information.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Entering students are expected to have completed an undergraduate degree in a physical science (e.g., physics, chemistry, atmospheric science, oceanography), mathematics, or engineering and studied mathematics, including vector calculus and ordinary differential equations. Courses taken to remedy deficiencies may not count toward graduate degrees.

The following items must be received to complete the application file:

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply/) found on the Graduate Admissions website.
2. A current resume/CV.
3. A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geography and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.
4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant's possession as official.

5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

**ADDITIONAL REQUIREMENTS**

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

**NON-DEGREE SEEKING STUDENTS**

Non-degree seeking students (NDS) are admitted on a rolling basis and must submit an online application (https://gradapply.ku.edu/apply). Applications are accepted on a rolling basis. Applicants must include the materials below in their application.

1. Copy of official transcripts including proof of a bachelor's degree.
2. Proof of English proficiency, if it is a second language.

Submit your graduate application online (https://gradapply.ku.edu/apply). For questions, contact:

The Graduate Program Coordinator

**Atmospheric Science M.S. Degree Requirements**

Required credit hours:

30 credits 500 level or above. Elective courses should be chosen in consultation with your advisor. For elective course options, please review the 700 level or above Atmospheric Science courses listed in the academic catalog.

Attend the Department's New Graduate Student Orientation (non-credit)

**Thesis**

A master's thesis is a demonstration of a student's ability to formulate an atmospheric science research problem, collect and analyze relevant data, synthesize appropriate literature, arrive at logical conclusions, and present the entire exercise in a public academic forum. The thesis should address an original problem of scientific importance, though at the M.S. level, the research will to a significant degree be guided by the faculty advisor.

**Thesis proposal**

During the second semester in the program, the student must submit to his committee a thesis research plan. All M.S thesis proposals are expected to contain three basic elements:

1. A statement of the research problem or questions to be investigated.
2. A survey of relevant literature and how it relates to the student's research problem
3. An outline of the general methodology, if not specific techniques, to be utilized in addressing the research problem or answering the basic research questions.

Two grades are possible for the proposal defense: "satisfactory" and "unsatisfactory". If the student receives a grade of unsatisfactory, the defense may be repeated once on the recommendation of the advisory committee. If the student receives an unsatisfactory grade a second time, they will be recommended for dismissal from the program. A minimum of 90 days must pass before the defense may be redone.

**Thesis seminar and defense**

Students are required to make a formal presentation to the faculty and fellow students in the form of a research seminar, and subsequently defend orally to their committee the results of their thesis research. Ideally, the final examination takes place immediately following the research seminar, but if necessary the two can be scheduled at separate times.

A majority of the committee members must approve the defense with an assessment of “satisfactory”, “unsatisfactory”, or “honors”. Students that fail the defense on their first attempt may repeat the defense at the recommendation of the degree program one more time. A minimum of 90 days must pass before the defense may be redone.

While completing degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://ogs.ku.edu/policies) relevant to their student status and academic standing.
### Handbook for Graduate Students

Detailed information on department regulations can be found in the Geography and Atmospheric Science Graduate Student Handbook.

### Master of Science in Geography

#### Graduate Programs

**Geography**

The graduate curriculum emphasizes broad geographic training while encouraging in-depth commitment to specialized concentrations. Students also are encouraged to take course work outside the department that complements their degree programs. Credit-hour requirements below are considered minimums for degree programs. Programs are tailored by the student and advisor to conform to the student’s interests and needs, as well as to fulfill the general degree requirements.

The central thrust of the department and the chief capabilities and interests of the faculty fall within these research-teaching areas:

1. Human geography including cultural geography, regional development, and environmental policy;
2. Geoinformatics including cartography, geographic information systems, and remote sensing;
3. Physical geography including geomorphology, soils, and biogeography;
4. Regional geography including Africa, East Asia, Russia, Latin America, and the United States; and
5. Atmospheric science and climatology.

#### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

#### Graduate Admission

Entering students are expected to have a B.S. degree in geography or in related physical science, earth science, mathematics, or engineering disciplines.

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systemic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees.

The following items must be received to complete the application file:

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply) found on the Graduate Admissions website.
2. A current resume/CV.

3. **A Statement of Interest and Goals.** This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks—in particular, we are interested in learning about (1) your specific interests within geography and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

4. **A scanned copy of an official transcript** can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant's possession as official.

5. **Three confidential letters of recommendation** sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school.

   If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

   **Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

### ADDITIONAL REQUIREMENTS

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

### NON-DEGREE SEEKING STUDENTS

Non-degree seeking students (NDS) are admitted on a rolling basis and must submit an application (https://gradapply.ku.edu/apply). Applications are accepted on a rolling basis. Applicants must include the materials below in their application.

1. Copy of official transcripts including proof of a bachelor's degree.
2. Proof of English proficiency, if it is a second language.

Submit your graduate application online (https://gradapply.ku.edu/apply/). For questions, contact:

**The Graduate Program Coordinator**

Atmospheric Science is the study of weather and climate. The atmosphere is a key component of the environment and affects many human activities ranging from daily weather prediction to the understanding of climate and human health. Our program provides graduate students with the advanced training to address a host of physical geography or methods and techniques.

**Proposal Defense**

The proposal defense should happen when the faculty advisor and the student agree that they have made enough progress and are ready to present their proposal to the entire committee. The proposal defense involves a presentation and a line of questioning from all committee members. The committee will be made up of at least 3 members in compliance with the Master’s Student Oral Exam Committee Composition policy.

Two grades are possible for the proposal defense: “satisfactory” and “unsatisfactory”. If the student receives a grade of unsatisfactory, the defense may be repeated once on the recommendation of the advisory committee. If the student receives an unsatisfactory grade a second time, they will be recommended for dismissal from the program. A minimum of 90 days must pass before the defense may be redone.

**Thesis Oral Defense**

The student must complete an oral defense of their thesis. The committee will be made up of at least 3 members in compliance with the Master’s Student Oral Exam Committee Composition policy. A majority of the committee members must approve the defense with an assessment of “satisfactory”, “unsatisfactory”, or “honors”. Students that fail the defense committee members must approve the defense with an assessment of “unsatisfactory”. If the student receives a grade of unsatisfactory, the student will be recommended for dismissal from the program. A minimum of 90 days must pass before the defense may be redone.

While completing degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://catalog.ku.edu/liberal-arts-sciences/geography/#courseinventory).

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Entering students are expected to have a M.S. degree in atmospheric science or in another physical science, mathematics or engineering. Entering students will be expected to have studied mathematics, including vector calculus and ordinary differential equations. They should also have taken the equivalent of at least 2 semesters of calculus-based physics and one of chemistry.

The following items must be received to complete the application file:

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply/) found on the Graduate Admissions website.
2. A current resume/CV
3. A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks— in particular, we are interested in learning about (1) your specific interests within Atmospheric Science and why they are important...
and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography & Atmospheric Science helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant’s possession as official.

5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school.

If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

## ADDITIONAL REQUIREMENTS

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Submit your graduate application online (https://gradapply.ku.edu/). For questions, contact:

The Graduate (https://geog.ku.edu/staff/)Program Coordinator

Upon a student's admission to the department, the Graduate Studies Committee (GSC) will appoint an advisor. Early in the first semester (preferably in the first week of classes), the student should meet with this advisor to outline a tentative program of coursework for the degree. Such programs should be solidified by the time of enrollment for the second semester and submitted to the GSC for approval. The student and advisor then continue to discuss and update programs each semester, bearing in mind that any substantive changes must be approved by the GSC.

</tr>
</tbody>
</table>

Electives are selected with approval of the committee and are tailored to fit the needs of the individual student (e.g. oriented to a subfield in meteorology, climatology, or other specializations) Sample courses include:

- ATMO 731 Advanced Topics in Atmospheric Science: ______
- MATH 647 Applied Partial Differential Equations
- MATH 781 Numerical Analysis I
- GEOG 558 Spatial Data Analysis
- BIOL 513 Virology Laboratory
- BIOL 594 Forest Ecosystems
- BIOL 841 Biometry I
- CE 730 Intermediate Fluid Mechanics
- CE 751 Physical Hydrology

### RSRS Requirement

The Research Skill and Responsible Scholarship (RSRS) requirement will be met by 6 credits at the 500 level or above in mathematics and/or engineering. Alternatively, 6 credits at the 500 level or above in a related discipline which are approved by the student’s graduate committee may also be used for the RSRS requirement. The courses for the RSRS requirement must be taken during the PhD program. Students must participate in the department Responsible Scholarship Seminar.

### Proposal/Oral Comp:

All candidates must pass a comprehensive written examination. Program sheets are available in the department office and must be filed before the oral examination can be scheduled. The comprehensive examination is scheduled when the student and the faculty advisor believe that competence in the specialty or specialties has been achieved. It consists of two parts: written questions submitted by the committee members and then oral examination. For the written questions, they may be open-book or closed at the discretion of the individual committee member submitting the questions, and the student normally will have up to 8 hours to complete each set of questions. In the oral section, students often are asked to elaborate and comment on their written answers. The focus is on the proposal, however, with probes into its scope, justification, and methodology being common.

Two grades are possible for the overall examination: “satisfactory,” and “unsatisfactory.” In the unsatisfactory case, the student may be allowed to repeat the process upon recommendation of the committee one more time. Such repetition can be undertaken no sooner than 90 days after the last exam. Approval from the Office of Graduate Studies must be secured for the scheduling of this procedure and the request must be submitted two weeks prior to the proposed date for the examination.

### Dissertation Requirements

The student must submit a dissertation approved by his/her graduate committee. All candidates must pass a final oral examination and must submit an approved dissertation to UMI. The dissertation will be defended in a public presentation.

### Final Defense:

The student must complete an oral defense of their dissertation. A majority of the committee members must approve the defense with an assessment of “satisfactory”, “unsatisfactory”, or “honors.”
Students that fail the defense on their first attempt may repeat the defense at the recommendation of the degree program one more time. Such repetition can be undertaken no sooner than 90 days after the last defense.

While completing degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://ogs.ku.edu/policies/) relevant to their status and academic standing.

Handbook for Graduate Students

Further details regarding degree requirements can be found in the Department's Graduate Student Handbook.

Doctor of Philosophy in Geography

The PhD program is for students interested in research, teaching opportunities, careers with NGOs, government consulting and more. The program offers concentrations in cultural-regional geography of Africa, East Asia, Latin America, Russia/Eurasia, and the United States; geographic information science (including cartography and remote sensing); and physical/environmental geography. The program includes courses, seminars, individual research and reading, and preparation of a dissertation. Although no “outside minor” is formally required of candidates, the department favors study in auxiliary departments. Learn more about our faculty (http://geog.ku.edu/faculty/) on our website.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees.

The following items must be received to complete the application file:

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply/) found on the Graduate Admissions website.
2. A current resume/CV
3. A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geography or atmospheric science and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography & Atmospheric Science helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant’s possession as official.

5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

ADDITIONAL REQUIREMENTS

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Submit your graduate application online (https://gradapply.ku.edu/apply/). For questions, contact:

The Graduate (https://geog.ku.edu/staff/) Program Coordinator

Required Courses

GEOG 805 (History of Geographic Thought); GEOG 980 Seminar in Geography: _____ (Colloquium) for 1 credit hour during each of the first 2 semesters of residence at KU; Non-credit 8-hour Responsible Scholarship session held just before classes start in the spring semester; attend the Department's New Graduate Student Orientation (non-credit). For elective course options, please review the 500 level or above Geography courses listed in the academic catalog (https://catalog.ku.edu/liberal-arts-sciences/geography/#courseinventory). Electives are to be chosen in consultation with your advisor.

Research Skills Requirement

Research skills are important elements of any graduate program and should complement the student’s research topic. Coursework necessary to meet this requirement should commence early in the program. Selection of a particular Research Skills option must be approved by the student’s advisor and student’s committee members. A student's Research Skills requirement may be met by 1 of the following:

1. Demonstrate a reading, writing, and speaking capability in a single foreign language sufficient to enable the student to do field work without an interpreter. An examination for competence, including written and oral portions, will be conducted by the appropriate language department having expertise in that language.
2. Demonstrate a satisfactory capability in 1 research skill from the list below. The actual courses must be approved by the student’s advisor and committee members.
   a. Computer Science--complete a computer-programming course in the Department of Electrical Engineering and Computer Science (e.g., C++, Fortran, or Visual Basic) with a grade of B or higher and create a substantial computer program that illustrates a geographic application of that language. Both the course and computer program must be approved by the Computer Programming Committee of the Department of Geography.
   b. Mathematics--complete 9 hours of courses at the 500-level or above with a grade of B or higher.
   c. Statistics--complete 9 hours of courses outside the Geography Department at the 500-level or above with a grade of B or higher.
   d. An outside discipline relevant to the student’s field(s) of specialization within geography (e.g. anthropology, biology, economics, geology, history, or psychology) -- complete 9 hours of courses at the 500-level or above with a grade of B or higher (Atmospheric science courses may be used for this option, but not courses listed or cross-listed as geography.) Students may petition the Graduate Affairs Committee to have 9 hours of courses at the 500-level or above in multiple departments fulfill this requirement.

Students whose native language is not English may, in some cases, use their native language to fulfill Research Skills but only if the language is considered an adequate research tool for their program and is endorsed by the student’s advisor and committee members. Using a native language to fulfill the Research Skills requirement must have GSC approval.

In addition, the department requires that any PhD student admitted after Fall 2011 must successfully complete the Responsible Scholarship seminar offered by the department.

Proposal/Oral Comp:

The comprehensive examination is scheduled when the student and the faculty advisor believe that competence in the specialty or specialties has been achieved. It consists of two parts: written questions submitted by the committee members and then oral examination. For the written questions, they may be open-book or closed at the discretion of the individual committee member submitting the questions, and the student normally will have up to 8 hours to complete each set of questions. In the oral section, students often are asked to elaborate and comment on their written answers. The focus is on the proposal, however, with probes into its scope, justification, and methodology being common.

Two grades are possible for the overall examination: “satisfactory,” and “unsatisfactory.” In the unsatisfactory case, the student may be allowed to repeat the process one more time upon recommendation of the committee. Such repetition can be undertaken no sooner than 90 days after the last exam. Approval from the Office of Graduate Studies must be secured for the scheduling of this procedure and the request must be submitted two weeks prior to the proposed date for the examination.

Final Defense:

The student must complete an oral defense of their dissertation. The committee will be made up of at least 5 members in compliance with the Doctoral Student Oral Exam Committee Composition policy. A majority of the committee members must approve the defense with an assessment of “satisfactory”, “unsatisfactory”, or “honors”.

Students that fail the defense on their first attempt may repeat the defense at the recommendation of the degree program one more time. Such repetition can be undertaken no sooner than 90 days after the last defense.

While completing degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://ogs.ku.edu/policies/) relevant to their student status and academic standing.

Handbook for Graduate Students

Further details regarding degree requirements can be found in the Department’s Graduate Student Handbook.

Graduate Certificate in Geographic Information Science

“Everything is related to everything else, but near things are more related than distant things,” said renowned geographer and cartographer Waldo Tobler. A certificate in Geographic Information Science (GIS) capitalizes on this by blending field equipment, computer hardware and software, data, and people to capture, manage, display, analyze, and distribute all forms of geographically referenced information. Through the application of GIS and its principles, you can perform quantitative analyses to make informed decisions and provide logistical support in virtually any field. Effective use of GIS has evolved into a requisite skill for most agencies in both the public and private sectors, and provides a transformative tool to address academic research. Students from such diverse disciplines as geography, atmospheric science, biology, engineering, economics, urban planning, landscape architecture, and sociology benefit from applying GIS and related technologies such as global positioning systems (GPS), remote sensing, spatial statistics, and computer programming to use location-based data. GIS has found wide applications in the sciences and engineering, as well as in business, government, military, and consumer areas. The director of the certificate program is available to meet with each student and design a curriculum that best meets your interests, goals, and academic level.

The certificate program is designed to provide graduate students with the knowledge and skills necessary to succeed in the rapidly expanding field of geographic information science (GIScience) or apply GIScience concepts in their own field of study. Attaining the certificate shows employers you have the critical skills necessary to perform in public, private, and academic settings. It complements the existing M.A., M.S., and Ph.D. degrees and builds upon the existing graduate concentrations in GIScience within the department.

The University of Kansas is a member of University Consortium for Geographic Information Science (UCGIS).

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.
Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The director of the certificate program, Professor Xingong Li (https://geog.ku.edu/people/xingong-li/), will be available to meet with each student and design a curriculum that best meets the student’s needs. Each student will have a personalized plan depending on their interests and, if applicable, current enrollment in a graduate program. All prospective students must complete the online application (https://gradapply.ku.edu/apply/) for the GIScience Graduate Certificate Program and include a statement of interest.

All current graduate students not housed in the Department of Geography & Atmospheric Science entering the certificate program must speak with their academic advisor before entering the certificate program. Application requirements for those currently enrolled at KU:

1. A completed online application for the GIScience Graduate Certificate Program.
2. Statement of Interest.
3. A letter of support from your graduate program.
4. A current Degree Progress Report (DPR) if applicable.

Application requirements for those not currently enrolled at KU:

1. A completed online application for the GIScience Graduate Certificate Program.
2. A statement of interest.
3. A copy of official transcripts from all previous post-secondary educational institutions.
4. A letter of recommendation from persons familiar with their academic work or potential for graduate school.

Please see the policy on Graduate Certificate Programs - Eligibility and Admission Criteria (http://catalog.ku.edu/graduate-studies/#certificatetext) for more information on minimum requirements for graduate certificate admission.

Submit your graduate application online (https://gradapply.ku.edu/apply/). For questions, contact:

The Graduate Program Coordinator

A total of 12 credit hours are required to earn the certificate. Only one course outside of the Department of Geography and Atmospheric Science may be included in these 12 credit hours. Course requirements include the following:

Select 2 of the 3 core GIS courses (6-7 credit hours) listed below:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 528</td>
<td>Spatial Databases</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 558</td>
<td>Spatial Data Analysis</td>
<td>4</td>
</tr>
<tr>
<td>GEOG 560</td>
<td>GIS Application Programming</td>
<td>3</td>
</tr>
</tbody>
</table>

Core courses may be waived and replaced with approved electives in cases where students have completed the same course for undergraduate credit.

Select an additional 5-6 credit hours of electives from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ATMO 642</td>
<td>Remote Sensing</td>

</tbody>
</table>

Any graduate-level GIS application course from another department/school (in consultation with advisor)

Or, a third core course from the core GIS courses listed above

At least once per year students are required to meet with the certificate Director to discuss progress in the program.

A student can take no longer than 4 years to pursue the certificate unless a leave of absence or other extenuating circumstances are present. In either event a petition letter must be submitted to the Director during the 4th year of enrollment.

Department of Geology

The Department of Geology

In Geology, you get to apply techniques and knowledge from chemistry, physics, biology, and math to answer important questions about Earth processes, history, and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and develop solutions to environmental challenges confronting our society.

Financial Aid

Undergraduate Scholarships

The department awards scholarships from its endowment to meritorious incoming or continuing students in geology. Scholarships also are awarded to students enrolled in Field Courses. For information, contact the chair.

KU Financial Aid

All undergraduates who wish to be considered for KU financial aid must complete applications with Financial Aid and Scholarships. (https://financialaid.ku.edu/)

Graduate Assistantships, Scholarships, and Fellowships

All prospective graduate students are considered for employment and financial aid. Employment may be in the form of teaching assistantships or research assistantships. Research assistantships may be supported with funds from external grants, KUEA funds, or appointments in other units on campus, such as the Kansas Geologic Survey or the Biodiversity Institute.

Graduate students are eligible for scholarships from the Geology Associates Program, as well as fellowship funds to support living expenses, field/laboratory research, and tuition and fees. Endowed scholarships include the Angino, Hall, Henbest, Holden, Ireland, McGee, Moore, Patterson, Peoples, and Walters scholarship funds. Other scholarships are awarded from donations from individuals and
corporations. Scholarships are awarded on the basis of academic excellence; some funds are designated for protected minorities or women.

Through the Selig Fund and other donations, the department supports graduate student field work. Through the McCollum Fund and other donations, the department underwrites partially some other research expenses, such as purchase of time on analytical equipment. Funding requires an acceptable thesis or dissertation proposal. Students who have no other sources of research support are given preference. Degree-seeking students may apply for loans from the Fritz, Horner, and Johns loan funds.

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/ku-funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

Specialties

The Department of Geology strives in offering a variety of specialties to match student's professional goals and attributes. We have trained faculty in the following specialties: tectonics, geophysics, sedimentary, stratigraphy, carbonates, stable-isotopes, siliciclastic/sequence stratigraphy, geomicrobiology, hydrogeology, paleontology, glaciology, and petroleum geology. Check out our faculty (http://geo.ku.edu/faculty/) today!

Careers

Career Opportunities

We train students for academic, government, and industry careers across the geosciences. On-campus interviews for industry internship opportunities occur annually.

Practice as a professional geologist often requires course work and training beyond the baccalaureate level.

Licensure

Formal study of geology at an accredited college or university is a principal requirement for becoming licensed to practice geology. During the senior year, students who plan to become licensed geologists should take the Fundamentals of Geology examination, offered twice a year. Information on registration is available from the department office or from the Kansas Board of Technical Professions. After passing the examination and after further practice, candidates can sit for the Practice of Geology examination to become licensed. Regulations for licensure may vary from state to state.

Undergraduate Programs

Geology is an interdisciplinary science that applies the principles of chemistry, physics, biology, and other fields to the study of the earth, its resources, and its natural processes. The field has many subdisciplines and specialties that offer stimulating challenges and careers. KU offers broad undergraduate programs in geology and geophysics but emphasizes research in paleontology, sedimentology, crustal evolution, hydrogeology, geobiology, seismology, applied geophysics, glaciology, and geomorphology.

Courses for Nonmajors

The department offers several courses of interest to nonmajors who wish to learn more about geology and related areas such as environmental science, oceanography, and economic resources. Principal courses include GEOL 101, GEOL 105, GEOL 121, GEOL 171, GEOL 302, and GEOL 351. GEOL 103 may be taken in conjunction with either GEOL 101 or GEOL 105 to fulfill the CLAS laboratory science requirement. GEOL 304, GEOL 360, and GEOL 552 all offer opportunities to study more specialized aspects of the earth and do not require advanced prerequisites.

Summer Field Courses

All undergraduate degree programs require field courses during 2 summers. Students should plan to take GEOL 360 in the summer after completing the introductory course. GEOL 560 and GEOL 561 (if required by the program) ideally are taken in the summer between the junior and senior years. Substantial scholarship support is available for geology majors who enroll in those courses.

Combined Degree Programs

A student may combine an interest in geology with a degree in business, education, or journalism.

Graduate Programs

The department offers the M.S. and Ph.D. in geology but permits specialization in a number of areas of geology and in geophysics and hydrogeology. Active areas of instruction and research include geophysics, geomorphology, geochemistry, microbial biogeochemistry, paleontology, sedimentology, tectonics, and petroleum geology. Students also may work with faculty supervisors at the Kansas Geological Survey and at Kansas State University.

Students who are interested in enrolling in graduate level coursework in the Department of Geology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (https://geo.ku.edu/graduate-admissions/) for further details.

Courses

GEOL 101. The Way The Earth Works. 3 Credits. NE N
Introduction to the principles of earth science. Study of the formation, occurrence, and structure of minerals and rocks; action of streams, oceans, glaciers, and other agents in the formation and modification of the landscape; volcanism, earthquakes, and plate tectonics. Discussion of earth processes in the context of sustainable energy, environmental concerns, climate and other topical issues. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Course may be offered in lecture or online format.

GEOL 103. Geology Fundamentals Laboratory. 2 Credits. U LFE
A course in geologic laboratory studies. This course plus GEOL 101, GEOL 105, GEOL 106, or GEOL 121 satisfies the College laboratory science requirement. Gives students practical, hands-on experience with identifying earth materials (rocks, minerals, fossils), understanding their relationships to earth processes, understanding topographic and geologic maps, interpreting results of surficial processes, and learning about deep-earth processes such as earthquakes. Includes short field trips to see geologic structures and results of local geologic processes. This lab course may be offered in on-campus lab or online format. Prerequisite:
Previous or concurrent enrollment in GEOL 101, GEOL 105, GEOL 106 or GEOL 121.

**GEOL 105. History of the Earth. 3 Credits. NE N**
An introduction to the physical and biological history of the earth, the methods used to decipher earth history, and the development of the geological sciences. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Not open to students who have taken GEOL 106 or GEOL 304.

**GEOL 108. Troubled Waters: Water Resource Issues and Principles. 3 Credits. N**
Worldwide, water security is necessary for life, and food, industry, and energy production, and is increasingly the source of conflict. This course explores water in the environment and the fundamental interactions between humans and water. Key topics and issues addressed include fundamentals of water and the water cycle; water in geologic processes; water availability, development and sustainability; climate effects including flooding and drought; economics; pollution, disease, sanitation, and health; culture, policy and law, and other challenging issues. Case studies explore examples from Kansas and around the world.

**GEOL 121. Life Through Time: DNA to Dinosaurs. 3 Credits. NB N**
This course leads students on a journey through time to explore the interconnection between life and the geology of Earth, including our own complex relationship with the world around us. If taken with GEOL 122, this course satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 122 is required for students taking both.

**GEOL 122. Life Through Time: DNA to Dinosaurs Laboratory. 1 Credits. N LFE**
This online companion to GEOL 121 allows students a hands-on exploration of the principles and practices of paleontology research. Students will be guided through an individual term-length research project--from shaping a research question to collecting and analyzing data to drawing conclusions to presenting in front of an audience. This lab will not only allow students to explore the fossil record but it will bring them into the scientific conversation. Prerequisite: Corequisite: Students must be concurrently enrolled in GEOL 121.

**GEOL 171. Earthquakes and Natural Disasters. 3 Credits. NE N**
Addresses the subject of natural disasters with concentration on earthquake effects and their mitigation. Briefly treats volcanic eruptions, tidal waves, floods, global warming, severe weather, and catastrophic meteorite impacts from the perspective of geological and human significance. Provides a basic background into earth-science processes.

**GEOL 172. Earthquakes and Natural Disasters Laboratory. 1 Credits. N**
This online companion to GEOL 171 allows students a hands-on exploration of the principles and practices of geologic and geophysical research. Students will be guided through an individual term-length research project--from shaping a research question to collecting and analyzing data to drawing conclusions to presenting in front of an audience. This lab will not only allow students to explore details of natural disasters, but it will bring them into the scientific conversation. Prerequisite: Corequisite: GEOL 171.

**GEOL 177. First Year Seminar: ______. 3 Credits. NE**
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in geology. May not contribute to major requirements in geology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**GEOL 190. Introduction to Quantitative Geoscience. 3 Credits. N**
This applied, introductory-level program will explore topics in geology, hydrogeology, physics, chemistry, and biology from a mathematical perspective. The course is designed for students with a desire to expand their mathematical skills, building on practical applications in the natural sciences. The study of lab and field sciences and mathematical problem-solving through rigorous, quantitative, and interdisciplinary investigations will be emphasized. The course will take students from a review of arithmetic and algebraic manipulations, to the use of logarithms, and functions, through series, trigonometry and graphing, and finish with an introduction to the elements of calculus and statistics. The course will utilize Excel as platform for calculating and graphing numerical examples of the problems presented. We expect students in this course to emerge with confidence in the basic use of mathematics commonly applied to investigate and model the natural world. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

**GEOL 301. Introduction to Oceanography. 3 Credits. N**
The online course is an introduction to the earth and its oceans, including a discussion of the history of ocean exploration using the approach of the scientific method. The course will explore theories that describe the origin of the solar system, the earth, the atmosphere, and the oceans, in addition to a discussion of the origin of life on the earth. The course will cover the essential physics, chemistry, geology, biology, and the concepts of plate tectonics, as applied to understanding the oceans and seas. This course cannot be taken if a student has completed GEOL 302.

**GEOL 302. Oceanography. 4 Credits. NE N LFE**
An introduction to the origin, nature, and dynamics of the world's oceans, including aspects of geology, chemistry, biology, physics, and meteorology that are involved in ocean processes. The relations between the oceans and humans in the past, present, and future, and instruction in scientific reasoning as it applies to oceanography. Laboratory exercises in critical thinking about oceanography. This course cannot be taken if a student has completed GEOL 301. Prerequisite: An introductory science course.

**GEOL 304. Historical Geology. 3 Credits. N**
An introduction to the physical and biological history of the Earth, the methods used to decipher earth history, and the development of the geological sciences. Concepts of lithostratigraphy, chronostratigraphy and biostratigraphy, and methods of analysis of stratigraphic data focus on the interpretation of Earth history. Prerequisite: GEOL 101 and GEOL 103.

**GEOL 311. Mineralogy and Structure of the Earth. 3 Credits. N LFE**
Basic identification and properties of rocks and minerals in the context of whole-earth structure and evolution. Includes basic chemical equilibria for rock and mineral systems and their bearing on processes involved with formation and evolution of Earth's crust, mantle, and core. Two lectures and one lab per week. Prerequisite: GEOL 101, CHEM 130, and eligibility for MATH 125 or MATH 115.

**GEOL 312. Mineral Structures and Equilibria Laboratory. 1 Credits. U LFE**
A laboratory to accompany GEOL 311. Presents more rigorous analysis of the structures, compositions, and chemical equilibria governing the formation and stability of common rock-forming mineral systems. Prerequisite: GEOL 311 (may be taken concurrently), CHEM 130, and eligibility for MATH 125 or MATH 115.

**GEOL 315. Gemstones. 3 Credits. NE N**
The properties, occurrence, description, determination, mineral affinities, and legend and lore of gems, ornamental stones, and gem materials.
GEOL 316. Geochemistry. 3 Credits. N
The course is intended to be an introduction to all types of geochemistry. It focuses on the natural chemistry of the world and the chemical evolution of the Earth over geological time. The course is composed of three modules: (a) geochronological fundamentals; (b) natural and anthropogenically perturbed aspects of the Earth’s hydrosphere and its interaction with surficial rocks, sediments, soils, the biosphere and the atmosphere and (c) the origin and evolution of Earth (crust-mantle-core) and the solar system through nuclear and high temperature chemical processes. Prerequisite: GEOL 101, CHEM 130 or 190; and eligibility for MATH 115.

GEOL 331. Sedimentology and Stratigraphy. 4 Credits. N LFE
Basic principles used in the study of sedimentology and stratigraphy. Physical, chemical, and biological processes in sedimentary environments applied to the recognition of the depositional environment, preservation, and alteration of sedimentary rocks. Field and laboratory study of sedimentary rocks with emphasis on interpretation of original depositional environments and preservation in the stratigraphic record. Prerequisite: GEOL 101 and GEOL 103; and GEOL 304 or taken concurrently.

GEOL 332. Sedimentology for Petroleum Engineers. 4 Credits. N
This course is designed for Petroleum Engineering majors. It covers basic principles used in the study of sedimentary environments. Topics include classification of sedimentary rocks, diagenesis and the alteration of sedimentary rocks. Surface processes and recognition of depositional environments in the rock record is emphasized. Basic concepts of stratigraphy are introduced. Emphasis is placed on practical examples relating to petroleum reservoirs. Lecture, lab and field trips. Prerequisite: GEOL 101 and GEOL 103 and Petroleum Engineering Major.

GEOL 351. Environmental Geology. 3 Credits. NE N
An introductory course dealing with the implications of geologic processes and materials for civilization. Topics to be considered include: geologic hazards such as floods, landslides, earthquakes, and volcanism; the availability of water, mineral, and energy resources; and the environmental impact of resource utilization. The importance of recognizing geologic constraints in land use planning and engineering projects is emphasized and illustrated by examples.

GEOL 360. Field Investigation. 2 Credits. N
Summer session. A field-geology course that provides beginning geology students with an initial understanding of the nature of geological evidence in the field, the breadth of geological phenomena, and the importance of the interplay of information from many geological disciplines in solving problems. Given at various geologically diverse locations. Fee. Prerequisite: GEOL 101.

GEOL 370. Study Abroad in Greece: Natural Environment and Civilizations. 3 Credits. N
This course examines the profound influence of the natural environment on the development of civilizations and the course of history. Geologic processes responsible for natural resources, water, landscapes, natural hazards and climate are presented in the context of their impact on ancient Greek society. The class visits sites of geologic and historic interest such as Athens, Delphi, Mycenae and the Aegean Sea islands including Santorini volcano. Examples from other eras and regions of the world are discussed along with present-day analogues. Prerequisite: An introductory geology course or permission of the instructor.

GEOL 391. Special Studies in Geology. 1-6 Credits. N
Special reports upon subjects in which students have a particular interest. Prerequisite: Fifteen hours of geology.

GEOL 399. Senior Honors Research. 2-5 Credits. N
 Normally two to five hours in any one semester with a maximum of eight hours. An undergraduate research course, in any of the fields of geology, open by permission of the department to seniors in the College who have an average grade of B or higher in geology courses. Prerequisite: Thirty hours of geology, five of which may be taken concurrently with this course.

GEOL 501. Simple Error Analysis with Matlab. 2 Credits. NE N
This course covers basic error analysis as it applies to geology. The course will emphasize the description and propagation of errors in data collection and reduction. Subjects include: how to report data and associated errors, error propagation in simple and complex equations, the Normal, Gaussian, and Poisson distributions, linear and higher order regression, and X-squared test. Prerequisite: MATH 125.

GEOL 502. Linear Algebra for Earth Scientists. 2 Credits. N
This course covers basic linear algebra as it applies to geology and emphasizes the description and use of linear algebra to solve geologic problems. Subjects include: how to solve systems of equations, determinants, inversion, vector spaces, matrix manipulation, eigenvectors and values, least squares solutions, and orthogonality. Prerequisite: MATH 125.

GEOL 503. Numerical Methods in the Earth Sciences. 2-3 Credits. N
The class will provide an introduction to writing and testing code in the numerical computing environment MATLAB, using examples from Earth Science disciplines to introduce basic concepts and develop progressively more complex code. Prerequisite: MATH 125 and prior completion or co-enrollment in GEOL 502.

GEOL 504. Inverse Problems for Geoscientists. 3 Credits. N
This course will cover a variety of mathematical methods for fitting models of underlying physical processes to data. This course is aimed specifically at geoscientists, with examples taken from geophysical problems such as seismic tomography. The specific topics to be covered will vary a bit based on the interests of those in the class. We are sure to cover Linear Regression and Least Squares, Tikhonov Regularization, and bounded constraints. Other topics include Kalman Filters for time-dependent inversion of time series data, Markov-Chain Monte Carlo Methods from non-linear problems, and other non-linear optimization methods. Problem sets will be assigned in MATLAB, previous MATLAB experience highly recommended. Prerequisite: GEOL 501 OR MATH 526; GEOL 502 OR MATH 290 or MATH 291; MATH 220 or MATH 320 equivalent; GEOL 503 or equivalent MATLAB experience.

GEOL 511. Raman Spectroscopy of Crystalline Solids. 3 Credits. N
This course introduces students to Raman scattering in crystalline solids. This class with cover light and polarization of light, phonons and magnons, Raman scattering, Raman Tensor, wave vectors and k space, reciprocal space and Brillouin zones (and zone edge), group theory and character tables, polarized Raman scattering (symmetry of zone center phonons), Frohlick intraband electro-optical coupling and other multiphonon resonance Raman mechanisms in crystalline solids, and phonon confinement in nanomaterials. Prerequisite: GEOL 311 or PHSX 212.

GEOL 512. Igneous and Metamorphic Petrology. 3 Credits. N
The study of minerals, rocks and fluids within the earth's crust and mantle to elucidate their mechanisms of formation and the pressure-temperature-composition conditions within the earth. The course emphasizes equilibrium thermodynamics, phase equilibria, fractionation mechanisms, tectonic control of petrogenesis, and quantitative analysis of mineral parageneses. Prerequisite: GEOL 311 and first semester calculus, or permission of instructor.
GEOL 533. Shales and Other Mudstones. 3 Credits. N
This course defines mudstones and shales. Deposition and constituents of fine-grained sediment; geochemistry, diagenesis and lithification of such deposits. Organic constituents of mudstone and their function as sources of crude oil and natural gas. Petrophysics and mechanical properties of mudstones and their potential as reservoirs of hydrocarbons. Not open to students with credit in GEOL 733. Prerequisite: GEOL 512 and GEOL 101.

GEOL 535. Petroleum and Subsurface Geology. 4 Credits. N LFE
A general study of the occurrence, properties, origin, and migration of petroleum. Studies of various oil fields and oil-bearing basins. Laboratory studies include well logs, subsurface mapping, and cross-sections. Prerequisite: GEOL 331 and either GEOL 562 or C&PE 327, or permission of instructor.

GEOL 536. Geological Log Analysis. 1 Credits. U
Application of well logging measurements to interpretation subsurface. Not open to students who have completed or are taking C&PE 528. Prerequisite: GEOL 101.

GEOL 537. Petroleum Reservoir Characterization. 3 Credits. N
Geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve oil recovery. Students who have completed GEOL 837 may not take GEOL 537 for credit. Prerequisite: GEOL 535 and permission of instructor.

GEOL 538. Basin Analysis. 3 Credits. N
Overview of sedimentary basins, mechanisms of basin formation, and basin evolution through time. Topics include lithospheric stretching and flexure to form sedimentary basins, geohistory analysis and backstripping, and thermal history and controls on basin fill. This course consists of lectures, exercises, and a field trip. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 738. Prerequisite: GEOL 331 and GEOL 562.

GEOL 539. Sequence Stratigraphy. 3 Credits. N
Principles and practical applications of sequence stratigraphy, the process of studying and correlating depositional linked stratal successions in a chronostratigraphic framework. The concepts of depositional sequences, parasequences, bounding surfaces, systems tracts and incised valleys are studied through class exercises and a regional field trip. Seismic stratigraphic techniques and concepts are covered in the latter part of the course. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 739. Prerequisite: GEOL 331 or GEOL 332.

GEOL 541. Geomorphology. 4 Credits. N LFE
A critical study of landforms in relation to tectonics, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEOG 541.) Prerequisite: GEOL 101 and GEOL 103, GEOG 104 and GEOG 105, or GEOL 304 and GEOL 103.

GEOL 542. Energy and Society. 3 Credits. N
In this course, you will gain the necessary understanding of energy technologies and policies to evaluate options for energy usage and its socioeconomic and environmental impacts. You will analyze different opportunities and impacts of energy systems that exist within and between groups defined by national, regional, household, ethnic, and gender distinctions. Analysis of the range of current and future energy choices will be stressed, as well as the role of energy in determining local environmental conditions and global climate. Prerequisite: A course in Biology, Chemistry, Physics, or Geology.

GEOL 543. Environmental Ethics: A View from the National Parks. 3 Credits.
To what extent are our National Parks protected from pollution, invasive species, mining, climate change and tourism? In this course you will learn about the geologic processes that form our National Parks as well as the competing interests that stakeholders have on the land. Prerequisite: A course in Biology, Chemistry, Physics, or Geology.

GEOL 548. Geology and Culture of Polynesia. 3 Credits. N
Polynesia, encompassing over 1,000 islands in the southern and central Pacific Ocean, was the last region of the Earth to be settled by humans. Around 3000-1000 BCE, people from northwest Melanesia first reached one of these islands, and over the next few centuries spread to colonize all of the islands. However, despite the fact that all of the Polynesian islands were settled by colonists who stemmed from a single population with a shared culture, language, technology, and agriculture, the cultures of these islands are incredibly rich and varied. In this course we will examine some of the cultural mores and practices of the Polynesian islands, including how these were shaped by the climate, geology, soil, hydrology, and marine resources of each individual island. In this course we will examine these factors and assess their potential impact.
on the cultures present in the region. Prerequisite: A course in Biology, Chemistry, Physics, or Geology.

**GEOL 552. Introduction to Hydrogeology. 3 Credits. N**

**GEOL 554. Contaminants in Groundwater. 3 Credits. N**

This course introduces the basics of groundwater flow, water quality, and contaminant transport from a qualitative perspective. The course also surveys common groundwater pollutants, such as heavy metals, organic compounds, radionuclides, salts, non-aqueous phase liquids, risk analysis, and forensic hydrogeology. Students are expected to work together to complete weekly reading assignments. A course field trip forms the basis for a term report that is expected to incorporate concepts and tools covered during the lectures and readings. This course requires no calculations, but mathematical and chemical terms are presented. Prerequisite: One semester of general chemistry, and at least one 100 level course or higher in Geology or physical geography (GEOG 104 or GEOG 105), or permission of the instructor.

**GEOL 555. Climate Science. 3 Credits. N**

This course explores the science of climate change. Students will learn how the climate system works; what factors cause climate to change across different time scales and how those factors interact; how scientists use models, observations and theory to make predictions about future climate; and the possible consequences of climate change for our planet. Students will learn how climate change today is different from past climate cycles and how satellites and other technologies are revealing the global signals of a changing climate. Finally, the course looks at the connection between human activity and the current warming trend and considers some of the potential social, economic and environmental consequences of climate change. Prerequisite: A course in Biology, Chemistry, Physics, Environmental Studies, Geography, or Geology.

**GEOL 556. Field Methods in Hydrology. 3 Credits. N**

The course offers an overview on basic field methods for characterization of hydrologic systems. Topics to be covered include physical and chemical characterization techniques, such as: how to measure water levels; perform single well and aquifer tests; unsaturated zone parameterization; inorganic, organic, isotopic, and dissolved gas characterization; groundwater-surface water characterization techniques, and geophysical techniques for hydrogeology. Additionally, the class will visit a variety of sites of hydrogeologic interest. Prerequisite: GEOL 552 or permission from instructor.

**GEOL 557. Environmental Site Operations, Management, and Safety: HAZWOPER Health and Safety Standards. 3 Credits.**

On-site investigation of contaminated soil and water requires training in site operations and responses to emergencies involving releases of hazardous substances for scientists, workers, and employers. This course will introduce contaminant toxicology, hazard identification, site operations and management, and provide an overview of related regulations. Monitoring equipment, drum and container sampling, decontamination, and confined space designations will be taught. General safety hazards, personal protective equipment and levels of protection, drill rig safety, hazard communication and medical surveillance, and development of health & safety plans, will also be addressed. The course satisfies the Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response (HAZWOPER) 40-Hour requirement, following General Industry (29 CFR 1910.120) and Construction Industry (29 CFR 1926.65) regulations. A required “hands on” training exercise is conducted at Edwards campus on the first Saturday in March. Prerequisite: CHEM 130 and GEO 101, GEOG 104, BIOL 100 or an introductory engineering course.

**GEOL 558. Applied Groundwater Modeling. 3 Credits. N**

This course focuses on how to construct simple to complex computer models of groundwater systems and systems in which water flows between groundwater and surface water bodies such as springs, streams and lakes. We consider water flow, transport of solutes, density effects (from saltwater or brines), and the use of groundwater and surface water (demand-driven, supply-limited problems), and managed aquifer recharge (MAR). We consider three aspects of model development: (1) how to compare the computer models we construct to the systems modelers intend them to represent, (2) how accurate the models are likely to be and how uncertainty can be quantified, and (3) how useful the models are in practice. Prerequisite: GEOL 101 or permission from instructor.

**GEOL 559. Introductory Field Geology. 3 Credits. N**

Summer session. The study of the principles of field geology and the application of field methods to solve geological problems. Includes use of topographic maps and aerial photographs for geological mapping, the study of stratigraphic methods by measuring sections, and working field trips to areas of regional geological interest. Given at the University of Kansas Geology Field Camp near Canon City, Colorado. Fee. Prerequisite: GEOL 331, GEOL 360, and GEOL 562, or consent of instructor.

**GEOL 561. Field Geology. 3 Credits. N**

Summer session. The application of the principles of field geology to solve complex geological problems in the field. Given at the University of Kansas Geology Field Camp near Canon City, Colorado, or at other sites as appropriate. Fee. Prerequisite: GEOL 560.

**GEOL 562. Structural Geology. 4 Credits. N LFE**

A study of primary and secondary rock-structures and their genesis. Includes techniques of structural analysis and introduces mechanics of rock deformations. Lectures, laboratory, and required field trip. Prerequisite: GEOL 311; PHSX 111, PHSX 114, or PHSX 211 and PHSX 216; and MATH 115 or MATH 126.

**GEOL 563. Tectonics and Regional Geology. 3 Credits. NE N**

Topics vary with demand and include fundamental features of plate tectonics, interpretation and distribution of regional geology of mountain belts with emphasis on tectonic setting and processes, regional geology, and tectonics of selected mountain belts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GEOL 763. Prerequisite: GEOL 562, GEOL 512, or GEOL 331, and GEOL 572.

**GEOL 572. Geophysics. 3 Credits. N**

Introductory study of gravitational, magnetic, seismic, electrical, and thermal properties of the earth. Measurements, interpretation, and applications to exploration, earth structure, and global tectonics. Prerequisite: An introductory course in geology; MATH 116 or MATH 126; and PHSX 115 or PHSX 212 and PHSX 236. PHSX 115 or PHSX 212 may be taken concurrently.

**GEOL 575. Seismic Exploration. 3 Credits. N**

Application of seismic reflection and refraction techniques to the description of near-surface geology and the exploration for energy and mineral resources. Theory of seismic information, data collection, data processing using computers, and geologic interpretation. Prerequisite:
A course in computer programming, either FORTRAN or C, which may be taken concurrently. An introductory geophysics course, such as GEOL 572.

GEOL 578. Seismic Data Analysis and Interpretation. 3 Credits. N
Interpretation methods applied to seismic exploration and reservoir characterization. Topics include: rock physics, the convolutional model, synthetic seismograms, seismic response of hydrocarbon reservoirs, resolution, seismic velocity, depth conversion, seismic attributes, AVO, inversion, seismic anisotropy, 3-D & 4-D interpretation, S-wave and converted wave interpretation, laboratory use of commercial seismic interpretation software. Prerequisite: GEOL 572 or consent of the instructor.

GEOL 579. Hydrogeophysics. 3 Credits. N
This course is designed to introduce students to current hydrogeophysics research. Students will learn about determining, predicting, and studying the physical properties and hydrologic processes associated with groundwater flow, contaminant transport, and microbemineral interactions using geophysical measurements at different scales. This course combines lectures, literature review and discussion, and student presentations. Not open to students with credit in GEOL 779. Prerequisite: GEOL 571 or GEOL 121.

GEOL 591. Topics in Geology: _____ 1-5 Credits. N
May include lectures, discussions, readings, laboratory, and field work in geology. Will be given as needed. May be taken more than once.

GEOL 701. Graduate Students Professional Skills & Ethics. 2 Credits.
Graduate students develop a set of skills that promote their success in subsequent professional endeavors during their time in degree. Acquiring these skills early in their graduate training can facilitate progress through their degree as well as enrich preparation for their professional activities. The course will cover best teaching practices in the classroom and field, scientific ethics, diversity and inclusion in the workplace, and work-life balance as well as an introduction to basic KU Geology administrative structure. In the second half of the semester, students will develop, peer review, and complete a draft of the student's research proposal.

GEOL 715. Geochemistry. 3 Credits.
Application of chemical equilibria and kinetics to geological environments and processes, with emphasis on processes involving solution equilibria. Includes introduction to thermodynamic aspects of equilibria.

GEOL 717. Geochronology. 3 Credits.
Principles and applications of natural radioactive systems for geochronology and cosmochronology, including use of radiogenic isotopes as geochemical tracers. Prerequisite: GEOL 512 or consent of instructor.

GEOL 718. Stable Isotope Geochemistry. 1-3 Credits.
Principles and applications of equilibria among stable isotopes in the geological environment, with emphasis on the isotopic systems of hydrogen, carbon, and oxygen. Prerequisite: GEOL 715 or consent of instructor.

GEOL 723. Museum Internship. 1-6 Credits.
Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, ANTH 799, and MUSE 799.)

GEOL 728. Paleopedology. 3 Credits.
Paleopedology is the study of ancient soils preserved in the geologic record. The course covers concepts of paleopedology and its applications to the interpretation of paleoenvironmental, paleoecologic, and paleohydrogeologic settings and its use in sequence stratigraphy and paleoclimatology. Prerequisite: GEOG 535 or GEOL 331; or consent of the instructor.

GEOL 729. Ichnology. 3 Credits.
Ichnology is the study of organism-substrate interactions. The class will cover concepts and applications of ichnology in the marine and continental realms, including the behavior of such organisms as microbes, plants, invertebrates, and vertebrates preserved in the geologic record as trace fossils. Ichnology is applied in geology and in the petroleum industry to interpret ancient environments, hydrogeology, ecology, and climate. Prerequisite: GEOL 331 or GEOL 521; or consent of the instructor.

GEOL 731. Terrigenous Depositional Systems. 4 Credits.
Processes that operate in recent sedimentary environments, responses of sediment to those processes, and criteria for determining depositional environments of ancient sedimentary rocks. Lectures, practical exercises, and field trips. Prerequisite: GEOL 331.

GEOL 732. Carbonate Depositional Systems. 3 Credits.
Patterns and processes of contemporaneous carbonate deposition and diagenesis, depositional models; applications to interpretation of carbonate rocks. Lecture, discussion, laboratory and field trips.

GEOL 733. Shales and Other Mudstones. 3 Credits.
This course defines mudstones and shales. Deposition and constituents of fine-grained sediment; geochemistry, diagenesis and lithification of such deposits. Organic constituents of mudstone and their function as sources of crude oil and natural gas. Petrophysics and mechanical properties of mudstones and their potential as reservoirs of hydrocarbons. Not open to students with credit in GEOL 532. Prerequisite: GEOL 331.

GEOL 738. Basin Analysis. 3 Credits.
Overview of sedimentary basins, mechanisms of basin formation, and basin evolution through time. Topics include lithospheric stretching and flexure to form sedimentary basins, geohistory analysis and backstripping, and thermal history and controls on basin fill. This course consists of lectures, exercises, and a field trip. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 538. Prerequisite: GEOL 331 and GEOL 562.

GEOL 739. Sequence Stratigraphy. 3 Credits.
Principles and practical applications of sequence stratigraphy, the process of studying and correlating depositional-linked stratal successions in a chronostratigraphic framework. The concepts of depositional sequences, parasequences, bounding surfaces, systems tracts and incised valleys are studied through class exercises and a regional field trip. Seismic stratigraphic techniques and concepts are covered in the latter part of the course. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 539. Prerequisite: GEOL 331 or GEOL 332.

GEOL 751. Physical Hydrogeology. 3 Credits.
Study of fluid flow in subsurface hydrologic systems. Investigation of the ground water environment including porosity, and hydraulic conductivity and their relationship to typical geologic materials. Examination of Darcy's law and the continuity equation leading to the general flow equations. Discussion of typical hydraulic testing methods to estimate aquifer parameters in various situations and apply these to water resource problems. Study of the basic mechanisms that determine the behavior of typical regional flow systems. (Same as CE 752.)

GEOL 753. Chemical and Microbial Hydrogeology. 3 Credits.
Lecture and discussion of chemical and microbiological controls on groundwater chemistry. Topics include thermodynamic and microbiological controls on water-rock reactions; kinetics; and
microbiological, chemical and isotopic tools for interpreting water chemistry with respect to chemical weathering and shallow diageneis. Origins of water chemistry, changes along groundwater flow paths, and an introduction to contaminant biogeochemistry will be discussed through the processes of speciation, solubility, sorption, ion exchange, oxidation-reduction, elemental and isotopic partitioning, microbial metabolic processes and microbial ecology. An overview of the basics of environmental microbiology, including cell structure and function, microbial metabolism and respiration, microbial genetics and kinetics of microbial growth will be covered. (Same as CE 753.) Prerequisite: One year of chemistry, one year of calculus, one year of biology, an introductory course in hydrogeology, or consent of the instructors.

GEOL 754. Contaminant Transport. 3 Credits.
A study of the transport of conservative and non-conservative pollutants in subsurface waters. Case studies are used to illustrate and develop a conceptual understanding of such processes as diffusion, advection, dispersion, retardation, chemical reactions, and biodegradation. Computer models are developed and used to quantify these processes. (Same as CE 754.) Prerequisite: Introductory Hydrogeology or consent of instructor.

GEOL 755. Site Assessment. 3 Credits.
Site Assessment encompasses both the academic and applied aspects of environmental geology. The student is presented with the historical, regulatory and risk characteristics of environmental issues as well as specific geologic principles such as GIS and remote sensing, geophysics, geomorphology and surface and groundwater practices. Site assessment concepts include surface and subsurface sampling, analyses and interpretations, conceptual site models, environmental geologic forensics, and environmental Phase I site assessments (USEPA and ASTM). Environmental geology project management principles and practices are examined in detail. These core aspects of the course form the basic structure in understanding and applying environmental remediation and state-of-the-art/state-of-the-practice processes. Case studies are researched and analyzed for the assessment phase of the program.

GEOL 758. Applied Groundwater Modeling. 3 Credits.
This course focuses on how to construct simple to complex computer models of groundwater systems and systems in which water flows between groundwater and surface water bodies such as springs, streams and lakes. We consider water flow, transport of solutes, and density effects (from saltwater or brines). We consider the conjuctive use of groundwater and surface water (demand-driven, supply-limited problems), and managed aquifer recharge (MAR). We consider three aspects of model development: (1) how to compare the computer models we construct to the systems modelers intend them to represent, (2) how accurate the models are likely to be and how uncertainty can be quantified, and (3) how useful the models are in practice. (Same as CE 731.) Prerequisite: GEOL 751 or CE 752, or approved by the professor.

GEOL 761. Topics in Regional Field Geology: ______. 1-5 Credits.
A detailed field study of a carefully selected area that includes features of several phases of geology. Field trip fee. Prerequisite: GEOL 561 or equivalent and departmental approval.

GEOL 763. Tectonics and Regional Geology. 3 Credits.
Topics vary with demand and include fundamental features of plate tectonics, interpretation and distribution of regional geology of mountain belts with emphasis on tectonic setting and processes, regional geology, and tectonics of selected mountain belts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GEOL 563. Prerequisite: GEOL 562, GEOL 512, or GEOL 331, and GEOL 572.

GEOL 771. Advanced Geophysics: ______. 1-3 Credits.
Topics to vary with demand and include heat flow, wave propagation, synthetic seismograms, groundwater exploration, geothermal exploration, electrical methods in exploration, rock mechanics-tectonophysics, rock magnetism, geomagnetism, paleomagnetism, geophysical inverse theory, and others upon sufficient demand. May be repeated for different topics. (Same as PHSX 727.) Prerequisite: GEOL 572 or consent of instructor.

GEOL 772. Geophysical Data Analysis. 3 Credits.
Fourier analysis, sampling theory, prediction and interpolation of geophysical data, filtering theory, correlation techniques, deconvolution. Examples will be chosen from various fields of geophysics. Prerequisite: MATH 250/AE 250/ARCE 250/CE 250/C&PE 250/ECECS 250/EPHX 250/ME 250 and GEOL 572.

GEOL 773. Seismology. 3 Credits.

GEOL 779. Hydrogeophysics. 3 Credits.
This course is designed to introduce students to current hydrogeophysics research. Students will learn about determining, predicting, and studying the physical properties and hydrologic processes associated with groundwater flow, contaminant transport, and microbeminal interactions using geophysical measurements at different scales. This course combines lectures, literature review and discussion, and student presentations. Not open to students with credit in GEOL 579.

GEOL 780. Conservation Principles and Practices. 3 Credits.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

GEOL 781. Introduction to Museum Exhibits. 3 Credits.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide firsthand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, BIOL 787, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

GEOL 783. Museum Management. 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

GEOL 784. Introduction to Museum Public Education. 3 Credits.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, HIST 721,
and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

GEOL 785. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, BIOL 798, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

GEOL 791. Advanced Topics in Geology: _____. 1-5 Credits.
Selected offerings in geology. Intended primarily for graduate students and qualified seniors. May include lectures, discussions, reading, laboratory, and field work. May be taken more than once.

GEOL 814. Professional Science Masters Environmental Geology Capstone I. 1 Credits.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, or an internship or similar individual project for full-time students or students who are not employed in the area of study. This course will initiate the process of project development and will be taken prior to a student’s final semester. This project is to be continued in GEOL 815 in the last semester of the student's graduate career. Prerequisite: Minimum 20 credit hours completed in program.

GEOL 815. Professional Science Masters Environmental Geology Capstone II. 2 Credits.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, an internship or similar individual project for full-time students or students who are not employed in the area of study. The students will compile their project results in a formal written report and will give an oral presentation to the Environmental Studies faculty (2 minimum) and the student's employer or mentor. Prerequisite: GEOL 814.

GEOL 837. Geoscience and Petroleum Engineering. 3 Credits.
Advanced geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve recovery. Students who have completed GEOL 537 may not take GEOL 837 for credit.

GEOL 851. Field and Laboratory Methods: Physical Hydrogeology. 1 Credits.
Introduction to field and laboratory methods commonly used in physical hydrogeology. Practical experience with common water level measurement techniques, various well pumping techniques, well installation and geologic core sampling, and hydraulic testing. Prerequisite: Introductory course in hydrogeology and familiarity with computer use for data processing, or consent of instructor.

GEOL 852. Field and Laboratory Methods: Contaminant Transport. 1 Credits.
Introduction to laboratory methods for evaluating reactive transport parameters, followed by development and implementation of computer models. Students will gain experience building models starting from basic transport equations using a spreadsheet platform and, where appropriate, commercial software packages. Prerequisite: GEOL 751 (may be taken concurrently) or equivalent, or consent of the instructor.

GEOL 853. Field and Laboratory Methods: Chemical Hydrogeology. 1 Credits.
Practical experience in measuring unstable chemical parameters in groundwater, including pH, Eh, dissolved oxygen, temperature, alkalinity, specific conductance, and turbidity. Practical experience in collecting water samples for chemical analysis, choosing appropriate sample containers and preservation methods, and special techniques for collecting samples for determination of parameters sensitive to environmental changes such as oxygen level or temperature. Prerequisite: GEOL 753 (may be taken concurrently) or equivalent, or consent of the instructor.

GEOL 855. Field and Laboratory Methods: Environmental Geophysics. 1 Credits.
Introduction to the application of geophysical methods to environmental investigations. Practical experience in designing, conducting, and interpreting information obtained using downhole and shallow surface geophysical methods will be addressed. Prerequisite: Introductory course in hydrogeology or consent of instructor.

GEOL 856. Field and Laboratory Methods Special Topics: _____. 1 Credits.
Practical experience in a special topic in Environmental Geology. Course may be repeated if topic varies.

GEOL 891. Special Studies in Geology. 1-5 Credits.
May be repeated.

GEOL 899. Master's Thesis. 1-12 Credits.
Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing.

GEOL 999. Doctoral Dissertation. 1-12 Credits.
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing.

Bachelor of Arts in Geology

Why study geology?

In Geology you get to apply techniques and knowledge from chemistry, physics, biology and math to answer important questions about Earth processes, history and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and understand the environment including water quality and climate change.

The B.A. program (https://geo.ku.edu/geology-undergraduate-ba/) allows many free electives for background courses in the sciences or liberal arts. The program permits study of traditional geology (with emphasis on the solid earth, the earth's surface, or environmental geology and natural resources), environmental geology (with emphasis on water or urban environmental geology), or an individually tailored program.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office
of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Geology Programs

The B.A. program allows many free electives for background courses in the sciences or liberal arts. The program permits study of traditional geology (with emphasis on the solid earth, the earth’s surface, or environmental geology and natural resources), environmental geology (with emphasis on water or urban environmental geology), or an individually tailored program.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

First- and Second-Year Preparation

Students interested in geology should see a department advisor as soon as possible. They should enroll in mathematics, chemistry, and English in addition to Introduction to Geology and electives. Students should take GEOL 360 as soon as possible.

Advising

Developing a strong relationship with a faculty advisor helps students get the most out of their educational programs in the shortest time. Most courses for majors are offered in only one semester each year. Advisors can guide the student through complexities of the curriculum or into a specialized program.

Geology Required Electives

Majors must complete a minimum of 15 hours in geology or related courses. Several possible tracks of upper-level course work are given below.

Geology Options

Concentrate on traditional geology with emphasis on the solid earth and the earth’s interior, earth surface processes, or environmental geology and natural resources.

Other Elective Courses
- BIOL 414 | Principles of Ecology                                      | 3     |
- GEOG 558 | Spatial Data Analysis                                      | 4     |

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Geology with the following concentrations can be found here: General Geology (p. 1463) and Environmental Geology (p. 1464), or by using the left-side navigation.

**Departmental Honors**
Pursuit of departmental honors in Geology is by invitation from the Department of Geology honors coordinator.
Requirements include:
- 3.50 or higher KU geology-courses GPA at graduation.
- Completion of at least 2 credit hours of GEOL 399.

Completion and successful defense of an honor's thesis. Additional requirements and more information may be obtained from the Department of Geology honors coordinator and website.

**BA in Geology with concentration in General Geology**
Below is a sample 4-year plan for students pursuing the BA in Geology with a concentration in General Geology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

#### Total Hours 15-15-3

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Geology majors are required to complete 15 hours of elective. The General Geology track offers electives in Solid Earth, Surface Earth, and Geology and Natural Resources. For a list of applicable electives see the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/geology/ba/#requirementstext) tab.

3. All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

4. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BA in Geology with concentration in Environmental Geology

Below is a sample 4-year plan for students pursuing the BA in Geology with a concentration in Environmental Geology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120-125

---

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 Geology majors are required to complete 15 hours of elective. The Environmental Geology track offers electives in Water, Geology, and the Environment; Urban Environmental Geology; and Other Electives. For a list of applicable electives see the degree requirements ([http://catalog.ku.edu/liberal-arts-sciences/geology/ba/#requirementstext](http://catalog.ku.edu/liberal-arts-sciences/geology/ba/#requirementstext)) tab.
3 All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
4 Visit this website ([https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/](https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/)) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
5 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of
study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Science in Geology

Why study geology?

In Geology you get to apply techniques and knowledge from chemistry, physics, biology and math to answer important questions about Earth processes, history and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and understand the environment including water quality and climate change.

The B.S. program (http://geo.ku.edu/overview/) provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The environmental geology option combines training in geology with many different sciences.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Geology Programs

The B.S. program provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The environmental geology option combines training in geology with many different sciences.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

First- and Second-Year Preparation

Students interested in geology, especially in the B.S. degree, should see a department advisor as soon as possible. They should enroll in mathematics, chemistry, and English in addition to Introduction to Geology and electives. Students should take GEOL 360 as soon as possible.

Advising

Developing a strong relationship with a faculty advisor helps students get the most out of their educational programs in the shortest time. Most courses for majors are offered in only one semester each year. Advisors can guide the student through complexities of the curriculum or into a specialized program.

Requirements for the B.S. Degree

The B.S. program provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The environmental geology option combines training in geology with many different sciences.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

General Geology Option

Written Communication - Core Skill and Critical Inquiry.

Geology Prerequisite or Co-requisite Knowledge

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by:

MATH 125 Calculus I (Prerequisite: MATH 104; or MATH 103; or three years of college preparatory mathematics including trigonometry and a score of 28 or higher on ACT mathematics or 640 or higher on the SAT; or a qualifying score on the mathematics placement test.) 4

Calculus II. Satisfied by:

MATH 126 Calculus II 4

Chemistry. Satisfied by:

CHEM 130 General Chemistry I 10
& CHEM 135 and General Chemistry II

Physics. Satisfied by:

PHSX 211 General Physics I 5
& PHSX 216 and General Physics I Laboratory

PHSX 212 General Physics II 4
& PHSX 236 and General Physics II Laboratory

Biology. Satisfied by BIOL:

BIOL 152 Principles of Organismal Biology 3

Information Technology. Satisfied by one of the following:

ECE 138 Introduction to Computing: _____ 3

C&PE 325 Numerical Methods and Statistics for Engineers 3

Geology Core Knowledge and Skills

Majors must complete the following core courses:

Introduction to Geology. Satisfied by:

GEOL 101 The Way The Earth Works 3

Geology Fundamentals Laboratory. Satisfied by:

GEOL 103 Geology Fundamentals Laboratory 2

Historical Geology. Satisfied by:

GEOL 304 Historical Geology 3

Mineralogy and Structure of the Earth. Satisfied by:

GEOL 311 Mineralogy and Structure of the Earth 3

Mineral Structures and Equilibria Laboratory. Satisfied by:

GEOL 312 Mineral Structures and Equilibria Laboratory 1

Sedimentology and Stratigraphy. Satisfied by:

GEOL 331 Sedimentology and Stratigraphy 4

Field Investigation. Satisfied by:

GEOL 360 Field Investigation 2-3
or GEOL 370 Study Abroad in Greece: Natural Environment and Civilizations

Igneous and Metamorphic Petrology. Satisfied by:

GEOL 512 Igneous and Metamorphic Petrology 3

Petroleum Laboratory. Satisfied by:

GEOL 513 Petroleum Laboratory 1

Introductory Field Geology. Satisfied by:

GEOL 560 Introductory Field Geology 3

Field Geology. Satisfied by:

GEOL 561 Field Geology 3

Structural Geology. Satisfied by:

GEOL 562 Structural Geology 4

Geology Required Electives 18

At least one course from each of the three categories listed below: Life, Water & Climate; Rocks. Additional elective credit requirements fulfilled by 500 level and above geology courses, although only one geology course fulfilling KU Core Goal 4 or 5 may count towards these 9 hours. Additionally, 3 hours of GEOL 121, if taken before the student has completed 60 hrs, GEOL 391 or GEOL 399 can also count towards these 9 credit hours.

Life

GEOL 316 Geochemistry 3
GEOL 521 Paleontology 1
GEOL 525 Geobiology: The Coevolution of Life and Rocks
GEOL 591 Topics in Geology: _____ (Geobiology) 3

Rocks

GEOL 501 Simple Error Analysis with Matlab 3
GEOL 502 Linear Algebra for Earth Scientists 3
GEOL 503 Numerical Methods in the Earth Sciences 4
GEOL 511 Raman Spectroscopy of Crystalline Solids 3
GEOL 533 Shales and Other Mudstones 3
GEOL 535 Petroleum and Subsurface Geology 3
GEOL 536 Geological Log Analysis 3
GEOL 537 Petroleum Reservoir Characterization 3
GEOL 538 Basin Analysis 3
GEOL 539 Sequence Stratigraphy 3
GEOL 572 Geophysics 3

Water and Climate

GEOL 552 Introduction to Hydrogeology 3
GEOL 554 Contaminants in Groundwater 3
GEOL 555 Climate Science 3
GEOL 558 Applied Groundwater Modeling 3
Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 50 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. These hours do not contribute to the minimum number of hours required for the major.

**Mathematics**
Satisfied by:
- MATH 125 Calculus I
- MATH 126 Calculus II
- MATH 220 Applied Differential Equations
- MATH 290 Elementary Linear Algebra

**Chemistry**
Satisfied by:
- CHEM 130 General Chemistry I
- & CHEM 135 General Chemistry II

**Physics**
Satisfied by:
- PHSX 211 & PHSX 216 General Physics I and General Physics I Laboratory
- PHSX 212 & PHSX 236 General Physics II and General Physics II Laboratory

**Information Technology**
Satisfied by one of the following:
- EECS 138 Introduction to Computing: _____
- C&PE 325 Numerical Methods and Statistics for Engineers

**Statics**
Satisfied by:
- CE 201 Statics

**Dynamics**
Satisfied by:
- CE 250 Dynamics

**Fluid Mechanics**
Satisfied by:
- CE 330 Fluid Mechanics

**Hydrology**
Satisfied by:
- CE 455 Hydrology

**Soil Mechanics**
Satisfied by:
- CE 487 Soil Mechanics

**Engineering Geology Option**

**Written Communication - Core Skill and Critical Inquiry.**

Chemistry. Satisfied by:

CHEM 130 General Chemistry I and General Chemistry II 10
& CHEM 135

Physics. Satisfied by:

Select one of the following:

PHSX 211 General Physics I and General Physics I Laboratory 5
& PHSX 216

PHSX 212 General Physics II and General Physics II Laboratory (recommended) 4
& PHSX 236

PHSX 114 College Physics I and College Physics II 2-8
& PHSX 115

Biology. Satisfied by:

BIOL 150 Principles of Molecular and Cellular Biology 6
& BIOL 152 and Principles of Organismal Biology

Information Technology. Satisfied by one of the following:

EECS 138 Introduction to Computing: 3
& C&PE 325 Numerical Methods and Statistics for Engineers

Geology Core Knowledge and Skills

Majors must complete the following core courses:

Introduction to Geology. Satisfied by:

GEOL 101 The Way The Earth Works 3

Geology Fundamentals Laboratory. Satisfied by:

GEOL 103 Geology Fundamentals Laboratory 2

Historical Geology. Satisfied by:

GEOL 304 Historical Geology 3

Mineralogy and Structure of the Earth. Satisfied by:

GEOL 311 Mineralogy and Structure of the Earth 3

Sedimentology and Stratigraphy. Satisfied by:

GEOL 331 Sedimentology and Stratigraphy 4

Environmental Geology. Satisfied by:

GEOL 351 Environmental Geology 3

Field Investigation. Satisfied by:

GEOL 360 Field Investigation 2

Paleontology. Satisfied by:

GEOL 521 Paleontology 3

Geomorphology. Satisfied by:

GEOL 541 Geomorphology 4

Introduction to Hydrogeology. Satisfied by:

GEOL 552 Introduction to Hydrogeology 3

Introductory Field Geology. Satisfied by:

GEOL 560 Introductory Field Geology 3

Structural Geology. Satisfied by:

GEOL 562 Structural Geology 4

Geophysics. Satisfied by:

GEOL 572 Geophysics 3

Geology Required Electives

Majors must complete additional courses to total at least nine hours numbered 500 or above. The following are recommended:

GEOL 391 Special Studies in Geology 1-6
GEOL 535 Petroleum and Subsurface Geology 4
GEOL 715 Geochemistry 3
GEOL 751 Physical Hydrogeology 3

Environmental Hydrogeology Track

Besides the general program above, a specialized track in hydrogeology satisfies degree requirements. In addition to College, supporting science, and geology courses, the environmental hydrogeology track requires the following mathematics and civil engineering/physics courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 220</td>
<td>Applied Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 290</td>
<td>Elementary Linear Algebra</td>
<td>2</td>
</tr>
<tr>
<td>CE 330</td>
<td>Fluid Mechanics</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, Technical Electives (9 hours). These normally are chosen from courses numbered 500 or above in geology, physics, mathematics, chemistry, engineering or computer science. Courses numbered below 500 must be approved by a geology advisor.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours

Satisfied by 49 hours of major courses.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours

Satisfied by a minimum of 45 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Geophysics Option

Structural Geology. Satisfied by:
GEOL 562  Structural Geology 4

Geophysics. Satisfied by one of the following:
GEOL 572  Geophysics 3

Additional Geology Courses
Geophysics elective 500 and above (at least 9 hours) 9
GEOL 575  Seismic Exploration
GEOL 578  Seismic Data Analysis and Interpretation

Technical Required Electives 6
At least 6 hours from the list below or other 500 and above Geology, Physics, Mathematics, Engineering, or Computer Science.

GEOL 535  Petroleum and Subsurface Geology
GEOL 536  Geological Log Analysis
GEOL 552  Introduction to Hydrogeology
MATH 581  Numerical Methods

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 45 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
Earth and Space Science Licensure Option

This program fulfills the requirements for a Bachelor of Science degree in geology. The program also meets course requirements necessary to gain state licensure eligibility in earth and space science to become a secondary teacher in Kansas, but completion of the program does not guarantee the student’s licensure. This list is a guideline. Contact the geology department for further information about meeting degree and additional licensure requirements. You may also contact the UKanTeach Office for information about similar tracks resulting in eligibility for licensure in this and other science and mathematics fields.

Earth and Space Required Electives

Majors must complete one of the areas below:
Geology Focus. Satisfied by 4 hours in a geology course numbered 300 or above.

Astronomy Focus. Satisfied by 4 hours in astronomy courses numbered 300 or above. This can include three hours of GEOL 121 (if taken before the completion of 60 hours), or ASTR 390 or GEOL 399.

Research Methods
Satisfied by:
CHEM 598 Research Methods

Professional Development Course Work
A minimum grade of C is required in all courses.

Liberal Arts and Sciences. Satisfied by:
LA&S 290 Approaches to Teaching Science and Mathematics
LA&S 291 Approaches to Teaching Science and Mathematics

Curriculum and Teaching (19 hours). Satisfied by:
C&T 448 Reading and Writing across the Curriculum and 16 hours of courses approved by UKanTeach in curriculum and teaching. These should include courses such as Classroom Interactions (3), Knowing and Learning (3), Project Based Instruction (3), Student Teaching (6), and Special Topics Seminar (1).

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 46 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 34 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Departmental Honors
Pursuit of departmental honors in Geology is by invitation from the Department of Geology honors coordinator.
Requirements include:
3.50 or higher KU geology-courses GPA at graduation.
Completion of at least 2 credit hours of GEOL 399.
Completion and successful defense of an honor's thesis.
Additional requirements and more information may be obtained from the Department of Geology honors coordinator and web site.

BS in Geology with concentration in Earth & Space Science
Below is a sample 4-year plan for students pursuing the BS in Geology with a concentration in Earth and Space Science. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses/)
BS in Geology with concentration in Engineering Geology

Below is a sample 4-year plan for students pursuing the BS in Geology with a concentration in Engineering Geology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

1. Geology BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
2. All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
3. GEOL 360, GEO 560, and GEO 561 are offered only in the summer.
4. The Earth and Space Science concentration must complete electives in one of the following two areas: Geology Focus or Astronomy Focus. Course specifics are listed under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Total Hours 120

1. All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
2. GEOL 360, GEOL 560, and GEOL 561 are offered only in the summer.
3. Geology BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
4. The Environmental Geology concentration must complete at least 9.0 hours of additional major course work at the 500-level or above. A list of recommended courses can be found on the Degree Requirements tab.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

#### Total Hours 120

1. All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
2. Geology BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
3. GEOL 360, GEOL 560, and GEOL 561 are offered only in the summer.
4. Geology majors must complete 18.0 hours of elective coursework, and three courses must come from each of the following categories: Life; Rocks; Water and Climate. A complete course list can be found under the Degree Requirements tab.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Minor in Geology**

**Why study geology?**

In Geology you get to apply techniques and knowledge from chemistry, physics, biology and math to answer important questions about Earth processes, history and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and understand the environment.

Our Geology Minor (https://geo.ku.edu/geology-undergraduate-minor/) is built to be flexible depending on your interests! This is a great way to show future employers that you're dedicated to geology, but without taking the full suite of Major hours.

**Requirements for the Minor**

The minor requires 18 to 23 hours of geology courses, of which 12 hours must be junior/senior hours or higher (courses numbered 300 or above).

**Geology Minor Course Requirements**

Students selecting this minor must complete the following:

- Introduction to Geology. Satisfied by:
  - GEOL 101 The Way The Earth Works 3
- Geology Fundamentals Laboratory. Satisfied by:
  - GEOL 103 Geology Fundamentals Laboratory 2

**Geology Required Electives**

Students selecting this minor must complete a minimum of 13 hours in geology courses. GEOL 311 and GEOL 331 are recommended because they are necessary as prerequisites for many upper-division courses. Only one geology course fulfilling KU Core Goal 4 or 5 may count towards these 13 hours.

Students must work with an advisor to select courses to complete the requirements for the minor. Students must turn in a signed Geology Minor Advising form and a Minor Declaration form to the department office, 120 Lindley Hall, before taking any courses numbered 500 or above.

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
Minor in Petroleum Geology

The Department of Geology offers a minor in Petroleum Geology with a focused list of courses that is appealing to many employers.

² Not open for credit toward the minor for students who are majoring in Petroleum Engineering

Master of Science in Geology

Geology Graduate Programs

KU Geology is comprised of students, faculty, staff, and alumni who are inspired by a collaborative and multidisciplinary mission to undertake scientific discovery that benefits society.

Our program is large enough to be led by world-renowned faculty with expertise in areas that span the geosciences, from energy to the environment, vulcanology to the cryosphere, microbes to ancient rock, and more. At the same time, we are small enough to offer personalized, student-centered learning experiences. We are located in the world class Earth, Energy, and Environment Center (https://eeec.ku.edu/), which houses state-of-the-science laboratories, collaborative spaces, and classrooms.

Our program provides students with a comprehensive curriculum in geoscience with unique research opportunities, including acclaimed field experiences. KU Geology runs one of the oldest field camps in the nation (established in 1922 in Cañon City, CO) and our program emphasizes field instruction at all levels and in locations near and far.

Our students are generously supported by scholarships and resources (http://geo.ku.edu/facilities/) that allow them to take advantage of all that KU Geology has to offer. Geoscience is a prolific field, with high demand for our graduates in careers that significantly impact society. We maintain a long tradition of connecting our graduates to career and interview opportunities, as well as to our GHawk Community of successful geoscience alumni and professionals around the world.

We invite you to explore further information about KU Geology on our website (http://geo.ku.edu/) and we welcome all inquiries related to our program.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Admission is based on academic records including GPA and general preparedness in geology and supporting sciences, letters of recommendation, and the applicant’s stated academic and professional interests and goals. An attempt is made to balance the interests of students with the availability of faculty members to supervise them and laboratory space in which they may work.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

The Department of Geology will review your application only after the application process is complete. *Please note that it is essential for all applicants to contact and communicate with a potential faculty supervisor in the Geology Department. Their evaluation and acceptance of graduate students is an important part of the admission evaluation.

You will need the following for your application:

1. **Official transcripts and proof of graduation:** U.S. universities generally indicate on transcripts if a degree has been conferred. However, if such a statement does not appear on a transcript, separate proof in the form of a degree certificate or diploma, issued directly by the institution, is required. Photocopies are not accepted. Transcripts from all post secondary institutions that you have attended are necessary for your application. Failure to provide them could result in delay processing your application. If a student is admitted before completing his or her undergraduate degree, the documentation proving he or she did graduate must be supplied to the Dept. of Geology before the end of the student’s first semester at KU.

2. **3 Letters of Recommendation:** You will be asked for the names and email addresses of three people who can write a recommendation letter describing your qualifications for graduate school in geology. Once you submit the application, an email will be sent requesting a letter from each person that you name. Once the applicant submits the online application form (see point 1), referees will receive an email notification with detailed instructions on how to submit a letter of reference.

3. **Resume/CV:** Please include awards, extra curricular activities (student organizations, community outreach), presentations, and publications.
4. **Personal Statement**: This is included in the on-line application form and should be about 2 pages, typed. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geology and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geology helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

### ADDITIONAL REQUIREMENTS

Non-native speakers of English must meet English proficiency requirements ([https://gradapply.ku.edu/english-requirements/](https://gradapply.ku.edu/english-requirements/)).

The Department of Geology will review your application only after the application process is complete.

Submit your graduate application online ([https://gradapply.ku.edu/apply/](https://gradapply.ku.edu/apply/)).

Inquiries may be sent to the department Graduate Program Coordinator.

### M.S. Degree Requirements

Detailed information on department regulations for Graduate Students can be found in the KU Geology Graduate Student Handbook. While completing the following degree requirements, graduate students are expected to understand and follow Office of Graduate Studies policies relevant to their student status and academic standing. These policies can be found in the Policy Library ([https://policy.ku.edu/](https://policy.ku.edu/)).

Prerequisites normally include credit in one year each of general biology, general chemistry, general physics, and calculus, plus junior- or senior-level courses in mineralogy, petrology, structural geology, paleontology, stratigraphy, geophysics, and a summer course in field geology. Students planning to specialize in geophysics also should have more advanced backgrounds in calculus and physics. Incoming graduate students meet with a departmental advisory review committee before enrollment to identify deficiencies and strengths and to set up curricula aimed at providing a broad background in geology at the intermediate to advanced level during the first year. Some deficiencies may be waived at this time if they are deemed nonessential.

Geology has many subdisciplines, and the department tailors each student’s curriculum to the needs of the individual. There is no departmental core curriculum. For elective course options, please review the 500 level or above Geology courses ([https://catalog.ku.edu/liberal-arts-sciences/geology/#courseinventory](https://catalog.ku.edu/liberal-arts-sciences/geology/#courseinventory)) listed in the academic catalog.

### Required Courses

- **GEOL 701 Graduate Students Professional Skills & Ethics** with a grade of “B” or higher
- **Thesis Option (M.S. Degree)** – 6 credit hours of GEOL 899 Master’s Thesis

### Thesis Option (M.S. Degree)

The master’s degree curriculum requires completion of 30 credit hours, including up to six credit hours for thesis research, and an acceptable master’s thesis. At least 50% of coursework for the master’s degree must be taken at 700 level or above. The student sets the curriculum in consultation with a 3-member advisory committee selected from the Graduate Faculty and approved by the Graduate Advisor. Course work counted toward the degree must be distributed to provide a comprehensive general knowledge of geology in addition to specialized knowledge required for the thesis. It may include courses in departments other than Geology. Courses numbered 500 level or above can count toward the master’s degree.

Although the Department of Geology does not award a master’s degree in geophysics, students can specialize in geophysics at the master’s level. The requirements for the degree are overseen by geophysics faculty within the Department and scientists on the staff of the Kansas Geological Survey. Geophysics research projects are also supervised by Departmental geophysics faculty and scientists on the staff of the Survey. Similar arrangements with faculty outside the Department can be made for students specializing in geobiology, glaciology, hydrogeology, paleontology, sedimentology, or tectonics.

Students seeking to earn an M.S. in geology must maintain at least a 3.0 grade-point average in geology and supporting science courses and pass a final oral general examination with emphasis on the areas of geology relevant to the thesis project.

### Thesis Defense

Students should submit theses and dissertations directly to their advisors, and this advisor’s approval must be received before a “clean and complete” version of this document is passed on to other committee members and the final oral defense is scheduled.

- Before the final oral defense can be held, the thesis must have the approval of the student’s committee and a copy of the thesis must be shared to the entire faculty for comment for at least one week. The thesis should be submitted to the Graduate Academic Advisor so it can be distributed to all faculty, courtesy, and emeriti.

- No later than 3 weeks prior to the scheduled defense, the student must submit a list of committee members, the proposed date and time, and the thesis title to the Graduate Academic Advisor. The Graduate Academic Advisor will file a petition of completion of Master’s exam with the College so that the milestone can be noted on the student’s record. Pre-approval from COGA is required. This approval must be sought by the department at least two weeks prior to the exam date. COGA checks to ensure that the student has fulfilled certain University requirements.

The M.S. thesis defense starts with a twenty-minute presentation by the student with a summary of the thesis research. Following the presentation, student, other guests, and faculty members may ask questions of the student; such questions typically are related to the presentation. After the question period, all guests are excused, and questioning continues with only the committee and the student. After this second period of questioning the student is excused and the committee discusses the performance.

The student can receive a satisfactory or unsatisfactory grade for the defense from each committee member. Department guidelines consider that a student passes the defense if most of the committee views the defense to be satisfactory, which means the student has successfully completed requirements of the degree program. The defense may be repeated once, if an unsatisfactory grade is received.
Nonthesis Option (M.S. Degree)

A student may complete an M.S. degree program based primarily on coursework and specialized skills. For this degree, a minimum of 36 credit hours of graduate-level study must be completed, including two written reports based on small projects (non-thesis with projects) or a single written report on a prescribed topic (non-thesis without projects). At least 50% of coursework for the master's degree must be taken at 700 level or above. The student determines the structure of the curriculum and projects in consultation with an advisory committee of 5 faculty members. A student must declare an intention to follow the nonthesis option during the first semester of graduate study. The nonthesis degree is a terminal degree and normally cannot lead to doctoral study. In addition to maintaining a 3.0 grade-point average in course work, the student must demonstrate proficiency in the areas of geology covered by the program. This is accomplished by satisfactory performance on a series of written examinations assembled and administered by the advisory committee (non-thesis with projects) or an oral examination (non-thesis without projects). These constitute the final examination for the degree and may be repeated once, if necessary.

During or after the period of residence, a student who wishes to change to an M.S. (thesis) program or a Ph.D. program must petition the Geology Graduate Studies Committee.

Doctor of Philosophy in Geology

Geology Graduate Programs

KU Geology is comprised of students, faculty, staff, and alumni who are inspired by a collaborative and multidisciplinary mission to undertake scientific discovery that benefits society.

Our program is large enough to be led by world-renowned faculty with expertise in areas that span the geosciences, from energy to the environment, volcanology to the cryosphere, microbes to ancient rock, and more. At the same time, we are small enough to offer personalized, student-centered learning experiences. Our program provides students with a comprehensive curriculum in geoscience with unique research opportunities, including acclaimed field experiences. KU Geology runs one of the oldest field camps in the nation (established in 1922 in Cañon City, CO) and our program emphasizes field instruction at all levels and in locations near and far.

Our students are generously supported by scholarships and resources (http://geo.ku.edu/facilities/) that allow them to take advantage of all that KU Geology has to offer. Geoscience is a prolific field, with high demand for our graduates in careers that significantly impact society. We maintain a long tradition of connecting our graduates to career and interview opportunities, as well as to our GHawk Community of successful geoscience alumni and professionals around the world.

We invite you to explore further information about KU Geology on our website (http://geo.ku.edu/) and we welcome all inquiries related to our program.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Admission is based on academic records including GPA and general preparedness in geology and supporting sciences, letters of recommendation, and the applicant’s stated academic and professional interests and goals. An attempt is made to balance the interests of students with the availability of faculty members to supervise them and laboratory space in which they may work. Students with exceptional records may be invited to study for the Ph.D. without first earning the M.S. degree.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

The Department of Geology will review your application only after the application process is complete. *Please note that it is essential for all applicants to contact and communicate with a potential faculty supervisor in the Geology Department.* Their evaluation and acceptance of graduate students is an important part of the admission evaluation.

You will need the following for your application:

1. **Official transcripts and proof of graduation**: U.S. universities generally indicate on transcripts if a degree has been conferred. However, if such a statement does not appear on a transcript, separate proof in the form of a degree certificate or diploma, issued directly by the institution, is required. Photocopies are not accepted. Transcripts from all post secondary institutions that you have attended are necessary for your application. Failure to provide them could result in delay processing your application. If a student is admitted before completing his or her undergraduate degree, the documentation proving he or she did graduate must be supplied to the Dept. of Geology before the end of the student’s first semester at KU.

2. **3 Letters of Recommendation**: You will be asked for the names and email addresses of three people who can write a recommendation letter describing your qualifications for graduate school in geology. Once you submit the application, an email will be sent requesting a letter from each person that you name. Once the applicant submits the online application form (see point 1), referees will receive an email notification with detailed instructions on how to submit a letter of reference.

3. **Resume/CV**: Please include awards, extra curricular activities (student organizations, community outreach), presentations, and publications.

4. **Personal Statement**: This is included in the on-line application form and should be about 2 pages, typed. The Graduate Studies
Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geology and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geology helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

**ADDITIONAL REQUIREMENTS**

Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

The Department of Geology will review your application only after the application process is complete.

Submit your graduate application online (https://gradapply.ku.edu/). (https://gradapply.ku.edu/apply/)

Inquiries may be sent to the department Graduate (https://geo.ku.edu/staff/) Program Coordinator.

**Ph.D. Degree Requirements**

Doctoral students can specialize in any area of faculty expertise, including sedimentology, paleontology, tectonics, geobiology, glaciology, geophysics and hydrogeology. Prospective Ph.D. candidates are subject to the same initial requirements as master’s students, but the master’s degree is not a prerequisite for acceptance into the doctoral program. A student with a strong academic background and strong performance during the first two semesters may be invited to proceed directly toward the doctorate.

The student’s advisory committee and the student construct a curriculum that offers the best preparation for the chosen field of interest and satisfies the research skills requirement. Moreover, each student is expected to enroll in courses in supporting fields to develop a broader perspective on the geological sciences and related fields. The student must maintain at least a 3.0 grade-point average in geology and supporting science courses.

Detailed information on department regulations for Graduate Students can be found in the KU Geology Graduate Student Handbook. While completing the following degree requirements, graduate students are expected to understand and follow Office of Graduate Studies policies relevant to their student status and academic standing. These policies can be found in the Policy Library (https://policy.ku.edu/).

**Required credit hours for the PhD degree:**

- At a minimum, the Ph.D. degree requires the completion of 36 credit hours to satisfy University requirements. This includes requirements for Research Skills, Responsible Scholarship (see below), as well as enrollment after the student has passed the Oral Comprehensive Exam, has been admitted to candidacy, and is actively writing their Dissertation.
- Beyond the above, there are no formal credit-hour requirements for the Ph.D. degree. The actual program of study will be developed by the advisory committee in consultation with the student, and will be designed to meet the needs of the student’s research and career interests. For elective course options, please review the 500 level or above Geology courses (https://catalog.ku.edu/liberal-arts-sciences/geology/#courseinventory) listed in the academic catalog.

Required courses for the Ph.D. degree:

- GEOL 701 Graduate Students Professional Skills & Ethics
- GEOL 999 Doctoral Dissertation

**Research Skills & Responsible Scholarship Requirements**

The university requires that every doctoral student have training in responsible scholarship, and in research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Doctoral students in geology meet this requirement by the following:

- Completion of GEOL 701 Graduate Students Professional Skills & Ethics with a grade of “B” or higher.
- With the approval of the advisory committee, the student may meet the research skills requirement by taking either a curriculum of at least three graduate-level courses outside the department that are relevant to the specialty, or by completing a combination of languages, research skills, and courses.

Either coursework plan must be approved by the Director of Graduate Studies, and a list of these courses must be included in the student’s file. Contact your advisor or the Director of Graduate Studies for further information about research skills and responsible scholarship.

**Admission to Candidacy**

To be admitted to Ph.D. candidacy, a student must pass an oral comprehensive examination on the specialty in geology in which the student is doing doctoral research, and on other relevant areas of geology and the supporting sciences. The student must prepare a research proposal based on the doctoral research project before the oral comprehensive examination, and have it approved by the advisor and advisory committee. The examination is based on the material presented in the proposal and its application to the geological sciences in general.

The examination is conducted by a 5-member faculty committee; one member of the committee must be from a KU department other than geology and is appointed by Graduate Studies on recommendation of the department. The same committee is also responsible for conducting a final oral examination based on the doctoral dissertation. Three members of the committee are responsible for supervising the research and preparing the student for writing of the dissertation.

The criteria for admission to candidacy is at the discretion of the committee. The minimum requirements are an Oral Comprehensive Exam and Proposal Defense. Other things could be added, for example, a Written Exam. Here are a few examples of what has been done to meet the requirement.

1. Ph.D. Proposal Defense followed by the Oral Comprehensive Exam on the same date
2. Ph.D. Proposal Defense and Oral Comprehensive Exam on different dates
3. A Written Exam followed by the Ph.D Proposal Defense and Oral Comprehensive Exam
• Generally a written exam should be completed first, and on a separate date
• The proposal defense and Oral Comprehensive Exam can then be taken on the same date, or on different dates as above.

Please see the Graduate Handbook to review guidelines for the Dissertation Proposal and Oral Comprehensive Exam.

Dissertation Defense

When the advisory committee has approved the dissertation as defendable, the student requests approval from the Director of Graduate Studies to schedule the final oral exam, which consists of a defense of the dissertation. The final dissertation defense begins with a public lecture on the dissertation research by the candidate. This lecture typically lasts no more than 45 minutes. Members of the Department faculty, students, and the public are encouraged to attend this presentation. Following the lecture, the candidate may be questioned by students, guests, and faculty members who do not intend to stay for the entire examination. Following the initial period of questioning, students and guests are excused; and the examination continues with questioning by the committee and other faculty members who wish to participate. At the end of this second period of questioning, the candidate is excused, and faculty members in attendance discuss the performance. Members of the examination committee then determine whether the dissertation was satisfactory or unsatisfactory.

For the Oral Comprehensive Exam and the Dissertation Defense, two outcomes are possible: satisfactory or unsatisfactory. If the student receives a grade of Unsatisfactory on either examination, it may be repeated once on the recommendation of the advisory committee. If the student receives an unsatisfactory grade a second time, they will be recommended for dismissal from the program.

Shared Doctoral Program with Kansas State University

The Department has a shared education program whereby doctoral students may study under the direction of a faculty member of the Department of Geology at Kansas State University, with a KU faculty member as co-chair of the dissertation committee. After one year of course work in Lawrence to fulfill the residency requirement, students may enroll at Kansas State University. Degrees are awarded by KU. For specific information on departmental practices in shaping individual curricula, in controlling general examinations, and in evaluating dissertation proposals, contact the department Director of Graduate Studies.

Graduate Certificate in Environmental Geology

The Department of Geology in collaboration with the KU Edwards Campus, now offers an online graduate certificate in environmental geology. The certificate consists of 14 credit hours and coursework is completed in online or online-hybrid mode, with the exception of the required 1-credit-hour field techniques workshop course, which is offered in-person. The field course typically meets on a Saturday on the Edwards or Lawrence Campus and is supplemented with online material.

The certificate courses are a subset of the graduate science courses taught in the Professional Science Masters in Environmental Geology (PSM-EG) degree program. The graduate certificate can be completed as a stand-alone graduate certificate; as a graduate certificate paired with an appropriate graduate degree that the student is simultaneously enrolled in; or as a precursor to starting the full PSM-EG program.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Certificate in Environmental Geology – Admissions Requirements:

Individuals interested in applying to the Graduate Certificate in Environmental Geology should have a bachelor’s degree from an accredited institution in geology or closely related field (natural, physical, or applied sciences, engineering) OR coursework of at least 20 credit hours in the natural and applied sciences (biology, chemistry, geology, physical geography, environmental sciences, or engineering). For those without the necessary background, courses in undergraduate science and mathematics, some additional coursework may need to be completed prior to the start of the graduate certificate program. Prospective applicants to the program are encouraged to contact the program to discuss past coursework.

Individuals who are not already enrolled as KU graduate students must complete an application to the Graduate School for admission into the certificate program and submit an application fee along with the following materials:

• Statement of interest: This 1-2 page narrative should succinctly summarize the applicant’s education, employment history, long-term career goals, and how this graduate certificate will help achieve these goals.
• Official undergraduate transcript.
• A letter of recommendation from persons qualified to offer judgment on the applicant’s ability to undertake graduate-level work; (former professor of instructor, workplace supervisor).

Current KU graduate students wishing to enroll in the Graduate Certificate in Environmental Geology program will apply through the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. Completion of the certificate will appear on the graduate transcript. KU graduate students should submit the following materials:

• A Statement of Interest in the environmental geology certificate program and its relationship to the applicant’s current graduate course of study.
• An unofficial copy of the applicant’s KU transcript.
• A letter of endorsement/support from the applicant’s graduate degree program (thesis/dissertation advisor or graduate director)

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).

This program may be completed entirely online, with the exception of the required Field Workshops. The Field Workshops are offered at the KU Edwards Campus in Overland Park or at the KU Lawrence Campus, and can be completed over one day or weekend.

Students must complete 5 courses for a total of 13 graduate credit hours:

Global and International Studies

Why Global and International Studies?

A degree in GIST will give you the tools to understand the rapid changes occurring internationally and transnationally throughout the world. In our interdisciplinary program, faculty and students think critically about some of the most fundamental global and regional issues facing societies today such as:

- population growth,
- politics and governance,
- migration,
- the global economy,
- poverty and inequality,
- religion, race and ethnicity,
- gender and sexuality,
- peace and conflict, and
- climate change.

Besides quality instruction and content, our students have access to the amazing international resources that put KU on the top shelf for international education—a nationally-ranked Study Abroad Program, instruction in 40 foreign languages, and local, national, and international internship opportunities.

After graduation, a degree in GIST is helpful for careers in journalism, Foreign Service, business and industry, education, law, politics and government, and social service agencies.

Undergraduate Programs

Global and International Studies (GIST) at KU offers an interdisciplinary program in which faculty and students think critically about some of the most fundamental issues facing societies today: population growth, politics and governance, migration, the global economy, poverty and inequality, religion, race and ethnicity, gender and sexuality, peace and conflict, and climate change. Through an investigation of these topics, GIST majors acquire an enriched understanding of the world today, which is not only a desirable end in itself but also a useful background for professional careers in different geographical and cultural areas. A major in GIST is helpful for careers in journalism, foreign service, business and industry, education, law, politics and government, and social service agencies. Students also have the opportunity to receive a minor in GIST.

Students in the Global & International Studies B.A. program pursue the same general path of study. They take six hours of introductory core courses of skills and knowledge and then a collection of electives on global and regional topics. GIST students also take one language class in addition to the four semesters required by KU's College of Liberal Arts and Sciences. Finally, the GIST B.A. culminates in two capstone courses where students produce a senior research thesis while learning tools for research methods and analytical writing.

Students are able to choose from 4 different concentrations within the program. These paths include:

1. Global & International Concentration
2. European Concentration
3. Latin American & Caribbean Concentration
4. Middle East Concentration

Since our major includes nine credit hours that can easily double up as general or core requirements in the first two years (and count toward the degree requirements in other programs), the flexibility to do a double-major and/or an additional minor with your GIST major is highly encouraged.

The Center for Global and International Studies also provides a minor in Middle East Studies, European Studies, Latin American and Caribbean Studies as well as a Certificate in Persian and Language and Cultures.
Graduate Programs

The Master of Arts in Global and International Studies provides an analytically sophisticated understanding of the contemporary global arena and cultivates the skills and knowledge to operate in a world where traditional boundaries are disappearing. Through the 33-credit hour program, students develop a specialization in a world region and can pursue interests in global politics, society, and culture across a broad range of courses in the humanities and social sciences.

Students in Global and International Studies have access to courses by top-notch research faculty across a wide variety of relevant disciplines at KU's main campus in Lawrence (http://www.ku.edu/). Besides access to quality instruction and content, our students have access to the amazing international resources that put KU on the top shelf for international education—a nationally-ranked Study Abroad Program, instruction in 40 foreign languages, and local, national, and international internship opportunities. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in GIST.

GIST "Traditional" Master's

The self-tailoring and interdisciplinary field of Global and International Studies prepares graduate students with marketable skills (such as professional certification opportunities and research and writing skills) and the knowledge to deal with contemporary global issues. This is critical in our contemporary world in which both problems and opportunities increasingly transcend national boundaries.

KU’s Master of Arts in Global and International Studies is designed for those who seek a better understanding of international issues that shape public policy and the global economy and who want to have an impact in these areas.

Students in our “traditional” Master of Arts in Global and International Studies (https://global.ku.edu/masters/) have the option to follow the broad GIST coursework, or choose one of our two concentrations, Latin American and Caribbean Studies or Contemporary East Asia Studies.

GIST Interagency Studies Master's

The Interagency concentration (https://global.ku.edu/isp-masters/) of the Master’s degree program in Global and International Studies is a one-year program designed primarily for officers pursuing their Intermediate Level Education (ILE) program at the Command and General Staff College (CGSC) at Ft. Leavenworth.

The objective of the Interagency Studies Program (ISP), is to prepare military officers for working in interagency environments by expanding their abilities to conceptualize and address issues beyond their military training. The program offers coursework from multiple disciplines with an array of theoretical frameworks. The ISP curriculum consists of 30 credit hours, with KU granting 6 hours of credit for ILE education. The remaining 24 credit hours come from 8 KU courses taught at in the evening at Ft. Leavenworth, along with courses at the Command and General Staff College. The evening classes run the length of the academic year - 3 courses August - December, 3 courses January - April, and 2 courses May - June. The program culminates with a final paper demonstrating the application of program knowledge to a military (preferably interagency) issue, which can be submitted to relevant journal outlets in military studies.

Center for Global and International Studies

The Center for Global and International Studies (http://global.ku.edu/) supports and promotes global and international studies at KU. In collaboration with International Programs and the area centers, CGIS works to provide a single point of contact for faculty with international expertise to help facilitate interdisciplinary research and teaching opportunities. Building on longstanding institutional strength in international studies, the center focuses on topics and themes of transnational scope and on world areas of economic and strategic importance not covered by the existing area studies centers.

CGIS prepares students for careers in an increasingly interconnected world by housing undergraduate and graduate degrees in global and international studies and by supporting the introduction of new course offerings and study abroad opportunities. In addition, the center offers outreach activities to K-12 teachers, businesses, and governmental agencies across the region and serves as a resource for the local and international community.

Courses

CEAS 200. Topics in East Asian Studies: ____. 1-3 Credits. U
An introductory interdisciplinary topics course addressing contemporary issues related to one or more East Asian countries. Format and content will vary. Does not count toward the EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes.

CEAS 500. Seminar in East Asian Studies: ____. 1-3 Credits. U
An interdisciplinary seminar addressing contemporary issues related to one or more East Asian countries. Prerequisites to be determined by instructor(s) on the basis of course content. Does not count toward the EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes.

CEAS 610. Minorities in Japan. 3 Credits. S
This course offers a sociological and historical exploration of Japan’s minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan’s minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels, with additional assignments required at the 600-level. (Same as EALC 610.) Prerequisite: An introductory East Asian Studies course or consent of the instructor.

CEAS 701. Professionalization Seminar in East Asian Studies. 3 Credits.
This graduate seminar’s main objective is to prepare students to be professional scholars and educators in East Asian Studies and in global contexts. The course focuses on development of professional networks, co-development of ideas, and opportunities for collaboration with other professionals. Students will develop and refine a wide range of skills crucial to students’ success in graduate school and their careers. Students will organize workshops to present their work and to generate materials for conferences, peer reviews, grant writing, CV preparation, job interviews, and much more. Graduate students with nonacademic as well as academic career goals are welcome in the seminar.

CEAS 704. Contemporary East Asia. 3 Credits.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in European Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**EURS 302. European Culture and Society 1945 to Present. 3 Credits.** HT H

The course provides historical, cultural, and political overviews of Europe since 1945 with particular emphasis on the contribution of French and Italian culture and society. The course emphasizes Europe's contribution to Western intellectual thought, social movements, arts and literature, and global society.

**EURS 315. Magic, Murder, Monsters: German Literature and the Modern Era. 3 Credits.** H

Introduction in English to German writers 1750-present featuring texts about the supernatural and monstrous. Students examine how encounters with magic and construction of monsters reflect particular cultural anxieties, fears, and ideals as relating to historical developments, industrialization, and scientific advancement. Discussion of themes such as gender, sexuality, class, race, empire, war, politics, and technology in German-speaking Europe. Readings include works in translation by influential German writers. Open to first-year students and non-majors. GERM 315 is required for admission to all courses beyond GERM 402 except GERM 462. (Same as GERM 315.)

**EURS 348. Politics of Western Europe. 3 Credits.** W

This course is an introduction to European politics, pursuing three goals. First, the class is designed to introduce you to a variety of different aspects of European political systems, their main political actors, and basic historical traditions. Our second objective focuses on discussing contemporary dynamics and transformations in the nature of political participation and representation across European political systems. Third, you will become acquainted in some detail with the institutions and operating procedures of four political systems that we focus on: France, Germany, Great Britain, and the European Union. These systems represent the range of traditions we encounter in Western and Central Eastern Europe so they serve as an example of how European polities work. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS 648. (Same as POLS 348.) Prerequisite: POLS 150.

**EURS 350. Study Abroad Topics in: __________________________________________. 1-5 Credits.** H

This course is designed for the study of special topics in European Studies at the Junior/Senior level. Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in European Studies. May be repeated for credit if content varies.

**EURS 396. Hitler and Nazi Germany, Honors. 3 Credits.** H

An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as HIST 396 and JWSH 396.) Prerequisite: Membership in University Honors or consent of instructor.

**EURS 430. European Civilization in World Context: ___________________________________. 3 Credits.** HL H

An introduction to the literature of encounters between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia,
and the Americas. World areas and historical periods chosen for study
will vary from semester to semester according to the interest and field of
the instructor. Not open to freshmen. (Same as HUM 430.) Prerequisite:
HUM 114 or HUM 204 and HUM 115 or HUM 205.

EURS 500. Seminar in European Studies. 3 Credits. H
Provides an interdisciplinary approach to the study of modern European
civilization. By discussing both classic and contemporary, controversial
readings each week and writing several papers during the semester,
students acquire an understanding of the development of modern
European culture and society and Europe's contemporary problems.
Topics for discussions and papers are drawn from the following subjects:
the economic and political integration of European states; modernism and
anti-modernism in European culture; imperialism, migration, and ethnic
and racial division in European society; democracy versus dictatorship;
American-European relations; mass culture, urban development, and
the welfare state; and contrasts and comparisons between European Cultures--East and West, North and South. Seminar discussions are led
by invited European Studies faculty as well as the instructor or instructors.
Required of all European Studies majors. Prerequisite: Junior standing or
consent of instructor.

EURS 501. Research for Honors in European Studies. 3 Credits. W
Research for a European Studies honors project, on a topic chosen in
conjunction with the faculty advisor. Emphasis on independent study
and writing. Open to students with previous coursework that counts
toward the European Studies co-major at the 400 level, an overall 3.25
GPA, and at least a B+ average in advanced work in the instructor's European Studies.
Prerequisite: At least one course for the EURS co-major at the 400 level
and permission of the Academic Director.

EURS 502. European Studies Honors Project. 3 Credits. H/W
Continuation of EURS 501. Student must defend completed honors
project in an oral examination before a thesis committee of three faculty
members. The committee determines whether the student earns Honors.
See Departmental Honors section of catalog for more information.
Prerequisite: EURS 501.

EURS 504. Europe Today. 3 Credits. H
An exploration of major social, political and economic developments post
World War II including the rise of the European Union, the integration of
Eastern and Western Europe, the growing role of Islam, attitudes towards
the United States, and Europe's role in the world economy. Topics may
vary based on current events. (Same as HUM 505.) Prerequisite: Junior
or senior standing or consent of instructor.

EURS 507. Research in European Collections. 1-3 Credits. H
This course allows students in the European Studies Co-Major and
related disciplines to receive credit for research related to European
Collections in one or more of the following institutions: Watson and
Spencer Research Libraries, the Dole Institute, the Eisenhower and
Truman Presidential Libraries, the U.S. Army Combined Arms Research
and Foreign Military Studies Office at Fort Leavenworth, the Linda
Hall Library in Kansas City, and the Winston Churchill Collection at the
Westminster College Library in Fulton, Missouri. May be taken in place of
EURS 501 by European Studies Honors Students if taken for three credit
hours. Permission of instructor necessary.

EURS 511. Topics in European Studies: ___. 3 Credits. H
A study of significant themes, movements, or problems in European
history, literature, politics, society, or culture. May also relate European
issues to issues in other world areas (Africa, North America, Asia, etc.)
May be repeated for credit when topic varies.

EURS 550. Classics of Peace Literature. 3 Credits. HL H
A study of influential proposals for world peace from Erasmus' The
Complaint of Peace (1515) to the 1995 Hague Appeal for World Peace.
Selected writings by such authors as Erasmus, Hugo Grotius, Jean-
Jacques Rousseau, Immanuel Kant, Henry Thoreau, Henri Dunant,
Berthe von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin
Luther King, Jr., are considered. (Same as PCS 550.) Prerequisite:
HUM 204 or HUM 205.

EURS 555. The Literature of Human Rights. 3 Credits. H
Examines in literature, art, and film from about 1800 to the present, both
sides of the ongoing debate surrounding the idea that all human persons
possess inalienable rights because all persons possess intrinsic value as
persons, value independent of race, gender, caste or class, wealth, age,
sexual preference, etc. Anti- and pro-rights proponents are paired and
studied with equal care. (Same as GIST 560 and PCS 565.) Prerequisite:
Junior/Senior standing or consent of instructor.

EURS 580. Directed Study. 1-3 Credits. H
Independent study and directed reading on special topics. Permission of
the instructor who will supervise the student's work is required.

EURS 604. The European Union. 3 Credits. S
This course will introduce students to the politics of the European Union.
The course will cover three closely connected topics. First, it will discuss
the institutional make-up of the EU, such as the European commission,
the European parliament, the European Council, and the European court
of justice. It will assess how well these institutions deal with the growing
importance of transnational issues, such as migration and economic
policy issues. Second, the course will examine how national governments
pursue national interests at the level of the European Union. Third, the
class will study how well the EU represents the citizens of European
countries. Finally, the course will assess the extent to which the EU
has successfully developed into a supra-national federation. (Same as
POL 643.) Prerequisite: Sophomore standing or consent of instructor.

Courses

GIST 111. Mapping Our Changing World. 4 Credits. N LFE
This course is an introduction to geospatial technologies. It focuses on the
case conceptual and technical aspects of mapping technologies that transform
information about locations, people, objects, environments, events, and
phenomena to digital representations of the world and as end-products of
geospatial analysis. Topics covered include surveying, aerial photography
and photogrammetry, satellite remote sensing, global positioning systems
(GPS), geographic information systems (GIS), and thematic mapping.
Students will learn how to acquire and develop geospatial data as the
sources for mapping, the skills of analyzing and interpreting spatial
information, and how geovisualization can be used in addressing real-
world problems. (Same as GEOG 111.)

GIST 139. The Global Cold War. 3 Credits. H
This course provides an immersive introduction to the global Cold
War and its legacies. It explores how the contest between capitalism
and communism unfolded not only in the United States and the Soviet
Union, but also in Asia, Africa, Europe, Latin America, and the Middle
East. Through interactive lectures, discussions, and role-playing
games, students will learn to "think globally," gain an understanding of
imperialism, nationalism, and decolonization, and discover how the
Cold War shaped culture, economics, politics, the environment,
and the international system in ways that remain relevant today. (Same as
HIST 139.)

GIST 177. First Year Seminar: ___. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing
current issues in Global & International Studies. Course is designed to
meet the critical thinking learning outcome of the KU Core. First-Year
Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

GIST 201. Topics in: ____. 1-3 Credits. U
An interdisciplinary study of international topics. Designed especially for freshmen and sophomores. May be repeated for credit if content varies.

GIST 203. Topics in Middle Eastern Studies: ____. 1-3 Credits. U
An interdisciplinary study of topics related to the Middle East. Designed especially for freshmen and sophomores. May be repeated for credit if content varies.

GIST 205. Muslim Lives: Politics, Culture, and Society. 3 Credits. S
The course provides a general introduction to Muslim communities and societies by surveying some of the major aspects of Muslims’ lived experiences from the early Islamic period to the modern globalized world. It will challenge the essentialized notion of a “Muslim world,” which is usually presented as a monolithic society. Through the course, students will develop a basic understanding of the rich diversity of Muslim communities in terms of cultural mores, religious practices, and sociopolitical conditions. Religious and sociopolitical practices will be analyzed in their ethical and moral perspectives. (Same as SLAV 205.)

GIST 210. Culture and Health. 3 Credits. H/W
This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 203 and GEOG 201.)

GIST 211. Culture and Health, Honors. 3 Credits. H/W
Honors version of AAAS 203, GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 204 and GEOG 202.)

GIST 220. Introduction to Global and International Studies. 3 Credits. S
This course provides an overview to the major approaches and themes involved in the study of world cultures, politics, and societies from a multi-disciplinary perspective. Topics of global importance, such as the construction and maintenance of cultures, comparative political systems, global and regional economies, popular culture, gender and the environment will be covered through their manifestations in particular regional and global contexts. Students will be challenged to address their own views and existing approaches to global dynamics from a critical and reflective perspective.

GIST 303. Language, Gender, and Sexuality. 3 Credits. S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, JWSH 305, SLAV 305 and WGSS 325.)

GIST 304. Globalization and Afro-Brazilian Culture. 3 Credits. W
During this study abroad experience, students will explore how Afro-Brazilian cultural elements, such as the music of Afro groups, the art form/martial art/dance capoeira, and the candomblé religion became realities around the world. Guest lecturers will present on topics such as Brazilian history, music, religion, dance, education, Carnival, and tourism. Planned site visits include temples of Afro-Brazilian religions such as candomblé and syncretic Catholic churches such as the Church of Our Lady of the Black Rosary. The program is based in Salvador, one of the Brazilian cities where African influence is the most visible and celebrated. This course and study abroad program is open to all majors.

GIST 305. World Indigenous Literatures. 3 Credits. NW H
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305 and ISP 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

GIST 306. Global Environmental Literature. 3 Credits. H
An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as ENGL 306 and EVRN 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

GIST 308. Key Themes in Modern Global History. 3 Credits. H
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as HIST 308.)

GIST 310. Modern Turkey: Culture and Society. 3 Credits. H/W
As a country that is geographically in the middle of a strategic global region, a key NATO ally, a candidate for EU membership, and representing a mix of democratic traditions, military coups, and authoritarian leaders combined with periods of rapid and drastic socioeconomic transformation, for one reason or another, Turkey seems to always be a country under the spotlight. This course is designed to give an overview of Modern Turkey and familiarize the student with its history, society and culture. Topics to be covered include the early republican period, ethnic and religious minorities, religion and secularism, music, cuisine, women, gender and sexuality, religious and national holidays, cinema and TV, among others. The primary purpose of this course is to help students develop necessary analytical and interpretive skills to identify, compare, and analyze Turkish cultural practices, products and perspectives as they relate to basic social, political, and historical contexts. No background knowledge of Turkey or the Turkish language is required. (Same as SLAV 310 and TURK 310.)

GIST 314. Globalization: History and Theory. 3 Credits. H
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries,
or it is a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as HIST 314.)

GIST 320. Love, Sex and Marriage in India. 3 Credits. H
This course addresses diverse aspects of the philosophies and expressions of intimacy and pleasure as found in India. Using old and new literature, including from the Kamasutra, as well as media, we examine the following: how and why in ancient times sensual pleasure was another path for ultimate bliss; how perspectives and traditions of intimacy have changed over time; diverse types of marriages; the culture and practice of arranged marriages; same-sex intimacy; and universal concepts of love.

GIST 321. Graphic Novels as Memory. 3 Credits. H
This course examines the interaction between literature and memory, in particular how authors respond to major historical events and contribute to shaping the collective memory of those events. Students will read graphic novels inspired by memories of the Holocaust and Communism. Through the visual and textual mix of the graphic novel, we will consider the impact of historical upheavals on the lives of ordinary individuals, drawing connections to contemporary national and global socio-political problems. Students will write on these topics in a variety of academic and non-academic genres, including: journal, article summary, synthetic essay, analytical essay, and reflection essay/creative writing. (Same as SLAV 320.)

GIST 323. Environmental Dynamics in India. 3 Credits. S/W
This course introduces students to the relationships the people of India have had with their landscape from ancient times to the present. Students will learn about diverse ecosystems and the indigenous peoples they have harbored from the high Himalayas altitudes to the coastal regions, from the desolate arid deserts to the rain forests of India. The class will discuss how the very nature of the relationship of the people with their land has changed over the long course history of South Asia with specific case studies of environmental challenges, failures and successes. Examples of possible cases include: the Chipko movement led by the women of the Himalayas to save their forests from loggers; the traditions of creating lakes and water conservation lifestyles in the arid region of Rajasthan; and nature worship and cases of leopards and tigers receiving protection by the very villages they terrorize. (Same as ANTH 323.)

GIST 325. Peoples and Cultures of South Asia. 3 Credits. S
This course provides an introduction to the diversity of peoples in South Asia, including India, Pakistan, Nepal, Bangladesh and Bhutan. The particular cultures and language of the indigenous peoples in the region are highlighted through academic sources and the direct study of reproductions of these cultures in literature and film.

GIST 329. Israeli-Palestinian Conflict: An Introduction. 3 Credits. S
This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. (Same as HIST 482, JWSH 329, and POLS 369.)

GIST 335. Iran Through Literature and Film. 3 Credits. W
This course examines aspects of Iranian society through literature and film. Students will analyze selected Iranian texts in their historical, social, and political contexts to examine and gain a comprehensive understanding of the complex and pressing issues facing the modern Iranian society. The course will utilize nationalist, Marxist, feminist, and Islamist paradigms to provide a theoretical framework for discussions and to better understand the crosscurrent of ideas in contemporary Iran. No knowledge of Persian language required because all the texts will be available in English translation and subtitles.

GIST 350. Study Abroad Topics in: ______. 1-5 Credits. U
This course is designed for the study of special topics in global and international studies at the junior/senior level. Course work must be arranged through the KU Office of Study Abroad and approved by a faculty adviser in Global and International Studies. May be repeated for credit if content varies.

GIST 354. Globalization: A Geographic Approach. 3 Credits. S
This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as GEOG 354.)

GIST 355. International Women's Rights. 3 Credits. SC
Women face discrimination and abuse around the world: at home, in the workplace, and in the public sphere. How are these systems of oppression connected? How are women working together for change, and what can you do to support their efforts? This course will investigate what feminist solidarity looks like around the world, with an emphasis on connections across different cultural and political contexts. (Same as WGS 355.)

GIST 371. Environmental Geopolitics. 3 Credits. S
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GEOG 371.)

GIST 376. Immigrants, Refugees, and Diasporas. 3 Credits. H
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as HIST 376.)

GIST 420. Analyzing Contemporary Global Issues. 3 Credits. S/W
This course enhances students' ability to critically analyze the intricacies of current international issues through three core goals. First, the content of the course is unique each semester as it targets major international issues in the moment, so students gain an in-depth understanding about things happening in the world around them. Second, the course refines students' critical writing skills by combining the critical thinking skills needed for issue analysis with the writing skills required to disseminate their thoughts in a variety of forms. Finally, for GIST majors specifically, the course offers an ideal preparation for the senior capstone experience.

GIST 433. Iran, Turkey, and the Kurds. 3 Credits. S
This course examines the contemporary political and social dynamics within these three communities residing along the northern stretch of what is commonly referred to as the Middle East. Using social and political theory as a starting point, students will comparatively study critical elements and issues facing the members of these societies. Issues and themes for comparison will include the structure and institutions of politics, nation-building and nationalism, Islam and politics, women and
politics, and regional and global engagement. Formerly known as GIST/POLS 633. Not open to students with credit in GIST/POLS 633. (Same as POLS 433.) Prerequisite: GIST 220, POLS 150, or consent of instructor.

**GIST 465. Genocide and Ethnocide. 3 Credits. S**
This course provides students with a conceptual and historical synopsis of genocide and ethnocide from an anthropological perspective. Taking its lead from a human rights orientation, the course assesses why such atrocities must be confronted. This includes grappling with ethical, legal and definitional ambiguities surrounding the concepts of genocide and ethnocide. We will explore a range of cases in the 20th and 21st centuries, while focusing on diverse conditions leading to genocide, ethnocide, population displacements, human trafficking and the modern phenomena of refugee camps. The course will analyze the role of the modern state, colonialism, political ideologies, ethnicity and nationalism as major forces underpinning ethnocide and genocidal campaigns. Based primarily on a select review of cases of ethnocide and genocide, the class examines how to spread global awareness and communal engagement by actively protecting human rights. (Same as ANTH 465.)

**GIST 466. Islam and Politics. 3 Credits. W**
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as the intersections of political Islam and democratic politics, state regulation of Islam, religion and Islamism’s role in nation-building, formal state institutions and opposition movements in authoritarian contexts. We also look at the complex ways in which religion intersects with gender dynamics and identity politics in Muslim-majority countries. This course is offered at the 400 level and 600 level with additional assignments at the 600 level. Not open to students with credit in GIST/POLS 667 or SOC 640. (Same as POLS 467.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

**GIST 471. Politics of Human Trafficking. 3 Credits. S**
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 714, POLS 714, or GIST 714. (Same as POLS 471 and WGSS 514.) Prerequisite: Sophomore standing or consent of instructor.

**GIST 482. Transnational Terrorism. 3 Credits. S**
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism. Formerly known as POLS 582/GIST 585. Not open to students with credit in POLS 582/GIST 585. (Same as POLS 482.) Prerequisite: Sophomore level or consent of instructor.

**GIST 486. International Human Rights. 3 Credits. S**
The course introduces students to historical and philosophical bases of contemporary human rights, theoretical approaches and methodological challenges to studying human rights questions, and acquaints them with the main topics, controversies, and tensions in the scholarship, practice and politics of human rights. Formerly known as GIST/POLS 686. Not open to students with credit in GIST/POLS 686. (Same as POLS 486.) Prerequisite: POLS 170 or consent of instructor is required.

**GIST 493. Directed Readings. 3 Credits. U**
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director.

**GIST 495. Global Internship. 3 Credits. U**
Semester-long internship with a business or organization located abroad or that provides a global or international working context for the interning student. The assessment component normally requires the submission of a reflective internship journal documenting work experiences within this unique context, and a final paper on a relevant theme that is determined by instructor and student based on context. This course is available to GIST majors and minors only. Prerequisite: Consent of instructor.

**GIST 501. Topics in: _____ 1-3 Credits. U**
An interdisciplinary study of international topics. Designed especially for juniors and seniors. May be repeated for credit if content varies.

**GIST 502. Advanced Topics in South Asian Studies: _____ 1-3 Credits. U**
An interdisciplinary study of topics related to South Asia. May be repeated for credit if content varies. Prerequisite depends on specific topic offered.

**GIST 503. Advanced Topics in Middle East Studies: _____ 3 Credits. U**
An interdisciplinary study of topics related to the Middle East. May be repeated for credit if content e depends on specific topic offered.

**GIST 529. Globalization. 3 Credits. S**
Addresses sociological aspects of the growth of transnational economic, cultural, institutional, and political interconnections, the freer and faster movement of goods, images, ideas, people, and institutional forms across national borders, and the consequences and problems of these processes. The focus is on recent (later 20th century to the present) global restructuring in the context of historical shifts in capitalist development. (Same as SOC 529.) Prerequisite: SOC 104 or GIST 220.

**GIST 535. Literature and Society in the Contemporary Middle East. 3 Credits. NW H/W**
This course offers a general introduction to the modern Middle Eastern literatures in English translation. Through analyses of selected short stories and novels from Arabic, Turkish and Persian literature, the students develop an understanding of the issues that shape everyday life in the Contemporary Middle East. The course investigates issues of nation and national identity, war, ethnicity, class, religion, and gender and sexuality. We use a variety of paradigms, namely nationalist, Marxist, feminist, and Islamist, to provide a theoretical framework for discussion of the selected works. No prior knowledge of Arabic, Turkish or Persian language is needed. Prerequisite: Junior or Senior standing or consent of instructor.

**GIST 550. Issues in Global Studies: _____ 3 Credits. U**
An interdisciplinary study of topics with particular emphasis on issues of global importance—i.e. transnational and trans-regional. May be repeated for credit if content varies. Prerequisite: GIST 220.

GIST 560. The Literature of Human Rights. 3 Credits. H
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as EURS 565 and PCS 565.) Prerequisite: Junior/Senior standing or consent of instructor.

GIST 570. Anthropology of Violence. 3 Credits. S
Introduces students to the comparative and cross-cultural study of violence. The course begins by surveying different anthropological approaches to the study of violence, with special attention paid to classical social theorists as well as ethnographic works. Topics may include (post) coloniality and identity politics, nationalism, race, religion, and political culture; geographic areas to be covered may include Africa, Europe, Latin America, the Middle East, and South Asia. (Same as ANTH 570.) Prerequisite: Junior standing or above or permission of instructor.

GIST 577. Human Dimensions of Global Change. 3 Credits. S
This class introduces concepts such as coupled human and natural systems, social-ecological resilience, and sustainability science, examines people's responses to major climate, land, water, and coastal change, and discusses case studies. One hour of each seminar will be devoted to individual needs that address topical or methodological issues. Class requirements include presentations, biweekly papers, and a term paper. (Same as GEOG 577.) Prerequisite: One of the following: GEOG 100, GEOG 104, GEOG 374, or an Environmental Studies introductory course.

GIST 582. Geopolitics and Genocide. 2-3 Credits. S
Explores the inherently geographical and geopolitical nature of genocide and related mass violence and introduces an overarching concept, territorial cleansing, that foregrounds the spatial and territorial nature of these events. Detailed studies of cases at a range of scales and locales provide the major context for critical examination and comparison of territorial cleansing concepts. Students enrolling for 3 credits will prepare and present a substantial independent research paper. (Same as GEOG 306.) Prerequisite: GEOG 102 or GEOG 103; or ANTH 108 or ANTH 109; or permission of instructor.

GIST 601. Indigenous Peoples of the World. 3 Credits. S
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEOG 601 and ISP 601.) Prerequisite: Permission of instructor.

GIST 610. Interdisciplinary Methods for Global Contexts. 3 Credits. S
An introduction to a variety of widely-employed quantitative and qualitative research methods in the social sciences and humanities, including methods such as statistical analysis, ethnography, and content analysis. Prerequisite: GIST 220 or consent of the instructor.

GIST 624. Social Movements in the Middle East. 3 Credits. S
Using the major theories and approaches comparatively applied to social movements around the world, this course critically analyzes historical and existing cases of social movements and "nonmovements" in the Middle East. We cover examples of Islamist (and post-Islamist), women's, nationalist, democratic, youth and labor movements and their impact on the region. Contextual factors like technology and social networking, regime type, institutions, and socioeconomic structures are also considered for their role in supporting or inhibiting collective action. Prerequisite: GIST 220 or POLS 150.

GIST 667. Islam and Politics. 3 Credits. W
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as the intersections of political Islam and democratic politics, state regulation of Islam, religion and Islamism's role in nation-building, formal state institutions and opposition movements in authoritarian contexts. We also look at the complex ways in which religion intersects with gender dynamics and identity politics in Muslim-majority countries. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses and includes a presentation of the findings of the research. Not open to students with credit in GIST/POLS 467. (Same as POLS 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

GIST 678. Chinese Foreign Policy. 3 Credits. S/W
An in-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 378. (Same as EALC 678 and POLS 678.) Prerequisite: Sophomore level or consent of the instructor.

GIST 698. Capstone Seminar. 3 Credits. H
A seminar designed to introduce students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: GIST 610 or consent of the instructor.

GIST 699. Capstone Seminar, Honors. 3 Credits. H
A seminar designed to introduce honors students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: 12 hours of junior/senior level and above courses that satisfy requirements for the major.

GIST 701. Approaches to International Studies. 3 Credits.
This course examines various approaches to the study of cultures, politics, and societies in their global and international contexts through the exploration of a series of exemplary works of global/international research from a variety of disciplines (e.g. anthropology, sociology, political science, economics, geography, history, etc.). The course will cover the major contributions of these disciplines in their approaches to global questions and themes and will provide a multidisciplinary framework within which students can begin exploring their own global and international research questions. The course also provides an introduction to the major regions and many of the themes that students will be able to specialize in during the course of the MA program.

GIST 702. Globalization. 3 Credits.
A central issue in international studies is globalization, the increasing interconnectedness of societies and economies. This course examines globalization from an historical and contemporary perspective. Major topics include (but are not necessarily limited to) the historical expansion of the West since 1500, the growth of international economic institutions, conflict among global cultures, the future of state sovereignty, and the challenges of economic integration.
GIST 705. Globalization in History. 3 Credits.
A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include western expansion since 1500, the spread of state sovereignty, the formation of a world economy, and spread of international institutions. The current world problems investigated will vary, but may include issues such as environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as HIST 705.)

GIST 707. Studying Modern Islam. 3 Credits.
An in-depth introduction to the issues involved in the academic study of modern Islam. In this class students will investigate the ideas, assumptions and historical circumstances that gave rise to and continue to influence scholarly approaches to Islam. Topics may include the Orientalism, gender studies, colonialism, secularism, Islamism and the concept of modernity. Students will apply what they learn to the study of Islam in contemporary Egypt.

GIST 709. Research Design. 1-3 Credits.
This course guides new graduate students through the process of designing and developing an original research project. The fundamentals of interdisciplinary research will be the instructional framework within which students will design their own original research project. Instruction regarding the review of literature, methodology, and how to structure and scale the project will be given. Students taking this course will be required to take the companion course, GIST 810.

GIST 710. Research Design for International Area Studies. 3 Credits.
This course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as CEAS 710 and LAC 710.) Prerequisite: Consent of instructor.

GIST 714. Politics of Human Trafficking. 3 Credits.
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GIST 471, POLS 471, or WGSS 514. (Same as POLS 714 and WGSS 714.) Prerequisite: Graduate standing.

GIST 750. Topics in International Studies: _____ 3 Credits.
A study of one or more selected topics in international studies. Course may be taken more than once.

GIST 751. Human Rights and U.S. National Security. 3 Credits.
This course explores the history, debates, and contemporary issues related to human rights and U.S. national security policy. Through lecture, practical exercises, and class-led discussions, the course will cover relevant and timely issues such as human rights and counter-terrorism, security assistance and cooperation, peacekeeping and protection of civilians, and global criminal accountability. Prerequisite: Graduate standing or consent of instructor.

GIST 752. International Conflict Prevention and Resolution. 1 Credit.
This course examines three connected fields of study related to armed conflict and acute violence from the perspective of US policymakers: the nature of contemporary conflict and its causes; mediation, and peacebuilding; and the policy options for preventing or managing conflict. Throughout the short course, students will explore the major analytical frameworks and theories used to examine conflict, and the major approaches applied to address it, including contemporary approach to stabilization and reducing state fragility.

GIST 774. The U.S. in Latin America. 3 Credits.
This interdisciplinary course will cover significant moments in world history in which the United States played a prominent role in Latin America’s politics and economy. Class materials and discussions will focus on historical events such as the Cold War, the Good Neighbor Policy, and the Military Regimes. By engaging with an array of readings from disciplines such as history, political science, economics, and cultural studies, along with the discussions films and novels that portray the human and historical moments that they are studying, students will learn about and analyze the dynamics of the United States in Latin America through a variety of representations and critical perspectives.

GIST 783. Theories of Conflict, Security and Peace. 3 Credits.
Armed conflicts can be caused by a myriad of factors; thus, conflict studies in international relations provide useful theories and methods through which inter- and intra-state conflict may be analyzed. The goal of this course is an analytical understanding of the conditions, processes, and events that lead to the outbreak and escalation of war. This course focuses predominantly on the causes of interstate conflict, global security, and conflict resolution but also includes a brief examination of the causes of civil war. The course highlights the complexity of the subject matter, scrutinizing war through the many lenses of peace and conflict theory, including but not limited to realism and the balance of power, levels of analysis, misperception, rivalries, grievances, bargaining, and insecurity.

GIST 793. Directed Readings. 1-5 Credits.
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director.

GIST 810. Graduate Writing Experience. 1-3 Credits.
This course guides students through the process of effectively communicating the findings of original research through formal writing. The purpose of the course is to provide writing guidance and instruction to students conducting ongoing research, so that they are familiar with successful ways of communicating research to academic and professional audiences. Depending on the career objectives of the student, the writing project will be tailored to address the relevant audience—academic or professional. The fundamental components of the research writing process will be individualized to correspond with student’s research goals. Prerequisite: GIST 709.

GIST 818. Islamic Law. 2-4 Credits.
Examines the history, doctrine, texts, and role of Islamic law (Shari'a) throughout the world. This course complements (but is independent of) LAW 879. The course focuses on the background and birth of the Arab-Islamic Empire, the life and times of the Prophet Muhammad (PBUH), the development of Islam, the Rashidun, Umayyad, and Abbasid Caliphatess, Moghul and Ottoman Empires, the Koran and Sunnah and other sacred texts, the Sunni-Shi'a split, the principal schools of Islamic law, the status of women and religious minorities, and principles of the substantive areas of law, including criminal, family, inheritance, contract, property, business, banking, and international law (including law of war). Also covered are issues of economic growth, marginalization, and terrorism. (Same as LAW 918.)

GIST 897. Examination Preparation. 1 Credits.
Independent study in preparation for the Comprehensive M.A. examination. May be repeated. Graded on a satisfactory/unsatisfactory basis.

GIST 898. Thesis and Research Project Writing. 3 Credits.
This course is primarily designed to guide MA students through the writing development of their concluding graduate research, whether a final graduate research project or a thesis. Students will learn and apply the practices of effective communication and writing of research while completing the various components of their final projects. The intention of the class is to help students complete a high quality draft of their research, though deadlines and assignment may relate to practice in graduate level research writing in general. Within an interdisciplinary framework and an understanding of rhetorical distinctions across various epistemologies, students will practice relevant modeling of academic literature reviews, transparency in communicating research practices, analyzing/interpreting texts, data, or other information, and introducing and concluding their work. (Same as CEAS 898.) Prerequisite: GIST 710.

GIST 899. Thesis. 1-6 Credits.
Enrollment for writing thesis for master's degree. Graded on a satisfactory progress/limited progress/no progress basis.

Courses

KQKL 110. Elementary Kaqchikel Maya I. 3 Credits. U F1
An orientation to Kaqchikel Maya language and culture for beginning students. Includes elements of grammar, conversation, and composition. Kaqchikel is the first language of approximately 500,000 people of highland Guatemala and one of roughly 30 Mayan languages. This course is offered at the 100 and 600 level with additional assignments at the 600 level. Not open to students with credit in KQKL 600. May be taken more than once. Prerequisite: KQKL 360 or equivalent.

KQKL 360. Advanced Kaqchikel Maya II. 3 Credits. U
Advanced work in Kaqchikel language and culture. May be taken more than once. Prerequisite: KQKL 360 or equivalent.

KQKL 600. Elementary Kaqchikel Maya I. 3 Credits. U
An orientation to Kaqchikel Maya language and culture for beginning students. Includes elements of grammar, conversation, and composition. Kaqchikel is the first language of approximately 500,000 people of highland Guatemala and one of roughly 30 Mayan languages. This course is offered at the 100 and 600 level with additional assignments at the 600 level. Not open to students with credit in KQKL 110. Prerequisite: Instructor permission.

Courses

LAC 100. Latin American Culture and Society. 3 Credits. SC S
An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with a basic knowledge base for understanding Latin America today. (Same as HIST 124.)

LAC 177. First Year Seminar: _____, 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Latin Area and Caribbean Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

LAC 300. Interdisciplinary Themes in Latin American Studies. 3 Credits. U
This course offers an in-depth examination of several key themes in Latin American Studies. Emphasis is placed on exploring the utility of interdisciplinary methods and on becoming familiar with the theoretical framework that underpins the field. Prior completion of LAC 100 recommended.

LAC 302. Topics in Latin American Area Studies: _____, 1-3 Credits. U
Investigation of special topics on Latin America at the undergraduate level.

LAC 310. Topics in LAC - Anthropology: _____, 3 Credits. W
A Latin American and Caribbean topics course with content related to the Anthropology disciplinary group of the Latin American studies major. May be repeated for credit.

LAC 311. Topics in LAC - History: _____, 3 Credits. U
A Latin American and Caribbean topics course with content related to the History disciplinary group of the Latin American studies major. May be repeated for credit.

LAC 312. Topics in LAC - Spanish American Literature and Culture: _____, 3 Credits.
A Latin American and Caribbean topics course with content related to the Spanish American Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit.

LAC 313. Topics in LAC - Brazilian Literature and Culture: _____, 3 Credits. U
A Latin American and Caribbean topics course with content related to the Brazilian Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit.

LAC 314. Topics in LAC - Latino and Caribbean Literature: _____, 3 Credits. U
A Latin American and Caribbean topics course with content related to the
Latino/a and Caribbean Literature disciplinary group of the Latin American
studies major. May be repeated for credit.

LAC 315. Topics in LAC - Film Music Arts: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the
Film, Music, Arts disciplinary group of the Latin American studies major.
May be repeated for credit.

LAC 316. Topics in LAC - Geography and Environment: ______. 3
Credits. U
A Latin American and Caribbean topics course with content related to the
Geography and Environment disciplinary group of the Latin American
studies major. May be repeated for credit.

LAC 317. Topics in LAC - Politics, Society, Business and Economy:
______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the
Politics, Society, Business and Economy disciplinary group of the Latin
American studies major. May be repeated for credit.

LAC 318. Topics in LAC - Transatlantic and Transnational: ______. 3
Credits. U
A Latin American and Caribbean topics course with content related to the
Transatlantic and Transnational disciplinary group of the Latin American
studies major. May be repeated for credit.

LAC 319. Topics in LAC - Methodology and Theory: ______. 3
Credits. U
A Latin American and Caribbean topics course with content related to the
Methodology and Theory disciplinary group of the Latin American studies
major. May be repeated for credit.

LAC 320. Modern Latin America. 3 Credits. H
A survey of Latin America since the 1800s. Students will examine the
emergence of national identities and the processes of modernization and
globalization in the region. The course also examines how race, social
structures, and politics evolved after independence in the region,
giving particular attention to the legacies of colonialism. Course readings
and lectures highlighting unique national experiences and continuities
across the region. This course is offered at the 100 and 300 level with
additional assignments at the 300 level. Not open to students who have
taken HIST 121. (Same as HIST 315.)

LAC 332. Language and Society in Latin America. 3 Credits. W
This course examines the diversity of languages and cultures that make
up Latin America and the Caribbean, including the influence of colonial
Spanish and Portuguese as well as the many Indigenous, Afro-Caribbean,
and Creole languages and cultures that can be found in Latin America.
Attention is paid to the multifaceted relations between language and
ethnic group, as well as to dynamics of gender and social class within Latin
American cultures. This course is offered at the 300 and 600 level
with additional assignments at the 600 level. Not open to students with
credit in LAC 632.

LAC 334. Indigenous Traditions of Latin America. 3 Credits. NW S/
W
A survey of the major indigenous traditions of Mesoamerica, the
Andes, and lowland tropical Latin America. Coverage emphasizes how
indigenous cultural traditions and societies have both continued and
changed since the European Invasion and addresses such current issues
as language rights, territorial rights, sovereignty, and state violence.
Students enrolled in the 600-level section will be required to complete
additional research and class leadership tasks. Not open to students who
have taken LAC 634. (Same as ANTH 379.)

LAC 499. Honors Course in Latin American Studies. 3 Credits. H
Intensive study and research under faculty direction. Open to students
wishing to graduate with honors in Latin American Studies and having
a grade point average of at least 3.5 in Latin American Studies and at
least 3.25 overall. Requires an interdisciplinary project concerning a
specific topic involving at least two disciplines. Must be directed by a
faculty member in Latin American Studies, approved by the Center
Associate Director, and defended before a committee of at least three
faculty members. To earn departmental honors, a student must take the
course for two semesters (with a minimum grade of B the first semester,
and an A the second).

LAC 500. Directed Study in Latin American Area Studies. 1-3
Credits. U
Independent study and directed reading on special topics.

LAC 501. Multilingualism and Multiculturalism in Latin America. 3
Credits. H
Examines the sociolinguistic issues of multilingual countries in Latin
America from an interdisciplinary perspective. Topics include but are
not limited to linguistic inequality, the language of politics, language and
education, urban and rural linguistic interaction, and indigenous and
creole languages. Prerequisite: A liberal arts course with Latin American
content.

LAC 505. U.S. Latino and Latin American Film and Literature. 3
Credits. H
This course follows the development of U.S. Latino and Latin American
cinema from its origins to the present and its relationship with literary
discourse. U.S. Latino/Latin American cinema can be seen as a specific
practice that cannot be reduced in all its manifestations to the institutional
mode of production of the dominant Hollywood model. The course
examines the creation of a national cinema that seems to be more
dependent on a literary canon. Knowledge of Spanish is not required.

LAC 510. Topics in LAC - Anthropology: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the
Anthropology disciplinary group of the Latin American studies major.
May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or
any LAC course at the 300 level.

LAC 511. Topics in LAC - History: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the
History disciplinary group of the Latin American studies major. May
be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any
LAC course at the 300 level.

LAC 512. Topics in LAC - Spanish American Literature and Culture:
______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the
Spanish American Literature and Culture disciplinary group of the Latin
American studies major. May be repeated for credit. Prerequisite:
LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 513. Topics in LAC - Brazilian Literature: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the
Brazilian Literature and Culture disciplinary group of the Latin American
studies major. May be repeated for credit. Prerequisite: LAC 100 or
HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 514. Topics in LAC - Latino and Caribbean Literature: ______. 3
Credits. U
A Latin American and Caribbean topics course with content related to the
Latino/a and Caribbean Literature disciplinary group of the Latin American
studies major. May be repeated for credit. Prerequisite: LAC 100 or
HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 515. Topics in LAC - Film Music Arts: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Film, Music, Arts disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

**LAC 516. Topics in LAC - Geography and Environment:** 
A Latin American and Caribbean topics course with content related to the Geography and Environment disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

**LAC 517. Topics in LAC - Politics, Society, Business and Economy:** 
A Latin American and Caribbean topics course with content related to the Politics, Society, Business and Economy disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

**LAC 518. Topics in LAC - Transatlantic and Transnational:** 
A Latin American and Caribbean topics course with content related to the Transatlantic and Transnational disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

**LAC 519. Topics in LAC - Methodology and Theory:** 
A Latin American and Caribbean topics course with content related to the Methodology and Theory disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

**LAC 550. Capstone in Latin American and Caribbean Studies:** 
The capstone course in the major offers interdisciplinary approaches to a thematic topic or focus related to Latin America/ the Caribbean and contains substantial writing and independent research requirements. By the end of the class and culminating their study of the field at KU, students will be able to discuss the course topic from a variety of theoretical, methodological, and disciplinary perspectives. Prerequisite: Completion of at least 18 credits toward the LAA major, or permission of instructor.

**LAC 552. Foodways: Latin America.** 
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, HUM 552, and ISP 552.) Prerequisite: Upper division course on Latin America or permission of the instructor.

**LAC 556. Pre-Hispanic Mexico and Central America.** 
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotecs, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as ANTH 506 and HIST 571.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor.

**LAC 558. Ancient American Civilizations: The Central Andes.** 
An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of "vertical" environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huari, Tiahuanaco, Chimú, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnohistoric documents. (Same as ANTH 508 and HIST 572.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, History, or Indigenous Studies, or permission of instructor.

**LAC 559. Ancient Central America.** 
This course will examine the Pre-Columbian cultures of the region situated between Mesoamerica to the north and the Central Andes to the south, focusing principally on the countries of Honduras, Nicaragua, Costa Rica, Panama, and Colombia. Once regarded as an "Intermediate Area" on the peripheries of the ancient civilizations to the north and south, the area of southern Central America and northern South America is now recognized as a center of innovation from very remote times up until the Spanish Conquest. The archaeological remains of stone tools, pottery, jade carvings, gold and copper ornaments, and a wide variety of structures will be interpreted within the context of information on subsistence, settlement patterns, social organization and religious ideology. Issues of the relationships with populations of regions in major culture areas to the north and south will also be considered in detail. (Same as ANTH 509.) Prerequisite: ANTH 110 or ANTH 115.

**LAC 561. Indigenous Development in Latin America.** 
Survey of the development enterprise since WWII, examines the marginalization and impoverishment of Latin America's indigenous peoples, and provides training to carry out projects for and with them to enhance their quality of life. Development is understood as not merely technological or economic, but also social, emotional, and educational. Students work in teams to design their own mock development project. A 3-credit non-obligatory companion course, Applied Anthropological Field School among the Ch'ortí Maya, will follow in the intersession after each version of this course. (Same as ANTH 561.) Prerequisite: ANTH 100, ANTH 108, ANTH 160 or LAC 100; or consent of instructor.

**LAC 562. Mexamérica.** 
This class surveys the relations between Mexico and the U.S. as nation-states, and among Mexicans, Mexican Americans, and Anglo Americans (to a lesser extent other U.S. citizens) in historical perspective. Issues of sovereignty, national and ethnic identity, immigration, migration, labor relations, popular culture, media, and transnational economics are covered. (Same as ANTH 562.) Prerequisite: ANTH 108 or ANTH 308 or ANTH 160 or ANTH 360 or LAC 100.

**LAC 577. The Andean World.** 
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary
struggles over globalization and extractivism. (Same as EVRN 577, HIST 577 and ISP 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

LAC 587. Multidisciplinary Field School in Partnership with the Chorti Maya. 3 Credits. S
Teams of interdisciplinary students partner with the Chorti Maya of Guatemala and Honduras to share information and experiences. One third of the course consists of readings and 4-5 orientation sessions on campus, and two thirds entails two weeks in Central America. Examples of activities might include historical research, water testing and improvement, photography, art, music, tourism consultation, marketing of crafts, human rights advocacy, web design, computer training, and museum work, among others. There are no prerequisites, but students with a working knowledge of Spanish will receive preference for admission. (Same as ANTH 587.)

LAC 602. Topics in Latin American Studies: _____ . 1-3 Credits. U
Investigation of special topics on Latin America.

LAC 632. Language and Society in Latin America. 3 Credits.
This course examines the diversity of languages and cultures that make up Latin America and the Caribbean, including the influence of colonial Spanish and Portuguese as well as the many Indigenous, Afro-Caribbean, and Creole languages and cultures that can be found in Latin America. Attention is paid to the multifaceted relations between language and ethnic group, as well as to dynamics of gender and social class within Latin American cultures. Students will conduct independent research on non-dominant languages and cultures in Latin America. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in LAC 332. Prerequisite: Any previous LAC course.

LAC 634. Indigenous Traditions of Latin America. 3 Credits. NW S/ W
A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken ANTH 379 or LAC 334.

LAC 701. Interdisciplinary Seminar in Latin American Culture and Problems. 3 Credits.
An interdisciplinary seminar incorporating significant and pertinent materials from the fields of anthropology, economics, geography, history, political science, sociology, and Spanish and Portuguese literature. Required of all graduate students enrolled in the Master of Arts program in Latin American Area Studies. Prerequisite: LAC 710 (may be taken simultaneously with LAC 701 if both courses offered during same semester.)

LAC 702. Topics in Latin American Studies: _____ . 3 Credits.
Investigation of special topics on Latin America. Topics are drawn from many disciplines within Latin American and Caribbean Studies. Course can be repeated for credit as the topic changes.

LAC 710. Research Design for International Area Studies. 3 Credits.
This course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as CEAS 710 and GIST 710.) Prerequisite: Consent of instructor.

LAC 800. Investigation and Conference. 1-2 Credits.
Investigation and research of interdisciplinary topics in Latin American Studies.

LAC 899. Thesis/Non-Thesis. 1-6 Credits.
Prerequisite: Consent of instructor.

Courses

QUEC 110. Elementary Quechua I. 3 Credits. U F1
An orientation to Ecuadorian Quechua language and culture for beginning students. Includes elements of grammar, conversation, and composition. Quechua (a.k.a. Kechwa, Quichua, Kechua, Kitchwa, Khetchua, or Runa Ximi) in its various forms is an indigenous language spoken by over six million people in Ecuador, Peru and Bolivia combined.

QUEC 114. Elementary Quechua II. 3 Credits. U F2
Continuation of QUEC 110. Prerequisite: QUEC 110 or equivalent.

QUEC 230. Intermediate Quechua I. 3 Credits. U F3
Continuation of QUEC 114. Prerequisite: QUEC 114 or equivalent.

QUEC 234. Intermediate Quechua II. 3 Credits. U F4
Continuation of QUEC 230. Prerequisite: QUEC 230 or equivalent.

QUEC 610. Directed Study in Quechua Language and Culture. 3 Credits. H
This course is intended for students seeking proficiency in Quechua beyond QUEC 234. Instructor will direct the student through readings and materials in Quechua that will add to the student's substantive knowledge of Quechua speakers and their cultures. May be taken multiple semesters for credit with varying content. Prerequisite: QUEC 234 or consent of instructor.

Bachelor of Arts in Global and International Studies

Why choose a Global and International Studies degree?

A degree in Global and International Studies will give you the tools to understand the rapid changes occurring internationally and transnationally throughout the world. In our interdisciplinary program, faculty and students think critically about some of the most fundamental global and regional issues facing societies today such as:

- population growth,
- politics and governance,
- migration,
- the global economy,
- poverty and inequality,
- religion, race and ethnicity,
- gender and sexuality,
Global & International Core Knowledge and Skills (6 hours/2 units).

Besides access to quality instruction and content, our students have access to the amazing international resources that put KU on the top shelf for international education–a nationally-ranked Study Abroad Program, instruction in 40 foreign languages, and local, national, and international internship opportunities.

Students are able to choose from 4 different concentrations within the program. These paths include:

1. Global & International Concentration
2. European Concentration
3. Latin American & Caribbean Concentration
4. Middle East Concentration

After graduation, a degree in GIST is helpful for careers in journalism, Foreign Service, business and industry, education, law, politics and government, and social service agencies.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Requirements for the B.A. Major**

International Electives (9 hours/3 units). Majors must take three courses from the list of approved international elective courses at the 300-level or above. Students are strongly encouraged to strategically select a cluster of three courses that would help them to fulfill KU Core requirements, or maximize a double-major with another program. For example, students double-majoring in geography or history should select their international electives from the list of approved GEOG or HIST courses. Students may, however, select from any of the approved courses available.

The following list shows examples of commonly taught approved international electives. To see a full list of approved courses for the international elective, consult our website (https://global.ku.edu/ba-global-international-concentration/). Other courses may also be approved in consultation with the department.

SPAN 470 | Studies in Spanish Culture and Civilization: _____ | 1-3

### Latin American and Caribbean CONCENTRATION

**Latin American and Caribbean Concentration Core Knowledge and Skills (9 hours/3 units).** Satisfied by taking each of the following courses:

### Code | Title | Hours
--- | --- | ---
LAC 100 | Latin American Culture and Society | 3
LAC 300 | Interdisciplinary Themes in Latin American Studies | 3
or LAC 310 | Topics in LAC - Anthropology: _____ | 3
or LAC 332 | Language and Society in Latin America | 3
or LAC 334 | Indigenous Traditions of Latin America | 3

**Additional Language (3-5 hours/1 unit).** Satisfied by:

Completion of one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above) or any available additional language course (3-5 hours). All language study must be in Latin American Caribbean languages (e.g. Spanish, Portuguese, or Indigenous Latin American Languages).

### Mid-Level Latin American and Caribbean Electives (1-3 hours/1-3 units).
satisfied by:

Completion of any additional LAC (or crosslisted) courses at the 300-level or above. The following list shows examples of commonly taught approved electives; consult with the Undergraduate Advisor for GIST for a complete list of approved courses:

### Code | Title | Hours
--- | --- | ---
AAAS 301 | Haiti: Culture and Identity | 3
AAAS 333 | Introduction to Caribbean Literature | 3
AAAS 574 | Slavery in the New World | 3
ANTH 379 | Indigenous Traditions of Latin America | 3
ANTH 380 | Peoples of South America | 3
ANTH 382 | People and the Rain Forest | 3
ENGL 339 | Introduction to Caribbean Literature | 3
FMS 316 | Cinemas of the Southern Cone: Argentina, Chile, and Uruguay | 3
GEOG 368 | A History of Afro-Latin America | 3
PORT 300 | Brazilian Culture | 3
PORT 471 | Studies in Brazilian Culture and Civilization: _____ | 1-3
PORT 565 | Studies in Brazilian Film: _____ | 3
SPAN 346 | Transatlantic Hispanic Cultures | 3
SPAN 447 | Latin American Cultures: _____ | 3
SPAN 475 | Studies in Latin-American Literature and Culture: _____ | 1-3
SPAN 560 | Colloquium on Latin American Film | 3

### Upper-Division Latin American and Caribbean Electives (9 hours/3 units).** Satisfied by taking three LAC (or crosslisted) courses at the 300-level or above (this can include LAC 300, 310, 332, or 334).

### Upper-Division Interdisciplinary Electives (6 hours/2 units).** Satisfied by taking two courses focusing on the Latin American and Caribbean region from related departments at the 300-level or above. The following list shows examples of commonly taught approved electives; consult with the Undergraduate Advisor for GIST for a complete list of approved courses:

### Code | Title | Hours
--- | --- | ---
AAAS 301 | Haiti: Culture and Identity | 3
AAAS 333 | Introduction to Caribbean Literature | 3
AAAS 574 | Slavery in the New World | 3

SPAN 447 | Latin American Cultures: _____ | 3
SPAN 475 | Studies in Latin-American Literature and Culture: _____ | 1-3
SPAN 560 | Colloquium on Latin American Film | 3

### Middle East CONCENTRATION

**Middle East Concentration Core Knowledge and Skills (6 hours/2 units).** Satisfied by taking each of the following courses:

### Code | Title | Hours
--- | --- | ---
GIST 220 | Introduction to Global and International Studies | 3
AAAS 102 | Arabic and Islamic Studies | 3

**Additional Language (3-5 hours/1 unit).** Satisfied by:

Completion of one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above) or any available additional language course (3-5 hours). All language study must be in Middle East languages (e.g. Arabic, Turkish, Persian, or Hebrew).

### Additional Language (3-5 hours/1 unit).** Satisfied by:

Completion of one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above) or any available additional language course (3-5 hours). All language study must be in Middle East languages (e.g. Arabic, Turkish, Persian, or Hebrew).

### The Capstone Research Coursework (6 hours/2 units).** Satisfied by the completion of the following two courses, with a senior project specifically focused on a Latin American and Caribbean topic:

### Code | Title | Hours
--- | --- | ---
GIST 610 | Interdisciplinary Methods for Global Contexts | 3
GIST 698 | Capstone Seminar | 3
GIST 699 | Capstone Seminar, Honors | 3

### The Capstone Research Coursework (6 hours/2 units).** Satisfied by the completion of the following two courses, with a senior project specifically focused on a Middle East topic:

### Code | Title | Hours
--- | --- | ---
GIST 610 | Interdisciplinary Methods for Global Contexts | 3
GIST 698 | Capstone Seminar | 3
Major Junior/Senior Hours

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Upper-Division Concentration Electives (9 hours/3 units). Satisfied by taking three of the following courses:

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 11 units (minimum of 33 credit hours) of major courses.

**Overlapping Courses**
Students in the GIST major can overlap relevant coursework with other programs; however, in order to ensure interdisciplinary breadth, they can only take up to 5 courses offered or cross-listed by any single other academic program.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 21 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Global and International Studies with the following concentrations can be found here: Global and International (p. 1501), European (p. 1500), Latin American & Caribbean (p. 1502), Middle East (p. 1503), or by using the left-side navigation.

**Departmental Honors**

To graduate with departmental honors in Global and International Studies, students must complete all requirements for the major plus GIST 699 (Honors Capstone) with a 3.5 grade-point average in the major. The honors seminar allows students to receive research assistance from three-member faculty committee while writing their theses.

To enroll in the program, students must have a 3.5 grade-point average in the courses making up the Global and International Studies major. Students must obtain approval of their research topic by the instructor with advice from committee members. Each student will defend their honor's thesis in an oral examination before their thesis committee. The student's committee includes the GIST 699 instructor and two university faculty members the student chooses with the assistance of the instructor.

**Major GPA**

Calculations include all junior/senior courses in the field of study including F's and repeated courses. See the GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 101 (Goal 2.1 Written Communication/BA Writing I)\(^1\) and ENGL 102 (Goal 2.1 Written Communication/BA Writing II)\(^1\). Goal 1.2 Quantitative Literacy is allowed. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. A list of approved courses for the Upper-Division General European Electives and the Upper-Division National or Regional Electives may be found under the "Degree Requirements" tab for the major.
4. This major requirement can be fulfilled by completion of one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above), or any available additional language course (3-5 hours).
5. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

1 All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
2 The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
3 Additional Language Course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above), or any available additional language course (3-5 hours).
**Minor in European Studies**

**Why minor in European Studies?**

The European Studies Minor, housed in the Center for Global & International Studies, offers an intellectually engaging minor for students interested in exploring the languages, cultures, history, politics, and economies of Europe and individual European countries. Students integrate the minor most frequently with their study of Global & International Studies, a modern European language, History, Political Science, and/or English. The program provides students opportunities to attend lectures and panel discussions by leading scholars, conduct research, study abroad, and complete internships, all of which help prepare them for careers in a rapidly changing world and global economy.

**Requirements for the Minor**

Students selecting this minor must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EURS 500</td>
<td>Seminar in European Studies</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>1 approved modern European history course</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>European Studies Minor Electives</td>
<td>9</td>
</tr>
</tbody>
</table>

Select three of the following options:

1. approved European politics course
2. approved European economics or business course
3. approved general European culture or history course
4. approved national or regional European course

A current list of approved courses for the minor is available on the European Studies website and from the Program’s Advising Specialist and Academic Director.

**Note:** No more than 1 course may be counted both in the minor and another degree or minor program.

### Minor Hours & Minor GPA

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Junior/Senior (300+) Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all courses in the field of study.

---

### Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. This major requirement can be fulfilled by completion of one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above), or any available additional language course (3-5 hours). All language study must be in Middle East languages (e.g., Arabic, Turkish, Persian, or Hebrew).
4. A list of courses that fulfill the Upper-Division Concentration Electives, and the Upper-Division Interdisciplinary Electives may be found on the "Degree Requirements" tab for this major.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. All language study must be in Middle East languages (e.g., Arabic, Turkish, Persian, or Hebrew).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Global and International Studies Minor

Why minor in Global and International Studies?

Global and International Studies will give you the tools to understand the rapid and profound changes occurring around the world. As a degree of study, it is useful for careers in business and the private sector, non-profit work, and foreign and civil service. The interdisciplinary curriculum provides a great deal of flexibility to tailor your program toward your career aspirations. We live in a world where a great demand exists in rapid and profound changes occurring around the world. As a degree of study, it is useful for careers in business and the private sector, non-profit work, and foreign and civil service. The interdisciplinary curriculum provides a great deal of flexibility to tailor your program toward your career aspirations. We live in a world where a great demand exists in career fields for the understanding of contemporary global dynamics, language and cultural study, and research and writing development our degree provides.

Global & International Studies International Electives: (6 hours/2 courses) Minors must take 2 courses from the list of approved international elective courses. Students are strongly encouraged to strategically select courses that would help them to maximize its linkage to another major or minor with another program, or use the electives to help fulfill requirements from the KU Core. Students may, however, select from any of the approved courses available.

The following list shows the most commonly taught approved international electives. To see a full list of approved courses for the international elective, consult our website (https://global.ku.edu/gist-all-courses/). Other courses may also be approved in consultation with the department.

Minor in Latin American Area Studies

The Undergraduate Minor in Latin American Area Studies provides students with a solid foundation of instruction on Latin American topics to supplement their primary field. There are two tracks within the minor: the General Latin American and Caribbean Studies Track and the Indigenous Studies in Latin America (ISLA) Minor Track. Both tracks require 3 hours of core classes followed by 15 hours of upper-division electives from a wide variety of courses approved by the center. No more than 1 course (3 hours) may be shared with the student's major. For the General LACS minor track there is no language requirement. The ISLA track requires two semesters of an indigenous language spoken in Latin America. For the General Track LAC 100, LAC 300, LAC 332, or LAC 334/ANTH 379 can count as a core course. For the ISLA Track ISP 101 may also count as a core course.

The General Track is for students from several departments and schools who do not wish to concentrate in language studies, but who are interested in aspects such as the history, culture, geography, anthropology, art history, politics, business or journalism of Latin America. This minor will be a great complement to a degree in, for example, business or architecture. There is great flexibility for students who wish to create their own program in order to acquire knowledge in various disciplines subjects. The ISLA track is for similar students who are particularly interested in indigenous peoples of the Western Hemisphere and wish to study an indigenous language. In particular, the ISLA track allows students to integrate coursework on indigenous population of what is now the United States with coursework on such populations elsewhere in the Western Hemisphere.

Please contact the Director of Undergraduate Studies in the Center for Global and International Studies for further information on this minor.

The Undergraduate Minor in Latin American Area Studies provides students with a basic foundation of knowledge on Latin America & the Caribbean to complement their primary field. There are two options: the General Latin American and Caribbean Studies option and the Indigenous Studies in Latin America (ISLA) option.

The General Option is for students interested in building knowledge of Latin America & the Caribbean in such areas as anthropology, art history, business, film, geography, history, indigenous studies, literature, journalism, politics, and theatre.

Minor Hours & Minor GPA
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Overlapping Courses
Students in the GIST minor can overlap relevant coursework with other programs; however, in order to ensure interdisciplinary breadth, they can only take up to 3 courses offered or cross-listed by any single other academic program.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
2. Four additional upper-division LAC electives (12 hours).

Satisfied by taking any upper-division LAC course or its cross-listed number

OR

The ISLA Option is for students interested in indigenous people of Latin America and who wish to study an indigenous language.

1. Two Required Courses (6 hours) - select two from the following list:

</tbody>
</table>

Other indigenous Latin American languages may be substituted with approval of the GIST Director of Undergraduate Studies.

3. Two additional upper-division LAC electives (6 hours).

Students may take any upper-division LAC course or its cross-listed number as an elective.

A minimum of 12 credit hours must be taken at the 300+ level to complete the minor.

If a student would like to apply a non-LAC (or cross-listed) course with at least 25% Latin American and/or Caribbean content (which may include assignments) for either minor, they can seek approval from the GIST Director of Undergraduate Studies by sharing the syllabus. No more than 2 such courses may count toward the minor.

Middle East Studies Minor

Why study the “Middle East”? The countries within and neighboring what is commonly referred to as the Middle East continue to play an important role in global affairs and dynamics. The economic and business elements of the region along with its political, cultural, and social realities factor heavily into contemporary world developments. Within such a context, for intrinsic and extrinsic reasons, there are strong reasons to focus one’s study on this area of the world. KU combines education in Arabic, Persian, Turkish, and Hebrew with a rich selection of courses on or related to the region, including courses in Islamic studies, language, culture and art, history, and contemporary social and political dynamics. The minor also complements many majors within the College as well as other degrees across the University. The area’s languages and knowledge of cultures, society, and politics in the region can prepare students for careers in business and the private sector, foreign or civil service, or jobs with non-profit organizations.

Requirements for the Minor

Electives 12

These courses allow students to deepen their knowledge of the countries and issues in the region. Students must take at least one course from each emphasis—i.e. social science and humanities, as listed below—but can choose to take three courses from one emphasis and one from the other or take two from each.

Regularly offered and upcoming elective options are:

Social science emphasis: (minimum 3 credit hours)

- ANTH 303 Peoples and Cultures of North Africa and the Middle East
- ANTH 372 Religion, Power, and Sexuality in Arab Societies
- GIST/POLS 433 Iran, Turkey, and the Kurds
- GIST 624 Social Movements in the Middle East
- JWSH 329 Israeli-Palestinian Conflict: An Introduction
- JWSH 410 Israel: From Idea to State
- JWSH 414 Israel/Palestine: The War of 1948
- JWSH 420 Politics and Government in Israel
- JWSH 426 Politics and Public Opinion in Israel
- JWSH 440 International Relations of the Middle-East
- JWSH 681 Regimes in the Middle East and North Africa
- POLS 361 Politics of the Middle East
- POLS 371 United States Foreign Policy
- POLS/GIST 667/SOC 640 Islam and Politics
- or POLS 467 Islam and Politics
- or GIST 467 Islam and Politics
- SOC 532 Sociology of the Middle East

Humanities emphasis: (minimum 3 credit hours)

- AAAS 102 Arabic and Islamic Studies
- AAAS 415 Women and Islam
- AAAS 433 Islamic Literature
- AAAS 543 Language and Culture in Arabic-Speaking Communities
- AAAS 545 Unveiling the Veil
- GIST/SLAV 205 Muslim Lives: Politics, Culture, and Society
- GIST 535 Literature and Society in the Contemporary Middle East
- HIST 327 The Premodern Middle East
- HIST 328 The Modern Middle East
- HIST 480 Travellers’ Tales of the Middle East
- HIST 481 From Harem to the Streets: Gender in the Middle East, 1900-Present
- HIST 570 The Middle East After World War II
- JWSH 382 Jerusalem Through the Ages
- REL 355 Muslim Societies

Language Option: A student pursuing a Middle East Studies minor may also use one 300-level or above ARAB, PERS, TURK, or HEBR language course as an elective that counts toward three credit hours of “Humanities emphasis.”

**Undergraduate Certificate in Persian Language and Cultures**

The certificate in Persian Language and Cultures provides students an avenue to exemplify their investment in knowledge and skills of this critical language and its cultures--Farsi, Tajik, and Dari. Students can pair this certification with overlapping courses in majors such as Global & International Studies, African & African American Studies, or the Middle East Studies minor. The certificate is also a convenient way to demonstrate language and culture credentials for students in the professional schools, like engineering, journalism, or business. Please contact the undergraduate advisor for Global & International Studies for more information.

Master of Arts in Global and International Studies

Master of Arts in Global and International Studies

The M.A. in GIST provides an analytically sophisticated understanding of the contemporary global arena and cultivates the skills and knowledge to operate in a world where traditional boundaries are disappearing. Through the 30-credit hour program, students develop a specialization in a world region and can pursue interests in global politics, society, and culture across a broad range of courses in the humanities and social sciences.

Students in Global and International Studies have access to courses by top-notch research faculty across a wide variety of relevant disciplines at KU’s main campus in Lawrence (http://www.ku.edu/). Besides access to quality instruction and content, our students have access to the amazing international resources that put KU on the top shelf for students interested in learning and studying abroad. Our students have access to courses in more than 40 foreign languages, and local, national, and international internship opportunities.

"Traditional" Master's Track

The self-tailoring and interdisciplinary field of Global and International Studies prepares graduate students with marketable skills (such as professional certification opportunities and research and writing skills) and the knowledge to deal with contemporary global issues. This is critical in our contemporary world in which both problems and opportunities increasingly transcend national boundaries.

KU's Master of Arts in Global and International Studies (https://global.ku.edu/masters/) is designed for those who seek a better understanding of international issues that shape public policy and the global economy and who want to have an impact in these areas.

There are three options for area studies concentrations in the "Traditional" Master's Degree: Global & International Studies (https://global.ku.edu/ma-global-international-concentration/), Latin American & Caribbean Studies (https://global.ku.edu/ma-latin-american-caribbean-concentration/), or Contemporary East Asian Studies (https://global.ku.edu/ma-contemporary-east-asian-concentration/).

Interagency Studies Concentration

The Interagency concentration (https://global.ku.edu/isp-masters/) of the Master’s degree program in Global and International Studies is a one-year program designed exclusively for military personnel pursuing their Intermediate Level Education (ILE) program at the Command and General Staff College (CGSC) at Ft. Leavenworth.

The objective of the Interagency Studies Program (ISP), is to prepare military officers for working in interagency environments by expanding their abilities to conceptualize and address issues beyond their military training. The program offers coursework from multiple disciplines with an array of theoretical frameworks.

KU courses are held primarily at the KU Ft. Leavenworth campus, along with courses at the Command General Staff College and at the KU Lawrence campus. Classes are primarily offered in the evening and run the length of the academic year - three courses August-December, three courses January-April, and two courses May-June.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Applications for the traditional M.A. program are accepted for each term. Please see the traditional MA (https://global.ku.edu/masters/) and I (https://coms.ku.edu/admissions/ISP admission (https://global.ku.edu/isp-masters/) pages for more information about the admission requirements, deadlines, and processes, as well as for contact information for the admissions program coordinator.

M.A. Degree Requirements

The M.A. degree in Global and International Studies requires the completion of a minimum of 30 graduate credit hours. There are three options for concentration: Global & International Studies, Latin American and Caribbean Studies, or Contemporary East Asian Studies.

Global and International Studies Concentration

All students pursuing the Global and International Studies Traditional Concentrations complete the following components: 1) Core Courses; 2) Regional Specialization Cluster; 3) Topic Specialization Cluster; 4) Language; and 5) Final Assessment (thesis, research project and oral exam option, or written and oral exam options).
1) Core Courses: All students complete 9 hours of core courses at the 700 level:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GIST 701</td>
<td>Approaches to International Studies</td>
<td>3</td>
</tr>
<tr>
<td>GIST 702</td>
<td>Globalization</td>
<td>3</td>
</tr>
<tr>
<td>GIST 710</td>
<td>Research Design for International Area Studies</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the 9 hours of specific requirements, students must then complete 18 credit hours of electives at 700 level or above. These electives form 2 coherent clusters of 9 credit hours each.

2) Regional Specialization Cluster:
This cluster of 9 credit hours will give students focused knowledge about a selected region of the world. Up to 3 language courses (9 hours) at or above the 500 level may also count toward this requirement. Specific courses must be selected in consultation with an advisor.

3) Topic Specialization Cluster:
This cluster of 9 credit hours will focus on a topic specialization approved by the student's advisor. Students can choose current global and international themes, or they can select an existing graduate certificate program offered by another department. Certificate options or specific courses should be selected in consultation with an advisor.

4) Language Requirements:
For all students, the M.A. degree also requires evidence of current competence (equivalent to 2 years of successful college-level study) in a modern spoken and written language other than their native tongue; courses taken to complete this requirement generally do not count toward the degree. Students must meet all general requirements as well as program requirements.

5) Final Assessment
All students must have a final assessment component with an oral exam. This can be as part of a thesis option or as part of a research project and oral exam option or written and oral exam option.

Thesis Option
Students electing to write and defend a thesis must have their thesis project proposal approved by their thesis advisor prior to enrolling in GIST 898 Thesis and Research Project Writing. Students choosing the thesis option must complete GIST 898. If students have additional needs for thesis work beyond GIST 898, they are able to take additional thesis hours (GIST 899) to complete their research. For guidelines and policy regarding the thesis, please consult the GIST graduate student handbook.

Research Project and Oral Exam Option
Students selecting this option are required to take GIST 898 and complete a research project of more limited scope and scale than a thesis, and the project will be followed by an oral exam. For guidelines and policy regarding the research project option, please consult the GIST graduate student handbook.

Written and Oral Exam Option
Students choosing this option must take an additional 3 credit hours, corresponding to one of their 2 coherent elective clusters. In the final semester, the student must successfully complete a written examination on the core course content (GIST 701 and GIST 702) and the student's regional and substantive areas of focus. This is followed by an oral exam. Students considering this option must consult the graduate director first. For guidelines and policy regarding the written and oral exam option, please consult the GIST graduate student handbook.

Interagency Degree Requirements
The Interagency Studies Program (ISP) is a unique concentration within the GIST master's degree for students in the Intermediate Level Education (ILE) program at the Command and General Staff College (CGSC) at Ft. Leavenworth. The curriculum combines coursework from KU and from the ILE program. Students who complete the ILE program at CGSC are approved for a reduced credit hour master's degree at KU, allowing them to complete the Global & International Studies master's with a minimum of 24 graduate credit hours.

Below are the KU courses that a student can typically expect to take.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GIST 624</td>
<td>Social Movements in the Middle East</td>
<td>3</td>
</tr>
<tr>
<td>GIST 678</td>
<td>Chinese Foreign Policy</td>
<td>3</td>
</tr>
<tr>
<td>GIST 702</td>
<td>Globalization</td>
<td>3</td>
</tr>
<tr>
<td>GIST 751</td>
<td>Human Rights and U.S. National Security</td>
<td>3</td>
</tr>
<tr>
<td>GIST 752</td>
<td>International Conflict Prevention and Resolution</td>
<td>1</td>
</tr>
<tr>
<td>GIST 783</td>
<td>Theories of Conflict, Security and Peace</td>
<td>3</td>
</tr>
<tr>
<td>GIST 810</td>
<td>Graduate Writing Experience</td>
<td>2</td>
</tr>
<tr>
<td>POLS 782</td>
<td>Transnational Terrorism</td>

<tr>
<td>or HIST 810</td>
<td>Colloquium in Nationalism Studies</td>
<td></td>
</tr>
<tr>
<td>PUAD 854</td>
<td>Innovation and Organizational Change</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 24

Final Examination
The program culminates with a final paper demonstrating the application of program knowledge to a military (preferably interagency) issue, which can be submitted to relevant journal outlets in military studies.

Latin American & Caribbean Studies Concentration
All students complete 9 hours of core courses at the 700 level:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GIST 701</td>
<td>Approaches to International Studies</td>
<td>3</td>
</tr>
<tr>
<td>LAA 701</td>
<td>Interdisciplinary Seminar in Latin American Culture and Problems</td>
<td>3</td>
</tr>
<tr>
<td>LAA 710</td>
<td>Research Design for International Area Studies</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses: 15-18

4 courses (12 hours) of the electives must be at the 700-level or above. GIST 702 is strongly recommended.

3 courses (9 hours) must be LAC or crosslisted courses.
9 hours (3 courses) must constitute a “Topic Specialization” designed to prepare the student for the thesis/comparative research paper. The specialization cluster may be in a topic/issue, in a geographical area, in a particular discipline, etc., and is designed in consultation with the student’s advisor and approved by the Director of Graduate Studies.

Elective hours can include 2 semester of a 3rd language that is a less commonly taught language in LAC. These courses must be 500 level or above to count toward the 30 hours of required graduate courses.

**Thesis/Research Hours** 3-6

Thesis (6 hours) or Comparative Research Paper (3 hours). GIST 898 is strongly recommended for students opting to complete a thesis and counts toward the thesis hour requirement.

At least 50% Latin American/Caribbean content.

**Language Proficiency**

M.A. candidates must demonstrate comprehensive proficiency in Spanish or Portuguese. This includes aural, speaking, reading, and writing ability. Completion of SPAN 424 and SPAN 428 or a higher-level course constitutes comprehensive proficiency in Spanish. Comprehensive proficiency in Portuguese requires completion of a 500-level or higher literature course.

The language requirements should be satisfied as early as possible. Students also must complete two semesters in a second language (SPAN 104 and SPAN 108; PORT 104 and PORT 108), or the equivalent (e.g. PORT 611). Quichua, Kaqchikel Maya, or Haitian Creole may be substituted as the language of reading proficiency with approval of the director.

**Contemporary East Asia Concentration**

All students complete 12 hours of core courses at the 700 level or above:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GIST 701</td>
<td>Approaches to International Studies</td>
<td>3</td>
</tr>
<tr>
<td>CEAS 701</td>
<td>Professionalization Seminar in East Asian Studies</td>
<td>3</td>
</tr>
<tr>
<td>CEAS 710</td>
<td>Research Design for International Area Studies</td>
<td>3</td>
</tr>
<tr>
<td>CEAS 898</td>
<td>Thesis and Research Project Writing</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

World Region: 3 courses with contemporary East Asian Content 9

Topic Specialization: 3 courses must cluster in topic/issue 9

Electives must conform to the following specifications and should be selected in consultation with an advisor:

- At least four courses must contain CEAS approved East Asian content courses
- No more than three elective courses can be in a single discipline
- Two advanced East Asian language courses can be included (500 or higher).

**Language Requirement**

Proficiency in an East Asian language is not required for admission to this program, but proficiency at the second level (intermediate) is required for the degree. Credit earned in introductory and intermediate language courses will not count toward the 30 hours required. If such courses are taken after admission, they will add substantial time to the program.

Students who plan to continue to move on to a Ph.D. program are strongly encouraged to pursue language at the third level.

**Additional Curriculum Requirements**

Along with completing required coursework and meeting the language requirement, students must fulfill the following requirements:

1. Prepare a publishable research paper (25-30 pages)
2. Successfully pass an oral defense of that paper to the satisfaction of an M.A. examination committee
3. Submit your paper to an academic journal(s) to be considered for publication

The purpose of the M.A. research paper requirement is to train students in writing, conceptualization, research, and presentation of the subjects in their area of specialization in social science.

**Department of History**

Studying history at the University of Kansas will expand your mind. Our course offerings introduce students to medieval witches and Samurai warriors, conspiracy cranks and Native American prophets, Chairman Mao and the Black Panthers. Students can take courses on the history of sexuality, or, if that isn’t exciting enough, courses on natural disasters, wars, and plagues. With 29 tenured and tenure-track faculty, the Department of History covers the globe.

But studying history is more than just an entertaining adventure. Training in historical research, analysis, and writing develops skills that are essential in our information economy, and this preparation is especially useful to students planning to pursue graduate training and careers in law, public policy, journalism, education, and a universe of other possibilities, as our recent undergraduate and graduate alumni throughout the world can attest.

The Department of History at KU offers an outstanding undergraduate program (https://history.ku.edu/undergraduate/) with approximately 250 History majors and minors. These students are taught by faculty who consistently win awards for their teaching as well as their research. Beyond the introductory level, class sizes are small, including two required seminars that are capped at fifteen students each, and the optional Senior Honors Thesis, which features direct one-on-one advising with a faculty mentor.

Our graduate program (https://history.ku.edu/degrees/) has consistently ranked in the top 25 among public research universities. With an average of 35 graduate students enrolled, we are primarily a doctoral program, granting Ph.D. degrees in geographical areas such as the United States, Europe, Asia, Africa, the Middle East, and Latin America, as well as in thematic fields such as military, environmental, and gender and sexuality. Recent Ph.D. recipients have gone on to tenure-track positions at research universities, liberal arts colleges, junior colleges, and a variety of careers in other sectors.

Finally, faculty in the Department of History are nationally and even internationally known for their research. The books and articles they have published just in the last two years are too numerous to list here, but you can scroll through the faculty page (https://history.ku.edu/faculty/) to gain a sense of their significance shaping our knowledge about the world. Their productivity plays an important role in helping KU maintain its position in the prestigious American Association of Universities.
Take some time to search through our website (https://history.ku.edu/). You’ll find information about our programs, our courses, and our prolific faculty, and you can hear the voices of undergraduates and graduate students who have passed through the Department. Please feel free to contact (https://history.ku.edu/contact/) any of the administrative staff, faculty, and faculty officers with your questions.

Undergraduate Programs

The Department of History at the University of Kansas is particularly distinguished in undergraduate teaching and mentorship. The Department is a recipient of the Excellence in Undergraduate Advising Award from the College of Liberal Arts and Sciences and ranks well above the University average in student evaluations. Many History faculty members have won individual awards for their teaching including, the Kemper Prize and Distinguished Professor awards.

- Politics, sex, art, labor, food, fashion, and rebellion--the Department of History examines the past from a wide range of perspectives. In our teaching and research, faculty are committed to recovering and centering voices of people whose historical experiences have been marginalized through systemic racism, gender and sex prejudice, and class bias.

- Our Faculty (https://history.ku.edu/faculty/) are nationally and internationally recognized leaders in their field, and they bring this advanced knowledge into the classroom. We have strong connections to interdisciplinary work in African and African-American Studies, Environmental Studies, Indigenous Nations Studies, and Women, Gender, and Sexuality Studies programs.

- Resources for historical research at KU are rich. Watson (https://lib.ku.edu/locations/watson/) and Anschutz (https://lib.ku.edu/locations/anschutz/) libraries help make up a major research library collection, and the Spencer Library (https://spencer.lib.ku.edu/) offers such resources as the Wilcox Collection on extremist politics, the University Archives.

Courses for Nonmajors

The department welcomes nonmajors in all of our courses and offers a variety of cross-listed classes. Nonmajors may enroll in History courses at any level.

Graduate Programs

The Department of History (http://history.ku.edu/) at the University of Kansas is a dynamic place, with a proud tradition of training scholars from across the globe who have transformed the practice of history. The program offers major or minor concentrations in the areas of United States, African American, Modern European, British & Imperial, Russian/ East European, East Asian, Latin American, African, Medieval, Women and Gender, Military, and Environmental History. KU offers its graduate students great flexibility in their choice of fields, as defined both by traditional geographical and chronological parameters and thematic topics. Students also have the opportunity to take coursework outside the department in fields such as Public History, Museum Studies, Environmental Studies, and the History of Medicine.

Primarily a doctoral program, the Department currently enrolls approximately 80 graduate students from throughout the United States and the world, including Japan, China, Peru, and Russia. Our students make up a very diverse group, and we encourage applicants from traditional and non-traditional backgrounds.

Students who are interested in enrolling in graduate level coursework in the Department of History without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (https://history.ku.edu/ma/) webpage for further details.

For statistics regarding our program, please see our Doctoral Program page (https://history.ku.edu/phd/), which demonstrates our success at funding and placing current and recent graduates.

Courses

HIST 101. Introduction to Western History: _____. 3 Credits. HT H

An introduction to the study of history focusing on a topic in Western History. The course will expose the student to the major issues and methods of historical study through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. This course grants HIST Category I credit.

HIST 102. Introduction to History, Honors: _____. 3 Credits. HT H

An introduction to the study of history. The course will expose the student to the major issues and methods of historical study. This will be done through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. Prerequisite: Membership in the College Honors Program or consent of department.

HIST 103. Environment and History. 3 Credits. H

Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as EVRN 103.)

HIST 104. Introduction to African History. 3 Credits. NW H/W

An introduction to important historical developments in Africa. Topics include empires, kingdoms, the slave trade, European colonialism, liberation movements, national identities, and a return to independence. (Same as AAAS 105.)

HIST 105. Introduction to Ancient Near Eastern and Greek History. 3 Credits. NW H/W

A general survey of the political, social, and economic developments of Mesopotamia, Egypt, Asia Minor, and Greece from Paleolithic times to 323 B.C. (Same as CLSX 105.)

HIST 106. Introduction to Roman History. 3 Credits. H/W

A general survey of the political, social, and economic developments of ancient Rome from 753 B.C. to 475 A.D. (Same as CLSX 106.)

HIST 107. Introduction to the Ancient World. 3 Credits. H

This course covers the history of the ancient Near East, Greece and Rome with emphasis on the origins of agriculture, writing, cities, empires, and democracy. Students will be introduced to schemes of interpretation, critical readings, and analysis, primary sources, and evaluation of evidence.

HIST 108. Medieval History. 3 Credits. HT H/W

The history of Europe from the Barbarian Invasions to the beginning of the 16th century.

HIST 109. The Black Experience in the Americas. 3 Credits. HT H/W
An interdisciplinary study of the history of the African peoples of the New World, relating their cultures and institutions to the African background and to their peculiar New World experiences up to and including the nineteenth century. While the main emphasis is on the U.S.A., attention is also paid to the Caribbean and Latin America. Approaches include demography, economics, social and political developments, literature, and music. (Same as AAAS 106.)

HIST 110. Introduction to Non-Western History: ______. 1-3 Credits. H
An introduction to the study of history focusing on a topic in non-Western History. The course will expose the student to the major issues and methods of historical study through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. This course grants HIST Category II credit.

HIST 112. Introduction to British History. 3 Credits. H
This course will introduce students to the concepts, issues, and methods of historical study, at the same time as it explores the main processes and events which shaped the history of Britain and its imperial dependencies. Students will be introduced to the nature and validity of different historical interpretations, and to the purpose and merit of historical writings.

HIST 114. Renaissance to Revolution: Europe 1500-1789. 3 Credits. HT H/W
An introduction to early modern European history, with emphasis on the cultural, political, economic, and cultural forces which have helped to shape the modern world. The renaissance, the rise of nation states, the Reformation, absolutism and constitutionalism, the Enlightenment, and the coming of the French Revolution.

HIST 115. French Revolution to the Present: Europe 1789-Present. 3 Credits. HT H/W
An introduction to recent European history, with emphasis on the social, political, economic, and cultural forces which have helped to create the Europe of today: the French Revolution, the romantic movement, the revolutions of 1848, nationalism, imperialism, Communism, and two World Wars, the cold war, and its aftermath.

HIST 117. Russia, An Introduction. 3 Credits. HT H/W
This course introduces students to the history of Russia from its beginnings to the present. It explores Russia's ethnic and religious diversity, the relationship between the state and its peoples, the geopolitics of its place between Europe and Asia, and the revolutionary movements that shook Russia and shaped the world around it.

HIST 118. Premodern East Asia. 3 Credits. NW H/W
A survey of the premodern history of China, Japan, Korea, and other cultures in East Asia. Students are introduced to the major currents of East Asian history and historical methods used to study them. Not open to students with credit in upper division East Asian history.

HIST 119. Modern East Asia. 3 Credits. NW H/W
A survey of the modern history of China, Japan, Korea, and other cultures in East Asia. Students are introduced to the major currents of East Asian history and historical methods used to study them. Not open to students with credit in upper division East Asian history.

HIST 120. Colonial Latin America. 3 Credits. NW H/W
The principal focus is on the evolution and analysis of societies, economies, and religions of native American peoples, the impact of Spanish and Portuguese conquests and settlement, government, trade and culture upon native civilizations, the influence of African population and culture, and the creole nature of the resulting society in the colonial period. Changes in the society and economy which presaged the movements for independence are also discussed.

HIST 121. Modern Latin America. 3 Credits. HT W
A survey of Latin America since the 1800s. Students will examine the emergence of national identities and the processes of modernization and globalization in the region. The course also examines how race, social structures, and politics evolved after independence in the region, giving particular attention to the legacies of colonialism. Course readings and lectures highlight unique national experiences and continuities across the region. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students who have taken HIST 315.

HIST 124. Latin American Culture and Society. 3 Credits. SC S
An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with a basic knowledge base for understanding Latin America today. (Same as LAC 100.)

HIST 125. The History of Global Capitalism. 3 Credits.
What is capitalism? Where did it come from? Where is it going? How has it shaped people's lives over the last six centuries? This course explores the spread and development of global capitalism from its origins in the expansion of European seaborne empires to Africa, Asia and the Americas in the fifteenth century to the global economic crisis of 2008. We will examine the many forms of capitalism that have emerged over five centuries, including merchant capitalism, industrial capitalism, slave-based capitalism, war capitalism, financial capitalism, casino capitalism, and state-run capitalism. We will learn about the revolutionary economic and social changes, the technological inventions, and the intellectual frameworks that helped drive the expansion of this relentlessly adaptive economic system. We will pay close attention to the impact that capitalism had on the material realities of everyday life and on the lived experiences of the forced and free workers in capitalist economies. We will explore how capitalism—a constructed reality—has shaped and reshaped politics, the natural world and people's core beliefs about human nature, human rights, and the meaning of life.

HIST 128. History of the United States After the Civil War. 3 Credits. HT H
A historical survey of the United States from the peopling of the continent through the Civil War. This survey is designed to reflect the diversity of the American experience, to offer the student a chronological perspective on the history of the United States, and to explore the main themes, issues, ideas, and events which shaped that history.

HIST 129. History of the United States After the Civil War. 3 Credits. HT H
A historical survey of the American people from Reconstruction to the present. This survey is designed to reflect the diversity of the American experience, to offer the student a chronological perspective on the history of the United States, and to explore the main themes, issues, ideas, and events that shaped American history.

HIST 139. The Global Cold War. 3 Credits. H
This course provides an immersive introduction to the global Cold War and its legacies. It explores how the contest between capitalism and communism unfolded not only in the United States and the Soviet Union, but also in Asia, Africa, Europe, Latin America, and the Middle East. Through interactive lectures, discussions, and role-playing games, students will learn to "think globally," gain an understanding
of imperialism, nationalism, and decolonization, and discover how the Cold War shaped culture, economics, politics, the environment, and the international system in ways that remain relevant today. (Same as GIST 139.)

**HIST 140. Global Environment I: The Discovery of Environmental Change. 3 Credits. U LFE**
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 140 and GEOG 140.)

**HIST 142. Global Environment II: The Ecology of Human Civilization. 3 Credits. U**
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 142 and GEOG 142)

**HIST 144. Global Environment I: Discovery of Environmental Change, Honors. 3 Credits. U LFE**
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 144 and EVRN 144.) Open only to students admitted to the University Honors Program or by permission of instructor.

**HIST 145. Global Environment II: The Ecology of Human Civilization, Honors. 3 Credits. U**
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 145 and GEOG 145.) Open only to students admitted to the University Honors Program or by permission of instructor.

**HIST 150. Introduction to Food History: Around the World in Eight Dishes. 3 Credits. H**
Foods and drinks such as chocolate, coffee, curry, and olive oil have changed the world in ways that transcend national boundaries; this course follows their stories tracing routes of imperialism and globalization while attentive to the impact of these foods on indigenous peoples. Each week offers new foods and new discoveries drawing from cases globally to ask why people choose certain foods, what that says about their culture, and how foods and drinks have changed historically. Besides learning how food can be a window to history and gaining an introduction to the interdisciplinary methodology of food studies, this course will help you understand the consequences of what you eat in terms of your own body, the environment, and communities a world away.

**HIST 160. Introduction to West African History. 3 Credits. W**
This course treats West African history through the first part of the twentieth century. The student is provided with a perspective on the major historical patterns that gave rise to West Africa’s development as an integral part of world history. Special attention is paid to anthropological, geographical, and technological developments that influenced West African political and socioeconomic changes. (Same as AAAS 160.)

**HIST 177. First Year Seminar:_____ 3 Credits. HT**
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in history. May not contribute to major requirements in history. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**HIST 201. Writing the Past-Category I/Western Topics:_____ 3 Credits. H**
Many of the words that human beings have written down in one form or another have been stories of events, people, and places from the past. History is a story of countless people-some famous, many anonymous-who have made up the human past. This course will introduce students to the basic skills of analytical, descriptive, and narrative writing and reading through the lens of history. Students will learn how to develop a voice of their own as writers and build a toolkit of skills that will help them effectively communicate in writing, in their course work and careers. This course will cover topics that will fulfill the Category I/Western requirement of the History major.

**HIST 202. Writing the Past-Category II/Non-Western Topics:_____ 3 Credits. H**
Many of the words that human beings have written down in one form or another have been stories of events, people, and places from the past. History is a story of countless people-some famous, many anonymous-who have made up the human past. This course will introduce students to the basic skills of analytical, descriptive, and narrative writing and reading through the lens of history. Students will learn how to develop a voice of their own as writers and build a toolkit of skills that will help them effectively communicate in writing, in their course work and careers. This course will cover topics that will fulfill the Category II/Non-Western requirement of the History major.

**HIST 203. Speaking the Past-Category I/Western Topics:_____ 3 Credits. H**
This seminar offers students the opportunity to learn about a specific theme or topic in history through the development of their verbal communication skills. A variety of scaffolded assignments will introduce students to the essential elements of interpersonal and public speaking, provide opportunities to practice their performances and receive constructive feedback, and hone their organizational and critical-thinking skills. In doing so, they will achieve a deeper understanding of an important aspect of the past. Specific historical topics will be determined by individual instructors. This course will cover topics that will fulfill the Category I/Western requirement of the History major.
HIST 204. Speaking the Past-Category II/Non-Western Topics: _____ 3 Credits. H
This seminar offers students the opportunity to learn about a specific theme or topic in history through the development of their verbal communication skills. A variety of scaffolded assignments will introduce students to the essential elements of interpersonal and public speaking, provide opportunities to practice their performances and receive constructive feedback, and hone their organizational and critical-thinking skills. In doing so, they will achieve a deeper understanding of an important aspect of the past. Specific historical topics will be determined by individual instructors. This course will cover topics that will fulfill the Category II/Non-Western requirement of the History major.

HIST 230. Sex, Gender, Film, and History 3 Credits. H
In the second half of the 20th century, Americans struggled over sex and gender-and both their behaviors and beliefs changed dramatically, though not without controversy. In this class, we use mainstream, popular American films produced during this volatile era to analyze historical understandings of gender identity and appropriate sexual behaviors in post-WWII American society. This course is also an introduction to the study of history: students will work extensively with film and other primary documents, and will analyze different scholarly interpretations of the same set of events.

HIST 231. War and 20th Century U.S. Culture 3 Credits. H
This course analyzes the “cultural construction” of war in 20th century America by focusing primarily on World War II and the Vietnam War. How have Americans attempted to come to terms with the wars they have fought? How have Americans’ cultural understandings shaped the wars they have waged? How have Americans used various cultural forms (film, music, photography, etc.) to support a war effort or to protest against it? We pay special attention to the place of the military in American society, to notions of patriotism and citizenship, to constructions of gender, race, and sexuality, and to the roles of government, media, technology, and public opinion.

HIST 250. Study Abroad Topics in: _____ 1-5 Credits. H
This course is designed for the study of special topics in History at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

HIST 285. Headless Men: Conquest and Cultural Exchange Before the Age of Exploration 3 Credits. HL H
In fourteen hundred and ninety-two, Columbus sailed the ocean blue. But what happened before Columbus’ great journey? And, more to the point, why did he and his contemporaries feel entitled to simply claim whatever land they found? This course proposes to explore the medieval experiences of cultural and racial Otherness in order to better understand the roots of some of the assumptions about difference (interpersonal, intercultural, and international) that continue to play out in American society today. Taught in English. (Same as FREN 285.)

HIST 300. Modern Africa 3 Credits. NW H/W
A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 305.)

HIST 301. The Historian’s Craft 3 Credits. H
This course introduces students to the practice of history and serves as the foundation to the major. HIST 301 focuses on the development of the core concepts and skills of our discipline: the construction of compelling historical questions and the practice of gathering evidence in support of answers and convincing arguments. The course trains students to think like historians, equipping them with skills in research, critical analysis, argument construction, and written expression. Students learn the value and function of primary and secondary sources and to recognize the variety of modes of historical production in our daily lives. Students will also gain practice with “historical thinking” and examine how to apply the same techniques of critical analysis to contemporary issues and debates. This course is required of all history majors. Prerequisite: Completion of KU Core 2.1 and recommended completion of KU Core 2.2. Open only to declared History majors or by consent of instructor.

HIST 303. Sin Cities 3 Credits. H
This course offers a comparative global introduction to the history of the modern city by looking at the ways in which certain metropolises developed an attractive underbelly of decadence at the same time as they sought to be centers of refined and orderly cosmopolitan life. The course examines topics such as popular culture, gambling, prostitution, crime, violence, nightlife, tourism, and corruption in the context of the increased social mobility that characterized the beginning of the industrial age and that has extended into the 21st century. Students investigate the changing relationship between work and leisure, spectacle and consumerism, and urban space and the struggle for order.

HIST 304. 1642, 1688, 1776: Three British Revolutions 3 Credits. H
Explains and analyzes the three revolutions in the English-speaking world which, more than any others, are held to have laid the foundations of modernity. Themes discussed include social, intellectual, and political developments, structures, and conflicts. 1642 and 1688 are treated in the setting of England’s relations with Scotland and Ireland, and against the background of European wars of religion. 1776 is analyzed in a transatlantic context as a civil war within the wider British polity.

HIST 305. Technological Revolutions and Global Transformations 3 Credits. H
This course focuses on the social, political, and technological changes that contributed to and arose out of the Industrial Revolution of the eighteenth and nineteenth centuries, the Technological Revolution of the nineteenth and twentieth centuries, and the Information Revolution of the late twentieth and twenty-first centuries. By contextualizing these historical events as global phenomena within the history of technology, we will analyze how the invention of labor saving devices arose out of and shaped growing transnational networks, how new industrial devices and processes became tools of imperial exploitation, and how post-colonial states grappled with the legacy and challenges of these various “revolutions.”

HIST 307. Modern Africa, Honors 3 Credits. NW H
An intensive version of HIST 300. A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 307.) Prerequisite: Open only to students admitted to the University Honors Program, or by consent of the instructor.

HIST 308. Key Themes in Modern Global History 3 Credits. H
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as GIST 308.)

HIST 312. American Culture, 1877 to the Present 3 Credits. H
An examination of the major historical shifts, trends, and conflicts that have shaped the multicultural nature of life in the United States from
1877 to the present. In addition to tracing developments in literature, architecture, drama, music and the visual arts, this course investigates patterns and changes in the popular, domestic, and material culture of everyday life in America. (Same as AMS 312.)

HIST 313. Conspiracies and Paranoia in American History. 3 Credits. H
The theme of conspiracy is a recurring motif in American history. This course uses a case-study method to revisit episodes such as the Salem witch trials, the movement against freemasonry, the Slave Power conspiracy, and more recent obsessions such as UFOs and the assassination of John F. Kennedy to explain why so many Americans have embraced conspiracy theories to explain mysterious events and dramatic social change. The course will rely on primary accounts, fiction, and film, as well as secondary historical literature, to examine both "real" and "imaginary" conspiracies and their effects on the politics, culture, and society of the United States.

HIST 314. Globalization: History and Theory. 3 Credits. H
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as LAC 314.)

HIST 315. Modern Latin America. 3 Credits. H
A survey of Latin America since the 1800s. Students will examine the emergence of national identities and the processes of modernization and globalization in the region. The course also examines how race, social structures, and politics evolved after independence in the region, giving particular attention to the legacies of colonialism. Course readings and lectures highlighting unique national experiences and continuities across the region. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students who have taken HIST 121. (Same as LAC 320.)

HIST 316. Ministers and Magicians: Black Religions from Slavery to the Present. 3 Credits. H
This course examines the history and diversity of African American religious expression from slavery until the present, emphasizing both mainstream and alternative faiths. It covers the religious world views of enslaved Africans, and examines faiths inside and outside of Christianity. Topics may include: independent black churches, magical practices, the Holiness and Pentecostal movements, black Islam, religious freemasonry, and esoteric faiths. The class emphasizes the influence of gender, class, race, migration, and urbanization on black religion. (Same as AAAS 316 and AMS 316.)

HIST 318. Indian Territory. 3 Credits. H
This course examines the cultural, social, economic, environmental, and political background of Indian territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HUM 345 and ISP 345.)

HIST 319. History, Women, and Diversity in the U.S.. 3 Credits. H
This survey course explores the history of being female in America through a focus on the ways differences in race, sexuality, ethnicity, class, and life cycle have shaped various aspects of women's lives. Themes to be explored could include, but are not limited to: social and political activism; intellectual developments; family; women's communities; work; sexuality; and culture. (Same as WGSS 319.)

HIST 320. From Goddesses to Witches: Women in Premodern Europe. 3 Credits. HT H
This course examines the social, cultural, and political contexts of women's spirituality and their relations to gender relations in Europe from about 30,000 B.C.E. to the 16th century Protestant Reformation. Lectures move both chronologically and topically, covering such subjects as goddess-worshiping cultures, women's roles in Christian and Jewish societies, symbols of women, and male attitudes toward women. Students will be able to participate in weekly discussions of primary and secondary source readings about women. (Same as WGSS 320.)

HIST 321. From Mystics to Feminists: Women's History in Europe 1600 to the Present. 3 Credits. HT H
This course will take students on the first part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The first part of this two course sequence begins in the colonial period and ends around 1900 as modern categories of sexuality and sexual orientation came into existence. We will examine the ways in which individuals who craved intimacy with members of the same sex understood and negotiated their desires in an often hostile world. And we will consider how Early America's remarkable diversity shaped this history of same-sex love and desire. (Same as WGSS 321.)

HIST 322. LGBTQ U.S. History, 1600-1900. 3 Credits. H
This course will take students on the second part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The second part of this two course sequence focuses on the twentieth and twenty-first centuries. We will examine the changing understanding of non-normative sex, love, and desire; the political tactics, framings, and fights around sexual identities and rites; and the intersection of structural inequalities including, but not limited to, race, class, ability, and gender with LGBTQ histories. Please note that WGSS 322 or HIST 322 is not a prerequisite for WGSS 323 or HIST 323, though students interested in LGBTQ history should consider taking both. (Same as WGSS 323.)

HIST 324. History of Women and the Body. 3 Credits. H
This course examines different notions about women and their bodies from a historical perspective. It discusses the arguments and circumstances that have shaped women's lives in relation to their bodies, and women's responses to those arguments and circumstances. This course covers a wide geographical and chronological spectrum, from Ancient societies to the present, from Latin America and the Middle East, to North America and Western Europe. (Same as WGSS 324.)
HIST 325. The Spanish Inquisition. 3 Credits. H
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as JWSH 315 and SPAN 302.)

HIST 326. Native Americans Confront European Empires. 3 Credits. NW H/W
Since 1492, Native American societies have struggled against European conquest and colonization. This course examines the history of Native American encounters with Europeans and their empires from 1492 through 1800 in North and South America. Native American cultures varied widely as did their interactions with Europeans of diverse nations. Using a comparative framework this course will examine the continuities and differences in indigenous reactions to European imperialism in the Americas. Themes of the course include: conquest, colonialism, religion, and resistance and accommodation.

HIST 327. The Premodern Middle East. 3 Credits. NW H
A survey of the history of the Middle East from the origins of Islam in the seventh century to the rise and consolidation of the Ottoman Empire in the eighteenth century. Lectures and discussions focus on diversity within the Middle East at the height of the Islamic empires. Topics include the life of Muhammad and early Islamic communities, expansion of Islam into Asia, Africa and Europe, intellectual strength in the medieval period, and the everyday lives of women, Christians, Jews and other minority groups.

HIST 328. The Modern Middle East. 3 Credits. W
A survey of the history of the Middle East from 1800 to the present. Lectures and discussions focus on diversity within the Middle East over two centuries of major political and cultural change. Topics include causes for the decline of the Ottoman Empire, debates over modernization, European imperialism and the formation of nation-states, twentieth century cultural revolutions and women's activism, the Arab-Israeli conflict, and the revival of Islamic social movements.

HIST 331. Age of Empires-The Atlantic 1400-1800. 3 Credits. H
This course examines the history of empires in the Atlantic World. During this period African, European and Native American empires encountered each other vying for people and territory. These encounters vastly transformed the people and societies of this broad geographic region. Not only did these empires challenge each other, anti-imperial groups including pirates and African maroons actively undermined imperial systems. This course will examine themes of empire in the Atlantic including conquest, enslavement and slave trades, indigenous and African resistance, and independence.

HIST 332. Sex in History. 3 Credits. HT H
This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, "perversions" (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as AMS 323, HUM 332 and WGS 311.)

HIST 333. Eurometro: Visions of the European Metropolis, 1849-1939. 3 Credits. H
This course investigates the interrelated symbols of the European metropolis during the "Age of Great Cities", from the filth of the sewers to the "filthiness" of prostitution. Students investigate gender and class in the metropolis by exploring a few stereotypes: the juvenile delinquent, the woman on the street, and the flaneur. The course format stresses discussion of common texts, including short readings of literature from the period and historical scholarship. Students also analyze contemporary photographs, art, architecture, and advertising.

HIST 334. The Great War: The History of World War I. 3 Credits. H
A historical survey of the causes, course, and consequences of the conflict, 1878-1919, stressing its socio-economic dimensions as well as its political ramifications and military aspects. Considerable use will be made of visual aids. No prerequisites.

HIST 335. History of Jewish Women. 3 Credits. H
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women’s lives in both Jewish and non-Jewish society. (Same as JWSH 335, WGS 335.)

HIST 336. Ethics, Ideas, and Nature. 3 Credits. H
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state in managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and right ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent in human-centered environmental ethics and nature-centered environmental ethics. (Same as EVRN 336.)

HIST 337. History, Ethics, Modernity. 3 Credits. H
This course will examine how human dignity is preserved and violated in the modern age. Cast in a global framework, themes may include the history of human rights; the moral universe of health and wellbeing; narratives of genocide and collective resistance; the shifting status and treatment of the poor and the colonized; and the impact of changing technology on ethics in medicine, science, and the environment.

HIST 340. The History of the Second World War. 3 Credits. H
A survey of the origins, course, and consequences of the war, 1930-1945. Political, economic, military, and social aspects will be dealt with in the context of their global effects. Extensive use will be made of motion pictures and other media.

HIST 341. Hitler and Nazi Germany. 3 Credits. H/W
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as GERM 341 and JWSH 341.)

HIST 343. The Holocaust in History. 3 Credits. H
The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares
other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as JWSH 343.)

HIST 344. Modern Jewish History. 3 Credits. H
This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of antisemitism and the Holocaust. (Same as JWSH 344.)

HIST 345. Hard Times: The Depression Years in America, 1929-1941. 3 Credits. H
An analysis of the experiences of the American people during the Great Depression. Attention will also be given to the global dimensions of the crisis, socioeconomic dislocation, cultural and institutional change, and the impact of the Asian and European wars.

HIST 347. Environmental History of North America. 3 Credits. H
A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialism, urbanization, and such technologies as the automobile, and the origins of conservation. (Same as EVRN 347.)

HIST 348. History of the Peoples of Kansas. 3 Credits. H
A survey of culture and society in Kansas from prehistory to the present. Topics include Native American life, Euro-American resettlement, Bleeding Kansas and the Civil War, agricultural settlement, urbanization and industrialization, depression and recovery, and modern Kansas in transition. Emphasis in the course will be on social and economic conditions, the experience of ethnic and racial groups, inter-racial relations, and the role of women.

HIST 349. Antisemitism: A Long History. 3 Credits. H/W
This course surveys the genesis, evolution and persistence of antipathy towards Jews and Judaism from late antiquity through the twentieth century, exploring its connections to religious and secular ideologies and its changing nature over time, place, and culture. Using primary source documents, religious and secular art and literature, the mass media and popular expression, the course examines how antisemitism was articulated and implemented, how Jews and Judaism were perceived and represented, and how Jews and Judaism responded to antisemitism. (Same as JWSH 349.)

HIST 350. The Korean War, 1950-1953. 3 Credits. H
An examination of the origins, pattern of development, and legacy of this still unsettled conflict, which in many ways set the tone for the entire post-1945 era of the Cold War. Points of emphasis will include the motives and policies of the major participants (Koreans, Americans, Chinese, and Soviets), as well as the effects of the war on their domestic politics and foreign policy positions.

HIST 351. American Indian and White Relations to 1865. 3 Credits. H
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HUM 348, ISP 348.)

HIST 352. American Indians Since 1865. 3 Credits. H
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HUM 350 and ISP 350.)

HIST 353. Indigenous Peoples of North America. 3 Credits. NW H/W
This course surveys the history of the first peoples to inhabit North America from prehistory to present. Commonly and collectively referred to as American Indians, indigenous peoples include a diverse array of nations, chiefdoms, confederacies, tribes, and bands, each of which has its own unique cultures, economies, and experiences in dealing with colonial and neocolonial powers. This class seeks to demonstrate this diversity while at the same time providing an understanding of the common struggle for political and cultural sovereignty that all indigenous nations face. Indigenous nations that have developed a relationship with the United States will receive primary focus, but comparative reference will be made to First Nations of Canada.

HIST 356. At the Movies: U.S. History on the Silver Screen. 3 Credits. H
The motion picture was invented right here in the United States more than a century ago, and Americans have been going to the movies ever since. Movies have expressed their dreams and nightmares, aspirations and fears, hopes and dreads. Through a wide-ranging study of Hollywood films from the 1920s to the present, including the industry that created them and the people who watched them, this course explores what Americans have seen and felt at the movies.

HIST 357. History of the American West. 3 Credits. H
This course examines major themes in the history of the American West from Columbus to the present. The course includes topics familiar to the American West such as the California Gold Rush and the Battle of Little Bighorn. More importantly, it also offers a way of understanding North American history that is different from that of most U.S. history courses: through the lens of imperial settlement. The course focuses on: 1) cultural encounters between settlers and indigenous peoples as well as among Anglo settlers, the Spanish-speaking populations of the Mexican borderlands, and Asian immigrants to the Pacific Coast; 2) the impact of hunting, logging, ranching, and mining on the environment and the influence of the arid Western environment on human societies; and 3) the cultural symbolism of the American West in literature and film as an enduring national icon and ideology that has shaped settlement and regional history.

HIST 358. The Vietnam War. 3 Credits. H
This course is a survey of the Vietnam War. It covers the early days of Cold War, 1945-54, and all phases of the Vietnam War: the advisory phase (1955-64); the Americanization phase (1965 -68); the Vietnamization Phase (1969-73); and the final phase, the Vietnam Civil War, 1972-75. This course covers the causes, course, conduct, and consequences of the war and in so doing provides a political, military, and social history of the war.
HIST 359. The Black Experience in the U.S. Since Emancipation. 3 Credits. H
An interdisciplinary study of the history and culture of Black people in America from Reconstruction to the present. Topics covered include an analysis of Reconstruction, Black leaders, organizations and movements, the Harlem Renaissance, migration, and race relations. Demographic variables covered include socio-economic class, education, political persuasion, and influence by avant-garde cultural changes. (Same as AAAS 306 and AMS 306.)

HIST 361. Youth, Sex, and Romance in Post-WWII United States. 3 Credits. H
Most people don't think of sex and romance as having a history. And youth seems just a natural stage of life. But the nature of "courtship," the definitions of sex, and the meaning of "youth" have changed dramatically over time, and people struggle over those definitions right up to the current day. In this class we try to make historical sense of those struggles by focusing on a volatile and complicated period in U.S. history: the years from World War II through the recent past.

HIST 362. The American Way of War Since World War II. 3 Credits. H
This course is a survey of American Military History from World War II to current military operations. It covers the Cold War, the Korean War, the Vietnam War, both Persian Gulf wars, the global war on terrorism, and the war in Afghanistan. The course examines the causes, course, conduct, and consequences of the wars and covers advances in technology and doctrine, civil-military relations, foreign policy, and inter-service rivalry, providing a political, military, and cultural history of the wars.

HIST 363. Perspectives on Science, Engineering and Mathematics. 3 Credits. H
This course places the historical creation of scientific and technological knowledge within a broader social, cultural, and political context. Students will learn that the STEM disciplines are not merely a static body of facts, theories, and techniques but involve diverse, evolving processes which are continually generated and reformulated. By examining the role of failure in knowledge creation, the religious motivations behind space exploration, the continued legacy of racist practices in medicine, the construction and ramifications of "Big Science," and other topics, students will go beyond the "genius inventor" narrative to question the presumed neutrality and progressive inevitability of scientific and technological advancements. Through a mixture of online activities, readings, videos, and synchronous online discussions, we will also examine the formulation and codification of expertise, investigate the process of professionalization within the STEM fields, and interrogate how science and technology have supported systems of oppression throughout history.

HIST 364. Angry White Male Studies. 3 Credits. H
This course charts the rise of the "angry white male" in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HUM 365 and WGSS 365.)

HIST 365. Invention of the Tropics. 3 Credits. H
This course surveys the history of the tropical environment and its diverse peoples from early European encounters until the current boom in extractivism and ecotourism. It focuses on portrayals of the tropics in historical travel accounts and films. Through these sources, we will seek to understand cross-cultural interactions, and the ways in which science, technology, and tourism have reconstructed these environments over time. Case studies are drawn from Latin America, Africa, Oceania, and/or Asia. (Same as EVRN 365.)

HIST 367. Magic and Superstition in European History. 3 Credits. H
This course traces the changing role and understanding of magic in European culture, religion, politics and science from the late Middle Ages through the early 20th century. Topics may include alchemy, miracles, magical healing, witchcraft, monsters and demonic possession.

HIST 368. A History of Afro-Latin America. 3 Credits. H
This course examines the history of Africans and their descendants in Latin America. In this region, Africans could be found serving as militia commanders, laboring as skilled tradesmen, running their own businesses, working as household servants, and toiling on plantations. Students will study the varied experiences of these men and women across colonial and national boundaries. Topics include: acculturation/Creolization, manumission, family formation, social networks, economic roles, political mobilization, and interaction with indigenous peoples.

HIST 371. Tequila, Tango, Carnival, City. 3 Credits. H
This course explores the history of modern urban Latin America through the lens of popular culture. Elements of culture that will be examined include music, food, soccer, cinema, photography, and art of the 19th and 20th centuries. Some of the themes likely to be explored are collective identity, exile, travel, cultural resistance to state violence, public rituals, and the evolution of the city and its cultural spaces.

HIST 373. The Supreme Court and Religious Issues in the United States. 3 Credits. H
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Not open to freshmen. (Same as REL 373.)

HIST 374. The History of Modern American Conservatism. 3 Credits. H
In this course students will gain an in-depth knowledge of modern American conservatism, primarily through the lens of political history. We will focus on the development of the conservative political movement from the 1930s through contemporary times. We will ponder several interrelated questions: how did conservatives build a movement capable of exercising political power; what do conservatives mean when they discuss equality, liberty, and freedom; how have conservatives conceptualized the role of the United States in the world; what role have ideas played in the conservative movement; how have different factions of conservatives fought for control of their movement while struggling to maintain political unity; and how have conservatives governed? Finally, we will contextualize modern American conservatism in the broader, dynamic political culture of the United States.

HIST 376. Immigrants, Refugees, and Diasporas. 3 Credits. H
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these
issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as GIST 376.)

HIST 377. Everyday Communism in Eastern Europe. 3 Credits. H
This course investigates through film, literature, memoirs, photography, architecture, and scholarship the experience of ordinary citizens under Soviet-style communism in Eastern Europe. We study the ways people supported, resisted, opposed, and merely got by under state socialism from the late 1940s to the collapse of Communism in 1989.

HIST 378. Beyond the Iron Curtain: Soviet Perspectives on the Cold War. 3 Credits. H
This course reimagines the Cold War through Soviet eyes, challenging assumptions and offering less familiar perspectives on a global conflict. Analyzing Soviet and American mass media, popular culture, declassified documents, and personal stories, students investigate the following: Who started the Cold War, and who won it? Was it a time of relative peace or paranoia? How did the two sides view each other and did espionage help them know each other better? How did people and culture sometimes cross the iron curtain? What were the Soviets doing in places like Latin America and the Middle East? And why were both sides so concerned with Olympic athletes, ballet defectors, and cosmonauts?

HIST 379. Europe in Crisis: Empire, Extremism, and War, 1890-1945. 3 Credits. H
This course examines the sense of crisis that defined European life in the first half of the twentieth century, an era defined by economic spasms, cultural revolts, extreme political ideologies, and two massively destructive world wars. We will examine the period between 1890 and 1945 as a violent, at times apocalyptic, clash between three competing ideologies - communism, fascism, and liberal democracy -demonstrating how extremism both fed upon and created a sense of crisis.

HIST 380. Enemies of Ancient Israel. 3 Credits. H
An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called “Bad Guys of the Bible” using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as JWSH 387 and REL 387.)

HIST 382. Jerusalem Through the Ages. 3 Credits. H
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, JWSH 382 and REL 382.)

HIST 383. United States in the 1960s. 3 Credits. H
In the Sixties, millions of Americans rejected socially-sanctioned established wisdom, long-standing cultural precepts and conventional political policies and practices. In this gateway course we will examine how and why they did so, why so many other Americans rejected their challenges to the status quo, and what difference these rebellions made in Americans' lives. By placing their struggles in historical context, we will think about how and why people make and resist social change and how historical circumstances restrain and enable people's individual and collective ability to act and to make their own futures. Through readings, lectures, discussion, and various assignments students will have opportunities to debate the great questions of that era and ponder the relevance of historical events and understandings to their own lives and to the life of the nation, as they sharpen their analytic abilities and their capacity to communicate those analyses effectively. Formerly known as HIST 229. Not open to students with credit in HIST 229.

HIST 387. Alexander the Great: Man and Myth. 3 Credits. HT H
This course explores the life, times, and legacy of Alexander the Great (356-323 BCE). It covers the historical context of ancient Greece and Macedon from which Alexander emerged; his engagement with ancient Greek, Egyptian, and Persian cultures; his military campaigns; his aims in creating an empire; and the immediate aftermath of his conquests. In addition, the course considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Alexander has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the use of the memory of Alexander by later Greeks and Romans; the medieval Alexander tradition; responses to Alexander in Middle Eastern and Indian thought and literature; the legacy of Alexander's conquests in the age of empires; his transformation in Hollywood; and his contested place in the modern political dispute between Greece and North Macedonia. (Same as CLSX 322.)

HIST 388. Julius Caesar: Man and Myth. 3 Credits. HT H
This course explores the life, times, and legacy of Julius Caesar (c. 100-44 BCE). It covers Caesar's early political career, his military campaigns, and his rise to power through civil war, with special attention paid to his aims, political reforms, and the institutions that enabled his rise to power. In addition, it considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Caesar has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the impact of Julius Caesar in Rome with the creation of an empire ruled by "Caesars"; Medieval responses to Caesar as tyrant, king, and emperor; Caesar as a paradigm of populist tyranny from the Renaissance to the present; the legacy of his literary output and the Romantic image of Caesar as a genius; his impact on the modern age of empires; and re-imaginings of Caesar in film, TV, and video games. (Same as CLSX 323.)

HIST 389. Topics in Western History: _____ . 3 Credits. H
A study of a specialized theme or topic in Western History. Students will examine major issues and methods of historical study through the study of a specific historical period or topical area. This course grants HIST Category I credit. May be repeated for credit when topic varies.

HIST 390. Topics in Non-Western History: _____ . 3 Credits. H
A study of a specialized theme or topic in non-Western History. Students will examine major issues and methods of historical study through the study of a specific historical period or topical area. This course grants HIST Category II credit. May be repeated for credit when topic varies.

HIST 391. Topics in (Honors): _____ . 3 Credits. H
A study of a specialized theme or topic in History. May be repeated for credit when topic varies. Open only to students admitted to the University Honors Program. Prerequisite: Permission of instructor.

HIST 394. Made in China: Chinese Business History. 3 Credits. H
This course examines the development of business culture in China since 1900. Looking particularly at how it has transformed and adapted in response to China's own changing political environment as well as China's changing engagement with the West and Japan. We examine cases of western businesses in China and Chinese businesses in both China and the West. Topics include the rise of industrialism, the role of foreign investment, China's role in the global market place, the relationship between business and the state, state-run enterprises, factory life, entrepreneurialism, advertising, consumerism, and economic nationalism.

HIST 395. History of Sushi. 3 Credits. H
HIST 402. War and Society in Greece and Rome. 3 Credits. H/W
This course explores the military history of the ancient world, with a focus on the connections between warfare and political, social, and cultural developments. Through extensive reading, analysis, and discussion of a wide variety of ancient sources (literary, epigraphic, archaeological) and contemporary scholarship, this class will survey both the major developments in warfare in Greece and Rome, while at the same time investigating the relationship of military institutions, technologies, tactics, and strategies to the key political and economic changes, social structures, and value systems of antiquity. Beyond exploring famous and influential campaigns and battles (Persian Wars; Peloponnesian War; rise of Macedonia; Punic Wars; Roman civil wars; barbarian invasions), topics will include: hoplite warfare and the emergence of Sparta and Athens; sea-power, democracy, and imperialism; citizen militia and professionalization in Rome; trauma, triumph, and memorialization; gender roles and ethnic identity. (Same as CLSX 402.)

HIST 403. Playing with the Past: History in Games and Gaming. 3 Credits. H
Humans have played games since prehistoric times. Frequently games are more than just entertainment; they often convey political, cultural, social, economic concepts. Games are more than just leisure; they are historical texts that do work to shape our understanding of the past. This class examines the relationship between history and games. How do games portray history? How do they shape our understanding of the past? How can games help us understand the way that the past has influenced the present? How do games tackle historically constructed issues such as race and gender? Can games be used to challenge power systems, stereotypes, and social inequities? Students will be asked to play and analyze a variety of board games and videogames to better understand these questions.

HIST 404. Technology and the Modern World. 3 Credits. H
We live in a technological world. From the moment we wake up until the moment we fall asleep, our lives as modern human beings are defined by the existence of and our interactions with various technologies. Far from neutral, technologies embody the values, priorities, and power disparities of a society. As a result, their creation, use, and proliferation raise profound ethical questions such as their environmental impact, equitable access, and potential unintended consequences or “spillover effects”. In this class, we will apply ethical codes to key case studies within the history of technology to understand how moral issues inherent within contemporary discussions of emerging technologies have developed and changed over time.

HIST 405. Women, Gender, and Sexuality in the North American West. 3 Credits. H
This course will provide students with an overview of how the history of women have profoundly shaped and given meaning to the development of the North American West (which includes present-day states and provinces in the U.S., Canada, and Mexico). The class will examine the lives of women who represent diverse backgrounds, lands, and time periods in this western region. In addition to women, lectures, readings, and discussion will focus on the themes of gender, masculinity, class, race, ethnicity, sexuality, labor, and environment. Broad in chronological scope that spans pre-contact into the twenty-first century, this course is not a comprehensive survey. Rather, the class will examine how women and groups of women across the region defended, survived, explored, cultivated, and imagined the West as a place that defined their homes, migrations, settlement patterns, as well as sites of captivity, displacement, war, and development. (Same as WGSS 305.)

HIST 407. Technology in American History. 3 Credits. H
In this course, students examine the role that technological development and proliferation have played in American history from the nation’s founding to the present. Drawing on key areas of study within the history of technology, we will analyze the historical debate over the place of technologies in American society, how cultural values and political movements have shaped the creation and adoption of new technologies, and the ways that technologies have become tools for equality and oppression. Topics may include the railroad, electrification, mass production, the automobile, radio, air conditioning, television, computers, and the internet.

HIST 408. History of the Great Plains. 3 Credits. H
This course is an overview of the history of the North American Great Plains up to 1900. Today’s plains region comprises ten American states and three Canadian provinces, but it also connects dozens of Indigenous nations that (historically and presently) overlapped through seasonal migrations, trade, resources, and sacred lands. The Great Plains is a unique geographical area that is united by several environmental traits: flatness, aridity, unusual elevations, and an abundance of grasslands. It is also a region of North America characterized by significant cultural diversity, contested spaces, and national myths of empire and settlement. Lectures, readings, and discussion will cover these topics chronologically while emphasizing major themes of ethnicity, race, gender, class, environment, politics, and economic development.

HIST 410. The American Revolution. 3 Credits. H
This course will focus on the meaning the American Revolution had for different groups of Americans. Particular emphasis will be on the relationship between ideology and experience, and the impact of the Revolution on such groups as women, slaves, Indians, African-Americans, the poor, merchants, and loyalists.

HIST 412. The Civil War in America, 1828-1877. 3 Credits. H
This course analyzes the history of the American Civil War from the growing sectional tensions of the late 1820s to the collapse of Reconstruction in 1877. Students will explore the political, social, and economic issues that led to the war, including African American enslavement, the Constitutional crises, and westward expansion. This course will also examine how wartime leadership, diplomacy, strategy, and the home front affected the outcome of the war and how plans for post-war Reconstruction were frustrated by the politics of reunification, gender, and race.

HIST 415. The Rise of Civilization. 3 Credits. S
A study of evolutionary processes leading to the birth of the early great urban civilizations of the Old World and the New World. Patterns of growth and similarities and differences in the rise of urban complexes and states in Mesopotamia, Egypt, the Indus Valley, and in Mexico/Guatemala and Peru. (Same as ANTH 415.)

HIST 441. Aviation in American Culture. 3 Credits. H
This course examines the complex relationship between powered flight and American society from the invention of the airplane to the rise of drone warfare. Through a mixture of scholarly works, personal accounts, and primary sources, we will investigate how use of and access to the airplane became a focal point for the construction and deconstruction of race, gender, and class distinctions and an important site in the struggle for equality and social justice. Using the airplane as a lens, we will recognize and challenge key assumptions within American technoculture such as technological messianism, technological neutrality, and the role of government in technological development. (Same as HUM 373.)

HIST 442. The Politics of Racial Injustice in the United States. 3 Credits.
In this course, students will examine, in detail, four historical eras in which the American people struggled over anti-Black racial injustice in the United States. While the role and efficacy of social change movements and grass-roots activism in that struggle will be analyzed, the course will emphasize political, policy, and institutional responses and remedies to the problem of American racism. In particular, discussions, readings, and assignments will evaluate the successes and failures of specific legislative, judicial, administrative, and organizational interventions. How and why these responses developed and fared as they did as well as the debates over their efficacy will be the focal point of this course. (Same as AAAS 442.)

HIST 450. Study Abroad Topics in: _____. 1-5 Credits. H
This course is designed for the study of special topics in History at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

HIST 461. The Asia-Pacific War, 1937-1945. 3 Credits. H
This course introduces students to the Asia-Pacific War, which began with the outbreak of fighting between Japan and China in July 1937 and ended with the unconditional surrender of the Japanese Empire to Allied forces in August 1945. The course revolves around three themes, which are explored through lecture, discussion, and extensive use of film and visual materials: the geopolitical and colonial origins of the conflict; the concept of total war and the political and social transformations it unleashed on all belligerent nations; and the ideologies on the home front justifying the mass slaughter of soldiers and civilians. There is also discussion about how people in Japan, the United States, China, Korea, and other countries remember the war in the postwar period.

HIST 475. Professional Skills in History. 3 Credits. H
This course will introduce students to the fundamentals of planning and organizing job search strategies. Students will identify their professional interests, research specific careers, and prepare applications to positions or internships based on the skills, experience, and knowledge acquired in their History courses. The final project assignment will consist of preparing a digital portfolio that will include a cover letter, c.v., or resume, lists of specific positions or internships they could apply for, and a video of a mock professional interview.

HIST 480. Travelers' Tales of the Middle East. 3 Credits. H
This reading-intense seminar examines the multiple visions of "the Orient" that appeared in the letters, memoirs, and novels of Western travelers to the Middle East in the nineteenth and twentieth centuries. We examine the rise of tourism and travel-writing within the Middle East and their links to European imperialism. Working closely with primary source documents, we question what these highly personal and often misinformed types of writing can tell us about the politics and culture of everyday life in the Middle East.

HIST 481. From Harem to the Streets: Gender in the Middle East, 1900-Present. 3 Credits. H
This reading-intensive seminar examines shifts in gender roles and expectations in the Middle East during the twentieth and twenty-first centuries. The course begins with the importance of harem within Middle Eastern society, and traces Middle Eastern women's increasingly public presence in national movements, feminist activism, and peace protests as well as the impact of Western standards of marriage, child-rearing, beauty, and sexuality on gender roles. The course uses primary and secondary sources to analyze how gender identity is informed by religion and culture and grounded in specific historical moments.

HIST 482. Israeli-Palestinian Conflict: An Introduction. 3 Credits. S
This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship,
official and unofficial narratives, and international responses. (Same as GIST 329, JWSH 329, and POLS 369.)

HIST 492. Readings in History. 1-4 Credits. H
Investigation of a subject selected by the student with the advice and direction of an instructor. Individual reports and conferences. Two (2) Readings in History courses may be applied to the major and no more than one (1) may be applied to the minor. Prerequisite: Ten hours of college history including at least two upper-class courses and a "B" average in history. Consent of instructor.

HIST 493. History Research Internship. 1-3 Credits. H
The course allows students to work with a faculty mentor and learn firsthand the tasks that historians undertake to research and present their findings. Potential student assignments include database entry and retrieval, translation, fact checking, and compiling sources. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level history course; declared major in history; and permission of the instructor.

HIST 494. Service Learning in History. 1-3 Credits. H
This course is designed to give students the opportunity to apply historical knowledge and ideas gained through course work to real-life situations in volunteer service agencies and community centers. Open to History majors and others with significant History backgrounds. Permission of instructor is required.

HIST 500. History of the Book. 3 Credits. H
Brief history of writing materials and handwritten books; history of printed books from the 15th century as part of cultural history; technical progress and aesthetic change. Offered every second year. (Same as ENGL 520.)

HIST 501. Topics in Western History: ____. 3 Credits. H
A study of a specialized theme or topic in western History. Students will examine major issues and methods of historical research through the study of a specific historical period or topical area. This course grants HIST Category I credit. May be repeated for credit when topic varies. Prerequisite: Successful completion of a history course numbered below 500, or permission of instructor.

HIST 502. The Age of Heroes: Early Greece. 3 Credits. H/W
This course explores the Greek Bronze and Dark Ages and in particular the relationship of the Iliad and the Odyssey to early Greek history. The course is organized around current methods, problems, and debates in the fields of Greek history, archaeology, and Classics. Topics include the rise and fall of the Minoan and Mycenaean worlds, the historicity of the Trojan War, and social, religious, and political institutions of the Dark Ages. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 502.) Prerequisite: Any CLSX or HIST course.

HIST 503. The Ancient History of the Near East. 3 Credits. H
History of the rise of civilizations in the ancient Near East from the earliest time to the Muslim conquest of the early seventh century, including the areas of Mesopotamia, Egypt, Syria, Palestine and Asia Minor. An archaeological approach is used in focusing attention on the cultural phenomena and achievements of the peoples of these areas, including the Babylonians, Assyrians, Persians, ancient Israelites, Greeks and Romans.

HIST 504. Rise of Athens and Sparta. 3 Credits. H/W
This course explores the history of Archaic and Classical Greece, focusing on the rise and fall of the rival states of Sparta and Athens. The course is organized around current methods, problems, and debates in the fields of Greek history and Classics. Topics include the emergence of the Greek polis; Greek colonization; developments in political, religious, and social institutions, including the Spartan constitution and the rise of Athenian democracy; the changing definitions of personal, cultural, and national identities; cultural, political, and economic tensions between rival Greek city-states and neighbouring cultures, especially Persia and Macedonia. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 504.) Prerequisite: Any CLSX or HIST course.

HIST 506. Roman Republic. 3 Credits. H
This course investigates the origins, development, and eventual crisis of the Roman Republic, from its foundation in the eighth century BC to Civil War in the first century BC. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include the contexts and causes for the rise of Rome, the growth, development, and eventual collapse of the Roman republican constitution, and the impact of empire on Roman society, culture, religion, economy, and identity. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 505.) Prerequisite: Any CLSX or HIST course.

HIST 507. Early Roman Empire. 3 Credits. H
This course investigates the establishment and development of the Roman Empire, from the rise of Augustus to the peak of Roman power and prosperity in the second century AD. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include the creation of the imperial system; developments in the role of the emperor and the Roman government; continuity and transformation in society, culture, religion, economy, and identity with the shift from republic to empire; daily life across the empire and in the army. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 507.) Prerequisite: Any CLSX or HIST course.

HIST 508. Late Roman Empire (284-527). 3 Credits. H
This course investigates the history of the later Roman Empire, from the height of its power in the second century AD to the fall of the Western Roman Empire in the fifth century AD. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include continuity and change in Roman culture, identity, and institutions; the Christianization of the empire; contact and conflict between Romans and the “barbarians”; political decline and daily life across the empire. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 508.) Prerequisite: Any CLSX or HIST course.

HIST 510. Topics in Non-Western History: ____. 3 Credits. H
A study of a specialized theme or topic in non-Western History. Students will examine major issues and methods of historical research through the study of a specific historical period or topical area. This course grants HIST Category II credit. May be repeated for credit when topic varies. Prerequisite: Successful completion of a history course numbered below 500, or permission of instructor.

HIST 511. Foodways: Native North America. 3 Credits. H
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods,
meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HUM 551 and ISP 551.) Prerequisite: Upper division course in indigenous/ American Indian history, or permission of the instructor.

HIST 512. Foodways: Latin America. 3 Credits. H
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HUM 552, ISP 552, and LAC 552.) Prerequisite: Upper division course on Latin American history or permission of the instructor.

HIST 514. The Civil Rights Movement. 3 Credits. H
An examination of the Civil Rights Movement in American History. Emphasis is placed on the activities of major Civil Rights organizations, Civil Rights legislation and its impact on American life, and conflicts between integrationist and separatist forces in politics, economics, education, culture and race relations in the United States. (Same as AAAS 511.)

HIST 517. The Seventies: An American History. 3 Credits.
Americans who lived through the 1970s witnessed more than their fair share of historically significant events. The President resigned in disgrace. America ran out of gas and got run out of Vietnam. New York City went bankrupt, blacked out, and caught on fire. Women rebelled and gay Americans stormed out of the closet. Racial integration died and Black Power went mainstream. The Beatles broke up, Muhammad Ali ruled the world (again), Lucas and Spielberg birthed the blockbuster, and disco, rap and punk put the smack down on Rock ’n’ Roll. Everywhere you look in the 1970s, you can find evidence of the end of one period of American history—the postwar period—and the beginning of a new historical epoch—the Age of Reagan, the Neoliberal Age, or, perhaps, Postmodern America. Students will explore this pivotal decade in American history through weekly readings, watchings, and listenings; twice-weekly class discussions of prepared material; and an independent research project. Prerequisite: Prior course in HIST or a related field or permission of the instructor.

HIST 518. Capitalism and the Black Experience. 3 Credits. H
This is an upper level course designed to analyze the experiences that define the African American relationship to the American economy. The course begins with the slave trade and ends in the present. It explores and explains how African American economic development intimately intertwined with the movement for freedom. Students will learn how African Americans addressed issues around slavery, housing, banking, capitalism/socialism, underground economy, and gentrification. This course is chronological in nature with thematic elements. Lectures will provide brief histories and conceptual framework for readings. This background will help students understand and explore how black identity, culture, and politics interact with economy. However, the bulk of the course will operate as a seminar. By the end of the course, students will be able to summarize African American past experiences with capitalism and its relevance to contemporary economic issues affecting African American people today. (Same as AAAS 518 and AMS 518.) Prerequisite: Any American Studies or History courses on American History.

HIST 520. The Age of the Renaissance. 3 Credits. H/W
A survey of economic, political, social, and cultural developments in Italy in the 14th and 15th centuries, with special attention to those elements in the life of the age which look forward to the modern world.

HIST 521. The Age of the Reformation. 3 Credits. H/W
The Protestant revolt of the 16th century.

HIST 522. The Age of Religious Wars, 1540-1648. 3 Credits. H/W
The Catholic or Counter-Reformation and the wars of religion, including the Thirty Years War.

HIST 525. France and Its Empire: From Acadia to Zidane. 3 Credits. H/W
A study of modern France through the lens of its overseas empire and the relations between French colonies and the metropolitan "Hexagon." This course studies the establishment of New France in the early modern period, the relationship between the French Revolution and colonies like Haiti, the French obsession with North Africa in the nineteenth century, the "Second Empire" at home and abroad, the French role in the Scramble for Africa and the global age of imperialism, the participation of colonial troops in the world wars, the post-World War II age of colonial wars and decolonization, and the contemporary role of imperial memory and immigrants to France from its former colonies. Prerequisite: Requires a prior history course or permission of the instructor.

HIST 527. Recent European History, 1870 to the Present. 3 Credits. H/W
A study of the issues and themes that have shaped the contemporary European world, exploring European politics, economy, and society from the zenith of Europe's power and influence at the turn of the century through two world wars and into the contemporary era. This survey begins with the period of consolidation of a system of major national states in western Europe and ends with the search for alternatives to that system in the break-up of empires and movements for European unity in the post-World War II era. The course also considers the emergence of the states of central and eastern Europe and examines the impact of the Russian Revolution and the Soviet state on European affairs. Not open to those who have credit in either HIST 435 or HIST 436.

HIST 528. Economic History of Europe. 3 Credits. S/W
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as ECON 535.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

HIST 530. History of American Women--Colonial Times to 1870. 3 Credits. H
A survey of women's history in the United States that will consider women's roles as housewives, mothers, consumers, workers, and citizens in preindustrial, commercial, and early industrial America. (Same as AMS 510 and WGSS 510.)

HIST 531. History of American Women--1870 to Present. 3 Credits. H
A survey of women's history in the United States that will include radical and reform movements, the impact of war and depression, professionalization, immigration, women's work, and the biographies of leading figures in women's history. (Same as AMS 511 and WGSS 511.)
HIST 541. British History, Tudors and Stuarts. 3 Credits. H
An introduction to the impact on the British Isles of the Reformation and Renaissance; the development of the Tudor state; Parliament; the Stuart monarchy; the Anglican counter-reformation; civil war; the Cromwellian experiment. Prerequisite: A prior history course, or permission of the instructor.

HIST 548. Rise of Modern Britain. 3 Credits. H
A study of the rise of modern Britain from the 1832 Reform Act, a major step on the path from aristocratic government to mass democratic politics. It covers the politics and society of the Victorian era, the extension of British influence overseas, the origins and social impact of two world wars, the creation of the Welfare State, the loss of Empire, and Britain’s entry into Europe.

HIST 561. Liberation in Southern Africa. 3 Credits. W
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and POLS 561.)

HIST 563. U.S. Environmental Thought in the 20th Century. 3 Credits. H
Explores both leading and dissident ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as EVRN 563.) Prerequisite: EVRN 148 or HIST 129, or permission of instructor.

HIST 564. Medieval Russia. 3 Credits. H
Political, economic, social, cultural, and religious developments of Russia from the beginnings of the Russian state in the 9th Century through the 17th Century.

HIST 565. Imperial Russia. 3 Credits. H/W
The history of Imperial Russia from Peter the Great’s reinvention of the empire in the eighteenth century to its demise in the revolutions of 1917. Placing Russia in a global context, the course examines change and continuity in politics, society, economy, and culture and looks at Russia as a diverse empire between Europe and Asia. Readings include historical scholarship and some of the classics of Russian literature.

HIST 568. Rise and Fall of the Soviet Union. 3 Credits. H/W
An exploration of the Soviet Union’s creation, evolution, collapse, and legacy in contemporary Russia and Eurasia. Drawing on historical scholarship, literature, music, and film, the course examines the major trends and developments in Soviet politics, ideology, society, economy, and culture. Special attention is paid to how the multiethnic Soviet state’s rise and fall reflected broader changes in the world during the “Soviet century.”

HIST 570. The Middle East After World War II. 3 Credits. NW H/W
An intensive study of developments and changes in the Middle East since World War II. Topics and themes will vary, but may include the long-lasting effects of European imperialism, Big Oil and the energy crisis, the Arab-Israeli conflict and peace process, American intervention in the Middle East, minority communities, and the revival of Islamic and popular protest movements.

HIST 571. Pre-Hispanic Mexico and Central America. 3 Credits. NW S/W
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotecs, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as ANTH 506 and LAC 556.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor.

HIST 572. African History. 3 Credits. W
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and POLS 561.)

HIST 574. Slavery in the New World. 3 Credits. H/W
Slavery, slave culture, and the slave trade in the U.S., Latin America, and the Caribbean will be examined comparatively. Attention will also be given to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. (Same as AAAS 574.)

HIST 577. The Andean World. 3 Credits. H
The Andean environment is defined by its mountains, but includes all of the earth’s major biomes: from tropical rainforest to the world’s oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, ISP 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

HIST 578. Global Indigenous History. 3 Credits.
In this course, students are introduced to a global comparative history of Indigenous peoples and nations, offering a unique opportunity to study how Indigenous nations have made a significant impact from ancient to contemporary times. Global Indigenous history provides invaluable insights into key historical debates about the processes/systems of colonization, international law, treaty rights, citizenship, nationalism, democratization, war, sovereignty, community & nation building, and cultural revitalization. This lecture class explores histories of the Ancient Mayan and Incan empires; Red Power to Idle No More; Māori and Aboriginal rights movements; Tibetan independence and Gandhi’s Satyagraha; Irish and Scottish devolution; and contemporary conflict(s) in the Middle East, just to name a few. This course is offered at the 500
and 800 level with additional assignments at the 800 level. Not open to students with credit in ISP 878. (Same as ISP 578.) Prerequisite: Requires a prior history course or one in a related field or permission of the instructor.

**HIST 579. The History of Brazil. 3 Credits. H/W**
The history of Brazil from European discovery to the present with emphasis on social and economic change. Topics discussed will include the Indian, African, and European backgrounds, slave society, the frontier in Brazilian development, cycles of economic growth and regionalism, the role of foreign capital, industrial development, labor, urban problems, the military in government, and human rights.

**HIST 580. Economic History of Latin America. 3 Credits. H/W**
A study of the changing economic conditions in Latin America from Colonial times through the Twentieth Century and the effect of these conditions on Latin American society. Emphasis will be on the major theoretical issues of development economics, patterns of growth, and suggested strategies for economic development. Analysis will center on changes in agriculture, industry, labor, finance, transportation and technology, urbanization, immigration, role of women, export and commerce, and foreign involvement.

**HIST 584. Modern China. 3 Credits. NW H/W**
An intensive survey of China’s history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as EALC 584.)

**HIST 585. Beer, Sake, Tea-Beverages in Japan History. 3 Credits. H**
Sake and tea are synonymous with Japan today, but the history of beverages from water to whiskey illuminates key developments in Japanese civilization. This course makes a thematic survey of Japanese beverages introducing the place of drinks in global history before examining their distinct context in Japan. Topics include the ritual consumption of beverages as in the tea ceremony; the place of alcohol in Japanese culture; locales for consuming beverages such as bars, teahouses and coffee shops; and the Westernization of taste preferences as characterized by the introduction of beer and wine. By taking this course, students gain insight into ways that beverages contribute to Japanese culture and help shape personal and national identity. Prerequisite: Successful completion of an East Asian history or culture course number below 500 or permission of the instructor.

**HIST 587. Age of Shoguns: Early Modern Japan. 3 Credits. NW H/W**
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as EALC 587.) Prerequisite: An earlier course in history or east Asian languages and cultures, or permission of the instructor.

**HIST 588. Japan, 1853-1945. 3 Credits. NW H/W**
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as EALC 588.)

**HIST 591. Food in History: West and East. 3 Credits. H/W**
A survey of scholarship on food in the West and in East Asia, choosing works primarily by historians, but also by sociologists, geographers, and anthropologists. We consider how scholars have approached issues concerning food productions and consumption, what habits of eating reveal about daily life, and how and when food is embedded with historiography related to these topics, keeping in mind the famous maxim of the noted French gastronome Brillat-Savarin (d. 1826): "Tell me what you eat: I will tell you what you are."

**HIST 598. Sexuality and Gender in African History. 3 Credits. W**
An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project in consultation with the instructor. (Same as AAAS 598 and WGSS 598.)

**HIST 603. History of Tibet. 3 Credits. NW H**
This course surveys the cultural and political history of Tibet from the eighth to the twentieth century. Through readings, lectures, and discussions, students gain familiarity with the dominant features of Tibetan civilization. Topics include the relationship between Tibet and the civilizations of India and China, Tibetan Buddhism, and the tensions between the struggle for Tibetan independence versus claims of Chinese sovereignty. The course also considers the Tibetan diaspora and the reception of knowledge about Tibetan civilization in the West.

**HIST 604. Contemporary Greater China. 3 Credits. W**
This course considers contemporary China, Taiwan, and Hong Kong in comparative perspective. It begins in the early twentieth century so as to set up a comparison between Nationalist, Communist and Colonial China. It focuses on the evolution from the 1940s to the present studying the political, economic and social systems of the three regions that constitute what we now call ‘Greater China’ and considers, in particular, important points of difference and similarity between them.

**HIST 605. Medieval Japan. 3 Credits. NW H**
Course examines the history of Japan from the end of the ancient period (c. 1200 AD) through the medieval era (approximately 1573). Issues covered include the formation and destruction of the Kamakura and Muromachi warrior governments, medieval religious life and culture. Writing assignments provide students with opportunities to gain familiarity with historical methods for analysis and to strengthen their written expression. Not open to students who have taken HIST/EALC 586.

**HIST 610. American Colonial History. 3 Credits. H**
Examines colonial American history from the age of Columbus to the mid-1760s. The course seeks to place colonial American history into the larger historical context, particularly the expansion of the British Empire in the early modern period. Emphasis in the course will be on migration, social and economic conditions, and inter-racial relations.

**HIST 615. Rise of Modern America: Politics, Culture, and Society, 1900-1950. 3 Credits. H**
The history of the United States in the First Half of the Twentieth Century.

**HIST 616. Contemporary America, 1941-Present. 3 Credits. H**
A history of the United States from its entry into World War II to the present. A study of such selected topics as women’s history and feminism, race relations and the Afro-American civil rights movement, power, poverty, the military-industrial complex, McCarthyism, and presidential administrations.

**HIST 618. History of the American West to 1900. 3 Credits. H**
A survey of Western history with emphasis on such topics as Native Americans and Indian-white relations, environment and resource use, exploration and discovery, expansionism and Manifest Destiny, economic development, urban, rural, and alternative communities, ethnic and racial
experience, women and violence. Consideration will also be given to
topics such as fur trade, mining, the cattle business, and agriculture.

**HIST 619. History of the American Indian. 3 Credits. NW H/W**
A study of Indians in the United States from colonial times to the present.
Consideration will be given to the political, social, and cultural history of
selected Indian tribes and to Indian-white relations with particular attention
to the Indian point of view. Other topics will include a comparative study of
Indian policy of nations colonizing in America, cultural intermingling and
cultural conflict, and current Indian problems. Slides, films, and guest
speakers (including American Indians) will be used in the course.

**HIST 621. The American West in the 20th Century. 3 Credits.**
A study of the post-frontier era and the struggle to create a regional
identity, drawn from legends of the heroic past, varieties of racial and
ethnic experience, political culture, and the possibilities of the land.

**HIST 625. The Body, Self and Society. 3 Credits. H**
An intensive examination of the role of the human body in the creation
of personal and social identities in the Western world. Students become
acquainted with contemporary theories of embodiment and senses
as they are applied to a variety of historical themes, and develop
research projects on a topic negotiated with the instructor. (Same as
HUM 575, WGSS 575.) Prerequisite: An upper-division course in History,
Humanities, or Women Gender and Sexuality Studies; or permission of
instructor.

**HIST 630. The United States and the World, 1890-2003. 3 Credits. H**
An examination of the history of United States foreign relations over the
course of the twentieth century. Treats America's emergence as a world
power before World War I, imperialism and interventionism, involvement
in World War I and World War II, internationalism, the Cold War and
America's anti-communist crusade, third world nationalism, responses
to a global economy, and the obligations of a military superpower in a
chaotic world.

**HIST 649. History of Feminist Theory. 3 Credits. H**
This discussion course will cover the development of feminist theories from
the late Middle Ages to the 1970s. Reading will include Pisan, Wollstonecraft, Mill, Freud, Woolf, Beauvoir, Friedan, Daly, Kristeva,
and others. (Same as WGSS 549.) Prerequisite: Any previous course in
WGSS or HIST or permission of instructor.

**HIST 690. Honors Course in History. 3 Credits. H**
This course is the first part of a two-part course that provides a group
setting for writing the Senior Honors Thesis, which is a substantial work
of historical research based above all on the analysis of primary sources.
During this first semester students must produce a serious working draft
of the thesis. Assignments and discussions will help students to prepare
this draft, which will establish a solid foundation for the Honors Thesis.
In addition, this course will provide a close experience of advanced,
professional, historical work. Presentations, weekly comments on the
work of others, and active participation in seminar discussions with
constructive observations and questions will complete that professional
experience. A History faculty advisor will provide essential guidance
throughout the process of writing the thesis. Prerequisite: HIST 301 and
permission of instructor.

**HIST 691. Undergraduate History Honors Seminar. 3 Credits. H**
Required for students in the History major honors program, normally
in the second semester of their History honors projects. Another
semester experience may be substituted, with the approval of the Honors
Coordinator. Prerequisite: Approval of the Honors Coordinator of the
Department of History.

**HIST 692. Independent Capstone. 3 Credits. H**
This independent study is designated for students who did not, or are unable to, complete one of the department's other capstone offerings
(HIST 696 or HIST 691). The course will introduce students to the theory
and practice of historical inquiry and require a substantial research
project. May not be repeated for credit. Prerequisite: Completion of 75
credit hours of undergraduate study, including HIST 301, and consent of
the instructor.

**HIST 696. Seminar in: ____. 3 Credits. H**
A seminar designed to introduce students to the theory and practice of
historical inquiry. A research paper will be required. May not be repeated
for credit. Prerequisite: Completion of 75 credit hours of undergraduate
study and completion of HIST 301, and recommended completion of one
500 level history course, or consent of the instructor.

**HIST 705. Globalization in History. 3 Credits.**
A study of the increasing interaction among world societies since 1500
and an investigation of the long-term developments behind current world
problems. Major topics include western expansion since 1500, the spread
of state sovereignty, the formation of a world economy, and spread
of international institutions. The current world problems investigated
will vary, but may include issues such as environmental crises, human
rights, migration, free trade and the spread of consumer culture, ethnicity
and nationalism, and international intervention within states. (Same as
GIST 705.)

**HIST 720. The Nature of Museums. 3 Credits.**
The purpose of this course is to provide an overview of the kinds of
museums, their various missions, and their characteristics and potentials
as research, education, and public service institutions responsible
for collections of natural and cultural objects. (Same as MUSE 801.)
Prerequisite: Museum Studies student, Indigenous Nations Studies
student, or consent of instructor.

**HIST 721. Introduction to Museum Public Education. 3 Credits.**
Consideration of the goals of an institution's public education services,
developing programs, identifying potential audiences, developing
audiences, and funding. Workshops and demonstrations are designed for
students to gain practical experience working with various programs and
developing model programs. (Same as AMS 797, BIOL 784, GEOL 784,
and MUSE 705.) Prerequisite: Museum Studies student, Indigenous
Nations Studies student, or consent of instructor.

**HIST 722. Conservation Principles and Practices. 3 Credits.**
This course will acquaint the future museum professional with problems
in conserving all types of collections. Philosophical and ethical
approaches will be discussed, as well as the changing practices regarding
conservation techniques. Emphasis will be placed on detection and
identification of causes of deterioration in objects made of organic
and inorganic materials, and how these problems can be remedied.
Storage and care of objects will also be considered. (Same as AMS 714,
BIOL 700, GEOL 780, and MUSE 706.) Prerequisite: Museum Studies
student, Indigenous Nations Studies student, or consent of instructor.

**HIST 723. Introduction to Museum Exhibits. 3 Credits.**
This course will consider the role of exhibits as an integrated part
of museum collection management, research, and public service. Lecture
and discussion will focus on issues involved in planning and producing
museum exhibits. Laboratory exercises will provide first hand experience
with basic preparation techniques. Emphasis will be placed on the
management of an exhibit program in both large and small museums in
the major disciplines. (Same as AMS 700, BIOL 787, GEOL 781, and
MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations
Studies student, or consent of instructor.
HIST 725. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, BIOL 798, GEO 785, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

HIST 727. Practical Archival Principles. 3 Credits.
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as MUSE 707.)

HIST 728. Museum Management. 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, GEO 785, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

HIST 747. East Asian History and Culture for Teachers. 2 Credits.
An advanced survey of the history, culture, and contemporary affairs of China, Japan, and Korea, specifically designed for K-12 educators who wish to incorporate East Asian topics into their classroom teaching. Pedagogical methods and resources for the study of East Asia will be emphasized. Topics covered will address relevant benchmarks in the state curricular standards in social studies, themes from the Advanced Placement world history examination, and the national standards in world history. Prerequisite: Approval of the instructor.

HIST 748. East Asian Historical Materials: _____ . 3 Credits.
The aim of the course is to provide students with the linguistic tools needed for archival research in East Asian history by assisting them in gaining experience reading primary and secondary language materials in Japanese and/or Chinese including texts in classical forms of these languages. After studying the rules of classical grammar and the particulars of historical materials as needed, students will read primary documents in conjunction with secondary readings in Japanese and/or Chinese. Fundamental aspects of paleography may also be introduced in this course depending on student need. Prerequisite: Capability of reading Japanese or Chinese and permission of the instructor.

HIST 800. Readings in: ______. 1-8 Credits.
Prerequisite: Consent of instructor.

HIST 801. Colloquium in: ______. 1-6 Credits.
Reading and discussion of selected topics.

HIST 802. Seminar in: ______. 3 Credits.
Research Seminar on selected topics.

HIST 804. Professionalization Seminar in Women, Gender, and Sexuality Studies. 1.5 Credits.
The goal of this course is to train students in the skills essential to becoming effective scholars and educators, and successful members of the profession. The material to be covered by these three iterations includes 1) the ethics and practice of feminist research (e.g., protection of human subjects, conflicts of interest, confidentiality, legal strictures); 2) the practical aspects of producing knowledge (e.g., writing research papers, proper citation methods, conference presenting, responding to peer reviews); and 3) acquiring and securing a place in the work force (e.g., CV preparation, job interviews, grant writing, getting promotion [and, in the academy, tenure]). (Same as WGSS 804.) Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students.

HIST 805. The Nature of History. 3 Credits.
The introductory course to graduate study, this colloquium introduces students to the practice and epistemology of history, familiarizing them with various methodological schools, theoretical touchstones, and historiographical subfields. Required of all incoming M.A. and Ph.D. students.

HIST 806. Studies in: ______. 3 Credits.
The core course for each thematic major field in the graduate program in History. The course, offered in a colloquium style format, will serve as an introduction to the principal standard literature in the field, and will consider the full range of methodologies or approaches appropriate to the field.

HIST 807. Professional Development Colloquium in Pedagogy. 3 Credits.
This course will help train future professional historians to teach. It will focus on a variety of pedagogical topics for future college history faculty, including: developing students' critical and analytical thinking; teaching research skills; promoting student involvement/participation; determining course goals; use of multi-media technology. In addition to attending class meetings of History 807, students will attend as observers throughout the semester one 500/600-level course in an area relevant to their future teaching and complete the readings assigned to the class. They will produce a course portfolio for an undergraduate course, including: a syllabus designed by the student; a set of assignments that will be part of that course, such as examinations and papers; sample lesson plans; an annotated bibliography of materials relevant to the subject-matter of the course.

HIST 808. Colloquium in Comparative History: ______. 3 Credits.
A readings-oriented course which explores themes in two or more geographic and/or chronological fields of history. The benefits and disadvantages of comparative methodologies will be analyzed. Topics will vary each term but may include the examination of such subjects as the history of urbanization, labor, colonialism, immigration, the family, political thought, or industrialization. Prerequisite: Varies with area of subtopic.

HIST 810. Colloquium in Nationalism Studies. 3 Credits.
Exploration of the major contemporary scholarly theories of nationalism and other forms of group identification, supplemented with case studies.

HIST 811. Colloquium in Comparative Empires. 3 Credits.
This colloquium explores the evolution of empires across space and time by surveying the rather contentious scholarly literature on the subject, offering a methodological introduction to comparative and transnational history in the process.

HIST 862. Indigenous Archives and Tribal Historic Preservation. 3 Credits.
In this methods class, students will gain foundational knowledge in the archival and preservation of Indigenous source materials: oral histories, printed materials, Tribal documents, letters/journals/diaries, artwork, and a host of other sources. Students will also utilize digital history technology to create online exhibits and an original research paper. Beyond the archives this course introduces students to the important work of Tribal Historical Preservation examining the laws, ethics, cultures, policies, histories, ethics, recovery/restoration, Indigenous GIS, consultation, management, and career paths in Tribal Historical Preservation. Finally, students will gain invaluable experiences by writing grants and developing final projects that can lead to real-world applications of their research. (Same as ISP 862.)
HIST 878. Colloquium in Global Environmental History. 3 Credits.
This graduate colloquium examines the intersection between environmental history, world history, and global history as interdisciplinary fields of inquiry, as well as regional approaches to environmental history from around the globe.

HIST 879. Colloquium in North American Environmental History. 3 Credits.
Intensive survey of significant works in the field from colonial times to the present, with attention to bibliography, research methods and needs, and leading issues in interpretation.

HIST 881. Slavery in the Atlantic World. 3 Credits.
A graduate colloquium examining the historical roots, processes, experiences, and legacies of human slavery from local, regional, comparative, and global perspectives.

HIST 883. Ethnohistory of the Americas. 3 Credits.
A graduate colloquium that develops methodologies and examines historical case studies for the study of ethnicity, interethic relations, and cultural hybridity from a hemispheric perspective, not only for indigenous peoples, but also for African-, Asian-, European-, or Pacific-derived groups, as well as new ethnic groupings and identities that emerged from their interaction.

HIST 890. Colloquium in American History 1492-1800. 3 Credits.
Study of the leading interpretations of major issues in the history of Colonial and Revolutionary America, including appropriate attention to new approaches and techniques in research. The first course in the sequence of colloquia in United States history.

HIST 891. Colloquium in 19th Century U.S. History. 3 Credits.
Study of the leading interpretations of major issues in the history of the United States in the 19th century. The second course in the sequence of colloquia in United States history.

HIST 892. Colloquium in 20th Century U.S. History. 3 Credits.
Study of the leading interpretations of major issues in the history of the United States in the 20th century. The third course in the sequence of colloquia in United States history.

HIST 893. Colloquium in Military, War, and Society. 3 Credits.
Analysis of key historiographical conversations and major trends in US-focused Military, War, and Society scholarship, including their relation to the broader fields of military and US history.

HIST 895. Colloquium in the History of Gender. 3 Credits.
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as AMS 835 and WGSS 835.)

HIST 899. Masters Preparation. 1-3 Credits.
A course for students preparing to complete their Master's degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

HIST 982. Colloquium in the History of the American West. 3 Credits.
Study of issues and interpretations in the history of the American West from prehistory to the present, including attention to new approaches and techniques in research.

HIST 993. Applied History Experience. 1-3 Credits.
This course allows students to receive credit for participating in an internship, practicum, or other non-academic context in which they take part in the preservation, dissemination, interpretation, or presentation of History. Students taking this course will meet regularly with the instructor, ideally their advisor, to discuss and reflect upon the experience and its relationship to the student’s research and professional development.

Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of Instructor.

HIST 997. Dissertation Seminar. 1-12 Credits.
In this course, students who have successfully completed their doctoral oral comprehensive exam will research, write, and workshop dissertation chapters, while engaging in other professionalization exercises and discussions. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Must pass oral comprehensive exam before enrolling.

HIST 998. Portfolio Preparation. 1-3 Credits.
This course will guide students through the process of preparing and submitting their written portfolio and preparing for the oral defense. In this course, students will complete field readings and prepare the cover letter, professional essay, grant application, and sample syllabus they are required to submit to their Advisory Committee in advance of the oral defense. Working closely with their Advisory Committee members, students in HIST 998 will generate these documents and workshop them with the course instructor and their fellow students. The instructor will mentor students through the process of scheduling their exams and preparing the final written document for submission. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be a second year Ph.D. student and obtain permission of the instructor.

HIST 999. Doctoral Dissertation. 1-12 Credits.
An inquiry into the source material upon a specific subject. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor.

Bachelor of Arts and Bachelor of General Studies in History

Why study history?
We study the past to gain insight for living in our present. At the collegiate level, studying history comprises much more than memorizing names or dates. Historians examine change over time and are most interested in questions that ask 'why?' or 'how?' These questions demand complex answers about who we are and how we have come to be where we are.

A major in History teaches skills in research, evaluation, analysis, and communication that allow us to better understand what it means to be human in an increasingly complex and interdependent world. As a department we are:

Welcoming: In our teaching and research, faculty are committed to recovering and centering voices of people whose historical experiences have been marginalized through systemic racism, gender and sex prejudice, and class bias. We welcome all students in our classrooms.

Relevant: The study of history at the collegiate level prepares students for global citizenship and teaches them to construct evidence-based arguments, even in the face of uncertainty, bias, and incomplete information. Our courses develop skills in critical thinking, analysis of qualitative and quantitative sources, research methods and practices, and effective communication—all of which transfer to any number of future careers and occupations.

Personal: Courses (https://catalog.ku.edu/liberal-arts-sciences/history/ #courseinventory) in the department are usually small, and the larger courses always include trained Graduate Teaching Assistants to give individual attention and feedback. All our required seminars are capped at
fifteen students, and each afford the opportunity to work one-on-one with a faculty member.

**Prominent:** Faculty ([https://history.ku.edu/faculty/](https://history.ku.edu/faculty/)) in the department are nationally and internationally recognized leaders in their field, and they bring this advanced knowledge into the classroom

**Flexible:** Students must take only two required courses - a seminar on historical methods (HIST 301 [https://catalog.ku.edu/search/?P=HIST%20301]) and a senior research seminar (HIST 696 [https://catalog.ku.edu/search/?P=HIST%20696]) or honors thesis (HIST 690 [https://catalog.ku.edu/search/?P=HIST%20690] & HIST 691 [https://catalog.ku.edu/search/?P=HIST%20691]). Because few courses have sequential prerequisites, History is easy to take as a minor or as a second major.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions ([http://admissions.ku.edu/](http://admissions.ku.edu/)) for application deadlines and specific admission requirements.

Visit the International Support Services ([http://www.iss.ku.edu/](http://www.iss.ku.edu/)) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions ([http://credittransfer.ku.edu/](http://credittransfer.ku.edu/)) website.

**Declaring a Major**

The Department of History has no admission prerequisites or requirements before declaring a major. You can declare a History major by scheduling an appointment with our Advising Specialist ([https://history.ku.edu/people/nicole-evans/](https://history.ku.edu/people/nicole-evans/)) to fill out a Major Declaration Form. We urge you to meet with the Director of Undergraduate Studies ([https://history.ku.edu/people/marie-brown/](https://history.ku.edu/people/marie-brown/)) and our Advising Specialist when you declare, so that we can explain the major requirements and get to know you and your interests. There is no set time for declaring your major, but you should try to contact the department early for advising, preferably before the end of your sophomore year.

**First- and Second-Year Preparation**

Prospective majors are encouraged to enroll in one or two introductory courses at the 100 or 200 level in the first two years. Many introductory history courses fulfill Core Goal 1.1 and 3H requirements. Students who come to KU with AP or transfer credit should be aware that only nine hours of history course work numbered 100-299 may be counted toward the major.

**Requirements for the B.A. or B.G.S. Major**

**History Required Electives**

Majors must complete a minimum of 12 hours (4 courses) in both Category I and Category II below. The remaining 6 hours may be taken from either category.

**History Category I: Western Orientation. Satisfied by courses in Ancient, Medieval, Modern Western Europe, Russia/Eastern Europe, United States:**

- HIST 101 Introduction to Western History: ______
- HIST 102 Introduction to History, Honors: ______
- HIST 103 Environment and History
- HIST 105 Introduction to Ancient Near Eastern and Greek History
- HIST 106 Introduction to Roman History
- HIST 107 Introduction to the Ancient World
- HIST 108 Medieval History
- HIST 109 The Black Experience in the Americas
- HIST 112 Introduction to British History
- HIST 114 Renaissance to Revolution: Europe 1500-1789
- HIST 115 French Revolution to the Present: Europe 1789-Present
- HIST 117 Russia, An Introduction
- HIST 128 History of the United States Through the Civil War
- HIST 129 History of the United States After the Civil War
- HIST 139 The Global Cold War
- HIST 140 Global Environment I: The Discovery of Environmental Change
- HIST 142 Global Environment II: The Ecology of Human Civilization
- HIST 144 Global Environment I: Discovery of Environmental Change, Honors
- HIST 145 Global Environment II: The Ecology of Human Civilization, Honors
- HIST 150 Introduction to Food History: Around the World in Eight Dishes
- HIST 177 First Year Seminar: ______
- HIST 201 Writing the Past-Category I/Western Topics: ______
- HIST 203 Speaking the Past-Category I/Western Topics: ______
- HIST 230 Sex, Gender, Film, and History
- HIST 231 War and 20th Century U.S. Culture
- HIST 250 Study Abroad Topics in: ______
- HIST 285 Headless Men: Conquest and Cultural Exchange Before the Age of Exploration
- HIST 303 Sin Cities
- HIST 304 1642, 1688, 1776: Three British Revolutions
- HIST 305 Technological Revolutions and Global Transformations
- HIST 308 Key Themes in Modern Global History
- HIST 312 American Culture, 1877 to the Present
- HIST 314 Globalization: History and Theory
- HIST 316 Ministers and Magicians: Black Religions from Slavery to the Present
- HIST 318 Indian Territory
- HIST 319 History, Women, and Diversity in the U.S.

History Capstone Seminar
Majors must complete a capstone research experience in which they research and write an original thesis based on primary sources. It normally is taken during the senior year. Alternatively, students with a Major GPA of 3.5 or above may choose to write a senior honors thesis. Satisfied by one of the following:

**History Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

**Major Hours**
Satisfied by 36 hours of major courses. No more than 2 HIST 492 Readings in History courses may be applied to the major. Only courses taken in the Department of History or cross-listed in other units are accepted for credit toward the major.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major. Of these 27 hours, at least 6 hours (two courses) must be taken at the 500-699 level (in addition to HIST 696).

**Major Junior/Senior Graduation (300+) GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator [here](http://clas.ku.edu/undergrad/tools/gpa/).

**Graduation Plan**
With careful planning and commitment to a full-time course load, you can graduate with a degree in History in four years. Consult with an Advising Specialist for help in creating your graduation plan.

**Double Majors**
Many history majors choose to pursue a second major. Fulfilling the requirements of 2 majors in a timely fashion requires careful choice of courses. Consult with an Advising Specialist for help in creating a graduation plan that fulfills all requirements.

A sample 4-year plan for the BA degree in History can be found here: History (p. 1533), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in History can be found here: History (p. 1534), or by using the left-side navigation.

**Departmental Honors**
The honors program in history allows exceptional undergraduates to work closely with faculty members on a year-long original research project. To graduate with honors, a student must: 1) complete the requirements for the major in history, 2) enroll in the two semester research sequence HIST 690/HIST 691, 3) maintain a 3.5 GPA in History, and 4) successfully defend an Honors Thesis in an oral examination.

Instead of completing the standard capstone course HIST 696, students pursuing Honors in History enroll in a two-semester sequence: HIST 690, in which the student carries out direct research on the topic of their choice under the supervision of a faculty advisor; and HIST 691, which provides a group setting for writing and revision of an Honors Thesis. The rigor of these two courses approximates graduate work and is an invaluable experience for those considering a graduate degree. In exceptional circumstances, a student may complete HIST 696 and, by invitation, enroll in HIST 691 to develop the seminar paper into an honors thesis.

Each student who completes an Honors Thesis must defend it in an oral examination before a thesis committee of three faculty members. In most cases, the committee is composed of history faculty, but committee members from outside the department are encourages as well. Upon completion, a copy of the thesis is deposited in the department and uploaded to KU Scholar Works.

Petitions for exceptions to these regulations should be submitted to the Honors Coordinator.

**BA in History**
Below is a sample 4-year plan for students pursuing the BA in History. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website [here](http://kucore.ku.edu/courses/).

**Total Hours 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Must be a declared History major in order to enroll in HIST 301. See a departmental advisor to declare.
4. Majors must complete a minimum of 30 hours (10 courses) by completing 12 hours (4 courses) from Category I, 12 hours (4 courses) from Category II, and 6 hours (2 courses) from either category I or II.
5. Only 9 hours (3 courses) at the 100-200 level can apply toward the major and at least 6 hours (2 courses) must be taken at the 500-699 level.
6. Hour requirements (incl. 45 jrs/hr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
7. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Senior
Fall

HIST Elective 500+ (10 of 10) 2
HIST 475 (Recommended for BGS Career Prep Course BGSC)
Second Area of Study/Elective/Degree/Junior-Senior Hours 3
Second Area of Study/Elective/Degree/Junior-Senior Hours 3

Total Hours 120

1 Must be a declared History major in order to enroll in HIST 301. See a departmental advisor to declare.
2 Majors must complete a minimum of 30 hours (10 courses) by completing 12 hours (4 courses) from Category I, 12 hours (4 courses) from Category II, and 6 hours (2 courses) from either category I or II. Only 9 hours (3 courses) at the 100-200 level can apply toward the major and at least 6 hours (2 courses) must be taken at the 500-699 level.
3 Hour requirements (incl. 45 jr/ar hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in History

Why study history?

We study the past to gain insight for living in our present. At the collegiate level, studying history comprises much more than memorizing names or dates. Historians examine change over time and are most interested in questions that begin by asking ‘why’ or ‘how.’ These questions demand complex answers about who we are and how we have come to be where we are.

A Minor in History provides a foundation in historical thinking and teaches skill in research, evaluation, analysis, and communication that allow us to better understand what it means to be human in an increasingly complex and interdependent world. As a department, we are:

Welcoming: In our teaching and research, faculty are committed to recovering and centering voices of people whose historical experiences have been marginalized through systemic racism, gender and sex prejudice, and class bias. We welcome all students in our classrooms.

Relevant: The study of history at the collegiate level prepares students for global citizenship and teaches them to form evidence-based arguments, even in the face of uncertainty, bias, and incomplete information. Our courses develop skills in critical thinking, analysis of qualitative and quantitative sources, research methods and practices, effective communication—all of which transfer to any number of future careers and occupations.

Personal: Courses (https://catalog.ku.edu/liberal-arts-sciences/history/ #courseinventory) in the department are usually small, and the larger courses always include trained Graduate Teaching Assistants to give individual attention and feedback. All our required seminars are capped at fifteen students, and each afford the opportunity to work one-on-one with a faculty member.

Flexible: Any course offered by the Department of History is open to Minors. Students are encouraged, but not required to enroll in our seminar in historical methods (HIST 301) or the senior research seminar (HIST 696).

Requirements for the Minor

History Minor Course Requirements

Minors must complete a minimum of 2 courses (6 hours) in both Category I and Category II below. The remaining 6 hours may be taken from either category.

Satisfied by 2 HIST courses (6 hours)  

## History Minor Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

### Minor Hours
Satisfied by 18 hours of minor courses.

### Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

### Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

### Minor Graduation GPA
Satisfied by a minimum of a 2.0 GPS in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

## Master of Arts in History

Our terminal Master of Arts degree provides students with rigorous training in the skills of historical thinking, archival research, and the different modes of expression scholars use to communicate their findings to a wide audience. Completely integrated with our Ph.D. program, the M.A. in History at KU offers students the opportunity to develop subject expertise in fields of study, learn the conventions of professional scholarship in History, collaborate with other students, and receive one-on-one career advice and intellectual mentorship from our faculty.

Our M.A. program allows for full-time or part-time study, and has defined tracks in U.S. History and World History. Students also have the opportunity to take coursework outside the department in fields such as African and African-American Studies, Environmental Studies, Museum Studies, and Women, Gender & Sexuality Studies.

Students in our terminal M.A. program are self-funded, and are encouraged to inquire regarding current information for in-state/out-of-state/international tuition costs and university fees.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Graduate Admission

In History at KU, we privilege high-quality graduate advising and mentorship at every stage of a student’s interaction with our department. As such, our application processes for the M.A. and M.A./Ph.D. are geared towards ensuring the best possible fit between faculty and graduate students. Graduate applicants who seek to study at the University of Kansas are **required** to correspond with at least one prospective faculty advisor well in advance of the application deadline. On the most basic level, these preliminary contacts with faculty give applicants a sense of whether or not the prospective advisor is currently taking new students. More than this, these conversations offer candidates for admission a better sense of how they might fit into the program at KU. Our admissions process is designed to educate prospective students about what studying at KU would really be like and about the resources the Department and University possess in their areas of interest, as well as offering an opportunity to get to know some of the people they’d be working with during their time here. Moreover, the early establishment of a relationship between prospective faculty and applicant permits students to refine their applications to better articulate the candidate’s fit with our program. The prospective faculty advisor will be able to more effectively advocate for the applicant’s candidacy based upon this correspondence.

Once candidates for admission have established correspondence with at least one prospective advisor, they must complete the online application through the KU Office of Graduate Admissions. ([https://gradapply.ku.edu/apply/](https://gradapply.ku.edu/apply/)) International or domestic applicants who are non-native speakers of English should carefully review Graduate Studies’ English Proficiency Requirements ([https://gradapply.ku.edu/english-requirements/](https://gradapply.ku.edu/english-requirements/)).

The application deadline is **December 15th** for all applicants. Please schedule the TOEFL exam with this deadline in mind—scores must be received by the application deadline.

- **Statement of Academic Objectives**, including a clear plan for graduate research in a specific field of study. This statement should be largely academic rather than biographical and should achieve the following objectives:
• **Suggest a potential direction for your research at KU as concretely as possible**;
• **Outline how you see an M.A. in History fitting into your broad career goals**; and
• **Identify specific chronological, geographical, and thematic areas of interest**

**Curriculum Vitae**

**Writing Sample (maximum twenty-five pages, double-spaced)**
- The Department is interested in reviewing the best-crafted, most persuasively argued writing sample that applicants are able to provide. Such papers are often derived from an upper-level undergraduate history class in which the student conducted independent research and employed both primary and secondary sources.

**GRE Scores are no longer required**

**Official Transcript** from each institution that has granted you a degree, or at which you are currently enrolled

**Three letters of recommendation** – The letters can be directly uploaded online by those who write the recommendations, or they can be mailed to the University of Kansas, Department of History, ATTN: Graduate Academic Advisor, Wescoe 3650, 1445 Jayhawk Boulevard, Lawrence, KS 66045. A recommendation form for hard copy letters can be downloaded here (https://history.ku.edu/ma/).

Please note that documents, including a writing sample and transcripts, should be uploaded to the application. Applicants should not send hard copies of application materials to the Department of History. When you submit your online application, it is made available to the Department of History for review; yet it is the applicant’s responsibility to ensure the Office of Graduate Studies has received all materials by the deadline. The Department of History Graduate Office cannot process your application and move it forward for consideration by the Graduate Committee until all materials have been received. The Department of History reviews applications for completeness, and the Graduate Program Coordinator will contact you if your application is not complete.

**M.A. Degree Requirements**

The master’s program in history requires satisfactory completion of 30 credit hours of graduate courses including at least 6 hours in history research seminars and the passing of a comprehensive oral examination. Students must complete a minimum of eighteen credit hours in courses numbered 700 or higher.

Soon after admission, students should select a faculty member as their advisor. The advisor directs the student’s work and advises the student on appropriate coursework for their interests.

**Course Requirements**

1. A minimum of 30 hours of credit at the graduate level including the following:
   a. Two HIST 802 Research Seminars
   b. HIST 805 The Nature of History
2. At least 24 hours of the minimum credits must be taken as HIST courses.
3. At least 9 hours of work in courses at the 800 level or higher (excepting HIST 800).
4. At least 18 hours of the minimum credits must be taken at the 700 level or above.

All master’s candidates must produce 2 professional-quality, article-length papers (7500-10000 words) in the 2 required HIST 802 seminars.

**Research Language Requirement**

**Terminal M.A. Students:** Upon admission to the program students should consult with their advisor to determine if their research interests require knowledge of a research language. Students should discuss research language expectations with potential advisors during the application process. If a non-English research language is required, the faculty advisor should designate the primary research language. Students must demonstrate proficiency in the primary research language by the end of their first year in the program. (See the Graduate Handbook (https://history.ku.edu/graduate-resources/) for certification requirements)

If English is sufficient as the primary research language, there is no additional research language requirement for M.A. students.

**For M.A./Ph.D. Students:** Students must complete the Ph.D. Research Language Requirement. (See the Graduate Handbook (https://history.ku.edu/graduate-resources/) for certification requirements)

**M.A. Examination**

**Terminal M.A.:** Students will sit for a ninety-minute oral examination that covers the student’s research fields and the papers prepared in the two research seminars.

**M.A./Ph.D.:** Students will submit final drafts of the two required research seminar papers to their committee for a written evaluation of their work.

See the Graduate Handbook (https://history.ku.edu/graduate-resources/) for additional details of the M.A. Examination process.

**Accelerated Master of Arts in History**

**Note:** Admission to the Accelerated M.A. program is open to current KU undergraduate students only. If you are a non-KU student interested in graduate study, consult information about our M.A. and Ph.D. programs, respectively.

The Accelerated M.A. program in History enables qualified KU students to earn both a Bachelor’s degree and a Master’s degree in history in five years. Students apply to join the accelerated program by January 1 of their Junior year, and spend the following two years completing a mix of undergraduate and graduate coursework.

The program has two tracks, one leading to an M.A. in U.S. History and one leading to an M.A. in World History. The M.A. may be pursued as a terminal degree or as preparation to pursue doctoral studies at KU or elsewhere.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees be completed within the five-year timeframe. All prospective students should discuss their interest in admission to the accelerated program with both the Director of Undergraduate Studies and the Director...
of Graduate Studies as early as possible but no later than Fall of the student’s Junior year.

Prospective students are eligible to apply to the graduate program in their Junior year. Applications are accepted on a rolling basis but should be submitted before the end of the applicant’s junior year. Applications must be received at least 4 weeks prior to start of the student’s second to last undergraduate semester.

The following program requirements must be met by this time:

- Major GPA of at least 3.5 and cumulative GPA of at least 3.00;
- On track to complete all requirements for a B.A. degree in History from KU with one additional year of study beyond the junior year.

Applicants must complete an Application for Graduate Study (https://gradapply.ku.edu/apply/online). Please submit the inquiry form below and contact the Graduate Program Coordinator prior to starting the application. The following information should be gathered in advance and uploaded with the application:

- Two letters of recommendation (preferably from professors in the major). You will be asked to enter the names and e-mail addresses for two recommenders while completing the online application. Your recommenders will automatically receive an e-mail requesting their letters when you submit the application. It is not necessary for your recommenders to send hard copies of their letters to the department if they submit their letters electronically. Should a recommender feel uncomfortable with the online submission process, please contact the department for more options.
- Résumé or curriculum vitae
- A one-page statement of educational and career objectives
- A writing sample, preferably from a history course, 5-10 pages of text not including the bibliography, endnotations, or images following endnotations.

Upon review of the Application for Admission, the History Department will notify the student of his or her eligibility to begin coursework in the program the following Fall semester. Final acceptance to the graduate program will be contingent upon the following:

- Successful completion of all requirements for the Bachelor’s degree;
- Grades of B+ or above in all History graduate-level coursework taken in the final year of undergraduate study.
- Submission of a Program of Study

Program of Study

- After acceptance to the program, M.A. students will submit an M.A. Program of Study Worksheet. Students are expected to identify three fields of study (geographical, thematic, and chronological) in consultation with their primary advisor. These fields must be approved by the primary advisor and Director of Graduate Study by April 15. The Program of Study Worksheet also designates a Primary Advisor and two other faculty advisors as the official members of the student’s M.A. Committee.

To express interest and request further information about the History Accelerated M.A. Program, click one of the links below to complete a short form.

### History Capstone Seminar

Majors must complete a capstone research experience in which they research and write an original thesis based on primary sources. Alternatively, majors with a GPA above 3.5 may choose to write a senior honors thesis. 3 of these credit hours will also count toward the master’s degree and must be completed during the Senior year.

Satisfied by one of the following:

- HIST 696 Seminar in: _____ or
- HIST 690 Honors Course in History and HIST 691 Undergraduate History Honors Seminar

### History Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:
**Major Hours**
Satisfied by 36 hours of major courses. No more than 2 HIST 492 (https://catalog.ku.edu/search/?P=HIST%20492) Readings in History courses may be applied to the major. Only courses taken in the Department of History or cross-listed in other units are accepted for credit toward the major.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major. Of these 27 hours, at least 6 hours (two courses) must be taken at the 500-699 level (in addition to HIST 696).

**Major Junior/Senior Graduation (300+) GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Proficiency in a foreign language is required for the M.A. degree if pursuing an MA with a focus outside the United States. Students in the accelerated program should complete at least the fourth semester of a relevant foreign language with a grade of B or better by the end of Year 4 or be prepared to demonstrate proficiency by passing the department’s language proficiency exam at the beginning of Year 5. Should the student not pass the proficiency exam, s/he will be expected either to enroll in the appropriate level of language study or establish a plan for passing the language exam at the start of the second semester of Year 5.

**Master’s Degree Requirements**
The master’s program in history requires satisfactory completion of 30 credit hours of graduate courses. In addition to the 12 credit hours of graduate coursework taken during the Senior year, students must complete an additional 18 credit hours of graduate coursework once fully admitted to the master’s program. These include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 802</td>
<td>Seminar in: _____</td>
<td>3</td>
</tr>
<tr>
<td>HIST 805</td>
<td>The Nature of History</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives (12)**
At least 12 hours of electives numbered 800 or above. Students may take up to 3 of these hours outside of the History department.

No more than 9 hours of Electives numbered 500-799. Students in the Accelerated Masters should plan to take 9 hours of 500+ electives before the end of their fourth year.

**MA Examination**
In the final semester of enrollment, terminal M.A. degree will sit for a ninety-minute oral examination that covers the student’s research fields and the papers prepared in the undergraduate capstone seminar (HIST 696 or 690/691) and the graduate research seminar (HIST 802), respectively.

The M.A. exam tests the student’s mastery of the scholarly debates pertinent to their field and their facility with advanced methods of historical research and writing.

The examination will cover basic historiographical questions, and the student should offer evidence of knowledge of the field equivalent to the material contained within a survey textbook. Moreover, the exam is designed to permit the student to demonstrate competency in engaging in an academic conversation. The examining committee will also discuss the content and significance of the research papers and advise upon future directions in the student’s submission of these papers for publication.

A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook, available online at https://history.ku.edu/graduate-resources (https://history.ku.edu/graduate-resources/).

**Progression Requirements**
Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Upon approval to begin graduate coursework in the accelerated program, the student must meet with the DGS to plan the final year of undergraduate study.
2. In the final semester of undergraduate study, the department will review the student’s performance in graduate-level History courses taken in the final year. The student must earn a grade of B+ or better in each of these courses to be eligible for regular admission to the master’s degree.
3. Following completion and award of the undergraduate degree, the admitted student will again meet with the DGS to review the course plan for the final year of graduate study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated.
4. The student will not be permitted to enroll in courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the Accelerated M.A. within 2 to 3 semesters of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Doctor of Philosophy in History

Earning a KU Ph.D. in History requires a mastery of research skills, including the ability to contextualize and interpret primary sources, knowledge of the languages relevant to one’s research, and the ability to develop an original historical argument that contributes to the historiography of one’s field. Moreover, a KU Ph.D. in History certifies that students can communicate complex ideas persuasively in writing and orally. It also attests to the readiness of a graduate of our program to teach history and advise undergraduates at the level of the university classroom and to train graduate students.

Our program privileges advanced training in History that prepares and encourages students to research and write “across and between” conventionally-defined historiographical fields. To develop such a research program, students read in geographic, chronological, and thematic fields. Fields may be geographic, chronological, and/or thematic to provide maximum flexibility. Ph.D. students designate one major and two minor fields in consultation with their primary advisor and advisory committee. All students who are admitted into the Ph.D. program for full-time study, except those who have secured guaranteed external institutional funding, are provided with 5 years of funding in the form of a fellowship, teaching, or research position contingent on funding availability. International students whose native language is not English are eligible to hold a GTA appointment, provided they meet the University’s and the Department’s standards for written and spoken English. Applicants who indicate that they are seeking Department funding will be considered automatically for nomination for University-wide fellowships and grants for entering graduate students.

For statistics regarding our program, please see our Doctoral Program Profile (http://graduate.ku.edu/sites/graduate.ku.edu/files/docs/dpp/ DPP_A_HIST_HIST.pdf), which demonstrates our success at funding and placing current and recent graduates.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Admission

In History at KU, we privilege high-quality graduate advising and mentorship at every stage of a student’s interaction with our department. As such, our application processes for the M.A. and Ph.D. are geared towards ensuring the best possible fit between faculty and graduate students. Graduate applicants who seek to study at the University of Kansas are required to correspond with at least one prospective faculty advisor well in advance of the application deadline. On the most basic level, these preliminary contacts with faculty give applicants a sense of whether or not the prospective advisor is currently taking new students. More than this, these conversations offer candidates for admission a better sense of how they might fit into the program at KU. Our admissions process is designed to educate prospective students about what studying at KU would really be like and about the resources the Department and University possess in their areas of interest, as well as offering an opportunity to get to know some of the people they’d be working with during their time here. Moreover, the early establishment of a relationship between prospective faculty and applicant permits students to refine their applications to better articulate the candidate’s fit with our program. The prospective faculty advisor will be able to more effectively advocate for the applicant’s candidacy based upon this correspondence.

Once candidates for admission have established correspondence with at least one prospective advisor, they must complete the online application through the KU Office of Graduate Admissions (https://gradapply.ku.edu/apply/). International or domestic applicants who are non-native speakers of English should carefully review Graduate Studies’ English Proficiency Requirements (https://gradapply.ku.edu/english-requirements/).

The application deadline is December 15 for all applicants. Please schedule the TOEFL exam with this deadline in mind—scores must be received by the application deadline.

The application comprises the following:

- **Statement of Academic Objectives** (two pages, double-spaced), including a clear plan for graduate research in a specific field of study. This statement should be largely academic rather than biographical and should achieve the following objectives:
  - Suggest a potential direction for your research at KU as concretely as possible;
  - Outline how you see a Ph.D. in History fitting into your broad career goals; and
  - Identify specific chronological, geographical, and thematic areas of interest

- **Curriculum Vitae**

- **Writing Sample** (maximum twenty-five pages, double-spaced). The Department is interested in reviewing the best-crafted, most persuasively argued writing sample that applicants are able to provide. Such papers are often derived from an upper-level undergraduate history class in which the student conducted independent research and employed both primary and secondary sources.

- **GRE Scores are not required**

- **Official Transcript** from each institution that has granted you a degree, or at which you are currently enrolled

- **Three letters of recommendation** – The letters can be directly uploaded online directly by those who write the recommendations, or they can be mailed to the University of Kansas, Department of History, ATTN: Graduate Academic Advisor, Wescoe 3650, 1445 Jayhawk Boulevard, Lawrence, KS 66045. A recommendation form for hard copy letters can be downloaded here (https://history.ku.edu/phd/).

Please note that documents, including a writing sample and transcripts, should be uploaded to the application. Applicants should not send hard copies of application materials to the Department of History.

When you submit your online application, it is made available to the Department of History for review, yet it is the applicant’s responsibility to ensure the Office of Graduate Studies has received all materials by the deadline. The Department of History Graduate Office cannot process your application and move it forward for consideration by the Graduate Committee until all materials have been received. The Department of History reviews applications for completeness, and the Graduate Program Coordinator will contact you if your application is not complete.

**Ph.D. Degree Requirements**

Students normally must complete the M.A. degree before they are eligible to enter the Ph.D. program. Students who enter the M.A. program may either complete the degree or petition for direct admission to the Ph.D. program. This petition first must be endorsed by the student’s advisor and the field committee and then be approved by the department’s graduate committee.

**Course Requirements**

1. A minimum of 33 hours of credit at the graduate level including the following:
   a. A minimum of three historiographical colloquia numbered HIST 801 and above
   b. Two HIST 802 Research Seminars
   c. HIST 805 The Nature of History
   d. HIST 998 Portfolio Preparation

2. At least 24 hours of the minimum credits must be taken as HIST courses.

3. At least 18 hours of the minimum credits must be taken at the 700 level or above.

See the Graduate Handbook (https://history.ku.edu/graduate-resources/) for a list of elective graduate courses.

**Research Skills and Responsible Scholarship**

In order to fulfill the University research skills and responsible scholarship requirement, all graduate students in History must take HIST 805 and HIST 802.

**Note:** Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral research skills and responsible scholarship are listed in the Graduate Studies section of the online catalog and in the KU Policy Library (https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/).

**Research Language Requirement**

Upon admission to the program students should consult with their advisor to determine if their research interests require knowledge of a language other than English. Students should discuss research language expectations with potential advisors during the application process. If a non-English research language is required, the faculty advisor should designate the primary research language. Students must certify
proficiency in the primary research language by the end of their first year in the program. Students whose primary research language is English may certify proficiency in a secondary research language designated by their advisor in order to fulfill this requirement. Students whose primary research language is English and have not certified a secondary research language must fulfill the Alternative Doctoral Skills Requirement. See the Graduate Handbook (https://history.ku.edu/graduate-resources/) for language certification requirements.

**Alternative Doctoral Skills Requirement**

Students who have not certified a non-English primary or secondary research language must enhance their historical studies by engaging in additional training in skills that augment their research and/or professional interests. This training may be fulfilled by completing any one of the following options:
1. Pass (with a B or above) a 3+ hour course on method or theory in another academic unit.
2. Pass (with a B or above) a 3+ hour course that provides a professional or research related skill.
3. Participate in an internship, practicum, volunteer experience that connects to the study, dissemination, presentation, or preservation of history.
4. Complete a graduate certificate in related field or interdisciplinary approach.
5. Students may petition the Graduate Committee to have an experience or combination of experiences be considered as fulfilling this requirement. See the Graduate Handbook (https://history.ku.edu/graduate-resources/) for additional details on how to complete this requirement.

**Portfolio and Oral Comprehensive Exam**

A written portfolio of the student's work and an oral examination that will provide the candidate with an opportunity to demonstrate the knowledge they have acquired and respond to questions from the committee about their written portfolio. The student must pass their portfolio exam by the end of their fifth semester of study. Any exception to taking the portfolio exam as outlined above requires a petition to the History Graduate Committee.

**Dissertation Prospectus Defense**

Students will defend their Dissertation Prospectus in an oral examination with their Advisory committee the semester following their passing of the Portfolio Exam. Students must successfully defend a dissertation prospectus by the end of their sixth semester. Any exception to this requires a petition to the History Graduate Committee.

**Doctoral Dissertation and Defense**

The dissertation is a book-length piece of original scholarship that makes a significant contribution to historical knowledge. The candidate for the Ph.D. must defend this piece of scholarship in an oral examination.

For more information about the Ph.D. program in History, consult the Graduate Handbook (https://history.ku.edu/graduate-resources/)

---

**Department of History of Art**

**Why study the history of art?**

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

**Undergraduate Programs**

The curriculum introduces students to diverse forms of art and visual culture from prehistory to the present in Europe, the Americas, East Asia, Africa, and the Middle East, both within national traditions and transnationally. Students develop depth and breadth of knowledge as they probe the ways in which art and visual culture at once reflect and shape the societies in which they are produced. The study of art history fosters visual and cultural literacy and critical thinking, research, and communication skills that are valuable for a variety of careers.

Several introductory courses are offered every semester. These include 1- and 2-semester surveys in Western art (HA 100, HA 300, HA 150, and HA 151), HA 261 Introduction to Modern Art, HA 166 The Visual Arts of East Asia, HA 367 Art and Culture of Japan, HA 368 Art and Culture of China, and HA 330 Italian Renaissance Art.

**Courses for Nonmajors**

All courses are open to nonmajors if they have the necessary prerequisite, which in most cases is one of the introductory courses. An undergraduate advisor counsels nonmajors who need help selecting a course.

**Graduate Programs**

The Kress Foundation Department of Art History offers graduate art history courses in European, American, and East Asian art. Students may pursue graduate degrees in European and American Art/Global Modern and Contemporary Art or East Asian Art.

The M.A. provides students with a broad and deep knowledge of the visual arts, as well as study of the basic concepts, theories, and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation for doctoral studies at KU or to apply elsewhere.

The Combined M.A./Ph.D. is a streamlined degree track intended for students who want to pursue the Ph.D. in art history at KU, but who do not yet hold the M.A. degree in art history.

The Ph.D. is intended for students who hold the M.A. degree in art history. Students who are interested in enrolling in graduate-level coursework in the Art History Department without formal admission to a graduate program at KU are encouraged to apply for non-degree seeking student status. See the department’s admission webpage (https://arthistory.ku.edu/graduate-admission/) for further details.

**Courses**

**HA 100. Introduction to Western Art History. 3 Credits. HT H**

A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors.
Does not count toward the 30 required hours in the major. Not open to students with credit in HA 150, HA 151, HA 160, HA 161, or HA 300.

HA 105. Special Study: ____. 1-6 Credits. H
This course is designed for the study of special topics in art history at the introductory level, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies.

HA 150. History of Western Art: Ancient Through Medieval. 3 Credits. HT H
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 160.

HA 151. History of Western Art: Renaissance to Contemporary. 3 Credits. H
A survey of art in the West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 161.

HA 160. History of Western Art: Ancient Through Medieval, Honors. 3 Credits. HT H
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 150. Prerequisite: Membership in the University Honors Program or consent of instructor.

HA 161. History of Western Art: Renaissance to Contemporary, Honors. 3 Credits. H
A survey of the art in West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 151. Prerequisite: Membership in the University Honors Program or consent of instructor.

HA 166. The Visual Arts of East Asia. 3 Credits. W
This course examines major forms of artistic expression in China, Korea, and Japan. Discussions introduce basic art concepts, the themes and purposes of art, and different art styles in East Asia from ancient times to the present. Students develop critical skills through analyzing, writing about, and talking about art and East Asian cultures. Students also learn about important museums in North America and Asia. No prior knowledge of art history or East Asia expected.

HA 177. First Year Seminar: ____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in History of Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

HA 261. Introduction to Modern Art. 3 Credits. HT H
This course considers the efforts of artists to explore and represent their place in the modern world. The political, industrial, and scientific revolutions of the late 18th and 19th centuries in the West overturned the certainties of traditional authority and liberated artists to raise new questions. Innovations ranged from Impressionism’s light-filled landscapes to Surrealism’s dream imagery. Abstract Expressionism’s paint-splattered canvases, and Pop Art’s celebration of consumer culture. This course addresses these and other modern art movements, emphasizing developments in Europe and the United States through the late 20th century and concluding with international contemporary art in an age of globalization. Intended for non-majors.

HA 300. Introduction to Western Art History. 3 Credits. HT H
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 100, HA 150, HA 151, HA 160, or HA 161.

HA 305. Special Study: ____. 1-6 Credits. H
This course is designed for the study of special topics in art history, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies.

HA 311. The Art and Architecture of the British Isles. 3 Credits. H

Taught in the British Summer Institute in the Humanities Study Abroad program, this course offers an introductory survey of British art and architecture. Through classroom lectures, readings, and visits to museums, churches, and other historic sites, selected works of art and architecture are analyzed in terms of their formal qualities, iconography, and cultural context. Prerequisite: Approval for enrollment in the British Summer Institute in the Humanities Study Abroad program through the KU Office of Study Abroad.

HA 315. The Prehistory of Art. 3 Credits. S
A survey of prehistoric art focusing on the material record and interpretations of rock art (paintings, engravings on rock surfaces in rock-shelters, caves and in open air sites) and portable art created by prehistoric people. The emphasis is on the small-scale societies (hunter-gatherer and early food producers) around the world before the appearance of written records in respective geographic areas. Environmental, social and cultural contexts in which these art forms were created are discussed along with a review of past scholarship and current interpretive approaches to this old and enduring expression of human creativity. Course may be offered in lecture or online format. (Same as ANTH 315.)

HA 322. European Architecture 300-1300. 3 Credits. H
This course surveys the architecture of Western Europe from the 4th through the 14th centuries, concentrating on 750-1300. The medieval millennium was an era of constant conflict: military, diplomatic, intellectual, ideological, theological, and stylistic. Within a chronological framework, this course will examine selected works of architecture and urban design, paying special attention to the tension between architectural innovation and traditional practices. Its mission is to explore why and how these buildings and sites were produced, to understand how they communicate their patrons and makers’ ideas, and to discover their audiences’ responses to them. Students will consider the reinterpretation and transformation of the classical orders, the adaptation and transformation of several ancient building types, the establishment and development of architecture to serve newly emerging nation-states and religions, the evolution of vaulting, the changing conception of the wall, and the representational qualities of medieval architecture. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 325. Aegean Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca.
3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaean, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 525 or HA 525. No knowledge of Greek or Latin is required. (Same as CLSX 325.)

HA 326. Greek Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 526 or HA 526. No knowledge of Greek or Latin is required. (Same as CLSX 326.)

HA 327. Roman Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome’s influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 527 or HA 527. No knowledge of Greek or Latin is required. (Same as CLSX 327.)

HA 330. Italian Renaissance Art. 3 Credits. H/W
A survey of the art and architecture of Italy from c. 1300 to 1550. Special emphasis is placed on regional styles and the private, political, and devotional contexts in which works of art and architecture functioned. Some of the artists whose works are considered are Giotto, Duccio, Donatello, Botticelli, Leonardo, and Michelangelo.

HA 331. Northern European Art from Van Eyck to Brueghel. 3 Credits. H
This course examines Bohemian, French, Netherlands, and German art in the 14th-16th centuries in settings ranging from religious foundations to noble courts and cities. Participants in the course will consider painting, prints, sculpture, and manuscripts from the era of Jan van Eyck to that of Hieronymus Bosch and Pieter Brueghel the Elder. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor.

HA 333. Rococo to Realism: Painting in Europe c. 1750-1848. 3 Credits. H
This course considers European painting c. 1750 to 1848 within the context of dramatic political and industrial revolutions. Exploring the power of the visual to engage with broader circumstances and to effect change, we will examine the ways in which shifting constructions of gender, empire, colonialism, race, slavery, and class were addressed by such artists as Watteau, David, Vigée-Lebrun, Delacroix, Géricault, Goya, Turner, Constable, Ingres, Daumier, Bonheur, and Courbet. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 533/WGSS 533. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 334. Impressionism and Post-Impressionism: 1848-1900. 3 Credits. H
This course considers French painting 1848 to 1900, a period marked by unprecedented technological advancements, the restructuring of Paris, and the rise of consumer culture. As large sections of the city were leveled to make way for broad boulevards, cafés, and department stores, some artists strove to represent the ever-changing spectacle of urban life; others found their inspiration away from the city. Focusing on Manet, Degas, Cassatt, Morisot, Monet, Renoir, Seurat, Gauguin, Van Gogh, and Cézanne, we will explore how artists engaged with shifting constructions of modernity, gender, fashion, public and private, empire, race, class, and consumer and leisure cultures. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 534/WGSS 534. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 335. Renaissance Architecture in Italy. 3 Credits. H
This course examines the history of Italian Renaissance architecture from its origins in the 15th century to its transformation in the 16th, featuring (but not limited to) the work of three of its most celebrated exponents: Filippo Brunelleschi, Michelangelo Buonarroti, and Andrea Palladio. Students will explore how and why 15th and 16th-century architects and patrons appropriated and interpreted both ancient and medieval forms to create the architectural culture of the Renaissance. We will investigate the revival and transformation of the classical architectural language, the emerging notion of architectural authorship, the ability of architectural forms and materials to convey particular meanings to particular audiences, the deployment of architecture as an instrument of power, and the birth of architectural history and theory. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 535. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 337. Contemporary Art. 3 Credits. H
This course surveys the dynamic developments in art practice worldwide since the 1980s, highlighting innovations in such mediums as painting, photography, sculpture, installation, performance, video, and social practice. The course explores contemporary artists’ engagement with such themes as the body, identity, politics, spirituality, ecology, technology, time, globalization, and social justice. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 567. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 340. Special Study in Asian Art Before 1900: _____. 1-6 Credits. H
This course is designed for the study of special topics in Asian art before 1900, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500 levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels.

HA 342. Special Study in 18th/19th-Century European or American Art: _____. 1-6 Credits. H
This course is designed for the study of special topics in European or American art of the 18th and/or 19th centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500 levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels.

HA 343. Special Study in 20th/21st-Century Art: _____. 1-6 Credits. H
This course is designed for the study of special topics in art of the 20th and/or 21st centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500 levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels.

HA 344. Manga: Histories and Theories. 3 Credits. H
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging
narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 544. (Same as EALC 344.)

HA 347. Ceramics of East Asia. 3 Credits. NW H
This course explores the history of East Asian ceramics from the 10th to the late 20th century. Using critical approaches from art history, anthropology, sociology, literature, and materials science, students discuss the historiography and connoisseurship as well as the production, design, and consumption of ceramics such as Yaozhou celadon, Temmoku and Raku tea bowls, stamped and slip-brushed Punch’ong ware, and Ming blue-and-white porcelain. This is a hybrid course, which means that most of the material and assignments of the course are online. However, students are required to participate in 6-7 field trips, including trips to the Spencer Museum of Art, the kilns located on campus, and a demonstration of the Japanese tea ceremony. This course is offered at the 300 and 500-level with additional assignments at the 500-level. Not open to students with credit in HA 547. (Same as AAAS 569/HA 569. (Same as AAAS 353.)

HA 353. Modern and Contemporary African Art. 3 Credits. H
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists’ engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 569/HA 569. (Same as AAAS 353.)

HA 354. Japanese Prints. 3 Credits. NW H/W
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500-level. (Same as EALC 354.)

HA 360. African Art and Gender. 3 Credits. HL H
How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 780/HA 780. (Same as AAAS 380 and WGSS 380.)

HA 361. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 561 or REL 511. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as EALC 360.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 362. Ceramics of Korea. 3 Credits. H
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 562. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as EALC 372.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 363. Modern Korean Art and Culture. 3 Credits. H
This course is a thematic introduction to Korean art and culture with an emphasis on modern and contemporary Korea. Pre-modern works are contextualized with respect to contemporary issues. Students learn how to conduct a comprehensive analysis of an artwork by considering the political, historical and social conditions of its time within a broader East Asian cultural framework. (Same as EALC 373.) Prerequisite: An introductory course in art history at the college level, or consent of instructor.

HA 367. Art and Culture of Japan. 3 Credits. NW H/W
The history of Japanese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Japanese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as EALC 367.)

HA 368. Art and Culture of China. 3 Credits. NW H/W
The history of Chinese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions between different ethnic groups, and the roots of modernism in Chinese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as EALC 378.)

HA 370. Art of the United States. 3 Credits. H
This course examines the history of art in the United States from the late-colonial period of the 1700s through to the mid-twentieth century. With a focus on the central role that artistic production and consumption played in constructing American social identities and culture, this course pays particular attention to the contributions of minority and marginalized groups as active agents in the development of a national culture. Other topics include transnational perspectives on American art, the influence of European traditions, ideas of modernity and the modern artist in American culture, and relationships between art and material culture in American life. This course is offered at the 300 and 500 level with additional work required at the 500 level. Not open to students with credit in HA 570. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 371. Modern Sculpture. 3 Credits. H
Since the 1870s, modern sculptors have dramatically transformed their medium, pioneering new forms of figuration and abstraction, investigating new materials and processes, and developing installation and site-specific art. With a focus on Europe and the U.S. through the 1980s, expanding to...
global trends of recent decades, this course examines how this happened, considering the work of major artists from Rodin, Matisse, Picasso, and Brancusi to Donald Judd, Eva Hesse, Anish Kapoor, Jeff Koons, and David Hammons. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 571. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 372. Baroque Art in Europe. 3 Credits. H
This course surveys significant 17th-century paintings, sculpture and architecture that were produced in Italy, Spain, France and the Southern and Northern Netherlands. Artists whose works are discussed include Caravaggio, Bernini, Velazquez, Rubens, Rembrandt and Vermeer. Artistic elements of individual works, major changes in patronage, and the religious, political, economic and cultural contexts in which the art was produced are examined. Assigned readings present a range of methodological perspectives.

HA 376. Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque. 3 Credits. H
This course surveys significant 17th-century paintings, prints and drawings produced in the Northern and Southern Netherlands (modern-day Netherlands and Belgium). Artists whose works will be discussed include Peter Paul Rubens, Rembrandt van Rijn, Johannes Vermeer, and other painters of scenes of daily life, landscapes, cityscapes, portraits and still-lifes. Artistic elements of individual works and their relationship to major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 576. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 377. African Design. 3 Credits. H/W
This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 677/HA 677. (Same as AAAS 377.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

HA 380. History of Photography. 3 Credits. H
An introduction to the history of photography. We will consider strategies used over its history to make photography an art, a witness to truth, a record of fact, a purveyor of falsehoods, a mass medium, a hawkers of goods and ideologies, an agent of political change, a means of remembrance, and more. Not open to students with credit in HA 580. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 385. The Art of Buddhism. 3 Credits. H/W
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 585. (Same as EALC 385.)

HA 386. Japanese Painting. 3 Credits. NW H/W
A survey covering the development of Japanese painting from the seventh century to the early twentieth century. Topics include Buddhist and other religious paintings, narrative handscrolls, ink painting, decorative folding screens, ukiyo-e prints, and western-style paintings from the late eighteenth through early twentieth centuries. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 586. (Same as EALC 386.) Prerequisite: An introductory course in Asian art or consent of instructor.

HA 388. Modern and Contemporary Visual Arts of Japan. 3 Credits. H
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 588. (Same as EALC 388.)

HA 390. Special Study in African Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

HA 391. Special Study in Asian Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

HA 392. Special Study in Ancient Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

HA 393. Special Study in Medieval Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

HA 394. Special Study in Renaissance Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

HA 395. Special Study in Baroque Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

HA 396. Special Study in American Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in American art. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

**HA 397. Special Study in Modern Art:** _____ 3-6 Credits  H
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels.

**HA 468. Art and Culture of China, Honors.** 3 Credits  NW H/W
An introduction to the arts of China using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 368, with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 268 or HA 368.

**HA 488. Chinese Painting, Honors.** 3 Credits  NW H/W
A survey of the development of painting in China, beginning with the earliest forms of figural and landscape depiction. Emphasis will be placed on the major painting traditions of the Song, Yuan, Ming, and Qing Dynasties. Prerequisite: An introductory course in art history or Eastern Civilizations and membership in the University Honors Program or consent of instructor.

**HA 505. Special Study:** _____ 1-6 Credits  H
This course is designed for the study of special topics in art history on a trial basis, open to both undergraduate and graduate students. Prerequisite: An introductory-level course in art history, appropriate to the specific special study topic; or consent of instructor.

**HA 506. Early Medieval and Romanesque Art.** 3 Credits  H
This course examines the art of Europe from the Early Christian era through the Romanesque period, up to 1200. Architecture, sculpture, manuscript illumination, metalwork and painting are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of the instructor.

**HA 507. Gothic Art.** 3 Credits  H
This course examines the art of Europe during the Gothic period, from 1140-1500. Architecture, sculpture, manuscript illumination, metalwork, painting and furniture are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of instructor.

**HA 510. Medieval Manuscripts and Early Printed Books.** 3 Credits  H
Students study the history of the book from 300 to 1500 A.D., concentrating on the role of visual imagery in books and the place of books in medieval and renaissance culture. In addition to discussing the relation between text and image, and studying the stylistic contexts for ancient, medieval, and Renaissance illumination and early woodcut illustration, participants in this course consider such additional topics as methods of book production, the development of cycles of illustration for religious and secular books, and the relationship between manuscripts and early printed books. Lectures and discussion are supplemented by visits to the fine collection of manuscripts, printed books, and facsimiles in the Kenneth Spencer Research Library. Prerequisite: An introductory course in Western art history at the college level, or consent of the instructor.

**HA 511. From Court to City: Northern Art.** 3 Credits  H
This course will examine painting, manuscripts, metalwork, tapestry, ivories, prints, and ephemeral arts such as the material culture of feasts or the entry processions of rulers into cities in order to gain insight into the place of the arts in late medieval and Renaissance culture in the fourteenth and fifteenth centuries. In addition to discussion of noble, clerical and civic patronage, and of artistic style, participants in this course will consider such additional topics as artistic production and the development of art markets in cities. Prerequisite: HA 100, HA 150, or consent of instructor.

**HA 512. Humanism and Reform: 16th Century Northern European Art.** 3 Credits  H
This course explores the history of Northern European painting, manuscripts, printed books, sculpture, prints, and architecture paying particular attention to the artists and patrons that produced and consumed art, the function of artistic objects in settings ranging from church to palace, and the impact of humanism and the Reformation on the arts. Bosch, Brueghel, Cranach, Dürrer, and Holbein will be considered among other artists. Prerequisite: HA 100, HA 150, or consent of instructor.

**HA 517. Directed Readings.** 1-6 Credits  U
Supervised study and research into specialized areas of art history.

**HA 525. Aegean Archaeology and Art.** 3 Credits  H/W
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaens, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 325 or HA 325. No knowledge of Greek or Latin is required. (Same as CLSX 525.)

**HA 526. Greek Archaeology and Art.** 3 Credits  H/W
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 326 or HA 326. No knowledge of Greek or Latin is required. (Same as CLSX 526.)

**HA 527. Late Medieval Art in Italy.** 3 Credits  H
This course examines the history of paintings, sculptures and buildings produced in Italy from c. 1250 to 1400. Important individual works, artists, and decorative complexes, such as Giotto's Scrovegni (Arena) Chapel, are analyzed in terms of their stylistic, geographical, social, historical, devotional, and literary contexts. Current theories and controversies pertinent to the history and study of 13th- and 14th-century Italian art are also addressed. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

**HA 528. The Spatial Arts of Urban Italy.** 3 Credits  H
This course examines the central role played by the arts of urbanism, architecture, and monumental sculpture in shaping the distinctive civic cultures of Italy at the threshold of the Renaissance, 1200-1550. It will pay particular attention to the republics of Florence and Venice, but also
consider papal Rome and Pienza, and a changing selection of Italy’s magnificent court cities (including Milan, Padua, Parma, and Verona). Prerequisite: HA 100, HA 150, or the equivalent, and an upper-level (300-level or above) course in art history or Western European culture, or consent of instructor.

HA 529. Archaeology and Art of the Ancient Near East. 3 Credits. H

A cross-cultural survey of the material remains of the major civilizations of the ancient Near East, including Anatolia, Mesopotamia, the Levant, and Egypt from Neolithic period to the rise of the Roman empire (ca. 6000 B.C.E. - 30 B.C.E.). Includes lectures with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as CLSX 529.)

HA 533. Rocco to Realism: Painting in Europe c. 1750-1848. 3 Credits. H

This course considers European painting c. 1750 to 1848 within the context of dramatic political and industrial revolutions. Exploring the power of the visual to engage with broader circumstances and to effect change, we will examine the ways in which shifting constructions of gender, empire, colonialism, race, slavery, and class were addressed by such artists as Watteau, David, Vigée-Lebrun, Delacroix, Géricault, Goya, Turner, Constable, Ingres, Daumier, Bonheur, and Courbet. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 333. (Same as WGSS 533.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 534. Impressionism and Post-Impressionism: 1848-1900. 3 Credits. H

This course considers French painting 1848 to 1900, a period marked by unprecedented technological advancements, the restructuring of Paris, and the rise of consumer culture. As large sections of the city were leveled to make way for broad boulevards, cafés, and department stores, some artists strove to represent the ever-changing spectacle of urban life; others found their inspiration away from the city. Focusing on Manet, Degas, Caillebotte, Morisot, Cassatt, Monet, Renoir, Seurat, Gauguin, Van Gogh, and Cézanne, we will explore how artists engaged with shifting constructions of modernity, gender, fashion, public and private, empire, race, class, and consumer and leisure cultures. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 334. (Same as WGSS 534.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 535. Renaissance Architecture in Italy. 3 Credits.

This course examines the history of Italian Renaissance architecture from its origins in the 15th century to its transformation in the 16th, featuring (but not limited to) the work of three of its most celebrated exponents: Filippo Brunelleschi, Michelangelo Buonarroti, and Andrea Palladio. Students will explore how and why 15th and 16th-century architects and patrons appropriated and interpreted both ancient and medieval forms to create the architectural culture of the Renaissance. We will investigate the revival and transformation of the classical architectural language, the emerging notion of architectural authorship, the ability of architectural forms and materials to convey particular meanings to particular audiences, the deployment of architecture as an instrument of power, and the birth of architectural history and theory. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 335. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 536. Islamic Art and Architecture in Africa. 3 Credits. H

Study of Islamic art and architecture in various cultural and geographical settings, from the first mosques of North African and the Swahili coast to contemporary Islamized masquerades in West Africa. We consider art objects and architectural sites in terms of religious practice, trade and commerce, ritual and political power, and contemporary expression. (AAAS 536.) Prerequisite: AAAS 102, AAAS 103, HA 100, or HA 150; or permission of instructor.

HA 537. Roman Archaeology and Art. 3 Credits. H/W

An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire, including its influence on art and architecture, and on society and politics. The course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of art. This course is offered at the 300 and 500-level with additional assignments at the 500 level. Not open to students with credit in CLSX 327 or HA 327. No knowledge of Greek or Latin is required. (Same as CLSX 527.)

HA 538. Pompeii and Herculaneum. 3 Credits. H

An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as CLSX 538, HUM 538.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor.

HA 540. Special Study in Asian Art Before 1900: ______. 1-6 Credits. H

This course is designed for the study of special topics in Asian art before 1900, including courses taught through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in Asian art history, or consent of the instructor.

HA 543. Special Study in 20th/21st-Century Art: ______. 1-6 Credits. H

This course is designed for the study of special topics in art of the 20th and/or 21st centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 544. Manga: Histories and Theories. 3 Credits. H

Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 344. (Same as EALC 544.) Prerequisite: A college level introduction to Asian art history or Asian studies, or consent of instructor.
HA 545. Early Chinese Art. 3 Credits. NW H
A survey of Chinese art from Neolithic times through the Han Dynasty (ca. 200 C.E.). Emphasis will be placed on recent archaeological excavations and also on the development of bronze vessels of the Shang and Zhou Dynasties. Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 546. Chinese Sculpture. 3 Credits. H
A survey of Chinese sculpture from the Shang dynasty through the Song dynasty (1600 BCE-1279 CE), focused on sculptural programs in native funerary art and Buddhist temples and cave-shrines.

HA 547. Ceramics of East Asia. 3 Credits. NW H
This course explores the history of East Asian ceramics from the 10th to the late 20th century. Using critical approaches from art history, anthropology, sociology, literature, and materials science, students discuss the historiography and connoisseurship as well as the production, design, and consumption of ceramics such as Yaozhou celadon, Temmoku and Raku tea bowls, stamped and slip-brushed Punch'ong ware, and Ming blue-and-white porcelain. This is a hybrid course, which means that most of the material and assignments of the course are online. However, students are required to participate in 6-7 field trips, including trips to the Spencer Museum of Art, the kilns located on campus, and a demonstration of the Japanese tea ceremony. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 347. Prerequisite: A college level introduction to Asian art history or Asian studies, or consent of instructor.

HA 548. Japanese Prints. 3 Credits. H
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Prerequisite: HA 100, or the equivalent, or consent of instructor.

HA 549. Chinese Painting. 3 Credits. H
An introductory survey of painting in China from the 7th through the 19th centuries. Prerequisite: One course in art history, or in East Asian languages & cultures; or consent of instructor.

HA 550. Capstone in Art History: ______. 3 Credits. H
An advanced course dedicated to the in-depth study of special topics in art history. Students conduct research on a question within the parameters of the course topic and produce a research product that integrates knowledge from within the discipline of art history or in combination with other disciplines to generate new ideas. May be repeated for credit if content varies. Prerequisite: Junior or senior standing and twelve hours of art history, or consent of the instructor.

HA 554. Japanese Prints. 3 Credits. NW H/W
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Prerequisite: An introductory course in art history or consent of instructor.

HA 561. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 361. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as REL 511.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 562. Ceramics of Korea. 3 Credits. H
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 362. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 564. European Art, 1900-1945. 3 Credits. H
A detailed survey of modern European art from the turn of the century through World War II. Movements to be considered may include post-impressionism, cubism, constructivism, dada, and surrealism. Graduate students may be expected to do additional reading and writing assignments. Prerequisite: HA 100, or the equivalent, or consent of instructor.

HA 566. Art From 1945 to the 1980s: Modernism to Post-Modernism. 3 Credits. H
An international survey of modern and post-modern art from World War II to the 1980s. Topics may include abstract expressionism, pop art, minimalism, happenings and performance art, earth works, conceptual art, feminist art, photo-realism, the craft revival, and new media. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, or the equivalent, or consent of instructor.

HA 567. Contemporary Art. 3 Credits. H
This course surveys the dynamic developments in art practice worldwide since the 1980s, highlighting innovations in such mediums as painting, photography, sculpture, installation, performance, video, and social practice. The course explores contemporary artists' engagement with such themes as the body, identity, politics, spirituality, ecology, technology, time, globalization, and social justice. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 337. Prerequisite: HA 100, or the equivalent, or consent of instructor.

HA 568. Modern and Contemporary African Art. 3 Credits. H
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists' engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 353/HA 353. (Same as AAAS 569.) Prerequisite: Junior/Senior standing and at least one course at the 100-level or above in AAAS or HA.

HA 570. Art of the United States. 3 Credits. H
This course examines the history of art in the United States from the late-colonial period of the 1700s through to the mid-twentieth century. With a focus on the central role that artistic production and consumption played in constructing American social identities and culture, this course pays particular attention to the contributions of minority and marginalized groups as active agents in the development of a national culture. Other topics include transnational perspectives on American art, the influence of European traditions, ideas of modernity and the modern artist in American culture, and relationships between art and material culture in American life. This course is offered at the 300 and 500 level with additional work required at the 500 level. Not open to students with credit in HA 370. Prerequisite: HA 100, or the equivalent, or consent of instructor.

HA 571. Modern Sculpture. 3 Credits. H
Since the 1870s, modern sculptors have dramatically transformed their medium, pioneering new forms of figuration and abstraction, investigating
new materials and processes, and developing installation and site-specific art. With a focus on Europe and the U.S. through the 1980s, expanding to global trends of recent decades, this course examines how this happened, considering the work of major artists from Rodin, Matisse, Picasso, and Brancusi to Donald Judd, Eva Hesse, Anish Kapoor, Jeff Koons, and David Hammons. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 371. Intended for graduate students. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 576. Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque. 3 Credits. H
This course surveys significant 17th-century paintings, prints and drawings produced in the Northern and Southern Netherlands (modern-day Netherlands and Belgium). Artists whose works will be discussed include Peter Paul Rubens, Rembrandt van Rijn, Johannes Vermeer, and other painters of scenes of daily life, landscapes, cityscapes, portraits and still-lifes. Artistic elements of individual works and their relationship to major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 376. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 580. History of Photography. 3 Credits. H
An introduction to the history of photography. We will consider strategies used over its history to make photography an art, a witness to truth, a record of fact, a purveyor of falsehoods, a mass medium, a hawker of goods and ideologies, an agent of political change, a means of remembrance, and more. Intended for graduate students. Not open to students with credit in HA 380. Prerequisite: HA 100, HA 151, or the equivalent, and consent of instructor.

HA 582. American Art 1860-1900: Gilded Age. 3 Credits.
A survey of major artists and movements in painting, sculpture, and allied arts in the late 19th century. Consideration will be given to developments in landscape painting and images of the American West, the impact of impressionism and other European movements, and the decorative programs of the Gilded Age. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 583. American Art 1900-1945: Rise of Modernism. 3 Credits. H
A survey of major artists and movements in painting, sculpture, and allied arts, from the early urban realists to the emergent avant-garde at mid century. Consideration will be given to the cosmopolitan tendencies of the 1910s and the 1920s, to regionalist impulses of the 1930s, and the assimilation of European modernism. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 585. The Art of Buddhism. 3 Credits. NW H/W
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500 levels with additional work required at the 500-level. Not open to students with credit in HA 385. Prerequisite: Consent of instructor.

HA 586. Japanese Painting. 3 Credits. NW H/W
A survey covering the development of Japanese painting from the seventh century to the early twentieth century. Topics include Buddhist and other religious paintings, narrative handscrolls, ink painting, decorative folding screens, ukiyo-e prints, and western-style paintings from the late eighteenth through early twentieth centuries. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in EALC/HA 386. Prerequisite: An introductory course in Asian art or consent of instructor.

HA 587. Japanese Sculpture. 3 Credits. NW H
A survey of Japanese sculpture from the Kofun period (300-700 C.E.) to the present day. Emphasis is placed on works of Buddhist sculpture from the 7th through the 13th centuries. Prerequisite: An introductory course in Asian art history or consent of instructor.

HA 588. Modern and Contemporary Visual Arts of Japan. 3 Credits. H
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 388/EALC 388. Prerequisite: An introductory course in art history or consent of instructor.

HA 590. Special Study in African Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history or African Studies, or consent of the instructor.

HA 591. Special Study in Asian Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history or Asian Studies, or consent of the instructor.

HA 592. Special Study in Ancient Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in Art History or Classics, or consent of the instructor.

HA 593. Special Study in Medieval Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 594. Special Study in Renaissance Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 595. Special Study in Baroque Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 597. Special Study in Modern Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit if content varies. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 677. African Design. 3 Credits. NW H/W
This course examines the conceptualization of the “decorative” arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as “decorative art” and “craft” still operative, and how do they reflect ideas about race and gender? How have African artists approached “traditional” design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists’ writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 377/HA 377. (Same as AAAS 677.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

HA 698. Honors Essay in Art History. 3 Credits. H
Required for departmental honors. A course of directed research and the preparation of a paper on an art history topic, supervised by a professor. Prerequisite: A grade-point average of 3.5 in art history and 3.25 in all courses, and consent of a major advisor and supervising professor.

HA 706. Seminar: _____. 3 Credits.
A concentrated study of a specific topic in art history. May be repeated for credit if content varies. Prerequisite: Consent of instructor.

HA 707. Directed Readings. 1-6 Credits.
Supervised study and research into specialized areas of art history.

HA 719. Art Histories: Theory and Methodology. 3 Credits.
This course examines the major methodologies and theories that have shaped and continue to shape the field of art history. Through critical reading of primary, secondary, and interpretive texts, the course will analyze closely the history and current state of the discipline. Prerequisite: Nine hours of History of Art or consent of instructor.

HA 720. Asian Art: Theory and Method. 3 Credits.
This course examines important methodologies and theories of the past and present employed in the field of Asian art history. Through critical reading of primary documents and secondary scholarship, students will gain historical perspective on and practical tools for research in the history of Asian art and visual culture. Prerequisite: Nine hours of History of Art or consent of instructor.

HA 760. Proseminar in Korean Art. 3 Credits.
Intensive study of a selected topic in the visual arts of Korea; topics may focus on a particular genre, theme, historical period or group of artists, for example Buddhist painting and sculpture, Choson period landscape and genre painting, ceramics and lacquerware or modern and contemporary art in North and South Korea. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor.

HA 780. African Art and Gender. 3 Credits.
How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 380/HA 360/WGSS 380. (Same as AAAS 780.) Prerequisite: Any previous AAAS course.

HA 788. Proseminar in Japanese Art. 3 Credits.
Critical analysis of readings on selected topics in Japanese art. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor.

HA 789. Proseminar in Chinese Art. 3 Credits.
Critical analysis of readings on selected topics in Chinese art. May be repeated for credit up to a maximum of 12 credit hours. Prerequisite: Consent of instructor.

HA 898. Franklin Murphy Seminar in Art History: _____. 3 Credits.
This seminar is given each spring by the Murphy Lecturer of the year and includes two weeks of intensive study with a nationally known expert in a special field of art history. The other weeks of seminar meetings for the semester are conducted by the faculty member most closely specialized in this field. Prerequisite: Consent of supervising faculty member.

HA 899. Thesis. 1-6 Credits.
Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis.

HA 906. Seminar: _____. 3 Credits.
A concentrated study of a specific topic in art history. May be repeated for credit if content varies. Prerequisite: Consent of instructor.

HA 907. Directed Readings. 1-6 Credits.
Supervised study and research into specialized areas of art history. Prerequisite: Nine hours of art history and a reading knowledge of a pertinent foreign language.

HA 925. Seminar in Late Medieval Art: _____. 3 Credits.
A study of selected problems dealing with the art of the later Middle Ages. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 935. Seminar in Northern Renaissance Art: _____. 3 Credits.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 940. Seminar in 17th Century Art: _____. 3 Credits.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 955. Seminar in 19th Century Art: _____. 3 Credits.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 965. Seminar in American Art: _____. 3 Credits.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated
for credit up to a maximum of 12 credit hours. Prerequisite: Consent of instructor.

**HA 980. Seminar in Chinese Art: _____**. 3 Credits.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

**HA 990. Seminar in Japanese Art: _____**. 3 Credits.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

**HA 995. Seminar in Korean Art: _____**. 3 Credits.
Concentrated study of one particular genre, theme, historical period or group of artists. Readings will include primary and secondary language material in Korean, Japanese and/or Chinese including texts in classical forms of these languages. May be repeated for credit up to maximum of twelve hours. Prerequisite: Reading knowledge of Korean, Japanese or Chinese and consent of instructor.

**HA 999. Doctoral Dissertation. 1-12 Credits.**
This course may be taken more than once, but not for more than twelve hours of credit in any one semester. Graded on a satisfactory progress/limited progress/no progress basis.

### Bachelor of Arts and Bachelor of General Studies in History of Art

**Why study the history of art?**

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers, and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

### Undergraduate Admission

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

### History of Art Programs

Bachelor’s degrees with majors in the history of art are offered in the College of Liberal Arts and Sciences (B.A. and B.G.S.) and in the School of the Arts (B.F.A.). See Bachelor of Fine Arts in History of Art (p. 1974) in the School of the Arts Department of Visual Art section of the catalog for B.F.A. requirements.

### 5. Art history elective (0-3 hours; see number 4 above).

Total Hours: 30

Note: HA 100/HA 300 is a 1-semester survey of Western art history intended for non-majors and does not count toward the 30 required hours in art history. A student who takes HA 100 or HA 300 and then decides to major in art history must then also take either HA 150 or HA 151 (or both).
A student who already has credit in either HA 150 or HA 151, however, should not take HA 100 or HA 300.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in History of Art can be found here: History of Art (p. 1558), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in History of Art can be found here: History of Art (p. 1559), or by using the left-side navigation.

**Departmental Honors**

The department invites art history undergraduate majors to apply for graduation with departmental honors. They must meet the following criteria:

1. An overall grade-point average of at least 3.25 and an art history grade-point average of 3.5 at the time of declaring intention to seek honors.

2. In consultation with the departmental honors coordinator and with approval from a supervising professor, declared intention of seeking honors no later than the time of enrollment for the final undergraduate semester.

3. Enrollment in HA 698 Honors Essay and full participation in a concurrent art history graduate seminar (numbered 700 or above) for which the student must write a substantial, original research paper to be submitted to the supervising professor as an honors essay.

4. Approval of the honors essay by the supervising professor and 2 other faculty members who, as a committee, certify to the departmental honors coordinator that the student has successfully completed the requirements to earn honors.

**BA in History of Art**

Below is a sample 4-year plan for students pursuing the BA in History of Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website ([https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/](https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/)) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. History of Art Breadth requires one course in 3 out of the 4 Geographical Regions and one course in 3 out of the 4 Chronological Periods for a total of 18 hours (6 courses). See Degree Requirements tab in the Catalog for course lists.
4. An Art History course approved for Goal 6 Integration & Creativity is required. The department recommends that students take the HA or Studio Art course to satisfy Goal 6 in either the fall or spring semester of their fourth year. HA 698 and HA 550 fulfill a Goal 6 requirement.
5. A course may double count for a Breadth requirement within the major and also for Goal 6 of the KU Core. If one course is taken to fulfill both requirements, then an additional Art History elective at the 300+ level is required.
6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
7. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BGS in History of Art

Below is a sample 4-year plan for students pursuing the BGS in History of Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. ([http://kucore.ku.edu/courses/](http://kucore.ku.edu/courses/))

### Minor in History of Art

#### Why study the history of art?

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers, and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

#### Requirements for the Minor

**History of Art Minor Requirements**

Students selecting this minor must complete a minimum of 6 History of Art courses. Satisfied by 18 hours of History of Art coursework. 12 of the 18 hours must be at the 300 level or above. With approval of the art history undergraduate advisor, 1 closely related course taught outside of the art history department (e.g., history of architecture or design) may count toward the minor.

<table>

Total Hours 120

1. Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

2. History of Art Breadth requires one course in 3 out of the 4 Geographical Regions and one course in 3 out of the 4 Chronological Periods for a total of 18 hours (6 courses). See Degree Requirements tab in the Catalog for course lists.

3. The department recommends that students take the HA or Studio Art course to satisfy Goal 6 in either the fall or spring semester of their fourth year. HA 698 and HA 550 fulfill a Goal 6 requirement.

4. A course may double count for a breadth requirement within the major and also for the Goal 6 requirement in the KU Core. If one course is taken to fulfill both requirements, an additional History of Art elective at the 300+ level is required.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

#### Minor Hours

Satisfied by 18 hours of minor courses.

#### Minor Hours in Residence

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

#### Minor Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

#### Minor Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Master of Arts in History of Art

KU offers graduate art history courses in European, American, East Asian, and African art. Students may pursue graduate degrees in European and American/Global Modern and Contemporary Art or East Asian Art. Students who are interested in pursuing graduate degrees that emphasize international and/or transnational modern and contemporary art should follow the European and American/Global Modern and Contemporary track.

The M.A. provides students with a broad and deep knowledge of the visual arts, as well as study of the basic concepts, theories, and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation for subsequent doctoral studies.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Admission to the M.A.

To be considered for admission, a student must hold a bachelor’s degree. Please review the full Graduate Studies Admissions Policy. (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/)

Non-native speakers of English must meet Graduate Studies’ English proficiency requirements. (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/)

A full list of the required application materials can be found on the department’s website.
M.A. Degree Requirements

The student must complete 30 hours of graduate credit, at least 21 of which must be in art history distributed according to department requirements (see the Graduate Student Handbook (https://arthistory.ku.edu/graduate-student-handbook/)). Students pursuing the degree in European and American Art/Global Modern and Contemporary Art must take at least 21 credit hours at the 700-900 level, 6 hours of which must be taken at the 800 level or higher. Students pursuing the degree in East Asian Art must take at least 15 credit hours at the 700 level or higher, 6 hours of which must be taken at the 800 level or higher (see the Graduate Student Handbook (https://arthistory.ku.edu/graduate-student-handbook/) for specifics). The candidate must demonstrate proficiency in the reading of a foreign language, normally a major European language, Chinese, Korean, or Japanese.

A general written examination (in European and American Art/Global Modern and Contemporary Art or East Asian Art) must be passed to earn the M.A. degree. M.A. and M.A./Ph.D. students who wish to be considered for admission to the Ph.D. program must complete and sign the Petition for Continuation in the Ph.D. Program form, which will be distributed at the M.A. exam. It is expected that such students will already have expressed this interest to a potential major field advisor and received that faculty member’s support.

The student must pass the M.A. exam in order for the petition to be considered by the graduate faculty. After receiving departmental approval for the petition and completing all M.A. degree requirements, the student will automatically be entered into the Ph.D. program and will be expected to maintain enrollment as per Graduate Studies guidelines. Students who do not submit the petition at the time of the M.A. exam will need to reapply for admission to the art history graduate program.

Handbook for Graduate Students

A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook (https://arthistory.ku.edu/graduate-student-handbook/).

Graduate Policy

Students are encouraged to review Graduate Studies’ policies that apply to M.A. degree programs for information about other requirements that may apply.

Accelerated Master of Arts in Art History (East Asian)

Only current KU undergraduate students are eligible to apply to the Accelerated M.A. program. If you are not a current undergraduate student at KU, please review the admission requirements for History of Art’s M.A., M.A.-Ph.D., and Ph.D. programs.

The Accelerated M.A. program enables qualified KU students to earn B.A./B.G.S. and M.A. degrees in art history in 5 years. 12 hours of 500-level-or-above coursework in the major completed in Year 4 of study are eligible to count for both the B.A./B.G.S. and M.A.degrees. The M.A. degree is completed in Year 5 with 18 additional hours of coursework.

The M.A. may be pursued as a terminal degree or as preparation for subsequent doctoral studies.

Only current KU undergraduate students are eligible to apply to the Accelerated M.A. program. If you are not a current undergraduate student at KU, please review the admission requirements for History of Art’s M.A., M.A.-Ph.D., and Ph.D. programs.

Application Deadline

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both the B.A./B.G.S. and M.A. degrees may be completed within the 5 years. All prospective students should discuss their interest in admission to the Accelerated M.A. program with both the Undergraduate Advisor and the Director of Graduate Studies no later than the second semester of the student’s Junior year.

Prospective students must apply to the Accelerated M.A. program by May 1st of their Junior year. The following program requirements must be met by this time:

• Major GPA of at least 3.50 and cumulative GPA of at least 3.00;
• On track to complete all requirements for a B.A. or B.G.S. degree in History of Art from KU by the spring semester of the Senior year

Required Application Materials

• Three letters of recommendation (preferably from professors in the major). You will be asked to enter the names and e-mail addresses for your recommenders while completing the online application.
• Résumé or curriculum vitae
• A statement of personal and educational interests and career objectives; not to exceed 750 words. Please address how the graduate program in Art History at KU would help you to achieve your goals.
• A writing sample, preferably from an art history course, of between 5-10 pages of text (not including the bibliography, endnotes, or images following endnotes) that you feel best represents your research, writing, and critical thinking skills.

Upon review of the Application for Admission, the History of Art Department will notify the student of their eligibility to begin graduate-level coursework. Final admission to the graduate program will be contingent upon the following:

• Successful completion of all requirements for the bachelor’s degree;
• Grades of B+ or above in all History of Art graduate-level coursework taken during the student’s Senior year. Accelerated M.A. students are graded at the graduate level in their double-counting classes in Year 4.

Non-native speakers of English must meet Graduate Studies’ English proficiency requirements. (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/)

The course requirements for this accelerated program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4 and graduate credit courses taken in Year 5. Numerous graduate-level courses are regularly offered that fulfill distribution requirements for both the B.A./B.G.S. and M.A. degrees.
The student must be approved to begin coursework toward the Accelerated M.A. prior to enrolling in any 500 level or above courses that are to count for both undergraduate and graduate credit.

4. Complete a 500 level or above art history course in an East Asian topic approved for Goal 6 in the KU Core. (The Goal 6 art history course may also fulfill one of the breadth requirements above, in which case an elective course should be taken for the final 3 required hours of art history).

5. Art history elective (0-3 hours; see number 4 above).

Total Hours: 30

M.A. Degree Requirements

Proficiency in a foreign language is required for the M.A. degree. Students in the Accelerated M.A. program should complete at least the fourth semester of a relevant foreign language (normally Chinese, Korean, or Japanese) with a grade of B or better by the end of Year 4 or be prepared to demonstrate proficiency by passing the department’s language proficiency exam at the beginning of Year 5. Should the student not pass the proficiency exam, they will be expected either to enroll in the appropriate level of language study or establish a plan for passing the language exam at the start of the second semester of Year 5.

In addition to the 12 credit hours of graduate coursework taken during the senior year, students must complete an additional 18 credit hours of graduate coursework, for a total of 30 hours of graduate credit.

The full 30 hours must include:

- At least 5 graduate courses (15 credit hours) at the 500 level or above
- At least 3 graduate seminars (9 credit hours) at the 700 level or above
- At least 2 graduate seminars (6 credit hours) at the 800 level or above

These courses should represent a balanced distribution of graduate-level (500 level or above) courses in Chinese, Japanese, and Korean art history.

Written Comprehensive Examination

A general written examination in East Asian art must be passed to earn the M.A. degree.

A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook (https://arthistory.ku.edu/graduate-student-handbook/).

Progression Requirements

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. The student applies to the Accelerated M.A. program by May 1 of Year 3. In anticipation of being approved to begin graduate coursework, the student meets with the DGS during the second semester of Year 3 to discuss their potential program of study for Year 4.

2. At the end of the final semester of undergraduate study (Year 4), the department will review the student’s performance in graduate-level HA courses taken in Year 4. The student, who has been graded at the graduate level, must earn a grade of B+ or better in each of these courses to be eligible for regular admission to the M.A. degree in Year 5. In anticipation of being admitted, the
Students should complete all requirements for the Accelerated M.A. within one year of receiving the B.A./B.G.S. degree. If unforeseen circumstances prevent the timely completion of the M.A. degree, the student must consult with the Director of Graduate Studies to develop an alternative plan for completion.

### Total Hours 138

1. The Art after 1900 breadth course must be in an East Asian Topic.
2. This requirement can be fulfilled by taking a graduate-level seminar.
3. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the B.S. with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
Accelerated Master of Arts in Art History (European and American/Global Modern and Contemporary)

Only current KU undergraduate students are eligible to apply to the Accelerated M.A. program. If you are not a current undergraduate student at KU, please review the M.A., M.A./Ph.D., and Ph.D. program catalog pages.

The Accelerated M.A. program enables qualified KU students to earn B.A./B.G.S. and M.A. degrees in art history in 5 years. 12 hours of 500-level-or-above coursework in the major completed in Year 4 of study are eligible to count towards both the B.A./B.G.S. and M.A. degrees. The M.A. degree is completed in Year 5 with 18 additional hours of coursework.

The M.A. provides students with a broad and deep knowledge of the visual arts, as well as study of the basic concepts, theories, and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation for subsequent doctoral studies.

Application Deadline

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both the B.A./B.G.S. and M.A. degrees may be completed within the 5-year timeframe. All prospective students should discuss their interest in admission to the Accelerated M.A. program with both the Undergraduate Advisor and the Director of Graduate Studies no later than the first semester of the student’s Junior year.

Prospective students must apply to the Accelerated M.A. program by May 1st of their Junior year. The following program requirements must be met by this time:

- Major GPA of at least 3.50 and cumulative GPA of at least 3.00
- On track to complete the fourth semester of a language by the spring semester of the Senior year
- On track to complete all requirements for a B.A./B.G.S. degree in History of Art from KU by the spring semester of the Senior year

Required Application Materials

- Three letters of recommendation (preferably from professors in the major). You will be asked to enter the names and e-mail addresses for three recommenders while completing the online application.
- Résumé or curriculum vitae
- A statement of personal and educational interests and career objectives; not to exceed 750 words. Please address how the graduate program in Art History at KU would help you to achieve your goals.
- A writing sample, preferably from an art history course, of between 5-10 pages of text (not including the bibliography, endnotes, or images following endnotes) that you feel best represents your research, writing, and critical thinking skills.

Upon review of the Application for Admission, the History of Art Department will notify the student of their eligibility to begin graduate-level coursework. Final admission to the graduate program for Year 5 will be contingent upon the following:

- Successful completion of all requirements for the bachelor’s degree;
- Grades of B+ or above in all History of Art graduate-level coursework taken during the student’s Senior year. Accelerated M.A. students are graded at the graduate level in their double-counting classes in Year 4.

Requirements for the B.A. or B.G.S. Major

Breadth Courses: Six courses total; at least two courses must be completed at the 500 level or above and at least two courses must be completed at the 700 level or above. A course or topic may fulfill only one requirement, either for geographical or chronological breadth.
### 2. Breadth Courses, Geographical Regions: complete one course in three out of four geographical regions.

#### A. Americas, Africa, Middle East
- **HA 353/569** Modern and Contemporary African Art
- **HA 360/780** African Art and Gender
- **HA 370/570** Art of the United States
- **HA 377/677** African Design
- **HA 390/590** Special Study in African Art: _____
- **HA 396** Special Study in American Art: _____
- **HA 529** Archaeology and Art of the Ancient Near East
- **HA 536** Islamic Art and Architecture in Africa
- **HA 582** American Art 1860-1900: Gilded Age
- **HA 583** American Art 1900-1945: Rise of Modernism
- **HA 706** Seminar: _____

#### B. Europe
- **HA 311** The Art and Architecture of the British Isles
- **HA 322** European Architecture 300-1300
- **HA 325/525** Aegean Archaeology and Art
- **HA 326/526** Greek Archaeology and Art
- **HA 327/537** Roman Archaeology and Art
- **HA 330** Italian Renaissance Art
- **HA 331** Northern European Art from Van Eyck to Brueghel
- **HA 333/533** Rococo to Realism: Painting in Europe c. 1750-1848
- **HA 334/534** Impressionism and Post-Impressionism: 1848-1900
- **HA 335/535** Renaissance Architecture in Italy
- **HA 372** Baroque Art in Europe
- **HA 376/576** Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque
- **HA 393/593** Special Study in Medieval Art: _____
- **HA 394/594** Special Study in Renaissance Art: _____
- **HA 395/595** Special Study in Baroque Art: _____
- **HA 506** Early Medieval and Romanesque Art
- **HA 507** Gothic Art
- **HA 510** Medieval Manuscripts and Early Printed Books
- **HA 511** From Court to City: Northern Art
- **HA 512** Humanism and Reform: 16th Century Northern European Art
- **HA 527** Late Medieval Art in Italy
- **HA 528** The Spatial Arts of Urban Italy
- **HA 538** Pompeii and Herculaneum
- **HA 545** Early Chinese Art
- **HA 706** Seminar: _____

#### D. Cross-regional
- **HA 337/567** Contemporary Art
- **HA 371/571** Modern Sculpture
- **HA 380/580** History of Photography
- **HA 566** Art From 1945 to the 1980s: Modernism to Post-Modernism
- **HA 706** Seminar: _____

### 3. Breadth Courses, Chronological Periods: complete one course in three out of four chronological periods.

#### A. Pre-1400
- **HA 322** European Architecture 300-1300
- **HA 325/525** Aegean Archaeology and Art
- **HA 326/526** Greek Archaeology and Art
- **HA 327/537** Roman Archaeology and Art
- **HA 361/561** Buddhist Art of Korea
- **HA 392/592** Special Study in Ancient Art: _____
- **HA 393/593** Special Study in Medieval Art: _____
- **HA 506** Early Medieval and Romanesque Art
- **HA 507** Gothic Art
- **HA 510** Medieval Manuscripts and Early Printed Books
- **HA 527** Late Medieval Art in Italy
- **HA 529** Archaeology and Art of the Ancient Near East
- **HA 538** Pompeii and Herculaneum
- **HA 545** Early Chinese Art
- **HA 706** Seminar: _____

#### B. 1400-1850
- **HA 330** Italian Renaissance Art
- **HA 331** Northern European Art from Van Eyck to Brueghel
- **HA 333/533** Rococo to Realism: Painting in Europe c. 1750-1848
- **HA 335/535** Renaissance Architecture in Italy
- **HA 347/547** Ceramics of East Asia
- **HA 354/554** Japanese Prints
- **HA 372** Baroque Art in Europe
- **HA 376/576** Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque
- **HA 394/594** Special Study in Renaissance Art: _____
- **HA 395/595** Special Study in Baroque Art: _____
- **HA 398** Chinese Painting, Honors
- **HA 545** Early Chinese Art
- **HA 546** Chinese Sculpture
- **HA 549** Chinese Painting
- **HA 567** Chinese Art
- **HA 588** Japanese Sculpture
- **HA 760** Proseminar in Korean Art
- **HA 788** Proseminar in Japanese Art
- **HA 789** Proseminar in Chinese Art
### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours

Satisfied by 30 hours of major courses.

#### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 3.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://degreeprogress.ku.edu/gpa/).

### M.A. Degree Requirements

Proficiency in a foreign language is required for the M.A. degree. Students in the Accelerated M.A. program should complete at least the fourth semester of a relevant foreign language (normally French, German, Italian, or Spanish) with a grade of B or better by the end of Year 4 or be prepared to demonstrate proficiency by passing the department's language proficiency exam at the beginning of Year 5. Should the student not pass the proficiency exam, they will be expected either to enroll in the appropriate level of language study or establish a plan for passing the language exam at the start of the second semester of Year 5.

In addition to the 12 credit hours of graduate coursework taken during the senior year, students must complete an additional 18 credit hours of graduate coursework, for a total of 30 hours of graduate credit.

The full 30 hours must include:

- At least 4 graduate courses (12 credit hours) at the 500 level or above
- At least 2 graduate seminars (6 credit hours) at the 800 level or above
- At least 2 graduate seminars (6 credit hours) at the 800 level or above

See the Graduate Student Handbook ([https://arthistory.ku.edu/graduate-student-handbook/](https://arthistory.ku.edu/graduate-student-handbook/)) for distribution requirements of graduate courses.

#### Written Comprehensive Examination

A general written examination in European and American/Global Modern and Contemporary art must be passed to earn the M.A. degree. A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook ([https://arthistory.ku.edu/graduate-student-handbook/](https://arthistory.ku.edu/graduate-student-handbook/)).

#### Progression Requirements

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. The student applies to the Accelerated M.A. program by May 1 of Year 3. In anticipation of being approved to begin graduate coursework, the student meets with the DGS during the second semester of Year 3 to discuss their potential program of study for Year 4.

2. At the end of the final semester of undergraduate study (Year 4), the department will review the student's performance in graduate-level HA courses taken in Year 4. The student, who has been graded at the graduate level, must earn a grade of B+ or

### Goals for the Accelerated M.A. Program in Art History

The first goal of the accelerated program is to prepare students to pass the comprehensive examination and complete the required coursework for the M.A. degree during the final two years of the B.A. degree program.

The second goal is for students to be able to pass the KU proficiency exam in a foreign language by the end of Year 4 of the B.A. degree program.

To complete the major requirements, students must:

- Complete a 500 level or above art history course approved for Goal 6 in the KU Core. (The Goal 6 art history course may also fulfill one of the breadth requirements above, in which case an elective course should be taken for the final 3 required hours of art history.)

5. Art history elective (0-3 hours; see number 4 above).

**Total Hours: 30**

---

Note: HA 100/HA 300 is a 1-semester survey of Western art history intended for non-majors and does not count toward the 30 required hours in art history. A student who takes HA 100 or HA 300 and then decides to major in art history must then also take either HA 150 or HA 151 (or both). A student who already has credit in either HA 150 or HA 151, however, should not take HA 100 or HA 300.

better in each of these courses to be eligible for regular admission to
the M.A. degree in Year 5. In anticipation of being admitted, the
student meets with the DGS during the second semester of Year 4
to discuss their potential program of study for Year 5. The student
will not be permitted to enroll in additional courses for graduate
credit toward the M.A. degree until the B.A./B.G.S. degree has been
conferred.

3. For those students who do not meet the minimum GPA
requirement of 3.0 in the first semester of Year 5, the department
may, at its discretion, devise a plan of study to address the student’s
deficiencies, or may dismiss the student from the M.A. program.

4. The student must pass the M.A. Exam in January or May of
Year 5 to graduate with the Accelerated M.A. within the 5-year
period.

Students should complete all requirements for the Accelerated M.A.
within one year of receiving the B.A./B.G.S. degree. If unforeseen
circumstances prevent the timely completion of the M.A. degree, the
student must consult with the Director of Graduate Studies to develop an
alternative plan for completion.

1 This requirement can be fulfilled by taking a graduate-level seminar
2 The BA requires completion of two courses of collegiate-level writing
instruction. Students who test out of Composition will still need to
complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
3 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning/) for a list of courses that fulfill the BA Quantitative Reasoning
requirement.
4 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. 
Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your
advisor.

Please note:
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Doctor of Philosophy in History of Art**

KU offers graduate art history courses in European, American, East Asian, and African art. Students may pursue graduate degrees in European and American/Global Modern and Contemporary Art or East Asian Art. Students who are interested in pursuing graduate degrees that emphasize international and/or transnational modern and contemporary art should follow the European and American/Global Modern and Contemporary track.

The Ph.D. is intended for students who already hold the M.A. degree in art history.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog. Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Ph.D.**

Applicants for the Ph.D. are expected to hold an appropriate M.A. degree. To be considered for admission, a student must hold a bachelor's degree. Please review the full Graduate Studies Admissions Policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet Graduate Studies’ English proficiency requirements. (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/)

A full list of the required application materials can be found on the department's website (https://arthistory.ku.edu/phd/).

**Admission to the Ph.D. program for students who receive the M.A. degree from KU:**

The M.A. or M.A./Ph.D. student who wishes to be considered for full admission to the Ph.D. program must complete and sign the Petition for Continuation in the Ph.D. Program form which will be distributed at the M.A. Exam. The student must pass the M.A. Exam in order for the petition to be considered by the graduate faculty. After receiving departmental approval for the petition and completing all requirements for the M.A. degree, the student will automatically be entered into the Ph.D. program and will be expected to maintain enrollment as per Graduate Studies guidelines.

Students who do not submit the petition at the time of the M.A. Exam and who wish to remain in the department to pursue the Ph.D. will need to complete the full application for admission to the art history Ph.D. program.

**Ph.D. Degree Requirements**

Ph.D. aspirants shall, prior to admission to the Ph.D. comprehensive examination, demonstrate knowledge of at least one foreign language sufficient to meet the demands of their research and have successfully completed at least one 700 level or above History of Art seminar course in fulfillment of Graduate Studies’ Research Skills and Responsible Scholarship requirement. Ph.D. students may be required by their committee, prior to admission to the Ph.D. comprehensive exams, to demonstrate proficiency in two or more foreign languages, depending on the student's area of specialization and program of study.

Normally, Ph.D. students are expected to complete 18 to 21 post-M.A. hours and Combined M.A./Ph.D. students are expected to complete 12 to 15 post-M.A. graduate credit hours. The exact number of required post-M.A. courses will be determined in consultation with the student’s Ph.D. comprehensive exam committee.

Students must take both written and comprehensive oral examinations at the end of their course work. Both written and oral examinations cover the major area and 2 minor areas specified in the student’s Doctoral Program of Study petition (see department's Graduate Student Handbook (https://arthistory.ku.edu/graduate-student-handbook/)). The oral comprehensive examination normally follows the written examination by 1 week.

The dissertation proposal must be approved by the student’s primary advisor and the graduate faculty within three months of passing the comprehensive Ph.D. examinations. The student is strongly encouraged to work closely with the primary advisor immediately following the comprehensive examination to meet this deadline.

Upon acceptance of the dissertation in final draft form, the candidate must successfully pass the final oral examination (the dissertation defense) to complete the degree.

**Research Skills & Responsible Scholarship Requirement**

All graduate seminars include instruction in and discussion of appropriate research conduct and research misconduct; authorship, publication, plagiarism, copyright; peer review; and professional practices. For more information on the Research Skills and Responsible Scholarship requirement, please see the Graduate Studies section of the online catalog.

**Handbook for Graduate Students**

A detailed presentation of departmental degree requirements and regulations is included in the department's Graduate Student Handbook (https://arthistory.ku.edu/graduate-student-handbook/).

**Graduate Policy**

Students are encouraged to review Graduate Studies’ policies (https://ogs.ku.edu/policies/) that apply to doctoral degree programs for information about other requirements that may apply.
University Honors Program

Honors Courses

Honors courses are open to qualified undergraduates in any school of the university.

University Honors Program

The goal of the University Honors Program is to challenge students to launch extraordinary lives. We do this by providing exceptional classes, advising, and enrichment opportunities to academically motivated undergraduates at the University of Kansas. From convocation to commencement, we strive to foster a transformational community of critical thinkers, a community that is diverse, highly qualified, engaged, and motivated to lead.

Overview

Honors classes are typically small, discussion-oriented, and taught by exceptional instructors. Many honors courses fulfill KU Core (or major) requirements, but they are likely to do so in more depth than their non-honors equivalents. While there is no required number of honors credit hours in which a student must enroll each semester, students must complete at least six (6) honors courses totaling at least eighteen (18) credit hours to graduate with University Honors.

During each student’s first year in the program, a semester-long seminar provides an introduction to an academic area of study in an informal setting that allows students to get to know one another and their instructor. The seminar explores critical questions in society and acquaints students with resources available at KU.

Whatever a student’s school or major, the University Honors Program encourages them to explore their interests through the broad curriculum choices KU has to offer, expanding their knowledge through a range of liberal arts and science courses. Additionally, honors students are required to engage in educational experiences beyond the classroom such as research, study abroad, internships, or community service.

An honors student’s success team includes regular, personalized meetings with honors advisors, faculty fellows, and honors mentors. Jayhawk Academic Advising facilitates early and frequent contact with honors advisors who are knowledgeable about the student’s areas of interest. Honors students benefit from priority enrollment, which provides flexibility in planning one’s academic curriculum.

More information is available at honors.ku.edu (https://honors.ku.edu/).

Admission

Students from all backgrounds who are seeking academic challenge, personalized guidance, and an intellectual community during their time at KU are encouraged to apply to the University Honors Program. The program uses a holistic admissions process. For incoming first-year students, the program considers a student’s response to short-answer questions and an essay prompt, as well as their academic record and involvement. For current KU students and incoming transfer students, applications are evaluated based on college GPA, involvement and activities, and an essay. Students interested in applying can learn more at honors.ku.edu/apply (http://honors.ku.edu/apply/).

Requirements for Completion

- Cumulative GPA of 3.25 or higher at graduation.
  - Students whose GPA drops below 3.25 prior to their final semester will be expected to raise their GPA in subsequent semesters.
- Students whose GPA is consistently below 3.25 over two or more consecutive semesters may be discontinued from the Honors Program.
- One (1) first-year honors seminar (HNRS 177, HNRS 190 or HNRS 195).
- At least six (6) honors courses totaling at least eighteen (18) credit hours. These can include:
  - Courses designated HNRS.
  - Honors courses offered by individual departments or programs.
  - Graduate-level courses numbered 700 and above.
  - Less commonly taught languages (maximum of two courses).
- Courses completed under an Honors Course Contract (https://honors.ku.edu/course-contract/).
- Four (4) Enhanced Learning Experiences (ELEs). Each ELE may have course-based and/or experience-based paths for completion. Each of the student’s four ELEs must be from a different category, chosen from among the following:
  - Public Service.
  - Cultural Literacy & Social Justice.
  - Global Citizenship.
  - Aesthetic Engagement.
  - Professional Development & Social Entrepreneurship.
  - Leadership.
  - Research Skills & In-Depth Learning.
  - Interdisciplinarity & Breadth of Learning.

To receive credit for an ELE, students must post a written reflection in their KU Portal when the experience is completed. Though some experiences may overlap between two or more categories, no single activity can be counted toward more than one ELE requirement. A course taken toward the 18 hours of Honors credit can also be used to fulfill an ELE if the student completes an appropriate reflection.

For further questions regarding Honors Program requirements, please contact the University Honors Program at honors@ku.edu or 785-864-4225.

Nunemaker Center

Nunemaker Center, home of the University Honors Program, is located on Daisy Hill across the street from Templin Hall. Honors students are encouraged to take advantage of the spaces available at Nunemaker, including several classrooms and study areas, a kitchen, and comfortable lounges. The center is open most days and some evenings.

Courses

HNRS 177. First Year Seminar: _____ 3 Credits. U

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Honors. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.
HNRS 190. First Year Honors Seminar: _____ 1 Credits. U
This seminar serves as an introduction to the University Honors Program, to research opportunities and other academic resources available at the University of Kansas, and to specific disciplinary perspectives on an overarching theme. While closely examining the designated topic, students develop skills in research, reading, writing, and in-depth discussion. Required of all first-year Honors students; open only to first-year students in the University Honors Program.

HNRS 195. Transfer Honors Seminar: _____ 1 Credits. U
This seminar serves as an introduction to the Honors Program, and to the research opportunities and other academic resources available at the University of Kansas. This seminar fosters the transfer students’ oral and written communication and the critical assessment of their academic and pre-professional goals. The instructor of the student’s seminar also serves as the student’s honors mentor. Open only to transfer students in the University Honors Program.

HNRS 250. Citizen Philanthropy: An Introduction to the Nonprofit World. 3 Credits. U
This interdisciplinary course explores the historical and economic roots of citizen generosity and the role of the nonprofit/philanthropic sector. This service learning course combines volunteer experiences and public service internships with research and exploration of the missions and ethical orientations of nonprofit organizations. The course is designed to explore the social and the ethical contexts of the nonprofit sector with opportunities to demonstrate social and civic responsibility.

HNRS 310. University Scholars Seminar. 3 Credits. U
An interdisciplinary survey to acquaint students with some of the main ideas, methods, and outstanding problems in various areas of scholarship. The organization of human knowledge inside and outside the university, as well as the implications of this organization for scholarship and society, are emphasized. Ideas and methods in various disciplines are contrasted and compared. Required of and open only to newly admitted students in the University Scholars Program.

HNRS 320. Global Scholars Seminar. 3 Credits. H
The Global Scholars Seminar is designed to foster academically talented and motivated undergraduate students’ interest in global studies. Through interdisciplinary coursework, mentorship and research experience in global studies, the seminar provides cohorts of students with opportunities to develop their intellectual capabilities and interests to the fullest and better prepares them for careers, further study, and leadership roles in today’s complex international arena. Required of and open only to newly admitted students in the Global Scholars Program.

HNRS 370. Personal Writing Seminar. 1 Credits. U
This seminar helps students develop their personal writing abilities. Students analyze language and rhetorical choices in the genre of the personal essay. Students demonstrate rhetorical flexibility within the genre, considering audience, purpose, and application of the material. This course is intended for candidates for national fellowships, regardless of University Honors Program membership. (Same as LA&S 370.) Prerequisite: Permission of the Office of Fellowships.

HNRS 380. Critical Thinking and Advocacy Seminar. 1 Credits. U
The focus of this class is on honing the two basic skills of critical thinking and advocacy. In this seminar, students develop a basic system for critical analysis that can be applied generally; test that critical analysis system in a series of practicums to develop the skills necessary to apply it; and develop a basic system for designing effective and ethical persuasive messages. (Same as LA&S 380.) Prerequisite: Permission of the Office of Fellowships.

HNRS 395. Edwards Campus Honors Seminar. 1 Credits.
This seminar serves as an introduction to the KU Edwards Campus Honors Program, and to the research opportunities and other academic resources available at the University of Kansas Edwards Campus. The seminar focuses on an overarching theme or current societal problem, and explores specific disciplinary perspectives of that theme. While closely examining the designated topic, students develop skills in research, reading, writing, and in-depth discussion. This seminar fosters the KU Edwards Campus students’ oral and written communication and the critical assessment of their academic and pre-professional goals. Required of all KU Edwards Campus Honors students. Prerequisite: KU Edwards Campus Honors Student.

HNRS 410. Professional Responsibility, Honors: _____ 1-3 Credits.
This course focuses on the challenges facing practitioners in a specific professional field. Students will learn about the ethics, conduct, and other responsibilities associated with that profession, and will explore career choices within the field. Prerequisite: Membership in the University Honors Program, sophomore standing or above, and prior completion of an Honors Seminar (HNRS 190 or HNRS 195.) Concurrent enrollment with HNRS 195 is possible with special permission from the Honors Program.

HNRS 492. Topics and Problems on: _____ 1-6 Credits. U
An interdisciplinary study of different topics. Designed especially for juniors and seniors.

HNRS 495. Honors Directed Study. 1-3 Credits. U
Individual and supervised study of an interdisciplinary topic or topics. May be repeated for a total of up to 6 hours. Up to one 3-hour enrollment will count as one course toward completion of the University Honors Program. Prerequisite: Membership in the University Honors Program and consent of the instructor.

HNRS 496. Honors Internship. 1-3 Credits. U
Students participate in an internship in an organization related to their professional/career goals. An internship plan is developed by the student in conjunction with the student’s academic advisor and an authorized agent of the internship site. Prerequisite: Instructor permission required.

HNRS 497. Honors Seminar Assistantship. 0 Credits.
Open to all Honors students selected to be Honors Seminar Assistants, regardless of major field. These students assist Seminar instructors in the teaching of an Honors seminar in various ways, including but not limited to: leading group discussions, engaging students in the learning process, developing classroom material, encouraging and guiding students to solve problems themselves and helping students prepare for their advising appointments. May be repeated. Prerequisite: HNRS 190 or HNRS 195 and membership in the University Honors Program.

HNRS 595. Edwards Campus Honors Capstone. 3 Credits.
This seminar serves as an interdisciplinary capstone experience for students KU Edwards Campus Honors Program, and as an introduction to the research opportunities and other academic resources available at the University of Kansas Edwards Campus. The seminar focuses on an overarching theme or current societal problem that students explore from the perspectives of several disciplines, incorporating experiential learning opportunities. While closely examining the designated topic, students develop skills in research, reading, writing, and in-depth discussion. This seminar fosters the KU Edwards Campus students’ oral and written communication and the critical assessment of their academic and pre-professional goals. Required of all KU Edwards Campus Honors students.
Indigenous Studies Program

Indigenous Studies Graduate Program

KU’s Indigenous Studies Program serves students, Native American and Indigenous Nations and communities in Kansas, the Midwest, the U.S., and the world through our teaching, research, creative work, and service. At the core of these endeavors is our deep commitment to and engagement with the nations and communities we come from, learn from, and serve. Our aim is to contribute to the continuing projects of knowledge building, effective leadership, and infrastructure development.

KU Indigenous Studies offers an undergraduate minor, a master’s program, and a graduate certificate program. Students who are interested in enrolling in graduate-level coursework in the Indigenous Studies Program without admission to a formal graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See our admission webpage for further details.

Courses

ISP 101. Introduction to Indigenous Nations Studies. 3 Credits. NW

An introduction to the study of Indigenous peoples. It surveys the concepts, methods, and content relevant to Applied Indigenous Studies, using case studies drawn from diverse cultures. The course illustrates that the social, political, religious, and economic aspects of American Indian life are interconnected and that tribal histories cannot be understood without an awareness of these fields. Students are introduced to controversies over how to research, write, and interpret American Indians, and will address the foundations of Indigenous Studies, and that is Indigenous concepts of decolonization, empowerment and Nation-building. The course explores how the lives of Indigenous people have been affected by colonization, while exploring the varying definitions of “colonialism”, “colonizer” and the “colonized.”

ISP 204. Special Topics: _____, 1-6 Credits.

This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs. Some sections may be offered at Haskell Indian Nations University through the Haskell-KU Exchange, which requires permission from the Haskell-KU liaison.

ISP 304. Special Topics: _____, 3 Credits. H

This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs.

ISP 305. World Indigenous Literatures. 3 Credits. NW

A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305/GIST 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ISP 345. Indian Territory. 3 Credits. H

This course examines the cultural, social, economic, environmental, and political background of Indian territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outrlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HIST 318 and HUM 345.)

ISP 348. American Indian and White Relations to 1865. 3 Credits. H

This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HIST 351, HWC 348.)

ISP 350. American Indians Since 1865. 3 Credits. H

This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HIST 352 and HUM 350.)

ISP 355. Indigenous Film and Media. 3 Credits. H

This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum-including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 750 or ISP 755. (Same as FMS 350.)

ISP 400. Indigenous People of the Great Plains. 3 Credits. H

This course examines the emergence of horse-mounted indigenous societies in the Great Plains; the nature of the indigenous societies of the Great Plains in the nineteenth century; conflicts with the United States; the beginning of the reservation period; and indigenous people of the Great Plains in the modern era. Readings combine primary documents and novels with selections from anthropology, social history, and environmental history. (Same as HIST 400.)

ISP 495. Directed Readings. 1-3 Credits.

Work for advanced majors in fields or on topics not covered in course work. May be repeated for a total of up to six hours. May be counted as part of the total junior-senior credit hours required. Prerequisite: Consent of instructor.

ISP 504. Topics in Indigenous Studies: _____, 3 Credits. W

This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines in order to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit
when the topic differs. Recommended for juniors or seniors, or for students who have completed ISP 101/GINS 101/INS 101.

ISP 530. Indigenous Food and Health. 3 Credits. NW U
This course investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. The class traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems and offers traditional cultural strategies for health recovery.

ISP 542. Ethnobotany. 3 Credits. S
Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as ANTH 582 and EVRN 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor.

ISP 551. Foodways: Native North America. 3 Credits. H
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and HWC 551.) Prerequisite: Upper division course on indigenous/ American Indian history, or permission of the instructor.

ISP 552. Foodways: Latin America. 3 Credits. H
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, HUM 552 and LAC 552.) Prerequisite: Upper division course on Latin American history or permission of the instructor.

ISP 567. Native Feminisms. 3 Credits. SC H/W
This course examines the foundation of Native feminist scholarship and the history of Native feminist activism. The class will begin by considering whether feminist theory can support contemporary Native women Native Two-Spirit (LGBTQ+) in their struggles against settler colonialism and heteropatriarchy. While the course begins by examining the North American experience, the course will also cover a range of international indigenous contexts, with a focus on the Global South and the Indigenous Pacific. Topics explored include the history of settler-colonialism, cultural revitalization and gender roles, change and continuity under cycles of settler-colonialism, the connection between colonialism and sexual violence in Native communities, debates over citizenship and sovereignty, and contemporary Native gender roles and identities. During the conclusion of the course, students will learn to identify how Native feminism informs activism and practice. (Same as WGS 567.) Prerequisite: Any previous course in WGS or ISP, or by permission of instructor.

ISP 577. The Andean World. 3 Credits. H
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, HIST 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

ISP 578. Global Indigenous History. 3 Credits.
In this course, students are introduced to a global comparative history of Indigenous peoples and nations, offering a unique opportunity to study how Indigenous nations have made a significant impact from ancient to contemporary times. Global Indigenous history provides invaluable insights into key historical debates about the processes/systems of colonization, international law, treaty rights, citizenship, nationalism, democratization, war, sovereignty, community & nation building, and cultural revitalization. This lecture class explores histories of the Ancient Mayan and Incan empires; Red Power to Idle No More; Māori and Aboriginal rights movements; Tibetan independence and Gandhi's Satyagraha; Irish and Scottish devolution; and contemporary conflict(s) in the Middle East, just to name a few. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in ISP 878. (Same as HIST 578.) Prerequisite: Requires a prior history course or one in a related field or permission of the instructor.

ISP 601. Indigenous Peoples of the World. 3 Credits. S
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEOG 601 and GIST 601.) Prerequisite: Permission of instructor.

ISP 673. Environmental Justice. 3 Credits. NW U
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping, and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. (Same as EVRN 673.) Prerequisite: Permission of instructor.

ISP 755. Indigenous Film and Media. 3 Credits.
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous...
media optics by examining media practices across a broad contemporary spectrum—including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 350 or ISP 355. (Same as FMS 750.)

**ISP 800. Indigenous Issues in the United States. 3 Credits.**
This course will focus on contemporary issues relating to Indigenous peoples and nations within the United States, with particular emphasis on such issues as sovereignty, indigeneity, colonialism and decolonization. The course will address varied disciplinary approaches to this range of issues and will consider how this discourse bears upon scholarly conversations regarding broader themes in other selected fields of study.

**ISP 804. Special Topics: ______. 1-3 Credits.**
Designed to fulfill program needs of the Indigenous Studies master's program, this course may meet with appropriate professional or graduate courses. Can be repeated for credit when topic differs.

**ISP 806. Directed Readings. 1-3 Credits.**
An individual readings course with a qualified instructor on a topic in Indigenous Studies.

**ISP 807. Internship in Indigenous Studies. 1-6 Credits.**
Internships provide students the opportunity to obtain training and perform professional duties for academic credit at pre-approved indigenous-related agencies, organizations, and communities. Students are required to demonstrate a minimum of 60 contact hours for each one credit hour. To enroll, students must obtain the consent of their ISP faculty advisor or the Program’s Director if a student is outside ISP. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission from instructor.

**ISP 824. Federal Indian Law. 3 Credits.**
Addresses the law and policy of the United States regarding Indian nations and their members. Issues include the origins and contours of federal plenary power over Indian affairs, the scope of inherent tribal sovereignty, the limits of state power in Indian country, civil and criminal jurisdiction, and gaming. (Same as LAW 914.)

**ISP 830. Indigenous Food and Health. 3 Credits.**
Investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. Traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems. Will offer traditional cultural strategies for health recovery.

**ISP 862. Indigenous Archives and Tribal Historic Preservation. 3 Credits.**
In this methods class, students will gain foundational knowledge in the archival and preservation of Indigenous source materials: oral histories, printed materials, Tribal documents, letters/journals/diaries, artwork, and a host of other sources. Students will also utilize digital history technology to create online exhibits and an original research paper. Beyond the archives this course introduces students to the important work of Tribal Historical Preservation examining the laws, ethics, cultures, policies, histories, ethics, recovery/restoration, Indigenous GIS, consultation, management, and career paths in Tribal Historical Preservation. Finally, students will gain invaluable experiences by writing grants and developing final projects that can lead to real-world applications of their research. (Same as HIST 862.)

**ISP 871. Community Health and Development. 3 Credits.**
This course extends knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation, and then apply these skills to issues that matter to them and to the communities they serve. (Same as ABSC 710.)

**ISP 878. Global Indigenous History. 3 Credits.**
In this course, students are introduced to a global comparative history of Indigenous peoples and nations, offering a unique opportunity to study how Indigenous nations have made a significant impact from ancient to contemporary times. Global Indigenous history provides invaluable insights into key historical debates about the processes/systems of colonization, international law, treaty rights, citizenship, nationalism, democratization, war, sovereignty, community & nation building, and cultural revitalization. This lecture class explores histories of the Ancient Mayan and Incan empires; Red Power to Idle No More; Māori and Aboriginal rights movements; Tibetan independence and Gandhi’s Satyagraha; Irish and Scottish devolution; and contemporary conflict(s) in the Middle East, just to name a few. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in HIST/ISP 578. Prerequisite: Requires a prior history course or one in a related field or permission of the instructor.

**ISP 898. Master’s Non-Thesis. 1-6 Credits.**
Course for Indigenous Studies students completing a portfolio Master's exam. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission from instructor.

**ISP 899. Master’s Thesis. 1-6 Credits.**
Course for Indigenous Studies Program students completing Master's thesis projects. Prerequisite: Permission from instructor.

## Indigenous Studies Minor

### Indigenous Studies Minor

The minor in Indigenous Studies provides undergraduate students with knowledge essential to understand a broad variety of cultural, historical, political, religious, and social issues affecting Indigenous peoples. Students gain disciplinary knowledge in preparation for graduate study or immediate employment in fields such as government and other public service, or the private sector. Courses offered across the university allow students to create an individualized program of study. Our affiliate faculty members have appointments in the humanities, social sciences, arts, and professional schools across the university. Courses taken at Haskell Indian Nations University through the exchange program can count toward the Indigenous Studies minor.

### Requirements for the Minor

#### Indigenous Studies Minor Course Requirements

The Indigenous Studies minor requires 18 hours of Indigenous Studies courses, of which 12 must be in courses numbered 300 or above, with a 2.0 grade-point average. One course taken at Haskell Indian Nations University is strongly recommended.
Any course using an ISP prefix will count toward these required hours. ISP 204 and ISP 304 courses can be taught either at KU's Lawrence campus or at Haskell Indian Nations University, through the Haskell-KU Exchange Program.

Courses must have 30% or more content focused on Indigenous peoples, and be approved by the ISP Executive Committee.

### Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

#### Minor Hours
Satisfied by 18 hours of minor courses.

#### Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

#### Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

#### Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Master of Arts in Indigenous Studies

#### Indigenous Studies Master of Arts Program

The ISP master’s requires 30 credit hours to complete.

This degree enables you to become an innovative and capable scholar and leader who brings Indigenous perspectives to academic settings, government and other public service, and the private sector. ISP equips you with the knowledge and skills to conduct theoretical and applied research and to develop innovative solutions to issues facing Indigenous communities.

You’ll take courses from across KU to create an individualized program of study. Our affiliate faculty members teach in the humanities, social sciences, arts and professional schools.

To graduate, you’ll complete either a thesis or portfolio of your work.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Indigenous Studies Admission Requirements

The Indigenous Studies program accepts applications on a rolling basis, so apply to begin your studies either in the fall or spring semester.

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy. To be considered for admission to the program,
a student must hold a bachelor's degree. Non-native speakers of English must meet Graduate Studies’ English proficiency requirements (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

You can find the full list of the required application materials on the Indigenous Studies website (https://indigenous.ku.edu/how-apply/).

If you are interested in pursuing a joint M.A./J.D. with the KU School of Law or the PSM + ISP graduate certificate, you will need to apply to both programs separately.

M.A. Degree Requirements

Students pursuing the M.A. in Indigenous Studies must successfully complete 30 graduate credit hours: a 21-hour core curriculum plus 9 hours taken according to either Plan A, B, or C.

Core Curriculum

ISP 800 Indigenous Issues in the United States. A 3-hour graduate-level course that focuses on contemporary issues relating to Indigenous peoples and nations within the United States, with particular emphasis on such issues as sovereignty, indigeneity, colonialism, and decolonization. The course will address varied disciplinary approaches to this range of issues and will consider how this discourse bears upon scholarly conversations regarding broader themes in other selected fields of study.

18 hours of approved course work with content relevant to the field of Indigenous studies approved by the student's faculty advisor in consultation with the ISP Director. Courses are offered by Indigenous Studies as well as departments such as Anthropology, Environmental Studies, English, History, Political Science, Religious Studies, and Geography. A list of approved courses can be found on the ISP website (https://indigenous.ku.edu/approved-graduate-courses/). Students may take courses not on the approved list by demonstrating how the course will advance their understanding of Indigenous perspectives and/or methodologies. More information on the process of course approval may be found in the Graduate Student Handbook.

Plan A: Portfolio Option

• 9 hours of electives. Electives should be selected in consultation with a faculty advisor and complement the student's research, body of graduate work, and future career goals.
• An M.A. examination: an oral examination in which the candidate defends their portfolio, developed through coursework, research, or other creative activity, that makes a meaningful contribution to the field of Indigenous Studies.

Plan B: Thesis Option

• 6 hours of electives. Electives should be selected in consultation with a faculty advisor and complement the student's research, body of graduate work, and future career goals.
• 3 hours of ISP 899 Thesis Hours to produce a thesis on an approved subject with an oral defense that serves as the M.A. examination.

Plan C: Comprehensive Exam Option

• 9 hours of ISP 806 Directed Readings (3 hours with each M.A. exam committee member) to create and cover reading lists representative of the student's areas of interest in each committee member's field.
• An M.A. examination: The student completes a two-week take-home written comprehensive exam comprised of 3 questions created by each member of the M.A. exam committee based on the reading lists covered during the directed readings courses. Responses to the questions are to be submitted as separate essays and each essay should not exceed 15 typed pages, with citations under separate cover.
• The committee reviews and grades the student's responses as pass or no pass. If a majority of the committee members vote to pass the written exams, the student may schedule their oral defense of their responses which will serve as the final M.A. examination.

M.A. Examination

Students defend their portfolio, thesis, or written comprehensive exam before their committee in a public forum. This is a presentation followed by questions from the committee and other individuals in attendance. Students use the oral defense to relate their portfolio, thesis, or written comprehensive exam to the broader discourse in the field of Indigenous studies, and to thematic issues treated in the program's core courses.

Committee members assign an outcome of Honors, Satisfactory, or Unsatisfactory to the oral defense. A majority vote of Satisfactory is required to pass the defense.

Course-Level Requirement

All courses must be taken at the 500-level or above to count for graduate credit. Students pursuing an M.A. in Indigenous Studies must take 50% or more of their course work at the 700 level or above. ISP 800 and thesis hours (if applicable) count toward this requirement.

Graduate Policy

Students are encouraged to review Graduate Studies' policies (https://ogs.ku.edu/policies/) related to master's degree programs for information about other requirements that may apply.

Dual Degree with KU Law

The University of Kansas offers a dual degree program in Law and Indigenous Studies. As part of this unique program, students may graduate with both the J.D. and an M.A. in Indigenous Studies in three to four years, making it an ideal choice for students interested in tribal law. Students must apply separately to the Law School and the Indigenous Studies graduate program.

A student must complete the first 29 credit hours of required courses in the J.D. program before beginning any ISP course work.

The master's program in ISP requires all candidates to earn 30 graduate credit hours in accordance with Option A, B, or C outlined above. The master's program will accept for credit toward the M.A. degree 12 credit hours earned from approved courses in the law school.

Graduate Certificate in Indigenous Studies

Indigenous Studies Graduate Certificate

The Indigenous Studies graduate certificate enhances the qualifications of students seeking careers in academic settings, government and other public service, and the private sector. You'll gain knowledge essential to understand a broad range of historical, political, religious and social issues affecting Indigenous peoples. And, you'll earn an additional
The Institute for Leadership Studies
Institute for Leadership Studies

The Institute for Leadership Studies (ILS) supports the university’s mission of preparing students for a diverse and challenging world through innovative, interdisciplinary curricula at the undergraduate and graduate levels. Our programs inspire students to make a difference from where they are with what they have because we envision a world mobilized by Jayhawks with the courage and leadership skills to ignite positive change.

The ILS engages students across campus and from all disciplines in learning to do the work of leadership through a variety of programs designed to complement any degree or career path, in residence and online. The Leadership Studies Minor (LSM) serves as the centerpiece of our undergraduate curriculum, offering students opportunities to work in a small-group environment, developing universal professional skills that are highly valued in today’s workforce. Through innovative coursework, students practice diagnosis, problem-solving, and ethical decision making while developing a self-awareness which enhances tolerance for ambiguity, empathy, perspective-taking, and active reflection while increasing understanding of diversity. The combination of theoretical and experiential coursework allows students to frame existing leadership experiences, explore new leadership opportunities, and engage their disciplinary content with greater confidence and efficacy.

In addition to the LSM, undergraduate students may elect to complete the Leadership Engagement Certificate, the Online Leadership Strategies and Applications certificate, or participate in Leadership Studies centered study abroad experiences.

Graduate students can apply to the online Graduate Certificate in Leadership Studies, the hybrid Graduate Certificate in Studies in Equity and Social Diversity in the US and the Masters in Leadership in Diversity and Inclusion. These innovative, interdisciplinary programs offer graduate students, community organizers, and working professionals the tools and skills to better understand complex challenges and navigate leadership opportunities within the context of diversity, equity, inclusion, and belonging in the United States.

**Courses**

**LDST 200. Introduction to Leadership Studies and Applications. 3 Credits. SC S**
This course combines an introduction to a theoretical, research-based approach to the study of leadership with hands-on application, analysis and experimentation with the process of leadership. Students will explore core leadership competencies and apply leadership tools and processes across a variety of groups and systems, addressing issues of concern within those communities. This course satisfies the LDST 201/LDST 202 requirement for the Leadership Studies Minor. This course is not available to students with credit in LDST 201/LDST 202. Prerequisite: Instructor permission.

**LDST 201. Introduction to Leadership. 2 Credits. S**
This course introduces students to the study of the leadership process. The course covers theories and research on core themes of leadership, focusing on how course materials relate to students' own leadership experiences. Concurrent enrollment in LDST 202 is recommended. Students considering the Leadership Studies Minor must complete LDST 202. This course is not available to students with credit in LDST 200. Not open to seniors. Prerequisite: Corequisite: LDST 201.

**LDST 202. Introduction to Leadership Applications. 1 Credits. S**
This course focuses on the application of information learned in LDST 201. Activities and discussions emphasize application, analysis, and engagement with the process of leadership. Concurrent enrollment in LDST 201 is recommended. Students considering the Leadership Studies Minor must complete LDST 201 and LDST 202. This course is not available to students with credit in LDST 200. Not open to seniors. Prerequisite: Corequisite: LDST 201.

**LDST 203. Introduction to Leadership, Honors. 3 Credits. S**
This course combines an introduction to a theoretical, research-based approach to the study of leadership with hands-on application, analysis, and engagement with the process of leadership. Within a small group setting, students explore core leadership competencies and experiment with the process of leadership by engaging classmates and members of the university and local communities and addressing issues of concern within those communities. This course satisfies the LDST 201/LDST 202 requirement for the Leadership Studies Minor. This course is not available to students with credit in LDST 200 or LDST 201/LDST 202. Prerequisite: Admission to the University Honors Program, Instructor Permission.

**LDST 260. Study Abroad Topics in Leadership Studies. 1-6 Credits. S**
This course is designed to enhance international experience in topic areas related to Leadership Studies at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**LDST 290. Foundations of Leadership in Society. 3 Credits. S**
This course will expose students to a variety of concepts, theories, and skills relevant to contemporary leadership thought. Students will be challenged to consider their personal conceptions and philosophy of leadership. Students will examine leadership within particular contexts such as creating change, ethical leadership, leadership and management, and historical leadership thought and leaders.

**LDST 301. It's On Us: Gender Based Violence Prevention. 0-1 Credits. S**
This course is the first in a series of four addressing Gender Based Violence Prevention. This class examines the foundational concepts of Gender Based Violence Prevention at the individual level. Topics covered include; but are not limited to, Consent, Drug and Alchohol Facilitated Rape, Gender Based Violence as Oppression, and Bystander Intervention. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course students will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Identify the four main characteristics of consent and describe what is necessary for consent to be present (3) Identify and apply strategies for safely intervening as an active bystander on the individual level (4) Identify multiple ways that power and oppression is impacted by individual identity. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S.

**LDST 302. Breaking the Cycle: Gender Based Violence Prevention. 0-1 Credits. S**
This course is the second in a series of four addressing Gender Based Violence Prevention. This class examines the intersection between Gender Based Violence and individual identities in relation to gender and sexual orientation on the relationship level. Topics cover include; but are not limited to, introduction or Sexual Orientations, Gender Roles and Gender Construct, Sexual Health and Sex Positivity, and Healthy Relationships. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course student will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Assess behaviors that contribute to sexual health and sex positivity (3) Identify multiple ways that power and oppression are utilized through the social construct of gender and toxic masculinity (4) Identify multiple characteristics of healthy relationships and describe what is necessary for consent to be present in intimate partner relationships (5) Identify and apply strategies for safely intervening as an active bystander on the relationship level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. Prerequisite: LDST 301.

**LDST 303. Prevention is Possible: Gender Based Violence Prevention. 0-1 Credits. S**
This course is the third in a series of four addressing Gender Based Violence Prevention. This class examines the critical role social justice plays in the prevention of Gender Based Violence on the community level. Topics cover include; but are not limited to, Introduction to Social Justice, Cultural Humility, Systems of Oppressions, and Primary Prevention as Activism. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course student will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Identify and apply strategies for safely intervening as an active bystander on the relationship and community level (3) Identify multiple ways that power and oppression is impacted by individual identity (4) Contribute to gender based violence prevention on the community level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. Prerequisite: LDST 301.

**LDST 304. ACTivist: Gender Based Violence Prevention. 0-1 Credits. S**
This course is the final class in a series of four addressing Gender Based Violence Prevention. This class examines Gender Based Violence prevention through a Social Justice Frame Work and the Socioecological Model on the community and societal level. Topics cover include; but are not limited to, Social Justice Frame Work, Socioecological Model,
Evidence Based Primary Prevention, and Accountability. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course student will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Assess the intersection between the socioecological model and the social justice frames work (3) Identify and apply strategies for safely intervening as an active bystander on the community and societal level (4) Identify multiple ways that power and oppression is impacted by individual identity (5) Contribute to gender based violence prevention on the community or societal level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. Prerequisite: LDST 303.

LDST 320. How to Plan (Almost) Anything: Event Development and Management. 3 Credits. S
This course is designed to provide an introduction to the principles of special event planning and management. Students will gain foundational concepts and professional skills through researching, planning, coordinating, marketing, management and evaluation of special events. This course will develop student skills necessary to lead and manage in an ethically, environmentally, economically, and socially sustainable way. By utilizing the adaptive leadership model, students will analyze core objectives of event planning, while experimenting with smart risks and disciplined assessment. Essential topics will include event planning and coordination, sponsorship, negotiations, marketing, communications, customer service, vendor management, volunteer management, crisis risk management, and event evaluation.

LDST 420. Communication, Leadership, and Conflict Management. 3 Credits. S
This course introduces students to theories of conflict management from a variety of academic perspectives and the role leadership plays in managing conflict across multiple contexts. Students will learn how to successfully assess and command situations and effectively resolve interpersonal, organizational, and systemic conflict while doing the work of leadership. (Same as COMS 415.)

LDST 431. Communication and Leadership. 3 Credits. S
This course provides an overview of the role of communication in leadership in a variety of contexts, including: interpersonal, small group, intercultural, organizational, and public sphere. It will include theoretical and experiential approaches to effective leadership communication. Prerequisite: LDST 200, LDST 201, or LDST 203.

LDST 460. Study Abroad Topics in Leadership Studies. 1-6 Credits. S
This course is designed to enhance international experience in topic areas related to Leadership studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

LDST 470. Independent Study in Leadership Studies. 1-6 Credits. S
This course engages students in an investigation of a special topic or project selected by the student with advice, approval, and supervision of a Leadership Studies instructor. Such study may take the form of special research, individual reports and/or conferences. Prerequisite: Permission of Instructor, LDST 201, LDST 202.

LDST 480. Internship in Leadership Studies. 1-6 Credits. S
Students complete leadership-centered fieldwork in an organization related to their career goals. Criteria for the organizations and work assignments suitable for internship credit are available through the Institute for Leadership Studies. An internship plan is developed with the field supervisor and internship faculty adviser. Reports and meetings are required. Prerequisite: Permission of Instructor.

LDST 490. Special Topics in Leadership Studies: _____. 3 Credits. S
This course is designed for the study of special topics in leadership studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor.

LDST 500. Directed Readings in Leadership Studies. 1-6 Credits. S
This course is designed for directed readings in selected areas of Leadership Studies. Individual and supervised readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor.

LDST 520. Leadership Ethics. 3 Credits. S
Through collaboration, discussion, case study, and course readings, Leadership Ethics familiarizes students with various theoretical perspectives of ethical decision making and the ethics-guided behavior essential for competent leadership. Upon completion, students will understand the variety of ethical perspectives for the prescription of action in a leadership context, apply a variety of ethical perspectives to the choice and evaluation of action in leadership work, and recognize the significance of considering multiple ethical perspectives in both leadership and broader contexts. Prerequisite: LDST 202.

LDST 532. Leadership Studies Practicum. 3 Credits. S
Students simultaneously complete a 1-hour seminar in equity-centered leadership and a 1-hour supervised, direct, community involvement project in which they apply leadership knowledge, tools, and skills to a real world environment. Written assignments, journal reflections, and group discussions are used to record and assess learning. Prerequisite: LDST 201 and admission to the Leadership Studies minor.

LDST 535. Seminar in Leadership Strategies and Applications. 3 Credits. S
This seminar serves as the capstone course for the Leadership Studies minor. It includes advanced readings on leadership theory and practice, as well as major written and applied projects in which students integrate and demonstrate what they have learned in the program. Prerequisite: LDST 201, or LDST 431, and admission to the Leadership Studies minor.

LDST 690. Special Topics in Leadership Studies: _____. 3 Credits. S
This course is designed for the study of special topics in Leadership Studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit of the content differs. Prerequisite: Permission of instructor.

LDST 695. Advanced Special Topics in Leadership Studies: _____. 3 Credits. S
This course is designed to take advantage of special competence by an individual faculty member in Leadership Studies. Course content addresses timely topics and relevant issues in the field and topics change as needs and resources develop. May be repeated for credit of the content varies. Prerequisite: Permission of Instructor.

LDST 700. Introduction to Graduate Studies. 3 Credits.
This course is designed to prepare students accepted into the Master of Arts in Leadership in Diversity and Inclusion program for further graduate studies through a series of workshops, experiential learning opportunities, lecture, discussion, research assignments, and peer collaboration. Upon completion, students will have a better understanding of the expectations
of graduate education as well as campus resources, and networking opportunities designed to support degree work. Students will develop their academic skill set by focusing on scholarly writing, oral communication/presentation, research and information literacy, critical thinking, and argumentation. Prerequisite: Permission of Instructor.

LDST 705. Professionalization Seminar in Leadership Studies. 3 Credits.
This course is designed to cultivate professional habits, perspectives, and identities for graduate students primarily in the humanities and social science fields, but is open to students from all fields. The course focuses on preparation for career paths outside of higher education and based in work around Leadership in Diversity and Inclusion in the United States. Prerequisite: Graduate standing.

LDST 710. History and Theory of Leadership Studies. 3 Credits.
Theoretical foundations in leadership, organizational decision making, and communication will enhance students' development of expertise in assessing organizational and systems issues, and facilitating unit-, organization-, and system-wide improvements. Traditional approaches to leadership, organizing and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures, systems, and populations. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to effectively assess, design and lead high performing organizations in a dynamic world. Contexts discussed will include for-profit, not-for-profit, healthcare, community, and military organizations. Prerequisite: Graduate standing.

LDST 715. Leadership, Equity, and Inclusion. 3 Credits.
This course introduces students to the Adaptive Leadership framework as a tool for evaluating, navigating, and addressing difficult challenges at both a personal and systemic level. Using a case-based approach, students will identify and diagnose challenges, design equitable interventions, and mobilize diverse stakeholders to implement change on issues of concern. Prerequisite: Admission to a graduate program or certificate or consent of instructor.

LDST 720. Leadership Ethics. 3 Credits.
This course establishes a theoretical groundwork with readings and discussions that will familiarize students with five perspectives on ethical decision making and behavior as well as the essential competencies of leadership. For each of those perspectives, students will engage in reflections, collaborative case studies, and debates based on a case in point approach as well as a single-authored analysis of a selected leadership case. Prerequisite: Graduate Standing.

LDST 730. Managing the Work of Leadership. 3 Credits.
Through webinars and case in point pedagogy, this course prepares students to manage the day to day communicative and executive functions necessary for doing the work of leadership. Topics will include crisis management, stakeholder engagement, speech writing, fundraising, image management, and professionalization. Prerequisite: Graduate standing.

LDST 740. Leadership and Power. 3 Credits.
Leadership and power often are confused and this misunderstanding can lead to members of oppressed groups dismissing their own leadership potential. Through reading, reflective writing, and engaged discussion, this course will help students understand power and leadership as distinct concepts that occasionally intersect. Within their various systems, people continuously perceive, encounter, and work within different power dynamics. Thus students will learn about historical and culturally diverse understandings of power, the ethical responsibilities of power, the dangers of misuse of power, and doing the work of leadership with (and without) power. Prerequisite: Graduate standing.

LDST 760. Leadership and Communication. 3 Credits.
This course focuses on intra- and inter-personal communication, supporting students to: develop listening and empathy skills; make clear and specific requests; and express feelings and needs in a way that does not imply judgment, criticism, blame, or punishment. Learning this process involves working collaboratively through small group practice, pair shares, and teamwork to master the skills. A collaborative education approach is employed throughout the course, reinforcing learning, and providing students with confidence and competence to resolve conflict and handle challenging communication. Students critique one another's work, present feedback and suggestions, and collectively develop aptitude for successful work environments and personal relationships. Prerequisite: Admission to a graduate program or graduate certificate or instructor permission.

LDST 769. Special Topics in Leadership Skills and Methods: _____. 3 Credits.
This course is designed for the study of graduate level skills and methods in leadership in diversity, equity, and inclusion. Course content addresses specialized leadership skills or leadership research methodologies in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Admission to a graduate program or graduate certificate or instructor permission.

LDST 770. Independent Study in Leadership Studies. 1-3 Credits.
This course engages students in a graduate-level investigation of a special topic or project selected by the student with advice, approval, and supervision of a Leadership Studies instructor. Such study may take the form of special research, individual reports and/or conferences. Prerequisite: Permission of instructor.

LDST 799. Special Topics in Leadership Contexts: ____. 3 Credits.
This course offers students the opportunity to explore or extend existing investigation of populations, identities, contexts, movements, and issues common to the work of leadership in diversity, equity, inclusion, and belonging spaces. Topics will change as issues, needs, and resources develop. May be repeated for credit if the content differs. Prerequisite: Admission to a graduate program or graduate certificate or instructor permission.

LDST 800. Directed Readings in Leadership Studies. 1-3 Credits.
This course is designed for graduate level directed readings in selected areas of Leadership Studies. Individual and supervised readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Permission of instructor.

LDST 850. Leadership in Diversity and Inclusion Capstone. 1-3 Credits.
Students will integrate and synthesize the interdisciplinary knowledge they have gained in their graduate learning, making relevant connections across disciplines represented within the degree program while applying theory, skills, and methods to new contexts or complex problems. Prerequisite: Graduate standing and instructor consent.

Minor in Leadership Studies

Why study leadership studies?
In the Institute for Leadership Studies we believe that leadership is a process, not an outcome. Effective leadership starts with effective communication, and therefore students develop their learning around the
adaptive leadership paradigm and develop core leadership competencies in order to mobilize others to tackle tough challenges and thrive.

**Requirements for the Minor**

Leadership Studies is an 18-credit hour interdisciplinary minor offered through the Institute for Leadership Studies. The minor requires completion of LDST 200, LDST 201 and LDST 202 or LDST 203 with an additional 15-credit hours as identified below. Due to limited space capacity, top candidates will be given preferential permission to enroll in the subsequent LDST courses in the minor. Therefore, students may apply for admission to the minor while taking LDST 200, LDST 202 or LDST 203 or upon completion of the course. Course work involves studying theory and research in leadership and applying it to the students’ leadership experiences.

**Leadership Studies Course Requirements**

The minor requires 18 hours as follows:

Undergraduate Certificate in Leadership Strategies and Applications

The Leadership Strategies and Applications Certificate introduces the principles of effective and ethical leadership through the Adaptive Leadership paradigm. Students will explore leadership tools and processes, a variety of perspectives of ethical decision making and behavior, strategies for effective interpersonal communication and conflict management, and online communication theories and practices.

### Minor Hours & GPA

While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

- **Minor Hours**
  - Satisfied by 18 hours of minor courses.

- **Minor Hours in Residence**
  - Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

- **Minor Junior/Senior Hours**
  - Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

- **Minor Graduation GPA**
  - Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Graduate Certificate in Leadership Studies

The purpose of the Graduate Certificate in Leadership Studies is to build foundational knowledge of the history, theory, and practice of leadership with a focus on ethical decision making and understanding of the dynamics of power in doing the work of leadership. The primary objectives are to offer graduate students and working professionals tools and techniques to better understand and navigate leadership opportunities within professional and community environments, and to respond efficiently and effectively to the demands of a changing social, cultural, and political landscape while doing the work of leadership.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Graduate Admission

Any applicant seeking to pursue a graduate certificate in Leadership Studies must submit an online application (https://gradapply.ku.edu/apply/). Applications are accepted on a rolling basis. Please see the Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/) policy for information on admission requirements.

### New Applicants

Applicants who are not already enrolled in a KU graduate program should include the following materials in their application to the certificate program.

- A statement of purpose outlining their interest in the Leadership Studies graduate certificate
- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges and universities attended
Non-native speakers of English must meet English proficiency requirements (http://graduate.ku.edu/english-proficiency-requirements/).

**Current KU Graduate Students**

Applicants already in a KU graduate program must be in good standing with their home department to be eligible for admission the certificate program. Current KU graduate students should include the following materials in their online application:

- A statement of purpose outlining their interest in the Leadership Studies graduate certificate
- A letter of support from their faculty advisor or the Director of Graduate Studies in their home academic unit

**Contact**

Visit the Institute for Leadership Studies website (https://ils.ku.edu/admission-graduate-certificate/) for more detailed information about the application process.

**Interdisciplinary Studies in Liberal Arts and Sciences**

**Cross-Departmental Degree Programs**

The College of Liberal Arts and Sciences offers graduate degrees that cross multiple departments and units. For information on these, see:

- Center for East Asian Studies (http://ceas.ku.edu/);
- Center for Global and International Studies (http://global.ku.edu/);
- Indigenous Studies Program (https://indigenous.ku.edu/);
- Center for Latin American & Caribbean Studies (https://clacs.ku.edu/);
- Museum Studies Program (https://museumstudies.ku.edu/); and
- Center for Russian, East European, and Eurasian Studies (https://crees.ku.edu/).

Cross-departmental studies that have no defined degree program may be authorized upon petition. See Interdisciplinary Studies in the Graduate Studies section of the online catalog for more information.

Graduate students in degree programs may add a graduate certificate in the following areas:

- African Studies
- American Studies
- Applied Behavior Analysis
- Applied Math
- Chemical Biology
- City and County Management
- Community Health and Development
- East Asian Cultures
- Environmental Assessment
- Environmental Justice
- Geographic Information Science
- Health Psychology
- Indigenous Studies
- Medieval and Early Modern Studies
- Museum Studies
- Performance Management
- Religious Studies
- Second Language Studies
- Women, Gender and Sexuality Studies

Information on these Graduate Certificate Programs may be found in this catalog in the College of Liberal Arts and Sciences’ Overview section.

**Jewish Studies Program**

The Program in Jewish Studies offers an undergraduate major (BA in Jewish Studies) and minor, Departmental Honors (both by research paper and by service learning), and courses in Jewish Studies, Hebrew, and Yiddish. We also co-sponsor courses in many other units, especially Religious Studies, History, Global and International Studies, and Political Studies. Among our several focus areas are Jewish history and culture, Judaism, Holocaust Studies, Israel Studies, Jewish languages and narratives, and applied service in Jewish organizations.

Jewish culture and religion have flourished in a rich variety of forms and in remarkably disparate places on the globe for thousands of years. Jewish contributions have deeply affected the art, languages and literature, law, philosophy, and political thought, and the sciences of all nations. The global impact of Jewish culture thus warrants its study as an important component of the liberal arts curriculum at KU. The Jewish Studies Program at KU is the only such program in the state of Kansas. Its mission, therefore, is to celebrate the Jewish experience and promote the understanding of its cultural importance with courses and academic programs that focus on the history, diversity, culture, languages, thought, and practices of the Jewish people and their religion.

As a Jewish Studies major you will gain skills in critical thinking and cultural awareness that lead to successes in a wide array of career fields, including education, law, journalism, healthcare, and social justice advocacy. Requirements for the Jewish Studies major include 2 courses in Jewish history and/or culture; 2 courses in Judaism; 3 electives; demonstration of proficiency at the intermediate level of Hebrew or Yiddish (usually satisfied by taking 2 courses at the 200-level); and JWSH 601, a capstone course.

**Courses**

**HEBR 110. Elementary Modern Hebrew I. 5 Credits.** U F1
A beginning course in modern Hebrew. Essentials of grammar, syntax and conversational practice; elementary reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam.

**HEBR 120. Elementary Modern Hebrew II. 5 Credits.** U F2
A continuation of HEBR 110. Note Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 110.

**HEBR 177. First Year Seminar: _____. 3 Credits.** U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hebrew. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

HEBR 200. Elementary Studies in Modern Hebrew. 3 Credits. H This course is designed to help prepare students for the intermediate level of Modern Hebrew. Not open to native speakers of Hebrew. Does not count toward the JWSH minor or major. Prerequisite: HEBR 110 or equivalent. Consent of instructor.

HEBR 210. Intermediate Modern Hebrew I. 3 Credits. U F3 Further development of language skills: listening comprehension, oral efficiency, intermediate grammar and syntax, reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 120.

HEBR 220. Intermediate Modern Hebrew II. 3 Credits. U F4 A continuation of HEBR 210. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 210.

HEBR 340. Advanced Modern Hebrew I. 3 Credits. U FP Advanced study of Modern Hebrew. This course is designed to strengthen linguistic skills, enrich vocabulary, and further the study of grammar and syntax. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or permission of the instructor.

HEBR 350. Advanced Modern Hebrew II. 3 Credits. U FP Continued advanced study of modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 340 or permission of the instructor.

HEBR 395. Study Abroad Topics in Hebrew: _____ 3-6 Credits. H This course is designed for the study abroad of special topics in Hebrew at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

HEBR 410. Studies in Modern Hebrew Literature. 3 Credits. H FP An introduction to Hebrew literature from the nineteenth century to the present day. The course emphasizes the development of basic interpretive skills and the understanding of basic literary movements, genres, and concepts. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent.

HEBR 420. Studies in Modern Hebrew. 3 Credits. U FP This course is designed to help students achieve fluency in speaking, listening, and writing Modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 420 or equivalent.

HEBR 490. Independent Study. 3 Credits. U Intensive reading or research under faculty supervision. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent.

JWSH 107. Jews, Christians, Muslims. 3 Credits. HR H A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. (Same as REL 107.)

JWSH 120. Exploring the Jewish Experience. 1 Credits. H This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, and culture. Not open to students who have completed JWSH 400 or JWSH 610.

JWSH 124. Understanding the Bible. 3 Credits. HR H An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as REL 124.)

JWSH 125. Understanding the Bible, Honors. 3 Credits. HR H An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as REL 125.)

JWSH 177. First Year Seminar: _____ 3 Credits. U A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Jewish Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

JWSH 300. Topics in Jewish Studies: _____ 3 Credits. H Examination of special topics in Jewish Studies. May be repeated if topic varies.

JWSH 305. Language, Gender, and Sexuality. 3 Credits. S How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism: gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, GIST 303, SLAV 305 and WGSS 325.)

JWSH 315. The Spanish Inquisition. 3 Credits. H A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HIST 325 and SPAN 302.)

JWSH 318. Jews and Slavs in Eastern Europe. 3 Credits. H Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups have shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. "Jews and Slavs" examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both groups. Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as SLAV 318.)

JWSH 320. The Bible Then and Now. 3 Credits. An introduction and survey of the history and interpretation of the Jewish and Christian bibles from their first formation to the present day. Students will explore the way the text, interpretation and format of the Bible
have adjusted over time to accommodate religious, political, social and technological changes. Class will occasionally meet in the university's rare book collection to study rare bibles. (Same as REL 320.)

**JWSH 323. The Jewish World of Jesus. 3 Credits. H**

An introduction to the figure of Jesus in his ancient Jewish context. What was Jewish life like in Jesus's time? What did the early Jesus movement share with other forms of Judaism, and how did it differ? Evidence from the New Testament, the Dead Sea Scrolls, and other textual and archaeological sources will be used to explore the first-century Jewish society of which both Jesus and the first Christians were a part. (Same as REL 323.)

**JWSH 325. Introduction to Judaism. 3 Credits. H**

Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as REL 325.)

**JWSH 326. The Talmud: Its Origins, Nature, and Evolution. 3 Credits. H**

This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries. (Same as REL 326.) Prerequisite: REL 104, REL 107, or REL 124 or REL 125, or permission of the instructor.

**JWSH 327. Jewish Secular Culture. 3 Credits. HL H**

By examining the modern concept of Yiddishkeit (Jewishness), this course explores Jewish secularism as a set of modern intellectual, literary, and cultural practices that redefined the relationship between the secular and religious in literature, music, theatre, art, humor, and foodways. This interdisciplinary course draws on theoretical approaches from history, cultural studies, religious studies, folklore, and linguistics to examine the different secularizing cultural practices of the Jews in Central and Eastern Europe, as well as in North America.

**JWSH 329. Israeli-Palestinian Conflict: An Introduction. 3 Credits. S**

This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. (Same as GIST 329, HIST 482, and POLS 369.)

**JWSH 330. Mystical Tradition in Judaism. 3 Credits. H**

Mystical experiences and supernatural encounters in Jewish texts and tradition: Dybbuks and demons, angels and Elijah; from ecstatic enlightenment to succumbing to satan - Jewish texts and tradition are riddled with the arcane, the occult and the mystical. This course will mine the sources for a deep exploration of these aspects of Judaism that are most often obscured by "normative" teachings and practices, yet remain deeply embedded in the customs and beliefs of Jews around the world. (Same as REL 329.)

**JWSH 333. Jewish Women and Leadership. 3 Credits. H**

This course explores Jewish women's involvement and activism in their communities and immediate environment. We will explore themes in Jewish women's participation like enfranchisement, labor activism, civil rights, access to healthcare, religious practices, cultural contributions, and family units. Students will have the opportunity to consider the relationship between identity, gender, religion, community, and how these impact individuals' social behavior. Specifically, students will explore how Jewish women have to balance their religious and ethnic identities and efforts to impact their surroundings.

**JWSH 334. Jewish Women and Leadership, Honors. 3 Credits. H**

This course explores Jewish women's involvement and activism in their communities and immediate environment. We will explore themes in Jewish women's participation like enfranchisement, labor activism, civil rights, access to healthcare, religious practices, cultural contributions, and family units. Students will have the opportunity to consider the relationship between identity, gender, religion, community, and how these impact individuals' social behavior. Specifically, students will explore how Jewish women have to balance their religious and ethnic identities and efforts to impact their surroundings.

**JWSH 335. History of Jewish Women. 3 Credits. H**

This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women's lives in both Jewish and non-Jewish society. (Same as HIST 335, WGSS 335.)

**JWSH 336. Jewish American Literature and Culture. 3 Credits. H**

An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folklore, music, film, and visual art. (Same as ENGL 336.) Prerequisite:Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**JWSH 337. Religious Zionisms. 3 Credits. H**

A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required. (Same as REL 327.)

**JWSH 338. Languages of the Jews. 3 Credits. H**

From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as LING 338.)

**JWSH 339. Languages of the Jews, Honors. 3 Credits. H**

Honors version of JWSH 338 or LING 338. Languages of the Jews. Prerequisite: Membership in the University Honors Program or consent of instructor. (Same as LING 339.)

**JWSH 341. Hitler and Nazi Germany. 3 Credits. H/W**

An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as GERM 341 and HIST 341.)

**JWSH 343. The Holocaust in History. 3 Credits. H**

The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons...
the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as HIST 343.)

**JWSH 344. Modern Jewish History. 3 Credits. H**

This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of antisemitism and the Holocaust. (Same as HIST 344.)

**JWSH 345. Theatre and Genocide. 3 Credits. H**

This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in JWSH 645 or THR 645. (Same as THR 345.) Prerequisite: THR 308 or instructor permission.

**JWSH 346. The Jewish Experience in America. 3 Credits.**

This course surveys the history of American Jewry from the 17th to the 20th centuries through overlapping perspectives of economics, politics, ethnicity, culture, and gender. The first part of the course examines the three waves of Jewish immigration - Sephardic ("Spanish-Portuguese"), West-Ashkenazic ("German"), and East Ashkenazic ("Russian") - that took place between the 1600s and World War I: their specific European roots and American circumstances; the different ways in which each group adapted to, interacted with, shaped and was shaped by American life, constructed ideas of community and identity, and influenced those who came later. The second part of the course explores the genesis of an integrated and distinctive modern American "Jewishness" that emerged after World War I and reached its zenith in the 1960s. Informed by interwar and postwar social, economic and demographic transformation and critical domestic and international political developments, this process involved the reconstruction of Jewish identity and community based on the conscious blending of Jewish values, traditions, rituals, and institutions with American notions of personal happiness and success, family, domesticity and upward mobility and the conscious broadening of Jewish concepts of philanthropy and activism based on expanded notions of American Jewry's social and political mission in the United States and the world.

**JWSH 347. Jewish Ethics. 3 Credits. HR H**

In this course we will explore the variety of ways that Judaism and Jewish people have approached ethics, both theoretically and practically. Our investigation will consider the evolution of approaches across time, and variations among different communities, as well as examining how the religious tradition has, at times, differed from actual practice among Jewish people. We will look at theological, philosophical, and sociological elements that inform Jewish ethics, as well as delving into specific issues in Jewish ethics, including autonomy vs. communal norms; business and labor practices; saving a life vs. taking a life; the treatment of animals; marriage and family matters; medical ethics; universalism vs. particularism, and more.

**JWSH 349. Antisemitism: A Long History. 3 Credits. H/W**

This course surveys the genesis, evolution and persistence of antipathy towards Jews and Judaism from late antiquity through the twentieth century, exploring its connections to religious and secular ideologies and its changing nature over time, place, and culture. Using primary source documents, religious and secular art and literature, the mass media and popular expression, the course examines how antisemitism was articulated and implemented, how Jews and Judaism were perceived and represented, and how Jews and Judaism responded to antisemitism. (Same as HIST 349.)

**JWSH 350. Contemporary Jewish Identities. 3 Credits. SC H**

This course explores the variety of ways in which American Jews create Jewish identities as individuals and groups. It traces the emergence of the various current divisions within Judaism: Reform Judaism (which by definition, implies Orthodoxy), then Conservative Judaism, and then the later development of Reconstructionist Judaism. The course also explores other contemporary options for being Jewish: cultural Jews, secular Jews, unaffiliated Jews, religious Jews, and gay or lesbian or transgendered Jews.

**JWSH 361. Jewish Film. 3 Credits. HL H**

An examination of the cultural history of the Jews through films that explore Jewish themes, including but not limited to: issues of tradition and modernity, religion and secularism, immigration, gender, Zionism, anti-Semitism, and the Holocaust. Films studied may be in English and in foreign languages (with English subtitles) like Yiddish, Hebrew, and Russian.

**JWSH 371. Archaeology of Ancient Israel. 3 Credits. H**

Archaeology and art, sites and monuments of ancient Israel from the Neolithic period to Late Roman. Special topics will include the peoples of the region, nomadism and urbanization, the kingdoms of Israel, Second Temple Period, Qumran, Roman Jerusalem, and the creation and development of the synagogue. (Same as CLSX 371.)

**JWSH 382. Jerusalem Through the Ages. 3 Credits. H**

As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, HIST 382 and REL 382.)

**JWSH 387. Enemies of Ancient Israel. 3 Credits. H**

An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called “Bad Guys of the Bible” using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as HIST 381 and REL 387.)

**JWSH 395. Study Abroad Topics in Jewish Studies: ______. 3-6 Credits. H**

This course is designed for the study of special topics in Jewish Studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**JWSH 396. Hitler and Nazi Germany, Honors. 3 Credits. H**

An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism
led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as EURS 396 and HIST 396.) Prerequisite: Membership in University Honors or consent of instructor.

JWSH 400. Foundations of Jewish Studies. 3 Credits. H
This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, ethnicities and narratives, languages, customs and the arts. Special attention will be given to various career options available to students of Jewish studies. Not open to students who have completed JWSH 120 or JWSH 610.

JWSH 410. Israel: From Idea to State. 3 Credits. S
The course focuses on understanding Israel as a Nation-State of the Jewish people and its challenges regarding the balance between being a Jewish and a Democratic state. In the first part, the course surveys Jewish history in the 19th century, the birth of Zionism, and statehood's progress through the British Mandate. In the second part, students learn about Israel's major contemporary issues by discussing political, ethnic, national, economic, gender, and religious divides and their relation to the pre-statehood period.

JWSH 412. Mandatory Palestine: 1920-1948. 3 Credits. S
A review of the thirty-year history of the British Mandate over Palestine, with a focus on the successful nation building by the Jewish people and the demise of the Palestinian project in 1948.

JWSH 414. Israel/Palestine: The War of 1948. 3 Credits. S
The war of 1948 shaped the history of the modern Middle East more than any other single event. Issues that will be discussed include the participating parties, the efforts of the international community, the establishment of Israel, the division of Palestine, and the continuing problem of Palestinian refugees.

JWSH 416. Israel in the First Decade. 3 Credits. S
The course focuses on the formative period of the State of Israel from sociological, economic, religious, and cultural perspectives.

JWSH 420. Politics and Government in Israel. 3 Credits. S
The course is an introduction to the Israeli system of government and its complexities, from a comparative perspective. The course aims to deal with the processes and critical issues that characterize the Israeli political system, as well as dilemmas and conflicts that are part of it since the early days of statehood until today. (Same as POLS 480.)

JWSH 422. Topics in Israeli Society: ______. 3 Credits. U
This course explores the social interconnections and interactions of the various cultures, religions, and ethnic identities in Israel.

JWSH 426. Polls and Public Opinion in Israel. 3 Credits. S
An examination of public opinion in Israel, polls, and their effect on election results, policy making, and politics -- from a comparative perspective. We will discuss the validity of public opinion polls as a measurement tool, its advantages and disadvantages, and its success and failure at predicting election results.

JWSH 434. Arab-Palestinian Society, Culture and Politics. 3 Credits. S
This course introduces students to the study of Arab-Palestinians in Israel, by exploring the construction of Palestinian identity, their social and political structures, their culture, relations with Israeli Jews and the status of integration vs segregation within Israel.

JWSH 440. International Relations of the Middle-East. 3 Credits. S
An overview of the politics and the governmental systems of Middle Eastern nations, including the historic, religious, ideological, economic and cultural forces that shape government policies and social movements.

JWSH 445. Local Self-Governments in Israel. 3 Credits. S
An introduction to the fundamentals of local governments in Israel and their relationships, political, legal, and economic, to the central government.

JWSH 490. Directed Study in Jewish Studies. 3 Credits. H
Intensive reading or research under faculty supervision. Prerequisite: Consent of instructor.

JWSH 491. Directed Study in Jewish Studies, Honors. 3 Credits. H
Honors version of JWSH 490. Intensive reading or research under faculty supervision. Prerequisite: Membership in the University Honors Program or consent of instructor.

JWSH 525. Jews and Christians. 3 Credits. H/W
This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as REL 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor.

JWSH 562. Judaism and Political Theology. 3 Credits. H
A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization, pluralism, democracy, and revolution. (Same as REL 572.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor.

JWSH 590. Research Methods. 3 Credits. U
This seminar will introduce students to appropriate approaches and methods, especially in the Humanities and Social Sciences, for conducting research in Jewish Studies and/or in Israel Studies. Examples will draw on many disciplines, especially in the humanities and social sciences. Students will prepare a research proposal and investigative methodology. Prerequisite: Any JWSH course 300 or above or permission of the instructor.

JWSH 600. Advanced Topics in Jewish Studies: ______. 3 Credits. H
Examination of advanced topics in Jewish Studies. May be repeated if topic varies. Prerequisite: Consent of instructor.

JWSH 601. Senior Seminar in Jewish Studies. 3 Credits. H
Investigation of topics related to Jewish studies from an interdisciplinary perspective: Jewish culture, history, and religion. The course focuses on research methods and intensive writing. Prerequisite: Open only to Jewish studies majors. Suggested for students with senior standing.

JWSH 610. Foundations of Jewish Studies. 3 Credits. H
This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, ethnicities and narratives, languages, customs and the arts. Special attention will be given to various career options available to students of Jewish studies. Not open to students who have completed JWSH 120 or JWSH 400. Prerequisite: Graduate status.

JWSH 645. Theatre and Genocide. 3 Credits.
This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to
explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to student with credit in JWSH 345 or THR 345. (Same as THR 645.) Prerequisite: THR 308 or graduate standing, or instructor permission.

JWSH 650. Service Learning in Jewish Studies. 3 Credits. S
This course, to be taken in the junior or senior year, is designed to give students the opportunity to apply the knowledge, concepts, and ideas gained in courses in Jewish studies to real-life situations in appropriate agencies and organizations. Open to students in the Jewish Studies program. Prerequisite: Permission of instructor.

JWSH 681. Regimes in the Middle-East and North Africa. 3 Credits.
Using governmental case-studies in North Africa and the Middle East, this course will examine basic definitions and behaviors of liberal democracies, dictatorships, and hybrid regimes, the transitions between them, and the strategies they (and their leaders) use to stay in power. Prerequisite: JWSH 440 or permission of instructor.

JWSH 695. Study Abroad Advanced Topics: _____.
Advanced study abroad topics in Jewish and Israel studies. Prerequisite: Any JWSH course 300 or above or permission of the instructor.

JWSH 700. Topics in Jewish Studies: _____.
A study of one or more selected topics in Jewish studies. Topics can be on Jewish religion, history, culture, languages, or Israel studies. Repeatable for credit if topic varies. Prerequisite: Any JWSH course 300 and above, or equivalent by permission of instructor.

JWSH 729. Research in the Israeli-Palestinian Conflict. 3 Credits.
This course guides students in conducting research on any aspect of the Israeli-Palestinian conflict, such as its history from the Ottoman period to the present day, the social and political effects on Israelis and Palestinians, various narratives, and international responses. Prerequisite: JWSH 329 or JWSH 410 or JWSH 414 or JWSH 412 or JWSH 434 or permission of the instructor.

Courses

YDSH 177. First Year Seminar: _____.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Yiddish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

YDSH 300. Studies in Yiddish: _____.
Examination of special topics in Yiddish. May be repeated if topic varies.

YDSH 490. Independent Study. 3 Credits.
Intensive reading or research under faculty supervision.

Bachelor of Arts in Jewish Studies

The Program in Jewish Studies offers an undergraduate major (BA in Jewish Studies) and minor, Departmental Honors (both by research paper and by service learning), and courses in Jewish Studies, Hebrew, and Yiddish; we also co-sponsor courses in many other units, especially Religious Studies and History, Global and International Studies, and Political Science. Among our several focus areas are Jewish history and culture, Judaism, Holocaust studies, Israel Studies, Jewish languages and narratives, and applied service in Jewish organizations.

Students who choose to complete the BA in Jewish Studies often find employment working in Jewish education, non-profit organizations, outreach, and other areas where knowledge of Jewish languages, history, and culture is an asset. The Jewish Studies BA is easy to combine with other majors and/or minors within the College of Liberal Arts and Sciences.

Jewish culture and religion have flourished in a rich variety of forms and in remarkably disparate places on the globe for thousands of years. Jewish contributions have deeply affected the art, languages and literature, law, philosophy, and political thought, and the sciences of all nations. The global impact of Jewish culture thus warrants its study as an important component of the liberal arts curriculum at KU. The Jewish Studies Program at KU is the only such program in the state of Kansas. Its mission, therefore, is to celebrate the Jewish experience and promote the understanding of its cultural importance with courses and academic programs that focus on the history, diversity, culture, languages, thought, and practices of the Jewish people and their religion.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Requirements for the B.A. Major

Students take 30 credit hours structured according to the following plan:

2 credit hours in Jewish culture or history courses:
2 religion courses relevant to Judaism;
2 courses of intermediate or advanced Hebrew and/or Yiddish;
1 capstone seminar course in Jewish Studies (JWSH 601), writing intensive;
1 and 3 elective courses, allowing the student to explore Jewish Studies in greater breadth and depth.

### Electives

Other JWSH courses not chosen to satisfy the above requirements. HEBR and YDSH courses at 300+ level qualify as electives for up to 6 credit hours total. HEBR/YDSH courses at 200 level must be approved manually.

## Major Hours & Major GPA

### Major Hours

Satisfied by 30 hours of major courses.

### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

### Major Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major.

### Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. See the Degree Requirements tab for a list of courses that fulfill this major requirement.
4. Please note: the HEBR and YDSH Intermediate I and II courses listed on this four-year plan will fulfill both the BA Second Language requirement and the Language requirement in major. A complete list of courses that can count toward the Language requirement for the major is listed on the Degree Requirements tab. Not all the courses listed will fulfill the BA Second Language requirement. Students who use courses from the course list to fulfill the major Language requirement that do not also fulfill the BA Second Language requirement need to be sure that they either complete coursework or obtain a letter of proficiency to satisfy the BA Second Language requirement.
5. This major requires 3 courses of Jewish Studies major electives, which can be chosen from all the course lists provided under the Degree Requirements tab.
6. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

For departmental honors in Jewish Studies, students must meet the following criteria:

1. Candidates will have a grade-point average in Jewish Studies of 3.5 both at the time of declaring their intention to seek honors and by graduation.
2. In consultation with the JS honors coordinator and with approval from a supervising professor, candidates will declare their intention to seek honors no later than the time of enrollment for the final undergraduate semester.
3. Candidates will fill out a Departmental Honors Intent form (https://deptsec.ku.edu/~clasforms/forms/form/47/) and submit a copy of that form to College Undergraduate Academic Services (109 Strong Hall).
4. Candidates intending to conduct research and write a substantial, original research paper (honors essay) will enroll in JWSH 490 Directed Study in Jewish Studies or in JWSH 491 Directed Study in Jewish Studies Honors (if they are in the University Honors Program) for one or two semesters. Candidates intending to engage in service learning at a community organization will enroll in JWSH 650 and, at the end of service, will submit an essay that describes the service and reflects on the student's experience. A grade of B or higher must be earned in this/these courses.
5. A committee of three members of the University faculty (the supervising professor and two others, one of whom must be a member of the Jewish Studies faculty) will approve the honors essay or service learning project and will certify to the JS honors coordinator that the candidate has successfully completed the requirements to earn honors. The JS honors coordinator will write to notify College Advising and Student Services that the JS Honors Program has been successfully completed.
6. If the candidate is earning a double major and is attempting to earn departmental honors in two different departments, one research project may be used to satisfy the requirements of both departments if
the candidate obtains approval from both. Both departments must be represented on the student’s committee.

**Minor in Jewish Studies**

The minor in Jewish Studies provides undergraduate students with an opportunity to gain basic knowledge in Jewish Studies, with required coursework in areas of Judaism as well as Jewish History and Culture. Students will also take Jewish Studies electives in their areas of interest. The Jewish Studies minor is a great complement to a variety of majors, due to its interdisciplinary nature and flexibility.

### Requirements for the Minor

#### Jewish Studies Minor Course Requirements

Student selecting this minor must complete a course in each of the following areas:

### Electives. Satisfied by: 12

Any other JWSH course or appropriate cross-listed or cross-referenced courses in other units. (see below)

6 credit hours in Yiddish (YDSH) and/or in Hebrew (HEBR) at the 200-level or above may count among these 12 credit hours. More HEBR or YDSH courses may be approved for the minor by the Jewish Studies advisor.

#### Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

- **Minor Hours**
  - Satisfied by 18 hours of minor courses.

- **Minor Hours in Residence**
  - Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

- **Minor Junior/Senior (300+) Hours**
  - Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

- **Minor Graduation GPA**
  - Satisfied by a minimum of a 2.0 KU GPA in all courses in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Liberal Arts and Sciences Bachelor of General Studies Degree

Why pursue the B.G.S. Liberal Arts and Sciences degree option?

If, as a student, your personal goals are best served by:

- A more broad-based, liberal arts and sciences curriculum with balanced contributions from natural sciences and mathematics, social sciences, and the humanities (requiring exploration in 15 different disciplines in the College).
- The broadest preparation for admission into a professional program.
- An avenue for adding a bachelor’s degree to an already existing technical degree or licensure certificate.
- A degree option with maximum flexibility.
- A distance-education option for a KU degree.
- A degree that provides students the opportunity to build the skills and knowledge employers indicate are required for success in our changing economy and world community — skills that are limited in current college graduates.

The B.G.S. Liberal Arts and Sciences degree option is:

- Not an “Easy Out” degree option. Academic standards are the same for all degrees granted by the College of Liberal Arts and Sciences.
- Not a quick option for a bachelor’s degree. (A minimum of 120 hours is required, including degree specific coursework.)
- Not an option in which students may pursue majors or minors in the College.

Courses

HUM 110. Introduction to Humanities. 3 Credits. HL H
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education, perspectives and methods in the humanities, the humanities and human diversity, and interdisciplinary approaches to understanding and interpreting texts.

HUM 111. Introduction to Humanities, Honors. 3 Credits. HL H
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education; perspectives and methods in the humanities; the humanities and human diversity; and interdisciplinary approaches to understanding and interpreting texts. Prerequisite: Membership in the University Honors Program.

HUM 112. Exploring The Human Condition: ______. 3 Credits. H
This is a special topics course that provides an interdisciplinary exploration of human experience through the study of specific themes, periods or genres. Through reading and discussion of primary sources and scholarly texts, students will examine issues central to the human condition, be introduced to the methods that disciplines in the humanities use to analyze them, and learn the skills of close reading, critical analysis, and the interpretation of evidence. Assignments require students to
analyze source material, synthesize information, solve problems and construct arguments to support conclusions.

**HUM 114. Western Civilization I Honors. 3 Credits. H**
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. Prerequisite: Membership in the University Honors Program or permission of the department.

**HUM 115. Western Civilization II Honors. 3 Credits. H**
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period. Prerequisite: Membership in the University Honors Program or permission of department.

**HUM 125. Introduction to Medical Humanities. 3 Credits. H**
An interdisciplinary introduction to the field of medical humanities, which considers the relationship between medicine and humanistic thought. Students analyze the role of medicine in a variety of genres, while considering the growing importance of narrative and artistic expression in the medical profession. Topics may include: the objectification of the body, ageism, art and self-expression as medical care, and the impact of race, class, and culture on definitions of "illness", "health", and "beauty".

**HUM 133. Technology and the Individual. 3 Credits. H**
This course focuses on the complex relationship among technological change, increasing social complexity, and the individual from the Paleolithic Era to the so-called Computer Revolution, with a particular emphasis on Europe and the United States. Through the study of foundational texts in the history of technology and dystopian fiction, students will analyze a range of technologies from stone tools to smartphones to better understand the social, cultural, and economic forces that underlie technological change and how to critically evaluate assumptions about the nature of that change.

**HUM 140. Introduction to World Literature. 3 Credits. H**
This course provides an introduction to the field of world literature as an approach to critical reading and writing about literary works in a global context. Topics may include: what constitutes literature; challenges to reading works across time or within different cultural traditions; reading works in translation; history of writing technologies and canon formation; literature and market forces; and the literature of global encounters and exchanges. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice.

**HUM 175. Kansas Environment and Culture. 3 Credits. H**
An introduction to the inhabitants of Kansas and their experiences of the unique landscapes found within the state. Through the use of sources such as letters, autobiographies, novels, art, architecture and film, this course explores how Kansas environments have shaped and been shaped by the humans that occupy them, and why Kansas has had a powerful hold on the American imagination.

**HUM 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Humanities. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**HUM 204. Western Civilization I. 3 Credits. H**
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice.

**HUM 205. Western Civilization II. 3 Credits. H**
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period.

**HUM 206. Contemporary Western Civilization. 3 Credits. HL H**
A sequel to the two Western Civilization courses which offers the opportunity to examine influential works of literature, philosophy, history, and political thought written since the end of World War II. In keeping with the decline of colonialism and the growth of global and multicultural civilization since 1945, the readings of the course are selected from both Western and non-Western writers.

**HUM 300. Studies In: _____ 3 Credits. H**
An interdisciplinary course, focusing on different topics and drawing on diverse media, cultures, and historical periods. Humanities-based, this course, depending on its topic, may include the arts, the social sciences, and the natural sciences. May be repeated for credit with different topics.

**HUM 304. World Literature I. 3 Credits. HL H**
The study of great books in English translation from antiquity through the fifteenth century from two or more national literatures.

**HUM 308. World Literature II. 3 Credits. HL H**
The study of great books in English translation from the sixteenth, seventeenth, eighteenth, and early nineteenth centuries from two or more national literatures.

**HUM 312. World Literature III. 3 Credits. HL H**
The study of great books in English translation in the modern period (late nineteenth and twentieth centuries) from two or more national literatures.

**HUM 320. Being Human in the Workplace. 3 Credits. H**
A study of what it means to be human and humane in the workplace. Topics include the concepts of work, the worker, and the workplace; workers’ rights; issues of discrimination; business ethics; privacy and confidentiality; bullying; whistle blowing; workplace environment.

**HUM 332. Sex in History. 3 Credits. HT H**
This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, "perversions" (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as AMS 323, HIST 332 and WGSS 311.)

**HUM 340. Understanding the European Migrant Crisis. 3 Credits. H**
This course offers students the opportunity to explore the social, political and ethical consequences of transnational migration in a European context. As the foundation of a winter-break study abroad experience in the Humanities Program, the course surveys the history and geography of human mobility across the EU with a focus on concepts such as "fortress Europe," and "shelter Europe," and the borderization of the Mediterranean basin. The main component of the course consists of experiential learning activities. Students engage in site visits, interact with activists and immigrants, and participate in migrant relief projects to
better understand the dynamics of immigration policies as well as efforts to foster multiculturalism and integration within the area in question. (The program will take place in select European cities and location may vary by semester.) Prerequisite: Open only to students in the Humanities winter break study abroad program.

HUM 345. Indian Territory. 3 Credits. H
This course examines the cultural, social, economic, environmental, and political background of Indian territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HIST 318 and ISP 345.)

HUM 348. American Indian and White Relations to 1865. 3 Credits. H
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HIST 351, ISP 348.)

HUM 350. American Indians Since 1865. 3 Credits. H
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HIST 352 and ISP 350.)

HUM 364. Pregnancy in Modern Literature. 3 Credits. HL
An examination of pregnancy, childbirth and reproductive control as depicted in literature from various national traditions in the twentieth and twenty-first centuries. This course draws together voices from literature, history, and feminist theory to deepen students' understanding of the ways nationality, class, race, ability, and gender affect the aesthetics surrounding reproduction. Special attention is given to the relationship between society and the pregnant/postpartum individual. Other topics may include: eugenics, contraception, male pregnancy, and speculative reproduction. (Same as WGSS 364.)

HUM 365. Angry White Male Studies. 3 Credits. H
This course charts the rise of the “angry white male” in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HIST 364 and WGSS 365.)

HUM 366. Fat, Food and the Body in Global Perspective. 3 Credits. H
An examination of fat and food as they relate to human embodiment in a variety of world locations. Bringing into a dialogue a number of disciplinary voices, including anthropology, fat studies, feminist theory, food studies, history, medicine, and psychology, the course applies theories of culture and embodiment to select global case studies as a means of approaching the pleasures, anxieties, health implications, and symbolic functions of ingesting food and drink. Topics may include the cultural and gender politics of fatness and thinness; anorexia and feederism; food, sex, and animality; vegetarianism, food scares and food purity movements; neoliberalism and the consuming body; and the material and symbolic aspects of fats and oils. (Same as WGSS 366.)

HUM 373. Aviation in American Culture. 3 Credits. H
This course examines the complex relationship between powered flight and American society from the invention of the airplane to the rise of drone warfare. Through a mixture of scholarly works, personal accounts, and primary sources, we will investigate how use of and access to the airplane became a focal point for the construction and deconstruction of race, gender, and class distinctions and an important site in the struggle for equality and social justice. Using the airplane as a lens, we will recognize and challenge key assumptions within American technoculture such as technological messianism, technological neutrality, and the role of government in technological development. (Same as HIST 441.)

HUM 375. The Refugee Experience: Stories of Statelessness and Citizenship. 3 Credits.
This course draws on materials from multiple disciplines in the humanities including literature, history, philosophy, and cultural studies, to examine how belonging or not belonging to a state shapes the human experience. Literary texts, theoretical reflections, and historical studies on the subject of mass migration in Europe in the middle of the 20th-century will prepare for discussions of contemporary statelessness as well as responses to the refugee condition in a global context. (Same as PCS 375.)

HUM 380. Modern Themes, Ancient Models: _____ 3 Credits. H
The study of the evolution of a cultural or literary tradition from the Graeco-Roman world into modern times. The theme of the course will normally vary from semester to semester; topics such as these may be examined: the analysis of a literary genre (e.g. drama, satire, lyric), the transformation of the ancient mythical heritage, the reception of ancient astronomy. Students should consult the Schedule of Classes for the theme of the course in a given semester. With departmental permission, may be repeated for credit as topic varies. (Same as CLSX 350.)

HUM 424. Senior Seminar in Humanities. 3 Credits. H
A seminar to result in the student's integration of knowledge within the Humanities major. Students undertake a project that reflects and utilizes the interdisciplinary perspectives of the humanities. Options for the final project include a portfolio, web page, or significant writing project. Not open to freshmen and sophomores; recommended in the senior year. Prerequisite: Completion of at least 9 hours of upper division courses in the major.

HUM 430. European Civilization in World Context: _____ 3 Credits. HL H
An introduction to the literature of encounters between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as EURS 430.) Prerequisite: HUM 114 or HUM 204 and HUM 115 or HUM 205.

HUM 477. Gender and Religion. 3 Credits. H
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as REL 477 and WGSS 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender & Sexuality Studies.

HUM 494. Humanities Directed Study: _____ 1-3 Credits. H
Investigation of a subject in fields or on topics not covered in regularly scheduled courses. May be repeated for a total of 6 hours. Does not replace or satisfy specific course requirements for the HWC major. May be counted as part of the total junior-senior credit hours required.

HUM 500. Studies in: ______. 3 Credits. H
A study of significant themes, topics, or problems in the humanities. May also relate an issue in the humanities to the social sciences or natural sciences. May be repeated for credit when the topic varies.

HUM 505. Europe Today. 3 Credits. H
An exploration of major social, political and economic developments post World War II including the rise of the European Union, the integration of Eastern and Western Europe, the growing role of Islam, attitudes towards the United States, and Europe’s role in the world economy. Topics may vary based on current events. (Same as EURS 504.) Prerequisite: Junior or senior standing or consent of instructor.

HUM 508. Special Topics in World Literature: ______. 3 Credits. H
An examination of selected theoretical texts and literary works relevant to the emerging field of "world literature studies" that seeks to account for the ways that global relationships structure literary production, circulation, and reception. Topics and texts vary. May be taken more than once if content differs sufficiently.

HUM 510. Science, Technology, and Society. 2-3 Credits. H
The objective of this course is to provide members of the university community with information that enables them to judge the humanistic, moral, and ethical implications of scientific and technological developments. Formal presentations by guest lecturers, followed by question-and-answer periods, will alternate with panel discussions, symposia, etc., prepared by faculty members drawn from the various departments, schools, and organizational units of K.U.

HUM 524. Chinese Thought. 3 Credits. NW H/W
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and PHIL 506.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy.

HUM 538. Pompeii and Herculaneum. 3 Credits. H
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as CLSX 538, HA 538) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor.

HUM 545. Methodologies in Digital Humanities, Honors. 3 Credits. H
This course addresses research possibilities and ongoing debates in the field of Digital Humanities. Students will examine how digital technologies and methodologies can enhance or suggest new modes of Humanities research. The course focuses on core topics in the field, including text analysis, data visualization, digital mapping, archiving and (digital) cultural studies. We will take a hands-on and critical approach to investigating the benefits and limitation of different digital methods. Course assignments will consist of blog posts and mini projects conducted throughout the semester. At the end of the semester, students will develop a proposal for a project that brings digital methodologies to bear on a research inquiry related to the student's discipline. No prior experience in digital work or technical skills required. Prerequisite: Instructor permission.

HUM 551. Foodways: Native North America. 3 Credits. H
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and ISP 551.) Prerequisite: Upper division course on indigenous/ American Indian history, or permission of the instructor.
