1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/department-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. FMS 593 Experimental Film and Video is offered FALL ONLY.
4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
5. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
6. FMS 425 Ethics in Storytelling satisfies KU Core Goal 5
7. FMS 275 has been upgraded to 4 credit hours. Students who take FMS 275 for FMS Production credit may take one less credit hour of FMS or other elective courses.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

FMS Elective can be any Film (FMS-coded) course (Production or Culture and Studies)

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

---

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

- The FMS Department recommends no more than two production classes per semester.
- FMS Elective can be any 300+ Film (FMS-coded) course (Production or Culture and Studies)
- FMS 380, FMS 303, and FMS 302 are all topics courses meaning they can be repeated for credit as long as the topic differs.
- Screenwriting Sequence: FMS 273 Basic Screenwriting offered in the Fall and FMS 373 Intermediate Screenwriting in the Spring. FMS 273 is the pre-req for FMS 373.
Undergraduate Certificate in Media Cultures

The Undergraduate Certificate in Film & Media studies offers an examination of media strategies for analysis and storytelling in contemporary culture. The certificate is structured around five courses that integrate theory and application, designed for non-residential, non-traditional, and professional students. These courses offer a global perspective through an analytical, ethical and creative framework for evaluating media in a diversity of contexts.

To be awarded the certificate, students must successfully complete four of the following five courses

Master of Arts in Film and Media Studies

Why study film and media?

The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

The affiliation of the Department with the College of Liberal Arts and Sciences (http://clas.ku.edu/) and the School of the Arts (http://sota.ku.edu/) reflects a liberal arts perspective towards the study of film and media as well as hands-on production elements. We see film and media as ways of ordering, clarifying, and understanding human experience.

We are humanists, sharing the general goal of discovering and putting into communicable form hypotheses about human beings and the world as they interact with it. We are scholars and practitioners, and our work includes the creation of film and media, teaching, and scholarship. As a result we serve our disciplines, the University, and the surrounding community in our capacities as teachers, scholars, and artists.

Discover how film and media can change your life. In KU Film and Media Studies you’ll find a community that shares your passion for film and media and is dedicated to helping you succeed in today’s changing media landscape. You’ll find your place here within the School of the Arts’ creative community.

The M.A. degree is an academic degree but students are also expected to complete courses in film and video production. All M.A. students in Film and Media Studies must write a thesis as the culmination of their degree.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student.

Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admissions

A full list of application materials and deadlines is available on The Department of Film and Media Studies admission pages (https://film.ku.edu/admission/#Graduate%20Admission). The Department of Film and Media Studies does not admit new students for the Spring or Summer terms.

The completed application should be submitted online (https://gradapply.ku.edu/apply/).

M.A. Degree Requirements

The Master of Arts in film and media is an academic degree, but students are expected to complete 3 hours in film and video production. All M.A. students must write a thesis as the culmination of the degree.

To complete the M.A., the student must sustain a grade-point average of 3.0 or higher through 30 graduate credit hours.

Requirements for the M.A. in Film and Media Studies

A total of 30 hours is required. Students will complete 9 credits of Film and Media Studies Core, 3 credits of Production courses, 6 credits of Film and Media electives (https://film.ku.edu/graduate-courses/), 6 credits of non-FMS electives related to their chosen thesis topic and 6 credits of thesis hours.

**Ph.D. Degree Requirements**

**Film and Media Studies Core Requirements**

12 hours of core courses are required. Doctoral students in film and media studies must take a core of courses aimed at strengthening methodological, historical, and theoretical grounding. 1 graduate-level production course is required, and 1 course in FMS 902 Film Seminar is mandatory.

**Film and Media Studies Elective Requirements**

9 hours of electives (https://film.ku.edu/graduate-courses/) are required. Elective courses focus on the academic study of history, international cinema, popular culture, and digital media, among other areas. These courses are selected with a graduate advisor to reflect the student’s special interest. The advisor may increase the number of hours, depending on the student’s academic needs.

**Film and Media Studies Production Requirements**

3 hours of production courses are required. Production courses give students an understanding of the production process in making film, video, or animation pieces. On graduation, doctoral students can perform as competent artisans in addition to research scholars. Production courses are selected with a graduate advisor to reflect the student’s specific interest. The advisor may increase the number of hours, depending on the student’s academic needs.

**Secondary Field Requirements**

9 hours of secondary field courses at the graduate level from outside the Department of Film and Media Studies are chosen to assist the student in writing the dissertation. They are related to the student’s proposed area of specialization. Examples include English; History; Women, Gender, and Sexuality Studies; American Studies; Education; and Social Welfare.

Additionally, students will select their second Research Skills and Responsible Scholarship from their secondary field.

**Research Skills and Responsible Scholarship (RSRS) Requirements**

KU requires all doctoral students to meet the Research Skills requirement before proceeding to comprehensive exams. Compliance with this policy requires all graduate students to receive training in responsible scholarship pertinent to the field of research and obtain research skills pertinent to the doctoral level of research in their field(s).

Research Skills requirements may be satisfied by:
The Graduate Certificate in Film and Media Studies (https://film.ku.edu/gc-overview/) provides a concentration in core film and media theory and history courses. This certificate is designed for graduate students whose research includes analysis of media text and technologies, and provides training in methodologies and a basic familiarity with critical and theoretical discourse, both historical and contemporary, in which film and media are discussed.

Information about application materials and deadlines is available at the Department of Film and Media Studies certificate admission webpage. (https://film.ku.edu/admission/#GC%20Admission)

Currently enrolled students must be in good standing with their graduate degree program in order to participate in the certificate program. The application process entails completing the online application, paying the application fee, and submitting materials required for the Film and Media Studies Certificate.

Department of Theatre and Dance
KU Theatre and Dance: Educating the Changemakers of Tomorrow, Today

The Department of Theatre and Dance is a creative, diverse and inclusive educational environment that serves as an inspirational learning incubator for the next generation of scholars, performers, dancers, designers and technicians in theatre, performance, and dance. Our faculty and professional staff support our students to identify and cultivate their unique contributions to an increasingly global world. All of our undergraduate and graduate programs are grounded in the philosophy that artists are critically thinking, self-starting and entrepreneurially engaged artist-scholars. Our students work intensively on acquiring analytical, creative, and technical skills in our classrooms, theatre labs, and dance studios. Our holistic academic training of our students helps them to make the intellectual and practical connections between theory and practice needed to be competitive professionals in academic and professional theater environments. Our outstanding faculty and professional staff offer individualized attention to each student in a safe environment that inspires students to take risks and to explore the vast array of academic and creative choices available at a top-tier research university. Our phenomenal alumni have gone on to practice, teach, and create at the highest level of the profession in professional and academic settings.
University Theatre and the University Dance Companies

The classroom meets the stage in the University Theatre and the University Dance Companies. KU Theatre and Dance students, faculty and professional staff work together to create ten fully produced shows each year, from dramas and concert dance to musicals and operas in alternating years. In our fully-equipped facilities, students are required to engage in all aspects of production onstage and backstage. Students have opportunities to continue study year-round working with union actors, choreographers, directors, and designers with our critically acclaimed Kansas Repertory Theatre (KRT) and the Summer Dance Intensive, in partnership with the Lawrence Arts Center.

Internationally Recognized Faculty Scholars and Artists

The faculty of the Department of Theatre and Dance is creative artists and researchers working in the areas of theatre stagecraft, choreography, performance, design, dramatic literature, dramaturgy, and pedagogy, as well as the historical, literary, and cultural study of theatre, dance, and performance. Our faculty includes award-winning teachers, scholars, and artists working in professional theatre and dance, authoring books and establishing nationally and internationally recognized research and outreach programs.

Support for Students

The Department of Theatre and Dance offers students financial aid in the form of dozens of scholarships, awards, and teaching assistantships each year to graduate and undergraduate students. Friends of the Theatre (FROTH), a community group dedicated to supporting the mission of the University Theatre, provides a fantastic support network for our student shows and curricular enrichment opportunities. Donors to the Dance Division endow support for guest choreographer residencies each semester and special opportunity funds. Once students graduate our program, they join an extensive network of theatre and dance alumni and Professional Advisory Board members that work in all aspects of academe, the entertainment industry, and non-profit organizations.

Undergraduate Degrees

Dance

The BFA in Dance focuses on advanced technical training and preparation for a career in professional performance. An audition is required for entry in the BFA program. The BA in Dance provides rigorous studio training in a liberal arts environment, and allows students to double major in other disciplines. The BA in Dance does NOT require an audition for entry. Instead, students must complete an evaluation at the end of their sophomore year to complete the degree program.

Degrees offered:

- B.A.
- B.F.A.
- Minor in Dance

Performance

The Performance concentration prepares theatre majors for a career as a professional actor. Through small-class studio courses and department productions, our program provides talented performing artists with a solid foundation in acting, movement, voice and speech, improvisation, and musical theatre. Both the Bachelor of Arts (B.A.) and Bachelor of General Studies (B.G.S.) require 40 hours. The primary distinctions between the B.A. and the B.G.S. degree are the foreign language requirement (required of the B.A. but not the B.G.S.) and 18 hours junior/senior concentration or minor (required for the B.G.S but not the B.A.).

Degrees offered:

- B.A.
- B.G.S.

Theatre, Culture, and Society

This concentration is designed for students interested in studying the cultural and social underpinnings of theatre and performance along with courses in acting, directing and design and with participation in University Theatre production. The TCS concentration provides the critical, analytical, and historical education that is the foundation of a liberal arts degree. Both the Bachelor of Arts (B.A.) and Bachelor of General Studies (B.G.S.) require 40 hours. The primary distinctions between the B.A. and the B.G.S. degree are the foreign language requirement (required of the B.A. but not the B.G.S.) and 18 hours junior/senior concentration or minor (required for the B.G.S but not the B.A.).

Degrees offered:

- B.A.
- B.G.S.

Theatre Design

The Bachelor of Fine Arts (B.F.A.) in Theatre Design is intended as general preparation for the professional designer of scenery, costumes or lighting working in theatre and film or as preparation for graduate studies. Students learn through small-class studio courses, laboratories, and involvement in productions in the University Theatre.

Degrees offered:

- B.F.A.

Theatre Minor

Theatre welcomes non-majors who wish to learn about acting, drama, design, theatre history, and technical theatre through the completion of a minor.

Graduate Programs

Our M.F.A., M.A., and Ph.D. programs in Theatre and Dance are unique for combining intensive study of theatre and performance with the production training necessary for theatre and dance careers in higher education and the professional sector. Our graduate students are immersed in an integrated environment that synchronizes theory and practice and prepares artists for academic and professional careers. Currently, our M.A. and Ph.D. degrees are focused on Theatre and Performance Studies. Graduate students interested in a dance focus in this area are encouraged to apply.

Master of Fine Arts in Scenography

The M.F.A. in Scenography is a three-year integrated program of study leading to a Master of Fine Arts degree, the terminal degree for professionals working in design for theatre, dance, film, and television. Scenography classes are at the core of the curriculum and students will
develop a portfolio in a wide variety of theatrical and performance genres. Students will design in both the large Crafton-Prayer proscenium stage and the Inge black box theatre. Opportunities exist to work with new technologies in theatre design, including Virtual Realities.

Degrees offered:

• M.F.A.

Master's and Doctoral Degrees in Theatre Studies

The master's and doctoral programs in Theatre and Dance combine rigorous study of theory, criticism, and history with production work in a collegial atmosphere. MA students admitted are usually coming directly from a four-year college experience with minimal professional experience and intense academic study. Doctoral students can expect to develop expertise in current methodologies, such as those derived from or applicable to contemporary historiography, semiotics, post-structuralism, performance studies, post-modernism and cultural studies. Production practice areas include but are not limited to Acting, Directing, Dance, and Dramaturgy. The research of our faculty ranks us in the top ten among a selection of major institutions in the 2015 Faculty Productivity Index by Academic Analytics. The department is an organizational member of the Association for Theatre in Higher Education and home to the prestigious Journal of Dramatic Theory and Criticism.

Degrees offered:

• M.A. or Ph.D.

Departmental Funding

The Department recognizes that financial support during the graduate years is crucial to student success. Through a combination of university awards, departmental teaching assistantships, tuition assistance, student employment, fellowships, and travel grants, we are able to provide almost all of our students with some level of support. Graduate Students in the department may be supported in their careers by a limited number of departmental teaching assistantships, typically awarded to M.F.A and Ph.D. students. More information regarding funding is available on the Graduate Financial Aid (https://theatredance.ku.edu/graduate-financial-aid) portion of the department website.

Advising

During the first year of enrollment, students must meet with the Director of Graduate Studies once per semester. Returning students will meet one time during the year with the Director of Graduate Studies to determine progress to degree. Advising of students is also conducted by individual faculty members who act as mentor and advisers of students who have interest in their specialty research areas.

Non-Degree Seeking

Students who are interested in enrolling in graduate level coursework in the Department of Theatre and Dance without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department's Non-Degree Seeking page for more information.

Courses

DANC 100. Introduction to the Dance Major. 1 Credits.  H

This is a 6 week online course designed to identify what is unique about the KU Dance experience, and to introduce students to the requirements for a BA or BFA degree. The course examines issues of academic integrity, informs students about academic support available to them, familiarizes students with the expectations of a dance major and suggests career opportunities for dance majors. Students complete five modules: Getting Started, Programs and Degrees, Academic Integrity and Support, Expectations and Career Pathways to provide a foundation for academic success in the major.

DANC 101. Ballet I. 2 Credits.

Classical and modern approaches to the language of ballet for beginners. May be repeated for credit. Does not count toward the dance major requirements.

DANC 103. Modern Contemporary I. 2 Credits.

Dance technique for beginners with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for credit. Does not count toward the dance major requirements.

DANC 105. Jazz I. 2 Credits.

Dance technique for beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Does not count toward the dance major requirements.

DANC 150. Choreography I. 2 Credits.  H

The introductory-level course in a series of four composition courses (DANC 150, 250, 350 and 550). Includes basic exploration of improvisation: movement studies for solo figure, movement themes for duet, trio, and larger groups; and dances for non-traditional performing spaces both indoors and outdoors. Students will learn fundamental ingredients of dance (space, time, weight, and energy flow) and how to organize them into short compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: Consent of instructor.

DANC 177. First Year Seminar:   .  3 Credits.  U

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Dance. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

DANC 210. Rhythms and Structures of Music. 3 Credits.  H

An introduction to the analysis and use of rhythms and the compositional forms of music for dance.

DANC 211. Ballet II. 2 Credits.

Classical and modern approaches to ballet technique for low intermediate dancers. May be repeated for credit. Counts toward the B.A. in Dance and Dance Minor requirements. Prerequisite: DANC 101 or consent of instructor.

DANC 213. Modern Contemporary II. 2 Credits.

Dance technique for low intermediate dancers with precedents in the movement vocabularies of classical modernists and contemporary choreographers of dance. May be repeated for credit. Counts toward the B.A. and the Minor in dance requirements. Prerequisite: DANC 103 or permission of instructor.

DANC 215. Jazz II. 2 Credits.

Dance technique for experienced beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Counts toward the B.A. and Minor in dance requirements. Prerequisite: DANC 105 or consent of instructor.

DANC 250. Choreography II. 2 Credits.  H
The intermediate course in a series of four composition courses (DANC 150, DANC 250, DANC 350 and DANC 550) includes more complex exploration of improvisation; movement studies for solo figure, movement themes for duet, trio, and larger groups; and dances for non-traditional performing spaces both indoors and outdoors. Students will further develop the ingredients of dance (space, time, weight, and energy flow) and how to organize them into studies including compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: DANC 150 or consent of instructor.

DANC 260. Musical Theatre Dance. 3 Credits.
This course focuses on the dance and movement vocabulary uniquely associated with musical theatre productions, as well as a variety of popular dance styles from the 1920s to the present. Performance techniques for the stage are emphasized.

DANC 290. Sophomore Review. 0 Credits. H
The Sophomore Review of all majors in the BA program in Dance provides an assessment of student progress in the degree. Transfer students to the BA program participate in the year following their admission to KU. The review process consists of: verification that students are making academic progress; Students should have an overall GPA of 2.0; a self-evaluation composed of written responses to a series of questions about their own artistic, technical and discipline-specific academic progress in the program; a faculty evaluation comprised of written feedback on each students artistic, technical and discipline-specific academic progress in the program; and participation in at least one speedback session prior to the end of the second year. Speedback is a feedback process modeled on the speed dating format. All majors sit with faculty members for 5-minute intervals to receive individual feedback. Students engage with professors with whom they have been in technique class or rehearsal for the current year. There are no prerequisites for entry into the course. The completion of the course will be a prerequisite for enrollment in DANC 550 Senior Project.

DANC 307. Pointe and Pas de Deux. 2 Credits.
An introduction to pointe and classical partnering work for the intermediate/advanced female ballet dancer, with equal emphasis on pointe technique and style, and on classical repertory for couples. May be repeated for credit. Prerequisite: Consent of instructor.

DANC 308. Pas de Deux. 1 Credits.
The exploration of classical ballet partnering (pas de deux) including supported poses, lifts, turns, and their coordination between the partners. For men only. Women enroll in Pointe and Pas de Deux, DANC 307. May be repeated for credit. Prerequisite: Consent of instructor.

DANC 311. Ballet III. 3 Credits. H
Advanced level technique in classical and modern approaches to the language of ballet. May be repeated for credit. Prerequisite: Instructor consent.

DANC 313. Modern/Contemporary III. 3 Credits. H
Dance technique for intermediate/advanced dancers with precedents in the movement vocabularies of classical modernists and contemporary choreographers of dance. May be repeated for credit. Counts toward the B.A., B.F.A., and the Minor in dance requirements. Prerequisite: Consent of instructor.

DANC 315. Jazz III. 3 Credits. H
Dance technique for intermediate dancers based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for variable credit. Prerequisite: DANC 105 or consent of instructor.

DANC 317. Hip Hop Fundamentals. 3 Credits.
Basic fundamentals of hip-hop dance. Students will learn basic steps for choreography and freestyle based on all urban street styles. They will learn the origins and history of the hip hop movement and all urban street styles through lectures and class participation.

DANC 319. Tap Fundamentals. 3 Credits. SC H
Introduces the principles of tap dance including rhythm, clarity of sound, syncopation and weight shift. Emphasis is placed on proper execution of basic tap technique, step knowledge, weight distribution, and the development of basic rhythm and syncopation skills. The course will be based on “stomp tap” and “rhythm tap”, working with/without the music to make clear patterned sounds.

DANC 320. University Dance Company. 0-1 Credits.
A dance repertory, performance and production class. Emphasis is on the development of skills for performing and/or producing dance concerts. Admission by audition only. May be repeated for credit.

DANC 330. Approaches to World Dance. 3 Credits. HL H
This course examines dance forms from throughout the world and how they relate to the times and cultures in which they evolved. Dance forms such as African, East Indian classical, European court dance, ballet, modern, and jazz will be studied through readings, master classes, live performances, videotapes, and films. Prerequisite: 200-level English course.

DANC 334. Introduction to African Dance Theatre. 2 Credits. NW U
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as AAAS 334 and THR 334.)

DANC 350. Choreography III. 3 Credits. H
The advanced course in a series of four composition courses (DANC 150, DANC 250, DANC 350 and DANC 550) includes in-depth development of improvisation: movement studies for solo figure, movement themes for duet, trio, and larger groups; and dances for non-traditional performing spaces both indoors and outdoors. Students will develop increasingly complex studies of dance (space, time, weight, and energy flow) including compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: DANC 250 or consent of instructor.

DANC 375. Anatomy and Injury Prevention. 3 Credits. H
Basic concepts of neuromuscular and skeletal education through the use of specific imagery (ideokinesis). Based on the work of Mabel Todd, Lulu Sweigard, and Irmgard Bartenieff, the emphasis is on body connectedness and dynamic alignment. The aim is to realize full movement potential in the most efficient way through intrinsic body awareness. Injury prevention is addressed by introducing principles of conditioning (strength, flexibility, endurance) and factors leading to injury such as muscular imbalances or postural deviations.

DANC 411. Ballet IV. 3 Credits. H
Advanced level technique in classical and modern approaches to the language of ballet. Prerequisite: Consent of instructor.

DANC 417. Hip Hop II. 3 Credits. SC H
Intermediate/advanced hip hop dance. Students will learn intermediate/advanced hip hop skills, combinations, and choreography. Greater focus will be placed on intermediate/advanced steps, isolations, and body control. Prerequisite: Hip Hop Fundamentals or permission of instructor.

DANC 419. Tap II. 3 Credits. SC H
Intermediate/advanced tap dance. A continuation of the principles introduced in Tap Fundamentals including rhythm, clarity of sound, syncopation and weight shift. Proper execution of intermediate/advanced tap technique including step knowledge, weight distribution, and
the development of rhythm and syncopation skills is emphasized.  
Prerequisite: Tap Fundamentals or permission of instructor.

DANC 420. Introduction to Videography and Website Design for Dance. 3 Credits. H
This is a hands-on course exploring digital video technology for dance. Students are introduced to video and website production as well as the time management skills necessary to engage the multi-faceted project that is dance video. We will cover video techniques for recording dance; video editing; collaborating with national and international sites and artists; and self-promotion and marketing strategies with video and websites. The final project will be the creation of a video website for each student. No previous video editing experience is required. Prerequisite: Basic computer literacy.

DANC 440. Introduction to Classical East Indian Dance. 3 Credits. W
Classical East Indian dance has an extensive movement vocabulary that emphasizes the coordination of rhythmic foot patterns with intricate hand gestures. Students will learn the mudras (hand gestures) and their significance and integration within each dance. Readings will include excerpts from the Natya Sastra and other treatises of East Indian dance and culture.

DANC 460. Dance History: Research and Reconstruction. 3 Credits. HL H
Through research and reconstruction, students will examine major topics in dance history, such as the meaning and function of dance in pre-industrial societies, communal and court dance in Europe from the 14th to the 19th centuries, and the transformation and development of dance as a theatre art in the modern world. Texts by dance historians and treatises by dancing masters will be supplemented by readings from fields, such as anthropology, philosophy, art history, and literature, that indicate the different ways of approaching the history of dance.

DANC 475. Career Preparation in the Arts. 3 Credits. H
Designed to provide an overview of key areas in career preparation in the arts, including resume writing, audition skills, professional speaking, grant writing and development, publicity and marketing strategies, developing relationships with presenters and funders, and audience education. Through readings, class discussion, guest lectures with professionals, and projects based on real-life scenarios, students develop tools to further their careers in the arts. This focused study also provides individuals with the direction and means to employ their training in the field of performing arts administration and management at many different levels. This course prepares students for their entry into the professional arts marketplace.

DANC 490. Introduction to Flamenco Dance Technique. 3 Credits.
Using the basic compass (rhythmic structures) of Flamenco, we will explore the different components of flamenco dance technique: floreo (spiralling fingers), brazeeo (arm movements), palmas (rhythmic hand-clapping), marcaje (marking, or movement through space), vueltas (turns) and zapateado (footwork). We will cultivate an awareness of flamenco's unique posture, learn the structure of the different rhythmic forms and introduce the possibilities for personal expression and improvisation.

DANC 498. Directed Study in: _____ 1-3 Credits.
Investigation of a special topic or project in aesthetics, dance history, movement analysis, production, or a creative project. A maximum of six hours may be counted toward graduation. Prerequisite: At least seven hours of credit in dance courses.

DANC 520. Pedagogy. 3 Credits. H
Methods and materials designed to address the needs of teaching artists across genres of dance (ballet, modern/contemporary, jazz, creative movement) among children, adults and special populations. Lessons are prepared and tested in the classroom among peers. Prerequisite: Consent of Instructor.

DANC 530. Practicum in: _____ 1 Credits.
Supervised experience in teaching beginning level dance technique in the styles of ballet, jazz, or modern dance. Different approaches are analyzed, discussed, and tested in the studio. Prerequisite: Intermediate level of dance technique in the style of the practicum.

DANC 540. Field Experience in Dance Teaching. 3 Credits.
Teaching ballet, modern, or jazz dance technique to children or adults with faculty supervision in an academic or community program. Prerequisite: Consent of instructor.

DANC 550. Senior Project. 3 Credits.
In-depth research project in dance theory or history, or choreography project involving the complete development and presentation of a dance idea. Prerequisite: Performance option: DANC 320, DANC 350, DANC 290 (for BA students only) and permission of the dance division. Research option: DANC 340, DANC 370, DANC 375, DANC 460, DANC 462, DANC 290 (for BA students only) and permission of the dance division.

DANC 580. Special Topics in Dance: _____ 3 Credits.
A study of current developments in dance with an emphasis on performance or research. May be repeated for credit. Prerequisite: Junior or senior standing or consent of instructor.

DANC 898. Directed Study in: _____ 1-3 Credits.
Directed study in some aspect of aesthetics, dance history, movement analysis, production, or an advanced creative project. Prerequisite: Consent of instructor.

Courses

THR 100. Introduction to the Theatre. 3 Credits. HL H
Designed to help students by means of experience with theatre as well as study about it to achieve an understanding of its cultural role in contemporary society, to develop a sensitive and informed appreciation of its art, and to make it an integral part of their cultural lives. Lectures, discussion groups, special interest groups, theatre attendance.

THR 101. Theatre Practicum I. 1 Credits. H
One crew assignment in a University Theatre & Dance production qualifies for 1 credit hour. May be repeated for credit.

THR 105. Improvisation. 3 Credits. H
Designed to free the beginning actor, develop creativity and imagination. Fundamentals of improvisation technique and skills through physical work, deep listening and focus. Ensemble building emphasized with exercises and games, the work will progress to sketch writing and performance.

THR 106. Acting I. 3 Credits. HL H
Fundamental techniques in acting. Practice in character creation, body language, and effective stage speech.

THR 111. Make-Up. 1 Credits. H
The techniques in application of make-up for specific characterizations, both straight and character. Study of the structure of the face and hands for stage make-up. Should be taken concurrently with THR 106, if possible.

THR 116. Scenographic Techniques. 3 Credits. H
Emphasis on drafting, model building, and presentation techniques for the theatrical designer or art director. Some work in computer drafting for the designer-technician. Lecture and laboratory periods.

THR 120. Public Speaking as Performance. 3 Credits. H
This course offers a unique approach to public speaking grounded in theatre practice and performance studies. A combination of speech assignments and theatre exercises teaches students to integrate body and mind while speaking across social, cultural, and disciplinary boundaries.

THR 177. First Year Seminar:  1 Credits.  H
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in Theatre. May not contribute to major requirements in theatre. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

THR 201. Theatre Practicum II.  1 Credits.  H
One crew assignment in a University Theatre & Dance production qualifies for 1 credit hour. May be repeated for credit. Prerequisite: THR 101.

THR 206. Acting II.  3 Credits.  H
The study of roles and scenes from plays. Practice in character analysis, creation of roles, rehearsal of scenes, and ensemble work. Prerequisite: THR 106.

THR 210. Musical Performance for the Actor I.  3 Credits.  H
Beginning Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance.

THR 212. Beginning Voice and Speech for Actors.  3 Credits.  H
A foundation course; introduction to phonetics; training in Standard American Stage Speech; articulation skills; resonance and voice placement.

THR 213. Movement I: The Acting Instrument.  3 Credits.  H
A foundational course in discovering ease and efficient use of the body in a performance context, developing non-verbal communication and partnering skills, and establishing the connection of movement to voice production. Trains actors in proper warm-up technique, alignment and balance, physical safety, and basic tumbling skills.

THR 215. Approaching Design.  3 Credits.  HL H
Conceptualization and visualization of the elements involved in creative design for theatre, dance, television, and film.

THR 216. Scenic Production.  2 Credits.  H
Introduction to the planning, construction, and mounting of scenery for theatre, television, and film. Concentration on the technical organization of scenic production. Lecture, discussion, and laboratory periods.

THR 220. Costume Production.  2 Credits.  H
Introduction to techniques of costume construction, including study of fabrics, color, fundamentals of pattern making, and draping of costumes for theatre, television, and film. Concentration on the technical organization of costume production. Lecture, discussion, and laboratory periods.

THR 224. Lighting Production.  2 Credits.  H
Introduction to the planning and execution of lighting for theatre, television, and film. Concentration organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

THR 301. Theatre Practicum III.  1 Credits.  H
One crew assignment in a University Theatre & Dance production qualifies for 1 credit hour. May be repeated for credit. Prerequisite: THR 201.

THR 302. Undergraduate Seminar in:  3 Credits.  H
Course organized any given semester to study a particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

THR 304. Study Abroad Topics in:  1-6 Credits.  H
This course is designed for the study of special topics in Theatre at the junior/senior level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

THR 306. Acting III.  3 Credits.  H
Advanced projects in acting. Character and scene analysis, scoring the role, rehearsal, and performance. Prerequisite: THR 206.

THR 307. Undergraduate Theatre Internship.  1-3 Credits.  H
Supervised study with an approved theater company or project. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Prerequisite: Consent of instructor and at least seven hours credit in the department.

THR 308. Script Analysis.  3 Credits.  H
This course provides knowledge and methods enabling students to conduct in-depth study of dramatic scripts. Emphasis is given to the analysis skills appropriate to practitioners of stage and screen arts.

THR 310. Musical Performance for the Actor II.  3 Credits.  H

THR 313. Movement II: Physical Characterization.  3 Credits.  H
The study of diverse physical acting techniques, and an investigation into creating a character through manipulation of the acting instrument. Actor training in performance neutrality, mask work, age, and gender distinctions. Prerequisite: THR 213 and permission of instructor.

THR 315. Stage Management.  3 Credits.  H
Stage Management is an introduction to the job and responsibilities of a professional stage manager. Through a general examination of what a stage manager does throughout the process of running a show, students gain basic knowledge of every facet of the skills needed from pre-production to final performance. Through a combination of integration and application, with a strong focus on problem solving, the course introduces students to much of the backstage logistical and otherwise unseen work that makes theater possible.

THR 316. Beginning Scene Design.  3 Credits.  H
Study of scenic design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor.

THR 320. Beginning Costume Design.  3 Credits.  H
Study of the costume design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 215.

THR 324. Beginning Lighting Design.  3 Credits.  H
Study of the lighting design process with beginning problems in textual analysis, style, historical research, with preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor.

THR 326. African Theatre and Drama.  3 Credits.  NW H/W
A study of the origin and development of continental African theatre and its affinity to the Levant. Traditional, colonial and contemporary dramatic
theories and experiments will be examined in play selections. (Same as AAAS 355.)

**THR 327.** African-American Theatre and Drama. 3 Credits. H
A historical study of Black Theatre in the U.S.A. from its African genesis to its contemporary Americanism. Epochs in African-American dramaturgy will be critically examined. (Same as AAAS 356.)

**THR 334.** Introduction to African Dance Theatre. 2 Credits. NW U
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as AAAS 334 and DANC 334.)

**THR 345.** Theatre and Genocide. 3 Credits. H
This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in JWSH 645 or THR 645. (Same as JWSH 345.) Prerequisite: THR 308 or instructor permission.

**THR 380.** Popular Culture: _____. 3 Credits. HL H
Interdisciplinary examination of popular culture oriented around a specific genre or theme. Objects of study may include popular forms of live performance such as musicals or vaudeville, as well as media-based performances (radio, television, film, internet). Specific topic to be studied changes as needs and resources develop. May be repeated for credit for different topics.

**THR 401.** Stage Management and Assistant Direction. 1 Credits. H
Majors are assigned to stage manage or assistant direct a University Theatre production, or to take related workshops in stage management or assistant directing. May be repeated for credit

**THR 406.** Audition Techniques. 3 Credits. H
This course prepares students for all types of audition experiences. It includes study in techniques of prepared auditions, cold readings, interviews, and the musical audition for actors. Emphasis is placed upon developing resumes and photo portfolios as well as concentrated study in professional contracts, unions, and agent acquisition. Prerequisite: THR 206.

**THR 407.** Advanced Acting Special Topic: _____. 3 Credits.
This course is designed for the study of special topics in performance techniques involving advanced skills for the actor at the junior/senior level. Specific topic to be studied changes as needs and resources develop. May be repeated for credit for different topics. Prerequisite: THR 306. Theatre major or minor students.

**THR 410.** Musical Performance for the Actor III. 3 Credits. H
Advanced Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance. Prerequisite: THR 106, THR 210, and THR 310.

**THR 413.** Stage Combat Skills. 3 Credits. U
Study of the illusion of violence in a dramatic context and the special skills necessary for creating believable and safe stage fights. Actor training in armed and unarmed combat, including one or more of the following: rapier and dagger, broadsword, and quarter staff. Prerequisite: THR 313 and permission of instructor.

**THR 429.** Postcolonial Theatre and Drama. 3 Credits. NW H
The course develops an understanding of the postcolonial concept and its different manifestations in theatre and drama across nations and cultures. It approaches postcolonialism as a way of reading theatre, and as a genre within theatre by exploring how the "colonial project" has reconfigured the concept, content, and context of theatre in both colonized and colonizing cultures. In addition to the study of postcolonial playwrights and their works, the course is also an introduction to postcolonial theory and its critics. (Same as AAAS 429.)

**THR 498.** Honors Directed Study in Theatre. 3 Credits. H
Individual creation of an original product that integrates theatre knowledge and skills. Selected in advance with advice, approval, and supervision by an instructor. Prerequisite: Consent of instructor, senior level status, and 3.5 GPA in Theatre and 3.25 GPA overall at the time of enrollment.

**THR 499.** Directed Study in Theatre. 3 Credits. H
Individual creation of an original product that integrates theatre knowledge and skills. Selected in advance with advice, approval, and supervision by an instructor. Prerequisite: Consent of instructor and junior or senior level status.

**THR 506.** Acting for the Camera. 3 Credits. H
A study of acting techniques appropriate to the requirements of the camera. Emphasis is placed on developing audition skills necessary to compete for roles in dramatic features, corporate videos, and commercials. Actors acquire skills essential to the transition from stage to camera. Prerequisite: Permission of instructor.

**THR 508.** Fundamentals of Directing. 3 Credits. H
Offered as an initial approach to play directing, this course introduces students to practical and theoretical aspects of the craft of stage directing. Prerequisite: THR 308.

**THR 512.** A Vocal Approach to the Classics. 3 Credits. H
This is an advanced voice and speech course for actors aiming to further increase their command over tone, rhythm, pacing, and diction. Their range and power will be extended. Through discovery of the demands of a variety of classical texts, the actor will be challenged both in verse and in prose to develop the skills necessary to fully interpret that material. Prerequisite: THR 212.

**THR 516.** Scenic Painting Techniques. 3 Credits. H
Study of painting equipment, tools, pigments, binders, and vehicles, and their relationship to the surfaces to be painted. Instruction in basic painting techniques. Prerequisite: THR 116 and THR 215.

**THR 517.** Computer-Aided Design. 3 Credits. U
Study of new media in theatre and film/video production, primarily computer technologies and methods for the theatrical designer or art director. Emphasis on computer 3-D modeling and color rendering. Prerequisite: THR 116, THR 215, or permission of instructor.

**THR 518.** Scenography and the Classic Script. 3 Credits. H
Holistic production design, including lighting, scenery, and costumes, for classic theatre scripts. Contrasts historical styles of production with styles for contemporary spaces and audiences. Projects tailored to the needs and level of the students. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in THR 720. Prerequisite: Consent of instructor.

**THR 519.** Scenography and the Modern Script. 3 Credits. H
Holistic production design, including lighting, scenery, and costumes, for modern theatre scripts. Examines modern styles of production. Projects tailored to the needs and level of the students. This course is offered at the 500 and 700 level with additional assignments at the 700 level.
Not open to students with credit in THR 721. Prerequisite: Consent of instructor.

**THR 520. History of Period Style I. 3 Credits. H**
A survey of Western style from ancient Egypt to the Restoration. Focus is placed on developing a comprehensive understanding of the stylistic relationships between art, architecture, clothing, decor, manners, and social and political history. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor.

**THR 521. History of Period Style II. 3 Credits. H**
Continuation of THR 520, from the Restoration to the present day. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor.

**THR 525. History of Theatre. 3 Credits. H**
Study of developments in world theatre and drama from the ancient world to the eighteenth century. Prerequisite: THR 308.

**THR 526. History of Theatre II. 3 Credits. H**
Study of developments in world theatre and drama since the eighteenth century. Prerequisite: THR 308.

**THR 528. History of U.S. Theatre and Drama. 3 Credits. H**
Historical approach to the development of theatre and performing arts in the United States. Prerequisite: THR 308.

**THR 560. Collaborative Production. 3 Credits. H**
Seniors collaborate as a theatre company to create an original production that integrates several of the following areas: improvisation, playwriting, acting, directing, dramaturgy, design, technical production, and stage management. Collaboration of group project approved in advance with advice, approval, and supervision by at least one instructor. Prerequisite: Senior level and consent of at least one instructor.

**THR 599. Special Topics in Scenography. 1-6 Credits. U**
Individual studio activity. Course content to be determined by the student under the supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor.

**THR 603. Theatre for Young Audiences. 3 Credits. U**
A survey of theories, history, literature, criticism, production methods, and audience research about theatre performed by adults for children and adolescents. Emphasis is on child development and community outreach. Prerequisite: THR 308 or consent of instructor.

**THR 617. Computer-Aided Design II. 3 Credits. U**
Continuation of THR 517. Emphasis on computer-generated images as scenic media in production situations. Prerequisite: THR 517, or permission of instructor.

**THR 618. Scenography and the Musical Theatre. 3 Credits. H**
Holistic production design, including lighting, scenery, and costumes, for musical theatre, opera, and dance. Examines development and changes in design styles in the evolution of musical theatre, opera, and dance and the special requirements of these forms. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 820. Prerequisite: Consent of instructor.

**THR 619. Scenography and the Contemporary Script. 3 Credits. H**
Holistic production design, including lighting, scenery, and costumes, for contemporary scripts. Examines contemporary episodic scripts written for the stage that are based on a filmic structure, the special problems of these kinds of scripts, and the respective problems of designing for theatre and film. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 821. Prerequisite: Consent of instructor.

**THR 620. Scenography and the Experimental Production. 3 Credits. H**
Holistic production design, including lighting, scenery, and costumes, for experimental scripts/scenarios. Examines experimental approaches to a variety of script/scenarios, including mixed-media production. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 822. Prerequisite: Consent of instructor.

**THR 626. Myth and the Dramatist. 3 Credits. U**
This seminar critically explores myths in dramatic literature from ancient to contemporary times, using select authors from different cultures. Analysis of the works will be based on both conventional and post-structuralist theories and specific emphasis will be on myths that have been adapted cross-culturally and/or in different time perspectives.

**THR 645. Theatre and Genocide. 3 Credits.**
This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to student with credit in JWSH 345 or THR 345. (Same as JWSH 645.) Prerequisite: THR 308 or graduate standing, or instructor permission.

**THR 702. Graduate Seminar in: ______. 3 Credits.**
Course organized any given semester to study particular subject matter or to take advantage of special competency by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

**THR 703. Directed Readings in Theatre. 1-3 Credits.**
Research and presentation of reports on specific subjects related to the students major area of specialization. May be repeated up to a total of six credits on petition. Prerequisite: Instructor Consent.

**THR 704. Study Abroad Topics in: ______. 1-6 Credits.**
This course is designed for the study of special topics in Theatre. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**THR 707. Theatre Internship. 3-12 Credits.**
Study with an approved theatre company. Emphasis may be in one or all of the following areas: acting, directing, stage management, technical theatre, promotion management. No more than six hours may be applied to an M.A. degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

**THR 710. The Art of Directing. 3 Credits.**
Offered as an advanced course in play directing. Theory is combined with practical application to explore the craft of directing using a variety of styles in classic and contemporary theatre. Lecture and laboratory periods.

**THR 715. Problems and Techniques of Direction. 3 Credits.**
Individually supervised directing of theatre pieces for public presentation. In special cases, credit may be given for musical direction, dramaturgy, choreography, or stage management. Prerequisite: Consent of instructor.

**THR 719. M.F.A. Production Seminar. 3 Credits.**
To be taken by M.F.A. candidates during those semesters in which they are assigned to design one or more elements in a production to be mounted on one of our stages. Weekly critique and discussion of solutions to practical design problems from conception through execution. May be repeated for a total of no more than six hours credit. Prerequisite: Consent of instructor.

**THR 720. Scenography and the Classic Script. 3 Credits.**
Holistic production design, including lighting, scenery, and costumes, for classic theatre scripts. Examines historical styles of production with styles for contemporary spaces and audiences. Projects tailored to the needs and level of the students. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in THR 518. Prerequisite: Consent of the instructor.

**THR 721. Scenography and the Modern Script. 3 Credits.**
Holistic production design, including lighting, scenery, and costumes, for modern theatre scripts. Examines modern styles of production. Projects tailored to the needs and level of the students. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in THR 519. Prerequisite: Consent of instructor.

**THR 725. Russian Theatre and Drama from Stanislavski and Chekhov to the Present. 3 Credits.**
A study of the development of Russian theatre and dramatic literature from 1898 to the present. Lectures and readings in English. (Same as SLAV 762.)

**THR 800. Introduction to Graduate Study in Theatre. 3 Credits.**
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in theatre and performance studies. The course should be taken at the beginning of the graduate student's program.

**THR 801. Professional Development Seminar. 1-3 Credits.**
Preparation for faculty careers in theatre and related fields, including issues of research, teaching, and service. At least three hours per semester will be devoted to training in responsible scholarship. May be repeated for credit.

**THR 815. Advanced Play Production. 1-3 Credits.**
Individually supervised advanced directing of theatre pieces for public presentation. In special cases, credit may be given for musical direction, dramaturgy, choreography, or stage management. Prerequisite: Instructor consent.

**THR 817. Theory of Acting and Directing. 3 Credits.**
Readings, lectures, discussions and papers on acting and directing theory; is concerned with the divergence between presentational and representational acting methods and the emergence of directing art.

**THR 819. Advanced M.F.A. Production Seminar. 3 Credits.**
Continuation of THR 719, but production design assignments will be more complex and larger in scope. May be repeated for maximum of six hours credit. Prerequisite: Six hours of THR 719 and consent of instructor.

**THR 820. Scenography and the Musical Theatre. 3 Credits.**
Holistic production design, including lighting, scenery, and costumes, for musical theatre, opera, and dance. Examines developments and changes in design styles in the evolution of musical theatre, opera, and dance and the special requirements of these forms. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 618. Prerequisite: Consent of instructor.

**THR 821. Scenography and the Contemporary Script. 3 Credits.**
Holistic production design, including lighting, scenery, and costumes, for contemporary scripts. Examines contemporary episodic scripts written for the stage that are based on a filmic structure, the special problems of these kinds of scripts, and the respective problems of designing for theatre and film. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 619. Prerequisite: Consent of instructor.

**THR 822. Scenography and the Experimental Production. 3 Credits.**
Holistic production design, including lighting, scenery, and costumes, for experimental scripts/scenarios. Examines experimental approaches to a variety of script/scenarios, including mixed-media production. Projects tailored to the needs and level of the students. This course is offered at the 600 and 800 level with additional assignments at the 800 level. Not open to students with credit in THR 620. Prerequisite: Consent of instructor.

**THR 898. Investigation and Conference (for Master's Students). 1-8 Credits.**
Directed research and experimentation in theatre. Limited to eight hours credit toward the Master's degree.

**THR 899. Master's Thesis. 1-6 Credits.**

**THR 901. Theatre Seminar in: _____. 3 Credits.**
A graduate seminar devoted to selected historical, theoretical, or critical issues in theatre. Prerequisite: Consent of instructor.

**THR 914. Theories of Race and Performance. 3 Credits.**
Theories of Race and Performance is an inter-textual graduate course that explores interdisciplinary scholarship on race and performance. It seeks to translate these theories into practical application in various visual, audio and performance texts in popular culture. The course is divided into modules aimed at gaining an understanding of the shifting meaning of race over time and its relationship to ethnicity, gender, sexuality, class, nation, and power. How do we perform our identities? How is race constructed and maintained through performance? To begin to answer these questions, we will examine the ways in which racial identities are created through performance.

**THR 917. Dramatic Theory I. 3 Credits.**
Advanced study in the history of critical theory relating to dramatic literature, theatre, and performance.

**THR 922. Theatre Historiography. 3 Credits.**
This course focuses on the advanced study of research methods, subjects, interpretative paradigms, theoretical frameworks, and philosophies of history employed in contemporary approaches to writing and teaching theatre history.

**THR 998. Investigation and Conference (for Doctoral Students). 1-8 Credits.**

**THR 999. Doctoral Dissertation. 1-12 Credits.**

**Bachelor of Fine Arts in Dance**

**Bachelor of Fine Arts in Dance**

A BFA in dance focuses on technical training and preparation for a career in professional performance. An audition is required for entry in the BFA program. For information regarding the audition process, please see the Department of Theatre and Dance’s website (https://theatredance.ku.edu/admission-audition/) or email KUDance@ku.edu (kudance@ku.edu).
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Bachelor of Fine Arts in Dance Degree Requirements

The B.F.A. requires an audition for entry; however, students enrolled in the B.A. program may audition at the end of each academic year. In order to be considered for a scholarship or entry directly into the B.F.A. program, incoming students MUST audition in person or online via Acceptd (https://app.getacceptd.com/kudance/).

The curriculum leading to the B.F.A. focuses on technique, choreography, and performance. It prepares students for professional careers or further academic study in dance. Entrance into the B.F.A. program is provisional during the first year. After evaluation of the year's work and approval by the faculty, a student is fully accepted into the B.F.A. program.

B.F.A. majors receive integrated training in ballet, modern, and jazz dance technique. They also take courses in choreography, dance theory, history, dance science, and pedagogy. Other B.F.A. courses include flamenco, performing arts administration, classical East Indian dance, conditioning and injury prevention for dancers, and musical theatre dance. Students must complete a senior project in performance and/or choreography. B.F.A. majors have a variety of performance opportunities as members of the University Dance Company (https://rockchalkcentral.ku.edu/organization/universitydancecompany/). A total of 120 credit hours is required.

## Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

### Major Hours

- **Satisfied by 72 hours of major courses.**

### Major Hours in Residence

- **Satisfied by a minimum of 15 hours of KU resident credit in the major.**

### Major Junior/Senior Hours

- **Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.**

### Major Junior/Senior Graduation GPA

- **Satisfied by 72 hours of major courses.**
- **Satisfied by a minimum of 15 hours in the field of study, including F’s and repeated courses.**
- **See the GPA Calculator ([http://clas.ku.edu/undergrad/tools/gpa/](http://clas.ku.edu/undergrad/tools/gpa/)).**
- **Satisfied by 15 hours of KU resident credit in the major.**

### Field Experience in Dance Teaching

**Total Hours:** 120

1. Technique placement determined by Dance Department faculty. If student begins technique coursework at 200-level, degree plan will alter significantly.
2. See Catalogue for full list of approved Dance Technique Electives.
3. Choreography classes sequenced/not offered every semester. See Dance Course Rotation ([https://theatrdance.ku.edu/dance-courses/](https://theatrdance.ku.edu/dance-courses/)) for more details.
4. See Catalogue for full list of approved Dance General Electives.
5. DANC 490 Introduction to Flamenco Dance Technique satisfies Goal 3 Arts and Humanities.
6. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Bachelor of Arts in Dance**

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Bachelor of Arts in Dance Degree Requirements**

The B.A. in Dance at the University of Kansas does not require an audition. Instead, all students must pass a technical and academic evaluation at the end of their sophomore year. However, to be considered for a scholarship, a prospective or transfer student must audition. The B.A. in dance offers comprehensive technical training, built on a solid liberal arts foundation, which allows students to double-major or to pursue graduate study in any number of fields.

The curriculum leading to the B.A. in dance offers integrated training in ballet, modern, and jazz dance techniques, as well as courses in classical Indian dance, African dance and flamenco dance techniques, musical theatre dance, dance improvisation and composition, video for dance, history and philosophy of dance, music for dance, creative dance for children, dance production, career preparation in the arts and independent study options. The program prepares students for professional careers in dance or for further academic study. The senior project may involve research in any of the above areas or choreography and performance culminating in a senior recital. Students are expected to take technique classes appropriate to their level of training each semester they are enrolled. A total of 120 credit hours is required.

and the B.G.S. degree are the foreign language requirement (required of the B.A. but not the B.G.S.) and 18 hours junior/senior concentration or minor (required for the B.G.S but not the B.A.).

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

There are no major admission requirements for the B.A. or B.G.S. in Theatre.

Students considering a theatre major should enroll in THR 106 and THR 101 and complete all 100- and 200-level courses in the first 2 years of study. It is imperative that theatre students earn practicum credit (THR 101, THR 201, THR 301) early in their careers at KU.

Requirements for the B.A. and B.G.S. Major

Both the B.A. and B.G.S. require 40 hours. The distinction between the B.G.S. degree and the B.A. degree is found in College of Liberal Arts and Sciences requirements.

Theatre, Culture, and Society Emphasis

The following 40 hours are required: (40 hours)

- THR 101: Theatre Practicum I
- THR 106: Acting I
- THR 201: Theatre Practicum II
- THR 215: Approaching Design
- THR 308: Script Analysis
- Select two of the following: Scenic Production, Costume Production, Lighting Production
- Select one of the following: Theatre Practicum III, Stage Management and Assistant Direction
- Select two of the following: History of Theatre, History of Theatre II, History of U.S. Theatre and Drama

Bachelor of Arts and Bachelor of General Studies in Theatre

Theatre B.A. and B.G.S. students work intensively on acquiring theatre skills and knowledge in classrooms, studios, and laboratories. Undergraduates pursuing the B.A. or B.G.S. may choose from two emphases: Theatre, Culture, and Society or Performance.

The Performance concentration prepares theatre majors toward a career as a professional performer. Through small-class studio courses and department productions, our program provides talented performing artists with a basic foundation in acting, movement, voice and speech, improvisation, and musical theatre.

The Theatre, Culture and Society concentration prepares students for careers that require critical, analytical, and historical foundations in the liberal arts, while providing courses in acting, directing and design as well as participation in University Theatre production. Our program provides emerging scholars with basic knowledge and research tools for understanding the social and cultural significance of theatre and performance.

Both the Bachelor of Arts (B.A.) and Bachelor of General Studies (B.G.S.) in Theatre require 40 hours. The primary distinctions between the B.A. and the B.G.S. degree are the foreign language requirement (required of the B.A. but not the B.G.S.) and 18 hours junior/senior concentration or minor (required for the B.G.S but not the B.A.).
Theatre, Culture, & Society Electives - 18 hours. Satisfied by:
Successful completion of 6 courses (18 hours) of THR 210 or any
300-level or above Theatre course. Up to 3 hours may be taken in
a drama, cultural studies, or related course outside the department,
with a faculty advisor's approval.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the
following hour and grade-point average minimum standards:

Major Hours
Satisfied by 40 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in
the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+)
in the major. GPA calculations include all junior/senior courses in the
field of study including F's and repeated courses. See the Semester/
Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Performance Emphasis

the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+)
in the major. GPA calculations include all junior/senior courses in the
field of study including F's and repeated courses. See the Semester/
Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Theatre with the following
concentrations can be found here: Theatre, Culture, and Society
(p. 1948) and Performance (p. 1947), or by using the left-side navigation.

Sample 4-year plans for the BGS degree in Theatre with the following
concentrations can be found here: Theatre, Culture, and Society
(p. 1950) and Performance (p. 1949), or by using the left-side navigation.

Departmental Honors
An undergraduate interested in honors in theatre must present a written
declaration of intention to the department's honors coordinator as early as
possible in the junior or senior year. The following are required:

1. A grade-point average at the time of declaration and at graduation of
   at least 3.5 in theatre courses.
2. 3-6 hours of THR 498 Honors Seminar. Enrollment in this course
   must be approved by the honors coordinator. Students in the honors
   seminar work under the direction of one instructor for each semester.
   The instructor conducts an examination at the end of each semester's
   work and assigns a grade. Credit only is given to students who
   complete the work assigned for any semester but do not complete
   the requirements for honors. Students may change area of interest
   or instructor at the beginning of a semester with the consent of the
   honors coordinator.

BA in Theatre with concentration in Performance

### Total Hours 120

1. Complete online Crewing Application form to enroll in THR 101, THR 201, THR 301. Crewing Application (https://www.kutheatre.com/crewing/) can be found on the Theatre website.
2. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
3. Four credit hours of Theatre Production coursework required for the THR performance major.
4. Prerequisite for History of Theatre coursework and THR 508 Fundamentals of Directing
5. See Catalogue for full list of approved Theatre Performance electives.
7. THR 560 Collaborative Production, THR 307 Undergraduate Theatre Internship, and THR 499 Directed Study in Theatre all satisfy KU Core Goal 6.
8. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
9. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
ENGL 101 (Goal 2.1 Written Communication/BA Writing I)² 3  
ENGL 102 (Goal 2.1 Written Communication/BA Writing II)² 3
First Year Seminar Goal 1.1 Critical Thinking 3  
Goal 1.2 Quantitative Literacy² 3
1st Semester Language (BA Second Language) 5  
2nd Semester Language (BA Second Language) 5

Below is a sample 4-year plan for students pursuing the BGS in Theatre with a concentration in Theatre, Culture & Society. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Notes:

THR 120 Public Speaking as Performance satisfies KU Core Goal 2.2.

The Theatre Department offers classes that satisfy KU Core Goal 4.1 and Goal 4.2. See Theatre Advisor for more details.

It's recommended that students enroll in a KU Core Goal 6 from their major concentration when available.

See footnote or Catalogue for THR Goal 6 options.

## Total Hours

- 120

Please note:

- All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
- The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

## Bachelor of Fine Arts in Theatre Design

The Bachelor of Fine Arts (B.F.A.) in Theatre Design is intended as a general preparation for the professional designer of scenery, costumes or lighting in theatre and/or film or as preparation for graduate studies. Students learn through small-class studio courses, laboratories, and...
involvement in productions in the University Theatre. Students in the B.F.A. Theatre Design program take 69 hours in Theatre, Visual Art, and Art History in addition to the KU Core and electives.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**B.F.A. in Theatre Design Degree Requirements**

The program leading to the B.F.A. degree in theatre design is offered cooperatively by the School of the Arts and the Department of Theatre. It requires 6 hours of foundational coursework, 63 additional hours in the major, and completion of the KU Core, as well as additional general electives, for a total of 120 hours.

**General Electives**

- Additional credit hours of general electives are needed to meet the minimum total hours required for graduation.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 69 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (https://degreeprogress.ku.edu/gpa/).

Below is a sample 4-year plan for students pursuing the BFA in Theatre Design. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Minor in Dance

#### Dance Minor

The dance minor is designed to balance creative and technical aspects of dance with historical, cultural and theoretical studies. Our students are expected to attain and/or maintain the intermediate to high intermediate level in one area of dance technique, to think and write critically about dance, and to develop an understanding of the larger field of professional dance. The 20-credit hour minor allows students with an interest in dance to advance their study while pursuing a major in another discipline.

#### Requirements for the Minor in Dance

**Open to all KU students**

**Dance Minor Course Requirements**

Students selecting this minor must complete the following requirements:

  - Senior Hours
  - Elective/Degree/Junior-Second Area of Study/9
  - Total Hours 120

---

1. Alternative: THR 100 Introduction to the Theatre — Also satisfies Core Goal 3 Arts and Humanities
2. THR 116 only offered in the Fall
3. Beginning Theatre Design Courses offered on rotation. Check with Theater Advisor for more details.
4. Pre-Requisite for THR 508 and History of Theatre coursework
5. See Catalogue for full list of approved Theatre Design Electives
6. History of Period Style offered every other year. Check with Theatre Advisor for more details.
7. THR 508 only offered in the Fall
8. THR 560 Collaborative Production, THR 307 Undergraduate Theatre Internship, and THR 499 Directed Study in Theatre all satisfy KU Core Goal 6.
9. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Minor Hours & Minor GPA
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 20 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 junior/senior hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (https://degreeprogress.ku.edu/gpa/).

Master of Arts in Theatre
The Master of Arts in Theatre Studies helps students to begin developing a broad, comparative grasp of the major methods, approaches and protocols currently used in both the study and practice of theatre and performance. Special emphasis is placed on (1) an analytic understanding of theatre history and similar genres of performance, (2) the ability to critically engage the practical protocols, past and present, that have been influential in the creation and study of theatrical art and performance, and (3) the capacity to understand socio-cultural contexts that influence theatre scholarship and practice.

The M.A. helps to prepare students for leadership roles in a wide array of community, regional, and national arts organizations. The M.A. degree also provides students with a strong foundation to transition to a doctoral program.

Please visit the Department of Theatre and Dance’s Graduate Resource page for more information.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admissions
Our holistic application evaluations are based on several criteria: grades, the strength of recommendation letters, written or portfolio samples, previous experience and the fit of your interests with our program. A full list of application materials and deadlines is available on The Department of Theatre and Dance’s admission pages (https://theatredance.ku.edu/ma-phd-admissions/). The Department of Theatre and Dance does not admit new students for the Spring or Summer terms.

The completed application should be submitted online.

M.A. Degree Requirements

The Master of Arts in theatre is an academic degree, but students are expected to complete 6 hours in theatrical production. All M.A. students must write a thesis as the culmination of the degree. At least 50% of the coursework required for the MA degree must be taken at the 700 level or above.

To complete the M.A., the student must sustain a grade-point average of 3.0 or higher through 33 graduate credit hours. Up to 6 hours of additional courses in a foreign language or research skills may be required by your advisor.

Requirements for the M.A. in Theatre

A total of 33 hours is required. All courses should be selected in consultation with the graduate advisor.

General Theatre Studies

Select 15 hours of courses from graduate offerings in theatre history, dramatic literature, history and criticism; Of these 15 hours, up to 6 may be graduate courses from other areas such as film and media studies; child psychology; American studies; African and African-American studies; women, gender, and sexuality studies; developmental psychology; English; and pertinent offerings from language and culture programs.

Completion of the Degree

An oral examination structured around a thesis based on scholarly and/or creative research:

THR 899 Master's Thesis 3

The final examination consists of an oral examination upon completion of a thesis that is accepted by the candidate’s committee. The M.A. thesis is a work of original research and writing that explores in depth a carefully delimited subject related to the student’s area of emphasis. The master’s candidate satisfies the final examination requirement with a majority vote of “Satisfactory” by the candidate’s committee. The committee may also recommend the student for Honors, which is a designation conferred by the Department at graduation.

Throughout the course of graduate study, the student must fulfill all relevant College and University policies (http://coga.ku.edu/graduate-policies/).

Further details about meeting the degree requirements can be found in the Department’s Graduate Handbook.

Master of Fine Arts in Theatre Design-Scenography Concentration

The M.F.A. in Scenography is a three-year integrated program of study leading to a Master of Fine Arts degree, the terminal degree for professionals working in design for theatre, dance, film, and television. Scenography classes take an engaged, practice-based approach to theatre design to prepare students in areas of technical production such as costume, lighting, and set design. Our core curriculum provides students with the tools that they need to develop a portfolio in a wide variety of theatrical and performance genres. Students will execute realized designs in both the large Crafton-Preyer proscenium stage, the William Inge Memorial theatre (black box) as well as studio and site specific spaces. Students learn new technologies in theatre, lighting and costume design, including new innovations in Virtual Realities.

Please visit the Department of Theatre and Dance’s Graduate Resource page for more information.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admissions

Our holistic application evaluations are based on several criteria: grades, the strength of recommendation letters, written or portfolio samples, previous experience and the fit of your interests with our program. A full list of application materials and deadlines is available on The Department of Theatre and Dance’s admission pages (https://
The completed application should be submitted online.

M.F.A. in Theatre Design with a Concentration in Scenography Degree Requirements

Scenography classes are at the core of the curriculum. While in the program, students will design at least 4 realized productions in the University Theatre program. They will do at least 1 lighting, 1 costume and 1 scenic design, and preferably a combination of 2 or all design areas for 1 production. Design assignments, made by the scenography faculty, will be based on the students’ experience and interests (i.e., a student with little experience in lighting design will be given a less challenging project in the smaller theatre).

Students work with the KU Theatre’s professional staff in the realization of their designs. Successful scenography students at the University of Kansas have come from a variety of backgrounds, including theatre, art and design, illustration and architecture. Students with deficiencies in theatre production, theatre and/or art history, and painting and drawing may be required to take undergraduate courses in these areas, which could result in a longer program.

To complete the M.F.A., the student must sustain a grade-point average of 3.0 or higher through 60 graduate credit hours. At least 50% of the coursework required for the M.F.A. must be taken at the 700 level or above. The following guidelines govern the distribution of hours:

Electives: no limit, but a minimum of 15 hours for a total of 60 hours. Courses in Theatre are recommended, specifically THR 520, 521, 525, 526 or 599 as needed.

All courses should be selected in consultation with the graduate advisor.

The MFA thesis is an essential element of the Master of Fine Arts degree. It is a work of original scenography with scenic, lighting, and costume design elements. It contains a written component that articulates and justifies the scenographic vision. The MFA thesis is developed under the supervision of a committee of faculty members. The completion of a master’s thesis concludes with an oral examination conducted by the student’s thesis committee. A master’s candidate satisfies the final examination requirement with a majority vote of “Satisfactory” by the candidate’s committee. The committee may also recommend the student for Honors, which is a designation conferred by the Department at graduation.

Throughout the course of graduate study, the student must fulfill all relevant College and University policies (http://coga.ku.edu/graduate-policies/).

Further details about meeting the degree requirements can be found in the Department’s Graduate Handbook.

Doctor of Philosophy in Theatre

The purpose of the Ph.D. in Theatre is to develop leaders in the areas of both studies and practice. The curriculum requires an intense exposure to critical theory, history and historiography, and the craft and art of performance. We offer practice opportunities for doctoral students in directing, acting, and dramaturgy in order to help doctoral students prepare for work as scholar artists. Our graduates have excellent placement in higher education, non-profit organizations, and various posts in the entertainment industry as professional artists and administrators. Recent and former students from the M.A. and Ph.D. programs work or have worked across a wide array of academic and artistic settings, including Junkyard Dog Productions, The Ohio State University system, Chapman College, Washburn University, CBS, Disney Productions, University of Costa Rica, University of Minnesota (Morehead), Southern Illinois University, University of Georgia, Texas Christian University, University of Minnesota (Duluth), University of Arizona, California State University (Fresno), Southern Utah University, Bismarck State College, SUNY-Buffalo, Columbus State University, University of Kansas, Benedictine College, Wayne State College (Nebraska), and Converse College.

Please visit the Department of Theatre and Dance’s Graduate Resource page for more information.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Ph.D. Degree Requirements

The Ph.D. is an academic degree, but students must demonstrate competence in at least one production area. Normally the Ph.D. requires 60 hours not including Research Skills and Responsible Scholarship requirements. All courses must be chosen in consultation with an advisor.

Core Requirements

12 hours of core courses in Theatre are required.

THR 800 is required in the first semester.

9 credit hours of graduate level courses selected in consultation with an advisor. Students choose from departmental courses in theatre history, performance studies, dramatic literature, theory, and criticism. Students must take only departmental courses their first semester of graduate study.

Elective Requirements

9 hours of electives are required. Elective courses focus on the academic study of theatre/performance history, theory, and related methodologies. Courses are selected with a graduate advisor to reflect the student’s special interest. These may include courses outside the Department with prior approval of the Department with prior approval of the advisor and Director of Graduate Study.

Secondary Field Requirements

Students choose 9 hours at the graduate level from outside the department to assist them in writing the dissertation. Courses are related to the student’s proposed specialization. (See examples of departments with applicable coursework under Elective Requirements.)

Production Courses

6 hours of production courses are required. To become competent artists as well as developing research scholars, students choose a sequence of graduate courses in either scenography, directing, dance, or dramaturgy.

Research Skills and Responsible Scholarship

The Department of Theatre Doctoral Research Skills and Responsible Scholarship requirements are met by fulfilling the following:

- THR 800 Introduction to Graduate Study in Theatre (3 credit hours in 1st semester).
- 3 credit hours of THR 801 Professional Development Seminar,
- THR 999 Doctoral Dissertation,
- If required by faculty advisor for dissertation topic, reading ability in a foreign language or proficiency in an alternative language skill pertinent to the specialty (e.g., computer languages, American sign language). Reading ability or alternative-language proficiency can be demonstrated by: (1) completing with a grade of B or better two college semesters of the language; or (2) completing with a B or better a course in reading comprehension; or (3) submitting a letter from a qualified faculty member attesting to student’s language proficiency.

Comprehensive Examination

The comprehensive examination is an essential element of the doctoral program, providing an opportunity for students to focus and consolidate the diverse strands of their graduate course work, to demonstrate competence for teaching in particular subject areas, and to establish a strong foundation for moving on to the dissertation. It consists of 4 parts:

1. A written examination, which covers 4 or 5 areas of expertise. Ordinarily, each area corresponds to a member of the student’s committee.
2. Submission of 1 publishable paper of article length (5,000 to 8,000 words) that demonstrates the student’s ability to research and write original scholarship at a level appropriate to the field. Publishable papers may be revised versions of papers submitted in KU courses. Publishable papers must be submitted on the first day of the written examination.
3. Submission of a dissertation prospectus 2 weeks before the oral exam.
4. An oral examination, given 2 to 4 weeks after the written examination. The oral examination lasts about 90 minutes and may revisit material covered in the written examination, the publishable papers, dissertation prospectus and/or other material as deemed appropriate by the committee.

While preparing for the examination, students must enroll in THR 998 Investigation and Conference (for Doctoral Students). This course may be taken twice for a total of 6 credit hours.

Dissertation

Upon successful completion of the comprehensive oral exam and dissertation prospectus, students adhere to Doctoral Candidacy policy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/) until they are ready to defend their dissertation. The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly creativity. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on a useful area of interest a variety of research skills and scholarly or creative processes. Further details about the committee requirements and scheduling process can be found in the
Welcome to Visual Art

The Department of Visual Art (http://art.ku.edu/) at KU functions as a creative laboratory where students, mentored by a faculty of internationally recognized artists, explore a broad range of media and disciplines.

Housed in a major university, the department encourages the development of a unique artistic voice through critical inquiry and research. Students have the additional opportunity to pursue interdisciplinary and collaborative work across the School of the Arts, as well as the University at large. The University of Kansas is the school of choice for ambitious art students throughout the region. The Department of Visual Art provides students with the technical skill and cultural awareness essential to the careers of professional artists, scholars, teachers or administrators. Seminars on specialized topics, a strong visiting artist schedule, trips to major cities, and study abroad possibilities enrich students studying Visual Art at the University of Kansas.

The University of Kansas is a member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of those organizations.

Facilities

Visual Art students have access to excellent facilities and close mentoring from the Visual Art faculty. Coursework includes practice, discussion and critiques with faculty, advisors, and visiting artists. Cross discipline investigations are strongly encouraged and many courses are team-taught. Exhibition and installation spaces are readily available throughout the community of Lawrence. Kansas City with its rich history in the visual arts is just a short drive away.

Chalmers Hall, a 130,000 square foot mega structure, houses a full range of studio facilities including THE COMMON SHOP (http://art.ku.edu/common-shop) — a fabrication shop with two full time technical assistants ready to assist students. The well-equipped SCULPTURE FACILITIES (https://art.ku.edu/sculpture/) include a foundry, metalshop, and woodworking studio. The EXPANDED MEDIA FACILITIES (https://art.ku.edu/expanded-media/) include digital imaging facilities as well as sound and projection equipment, upgraded annually as those technologies evolve. The PRINTMAKING FACILITIES (https://art.ku.edu/printmaking/) include space for intaglio, lithography, and serigraphy studios, as well as large format presses and equipment for papermaking and book arts. The CERAMICS FACILITIES (https://art.ku.edu/ceramics/) include gas and electric kils, and a separate complex for wood-fired kils. The METALSMITHING/JEWELRY FACILITIES (https://art.ku.edu/metal smithingjewelry/) offer casting, soldering, enameling equipment, a digital mill, and 3-D printer. The TEXTILES/FIBERS FACILITIES (https://art.ku.edu/textilesfibers/) include floor looms, printing and dyeing labs, multiple sewing machines, and a computer lab. The PAINTING FACILITIES (https://art.ku.edu/paintingdrawing/) include three enormous group studios equipped with easels. The Department of Visual Art places great emphasis on drawing and maintains four large drawing studios. The department also offers individual workspace for upper level majors. The ART & DESIGN GALLERY (http://art.ku.edu/art-design-gallery/) presents student, faculty, visiting artist and thematic exhibitions.

Highly Qualified Faculty Scholars and Artists

The faculty of the Department of Visual Art is comprised of internationally recognized artists and scholars with interests that span a broad range of media and disciplines. Dedicated to educating the next generation of artists, award-winning teachers prioritize mentorship, offering students individual attention and small class sizes.

Most courses in Visual Art are studio, practice-based courses. Studio classes are typically capped at 15-20 students. All areas have classes that are open to non-majors. Three-credit courses normally meet in class for six hours weekly for 15 weeks of fall and spring semester; another nine hours of work is expected outside class. Studio areas are open and accessible.

Undergraduate Programs

Undergraduate Degrees

The department offers undergraduate degree programs leading to a Bachelor of Arts in Visual Art, a Bachelor of Fine Arts in Visual Art, a Bachelor of Fine Arts in History of Art, a Bachelor of Art Education, and a Visual Art minor.

All our degrees allow students to design an academic experience tailored to their interests and goals. By choosing and combining courses from across a variety of studio areas, students direct their own educational path. The degree provides an immersive academic experience in which students master the fundamentals of the form. Through advanced coursework, students explore the nuances of artistic avenues that best complement their professional and creative goals. The degrees prepare students for careers as teachers or administrators in a variety of settings including public schools, arts agencies, art museums, community centers and other venues.

Visual Art (https://art.ku.edu/degrees/) (Drawing, Painting, Expanded Media, Sculpture, and Printmaking)

Ceramics (https://art.ku.edu/degrees/)

Metalsmithing / Jewelry (https://art.ku.edu/degrees/)

Textiles / Fibers (https://art.ku.edu/degrees/)

Combined Art History / Visual Art (https://art.ku.edu/degrees/)

Visual Art Education (https://art.ku.edu/degrees/)

Visual Art Minor

Advanced Placement in Art and Design

Students who score 3, 4, or 5 on the CEEB Advanced Placement Examination may receive up to 3 credit hours in art studio electives. Advanced placement credit does not exempt students from foundations requirements.

Advising

Students admitted to work toward B.F.A., B.A., or B.A.E. degrees are advised by the academic advisor in Visual Art in combination with faculty members in their chosen concentration. Check sheets describing each program in complete detail are available from the Visual Art main office, 300 Chalmers Hall, or online (http://art.ku.edu/). History of Art, information is available from the Kress Foundation Department of Art History (http://
Students are encouraged to seek advice from any faculty member in a specific area of interest.

Students are expected to spend time outside of class working in the studio. For each credit hour in class another three hours of work will be expected outside of class time. It is normally expected that for 3 credit hours of studio a student will spend 9-15 hours per week working and studying for the entire 16 weeks during the semester.

Graduate Programs
The Department of Visual Art offers graduate programs leading to the Master of Fine Arts degree in visual art. Concentrations include ceramics, drawing and painting, expanded media, fibers, metalsmithing and jewelry, printmaking, and sculpture. A Master of Arts degree in visual art education and graduate licensure in art education are also available through the Department of Visual Art.

Students who are interested in enrolling in graduate level coursework in the Department of Visual Art without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department's non-degree seeking program page for further details.

Courses
ART 101. Drawing I. 3 Credits. H
Open to all University students, this course provides an introductory study of Drawing with emphasis on tools, techniques and observational development. Studio class includes intensive in-class exercises, lectures, images, and assignments. Students develop a formal fine arts vocabulary and gain verbal and written skills in critical analysis through individual and group critiques. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 102. Drawing II. 3 Credits. H
Continuation of ART 101: Drawing I. Prerequisite: ART 101 or instructor permission.

ART 103. Art Concepts and Practice. 3 Credits. H
A companion course to ART 104. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. Prerequisite: Must be a major or minor in the Department of Visual Art or receive instructor permission.

ART 104. Art Principles and Practice. 3 Credits. H
A companion course to ART 103. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. Prerequisite: Must be a major or minor in the Department of Visual Art or receive instructor permission.

ART 105. Visual Art Seminar. 1 Credit.
An introduction to campus and community resources for students interested in Visual Arts. Resources in the Department, the University and the larger community will be discussed and explored.

ART 120. Fundamentals of Painting. 3 Credits.
Open to all university students. An exploration of basic technical and expressive possibilities in painting. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 121. Fundamentals of Printmaking. 3 Credits.
Open to all university students. An exploration of basic technical and expressive possibilities in printmaking, including woodcut, etching, lithography and silk screen; may include field trips, films, visiting lecturers.

Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 122. Fundamentals of Sculpture. 3 Credits.
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in three-dimensional form and space, including sculpture, modeling, carving, and construction; materials include wood, stone, clay, metal; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 123. Fundamentals of Expanded Media. 3 Credits. U
Open to all university students. An exploration of basic technical and expressive possibilities in Expanded Media, including Installation, Performance, Video and other Digital technologies; may include field trips, films, and/or visiting lecturers. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 131. Fundamentals of Ceramics. 3 Credits.
Open to all university students. An introduction to ceramic techniques and conceptual development. The course will investigate historical and contemporary ceramic art, develop skills in wheel throwing, hand-building, glazing, clay-mixing, and firing. Through practice and research, students will build an integrated understanding of ceramics as a continuum of cultural expression. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 132. Fundamentals of Metalsmithing/Jewelry. 3 Credits.
Open to all university students. A comprehensive study of the field of jewelry and metalsmithing with an emphasis on the tools, processes, and techniques used in the design and fabrication of objects from metals such as aluminum, brass, copper, bronze, sterling and related materials. Studio experience will include lectures, slide presentations, demonstrations, visiting artist, and student projects. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 133. Fundamentals of Fibers. 3 Credits. U
Open to all university students. Studio exploration of fibers as an art form and means of personal expression. A variety of dyeing, construction, and surface embellishment techniques will be introduced. Six hours scheduled studio activity and approximately six hours outside work weekly.

ART 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

ART 300. Special Topics in Visual Art: _____ 3 Credits.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. This course is offered at the 300 and 500 levels, with ART 500 serving as a continuation of study in the topic area. Prerequisite: ART 101, ART 102, ART 103, or ART 104; or permission of instructor.

ART 375. Directed Readings in Visual Art. 1-3 Credits. U
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor.

ART 395. Study Abroad Topics in: _____ 1-6 Credits. H
This course is designed for the study of special topics in Visual Art. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to all students.

ART 500. Advanced Special Topics in Visual Art: _____ 3 Credits.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. This course is offered at the 300 and 500 levels, with ART 500 serving as a continuation of study in the topic area. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and ART 300 (same topic), or permission of instructor.

ART 540. Professional Activities Seminar. 3 Credits.
Comprehensive development of skills and strategies needed to pursue a career as a professional studio artist. Prerequisite: Twenty-four hours of departmental electives or permission of instructor.

ART 575. Advanced Directed Reading in Visual Art. 1-3 Credits.
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor.

ART 590. Internship in Visual Art. 1-3 Credits. U
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and permission of instructor.

ART 595. Advanced Study Abroad Topics in: ______. 1-6 Credits. H
This course is designed for the study of special topics in Visual Art at the senior/graduate level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to seniors and graduate level students.

ART 599. Individual Studies in Visual Art. 1-6 Credits.
Individual studio activity. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and twelve hours of Visual Art courses; and permission of instructor.

ART 650. Senior Seminar I. 3 Credits. H
This course explores issues and themes in creative practice while critically examining works of visual art and culture; capstone experience. Concurrent enrollment in at least one upper level Visual Art studio course is required. Typically taken during a student's final two semesters. Prerequisite: 30 hours of departmental electives and instructor permission. Corequisite: Any 300 level or above Visual Art studio course.

ART 660. Senior Seminar II. 3 Credits. H
Continuation of ART 650; capstone experience. Participation in BFA exhibition required. Concurrent enrollment in at least one upper level Visual Art studio course is required. Prerequisite: ART 650 and instructor permission. Corequisite: Any 300 level or above Visual Art studio course.

ART 695. Directed Study I. 3 Credits.
Individual studio activity under direction of faculty advisor; capstone experience. Prerequisite: Thirty hours of departmental electives, consent of department, and permission of instructor.

ART 696. Directed Study II. 3 Credits.
Continuation of ART 695; capstone experience. May be repeated for credit in subsequent semesters. Prerequisite: ART 695.

ART 801. Directed Study III. 2-5 Credits.
Individual studio activity under the direction of faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of graduate director and enrollment in the Visual Art MFA program.

ART 802. Directed Study IV. 2-5 Credits.
Continuation of Directed Study III. Prerequisite: Enrollment in the Visual Art MFA Program.

ART 803. Directed Study V. 2-5 Credits.
Continuation of Directed Study IV. Prerequisite: Enrollment in the Visual Art MFA Program.

ART 805. Graduate Studio. 1-3 Credits.
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: Graduate standing in The School of The Arts and permission of the instructor.

ART 861. Directed Reading in Visual Art. 1-3 Credits.
Research reading and presentation of reports on specific subjects related to the student's major area of specialization. Prerequisite: Enrollment in the MFA Program in the Department of Visual Art.

ART 877. Graduate Seminar. 3 Credits.
The graduate seminar emphasizes professional preparation for contemporary artists focusing on writing skills, oral presentations, critiques of individual creative research/artwork, critical thinking about and visual analysis of current art forms and contemporary approaches to the teaching of studio art. Prerequisite: Admission to the Graduate Program in Visual Art.

ART 898. Special Topics: Studio Theory and Criticism. 3 Credits.
Lecture, discussion, and supervised research in current topics related to contemporary studio theory and criticism. May be repeated for credit as topics vary. This course will be counted as a graduate level academic elective in course and credit distribution.

ART 906. Graduate Studio. 1-3 Credits.
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: ART 805 and permission of the instructor.

ART 950. Thesis in Visual Art. 1-6 Credits.
Original research in visual art culminating in a thesis exhibition. May be repeated for credit. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Thirty-six credit hours of graduate credit and permission of the graduate review committee.

Courses

CER 208. Ceramics I. 3 Credits.
The development of form and surface through the use of handbuilding and wheel thrown techniques. Stoneware and Raku are explored.

CER 300. Special Topics in Ceramics: ______. 1-4 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 131 or CER 208; or permission of instructor.

CER 301. Concepts and Methods: Wheel Throwing. 3 Credits.
Intermediate ceramics course focusing on the potter's wheel as a tool. Coursework focuses on throwing skills and three-dimensional design concepts related to the functional ceramic vessel, wheel thrown sculpture, and creative problem-solving. Technical information supports an understanding of forming, surface development, glazing, and firing. Prerequisite: ART 131 or CER 208.

CER 302. Concepts & Methods: Hand Building. 3 Credits.
Intermediate ceramics course using hand-building techniques and processes supported by design and idea development. Techniques will include press molding, slab construction and coil-building, color and
surface development through glazing and firing. Emphasis is placed on creative expression and communication of personal ideas. Prerequisite: ART 131 or CER 208.

CER 402. Mold Making and Slip Casting. 3 Credits.
Intermediate ceramics course focusing on the production of plaster molds and the slipcasting process. Students will make molds and prototypes, produce porcelain casting slip, and develop strategies in casting as well as consider the use of the slipcasting technique as a conceptual tool. Undergraduate students who wish to take this for a second/continuing semester should enroll in CER 502. Prerequisite: ART 131 or CER 208.

CER 403. Advanced Topics in Ceramics. 3 Credits.
Advanced ceramics course using traditional and non-traditional approaches to ceramic art-making. Topics may include: wood firing, ephemeral art, large-scale sculpture, and/or digital technologies. This course can be repeated if topic varies. If same topic is repeated, students should enroll in CER 503. Prerequisite: CER 301 or CER 302 or permission of instructor.

CER 500. Advanced Special Topics Ceramics: _____ 1-4 Credits. U
Course to be offered in an area of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. This course is offered at the 300 and 500 levels, with CER 500 serving as a continuation of study in the topic area. Prerequisite: ART 101, ART 102, ART 103, or ART 104; and CER 300 (same topic), or permission of instructor.

CER 502. Advanced Mold Making and Slip Casting. 3 Credits.
Advanced ceramics course focusing on the production of plaster molds and the slipcasting process. Students will make molds and prototypes, produce porcelain casting slip, and develop strategies in casting as well as consider the use of the slip-casting technique as a conceptual tool. Prerequisite: ART 131 or CER 208, and CER 402. Graduate students may enroll without prerequisites by instructor permission.

CER 503. Advanced Topics in Ceramics. 3 Credits.
Advanced ceramics course using traditional and non-traditional approaches to ceramic art-making. Topics may include: wood firing, ephemeral art, large-scale sculpture, and/or digital technologies. This course is intended as a continuation for a specific topic course in CER 403. Graduate students should enroll in CER 503 with no prerequisite required. Prerequisite: CER 301 or CER 302, CER 403, or permission of instructor.

CER 504. Kilns. 3 Credits.
The principles in kiln design, including up-draft, down-draft, cross-draft, and electric kilns, and burnner technology. Prerequisite: ART 131, or CER 208, or CER 301, or permission of instructor.

CER 505. Clay and Glaze Formulation. 3 Credits.
Formulation of the various clay bodies and glazes associated with ceramics. Prerequisite: ART 131, or CER 208, or CER 301, or permission of instructor.

CER 510. History of Ceramics. 3 Credits.
This course examines historical ceramics across the globe. Emphasis will be placed on the development and transmission of design, materials, and technique across various traditions. This course number is intended for undergraduate students. Graduate students should enroll in CER 710 History of Ceramics. Prerequisite: CER 131 or CER 208, or permission of instructor.

CER 515. Advanced Ceramics I. 3-6 Credits.
Development of individual direction in ceramics based on experience, research, and skills acquired in previous courses; capstone experience. May be repeated for credit. Prerequisite: CER 301 and CER 402.

CER 520. Advanced Ceramics II. 3-6 Credits. U
Continuation of CER 515; capstone experience. May be repeated for credit. Prerequisite: CER 515.

CER 590. Internship in Ceramics. 1-3 Credits. U
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses; and permission of instructor.

CER 599. Individual Studies in Ceramics. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters: a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Ceramics courses or permission of instructor.

CER 710. History of Ceramics. 3 Credits.
This course examines historical ceramics across the globe. Emphasis will be placed on the development and transmission of design, materials, and technique across various traditions. This course is for Graduate students. Undergraduate students should enroll in CER 510 History of Ceramics.

CER 715. Ceramics. 2-6 Credits.
Individual research. Prerequisite: CER 515 or equivalent.

CER 815. Ceramics. 2-6 Credits.
Continuation of CER 805.

Courses
DRWG 203. Drawing III. 3 Credits.
Advanced problems in drawing. Prerequisite: ART 102.

DRWG 213. Life Drawing I. 3 Credits.
Figure drawing. Prerequisite: ART 102 and ART 103 or ART 104.

DRWG 300. Special Topics in Drawing: ____. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

DRWG 304. Drawing IV. 3 Credits.
Continuation of DRWG 203. Prerequisite: DRWG 203.

DRWG 314. Life Drawing II. 3 Credits.
Continuation of DRWG 213. Prerequisite: DRWG 213.

DRWG 318. Life Drawing II, Honors. 3 Credits.
Figure drawing, a continuation of DRWG 213. Prerequisite: DRWG 213; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

DRWG 500. Advanced Special Topics in Drawing: ____. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit.
Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor.

**DRWG 515. Life Drawing Ill. 3 Credits.** Continuation of DRWG 514. Prerequisite: DRWG 514.

**DRWG 516. Life Drawing IV. 3 Credits.** Continuation of DRWG 515. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515.

**DRWG 518. Life Drawing III, Honors. 3 Credits.** Figure drawing, a continuation of DRWG 514 or DRWG 518. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 514 or DRWG 518; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**DRWG 519. Life Drawing IV, Honors. 3 Credits.** Figure drawing, a continuation of DRWG 515 or DRWG 518. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515 or DRWG 516; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**DRWG 599. Individual Studies in Drawing. 1-6 Credits. U** Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor.

**DRWG 817. Life Drawing V. 3 Credits.** Individual research in figure drawing. Prerequisite: DRWG 516.

**DRWG 918. Life Drawing VI. 3 Credits.** Continuation of DRWG 817. Prerequisite: DRWG 817.

** Courses **

**EXM 274. Expanded Media. 3 Credits. U** Beginning course to introduce the fundamental concepts, strategies, and technologies that comprise the Expanded Media area of the Department of Visual Art: Installation, Performance, and Digital Image. Emphasis is placed on forming ideas and strategies, and creating artwork that considers the core connections within Expanded Media: time, space, the body, the viewer, and society at large. Computer-based technologies and time-based media that are inherent to Expanded Media practice support studio assignments. Coursework includes the investigation and discussion of historic precedents and the development of an appropriate critical dialogue with which to discuss their work. Prerequisite: ART 102, ART 103, and ART 104.

**EXM 300. Special Topics in Expanded Media: ____. 3 Credits. U** Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

**EXM 301. The Digital Image I. 3 Credits.** Introduction to various still digital processes and skills that encourage the use of digital imagery within a variety of other media. Focus on content issues as they relate to development of artwork incorporating digital imagery. Prerequisite: ART 102, ART 103 or ART 104 or permission of instructor.

**EXM 302. Performance Art I. 3 Credits. U** An introduction to the understanding and production of performance art. Students gain proficiency in conceptualization and production of performance time-based art in an Interdisciplinary art-making environment. Prerequisite: ART 102, ART 103 or ART 104, or permission of instructor.

**EXM 304. Digital Photography I. 3 Credits.** This course explores Digital Photography as a tool and resource with a wide range of expressive and creative interests. Digital processes such as image capturing, editing, and printing will be the main focus. Issues pertaining the circulation and distribution of digital imagery in contemporary culture will be addressed. DSLRs, Point and Shoot Cameras, and Camera Phones will be used. Prerequisite: ART 101, ART 103, or ART 104; and any introductory art studio, or permission of instructor. This course is offered at the 300 and 500 levels, with the 500 level serving as a continuation of study in the topic area.

**EXM 305. Intermediate Expanded Media, Honors. 3 Credits. U** This course is an exploration of art making with an emphasis on space, site, installation, and the viewer's experience surrounding art making. Students will research, discuss, and produce temporary art installations using a variety of mediums in an atmosphere of interdisciplinarity and experimentation. Major topics include time/space specificity; the collaboration process; body/space dynamics, and art-making as part of a social/cultural dynamic. Prerequisite: ART 101, ART 103, or ART 104, or permission of instructor.

**EXM 324. Video and Time-Based Media I. 3 Credits. U** An introduction to the understanding and production of video and time-based art. Students gain proficiency in conceptualization and production of video and time-based art in an Interdisciplinary art-making environment. Prerequisite: EXM 274.

**EXM 500. Advanced Special Topics in Expanded Media: ____. 3 Credits. U** Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103 or ART 104; 12 hours of courses in Visual Art, or permission of instructor.

**EXM 501. The Digital Image II. 3 Credits.** Continuation of EXM 301, The Digital Image I. May be repeated for credit. Prerequisite: EXM 301.

**EXM 504. Digital Photography II. 3 Credits.** This course will explore Digital Photography as a tool and resource with a wide range of expressive and creative interests. Students will explore how digital photographs are 'captured', edited, printed, and distributed in contemporary culture. DSLRs, Point and Shoot Cameras, and Camera Phones will be used. Advanced techniques in Picture Editing, File Management, Printing, Digital Delivery, and Studio Photography of Artwork will be explored. May be repeated for credit. Prerequisite: EXM 304.

**EXM 526. Video and Time-Based Media II. 3 Credits. U** Continuation of EXM 324, Video and Time-Based Media I. May be repeated for credit. Prerequisite: EXM 324.

**EXM 535. Intermediate Expanded Media. 3 Credits. U** Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses.

**EXM 536. Intermediate Expanded Media, Honors. 3 Credits. U** Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department.
EXM 537. Advanced Expanded Media. 3 Credits.
Continuation of EXM 535. May be repeated for credit. Prerequisite: EXM 535 or EXM 536.

EXM 538. Advanced Expanded Media, Honors. 3 Credits.
Continuation of EXM 536. May be repeated for credit. Prerequisite: EXM 535 or EXM 536; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department.

EXM 543. Graduate: The Digital Image. 3 Credits.
Advanced work focusing on content issues as they relate to development of artwork incorporating digital imagery. Prerequisite: Permission of instructor.

EXM 546. Graduate Expanded Media V. 3 Credits.
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor.

EXM 573. Performance Art II. 3 Credits. U
Continuation of EXM 302. Prerequisite: EXM 302.

EXM 577. Installation Art II. 3 Credits. U
Continuation of EXM 307. Prerequisite: EXM 307.

EXM 578. Installation Art II, Honors. 3 Credits. U
Continuation of EXM 307. Prerequisite: EXM 307 and membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department.

EXM 599. Individual Studies in Expanded Media. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Expanded Media courses, of permission of instructor.

EXM 846. Graduate Expanded Media VI. 3 Credits.
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor.

EXM 946. Graduate Expanded Media VII. 3 Credits.
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor.

Courses

METL 300. Special Topics in Metallurgy: _____ 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

METL 301. Introduction to Casting for Jewelry. 3 Credits.
Introduction to casting and mold making processes used for jewelry and small sculpture. Students explore various methods and materials for creating models for casting in bronze or silver including wax carving, wax modeling, and the use of natural and synthetic materials as models. Models are cast using centrifugal and vacuum casting processes. Basic mold making in clay and silicone are also explored. Prerequisite: ART 132 or permission of instructor.

METL 360. Holloware. 3 Credits.
Problems related to specific smithing techniques such as raising, stretching, shell structures and seam fabrications. Metal manipulation on a large scale. Prerequisite: Six hours of metalsmithing or consent of the instructor.

METL 362. Metallurgy. 3-6 Credits. H
Intermediate metalworking with an emphasis on the refinement of design and techniques. Processes may include soldering and fabrication, mechanisms, and surface embellishment. Prerequisite: Six hours of metalsmithing or consent of the instructor.

METL 363. Intermediate Jewelry. 3 Credits.
Lectures and demonstrations on traditional techniques of jewelry construction and embellishment, such as stone setting, chasing, repousse, and die forming. Prerequisite: Six hours of metalsmithing or consent of the instructor.

METL 364. Enameling. 3-6 Credits.
Introduction to enameling as applied to jewelry design and metalsmithing objects. Exploration of major enameling techniques such as wet packing, cloisonné, champlevé, basse-taille, and limoges. Prerequisite: Six hours of metalsmithing or consent of instructor.

METL 500. Advanced Special Topics in Metalsmithing: _____ 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

METL 503. Gemology. 3 Credits. H
Students study the optical and physical characteristics of gemstones in order to identify them using gemological instruments. This laboratory and discussion class explores related topics including the principles of optics that support this methodology, history and geographical distribution of gemstones, gemstone cutting and pearl farming, the history of DeBeers and the development of the world demand for diamond, quality analysis of diamond, colored gemstones and pearls, including the history of diamond grading, the development and identification of synthetics, imitations and laboratory enhancements as well as the use of gemstones in designing jewelry. Prerequisite: ART 132.

METL 504. A History of Jewelry. 3 Credits. H
This course explores the history from Sumeria to the 21st century of the use of metals and gemstones in the creation of decorative art for personal adornment. Students explore the evolution of the role of jewelry in ancient culture and modern society and survey individuals whose ideas and work influenced generations of goldsmiths and jewelers around the globe. The class studies primitive tools and modern manufacturing techniques, the history of gemstone cutting and setting and the origin and development of gemstones as symbols. Prerequisite: ART 132.

METL 505. Digital Jewelry Design I. 3 Credits. H
Matrix is a 3-D CAD program based on Rhino developed by Rhino, specifically for jewelry design. The goal of this course is to instruct beginners in the Matrix design program. Students learn to transform their 3-D Matrix models to appear as if they were a finished object. The class time is structured as a combination of instructor-led tutorials and working labs. Prerequisite: ART 132.

METL 506. Digital Jewelry Design II. 3 Credits. H
The second semester of Matrix increases the operating and design skills building on the knowledge of DG I. The focus of the class is producing wax models on the Revo Digital Mill. Digi II covers the advanced modeling and techniques including T-spline and Rhino. Students also learn how to make a customized tool path for Revo C mill program and how to solve milling problems. Students also learn how to convert Rhino files to produce a
3D print for outsourcing to other 3D modeling programs. Prerequisite: ART 132, METL 301, METL 505.

**METL 515. Advanced Metals I. 3-6 Credits. H**
Development of individual direction in Metalsmithing/Jewelry based on experience, research and skills acquired in preceding courses. This course serves as a capstone experience. General BFA students, non-majors or minors may enroll in this course with consent of the instructor. Students who are off track in sequence may be eligible to enroll in this course with consent of the instructor. Prerequisite: METL 360, METL 362, METL 363 & METL 364 or consent of the Instructor.

**METL 520. Advanced Metals II. 3-6 Credits.**
Continuation of METL 515 with emphasis on individual design aesthetic through intensive designing, rendering, and model making that leads to a professional and unified body of Metalsmithing/Jewelry work. This course requires a final presentation of a complete portfolio including resume, renderings and photographs of the finished work. This is a capstone course. Prerequisite: METL 515.

**METL 590. Internship in Metalsmithing/Jewelry. 1-3 Credits. U**
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Grade on a satisfactory/unsatisfactory basis. Prerequisite: ART 102, and ART 103, and ART 104; and fifteen hours of Visual Art Courses; and permission of instructor.

**METL 715. Metals/Jewelry. 2-6 Credits.**
Individual research. Prerequisite: Graduate standing.

**METL 815. Metals/Jewelry. 2-6 Credits.**
Continuation of METL 715.

**Courses**

**PNTG 263. Painting I. 3 Credits.**
Basic problems in painting. Prerequisite: ART 102, and ART 103 or ART 104.

**PNTG 300. Special Topics in Painting: ______. 3 Credits.**
Course to be offered in area of studio activity of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Painting courses, or permission of instructor.

**PNTG 337. Watercolor. 3 Credits.**
Sessions deal with the preparation of watercolor paints and equipment, but the main emphasis is placed on relational concepts affecting tone, structure, and unity in work. While the students are expected to explore some of the traditional approaches to watercolor, they also are encouraged to work with new and innovative ones. Prerequisite: ART 120 or permission of instructor.

**PNTG 338. Landscape Painting. 3 Credits.**
An introduction to landscape painting. Considerable work is done out-of-doors. Emphasis is placed upon experiencing the environment and the development of individual approach. May be repeated for credit. Prerequisite: PNTG 263 and permission of instructor.

**PNTG 364. Painting II. 3 Credits.**
Continuation of PNTG 263. Prerequisite: PNTG 263.

**PNTG 368. Painting II, Honors. 3 Credits.**
Continuation of PNTG 263. Prerequisite: PNTG 263; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**PNTG 500. Advanced Special Topics in Painting: ______. 3 Credits.**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Painting courses, or permission of instructor.

**PNTG 538. Advanced Landscape Painting. 3 Credits.**
A continuation of art practice in landscape painting. Considerable work is done out-of-doors. Emphasis is placed upon experiencing the environment and the development of individual approach. May be repeated for credit. Prerequisite: PNTG 338.

**PNTG 565. Painting III. 3 Credits.**
Continuation of PNTG 364. Prerequisite: PNTG 364.

**PNTG 566. Painting IV. 3 Credits.**
Continuation of PNTG 565. May be repeated for credit. Prerequisite: PNTG 565.

**PNTG 567. Painting III, Honors. 3 Credits.**
Continuation of PNTG 364 or PNTG 368. Prerequisite: PNTG 364 or PNTG 368; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**PNTG 569. Painting IV, Honors. 3 Credits.**
Continuation of PNTG 565 or PNTG 568. Prerequisite: PNTG 565 or PNTG 568; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

**PNTG 599. Individual Studies in Painting. 1-6 Credits. U**
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Metalsmithing/Jewelry courses, or permission of instructor.

**PRNT 223. Intaglio I. 3 Credits.**
Introduction to intaglio. Prerequisite: ART 102, and ART 103 or ART 104.

PRNT 233. Lithography I. 3 Credits.
Introduction to lithography. Prerequisite: ART 102, and ART 103 or ART 104.

PRNT 243. Serigraphy I. 3 Credits.
Introduction to serigraphy. Prerequisite: ART 102, and ART 103 or ART 104.

PRNT 300. Special Topics in Printmaking: _______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

PRNT 324. Intaglio II. 3 Credits.
Continuation of PRNT 223. Prerequisite: PRNT 223, or permission of instructor.

PRNT 328. Intaglio II, Honors. 3 Credits.
Continuation of PRNT 223. Prerequisite: PRNT 223; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

PRNT 334. Lithography II. 3 Credits.
Continuation of PRNT 233. Prerequisite: PRNT 233 or permission of instructor.

PRNT 338. Lithography II, Honors. 3 Credits.
Continuation of PRNT 233. Prerequisite: PRNT 233; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

PRNT 344. Serigraphy II. 3 Credits.
Continuation of PRNT 243. Prerequisite: PRNT 243 or permission of instructor.

PRNT 349. Serigraphy II, Honors. 3 Credits.
Continuation of PRNT 243. Prerequisite: PRNT 243; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

PRNT 500. Advanced Special Topics in Printmaking: _______. 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor.

PRNT 523. Printmaking III A (Intaglio). 3 Credits.
Prerequisite: PRNT 324 or permission of instructor.

PRNT 524. Printmaking III B (Lithography). 3 Credits.
Prerequisite: PRNT 334 or permission of instructor.

PRNT 525. Printmaking III C (Serigraphy). 3 Credits.
Prerequisite: PRNT 344 or permission of instructor.

PRNT 526. Printmaking IV A (Intaglio). 3 Credits.
Prerequisite: PRNT 523 or permission of instructor.

PRNT 527. Printmaking IV B (Lithography). 3 Credits.
Prerequisite: PRNT 524 or permission of instructor.

PRNT 528. Printmaking IV C (Serigraphy). 3 Credits.
Prerequisite: PRNT 525 or permission of instructor.

PRNT 599. Individual Studies in Printmaking. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor.

PRNT 802. Special Problems in Printmaking. 3 Credits.
Individual research in printmaking; course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: PRNT 579 and permission of instructor.

PRNT 827. Printmaking VII. 3 Credits.
Continuation of PRNT 663. Prerequisite: PRNT 663.

PRNT 903. Special Problems in Printmaking. 3 Credits.
Individual research in printmaking; course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: PRNT 802 and permission of instructor.

PRNT 928. Printmaking VIII. 3 Credits.
Continuation of PRNT 827. Prerequisite: PRNT 827.

Courses

SCUL 253. Sculpture I. 3 Credits.
Introduction to sculpture. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor.

SCUL 300. Special Topics in Sculpture: _______. 3 Credits.
Course to be offered in an area of studio activity of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor.

SCUL 330. Sculpture Intercepting the Waste Stream. 3 Credits. N
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art.) Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as EVRN 330.) Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 349. Metal and Glass Casting. 3 Credits.
A course in foundry techniques as related to sculpture. Both traditional and experimental procedures for casting bronze, aluminum, and iron sculpture are explored. This course is taught at the 300 and 500 levels, with additional assignments at the 500 level.

SCUL 353. The Figure 3D: Modeling and Molding. 3 Credits. H
Sculpting a figure is radically different form drawing one! You will develop a more comprehensive understanding of the human form while creating art addressing contemporary aesthetic concerns. Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 354. Sculpture II. 3 Credits.
Continuation of SCUL 253. Prerequisite: SCUL 253.

SCUL 355. Sculpture III. 3 Credits.
Continuation of SCUL 354. Prerequisite: SCUL 354.

SCUL 356. Public Art. 3 Credits. H
Students in this class investigate the nature of contemporary public art as well as creating their own artworks. Public Art covers a wide spectrum of art making from interventions, to street art, to murals and on to monumental sculpture. This class also covers how to present for commissions, budgeting, and legal liability. Previous work created in this
class has won national awards. Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 358. Sculpture II, Honors. 3 Credits.
Continuation of SCUL 253. Prerequisite: SCUL 253; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

SCUL 359. Sculpture III, Honors. 3 Credits.
Continuation of SCUL 354 or SCUL 358. Prerequisite: SCUL 354 or SCUL 358; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

SCUL 360. Build Smart. 3 Credits. H
An introductory woodworking course that emphasizes planning, fabricating, and assembly techniques. Material handling and best practice building methods are introduced and reinforced through a series of individual woodworking projects that expose the student to the properties of wood, as well as, hand and machine woodworking tools. Significant out of class work required. Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 362. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as EVRN 362.) Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 500. Advanced Special Topics in Sculpture: _____ 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor.

SCUL 549. Metal and Glass Casting. 3 Credits. U
A course in foundry techniques as related to sculpture. Both traditional and experimental procedures for casting bronze, aluminum, and iron sculpture are explored. May be repeated for credit. This course is taught at the 300 and 500 levels, with additional assignments at the 500-level. Prerequisite: SCUL 253.

SCUL 556. Sculpture IV. 3 Credits.
Continuation of SCUL 355. May be repeated for credit. Prerequisite: SCUL 355.

SCUL 558. Sculpture IV, Honors. 3 Credits.
Continuation of SCUL 355 or SCUL 359. May be repeated for credit. Prerequisite: SCUL 355 or SCUL 359; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department.

SCUL 599. Individual Studies in Sculpture. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor.

SCUL 630. Sculpture Intercepting the Waste Stream. 3 Credits. N
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art.) Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as EVRN 630.) Prerequisite: Graduate standing or permission of instructor.

SCUL 653. The Figure 3D: Modeling and Molding. 3 Credits. H
Sculpting a figure is radically different form drawing one! Students will develop a more comprehensive understanding of the human form while creating art addressing contemporary aesthetic concerns. Prerequisite: Graduate standing or permission of instructor.

SCUL 656. Public Art. 3 Credits. H
Students in this class investigate the nature of contemporary public art as well as creating their own artworks. Public Art covers a wide spectrum of art making from interventions, to street art, to murals and on to monumental sculpture. This class also covers how to present for commissions, budgeting, and legal liability. Previous work created in this class has won national awards. Prerequisite: Graduate standing or permission of instructor.

SCUL 657. Sculpture V. 3 Credits.
Continuation of SCUL 556. Prerequisite: SCUL 556.

SCUL 658. Sculpture VI. 3 Credits.
Continuation of SCUL 657. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 657.

SCUL 660. Build Smart. 3 Credits. H
This course is an introductory woodworking course that emphasizes planning, fabricating, and assembly techniques. Material handling and best practice building methods are introduced and reinforced through a series of individual woodworking projects that expose the student to the properties of wood, as well as, hand and machine woodworking tools. Significant out of class work required. Non Visual Art students require permission number from Department. Prerequisite: Graduate standing or permission of instructor.

SCUL 662. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as EVRN 662.) Prerequisite: Visual Art major or minor, or instructor permission.

SCUL 804. Special Problems in Sculpture. 3 Credits.
Individual research in sculpture: course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 559 and permission of instructor.

SCUL 859. Sculpture VII. 3 Credits.
Individual research in sculpture. Prerequisite: SCUL 658.

SCUL 905. Special Problems in Sculpture. 3 Credits.
Individual research in sculpture: course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 804 and permission of instructor.

SCUL 960. Sculpture VIII. 3 Credits.
Continuation of SCUL 859. Prerequisite: SCUL 859.

Courses

TD 300. Special Topics in Textiles/Fibers: _____ 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor.

TD 313. Fiber Forms. 3 Credits.
Studio exploration of fibers as an art form. Techniques include feltmaking, papermaking, basketry, and dyeing. Prerequisite: ART 101, and ART 133.

TD 314. Introduction to Weaving. 3 Credits. U
Application of art and design principles to four-harness loom structures. Emphasis on the use of color and texture in loom controlled and weaver controlled techniques. Prerequisite: ART 101, and ART 133.

TD 315. Textile Handprinting and Resist Processes. 3 Credits. U
Fundamentals of resist and dye techniques on textiles: batik, tie-dye, discharge, and direct application. Prerequisite: ART 101, and ART 133.

TD 316. Screenprinting Textiles. 3 Credits.
Design problems in textile printing with emphasis on screenprinting and photo techniques. Prerequisite: ART 101, and ART 133.

TD 401. Weave Structures. 3 Credits. U
Continuation of TD 314. Research and analysis of multiple-harness weave structures. Weave drafts. Design problems to develop the use of color, form, and surface in simple and compound weaves. Prerequisite: TD 314.

TD 402. Techniques in Weaving. 3 Credits. U
Development of individual art and design concepts in relation to woven structures and/or forms. Emphasis on weaver-controlled techniques used to create images and composition. Prerequisite: TD 314.

TD 403. Intermediate Textile Printing. 3 Credits.
Individual problems in textile printing and dyeing processes. Prerequisite: TD 316.

TD 404. Surface Design. 3 Credits.
Textile pattern design for art and/or industry. Prerequisite: Twelve hours in Visual Art or Design, or permission of the instructor.

TD 500. Advanced Special Topics in Textiles/Fibers: 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor.

TD 504. History of Textiles, Lecture. 3 Credits.
Study of historical textiles, their design development, and the techniques employed. Prerequisite: Junior standing in department or permission of instructor.

TD 506. Advanced Fiber Forms. 1-6 Credits. U
Directed study of three-dimensional and off-loom methods and techniques. May be repeated for credit. Prerequisite: TD 313.

TD 514. Advanced Techniques in Weaving. 1-6 Credits. U
Directed study of advanced loom-controlled and weaver-controlled methods. May be repeated for credit. Prerequisite: TD 401 or TD 402, or permission of instructor.

TD 515. Advanced Textiles/Fibers I. 3-6 Credits.
Development of individual direction in textiles based on experience, research, and skills acquired in preceding courses; capstone experience. Prerequisite: Twenty-four credits in Textiles/Fibers and consent of instructor.

TD 520. Advanced Textiles/Fibers II. 3-6 Credits.
Continuation of TD 515, capstone experience. Prerequisite: TD 515.

TD 590. Internship in Textiles/Fibers. 1-3 Credits. U
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded according to the written recommendation provided by the internship supervisor to the faculty advisor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses.

TD 599. Individual Studies in Textiles/Fibers. 1-6 Credits. U
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor.

TD 715. Textile Design in Weaving, Printing, and Dyeing. 2-6 Credits.
Individual research. Prerequisite: Graduate standing.

TD 815. Textile Design in Weaving, Printing, and Dyeing. 2-6 Credits.
Continuation of TD 715.

Courses

VAE 300. Special Topics in Visual Art Education: 3 Credits. U
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor.

VAE 320. Instruction and Curriculum I. 3 Credits.
This methods course provides an overview of the professional practices of K-12 art educators. Course content deals with the art education program, K-12, in relationship to the rest of the curriculum. This encompasses goals, objective sequence, courses offered at various levels, finance, staffing and administration. Prerequisite: Junior standing or consent of the instructor.

VAE 341. Instructional Strategies in Art for Elementary Classroom Teachers. 2 Credits.
Child growth and development in art. Materials as they relate to a sequential art education curriculum in the elementary school. Prerequisite: Admission to the School of Education or the education division of the graduate school.

VAE 395. Community Collaborations in Art Education. 3 Credits. U
A focused examination of existing community organizations, models, and resources alongside collaborative strategies for working with these entities to achieve common goals for art education. Students in this class will learn of collaborative community models, explore entrepreneurial and other educational initiatives that contribute to the general purpose of art education, and recognize the role of families and other community members in contributing to the arts.

VAE 430. Curriculum and Teaching Processes in Art Education. 5 Credits.
Building on content in VAE 320, this course concentrates on curriculum development, instructional models, and professional methods in art education. We will explore how ideas and materials are used in teaching art across PK-12 levels and in diverse settings. Students will create, adapt, and use appropriate resources, materials and technologies in standards-based curriculum. We will also investigate and analyze how art
Bachelor of Fine Arts in Visual Art

Bachelor of Fine Arts in Visual Art

The Bachelor of Fine Arts in Visual Art is a four-year, 120 credit hour degree program. The first year is spent in foundations courses where students focus on the development of their creative and technical skills. After the foundation year, students can select to concentrate in several degree emphasis areas.

B.F.A. General (encompasses Drawing, Painting, Printmaking, Sculpture, and Expanded Media)

B.F.A. Ceramics

B.F.A. Metalsmithing/Jewelry

B.F.A. Textiles/Fibers

B.F.A. Visual Art Education

The intent is for students to explore a variety of mediums in order to determine how they would like to focus their advanced studies. In addition, fundamental concepts and strategies of artmaking are reinforced, even as new techniques and approaches from various disciplines are introduced.

In addition to completing the on-line application to KU Admissions, prospective students must submit a portfolio and responses to three essay questions to the Department of Visual Art in order to complete the application process and be for admission to the major in Visual Art.

First-Year Preparation

The first year foundations courses for the B.F.A., B.A., and B.A.E. degree include 13 hours of foundations studio, 6 hours of English, and 6 hours of Art History coursework.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office
of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Bachelor of Fine Arts in Visual Art Degree Requirements**

The Department of Visual Art offers the B.F.A. in Visual Art, including the areas of Ceramics, Drawing, Expanded Media, Metalsmithing/Jewelry, Painting, Printmaking, Sculpture, Textiles/Fibers, and Visual Art Education. A total of 120 hours is required for the degree, including 45 junior/senior hours (courses numbered 300 or higher). 30 of these 45 junior/senior hours must be taken in residence at the University of Kansas. In addition to the 10-hour foundations requirement, a minimum of 51 hours in departmental courses is required, including 2 semesters of Senior Seminar (except the Visual Art Education concentration).

The Department of Visual Art reserves the right to retain examples of student work and to use images of student work on internet websites and for university publication purposes.

1 A list of possible courses for History of Art Non-Western can be found on the degree requirements tab.
2 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Bachelor of Fine Arts in History of Art

#### The Bachelor of Fine Arts in History of Art

The BFA in History of Art is a four-year, 120 credit hour degree program combining a 30-hour concentration in the history of art with 30 hours of studio art training to serve students interested in both the history and the making of art.

History of Art B.F.A. majors learn how to investigate and analyze the aesthetic characteristics, meaning, and function of works of art, and to place works in historical, cultural, and stylistic contexts. Students gain a general knowledge of the monuments and principal artists of all major periods of the past, with an emphasis on the art of the 20th- and 21st-
centuries and gain a sophisticated understanding of what can be learned about different cultures and time periods through the study of art.

First-Year Preparation

The first year foundations courses for the B.F.A., B.A., and B.A.E. degree include 13 hours of foundations studio, 6 hours of English, and 6 hours of Art History coursework.

   - HA 564 European Art, 1900-1945

C. East Asia
   - HA 340/540 Special Study in Asian Art Before 1900:_______

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Bachelor of Fine Arts in History of Art Degree Requirements

A major in the history of art is available to candidates for the B.F.A. degree. This major combines a 30-hour concentration in art history with 17 hours of studio training (beyond the 13 hours of foundation courses). A total of 120 hours is required for the degree, including 45 junior/senior hours (courses numbered 300 or higher). 30 of these 45 junior/senior hours must be taken in residence at the University of Kansas. The B.A. and B.G.S. degrees (p. 1556) are offered by the College of Liberal Arts and Sciences.

### Breadth Courses, Chronological Periods: complete one course in three out of four chronological periods.

#### A. Pre-1400
- HA 322 European Architecture 300-1300
- HA 325/525 Aegean Archaeology and Art
- HA 326/526 Greek Archaeology and Art
- HA 327/537 Roman Archaeology and Art
- HA 361/561 Buddhist Art of Korea

#### B. 1400-1850
- HA 330 Italian Renaissance Art
- HA 331 Northern European Art from Van Eyck to Brueghel
- HA 333/533 Rocco to Realism: Painting in Europe c. 1750-1848
- HA 335/535 Renaissance Architecture in Italy
- HA 344/547 Ceramics of East Asia
- HA 354/554 Japanese Prints
- HA 372 Baroque Art in Europe
- HA 376/576 Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque
- HA 394/594 Special Study in Renaissance Art: _____

#### C. Post-1850
- HA 334/534 Impressionism and Post-Impressionism: 1848-1900
- HA 337/567 Contemporary Art
- HA 343/543 Special Study in 20th/21st-Century Art: _____
- HA 344/544 Manga: Histories and Theories
- HA 353/569 Modern and Contemporary African Art
- HA 363 Modern Korean Art and Culture
- HA 371/571 Modern Sculpture
- HA 377/677 African Design
- HA 380/580 History of Photography
- HA 388/588 Modern and Contemporary Visual Arts of Japan
- HA 390/390 Special Study in African Art: _____
- HA 536 Islamic Art and Architecture in Africa
- HA 564 European Art, 1900-1945
- HA 566 Art From 1945 to the 1980s: Modernism to Post-Modernism
- HA 582 American Art 1860-1900: Gilded Age
- HA 583 American Art 1900-1945: Rise of Modernism

#### D. Cross-period
- HA 311 The Art and Architecture of the British Isles
- HA 362/562 Ceramics of Korea
- HA 367 Art and Culture of Japan
- HA 368 Art and Culture of China
- or HA 468 Art and Culture of China, Honors
- HA 370/570 Art of the United States
- HA 385/585 The Art of Buddhism
- HA 386/586 Japanese Painting
- HA 488 Chinese Painting, Honors
- HA 511 From Court to City: Northern Art
- HA 528 The Spatial Arts of Urban Italy
- HA 546 Chinese Sculpture
- HA 549 Chinese Painting
- HA 587 Japanese Sculpture

### 4. Complete an art history course (3 hours) or studio course (3-6 hours) approved for Goal 6 in the KU Core. (The Goal 6 art history course may also fulfill one of the breadth requirements above, in which case an elective course should be taken for the final 3 required hours of art history. If a Goal 6 studio course is taken, an elective course should be taken for the final 3 required hours of art history.)

### 5. Art history elective (0-3 hours; see number 4 above)
Electives in applicable studio courses: Satisfied by completing coursework with subject code (ART, CER, EXM, METL, PNTG, PRNT, SCUL, TD, VAE)

### General Education Courses
Completion of KU Core Requirements. (see KU Core section of the catalog)

### Liberal Arts and Sciences/Foundational Studies Courses
- ART 101 Drawing I
  or BDS 103 Drawing for Design
ART 101 is a required course, BDS 103 only accepted for students transferring into the department
ART 102 Drawing II
ART 103 Art Concepts and Practice
or BDS 101 Design Thinking and Making
ART 103 is a required course, BDS 101 only accepted for students transferring into the department
ART 104 Art Principles and Practice
or BDS 102 Design Thinking and Making II
ART 104 is a required course, BDS 102 is only accepted for students transferring into the department
ART 105 Visual Art Seminar

Writing Requirement – ENGL 101 and 102, or placement in and completion of ENGL 102/105 and an additional Goal 2 Outcome 1 course.

Foreign language: A fourth-level proficiency in one language, or third-level proficiency in one language and first-level proficiency in another.

Below is a sample 4-year plan for students pursuing the BFA in History of Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses/)

### Total Hours 120

1. History of Art Breadth requires one course in 3 out of the 4 Geographical Regions and one course in 3 out of the 4 Chronological Periods for a total of 18 hours (6 courses). See Degree Requirements tab in the Catalog for course lists.
2. The department recommends that students take the HA or Studio Art course to satisfy Goal 6 in either the fall or spring semester of their fourth year. HA 698 and HA 550 fulfill a Goal 6 requirement.
3. A course may double count for a breadth requirement within the major and also for the Goal 6 requirement in the KU Core. If one course is taken to fulfill both requirements, an additional History of Art elective at the 300+ level is required.
4. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Arts in Visual Art

The Bachelor of Arts in Visual Art is a four-year, 120 credit hour degree program. The B.A. in Visual Art is a traditional liberal arts undergraduate degree, requiring 24 credit hours in Visual Art beyond the 1st year foundations courses, as opposed to the more art intensive B.F.A. degree.

Students interested in pursuing a double major may find it easier to pair the B.A. with other undergraduate degrees. After taking the foundations courses, students take their remaining studio courses from the seven Visual Art studio areas: Ceramics, Expanded Media, Metalsmithing/Jewelry, Painting/Drawing, Printmaking, Sculpture, Textiles/Fibers, and Photomedia (in the Design Department).

In addition to completing the on-line application to KU Admissions, prospective students must submit a portfolio and responses to three essay questions to the Department of Visual Art in order to complete the application process and be admitted to the major in Visual Art.

First-Year Preparation

The first year foundations courses for the B.F.A., B.A., and B.A.E. degree include 13 hours of foundations studio, 6 hours of English, and 6 hours of Art History coursework.

Total Hours 120

1 A list of possible courses for History of Art Non-Western can be found on the degree requirements tab.

2 Choose 2 Intermediate/Advanced weaving: TD 401, TD 402, TD 403, TD 404, TD 514

3 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BFA in Visual Art with Concentration in Visual Art Education**

Below is a sample 4-year plan for students pursuing the BFA in Visual Art with a concentration in Visual Art Education. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Must be admitted to the AED Professional Sequence by Spring Sophomore year

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Visual Art

The Department of Visual Art welcomes non-majors who wish to learn about the various areas within visual art through the completion of a minor. Visual Art minors are not required to submit a portfolio for admission.

Because studio courses are sequential, students are advised to declare a minor no later than the first semester of their junior year to allow for adequate time to complete the Visual Art minor.

The Visual Art minor is 18 hours or 6 courses, (12 hours at the JR/SR level). Students complete a foundations course, such as, ART 101 Drawing I, and an introductory concentration course out of the 8 art areas we offer (Drawing, Painting, Ceramics, Expanded Media, Metalsmithing/Jewelry, Printmaking, Sculpture, or Textiles). Students are encouraged to concentrate in one art area to attain the proper number of JR/SR hours.

Requirements for the Minor

A minimum of 18 hours is required for the minor; 12 hours must be numbered 300 and above.

Minor Hours

Satisfied by 18 hours of minor courses.
Visual Art may be refused if available instructional space does not allow for addition of more students. More information about materials and deadlines is available on the Department of Visual Art admissions page.

Submit your application and fee online.

Required Materials:

- Official transcript of all college and university coursework
- Statement of purpose
- 3 letters of recommendation
- Digital portfolio
- Printed image index
- Application form for financial aid
- International Students: Please refer to the international admissions requirements (https://gradapply.ku.edu/International-requirements/)
- Non-native English speakers must demonstrate proof of English proficiency. Please see Graduate policy on English Proficiency (https://gradapply.ku.edu/english-requirements/) for more information

M.F.A. in Visual Art Degree Requirements

Concentrations in Ceramics, Drawing and Painting, Expanded Media, Metalsmithing and Jewelry, Printmaking, Sculpture and Textiles & Fibers

The graduate program consists of 60 semester hours of graduate credit, including thesis exhibition, in courses approved by the graduate director and the graduate thesis committee. At least 50% of the coursework required for the degree must be taken at the 700 level or above. A student may concentrate in one or more specializations. When the student has completed 2 semesters, the faculty selection and review committee reviews the student’s work. The graduate director gives the student a written assessment of progress, signed by the committee. At the end of the third semester, the same committee conducts a thesis review that determines whether the student is prepared to begin thesis work, needs additional coursework, or is to be dropped from the program.

Upon approval by the review committee, the candidate begins work toward the thesis. Students not receiving approval may continue to work toward the next review unless denied by the committee. A student who is approved for thesis work may enroll in Thesis in Art. Students are required to enroll and complete 10 hours of Thesis in Art before being approved for graduation. Before thesis enrollment, the student selects a graduate thesis committee consisting of 3 members of the graduate art faculty. The committee advises the student, conducts regularly scheduled reviews of the work, and determines whether the requirements for the thesis have been completed. The graduate director must approve the membership of the graduate thesis committee.

Each M.F.A. candidate will display an exhibition of the students thesis work, complete a thesis review exam with their committee, and compile a master's thesis folio. The successful approval of the students thesis folio will result in the earning of the M.F.A. degree.

The thesis folio includes a statement written by the candidate concerning the work and a visual record of the exhibition. The department reserves the option of selecting and retaining one example of each graduate student's work. Upon enrolling, the student automatically accepts these requirements and conditions.
Public Affairs Administration (in CLAS)

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years' catalogs are available online at http://catalog.ku.edu/archives/.

Over 70 years of Preparing Exceptional Leaders for Public Service

The KU School of Public Affairs and Administration develops skilled leaders, innovators and problem solvers who are ready to make a difference in their communities by addressing social and economic challenges at all levels of governance. Our graduates become leaders and public management professionals who exemplify a deep commitment to ethical public service within a wide variety of public and nonprofit sector professions.

Undergraduate Programs

Public Administration

Public administration provides students with the necessary knowledge and skills for planning, implementing, and evaluating public programs. Our graduates have rewarding careers in local and state government, nonprofit organizations, and private sector businesses.

Law and Society

Law and society is an interdisciplinary field that examines how law works in practice in public administration, courts, the non-profit sector, policy, policing, and the justice system. Law professionals help shape government and address crime and other societal problems.

Accelerated Masters Degrees

KU undergraduate students majoring in Architecture or degrees within the College of Liberal Arts Sciences can complete their M.U.P. degree in one additional year through an accelerated masters degree.

- Accelerated Master of Urban Planning
- Accelerated Master of Urban Planning/BA in Environmental Studies

Graduate Programs

Master of Public Administration

With a unique combination of theoretically grounded course work and practical application, our master of public administration degree provides students with the knowledge and skills needed to lead, innovate, and problem-solve in public sector and non-profit settings. Our Edwin O. Stene M.P.A. program is one of the oldest and most respected programs in the United States, beginning with our local government leadership program founded in 1948. Since 1998, our tradition of excellence in educating students at the masters’ level has been recognized by U.S. News & World Report with a #1 ranking in city management.

Master of Urban Planning

The master of urban planning is a graduate professional degree that prepares students for careers in urban planning. The M.U.P. degree is accredited by the Planning Accreditation Board. The program places strong emphasis on policy, planning and analysis in the context of urban or urbanizing environments. The program is geared toward meeting the need for planning policy on urban issues at any level of government — federal, state, regional, and local — or outside the governmental arena. M.U.P students specialize in at least one of the following areas: Housing and Development, Sustainable Land Use Planning, and Transportation.

Doctorate in Public Administration

The mission of the doctoral program in the KU School of Public Affairs and Administration is to provide advanced graduate education in theory and research in order to prepare students for academic and research careers in public administration, as well as professional careers in advanced practice of public administration.
Dual Degrees

The School of Public Affairs & Administration professional programs (M.P.A. & M.U.P.) have collaborations in place with other KU graduate programs so that students can complete two master’s degrees on a shorter timeline than earning both degrees separately.

The Dual J.D. / M.P.A. Degree (https://catalog.ku.edu/public-affairs-administration/mpa-jd/) is designed for law students who intend to practice in communities where they might be called on to perform legal services for the municipality and to students preparing for positions in city management.

The Dual M.P.A. / M.U.P. Degree (https://catalog.ku.edu/public-affairs-administration/mpa-mup/) is for students interested in learning about and leading cities into the future through critical planning, sustainability, and administrative skills.

The Dual M.U.P. / M.A. Geography Degree (https://catalog.ku.edu/public-affairs-administration/mup-ma-geog/) is designed for students who intend to engage in planning for the arts, cultural activities and facilities, and historic preservation within urban communities.

The Dual M.U.P./M.A. American Studies Degree (https://catalog.ku.edu/public-affairs-administration/mup-ma-ams/) is designed for students interested in careers in policy planning and research involving the arts, social planning, cultural activities and facilities, and historic preservation.

Accelerated Masters Degrees

KU undergraduate students majoring in Architecture or degrees within the College of Liberal Arts & Sciences can complete their M.U.P. degree in one additional year through an accelerated masters degree.

- Accelerated Master of Urban Planning (https://catalog.ku.edu/public-affairs-administration/amup/)
- Accelerated Master of Urban Planning/BA in Environmental Studies (https://catalog.ku.edu/public-affairs-administration/amup-ba-evrn/)

Graduate Certificates

Graduate Certificates are a way to delve into specialized areas of public administration theory and practice. They are structured to provide a condensed version of the specific skills and knowledge to advance in particular professional fields. Certificates can be earned in conjunction with your graduate degree or as a stand-alone certification and may focus in a specialized area, including:

- City and County Management (https://kupa.ku.edu/graduate-certificates/city-county-management/)
- Law & Society (https://kupa.ku.edu/graduate-certificates/law-society/)
- Performance Management (https://kupa.ku.edu/graduate-certificates/performance-management/)
- Public / Nonprofit Management (https://kupa.ku.edu/graduate-certificates/public-nonprofit-management/)
- Public Policy (https://kupa.ku.edu/graduate-certificates/public-policy/)
- Urban Planning (https://kupa.ku.edu/graduate-certificates/urban-planning/)

Courses

LWS 330. Introduction to Law & Society. 3 Credits. S
Offers an introduction to the interdisciplinary field of law and society. Surveys the role of law in social processes and the influence of these processes on law, and introduces alternative theoretical perspectives on these processes.

LWS 332. Methods in Law and Society. 3 Credits. S
Surveys the various methods used in law & society research and prepares students to be sophisticated readers of basic socio-legal research, capable of evaluating the quality of the research design and methods. Prepares students to participate as research assistants in original studies.

LWS 333. The Pursuit of Rights: Law, Democracy & Power. 3 Credits. S
Examines how law and legal norms, particularly rights, support social and political institutions yet also may be used to challenge these institutions and foster change. Particularly examines the role of law in supporting but also challenging hierarchies of race, ethnicity and gender. Surveys major studies of these processes both domestically and across the globe. Prerequisite: LWS 330 or permission of the instructor.

LWS 443. Theoretical Foundations of Law & Society. 3 Credits. S
This course examines classic texts from institutional, functional, and economic theories of law that have served as the basis for Law & Society research. It then considers the continued development of those classical theories to make sense of important current social and legal problems. Students will practice using theory to make sense of puzzling empirical patterns, and developing theoretical explanations of their own. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in LWS 643 or LWS 743. Prerequisite: LWS 330.

LWS 494. Topics in Law & Society: _______. 3 Credits. U
Study of selected topics in law and society. Course may be repeated for credit if content varies. Not open to students with credit in LWS 694 or LWS 794 if the topic is the same. Prerequisite: LWS 330.

LWS 691. Internship in Law & Society. 1-3 Credits. S
Designed to provide law & society students an applied learning experience in a relevant public, non-governmental, or nonprofit organization. Students are required to critically reflect on their experience through a variety of academic assignments throughout their internship experience. Prerequisite: LWS 330 and LWS 332, and permission of instructor.

LWS 699. Capstone in Law and Society. 3 Credits.
Integrates learning across the Law & Society curriculum with an applied, original research experience. Class topics rotate depending on faculty research agenda and current policy foci. Students gather and analyze data throughout the class, and present their final work to a variety of audiences. The product is an original research presentation that advances knowledge. Prerequisite: LWS 330 and LWS 332.

LWS 743. Theoretical Foundations of Law and Society. 3 Credits.
This course examines classic texts from institutional, functional, and economic theories of law that have served as the basis for Law & Society research. It then considers the continued development of those classical theories to make sense of important current social and legal problems.
Students will practice using theory to make sense of puzzling empirical patterns, and developing theoretical explanations of their own. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in LWS 443. Prerequisite: Graduate student standing or faculty approval.

LWS 794. Topics in Law & Society: ____. 3 Credits.
Study of selected topics in law and society. Course may be repeated for credit if content varies. Not open to students with credit in LWS 494 if topic is the same. Prerequisite: Graduate student standing or faculty approval.

Courses

PUAD 177. First Year Seminar: ____. 3 Credits. SF
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in public administration. May not contribute to major requirements in public administration. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: Open to Freshmen only (less than 30 hours).

PUAD 305. Introduction to Project Management. 3 Credits.
An exploration of the technical aspects of project management and the human aspects of project leadership. The course integrates conceptual approaches with practical applications of knowledge and skill sets. The course addresses the Project Management Body of Knowledge (PMBOK—as created by the Project Management Institute) and project leadership competencies including leading, communicating, negotiating, problem solving, and influencing. Not available to students with credit in PUAD 407 and 607.

PUAD 330. Introduction to Public Administration. 3 Credits. S
Introduction to administration, public policy and policy makings is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as POLS 390.) Prerequisite: POLS 110.

PUAD 331. Introduction to Public Administration, Honors. 3 Credits. S
Introduction to administration, public policy and policy making, for honors students, is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as POLS 391.) Prerequisite: POLS 110.

PUAD 332. Quantitative Methods for Public Administration. 3 Credits. S
Focuses on building the quantitative analysis skills of students in public administration. Students learn basic and intermediate statistics, and methods of data analysis and interpretation. Students gain exposure to the uses of data in public organizational settings.

PUAD 333. Hard Choices in Public Administration: ____. 3 Credits. S
Focuses on some of America’s most vexing public policy challenges and emphasizes the political context of difficult choices. Course examines models of decision-making and the process of policy analysis. Students learn how to apply the tools of policy analysis to make policy judgments. Prerequisite: PUAD 330 or PUAD 331.

PUAD 401. Administration of Justice. 3 Credits. S
Examines the administration of justice and focuses on differential and discriminatory treatment in policing, criminal prosecutions, trials, sentencing, or imprisonment. Also considered are the basis and impact of racial profiling, harassment, arbitrary detention, and abusive treatment of members of racial and ethnic groups, immigrants, and/or other vulnerable groups by law enforcement, and disparate treatment by prosecutors and the courts. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 601 or PUAD 701.

PUAD 402. Diversity and Social Equity in Public Administration. 3 Credits. S
Analyzes diversity and leadership in public and private institutions along ethnic, racial, and gender lines and the challenges of the facilitation of open dialogue on diversity. Examines the political, historical, social, and economic reasons why Americans of different ethnic, racial, and gender groups hold divergent views about major public policy areas, as well as fundamental views about democratic participation. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 602 or PUAD 702. Prerequisite: PUAD 330 or PUAD 331.

PUAD 403. Foundations of the Nonprofit Sector. 3 Credits. H/S
This course provides an overview of the U.S. nonprofit sector, its history, scope, diversity and its positioning among and between the private and public sectors of the U.S. economy. The course explores the legal framework under which nonprofit organizations operate and are regulated. Economic, political, social, organizational and giving theories of the sector are reviewed in order to understand the sectors existence, roles and activities with particular attention to philanthropy and voluntarism. Distinct contributions to society as well as contemporary challenges faced by the sector are examined. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 603 or PUAD 703. Prerequisite: PUAD 330, or POLS 110, or MGMT 305, or a PUAD master's core course, or consent of instructor. Junior status or above is also required.

PUAD 404. Resource Development and Management in Nonprofit Organizations. 3 Credits. H
This course provides an overview of the broad range of activities relevant to acquisition, management and utilization of resources in nonprofit organizations. The course identifies the primary strategies through which resources are generated with emphases on grantwriting, fundraising, social entrepreneurship, and public/private partnerships. Development of organizational identity and management of public relations is examined in relation to resource and relationship development. Strategies for management of resources to ensure long-term benefit and sustainability are explored. Not available to students with credit in PUAD 604. Prerequisite: PUAD 403.

PUAD 405. Managing Nonprofit Relationships. 3 Credits. H
This course considers the set of relationships that nonprofit leaders must balance within the organization and beyond organizational boundaries. Both internal relationships (with staff, volunteers, and board members) and external relationships (with stakeholders, other organizations, and the community at large) are critical to mission accomplishment. This course provides students with the resources necessary to understand the challenges and opportunities related to building and maintaining these relationships. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in PUAD 605 or PUAD 705.

PUAD 406. Nonprofit Accountability: Public Needs and Public Values. 3 Credits. H
This course examines the role of the nonprofit sector in society by posing broad questions about why nonprofit organizations are held accountable, to whom they are accountable, and detailing how organizations can
satisfy accountability demands. The course investigates the public role of the nonprofit sector in society, identifies the stakeholders that are integral to an organization's mission, and describes critiques of the financial and evaluation tools that nonprofits can use to ensure their social viability. Not available to students with credit in PUAD 606. Prerequisite: PUAD 403.

**PUAD 408. Collaboration in Public Administration. 3 Credits. S**
Managers must work effectively across organizational and sector boundaries to solve problems and produce public value. This course considers the forces contributing to the need for collaborative governance, changing management tasks and competencies, and how to address key collaborative challenges. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 608 and PUAD 708.

**PUAD 431. Bureaucracy, Public Administration, and the Private Sector. 3 Credits. S**
Examines the problems posed by behaviors within and by bureaucracies. Provides students with a set of conceptual tools for understanding the organizational environment in which policy analysts ply their profession and the role of a manager within such organizations. Offers strategies for the policy professional seeking to navigate large bureaucracies. Readings and class discussions integrate theoretical analyses of organizations with detailed case studies. Prerequisite: PUAD 330 or PUAD 331.

**PUAD 432. Conducting the People's Business Ethically. 3 Credits. S**
Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership, as well as strategies to build strong institutional cultures and support ethical practices in institutions. Considers moral and political theory by focusing on contemporary cases and issues. Students learn how to identify moral issues in public life and public management. There is a special focus on the integration of moral concerns into public discussion in a manner that contributes to good policy and does not polarize issues. This course considers moral and political theory by focusing on contemporary cases and issues.

**PUAD 433. Metropolitcs and Macroproblems: The American City in Local and Global Context. 3 Credits. S**
An interdisciplinary study of American cities, focusing on the rapidly changing demographic, physical, political, social, and economic changes. Sunbelt cities, edge cities, the rustbelt cities, planned and unplanned suburban communities, as well as declining center cities and newly revitalized downtowns are considered. The role of immigration and migration in reshaping the urban environment, and the effects of globalization are also examined.

**PUAD 435. Generating, Allocating and Managing Public Resources. 3 Credits. U**
This course is devoted to topics in public budgeting, finance and financial management. These activities play a central role in public management. The intent of this course is to understand the role these activities play in local, state, and federal governments and to see how policy and management are shaped and influenced by budgets, financial reports, and tax policy.

**PUAD 436. Managing People in Public Organizations. 3 Credits. U**
Effective human resources management is one of the key goals of organizations in both the public and private sectors. This course focuses on human resources management in a public sector context with particular emphasis placed upon past, current, and future challenges in the field. The course covers topics such as the recruitment, selection, and compensation of public sector employees, as well as more contemporary issues such as diversity management and public sector personnel reform.

**PUAD 439. Concepts of Civil Society. 3 Credits. U**
Concepts of community, social capital, and civil capacity building, and their relations to effective community functioning, democratic politics, and administrative expertise. Not available to students with credit in PUAD 639.

**PUAD 441. Public Service Leadership. 3 Credits. U**
This course is based on the premise that leadership is not confined to the top tiers of organizations and that each individual can and should develop their leadership abilities. To that end, this course examines the concept of leadership through a variety of lenses-individual, environmental, and follower perspectives-in public, nonprofit and private contexts. Special emphasis will be placed on scholarly practice and perspectives of individual leadership assessment and development. This course is offered at the 400 and 700-level, with additional assignments at the 700-level. Not available to students with credit in PUAD 641 and PUAD 741.

**PUAD 494. Topics in Public Administration: ______. 3 Credits. S**
An introductory study of selected topics in public affairs and administration. Course may be repeated for credit if content varies. Course may be offered in lecture or online format. Not open to students with credit in PUAD 694 if the topic is the same.

**PUAD 691. Internship in Public Service. 1-6 Credits. U**
Designed to provide public administration students an applied learning experience in either a public or nonprofit organization. Open to majors in Public Administration only. Prerequisite: One of the following: PUAD 330, 331, PUAD 332, PUAD 333, and consent of instructor required.

**PUAD 701. Administration of Justice. 3 Credits.**
Examines the administration of justice and focuses on differential and discriminatory treatment in policing, criminal prosecutions, trials, sentencing, or imprisonment. Also considered are the basis and impact of racial profiling, harassment, arbitrary detention, and abusive treatment of members of racial and ethnic groups, immigrants, and/or other vulnerable groups by law enforcement, and disparate treatment by prosecutors and the courts. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 401.

**PUAD 702. Diversity and Social Equity in Public Administration. 3 Credits.**
Analyzes diversity and leadership in public and private institutions along ethnic, racial, and gender lines and the challenges of the facilitation of open dialogue on diversity. Examines the political, historical, social, and economic reasons why Americans of different ethnic, racial, and gender groups hold divergent views about major public policy areas, as well as fundamental views about democratic participation. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 402.

**PUAD 703. Foundations of the Nonprofit Sector. 3 Credits.**
This course provides an overview of the U.S. nonprofit sector, its history, scope, diversity and its positioning among and between the private and public sectors of the U.S. economy. The course explores the legal framework under which nonprofit organizations operate and are regulated. Economic, political, social, organizational and giving theories of the sector are reviewed in order to understand the sectors existence, roles and activities with particular attention to philanthropy and voluntarism. Distinct contributions to society as well as contemporary challenges faced by the sector are examined. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 403.
PUAD 705. Managing Nonprofit Relationships. 3 Credits.
This course considers the set of relationships that nonprofit leaders must balance within the organization and beyond organizational boundaries. Both internal relationships (with staff, volunteers, and board members) and external relationships (with stakeholders, other organizations, and the community at large) are critical to mission accomplishment. This course provides students with the resources necessary to understand the challenges and opportunities related to building and maintaining these relationships. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in PUAD 405.

PUAD 708. Collaboration in Public Administration. 3 Credits.
Managers must work effectively across organizational and sector boundaries to solve problems and produce public value. This course considers the forces contributing to the need for collaborative governance, changing management tasks and competencies, and how to address key collaborative challenges. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 408.

PUAD 741. Public Service Leadership. 3 Credits.
This course is based on the premise that leadership is not confined to the top tiers of organizations and that each individual can and should develop their leadership abilities. To that end, this course examines the concept of leadership through a variety of lenses-individual, environmental, and follower perspectives-in public, nonprofit and private contexts. Special emphasis will be placed on scholarly practice and perspectives of individual leadership assessment and development. This course is offered at the 400 and 700-level, with additional assignments at the 700-level. Not available to students with credit in PUAD 441.

PUAD 824. Creating Good Public Policy. 3 Credits.
This course is an introduction to policy making in the United States with the aim of providing students with the skills and knowledge necessary to make and communicate good decisions about public policy. Competing theoretical approaches will be used to understand the policy making process. The class will highlight interactions between residents, organized interest groups, governments, the economy, and the environment. It introduces basic approaches for stakeholder analysis and methods for developing evidence-based policies or programs. Students will discuss common obstacles to good policy-making and the tensions of making public policy in a political environment.

PUAD 825. Urban Policy and Administration. 3 Credits.
This course explores the development, implementation and evaluation of public policy in the local government context. It examines a variety of policy tools used to address urban problems and applies theories of the policy process, intergovernmental relations, and institutions to municipal governance. In so doing, the course examines a range of current substantive policy and administrative issues facing urban communities and governments. (Same as PUAD 825.)

PUAD 828. Nonprofit Management and Policy. 3 Credits.
This course focuses on the economic, social, and legal foundations of the nonprofit sector. Nonprofits are examined in the context of a three-sector economy, with emphasis on the ways in which nonprofits compensate for market failures and government failures. The course examines government-nonprofit relations in the modern welfare system and offers an in-depth examination of the health, education, and welfare functions as performed by nonprofits. This course also provides exposure to selected topics in nonprofit management such as grant writing, board relations, advocacy, fundraising and volunteer management.

PUAD 834. Human Resource Management. 3 Credits.
This course presents the context and practice of effective human resource management, with emphasis on the political, legal, historical, and ethical dimensions of public employment. This course considers the functions of workforce management, including: 1) planning of work and the allocation of labor to that work, 2) acquisition of employees and their competencies, knowledge, skills, and abilities, 3) development of employees to channel, improve and create new knowledge, skills, and abilities, and 4) maintaining the working relationship between employee and employer. Students will apply workforce management theories and techniques to contemporary organizational challenges and investigate the tensions inherent to balancing competing values (such as: responsiveness/neutrality and efficiency/equity) and meeting conflicting demands of organizational stakeholders and society.

PUAD 835. Managing Public Money. 3 Credits.
This course covers essential financial management practices and the budgetary processes of the United States federal, state and local governments. It provides an overview of major revenue, spending, and debt financing policies.

PUAD 836. Data Informed Decision-Making. 3 Credits.
This course examines an array of data analysis tools that, when mastered, will increase students’ abilities to analyze, synthesize, think creatively, solve problems, and make decisions. It covers concepts of research design, probability, inferential statistics, and introduces quantitative approaches to examine public management and public policy decisions.

PUAD 837. Advanced Public Budgeting and Finance. 3 Credits.
In this class, students examine the design and impacts of budgetary institutions and processes in-depth. Students are introduced to and apply various technical analyses for budgetary policymaking, such as forecasting, financial statement analysis, and cost analysis. Prerequisite: The successful completion of PUAD 835 with a grade of C of higher or instructor approval is needed to enroll.

 PUAD 839. Topics in Public Administration: ______. 3 Credits.
Study of selected topics in public administration.

PUAD 841. Context, Ethics and Legal Environment of Public Administration. 3 Credits.
This course explores the environment in which public administrators work that both empowers and constrains what public administrators can do. Through discussion, cases, and classic readings, the course explores the accepted uses and procedures of the field. This includes the intellectual history, the political and legal context, the tensions between democracy and bureaucracy, and ethical decision making.

PUAD 842. Law and Public Management. 3 Credits.
This course introduces constitutional and administrative law issues that face public administrators, with a particular focus on the state and local level. Using legal reasoning as a decision-making tool, the context of often-competitive administrative values-efficiency, effectiveness, and equity—will be considered. While administrators do not face constitutional issues every day, this course examines how constitutional values often play out in the day-to-day decision-making of public administrators.

PUAD 845. Managing Public Organizations. 3 Credits.
This class explores concepts and practices in organization behavior and management theory as they apply to public organizations. It covers dynamics associated with organizational structures, accountability, and culture and dynamics of risk in leadership, collaboration, and contracting. It emphasizes approaches to understanding the dynamics of individuals, groups, and teams within organizations.

PUAD 849. Law, Courts, and Public Policy. 3 Credits.
This course provides an overview of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. Prerequisite: Graduate standing or consent of instructor.

**PUAD 850. Intergovernmental Relations. 3 Credits.**
This course focuses on the fiscal and administrative relationships among the three levels of government - federal, state, and local - in the United States. A number of topics will be examined, including a history of intergovernmental relations, the political, constitutional, and legal foundations of the intergovernmental system, and intergovernmental fiscal policy. The impact of the intergovernmental system will be assessed from the perspective of specific areas and intergovernmental programs.

**PUAD 851. Infrastructure Management. 3 Credits.**
This course introduces students to infrastructure management from a local government perspective. Through a heavy reliance on guest speakers and site visits, it provides an overview of infrastructure development, financing, and maintenance. Throughout the course, students are taught to think in terms of systems and collaborative relationships.

**PUAD 853. Policy Analysis. 3 Credits.**
This course exposes students to the conceptual foundations and applied techniques associated with identifying, describing, and seeking solutions to public policy problems. Recognizing that it often occurs in a context where competing values and perspectives are often strongly held, students will learn the designs and methodologies to conduct policy analysis systematically and with minimal bias. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.

**PUAD 854. Innovation and Organizational Change. 3 Credits.**
This course will examine theories of innovation and organizational change as applied to public organizations. Particular emphasis will be placed on the concepts of innovation in bureaucratic organizations, on the process of successful change in organizations, and on leadership and employees' roles.

**PUAD 856. Management and Information Technology. 3 Credits.**
An introduction to the concepts of information policy and management of technology within governmental organizations. The course covers the effects of technology on government and society as well as information policy (privacy, security and access) and their importance to democracy. The course also includes a leadership perspective on planning, funding, and implementation of technology systems in governmental organizations as well as the role of Chief Information Officer.

**PUAD 857. Performance Management and Governance. 3 Credits.**
This course examines the practice and governance challenges of performance management and budgeting in the public sector. Topics covered in this course include: a) the governance context of performance measurement and management; b) the historical and theoretical foundation of performance measurement and management; c) the global trend of performance-oriented reforms; d) the practice and politics of performance measurement and management; and e) governance and ethical issues in managing for results. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.

**PUAD 858. Performance Audit. 3 Credits.**
This course examines the practice of performance audit at the national, state, and local levels. Topics covered in the course include: a) the concept of performance audit and the roles of auditors in performance management; b) performance audit systems and standards at the national, state and local levels; c) performance audit methodologies and techniques; d) the establishment of audit criteria; e) the concept and practice of risk and vulnerability analysis; f) the reporting and communication of performance audit results. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.

**PUAD 860. Governing Sustainable Communities. 3 Credits.**
This course examines the role that communities can play in advancing environmental, economic, and social sustainability. Although sustainability has traditionally been viewed as an international or national issue, the unit of action has been shifting downward. Cities, in particular, have been characterized as a key "battleground for sustainability." This is in part because an estimated 50 percent of the global population, including 84 percent of the U.S. population, lives in urban areas, and those numbers are only projected to increase. Moreover, local governments have authority over many decisions that are directly related to sustainability, including land use, transportation, housing, local food policy, energy efficiency, and the character of local economic development. In this class we examine these and related issues from a community-level and institutions perspective in order to assesses how social and governmental structures, priorities, pressures and constraints influence the prospect for urban sustainability. A particular focus is placed on understanding how local and regional governments implement and manage sustainability.

**PUAD 861. Data Analytics. 3 Credits.**
The course is an introduction to data analytics in public administration and policy analysis. It teaches basic programming in R and SAS, covers basic applications of data analytics such as regression analysis and machine learning, and teaches basic tools of data visualization, including GIS. The course also reviews the political, legal, organizational, and ethical challenges of data analytics usage and the professional responsibilities public administrators have in using these tools. Students are expected to be familiar with basic statistical analysis and have already taken MPA-level statistics or an equivalent course. This course satisfies an elective requirement for students who are completing the Performance Management certificate. Prerequisite: PUAD 836 or equivalent academic engagement that includes quantitative analysis up to multi-variate regression.

**PUAD 862. Emergency Management in the United States: Theory and Practice. 3 Credits.**
This course covers the history, context, and practice of emergency management, blending in the theory and concepts of intergovernmental relations and collaborative leadership methods that are essential to the practice. The course will cover emergency management, as practiced in the United States, the National Incident Management System (NIMS), and the intergovernmental relationships that must be cultivated among all branches of government, non-profits, and private sector entities to plan, mitigate, respond to and recover from all disasters both natural and manmade.

**PUAD 863. Program Evaluation. 3 Credits.**
In this course, students learn the designs and methods used to evaluate the performance of public programs, policies, and organizations. Evaluation is rooted in trying to understand cause and effect relationships in complex situations and correctly attributing impact to intervention. Emphasis is placed on approaches to measure social outcomes. Through a series of evaluation case studies, students will use evidence and empirical methods to assess whether public action achieves its desired outcomes. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.
PUAD 892. Internship Experience in Local Government Administration. 1-3 Credits.
This course is to supplement and enhance a part-time internship or current work experience in a local government or non-profit agency. It challenges students to examine their work experience to provide them the knowledge, background, and skills needed to successfully lead and manage in a local government or non-profit organization. The course requires students to reflect, write, and discuss their part-time internship (or current work experience) and study how the experience relates to public administration theory, leadership, and management competencies. As this course focuses on local government management, all students are required to attend a professional conference designated by the instructor. Graded on a satisfactory/unsatisfactory basis.

PUAD 893. Directed Readings. 1-3 Credits.
Designed to meet the needs of advanced students whose study in public administration cannot be met with current course work.

PUAD 894. Professional Development Seminar I: Public Admin Contemporary Issues & Competency Assessment. 3 Credits.
This intensive seminar examines students' current experiences as full-time interns and considers workplace and community concerns within the context of contemporary issues. The transition from an academic to a professional work setting is emphasized in discussion and reflective assignments. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Open only to MPA students who are required to complete a full-time internship in their second year of study.

PUAD 895. Professional Development Seminar II: Leading to Create a Culture for High Performance. 3 Credits.
In this intensive week-long seminar students will examine what high performance means, how performance happens in an organization and the various principles of public leadership that most effectively guide organizational culture. The course is intended to stimulate thoughts and learnings about high-performance organizations, organizational values, and explores strategies that can create the type of culture that inspires and enables employees to excel. The seminar format provides an opportunity for introspection in individual beliefs and characteristics, group discussion for the exchange of diverse views, and classroom instruction to explore the latest thinking in public sector leadership. Ultimately, the seminar is designed to train and empower public administrators to live the Athenian oath in their organization and community.

PUAD 899. Excelling in the Practice of Public Administration. 1 Credit.
This course is taken in the final semester of the MPA degree and serves as a culminating review and reaplication of the core competencies and learning objectives emphasized throughout the curriculum. Centered on the development of an applied final report, and emphasizing a process of targeted peer review, this course aims to develop reflective practitioners and ensure that students integrate the range of core competencies and skills essential to leading and managing in public-serving organizations and serving diverse communities. Prerequisite: Students are expected to be in the final semester of MPA study.

PUAD 930. Research Seminar in Public Administration and Democracy. 3 Credits.
This course focuses on the democratic context of public administration. Topics could include how democracy shapes the practice of public administration; the functioning of public administration in a constitutional democracy; issues relating to control and discretion of public administrators; citizenship and representative bureaucracy; theories of bureaucratic values such as equity, justice and efficiency, ethics and accountability; theories of institutions.

PUAD 931. Research Seminar in Public Management. 3 Credits.
This course, on the topic which increasingly is approached as an interdisciplinary field, focuses on the management of public and non-profit agencies. Topics could include: the nature of public agencies and the roles of public executives, managers, and professionals; distinctions between public, private, and non-profit agencies in America and internationally; creating and managing organizational networks; leadership; work motivation; and the ethics of decision-making.

PUAD 932. Seminar in the Intellectual History of Public Administration. 3 Credits.
This course will analyze the intellectual currents that undergird the theories and concepts in public administration. There are three primary perspectives crosscutting the topics. They are historical, cultural and analytical.

PUAD 933. Research Methods in Public Administration. 3 Credits.
The course examines issues of research and epistemology with an emphasis on connecting theory and research and doing research in field settings.

PUAD 934. Advanced Quantitative Methods for Public Administration. 3 Credits.
This seminar will assist students to develop a thorough competence in both theory and application of multivariate statistical models of the types that are commonly used to study questions of organization and policy in the public sector. These will include inference for the general linear regression model under a wide variety of specifications, as well as a consideration of path models and systems of simultaneous equations. The principal goal of this course is to strengthen the ability of doctoral students in public administration to work methodologically as independent scholars using relatively advanced designs and technique in their work.

PUAD 936. Policy Analysis and Program Evaluation. 3 Credits.
This course examines the theoretical foundations and analytical components of policy analysis and program evaluation, common tools for assessing alternative courses of public action and program effectiveness. This examination will include a review and critique of common quantitative and qualitative approaches, including cost-benefit analysis, cost-effectiveness analysis, and quasi-experimental design.
PUAD 937. Qualitative Methods in Public Administration. 3 Credits.

This course examines the concepts and practices of qualitative research. The focus will be on field research and the collection of "textual data" through observation, interviewing, and documents. The course will also examine the interpretation and analysis of qualitative data and how to present qualitative findings.

PUAD 939. Topics in Public Administration: ____. 1-3 Credits.

A study of selective topics in public administration. Course may be taken more than once.

PUAD 943. Constitutional Foundations of Public Administration. 3 Credits.

This course provides grounding in the constitutional premises of public administration including executive, legislative, and judicial powers, and federalism, and those issues associated with the development of economic institutions and processes such as taxation, employment regulation, and commerce controls.

PUAD 949. Law, Courts, and Public Policy. 3 Credits.

This course provides an in-depth analysis of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. As part of the course requirements, students will conduct original empirical research.

PUAD 998. Directed Reading on Public Administration. 1-6 Credits.

Designed to meet the needs of graduate students whose study in public administration cannot be met with present course. Prerequisite: consent of instructor.

PUAD 999. Dissertation. 1-15 Credits.

Enrollment for writing doctoral dissertations. Graded on a satisfactory progress/limited progress/no progress basis.

Courses

SPAA 400. Law Enforcement Leadership. 3 Credits.

The course covers leadership and management concepts in the context of law enforcement agencies. The course provides an introduction to leadership and management functions including fiscal management, human resources, and strategic planning as well as the organization of decision making and training functions. Students will learn research verified concepts of leadership and management within the context of the United States law enforcement environment. (Same as CRIM 400.)

SPAA 691. Internship Experience. 1-3 Credits. S

Designed to provide students an applied learning experience in a relevant public, non-governmental, or nonprofit organization. Students are required to critically reflect on their experience through a variety of academic assignments throughout their internship experience. Prerequisite: Permission of academic unit.

SPAA 692. Research Experience. 1-3 Credits. S

Designed for advanced undergraduate students. Students enhance their research skills by working one-on-one with a faculty member on an independent scholarly project. Students are required to complete a final project or presentation, through advising and consultation with the designated faculty member. Prerequisite: Permission of academic unit.

SPAA 693. Directed Readings. 1-3 Credits. S

For advanced undergraduate students who wish to study a specific topic of interest that is not covered in the curriculum. Each student must complete a proposal outlining his or her topic request and submit to the Undergraduate Coordinator. Prerequisite: Permission of the academic unit.

Courses

UBPL 200. Sustainability and Society. 3 Credits.

This course will introduce the concept of sustainability, examining its early iterations, recent applications, and possible future transformations. Critical analysis of sustainability as a concept and societal goal will be a course cornerstone. We will examine two contemporary social issues that are relevant to students at the University of Kansas. Social science perspectives will be emphasized, but, because sustainability necessitates an interdisciplinary perspective, the course will consider the contributions of a wide range of disciplines to these issues.

UBPL 300. Planning the Sustainable City. 3 Credits.

A broad introduction to the field of urban planning as a technical profession, a process of decision-making, and a governmental function. The multi-disciplinary nature of planning as an area for professional practice in the geographical, socio-economic and political contexts of the U.S. is stressed. We will explore the promise and limitations of planning in the context of mitigating and adapting to climate change. The course is intended for both the student who is considering planning as a major field of study and the student with primary interest in a related field who would like a working knowledge of past and current planning in the U.S.

UBPL 402. Special Topics in Urban Planning: ____. 3 Credits.

Intended for undergraduate individual or group projects/research in an urban planning topic.

UBPL 407. Sustainability and the Future of Transportation. 3 Credits.

This course examines the worldwide impact of how we travel, and how that is changing with the development of new technologies in transportation. Our study starts with an overview of different modes of transportation and their use across the globe, then moves into the environmental, economic, equity, and energy factors that influence the sustainability of our ways of travel. Once we examine our present reality, we then peer into the future and examine the potential of evolving developments in transportation, including electric vehicles, autonomous cars, shared mobility, and the COVID-19 pandemic. Topic areas include worldwide differences in the use of modes of transportation, spatial relations and interactions between transportation and land use, and how sustainability principles interact with policy, market forces, and personal behavior in transportation. Upon completion of the course, students will be able to 1) evaluate the sustainability of transportation proposals and developments, 2) develop transportation improvements that contribute to enhancing equity in transportation while mitigating environmental impacts and energy use, and 3) practice enhanced critical thinking, logic, reasoning, and professional communication abilities. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 707.

UBPL 410. Housing Policy and Planning. 3 Credits.

This course explores contemporary U.S. housing issues and introduces the various methods used by the public sector as it intervenes in housing markets. Governments at all levels employ many different approaches to achieve housing goals. This course will examine many of these approaches to help students understand what these housing programs are supposed to accomplish and how well they work. In all cases, the objective of the course is to educate planners so that they have a firm understanding of housing programs that exist and a grasp of the methods used to select housing strategies for implementation by the public sector. This course is offered at the 400 and 700 level with
additional assignments at the 700 level. Not open to students with credit in UBPL 710.

**UBPL 420. Sustainable Land Use Policy and Planning. 3 Credits.**

This course introduces students to the issues that planners and decision makers face as they strive to promote sustainability, especially within the context of land use planning. Emphasis will be placed on the theoretical and policy considerations that guide the work of planners. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 720.

**UBPL 425. Environmental Planning Techniques. 3 Credits.**

An understanding of natural processes is an essential aspect of developing appropriate and effective environmental plans and policies, and creating context- and ecosystem-sensitive site designs. The course covers a variety of topics within environmental and sustainable land use planning. Each topic is examined with respect to the scope of the issues, the methods of analyzing and/or measuring those issues, and the ways those issues can be addressed to avoid or mitigate environmental problems. The main topics will include 1) soils, 2) water and land use, 3) urban ecology, wildlife habitats, and urban biodiversity, and 4) energy, climate change, and natural hazards. The primary purposes of this course are to: 1) Gain an overview of the range of environmental topics and challenges involved in sustainable land use planning; 2) Develop familiarity with common principles and datasets used in environmental planning analysis; and 3) Apply techniques of environmental analysis to build skills applicable in practice. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 725.

**UBPL 450. Transportation Policy and Planning. 3 Credits.**

This course is designed to provide a broad overview of urban transportation. The role which transportation systems and networks play in facilitating the movement of people as motorists, cyclists, and pedestrians is explored. Methods through which transportation systems are planned for and evaluated are discussed as are major policy issues confronting decision makers within the field. Upon completion of this course, students will be able to 1) comprehend transportation plans and policy documents, 2) evaluate the broader impacts of transportation decisions, and 3) develop and evaluate transportation planning and policy interventions which address current and future issues. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 750.

**UBPL 480. Climate Change and Hazards Planning. 3 Credits.**

This course covers planning for climate change and disasters. Floods, heat waves, droughts, extreme storms, sea level rise, and the wide range of other climate-related hazards are (or soon will) impact virtually every aspect of the social, economic, and environmental systems on which we all depend. While the challenges of making our communities more sustainable and resilient are daunting, innovative plans, policies, programs, and projects are being developed and implemented all around the world. This course will cover four main topics: 1) the basic science and concepts of climate change and disasters, 2) learning from decades of knowledge about planning for natural hazards, 3) mitigating climate change by reducing greenhouse gas emissions, and 4) adapting to the impacts of climate change. Each topic will be addressed primarily at the local (city, county or regional) scale, with a primary focus on planning in the United States. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 780.

**UBPL 701. Directed Readings. 1-6 Credits.**

Designed to meet the needs of students whose study in urban planning cannot be met with the present courses. Prerequisite: Consent of instructor.

**UBPL 705. Urban Economic Theory and Analysis. 3 Credits.**

This course examines the economic forces which shape and affect cities. In the first part of the course, theories of location are considered. With the help of these theories our objectives are to understand why cities exist, why they are located where they are, the distribution of city sizes, the causes of regional and metropolitan growth and decline, and the spatial distribution of alternative activities within cities. Part two of this course introduces analysis methods which aid in the comprehension of local and regional economic characteristics and in decision-making concerning the distribution of resources within cities.

**UBPL 707. Sustainability and the Future of Transportation. 3 Credits.**

This course examines the worldwide impact of how we travel, and how that is changing with the development of new technologies in transportation. Our study starts with an overview of different modes of transportation and their use across the globe, then moves into the environmental, economic, equity, and energy factors that influence the sustainability of our ways of travel. Once we examine our present reality, we then peer into the future and examine the potential for evolving developments in transportation, including electric vehicles, autonomous cars, shared mobility, and the COVID-19 pandemic. Topic areas include worldwide differences in the use of modes of transportation, spatial relations and interactions between transportation and land use, and how sustainability principles interact with policy, market forces, and personal behavior in transportation. Upon completion of the course, students will be able to 1) evaluate the sustainability of transportation proposals and developments, 2) develop transportation improvements that contribute to enhancing equity in transportation while mitigating environmental impacts and energy use, and 3) practice enhanced critical thinking, logic, reasoning, and professional communication abilities. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 407.

**UBPL 710. Housing Policy and Planning. 3 Credits.**

This course explores contemporary U.S. housing issues and introduces the various methods used by the public sector as it intervenes in housing markets. Governments at all levels employ many different approaches to achieve housing goals. This course will examine many of these approaches to help students understand what these housing programs are supposed to accomplish and how well they work. In all cases, the objective of the course is to educate planners so that they have a firm understanding of housing programs that exist and a grasp of the methods used to select housing strategies for implementation by the public sector. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 410.

**UBPL 715. Community and Neighborhood Revitalization. 3 Credits.**

The course introduces students to a range of community development concepts and approaches in the context of urban change in the United States. In this context, this course helps students understand the various theories of neighborhood change, community development strategies, and a range of principles for developing neighborhood revitalization initiatives focusing on revitalization strategies for inner-city neighborhoods. In this course, community development interventions are understood as facilitating, strengthening, and improving less-advantaged communities.

**UBPL 716. Neighborhood Analysis and Evaluation. 3 Credits.**
This course explores social theories of Community, how those theories have influenced concepts for neighborhood development, and how to apply the idea of Community to local neighborhood planning and community development. It also teaches how to analyze neighborhood conditions to understand and describe neighborhoods and inform neighborhood improvement strategies. It explores ways to analyze and interpret quantitative indicators—demographic, economic, physical, and social conditions—which exist at the neighborhood level. It teaches students how to investigate and analyze opportunities, assets, and challenges confronting the neighborhood. It introduces students to community asset mapping.

**UBPL 720. Sustainable Land Use Policy and Planning. 3 Credits.**

This course introduces students to the issues that planners and decision makers face as they strive to promote sustainability, especially within the context of land use planning. Emphasis will be placed on the theoretical and policy considerations that guide the work of planners. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 420.

**UBPL 725. Environmental Planning Techniques. 3 Credits.**

An understanding of natural processes is an essential aspect of developing appropriate and effective environmental plans and policies, and creating context- and ecosystem-sensitive site designs. The course covers a variety of topics within environmental and sustainable land use planning. Each topic is examined with respect to the scope of the issues, the methods of analyzing and/or measuring those issues, and the ways those issues can be addressed to avoid or mitigate environmental problems. The main topics will include: 1) soils, 2) water and land use, 3) urban ecology, wildlife habitats, and urban biodiversity, and 4) energy, climate change, and natural hazards. The primary purposes of this course are: 1) Gain an overview of the range of environmental topics and challenges involved in sustainable land use planning; 2) Develop familiarity with common principles and datasets used in environmental planning analysis; and 3) Apply techniques of environmental analysis to build skills applicable in practice. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 425.

**UBPL 730. City and County Planning. 3 Credits.**

This course is about how to create plans and put the pieces of cities together in a sustainable manner, balancing the competing values of economy, ecology, equity, and livability. It introduces students to the planning process in the U.S., what makes great plans, the basic implementation tools for planning (zoning, capital improvement plans, engineering standards, and subdivision regulations). We will learn about the Comprehensive Plan along with specialized plans for transportation, housing, land use, and the environment.

**UBPL 735. Site Planning and Design. 3 Credits.**

Site planning is the arrangement of elements (buildings, landscaping, parking, open space) on particular pieces of property. This class focuses on the site planning process and the implementation of site design standards through regulations. We will delve into the elements and principles of design and ask these big questions: What makes great public spaces? What makes great neighborhoods? What makes great streets? What can we do to steer development in the direction of greatness?

**UBPL 736. Planning Law and Institutions. 3 Credits.**

This course explores the legal principles underlying the institutions, practices, and processes of city planning. Subjects to be discussed include zoning, eminent domain, subdivision regulation, transfer of development rights, environmental regulation, growth management, and other planning mechanisms used to guide urban growth and control the use of land. Particular attention will be paid to conflict resolution and negotiation. Students should emerge from the course with a solid understanding of the logic and routine practice of planning in a procedural and institutional context.

**UBPL 741. Foundations of Compassionate Critical Thinking. 3 Credits.**

This course engages students with research methods (research design, inferential statistics, and survey methods) within the broad suite of relationship skills on which successful planning analysis and public service careers depend. These relationship skills ironically are commonly referred to as ‘soft skills,’ in spite of, the hard work they often require. By embedding ‘soft skills’ within ‘hard skills’ (quantitative methods), we will examine a variety of motivations for public service and planning through a consistent lens of advancing equity. We use compassion as a framework for integrating science and practice related to a) emotions, relationships, and self-care, b) reasoning and cognitive biases, c) networks of relationships, and d) broader social, economic, and political systems. We pay particular attention to countering racism, sexism, and other forms of exclusion and oppression which can be hidden within seemingly technical/rational research methods and analyses. Through the course, we consider how planners can use research and communication to help the public and decision makers in the near term, even as there is great uncertainty about the future.

**UBPL 742. Applied Data and Spatial Analysis. 3 Credits.**

Planners work with quantitative data, much of which are spatial in nature. They use quantitative information to address questions they encounter in planning and policymaking and make decisions. Planners gather, summarize, analyze, and present data they have collected themselves or have obtained from secondary sources. Planners may also review and assess quantitative analyses prepared by others. This course is designed to prepare students to critically review analyses prepared by others and conduct basic statistical analysis of data. It introduces students to key concepts and tools in quantitative analysis and research methods relevant to urban planning and policy. It prepares students to understand, interpret, and more importantly, critically assess quantitative data analyses and results they would encounter in urban planning and allied disciplines.

**UBPL 746. GIS Applications for Design and Planning. 3 Credits.**

This course will explore a range of Geographic Information Systems (GIS) applications for students in architecture and planning. It will be structured as a workshop, starting with a review of basic GIS concepts and procedures. Different digital data sources will be explored, along with file sharing (import and export) capabilities. The focus will be on applications at different scales using projects in architecture, site planning, environmental planning, urban analysis, and regional analysis. Three dimensional analysis will also be introduced. Each student will develop a final project as a synthesis of earlier exercises and as an application relevant to their individual professional interests.

**UBPL 750. Transportation Policy and Planning. 3 Credits.**

This course is designed to provide a broad overview of urban transportation. The role which transportation systems and networks play in facilitating the movement of people as motorists, cyclists, and pedestrians is explored. Methods through which transportation systems are planned for and evaluated are discussed as are major policy issues confronting decision makers within the field.Upon completion of this course, students will be able to 1) comprehend transportation plans and policy documents, 2) evaluate the broader impacts of transportation decisions, and 3) develop and evaluate transportation planning and policy interventions which address current and future issues. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 450.

**UBPL 756. Data Driving Transportation. 3 Credits.**
The transportation systems of the world are the product of many decisions, all of which are heavily influenced by the methods we use to study and create those systems. This course explores the research methods that can be employed in planning and analyzing transportation. Content areas include history and theory of transportation planning and modeling, traditional and recent advancements in transportation modeling, and analyzing land-use/transportation interaction, freight travel, public transportation, and non-automotive travel demand, including public transit and non-motorized modes. Upon completion of this course, students will be able to 1) practice advanced skills in descriptive, graphical, GIS, and quantitative analytical methods for transportation, 2) evaluate the impact of transportation investments using those methods and 3) apply enhanced critical thinking, logic, reasoning, and professional communication abilities.

UBPL 780. Climate Change and Hazards Planning. 3 Credits.
This course covers planning for climate change and disasters. Floods, heat waves, droughts, extreme storms, sea level rise, and the wide range of other climate-related hazards are (or soon will be) impacting virtually every aspect of the social, economic, and environmental systems on which we all depend. While the challenges of making our communities more sustainable and resilient are daunting, innovative plans, policies, programs, and projects are being developed and implemented all around the world. This course will cover four main topics: 1) the basic science and concepts of climate change and disasters, 2) learning from decades of knowledge about planning for natural hazards, 3) mitigating climate change by reducing greenhouse gas emissions, and 4) adapting to the impacts of climate change. Each topic will be addressed primarily at the local (city, county or regional) scale, with a primary focus on planning in the United States. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 480.

UBPL 785. History and Theory of Planning. 3 Credits.
The course serves as an introduction to the history of city planning and "how to plan" in general. Planners are particularly concerned with future consequences of current action. In looking to the future, knowing past history is a good place to start. Also, planning theorists have thought deeply about how best to plan and their thoughts and advice can serve planners and decision-makers well when they are facing unknowns.

UBPL 802. Special Topics in Urban Planning: ______. 3 Credits.
Study of selected topics in urban planning.

UBPL 806. Thesis - Graduate Research. 1-6 Credits.
Independent study and research related to the master's thesis. Prerequisite: Consent of instructor.

Bachelor of Arts and Bachelor of General Studies in Law and Society

Law and society is an interdisciplinary field that examines how law works in practice in public administration, courts, the non-profit sector, policy, policing, and the justice system. A degree in law and society provides a strong background in how law works in practice. Students learn about legal history and legal policy, how law shapes managerial processes, how it shapes government and the system of justice, and how it affects ordinary people in every walk of life. Students can complete an internship for credit towards their degree. Past internship placements include: Johnson County District Attorney's Office, the City of Shawnee, Planned Parenthood, and Kansas City-area law firms.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 27 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Law and Society is available here: Law and Society BA (p. 1996), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Law and Society is available here: Law and Society BGS (p. 1997), or by using the left-side navigation.

**BA in Law and Society**

Below is a sample 4-year plan for students pursuing the BA in Law and Society. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

The Law and Society major is only available at the KU Edwards Campus in Overland Park.

**Total Hours 120-123**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. No more than 3 hours of SPAA 691 may count toward the major.
3. SPAA 691 Internship Experience is typically taken to fulfill KU Core Goal 6. If SPAA 691 is not taken for Goal 6, another Goal 6 course will need to be taken. This may require that an undesignated elective be used to fulfill a pre-requisite for a Goal 6 course.
4. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BGS in Law and Society

Below is a sample 4-year plan for students pursuing the BGS in Law and Society. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

The Law and Society major is only available at the KU Edwards Campus in Overland Park.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Bachelor of Arts and Bachelor of General Studies in Public Administration

The undergraduate major in public administration offers students the necessary knowledge and skills for planning, implementing, and evaluating public programs. Students learn to think critically and analytically about public policy and will also acquire skills that make them more effective citizens in their own communities. Students can complete an internship for credit towards their degree. Past internship placements include: Johnson County, Kauffman Center, Harvesters, Golf Course Superintendents Association of America, City of Roeland Park, YMCA, Governor’s Internship Program, Youth Volunteer Corps of Kansas City, America Reads and Army Corps of Engineers.

### Undergraduate Admission

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

#### Public Administration Required Electives

Majors must complete 6 courses (18 hours) from the following:

- LWS 330 Introduction to Law & Society
- LWS 333 The Pursuit of Rights: Law, Democracy & Power

---

1. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

2. No more than 3 hours of SPAA 691 may count toward the major.

3. SPAA 691 Internship Experience is typically taken to fulfill KU Core Goal 6. If SPAA 691 is not taken for Goal 6, another Goal 6 course will need to be taken. This may require that an undesignated elective be used to fulfill a pre-requisite for a Goal 6 course.

4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours

Satisfied by 27 hours of major courses.

#### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior Hours

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Public Administration is available here: Public Administration (p. 1999), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Public Administration is available here: Public Administration (p. 2000), or by using the left-side navigation.

BGS in Public Administration

Below is a sample 4-year plan for students pursuing the BGS in Public Administration. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

The Public Administration major is only available at the Edwards campus.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Goals, please visit the KU Core website (http://kucore.ku.edu/courses/). To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
Minor in Law and Society

The minor in law and society examines how law works in practice in public administration, courts, the non-profit sector, policy, policing and the justice system. A minor in law and society could help you pursue a career in nonprofit administration, social work, local and state government or urban planning, among many others.

Electives

Choose three of the following. Other relevant courses may be approved on an ad hoc basis.

- LWS 332 Methods in Law and Society
- LWS 494 Topics in Law & Society
- LWS 691 Internship in Law & Society
- LWS 699 Capstone in Law and Society
- PUAD 330 Introduction to Public Administration
- PUAD 333 Hard Choices in Public Administration
- PUAD 432 Conducting the People's Business Ethically
- PUAD 401 Administration of Justice
- PUAD 402 Diversity and Social Equity in Public Administration
- PUAD 433 Metropolitics and Macropolicies: The American City in Local and Global Context
- PUAD 439 Concepts of Civil Society
- PUAD 441 Public Service Leadership
- SPA 691 Internship Experience
- SPA 692 Research Experience
- SPA 693 Directed Readings
- AAAS 306 The Black Experience in the U.S. Since Emancipation
- AAAS 322 Legal Issues and the African American
- AAAS 437 Global Ethnic and Racial Relations
- AAAS 511 The Civil Rights Movement
- AAAS 611 History of the Black Power Movement
- ABS 437 Independent Living and People with Disabilities
- ABS 441 Ethical, Legal and Professional Issues in Applied Behavioral Science
- AMS 320 Border Patrolled States
- AMS 437 Global Ethnic and Racial Relations
- ANTH 330 Forensic Anthropology
- BBA 302 Legal Aspects of Business
- BLAW 301 Legal Aspects of Business
- EVRN 332 Environmental Law
- PSYC 465 Stereotyping and Prejudice Across Cultures
- PSYC 492 Psychology and Social Issues
- PSYC 566 Psychology and the Law
- SOC 304 Principles of Sociology
- SOC 306 Principles of Social Problems
- SOC 343 American Racial and Ethnic Relations
- SOC 437 Global Ethnic and Racial Relations
- SOC 461 Competing Perspectives on Crime and Deviance
- UBPL 200 Sustainability and Society
- UBPL 300 Planning the Sustainable City
- WGSS 327 Perspectives in Lesbian, Gay, Bisexual, and Transgender Studies
- WGSS 517 Policing the Womb
- WGSS 563 Gender, Sexuality and the Law
- WGSS 653 Gender, Peace, and Conflict

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

## Minor in Public Administration

### Why study public affairs and administration?

A public administration minor provides you with the necessary background to help manage teams, develop and implement programs, and set and follow a budget. These skills would be valued in careers with local, regional and state government offices and departments, as well as careers in business, the sciences or education.

## Requirements for the Minor

### Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

## Master of Public Administration

With a unique combination of theoretically grounded course work and practical application, our Master of Public Administration (https://spaa.ku.edu/master-public-administration-mpa/) degree provides students with the knowledge and skills needed to lead, innovate, and problem-solve in public sector and non-profit settings.

Our Edwin O. Stene Master’s program is one of the oldest and most respected programs in the United States, beginning with our local government leadership program founded in 1948. Since 1998, our tradition of excellence in educating students at the masters’ level has been recognized by U.S. News and World Report with a #1 ranking in city management.

The MPA degree meets the needs of both full-time students who are looking to launch a career in public service as well as those who already have a career and are looking to accelerate it by pursuing a MPA degree part-time. The MPA degree may be obtained through course work offered at the Lawrence Campus, the KU Edwards Campus in Overland Park, Kansas, and the Leavenworth location.

## City Management Fellowship

MPA students specifically interested in city management are invited to apply to our 2-year City Management Fellowship program (https://spaa.ku.edu/citycounty-management-mpa-fellowship-program/). City management is the School of Public Affairs and Administration’s most recognized program and has been ranked the #1 program in the country by U.S. News and World Report since 1998.

Admission to the City Management Fellowship program is competitive - only a small cohort of Fellows is selected each year. Fellows receive all
of the advantages of being in the largest KU MPA program and also benefit from:

- Designated scholarship awards
- Attendance to the International City/County Management Association (ICMA) annual meeting, supported by the School;
- Links to a large and welcoming professional network;
- Peer group learning and camaraderie;
- Additional experiential learning through part-time and full-time internships and other professional development opportunities.

The key distinctive feature of the Fellowship is its structure where the first year revolves around full-time intensive coursework and the second revolves around a full-time, paid internship.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

M.P.A. Admission

Please visit the M.P.A. Admissions page (https://spaa.ku.edu/master-public-administration-mpa/) for complete admissions information.

For all applicants, a completed application includes:

1. Online Graduate Studies application (https://gradapply.ku.edu/apply/).
2. A nonrefundable application fee, submitted online with the application form.
3. 1 official transcript from the degree-granting college or university and any post-graduate college or university attended.
4. 3 letters of recommendation. If possible, at least 1 should be an academic reference.
5. A 3- to 5-page essay describing your background and career goals and clearly indicating how the M.P.A. degree fits into those goals and addressing any deficiencies in your academic preparation.
6. A current résumé.
7. A writing sample that is at least 5 pages long. It should be a well-cited work in which you critically analyze (not just summarize) an issue.
8. Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Students who are interested in enrolling in master's level coursework in public administration without formal admission to the graduate program are encouraged to apply for graduate non-degree seeking student status.

Deadlines

To begin in the spring semester, applications must be received by November 1.

To begin in the fall semester, applications must be received by May 1.

To begin in the summer semester, applications must be received by February 1.

Applicants interested in the City Management Fellowship must apply by the February 1 deadline and be prepared to begin full-time course work in the following Summer semester.

Campuses

Students can complete their M.P.A. degree by taking classes at the main campus in Lawrence or the Edwards Campus in Overland Park. MPA courses are also offered at the Leavenworth location to accommodate Fort Leavenworth and Kansas Northland students.

MPA Degree Requirements

The MPA degree is awarded after successful completion of 43 credit hours of course work. This includes 16 credit hours of required core courses (5 courses) that all students complete, 12 credit hours toward one School of Public Affairs and Administration graduate certificate (https://kupa.ku.edu/graduate-certificates) (4 courses), 12 hours of electives tailored to the student’s interests (4 courses), and an experiential learning requirement which can be completed as detailed below (1 course). In addition, all students must pass a written master's examination (final paper) to complete the requirements for the MPA degree. Once a student begins the program, all degree requirements must be completed within 7 years.

The MPA core provides students with knowledge and skills foundational to advanced educational and professional engagement in public affairs and administration fields. They provide an important underpinning for the MPA certificates and are transferable across a range of public service professions. The MPA core coursework includes the following courses (16 credit hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUAD 824</td>
<td>Creating Good Public Policy</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 835</td>
<td>Managing Public Money</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 836</td>
<td>Data Informed Decision-Making</td>
<td>4</td>
</tr>
<tr>
<td>PUAD 841</td>
<td>Context, Ethics and Legal Environment of Public Administration</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 845</td>
<td>Managing Public Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

To complete the MPA program, students will also take the following courses OR complete the City Management Fellows MPA program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 School of Public Affairs &amp; Administration graduate certificate</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>4 Electives of additional School of Public Affairs &amp; Administration course work or graduate course work outside the School chosen in consultation with the program advisor</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

Completion of 1 of the following experiential learning options:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUAD 898</td>
<td>Leading to Create a Culture for High Performance</td>
<td>3</td>
</tr>
<tr>
<td>or PUAD 892</td>
<td>Internship Experience in Local Government Administration</td>
<td></td>
</tr>
<tr>
<td>or PUAD 839</td>
<td>Topics in Public Administration:____</td>
<td></td>
</tr>
</tbody>
</table>

Alternatively, students may apply to the City Management Fellowship program (http://kupa.ku.edu/city-management-fellowship-0/). Admission
to this two-year fellowship is competitive—only a small cohort of fellows is selected each year. The key distinctive feature of the fellowship is its structure: the first year revolves around full-time, intensive coursework and the second year revolves around a full-time, paid internship.

Students admitted to the City Management Fellowship program complete the following credits, which include the courses toward the City/County Management graduate certificate (http://kupa.ku.edu/graduate-certificates/city-county-management/), to fulfill degree requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUAD 851</td>
<td>Infrastructure Management</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 892</td>
<td>Internship Experience in Local Government Administration</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 894</td>
<td>Professional Development Seminar I: Public Admin</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Contemporary Issues &amp; Competency Assessment</td>
<td></td>
</tr>
<tr>
<td>PUAD 895</td>
<td>Professional Development Seminar II: Leading</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>to Create a Culture for High Performance</td>
<td></td>
</tr>
<tr>
<td></td>
<td>(PUAD 895 will count as the experiential learning</td>
<td></td>
</tr>
<tr>
<td></td>
<td>course to fulfill that component of MPA degree</td>
<td></td>
</tr>
<tr>
<td></td>
<td>requirements.)</td>
<td></td>
</tr>
</tbody>
</table>

Electives of additional School of Public Affairs & Administration course work or graduate course work outside the School chosen in consultation with the program advisor. Within these courses, students must complete the requirements for the City/County Management graduate certificate.

**Master of Urban Planning**

Urban planning is a professional field that addresses the health, welfare, and sustainability of our cities, towns, regions, and natural and rural areas. Planners are problem-solvers. They deal with both short- and long-range planning projects at scales from small to large. Planners seek to enhance overall quality of life by addressing aspects of communities such as housing, land use, transportation, and responsible development that preserves the natural environment. The Master of Urban Planning is an accredited, professional degree that prepares students to excel in planning practice. It is the normal academic qualification for planning and planning-related positions. Graduates are prepared for careers in the public sector (local, state, national, international governments and agencies), private sector (consulting firms, development companies), and not-for profits (housing authorities, nonprofits) helping make communities better places.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to Urban Planning**

Complete information about applying to the Master of Urban Planning can be found on the program website. (https://spaa.ku.edu/master-urban-planning/) The following materials are required of all applicants to the Master of Urban Planning. Incomplete applications will not be forwarded to the admissions committee for review.

- A completed graduate application (https://gradapply.ku.edu/apply/) submitted online;
- An application fee
- A statement of the applicant’s career goals and substantive interests in urban planning and rationale for undertaking graduate study in urban planning at KU;
- 1 official transcript from applicant’s undergraduate institution and any post-graduate institutions attended;
- 3 letters of recommendation from persons qualified to comment on the applicant’s academic abilities and probable success in graduate study;
- A current resume;
- Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Applications are considered on a rolling basis. The final application deadlines are July 1 for fall and December 1 for spring admission. International applicants must apply by June 1 for fall and November 1 for spring admission.

Students who are interested in enrolling in master’s level coursework in urban planning without formal admission to the graduate program are encouraged to apply for graduate non-degree seeking student status.

**M.U.P. Degree Requirements**

All students must complete 42 credit hours, which normally involves 4 semesters of full-time study.* While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://policy.ku.edu/office/Graduate-Studies/) relevant to their student status and academic standing.

In addition to coursework, students must have the chance to synthesize and demonstrate what they have learned in their degree program. This can be done through either a Master's final exam (non-thesis option) or a thesis. The Master's final exam option is most common in the Urban Planning program as most graduates go on to become planning practitioners. Occasionally, students who decide they would like to pursue an academic career or wish to delve into one area of study complete the thesis option.

**Required Core Courses**

*An accelerated B.A.-M.U.P degree is also available. Please see the academic catalog (https://catalog.ku.edu/public-affairs-administration/amup/) for more information.

Specializations
The curriculum requires each student to specialize in one of the following substantive areas:

- Housing and development planning
- Sustainable land use planning
- Transportation planning

The student should declare a specialization by the third semester of their course of study.

Housing and Development Planning

<table>
<thead>
<tr>
<th>Code</th>

<td>3</td>
</tr>
<tr>
<td>UBPL 758</td>
<td>Transportation for Livable Cities</td>
<td>3</td>
</tr>
</tbody>
</table>

Other courses may be available with approval from the Urban Planning Director of Graduate Studies.

Total Hours 12

Elective Courses
In addition to core and specialization courses, students must take 6 additional elective credit hours outside their specialization. Any UBPL class can be taken as an elective. Graduate level classes taken outside of Urban Planning require the Urban Planning Director of Graduate Studies’ approval. Thesis option students complete the elective course requirement with 6 credit hours of UBPL 806.

Master’s Final Exam Project Option
The Master’s final examination is the main culminating experience before students graduate. The examination provides a learning experience that encourages the student to synthesize the knowledge gained through course work and tests the student’s competence as a generalist/specialist planner.

The examination consists of the student preparing a written response to a scenario or case study in which they are asked to synthesize knowledge gained in their course work and apply it within a particular context. The Urban Planning faculty committee appoints a 2-member Final Project committee for each student’s Final Project. The grading committee is selected from the full-time faculty in the Urban Planning Program.

One grader teaches at least one of the core courses and is outside the student’s specialization and the other grader teaches within the student’s specialization. The Final Project committee assesses and grades the exam with Honors, Pass, or Retake. Up to two retake attempts are permitted. The department will determine an appropriate minimum interval between exam attempts.

Master’s Final Exam Thesis Option
The thesis provides an opportunity for the student to apply individual research skills in the context of their interest. The thesis is a continuation of the student’s course of study rather than a separate academic effort. The format, medium, and focus of the thesis varies with the problem addressed. Students must enroll in a minimum of 6 credit hours of UBPL 806. A student desiring to prepare a thesis must develop, with the assistance of a faculty advisor, a thesis proposal to be submitted to the faculty thesis committee no later than the first day of classes of the semester before the semester in which the student plans to graduate. A committee’s approval is required before the student may pursue the thesis option. The 3-member thesis committee must meet the requisite configuration defined in the Master’s Student Oral Exam Committee Composition policy (https://policy.ku.edu/graduate-studies/masters-oral-exam-committee-composition/). A final general examination on the thesis and course work is held.

The final general examination is a thesis defense in front of the committee. Three faculty members assess and grade the exam with Honors, Pass, or Unsatisfactory. If the committee assesses the thesis defense as unsatisfactory, it may be repeated on the recommendation of the committee up to two times. In any case, the department will determine the appropriate minimum intervals between attempts.

M.U.P. Curriculum
A total of 42 semester hours is required. Students typically complete the degree within 2 years.

Accelerated Master of Urban Planning

Only current KU undergraduate students in the College of Liberal Arts & Sciences (CLAS) are eligible to apply to the Accelerated Master of Urban Planning. If you are not a current undergraduate student at KU, please consider the Master of Urban Planning.

The Accelerated Master of Urban Planning combines a College of Liberal Arts & Sciences undergraduate major and the Master of Urban Planning and is designed for students who have a passion for problem solving and helping communities engage with their futures. It allows well-qualified students to earn a bachelor’s and a master’s degree in five years, rather than the six years it would take to earn each degree separately. This program combines in-depth training in the major of the student’s choice with an accredited professional master’s degree in urban planning. Graduates are prepared for careers in the public, private and not-for profit sectors helping make communities better places.

Any CLAS undergraduate major is good preparation for an urban planning career because the profession is so wide-ranging in the skills required. Planners can be specialists (transportation, sustainable land use, or housing and development) or generalists working on how all these systems work together to create great places. Planners can be technical experts working with numbers or communicators building relationships or both. Get the undergraduate degree you have always wanted, then the career you probably did not know existed, but is right and meaningful for you.

Careful course selection and steady progression through the undergraduate major is necessary to ensure all requirements for both degrees are completed within the 5-year time frame. All prospective students should discuss their interest with the undergraduate advisor for the major of their choice and the Urban Planning Program director as soon as possible. A meeting with the Urban Planning Program director should take place no later than the student’s junior year to discuss possible admission to the accelerated master’s program.

The program maintains rolling admissions. Prospective students are eligible to apply to the graduate program as early as the second semester of their sophomore year or at any time during their junior year, but rolling admissions allows for applications at any time. The following requirements must be met by this time:

- On track to complete all requirements for a B.A., B.S., or B.G.S. degree in the CLAS degree of their choice from KU by the second semester of the senior year.

Students pursuing the accelerated master's degree are also strongly encouraged to take the following as preparatory courses* for the master’s curriculum:

- UBPL 200: Sustainability and Society – sophomore year
- UBPL 300: Planning the Sustainable City – junior year

*In some cases, it may be possible for these courses to substitute for major electives. Consult with your undergraduate advisor to determine if this is an option for your major.

Applicants must complete an application for graduate study online (https://gradapply.ku.edu/apply/). The following information should be gathered in advance and uploaded with the application:

- Statement of interest that succinctly summarizes the students' interests, education, their long-term career goals, and how the accelerated degree program will help them achieve those goals;
- A copy of the student’s advising report
- The names of three persons qualified to comment on the applicant’s academic abilities and probable success in graduate study. These individuals will be asked to provide a letter of recommendation. At least two should be faculty members who have had the student in class.

Upon review of the application for admission, the Urban Planning Program will notify the student of their eligibility to begin coursework in the program. Final acceptance to the Master of Urban Planning graduate program will be contingent upon the following:

- Successful completion of all requirements for the bachelor’s degree;
- Grades of B or above in all urban planning graduate-level coursework

Any student who does not meet this minimum grade requirement may continue in the program but must repeat any graduate course for which they did not earn a B or above. Students may also elect to earn only the bachelor’s degree and re-apply to the graduate program at a later time.

Curriculum

The M.U.P degree consists of core courses, specialization courses, elective courses, and a Master's degree final exam. While completing the following degree requirements, students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

The curriculum requires each student to specialize in one of the following substantive areas:

- Housing and development planning
- Sustainable land use planning
- Transportation planning

Prior to Conferral of the Bachelor’s Degree

Students must be approved to begin coursework toward the master’s before completing any 500 level or above coursework in Urban Planning that is to count toward the master’s degree. Once approved, the student must complete the following 18 credit hours of Urban Planning courses while still an undergraduate student:

<table>

Specialization (select 2 courses) See below for the specializations and which courses go with each specialization 6
Policy & planning course in specialization of choosing (UBPL 710, UBPL 720, UBPL 750)
Policy & planning course in another specialization of choosing (UBPL 710, UBPL 720, UBPL 750)
Techniques course in specialization of choosing (UBPL 715, UBPL 725, UBPL 756)

Note: Students must choose one specialization, but early on, they may not be sure of which one of the three specializations to choose. It is common for students to take two different policy & planning courses to try out the specializations and make a decision. The techniques course in the student’s chosen specialization can be taken at a later time if the student is undecided on a specialization as an undergraduate.

Total Hours 18

After Conferral of the Bachelor’s Degree

After the bachelor’s degree has been conferred, the student will complete a total of 24 post-baccalaureate graduate credit hours, consisting of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>UBPL 742</td>

<td>Climate Change and Hazards Planning</td>
<td>3</td>
</tr>
</tbody>
</table>

Specialization Techniques Course (if not taken while an undergraduate)(UBPL 715, UBPL 725, UBPL 756)

Two other specialization courses in the specialization of choice (UBPL 707, UBPL 716, UBPL 730, UBPL 735, UBPL 758, UBPL 764)

Electives 3-6

Any UBPL class can be taken as an elective. Graduate level classes taken outside of Urban Planning require UBPL Director of Graduate Studies approval.

If a student completed two policy & planning specialization courses while an undergraduate, the second policy & planning course counts as an elective. They must complete 3 additional hours of electives while a graduate student. If a student completed one policy & planning specialization course and the specialization techniques course while an undergraduate, they must complete 6 hours of electives while a graduate student.

Total Hours 24

Master of Urban Planning Electives:

Elective coursework can be selected from the department’s graduate course offerings focusing in the areas of housing, transportation, or sustainable land use. Additional detail of elective courses and completion requirements can be found on the MUP Degree Requirements page (https://catalog.ku.edu/public-affairs-administration/mup/#degreerequirements). Students are encouraged to consult the UBPL Program Director when choosing elective courses.

Master’s Final Exam

Students in the Accelerated Master’s must successfully pass a final exam. The examination provides a learning experience that encourages the student to synthesize the knowledge gained through course work and tests the student’s competence as a generalist/specialist planner. The examination consists of the student preparing a written response to a scenario or case study in which they are asked to synthesize knowledge gained in their course work and apply it within a particular context. Two Urban Planning faculty members assess and grade the exam with Honors, Pass, or Retake. Up to two retake attempts are permitted. The department will determine an appropriate minimum interval between exam attempts.

Progression Requirements

Each student’s progress will be monitored at various points during the program:

- Upon approval to begin coursework toward the accelerated masters, the student will meet with the UBPL Program Director to plan the graduate UBPL courses to be taken for elective undergraduate credit.
  Students should continue to work closely with their undergraduate advisor to ensure all requirements for the undergraduate degree(s) are met.
- In the final spring semester of undergraduate study (Year 4), the student will meet with the UBPL Program Director to review the student’s performance in UBPL courses. The student must earn a grade of “B” or better in these courses to be eligible for regular admission to the Master of Urban Planning degree.
- Following completion and award of the undergraduate degree (end of Year 4), the admitted student will again meet with the UBPL Program Director to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.25 for these courses. At this time, the student will meet with a faculty advisor who is overseeing that specialization to ensure the course plan is on track.
- For those students who do not meet the minimum GPA requirement of 3.25 in the first semester of Year 5 an alternative plan of study to address the student’s deficiencies may be developed, at the program’s sole discretion. Students may also be dismissed from the program.
- If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in courses for graduate credit toward the MUP degree until the baccalaureate degree has been conferred.

Students are encouraged to complete all requirements for the master’s degree within one year of receiving the bachelor’s degree to take full advantage of the accelerated format. If unforeseen circumstances prevent the timely completion of the master’s degree, the student should consult with their graduate advisor to develop an alternative plan for completion.
Accelerated Master of Urban Planning/BA in Environmental Studies

Only current KU undergraduate students are eligible to apply to the Accelerated Master of Urban Planning/B.A. in Environmental Studies. If you are not a current undergraduate student at KU, please review the admission requirements the Master of Urban Planning.

The Accelerated Master of Urban Planning/B.A. in Environmental Studies is designed for students who have a passion for sustaining both our natural and built environments. It allows well-qualified students to earn a bachelor’s and a master’s degree in five years, rather than the six years it would take to earn each degree separately. This program combines in-depth training in environmental studies and analysis with a professional degree in urban planning. Graduates are prepared for careers in environmental planning in the public, private and not-for profit sectors.

Only current KU undergraduate students are eligible to apply to the Accelerated Master of Urban Planning/B.A. in Environmental Studies. If you are not a current undergraduate student at KU, please review the admission requirements for the Master of Urban Planning.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time frame. All prospective students should discuss their interest with the undergraduate advisor for Environmental Studies and the Urban Planning Program director as soon as possible. A meeting with the Urban Planning Program director should take place no later than the student’s junior year to discuss possible admission to the accelerated master’s program.

Prospective students are eligible to apply to the graduate program in spring semester of their junior year. The following requirements must be met by this time:

• On track to complete all requirements for a B.A. or B.G.S. degree in Environmental Studies from KU by the spring semester of the senior year

Applicants must complete an application for graduate study online (https://gradapply.ku.edu/apply/). The following information should be gathered in advance and uploaded with the application:

• Statement of interest that succinctly summarizes the students’ interests, education, their long term career goals, and how the accelerated degree program will help them achieve those goals;
• A copy of the student’s advising report
• The names of three persons qualified to comment on the applicant’s academic abilities and probable success in graduate study. These individuals will be asked to provide a letter of recommendation. At least two should be faculty members who have had the student in class.

Upon review of the application for admission, the Urban Planning Program will notify the student of his or her eligibility to begin coursework in the program. Final acceptance to the Master of Urban Planning graduate program will be contingent upon the following:

• Successful completion of all requirements for the bachelor’s degree;
• Grades of B or above in all Urban Planning graduate-level coursework taken in year 4

Any student who does not meet this minimum grade requirement may continue in the program but must repeat any graduate course for which they did not earn a B or above. Students should still aim to complete all requirements by the end of year 5. Students may also elect to earn only the bachelor’s degree and re-apply to the graduate program at a later time.

This accelerated masters program uses a carefully planned combination of prerequisite coursework, graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. The student must be approved to begin coursework toward the master’s prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

Accelerated Master of Urban Planning/BA in Environmental Studies
Major Hours
Satisfied by 40 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Requirements for the Master’s Degree
The M.U.P degree consists of core courses, specialization courses, elective courses, courses and a Master’s degree final exam. While completing the following degree requirements, students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing. During the Senior Year (Year 4), the student must take the following Urban Planning graduate coursework, in addition to the Major Requirements noted above:

<table>

2010 Accelerated Master of Urban Planning/BA in Environmental Studies
Dual Master of Urban Planning and Master of Arts in American Studies

This program combines the two-year Master of Urban Planning degree and the two-year Master of Arts degree in American Studies into a two and half year program. This program is designed for students interested in careers in policy planning and research involving the arts, social planning, cultural activities and facilities, and historic preservation.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Dual M.A./M.U.P.

Students seeking admission to the dual degree must meet the admission requirements for both programs. Please see the American Studies (https://americanstudies.ku.edu/admission/) and Urban Planning (https://spaa.ku.edu/master-urban-planning-admissions/) websites for their respective admission requirements.

Eligibility criteria for admission follow Graduate Studies’ admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission, a student must hold a bachelor's degree.

Non-native speakers of English must meet Graduate Studies' English proficiency requirements (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

M.U.P. Degree Requirements

The M.U.P portion of the dual degree requires 36 credit hours. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

M.U.P. Required Core Courses

Total Hours 146-147

1 If MATH 365 is not selected, one of the electives in the plan must be switched to a BA Quantitative requirement.

2 For courses that satisfy this requirement, see the Degree Requirements tab.

M.U.P. Electives

Master of Urban Planning Electives:

Elective coursework can be selected from the department’s graduate course offerings focusing in the areas of housing, transportation, or sustainable land use. Additional detail of elective courses and completion requirements can be found on the MUP Degree Requirements page.
Students are encouraged to consult the UBPL Program Director when choosing elective courses.

**M.A. in American Studies Degree Requirements**

The American Studies M.A. portion of the dual degree requires 24 credit hours of course work and an oral defense of the master's thesis or article.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>AMS 803</td>
<td>Research Methods in American Studies</td>
<td></td>
</tr>
<tr>
<td>AMS 804</td>
<td>Research Seminar</td>
<td></td>
</tr>
</tbody>
</table>

**Electives in American Studies**

These courses, selected in consultation with the faculty advisor, will serve as the student's area of concentration, preparing them for their thesis or publishable article. Electives must have an AMS course number and must be taken at the 700-level or above.

**Thesis/Article Hours**

Students completing the dual degree program are required to defend either a thesis or publishable article in their final semester. After completing the AMS required course work, the student enrolls in AMS 899 until their thesis or publishable article is accepted by their committee. An oral defense of the thesis or article will serve as the M.A. examination.

**Total Hours**

24

**Thesis Option**

The thesis is an original piece of research and a contribution to the scholarly literature. It is smaller in scale than a doctoral dissertation and is not expected to have a comparable impact on the field. Theses typically range in length from 50 to 100 pages, divided into chapters, and are available to the public.

**Article Option**

The article option is intended for students who plan to extend their research project to the doctoral level or other continued professional activity. The article is an original piece of research and should be around 8,000 words in length. It should be written and formatted for submission to a scholarly, peer-reviewed journal relevant to the topic and approach of the research. The article does not have to be accepted for publication as a requirement for graduation.

**The Defense/M.A. Examination**

The student must complete an oral defense of either the article or the thesis. The final exam committee, chosen by the student, must have at least four members; at least two from the Urban Planning area and at least two from the American Studies area. Optimally, committee members should be provided a draft of the project at least one month prior to the defense date. A majority of the committee members must approve the defense with an assessment of Pass or Pass with Honors in order for the requirement to be met.

---

**Course Level Requirement**

Students pursuing a dual M.U.P. and M.A. in American Studies must take 50% or more of their coursework at the 700 level or above. Core courses and thesis hours (if applicable) count toward this requirement.

**Handbook**

Further details about meeting the degree requirements can be found in each department's Graduate Student Handbook. Students are also encouraged to review Graduate Studies' policies ([https://ogs.ku.edu/policies/](https://ogs.ku.edu/policies/)) related to master's degrees for information about other requirements that may apply.

*If a student decides to complete only the M.A. or M.U.P. and withdraw from the other program, they must complete all requirements for the stand-alone degree.*

**Master of Urban Planning and Master of Arts in Geography**

**Dual Degree for Master of Arts in Geography and Master of Urban Planning**

Urban planning is a professional field that addresses the health, welfare, and sustainability of our cities, towns, regions, natural, and rural areas. Planners are problem-solvers. They deal with both short- and long-range planning projects at scales from small to large. Planners seek to enhance overall quality of life by addressing aspects of communities such as housing, land use, transportation, and responsible development that preserves the natural environment. The Master of Urban Planning is an accredited, professional degree that prepares students to excel in planning practice. It is the normal academic qualification for planning and planning-related positions. Graduates are prepared for careers in the public sector (local, state, national, international governments and agencies), private sector (consulting firms, development companies), and not-for profits (housing authorities, nonprofits) helping make communities better places.

The Master of Arts in Geography program develops a concentration in urban planning. The student chooses to pursue either a thesis or publishable article for their final academic activity. The article is an accredited, professional degree that prepares students to excel in planning practice. It is the normal academic qualification for planning and planning-related positions. Graduates are prepared for careers in the public sector (local, state, national, international governments and agencies), private sector (consulting firms, development companies), and not-for profits (housing authorities, nonprofits) helping make communities better places.

The Master of Arts in Geography program develops a concentration in urban planning. The student chooses to pursue either a thesis or publishable article for their final academic activity. The article is an accredited, professional degree that prepares students to excel in planning practice. It is the normal academic qualification for planning and planning-related positions. Graduates are prepared for careers in the public sector (local, state, national, international governments and agencies), private sector (consulting firms, development companies), and not-for profits (housing authorities, nonprofits) helping make communities better places.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Admission

Dual Degree application for Master of Arts in Geography and Master of Urban Planning

Admission details, including required application materials for the M.A. in Geography (https://geog.ku.edu/admission/) and Master of Urban Planning (https://spaa.ku.edu/master-urban-planning-admissions/), can be found on their respective web pages. Entering students should submit separate applications to each program.

Applicants without prior training in Geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees.

Submit your graduate application online (https://gradapply.ku.edu/apply/).

M.U.P. Degree Requirements

The M.U.P. portion of the dual degree requires 36 credit hours. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://policy.ku.edu/office/Graduate-Studies/) relevant to their student status and academic standing.

M.U.P. Specializations

Master of Urban Planning Electives:

Elective coursework can be selected from the department’s graduate course offerings focusing in the areas of housing, transportation, or sustainable land use. Additional detail of elective courses and completion requirements can be found on the MUP Degree Requirements page. Students are encouraged to consult the UBPL Program Director when choosing elective courses.

M.A. in Geography Degree Requirements

The M.A. in Geography portion of the dual degree requires a minimum of 22 credit hours. A maximum of 6 credits of 500 and 600 level courses may be included in the program. If a 500 or 600 level course is taken to fulfill the required Techniques/Research Methods course, those credits will not count toward this maximum.

Elective coursework should be chosen in consultation with your advisor. For course options, please review the 500 level or above Geography courses listed in the academic catalog (https://catalog.ku.edu/liberal-arts-sciences/geography/#courseinventory).

Graduate Level coursework: 22-23

Proposal Defense

The proposal defense should happen when the faculty advisor and the student agree that they have made enough progress and are ready to present their proposal to the entire committee. The proposal defense involves a presentation and a line of questioning from all committee members. The committee must be in compliance with the Master’s Oral Exam Committee Composition policy. The chair of the committee must come from the Department of Geography and Atmospheric Science. At least one committee member must come from the Department of Urban Planning.

Two grades are possible for the proposal defense: “satisfactory” and “unsatisfactory”. If the student receives a grade of unsatisfactory, the defense may be repeated once on the recommendation of the advisory committee. If the student receives an unsatisfactory grade a second time, they will be recommended for dismissal from the program. A minimum of 90 days must pass before the defense may be redone.

Thesis Oral Defense

The student must complete an oral defense of their thesis. The committee will be made up of at least 3 members and will be in compliance with the Master’s Student Oral Exam Committee Composition policy. The chair of the committee must come from the Department of Geography and Atmospheric Science. At least one committee member must come from the Department of Urban Planning.

A majority of the committee members must approve the defense with an assessment of “satisfactory”, “unsatisfactory”, or “honors”. Students that fail the defense on their first attempt may repeat the defense at the recommendation of the degree program one more time. A minimum of 90 days must pass before the defense may be redone.
While completing degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://ogs.ku.edu/policies/) relevant to their student status and academic standing.

**Handbook for Graduate Students**

Detailed information on department regulations can be found in the Geography and Atmospheric Science Graduate Student Handbook.

**Master of Public Administration and Juris Doctor**

**M.P.A./J.D. Dual Degree Program**

The dual degree program is designed for the student who intends to combine career preparation in law and public administration. Examples of career objectives for this degree are the practice of law in communities (for example, a city attorney, who may be called upon to perform legal services for a municipality) and for city managers (who may need to deal with legal questions and interact with legal professionals). The program combines into 4 years the normal 3-year Juris Doctor (p. 734) program offered by the School of Law (http://www.law.ku.edu/) and the 2-year M.P.A. program offered by the School of Public Affairs and Administration (https://spaa.ku.edu/master-public-administration-mpa-admissions/).

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**M.P.A./JD Dual Degree Admission**

Applicants for the M.P.A./J.D. dual degree program will apply for the M.P.A. and J.D. separately. Please visit the M.P.A. Admissions page (https://spaa.ku.edu/master-public-administration-mpa-admissions/) for complete M.P.A. application and admission information.

For all applicants, a completed application includes:

1. Online Graduate Studies application. (https://gradapply.ku.edu/apply/)
2. A nonrefundable application fee, submitted online with the application form.
3. 1 official transcript from the degree-granting college or university and any post-graduate college or university attended.
4. 3 letters of recommendation. If possible, at least 1 should be an academic reference.
5. A 3- to 5-page essay describing your background and career goals and clearly indicating how the M.P.A. degree fits into those goals and addressing any deficiencies in your academic preparation.
6. A current résumé.
7. A writing sample that is at least 5 pages long. It should be a well-cited work in which you critically analyze (not just summarize) an issue.
8. Non-native speakers of English must meet Graduate Studies English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

**Deadlines**

Application deadlines are **February 1, May 1** and **November 1**.

**J.D./MPA Dual Degree Program**

Students must complete 115 total credit hours: 78 credit hours in the School of Law (42 required and 36 elective) and 37 credit hours in the School of Public Affairs and Administration (19 required and 18 elective). Students pursuing the dual degree should plan to enroll in course work for 2, and in some instances 3, summers.

The M.P.A. degree is awarded upon successful completion of credits required and the final written examination. The College of Liberal Arts and Sciences requires a minimum 3.0 cumulative GPA. Only courses completed with a grade of C or higher will count toward the M.P.A. degree. Please see the current Law School Catalog (https://catalog.ku.edu/law/jd/#requirementstext) and School of Law Dual Degree page (http://law.ku.edu/publicadministration/) for details and degree requirements.

**MPA Degree Requirements**

The Master of Public Administration (MPA) degree is awarded after successful completion of 43 credit hours of course work. This includes 19 hours (6 courses) of required core courses (including the student’s choice of an experiential learning course to serve as a final reflective course) that all students complete, 18 hours (6 courses) tailored to the student’s interests and/or track (fellow or MPA track), and 6 hours (2 courses) from the School of Law. Once a student begins the program, all core requirements must be completed within 7 years.

MPA track students will complete the required core courses and select a graduate certificate within the School of Public Affairs & Administration to complete the program. Graduate certificates only require 12 credits, so there is additional flexibility in elective content for MPA track students.

**Core Course Work**

The MPA core course work includes the following courses (19 credit hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUAD 824</td>
<td>Creating Good Public Policy</td>
<td>3</td>
</tr>
<tr>

<td>Managing Public Organizations</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 898 or PUAD 895</td>
<td>Leading to Create a Culture for High Performance Professional Development Seminar II: Leading to Create a Culture for High Performance</td>
<td>3</td>
</tr>
</tbody>
</table>

**Track Course Work**

Students may either apply for the MPA track or the City/County Management Fellows track to complete course work toward the MPA degree.
MPA track students will select a graduate certificate within the School of Public Affairs & Administration and additional elective coursework totaling 18 credit hours to complete the program. Graduate certificates only require 12 credits, so there is additional flexibility in elective content for MPA track students. Please see here for a list of SPAA Graduate Certificates (https://kupa.ku.edu/graduate-certificates/).

City/County Management Fellows will take the following courses to complete City/County Management graduate certificate (https://kupa.ku.edu/graduate-certificates/) within their dual degree program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

<td>Professional Development Seminar I: Public Admin Contemporary Issues &amp; Competency Assessment</td>
<td>3</td>
</tr>
</tbody>
</table>

Final Exam
All students must pass a written master’s examination (final paper) to complete the requirements for the MPA degree.

Master of Public Administration and Master of Urban Planning

M.P.A./M.U.P. Combined Program

This program is designed for the student with career goals that center on assuming administrative and management responsibilities in urban planning and urban affairs. It combines into 3 years (excluding the 1-year internship required for the M.P.A. City and County Management Fellows curriculum) the normal course work required for the 2-year Master of Urban Planning (https://spaa.ku.edu/master-urban-planning-admissions/) degree and the 2-year Master of Public Administration (https://spaa.ku.edu/master-public-administration-mpa-admissions/) degree. The program offers students experience not only in public policy management, but also in management with particular expertise in urban problem resolution.

A student must meet admission requirements of both programs, but only needs to submit one application. The M.P.A./M.U.P. dual degree program is open to those who have earned baccalaureate degrees and whose undergraduate academic records indicate that they have the capacity to complete these graduate programs.

Contact the School of Public Affairs and Administration (https://spaa.ku.edu/how-apply-dual-degrees/) for more information.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

M.P.A./M.U.P. Admission

Please visit the School of Public Affairs & Administration M.P.A. / M.U.P. dual degree page (https://spaa.ku.edu/how-apply-dual-degrees/) for complete admissions information.

For all applicants, a completed application includes:

1. Online Graduate Studies application (https://gradapply.ku.edu/apply/)
2. A nonrefundable application fee, submitted online with the application form.
3. 1 official transcript from the degree-granting college or university and any post-graduate college or university attended.
4. 3 letters of recommendation. If possible, at least 1 should be an academic reference.
5. A 3 to 5 page describing your background and career goals and clearly indicating how the M.P.A./M.U.P. dual degree fits into those goals and addressing any deficiencies in your academic preparation.
6. A current résumé.
7. A writing sample that is at least 5 pages long. It should be a well-cited work in which you critically analyze (not just summarize) an issue.
8. Non-native speakers of English must meet Graduate Studies English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Deadlines

Application deadlines are February 1 and May 1.

This program combines into 73 credit hours the normal course work required for the Master of Urban Planning (42 credit hours) and the Master of Public Administration (43 credit hours) by requiring 37 credit hours for the MPA and 36 credit hours for the M.U.P. A student pursuing the degrees separately would require four years of course work. The dual degree requires three years of full-time enrollment to complete, including summers. Admission to the dual degree is only available for Summer and Fall semesters. Students in the dual degree program will not be eligible for the Urban Planning graduate certificate in addition to the credentials earned for the dual degree but may pursue another School of Public Affairs & Administration graduate certificate as elective scheduling concurrent to required MPA and MUP course work allows.

While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies (https://policy.ku.edu/graduate-studies/) relevant to their student status and academic standing.

MPA Curriculum

MPA Core Course Requirements

The MPA core provides students with knowledge and skills foundational to advanced educational and professional engagement in public affairs and administration fields. They provide an important underpinning for the MPA certificates and are transferable across a range of public service professions.

Total Hours 24

M.U.P. Electives

Elective coursework can be selected from the department’s graduate course offerings focusing in the areas of housing, transportation, or sustainable land use. Additional detail of elective courses and completion requirements can be found on the MUP Degree Requirements page. Students are encouraged to consult the UBPL Program Director when choosing elective courses.

M.U.P. Final Exam

The Master’s final exam is the main culminating experience before students graduate. The examination provides a learning experience that encourages the student to synthesize the knowledge gained through course work and tests the student’s competence as a generalist/specialist planner.

The examination consists of the student responding to a scenario or case study in which they are asked to synthesize knowledge gained in their course work and apply it within a particular context. Two Urban Planning faculty members assess and grade the exam with Honors, Pass, or Retake. Up to two retake attempts are permitted. The department will determine an appropriate minimum interval between exam attempts.

Doctor of Philosophy in Public Administration

The mission of the Ph.D. program in the KU School of Public Affairs and Administration is to provide advanced graduate education in theory and research in order to prepare students for academic and research careers in public administration, as well as professional careers in advanced practice of public administration. Doctoral students in public administration complete seminars and independent research courses to build competency in public administration history, theory, methodology, discipline specialization, and complementary cognate field in preparation for degree milestones and future contributions to the academy.

The Public Administration Ph.D. program (https://spaa.ku.edu/phd-program/) prepares researchers to enter academia or pursue careers that involve cutting-edge and innovative research in public affairs, policy, planning, and management/governance.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of...
Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Ph.D. Admission**

Successful Ph.D. applicants are clear about their research interests and why the School of Public Affairs and Administration is the best place to pursue their research.

Admission to the PhD program is based on the applicants:

• Complete online application (https://gograd.ku.edu/apply/)
• Official Transcripts
• Resume/CV
• Statement of research Interests
• Writing Sample
• Letter of reference
• Standardized test scores (GRE and Proof of English Proficiency)

Please visit the Public Administration Ph.D. Admissions page (https://spaa.ku.edu/phd-how-apply/) for complete admissions information.

**Ph.D. Degree Requirements**

The Ph.D. requires a minimum of 75 credit hours, including 66 credit hours of courses and 9 or more hours of dissertation credit. Students may count up to 30 hours of credit earned toward an MPA degree, or equivalent, toward the required 66 hours. Students who enter the doctoral program without a conferred MPA or its equivalent must complete all MPA core courses in the School of Public Affairs & Administration (SPAA) or the comparable 900-level doctoral courses, except they may choose to take either PUAD 835 Managing Public Money or PUAD 837 Advanced Public Budgeting and Finance.

The requirements for the Ph.D. are based on formal course work and independent study in several fields:

• Foundations of Public Administration
• Public Administration Specialization
• Cognate Field
• Methods Sequence

While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

**Foundations of Public Administration**

4 of the 5 courses listed below are required of all doctoral students.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUAD 930</td>
<td>Research Seminar in Public Administration and Democracy</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 931</td>
<td>Research Seminar in Public Management</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 932</td>
<td>Seminar in the Intellectual History of Public Administration</td>
<td>3</td>
</tr>
</tbody>
</table>

Substitutions require the approval of the Director of Graduate Studies.

**Public Administration Specialization**

In consultation with the Director of Graduate Studies, each student must develop and declare a public administration specialization of at least 3 courses, which may be satisfied in part by directed readings credit hours. Common specializations include public management and organization theory, budgeting and finance, human resources management, public policy analysis and evaluation, public values and ethics, public law and administration, and urban policy/politics. Other areas of specialization may be created in consultation with faculty.

**Cognate Field**

The Ph.D. degree requires a cognate field in addition to the public administration specialization. The cognate field is a subfield similar to a "minor" and courses typically are taken outside the School. Examples include economics, political science, education, or a policy specialization (e.g., environmental policy or transportation policy.) The cognate field’s sequence of 3 courses requires the approval of the Director of Graduate Studies and does not require a comprehensive examination.

**Methods Sequence**

The doctorate emphasizes the development of research skills. It requires PUAD 934 Research Methods in Public Administration, with the prerequisite PUAD 836 Data Informed Decision-Making or its equivalent, and PUAD 935 Advanced Quantitative Methods for Public Administration. Students also are encouraged to take PUAD 937 Qualitative Methods in Public Administration and PUAD 936 Policy Analysis and Program Evaluation. Substitutions require the approval of the Director of Graduate Studies. These requirements are the minimum, and students are encouraged to develop advanced skills in research methods and analysis.

**Research Skills & Responsible Scholarship**

Completion of the Methods Sequence requirement satisfies the Office of Graduate Studies’ Research Skills and Responsible Scholarship requirement.

**Public Administration Ph.D. Foundations and Specialization Exams**

After the completion of the required coursework, the student must pass two Written Comprehensive Examinations: one in the area of Foundations of Public Administration, and the other in the student’s Public Administration Specialization. If the student receives a grade of unsatisfactory on either Written Comprehensive Examination, the examination may be repeated once at which time the student will be required to retake the entire examination. Under no circumstances may the student seek to fulfill the requirement to pass a Written Comprehensive Examination in a specialization area other than the area in which he or she failed to pass the examination on the first attempt. Failure to pass either Written Comprehensive Examination within two attempts shall constitute failure to satisfy a requirement for the Ph.D. degree, and shall result in dismissal from the program.

**Comprehensive Oral Exam**

After passing both written exams, to become a Ph.D. candidate, the student must then pass a Comprehensive Oral Examination that includes
Graduate Certificate in City and County Management

Local government is increasingly being described as the level of government “where things get done!” This certificate is designed for those who are interested in a career in local government organizations (cities and counties) or in non-profit or private sector organizations that collaborate or serve local governments. It offers broad coverage of the leadership and management skills that local government professionals need as well as more in-depth instruction on key issues facing modern communities.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission

The School of Public Affairs & Administration (SPAA) accepts students on a rolling admissions basis. Students may apply to be admitted for either the fall, summer or spring semesters. Applicants for the certificate are required to meet the following program requirements:

• An undergraduate degree with a GPA of 3.0 (if the undergraduate degree was awarded in the last three years);
• at least three years of managerial experience or be already admitted to any graduate programs of KU or already have a graduate management or leadership degree from an accredited institution; and
• the University requirement that Non-native speakers of English meet Graduate Studies English proficiency (https://gradapply.ku.edu/english-requirements/).

Current graduate students who wish to earn a graduate certificate credential in any of the SPAA certificates must submit a graduate application for the specific certificate program (https://gradapply.ku.edu/apply/) no later than enrollment in the final course that will count toward the certificate.

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

• A current resume.
• A statement of interest in the graduate certificate program. This 1-2 page narrative should summarize your education, employment history, career goals, and how this certificate will bolster your professional aspirations.
• Official transcripts of baccalaureate degree/s and any post-baccalaureate course work.

The admissions committee may request additional materials if needed to assess an applicant’s ability to be successful in the coursework.

More information about admission and program requirements is available on the SPAA Graduate Certificate page (https://spaa.ku.edu/graduate-certificates/).

Certificate Requirements

The certificate is comprised of 4 courses for a total of 12 graduate credit hours. Other courses may be substituted with approval of the MPA Faculty Director. Students who wish to pursue both the City and County Management and Public and Nonprofit Management graduate certificates must seek approval from the MPA Faculty Director. PUAD 834 will count toward both certificates, but the student must take one additional elective to meet the 12 credit-hour completion requirement for each. Otherwise, Student pursuing more than one SPAA certificate may use a maximum of one course to count towards both certificates. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

1 course from the following or another department-approved course:
Graduate Certificate in Law & Society

Through the completion of this certificate, students will gain in-depth knowledge of how law intersects with and influences the practice of public administration and public policy-making and implementation. Students will learn how public administrators can work more effectively with knowledge of legal history and legal policy, how law shapes managerial processes, how it shapes government and the system of justice, and how it affects ordinary people in every walk of life. The knowledge gained through the courses in the Law and Society Certificate will prepare students for work in a variety of settings, including criminal justice organizations, non-profits, policy think tanks, political institutions, and public administrative agencies of all kinds. While all students are welcome to apply, this graduate certificate’s course work is only offered at the Edwards Campus.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The Law & Society graduate certificate is undergoing discontinuance and is no longer admitting students.

The School of Public Affairs & Administration (SPAA) accepts students on a rolling admissions basis. Students may apply to be admitted for either the fall, summer or spring semesters. Applicants for the certificate are required to meet the following program requirements:

- An undergraduate degree with a GPA of 3.0 (if the undergraduate degree was awarded in the last three years);
- at least three years of managerial experience or be already admitted to any graduate programs of KU or already have a graduate management or leadership degree from an accredited institution; and
- the University requirement that Non-native speakers of English meet Graduate Studies English proficiency (https://gradapply.ku.edu/english-requirements/).

Current graduate students who wish to earn a graduate certificate credential in any of the SPAA certificates must submit a graduate application for the specific certificate program (https://gradapply.ku.edu/apply/) no later than enrollment in the final course that will count toward the certificate.

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

- A current resume.
- A statement of interest in the graduate certificate program. This 1-2 page narrative should summarize your education, employment history, career goals, and how this certificate will bolster your professional aspirations.
- Official transcripts of baccalaureate degree/s and any post-baccalaureate course work.

The admissions committee may request additional materials if needed to assess an applicant’s ability to be successful in the coursework.

Certificate Requirements

The certificate requires 4 courses for a total of 12 graduate credit hours. Other courses may be substituted with the approval of the MPA Faculty Director. Student pursuing more than one SPAA certificate may use a maximum of one course to count towards both certificates.

Graduate Certificate in Performance Management

Effectiveness, efficiency, public accountability, and the better alignment of resources and managerial actions with organizational mission are key goals of public and nonprofit management. This certificate is designed for those individuals who wish to develop skill sets in managing performance and in fostering innovative changes to deliver greater value to the public. Managerial strategies, organizational change management, governance thinking, and quantitative analysis are emphasized in the coursework.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission

The School of Public Affairs & Administration (SPAA) accepts students on a rolling admissions basis. Students may apply to be admitted for either the fall, summer or spring semesters. Applicants for the certificate are required to meet the following program requirements:

- An undergraduate degree with a GPA of 3.0 (if the undergraduate degree was awarded in the last three years);
• at least three years of managerial experience or be already admitted to any graduate programs of KU or already have a graduate management or leadership degree from an accredited institution; and
• the University requirement that Non-native speakers of English meet Graduate Studies English proficiency (https://gradapply.ku.edu/english-requirements/).

Current graduate students who wish to earn a graduate certificate credential in any of the SPAA certificates must submit a graduate application for the specific certificate program (https://gradapply.ku.edu/apply/) no later than enrollment in the final course that will count toward the certificate.

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:
• A current resume.
• A statement of interest in the graduate certificate program. This 1-2 page narrative should summarize your education, employment history, career goals, and how this certificate will bolster your professional aspirations.
• Official transcripts of baccalaureate degree/s and any post-baccalaureate course work.

The admissions committee may request additional materials if needed to assess an applicant’s ability to be successful in the coursework.

More information about admission and program requirements is available on the SPAA Graduate Certificate page (https://spaa.ku.edu/graduate-certificates/).

Certificate Requirements

The certificate requires 4 courses for a total of 12 graduate credit hours. Other courses may be substituted with the approval of the MPA Faculty Director. Student pursuing more than one SPAA certificate may use a maximum of one course to count towards both certificates. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

Total Hours 15

Graduate Certificate in Public / Nonprofit Management

This certificate aims to enhance graduates’ ability to manage and lead public and nonprofit organizations ethically and effectively. It establishes effective human resource management as a core foundation, with emphasis on the political, legal, and ethical dimensions of public service employment. Through study of management theories and techniques, students will gain understanding of contemporary organizational challenges and the tensions inherent to competing values and develop the leadership skills necessary to guide public organizations through change. Through their choice of electives, students may tailor this certificate to focus more specifically on the nonprofit or public sector.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The School of Public Affairs & Administration (SPAA) accepts students on a rolling admissions basis. Students may apply to be admitted for either the fall, summer or spring semesters. Applicants for the certificate are required to meet the following program requirements:
• An undergraduate degree with a GPA of 3.0 (if the undergraduate degree was awarded in the last three years);
• at least three years of managerial experience or be already admitted to any graduate programs of KU or already have a graduate management or leadership degree from an accredited institution; and
• the University requirement that Non-native speakers of English meet Graduate Studies English proficiency (https://gradapply.ku.edu/english-requirements/).

Current graduate students who wish to earn a graduate certificate credential in any of the SPAA certificates must submit a graduate application for the specific certificate program (https://gradapply.ku.edu/apply/) no later than enrollment in the final course that will count toward the certificate.

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:
• A current resume.
• A statement of interest in the graduate certificate program. This 1-2 page narrative should summarize your education, employment history, career goals, and how this certificate will bolster your professional aspirations.
• Official transcripts of baccalaureate degree/s and any post-baccalaureate course work.

The admissions committee may request additional materials if needed to assess an applicant’s ability to be successful in the coursework.

More information about admission and program requirements is available on the SPAA Graduate Certificate page (https://spaa.ku.edu/graduate-certificates/).

Certificate Requirements

The certificate requires 4 courses for a total of 12 graduate credit hours. Other courses may be substituted with the approval of the MPA Faculty Director. Students who wish to pursue both the City and County Management and Public and Nonprofit Management graduate certificates
must seek approval from the MPA Faculty Director. PUAD 834 will count toward both certificates, but the student must take one additional elective to meet the 12 credit-hour completion requirement for each. Otherwise, Student pursuing more than one SPAA certificate may use a maximum of one course to count towards both certificates. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

Current graduate students who wish to earn a graduate certificate credential in any of the SPAA certificates must submit a graduate application for the specific certificate program (https://gradapply.ku.edu/apply/) no later than enrollment in the final course that will count toward the certificate.

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

- A current resume.
- A statement of interest in the graduate certificate program. This 1-2 page narrative should summarize your education, employment history, career goals, and how this certificate will bolster your professional aspirations.
- Official transcripts of baccalaureate degree/s and any post-baccalaureate course work.

The admissions committee may request additional materials if needed to assess an applicant’s ability to be successful in the coursework.

More information about SPAA graduate certificates can be found on the SPAA Graduate Certificates pages.

### Certificate Requirements

The certificate requires 4 courses for a total of 12 graduate credit hours. Other courses may be substituted with the approval of the MPA Faculty Director. Student pursuing more than one SPAA certificate may use a maximum of one course to count towards both certificates. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

| PUAD 857 | Performance Management and Governance | 3 |

### Graduate Certificate in Public Policy

Public policy shapes the behavior of individuals, organizations, and corporations and affects almost every aspect of society. The ability to develop “good” public policy requires both a strong analytical base and political astuteness. The required courses in the certificate establish a contextual and analytical foundation, equipping students with the ability to both prospectively assess and retrospectively evaluate public initiatives. Electives enable additional exploration of particular policy areas.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The School of Public Affairs & Administration (SPAA) accepts students on a rolling admissions basis. Students may apply to be admitted for either the fall, summer or spring semesters. Applicants for the certificate are required to meet the following program requirements:

- An undergraduate degree with a GPA of 3.0 (if the undergraduate degree was awarded in the last three years);
- at least three years of managerial experience or be already admitted to any graduate programs of KU or already have a graduate management or leadership degree from an accredited institution; and
- the University requirement that Non-native speakers of English meet Graduate Studies English proficiency (https://gradapply.ku.edu/english-requirements/?).
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Medical Center Campus Interdisciplinary Studies

The School of Nursing on the KU Medical Center campus offers interprofessional programs. Please see the specific catalog section for detailed information about the programs.

Master of Science in Health Informatics (p. 2025)
Health Informatics Graduate Certificate (p. 2028)
Health Professions Educator, Graduate Certificate (https://catalog.ku.edu/nursing/certificates/healthprofessionseducator/)

Nursing (Graduate) Courses

IPHI 820. Program, Project, and Communication Planning. 2 Credits.
Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed.

IPHI 850. Introduction to Health Informatics. 2 Credits.
This course provides a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices.

IPHI 851. Transforming Health Care through Use of Information Systems and Technology. 3 Credits.
The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will be explored for their impact on patient care and safety. The role of legal, regulatory, ethical, and security issues will be discussed as they apply to clinical and consumer information technologies. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

IPHI 852. Health Data Theory and Practice. 3 Credits.
Data science concepts and database theory as related to healthcare settings will be introduced. Simple database modeling, design, and manipulation will be explored using a database management system and a query language. Key data science methods, such as data wrangling and visualization, will be leveraged for decision making. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

IPHI 853. Abstraction and Modeling of Healthcare Information. 3 Credits.
The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified healthcare information requirements. Object-oriented techniques, such as Unified Modeling Language and Unified Modeling Methodology, will be introduced to facilitate process analysis and design proposal development. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum. It is recommended that students take IPHI 820 prior to this course.

IPHI 854. Knowledge Management in Health Care. 3 Credits.
Knowledge management is the creation, communication, and leveraging of a healthcare organization's knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge workers and their impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach to support a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum. It is recommended that students take IPHI 820 prior to this course.

IPHI 856. Health Informatics Practicum. 1-3 Credits.
In collaboration with health informatics faculty and preceptors, students design an experience to facilitate the application of theories and research related to health informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: IPHI 850, 851, 852, 853, 854, leadership electives, and focus area electives, or consent of instructor.

IPHI 858. Health Informatics Practicum: Pharmacy. 4 Credits.
In collaboration with health informatics faculty and preceptors, students design an experience to facilitate application of theories and research related to health informatics in a pharmacy setting. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. This course is only open to students enrolled in the dual PharmD and Health Informatics programs. Prerequisite: IPHI 850, 851, 852, 853, 854 and focus area electives, or consent of instructor.

IPHI 860. Health Informatics Scholarly Project. 2 Credits.
This research or evidence-based project course is designed for students to apply knowledge from their coursework. Students will work with a faculty mentor on components of a research, quality improvement, or evidence-based practice project. The student will create a scholarly document. Prerequisite: A research course and two informatics courses, or consent of instructor.

IPHI 861. Introduction to Telehealth Policy and Practice. 3 Credits.
Course focus is on telehealth concepts and skills development with emphasis on historical aspects, priority areas, an introduction to policy, and equitable access to care. #Evolving telehealth services including teledicine, e-health, mobile health, and telemonitoring are introduced. This course aligns with the accreditation competencies set by health professions, population health and clinical practice programs, and telehealth best practices established by state and national agencies and experts in the field.

IPHI 862. Developing Telehealth Programs. 3 Credits.
Course focus is on telehealth concepts and skills development with emphasis on needs assessment frameworks, service delivery models, financial models, and process flows. Evaluation and quality improvement models are introduced and applied to aid in planning, training, and preparing staff and the patient for telehealth services. Policy and reimbursement guidelines will be used throughout to determine service types and plan for sustainability. This course aligns with the accreditation competencies set by health professions, population health and clinical practice programs, and telehealth best practices established by state and national agencies and experts in the field. Prerequisite: IPHI 861: Introduction to Telehealth Policy and Practice or consent of instructor.
IPHI 863. Applications of Telehealth Methods and Models. 3 Credits.
Course focus is on telehealth concepts and skills development with emphasis on best practices for building a telehealth program. Program improvement and sustainability concepts will be applied to address current service needs, adapt to future practice, and identify gaps to ensure equitable access to telehealth services. This course aligns with the accreditation competencies set by health professions, population health and clinical practice programs, and telehealth best practices established by state and national agencies and experts in the field. Prerequisite: IPHI 861-Introduction to Telehealth Policy & Practice and IPHI 862-Developing Telehealth Programs or consent of instructor.

IPHI 957. Health Informatics, Human Factors, and Ergonomics as Applied to Patient Safety. 3 Credits.
The use of information systems including medical devices is paramount in achieving patient safety. Students will attain an inclusive understanding of how human factors and ergonomic principles can be used to improve patient safety in the design, implementation, and evaluation of information systems and medical devices. Additionally, healthcare professionals will acquire skills to appropriately apply error reduction strategies developed in high reliability organizations. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

IPHI 958. Knowledge Representation and Interoperability. 3 Credits.
The need to exchange clinical information consistently between healthcare providers, care settings, researchers, and others requires syntactic and semantic interoperability. Requirements and approaches to meet interoperability will be explored. Standards for messaging, terminology, and knowledge representation will be investigated. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

Graduate Studies Medical Ctr Courses

GSMC 50. Science Special Studies. 0 Credits.
The aim of this course is to teach the methodologies and skills required for conducting biomedical science research, or practice in a clinical setting. The learning experience will be tailored to individual needs with personalized instruction for the opportunity to learn new skills and competencies, or exposure to new research developments or clinical practice. Progress of the student will be monitored through weekly laboratory meetings with members of the research lab or weekly contact with the student and/or clinical instructor in the clinical setting. The students will self-assess their progress and receive constructive feedback from appropriate individuals in the lab or clinical setting. Prerequisite: Permission of instructor in the Office of International Programs.

GSMC 99. Postdoctoral Studies. 0 Credits.
Postdoctoral Studies

GSMC 501. Foundations of Interprofessional Collaboration I: Introduction to Interprofessional Collaboration. 0 Credits.
This course will introduce interprofessional students to the basic concepts of interprofessional collaboration including values and ethics, roles and responsibilities of healthcare team members, and interprofessional communication tools using the evidence-based national curriculum of TeamSTEPPS.

GSMC 502. Foundations of Interprofessional Collaboration II: Application Interprofessional Collaboration. 0 Credits.
This course will provide interprofessional students' opportunities to apply key knowledge and skills gained in FIPC I, through role-plays and case-based learning. Students will apply their knowledge of roles and responsibilities of healthcare team members and interprofessional communication tools and continue learning with, from, and about students from other professions.

GSMC 503. Foundations of Interprofessional Collaboration III: Demonstration Interprofessional Collaboration. 0 Credits.
This course will provide interprofessional students' opportunities to demonstrate key knowledge and skills gained in FIPC I and II, through simulation. Students will demonstrate their interprofessional communication skills, including specific opportunities to utilize TeamSTEPPS tools. Students will also demonstrate their teamwork abilities by working with interprofessional students during the simulation.

GSMC 803. Introduction to Clinical Research. 1 Credits.
Course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at the University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Prerequisite: Consent of Instructor.

GSMC 840. CLINICAL OBSERVATION IN HEALTH CARE FOR BIOENGINEERS. 3 Credits.
This course requires a 6 hour time commitment each week over the semester. During each weekly session the student will observe various medical practitioners in specific health care environments. The course gives the bioengineer an opportunity to see the inside of medical practice and exposes students to medical questions and challenges that could provide opportunities for engineers to contribute to the improvement of medical practice. Each student must select a concentration for this course from a health care specialty depending on availability. Some specialty options might include: Orthopedic, Radiology, Cardiology, Physical Therapy, etc. Grading will be pass/fail based on participation and journal keeping. Prerequisite: Graduate engineering standing, Consent of instructor.

GSMC 850. Proteins and Metabolism. 2 Credits.
This course is the first of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of metabolism, protein structure and an introduction to nucleic acids. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 852 (Introduction to Biomedical Research).

GSMC 851. Molecular Genetics. 2 Credits.
This course is the second of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of molecular genetics, DNA replication, DNA repair, transcription and translation. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 852 (Introduction to Biomedical Research).

GSMC 852. Introduction to Biomedical Research I. 2 Credits.
This is the first semester of a one year series in the Interdisciplinary Graduate Program in the Biomedical Sciences. The course is composed of weekly meetings to discuss research problems, methods and current literature. The course will interface with the lectures and students will
learn to critically evaluate our scientific knowledge base. The students will be introduced to the tools that are available to obtain and evaluate information. The students will be challenged to identify areas of our scientific knowledge that require further experimentation and clarification. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 850 (Proteins and Metabolism) and GSMC 851 (Molecular Genetics).

GSMC 853. Cellular Structure. 2 Credits.
This course is the third of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of cellular structure and function. Topics include the lipid bilayer, membrane proteins, and cellular organelles. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 855 (Introduction to Biomedical Research).

GSMC 854. Cell Communication. 2 Credits.
This course is the fourth of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of cell communication. Topics include G-protein-coupled signaling, cellular cytoskeleton; cell cycle control; cell death; extracellular matrix; and cancer. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 855 (Introduction to Biomedical Research).

GSMC 855. Introduction to Biomedical Research II. 2 Credits.
This is the second semester of a one year series in the Interdisciplinary Graduate Program in the Biomedical Sciences. The course is composed of weekly meetings to discuss research problems, methods and current literature. The course will interface with the lectures and students will learn to critically evaluate our scientific knowledge base. The students will be introduced to the tools that are available to obtain and evaluate information. The students will be challenged to identify areas of our scientific knowledge that require further experimentation and clarification. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 853 (Cellular Structure) and GSMC 854 (Cell Communication).

GSMC 856. Introduction to Research Ethics. 1 Credits.
The objective of this course is to introduce students to research ethics. Students will learn and discuss some of the following areas of ethics in research: 1) sources of errors in science, 2) Scientific Fraud, 3) plagiarism and misrepresentation, 4) conflicts of interest, and 5) confidentiality. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences.

GSMC 857. Biographies. 1 Credits.
The objective of the course is to teach students how to organize and present data in a clear and concise manner at national meetings. Students are taught basic principles of organizing data for presentation and then learn through the actual presentation of data in simulated platform sessions held in the course. Videotapes are made of the presentations, and students are then given a constructive critique of their presentation by the instructor and fellow students. Prerequisite: Permission of instructors. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences.

GSMC 858. Introduction to Faculty Research. 1 Credits.
This course was created to provide students with sufficient introduction to the research conducted at KUMC. To facilitate this point, the course is designed as a seminar series. In each session of the series, three faculty members present a brief 20-minute overview of their research programs. The series will help students to select faculty for research rotations and ultimately help them determine which faculty member they will select as a research adviser for their doctoral research. Prerequisite: Permission of instructors. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences.

GSMC 859. Research Rotations. 1-4 Credits.
The course will introduce students to research methods, experimental design, and the types of biomedical research conducted at KUMC. The first research rotation begins halfway through the first semester; the second and third research rotations will occur in the second semester. It is designed to help students determine which faculty member they will select as a research adviser for their doctoral research. Prerequisite: Permission of instructors. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences.

GSMC 860. Introduction to Molecular Medicine. 1 Credits.
Introduction to Molecular Medicine (1 credit hour/semester) is a two semester course, taught every fall and spring semester, primarily for first year MD-PhD students. This course is taught by the Director of the MD-PhD Program, with contributions from other faculty from the basic science and clinical departments. Through lectures, small group discussion, evaluation of primary literature, analysis of scientific data and presentations/discussions with current KUMC faculty, students will be introduced to the process of investigating the molecular and cellular derangements that underlie human disease. Order of topics mirror, to some extent, the subjects of the first-year modules. There will be particular emphasis on the diverse research methods and models systems used to investigate the molecular basis of disease and understanding how such investigations can be translated to answer clinically relevant questions. Students are evaluated by both group activity and individual preparation and participation. Prerequisite: Enrollment in the MD-PhD Program or Permission of Instructor.

GSMC 987. Experiential Learning in the Biomedical Sciences. 1-6 Credits.
Four to 16 weeks of experiential learning in a relevant biomedical setting outside of KUMC. Students must identify an outside learning experience and prepare a detailed outline of their activities. The outline must be approved by the instructor prior to enrollment. The goal of the class is to enable students to enhance their research opportunities by expanding their experiences. Examples of outside opportunities are: industry; clinical facilities; non-profit foundations; government programs (NIH, CDC, KBOR, KDHE). Prerequisite: Permission of Instructor, Mentor and Program.

Master of Science in Health Informatics

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health informatics, special skills will be acquired in organizational change, project management and impact evaluation.
This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html), which is sponsored by the School of Nursing.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Science in Health Informatics (https://www.kumc.edu/research/center-for-health-informatics/academics/master-of-science-in-health-informatics.html) website.

**Admission requirements:**

- A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).
- A current resume or curriculum vitae.
- A personal essay outlining the applicant’s reasons for wanting to pursue graduate education in health informatics, career objectives, and any other information that would help the admissions committee get to know the applicant.
- Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A background check (https://www.kumc.edu/academic-and-student-affairs/student-resources/criminal-background-checks-for-students.html) is required during the admission process; it may affect the student’s eligibility to enter the program.
- A graduate level statistics course (may be completed prior to admission or during the first semester of enrollment.)

After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

**International Students**

Due to the number of required online courses for this degree, the Health Informatics Program at KUMC does not meet the U.S. student visa requirements at this time. Therefore, we are unable to accept individuals who are on student visas. If you are in the U.S. on another type of visa, please contact SONinfo@kumc.edu for additional application requirements.

Admission requirements are subject to change. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

Successful completion of the **Leadership** courses. Choose a minimum of 9 credits (including one health policy course) from the following electives:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>IPHI 820</td>
<td>Program, Project, and Communication Planning</td>
<td>2</td>
</tr>
<tr>
<td>NRSG 808</td>
<td>The Social Context for Health Care Policy</td>
<td>2</td>
</tr>
<tr>
<td>NRSG 880</td>
<td>Organizational Foundations for Leading Change</td>
<td>3</td>
</tr>
<tr>
<td>NRSG 885</td>
<td>Evaluation and Analysis for Healthcare Effectiveness</td>
<td>2</td>
</tr>

<tr>
<td>HP&amp;M 837</td>
<td>Health Policy</td>
<td>3</td>
</tr>
</tbody>
</table>

Successful completion of 9 credits of elective courses in one **Focus Area**. The focus area (Clinical Leadership, Health Policy and Management, Public Health, Project Management, or Telehealth) and the corresponding courses are selected in consultation with the student’s advisor based on the student’s background and career goals.

Master of Science in Health Informatics (MSHI) students complete courses in health informatics, leadership, and in one of the following focus areas: clinical leadership, health policy and management, public health, project management, or telehealth. The student and advisor will work closely together to develop a plan of study that meets the career goals of the student.

**Degree requirements:**

- Degree requirements can be completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 3 years of admission to the program.
- Completion of a minimum of 35 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a general examination (https://catalog.ku.edu/graduate-studies/kumc/#ThesisDefense) the semester the student will graduate.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.
- Successful completion of the **Health Informatics** courses (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.

**Dual Degree: Doctor of Pharmacy & Master of Science in Health Informatics**

This dual degree program combines the Master of Science in Health Informatics (MSHI) with the Doctor of Pharmacy (PharmD) and is designed particularly for those students intending to pursue opportunities in pharmacy informatics. Students accepted into the dual MSHI/PharmD program concurrently enroll in both programs and can start MSHI courses as early as the spring of the P2 year. Providing that prerequisites are met, the HI practicum will satisfy 1 of 9 required advanced pharmacy practice experiences (APPEs). A Health Informatics comprehensive oral examination occurs during the last semester of enrollment in the MSHI program. Admission to this program is restricted to students currently in the KU PharmD program.

**Degree Requirements**

Health Informatics Certificate

Emerging technologies are fundamentally changing the way we manage and apply knowledge. In addition, healthcare organizations must meet the challenges of the HITECH Act and HIPAA, as well as regulatory influences. As a result, the need for trained healthcare informaticians has increased dramatically over the last few years. In order to appropriately select and use technology to improve healthcare and to meet the requirements of regulating bodies, health informatics professionals need training in the use of informatics concepts and methodologies.

The advantage of this certificate program is that it offers an interprofessional learning experience and is open to graduates in all fields. This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html), which is sponsored by the School of Nursing.

Approved as a Stackable Program: To encourage career and academic progression, students who have completed the Health Informatics Certificate may apply the courses towards the degree requirements for the Master of Science in Health Informatics.

The application process for the Health Informatics Certificate program is an online process. Detailed instructions on how to apply are posted on the Center for Health Informatics (https://www.kumc.edu/health-informatics.html) website. Students are admitted for the fall and spring semesters only. Applications for the fall semester must be received by April 1st and by September 1st for the spring semester.

Admission Requirements:

- A bachelor's or master's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended are required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale.
- Applicants, who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://catalog.ku.edu/graduate-studies/kumc/#EnglishProficiencyRequirement).
- A background check (https://catalog.ku.edu/graduate-studies/kumc/#BackgroundCheck) is required during the admission process; it may affect the student's eligibility to enter the program.
- Three letters of recommendation from individuals who can assess your academic and professional background and potential for success in a graduate-level certificate program.
- A personal statement regarding applicant's career objectives and purpose.
- A current resume or curriculum vitae.
- A satisfactory phone or in-person interview.

Applicants will be assessed on the above criteria and selected applicants will in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity.
to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application. Admission requirements are subject to change. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

Certificate Program Information: (p. 2466)
Certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a certificate program.

The certificate program is not a means of entry into a graduate degree program. If students admitted to a certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a certificate may be used as evidence in support of a student's application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

Healthcare Informatics Certificate
Effective Fall 2019, the Healthcare Informatics Certificate will no longer be accepting applications. Please apply to the Health Informatics Certificate program listed above.

Certificate requirements:
- Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework
- Students must be enrolled in a minimum of 1 credit during their graduation semester. Certificates may not be granted retroactively
- Successful completion of the following online courses:

<table>

Total Hours 17-20

Typical Plan of Study
The Health Informatics Certificate program consists of 19 credit hours. The 3-credit hour practicum (IPHI 856) requires a total of 200 clock hours and may be taken only after the majority of coursework is complete. This practicum may be taken over 1-3 consecutive semesters and must include the last semester in the program.
PharmD students who are concurrently completing the Health Informatics Certificate program will take IPHI 858: Health Informatics Practicum for Pharmacy instead of IPHI 856.

**TECHNICAL STANDARDS FOR ADMISSION**

The Master of Science in Health Informatics degree and the graduate Health Informatics Certificate signify that the holder is prepared for entry into the practice of applied health informatics. Therefore, it follows that graduates must have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students with or without accommodations admitted to the program.

1. **Observation**: Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication**: Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.

3. **Motor**: A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include field work in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem-solving abilities**: An applicant must be able to understand and learn factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes**: Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.
Medicine (M.D. & Graduate Degrees)

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, use the catalog of the year student entered program. Other years' catalogs (http://catalog.ku.edu/archives/)

Founded in 1905, the KU School of Medicine is proud of its rich legacy as Kansas' only medical school. Our mission is to enhance the quality of life and serve our community through the discovery of knowledge, the education of health professionals and by improving the health of the public.

The School of Medicine integrates excellent education, scientific discovery, outstanding clinical programs and dedication to community service. In addition to its commitment to educating the physician workforce of tomorrow, the school is an emerging leader in biomedical research and the health of the public. Graduate programs are offered in the biomedical sciences, biostatistics, public health, health policy and management, and clinical research.

Masters and Ph.D. Programs

Founded in 1905, the KU School of Medicine is proud of its rich legacy as Kansas' only medical school. Our mission is to enhance the quality of life and serve our community through the discovery of knowledge, the education of health professionals and by improving the health of the public.
The School of Medicine integrates excellent education, scientific discovery, outstanding clinical programs and dedication to community service. In addition to its commitment to educating the physician workforce of tomorrow, the school is an emerging leader in biomedical research and the health of the public. Graduate programs are offered in the biomedical sciences, biostatistics, public health, health policy and management, and clinical research.

Admission and degree requirements vary by program and are listed in the individual program descriptions. Requirements and course descriptions are subject to change. In most cases, use the catalog of the year entered program. Other years’ catalogs (http://catalog.ku.edu/archives/).

Click on the list of programs (p. 2031) link for a list of the programs offered.

Department of Anatomy and Cell Biology

The Cell Biology and Anatomy Graduate Program is designed to prepare the student for a career in independent research and/or teaching with concentrations in the following areas:

- Cell Biology
- Developmental Biology
- Neuroscience
- Renal Biology
- Reproductive Biology

The graduate program emphasizes acquiring the skills and knowledge required to perform and communicate the results of laboratory research. Individual research programs within the Division of Cell Biology and Anatomy are largely complementary and focus on understanding the biological processes that contribute to human health and disease. Experimental systems include the use of cell and tissue culture, as well as model systems such as *Drosophila melanogaster*, chameleon, frog, chick, zebrafish, rats, and transgenic mice.

In 2021, the Division of Cell Biology and Anatomy brought in nearly $6 million in grant funding from the National Institutes of Health, placing it at the top of all basic science departments within KUMC and 35th (out of 78) among all Anatomy and Cell Biology departments in the country. Faculty members and trainees also received funding from the National Science Foundation, American Heart Association, the Cystic Fibrosis Foundation, and various other agencies. Graduates of this program have obtained positions in industry, government, and consulting, as well as faculty positions at the college, university, and medical/graduate school level.

Courses

**ANAT 831. Fellowship Grant Development. 3 Credits.**

This 3-hour course will provide instruction and feedback towards the development of a fellowship-style grant application. Topics to be covered will include Biosketch, Candidate Background and Career Goals, Specific Aims, Significance and Innovation, Experimental Design and Approach, Sponsor Statement, Training Plan, and Grant Review Procedures. The learner will gain a deeper insight into the development and execution of each component of a fellowship application, as well as receive feedback from fellow students and participating faculty on how to improve their proposal. They will also gain a deeper appreciation of how the components of a fellowship proposal are reviewed and scored. It is anticipated that by the end of the course, the student should have a fully developed fellowship application that can be submitted to a funding agency. Prerequisite: IGPBS core curriculum or first two years of ACE curriculum.

**ANAT 832. Electron Microscopy Techniques. 3 Credits.**

Basic methods in preparation of tissues and cells for ultrastructural studies; use of electron microscopy in specific research problems; interpretation of biological ultrastructure; reading assignments and discussion sessions. Prerequisite: ANAT 830, or consent of course instructor.

**ANAT 845. Graduate Histology. 3 Credits.**

This course will bridge student knowledge of systems/organs with cellular histology and is designed as an accelerated introduction to histological techniques, microscopy/optics, and histology of normal and diseased tissues. Classes meet once a week and the format includes a 1 hour lecture on individual tissues within related organ systems followed by 1 hour of microscopic observation. (Same as NEUS 845.) Prerequisite: Completion of the IGPBS core curriculum or consent of instructor.

**ANAT 846. Advanced Neuroscience. 4 Credits.**

Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as PHCL 846, PHSL 846, NURO 846, and NEUS 846.) Prerequisite: Permission of the course director.

**ANAT 847. Developmental Neurobiology. 2 Credits.**

Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as NURO 847, PHSL 847 and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor.

**ANAT 848. Molecular Mechanisms of Neurological Disorders. 3 Credits.**

An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer’s, Parkinson’s, Huntington’s, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down’s syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as NURO 848, PHCL 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor.

**ANAT 849. Advanced Cell Biology. 2 Credits.**

This course focuses on modern trends in cell biology and their role in disease processes. Topics include cellular organelles, cell diversity, and cellular processes. Each two hour class will consist of a one hour lecture followed by a journal club discussion of the previous week’s topic. Oral presentations of written assignments will allow students to integrate lecture material. By the end of the course, the learner will have acquired knowledge of the cellular mechanisms essential to organismal health, developed creative and critical thinking skills by integrating multiple aspects of cell biology to address a research problem, and honed their oral presentation and scientific writing skills. Prerequisite: Completion of the IGPBS core curriculum or consent of the instructor.

**ANAT 868. Advanced Developmental Biology. 2 Credits.**

This is an advanced graduate course which is designed for 2nd year graduate students who have some previous exposure to embryology /
developmental biology at the undergraduate or graduate level. The class will focus on aspects of development that are currently at the leading edge of the field and will include a combination of lectures, discussion of late breaking papers, and seminars by outside speakers. Prerequisite: IGPBS Core Curriculum or consent of instructor.

ANAT 869. Grant Writing. 3 Credits.
All aspects of preparing grant applications are covered. This includes writing an actual grant application containing all the usual elements of grants - budgets, biosketches, resources, and scientific text. In addition, different funding agencies, building research teams, the review process, responding to reviewers, and resubmitting grants will be covered. (Same as HP&M 878 and NRS 889.) Prerequisite: Appropriate research methods and statistics courses in student's current graduate program; and permission of the instructor. For students in the Outcomes Management and Research concentration, HP&M 821.

ANAT 870. Research Methods and Advanced Technologies in Biomedical Research. 1 Credits.
This course will introduce students to novel research techniques and their application across a variety of disciplines. The class will meet weekly and consist of monthly faculty lectures on current or developing techniques and student-led presentations and discussions occurring during non-lecture classes. Prerequisite: Completion of the IGPBS core curriculum or consent of instructor.

ANAT 880. Advanced Topics: _______. 1-5 Credits.
Special study allowing a student to pursue a particular subject through readings, laboratory work, and conferences with a faculty member. Prerequisite: Consent of instructor.

ANAT 885. Seminar. 1 Credits.
Research-oriented presentations in a seminar format by students, faculty, and guests.

ANAT 890. Graduate Research. 1-10 Credits.
Independent laboratory investigation approved by and under the supervision of the student's advisor, and in partial fulfillment of the requirements for the M.S. or Ph.D. degree. Prerequisite: Consent of advisor.

ANAT 899. Master's Thesis. 1-6 Credits.
Preparation of the formal thesis based upon independent research and in partial fulfillment of the requirements for the M.S. degree. Credits will be given only after the thesis has been accepted by the department. Prerequisite: Consent of advisor.

ANAT 900. Analysis of Scientific Papers. 1 Credits.
Research articles are analyzed and presented by the student with the guidance of an instructor. Assessment will be based on the quality and mechanics of the presentation and participation in group discussion. One or more articles may be discussed in each tutorial session. The research topics are chosen in accordance with the research interest of the student and at the discretion of the instructor.

ANAT 990. Doctoral Research. 1-12 Credits.
Original and independent laboratory investigation, approved by and conducted under the supervision of the students' advisor and advisory committee, in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of advisor.

ANAT 999. Doctoral Dissertation. 1-12 Credits.
Preparation of the dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student's dissertation committee. Prerequisite: Consent of advisor.

---

**Master of Science in Cell Biology and Anatomy**

The Master of Science (M.S.) program in Cell Biology and Anatomy prepares the student for a career at the advanced technical level in academia, industry, or government. Graduating students may also find teaching positions at the secondary or junior college level. Incoming students may not directly enroll in the M.S. program; entry will only be granted by the Departmental Director of Graduate Education upon the recommendation of the student's Research Advisory Committee.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission requirements:**

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs -
Degree Requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2458) the semester the student will graduate.
- If thesis option is chosen, then enrollment in a minimum of one (1) credit hour of ANAT 899 Master's Thesis and successful thesis submission and publication (p. 2458) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

<table>

- Students must be continually enrolled in ANAT 885 Seminar and ANAT 900 Analysis of Scientific Papers each fall and spring semester beginning with fall semester of their second year. These two courses may be waived for one semester after the student has completed all departmental requirements other than the general exam or thesis defense.
- Successful completion of optional elective coursework as determined in consultation with the student’s advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

Thesis defense or general examination may be scheduled as early as this semester if approved by committee to graduate.
ANAT 885 and ANAT 900 may be waived for one semester after the student has completed all departmental requirements other than the general exam or thesis defense.

Total Hours 22-46

A M.S. in Anatomy and Cell Biology signifies that the holder is prepared for entry into a career at the advanced technical level in academia, industry, or government. Therefore, graduates must have the knowledge and skills to function in a broad variety of classroom and/or laboratory situations. In this manner, all students admitted into the Anatomy and Cell Biology M.S. program must meet the following abilities and expectations:

1. **Observation**: The candidate must be able to observe demonstrations and experiences in the basic sciences, including, but not limited to, biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the senses of vision and touch.

2. **Communication**: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor**: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities**: These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes**: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment, and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

---

**Doctor of Philosophy in Cell Biology and Anatomy**

The Ph.D. program in Cell Biology and Anatomy prepares the student for a career in independent research and/or teaching. The Ph.D. is typically followed by postdoctoral training in a specific field of study. Graduates of this program have obtained positions in industry, government, and consulting, as well as faculty positions at the college, university, and medical/graduate school level.

Students who obtain a Ph.D. in Cell Biology and Anatomy are required to achieve the following expectations:

- Become knowledgeable in the areas of study included in the IGPBS (Interdisciplinary Graduate Program in the Biomedical Sciences) core curriculum.
- Obtain in-depth and up-to-date expertise in a specialized area of knowledge that is appropriate for the field of your dissertation research project.
- Make original and high quality contributions to the scientific literature in your chosen research field.
- Become familiar with the scientific literature through general and specialized journals in biological research, and to develop the ability to critically evaluate the original research in your own and related fields.
- Become skilled in organizing and communicating information in oral presentations, and to respond to critical questioning.
- Develop clarity, conciseness, and precision in writing, to aid in grant application writing, and publication of your original research results.
- Learn how to ask incisive scientific questions and gain experience in the design, performance, and interpretation of laboratory experiments and observations.
- Gain familiarity with the preparation and writing of grant applications.
- Prepare for the teaching as well as the research aspects of an academic career.
- Obtain instruction in research skills and responsible scholarship.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
• One year of general chemistry
• One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
• One year of biological sciences
• One semester of calculus
• One semester of physics
• Research experience (beyond labs associated with lecture courses) is strongly suggested.
• Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs are available in the Office of Graduate Studies.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant coursework related to specialized interests. Electives are chosen in consultation with the student's advisor. Electives may be chosen from this list or students may select electives from courses offered by other departments.

Degree requirements:

• Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  • Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  • Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
  • Successful completion of the Residence Requirement (p. ) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
  • Successful completion of the Oral Comprehensive Examination (p. 2462). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
  • Successful completion of the Post-Comprehensive Enrollment (p. 2463) requirement.
  • Enrollment in a minimum of one (1) credit hour of ANAT 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
  • Successful completion of the Final Oral Examination (p. 2463) (dissertation defense.)
  • Successful Dissertation Submission and Publication (p. 2464) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

Final Oral Exam (dissertation defense) may be scheduled as early as this semester if approved by committee to defend and graduate.

ANAT 885 and ANAT 900 may be waived for one semester after the student has completed all departmental requirements other than the dissertation defense.
A Ph.D. in Anatomy and Cell Biology signifies that the holder is prepared for entry into a career in independent research and/or teaching. Therefore, graduates must have the knowledge and skills to function in a broad variety of classroom and/or laboratory situations. In this manner, all students admitted into the Anatomy and Cell Biology Ph.D. program must meet the following abilities and expectations:

1. **Observation:** The candidate must be able to observe demonstrations and experiences in the basic sciences, including, but not limited to, biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the senses of vision and touch.

2. **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment, and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

### Department of Biochemistry and Molecular Biology

The mission of the Department of Biochemistry and Molecular Biology is to provide:

- a dynamic research environment with programs in the disciplines of biochemistry and molecular biology.
- a superior educational experience for graduate students and medical students.
- a rich training environment for postdoctoral fellows.
- service to our institution and community.

Our areas of research strength include:

- Regulation of gene expression, emphasizing but not limited to transcription regulation.
- Protein folding and structure determination.
- Allosteric regulation of protein function.
- Signal transduction.

Core services are available, which includes: a transgenic mouse facility; a biotechnology support center that offers DNA synthesis, sequencing, and microchip analysis; a state-of-the-art mass spectrometry facility (http://www.kumc.edu/mspc.html); in-house x-ray crystallographic equipment; and a variety of spectroscopy and calorimetry instruments, including advanced fluorescence equipment.

### Courses

- **BCHM 802. Biochemistry Seminar. 1 Credits.** Weekly meetings.
- **BCHM 808. Methods for Analyzing Biomolecules. 3 Credits.** Application of physical techniques to the study of biological macromolecules in solution. Emphasis on utilization of data obtained from such studies in interpreting biological processes at the molecular level. Course will be taught in the spring. Prerequisite: Consent of instructor.
- **BCHM 850. Topics in Biochemistry. 1-3 Credits.** Selected topics in biochemistry with varying subject matter. Students should inquire before enrolling. Topics are in-depth studies of current research areas. The course may consist of formal lectures and/or directed readings and studies.
- **BCHM 862. Biochemical Research-Literature Seminar. 1 Credits.** Students and faculty meet once weekly to discuss the research of students or the current biochemical literature. The student is required to make one presentation. Prerequisite: Consent of instructor.
- **BCHM 890. Research in Biochemistry. 1-15 Credits.** Research for the M.S. degree or for Ph.D. students prior to completion of their comprehensive exam. RSH.
- **BCHM 899. Master’s Thesis. 1-15 Credits.** Restricted to the writing of the master’s thesis.
- **BCHM 922. Advanced Molecular Genetics. 3 Credits.** An in-depth analysis of the structure and function of gene regulatory proteins and the mechanisms of gene transcription, and DNA replication and repair. Lectures and discussion of current literature. Prerequisite: consent of instructor. Course will be presented in the fall semester and will include several faculty leading discussions in their area of research interests.
- **BCHM 923. Protein Structure and Function. 3 Credits.** The relationship between protein structure, binding, and physiological function. Emphasis is on proteins as enzymes, structural components, and regulators. Course will be taught in the spring. Prerequisite: consent of instructor.
- **BCHM 990. Doctoral Research. 1-15 Credits.** Research for the doctoral degree.
- **BCHM 999. Doctoral Dissertation. 1-15 Credits.** Restricted to the writing of the doctoral dissertation.

### Master of Science in Biochemistry and Molecular Biology

The M.S. in biochemistry and molecular biology normally leads to positions at the advanced technical level in academic research, industry, or government. It may lead to teaching positions at the secondary or junior college level.
The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).

- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
  - Research experience (beyond labs associated with lecture courses) is strongly suggested.
  - Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs.

Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.

- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.

- Completion of a minimum of 30 credit hours.

- Successful completion of either a thesis defense or general examination (p. 2458) the semester the student will graduate. The option will be decided by the student’s advisor and must be approved by the departmental Graduate Committee.

If the thesis option is chosen, then enrollment in a minimum of one (1) credit hour of BCHM 899 Master’s Thesis is required and successful thesis submission and publication (p. 2458) (according to Office of Graduate Studies policy.)

If the general examination option is chosen, then enrollment in a minimum of one (1) credit hour the semester the student will graduate is required.

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for admission to academic programs at the University of Kansas Medical Center. In such cases, the determination of eligibility for admission will be made on an individual basis in consultation with the applicant's physician; the decision will take a number of factors into consideration, including the legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.
Doctor of Philosophy in Biochemistry and Molecular Biology

The Ph.D. is required for careers in independent research in biochemistry and molecular biology. The Ph.D. most often is followed by one or more years of postdoctoral training in a specific area of research. Ph.D. degree holders in biochemistry and molecular biology may find positions in industry or government and, with some postdoctoral experience, may obtain faculty positions at the college or university level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs.

Degree requirements:

- Degree requirements are normally completed within 5-6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. ) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2462). This will comprise (i) a written grant proposal that conforms to the NIH R01 guidelines; and (ii) oral examination that centers around material in the written proposal, as well as broader aspects of biochemistry and molecular biology. The topic may be broadly related to the student’s research area, but hypotheses should be developed independently by the student. Students are expected to complete the Oral Comprehensive Exam by the end of year 2. Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of Post-Comprehensive Enrollment (p. 2463) requirement.
- Enrollment in a minimum of one (1) credit hour of BCHM 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2463) (dissertation defense.)
- Successful Dissertation Submission and Publication (p. 2464) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

Therefore all students admitted for graduate study in Biochemistry and a broad variety of academic situations in the classroom and laboratory. That end, graduates must have the knowledge and skills to function in a research and/or teaching in postgraduate training and faculty positions. To the Ph.D. degree signifies that the holder is prepared for entry into MOLECULAR BIOLOGY.

STUDIES IN THE DEPARTMENT OF BIOCHEMISTRY AND TECHNICAL STANDARDS AND REQUIREMENTS FOR GRADUATE

An infectious disease is a systemic disease that is the result of an infection by a pathogen. The pathogen is a living organism that can cause disease. Infectious diseases are caused by microorganisms, such as bacteria, viruses, fungi, and parasites. Infectious diseases can be transmitted from person to person, from animals to humans, or from the environment to humans.

Motor:

These

Communication:

Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to perform laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

Intellectual-Conceptual, Integrative, and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review, the provisions for reasonable accommodation will be determined.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Department of Biostatistics

The mission of the Department of Biostatistics & Data Science is to provide an infrastructure of biostatistical and informatics expertise to support and enhance the research, service and educational needs of the University of Kansas Medical Center and its affiliates. The global objectives of the department are as follows:

- To provide a leadership role in biostatistical and informatics research initiatives across the medical center.
- To provide the biostatistics and informatics cores for major initiatives.
- To ensure that researchers have ready access to biostatistical and informatics resources and support.
• To provide the infrastructure and expertise for centralized and project specific database development, management and analysis.
• To consolidate resources pertaining to biostatistics and informatics.

The innovative MS & PhD programs in Biostatistics, MS in Applied Statistics, Analytics & Data Science, and MS in Health Data Science help meet the ever-increasing demand for statisticians, biostatisticians, and health data scientists needed to take leadership roles in academia, government, health care institutions and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; statistical “omics; bioinformatics; Bayesian methodology; data science; and machine learning.

Courses

BIOS 704. Principles of Statistics in Public Health. 3 Credits.
Introductory course concerning the concepts of statistical reasoning and the role of statistical principles as the scientific basis for public health research and practice. Prerequisite: Permission of instructor.

BIOS 714. Fundamentals of Biostatistics I. 3 Credits.
First-semester course of a two-semester introductory statistics course that provides an understanding of the proper application of statistical methods to scientific research with emphasis on the application of statistical methodology to public health practice and research. This course focuses on basic principles of statistical inference with emphasis on one or two sample methods for continuous and categorical data. This course fulfills the core biostatistics requirement. Prerequisite: Calculus or Permission of Instructor.

BIOS 715. Introduction to Data Management using RedCap and SAS. 3 Credits.
This course will cover the utilization of Redcap and SAS for data management. Data collection and management using Redcap will be covered. Data cleaning and preparation for analysis will be covered using SAS. In addition, some of the basic descriptive analysis procedures will be covered in SAS. Prerequisite: Corequisite: BIOS 704 or BIOS 714 or equivalent with permission of instructor.

BIOS 717. Fundamentals of Biostatistics II. 3 Credits.
Second level statistics course that provides an understanding of more advanced statistical methods to scientific research with an emphasis on the application of statistical methodology to public health practice, public health research, and clinical research. Special focus will be upon the utilization of regression methodology and computer applications of such methodology. Prerequisite: BIOS 714 or equivalent with permission of instructor.

BIOS 720. Analysis of Variance. 3 Credits.
Methods for designed experiments including one-way analysis of variance (ANOVA), two-way ANOVA, repeated measures ANOVA, and analysis of covariance are emphasized. Post-ANOVA tests, power and testing assumptions required in NOVA are discussed and applied. Outlier detection using robust estimators also are incorporated. Boxplots, histograms and scatterplots are used to display data. Prerequisite: PRE 710/711 or BIOS 714/717 or equivalent. Preferred: BIOS 715. Knowledge of statistical software, basic statistical plotting methods, p-values, two-sample t-test and simple linear regression is assumed.

BIOS 725. Applied Nonparametric Statistics. 3 Credits.
This course will study nonparametric methods in many situations as highlighted by the following topics: Students will learn how nonparametric methods provide exact p-values for tests, exact coverage probabilities for confidence intervals, exact experimentwise error rates for multiple comparison procedures, and exact coverage probabilities for confidence bands. This course will be using EXCEL and SAS to conduct various procedures. Prerequisite: BIOS 714 or equivalent with permission of instructor.

BIOS 730. Applied Linear Regression. 3 Credits.
Simple linear regression, multiple regression, logistic regression, nonlinear regression, neural networks, autocorrelation, interactions, and residual diagnostics. Applications of the methods will focus on health related data. Prerequisite: 1) BIOS 714 or the equivalent and 2) BIOS 717 or BIOS 720 or equivalent with permission of instructor.

BIOS 735. Categorical Data and Survival Analysis. 3 Credits.
An intermediate level statistics course that provides an understanding of the more advanced statistical methods to scientific research with emphasis on the application of statistical methodology to clinical research, public health practice, public health research and epidemiology. Prerequisite: BIOS 714, BIOS 715, and BIOS 717 or permission of the instructor.

BIOS 740. Applied Multivariate Methods. 3 Credits.
This course is an advanced statistical course for students who have had fundamental biostatistics and linear regression. Topics to be covered include Hotelling’s T-squared test, MANOVA, principal components, factor analysis, discriminant analysis, canonical analysis, and cluster analysis. More advanced topics such as Multidimensional Scaling or Structural Equation Modeling might be introduced if time allows. Computers will be extensively used through the whole course, and students are suggested to be familiar with some statistical software before taking this course. Although students are allowed to use the software they are comfortable with, SAS will be the primary statistical package used to demonstrate examples in this course. Prerequisite: Corequisite: BIOS 730 or equivalent with permission of instructor.

BIOS 799. Introduction to Statistical Genomics. 3 Credits.
This course will provide a high-level introduction of various statistical and bioinformatics methods involved in the study of biological systems. In particular, this course will provide an overview of the analytical aspects involved in: the study DNA, RNA, and DNA methylation data measured from both microarray and next-generation sequencing (NGS) technologies. During the last week of the summer semester, students will be required to participate in a group seminar session in which they will present the results from their assigned genomics analysis projects. Prerequisite: Corequisite: BIOS 714 and BIOS 717 or equivalent with permission of instructor; Experience with a higher level programming language is preferred.

BIOS 805. Professionalism, Ethics and Leadership in the Statistical Sciences. 3 Credits.
This web-based course addresses issues in professionalism, leadership and ethics that are specific to students training to become statisticians, biostatisticians, and data scientists. Topics include use of sound statistical methodology, common threats to valid inference, effective communication and collaboration with content-area experts, maintaining transparency and independence, reproducible research, the publishing process (including authorship guidelines, plagiarism, peer review, intellectual property, etc.), conflict of interest, data security, and properties of effective leaders, among others. Prerequisite: Department consent.

BIOS 806. Special Topics in Biostatistics. 1-3 Credits.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Permission of the instructor.

BIOS 810. Clinical Trials. 3 Credits.
The design, implementations, analysis, and assessment of controlled clinical trials. Basic biostatistical concepts and models will be emphasized. Issues of current concern to trialists will be explored. Prerequisite: By permission of instructor.

BIOS 811. Scientific Rigor and Reproducibility. 3 Credits.
This course introduces the principles and practices required to conduct rigorous and reproducible research across the translational spectrum. The National Institutes of Health (NIH) promotes rigor and reproducibility in their guidance to grant applicants as part of the scorable parameters that grant reviewers must address. In addition, NIH requires formal instruction in scientific rigor and transparency for individuals supported by institutional training grants, career development awards, and fellowships. In this course, students learn best practices, including sound study planning and design, consideration of all relevant biomedical variables, sound data management practices, statistical considerations and techniques, and transparency in reporting research results. Prerequisite: BIOS 714 or equivalent with permission of instructor.

BIOS 815. Introduction to Bioinformatics. 3 Credits.
Bioinformatics, an interdisciplinary field at the cross-section of biology, computer science, and statistics, has played a key role in enhancing our understanding of many areas of biology. The broad purpose of this course is to introduce students in the quantitative sciences to the field of bioinformatics and its practice. Topics include foundational concepts in molecular biology, database technologies, sequence alignment, BLAST, molecular phylogenetics, genomics, transcriptomics, proteomics, microbiomics, with treatment of the accompanying bioinformatic tools/methodologies that have been developed to analyze various data types. Over the semester, students will gain a familiarity with the essential concepts and theories underlying the practice of bioinformatics, different types of ‘omic data, the technologies used to generate different ‘omic data types, and databases and tools commonly used for bioinformatics analysis. Prerequisite: There are no formal prerequisites for this course. Previous graduate-level coursework in probability and statistics and molecular biology is helpful, but not necessary.

BIOS 820. SAS Programming I. 3 Credits.
This is a graduate level course preparing a student for the SAS base programming certification exam. We will cover the topics required for a student to pass the SAS base programming certification exam given by SAS. To this end, topics we will study will include, referencing files and setting options, creating list reports, understanding data step processing, creating and managing variables, reading and combining SAS data sets, do loops, arrays, and reading raw data from files. After the completion of the course the student should be able to create SAS programs to read data from external files, manipulate the data into variables to be used in an analysis, generate basic reports showing the results. Prerequisite: Permission of the Instructor.

BIOS 821. SAS Programming II. 3 Credits.
This is a graduate level course preparing a student for the SAS advanced programming certification exam. We will cover the topics required for a student to pass the SAS advanced programming certification exam given by SAS. To this end, topics we will study include array processing, use of data step views, using the data step to write SAS programs, efficient use of the sort procedure, introduction to the macro language in SAS, and accessing data using SAS PROC SQL. After the completion of the course the student should be able to create SAS programs to read data from external files, manipulate the data into variables to be used in an analysis, generate basic reports showing the results. Prerequisite: Corequisite: BIOS 820 or equivalent (SAS Certified BASE programmer for SAS or at least one year of experience as a data analyst/programmer).

BIOS 823. Introduction to Programming and Applied Statistics in R. 3 Credits.
This course will provide students with the opportunity to learn advanced statistical programming. The development of new statistical or computational methods often implies the development of programming codes to support its application. Much of this type of development is currently carried out in the R (or S-Plus) language. Indeed much of the recent development of statistical genetics is based on the R programming language and environment. This course provides an introduction to programming in the R language and it’s applications to applied statistical problems. Prerequisite: Corequisite: Some previous exposure to computer programming. Some basic statistics at the Applied Regression or Applied Design level and permission of instructor.

BIOS 825. Nonparametric Methods. 3 Credits.
This course is an introduction to nonparametric statistical methods for data that do not satisfy the normality or other usual distributional assumptions. We will cover most of the popular nonparametric methods used for different scenarios, such as a single sample, two independent or related samples, three or more independent or related samples, goodness-of-fit tests, and measures of association. Power and sample size topics will also be covered. The course will cover the theoretical basis of the methods at an intermediate mathematical level, and will also present applications using real world data and statistical software. Prerequisite: Permission of instructor.

BIOS 830. Experimental Design. 3 Credits.
The emphasis of this course is on learning the basics of experimental design and the appropriate application and interpretation of statistical analysis of variance techniques. Prerequisite: Permission of instructor, BIOS 820 recommended.

BIOS 833. Measurement for Statisticians. 3 Credits.
This course aims to introduce the theory and applications of measurement and psychometrics to students in the statistical sciences. The goal is for students to master the concepts of measurement theory, classical/modern test theory, reliability and validity, factor analysis, structural equation modeling, item response theory, and differential item functioning. Prerequisite: Corequisite: BIOS 835, or by permission of instructor.

BIOS 835. Categorical Data Analysis. 3 Credits.
This course provides an understanding of both the mathematical theory and practical applications for the analysis of data for response measures that are ordinal or nominal categorical variables. This includes univariate analysis, contingency tables, and generalized linear models for categorical response measures. Regression techniques covered for categorical response variables, such as logistic regression and Poisson regression methods, will include those categorical and/or continuous explanatory variables, both with and without interaction effects. Prerequisite: By permission of instructor; BIOS 820 and BIOS 840 are recommended.

BIOS 840. Linear Regression. 3 Credits.
This course is an introduction to model building using regression techniques. We will cover many of the popular topics in Linear Regression including: simple linear regression, multiple regression, model selection and validation, diagnostics and remedial measures. Prerequisite: By permission of the instructor.

BIOS 845. Survival Analysis. 3 Credits.
This course provides an understanding of both the mathematical theory and practical applications for the analysis of time to event data with censoring. This includes univariate analysis, group comparisons, and regression techniques for survival analysis. Parametric and semi-parametric regression techniques covered will include those with categorical and/or continuous explanatory variables, both with and without
interaction effects. Prerequisite: Corequisite: BIOS 820, 835, 840, and 871, or by permission of instructor.

BIOS 850. Multivariate Statistics. 3 Credits.
This course will introduce the theory and methods of applied multivariate analysis. As the field of multivariate analysis is very wide and well developed, the course will focus on those methods that are more frequently used in biostatistical applications. Some knowledge of basic matrix algebra is necessary and will be reviewed as the course progresses. Theoretical exercises and analysis of data sets will be assigned to the student. Emphasis will be on biostatistical applications. Prerequisite: Corequisite: BIOS 820, BIOS 830, and BIOS 840.

BIOS 855. Statistical Methods in Genomics Research. 3 Credits.
This survey course will provide a high-level introduction to various statistical and bioinformatics methods involved in the study of biological systems. In particular, this course will provide an overview of the analytical aspects involved in: the study DNA, RNA, and DNA methylation data measured from both microarray and next-generation sequencing (NGS) technologies. During the last week of the summer semester, students will be required to participate in a group seminar session in which they will present the results from their assigned genomics projects. Prerequisite: BIOS 820 OR experience programming in a higher level programming language; BIOS 840; OR by permission of the instructor.

BIOS 860. Clinical Trial Design and Analysis. 3 Credits.
This course is intended for students interested in the statistical aspects of clinical trial research. This course will provide a comprehensive overview of the design and analysis of clinical trials, including: first-in-human studies (dose-finding, safety, proof of concept, Phase I), Phase II, Phase III, and Phase IV studies. Prerequisite: By permission of instructor. BIOS 820, BIOS 830, BIOS 840.

BIOS 871. Mathematical Statistics. 3 Credits.
This course introduces the fundamentals of probability theory, random variables, distribution and density functions, expectations, transformations of random variables, moment generating functions, convergence concepts, sampling distributions, and order statistics. Prerequisite: By permission of instructor.

BIOS 872. Mathematical Statistics II. 3 Credits.
This course introduces the fundamentals of statistical estimation and hypothesis testing, including point and interval estimation, likelihood and sufficiency principles, properties of estimators, loss functions, Bayesian analysis, and asymptotic convergence. Prerequisite: BIOS 871 or by permission of instructor.

BIOS 880. Data Mining and Analytics. 3 Credits.
Students will be introduced to common steps used in data mining, such as accessing and assaying prepared data; pattern discovery; predictive modeling using decision trees, regression, and neural networks; and model assessment methods. Prerequisite: Corequisite: BIOS 820, 830, 835, 840, and 871, or by permission of instructor. BIOS 821 and 850 recommended.

BIOS 896. Collaborative Research Experience. 3 Credits.
This course provides students with experience in collaborative research under the supervision of an experienced researcher. The student will spend one semester working under an investigator or faculty member, making independent contributions to a research project. Prerequisite: Corequisite: BIOS 820, 830, 835, 840, 871, and 872, or by permission of instructor.

BIOS 899. MSCR Thesis. 3 Credits.
This course involves preparation of a formal thesis based on the research conducted by a student working toward the MS in Clinical Research and directed by a faculty member in the Department of Biostatistics. After the thesis has been completed, the student will be given an oral examination of the research methods and content. Prerequisite: Corequisite: Department of Biostatistics approval.

BIOS 900. Linear Models. 3 Credits.
This course introduces the theory and methods of linear models for data analysis. The course includes the theory of general linear models including regression models, experimental design models, and variance component models. Least squares estimation, the Gauss-Markov theorem, and less than full rank hypotheses will be covered. Prerequisite: Corequisite: BIOS 871 and BIOS 872 or by permission of instructor; BIOS 820 recommended.

BIOS 902. Bayesian Statistics. 3 Credits.
This course introduces Bayesian theory and methods for data analysis. The course includes an overview of the Bayesian approach to statistical inference, performance of Bayesian procedures, Bayesian computational issues, model criticism, and model selection. Case studies from a variety of fields will be incorporated into the course. Implementation of models using Markov chain Monte Carlo methods will be emphasized. Prerequisite: Corequisite: BIOS 871 and 872 or by permission of instructor; BIOS 820 recommended.

BIOS 905. Theory of Statistical Inference. 3 Credits.
This course covers advanced aspects of statistical inference. It is aimed at preparing Ph.D. BIOS students for the Ph.D. comprehensive exam and will emphasize advanced biostatistical ideas as well as problem solving techniques. Prerequisite: Corequisite: BIOS 871 and BIOS 872 or equivalent and permission of instructor.

BIOS 906. Advanced Special Topics in Biostatistics. 1-9 Credits.
This course allows exploration of special topics that are not routinely a part of the Biostatistics PhD curriculum. Prerequisite: Passing grade on the PhD Qualifying exam. Permission of the instructor.

BIOS 908. Advanced Clinical Trials. 3 Credits.
This course provides an introduction to recent innovations in clinical trial designs and analysis methods. Topics include concepts of controls, blinding, and randomization; common trial designs by phase of clinical development; sample size calculations; interim analysis; and adaptive clinical trials. Traditional frequentist and likelihood approaches to trial design and analysis will be covered in the first half of the course; the Bayesian approach (including adaptive clinical trial designs) will be emphasized in the second half of the course. Prerequisite: BIOS 860 and BIOS 902 or by permission of the instructor.

BIOS 910. Generalized Linear Models. 3 Credits.
This course on Generalized Linear Models (GLM) is designed for both the applied and theoretical statistician. In this course we introduce the theoretical foundations and key applications of generalized linear models. Prerequisite: BIOS 835, BIOS 840, and BIOS 900 or by permission of instructor.

BIOS 911. Nonlinear Models. 3 Credits.
This course will involve both theory and applications of nonlinear models, with emphasis in biological, medical, and pharmaceutical research. Applications to dose-response studies, bioassay studies and clinical pharmacokinetics and pharmacodynamics studies will be discussed. Nonlinear mixed effects models will also be examined, as well as criteria for optimal experimental designs based on nonlinear models. This course will cover the theoretical basis of the methods at an intermediate mathematical level, and will also present applications using real world data and statistical software. Prerequisite: BIOS 900 or equivalent and permission of instructor.

BIOS 915. Longitudinal Data Analysis. 3 Credits.
A longitudinal study is a research study that involves repeated observations of the same individuals and events over extended periods of time. It is typically a type of observational study, though may have design components. In medical settings these studies and related models are used to observe the developmental path of a disease or treatment through time. Often this is in the context of follow-up and long-term study of both progress and potential side-effects. As the study involves the same individuals (subject to drop-out) through several time points, statistical methods must employ random effects or “mixed models” incorporating various correlation structures. This is typically done using generalized estimating equations and marginal model approaches. Bayesian methods may also be appropriate here. Students will, after completing this course, be able to design and analyze longitudinal studies. The computer package to be employed is SAS. Prerequisite: BIOS 820, BIOS 830, BIOS 840, BIOS 871, BIOS 872, and BIOS 900 or by permission of instructor.

BIOS 920. Latent Variable Analysis. 3 Credits.
Latent variables refer to random variables whose realization values are not observable or cannot be measured without error, and their inferences rely on statistical models connecting latent and other observed variables. This course aims to introduce a family of such statistical models and their applications in biomedical and public health research. The course is designed as an elective course for students in the Biostatistics graduate program. We will use the statistical packages of Mplus, R, and/or SAS for the course. Prerequisite: BIOS 835 and BIOS 900, or by permission of instructor. Familiarity with vectors and matrices is strongly encouraged.

BIOS 999. Doctoral Dissertation. 1-9 Credits.
Preparation of the doctoral dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student’s dissertation committee. Prerequisite: Successful completion of the Department of Biostatistics Ph.D. Comprehensive Exam and consent of advisor.

Courses

DATA 806. Special Topics in Data Science. 1-3 Credits.
This course allows exploration of special topics that are not routinely a part of the Applied Statistics & Analytics and Data Science curriculum. Prerequisite: Permission of instructor.

DATA 817. Introduction to Tableau. 1 Credits.
Under Tableau Desktop-I specialization, the student will discover what data visualization is, and how to use it to better display and understand the information within a data set. Using Tableau, this course will examine the fundamental concepts of data visualization and explore the Tableau Desktop interface, identifying and applying the various tools Tableau has to offer. By the end of the course, students will be able to prepare and import data into Tableau and explain the relationship between data analytics and data visualization. This course is designed for learners who have never used Tableau before, those in need of a refresher, or those wanting to explore Tableau in more depth. No prior technical or analytical background is required. The course will guide students through the steps necessary to create visualization dashboard and story from the beginning based on data context, setting the stage for students to be ready for Desktop-I certification. Prerequisite: There are no formal prerequisites for this course. Prior experience generating plots, tables, graphs, etc. is helpful, but is not required.

DATA 819. Introduction to Python. 1 Credits.
This is a one credit hour introduction course to programming in Python. The fundamentals of Python programming, including: introduction to Python syntax, types, data structures, control of flow, functions, modules and packages, reading and writing files, and basic statistics will be covered throughout the course.

DATA 822. Introduction to SQL. 1 Credits.
This course prepares students to interact with most dialects of Structured Query Language (SQL). At the conclusion of the course, students will be prepared to interact with any major database, including PostgreSQL, MySQL, Oracle, among others. Topics covered relational databases, structure of data, Data Definition Language (DDL), Data Manipulation Language (DML), table joins, data summarization, and writing and interpreting SQL queries.

DATA 824. Data Visualization and Acquisition. 3 Credits.
Being a data scientist requires an integrated skill set that spans the domains of statistics, machine learning, and computer programming. It also demands a solid foundation in the principles of data visualization in order to create effective data presentations that convey the intended message. Put simply, data visualization describes any effort to assist an individual's understanding of the significance of data by placing it in a visual context. In this course, students will be introduced to principles of effective data visualization and tools commonly used for its implementation. Techniques and strategies for visualizing different types of data (e.g., numeric data, non-numeric data, spatial-temporal data), the use of space and color to visually encode data, interactive visualizations, acquiring and visualizing data from publicly available data repositories, data cleaning and standardizing, are examples of some of the topics this course will address. The focus in the treatment of these topics will be on breadth, rather than depth, and emphasis will be placed on integration and synthesis of concepts and their application to solving problems. Prerequisite: While there are no formal prerequisites for this course, students should have a basic familiarity with the R statistical programming language (STAT 823 highly recommended). Prior experience using statistical software (e.g., R) to generate plots, tables, graphs, etc. is helpful, but is not required.

DATA 881. Statistical Learning I. 3 Credits.
Statistical learning is a fundamental skill for data scientists. Data scientists are specialists in "drinking from the firehose" of big data, and statistical learning techniques are some of their key tools. This course focuses on applications of statistical learning to big data challenges through data mining and predictive modeling techniques that are in great demand. Students will be introduced to the basics of statistical/machine learning; supervised learning (e.g. linear model, nonlinear models, penalized methods, ensemble methods, etc.), unsupervised learning (e.g. K means clustering, nearest neighbors, hierarchical clustering, etc.), and missing data in machine learning. Throughout the course, we will learn how to be "informed doers", who not only know how to apply methods but understand how those methods work. This understanding can be critical to getting good results from big data, so that the limitations of certain methods are properly understood. Prerequisite: STAT 820 or STAT 823, STAT 835, STAT 840, or by permission of instructor.

DATA 882. Statistical Learning II. 3 Credits.
Knowledge of how and when to apply more sophisticated statistical learning models to big data can make a data scientist an indispensable asset to a research team. In Statistical Learning 2, we will learn how to be "informed doers". We will learn how many of the covered methods work, in addition to the proper situations to apply them. This is particularly important in this course, because these methods are applicable when simpler methods are inappropriate and rarely work well without significant tinkering. Data scientists with mastery of these methods are empowered to investigate questions that are far too complex to answer with the more general "workhorse" methods covered in the first unit of this series, Statistical Learning 1. We will cover many of the most
important techniques in use today, including: mixture models, hidden Markov models, spline regression, support vector machines, advanced discriminant analysis methods, neural networks (including deep learning), and methods for handling highly complex computation, such as Hadoop. The course culminates with a short project that will pull together all the skills you have learned to demonstrate how they can be used for statistical decision support, which is a common task for data scientists. Prerequisite: DATA 881, or by permission of instructor.

Courses

STAT 655. Foundations of Mathematics for Data Science. 3 Credits.
Topics in single- and multiple-variable differential and integral calculus and linear algebra with applications in statistics and data science. Mathematical concepts including limits, derivatives, integrals, sequences, series, vectors, matrices, and optimization problems will be covered in the context of statistical applications. Prerequisite: College algebra or equivalent.

STAT 805. Professionalism, Ethics and Leadership in the Statistical Sciences. 3 Credits.
This web-based course addresses issues in professionalism, leadership and ethics that re specific to students training to become statisticians, biostatisticians, and data scientists. Topics include use of sound statistical methodology, common treats to valid inference, effective communication and collaboration with content-area experts, maintaining transparency and independence, reproducible research, the publishing process (including authorship guidelines, plagiarism, peer review, intellectual property, etc.), conflict of interest, data security, and properties of effective leaders, among others. Prerequisite: Permission of instructor.

STAT 806. Special Topics in Applied Statistics and Analytics. 1-3 Credits.
This course allows exploration of special topics that are not routinely a part of the Applied Statistics & Analytics curriculum. Prerequisite: Permission of instructor.

STAT 818. Introduction to R. 1 Credits.
This course will provide students with the opportunity to learn applied statistics using R statistical programming language.

STAT 820. SAS Programming I. 3 Credits.
This is a graduate level course preparing a student for the SAS base programming certification exam. We will cover the topics required for a student to pass the SAS base programming certification exam given by SAS. To this end, topics we will study will include, referencing files and setting options, creating list reports, understanding data step processing, creating and managing variables, reading and combining SAS data sets, do loops, arrays, and reading raw data from files. After the completion of the course the student should be able to create SAS programs to read data from external files, manipulate the data into variables to be used in an analysis, generate basic reports showing the results. Prerequisites: STAT 820 or equivalent (SAS Certified BASE programmer for SAS or at least one year of experience as a data analyst/programmer).

STAT 823. Introduction to Programming and Applied Statistics in R. 3 Credits.
This course will provide students with the opportunity to learn advanced statistical programming. The development of new statistical or computational methods often implies the development of programming codes to support its application. Much of this type of development is currently carried out in the R (or S-Plus) language. Indeed much of the recent development of statistical genetics is based on the R programming language and environment. This course provides an introduction to programming in the R language and it's applications to applied statistical problems. Prerequisites: Some previous exposure to computer programming. Some basic statistics at the Applied Regression or Applied Design level and permission of instructor.

STAT 825. Nonparametric Methods. 3 Credits.
This course is an introduction to nonparametric statistical methods for data that do not satisfy the normality or other usual distributional assumptions. We will cover most of the popular nonparametric methods used for different scenarios, such as a single sample, two independent or related samples, three or more independent or related samples, goodness-of-fit tests, and measures of association. Power and sample size topics will also be covered. The course will cover the theoretical basis of the methods at an intermediate mathematical level, and will also present applications using real world data and statistical software. Prerequisite: Permission of instructor.

STAT 830. Experimental Design. 3 Credits.
The emphasis of this course is on learning the basics of experimental design and the appropriate application and interpretation of statistical analysis of variance techniques. Prerequisite: Permission of instructor. STAT 820 or STAT 823 is recommended.

STAT 833. Measurement for Statisticians. 3 Credits.
This course aims to introduce the theory and applications of measurement and psychometrics to students in the statistical sciences. The goal is for students to master the concepts of measurement theory, classical/ modern test theory, reliability and validity, factor analysis, structural equation modeling, item response theory, and differential item functioning. Prerequisites: Prerequisite: STAT 820 or STAT 823 Corequisite: STAT 835, or by permission of instructor.

STAT 835. Categorical Data Analysis. 3 Credits.
This course provides an understanding of both the mathematical theory and practical applications for the analysis of data for response measures that are ordinal or nominal categorical variables. This includes univariate analysis, contingency tables, and generalized linear models for categorical response measures. Regression techniques covered for categorical response variables, such as logistic regression and Poisson regression methods, will include those categorical and/or continuous explanatory variables, both with and without interaction effects. Prerequisites: Permission of instructor. STAT 820 or STAT 823 and STAT 840 are recommended.

STAT 840. Linear Regression. 3 Credits.
This course is an introduction to model building using regression techniques. We will cover many of the popular topics in linear regression including: simple linear regression, multiple linear regression, model selection and validation, diagnostics, and remedial measures. Prerequisite: Permission of Instructor.

STAT 845. Survival Analysis. 3 Credits.
This course provides an understanding of both the mathematical theory and practical applications for the analysis of time to event data with censoring. This includes univariate analysis, group comparisons, and regression techniques for survival analysis. Parametric and semi-parametric regression techniques covered will include those with categorical and/or continuous explanatory variables, both with and without interaction effects. Prerequisites: STAT 820 or STAT 823, 835, and 840 or by permission of instructor.

**STAT 850. Multivariate Statistics. 3 Credits.**
This course will introduce the theory and methods of applied multivariate analysis. Topics include multivariate model formulation, multivariate normal distribution, Hotelling's T-square, multivariate analysis of variance, repeated measures analysis of variance, growth curves, discriminant analysis, classification analysis, principal components analysis, and cluster analysis. Prerequisites: STAT 820 or STAT 823, and STAT 840, or by permission of the instructor.

**STAT 880. Data Mining and Analytics. 3 Credits.**
Students will be introduced to common steps used in data mining, such as assessing and assaying prepared data; pattern discovery; predictive modeling using decision trees, regression, and neural networks; and model assessment methods. Prerequisites: STAT 820 or STAT 823, STAT 835, and STAT 840, or by permission of instructor. STAT 850 is recommended.

**Master of Science in Biostatistics**

The Biostatistics M.S. and Ph.D. programs were created to help meet the ever-increasing demand for biostatisticians to take leadership roles in careers as researchers and educators in academia, government, and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the Department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; statistical ‘omics; bioinformatics; Bayesian methodology; data science; and machine learning.

The Biostatistics MS program produces graduates that are prepared to function as biostatisticians or biostatistical consultants. Therefore, graduates gain an extensive understanding of biostatistical theory and practice and should be proficient in the application of statistical methods to one or more areas in the health sciences. At the completion of the M.S. degree in Biostatistics the graduate should be able to:

1. Demonstrate a broad knowledge and understanding of statistical theory and practice as applicable in the health sciences.
2. Function as a collaborator on a research team.
3. Take a leadership role in the design and implementation of a health science project.
4. Assume responsibility for the design and implementation of analyses for health science investigations.
5. Assist with the design and implementation of data management systems for large health science studies.
6. Prepare reports and publications resulting from health science studies.
7. Serve as an advocate for good statistical design in health science investigations.

The application process for the M.S. in Biostatistics is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

**Admission Requirements:**

- A bachelor's degree in statistics, biostatistics, mathematics or applied mathematics from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- Letter grade of B or better in Calculus I, II, & III (or the equivalent).
- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.
- Successful completion of a course in any computer programming language or demonstration of mastery via credentials or work experience.
• Research experience (beyond labs associated with lecture courses) is recommended, but not required.
• Contact information for three references who are familiar with the applicant's work and character and who have agreed to write letters of recommendation.
• A current resume or curriculum vitae.
• A personal statement regarding your interest in biostatistics and in biomedical research.
• A personal interview is required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or online interview may be substituted.

Applicants will be assessed based on these requirements.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

The M.S. in Biostatistics degree program consists of 36 credit hours including collaborative research experience, annual evaluations, and the successful completion of the master's general examination. The course plan consists of 27 credit hours from required biostatistics core courses which includes 3 credit hours of Collaborative Research Experience. This requirement ensures the completion of a research component through collaborative effort within or external to the department. Students also complete 9 credit hours of elective coursework.

Degree requirements:
• Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed.
• Completion of a minimum of 36 credit hours.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Enrollment in a minimum of one credit hour the semester the student will graduate.
• Successful completion of a general examination (https://catalog.ku.edu/graduate-studies/kumc/#ThesisDefense) the semester the student will graduate. The general examination is given upon completion of the following courses: BIOS 830, BIOS 835, BIOS 840, BIOS 871, BIOS 872, and BIOS 900. The examination has three purposes: to assess the student’s strengths and weaknesses; to determine whether the student should be awarded the M.S. degree; and, if it is a degree goal, to determine whether the student is prepared to continue into the Ph.D. program (p. 2056).
• Successful completion of the following Biostatistics courses:

<table>

• Successful completion of a minimum of 9 credit hours of elective coursework, including a minimum of 6 credit hours of elective coursework from courses offered by the department. Specific courses are determined in consultation with the student’s advisor.
• Students may take up to 12 credit hours of equivalent coursework under the STAT or HDSC prefix. Course equivalence should be determined in consultation with the student's advisor.
• Regular attendance at the Department Journal Club and Seminar Series is required.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

Annual Evaluations:
Students are evaluated each May by their graduate advisors and the director of the graduate program. These evaluations provide feedback to the student regarding the progress they are making in meeting program requirements, classroom performance, and research performance.

Total Hours 36

• Students may take up to 12 credit hours of equivalent coursework under the STAT and HDSC prefix. Course equivalence should be determined in consultation with the student’s advisor.
• Successful completion of any elective coursework as determined in consultation with the student’s advisor. Any coursework under the STAT or DATA prefixes may be considered as internal elective credit.

Because the MS and PhD in Biostatistics degrees signify that the holder is prepared for entry into the practice of biostatistics research, it follows that graduates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive, and behavioral standards...
that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at graduation. Therefore, the following abilities and expectations must be met by all students with or without accommodations admitted to the MS and PhD programs:

1. **Observation.** A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables and graphs, both in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication.** A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers, and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. **Motor.** A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, deliver lectures and make public presentations. Class requirements may also include field work in a variety of collaborative environments.

4. **Intellectual, conceptual, integrative and quantitative abilities.** A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher, and communicator.

5. **Behavioral and social attributes.** A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive, and effective professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

**NOTE:** Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

**Master of Science in Applied Statistics and Analytics**

The Master of Science in Applied Statistics, Analytics and Data Science is offered by the Department of Biostatistics & Data Science (p. 2043) located at the University of Kansas Medical Center (http://www.kumc.edu/). This program is offered 100% online through the University of Kansas-Edwards campus (http://edwardscampus.ku.edu/about-ku-edwards-campus/). Graduates are equipped with hands-on statistical computing skills emphasizing proper application and problem solving and are prepared for careers in the rapidly growing fields of statistics, biostatistics, analytics, and data science. Many of the most employable graduate degrees involve statistics. All coursework can be completed online, providing flexibility for working professionals who want to increase their knowledge of statistics, analytics, and data science. In response to workforce demand for knowledge and skills in analytics, data science, and statistics, students enrolled in this degree program may choose from one of three areas of emphasis:

- **Analytics Emphasis** will provide graduates with experience working with and analyzing large datasets using several of the most common statistical software tools.
- **Statistics Emphasis** will provide hands-on statistical computing in the context of statistical methods commonly applied in industry and government agencies.
- **Data Science Emphasis** will provide students with skills in statistical and computational methods for the acquisition and analysis of Big Data.

**Characteristics of Graduates**

Upon completion of the MS in Applied Statistics, Analytics and Data Science, the student should be prepared to immediately function as a statistician, analyst, and/or data scientist. Therefore, the student must have an understanding of the statistical theory underlying the methods most in-demand in the work force and should be proficient in the application of statistical methods within their field. Graduates of this program should be able to:

1. Demonstrate an understanding of statistical theory and practice.
2. Function as a collaborator on a project team.
3. Demonstrate proficiency in industry-standard statistical software.
4. Assume responsibility for the design and implementation of analyses for projects within his or her field.
5. Assist with the design and implementation of data management systems for projects within his or her field of application.
6. Prepare reports and publications resulting from said projects.
7. Effectively communicate the principles of statistics and analytics with his or her peers with varying statistical backgrounds.
8. Serve as an advocate for good statistical design and practice.

The application process for the M.S. in Applied Statistics, Analytics and Data Science is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students may be admitted to begin the fall, spring or summer semester.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent.
to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).
- Average grade of B or higher in Calculus I and II courses (i.e., single variable differentiation and integration or equivalent) or completion of STAT 655: Foundations of Mathematics for Data Science with a grade of B or higher.
- Successful completion of any computer programming language course or demonstration of mastery via credentials or work experience.
- Contact information for three references who are familiar with the applicant's work and character and who have agreed to write letters of recommendation.
- A personal statement describing your career goals and your interest in the program.
- A current resume or curriculum vitae listing scholarships/fellowships, awards and history of employment.

Graduate Record Examination (GRE) scores (or other graduate examination scores, such as the GMAT) are recommended, but not required. Applicants will be assessed based on these requirements.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs. The M.S. in Applied Statistics, Analytics and Data Science degree program consists of 30 credit hours. Students choose one or more emphasis area(s) from Analytics, Statistics, or Data Science. The program consists of a common foundation of 12 credit hours of statistics courses in addition to the 12 credit hours specific to the emphasis area and 6 credit hours of electives. A student can choose electives such that multiple emphasis areas can be completed if desired.

**Degree requirements:**

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed.

- Completion of a minimum of 30 credit hours.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- No more than two grades of C are allowed in courses required for the degree.

- Enrollment in a minimum of one credit hour the semester the student will graduate.

- Successful completion of a general examination (https://catalog.ku.edu/graduate-studies/kumc/#ThesisDefense) the semester the student will graduate. This is a comprehensive examination that is administered during the final semester of enrollment after successful completion of the required core coursework. The examination has two purposes: 1) to assess the student's strengths and weaknesses and 2) to determine whether the student should be awarded the MS degree. The examination is created and administered by a committee of at least three members of the Department Graduate Faculty. If this examination is failed, subject to committee approval, a second examination may be taken no sooner than three months later. The committee can recommend that the student leave the program following the semester in which the examination is taken. After two failures, no further examination is permitted and the student will not be awarded the degree.

- Successful completion of the following courses:

- Elective courses (minimum of 6 credit hours.) Specific courses are determined in consultation with the student's advisor. Any course taken for elective credit external to the department must be approved by the department's curriculum committee for the master's programs.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

**Annual Evaluations:**

Students are evaluated each May by their faculty advisor and Program Chair. These evaluations provide feedback to the student regarding the progress that they are making toward the degree.
Typical Plan of Study

Students may choose to pursue one of three emphasis areas for the MS in Applied Statistics, Analytics and Data Science degree. The emphasis areas were developed based on the knowledge and skillset demanded by the workforce.

- **Analytics Emphasis** will provide graduates with experience working with and analyzing large datasets using several of the most common statistical software tools.
- **Statistics Emphasis** will provide hands-on statistical computing in the context of statistical methods commonly applied in industry and government agencies.
- **Data Science Emphasis** will provide students with skills in statistical and computational methods for the acquisition and analysis of Big Data.

Below is the typical plan of study based on which emphasis is chosen.

Because the MS in Applied Statistics, Analytics and Data Science degree signifies that the holder is prepared for entry into the practice of applied statistics research, it follows that graduates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive, and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at graduation. Therefore, the following abilities and expectations must be met by all students with or without accommodations admitted to the MS program:

1. **Observation.** A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables and graphs, both in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication.** A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers, and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. **Motor.** A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, deliver lectures and make public presentations. Class requirements may also include field work in a variety of collaborative environments.
4. Intellectual, conceptual, integrative and quantitative abilities. A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher, and communicator.

5. Behavioral and social attributes. A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive, and effective professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University's Office for Academic Accommodations.

Master of Science in Health Data Science

The goal of the MS in Health Data Science program is to prepare students to work as a health data scientist in academia or health care industries. Upon completion of the MS in Health Data Science the students will have an extensive understanding of biostatistical principles and computing skills with applications in clinical and other diverse data resources.

At the completion of the MS program in Health Data Science the graduate should be able to:

• Demonstrate a broad knowledge and understanding of diverse resources and types of data
• A broad understanding of statistical principles, computing skills and apply them in health outcome data.
• Function as a collaborator on a research team.
• Assume responsibility for the computing and data visualization analyses for health science investigations.
• Assist with the design and implementation of data management systems for large health science studies.
• Prepare reports and publications resulting from health science studies.

With the rising emphasis on highly personalized data in health care, pharmaceutical, insurance and other organizations, so rises the need for health data scientists. The U.S. Bureau of Labor Statistics estimates a 31 percent growth in jobs for data scientists over the next 10 years (2019-2029) and reports a current median salary of $124,100 for data scientists. Our program will bring statistics and data science together with a focus on health data. This combination of skill sets is highly sought after and is required in many healthcare institutions and industries.

The Master of Science in Health Data Science degree typically compliments prior education and careers in:

• Pharmaceutical Industry
• Health Care
• Insurance Company
• Consulting
• Education
• Health Analytics
• Health Research
• Government
• Biotechnology

Fortune magazine ranked statistics and biostatistics among the top graduate degrees in 2015 and 2016 based on salary, growth and job satisfaction. Graduating with this degree will open new doors to a more rewarding career.

The application for admission to the M.S. in Health Data Science is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

ADMISSION REQUIREMENTS:

• A bachelor’s degree in statistics, biostatistics, mathematics or applied mathematics from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
• Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
• A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).
• Letter grade of B or better in Calculus I and II (or the equivalent).
• Successful completion of a course in any computer programming language or demonstration of mastery via credentials or work experience.
• Contact information for three references who are familiar with the applicant’s work and character and who have agreed to write letters of recommendation.
• A current resume or curriculum vitae.
• A personal statement describing your career goals and interest in the program.

Applicants will be assessed based on these requirements.

The program consists of 36 credit hours including annual evaluations and the successful completion of the Master’s Comprehensive Examination.
This 36-credit-hour program is organized into four sections: required statistics foundation, required computing foundation, required health data science foundation and an elective designed to equip students with skills in statistical and computational methods for the acquisition and analysis of Big Data. Students are required to maintain a GPA of 3.0 on a 4.0 scale.

To graduate with a MS in Health Data Science, students must pass the Master's Comprehensive Examination. The Masters Comprehensive Examination is administered after a student has successfully completed: (1) the required coursework including Categorical Data Analysis (HDSC 835), Linear Regression (HDSC 840), Statistical Learning I (HDSC 881), and Observational Health Data Analysis (HDSC 861); and (2) during the final semester of enrollment. The examination has two purposes: to assess the student’s strengths and weaknesses and to determine whether the student should be awarded the MS degree. The examination is created and administered by a committee of at least three members of the Department Graduate Faculty. If this examination is failed, a second examination may be taken no sooner than three months later and is subject to committee approval. The committee can recommend that the student leave the program following the semester in which the examination is taken. After two failures, no further examination is permitted, and the student will not be awarded the MS degree.

### Total Hours 36

Because the MS in Health Data Science degree signifies that the holder is prepared for entry into the practice of biostatistics research, it follows that graduates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The **Technical Standards** include those physical, cognitive, and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at graduation. Therefore, the following abilities and expectations must be met by all students **with or without accommodations** admitted to the MS program:

1. **Observation.** A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables and graphs, both in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication.** A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers, and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. **Motor.** A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, deliver lectures and make public presentations. Class requirements may also include field work in a variety of collaborative environments.

4. **Intellectual, conceptual, integrative and quantitative abilities.** A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher, and communicator.

5. **Behavioral and social attributes.** A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive, and effective
professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability, are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

Doctor of Philosophy in Biostatistics

The Biostatistics M.S. and Ph.D. programs were created to help meet the ever-increasing demand for biostatisticians to take leadership roles in careers as researchers and educators in academia, government, and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the Department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; statistical 'omics; bioinformatics; Bayesian methodology; data science; and machine learning.

The Ph.D. program produces biostatisticians who can develop biostatistical methodology that can be used to solve problems in public health and the biomedical sciences. In addition, graduates are prepared to apply biostatistical and epidemiology methodology for the design and analysis of public health and biomedical research investigations. Finally, graduates are well suited to function as collaborators or team leaders on research projects in the biomedical and public health sciences.

In addition to the characteristics outlined in the M.S. program, graduates of the Ph.D. program in Biostatistics will have:

1. the ability to develop careers in academia, research institutes, government, and industry;
2. a broad understanding of current statistical methods and practices in the health sciences;
3. a solid theoretical training necessary for the development and study of new statistical methods;
4. the ability to assume all responsibilities of a statistician in collaborative health science research; in particular, the graduate will have experience in the design, data management, analysis, and interpretation of a variety of experimental and observational studies;
5. experience in writing reports and giving oral presentations describing health science studies.

The application process for the Ph.D. in Biostatistics is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students are admitted for the fall semester only. Applications for the fall semester must be received by February 1st for consideration.

Admission Requirements:

- A master’s degree in statistics, biostatistics, mathematics or applied mathematics from a regionally accredited institution or a terminal degree (M.D., Ph.D.) in another field with approval from the program. Students not meeting this criteria should apply to the M.S. program (p. 2049). Completion of degree is documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- A letter grade of a B or better in Calculus I through III (or equivalent).
- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.
- Successful completion of a course in any computer programming language or demonstration of mastery via credentials or work experience.
- Research experience (beyond labs associated with lecture courses) is highly recommended, but not required.
- Contact information for three references who are familiar with the applicant's work and character and who have agreed to write letters of recommendation.
- A personal statement regarding your interest in biostatistics and in biomedical research.
- A current resume or curriculum vitae.
- A personal interview is required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or online interview may be substituted.

Applicants will be assessed based on these requirements.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs will be available.

The typical program consists of 63 credit hours, including collaborative research experience, annual evaluations, graduate examinations, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty.

Relevant prior graduate work is considered in setting up individual programs of study leading to the Ph.D. The typical course plan consisting of 63 credit hours is designed for students who have not previously completed an M.S. in biostatistics or a directly relevant area. The course plan for a student who has previously completed an M.S. in biostatistics or...
Degree requirements:

- Degree requirements are typically completed within 4 years of admission to the program, although a maximum of 8 years is allowed.
- A cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Successful completion of the Qualifying Examination. The qualifying examination is given upon completion of the following courses (or equivalent): BIOS 830, BIOS 835, BIOS 840, BIOS 871, BIOS 872, and BIOS 900. The examination has two purposes 1) to assess the student's strengths and weaknesses and 2) to determine whether the student is sufficiently prepared to continue in the Ph.D. program.
- Successful completion of the University’s Research Skills and Responsible Scholarship (https://catalog.ku.edu/graduate-studies/kumc/#ResearchSkillsandResponsibleScholarship) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of BIOS 898 Collaborative Research Experience (or equivalent) meets the Research Skills requirement.
  - Successful completion of BIOS 805 Professionalism, Ethics and Leadership in the Statistical Sciences and/or documented participation in the Biostatistics Graduate Students Association Seminar Series and completion of the KUMC Human Subjects Protection training module meets this requirement. Student must keep their certification current throughout their tenure in the Ph.D. program.
- Successful completion of the Residence Requirement (https://catalog.ku.edu/graduate-studies/kumc/#programtext) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status for a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (https://catalog.ku.edu/graduate-studies/kumc/#ComprehensiveOralExamination). The comprehensive examination is typically given when a doctoral aspirant has completed the major portion of the course work satisfactorily and met all other prerequisites to the comprehensive examination. The examination assesses the student's strengths and weaknesses and determines whether the student should continue in the Ph.D. program. The exam has a written component, an oral presentation, and an oral dissertation proposal defense. Students are recognized as formal candidates for the Ph.D. only after they have passed the comprehensive examination.
- Successful completion of Post-Comprehensive Enrollment (https://catalog.ku.edu/graduate-studies/kumc/#PostComprehensiveEnrollment) requirement.
- Enrollment in a minimum of one credit hour of dissertation BIOS 999 Doctoral Dissertation the semester the student will defend the dissertation and graduate.
- Successful completion of the Final Oral Examination (https://catalog.ku.edu/graduate-studies/kumc/#FinalOralExamination) (dissertation defense). The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly activity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities and to demonstrate an intensive focus on a problem or research area. This work is carried out under the guidance of a dissertation advisor. When the dissertation committee has accepted the completed dissertation in final draft form, and all other degree requirements have been satisfied, the chair of the committee requests (at least 3 weeks before the date of the examination) Graduate Studies approval to proceed with the final oral examination.
- Successful completion of the following Biostatistics courses (or equivalent):

- Students may take up to 12 credit hours of equivalent coursework under the STAT or HDSC prefix. Course equivalence should be determined in consultation with the student's advisor.
- Successful completion of any elective coursework as determined in consultation with the student's advisor. Any coursework under the STAT, DATA, and HDSC prefixes may be considered internal elective credit.
- Students are required to present at least once in each of the Department Journal Club and Seminar Series during their time in residence.
- Regular attendance at the Department Journal Club and Seminar Series is required.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

Annual Evaluations:

Students are evaluated each May by their graduate advisors and the graduate program director. These evaluations provide feedback to the student regarding their progress in meeting program requirements, classroom performance, and research performance.

Because the MS and PhD in Biostatistics degrees signify that the holder is prepared for entry into the practice of biostatistics research, it follows that graduates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive, and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at graduation. Therefore, the following abilities and expectations must be met by all students with or without accommodations admitted to the MS and PhD programs:

1. Observation. A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables and graphs, both in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.

2. Communication. A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers, and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. Motor. A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, deliver lectures and make public presentations. Class requirements may also include field work in a variety of collaborative environments.

4. Intellectual, conceptual, integrative and quantitative abilities. A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher, and communicator.

5. Behavioral and social attributes. A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive, and effective professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.
Applied Data Science Graduate Certificate

The Graduate Certificate in Applied Data Science teaches you how to extract, refine, analyze, and deliver data that has enormous values in today's Big Data Boom. The program provides focused knowledge to equip students with skills in statistical and computational methods for acquisition and analysis of Big Data that allows them to make an immediate impact in their field and realize a more rewarding career.

Upon completion of the Graduate Certificate in Applied Data Science, the student should be prepared to apply many of the common statistical methods to complement his or her every day job duties. Therefore, the student must have a basic understanding of the statistical theory and practice and should be proficient in the application of common statistical methods to one or more areas application. At the completion of the Graduate Certificate in Applied Data Science, the student should be able to:

1. demonstrate knowledge and understanding of the practice of data science as applicable to his or her field.
2. function as a collaborator on a research team.
3. critically evaluate the literature where data science applications are used.
4. take a leadership role in the implementation of a research project.
5. prepare reports and publications resulting from research studies.
6. serve as an advocate for proper statistical design and interpretation of results in his or her field.

The application process for the Graduate Certificate in Applied Data Science is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students may be admitted to begin the fall, spring or summer semester.

Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  - Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
  - A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Average grade of B or higher in Calculus I and II (i.e., single variable differentiation and integration or equivalent) or completion of STAT 655: Foundations of Mathematics for Data Science with a grade of B or higher.
- Successful completion of any computer programming language course or demonstration of mastery via credentials or work experience.
- Contact information for three references who are familiar with the applicant's work and character and who have agreed to write letters of recommendation.
- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.

Applicants will be assessed based on these requirements.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

Certificate Program Information: (http://catalog.ku.edu/graduate-studies/kumc/#certificatetext)

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student's application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

A minimum of 15 post-Bachelor's degree credit hours are required with a minimum GPA of 3.0 on a 4.0 scale. A typical full-time course plan is listed below for the Certificate in Applied Data Science. It consists of 15 credit hours of required coursework:

<table>

Total Hours 15

This typical Plan of Study shows the 15 credit hours of required courses to meet the requirement for completion of the Graduate Certificate in Applied Data Science program.

Because the Graduate Certificates in Biostatistics, Biostatistical Applications, Applied Statistics, Applied Data Science, and Health Data Science signify that the holder is prepared for entry into the practice of biostatistics research, it follows that students awarded the Graduate Certificates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive, and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students upon completion of the Graduate Certificate. The following abilities and expectations must be met by all students with or without accommodations admitted to the Certificates:

1. Observation. A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables and graphs, both in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.

2. Communication. A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers, and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. Motor. A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, and deliver lectures and public presentations. Class requirements may also include work in a variety of collaborative environments.

4. Intellectual, conceptual, integrative and quantitative abilities. A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher and communicator.

5. Behavioral and social attributes. A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive and effective professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

Applied Statistics Graduate Certificate

The Graduate Certificate in Applied Statistics teaches you how to “ask the data” the right questions and find the answers. The program provides students with focused knowledge in statistical theory with an emphasis on application that allows them to make an immediate impact in your field and realize a more rewarding career.

Upon completion of the Graduate Certificate in Applied Statistics, the student should be prepared to apply many of the common statistical methods to complement his or her every day job duties. Therefore, the student must have a basic understanding of the statistical theory and practice and should be proficient in the application of common statistical methods to one or more areas application. At the completion of the Graduate Certificate in Applied Statistics, the student should be able to:

1. demonstrate a basic knowledge and understanding of the statistical theory and practice as applicable to his or her field.
2. function as a collaborator on a research team.
3. critically evaluate the literature where statistical applications are used.
4. take a leadership role in the implementation of a research project.
5. prepare reports and publications resulting from research studies.
6. serve as an advocate for proper statistical design and interpretation of results in his or her field.

The application process for the Applied Statistics Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students may be admitted to begin the fall, spring or summer semester.
Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Average grade of B or higher in Calculus I and II (i.e., single variable differentiation and integration or equivalent) or completion of STAT 655: Foundations of Mathematics for Data Science with a grade of B or higher.
- Successful completion of any computer programming language course or demonstration of mastery via credentials or work experience
- Contact information for three references who are familiar with the applicant's work and character and who have agreed to write letters of recommendation.
- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.

Applicants will be assessed based on these requirements.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

Certificate Program Information: (http://catalog.ku.edu/graduate-studies/kumc/#certificatext)

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student's application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

A minimum of 15 post-Bachelor's degree credit hours are required with a minimum GPA of 3.0 on a 4.0 scale. A typical full-time course plan is listed below for the Certificate in Applied Statistics. It requires 15 credit hours of required coursework:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 820</td>
<td>SAS Programming I or STAT 823 Introduction to Programming and Applied Statistics in R</td>
<td>15</td>
</tr>
<tr>
<td>STAT 840</td>
<td>Linear Regression</td>

Total Hours 15

This typical Plan of Study shows the 15 credit hours of required courses to meet the requirement for completion of the Applied Statistics Graduate Certificate program.

Because the Graduate Certificates in Biostatistics, Biostatistical Applications, Applied Statistics, Applied Data Science, and Health Data Science signify that the holder is prepared for entry into the practice of biostatistics research, it follows that students awarded the Graduate Certificates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive, and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at upon completion of the Graduate Certificate. The following abilities and expectations must be met by all students with or without accommodations admitted to the Certificates:

1. Observation. A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables and graphs, both in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.
2. Communication. A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers and the public. Effective communication includes: the ability to understand assigned readings, lectures and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. Motor. A student must have sufficient motor function to attend classes, prepare assignments, use electronic media and deliver lectures and public presentations. Class requirements may also include work in a variety of collaborative environments.

4. Intellectual, conceptual, integrative and quantitative abilities. A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher and communicator.

5. Behavioral and social attributes. A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive and effective professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

Biostatistical Applications Graduate Certificate

The Graduate Certificate in Biostatistical Applications is awarded to those who have demonstrated specialized knowledge in a scientific field, but not to the level required by a postgraduate master’s degree. The Graduate Certificate in Biostatistical Applications requires individuals to acquire sufficient knowledge and expertise to permit them to work at the frontier of their field by:

1. becoming familiar with biostatistical methods in research, business and industry.
2. becoming excellent consumers of the literature where biostatistical applications are utilized.
3. applying many of the common biostatistical methods to compliment his or her every day job duties. Course work in this proposal is designed with this purpose in mind.

Upon completion of the Graduate Certificate in Biostatistical Applications, the student should be prepared to apply many of the common biostatistical methods to compliment his or her every day job duties. Therefore, the student must have a basic understanding of biostatistical practice and should be proficient in the application of common biostatistical methods to one or more areas application. Upon completion of the Graduate Certificate in Biostatistical Applications program, the student should be able to:

1. demonstrate a basic knowledge and understanding of the applications of some of the more common biostatistical methods.
2. function as a collaborator on a research team.
3. critically evaluate the literature where biostatistical applications are used.
4. participate in the implementation of a research project.
5. serve as an advocate for proper biostatistical application and interpretation of results in his or her field.

The application for the Biostatistical Applications Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

Admission Requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).
- A background check (https://www.kumc.edu/academic-and-student-affairs/student-resources/criminal-background-checks-for-students.html) is required during the admission process; it may affect the student’s eligibility to enter the program.
- A letter grade of B or better in calculus I (or equivalent), or a quantitative GRE score in the 70th percentile or higher.
- A letter grade B or better in a graduate-level introductory statistics course (e.g., BIOS 717 Fundamentals of Biostatistics II or equivalent.)

Note: Students not meeting this requirement may fulfill the requirement with completion of BIOS 717.

- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.
Applicants will be assessed based on these requirements.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».

Certificate Program Information: (p. 2466)

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. Students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for evidence in support of a student’s application for admission to a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, graduate certificate coursework.

Certificate requirements:

• Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.

• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.

• Enrollment in a minimum of one (1) credit hour the semester program is completed. Graduate certificates may not be granted retroactively.

• Completion of a minimum of 12 credit hours. Note: A prolonged plan of study will occur for students without the prerequisite graduate-level introductory statistics course prior to enrolling in the certificate program (see Admissions (http://catalog.ku.edu/medicine/biostatistics/statappgradcert/#admissionstext)).

• Current KU post-graduate students must complete four (4) courses from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOS 715</td>
<td>Introduction to Data Management using RedCap and SAS</td>
<td>3</td>
</tr>
<tr>
<td>BIOS 720</td>
<td>Analysis of Variance</td>
<td>3</td>
</tr>
<tr>
<td>BIOS 725</td>
<td>Applied Nonparametric Statistics</td>
<td>3</td>
</tr>
<tr>

Total Hours 9

This Plan of Study shows the 9 credit hours of required courses and shows which semester a specific elective is offered. In addition to the required courses, select two (2) elective courses for a minimum of 6 credit hours in order to meet the 15 credit hour minimum requirement for completion of the Biostatistics Graduate Certificate program.

Because the Graduate Certificates in Biostatistics, Biostatistical Applications, Applied Statistics, Applied Data Science, and Health Data Science signify that the holder is prepared for entry into the practice of biostatistics research, it follows that students awarded the Graduate
Certificates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at upon completion of the Graduate Certificate. The following abilities and expectations must be met by all students with or without accommodations admitted to the Certificates:

1. Observation. A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables, and graphs, both in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.

2. Communication. A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers, and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. Motor. A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, and deliver lectures and public presentations. Class requirements may also include work in a variety of collaborative environments.

4. Intellectual, conceptual, integrative and quantitative abilities. A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher, and communicator.

5. Behavioral and social attributes. A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive, and effective professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

Health Data Science Graduate Certificate

The Graduate Certificate in Health Data Science is awarded to those who have demonstrated specialized knowledge in a scientific field, but not to the level required by a postgraduate master’s degree. The Graduate Certificate in Biostatistical Applications requires individuals to acquire sufficient knowledge and expertise to permit them to work at the frontier of their field by:

1. becoming familiar with biostatistical methods in research, business and industry.
2. becoming excellent consumers of the literature where biostatistical applications are utilized.
3. applying many of the common biostatistical methods to compliment his or her every day job duties. Course work in this proposal is designed with this purpose in mind.

This program brings statistics and data science together with a focus on health data. This combination of skill sets is highly sought after and is required in many healthcare institutions and industries. The Graduate Certificate in Health Data Science degree typically compliments prior education and careers in:

- Pharmaceutical Industry
- Health Care
- Insurance Companies
- Consulting
- Education
- Health Analytics
- Health Research
- Government
- Biotechnology

The application for the Biostatistical Applications Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics & Data Science (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

ADMISSION REQUIREMENTS:

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).
- A background check (https://www.kumc.edu/academic-and-student-affairs/student-resources/criminal-background-checks-for-
Required Computing Foundation Courses (3 semester credit hours (SCH))
- HDSC 823 Introduction to Programming and Applied Statistics in R (3 SCH)

Required Statistics Foundation Courses (3 semester credit hours (SCH))
- HDSC 840 Linear Regression (3 SCH)

Electives (6 semester credit hours (SCH))
- HDSC 815 Introduction to Bioinformatics (3 SCH)
- HDSC 824 Data Visualization and Acquisition (3 SCH)
- HDSC 835 Categorical Data Analysis (3 SCH)
- HDSC 880 Data Mining and Analytics (3 SCH)
- HDSC 881 Statistical Learning I (3 SCH)
- HDSC 882 Statistical Learning II (3 SCH)

Total Hours 15

Because the Graduate Certificates in Health Data Science, Biostatistics, Biostatistical Applications, Applied Statistics, Applied Data Science, and Health Data Science signify that the holder is prepared for entry into the practice of biostatistics research, it follows that students awarded the Graduate Certificates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at upon completion of the Graduate Certificate. The following abilities and expectations must be met by all students with or without accommodations admitted to the Certificates:

1. Observation. A student must be able to observe and evaluate class demonstrations and field experiences relevant to the field of statistics. He or she must be able to read and comprehend text, numbers, tables, graphs, in print and displayed electronically. Observation necessitates the functional use of the senses of vision and hearing.

2. Communication. A student must be able to communicate effectively and efficiently in English in oral, written, and electronic form with other students, faculty, staff, researchers, and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions. Use of computers and other technology is imperative to this communication.

3. Motor. A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, and deliver lectures and public presentations. Class requirements may also include work in a variety of collaborative environments.
4. **Intellectual, conceptual, integrative and quantitative abilities.** A student must possess the ability to understand and read and understand documents written in English, to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher, and communicator.

5. **Behavioral and social attributes.** A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. He or she must develop mature, sensitive, and effective professional relationships with others. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

**NOTE:** Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

**Department of Cancer Biology**

The Department of Cancer Biology is a recently developed basic science department in the School of Medicine at the University of Kansas Medical Center. The missions of our department are:

1. To build a strong team of basic researchers with a collaborative and translational mindset who will discover fundamental characteristics of cancer cells that can eventually lead to novel therapeutic and preventive approaches which reduce cancer incidence, morbidities and/or mortality;

2. To understand the molecular genetic and epigenetic, biochemical, cellular and physiologic bases of cancer etiology and progression;

3. To understand the interactions between tumor cells and the microenvironments in which they find themselves;

4. To educate the next generation of cancer researchers, clinicians and patients;

5. To apply, as quickly as possible, fundamental research discoveries to patient care.

Our department is funded by grants from the National Cancer Institute, National Institutes of Health, American Cancer Society, Susan G. Komen for the Cure, Department of Defense, V-Foundation, the National Foundation for Cancer Research and from generous donations from patients, family and friends of the KU Cancer Center.

The Department of Cancer Biology is the home department for multi-departmental and institutional MS and PhD graduate programs. Students can choose from any funded graduate faculty member whose lab is doing cancer research in the KU Cancer Center. Details regarding admission and degree requirements for the M.S. (p. 2073) and Ph.D. (p. 2069) programs can be found on their respective catalog pages.

**Courses**

**CBIO 800. Mechanics of Tumor Development and Progression:** Colloquium Format. 3 Credits.

This 3 credit course is offered in the fall semester every year. This course examines the genetic alterations and cellular phenotypes involving cancer development in a practical manner. The course discusses the underlying molecular and biological principles that result from these genetic alterations and the methods/approaches to examine cancer phenotypes. By the end of the course, students should understand how cancer develops and how to design experiments to address different scientific hypotheses. In addition, students are expected to learn key points regarding how to prepare and give scientific presentation. The class will involve two, 1.5-hour lecture per week: one consists of didactic lecture by a faculty member and the other is student-led journal club related to the lecture topic. Prerequisite: College level biology.

**CBIO 820. Cellular and Molecular Mechanisms of Signal Transduction in Cancer:** Colloquium. 2 Credits.

This elective course will be offered in the spring semester every year. This course will be full of discussions on the importance of targeting signaling pathways in cancer through didactic teaching following student led discussion on the topic. The course discusses the underlying responses on signaling mechanisms in different cancers. The major theme is an understanding of how cancer cells receive, transmit and respond to environmental signals. Topics will include different complexity in signal transduction in cancer. There will be a series of lectures on the topics of signal transduction, cell cycle regulation, apoptosis and cancer. Each topic series will be followed immediately by student presentations. The presentations will complement the lectures by providing an overview of a particular topic through the in depth examination of a current research publication.

**CBIO 840. Tumor Microenvironment.** 2 Credits.

This 2-credit course is offered every other year. This course is designed to achieve two goals. First, to learn about the role of tumor microenvironment in promoting tumor growth, metastasis and response to therapy. Emphasis is given to understand the complex nature of the tumor microenvironment and use examples from specific tumor types to illustrate how the various components of the microenvironment contribute to tumor progression. By the end of the course, students should understand the components of the tumor microenvironment and their effect on the clinical course of the cancer. In addition, they should be able to design experiments to tease out the importance of these components in tumor progression and response to therapy. Secondly, the course is designed to foster higher order thinking in learners, specifically pertaining to the development and application of new theories. The class will involve pre-work and in-class discussion for a total of 3 hours per week. Pre-work including podcast lectures, individual readiness assessment tests, and associated material will be made available to the students on Blackboard two weeks before each in-class session. Prerequisite: Permission of Instructor and College Level Biology.

**CBIO 850. Cancer Center Seminar.** 1 Credits.

Seminar series covering diverse topics in cancer research.

**CBIO 860. Communicating Cancer Science.** 1 Credits.

A weekly meeting where research presentations by pre-/post- doctoral fellows will be critiqued for content and presentation skills by peers and faculty.

**CBIO 870. Analysis of Scientific Papers.** 1 Credits.
Research articles are analyzed by the student with the guidance of an instructor in terms of quality of scientific content and mechanics of the presentation. One or more articles are discussed in each tutorial session. The research topics and the instructor are chosen in accordance with the research interest of the student.

CBIO 880. Advanced Topics in Cancer Research. 1-5 Credits. Special study allowing a student to pursue a particular subject through readings, specialized laboratory work, writing, or conferences with a faculty member. Prerequisite: Consent of instructor.

CBIO 890. Master's Research in Cancer Biology. 1-10 Credits. This course is designated for research leading to the master's degree. Independent laboratory investigation approved by and under the supervision of the student's advisor, and in partial fulfillment of the requirements for the M.S. degree. Prerequisite: Consent of advisor.

CBIO 899. Master's Thesis in Cancer Biology. 1-10 Credits. This course is designated for thesis writing leading to a master's degree in Cancer Biology. The student prepares the formal thesis based upon independent research and in partial fulfillment of the requirements for the M.S. degree. The final defense of the thesis is scheduled only after the written thesis has been accepted by the student's thesis committee. Prerequisite: Consent of advisor.

CBIO 900. Carcinogenesis and Cancer Biology. 3 Credits. This is a semester long course that presents a survey of core topics in cancer biology and builds upon core IGPBS courses. The survey includes topics of etiology, genetics, signaling, biochemistry, tumor progression, metastasis, major treatment modalities and overviews of major cancer types. Students are assessed based upon class participation, presentations and examinations. Prerequisite: Completion of GSMC 850, GSMC 851, GSMC 853 and GSMC 854 or the equivalent or permission of instructor.

CBIO 990. Research for Ph.D. in Cancer Biology. 1-15 Credits. Original and independent laboratory investigation, approved by and conducted under the supervision of the student's advisor and advisory committee, in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of Advisor.

CBIO 999. Dissertation for Ph.D. in Cancer Biology. 1-10 Credits. This course is designated for dissertation writing leading to a Ph.D. degree in Cancer Biology. The student prepares the formal dissertation based upon independent research and in partial fulfillment of the requirements for the Ph.D. degree. The final defense of the dissertation is scheduled only after the written dissertation has been accepted by the student's thesis committee. Prerequisite: Consent of advisor.

Doctor of Philosophy of Cancer Biology

The Ph.D. program in Cancer Biology (CBIO) prepares the student for a career in independent research and/or teaching. The Ph.D. is typically followed by postdoctoral training in a specific field of study. Graduates of this program will be prepared for positions in industry, government, and consulting, as well as faculty positions at the college, university, and medical/graduate school level. Students mentored by CBIO faculty currently hold positions in academia, biotechnology, pharmacology, government, and scientific writing.

Students that obtain a Ph.D. in Cancer Biology are required to achieve the following expectations:

• Become knowledgeable in the areas of study included in the IGPBS (p. 2131) (Interdisciplinary Graduate Program in the Biomedical Sciences) core curriculum;
• Obtain in-depth and up-to-date expertise in a specialized area of knowledge that is appropriate for the field of your dissertation research project;
• Make original, high quality and publishable contributions to the scientific literature in your chosen research field;
• Become familiar with the scientific literature through general and specialized journals in biological research, and to develop the ability to critically evaluate the original research in your own and related fields;
• Become skilled in organizing and communicating information in oral presentations, and to respond to critical questioning;
• Develop clarity, conciseness, and precision in writing, to aid in grant application writing and publication of your original research results;
• To learn how to ask incisive scientific questions and gain experience in the design, performance and interpretation of laboratory experiments and observations.
• To gain familiarity with the preparation and writing of grant applications. (It is expected that all CBIO students identify available fellowship opportunities and apply as appropriate.)
• To prepare for the teaching as well as the research aspects of an academic career.
• To obtain instruction in research skills and responsible scholarship.

The faculty in this program have diverse research interests ranging from genetics/genomics, signaling (including, regulatory RNA, cell cycle, hormonal regulation of cancers), tumor-host interactions in carcinogenesis and metastasis, tumor immunology, preclinical research, pharmacology and drug resistance. The curriculum is flexible enough to allow students to pursue areas of special interest while maintaining breadth and rigor of cancer biology knowledge.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (http://catalog.ku.edu/medicine/graduate-program-biomedical-sciences/) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

• Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
• A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).
A background check (https://catalog.ku.edu/graduate-studies/kumc/#BackgroundCheck) is required during the admission process; it may affect the student's eligibility to enter the program.

Three letters of recommendation.

Prerequisite coursework:
- One year of general chemistry
- One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
- One year of biological sciences
- One semester of calculus
- One semester of physics

Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, and research experience. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs are available.

The CBIO program consists of coursework, research experience, and the completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree requirements:
- Degree requirements are normally completed within 4 to 6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2463) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2462). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination. For this examination, students must: exhibit the potential for original scientific thought; be familiar with the relevant literature and be able to identify significant research questions in their field; have a good understanding of the underlying principles of the experimental methodologies proposed; show an ability to critically analyze data and to anticipate experimental outcomes; and, have a good fund of knowledge of cancer biology and be proficient in the 2-3 core areas most closely related to their dissertation research.
- Successful completion of the Post-Comprehensive Enrollment (p. 2463) requirement.
- Enrollment in a minimum of one (1) credit hour of CBIO 999 Dissertation for Ph.D. in Cancer Biology the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2463) (dissertation defense). The dissertation should be comparable in scope to justify co-authorship on a rigorously peer-reviewed manuscript. Students qualifying for a CBIO PhD degree must have at least one accepted first-author peer-reviewed research publication at the time of defense and a second submitted first author publication. The Student’s Advisory Committee can petition the CBIO Director and Graduate Advisory Committee for a waiver of these requirements if the scope and impact of the first author published report is deemed of sufficient merit (such a waiver is expected to be an exception, not commonplace). The Student’s Advisory Committee can also petition the CBIO Director and Graduate Advisory Committee for a waiver if the student’s work is deemed of sufficient merit to warrant acceptance in a scientific journal, even if it has not yet been accepted at the time of the student’s dissertation defense.
- Successful Dissertation Submission and Publication (p. 2464) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (http://catalog.ku.edu/medicine/graduate-program-biomedical-sciences/) courses (or their equivalent):

• Continued attendance at the KUCC seminar (minimum 75% required determined by sign-in) in both the Fall and Spring semesters after completing 5 semesters of CBIO 850 Cancer Center Seminar.
• Annual presentation and continued attendance at Communicating Cancer Science in both the Fall and Spring semesters after completing 5 semesters of CBIO 860 Communicating Cancer Science.
• Presentation at a regional/national/international meeting at least once prior to final dissertation defense.
• Annual participation and/or attendance at the KU Medical Center Student Research Forum.
• Annual participation and/or attendance at the KU Cancer Center Research Retreats.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2142) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. *Other years’ catalogs*.

TECHNICAL STANDARDS AND REQUIREMENTS FOR THE PH.D. IN CANCER BIOLOGY

The Ph.D. degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore all students admitted must meet the following abilities and expectations.

1. Observation: The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. Communication: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. Motor: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. Intellectual-Conceptual, Integrative, and Quantitative Abilities: The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess
Admission Requirements:

To apply, visit the Program in Biomedical Sciences website for application deadlines. The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS).

The Master of Science (M.S.) program in Cancer Biology prepares the student for a career at the advanced technical level in academia, industry, or government. Graduating students may also find teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (http://catalog.ku.edu/medicine/graduate-program-biomedical-sciences/) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).

- A background check (https://catalog.ku.edu/graduate-studies/kumc/#BackgroundCheck) is required during the admission process; it may affect the student's eligibility to enter the program.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, and research experience. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs can be found at https://www.ku.edu/courses.

The Master of Science (M.S.) program in Cancer Biology prepares the student for a career at the advanced technical level in academia, industry, or government.

Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.
- Completion of a minimum of 30 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one (1) credit hour of CBIO 899 Master's Thesis in Cancer Biology the semester the student will defend the thesis and graduate.
- Successful completion of the thesis defense (p. 2458) or general examination the semester the student will graduate. The thesis should be comparable in scope to justify co-authorship on a rigorously peer-reviewed manuscript. In general, CBIO students graduating with an MS degree should have justified co-authorship on at least one peer-reviewed publication (as determined by their thesis advisory committee).
- Successful Thesis Submission and Publication (p. 2458) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (http://catalog.ku.edu/
medicine/graduate-program-biomedical-sciences/) courses (or their equivalent):

TECHNICAL STANDARDS AND REQUIREMENTS FOR THE M.S. IN CANCER BIOLOGY

The M.S. degree signifies that the holder is prepared for entry into research in industrial or academic laboratory settings. To that end, graduates must have the knowledge and skills to function in a broad variety of laboratory settings.

1. Observation: The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. Communication: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. Motor: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. Intellectual-Conceptual, Integrative, and Quantitative Abilities: The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review the provisions for reasonable accommodation will be determined.

For further information, contact the Department of Cancer Biology, University of Kansas School of Medicine, 2003 Wahl Hall West, 3901 Rainbow Blvd., Kansas City, Kansas 66160 (Phone: (913) 945-7739 E-mail: cancerbiology@kumc.edu)

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Department of History and Philosophy of Medicine

The Programs and Mission

The Department of History and Philosophy of Medicine consists of four major units: the Academic Programs, the Clendening Library, the Clendening Museum, and the KU Medical Center Archives. The Department unites these programs in its mission to advance understanding and application of ethical, historical and social analysis of health, medicine and healing.

Using the combined resources of the department we strive to teach students and colleagues how historical and social factors influence health and health care; and we inform our teaching through scholarship in the history and philosophy of medicine that merits national recognition.

The Library, Archives, and Museum act as careful stewards of the extensive historical collections and promote their use and appreciation;
while seeking to add some color to the often drab aesthetic of medical practice.

Finally, through our ethics programs we seek to deepen a moral appreciation of medicine’s role in healing through ethics education and scholarship in the medical school and ethics consultation in the University of Kansas Hospital.

Explore our featured resources:

• Clendening History of Medicine Library (http://www.kumc.edu/school-of-medicine/history-and-philosophy-of-medicine/clendening-history-of-medicine-library.html)
• University of Kansas Medical Center Archives (http://www.kumc.edu/school-of-medicine/history-and-philosophy-of-medicine/kumc-archives.html)

Although no graduate program is offered in this area, HPMD course work may be taken for graduate credit. Graduate level courses taught by History and Philosophy Medicine faculty are available through the Department of History and Philosophy of Medicine, and Department of Population Health on the medical center campus and the Department of History on the Lawrence campus.

Courses

H&PM 853. Responsible Conduct of Research. 1 Credits.
The purpose of this course is to engage research trainees in reading about, considering, and discussing the responsible conduct of science. The course is designed as an option for meeting current federal regulations, which require that all NIH training grants provide training in the responsible conduct of research. This course provides a concise overview of key subject areas in the responsible conduct of research. It is designed to make students aware of relevant guidelines, policies and codes relating to ethical research, as well as to provide the skills for identifying and resolving ethical conflicts that may arise in research. Cross-linked with PRVM 853.

Department of Microbiology, Molecular Genetics, and Immunology

The mission of the Department of Microbiology, Molecular Genetics and Immunology is to conduct high impact research that is relevant to human health and train the next generation of biomedical scientists and physicians who will advance our understanding of infection and immunity in ways that benefit humankind.

Our nationally recognized research programs, highly supported by NIH research funding, cover a variety of topics within the following themes:

• microbial physiology and pathogenesis
• virology
• immunology and host defense

Funding also provides support for pre- and postdoctoral trainees and visiting scientists, as well as for hosting national and international researchers in the Microbiology seminar series.

Courses

MICR 801. Principles of Immunology. 1 Credits.
An introductory course in immunology; cells and tissues of the immune system; B and T cells and their receptors; major histocompatibility complex; antigen presentation; regulation of immune responses; immunity and vaccination. Prerequisite: IGPBS courses or permission of instructor.

MICR 802. Principles of Virology. 1 Credits.
An introductory course in virology; replication of RNA and DNA viruses; viral RNA processing and translation; reverse transcription; virus assembly; viral pathogenesis; viruses as vectors. Prerequisite: MICR 801 or permission of instructor.

MICR 803. Principles of Bacterial Genetics and Pathogenesis. 1 Credits.
An introductory course in bacteriology; cell structure and function; chromosome and plasmid replication; genetic engineering; bacteriophage; gene regulation; quorum sensing; antibiotics; protein secretion; bacterial pathogenesis. Prerequisite: MICR 801 & MICR 802 or permission of instructor.

MICR 804. Science Communication. 1 Credits.
MICR 804. Science Communication. This 1-credit course is designed for students pursuing a graduate degree (PhD or MS) in a biomedical field. This course seeks to provide students with not just experience, but training in science communication, including both oral presentations and written communication. The goal of the course is to equip students with techniques and experience communicating to fellow scientists and non-science audiences, thus better equipping students with key skills necessary for a future in science regardless of career path. Prerequisite: An introductory course in biology, genetics, chemistry or biochemistry.

MICR 805. Teaching in Higher Education. 3 Credits.
Theoretical and practical aspects of teaching in a graduate degree program with emphasis on program and curriculum design, student assessment, communicating learning expectations, selecting optimal teaching methods aligned with expectations, understanding diverse learning styles, apprenticeship teaching, developing as a teacher and applying contemporary educational theory to the classroom or research laboratory. Prerequisite: Any graduate degree or current enrollment in a graduate degree program or permission of instructor.

MICR 808. Immunology. 3 Credits.
Molecular and cellular aspects of immunity. Specific topics will include immunoglobulin and receptor structure/function, attributes of antigenicity, antigen-antibody reactions, immunocompetent cells, cellular interactions, soluble mediators of immune responses and normal and abnormal immune regulation. Prerequisite: Permission of course director.

MICR 809. Tumor Immunology. 3 Credits.
Immune system and tumor growth; tumor immunotherapy. Analysis and applications of experimental systems and discussion of contemporary as well as classical primary literature in the field. Collaborative learning and communication skills emphasized. Prerequisite: IGPBS core curriculum or equivalent, or permission of instructor.

MICR 810. Fundamentals of Immunology. 2 Credits.
Immune cells and soluble mediators of the innate and adaptive systems, antigen and pattern recognition, lymphocyte development and activation, immune effector mechanisms, mechanisms of immune-based diseases. Analysis and applications of experimental systems and discussion of contemporary as well as classical primary literature in
Molecular Genetics of Bacteria and Phages. 2 Credits.
This 2-credit course is designed for students pursuing a graduate degree in a biomedical field. The goal of the course is to introduce the fundamental concepts of modern microbial genetics and to expose the students to commonly used experimental procedures in microbial and molecular genetics. Students will study both textbook and literature sources and will learn to apply research methods to understand the problems associated with the bacterial physiology and genetics. Active learning approaches in the classroom will require that students work collaboratively with others. Both written and oral communication will be emphasized as important learning outcomes in this course. Prerequisite: An introductory course in biology, genetics, chemistry or biochemistry.

Molecular Virology and Pathogenesis. 2 Credits.
This Virology course is aimed at graduate students who are pursuing a graduate degree in a biomedical field. It provides a contemporary understanding of how viruses are built, how they infect and replicate in host cells, how they spread and evolve, how they interact with host cells, how they eventually cause diseases, and how infection of a host can be prevented. Prerequisite: Introductory course work in cell and molecular biology, biochemistry and genetics.

Bacterial Genetics and Pathogenesis. 3 Credits.
Genetics of bacteria with emphasis on bacterial pathogens. Topics include: gene regulation, recombination, bacteriophages, transposons, genetic exchange, plasmids, genetics of virulence, bacterial adherence and colonization, immune evasion mechanisms, bacterial toxins, vaccines and antimicrobials, re-emerging bacterial diseases. Prerequisite: Introductory course work in cell and molecular biology, biochemistry and genetics.

Virology. 3 Credits.
Molecular biology of animal viruses. Aspects of various virus groups to be covered include structure, replication, and host cell responses. Lectures and student seminars. Prerequisite: Permission of the course director.

Oncogenesis Associated with Viral Infections. 3 Credits.
The course is designed primarily for students pursuing a graduate degree in a biomedical field. The course will evaluate current understanding of the various mechanisms that mediate carcinogenesis that is linked to viral infections. It will also consider strategies of circumventing virus infections as a potential way of preventing the development of tumors. Prerequisites: Course MICR 812 or permission of instructor.

Seminar in Microbiology. 1 Credits.
Reports on research and literature.

Research in Microbiology. 1-6 Credits.
This course is specifically designed to provide supervised research experience in various laboratories in the department.

Host-Pathogen Interactions. 3 Credits.
Concepts of host-pathogen interactions, with an emphasis on how pathogens interact with the innate immune system. Course is primary literature-based with a body system organized approach covering niche-specific immune factors and how pathogens circumvent these systems. Prerequisite: MICR 810 and one of two Fundamentals Courses (MICR 811 or 812) or permission of course director.

Master's Research in Microbiology. 1-10 Credits.
This course is designated for research leading to the master's degree.

Master's Thesis in Microbiology. 1-10 Credits.
This course is designated for thesis writing leading to a master's degree in Microbiology.

Advanced Topics in Microbiology. 1-8 Credits.
An advanced approach to selected topics in any of the major disciplines in microbiology. Readings and conferences, or advanced laboratory techniques.

Research for Ph.D. in Microbiology. 1-10 Credits.
This course is restricted entirely to dissertation research.

Dissertation for Ph.D. in Microbiology. 1-10 Credits.
Restricted to actual writing of dissertation.

Master of Science in Microbiology

M.S. degrees may be earned with a major emphasis in bacteriology, virology or immunology. M.S. program is designed to prepare for a diverse workforce of scientists, teachers and administrators who fill the broad science and engineering employment needs of the private and government sectors. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.
Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

### Degree Requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of the following Microbiology courses:
  - MICR 801 Fundamentals of Immunology (2)
  - MICR 811 Molecular Genetics of Bacteria and Phages (2)
  - MICR 812 Molecular Virology and Pathogenesis (2)
  - MICR 890 Master’s Research in Microbiology (1-10)
  - MICR 899 Master’s Thesis in Microbiology (if thesis option chosen, 1-10)

- Successful completion of additional elective coursework as determined in consultation with the student’s advisor or research committee. Electives may include the Microbiology courses listed below or courses from other departments.

Degree requirements and course descriptions are subject to change.
STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant's physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Doctor of Philosophy in Microbiology

A Ph.D. is required for careers in independent academic research in microbiology and immunology. The Ph.D. degree is most often followed by two or more years of postdoctoral training in a specific area of research. Ph.D. graduates in microbiology, with appropriate postdoctoral experience, are ready to compete effectively for faculty positions at a college or university, senior level positions in biotech industry and government.

The faculty in this program have diverse research interests ranging from the molecular pathogenesis of infectious agents (bacteria and viruses) to the understanding of immune function. Students with undergraduate degrees in microbiology, biochemistry or other similar disciplines are encouraged to apply.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.

- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs are applicable to the IGPBS.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

**Degree requirements:**

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
  - Successful completion of the Residence Requirement (p. 2080) prior to the semester the Oral Comprehensive Examination is scheduled.

The requirement is met by enrollment in full-time status a minimum of two semesters.

- Successful completion of the Oral Comprehensive Examination (p. 2462). After completing GSMC courses and two full semesters in the department, students start their comprehensive exam. The exam is an NIH F31 Fellowship style that provides maximum flexibility by allowing the topic to be on the student's research topic, closely related or off-topic. A pre-proposal allows the committee to provide guidance before submission of the final written comprehensive exam. Finally, there is an oral defense of the proposal. The goal is to accomplish all of this within five months. Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

- Successful completion of the Post-Comprehensive Enrollment (p. 2463) requirement.

- Enrollment in a minimum of one (1) credit hour of MICR 999 Dissertation for Ph.D. in Microbiology the semester the student will defend dissertation and graduate.

- Successful completion of the Final Oral Examination (p. 2463) (dissertation defense.) The doctoral candidate prepares a written dissertation detailing the results of their original research.

- Successful Dissertation Submission and Publication (p. 2464) (according to Office of Graduate Studies policy.)

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):
  **Code** | **Title** | **Hours**
  --- | --- | ---
  GSMC 850 | Proteins and Metabolism | 2
  GSMC 851 | Molecular Genetics | 2
  GSMC 852 | Introduction to Biomedical Research I | 2
  GSMC 853 | Cellular Structure | 2
  GSMC 854 | Cell Communication | 2
  GSMC 855 | Introduction to Biomedical Research II | 2
  GSMC 856 | Introduction to Research Ethics | 1
  GSMC 857 | Biographics | 1
  GSMC 858 | Introduction to Faculty Research (Direct admits do not take this course.) | 1
  GSMC 859 | Research Rotations | 1-4

- Successful completion of the following Microbiology courses:
  **Code** | **Title** | **Hours**
  --- | --- | ---
  Take two of the following courses:
  MICR 810 | Fundamentals of Immunology | 2
  MICR 811 | Molecular Genetics of Bacteria and Phages | 2
  MICR 812 | Molecular Virology and Pathogenesis | 2
  Take the following courses:
  MICR 830 | Seminar in Microbiology | 1
  MICR 835 | Research in Microbiology | 1-6
  MICR 990 | Research for Ph.D. in Microbiology | 1-10
  MICR 999 | Dissertation for Ph.D. in Microbiology | 1-10

- Successful completion of two of the following elective courses; one must be an advanced course in the student's research area.

Courses are selected in consultation with the student's advisor. One of these courses must be completed prior to scheduling the oral comprehensive exam.
### Typical Plan of Study

Total Hours 34-93

TECHNICAL STANDARDS AND REQUIREMENTS FOR THE MICROBIOLOGY GRADUATE PROGRAM

The Ph.D. degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore, all students admitted for graduate study must meet the following abilities and expectations.

1. **Observation**: The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. **Communication**: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor**: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities**: These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes**: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

For further information, contact the Microbiology Graduate Program, University of Kansas Medical Center, 3025 Wahl Hall West, 3901 Rainbow Blvd., Kansas City, Kansas 66160. Phone: (913) 588-7099; Fax: (913) 588-7295; E-mail: micrograd@kumc.edu.

**STUDENT POLICY ON INFECTION DISEASE**

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

**DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS**

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

**Department of Molecular and Integrative Physiology**

Research programs in the Department of Molecular and Integrative Physiology cover the range from analysis of genes to analysis of whole organisms and fall into three broad categories:

- This area includes the investigation of physiology and pathophysiology in experimental models ranging from cellular
preparations to intact animals and humans. Current research is directed at studies of the microvascular system, cardiovascular system, hypoxia and oxygen transport in the respiratory system, metabolism within adipose, muscle and liver, and plasma membrane and fluid transport within the renal system. Research also encompasses various aspects of cancer biology including both in vitro and in vivo approaches.

- **Neuroscience** (https://www.kumc.edu/school-of-medicine/neuroscience.html)
  - This area includes the investigation of neural function in normal and disease states, and addresses problems at different levels ranging from the regulation of nervous system genes to central nervous system mechanisms controlling arm movement in the intact animal. Current research includes the study of development, transplantation, demyelinating diseases, recovery of function following peripheral and central nervous system injury and stroke, motor and cognitive defects associated with HIV, neurophysiological, behavioral and molecular measures of early development, central mechanisms of hearing, neurotransmitters and plasticity.

  - This area includes the investigation of the hypothalamic-pituitary-gonadal axis, as well as uterine and placental function. Current studies are directed at mechanisms of hormone action, cell motility, cell-cell communication, cell and tissue differentiation and growth, cytokines and growth factors, gene expression and control of enzyme regulation in ova, tests, sperm, hypothalamic-pituitary axis, preimplantation embryo, trophoblast/placenta and uterus. Mammalian and invertebrate reproductive models including transgenic and gene knockout mice provide fundamental information related to cell biology, endocrinology, and developmental biology.

The common thread is that all programs endeavor to understand biological function in health and disease. Nearly all faculty members have served on national advisory committees to major funding agencies such as the National Institutes of Health and as reviewers and editors to major scientific publications. The program provides outstanding didactic instruction and laboratory experiences that enable students to become effective teachers and independent investigators. The department offers the Ph.D. degree, and the combined M.D./Ph.D. degrees in conjunction with the School of Medicine. An M.S. degree may be granted in appropriate circumstances.

**Courses**

**PHSL 784. Faculty Research Programs. 1 Credits.**

The new student will be introduced to the faculty research programs. Each faculty member will present his/her research interests using one or more of the following formats: laboratory demonstrations, computer simulations and lectures. The objectives are to assist the new student in selecting his/her area of dissertation research and acquainting the new student with the department research resources.

**PHSL 834. Reproductive Physiology. 5 Credits.**

All aspects of reproductive physiology including an in depth study of ovarian and testicular development/function, neuroendocrine development/function, implantation, placenta, puberty, pregnancy and fertility regulation are covered. Historical and current scientific literature will be used to support a graduate level text and didactic lectures. Prerequisite: a general endocrinology/physiology course, an equivalent course and/or consent of instructor.

**PHSL 835. Integrative Physiology of Exercise. 3 Credits.**

To understand how the major physiological systems of the body respond to exercise with an emphasis on integration and function. Historical and current scientific literature will be used to generate discussion and support didactic material. Fundamentals of exercise physiology will be covered, but a background in exercise physiology is not required. Prerequisite: a general physiology course, an equivalent course and/or consent of instructor.

**PHSL 838. Advanced Topics. 1-3 Credits.**

Special studies designed and arranged on an individual basis to allow a student to pursue a particular subject through reading, special laboratory work, and conferences with a senior staff member.

**PHSL 840. Advanced Genetic Analysis. 3 Credits.**

This course will focus on principles that underlie genetic analysis, including mutation, complementation, recombination, segregation, and regulation. The genetics of commonly used model organisms such as yeast, flies, worms and mice will be examined, classic genetic screens performed to study phage assembly, cell cycle regulation, sex determination and X-chromosome inactivation will be discussed and modern-day techniques used to study inheritance and gene function in various systems will be analyzed. Human genetic analysis will also be covered, including population genetics, techniques for gene mapping, inherited diseases, genetic testing and gene therapy. Through reading and discussion of scientific literature and problem-based homework and exams, students will learn how to evaluate and interpret genetic data as well as develop and design genetic strategies to solve current biological problems. Prerequisite: Completion of IGPBS Core Curriculum or equivalent, or permission of Course Director.

**PHSL 842. Comprehensive Human Physiology. 5 Credits.**

Advanced course on modern human physiology. The course focuses on organ systems of the human body including nervous, cardiovascular, endocrine, digestive, respiratory, reproductive and urinary systems. This course emphasizes the use of modern experimental approaches that take advantage of cellular and molecular technologies. Prerequisite: NONE

**PHSL 843. Physiology of Disease. 3 Credits.**

This course will cover physiological changes associated with representative diseases of major organ systems (endocrine, muscle, cardiovascular, respiratory, renal, gastrointestinal, immune, nervous, and reproductive). Example diseases to be covered include: diabetes, pituitary disorders, osteoporosis, obesity, non-alcoholic fatty liver disease, muscular dystrophy, hypertension, chronic obstructive pulmonary disease, asthma, glomerulonephritis, polycystic kidney disease, gastroesophageal reflux disease, inflammatory bowel diseases, rheumatoid arthritis, multiple sclerosis, infertility, endometriosis, and pregnancy complications. Class will include lectures, faculty-mentored student presentations, evaluations of research papers, and discussions. LEC Prerequisite: Comprehensive Human Physiology (PHSL 842), an equivalent course, or consent of Course Director.

**PHSL 844. Neurophysiology. 3 Credits.**

Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NEUS 844 and NURO 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor.

**PHSL 846. Advanced Neuroscience. 4 Credits.**

Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience
research. (Same as ANAT 846, PHCL 846, NURO 846 and NEUS 846.) Prerequisite: Permission of the course director.

PHSL 847. Developmental Neurobiology. 2 Credits.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847, NURO 847, and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor.

PHSL 848. Molecular Mechanisms of Neurological Disorders. 3 Credits.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, NURO 848, PHCL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor.

PHSL 850. Research. 1-10 Credits.
Original laboratory investigation conducted under the supervision of a senior staff member.

PHSL 851. Seminar. 1 Credits.
Student participation (attendance and presentation) in weekly Departmental seminar series. The topics examined in these seminars are dictated by the interests of students and staff. Prerequisite: student must have passed their oral comprehensive exam.

PHSL 899. Master's Thesis. 1-5 Credits.
Preparation of the formal thesis based on library research or independent research and in partial fulfillment of the requirements for the master's degree. Credits will be given only after the thesis has been accepted by the student's thesis committee.

PHSL 999. Doctoral Dissertation. 1-10 Credits.
Preparation of the Dissertation based on original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student's dissertation committee.

Master of Science in Molecular and Integrative Physiology

The Master of Science (M.S.) in Molecular and Integrative Physiology prepares the student for a career at the advanced technical level in academia, industry or government. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:
- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student's eligibility to enter the program.

**TECHNICAL STANDARDS AND REQUIREMENTS FOR THE DEPARTMENT OF MOLECULAR AND INTEGRATIVE PHYSIOLOGY**

The M.S. degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore all students admitted for graduate study must meet the following abilities and expectations.

1. **Observation:** The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet these expectations will be reviewed and assessed by the Departmental Graduate Student Advisory Committee and KUMC Technical Support staff. At this review the provisions for reasonable accommodation will be determined.

For further information, contact Graduate Director, Department of Molecular and Integrative Physiology, G011 Wahl Hall East, Mail Stop 3043, University of Kansas Medical Center, 3901 Rainbow Blvd., Kansas City, Kansas 66160 Phone: (913) 588-7025
STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Departmental Graduate Student Advisory Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Doctor of Philosophy in Molecular and Integrative Physiology

The Ph.D. in Molecular and Integrative Physiology prepares the student for a career in independent research in the broad area of Physiology. The Ph.D. is most often followed by one or more years of postdoctoral training in a specific area of research. Acquisition of a Ph.D. in Molecular and Integrative Physiology allows the individual to pursue positions in industry or government and following postdoctoral experience opportunities are available at the college or university level.

Upon acceptance into the graduate program in Molecular and Integrative Physiology, the student will select a research track for their subsequent studies. Three different tracks are available to the student:

- Cellular & Integrative Physiology
- Neuroscience
- Reproduction & Development

Each track has specialized curriculum requirements that must be followed for degree completion.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree Requirements:

- Degree requirements are normally completed within 6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
• Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.

• Successful completion of the Residence Requirement (p. 2087) (http://www.kumc.edu/Documents/graduate%20studies/Residence%20Requirement%20PhD%2016-Oct(0).pdf) by enrollment in full-time status a minimum of two semesters prior to the semester the Oral Comprehensive Examination is scheduled.

• Successful completion of the Oral Comprehensive Examination (p. 2462). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

• Successful completion of the Post-Comprehensive Enrollment (p. 2463) requirement.

• Enrollment in a minimum of one (1) credit hour of PHSL 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.

• Successful completion of the Final Oral Examination (p. 2463) (dissertation defense.)

• Successful Dissertation Submission and Publication (p. 2464) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

medical records for review by the Student Health Physician in order to determine eligibility for admission.

**DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS**

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

**Department of Pathology & Laboratory Medicine**

The Department of Pathology & Laboratory Medicine crosses the bridge between basic science and clinical practice and involves the study and diagnosis of disease. We emphasize innovative, service-oriented programs that encompass a full spectrum of medical practice. Our Mission is to provide excellent teaching, research, patient care and community service and to meet the health needs of Kansas and the community at large. Our Aim is to provide a supportive work environment so that each individual can excel and pursue avenues that lead to recognition within the medical community and benefit healthcare at large.

The Department provides vital patient services to the Hospital, Greater Kansas City Metropolitan Area and outlying medical facilities through our clinical laboratory (https://www.kumc.edu/school-of-medicine/academics/departments/pathology/divisions/laboratory-medicine.html) and anatomic (surgical) services (http://www.kumc.edu/school-of-medicine/pathology/anatomicsurgical-services.html). Faculty are board-accredited and the department provides a full spectrum of subspecialized expertise. The clinical laboratory processes over 3 million samples per year including the services of robotic automation and is accredited by the American Association of Blood Banks (AABB) (http://www.aabb.org/Pages/Homepage.aspx), College of American Pathologists (CAP) (https://www.cap.org/) and Foundation for the Accreditation of Cellular Therapy (FACT) (http://www.factwebsite.org/). The core laboratory reviews over 38,000 surgical pathology specimens per year, reflecting 9% year over year case growth; cytopathologists review 13,000 ascensions per year. 2,500 bone marrow ascensions are reviewed per year. The Department provides material to the University of Kansas Cancer Center’s Biospecimen Tissue Laboratory towards ongoing research and development of new and improved treatment modalities.

Basic Science research is conducted through our Division of Cancer & Developmental Biology (https://www.kumc.edu/school-of-medicine/academics/departments/pathology/divisions/cancer-and-developmental-biology.html) and includes cancer biology, developmental biology and cell differentiation, stem cell biology and microbial and viral pathogenesis. Our laboratories are supported by external funding from sources including the NIH (http://www.nih.gov/) as well as private resources; faculty and laboratories reside on both sides of the state line at the KUMC (http://www.kumc.edu/) and Stowers Institute (http://www.stowers.org/) campuses. Faculty numbers have increased dramatically since 2004, from 3 (2 at Stowers) in 2004 to 21 (4 at Stowers) in 2019.

The Department is committed to education (http://www.kumc.edu/school-of-medicine/pathology/education-programs.html) through its basic science research, medical and continuing medical education programs. Basic Science education is sponsored through our Graduate (http://www.kumc.edu/school-of-medicine/pathology/basic-science-graduate-program.html) and Postdoctoral programs and has grown commensurate with division laboratory expansion; there are currently 17 graduate students and 11 postdoctoral fellows enrolled in basic science programs and labs. Medical education is supported by our clinical and anatomic faculty and includes residency and postdoctoral hematopathology, surgical and cytopathology fellowships, post-sophomore fellowships, phase II elective rotations and phase I teaching services to the University of Kansas’ School of Medicine. Board accredited Continuing Medical Education is supported through a monthly Grand Rounds series that emphasizes current, applicable clinical and research topics; the department as well provides endowed subspecialty lectureships. Both our research and clinical/anatomic divisions provide regularly scheduled programs targeting cutting-edge basic science, subspecialized pathology topics and translational research, encouraging advancement of patient care.

Please refer to pages included in this catalog on both Master of Science and Doctor of Philosophy in Pathology for additional information regarding each program.

**Courses**

**PATH 803. Stem Cell Biology. 2 Credits.**

Current concepts in the study of stem cells and the clinical potential in modern disease treatment. Students will learn concepts of stem cells: origin, regulation of pluripotency, and differentiative potential; experimental isolation and manipulation; and clinical application of isolated stem cells. Current scientific literature will be used to highlight recent advances in stem cell biology. Special emphasis will be placed on the ethical and legal issues surrounding the use of stem cells of both adult and embryonic origin. Prerequisite: Course in cell biology or equivalent; consent of instructor.

**PATH 804. Selected Topics in Signal Transduction. 1 Credits.**

A survey of the basic principles and contemporary literature of signal transduction pathways involved in cancer development and developmental biology. Faculty lecture and student presentations will address selected topics in cellular signal transduction. Student seminars will focus on the scientific content of the publication with emphasis on appropriate presentation of background information, experimental methods, results and potential future directions. Critical discussion of papers will be provided by participating students and faculty. Prerequisite: Course in Molecular Biology or equivalent; consent of instructor.

**PATH 805. Seminars in Pathology. 1 Credits.**

Presentation of Pathology Department graduate student research-in-progress. Students will conduct a one-hour seminar in which updates of their current research project(s) in pathology will be reported. The seminars are interactive and students are encouraged to participate in discussion of the presented work. Prerequisite: Graduate standing in the Pathology program.

**PATH 806. Epigenetics. 2 Credits.**

Current concepts in epigenetic regulation of transcription, including its involvement in disease. Current scientific literature will be used to examine recent advances in the role of epigenetic regulation in transcription and its impact on cellular processes, including growth, differentiation, development, and disease. Students will learn the fundamental concepts of epigenetic regulation and the role of the epigenetic regulation in various gene expression systems. The role of
epigenetics in long-range DNA interactions will also be studied, with an emphasis on enhancer, silencer, and locus control region function. Recent advances in the role of epigenetics in disease, including cancer will also be examined. The course will examine current experimental methods to study epigenetics and gene regulation. Prerequisite: Course in Molecular Biology; consent of instructor.

**PATH 890. Research in Pathology. 1-10 Credits.**
RSH. Replaces PATH 911 in prior catalogs. Enrollment for masters students and PhD students who have yet to successfully complete the oral comprehensive examination.

**PATH 899. Master’s Thesis. 1-7 Credits.**

**PATH 912. Advanced Topics. 1-3 Credits.**
Offered by arrangement. Prerequisite: Approval of the instructor and completion of the IGPBS core curriculum or its equivalent.

**PATH 913. Introduction to Grant Proposal Writing. 1 Credit.**
This course will teach the fundamentals of writing a grant proposal with an emphasis on NIH proposals. This course is open to any graduate students interested in applying for pre-doctoral fellowships, and especially to graduate students in the Department of Pathology who will be conducting their comprehensive qualifying exams in the upcoming year. This course involves a combination of didactic lectures, student coursework and discussion. This course will include different principal investigators from the Pathology Department as guest speakers. Topics will include different sources of funding, grant submission and post-submission review process. However, the core component of this course will involve teaching the basic framework and components of an NIH R01 application. This course is designed to give practical structural guidance in scientific writing at a professional level and does not give guidance on specific research projects. Prerequisite: Consent of instructor.

**PATH 914. Bioinformatics Computing. 3 Credits.**
The course is being introduced with the demand of current biological research, which relies on an extensive amount of data analyses, including single-cell RNA-seq and single-cell spatial transcriptomics, ATAC-seq, CLIP-Seq, etc. The course syllabus includes an advanced-level introduction to Linux operating system. It also includes two programming languages, Python and R.

**PATH 990. Doctoral Research in Pathology. 1-10 Credits.**
RSH for PhD candidates who have successfully completed the oral comprehensive examination. Prerequisite: PATH 890.

**PATH 999. Doctoral Dissertation. 1-7 Credits.**
Prerequisite: Consent of instructor.

**Master of Science in Pathology**
The Master of Science in Pathology provides comprehensive training in understanding the molecular basis of disease and the fundamental mechanisms of cell growth and differentiation. It prepares the student for either a career in advanced academia or lays the base for continued terminal education. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission requirements:**
- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs–.

**Degree requirements:**
- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Participation in faculty advisory committee meetings starting after 12 months in the program. Meetings at six-month intervals are recommended and required every 12 months with greater frequency as the student nears his/her thesis defense.
- Enrollment in a minimum of one (1) credit hour of PATH 899 Master’s Thesis the semester the student will defend and graduate.
- Successful completion of a thesis defense (p. 2458). The thesis defense may be undertaken after the student has completed all requisite and elective coursework and has met the University’s minimum credit hour requirement. The examination consists of both a final written submission of the student’s research project and related oral presentation. It should reflect the student’s current fund
of knowledge, research skills and ability to progress in an industrial or education venue which may include pursuance of a terminal degree. It may be undertaken only after the student’s advisory committee has approved the student’s project and recommended the defense. The student is required to submit a final project for approval to his or her mentor, thesis defense examination committee and director of Pathology’s graduate program a minimum of four weeks in advance of the examination; only when the student has successfully completed this stage will the request for examination be submitted to Graduate Studies for approval to defend (must be at least three weeks in advance of the examination).

- Successful thesis submission and publication (p. 2458) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

TECHNICAL STANDARDS AND REQUIREMENTS FOR GRADUATE PROGRAMS IN PATHOLOGY & LABORATORY MEDICINE
The Masters degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore all students admitted for graduate study must meet the following abilities and expectations.

1. **Observation:** The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

**STUDENT POLICY ON INFECTIOUS DISEASE**

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must inform the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

**Doctor of Philosophy in Pathology**

The Department of Pathology and Laboratory Medicine offers a graduate program leading to the PhD degree including research opportunities with emphasis on developmental biology and cell differentiation, cancer biology, stem cell biology, microbial and viral pathogenesis, gene regulation and experimental pathology. This curriculum is designed for advanced research study in molecular and cellular biology and experimental pathology.

The course requirements of the Pathology Department Graduate Program are designed to provide maximum flexibility for the student's specialized needs. Students enrolled in the program are required to take graduate coursework in fields related to molecular and experimental pathology and to choose electives from either Pathology or other Medical Center departments related to their major dissertation work. After passing the Comprehensive Examination, students will devote most of their time to laboratory experimentation and developing a research project. Substantial portions of the research efforts should result in published works in peer-reviewed scientific journals.

The Doctorate of Philosophy in Pathology and Laboratory Medicine provides comprehensive training in understanding the molecular basis of disease and the fundamental mechanisms of cell growth and differentiation. Subspecialized research interests in cancer biology, reproductive and developmental biology, hematopoiesis, vascular biology, and microbial and viral pathogenesis are supported through required and elective coursework and laboratory activities. A Pathology PhD will afford the student the flexibility of tailoring a course of study towards specific research interests and goals, and prepare the student for a career in advanced academia or positions in industry.

**STUDENT POLICY ON INFECTIOUS DISEASE**

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant's physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must inform the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

**DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS**

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook (http://www.kumc.edu/student-handbook.html). Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.
Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the PhD.

Degree requirements:

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 856 Biographics, GSCM 852 Introduction to Biomedical Research I and GSCM 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  - Successful completion of the Residence Requirement (p. ) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
  - Participation in faculty advisory committee meetings starting after 12 months in the program. Meetings at six-month intervals are recommended and required every 12 months with greater frequency as the student nears his/her oral comprehensive examination and dissertation defense.
- Successful completion of the Oral Comprehensive Examination (p. 2462). The examination is expected to be undertaken after the student has completed all requisite and elective coursework and approximately half-way through the program (e.g., 30th month in a five-year program). The examination consists of both a written research proposal and oral presentation and is intended to delineate the student’s current fund of knowledge, research skills and ability to progress to a terminal degree in the department. It may be undertaken only after the student’s advisory committee has approved the research proposal and recommended examination. The student will then submit a final version of the written research proposal for approval to his or her mentor, oral comprehensive examination committee and director of Pathology’s graduate program a minimum of three weeks in advance of the examination; only when the student has successfully completed this stage will the request for examination be submitted to Graduate Studies for approval to defend (must be at least two weeks in advance of the examination). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of the Post-Comprehensive Enrollment (p. 2463) requirement.
- Enrollment in a minimum of one (1) credit hour of PATH 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2463) (dissertation defense). The student will undertake this examination only after a preliminary draft and presentation of dissertation project has been successfully completed and accepted by the student’s mentor and faculty advisory committee. A final draft is required to be submitted at least four weeks prior to defense and is to be presented to the student’s mentor, dissertation defense committee and director of Pathology’s graduate program. Only when the student has successfully completed this stage will the request for examination be submitted to Graduate Studies for consideration (must be at least three weeks in advance of the examination).
- Successful Dissertation Submission and Publication (p. 2464) (according to Office of Graduate Studies policy).
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent - specifically for students who have completed a master’s degree or have taken masters level courses at a different institution prior to joining the pathology program) Equivalents must be approved
by the Director of the Pathology Graduate Program and the Office of
Graduate Studies:

TECHNICAL STANDARDS AND REQUIREMENTS FOR GRADUATE PROGRAMS IN PATHOLOGY & LABORATORY MEDICINE

The PhD degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore all students admitted for graduate study must meet the following abilities and expectations.

1. **Observation:** The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review, the provisions for reasonable accommodation will be determined.

For further information, contact either Soumen Paul, PhD, Pathology & Laboratory Medicine Graduate Program Director, spaul2@kumc.edu, Phone: 913.588.7236 or Tamara Osborn, Graduate Studies Program Coordinator, (lyonkey@kumc.edu/tosborn@kumc.edu, Phone: 913.588.7192, Fax: 913.588.7073.

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook (http://www.kumc.edu/student-handbook.html). Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.
Department of Pharmacology, Toxicology, and Therapeutics

Pharmacology and Toxicology together form a discipline that examines the interactions of chemical substances with living systems. Pharmacology focuses on the properties of drugs, including their sites of action, processing by the human body, and therapeutic uses. Toxicology studies the adverse effects of chemicals such as environmental agents and synthetic compounds, including drugs and their metabolites, and the means to prevent or treat their effects. Because the study of chemicals requires an intimate knowledge of the biological systems affected, Pharmacology and Toxicology are by necessity an integrative discipline that studies the effects of chemicals at the molecular, cellular, organ, organismal, and population levels.

Faculty members in the Department of Pharmacology, Toxicology & Therapeutics at KUMC have diverse research interests. These research topics are essential for developing new drugs and are fundamental to determining the safety of all chemicals. Thus, our students obtain a broad educational background that prepares them for a career in research and scholarly work in a variety of settings, including academia, the pharmaceutical or biotechnology industries, or governmental agencies. Our department faculty has an excellent record of training students, and our graduates have become scientific leaders in academia, government and industry.

During the last five years, the Department faculty has undergone major changes with the addition of several tenure-track and research-track faculty, with a major focus in liver pathobiology and toxicology. This was facilitated in part by a Center of Biomedical Research Excellence (COBRE) grant from the National Institutes of Health, and has been accompanied by major new equipment purchases. The Department is been housed in state-of-the-art research space in the Hemenway Life Science Innovation Center. These resources provide an exciting environment that fosters personal and professional development in an atmosphere with ample opportunities for independent scholarship and strong collaborative activities.

Research opportunities are available for graduate students in the laboratories of faculty members throughout the department. Pharmacology faculty members have research interests in molecular and cellular neuropharmacology, neuromodulation, and the role of hormones and diet constituents on brain function. In addition, department faculty members study pharmacokinetics of drugs (absorption, distribution, biotransformation and excretion) and the biology and functional significance of drug transporters such as organic anion transporting polypeptides (OATPs), organic cation transporters (OCTs), and ATP binding cassette transporters. Our faculty members’ research interests in Toxicology include the toxicity of environmental chemicals, mechanisms of drug- and chemical-induced hepatotoxicity (necrosis, apoptosis, autophagy, inflammation, fibrosis) and liver regeneration. Furthermore, they study the pathogenesis of hepatocellular carcinoma, alcoholic hepatitis, steatohepatitis and cholestatic liver disease, and the role of nuclear receptors in these disease processes. Likewise, in Therapeutics, faculty members use metabolomics approaches to study herbal medicines’ ability to cause drug interactions with prescribed drugs. In addition, studies are being performed to understand which drugs enter the liver by specific transporters, and how genetics determine why the response to drugs can vary between individual patients (pharmacogenomics).

Courses

PHCL 761. General Principles of Pharmacology. 1 Credits.
General principles of pharmacology, including pharmacokinetics, pharmacodynamics, adverse effects, pharmacotherapeutics plus miscellaneous agents (antacids, cathartics, biologicals). Open to advanced B.S. students and graduate students in Nursing, Allied Health, and other health related programs. Independent study program with use of computer assisted instruction, textbooks, syllabi, consultation with staff and exams as primary teaching instruments. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: An Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor.

PHCL 762. Pharmacology of the Autonomic Nervous System. 1 Credits.
General principles of the autonomic nervous system, cholinergics, muscarinics, nicotinics, neuromuscular blockers, beta adrenergics, alpha adrenergics, and miscellaneous ANS agents. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor.

PHCL 763. Cardiovascular-Renal Pharmacology. 1 Credits.
Antihypertensives, antiarrhythmics, vasodilators, cardiac glycosides, serotonin, histamine, polypeptides, diuretics, antilipidemics. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor.

PHCL 764. Pharmacology of the Central Nervous System. 1 Credits.
General principles of the central nervous system, stimulants, hallucinogens, depressants (hypnotics and sedatives), general and local anesthesia, antiparkinson agents, tranquilizers, analgesics and anticonvulsants. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor.

PHCL 765. Chemotherapy. 1 Credits.
Principles of chemotherapy, sulfonamides, penicillins, aminoglycosides, anticancer and antifungal agents, antimarialis, broad spectrum antibiotics, antiparastic agents, and antiseptics. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor.

PHCL 766. Blood-Endocrine Pharmacology. 1 Credits.
General principles of endocrine function and use, thyroid drugs, insulin, sex hormones, oxytocics, adrenal steroids, antiinflammatory agents, blood drugs, anticoagulants and vitamins. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and
the instructor. In addition, the enrollment card must be stamped by the instructor.

PHCL 767. Toxicology. 1 Credits.
General principles of toxicology, clinical toxicology, solvents, metals, gases and dusts, corrosives, plant and animal toxins, pesticides, radiation, miscellaneous. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor.

PHCL 809. Seminar in Pharmacology. 1 Credits.
Weekly meetings.

PHCL 846. Advanced Neuroscience. 4 Credits.
Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHSL 846, NURO 846 and NEUS 846.) Prerequisite: Permission of the course director.

PHCL 848. Molecular Mechanisms of Neurological Disorders. 3 Credits.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, NURO 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor.

PHCL 875. Mitochondrial Biology (Form and function), Bioenergetics and Metabolism in human disease. 3 Credits.
This course is designed to explore mitochondrial physiology from perspectives of research, diagnostics, and clinic, from molecule, to man, to population. The course is an interactive program which goes beyond the textbook to actively engage the learner in current state-of-the-art laboratory and clinical practice. Starting from a basic introduction to cellular bioenergetics, the course focuses on the mitochondrial oxidative phosphorylation system, plasticity of mitochondrial structure/microscopy, mtDNA genetics, maintenance and gene expression, biogenesis of the oxphos system, protein dynamics, and drug development. The diagnostic sessions will highlight existing and novel genetic and biochemical diagnostic approaches with a special focus on the development of biomarkers for disease. During the clinical sessions the learner will be introduced to the clinical presentation of mitochondrial disorders, the personal perspective of the patient, anamnesis, clinical guidelines, case reports, treatment options, trials, and the development of outcome measures. As part of the course participants are expected to develop a translational mini-project in pairs of which the results are presented on the final course day. Prerequisite: Successful completion of the Interdisciplinary Program in Biomedical Sciences or permission of the Instructor.

PHCL 880. Essentials of Pharmacology. 4 Credits.
Introduction to Pharmacology for Graduate Students. Autonomic, Cardiovascular and Renal, Endocrine, Neuro, Antivirals Pharmacology. Autacoids; Workshop; Historical and Contemporary Methods used to Elucidate Mechanisms of Drug Action. Prerequisite: Successful completion of the Interdisciplinary Program in Biomedical Sciences or permission of the Instructor.

PHCL 890. Research in Pharmacology. 1-10 Credits.
For graduate students beginning their research training.

PHCL 898. Principles of Pharmacology. 1 Credits.
Chemical fundamentals in structure, actions and metabolism of drugs and toxicants. Included are molecular features of drugs and toxicants, stereoisomerism, receptor theory, dose-response relationships, agonists and antagonists, absorption, pharmacokinetics and structure-activity relationships.

PHCL 899. Thesis in Pharmacology. 1-10 Credits.
For students in a master's program in pharmacology.

PHCL 939. Carcinogenesis and Cancer Biology. 3 Credits.
Multidisciplinary approach. Cancer pathology. Mutagenesis, Genetics, Carcinogen metabolism. Signal Transduction, Apoptosis, Initiation and promotion. Tumor Immunology, Cell proliferation. Protooncogenes and suppressor genes. Hormonal carcinogenesis. Cancer epidemiology. Dietary and environmental causation and prevention. Cancer in various organ systems. (Same as PATH 939 and PTOX 939.) Prerequisite: Completion of one of the following: IGPBS modules 1-4 or equivalent or permission of instructor.

PHCL 990. Research for Dissertation in Pharmacology. 1-10 Credits.
Prerequisite: PHCL 890.

PHCL 999. Dissertation in Pharmacology. 1-10 Credits.
Prerequisite: Open to students of advanced standing enrolled in the doctoral program in Pharmacology.

Courses

PHRM 910. Research in Pharmacology. 4 Credits.
Selected research problems may be investigated under the direction of individual staff members. A description of current staff research projects is available from the department. Prerequisite: Permission of department.

PHRM 911. Readings in Pharmacology. 2-10 Credits.
Selected topics for reading in advanced texts and original papers in pharmacology. A paper and Journal Club presentation of the selected topic are required. Prerequisite: Permission of department.

PHRM 914. Advanced Pharmacology. 4 Credits.
Consultant rounds, poison control, immunopharmacology, and environmental health. Prerequisite: Consent of instructor.

Courses

PTOX 830. Introduction to Clinical and Translational Cancer Research. 3 Credits.
Instruct students in developmental steps used in translating a basic science experiment with clinical applications into a proof of concept application and human trial. Multidisciplinary approach; lectures from faculty in Pharmacology, KU Cancer Ctr, KUMCRI. Curriculum: Levels of evidence-clinical impact, Pre-Clinical modeling, In-Vitro studies & Animal models, Cancer Drug Development-pharmacokinetics & toxicity, Pre-Clinical Proof of Concept & FDA, Creating a Pilot Study, Biostatistics 101, Phases of Clinical Trials, Data Collection, Support Staff, Regulatory and DSMBs, IRB and HIPPA, Funding Study; Grants & Parma, Advertising study & meeting accrual goals, Goals of Phase I study, Goals & Objectives of Phase II Efficacy study, Phase 3 Multicenter Study; Value of Numbers & Utilizing Cooperative Groups. Prerequisite: Completion of first 2 years of Med School or graduate school, or enrollment in MD/PhD program. Students no meeting one of these criteria will require permission from course instructor.

PTOX 887. Toxicologic Pathology. 4 Credits.
Introductory pathology course for graduate students preparing for a career in basic toxicology research. Topics to be presented and discussed include: cell injury, inflammation, repair and regeneration, immunopathology, neoplasia, tumor pathology, respiratory pathology, liver pathology, neuropathology, miscellaneous organ pathology, and lab animal clinical chemistry.

**PTOX 889. Research in Toxicology. 1-10 Credits.**
Introductory pathology course for planning on being research toxicologists. Topics to be presented and discussed: cell injury, inflammation, repair and regeneration, immunopath, neoplasia, tumor pathology, respiratory pathology, liver pathology, neuropathology, miscellaneous organ pathology, and lab animal clinical chemistry.

**PTOX 898. Principles of Toxicology. 1 Credits.**
Chemical fundamentals in structure, actions and metabolism of toxicants and drugs. Included are molecular features of toxicants and drugs, stereoisomerism, receptor theory, dose-response relationships, agonists and antagonists, absorption, pharmacokinetics, and structure-activity relationships.

**PTOX 899. Thesis in Toxicology. 1-10 Credits.**
For students in a master's program in toxicology.

**PTOX 917. Disposition of Xenobiotics. 2 Credits.**
Principles of absorption, biotransformation, and excretion of xenobiotics. Prerequisite: PHCL 888 or departmental permission.

**PTOX 918. Toxicology. 4 Credits.**
Selected topics in environmental, forensic, and industrial toxicology.

**PTOX 938. Carcinogenesis and Cancer Biology. 3 Credits.**

**PTOX 940. Techniques in Industrial Toxicology. 2 Credits.**
A unique course where students are exposed to and have practical experience in techniques used for risk-assessment of chemicals. The course is taught with extensive input by industrial toxicologists who use these techniques on a daily basis. This course is offered at a local industrial setting. Prerequisite: PHCL 888; PTOX 917, PTOX 918, and PTOX 938, or departmental permission.

**PTOX 990. Research for Dissertation in Toxicology. 1-10 Credits.**
Prerequisite: PTOX 889.

**PTOX 999. Dissertation in Toxicology. 1-10 Credits.**
Prerequisite: Open to students of advanced standing enrolled in the doctoral program in toxicology.

**Master of Science in Pharmacology**

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Pharmacology though, focuses more on the therapeutic actions of chemicals (particularly drugs) in the health sciences, the use of drugs as therapeutic agents in medicine or as tools in scientific research, and the development and regulation of pharmaceuticals. Pharmacologists perform many different duties including research and teaching in academic, nonprofit and industrial settings, and in consulting and public service.

The Master of Science (M.S.) in Pharmacology degree program provides an academic experience that emphasizes research skills and prepares students for a range of careers in varied employment settings or more advanced academic study. The M.S. curriculum provides a foundation of core concepts and skills through required coursework, but allows considerable flexibility for individualization through advanced electives and mentored research experiences.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission requirements:**

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).

- A background check (p. 2456) is required during the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

**Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.**
Degree Requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2458) the semester the student will graduate.
- If thesis option chosen, then enrollment in a minimum of one (1) credit hour of PHCL 899 Thesis in Pharmacology and successful thesis submission and publication (p. 2458) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

TECHNICAL STANDARDS AND REQUIREMENTS FOR GRADUATE STUDIES IN THE DEPARTMENT OF PHARMACOLOGY, TOXICOLOGY AND THERAPEUTICS

The M.S. degree signifies that the holder is prepared for entry into research in industrial or academic laboratory settings. To that end, graduates must have the knowledge and skills to function in a broad variety of laboratory settings. Therefore, all students admitted for graduate studies in Pharmacology and Toxicology must meet the following abilities and expectations.
1. **Observation:** The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to perform laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review, the provisions for reasonable accommodation will be determined.

For further information, contact The Department of Pharmacology, Toxicology and Therapeutics, University of Kansas School of Medicine, MS 1018, 3901 Rainbow Blvd., Kansas City, Kansas 66160; Phone: (913) 588-0028 E-mail: kmccarso@kumc.edu

**STUDENT POLICY ON INFECTIOUS DISEASE**

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for admission to academic programs at the University of Kansas Medical Center. In such cases, the determination of eligibility for admission will be made on an individual basis in consultation with the applicant’s physician; the decision will take a number of factors into consideration, including the legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

**DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS**

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the [Graduate Student Handbook](http://www.kumc.edu). Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

**Master of Science in Toxicology**

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Toxicology is, more specifically, the study of adverse effects of chemicals on living systems, the extent of damage they produce, the relationship between dose and effect, routes of exposure, and potential treatments. Toxicologists not only identify toxins, but also contribute to risk assessment, safety evaluation, and establishment of legal regulations.

Toxicologists perform many different duties including research in academic, nonprofit and industrial settings, and in consulting and public service.

The Master of Science (M.S.) in Toxicology degree program provides an academic experience that emphasizes research skills and prepares students for a range of careers in varied employment settings or more advanced academic study. The M.S. curriculum provides a foundation of core concepts and skills through required coursework, but allows considerable flexibility for individualization through advanced electives and mentored research experiences.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website [http://www.kumc.edu/igpbs/how-to-apply.html](http://www.kumc.edu/igpbs/how-to-apply.html).

**Admission requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.

An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center – ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
• Three letters of recommendation.

• Prerequisite coursework:
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics

• Research experience (beyond labs associated with lecture courses) is strongly suggested.

• Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

Degree Requirements:

• Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.

• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

• Completion of a minimum of 30 credit hours.

• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

• Successful completion of either a thesis defense or general examination (p. 2458) the semester the student will graduate.

• If thesis option chosen, then enrollment in a minimum of one (1) credit hour of PTOX 899 Thesis in Toxicology and successful thesis submission and publication (p. 2458) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

TECHNICAL STANDARDS AND REQUIREMENTS FOR GRADUATE STUDIES IN THE DEPARTMENT OF PHARMACOLOGY, TOXICOLOGY AND THERAPEUTICS

The M.S. degree signifies that the holder is prepared for entry into research in industrial or academic laboratory settings. To that end, graduates must have the knowledge and skills to function in a broad variety of laboratory settings. Therefore, all students admitted for graduate studies in Pharmacology and Toxicology must meet the following abilities and expectations.

1. Observation: The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. Communication: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. Motor: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to perform laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. Intellectual-Conceptual, Integrative, and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student's difficulties. At this review, the provisions for reasonable accommodation will be determined.

For further information, contact The Department of Pharmacology, Toxicology and Therapeutics, University of Kansas School of Medicine, MS 1018, 3901 Rainbow Blvd., Kansas City, Kansas 66160; Phone: (913) 588-0028 E-mail: bhagenbuch@kumc.edu or (913) 588-7519 kmccarso@kumc.edu

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for admission to academic programs at the University of Kansas Medical Center. In such cases, the determination of eligibility for admission will be made on an individual basis in consultation with the applicant’s physician; the decision will take a number of factors into consideration, including the legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Doctor of Philosophy in Pharmacology

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Pharmacology though, focuses more on the therapeutic actions of chemicals (particularly drugs) in the health sciences, the use of drugs as therapeutic agents in medicine or as tools in scientific research, and the development and regulation of pharmaceuticals. Pharmacologists perform many different duties including research and teaching in academic, nonprofit and industrial settings, and in consulting and public service.

The Doctor of Philosophy (Ph.D.) in Pharmacology degree program prepares students for careers as independent scientists in academia, industry, or government through a broad-based curriculum and development of strong research design and communication skills. The Ph.D. didactic curriculum consists of a core of required discipline-based coursework, but is significantly individualized through advanced electives, seminars, extensive mentored research experiences, and consultation with the student’s selected advisory committee.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2131) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

• Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
• A background check (p. 2456) is required during the admission process; it may affect the student's eligibility to enter the program.
• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
• Three letters of recommendation.
• Prerequisite coursework:
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics
• Research experience (beyond labs associated with lecture courses) is strongly suggested.
• Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

The program consists of coursework, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Degree requirements:
• Degree requirements are normally completed within 6 years of admission to the program although a maximum of 8 years is allowed.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  • Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  • Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
• Successful completion of the Residence Requirement (p. ) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
• Successful completion of the Oral Comprehensive Examination (p. 2462). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
• Successful completion of the Post-Comprehensive Enrollment (p. 2463) requirement.
• Enrollment in a minimum of one (1) credit hour of PHCL 999 Dissertation in Pharmacology the semester the student will defend dissertation and graduate.
• Successful completion of the Final Oral Examination (p. 2463) (dissertation defense.)
• Successful Dissertation Submission and Publication (p. 2464) (according to Office of Graduate Studies policy.)
• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Doctor of Philosophy in Toxicology

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Toxicology is, more specifically, the study of adverse effects of chemicals on living systems, the extent of damage they produce, the relationship between dose and effect, routes of exposure, and potential treatments. Toxicologists not only identify toxins, but also contribute to risk assessment, safety evaluation, and establishment of legal regulations. Toxicologists perform many different duties including research in academic, nonprofit and industrial settings, and in consulting and public service.

The Doctor of Philosophy (Ph.D.) in Toxicology degree program prepares students for careers as independent scientists in academia, industry, or government through a broad-based curriculum and development of strong research design and communication skills. The Ph.D. didactic curriculum consists of a core of required discipline-based coursework, but is significantly individualized through advanced electives, seminars, extensive mentored research experiences, and consultation with the student’s selected advisory committee.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs→.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.
Degree requirements:

- Degree requirements are normally completed within 6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Successful completion of the University's Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GSMC 857 Biographies, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p.) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2462). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of the Post-Comprehensive Enrollment (p. 2463) requirement.
- Enrollment in a minimum of one (1) credit hour of PTOX 999 Dissertation in Toxicology the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2463) (dissertation defense.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

- Successful completion of a minimum of two elective courses that are at least two (2) credit hours each in consultation with the student's advisor and dissertation committee. Additional elective coursework may be taken as determined in consultation with the student's advisor.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2142) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

Toxicology must meet the following abilities and expectations: in a broad variety of academic situations in the classroom and laboratory. As a consequence, graduates must have the knowledge and skills to function effectively and efficiently in oral and written form with students, staff, and faculty. Therefore, all students admitted for graduate studies in Pharmacology and Toxicology must meet the following abilities and expectations.

1. **Observation:** The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to perform laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review, the provisions for reasonable accommodation will be determined.

For further information, contact The Department of Pharmacology, Toxicology and Therapeutics, University of Kansas School of Medicine, MS 1018, 3901 Rainbow Blvd., Kansas City, Kansas 66160; Phone: (913) 588-0028 E-mail: bhagenbuch@kumc.edu or (913) 588-7519 kmccarso@kumc.edu

**STUDENT POLICY ON INFECTIOUS DISEASE**

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for admission to academic programs at the University of Kansas Medical Center. In such cases, the determination of eligibility for admission will be made on an individual basis in consultation with the applicant’s physician; the decision will take a number of factors into consideration, including the legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease much advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

**DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS**

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

**Department of Population Health**

The Department of Population Health was formed on July 1, 2019, upon the merger of the Department of Preventive Medicine and Public Health and the Department of Health Policy and Management. Our department, with faculty on all three campuses of the Kansas University Medical
Center (Kansas City, Wichita and Salina), is focused on improving health and reducing health inequities for all people in Kansas. We think that the health of our communities is best served by integrating our efforts to improve public health with efforts to improve health systems, health policies, and health care delivery. We seek to understand the complex interplay of behavioral health and social determinants of health and identify the ways these underlying determinants influence the delivery of health care services. We try to find ways in which health systems and health policies can better respond to the needs of the communities they serve.

TEACHING
Faculty and staff in the Department of Population Health are dedicated to offering degree programs to future public health practitioners, health service leaders and clinical researchers. The department provides the following degree programs:

- Master of Health Services Administration (http://www.kumc.edu/school-of-medicine/population-health/education/master-of-health-services-administration-(mhsa).html)
- Ph.D. in Health Policy Management (http://www.kumc.edu/school-of-medicine/population-health/education/phd-in-health-policy-and-management.html)
- Graduate Certificate Programs (https://edwardscampus.ku.edu/public-health/)
- Community Health Center Executive Fellowship (http://www.chcexecfellow.com/)

RESEARCH
Department of Population Health faculty reflect the multidisciplinary scope of health practices and represent a variety of academic disciplines. Current research includes:

- Tobacco Control
- Cancer Screening and Prevention
- Obesity
- Health Services Research
- Epidemiology

SERVICE
Through strong partnerships with community organizations, government agencies, health care systems and other stakeholders, our more than 90 faculty and staff seek to address some of the most critical threats to the health of our communities, including tobacco, obesity, cancer, and diabetes. Our diverse faculty bring expertise in psychology, sociology, epidemiology, economics, statistics, demography, anthropology, implementation science, public health, and health care delivery, allowing us to apply a multi-disciplinary approach to tackling health concerns, particularly those concerns that disproportionately affect rural, incarcerated, Native American, African American, and Latino communities. Learn more. (https://www.kumc.edu/school-of-medicine/academics/departments/population-health.html)

Courses

HP&M 610. The Health Care System. 4 Credits.

This course introduces students to the health care system of the United States. The course stresses the system's historical development, distinguishing features, financing, management, resources, and politics. Requirements include position papers, class discussions, examinations, and site visits to health care facilities

HP&M 810. The Health Care System. 3 Credits.
The structure and function of the components of the U.S. healthcare system are introduced in the context of the history, values and social forces that influenced its development and evolution. Students gain exposure to the concepts and vocabulary associated with aspects of the system, including delivery (providers, institutions, services), resources (finance, payment, insurance), population and public health, and outcomes (cost, access, quality). Healthcare outcomes from consumer, clinical, and societal perspectives are explored. LEC

HP&M 819. Research for Health Care Leaders. 3 Credits.
Introduces epidemiology, survey research, and evaluation research. Examines quantitative and qualitative methods. Focuses on role of research in health policy and health management. Incorporates lecture, discussion, papers and presentations.

HP&M 822. Health Care Economics. 3 Credits.
This course introduces the core concepts from economics to healthcare with a focus on helping healthcare managers use economic tools in making sound decisions. The demand for healthcare products, the structure of insurance, and the supply of healthcare products are examined. Students will apply a variety of economic analyses to health policy and health system issues. LEC

HP&M 825. Financial Concepts in Healthcare Management. 3 Credits.
Introduces the financial and managerial accounting concepts used in health care. This includes financial statement analysis; cost accounting; budgeting; and capital project analysis. LEC

HP&M 827. Financial Applications in Healthcare Management. 3 Credits.
Applies economic and financial concepts to health care management, integrating operational, strategic, and financial planning. Students will analyze financial statement ratios; forecast revenue and expense; develop budgets; credit worthiness determination; break-even analysis and working capital management in a variety of healthcare settings including long-term care and public health. LEC Prerequisite: HP&M 825, Financial Concepts in Healthcare Management or permission of instructor.

HP&M 830. Health Care Management. 3 Credits.
This course introduces key concepts and skills for health care managers. Emphasizing self-discovery and professional development, the course examines how to become an informed employee, an effective team member, and a successful manager. Course topics include interpersonal skills, delegation, leadership, performance management, and organizational change. Learning methods include lectures, case analyses, experiential exercises, and discussion. Prerequisite: HP&M 810 or permission of instructor.

HP&M 831. Reimbursement and Fiscal Policy. 2 Credits.
Reimbursement and fiscal policy practices impact the success and the economic well-being of healthcare institutions, payers and patients. This course develops the student’s understanding of complex reimbursement methodologies from the perspective of providers and payers. Students will explore the strengths and weaknesses of the major methods of third party reimbursement, the types of managed care organizations and the payment methodologies employed. Students are also prepared to approach reimbursement policy issues both from the payer and the provider viewpoint. LEC
HP&M 832. Governance and Health Law. 2 Credits.
A survey course of the law as it affects governance, health care administration and health care generally. This course will develop the student's understanding of health law and its impact on many aspects of health care governance and administration. The student should be able to identify and understand various legal issues they may encounter and when to engage legal counsel's advice. Prerequisite: HP&M 810.

HP&M 833. Ethics. 2 Credits.
An introduction to the principles and concepts in the ethics of health services administration. The course will help students further develop their skills to recognize and analyze ethical dilemmas, and to explain, justify and evaluate the decisions they make in response to such dilemmas.

HP&M 837. Health Policy. 3 Credits.
This course examines the development, implementation, and evaluation of federal, state, and local health policy in the United States. Particular attention will be given to (1) the development of public institutions and policy goals; and (2) current policy problems such as cost controls, reimbursement, health services utilization, program assessment and evaluation, public health, and public/private investment and resource planning. Students will be expected to synthesize and integrate knowledge to apply theory and principles in ways consistent with professional practice as a health policy analyst. LEC

HP&M 838. Rural Health Care. 3 Credits.
Provides students with (a) an understanding of major issues in rural health and the rural environment in which health care providers and administrators provide service; (b) an understanding of the demographics, economics, services and challenges associated with the health care delivery systems in rural America and (c) an overview of federal and state health policy and its effect on rural health systems. Special emphasis will be placed on identifying, understanding, and addressing rural health challenges from administrative and policy perspectives. Prerequisite: None.

HP&M 840. Organizational Foundations for Leading Change. 3 Credits.
Self-discovery as a foundation for professional development while exploring the concepts of leader, manager, and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical, and other issues that constrain and destabilize organizations and strategies to restore equilibrium are explored. (Same as NRSG 880). LEC

HP&M 842. Roles, Functions and Care Models. 2 Credits.
This course examines the nature and characteristics of the healthcare workforce needed to deliver direct, indirect, and support services. Healthcare worker roles are analyzed through the lens of key organizational functions and care delivery modalities. Common care delivery models, such as primary, team, and patient-centered care approaches to organizing care delivery are explored in various clinical settings, including acute and long-term care and community and public health entities. Administrative challenges and opportunities for managing a diverse workforce are presented. LEC

HP&M 844. Communication for the Healthcare Executive. 2 Credits.
This course focuses on attaining proficient communication skills to deliver high impact messages to stakeholders ranging from board members, to diverse communities of interest, to policymakers and regulators. Verbal and written skill development addresses executive presence to perform communication functions such as conducting an 'ask' from a policymaker or potential benefactor, using storytelling and data to shape critical messages to the media, and communicating value-driven memoranda to internal audiences. The use of emerging technologies to aid in communication effectiveness will also be presented. LEC

HP&M 846. Health Information Technology Management. 3 Credits.
This course covers fundamental concepts of health information technologies including information management, health care delivery and remote monitoring systems of interest to administrators in health services organizations. Types of systems, alignment with organizational strategy, selection and adoption, return on investment, security and privacy, and uses of healthcare information for clinical and strategic analysis and decision support will be covered. The course will also cover current U.S. health technology infrastructure, policy, organizations and issues regarding the latest technology applications. An introduction to health care analytics is also provided.

HP&M 847. Business Intelligence in Healthcare. 2 Credits.
An introduction into the data sources, technologies and processes leveraged by healthcare organizations to make more timely, informed and actionable business decisions. Students will learn fundamental terms and practices of data analytics and analysis, study real world examples of how data can inform decision making in healthcare and participate in case studies and in class presentations. Prerequisite: Permission of instructor.

HP&M 848. Designing Health Care Organizations. 2 Credits.
This class examines how design affects a broad range of health care organizations. It considers designs for jobs, processes, equipment, buildings, and organizations, and explores implications for safety, customer satisfaction, worker satisfaction, productivity, effectiveness, and profitability. Students analyze varied cases that approach design as a management decision-making process.

HP&M 850. Introduction to Operations. 3 Credits.
Examines performance of health care organizations, sources of variation, methods of measurement, and strategies for improving performance. Considers several approaches to performance improvement and examines tools widely used in operations management. Incorporates lecture, discussion, and fieldwork. (Same as NRSG 882.)

HP&M 852. Strategic Marketing. 2 Credits.
Provides students with a framework for executive-level, strategic market planning and analysis. Topics covered include: the strategic marketing organization; the impact of organizational culture on strategy development; environmental assignments and competitor analysis; market research; and the impact of the marketing fours (price, positioning, promotion, and product) in health care.

HP&M 853. Strategic Management. 2 Credits.
Explores internal and external analysis for health care organizations. Examines development, analysis, execution, and monitoring of strategies. Application of critical thinking skills to strategy. Lecture and discussion. Prerequisite: Completion of HP&M Level I courses or permission of instructor.

HP&M 854. Human Resources and Workforce Development. 3 Credits.
The focus of this course is to understand the leadership functions of human resource management in organizations to create a competitive edge through employee empowerment. Core human resource concepts are introduced and applied to optimize human capital within a variety of healthcare settings, including compensation and benefits, employee recognition, and employee/labor relations. National, regional and local strategies and workforce trends are discussed related to best practices for the selection, retention, and management as a healthcare employer of choice. (Same as NRSG 891). LEC

HP&M 857. Evaluating Outcomes of Healthcare. 3 Credits.
This course will trace the development of the outcomes research movement and provide examples of methodologies, assessment instruments and issues that guide outcomes research. It will also review the methods for linking research findings with clinical practice (i.e., clinical practice guidelines). Obstacles to acceptance of practice guidelines will be discussed. Finally, the translation of outcomes research methodology into programs to improve health quality will be presented. Prerequisite: Permission of instructor.

HP&M 858. Organizational Behavior in Healthcare. 3 Credits.
Healthcare as a cultural and socio-behavioral system is presented. Using research and theory, students explore alternative perspectives on the nature of medicine and healing within comparative health systems, both U.S. and abroad. Students examine at an advanced level how healthcare organizational structures contribute to patient health outcomes and influence employee behaviors. The course reinforces the nature and characteristics of the health professions, particularly medicine and nursing perceptions, and the complex behavioral dynamics of health professionals with organizational leaders. LEC

HP&M 859. Professional Development. 2 Credits.
Prepares students for an initial professional job search, long term career planning and professional development. Explores personal assessment, professional networking, mentoring, resume' construction, job searches and interviewing. Reviews professional communication and other professionalism domains. Introduces foundational concepts of leadership and leadership development. Lectures, papers, interactive activities and discussion. Prerequisite: Permission of instructor.

HP&M 860. Graduate Internship in Healthcare Services Administration. 1-3 Credits.
Novice and experienced health services administrators function in applied settings. The internship is designed to meet the needs of individual students to advance their career functioning and set in motion a professional development plan. The inexperienced administrator will use the internship as a mid-curriculum opportunity to apply and synthesize in the practice setting knowledge, skills, and abilities. Students who come to the program with mid-level to advanced experience use the practicum to advance their career through exposure to additional experiences that extend their knowledge, skills, and abilities and demonstrates synthesis of program competencies. FLD

HP&M 861. Capstone Seminar. 2 Credits.
The knowledge, skills, and abilities learned throughout the program are validated in capstone experience. A case study approach will be used to synthesize and apply principles including, but not limited to, change theory and quality improvement, research and information technologies, strategy and communication tools, human resource management, financial and economic analysis, and advanced decision-making and management of organizational behavior. Students will present their cases to peers, faculty, and external reviewers for dialogue, critique, and a plan for professional skills development. IND

HP&M 862. Research Practicum in Health Services Administration. 1-3 Credits.
A course to conduct a research project related to health services delivery, management or policy and to explore topics related to the research project. RSH Prerequisite: HP&M 819.

HP&M 863. Independent Study. 1-3 Credits.
This course is designed to meet the needs of students who have a special interest that cannot be met by existing courses. IND

HP&M 870. Research Inquiry: Defining and Supporting the Research Problem; Research Design and Analysis. 3 Credits.
Students select a problem area, critically review and analyze the research literature related to it and develop a research question(s) and working hypotheses. The analysis of the problem integrates field experiences with relevant literature, and translates ideas from the practice and/or policy setting into the context of scholarly inquiry. Students then build on a problem area of interest with potential benefit to the health care field and examine methodologies that would support a hypothesis or significant research question. The course guides students in translating their questions into a research design, using specific data sources, including overall strategy, measurement, study population and/or sample and analysis plan. Focus will be placed on critical analysis of design trade-offs and limitations. Prerequisite: Permission of the instructor.

HP&M 873. Statistical Applications Using Large Data Bases. 3 Credits.
The management of large data sets is a critical analytic skill for health policy and management research. This course exposes students to the various types and configurations of large data sets and provides hands-on analytic experience using an array of statistical techniques and procedures. Attention is placed on the criteria for designing and evaluating, including the trade-offs in selecting one plan over another. Students actually carry out an analysis plan for a variety of data types. Prerequisite: HP&M 819, or permission of the instructor.

HP&M 875. Modeling in Health Services Research. 3 Credits.
Provides an opportunity for students to use a number of common analysis models in health services research. Emphasizes a conceptual understanding of appropriate modeling techniques and use of statistical software packages. The course focuses on application of methods to health services research questions, with emphasis on regression design and interpretation. Prerequisite: HP&M 873 or permission of the instructor.

HP&M 876. Medicare and Medicaid. 3 Credits.
Provides students with an in-depth understanding of the three publicly financed health programs that impact virtually all aspects of the American healthcare system - Medicare, Medicaid and Children's Health Insurance Programs (CHIP). Explores history and evolution of each program, plus specific operational issues such as eligibility, financing, management reporting, state/federal coordination, quality of care and outcomes management and influence of recent legislation. Prerequisite: Permission of the instructor.

HP&M 877. Women and Healthcare. 3 Credits.
A gender analysis of the organization of healthcare in the United States, using sociohistorical and sociological perspectives. Considers the health status and healthcare problems of women in relation to cultural aspects of medicine and healthcare; the roles of both informal and professional healthcare providers; the political economy of healthcare systems; and the relationship between gender and state. Prerequisite: HP&M 810, or permission of instructor.

HP&M 878. Grant Writing. 3 Credits.
The course is designed to take the principles and mechanics learned in introductory epidemiology and biostatistics and apply them in the design of epidemiologic studies. The strategy and data collection for studies will be emphasized rather than the methods of statistical analysis. The student will learn how to develop a proposal/grant that addresses the entire array of concerns regarding such studies and propose a realistic, scientifically justified study. (Same as ANAT 869 and NRSG 889.) Prerequisite: HP&M 819 or HP&M 821, and NRSG 886.

HP&M 879. Comparative Healthcare Systems. 3 Credits.
Critical examination of the structure and function of healthcare systems in major, advanced, capitalist countries (e.g., Canada, Japan, United Kingdom, France, Germany, and Sweden) in comparison to each other and to the healthcare system of the United States. Patterns in control
and financing will be studied in relation to issues of cost, quality, access, and in relation to cultural values. Special attention will be placed on comparative analysis of reform efforts. Prerequisite: HP&M 810 or permission of instructor.

HP&M 880. Health Care and Social Policies in Sweden. 3 Credits. Sweden leads the world in major health outcomes despite spending significantly less than the U.S. This course provides students the opportunity to visit Sweden and see the operation of its health care and social welfare system firsthand. Learn about Swedish history and culture as you re-examine many commonly held assumptions about both the U.S. and Sweden. An intensive schedule of site visits and lectures in the Stockholm-Uppsala area, assigned readings, and a major paper.

HP&M 882. Health Services Research Using Public Payer Data. 3 Credits. Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States' Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare & Medicaid Services (CMS) have streamlined researchers' access to national Medicare and Medicaid populations for health services and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to our state's employees, Medicaid beneficiaries, and private health insurance claims data for enterprise researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer claims data.

HP&M 885. Cost-Effectiveness and Decision Analysis. 3 Credits. This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins with an introduction to probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes, stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost effectiveness analysis, and cost benefit analysis. (SAME as PRVM 878).

HP&M 884. Clinical and Administrative Data Analysis. 3 Credits. This course presents advanced techniques in statistical analysis and information management to help understand, process, and use health services data. The three broad areas of health services data will be used: clinical, program, and population-based. Ways in which these data can be used as both management and research tools will be discussed. Implications for improving patient care and delivery of health services will be emphasized. Labs will stress the use of both manipulative techniques such as merging, matching, sorting, and file construction, as well as focus on analysis, using univariate, bivariate, and multivariate techniques. Recent methodology related to outcomes, case-mix, and performance assessment will be presented, and their application to health services administration demonstrated.

HP&M 885. Instructional Methods in Health Services Education. 1 Credit. An overview of pedagogical approaches and learning strategies for higher education courses in health policy and management. Content will include course organization, syllabus design, techniques for teaching in the classroom and online, learning styles, strategies for classroom management, and evaluation/grading methods. Prerequisite: HP&M 868 or permission of the instructor.

HP&M 886. Applied Health Services Research. 3 Credits. Students in this course apply the full spectrum of the research process to a specific hypothesis or research question, drawn from practical health systems observations and/or supported by critical analysis of the health services research literature. Moving step by step through the research process, students work to develop a complete research plan and proposal suitable to investigate their chosen question. Group discussion and guest researchers provide elaboration for each stage of research plan development. Prerequisite: HP&M 872 and HP&M 873 or permission of the instructor.

HP&M 887. Practicum in Health Services Education. 2 Credits. Application of the approaches and methods described in HP&M 885. Students will serve as a teaching assistant for one semester, working with a teaching mentor. In addition to assisting with the class, students will meet regularly with the mentor to critique and analyze content and classroom processes, plan and develop teaching activities, and evaluate learning and performance in the classroom. Prerequisite: HP&M 868 or permission of the instructor. HP&M 885 may be taken concurrently with HP&M 887.

HP&M 890. Topics in Health Policy and Management. 1-3 Credits. This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Consent of the instructor. IND

HP&M 901. Doctoral Seminar in Health Policy. 3 Credits. Students will investigate, review, and critically analyze major concepts, theoretical and methodological approaches and sub-areas in the field of health policy research. The course will cover comparative health policy analyses as well as both micro and macro system perspectives. Prerequisite: Permission of the instructor.

HP&M 903. Doctoral Seminar in Quality and Safety. 3 Credits. Students will critically review selected publications that address quality and safety in health care. Identification of major research questions and approaches to them will be stressed, and students will develop an interesting and tractable research question. Prerequisite: Admission to the Ph.D Program or permission of the instructor.

HP&M 904. Doctoral Seminar in Health Care Occupations and Culture. 3 Credits. Examines the social, historical, and cultural forces shaping the organization and delivery of health care. Students will critically analyze concepts surrounding health, illness and wellness, healing, professional authority, and interprofessional and intraprofessional relationships. Explores the impact of organizational cultures on the health care system. Prerequisite: Admission to the Ph.D Program or permission of instructor.

HP&M 905. Doctoral Seminar in Social Determinants of Health. 3 Credits. An advanced survey of theory and research in social determinants of health, giving primary attention to health differences by education, income, race/ethnicity, gender, and sexual orientation. Demographic, cross-cultural, social-psychological, and physiological aspects of physical and mental health will be considered. Prerequisite: Admission to Ph.D program or permission of instructor.

HP&M 906. Doctoral Seminar in Comparative Health Systems. 3 Credits. Critical examination of the structure and function of health care systems in major, advanced, capitalist countries (e.g., Canada, United Kingdom, France, Germany, Netherlands, Sweden) in comparison to each other.
and to the health care system of the United States. Patterns in control and financing will be studied in relation to issues of cost, quality, access, and in relation to cultural values. Special attention will be placed on comparative analysis of strategies for reform and the results of recent reform efforts in the focal countries. Prerequisite: Admission to PhD program or permission of instructor.

HP&M 910. Health Services Research Methods. 3 Credits.
Examines the research process and the primary methodologies used in health services research. Explores basic methods in survey research, epidemiology, and evaluation. Focuses on quantitative methods and introduces qualitative methods. Lecture Prerequisite: Graduate level statistics; Acceptance to the PhD program or permission of instructor.

HP&M 912. Qualitative Health Research. 3 Credits.
Examines qualitative approaches to research, specifically in health care settings. Content includes qualitative research methodologies, including ethnography, interviews, focus groups, and content analysis through examples in the literature and hands-on exercises. Discusses when qualitative methods are appropriate to use, and how they can complement other research methods. Prerequisite: Permission of Instructor.

HP&M 990. Advanced Topics in Health Policy and Management. 1-3 Credits.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Admission to a PhD program and consent of the instructor. IND.

HP&M 991. Individual Doctoral Readings. 1-3 Credits.
Individual study of special topics or problems by students working on a doctorate. Prerequisite: Admission to a PHD program and consent of the instructor.

HP&M 999. Dissertation. 1-12 Credits.

Courses

PRVM 429. Interdisciplinary Approaches to Neurodevelopmental Disabilities, Including Autism Spectrum Disorders. 3 Credits.
Topics in this course include an introduction to the Maternal and Child Health Bureau and related organizations, the history of neurodevelopmental disabilities (NDD), the genetics, identification, and prevention of developmental disabilities. Trainees obtain information about and participate in experiences related to neurodevelopmental and related disabilities and conditions individuals experience across the life course. The Life Course Perspective is defined by MCHB as the multidisciplinary approach to understanding the mental, physical, and social health of individuals, incorporating both life span and life stage concepts that determine an individual's health trajectory. Significant emphasis is on autism and related issues. Participants learn the different roles of interdisciplinary team members, their unique contributions, and the team process in screening, evaluation and planning intervention. Prerequisite: Permission of Instructor.

PRVM 431. Interdisc Leadership Approaches to Systems & Services for Indv with Autism, Neuro & Dev Disabilities. 3 Credits.
Topics in this course include information about the history and development of service systems in the United States including Maternal and Child Health and Title V programs. An overview of program administration, business planning, budget development and various grant sources provides participants with an understanding of service systems operations and funding streams. Program oversight, standards of care and evaluation, including needs assessment and government mandates for outcomes (GPRA), provide participants with information that enables them to explore agency director perspectives about barriers to providing effective services as well as systems barriers presented from a parent point of view. Discussions include how to make systems changes through consultation and technical assistance and information about adult learning styles and consumer empowerment. Other topics include the scientist/practitioner models of research, empirical validation of practices and community participatory action research. As an adjunct to the core course there are other didactic experiences required of all trainees including Center and community committee work, campus interdisciplinary forums, family immersion experiences and research presentations. These didactic experiences give faculty and trainees an opportunity to meet as a group, hear presentations, and discuss a variety of topics, including ethics, standards of care, and empirically validated practices. Prerequisite: Permission of Instructor.

PRVM 800. Principles of Epidemiology. 3 Credits.
Basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations. Considerations are centered on physical, biological, environmental, psycho-social and cultural factors in relation to infectious and non-infectious diseases; interactions between agent, host, and environmental factors as determinants of health and disease; the application of epidemiological approaches to health services; retrospective and prospective analysis of morbidity and mortality data.

PRVM 803. Introduction to Clinical Research. 3 Credits.
The course will provide a basic and broad overview to clinical research, as well as support tailored to each student's specific project. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations; the recruitment of study participants; regulatory issues; defining measures and instruments; data collection, management, and analysis; and reporting of results via abstract, presentation, and/or manuscript. It is required that students have a research idea and mentor before enrolling. Faculty support and collaboration will be available up to 6 months after completion of the course for ongoing efforts to complete the project. Prerequisite: Consent of Instructor. No prior coursework is required. Students must have, or plan to begin, a quality improvement or retrospective research project.

PRVM 804. Community Health Assessment, Intervention, and Advocacy. 3 Credits.
To impact community health, students must be able to: define the problem(s) experienced by specific populations, identify stakeholders and building partnerships, co-design an intervention to address the problem(s), incorporate cultural values of the affected stakeholders in the intervention, and advocate for various programs and policies to improve health. This course guides students through each element of the community health interventions process - from defining the problem to advocating for policy.

PRVM 805. Public Health Seminar. 1 Credits.
This course will focus on public health practice. Guest lectures from national, state, and local public health agencies will present problems and how these problems are being addressed. Topics are expected to vary somewhat from year to year, depending on the priorities of the agencies. However, topics might include such issues as smoking prevention, automobile accidents, foodborne outbreaks, cryptosporidium outbreaks, lead poisoning in children, asthma in children, sexuality transmitted diseases, diabetes, cancer control, nutrition, cardiovascular diseases, bioterrorism, legal issues and administration of public health. This course is the same as Public Health Grand Rounds.

PRVM 806. Special Topics:. 1-4 Credits.
In-depth, individualized investigation of special problems in community health. Designed especially for students with limited background in community health. Prerequisite: Permission of instructor.

PRVM 808. Clinical and Translational Research Seminar. 1 Credits.

This seminar will present locally and nationally recognized clinicians and researchers to discuss various areas of clinical research. The course is designed to expose students to a variety of ongoing research and features speakers from a variety of disciplines including physicians, epidemiologists, biostatisticians, behavioral scientists, nursing faculty, nursing students, medical students, allied health faculty and others. Prerequisite: Permission of instructor.

PRVM 809. Introduction to Public Health. 3 Credits.

This course provides an introduction to the basic principles of public health practice, including an overview of the history, philosophy, and scope of public health in the United States and globally. It will provide an overview of the primary disciplines within public health: biostatistics, demography, environmental health sciences, epidemiology, global health, health policy and management, social and behavioral health, and the analytical tools employed to measure public health indicators. Prerequisite: None.

PRVM 810. Cardiovascular Disease Epidemiology. 3 Credits.

This will be a study of Cardiovascular Disease risk factors, expression, treatment, and prevention from a population-based standpoint. Participants will gain knowledge of cardiovascular disease prevalence, incidence, risk factors, outcomes, and prevention strategies. The goal of this course is to understand major aspects of cardiovascular epidemiology and current strategies for primary and secondary prevention of major cardiovascular diseases. Attention will be given to physiologic mechanisms leading to atherosclerosis; traditional and novel coronary heart disease risk factors; prevention methodologies for cardiovascular disease, and the role of lifestyle, dietary, and genetic factors in the development of cardiac and vascular diseases. The course will be evidence- and outcomes-based, with a reference to landmark studies and major publications. Relevant historical breakthroughs and current controversies in CVD will be discussed using recent publications from the lay press and peer-reviewed journals. Emphasis will be placed on coronary artery disease and its clinical manifestations. Participants will learn to critically assess public health measures undertaken to recognize, manage, and treat atherosclerotic disease processes.

PRVM 811. Intro to Pharmaceutical Outcomes Research. 3 Credits.

Medications are involved in the treatment of nearly every chronic and acute disease. Pharmaceutical outcomes research is a broad field of research that strives to inform policies and interventions that optimize the safety, effectiveness, accessibility, and utilization of medications to improve patient outcomes. Pharmaceutical outcomes research spans pharmacoepidemiology, pharmacovigilance, pharmaceutical policy evaluation, pharmacoeconomics, and other medication-focused health services research disciplines. This course provides an overview of pharmaceutical outcomes research applications, with an emphasis on measuring medication use and outcomes; designing pharmaceutical outcomes research studies; and interpreting the pharmaceutical outcomes research literature. Prerequisite: PRVM 800 or permission of instructor.

PRVM 813. Chronic Disease Epidemiology. 3 Credits.

This course is required for students on the epidemiology concentration, but is open to other MPH students as well. It extends the methods and concepts of basic epidemiology to the prevention and control of major chronic diseases, as well as evaluating epidemiologic study designs and results from individual and multiple studies. Topics will include surveillance, risk factors, high risk populations, pathophysiology, and consequences. Students will also gain experience developing a proposal to conduct a screening, etiologic, or prevention study of selected chronic diseases. Prerequisite: PRVM 800 Principles of Epidemiology.

PRVM 814. Health Literacy. 3 Credits.

This is a graduate-level course designed to teach students about literacy and its implications on public health practice and research in the United States, with a focus on health literacy. Students will be introduced to the different types of literacy, including health, prose, quantitative, document, and computer, and how to evaluate them. In addition, students will learn how to lower literacy levels of health education materials for practical application. Cultural competency in literacy will also be discussed, with a focus on culturally competent health communication and education.

PRVM 815. Infectious Disease Epidemiology. 3 Credits.

This course emphasizes the underlying concepts of the epidemiologic approach as it relates to infectious diseases. Students will be introduced to principles and methods of disease surveillance and outbreak investigations using case studies. Essential concepts relating to vaccine efficacy and effectiveness in preventing infectious diseases, barriers to achieving adequate vaccine coverage, and how ongoing vaccine controversies relate to the scientific literature base will be covered. The evolving public health concerns of bioterrorism, antibiotic resistance, as well as new emerging pandemics such as novel coronavirus (COVID-19) will also be addressed. Characteristics of the agent, host, and environment that influence disease transmission will be examined in the context of control strategy identification. Instruction is primarily by online learning tools, with limited short lectures. Prerequisite: PRVM 800 Principles of Epidemiology.

PRVM 816. International Health. 3 Credits.

This course is divided into seven sections: 1) Global health introduction, 2) Health inequalities and the socio-economic context of disease, 3) Maternal and child health, the health of special populations, 4) The spread of infectious diseases, and HIV/AIDS, malaria, TB, 5) Globalizations and emerging infectious diseases, and nutrition, 6) Environmental health and the health effects of environmental change, 7) Global health payers and players, and global health priorities. Prerequisite: PRVM 800 Principles of Epidemiology or permission of the department/instructor.

PRVM 818. Social and Behavioral Aspects of Public Health. 3 Credits.

The course provides an overview of social and behavioral aspects of public health including the relevance of psychological and social factors for health, the principles of health behavior change, the application of these principles in various health domains, and an introduction to health behavior and health promotion interventions. The course begins with the rationale for studying social and behavioral aspects of health and examines select social and behavioral factors (e.g. gender, socioeconomic status, race/ethnicity) as they relate to physical well-being. The course also focuses on well-established theories of health behavior and examines the role of psychological and social factors in specific health topics (e.g. obesity, cancer, cardiovascular disease, smoking). Prerequisite: None.

PRVM 819. An Introduction to Geographic Information Systems (GIS) for Health. 2 Credits.

This course will provide students with an overview of Geographic Information Systems (GIS) applied in the context of health (public health, allied health and health care). Students will be introduced to GIS and health applications used locally, nationally and internationally. They will learn about pertinent data, how to visualize the data, how to design maps that represent the data, how to use spatial data, how to geocode data, and how to prepare and analyze data. Real-life examples will be
used throughout the course and students will gain hands-on experience using a GIS application. Students will also be kept abreast of any new GIS resources and trends or developments in GIS as relates to health. Prerequisite: Basic computer skills.

**PRVM 821. Research Methods in Public Health. 3 Credits.**
This is an introductory behavioral research methods, course. Students will learn about research designs, hypothesis formation, measurement, sampling, ethical issues in research, and pragmatic and research issues with evaluating behavioral interventions. Students will also learn how to critically evaluate and develop behavioral randomized clinical trials. Prerequisite: None. Social and Behavioral Aspects of Health and an Introductory statistics course are recommended but not required.

**PRVM 825. Child and Family Health. 3 Credits.**
Family, maternal, and child health problems will be addressed. Topics will include prenatal care (maternal health and habits); fetal growth factors, well baby care (immunizations, nutrition, growth, development, behavior); developmental disabilities; adoption; adolescence; child abuse; family as a support system; long-term medical and social outcomes of chronic illness/disability in children. Subjects are covered through lecture, discussion and field visits under the supervision of a pediatrician. Prerequisite: Permission of instructor.

**PRVM 826. Epidemiology for Advanced Nursing Practice. 3 Credits.**
Epidemiology for Advanced Nursing Practice is a graduate level course designed to synthesize basic epidemiology with clinical nursing concepts. The course is a core course required for the Doctor of Nursing Practice degree in which basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations are discussed. Considerations are centered on: 1) Physical, biological psychosocial and cultural factors in relation to infectious and non-infectious diseases; 2) Interactions between agent, host, and environmental factors as determinants of health and disease; 3) Application of the epidemiologic approach to clinical nursing; and 4) Measures of disease occurrence and risk. Prerequisite: None.

**PRVM 827. Public Health Administration. 3 Credits.**
This course provides students with an overview of the core functions of public health: assessment, policy development, and assurance together with an introduction to the leadership and management skills necessary to provide leadership in public health. It uses both theoretical and practical material to develop basic administrative competencies necessary for practice in community and public health. Assignments are designed to provide practice in applying course materials.

**PRVM 828. Designing Public Health Interventions. 3 Credits.**
Framed within the context of the core public health functions, assessment, policy development, and assurance, this course provides students with an overview of the planning process within a community setting. This course will use both theoretical and practical material to develop basic competencies in planning, implementing, and evaluating health programs; however, the predominant focus will involve the planning process and operations of a public health program. Assignments are designed to provide practice in applying course materials.

**PRVM 829. Interdisciplinary Approaches to Neurodevelopmental Disabilities, Including Autism Spectrum Disorders. 3 Credits.**
Topics in this course include an introduction to the Maternal and Child Health Bureau and related organizations, the history of neurodevelopmental disabilities (NDD), the genetics, identification, and prevention of developmental disabilities. Trainees obtain information about and participate in experiences related to neurodevelopmental and related disabilities and conditions individuals experience across the life course. The Life Course Perspective is defined by MCHB as the multidisciplinary approach to understanding the mental, physical, and social health of individuals, incorporating both life span and life stage concepts that determine an individual’s health trajectory. Significant emphasis is on autism and related issues. Participants learn the different roles of interdisciplinary team members, their unique contributions, and the team process in screening, evaluation and planning intervention. Prerequisite: Permission of Instructor.

**PRVM 830. Environmental Health. 3 Credits.**
This course will include discussion of some exposures and health effects of environmental contaminants and principles of prevention. Topics include outdoor and indoor air pollution, water and wastewater pollution, solid waste disposal, insect and rodent control, food protection, chemical and physical carcinogens, ionizing radiation, injury prevention, environmental epidemiology, active transportation, disasters, and occupational safety and health. A number of guest lecturers and field trips will be utilized.

**PRVM 831. Interdisc Leadership Approaches to Systems & Services for Indv with Autism, Neuro & Dev Disabilities. 3 Credits.**
Topics in this course include information about the history and development of service systems in the United States including Maternal and Child Health and Title V programs. An overview of program administration, business planning, budget development and various grant sources provides participants with an understanding of service systems operations and funding streams. Program oversight, standards of care and evaluation, including needs assessment and government mandates for outcomes (GPRAs), provide participants with information that enables them to explore agency director perspectives about barriers to providing effective services as well as systems barriers presented from a parent point of view. Discussions include how to make systems changes through consultation and technical assistance and information about adult learning styles and consumer empowerment. Other topics include the scientist/practitioner models of research, empirical validation of practices and community participatory action research. As an adjunct to the core course there are other didactic experiences required of all trainees including Center and community committee work, campus interdisciplinary forums, family immersion experiences and research presentations. These didactic experiences give faculty and trainees an opportunity to meet as a group, hear presentations, and discuss a variety of topics, including ethics, standards of care, and empirically validated practices. Prerequisite: Permission of Instructor.

**PRVM 835. Evaluation Methods in Public Health. 3 Credits.**
Principles and procedures to evaluate health promotion and disease prevention programs. Includes data collection methods, instrument scale development, measurement, and evaluation designs. Case studies of disease prevention literature on evaluation will be analyzed. Prerequisite: Permission of instructor.

**PRVM 836. Epidemiology in Aging. 3 Credits.**
An overview of the aging process, review of current knowledge of epidemiology of selected diseases, such as dementia and osteoporosis, and falls that primarily affect aging individuals. Emphasis on epidemiologic designs, methods, and issues (e.g., low response rate and measurements) that are pertinent to research on aging individuals. Prerequisite: PRVM 800, BMTR 811/PRVM 804, or permission of instructor.

**PRVM 841. Advanced Epidemiology I: Methods in Cross-Sectional and Case-Control Studies. 3 Credits.**
This course will concentrate on concepts and application of various statistical techniques in the analysis of epidemiological data. Students will be oriented toward application of SAS in data analysis and interpretation of data from cross-sectional and case-control studies. Prerequisite:
Students will understand the rule making process at the national and state level. They will understand the policy process at the national, state, and local level, and regulations and understand the role of common law. Students will understand the source of national, state, and local statutes and to play an active and effective role in policy making and analysis. This course is designed to prepare public health leaders to live and work in a world of laws, policy, and ethics. This course is designed to facilitate the development of skills in legal research as well as hands-on experience with skills in study design, methodology as applied to research in public health, health services research, and health behavior. Students will attend a weekly one-hour seminar on-line and will be given readings to accompany each lecture. Lectures will be done by faculty at various universities, as well as members of community organizations and/or tribes who are conducting research. Students may take the course multiple times; each seminar will be unique in terms of topics and accompanying readings, as well as lecturers. Some semesters may focus on a particular health topic for the full semester, e.g. - cancer or diabetes. This course is designed to be a seminar series that changes each time it is taught. Prerequisite: Permission of instructor.

PRVM 847. Seminar in American Indian Health Disparities. 1 Credit.
This is a graduate-level course designed to teach students about current research being done around the country to address health disparities faced by American Indian communities. Students will attend a weekly one-hour seminar on-line and will be given readings to accompany each lecture. Lectures will be done by faculty at various universities, as well as members of community organizations and/or tribes who are conducting research. Students may take the course multiple times; each seminar will be unique in terms of topics and accompanying readings, as well as lecturers. Some semesters may focus on a particular health topic for the full semester, e.g. cancer or diabetes. This course is designed to be a seminar series that changes each time it is taught. Prerequisite: Permission of instructor.

PRVM 849. Qualitative Methods in Public Health. 3 Credits.
Qualitative research has diverged from its anthropology roots to become commonplace in marketing, business, clinical, and public health settings. This course is designed to teach the basics of rigorous qualitative methodology as applied to research in public health, health services research, and health behavior. The course will equip students with a foundational understanding of theoretical underpinnings of qualitative research as well as hands-on experience with skills in study design, several methods of data collection, data analysis, and presenting results.

PRVM 851. Public Health Policy and Law. 3 Credits.
Public Health Policy and Law is about the legal and social justice framework for urgent public health issues. This course is designed to prepare public health leaders to live and work in a world of laws, and to play an active and effective role in policy making and analysis. Students will understand the source of national, state, and local statutes and regulations and understand the role of common law. Students will understand the policy process at the national, state, and local level, and develop skills analyzing legislation and influencing policy decisions. Students will understand the rule making process at the national and state level.

PRVM 853. Responsible Conduct of Research. 1 Credit.
The purpose of this course is to engage research trainees in reading about, considering, and discussing the responsible conduct of science. The course is designed as an option for meeting current federal regulations, which require that all NIH training grants provide training in the responsible conduct of research. This course provides a concise overview of key subject areas in the responsible conduct of research. It is designed to make students aware of relevant guidelines, policies and codes relating to ethical research, as well as to provide the skills for identifying and resolving ethical conflicts that may arise in research.

PRVM 855. Seminar in Women's Health. 3 Credits.
Seminar in Women's Health is a 3 credit elective, graduate level course focusing on gender issues that are relevant in treatment approaches to various health issues, the differing health status of minority women, the involvement of men's health to include the entire life span and areas other than reproduction, the changing implications of health care and policy and men in women's health. No prerequisite.

PRVM 856. Community-Based Participatory Research. 3 Credits.
This is a graduate-level course designed to teach students the basic methods of conducting and evaluating community-based participatory research (CBPR). Students will be introduced to the five phases of CBPR, including partnership formation and maintenance, community assessment and diagnosis, defining the issue, documentation and evaluation of partnerships, and feedback, interpretation, and evaluation of partnerships. In addition, students will learn how to find funding mechanisms and journals that are appropriate for CBPR, as well as some of the key factors in writing about CBPR. Students will be introduced to a variety of examples of well-done CBPR and will learn what makes it different from other types of research done in community settings. Prerequisite: Social and Behavioral Aspects of Public Health or permission of instructor.

PRVM 859. Tobacco and Public Health. 3 Credits.
This course will provide an overview of tobacco as a public health problem and tobacco politics. Students will learn about the pharmacology of nicotine, the mechanisms leading to tobacco addiction and biologic factors that affect pharmacology and tobacco use such as the menstrual cycle and comorbid illnesses such as depression and others. Public health approaches to preventing tobacco use initiation will be studied, including which initiatives are most effective. State-of-the-art methods to assist smokers to quit will be reviewed, including pharmacologic interventions, counseling by health professionals and education/motivation support. Barriers to obtaining services will be explored, such as educational needs among various types of health professionals, and access to care in rural areas or among clients with certain types of health insurance.

PRVM 861. Leadership in Public Health. 3 Credits.
This course is designed to enhance and develop leadership knowledge and skills vital to readying students for public health 3.0 and the role of chief health strategist for their organization, community, region, or state. Competency in principles of leadership, governance, management, collaboration, decision making, and negotiation will be achieved through leadership assessments, journal entries, case studies, and writing of a leadership self-reflection and action plan.

PRVM 862. Terrorism, Emergency Preparedness and Response. 3 Credits.
Through lectures, tabletop exercises, and invited speakers, the course content will include the following topics: terminology and core competencies, public health infrastructure, collaboration and communication, roles and responsibilities, psychological effects of terrorism, agricultural and zoonotic bioterrorism, law enforcements and public health, epidemiology of BT diseases (including agent specific lectures), burn injuries, risk communication, Strategic National Stockpile (SNS), National Incident Management System (NIMS), public health law...
as related to bioterrorism, and public health laboratory response related to bioterrorism.

**PRVM 863. Health Disparities in Public Health. 3 Credits.**
This course is designed to enhance students' understanding of the biopsychosocial factors that contribute to disparities in health and health care. This course will also review strategies developed to reduce health disparities. Prerequisite: PRVM 818 Social and Behavioral Aspects of Public Health is recommended.

**PRVM 864. Global Public Health Impact of HIV/AIDS. 3 Credits.**
Historically reviews the HIV pandemic to evaluate lessons learned in prevention and treatment of the disease and successes and failures of public policies to reduce the impact of HIV in various countries. Critically analyzes HIV prevention interventions (voluntary counseling and testing, prevention of mother-to-child transmission, promotion of safer sex practices, clean needle exchange, methadone or buprenorphine programs, treatment with antiretroviral therapy, pre- and post-exposure prophylaxis, vaccine and microbicide development) and challenges with their implementation.

**PRVM 865. Implementation Science I. 3 Credits.**
Many evidence-based health care interventions fail to produce successful outcomes when implemented into practice. Implementation and dissemination sciences comprise a multidisciplinary set of theories and methods to improve and expedite translating research evidence to everyday health-related practices. Both disciplines are systematic approaches to understanding how healthcare interventions can be better integrated into diverse practice settings, and emphasize direct engagement with institutions and communities where health interventions take place. In order to optimize public health, it is essential to not only understand how to create the best interventions, but how to ensure that they are effectively delivered within clinical and community practice. A healthcare intervention that is 100% efficacious, but never used is 0% effective. Prerequisite: Graduate level statistics course within the last 5 years.

**PRVM 867. Ethical Issues in Public Health. 3 Credits.**
Lectures and small group discussions explore public health ethics, social justice and autonomy as they relate to public health practice and health policy. Current issues in health policy are discussed including: the right to health and health care, bioterrorism, and health inequalities, poverty and power. Weekly small group discussions include cases on MCHP, obesity and “fat taxes,” resource allocation, and disparities in infant mortality. Student evaluation is based on class participation, a small group project, and a final paper based upon a case study addressing ethical issues relevant to the student’s area of public health specialization.

**PRVM 868. Biomedical Informatics Driven Clinical Research. 3 Credits.**
This course introduces students to biomedical informatics, clinical and administrative information systems and workflows, data warehousing and hypothesis generation using HERON and the i2b2 web client, programming using Structured Query Language (SQL), and developing a computable phenotype and research cohort for observational research or prospective trial eligibility based on secondary data sources centered on electronic health records. Students will also gain experience developing their cohort, an analytic ready database and files using SQLITE and REDCap, conduct preliminary analysis, and prepare an abstract for submission to a clinical or informatics forum/conference. Prerequisite: PRVM 800 Principles of Epidemiology or BIOS 714 Fundamentals of Biostatistics I.

**PRVM 869. Systematic Review. 3 Credits.**
This course covers the methods of comprehensive syntheses of research evidence. Rigorous review methods will be highlighted, such as searching for potentially relevant articles; selecting primary articles using explicit, reproducible criteria; appraisal of studies; quantitative data synthesis; and, interpretation. The course uses the framework provided by the GRADE Working Group to evaluate certainty of estimates and present and interpret evidence. The focus of the course is on systematic reviews of interventions, which typically include randomized trials and non-randomized studies that evaluate therapeutic interventions and outcomes. This focus is to ensure that students understand and apply the fundamental processes to conduct a systematic review. The process can be applied to other review topics and study designs, which may be mentioned but not covered in the course. Students are required to conduct a systematic review of an intervention during the course. Students who wish to conduct reviews of other types of question will need to ensure they have methodological support in addition to what is provided within the course. Prerequisite: PRVM 800 Principles of Epidemiology; graduate level statistics course or permission of instructor.

**PRVM 872. Grant Writing. 3 Credits.**
This course combines instruction and practical exercises to move the participant step-by-step through all stages of planning research, identifying funding sources, and writing grant applications primarily to the National Institutes of Health (NIH). Upon completion of the course, the student will have developed a quality proposal and be able to demonstrate skills in preparing applications. These will include: developing fundable research ideas, identifying appropriate funding opportunities from the NIH, finding information on the Internet regarding applying for funds, developing application sections and crafting a quality grant application, complying with certification and assurances required on NIH applications, providing feedback to other class participants in small groups to act as internal grant reviewers, responding to reviewers, and building a budget.

**PRVM 873. Scientific Writing. 3 Credits.**
This graduate course is designed for students, scientists, and clinicians who aspire to become independent published writers. This course will introduce the complex process of academic publishing. Students will use practical assignments to develop basic competencies in written communication, including planning, writing, peer-reviewing, revising, and submitting a scientific or academic manuscript for publication. Students will begin with existing work (e.g., course paper, written thesis, completed study findings, draft manuscript) which they will transform into a journal-quality manuscript ready for submission. Course content will also address writing-related anxiety, time-management, organization, editing, and responding to reviewers.

**PRVM 875. Management of Public Health Data. 3 Credits.**
A 3-credit hour graduate level course concerning basic computing skills necessary for any advanced epidemiologic or quantitative methods. This course covers basics of variable and dataset creation, building, maintenance and basic descriptive (not interpretive) analysis. The course is designed to be of use to students entering a variety of research, administrative and public health settings in public health, clinical and other fields. Software covered will include SAS, SPSS, Epi Info, REDCap, Microsoft-EXCEL and ACCESS. The course can stand alone, or prepare students for Biostatistics and Epidemiology courses. Public data presentations will be stressed to prepare students to communicate about data with the lay public.

**PRVM 876. Health Services Research Using Public Payer Data. 3 Credits.**
Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for
Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States’ Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare & Medicaid Services (CMS) have streamlined researchers’ access to national Medicare and Medicaid populations for health services and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to our state’s employees, Medicaid beneficiaries, and private health insurance claims data for enterprising researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer claims data.

PRVM 877. Health Communication. 3 Credits.
This course is focused on health education and promotion, especially designing and evaluating health communication programs for populations with shared risks, exposures or behaviors. Health communication theories and principles will be applied to selecting appropriate communication strategies and developing health communication plans. Students will develop an appreciation of the role of cultural context in designing health communication. Emphasis will be placed on written communication and oral presentation.

PRVM 878. Cost-effectiveness and Decision Analysis. 3 Credits.
This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins with a review of probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes, stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost-effectiveness analysis, and cost benefit analysis. (Same as HP&M 872)

PRVM 879. Budgeting and Human Resource Management. 3 Credits.
This graduate-level course covers principles and skills for budgeting and human resource management within public health organizations. It focuses on non-profit and public settings. Budgeting topics include the principles and purposes of accounting, concepts related to finance, and financial strategic planning. Human resource management topics include job design and hiring, performance management, retention, compensation/benefits, legal issues, and termination. The focus of the course is twofold: 1) understanding the concepts behind budgeting and in gaining skills in interpreting and using financial information; 2) gaining skills in human resources management and resource development. The course is designed for people who are interested in public health administration, but should be useful to anyone with an interest in public health leadership in any setting.

PRVM 880. Seminar in American Indian Health. 3 Credits.
This is a graduate-level course designed to teach students about current issues in American Indian health, as well as provide a basic historic context for understanding these issues. Students will read current literature from the academic journals and will be exposed to research being done today in American Indian communities, some of which has not yet been published. In addition, students will gain an understanding of what health disparities exist in American Indian communities and some of the reasons why they exist, including access issues and other barriers to care, from both Western and Native points of view. Students will be exposed to some of the difficulties in conducting health research in Native communities and some of the more successful techniques to overcome barriers. Prerequisite: None.

PRVM 891. Public Health Internship. 1-3 Credits.
Students will complete a 192 hour internship in a community setting (12 hours/week for the 16 week semester) during PRVM 891 Public Health Internship. The internship is a service-learning experience for which students should consider the contribution their activities will make to the internship setting as well as activities that will be undertaken to meet the student's learning objectives. Prerequisite: Students may enroll in PRVM 891 Public Health Internship if they are within 2 semesters of graduation and have the permission of the KU-MPH program.

PRVM 893. Public Health Capstone. 1-3 Credits.
The public health capstone is a 192 hour (12 hours/week for the 16 week semester) culminating experience that requires students to synthesize and integrate knowledge and/or apply theories and principles learned to an area of public health. The capstone is meant to be taken at the end of the student's degree program, and is designed to give the student an opportunity to apply their skills to a variety of problems or issues in public health. The capstone should be primarily focused on addressing concentration specific competencies. While the exact activities and outcomes of the capstone will differ across concentrations all capstones, regardless of concentration, must include a written report and an oral defense. Prerequisite: PRVM 891 Public Health Internship; previous attendance at two MPH capstone defenses; last semester of enrollment and be within 12 credits of graduation; must be in good academic standing.

PRVM 899. Thesis. 1-3 Credits.
Preparation of a formal thesis based on the research conducted on a community health problem. After the thesis has been completed, the student will be given an oral examination on the research methods and content. Prerequisite: All MS-CR core and required courses completed or in progress in the student's final semester.

Master of Health Services Administration

The Master of Health Services Administration (MHSA) degree prepares students for leadership roles in the health care sector, including positions in hospitals, health care systems, long-term care facilities, clinics, insurance firms, health departments, and government agencies. The MHSA offers a systematic examination of the health care system, exposure to the impact of health policy and the policy process, a mastery of analytic methods, and a broad exposure to the practice of health care management. Classes are taught on the KUMC campus and offered in the late afternoon and evening.

The mission of the MHSA Program is to improve lives and communities in Kansas and beyond by preparing students to be outstanding health administration professionals and future leaders in the health care sector. To accomplish this mission, the program:

- recruits students with diverse backgrounds and perspectives, along with the ability to succeed;
- hires, values and respects faculty with varied backgrounds, who are committed to excellence in teaching, scholarship and service;
- designs and develops a competency-based curriculum that stresses lifelong learning;
- emphasizes interprofessional education through collaboration with learners and practitioners from multiple disciplines;
• stresses the practical application of knowledge; and
• enables graduates to be competitive in the marketplace.

The application is an on-line process. Detailed instructions on how to apply and application deadlines are posted on the MHSA website (http://www.kumc.edu/school-of-medicine/population-health/education/master-of-health-services-administration-(mhsa).html). Students are admitted for the fall semester only.

Admission requirements:

• Bachelor’s degree from a regionally accredited institution, documented by submission of official transcript(s). The bachelor’s degree must be attained prior to entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
• A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement. (p. 2455)
• A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
• An official copy of the Graduate Record Examination (GRE) score not more than approximately five (5) years old sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895. An alternative graduate level examination score may be substituted on a case-by-case basis.
• A statement of goals/purpose. This brief essay should outline the applicant’s reasons for wanting to pursue graduate education in health administration and career objectives.
• Three letters of recommendation.
• Applicants must also have completed a prerequisite three (3) credit hour course in statistics.
• A personal interview is also required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. After an applicant has been admitted, the program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. To verify admissions requirements for past years, use the catalog of the year student entered the program. Other years’ catalogs (http://catalog.ku.edu/archives/)

The MHSA program is a 56 credit-hour graduate professional degree program and is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). (http://www.cahme.org/)

Degree requirements:

• Degree requirements are normally completed within two (2) years of admission to the program although a maximum of seven (7) years is allowed. Part-time students normally complete requirements within four to five (4-5) years of admission to the program.
• Cumulative grade-point average (GPA) of at least a 3.0 for all program coursework.
• Completion of a minimum of 56 credit hours.
• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
• Successful completion of the following required courses (or equivalents):

Total Hours 56

• Students are required to participate in the individualized competency review process.
• Students are required to participate in the campus-wide activities of the Center for Interprofessional Education (https://www.kumc.edu/research/center-for-interprofessional-practice-education-and-research.html). Specific activities are determined on an annual basis by the MHSA Program Director.

Although students complete an internship or practicum as part of the program, all students are encouraged to seek a post-graduation residency/fellowship.

Degree requirements and course descriptions are subject to change. Any courses taken as equivalents must be approved by the Program Director and the Office of Graduate Studies. In most cases, use the catalog of the year the student entered the program to determine requirements. Other years’ catalogs.«.

Dual /Joint degree Programs

The Department of Population Health offers 4 dual degrees and 1 joint degree in conjunction with the School of Medicine MD program and the Schools of Law, Nursing, and Health Professions. Please contact the MHSAs Program Manager or the respective schools for complete information.

MD/MHSA

The dual MD/MHSA program prepares students to enter careers as physician executives or to provide administrative support for their medical practice. As the health care environment becomes more complex and competitive, administrative skills can be extremely important to individuals starting careers in medicine or those seeking to enhance their current careers. The MHSAs portion of the curriculum combines social science and business content in the context of health care and prepares students for management and executive positions in health care organizations. Students complete all requirements for the MD degree as specified by the School of Medicine. The MD program is described in the School of Medicine Catalog (p. 2144)ig. The MD/MHSA can be completed in 5 years. Students must be admitted to each program to pursue the dual degree.

Students accepted into the dual MD/MHSA program complete the course of study described here (http://catalog.ku.edu/medicine/population-health/mhsa/JDMHSA_dual_degree_curriculumDec2020.pdf).

MS in Nursing (Organizational Leadership)/MHSA

The dual Master of Science in Nursing (Organizational Leadership)/MHSA degree program combines the MHSA degree offered by the Department of Population Health within the School of Medicine and the School of Nursing’s Master of Science (p. 2288) degree with the specialization in Organizational Leadership. This program gives students the opportunity to acquire training in the convergent fields of nursing and health services administration. The program combines course work, allowing the two degrees to be completed in 8 semesters. Students must be admitted to each program to pursue the dual degree.

DPT/MHSA

The dual Doctor of Physical Therapy (DPT) and Master of Health Services Administration (MHSA) degree is offered through the School of Medicine’s Department of Population Health and the School of Health Professions’ Department of Physical Therapy. As the health care environment becomes more complex and competitive, administrative skills will be extremely important to individuals starting clinical careers in healthcare. By participating in this program, students can achieve both degrees in four years. Students must be admitted to each program to pursue the dual degree.

• Cumulative grade-point average (GPA) of at least a 3.0 for both programs.
• Completion of the DPT degree prior to or at the same time as the awarding of the MHSA degree.
• Completion of a minimum of 39 MHSA credit hours.
• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
• Successful completion of 31 hours of the following MHSA courses:

Master of Health Services Administration

HP&M 862 Research Practicum in Health Services Administration 1-3
HP&M 876 Medicare and Medicaid 3
HP&M 880 Health Care and Social Policies in Sweden 3
PRVM 809 Introduction to Public Health 3

• NOTE: Any student who does not complete the DPT will need to take the 17 credits of the full MHSA program that were waived by virtue of being in the Dual Degree Program in order to earn an MHSA.

BSHIM/MHSA

The joint Bachelor of Science in Health Information Management (p. 644) (BSHIM) and Master of Health Services Administration (MHSA) degree is offered through the School of Medicine’s Department of Population Health in association with the School of Health Professions’ Department of Health Information Management. By participating in this intensive, full-time program, students can achieve both degrees in five years. Students pursuing the BSHIM/MHSA will be prepared to assume management and executive positions in health-related organizations and to bring their expertise in health information management to these positions.

Students accepted into the BSHIM/MHSA program complete the course of study described here (http://catalog.ku.edu/medicine/population-health/mhsa/Bridge_Curriculum_Revision_11-2020-final.docx).

The Graduate Certificate in Health Administration provides an introduction to the field of health administration. Students will obtain a basic understanding of the U.S. healthcare system and how it operates. This certificate is designed for those aspiring to leadership positions in healthcare, to those newly in healthcare leadership positions, and to those considering a Master of Health Services Administration (MHSA) degree (Master of Health Services Administration, KU School of Medicine Department of Population Health (kumc.edu) (https://www.kumc.edu/school-of-medicine/population-health/education/master-of-health-services-administration-(mhsa).html)). If a student is subsequently admitted to the MHSA program, credits from a completed certificate may upon approval be used towards fulfillment of MHSA degree requirements. All certificate classes are accessible to distance learners.

The certificate will be comprised of four courses taken in the following order:

**Summer HPM 810: The Healthcare System (3 credits, online)**
The structure and function of the components of the U.S. healthcare system are introduced in the context of the history, values and social forces that influenced its development and evolution. Students gain exposure to the concepts and vocabulary associated with aspects of the system, including delivery (providers, institutions, services), resources (finance, payment, insurance), population and public health, and outcomes (cost, access, quality). Healthcare outcomes from consumer, clinical and societal perspectives are explored.

**Fall HPM 825: Financial Concepts in Healthcare Management (3 credits, hybrid)**
Introduces the financial and managerial accounting concepts used in health care. This includes financial statement analysis; cost accounting; budgeting; and capital project analysis.

**Fall HPM 858: Health and Social Behavior (3 credits, hybrid)**
Health care as a cultural and socio-behavioral system is presented. Using research and theory, students explore alternative perspectives on the nature of medicine and healing within comparative health systems, both U.S. and abroad. Students examine at an advanced level how healthcare organizational structures contribute to patient health outcomes and influence employee behaviors. The course reinforces the nature and characteristics of the health professions, particularly medicine and nursing perceptions, and the complex behavioral dynamics of health professionals with organizational leaders.

**Spring HP&M 822: Healthcare Economics (3 credits, online)**
This course introduces the core concepts from economics to healthcare with a focus on helping health care managers use economic tools in making sound decisions. The demand for health care products, the structure of insurance, and the supply of health care products are examined. Students will apply a variety of economic analyses to health policy and health system issues.

**ADMISSIONS REQUIREMENTS:**

- A completed application
- An undergraduate GPA of 3.0 (on a 4-point scale) from an accredited institution
- A letter of reference from a professional colleague or professor
- A personal statement about why the applicant wants to pursue the certificate
- Interview with an MHSA faculty member

**Contact for More Information:**

Nichole Evans, MHSA Program Manager
Department of Population Health
University of Kansas Medical Center
5001 Student Center– Mail Stop 3044
Kansas City, KS 66160
913.588.1934; nevans2@kumc.edu

Because the MHSA degree signifies that the holder is prepared for entry into the practice of health services administration, it follows that graduates must have the knowledge and skills necessary to function in a broad range of management and leadership situations. Therefore, the following abilities and expectations must be met by all students with or without accommodations admitted to the MHSA program.
1. **Observation:** A student must be able to observe class demonstrations and field experiences relevant to the field of health services administration. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication:** A student must be able to communicate effectively in oral and written form with other students, faculty, staff, and preceptors. Effective communication includes the ability to understand assigned readings and lectures, the ability to analyze information, and the ability to present results of such analyses verbally and in writing.

3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, and make public presentations. Class requirements may also include field work in a variety of health services organizations.

4. **Intellectual, conceptual, integrative and quantitative abilities:** A student must possess the ability to understand and work with measurements, carry out calculations, and engage in reasoning, analysis and synthesis. A student must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of a manager’s responsibilities. Integrity, reliability, self-direction, motivation, and ability to work with diverse groups are qualities necessary for effective practice in this field.

**Master of Public Health**

The University of Kansas Master of Public Health program (KU-MPH) is a fully accredited, 42 credit hour graduate program with Epidemiology, Generalist and Public Health Practice concentrations. The program has been accredited by the Council on Education for Public Health (CEPH) since 1998 and is offered through the Department of Population Health at the University of Kansas Medical Center in Kansas City and the University of Kansas School of Medicine-Wichita in Wichita. KU-MPH is also the only fully accredited MPH program in the state to become member of the Association of Schools and Programs of Public Health (ASPPH).

Our program vision is: Healthy Communities

Our program mission is: To improve public health in Kansas, the Heartland, and the nation through excellence in education, discovery, and community engagement.

KU-MPH graduates are employed in a wide variety of settings, including governmental public health, non-profit organizations, academic research, and healthcare organizations.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Public Health (https://www.kumc.edu/school-of-medicine/academics/departments/population-health/academics/master-of-public-health/admissions.html) website. Admission to the M.P.H. program is competitive. Students may apply in either Kansas City or Wichita and indicate their preference of campus choice as well as their choice for concentration on the application itself.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
  - A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
  - Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455). (p. 2455)
  - A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
  - Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
  - A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or experience that indicates adequate preparation for the M.P.H. curriculum is preferred.
  - A personal written statement that describes the applicant's career goals and motivation for seeking post-graduate training in public health.
  - One semester of college algebra or calculus is required to enter the Public Health Practice or Online Generalist concentration. One semester of calculus is required to enter the Epidemiology concentration.
  - Completion of one semester of calculus is required to enter the Epidemiology concentration.

After an applicant has been admitted, the program may defer an applicant's admission for one semester after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years’ catalogs*.

The Master of Public Health program consists of at least 42 credit hours. Students complete credit hours in specified core courses in epidemiology, community health assessment and advocacy, environmental health, public health administration, leadership, management of public health data, and health communication. Additional degree requirements vary by the choice of concentration. The two concentrations are epidemiology or public health practice. All students complete a public health internship and capstone project as described below.

**Degree Requirements:**

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 4 years of admission to the program.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Completion of a minimum of 42 hours.
• Successful completion of the following core courses (21 credit hours) regardless of concentration:

Dual M.D.-M.P.H. Program

This is a five year program in which the medical student completes the requirements for the M.P.H. degree in one year. This can be accomplished either between the second and third, or between the third and fourth years of medical school. Students must complete all degree requirements for both the M.D. and the M.P.H. programs. They complete the M.P.H. concentration in Public Health Practice in three semesters, beginning in the summer (June), and proceeding through fall (August) and spring (January), and finishing by the end of May. Please contact the respective academic units offering the degree for more information. The M.D. degree (p. 2144) is offered by the School of Medicine.

Dual Ph.D. in Behavioral Psychology-M.P.H. Program

The Department of Applied Behavioral Science on the Lawrence campus offers a 72-credit-hour doctoral program in behavioral psychology (p. 1148). Students learn about an array of content areas and theoretical perspectives and achieve proficiency in behavioral analysis, developmental studies, or behavioral intervention. Both the departments of Applied Behavioral Science (http://www.absc.ku.edu/) and Population Health (http://www.kumc.edu/school-of-medicine/population-health.html) promote community/public health and development through collaborative research, teaching, and service.

The dual Ph.D./M.P.H. is ideal for students interested in prevention through community and public health. Students must apply for admission to the M.P.H. and Ph.D. programs separately. Applications are reviewed by the admissions committees of both programs. Students admitted to the joint program complete the 42-hour M.P.H. requirements as listed in the chart below in addition to the Ph.D. requirements. See the Doctor of Philosophy in Behavioral Psychology (p. 1148) section of this catalog for the Ph.D. degree requirements. Completion of ABSC 710, ABSC 875, and ABSC 876 also qualifies a student for a Graduate Certificate in Community Health and Development (p. 1153) offered by the Department of Applied Behavioral Science. Additional details about the certificate program may be found on their website (https://absc.ku.edu/ma-cert-chd/).

**Total Hours**: 42

The Master of Public Health online Generalist concentration consists of at least 42 credit hours. Students complete credit hours in specified core courses in epidemiology, community health assessment and advocacy, environmental health, public health administration, leadership, management of public health data, and health communication. Additional degree requirements vary by the choice of concentration with only the Generalist concentration being available completely online. All students complete a public health internship and capstone project as described below.

### Degree Requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 4 years of admission to the program.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

- Completion of a minimum of 42 hours.

- Successful completion of the following core courses (21 credit hours) regardless of concentration:
  - Required Courses - 21 credit hours
    - PRVM 800 Principles of Epidemiology
    - PRVM 804 Community Health Assessment, Intervention and Advocacy
    - PRVM 827 Public Health Administration
    - PRVM 830 Environmental Health
    - PRVM 861 Leadership in Public Health
    - PRVM 875 Management of Public Health Data
    - PRVM 877 Health Communication

- Concentration Courses - 15 credit hours
  - PRVM 870 Health Communication

### Observations:

- A student must be able to observe and analyze class demonstrations and field experiences relevant to the disciplines of public health. These disciplines include but are not limited to epidemiology, biometry, environmental health, health program management, and health communication. Observation necessitates the functional use of the senses of vision and hearing.

### Communication:

- A student must be able to communicate effectively in oral and written forms with other students, faculty, and preceptors. Use of computers and other technology is imperative to this communication. Effective communication includes the ability to understand assigned readings and lectures, the ability to analyze information, and the ability to present results of such analyses verbally and in writing.

### Motor:

- A student must have sufficient motor function to attend classes, prepare assignments, give public presentations, and participate in field experiences. Some field experiences in environmental health, for example, include activities at sites (e.g., waste treatment plants, water treatment facilities).

### Intellectual-Conceptual, Integrative, and Analytic Abilities:

- Applicants must be able to read and understand documents written in English. A student must possess the ability to understand and work with measurements, carry out calculations, and engage in reasoning, analysis, and synthesis. Problem solving, the critical skill of public health, demands all of these intellectual abilities. In addition, a student should be able to...
Admission requirements:

BEHAVIORAL AND SOCIAL ATTRIBUTES:
A student must possess the emotional maturity and stability required for full utilization of his/her intellectual abilities, the exercise of sound judgment, and the prompt completion of all responsibilities attendant upon responsible activity in the broad field of public health. Integrity, motivation, reliability, self-direction, and the ability to work in diverse groups are personal qualities, which are required for effective practice in the field. As a component of public health education, a student must demonstrate ethical behavior.

Individuals with disabilities are encouraged to apply to the program. Candidates who indicate that they cannot meet one or more of the expectations will be reviewed further with applicant and faculty input to determine what reasonable accommodations might be possible to facilitate successful completion of the MPH curriculum.

Master of Science in Clinical Research

The University of Kansas Master of Science in Clinical Research program (MS-CR) is a 33 credit hour graduate program with the student's thesis serving as their culminating project. The program is offered through the Department of Population Health at the University of Kansas Medical Center in Kansas City and the University of Kansas School of Medicine-Wichita in Wichita.

The MS-CR program provides students with formal training in clinical research, biostatistics, and epidemiology that will allow scholars to enhance their current research skills. Graduates from the Master of Science in Clinical Research (MS-CR) program serve in a wide variety of fields, including clinical medicine, research, education, disease surveillance and academic settings. The University of Kansas MS-CR degree is designed to provide clinical scholars with a strong foundation in patient-oriented research principles and methods.

Admission and degree requirements are detailed in this section of the catalog. Other program information and application details may be found at our website.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Clinical Research program (https://www.kumc.edu/school-of-medicine/academics/departments/population-health/academics/master-of-science-in-clinical-research/admissions.html) website. Admission to the M.S. in Clinical Research degree program is competitive. Students may apply in either Kansas City or Wichita and should indicate their preference of campus on the application itself.

Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. are required to submit an evaluation of their academic credentials performed by one of the established companies providing this service for a fee. The MS-CR program will accept evaluations from the World Education Service (http://www.wes.org/) (WES) or Educational Credential Evaluators (http://www.ece.org/) (ECE) and other companies on a case by case basis. The evaluation must be course by course and include degree equivalency and grade point average. The evaluation should be sent directly from the company to the MS-CR program.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html). The Educational Commission for Foreign Medical Graduates (ECFMG) certificate is accepted in lieu of a TOEFL/IELTS score for applicants with a Medical Degree applying to this program.
- A background check (https://catalog.ku.edu/graduate-studies/kumc/#BackgroundCheck) is required during the admission process; it may affect the student’s eligibility to enter the program.
- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.
- Completion of at least one semester of calculus is required.
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or experience that indicates adequate preparation for the M.S. in Clinical Research curriculum is preferred.
- A personal written statement that describes the applicant’s career goals and motivation for seeking post-graduate training in clinical research.

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Degree requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 5 years of admission to the program.
- Completion of a minimum of 33 credit hours.
Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

Enrollment in PRVM 899 Thesis the semester the student will graduate.

Successful thesis submission (https://catalog.ku.edu/graduate-studies/kumc/#ThesisSubmission) (according to Office of Graduate Studies policy.)

Successful completion of the following core courses (22 credit hours):

* These are sample plans, and may be subject to change. Students should meet with their advisors once per semester to discuss course plans.

The following abilities and expectations must be met by all students admitted to the Master of Science in Clinical Research program:

**OBSERVATION:**

A student must be able to observe and analyze class demonstrations and field experiences relevant to the disciplines of clinical research. Observation necessitates the functional use of the senses of vision and hearing.

**COMMUNICATION:**

A student must be able to communicate effectively in oral and written form with other students, faculty, and preceptors. Use of computers and other technology is imperative to this communication. Effective communication includes the ability to understand assigned readings and lectures, the ability to analyze information, and the ability to present results of such analyses verbally and in writing.

**MOTOR:**

A student must have sufficient motor function to attend classes, prepare assignments, and give public presentations. Class requirements may also include field experiences in a variety of health settings.

**INTELLECTUAL-CONCEPTUAL, INTEGRATIVE, AND ANALYTIC ABILITIES:**

Applicants must be able to read and understand documents written in English. A student must possess the ability to understand and work with measurements, carry out calculations, and engage in reasoning, analysis, and synthesis. A student must be able to draw on all these abilities to be an effective problem solver. In addition, a student should be able to comprehend three-dimensional relationships and understand spatial relationships of structures.
BEHAVIORAL AND SOCIAL ATTRIBUTES:

A student must possess the emotional maturity and stability required for full utilization of his/her intellectual abilities, the exercise of sound judgment, and the prompt completion of all responsibilities attendant upon responsible activity in the broad field of public health. Integrity, motivation, reliability, self-direction, and the ability to work in diverse groups are personal qualities, which are required for effective practice in this field. As a component of clinical research education, a student must demonstrate ethical behavior.

Individuals with disabilities are encouraged to apply to the program.

Candidates who indicate that they cannot meet one or more of the expectations will be reviewed further with applicant and faculty input to determine what reasonable accommodations might be possible to facilitate successful completion of the MS-CR curriculum.

Doctor of Philosophy in Health Policy and Management

Our PhD in Health Policy and Management prepares high-level health services researchers for careers in academic settings or in public and private organizations where advanced research, leadership and analytic skills are required.

Health services research is a multidisciplinary field that examines the uses, costs, quality, accessibility, delivery, organization, financing and health outcomes of healthcare systems in the U.S. and elsewhere. Health Services researchers investigate, compare and interpret the health outcomes of healthcare systems in the U.S. and elsewhere.

The doctoral program is a post-master’s, competency-based program in health services research consisting of 3 stages. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. The program, including dissertation, is designed to be completed in a minimum of 4-5 academic years (see Degree Plan tab.) Students are expected to maintain continuous, full-time enrollment.

Stage 1 consists of basic courses in health policy, health systems, culture, occupations, health care management, and quantitative and qualitative research methods. A notable feature of this stage is that students begin to participate in the research process immediately upon beginning the program through a series of 1-credit-hour immersion courses, taken within the first 2 semesters along with other basic courses.

Stage 2 involves specialization in a specific substantive area of either policy or management-related research or a combination, as well as advanced statistical analysis and research methods. Students also complete a teaching seminar and practicum.

Stage 3 consists of the doctoral dissertation demonstrating the development, execution, and results of original research. Students work primarily with their dissertation advisor and doctoral committee at this stage in order to prepare and defend their dissertation proposal and to carry out and complete their dissertation research project. There are two options for the written dissertation, the traditional book format or a three publishable articles format. The written dissertation is formatted and published according to university guidelines.

Admission requirements:

• A master’s degree in health services administration or a related field (e.g. public health, public administration, business, social sciences, biological sciences, nursing) from a regionally accredited institution and documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from all other institutions attended post-baccalaureate are also required.

• A cumulative grade-point average (GPA) of at least a 3.5 on a 4.0 scale for all post-baccalaureate course work. Students with degrees from outside the U.S. may be subject to transcript evaluation to determine that the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirement. World Education Services (WES) is a recommended resource for this requirement. The applicant should include their WES transcript request with their submitted materials in the University’s local software.

• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455) and additionally for this specific program, a minimum score of 50 on the TSE or SPEAK tests, a minimum iBT speaking score of 24, or a minimum IELTS speaking score of 8.

• A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.

• The Graduate Record Examination (GRE) is no longer required.

• Successful completion of a graduate level statistics course. The need for additional foundational coursework (health delivery systems, health economics, health behavior/organizations, health policy) will be evaluated on an individualized basis during the admissions process.

• Three letters of recommendation from individuals who can assess your academic background and potential for success in a doctoral program.

• A personal statement regarding your career objectives and purpose.

• A current resume or curriculum vitae.

• A copy of the applicant’s master’s thesis, graduate-level research paper or other example of the applicant’s scholarly research writing.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, students should refer to the catalog content of the year they entered the program. Other years' catalogs.

The doctoral program is a post-master’s, competency-based program in health services research consisting of 3 stages. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. The program, including dissertation, is designed to be completed in a minimum of 4-5 academic years (see Degree Plan tab.) Students are expected to maintain continuous, full-time enrollment.

Degree requirements:

• Degree requirements are normally completed within 4-5 years of admission to the program although a maximum of 8 years is allowed.

• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of the University’s Research Skills and Responsible Scholarship (https://catalog.ku.edu/graduate-studies/kumc/#ResearchSkillsandResponsibleScholarship) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of the required sequence of health services research methods courses HP&M 870, HP&M 873, HP&M 875, HP&M 886, and HP&M 910 meets the Research Skills requirement.
• Successful completion of the research ethics modules within HP&M 870, HP&M 886, and HP&M 910 meets the Responsible Scholarship requirement.
• Successful completion of the KUMC Human Subjects Projection training module during the first semester of enrollment and maintenance of certification throughout tenure in the PhD Program.
• Successful completion of preliminary examinations in quantitative analysis, general health policy and management research, and a specialization area.
• Successful completion of the Residence Requirement (https://catalog.ku.edu/graduate-studies/kumc/#programstext) by enrollment in full-time status a minimum of two semesters prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of the Oral Comprehensive Examination (https://catalog.ku.edu/graduate-studies/kumc/#ComprehensiveOralExamination). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
• Successful completion of the Post-Comprehensive Enrollment (https://catalog.ku.edu/graduate-studies/kumc/#PostComprehensiveEnrollment) requirement.
• Enrollment in a minimum of one (1) credit of HP&M 999 the semester the student will defend dissertation and graduate.
• Successful completion of the Final Oral Examination (https://catalog.ku.edu/graduate-studies/kumc/#FinalOralExamination) (dissertation defense.)
• Successful Dissertation Submission and Publication (https://catalog.ku.edu/graduate-studies/kumc/#DissertationSubmissionandPublication) (according to Office of Graduate Studies policy.)
• Successful completion of the following Health Policy and Management core courses:

A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, deliver lectures and make public presentations. Class requirements may also include field work in a variety of health services organizations.

4. Intellectual, conceptual, integrative and quantitative abilities: A student must possess the ability to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher and teacher.

5. Behavioral and social attributes: A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

## Essentials of Public Health Graduate Certificate

The Essentials of Public Health Graduate Certificate provides students with critical public health knowledge necessary for healthcare workers and public health practitioners to serve their populations. Students will gain knowledge in foundational public health skills including epidemiology, public health administration, environmental health and basic data management.

### Degree Requirements:

A minimum of 12 post-bachelor’s degree credit hours are required with a minimum GPA of 3.0 on a 4.0 scale. A typical full-time course plan is listed below for the Essentials of Public Health Practice Certificate. It requires 12 credit hours that consists of:

### Required Courses (12 credit hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
<tr>
<td>PRVM 875</td>
<td>Management of Public Health Data</td>
<td>3</td>
</tr>
</tbody>
</table>

## Graduate Certificate in Epidemiology

The Certificate in Epidemiology provides students with both basic and advanced epidemiological knowledge. Students will complete courses in epidemiology, statistics and advanced epidemiology methods dedicated to case control, cohort and longitudinal studies.

A minimum of 12 post-bachelor’s degree credit hours are required with a minimum GPA of 3.0 on a 4.0 scale. A typical full-time course plan is
listed below for the Certificate in Epidemiology. It requires 12 credit hours of required coursework:

Graduate Certificate in Health Administration

The Graduate Certificate in Health Administration provides a broad understanding of the U.S. health care system for those aspiring to healthcare leadership positions, to those newly in a healthcare leadership position, and to those considering applying to the MHSA program (https://www.kumc.edu/mhsa/). The certificate is accessible to distance learners and can be earned completely remotely.

The Graduate Certificate in Health Administration provides an introduction to the field of health administration. Students will obtain a basic understanding of the U.S. healthcare system and how it operates. This certificate is designed for those aspiring to leadership positions in healthcare, to those newly in healthcare leadership positions, and to those considering a Master of Health Services Administration (MHSA) degree (Master of Health Services Administration, KU School of Medicine Department of Population Health (kumc.edu) (https://www.kumc.edu/school-of-medicine/population-health/education/master-of-health-services-administration-(mhsa).html)). If a student is subsequently admitted to the MHSA program, credits from a completed certificate may upon approval be used towards fulfillment of MHSA degree requirements. All certificate classes are accessible to distance learners.

The certificate will be comprised of four courses taken in the following order:

**Summer HPM 810: The Healthcare System (3 credits, online)**
The structure and function of the components of the U.S. healthcare system are introduced in the context of the history, values and social forces that influenced its development and evolution. Students gain exposure to the concepts and vocabulary associated with aspects of the system, including delivery (providers, institutions, services), resources (finance, payment, insurance), population and public health, and outcomes (cost, access, quality). Healthcare outcomes from consumer, clinical and societal perspectives are explored.

**Fall HPM 825: Financial Concepts in Healthcare Management (3 credits, hybrid)**
Introduces the financial and managerial accounting concepts used in health care. This includes financial statement analysis; cost accounting; budgeting; and capital project analysis.

**Fall HPM 858: Health and Social Behavior (3 credits, hybrid)**
Health care as a cultural and socio-behavioral system is presented. Using research and theory, students explore alternative perspectives on the nature of medicine and healing within comparative health systems, both U.S. and abroad. Students examine at an advanced level how healthcare organizational structures contribute to patient health outcomes and influence employee behaviors. The course reinforces the nature and characteristics of the health professions, particularly medicine and nursing perceptions, and the complex behavioral dynamics of health professionals with organizational leaders.

**Spring HP&M 822: Healthcare Economics (3 credits, online)**
This course introduces the core concepts from economics to healthcare with a focus on helping health care managers use economic tools in making sound decisions. The demand for health care products, the structure of insurance, and the supply of health care products are examined. Students will apply a variety of economic analyses to health policy and health system issues.

Total Hours 12

**ADMISSIONS REQUIREMENTS:**

- A completed application
- An undergraduate GPA of 3.0 (on a 4-point scale) from an accredited institution
- A letter of reference from a professional colleague or professor
- A personal statement about why the applicant wants to pursue the certificate
- Interview with an MHSA faculty member

Graduate Certificate in Public Health Practice, Policy and Management

The Graduate Certificate in Public Health Practice, Policy and Management provides students with specialized public health knowledge required to succeed as practitioners. Students will gain knowledge in foundational public health skills as well as cultural competency, policy
Interdisciplinary Graduate Program in Biomedical Sciences

Graduate research at the University of Kansas Medical Center covers a rich and diverse range of topics in both basic and translational research. Basic research is geared toward understanding the basic biological systems that control life. By understanding these systems, rational treatments to treat disease can be devised. The discovery and refinement of these rational treatments is translational research. With such a range of research topics, it is often difficult to choose the best lab. The interdisciplinary program allows the student to make an informed choice of labs to enter. IGPBS students hear from every researcher who is able to take a new student into their lab during the Faculty Research Series. The student then selects 3 research rotations. At the end of the 3 rotations, the student will choose the lab that is the best fit for their research goals. Once a lab is chosen, the student enters the chosen mentor’s department to complete the Ph.D.

The interdisciplinary program covers the first 2 semesters of graduate study. Students take a core group of courses that cover all aspects of cell biology, biochemistry, and cell signaling. Courses are both lecture based and discussion based. Students receive introductions to critical research techniques, work on problem sets, and critically evaluate our current knowledge base. In addition, students take courses in scientific ethics and scientific communication. Scientific communication covers graphic presentation of data and both written and oral communication.

At the end of the first year, students have built a considerable knowledge base and have skills in scientific communication, critical thinking, and problem solving. Students expand their knowledge base and skills by taking advanced courses in their chosen departments or programs. Our graduate program prepares students for successful careers in research.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Application to this graduate program prepares students for successful careers in research. Students expand their knowledge base and have skills in scientific communication, critical thinking, and problem solving. Students expand their knowledge base and skills by taking advanced courses in their chosen departments or programs. Our graduate program prepares students for successful careers in research.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs →.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs →.

Beginning with the Fall semester of year two, the student enters the Ph.D. program their faculty mentor is associated with and completes the degree requirements listed in the catalog for that specific program.

TECHNICAL STANDARDS AND REQUIREMENTS FOR THE INTERDISCIPLINARY GRADUATE PROGRAM IN BIOMEDICAL SCIENCES

The Ph.D. degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore all students admitted for graduate study must meet the following abilities and expectations.

1. Observation: The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

2. Communication: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

3. Motor: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. Intellectual-Conceptual, Integrative, and Quantitative Abilities: The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review the provisions for reasonable accommodation will be determined.

For further information, contact Interdisciplinary Graduate Program in Biomedical Sciences, University of Kansas School of Medicine, 4095 Hemenway, 3901 Rainbow Blvd., Kansas City, Kansas 66160-7400 (Phone: (913) 588-2719 Fax: E-mail: IGPBS@kumc.edu

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Master of Science in Health Informatics

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which
includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health informatics, special skills will be acquired in organizational change, project management and impact evaluation.

This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html), which is sponsored by the School of Nursing.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Science in Health Informatics (https://www.kumc.edu/research/center-for-health-informatics/academics/master-of-science-in-health-informatics.html) website.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html).
- A current resume or curriculum vitae.
- A personal essay outlining the applicant's reasons for wanting to pursue graduate education in health informatics, career objectives, and any other information that would help the admissions committee get to know the applicant.
- Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant's academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A background check (https://www.kumc.edu/academic-and-student-affairs/student-resources/criminal-background-checks-for-students.html) is required during the admission process; it may affect the student's eligibility to enter the program.
- A graduate level statistics course (may be completed prior to admission or during the first semester of enrollment.)

After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

**International Students**

Due to the number of required online courses for this degree, the Health Informatics Program at KUMC does not meet the U.S. student visa requirements at this time. Therefore, we are unable to accept individuals who are on student visas. If you are in the U.S. on another type of visa, please contact SONInfo@kumc.edu for additional application requirements.

Admission requirements are subject to change. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

Master of Science in Health Informatics (MSHI) students complete courses in health informatics, leadership, and in one of the following focus areas: clinical leadership, health policy and management, public health, project management, or telehealth. The student and advisor will work closely together to develop a plan of study that meets the career goals of the student.

**Degree requirements:**

- Degree requirements can be completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 3 years of admission to the program.
- Completion of a minimum of 35 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a general examination (https://catalog.ku.edu/graduate-studies/kumc/#ThesisDefense) the semester the student will graduate.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.
- Successful completion of the Health Informatics courses (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.

**Dual Degree: Doctor of Pharmacy & Master of Science in Health Informatics**

This dual degree program combines the Master of Science in Health Informatics (MSHI) with the Doctor of Pharmacy (PharmD) and is designed particularly for those students intending to pursue opportunities in pharmacy informatics. Students accepted into the dual MSHI/PharmD program concurrently enroll in both programs and can start MSHI courses as early as the spring of the P2 year. Providing that prerequisites are met, the HI practicum will satisfy 1 of 9 required advanced pharmacy practice experiences (APPEs). A Health Informatics comprehensive oral examination occurs during the last semester of enrollment in the MSHI program. Admission to this program is restricted to students currently in the KU PharmD program.

**Degree Requirements**

**Informatics Core Courses** (21 credits)

# Neurosciences Program

The KU-L/KUMC bicampus Neuroscience Graduate Program ([http://www.neuroscience.ku.edu/](http://www.neuroscience.ku.edu/)) is designed to prepare the student for a career in research and/or teaching, with concentrations in neuroscience. The program emphasizes acquiring the skills and knowledge to perform and disseminate the results of neuroscience-based research. The course of study in the program is broadly based to assure that graduates are well-versed in a number of areas of neural research, spanning from molecular to systems neuroscience. The research opportunities in the program are widely varied and will accommodate many interests; students are encouraged to enroll in courses offered by other programs or departments.

Nearly all Ph.D. students in the Neuroscience Graduate Program at the KU School of Medicine initially gain entry through the Interdisciplinary Graduate Program in the Biomedical Sciences (IGPBS). After the initial year of course work, students who join the laboratory of a Neuroscience graduate faculty member may seek entry into the program. Coursework for the Neuroscience Graduate Program is offered at the KU Medical Center campus in Kansas City, KS, as well as the University of Kansas in Lawrence, KS. Several courses are taught across both campuses via videoconferencing. Comprehensive Exams for all students must be completed by the fall of the 3rd year in Graduate School. The program on the KUMC campus is directed by the KUMC Neuroscience Graduate Studies Committee consisting of the following faculty:

### KUMC Graduate Studies Committee Members:
- Julie Christianson, Ph.D. (Program Director)
- Kyle Baumbauer, Ph.D.
- Jill Morris, Ph.D.
- Heather Wilkins, Ph.D.
- Erin Young, Ph.D.

Applications may be made online at: Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) ([http://www.kumc.edu/igpbs.html](http://www.kumc.edu/igpbs.html)).

Inquiries related to the KUMC portion of the program may be directed to the Program Director:

- Julie Christianson, Ph.D.
- Professor, Department of Cell Biology & Physiology
- Director, Neuroscience Graduate Program, KUMC Campus
- University of Kansas Medical Center
- Kansas City, KS 66160
- 913-945-6430 (office)
- 913-588-5677 (fax)
- jchristianson@kumc.edu

### Courses

**NEUS 799. Neuroscience Seminar Series. 1 Credits.**
Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. (Same as NURO 799) Prerequisite: Graduate standing in the Neuroscience program.

NEUS 844. Neurophysiology. 3 Credits. Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NURO 844 and PHSL 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor.

NEUS 845. Graduate Histology. 3 Credits. This course will bridge student knowledge of systems/organs with cellular histology and is designed as an accelerated introduction to histological techniques, microscopy/optics, and histology of normal and diseased tissues. Classes meet once a week and the format includes a 1 hour lecture on individual tissues within related organ systems followed by 1 hour of microscopic observation. Prerequisite: Completion of the IGPBS core curriculum or consent of instructor.

NEUS 846. Advanced Neuroscience. 4 Credits. Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, and PHSL 846.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor.

NEUS 847. Developmental Neurobiology. 2 Credits. Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847 and PHSL 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor.

NEUS 848. Molecular Mechanisms of Neurological Disorders. 3 Credits. An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, and PHSL 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor.

NEUS 850. Sensory Biology. 2 Credits. A variety of topics associated with sensory biology, including olfaction, vision, audition, equilibrium, and the visceral and somatic senses will be discussed relative to basic functions and in disease settings. Faculty will provide lectures throughout the semester and research article discussions will be woven into the content throughout the course. Prerequisite: Student must be admitted to the IGPBS program or equivalent.

NEUS 851. Clinical and Biological Basics of Dementia. 1 Credits. This course will cover the major aspects of dementia research methodology, ranging from basic science to clinical and translational research. There will be a broad introduction to Alzheimer's Disease and Dementia including history, basic science, advanced analysis methods, and social and cultural ramifications. We will further cover topics such as clinical trial design, inclusion and ethical considerations, and translation into clinical practice. The course will include both didactic lectures and journal clubs. Prerequisite: Advanced Neuroscience (NEUS 846; ANAT 846; PHSL 846) or consent of the instructor.

NEUS 899. Neuroscience Master's Thesis. 1-11 Credits. Hours and credit for this course to be arranged with the mentor. Independent investigation of a research problem in neuroscience, but of limited scope. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor.

NEUS 900. Scientific Papers in Neuroscience. 1 Credits. Neuroscience research articles are analyzed by the student with the guidance of an instructor in terms of quality of scientific content and mechanics of the presentation. One or more articles are discussed in each tutorial session. The research topics and the instructor are chosen in accordance with the research interest of the students. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor.

NEUS 990. Research in Neuroscience. 1-9 Credits. Original and independent investigation, approved by and conducted under the supervision of the students' advisor and advisory committee, in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of advisor.

NEUS 999. Neuroscience Doctoral Dissertation. 1-11 Credits. Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor.

Master of Science in Neurosciences

The Neuroscience Master's program is a bi-campus graduate program that incorporates neuroscience faculty at the KU main campus in Lawrence and the KU Medical Center (KUMC). Neuroscience graduate students that matriculate at KUMC participate in the integrated IGPBS graduate program their first year and have the option of taking selected courses on the main campus after their first year. Students on the Lawrence campus take neuroscience courses on the Lawrence campus, but also participate in courses offered on the KUMC campus. Students and faculty from both campuses participate regularly via the Neuroscience Seminar series, which is conducted by video conference.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2455).
• A background check (p. 2456) is required during the admission process; it may affect the student's eligibility to enter the program.
• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.

Degree Requirements:

• Three letters of recommendation.
• Prerequisite coursework:
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics
• Research experience (beyond labs associated with lecture courses) is strongly suggested.
• Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

Degree Requirements:

• Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Completion of a minimum of 30 credit hours.
• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
• Successful completion of either a thesis defense or general examination (p. 2458) the semester the student will graduate.
• If thesis option is chosen, then enrollment in a minimum of one (1) credit hour of NEUS 899 Neuroscience Master's Thesis and successful thesis submission and publication (p. 2458) (according to Office of Graduate Studies policy.)
• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) courses (or their equivalent):

- A background check (p. 2456) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
  - Research experience (beyond labs associated with lecture courses) is strongly suggested.
  - Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. [Other years' catalogs](#).

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

**Degree Requirements:**

- Degree requirements normally are completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2460) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. ) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2462). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
• Successful completion of Post-Comprehensive Enrollment (p. 2463) requirement.
• Enrollment in a minimum of one (1) credit hour of dissertation NEUS 999 Neuroscience Doctoral Dissertation the semester the student will defend dissertation and graduate.
• Successful completion of the Final Oral Examination (p. 2463) (dissertation defense.)
• Successful completion of the following Neuroscience courses:
  Code  Title                  Hours
  NEUS 846  Advanced Neuroscience        4
  NEUS 799  Neuroscience Seminar Series   1
  NEUS 900  Scientific Papers in Neuroscience  1
  NEUS 999  Neuroscience Doctoral Dissertation  1-11

• Successful completion of at least two additional hours of neuroscience-related elective coursework as determined in consultation with the student's advisor and the graduate director. Options include the courses listed below as well as several neuroscience courses offered on the Lawrence campus.

### Typical Plan of Study

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2142) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs.
Graduate Committee and Technical Support staff of KUMC to assess following abilities and expectations: Therefore, all students admitted for graduate study must meet the intellectual-conceptual, integrative, and quantitative abilities: It follows that graduates must have the knowledge and skills to function in research and/or teaching in postgraduate training and faculty positions. The PhD degree signifies that the holder is prepared for entry into OF PHILOSOPHY IN NEUROSCIENCE.

TECHNICAL STANDARDS AND REQUIREMENTS FOR THE DOCTOR OF PHILOSOPHY IN NEUROSCIENCE

The PhD degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore, all students admitted for graduate study must meet the following abilities and expectations:

- **Observation**: The candidate must be able to observe demonstrations and experiences in neurosciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

- **Communication**: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

- **Motor**: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

- **Intellectual-Conceptual, Integrative, and Quantitative Abilities**: The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

- **Behavioral and Social Attributes**: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student's difficulties. At this review the provisions for reasonable accommodation will be determined.

For further information, contact the Neuroscience Graduate Program, University of Kansas School of Medicine, 3901 Rainbow Blvd. MS 3051, Kansas City, Kansas 66160

Phone: (913) 945-6430, Fax: (913) 588-5677, E-mail: jchristianson@kumc.edu

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant's physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

M.D.-Ph.D. Physician Scientist Training Program

The purpose of the MD-PhD dual degree program is to prepare highly qualified and motivated post-baccalaureate students for careers as physician scientists in academic medicine and biomedical research. To promote a close-knit group of students, MD-PhD training at the University of Kansas Medical Center includes small group interactions with the program directors and monthly interactions with fellow students at all phases of their training. A peer-mentoring program allows students to advise and guide each other on issues related to research and clinical training, personal life-work balance, and professional development. The program is conducted under the auspices of the Dean of Graduate Studies and the Executive Dean of the School of Medicine, with guidance from a MD-PhD Advisory Committee. On average, students spend about 7-8 years in the program; the variable period usually depends on the time needed to complete their research and dissertation.

Application for admission is through the MD-PhD Dual Degree Admissions Committee. The Program seeks highly motivated students with outstanding academic credentials and potential, a strong interest in research, and demonstrated research experience. There are no Kansas
residency requirements for admission to the MD-PhD program and students with exceptional potential as physician scientists are recruited from around the country.

Applicants need to submit the following credentials: (Deadline October 15th for application through AMCAS, all needed items due October 30th)

- Standard AMCAS medical application with “MD-PhD Combined-Degree Program” selected. Designate The University of Kansas School of Medicine as a recipient. Prepare an addendum and submit it to the Program address (email if possible) only if you wish to make additional or clarifying comments to those already expressed in the three essays in your AMCAS application: [1] Personal Statement. [2] Why are you interested in an MD-PhD Program? [3] Describe your research experience(s) to date, including location and time frame for each, and your research mentor(s).
- MCAT scores will be included in your AMCAS application, otherwise have official copy sent to the MD-PhD Program. Submit GRE scores if taken (not a requirement). Contact the Program if you have any questions.
- Download and complete Information for MD/PhD Physician Scientist Program at University of Kansas Medical Center form (http://www.kumc.edu/Documents/md-phd/MD-PhD%20Information%20Form.pdf) using the link provided. Please submit the form via email if at all possible to awolf5@kumc.edu.
- At least three (3) Letters of Recommendation (Please download through AMCAS):
  a. One must be written by the applicant’s mentor from the prior research experience(s) and give some indication about the applicant’s potential for research.
  b. One must be written by a faculty member, other than the research mentor with whom the applicant studied in a science course.
  c. A letter from any other person selected by the applicant.
- The application fee for our program comes directly to us. Please make out your check for $50.00 to: KUMC MD-PhD Program and send it to the Program address. You will not be required to pay the medical application fee that is listed on the MD only information.
- Email your current CV to awolf5@kumc.edu.

Interviews

- Selected applicants will be invited for interviews in Kansas City. The interviews are usually held mid January. During the interview, applicants meet with members of the MD-PhD Admissions Committee, MD-PhD and Graduate Program Directors, students currently in the program, and research faculty.
- The Program will cover each selected applicant’s basic travel expenses for interviews; details will be provided at the time of the invitation to interview. A student invited to interview but with exceptional circumstances and unable to participate on those dates may be given an alternative date and considered for admission by the Admissions Committee on an individual case basis.

For additional information please see: http://www.kumc.edu/md-phd-program/application-and-admission.html for details on the application and admission processes.

If Accepted Into the Program:

Students accepted into the MD-PhD Dual Degree program are admitted into the M.D. Program in the School of Medicine and as a Ph.D. student in one of the graduate programs offered through Graduate Studies. The student must provide an official transcript indicating receipt of a Baccalaureate degree from a fully accredited institution by the time of matriculation into the program (and if applicable, transcripts for any post-baccalaureate studies/degrees).

Admission requirements are subject to change. In most cases, use the catalog of the year the student entered the program. Other years’ catalogs».  

- MD-PhD students must meet the MD degree requirements of the School of Medicine as outlined in their section of this online catalog and the PhD degree requirements as outlined by their PhD department and minimum Graduate Studies requirements also outlined in their respective sections (p. 2031) of this online catalog.
- For MD-PhD students, the first two years of the MD curriculum are considered the equivalent of the Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2131) curriculum. Successful completion of the IGPBS curriculum (or its equivalent) is a degree requirement for each of the basic science Ph.D. programs.
- PAON 920 Molecular Medicine: Approaches & Ethics (meets once/week the fall and spring semester of the first year of the medical phase)
- Principles of Statistics in Public Health (online course offered in the summer between the first and second years of the medical phase)
- Research skills and responsible conduct of research will be met prior to taking the oral qualifying exam by the following coursework:
  - Research skills: 1) Biostatistics learning activities (first or second year of medical phase) and 2) PAON 920 Molecular Medicine: Approaches & Ethics (fall semester, first year of medical phase)
- Responsible conduct of research can be met via one of the following courses: 1) GSMC 856 Introduction to Research Ethics (fall semester, first year of graduate phase), 2) Stower’s Research Integrity Course (spring semester, first year of graduate phase), or 3) an institutional-approved Department-sponsored responsible conduct of research course (fall or spring semester of first year of graduate phase) with permission of the Program Director. For details contact the Program office.
- BIOS 799 Introduction to Statistical Genomics (or a comparable course with permission of the Program Director): taken during the first or second year of the graduate phase
- Research skills and responsible conduct of research training will also be required in the final year of the graduate phase, in consultation with the Program Director.

At any time throughout the course of study, if a student is not meeting the requirements of the MD-PhD program, or of the specific degrees – their tenure in the program will be reviewed by appropriate personnel and action may be taken. Continued advancement in the program is dependent on a student successfully meeting the requirements of the MD-PhD program and those of their current phase (MD or graduate) of study.

Degree requirements and course descriptions are subject to change. In most cases, use the catalog of the year the student entered the program. Other years’ catalogs».  

Matriculation in this program begins with two years of a basic medical science curriculum (p. 2145). Students are assigned a clinical preceptor,
who meets with the assigned student on a regular basis throughout the first two years of medical school. Students also take a required course PAON 920 Molecular Medicine: Approaches & Ethics offered by the MD-PhD program during the fall and spring semesters of the first year of medical courses. This course is designed to introduce students to cutting edge scientific concepts and research directly related to topics covered in the medical school curriculum.

Introductory laboratory research rotations are typically performed in the summer before and the summer after the first year of medical courses. In addition, the summer after the first year of medical courses, students will be enrolled in an online course, Principles of Statistics in Public Health. During the second year of medical courses, the student devotes time to selecting a research mentor (if not already done so by this time) and begins to develop ideas for the dissertation research problem. Students complete the second year by taking Step1 of the United States Medical Licensing Examination (USMLE).

Years three through five (or six) of the MD-PhD Program focus primarily on the research problem and the selected graduate curriculum. The number of years in this phase are dependent on individual progress with the required research.

During the first year in the graduate phase (year 3 of the program) the student fulfills the responsible research and ethics requirement for the PhD degree. Once completed, the student will be eligible to take the Oral Comprehensive Examination. For more details, refer to the degree requirements section in this catalog for the PhD programs available in the School of Medicine (p. 2031) or KU Lawrence Bioengineering (p. 414).

During the first or second year in the graduate phase (years 3 or 4 of the program) the student takes BIOS 799 Introduction to Statistical Genomics, or a comparable course with permission of the Program Director.

During years two through four of the graduate phase, the student will complete any remaining Program specific requirements, including responsible conduct of research the year the student plans to defend, and the student will conduct research for their dissertation culminated by the defense of their dissertation. During this phase, students have several opportunities for clinical training experiences. For example, the student-run JayDoc free clinic provides an excellent opportunity to both practice clinical skills and serve the community. Students complete Basic Life Saving training/certification approximately every 2 years to stay current in those clinical skills. Students may also elect to participate in supplemental instruction opportunities – in which they help teach and review concepts to help their peers prepare for the USMLE Step 1 exam.

After the dissertation defense and successful completion of the requirements of the graduate phase, students enter a transitional introduction to medical clerkships prior to completing their elective clinical rotations (p. 2145). After the third year of medical school, the USMLE Step 2 is taken.

In addition to the course of study outlined above, the Program also sponsors a number of other functions designed to develop professional skills relevant to a career in academic medicine. All of the students meet once a month with the program directors and their peers for one hour to discuss program-related activities, issues and events – including planning service and social activities. These meetings conclude with a formal presentation of a research project or a clinical case presentation.

Another important element of the Program is the annual retreat. Each annual summer event focuses on one of three aspects of MD-PhD training: research, clinical practice, and professional development/leadership. The retreat fosters discussion and learning about the many and varied elements in a physician-scientist’s training and career.

Below is the typical plan of study that includes 4 years in the MD phase and 3-4 years in the PhD phase. For numbering, M is for medical phase, G is for PhD phase and P is for total years in program.

### Doctor of Medicine (M.D.)

At the University of Kansas School of Medicine, the physicians of tomorrow are welcomed into a culture of community, forming bonds with peers and mentors by learning together. Through this support system, students reach common goals of serving their community and excelling in the knowledge of medicine and delivery of health care.

In the fall of 2017, the KU School of Medicine launched its innovative new curriculum: Active -> Competency-Based -> Excellence-Driven (ACE). The ACE curriculum’s block structure systematically introduces topics with progressive complexity of foundational and clinical content through the four years. The curriculum focuses on active learning, in which students develop skills in assessing their own learning needs and developing strategies to meet those needs.

#### Top rankings

Providing students with an outstanding medical education remains at the heart of the School of Medicine's mission.

- U.S. News & World Report ranks the School of Medicine among the top programs for training primary care physicians.

#### Three diverse academic environments

The School of Medicine has campuses at three locations in Kansas and has gained a national reputation, particularly for educating family, primary care and rural physicians.

- At the Kansas City campus, students train at a large academic medical center, which has attracted innovative and accomplished educators and researchers from around the world. In the summer of 2017, a new $75 million, 171,000-square-foot Health Education Building opened. The new building enables the School of Medicine to train students in the technologically advanced environment required by a modern health care curriculum.

- The Wichita campus provides a community-based medical education environment, in which students learn through direct patient care inside three partner hospitals as well as in physician offices across the state. Students may also elect to train in community-based and rural settings. The instructional space on this campus was expanded and updated in 2010 to facilitate small group learning and team based
experiences in anticipation of the new teaching method integral to the ACE curriculum.

• The Salina campus is designed for students with a strong interest in rural medicine and those wishing to work with a smaller group of peers on a rural regional campus with opportunities for early clinical experiences. Students are trained in a new state-of-the-art medical education building. Inter-professional activities and education occur in advanced simulated settings.

School of Medicine students in Kansas City and Wichita are also able to volunteer at the JayDoc Free Clinics, which are student-run clinics providing non-emergency urgent and preventive care to the uninsured and underinsured populations of Kansas City and Wichita. Salina students have the opportunity to assist with the medical care at Ashby House, a facility for a vulnerable population.

On the left you will find links for more information about the KU School of Medicine including administration, programs offered, campuses, and the course catalog for the School of Medicine.

Curriculum

CLASSES ENTERING AFTER 2017

ACE Curriculum Diagram (http://www.kumc.edu/school-of-medicine/education/ace-curriculum/the-curriculum.html)

Year One (35)

ACED 800 Introduction to Doctoring - 3
ACED 805 Molecular and Cellular Medicine - 8
ACED 810 Infection, Blood and Immunity - 8
ACED 815 Respiration and Circulation - 8
ACED 820 Gastrointestinal and Renal – 8

Year Two (32)

ACED 825 Muscles and Movement – 8
ACED 830 Brain, Mind and Behavior – 8
ACED 835 Reproduction, Development and Sexuality - 8
ACED 840 Medicine Capstone - 8

Year Three (48)

FAPR 955/ FCMD 950 Family Medicine Clerkship – 8
GYNO 900/ OBGN 975 Obstetrics/Gynecology Clerkship - 8
MED 900/ INMD 975 Internal Medicine Clerkship - 8
NEUR 900/ NROL 950 Neurology Clerkship - 4
PED 900/ PDRC 975 Pediatrics Clerkship – 8
PYCH 955/ PSCR 950 Psychiatry Clerkship - 4
SURG 900/ SGRY 975 Surgery Clerkship - 8
ICM 900/ ICM 975 Issues in Clinical Medicine - 0

Year Four (32)

FAPR 900 / RLMD 976 / RLMD 977 / RLMD 978, Rural Preceptorship - 4
Critical Care Selective - 4
Subinternship Selective - 4
Electives (at least 12 hours must be clinical) - 20

CLASS ENTERING 2016

Year One (36)

CORE 800 Foundations of Medicine - 8
CORE 805 Genetics and Neoplasia - 4
CORE 810 Inflammation and Immunity - 4
Core SOM Preclinical Phase

**CORE 815** Cardiopulmonary - 8
**CORE 820** Gastrointestinal System and Nutrition - 4
**CORE 825** Renal and Endocrine System - 4
**CORE 830** Reproduction and Sexuality - 4

**Year Two (30)**
**CORE 835** Musculoskeletal and Soft Tissue Systems – 4
**CORE 840** Brain and Behavior – 8
**CORE 845** Blood and Lymphoid System – 4
**CORE 850** Infectious Diseases – 6
**CORE 860** Integration and Consolidation – 8

**Year Three (48)**
**FAPR 955**/ **FCMD 950** Family Medicine Clerkship – 8
**GERO 900**/ **GERI 950** Geriatric Medicine Clerkship - 4
**GYNO 900**/ **OBGN 975** Obstetrics/Gynecology Clerkship - 6
**MED 900**/ **INMD 975** Internal Medicine Clerkship - 8
**NEUR 900**/ **NROL 950** Neurology Clerkship - 4
**PED 900**/ **PDRC 975** Pediatrics Clerkship – 6
**PYCH 955**/ **PSCR 950** Psychiatry Clerkship - 4
**SURG 900**/ **SGRY 975** Junior Surgery Clerkship - 8
**ICM 900**/ **ICM 975** Issues in Clinical Medicine - 0

**Year Four (32)**
**FAPR 900**/ **RLMD 976**/ **RLMD 977**/ **RLMD 978**, Rural Preceptorship - 4
Critical Care Selective - 4
**PMED 960**/ **PVMD 975**, Population Health in Practice - 4
Subinternship Selective - 4
Electives (at least 12 hours must be clinical) - 16

**Core SOM Preclinical Phase**

**First Year**

**ACED 800. Introduction to Doctoring. 0-3 Credits.**
Introduction to Doctoring is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. This course will provide students with the knowledge and skills to obtain a medical history in combination with a head-to-toe physical examination, basic life support and an introduction to the electronic medical record. In addition, students will be introduced to key topics in population health and social sciences. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Medical School admission requirements.

**ACED 805. Molecular and Cellular Medicine. 0-8 Credits.**
Molecular and Cellular Medicine is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The focus of the course is the molecular and cellular mechanisms underlying health and disease. This course integrates...
content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Introduction to Doctoring or permission of Associate Dean for Student Affairs.

ACED 810. Infection, Blood and Immunity. 0-8 Credits.
Infection, Blood and Immunity is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to microbial infection, as well as normal and abnormal activity of the immune system and blood, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Molecular and Cellular Medicine or permission of Associate Dean for Student Affairs.

ACED 815. Respiration and Circulation. 0-8 Credits.
Respiration and Circulation is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the cardiovascular, pulmonary and allied systems, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Infection, Blood and Immunity or permission of Associate Dean for Student Affairs.

ACED 820. Gastrointestinal and Renal. 0-8 Credits.
Gastrointestinal and Renal is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the gastrointestinal, renal and allied systems, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Respiration and Circulation or permission of Associate Dean for Student Affairs.

Second Year

ACED 825. Muscles and Movement. 8 Credits.
Muscles and Movement is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the musculoskeletal, soft tissue and allied systems, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Gastrointestinal and Renal and the end-of-year clinical skills assessment following the Gastrointestinal and Renal block or permission of Associate Dean for Student Affairs.

ACED 830. Brain, Mind and Behavior. 8 Credits.
Brain, Mind and Behavior is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the central and peripheral nervous systems and mental health including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Muscles and Movement or permission of Associate Dean for Student Affairs.

ACED 835. Reproduction, Development and Sexuality. 0-8 Credits.
Reproduction, Development and Sexuality is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of human reproductive systems, human development and human sexuality including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Brain, Mind and Behavior or permission of Associate Dean for Student Affairs.

ACED 840. Medicine Capstone. 8 Credits.
Medicine Capstone is an 8-week, case-based, multidisciplinary course which aims to consolidate concepts and learning objectives presented throughout the basic science curriculum. Large group sessions are taught by faculty members from foundational science and clinical departments. The course will serve as the capstone for the preceding courses while preparing students for the transition to clinical duties. Clinical skills lab activities will integrate content across systems and disciplines and provide
an opportunity to refine clinical skills prior to the clerkship year. Large group session material will include examples of case presentations by clinical faculty. Problem-based learning sessions will continue through this course as in all of the ACE courses. Prerequisite: Successful completion of Reproduction, Development and Sexuality or permission of Associate Dean for Student Affairs.

Course credit hours are indicated after the course title.

Kansas City Clinical Required Course Descriptions

Third Year Requirements

FAPR 955. Family Medicine Clerkship. 0-8 Credits.
The Family Medicine (FM) clerkship will introduce third-year medical students to the principles and practice of family medicine and community health. Students will learn about the breadth and diversity of family medicine through direct patient care, simulation, case-based learning, workshops, flipped classrooms, and more. Two options for the patient care portion of the FM clerkship are available: rural placement and Kansas City placement. For the rural placement, the student is immersed in a rural community under the close tutelage of a rural family physician. Students who choose the rural placement will have opportunities to learn in various settings, likely to include outpatient clinic, hospital, emergency department, and community settings. For the Kansas City option, the student is assigned to the KU Interprofessional Teaching Clinic, the University Hospital, and outpatient settings within the academic center and greater community. Student evaluation is based on assessment by clinical supervisors, the NBME Family Medicine Subject Exam, an Objective Structured Clinical Examination (OSCE), presentation of a written assignment, and participation in all required clerkship activities. Prerequisite: Completion of Phase I (Years 1 and 2).

ICM 900. Issues in Clinical Medicine. 0 Credits.
This course enables students to apply the theoretical framework developed in ICM 801/802 and 850/851 to the patient care activities in which they participate during third-year clerkships. Through lectures and small group discussions students examine the ethical, legal and social aspects of medical practice and application of key principles to clinical practice. Students also explore career opportunities in medicine and factors to be considered in choosing a medical specialty. Students are evaluated through written assignments and participation in course activities.

GYNO 900. Obstetrics/Gynecology Clerkship. 0-8 Credits.
During this clerkship, the student develops an understanding of disease in women through history, physical examination, and laboratory studies. The clerkship includes the study of biochemical, anatomical, and physiological changes in normal pregnancy and the effect of disease in altering the course of reproduction. Prerequisite: Medical Basic Sciences.

MED 900. Internal Medicine Clerkship. 0-8 Credits.
The Internal Medicine 8-week Clerkship will prepare the student to perform thorough and accurate history and physical examinations, select and interpret appropriate diagnostic testing, and create assessments and plans for adult patients as their level of training allows. The clerkship will begin with an orientation followed by a week of didactics including CBCLs, lectures, and flipped classroom activities that will enable students to tackle common problems presenting in both inpatient and outpatient settings in internal medicine. Teaching is provided by Inpatient Hospitalists, Ambulatory Faculty, and Internal Medicine Specialists with a focus on effective history-taking and cardiopulmonary examinations. The didactic week is followed by 6 weeks of clinical rotation blocks with a variety of Internal Medicine Specialties including General Internal Medicine, Infectious Disease, Ambulatory Medicine, and Pulmonary Medicine with rotations taking place at the University of Kansas Health Center and Outpatient Clinics as well as the Kansas City Veterans Administration Hospital. In the final clerkship week, students complete an OSCE and have preparatory time for their SHELF examination. Prerequisite: Completion of Phase I (Years 1 and 2).

NEUR 900. Neurology Clerkship. 4 Credits.
The required four-week Neurology Clerkship is intended to familiarize students with the diagnosis and treatment of major neurological disorders. Effective interviewing and diagnostic skills, and competent performance of the neurological examination are emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Students will be assigned to Kansas University Medical Center and Kansas City Veterans Administration Hospitals. Prerequisite: Completion of Phase I (Years 1 and 2).

PED 900. Pediatrics Clerkship. 0-8 Credits.
The Pediatric Clerkship provides clinical experiences in inpatient and outpatient settings. Activities will include rotations on pediatric inpatient services with combinations of general pediatrics, subspecialty pediatrics, neonatal intensive care, pediatric critical care, and newborn services. Daily rounds will be conducted with faculty. Activities will include rotations in outpatient clinics in a variety of academic and community-based clinics. All clinics are supervised by faculty. Students may have opportunities to work with pediatric, family medicine, and emergency medicine residents during the clerkship. Clinical learning environments used in the clerkship include inpatient and outpatient services at The University of Kansas Health System and Children’s Mercy Hospital and Clinics. Patient care activities include conducting histories and performing physical exams on infants, children, and adolescents; generation of differential diagnoses and assessments; participation in ordering and performing diagnostic and therapeutic testing; and development of comprehensive care plans. Students participate in simulation activities to hone key pediatric skills. Student evaluations are based on clinical performance and assessment of problem-solving skills as well as performance on a mid-clerkship examination, an Objective Clinical Skills Examination (OSCE), and a multiple-choice examination given at the end of the clerkship. Prerequisite: Medical Basic Sciences.

PYCH 955. Psychiatry Clerkship. 4 Credits.
The required four-week basic Psychiatry Clerkship is intended to familiarize students with the diagnosis and treatment of major psychiatric disorders. Effective interviewing and diagnostic skills, and competent performance of the mental status examination is emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Students will be assigned to Kansas University Medical Center and Kansas City Veterans Administration Hospitals. Prerequisite: Completion of Phase I (Years 1 and 2).

SURG 900. Surgery Clerkship. 0-8 Credits.
Surgical problems and diseases are studied utilizing lectures, skills laboratory experiences, study questions, clinical problem discussion, and live patients. This course prepares the student to meet the pertinent aspects of the summative competencies of the University of Kansas School of Medicine during the third year of Medical School. A particularly useful goal of this course is to teach the student to identify life-threatening conditions that require urgent intervention. Although the skills of this
course are necessary for ambulatory practice, the skills that are taught in this course are most frequently seen and performed in the hospital setting. The student is expected to have a basic understanding of normal and abnormal body functions. Prerequisite: Completion of Foundational sciences.

Fourth Year Requirements

FAPR 900. Rural Preceptorship. 4 Credits.
Since 1951 all medical students have completed, as a requirement of graduation, a rural preceptorship of at least four weeks with a practicing physician in the state of Kansas. The emphasis of the preceptorship is rural primary care (family medicine, general internal medicine and general pediatrics). Rural placements are made by the Course Administrator. The preceptor or site will provide housing while the student is on this rotation. The preceptor will expect the student to participate in all phases of professional life as a rural physician. Most sites have the student work in ambulatory clinic, hospital care, ER, nursing home, house calls, and night call. Students also are expected to participate in the civic, administrative and social activities of their preceptor. The preceptor will evaluate student performance based on school of medicine criteria. At the completion of the course the student will have: a working knowledge of the rural health care system, an understanding of the function of a physician in the context of community and an appreciation for the support systems needed for practice in rural Kansas. Offered in Modules I-XII. Prerequisite: Completion of year 3 clinical clerkships.

Subinternships (4)
The four-week subinternship gives medical students an opportunity to become more proficient in a specific area of medicine. They provide a more comprehensive course than that of the third-year required course. Students select one of the following options to fulfill the requirement.

FAPR 901. Subinternship in Family Medicine. 4 Credits.
This sub-internship is designed to prepare students for residency and enrolled students will assume the role of an intern under supervision. The family medicine approach to patient care is emphasized to include caring for patients in the context of their family environment and community, addressing structural and social determinants of health, and providing longitudinal care for patients throughout their lifetimes. Students will be assigned to patient care experiences in the hospital, ambulatory, and maternity-care settings. The student will be expected to participate in teaching and learning experiences available to residents. Students will be evaluated by their clinical supervisors in the areas of oral presentation, encounter documentation, differential building, plan formation, patient interview and physical exam skills, interpersonal and communication skills, systems knowledge, self-assessment, and goal-setting skills, and professionalism. Prerequisite: Completed third year.

GYNO 901. Subinternship in Obstetrics and Gynecology. 4 Credits.
The objective of GYNO 901 is to provide students with advanced experience in obstetrics and gynecology. Students will be assigned to the Obstetrics and Gynecology Service at KUMC. Students will participate in the management of common obstetrical and gynecologic conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This course fulfills the Subinternship Selective requirement.

MED 908. Subinternship in Internal Medicine. 4 Credits.
The objective of this course is to provide students with advanced experience in the management of acutely-ill medical patients. Students will be assigned to Kansas University Medical Center and will participate in the diagnosis and treatment of common medical conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This course fulfills the Subinternship Selective requirement.

OTOR 901. Subinternship in Otolaryngology. 4 Credits.
The objective of this clerkship is to provide students with advanced experience in otolaryngology. Students will be assigned to the Otolaryngology Service at KUMC. Students will participate in the management of common ENT conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement.

PED 910. Subinternship in Pediatrics. 4 Credits.
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care under close supervision of the faculty. Students will learn skills in patient management by active participation in the daily activities expected of a first-year resident. This selective is entirely clinical. The student will work on the pediatric inpatient unit at The University of Kansas Health System or at Children’s Mercy Hospital. Student performance will be evaluated by the faculty based on factual knowledge, practical skills, problem-solving abilities, and personal behavior and values. On the first day of the rotation, students will report to the inpatient attending assigned to the pediatric floor. Prerequisite: PED 900 or equivalent.

PED 918. Pediatric Subinternship Selective - Outpatient. 4 Credits.
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care under close supervision of the faculty. Students will learn skills in patient care by active participation in the daily activities of the pediatric outpatient clinic. This selective is entirely clinical. The student will work in the Pediatric Outpatient Clinic at KUMC in a variety of clinics. The specific clinics will be assigned by the Chief of the Ambulatory Pediatric Section after consultation with the student. Student performance will be evaluated by the faculty based on factual knowledge, practical skills, problem-solving abilities, and personal behavior and values. This course can still be taken for elective credit even if a student already has met the subinternship selective requirement. Prerequisite: PED 900 or equivalent.

PYCH 901. Subinternship in Psychiatry. 4 Credits.
The student will function as an intern on the Adult Psychiatric Services at the University of Kansas Medical Center and Kansas City VA Hospital. Each student will work closely with faculty and residents and will have an important role in the team care of hospital patients. The course is designed to provide a transitional experience between the predoctoral and residency stage of medical education allowing the student the opportunity to take more responsibility for patients with support and active teaching provided by faculty and residents.

SURG 901. Subinternship - Plastic Surgery. 4 Credits.
This course is designed to provide advanced experience to medical students the diagnosis and management of plastic surgery patients. Additionally, concepts taught during surgery 900 are reemphasized in greater detail. Ward rounds, clinical conference seminars and case studies supplement the clinical experience. An optional laboratory experience providing in-depth introduction to microvascular surgery can be arranged. Emphasis is placed on an understanding of the principles and surgical anatomy of areas of plastic surgery including congenital, trauma, tumor and cosmetic. Students are expected to participate with the surgical team in the diagnosis and management of plastic surgery patients. It is
expected that the student will participate, when possible, at a resident level of responsibility. The student participates directly in patient care on the wards, in the outpatient clinics and in the operation room. Prerequisite: SURG 900, MED 900.

**SURG 902. Subinternship in Surgery. 4 Credits.**
The student will be expected to participate with the surgical team in the diagnosis, operation, and management of surgical patients. It is expected that the student will participate, as possible, at a resident level of responsibility. Ward rounds, clinical conferences, seminars, and case studies supplement clinical experience. The student participates directly in patient care on the ward, in the outpatient department, and in the operating room. Emphasis is placed on an understanding of alterations in physiology secondary to pathology, management of fluids and electrolytes, basic elements of pre- and post-operative care, and diseases amenable to surgical treatment. In addition, concepts taught during Surgery 900 are reemphasized and considered in more detail. We can accommodate 6 students. Prerequisite: SURG 900 and MED 900.

**SURG 909. Surgery Subinternship-Neurosurgery. 4 Credits.**
This course is designed to provide advanced experience to the student in the management of neurosurgical problems. The student is assigned to the neurosurgical service at the University Hospital for four weeks. Students will participate with the surgical team in daily rounds, diagnosis, out-patient experience, operative experience and post-operative management of neurosurgical patients. Emphasis is placed on an understanding of neurologic disease with special emphasis in physical exam and diagnosis, management of basic neurosurgical emergencies and management of common neurosurgical problems. Accommodates three students in Modules I-XII. Prerequisite: SURG 900 and MED 900.

**SURG 910. Surgery Subinternship-Urology. 4 Credits.**
This course is designed to provide advanced experience to the student in the diagnosis and management of genitourinary disease. The student is assigned to the Urology Service at KUMC or the VA Hospital for 4 weeks. Students are expected to participate with urologic patients. It is expected that the student will participate, as possible, at a resident level of responsibility. Ward rounds, clinical conferences, seminars, and case studies supplement clinical experience. The student participates directly in patient care on the ward, in the outpatient department, and in the operating room. Emphasis is placed on an understanding of alterations in physiology, secondary to pathology of the genitourinary tract, and diseases amenable to surgical or medical treatment. The student is expected to become familiar with the diagnostic procedures and techniques used in evaluating patients with acute and chronic genitourinary problems (i.e. cystoscopy). The outpatient experience is particularly emphasized. By the end of the course, the student should be able to describe risk factors, epidemiology, etiology, diagnosis, management strategy, prognosis, including sequelae, and preventive measures for common urologic problems. We can accommodate five students at KUMC. Prerequisite: SURG 900 and MED 900.

**SURG 915. Subinternship-Orthopaedic Surgery. 4 Credits.**
This subinternship is designed to allow the student to participate in orthopedic clinical care. The student is assigned to the orthopedic surgical service at KUMC for four weeks. The student participates with the orthopedic surgery team in the diagnosis, surgical treatment and postoperative management of orthopedic patients. The student will participate directly in care of patients in the emergency department, operating room, intensive care unit and orthopedic ward. Emphasis is placed on the understanding of pre-op, intra-op and postop care of the orthopedic patient. There is a limit of 4 students per rotation. Prerequisite: Successful completion of basic clinical clerkships.

**Critical Care (4)**
The four-week critical care selective presents the knowledge, skills, and attitudes required to care for very ill hospitalized patients. This allows the student to focus on an interest in a particular specialty and ensures that all students have basic knowledge and skills in critical care. Students select one of the following options to fulfill the requirement.

**ANES 911. Critical Care: Post-Anesthesia Unit. 4 Credits.**
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Post-Anesthesia Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement.

**ERMD 920. Critical Care: Emergency Room. 4 Credits.**
The objective of this course is to provide students with experience in the management of critically-ill patients. Students will participate in the diagnosis and treatment of patients in the Emergency Room. Clinical work will be supplemented by conferences and other educational activities. This course is only offered on the Salina campus.

**MED 905. Critical Care: Coronary Care Unit. 4 Credits.**
Critical care is an integral aspect of medical education. The purpose of the 4th year critical care selective rotation is to allow students to participate in the management of the critically-ill patient in a specialty area of interest not experienced during the third year of training. Each subspecialty critical care rotation provides the student with the core knowledge necessary for the care of critically-ill patients, an appreciation of management issues unique to this patient population, and the technical skills that one must incorporate for effective patient care. The student will act as an integral part of the critical care team with an emphasis on increased patient care responsibility and autonomy. Most importantly, this educational purpose will be founded on the core competencies set forth by the University of Kansas School of Medicine. Clinical work will be supplemented by conferences and other educational activities. This course fulfills the Critical Care Selective requirement. Prerequisite: fourth year standing.

**MED 912. Critical Care: Medical Intensive Care Unit. 4 Credits.**
Critical care is an integral aspect of medical education. The purpose of the 4th year critical care selective rotation is to allow students to participate in the management of the critically-ill patient in a specialty area of interest not experienced during the third year of training. Each subspecialty critical care rotation provides the student with the core knowledge necessary for the care of critically-ill patients, an appreciation of management issues unique to this patient population, and the technical skills that one must incorporate for effective patient care. The student will act as an integral part of the critical care team with an emphasis on increased patient care responsibility and autonomy. Most importantly, this educational purpose will be founded on the core competencies set forth by the University of Kansas School of Medicine. Clinical work will be supplemented by conferences and other educational activities. This course fulfills the Critical Care Selective requirement.

**PED 926. Critical Care: Neonatology. 4 Credits.**
The student will be actively involved in the care and management of high-risk and acutely ill neonates. Through clinical participation, tutorial sessions, and assigned readings, emphasis will be placed on modern neonatal intensive care techniques and developmental physiology and biochemistry. Students may elect additional consecutive four-week periods to pursue aspects of neonatology in more detail, engage in investigative projects or acquire first-hand experience in the operation of
a regionalized program for care of high-risk or acutely ill neonates in the state. Interested students should contact the Pediatric Department.

**PED 930. Critical Care: Pediatric Intensive Care Unit. 4 Credits.**
Principles of ongoing assessment and management of critically ill children with single and multiple organ failure will be presented. The teaching format will be formal and informal rounds at the bedside in the KUMC Pediatric ICU by faculty members of the Pediatric Critical Care Division. Integration of history-taking, physical examination skills, and laboratory and radiological assessment with pathophysiology will be emphasized.

**SURG 927. Critical Care: Burn Center. 4 Credits.**
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Burn Center. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement.

**SURG 929. Critical Care: Surgical Intensive Care Unit. 4 Credits.**
The objective of this course is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Surgical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This course fulfills the Critical Care Selective requirement.

**Wichita Clinical Required Courses**

**Third Year Requirements**

**FCMD 950. Family Medicine Clerkship. 0-8 Credits.**
Students are introduced to the principles and practice of family medicine. They spend the majority of their time participating in the practice of a private family physician where they evaluate patients under direct supervision and recommend management. This practice experience is enhanced by case-based seminars and skills-based workshops with faculty and hospital call with family medicine residents. Evaluation is based on assessment by clinical supervisors, projects, the Observed Structured Clinical Examination (OSCE), and the NBME Family Medicine Subject Exam. Prerequisite: Basic Sciences.

**ICM 975. Issues in Clinical Medicine. 0 Credits.**
This course is designed to promote the development of professional responsibility and medical ethics. Incorporated into the topics are medical ethical theory, skills of ethical decision making and recognizing personal and professional responsibilities and value identification. The one-hour sessions are held twice a month. All third year medical students are required to attend. Prerequisite: Medical Basic Sciences.

**INMD 975. Internal Medicine Clerkship. 0-8 Credits.**
Students are assigned two four-week blocks on university general medicine services. Students are expected to acquire basic clinical skills in medicine: interview and examine patients, complete databases and clinical problem assessments, write progress notes and give bedside presentations on daily rounds, and demonstrate accountability for ward duties and patient data. Rounds with visiting professors, KUSM-W Grand Rounds, and medicine case conferences supplement regularly scheduled tutorial sessions and daily ward rounds. Students receive instruction in basic skills, i.e., ECG, chest X-ray, blood count, body chemistry interpretation. Grades are based on ward work, a written history and physical and bedside practical exam (both pass/fail), Observed Structured Clinical Examination (OSCE) and National Board subject examination scores. Prerequisite: Medical Basic Sciences.

**NROL 950. Neurology Clerkship. 4 Credits.**
The required four-week Neurology clerkship is intended to familiarize students with the diagnosis and treatment of major neurological disorders. Effective interviewing and diagnostic skills, and competent performance of the neurological examination are emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions.

**OBGN 975. Obstetrics/Gynecology Clerkship. 0-8 Credits.**
During the clinical clerkship the student develops understanding of health maintenance and disease processes specific to female patients as well as exposure to normal and high-risk pregnancy. Students will have the
opportunity to gain an understanding of female anatomy through physical examination, surgery and review of imaging. This clerkship will expose students to management of patients in both inpatient and outpatient settings as well as in the operating room and labor and delivery unit. Prerequisite: Medical Basic Sciences.

**PDRC 975. Pediatrics Clerkship. 0-8 Credits.**
The student will spend approximately 60 percent of the time on pediatric wards taking pediatric medical histories, physical examination of children and infants and making ward rounds with attendings and house staff. Approximately 40 percent of the student's time will be spent in ambulatory pediatrics in general specialty clinics and in the offices of practicing pediatricians. Time will be spent in the newborn nursery. Prerequisite: Medical Basic Sciences.

**PSCR 950. Psychiatry Clerkship. 4 Credits.**
The required four-week basic Psychiatry Clerkship is intended to familiarize students with the diagnosis and treatment of major psychiatric disorders. Effective interviewing and diagnostic skills, and competent performance of the mental status examination is emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Prerequisite: Basic Sciences.

**SGRY 975. Surgery Clerkship. 0-8 Credits.**
This course offers the student an introduction to the surgical management of disease. Students are assigned to one of the several surgical services, where they participate fully in diagnosis, operation, and management of patients with a wide range of surgical diseases. Clinical conferences, seminars, ward rounds, and case studies supplement the clinical experience. Students participate directly in patient care on the ward, as well as in the outpatient department and operating room. Emphasis is placed on the understanding of alterations in physiology secondary to trauma, management of fluids and electrolytes, basic elements of pre- and post-operative care, and understanding diseases amenable to surgical treatment. Prerequisite: Medical Basic Sciences.

**Fourth Year Requirements**

**Rural Preceptorship (4)**
A preceptorship of four weeks with a practicing physician in the state of Kansas is required for graduation. Students select one of the following options to fulfill the requirement.

**RLMD 976. Rural Preceptorship: Family Medicine. 4 Credits.**
The student will actively participate in the practice of a family physician in the state of Kansas. In addition, the student is asked to live in the rural community and explore the various roles a physician plays in the community. Experiences may include outpatient, inpatient, ER, maternity care, and performance of procedures under direct supervision of volunteer faculty in rural Kansas. Assignments for call are directed by individual faculty. Evaluation is based on assessment of clinical performance using the standard elective evaluation form. At the end of the Rural Preceptorship, the student will be able to describe the challenges and rewards of rural practice. Evaluation consists of clinical performance as assessed by the rural preceptor, and completion of a small project during the Rural Preceptorship.

**RLMD 977. Rural Medicine in Internal Medicine. 4 Credits.**
Rural Medicine in Internal Medicine is a four week clinical rotation during which each student works with a practicing Internal Medicine physician in the state of Kansas. Student will experience a one-to-one teaching/learning relationship in a private office (i.e., non-institutional) setting and will be exposed to both professional and non-professional aspects of the preceptor's family and social life in a non-tertiary care community environment. The student will perform a history and physical examination on each patient and will be responsible for writing daily progress notes on each assigned patient. Student will formulate diagnostic treatment and educational plans on each patient. The student will write orders after reviewing plans with attending physician. The student will also see patients in the emergency room and present them to the attending physician. The student will be involved in all procedures, such as treadmill, lumbar puncture, bone marrow biopsies, liver biopsies, upper GI endoscopy and flexible sigmoidoscopy on all assigned patients and other patients if appropriate. The student will be required to complete a pass/fail reflective assignment questionnaire which must be turned in to the department and reviewed by the course director. Prerequisite: Senior standing and INMD 975.

**RLMD 978. Rural Preceptorship - Pediatrics. 4 Credits.**
Rural Medicine in Pediatrics is a four-week clinical rotation during which each student works with a practicing pediatrician in the State of Kansas. Student will experience a one-to-one teaching/learning relationship in a private practice (i.e., non-institutional) setting and will be exposed to both professional and non-professional aspects of the preceptor's family and social life in a community environment. Initially the student will see patients and take calls with the pediatrician. Later in the month, the student will be given some independence seeing patients. The student may write progress notes and learn to dictate discharge summaries. The student will also participate in a number of procedures such as lumbar punctures, umbilical artery catheter insertion, etc. Students may also assist in ambulance transfers from smaller communities. Prerequisite: Senior standing and PDRC 975.

**RLMD 980. Rural Preceptorship: Obstetrics and Gynecology. 4 Credits.**
Rural Preceptorship in Obstetrics and Gynecology is a four-week clinical rotation during which the student works with a practicing Obstetrician and Gynecologist in Kansas. The student will experience a one-to-one teaching/learning relationship in the rural setting and will be exposed to and explore both professional and non-professional aspects of the various roles a physician plays in the community. The student will participate in procedures in both ambulatory and hospital settings. Students may also assist in transfers from smaller communities. Evaluation consists of clinical performance as assessed by the rural preceptor and completion of a reflection assignment related to rural OBGYN. Prerequisite: Senior standing and OBGN 975.

**Subinternships (4)**
The four-week subinternship gives medical students an opportunity to become more proficient in a specific area of medicine. They provide a more comprehensive course than that of the third-year required course. Students select one of the following options to fulfill the requirement.

**FCMD 998. Subinternship in Family Medicine. 4 Credits.**
The student will function as a subintern at one of the three KUSMW sponsored family medicine residency programs - Ascension Via Christi or Wesley in Wichita or Smoky Hill in Salina. Experiences include evaluation of outpatients and inpatients, maternal and newborn care, and performance of procedures under direct supervision of residents and faculty. Assignments include in-hospital call as directed by the individual residency. Evaluation is based on assessment of clinical performance using the standard subinternship evaluation form. Prerequisite: FCMD 950.

**INMD 998. Subinternship in Internal Medicine. 4 Credits.**
This course is designed to give the student practical experience in the hospital care of general medicine patients and patient care at the intern or R1 level. Students will perform and dictate the initial history and physical, write orders, perform indicated procedures under the supervision of a senior resident and faculty attending, and dictate discharge summaries on patients. Students will take hospital call with the senior resident, attend scheduled rounds and conferences, and function as a member of the patient care team. Prerequisite: Medical Basic Sciences and INMD 975.

**OBGN 998. Subinternship in Obstetrics and Gynecology. 4 Credits.**

Students will function as a subintern in multiple clinical environments with supervised but advancing clinical responsibilities that will assist in preparation for internship. Two weeks will be spent the obstetrics units which will include one week of night call. That portion of the rotation includes coverage of emergency / unscheduled cesarean sections and Emergency Department coverage. One week includes surgical experience and floor rounds with the Gynecologic Oncology team. One week is spent in private practice clinic with the Program Director, Department Chairman or additional faculty members as determined by the department. The student will be evaluated through faculty judgment for general information, and degree of attainment of skills necessary for matriculation into the intern year in Obstetrics and Gynecology residency. It is anticipated the subintern should have achieved competency in the ACGME Level 1 milestones for Obstetrics and Gynecology by the completion of this rotation. Prerequisite: Medical Basic Sciences and OBGN 975.

**PDRC 998. Pediatric Subinternship. 4 Credits.**

The student will participate in pediatric case management in a greater comprehensive manner than that of the general pediatric student curriculum. The student will be assigned to a pediatric resident and will participate in the clinical case load of the assigned resident. He/she will be expected to gather and analyze data as pertaining to the assigned pediatric care load. The student will perform physicals and dictate histories on assigned patients where permitted. Case load will be 1-3 patients per day. The student will formulate plan of management with written orders to be reviewed and countersigned by resident and faculty, perform indicated procedures under supervision, and dictate discharge summary of assigned patients where permitted. He/she will take call and attend scheduled rounds, pediatric clinics, and conferences with supervising resident. Evaluation will conform to the clinical assessment utilized for pediatric resident. Assessment of performance will be done jointly by supervising resident and faculty member. Prerequisite: PDRC 975 and senior standing.

**PSCR 998. Subinternship in Psychiatry. 4 Credits.**

This course is designed to expand the student's experience in general psychiatry by having them assume supervised, clinical responsibility equivalent to that of an intern or PGY-1 resident. Students will perform and dictate initial history and physical examinations, formulate diagnoses and treatment plans, write orders to be reviewed and countersigned, dictate discharge summaries, participate in the evaluation and intervention of psychiatric emergencies, attend scheduled rounds, conferences, and PGY-1 didactics. Prerequisite: PSCR 950, INMD 975, SGRY 975, senior standing.

**SGRY 998. Subinternship in Surgery. 4 Credits.**

The student will learn to work up patients with elective surgery, acute surgical abdomen, or GI bleeding, perform fundamental diagnostic and therapeutic procedures, and assist in certain endoscopies. The student will present a patient's clinical problems in a clear and concise manner. The student will be a part of a surgical team consisting of the attending surgeon and the senior and junior surgical residents. He/she will work up patients with the junior surgical resident and be reviewed by the attending surgeon and senior surgical resident. He/she will make daily rounds with the surgical team, scrub on all surgical procedures on his/her patients, and attend all conferences required of surgical residents (consultant rounds, surgical grand rounds, etc.). He/she will assist in the operation, attend clinics and minor surgery clinics. The student will work up approximately one new patient per day. Evaluation will be based on patient workups, technical skills, rapport with patient, paramedical personnel, and surgical team. Prerequisite: SGRY 975, INMD 975, and senior standing.

**Critical Care (4)**

The four-week critical care selective presents the knowledge, skills, and attitudes required to care for very ill hospitalized patients. This allows the student to focus on an interest in a particular specialty and ensures that all students have basic knowledge and skills in critical care. Students select one of the following options to fulfill the requirement.

**CCSL 977. Critical Care Selective in Neonatology. 4 Credits.**

This course is an overview of neonatal medicine. The student will develop skills and conceptual knowledge of newborns and premature infants. The student will also attend x-ray conferences weekly, literature review, service rounds twice daily, pediatric grand rounds weekly, and neonatal mortality review, as well as care for infants with special emphasis on NIVU, NSCU and Continuing Care Nurseries. Prerequisite: Senior standing.

**CCSL 978. Critical Care Selective in Pulmonary. 4 Credits.**

The student will learn the essentials of a comprehensive history, physical exam and interpretation of chest x-rays for the patient with pulmonary disease. The student will also learn the use and basic interpretation of pulmonary function testing, cardiopulmonary exercise testing, plus other laboratory information important to pulmonary disease (sputum assessment, ABG, scanning, pulmonary artery catheterization data, etc). Emphasis will be focused toward the patient in respiratory failure for diagnosis and ventilator management. Prerequisite: Senior standing.

**CCSL 979. Critical Care Selective in Pediatrics. 4 Credits.**

This elective experience has been designed as a one-month rotation in the pediatric intensive care unit at Wesley Medical Center. Care will be provided to critically ill patients from the neonatal period through adolescence. During this rotation the student will receive exposure to many pediatric critical care subjects and will be expected to convey an understanding of those processes during bedside rounds, in lectures, and during actual patient care. The student will participate in the educational endeavors of the critical care service, including lectures to other students and allied critical care staff such as nurses and respiratory therapists. The student will be expected to give brief presentations on topics that are identified during patient care. Prerequisite: Senior standing.

**CCSL 980. Critical Care Selective in Burn. 4 Credits.**

Student will be provided hands-on experience in burn management and critical care. Student will make daily rounds, assist in surgery, and participate in pre-operative and post-operative care of patients admitted to the burn unit. Student will be supervised by faculty and residents. Prerequisite: Senior standing.

**CCSL 981. Critical Care Selective in Internal Medicine. 4 Credits.**

The critical care rotation will aim to provide educational opportunities to acquire knowledge of and to develop clinical competence in the field of critical care medicine. The student will learn interpretation of CXR's, EKG's, Lab/Hemodynamic data and ventilator management. The student will participate in daily morning and evening rounds, and observe and be involved in ICU procedures. The student will be exposed to the many
Clinical Electives in Wichita

ethical issues of critical care illness. Emphasis will be on formulation of
differential diagnosis and therapeutic plan. Prerequisite: Senior standing.

CCSL 983. Critical Care Selective in Trauma. 4 Credits.
The student will learn the care of surgical patients who have experienced
blunt and penetrating traumas. Student will be assigned to the trauma
service and work with a critical care resident. Student will develop
trauma evaluation skills by participating in trauma patient work-ups in the
emergency room. Student will assist in surgery and participate in hospital
rounds for trauma patients in the Surgical Intensive Care Unit. Student will
also develop diagnostic skills in the ambulatory care setting and attend
surgical conferences. Prerequisite: Senior standing.

Postgraduate Training Programs

The KU School of Medicine provides two distinct residency and fellowship
programs. Both programs are comprehensive in their training. One
program is at the KU School of Medicine and Medical Center in Kansas
City. The second program is at the KU School of Medicine — Wichita.

Kansas City Postgraduate Training Programs (http://www.kumc.edu/
school-of-medicine/gme.html)

Graduate Certificate in Piano Pedagogy (p. 2260)
The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in the Swarthout Recital Hall (remodeled in 2015), Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Degrees

Undergraduate Degree Programs

The degree of Bachelor of Music is granted with majors in bassoon, clarinet, double bass, euphonium, flute, French horn, harp, jazz, musicology, music therapy, oboe, organ and church music, percussion, piano, saxophone, theory, composition, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

The degree of Bachelor of Arts in Fine Arts in Music is offered for students with interests in any area of music who also want to pursue a second degree or minor not in the School of Music.

The degree of Bachelor of Fine Arts is granted with a major in theatre and voice.

The degree of Bachelor of Music Education is granted with a major in music education.

Requirements for Graduation

Degrees from the School of Music are conferred on candidates who have satisfactorily completed a minimum of 120 credit hours for the B.A., B.M., B.F.A., and B.M.E. degrees, including required subjects. 45 credit hours must be in junior/senior-level courses, numbered 300 and above. A minimum 2.0 grade-point average, both cumulative and in KU courses, is required for graduation. Four (4) hours of the total in each case, except the Music Therapy B.M. and the Music Education B.M.E. degrees, may be in physical education activity courses.

Remedial Courses

Remedial courses listed in the catalog and Schedule of Classes (https://classes.ku.edu/) are numbered below 100. Such courses include, but are not limited to, MATH 2. Remedial courses do not count toward graduation in the School of Music and may not be counted as distribution courses or electives.

Facilities

Murphy Hall

Murphy Hall, named for former KU Chancellor Franklin D. Murphy, houses the School of Music (http://music.ku.edu/). It is a 5-level facility with offices for faculty members in applied music, music theory and composition, musicology, opera, music education, music therapy, and ensembles. Designed for music and theater, it contains 4 performance areas.

- Crafton-Preyer Theater provides a venue for plays, operas, musical theater shows, and concerts. It is a fully equipped, 1,188-seat proscenium stage facility.
- William Inge Memorial Theater is an intimate black-box facility with seating for up to 125, suitable for plays and small opera productions.
- Swarthout Recital Hall, a 273-seat facility with exceptional acoustics, is dedicated to faculty and student solo and chamber music presentations and occasional opera productions. Swarthout Recital Hall has been fully remodeled and re-opened to public performances in April 2015.
- The Baustian Theater, a black-box facility for opera and musical theater productions, seats 125 and has a dressing room and wardrobe area, set construction and storage area, and office and performance control areas.

Murphy Hall also houses classrooms, practice rooms, rehearsal halls, and storage facilities for instruments and sheet music. The Electronic Music Studio contains a digital workstation for the recording and production of electronic music and video.

The Thomas Gorton Music and Dance Library in Murphy Hall houses more than 111,000 scores, books, sound recordings, videos, and serials, and has the leading music collection in the Great Plains. It features a public computer lab (with both Windows and Macintosh workstations); study carrels; comfortable seating; and public display of new acquisitions, current periodicals, and special exhibitions. Students can make full use of music and dance information resources. The Library also features a high-quality overhead scanner, a listening room with a vinyl record player, a multi-function printer, and an ADA-compliant workstation designed for use by those with impaired vision. The library’s computer lab features a full suite of programs, including Microsoft Office, Adobe Creative Suite, and music notation programs such as Sibelius, Finale, and MuseScore. Students may also reserve our four meeting rooms for individual study and group meetings by submitting a request at lib.ku.edu/study.

The Music Education and Music Therapy Complex in Murphy Hall contains a model music education classroom, a general music instruction classroom, large and small music therapy clinical spaces, three research spaces (Human Learning Lab, Music Behavior Observation Lab, and Perception & Cognition Lab), faculty offices, and the MGMT Computer Lab. In addition, the complex houses a Vocology Laboratory, which affords excellent resources for research-based understanding of singing voice phenomena. The stationary lab facilitates acquisition and analysis of voice data in a controlled environment. It also provides mobile configurations of resources for field-based research and pedagogy in voice studios, choir rehearsal areas, classrooms, and music therapy clinics. Interactive distance delivery of specific music education and music therapy graduate courses are taught on campus and anywhere in the world.

Lied Center

The Lied Center of Kansas (http://www.lied.ku.edu/) is a 2,020-seat performing arts hall. On KU’s west campus at Irving Hill Road and Constant Avenue, it is the venue for the Lied Center Series. It also presents School of Music (http://music.ku.edu/) productions, Student Union Activities (https://rockchalkcentral.ku.edu/?ql=Student_9347) shows, and university and community events. The performing arts hall
The Dane and Polly Bales Organ Recital Hall is acoustically designed for the teaching and performance of organ music. It has seating for 200 and is attached to the Lied Center main lobbies at two levels. It houses a 45-stop mechanical key-action (electric stop-action) organ built by Hellmuth Wolff et Associés, one of the finest builders of organs in the world. The hall is available to organ students for practice, lessons, and recitals. Its aesthetics are enhanced by three magnificent stained glass windows designed by Peter Thompson, former Dean of the School of Fine Arts.

Undergraduate Programs

The school acquaints undergraduates with music as an important field of a liberal culture, either as members of a discriminating public or as trained practitioners. It prepares students for careers in music and promotes scholarship and research. It offers curricula for teachers of music in public schools and institutions of higher education and special degree curricula for training music therapists.

View the list of School of Music academic programs (p. 2155).

Applied Music Lessons

All majors, minors, and nonmajors (as space permits) who wish to take lessons must first pass an audition. Students should follow their degree check sheets for level and credit hours required for lessons. Students may state their preferences as to teachers for private lessons, but final authority rests with the director of the division. The minimum acceptable grade to remain in applied music lessons is a B-. A grade of B- or higher must be earned in each semester of lessons.

Courses for Nonmajors and Music minors

Students in other KU schools or the College of Liberal Arts & Sciences may enroll in music courses for credit. First Year Seminar (MUS 177), The Business of Music (MUS 586), two group beginner courses (GUIT 102, PIAN 111), some music theory courses (MTHC 105, MTHC 115, MTHC 301, MTHC 302, MTHC 303), most musicology courses (MUSC 298, MUSC 302, MUSC 309, MUSC 310, MUSC 314, MUSC 315, MUSC 318, MUSC 336, MUSC 408, MUSC 450, MUSC 470, or MUSC 471), and ensembles are open to KU students (BAND 406, BAND 410, CHOR 412, CHOR 414, CHOR 418, JAZZ 409, ORCH 406, and PENS 252 as well as other ensembles by audition. Please see the Ensembles section below.

Minors in music are offered for students in other disciplines.

Most degree programs accept up to 6 hours of electives in music ensembles and performance.

University Honors Program

The school encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu/).

Ensembles

The University of Kansas Symphony Orchestra (KUSO) provides performance majors the highest quality preparation for a professional career in orchestral playing. KUSO offers a comprehensive course of orchestral studies and performs repertoire spanning from the Baroque to the 21st century, including premieres of new works. In addition to large-scale symphonic programming, each season includes performances of major solo works featuring faculty, student, and leading international guest artists who recently have included Blake Pouliot, Joshua Roman and Simone Porter. The KU Symphony Orchestra also regularly collaborates with KU Theatre and KU Opera productions, for whom it is the resident ensemble. The orchestra combines with KU Choirs for the immensely popular annual Holiday Vespers concerts and in other choral/orchestral literature throughout the year and showcases the works of student composers in the KU Composition studio. In addition to works presented for performance, the Symphony Orchestra also regularly reads and rehearses additional orchestral literature.

The University Orchestra is an ensemble open to all enrolled students at the University of Kansas regardless of major, and typically presents 1-2 concerts per semester. The University Orchestra is open to all players without audition. If you play a wind instrument and would like to get some orchestral experience, this is a great starting place. If you played an instrument in high school and want to keep playing, this is the ensemble for you! The atmosphere is fun and friendly, and a great opportunity to meet new friends on campus. The orchestra is conducted and run by the graduate students in orchestral conducting for whom the ensemble doubles as a repertory orchestra. Repertoire performed includes standard symphonic literature, concerts and new music alongside more popular selections and arrangements.

The Wind Ensemble presents 4 or more concerts annually and tours nationally and internationally. The Symphonic and University Bands perform 2 concerts each semester.

The award-winning KU Jazz program includes 3 jazz ensembles, and several combos.

The Marching Jayhawks are part of the pageantry at football games. The Basketball Bands (Men’s and Women’s) and pep bands also perform for sporting events.

The Bales Chorale, Chamber Choir, KU Glee, University Singers, and KU Treble Choir perform concerts on campus, tour, and participate in combined choral and orchestral presentations such as the annual Holiday Vespers. All KU students are eligible through audition for placement in a choir.

Recitals of music by KU student composers are presented each semester. Various faculty ensembles present numerous concerts throughout the year.

Visit the School of Music (http://music.ku.edu/) for current information about recitals, concerts, and performances.

Graduate Programs

The School of Music offers Master of Music programs in composition, conducting, musicology, music theory, and areas of performance and
Master of Music Education programs in music education or music therapy.

The Doctor of Musical Arts degree is offered in composition, conducting, and areas of performance. We offer the Doctor of Philosophy degree in music education with a concentration in music education or music therapy and the Doctor of Philosophy degree in music with an emphasis in musicology or music theory.

View the list of School of Music academic programs (p. 2155).

The Kansas Board of Regents (http://www.kansasregents.org/) has designated KU as the sole institution in the Regents system authorized to grant doctoral degrees in music.

Graduate Grade-Point Average (GPA) Requirement

In addition to tracking degree progress with your advisory committee and other requirements appropriate to the graduate degree, a student must attain and maintain at least a 3.0 grade-point average in all graduate courses.

Please note, once you begin enrolling in your graduate career all courses 500 level and above will count towards your graduate GPA, even if you are not counting those courses towards your degree or are taking them as pre-requisite courses. Students who obtain a GPA below 3.0 will be placed on academic probation or dismissed from the School of Music.

Progress towards Degree

All graduate students must have an approved plan of study by the end of their second semester of graduate study. All students must have an up-to-date Plan of Study on record with the Graduate Student Services Coordinator and an advisory committee in place before your final year.

Recitals of music by KU student composers are presented each semester by the Kansas New Music Guild, a student organization.

Various faculty ensembles present numerous concerts throughout the year.

Visit the School of Music (http://music.ku.edu/) for current information about recitals, concerts, and performances.

Graduate Credit for Non-majors

Performance

Permission to enroll for graduate credit in applied music is determined by audition. This audition should be scheduled with the major division faculty at the beginning of each semester.

Music Education or Music Therapy

Permission to enroll for graduate credit in music education or music therapy is determined by the faculty advisor. Non-majors may enroll with permission from the faculty instructor.

Undergraduate Advising

Music students are advised by their assigned Jayhawk Academic Advisor and their assigned School of Music faculty mentor as well as being supported by the School of Music Student Services office. Faculty and staff in the School of Music work closely with Jayhawk Academic Advising to help undergraduate students achieve their educational goals, and to maintain the academic integrity of our degree programs. Together we welcome students, encourage them to be active participants in their educational experience, and celebrate their successes.

The School of Music encourages students to consult frequently with advisors/mentors/faculty/staff. Academic advisors serve as guides for academic and career interests by working closely with faculty and staff
to provide a comprehensive advising experience for each student's academic journey.

Graduate Advising

Graduate advising for current and prospective graduate students is handled by the major professor or the Area Coordinator for that specific area of study. Faculty contact information can be found in the School of Music Directory (https://music.ku.edu/directory/).

Undergraduate Scholarships

Academic Scholarships, as well as grants, loans, and need-based financial aid, are available through Financial Aid and Scholarships (https://financialaid.ku.edu/understand-aid/).

Merit Scholarships in Music are also available. Audition application and information is available on the school's website (http://music.ku.edu/applyaudition/).

Tuition and Fees

Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu/). Tuition and fees are set by the Board of Regents and are subject to change.

Graduate Fellowships and Assistantships

Financial Aid and Scholarships (http://financialaid.ku.edu/) administers grants, loans, and need-based financial aid, and maintains a net price calculator to estimate your tuition and fees for attending KU.

The School of Music offers Graduate Teaching Assistantships (GTAs) annually to well qualified students. Interested students can apply online (https://deptsec.ku.edu/~music/forms/form29/) and talk with faculty in their area of interest. For additional information about graduate assistantships, contact the School of Music Graduate Student Services Coordinator at musicgrad@ku.edu.

For more information about music scholarships, fellowships, and awards, see the Funding Resources (https://music.ku.edu/resources-academic-services/) section of the website or visit the Graduate Studies (https://graduate.ku.edu/funding/) website for information about funding opportunities for graduate students at KU.

Tuition and Fees

Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu/). Tuition and fees are set by the Board of Regents and are subject to change.

University Regulations

For information about all university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/). A few examples specific to undergraduate students in the School of Music are shown below.

All graduate student regulations can be found in the School of Music Graduate Handbook (https://music.ku.edu/graduate-handbooks/) or the Graduate Studies (p. 2449) pages of the Academic Catalog. If you have additional questions, contact the Graduate Student Services Coordinator at musicgrad@ku.edu.

Absences

The school defines excessive absence as absence in excess of the number of credit hours in the course. A student with excessive absences may be withdrawn from the course by the dean.

Change of School

To change from one school to another, the student must submit an online Change of School form (https://registrar.ku.edu/change-school/).

Admission is competitive. Students must have minimum cumulative grade-point averages of 2.75 on a 4.0 scale from all colleges or universities including KU. Music admission is contingent upon a successful audition. Change-of-school applicants must meet the same requirements as transfer applicants.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (http://policy.ku.edu/).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

Honor Roll

Students with grade-point averages of 3.6 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean's list in fall and spring. An Honor Roll notation appears on the transcript.

Incompletes

The letter I should not be used when a definite grade can be assigned for the work done. It is not given for the work of a student in any course except to indicate that some part of the work has, for reasons beyond the student's control, not been done, while the rest has been satisfactorily completed. At the time an I is reported on the electronic roster, the character and amount of work needed, as well as the date required for completion and lapse grade if further work is not completed by this date, should be indicated.

If the instructor specifies that repetition of a portion of the classroom work is required, the student may attend classes but should not officially enroll in that course again.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade.
assigned by the course instructor, and shall be indicated on the student’s record.

Extensions to the time limit may be granted by the dean’s representative upon submission of a petition from the student containing the endorsement of the course instructor who assigned the I grade, or the department chairperson if the instructor is unavailable. After the I grade is converted to a grade of F or U, the grade may only be changed in accordance with USRR Article II, Section 3 (http://policy.ku.edu/governance/USRR/).

**Maximum and Minimum Semester Enrollment**

The normal maximum enrollment is 20 hours during fall or spring semesters or 9 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean.

**Probation**

Students may be dismissed at any time by the dean for excessive absences or for failure to make satisfactory progress in their studies.

A student not on probation who fails to earn a grade-point average of at least 2.0 in any semester is placed on probation for the following semester.

At the end of the semester in which the student has been on probation, he or she is removed from probation if the grade-point average for the semester is at least 2.0, with a minimum course load of 12 hours and a cumulative grade-point average of 2.0. A student whose course load is fewer than 12 hours or whose cumulative grade-point average is below 2.0 continues on probation even if the semester grade-point average is 2.0 or above.

At the end of the semester in which the student has been on probation, he or she is dismissed for poor scholarship if the grade-point average for the semester is below 2.0.

A student who has been dismissed for poor scholarship is not eligible to enroll again at any time, except with the special permission of the dean. A reinstated student is placed on final probation. If the student fails to achieve a minimum grade-point average of 2.0 for the semester, he or she is dismissed, and readmission is not granted.

Students who take courses at other institutions during the suspension may receive credit for such work only if it meets the approval of the dean.

**Required Work in Residence**

6 of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

**Transfer of Credit**

CredTran (http://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Only grades of C or higher are accepted as transfer credit toward degrees.

**Graduate University Regulations**

For information about all university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/). A few examples specific to the School of Music are shown below.

**Absences**

A leave of absence may be granted on request. View the Graduate Studies policy on leaves of absence (http://graduate.ku.edu/policies/).

**Credit/No Credit**

The Credit/No Credit option is authorized, as of spring 2012, for graduate students (USRR Article II, 2.2.7). The full explanation can be found in the KU Policy Library under University Senate Rules and Regulations (http://policy.ku.edu/governance/USRR/).

**Incomplete**

The letters W and I may be given. The letter I indicates incomplete work that may be completed without re-enrollment in the course. The letter W indicates withdrawal for which no credit or grade point is assigned. For more information, see USRR Article II, Section 3 (http://policy.ku.edu/governance/USRR/).

**Maximum and Minimum Semester Enrollment**

The normal maximum enrollment is 16 hours during fall or spring semesters or 6 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean. International students must comply with the credit requirements for their visa status.

**Probation and Dismissal**

Upon falling below a cumulative graduate grade-point average of B (3.0), computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the Graduate Division of the school or college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student's overall graduate average has been raised to B by the end of the next semester of enrollment after being placed on probation, the student may be returned to regular status. If not, the student is not permitted to re-enroll unless the Graduate Division acts favorably on a departmental recommendation for the student to continue study.

For more information regarding Probation and Dismissal, see the Graduate Studies Policy library (https://ogs.ku.edu/policies/).

**Required Work in Residence**

For information about the doctoral residence requirement, see the Graduate Studies (p. 2449) section of the online catalog.

**Transfer of Credit**

View the Graduate Studies policy on graduate credit, including transfer credit, in the Graduate Studies section of the online catalog or the KU Policy Library (http://catalog.dept.ku.edu/201314/schools/gs/regulations/#12).
Music Courses

ACMP 527. Accompanying. 1-4 Credits.
Individual instruction in vocal and/or instrumental accompanying. Open to junior, senior, and graduate pianists with permission of instructor.

ACMP 529. Performance Class in Accompanying. 1 Credits.
A class in the performance of vocal and instrumental accompanying. Prerequisite: Completion of ACMP 527 or permission of instructor.

ACMP 727. Accompanying. 1-4 Credits.
Individual instruction in vocal and or instrumental accompanying. Prerequisite: Consent of instructor.

ACMP 811. Advanced Accompanying. 2-4 Credits.
For graduate students majoring in accompanying. May be repeated for credit. Summer session limit one to three hours.

ACMP 822. The Accompanist's Literature. 3 Credits.
A course in which major vocal and instrumental works are studied with vocal or instrumental participants.

Music Courses

BAND 202. Wind Ensemble. 0-1 Credits.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor.

BAND 204. Symphonic Band. 0-1 Credits.
For freshmen and sophomores. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director.

BAND 206. University Band. 0-1 Credits.
For freshmen and sophomores. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard band repertoire. May be repeated for credit. Prerequisite: Permission of director.

BAND 209. Basketball Band. 0-1 Credits.
Men's and Women's Basketball Bands. Placement by audition. Prerequisite: Participation/enrollment in BAND 410 or BAND 710.

BAND 210. University Marching Band. 0-1 Credits.
For freshmen and sophomores. Open to all qualified University students regardless of major. Public performances include presentation of marching maneuvers and pageantry at all home football games as well as several trips each season. Membership by audition. May be repeated for credit.

BAND 406. University Band. 0-1 Credits.
For undergraduate students. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard concert band repertoire. May be repeated for credit. Prerequisite: Permission of director.

BAND 409. Basketball Band. 0-1 Credits.
Men's and Women's Basketball Band. Placement by audition. Prerequisite: Participation/enrollment in BAND 410 or BAND 710.

BAND 410. University Marching Band. 0-1 Credits.
For undergraduate students. Open to all qualified University students regardless of major. Public performances include presentation of marching maneuvers and pageantry at all home football games as well as several trips each season. Membership by audition. May be repeated for credit.

BAND 466. Directed Study: ______. 1-3 Credits.
May be repeated for credit. Prerequisite: Permission of instructor.

BAND 602. Wind Ensemble. 0-1 Credits.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor.

BAND 604. Symphonic Band. 0-1 Credits.
For graduate students. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director.

BAND 701. Workshop in: ______. 1-3 Credits.
May be repeated for credit.

BAND 702. Wind Ensemble. 0-1 Credits.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor.

BAND 704. Symphonic Band. 0-1 Credits.
For graduate students. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director.

BAND 706. University Band. 0-1 Credits.
For Graduate students. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard concert band repertoire. May be repeated for credit. Prerequisite: Permission of director.

BAND 710. University Marching Band. 0-1 Credits.
Open to all qualified University graduate students regardless of major. Public performances include presentation of marching maneuvers and pageantry at all home football games as well as several trips each season. Membership by audition. May be repeated for credit.

BAND 803. Interpretation of Band Music. 1 Credits.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced band music. In addition to the regular course work, students must participate in one of the university concerts bands, attend all rehearsals each week and play in concerts. May be repeated for credit. Prerequisite: Permission of instructor.
Music Courses

BASN 100. Bassoon. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

BASN 101. Bassoon Reed Making. 0-1 Credits.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to freshmen and sophomores. May be repeated for credit.

BASN 121. Bassoon. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

BASN 221. Bassoon. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

BASN 300. Bassoon. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

BASN 301. Bassoon Reed Making. 0-1 Credits.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to juniors and seniors. May be repeated for credit.

BASN 321. Bassoon. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

BASN 421. Bassoon. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

BASN 422. Bassoon. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

BASN 622. Bassoon. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

BASN 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: BASN 622.

BASN 711. Bassoon. 1-3 Credits.
For graduate students not majoring in bassoon. Audition required. May be repeated for credit.

BASN 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

BASN 810. Elective Master's Recital. 1 Credits.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in BASN 811.

BASN 811. Bassoon. 3-4 Credits.
For graduate students majoring in bassoon. May be repeated for credit. Summer session limit three hours.

BASN 899. Master's Recital. 1 Credits.
Master's Degree Recital. The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: BASN 811.

BASN 921. Seminar in Performance. 3 Credits.
A study of repertoire and performance practice relating to the bassoon during the seventeenth and eighteenth centuries.

BASN 922. Seminar in Performance. 3 Credits.
A study of repertoire and extended performance techniques of the twentieth century.

BASN 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in bassoon. May be repeated for credit. Summer session limit three hours.

BASN 965. Doctoral Recitals. 1-3 Credits.
Maximum seven hours credit. May be repeated for credit.

BASN 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

BASN 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

BRSS 921. Seminar in Performance and Pedagogy: _____ 3 Credits.
Repertoire, performance practice, pedagogical, and stylistic concerns relating to the music for brass instruments throughout their history. Topics will include the physical development of the instruments, their usage as solo, chamber, and large ensemble instruments in both sacred and secular literature, and a survey of historical and modern bibliographic materials. May be repeated for credit when topics vary.

Music Courses

CARI 100. Carillon. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

CARI 300. Carillon. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

CARI 621. Carillon. 1-4 Credits.
One or two lessons per week. For graduate students not majoring in carillon performance. May be repeated for credit.

CARI 711. Carillon. 1-3 Credits.
For graduate students not majoring in carillon. Audition required. May be repeated for credit.

CARI 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

CARI 804. History of Carillon Literature and Design. 3 Credits.
A survey of carillon literature and design. Prerequisite: Permission of instructor.

CARI 811. Carillon. 3-4 Credits.
For graduate students majoring in carillon. May be repeated for credit. Summer session limit three hours. Prerequisite: Permission of instructor.

CARI 820. Studio Class in Carillon. 0 Credits.
Studio performance of repertoire for students enrolled in carillon. May be repeated. Prerequisite: Permission of instructor.

CARI 899. Master's Recital. 1 Credits.
Master's Degree Recital. The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: CARI 811.

Music Courses

CHAM 216. Chamber Music. 0-1 Credits.
For freshmen and sophomores. The study of works for various combinations of instruments. May be repeated for credit.

CHAM 220. Baroque Ensemble. 0-1 Credits.
For freshmen and sophomores. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit.

CHAM 254. New Music Ensemble. 0-2 Credits.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor.

CHAM 320. Baroque Ensemble. 0-1 Credits.
For juniors and seniors. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit.

CHAM 336. Chamber Music. 0-2 Credits.
For juniors and seniors. The study of standard chamber music literature with or without piano. May be repeated for credit.

CHAM 454. New Music Ensemble. 0-2 Credits.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor.

CHAM 545. New Music Ensemble. 0-2 Credits.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor.

CHAM 654. New Music Ensemble. 0-2 Credits.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor.

CHAM 754. New Music Ensemble. 0-2 Credits.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor.

CHAM 820. Baroque Ensemble. 0-2 Credits.
Study and performance of seventeenth and eighteenth century chamber music, using replicas of period instruments. Primarily for woodwinds, strings, and keyboards. May be repeated for credit.

CHAM 829. Advanced Chamber Music. 0-2 Credits.
A special study of chamber music works, with or without piano, with emphasis on problems of style and interpretation. May be repeated for credit.

May be repeated for credit.

Music Courses

CHOR 214. University Singers. 0-1 Credits.
Open through audition. Study and performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit.

CHOR 216. Concert Choir. 0-1 Credits.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit.

CHOR 218. KU Glee Club. 0-1 Credits.
A choral ensemble for tenors and basses. The group will study, rehearse, and perform traditional and contemporary choral music for tenors and basses. A formal audition is not required. May be repeated for credit.

CHOR 226. KU Treble Choir. 0-1 Credits.
A choral ensemble for treble voices. The group will study, rehearse, and perform traditional and contemporary choral music for treble chorus. For freshmen and sophomores. May be repeated for credit.

CHOR 242. Chamber Choir. 0-1 Credits.
Intensive study and public performance of significant choral literature. Membership by audition. For freshmen and sophomores. May be repeated for credit.

CHOR 254. Collegium Musicum, Vocal. 0-1 Credits.
May be repeated for credit. (Same as MUSC 254.) Prerequisite: Permission of instructor.

CHOR 412. Oread Singers. 0-1 Credits.
Open through placement audition. Study and performance of significant choral music from the major periods of music history. May not be used to fulfill music scholarship award requirement. May be repeated for credit.

CHOR 414. University Singers. 0-1 Credits.
Open through placement audition. Study and performance of significant choral music from the major periods of music history. For undergraduate students. May be repeated for credit.

CHOR 416. Concert Choir. 0-1 Credits.
Open through placement audition. Study and public performance of significant choral music from the major periods of music history. For undergraduate students. May be repeated for credit.

CHOR 418. KU Glee. 0-1 Credits.
A choral ensemble for tenors and basses. The group will study, rehearse, and perform traditional and contemporary choral music for tenors and basses. A formal audition is not required. May be repeated for credit.

CHOR 442. Chamber Choir. 0-1 Credits.
Intensive study and public performance of significant choral literature. Membership by audition. For undergraduate students. May be repeated for credit.

CHOR 446. KU Treble Choir. 0-1 Credits.
A choral ensemble for treble voices. The group will study, rehearse, and perform traditional and contemporary choral music for treble chorus. For undergraduate students. May be repeated for credit.

CHOR 642. Chamber Choir. 0-1 Credits.
Intensive study and public performance of significant choral literature. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit.

CHOR 654. Collegium Musicum, Vocal. 0-1 Credits.
Church Music Practicum. 0-1 Credits.
May be repeated for credit.

CHUR 320. Church Music Practicum. 0 Credits.
Methods and materials of church music. May be repeated.

CHUR 422. Bales Chorale. 0-1 Credits.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit.

CHUR 222. Bales Chorale. 0-1 Credits.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit.

CHUR 722. Bales Chorale. 0-1 Credits.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. For graduate students. May be repeated for credit.

CHUR 805. Selected Topics in Church Music: ______. 1-3 Credits.
Topics vary by semester. May be repeated for credit.

CHUR 806. Service Playing and Improvisation I. 3 Credits.
Hymn playing, service playing techniques, anthem accompaniment, conducting from the console and improvisation. Prerequisite: Permission of instructor.

CHUR 807. Service Playing and Improvisation II. 3 Credits.
Continuation of CHUR 806. Prerequisite: Permission of instructor.

CHUR 809. The Judeo-Christian Tradition and the Arts. 3 Credits.
Readings, discussion and projects concerning architecture, visual art, literature, drama, poetry, dance, and film as they have developed in the Judeo-Christian tradition.

Church Music in Context: A Study of Judeo-Christian Traditions from its inception to 1500 C.E. Church music is an incredibly expansive topic that exists within a very broad context. This course will introduce you to the broad issues and the major trends in the history of church music, liturgy, religious aesthetics, and the arts. The class will consider three related, generative questions: (1) Institutional: How have music, liturgy, and the arts been integrated into the life of Judeo-Christian religious institutions? (2) Theological: How has the Judeo-Christian tradition thought about music, liturgy, and the arts throughout its history? (3) Practical: What genres or styles of music, liturgy, and the arts have risen to prominence in the Judeo-Christian tradition.

Church Music in Context: A Study of Judeo-Christian Traditions from 1500 C.E. to the Present Church music is an incredibly expansive topic that exists within a very broad context. This course will introduce you to the broad issues and the major trends in the history of church music, liturgy, religious aesthetics, and the arts. The class will consider three related, generative questions: (1) Institutional: How have music, liturgy, and the arts been integrated into the life of Judeo-Christian religious institutions? (2) Theological: How has the Judeo-Christian tradition thought about music, liturgy, and the arts throughout its history? (3) Practical: What genres or styles of music, liturgy, and the arts have risen to prominence in the Judeo-Christian tradition.

Music Courses

CLAR 100. Clarinet. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

CLAR 121. Clarinet. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.
CLAR 221. Clarinet. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

CLAR 300. Clarinet. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

CLAR 321. Clarinet. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 12 credits.

CLAR 421. Clarinet. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

CLAR 422. Clarinet. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

CLAR 622. Clarinet. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

CLAR 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor in Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: CLAR 622.

CLAR 711. Clarinet. 1-3 Credits.
For graduate students not majoring in clarinet. Audition required. May be repeated for credit.

CLAR 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

CLAR 810. Elective Master’s Recital. 1 Credits.
Non-degree elective recital for Master’s students. Prerequisite: Concurrent enrollment in CLAR 811.

CLAR 811. Clarinet. 3-4 Credits.
For graduate students majoring in clarinet. May be repeated for credit. Summer session limit three hours.

CLAR 899. Master’s Recital. 1 Credits.
The Master’s recital is the culminating event for the Master of Music degree and must be given before the Master’s Final Oral Exam. Prerequisite: Corequisite: CLAR 811.

CLAR 921. Seminar. 3 Credits.
A study of clarinet repertoire and performance techniques in the 18th and 19th centuries.

CLAR 922. Seminar. 3 Credits.
A study of clarinet repertoire and performance techniques from 1900 to the present.

CLAR 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in clarinet. May be repeated for credit. Summer session limit three hours.

CLAR 965. Doctoral Recitals. 1-3 Credits.
Maximum seven hours credit. May be repeated for credit.

CLAR 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

CLAR 971. D.M.A. Recital. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

COND 245. Conducting I. 2 Credits.
An introduction to the principles of conducting through exercises and musical examples designed to develop a specific technical skill. A study of the basic conducting patterns and their application.

COND 345. Conducting II. 2 Credits.
A continuation of COND 245. Prerequisite: COND 245.

COND 711. Choral Conducting I. 1-3 Credits.
Conducting technique, choral musicianship, and choral methods. Prerequisite: MEMT 246, MEMT 330, and/or consent of instructor.

COND 712. Choral Conducting II. 1-3 Credits.
Continuation of COND 711.

COND 745. Instrumental Conducting. 2 Credits.
A study of conducting techniques and problems in rehearsal and performance. Score analysis and repertoire development. May be repeated for credit. Prerequisite: Consent of instructor.

COND 791. Score Reading. 2 Credits.
Development of skills in the reading of all clefs and the most common transpositions. Simultaneous reading of multiple lines and their practical rendition at the piano. May be repeated for credit.

COND 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

COND 811. Advanced Choral Conducting. 2-4 Credits.
A study of conducting techniques as they pertain to developing an expressive and precise choral ensemble. Participating in rehearsals under the supervision of instructor. May involve conducting in public performance. May be repeated for credit. Prerequisite: Permission of instructor.

COND 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Credits.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as MEMT 820.)

COND 821. Advanced Score Reading. 2 Credits.
Development of fluency in reading full scores at the piano. May be repeated for credit. Prerequisite: Two semesters of COND 791 or consent of instructor.

COND 822. Choral Literature - Late Baroque Era to Classical Era. 3 Credits.

COND 823. Choral Literature - Romantic Era. 3 Credits.

COND 824. Choral Literature - Contemporary Era. 3 Credits.

COND 825. Choral Literature-Renaissance. 3 Credits.
The study of literature from the Renaissance to the Early Baroque period.

**COND 845. Advanced Instrumental Conducting. 3 Credits.**
A study of techniques needed to project the conductor's concept in rehearsal and performance. Participating in rehearsals under the supervision of the instructor. May involve conducting in public performance. May be repeated for credit. Prerequisite: Consent of instructor.

**COND 899. Master's Recital. 1 Credits.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: COND 811.

**COND 921. Seminar. 3 Credits.**
Choral literature from 1450 to 1650.

**COND 931. Seminar. 3 Credits.**
Symphonic repertoire.

**COND 932. Seminar. 3 Credits.**
Operatic repertoire.

**COND 933. Seminar. 3 Credits.**
Solo repertoire with orchestra.

**COND 941. Seminar: Band Literature _____. 3 Credits.**
A study of literature for wind band including original works and transcriptions. May be repeated for credit when topic varies.

**COND 961. Directed Performance. 3-4 Credits.**
Open only to students who have been admitted to the D.M.A. program in conducting. May be repeated for credit. Summer session limit three hours.

**COND 965. Doctoral Recitals. 1 Credits.**
Maximum credit, four hours. May be repeated for credit.

**COND 970. D.M.A. Lecture-Recital. 1-4 Credits.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**COND 972. D.M.A. Document. 1-4 Credits.**
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**Music Courses**

**DBBS 100. Double Bass. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**DBBS 121. Double Bass. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**DBBS 221. Double Bass. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**DBBS 300. Double Bass. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**DBBS 321. Double Bass. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**DBBS 421. Double Bass. 1-2 Credits.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**DBBS 422. Double Bass. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**DBBS 622. Double Bass. 2-4 Credits.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

**DBBS 623. Senior Recital. 1 Credits.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: DBBS 622.

**DBBS 711. Double Bass. 1-3 Credits.**
For graduate students not majoring in double bass. Audition required. May be repeated for credit.

**DBBS 799. Artist Certificate Recital. 1 Credits.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**DBBS 811. Double Bass. 3-4 Credits.**
For graduate students majoring in double bass. May be repeated for credit. Summer session limit three hours.

**DBBS 899. Master's Recital. 1 Credits.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: DBBS 811.

**DBBS 961. Directed Performance. 3-4 Credits.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in double bass. May be repeated for credit. Summer session limit three hours.

**DBBS 965. Doctoral Recitals. 1-3 Credits.**
May be repeated for credit.

**Music Courses**

**EUPH 100. Euphonium. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**EUPH 121. Euphonium. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**EUPH 221. Euphonium. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**EUPH 300. Euphonium. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**EUPH 321. Euphonium. 1-2 Credits.**

Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

EUPH 421. Euphonium. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

EUPH 422. Euphonium. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

EUPH 622. Euphonium. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

EUPH 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed as required by the degree program. Prerequisite: Corequisite: EUPH 622.

EUPH 711. Euphonium. 1-3 Credits.
For graduate students not majoring in euphonium. Audition required. May be repeated for credit.

EUPH 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

EUPH 810. Elective Master's Recital. 1 Credits.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in EUPH 811.

EUPH 811. Euphonium. 3-4 Credits.
For graduate students majoring in euphonium. May be repeated for credit. Summer session limit three hours.

EUPH 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: EUPH 811.

Music Courses

FLUT 100. Flute. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

FLUT 121. Flute. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

FLUT 221. Flute. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

FLUT 300. Flute. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

FLUT 321. Flute. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

FLUT 421. Flute. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

FLUT 422. Flute. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

FLUT 622. Flute. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

FLUT 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed as required by the degree program. Prerequisite: Corequisite: FLUT 622.

FLUT 711. Flute. 1-3 Credits.
For graduate students not majoring in flute. Audition required. May be repeated for credit.

FLUT 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

FLUT 810. Elective Master's Recital. 1 Credits.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in FLUT 811.

FLUT 811. Flute. 3-4 Credits.
For graduate students majoring in flute. May be repeated for credit. Summer session limit three credits.

FLUT 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: FLUT 811.

FLUT 921. Seminar in Performance. 3 Credits.
A study of repertoire and performance practice relating to the baroque flute and recorder during the seventeenth and eighteenth centuries.

FLUT 922. Seminar in Performance. 3 Credits.
A study of repertoire and extended performance techniques of the twentieth century.

FLUT 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in flute. May be repeated for credit. Summer session limit three hours.

FLUT 965. Doctoral Recitals. 1-3 Credits.
Maximum seven hours credit. May be repeated for credit.

FLUT 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

FLUT 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

FRHN 100. French Horn. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

FRHN 121. French Horn. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

FRHN 221. French Horn. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

FRHN 252. Horn Ensemble. 0-1 Credits.
For freshmen and sophomores. Study and performance of ensemble literature for the horn. May be repeated for credit.

FRHN 300. French Horn. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

FRHN 321. French Horn. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

FRHN 421. French Horn. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

FRHN 422. French Horn. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

FRHN 622. French Horn. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

FRHN 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: FRHN 622.

FRHN 652. Horn Ensemble. 0-1 Credits.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the horn. May be repeated for credit.

FRHN 711. French Horn. 1-3 Credits.
For graduate students not majoring in French horn. Audition required. May be repeated for credit.

FRHN 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

FRHN 810. Elective Master's Recital. 1 Credits.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in FRHN 811.

FRHN 811. French Horn. 3-4 Credits.
For graduate students majoring in French horn. May be repeated for credit. Summer session limit three credits.

FRHN 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: FRHN 811.

FRHN 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in French Horn. May be repeated for credit. Summer session limit three hours.

FRHN 965. Doctoral Recitals. 1-3 Credits.
May be repeated for credit.

FRHN 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

FRHN 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

GUIT 100. Guitar. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

GUIT 102. Beginning Group Guitar. 1 Credits.
For beginning students with little or no experience playing guitar. No previous musical background is necessary. Emphasis on guitar basics, using easy exercises, chord structure and scales, sight reading, including lead sheets. May be repeated.

GUIT 121. Guitar. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

GUIT 221. Guitar. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

GUIT 300. Guitar. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

GUIT 321. Guitar. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

GUIT 421. Guitar. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.
Music Courses

HARP 100. Harp. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

HARP 121. Harp. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

HARP 221. Harp. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

HARP 300. Harp. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

HARP 321. Harp. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

HARP 421. Harp. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

HARP 422. Harp. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

HARP 622. Harp. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

HARP 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: HARP 622.

HARP 711. Harp. 1-4 Credits.
For graduate students not majoring in harp. Audition required. May be repeated for credit. Summer session limit one to three hours.

HARP 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

Music Courses

HPCD 100. Harpsichord. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

HPCD 300. Harpsichord. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

HPCD 621. Harpsichord. 1-4 Credits.
One or two lessons per week. For graduate students. May be repeated for credit.

HPCD 711. Harpsichord. 1-3 Credits.
For graduate students not majoring in harpsichord. Audition required. May be repeated for credit.

Music Courses

JAZZ 208. Jazz Ensemble. 0-1 Credits.
For freshmen and sophomores. A performance laboratory specializing in the preparation and presentation of jazz compositions and arrangements. Designed to provide today's student musician with the background and skills necessary to function successfully as a professional studio musician, or as a teacher of popular jazz music. May be repeated for credit. Prerequisite: Consent of director.

JAZZ 209. Jazz Combo. 0-1 Credits.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director.

JAZZ 212. Vocal Jazz Ensemble. 0-1 Credits.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. May be repeated for credit.

JAZZ 224. Jazz Improvisation I. 2 Credits.
Study of techniques involved in jazz improvisation, including application of chord-scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor.

JAZZ 225. Jazz Improvisation II. 2 Credits.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor.

JAZZ 230. Introduction to Jazz Piano. 2 Credits.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor.

JAZZ 405. Jazz Theory and Performance I. 3 Credits.
First of four classes covering concepts in jazz improvisation, theory, and performance. Focuses on the basics of melodic line creation, harmonic and melodic dictation (jazz ear training), an introduction to diatonic harmony (up to but not including secondary dominants) and basic major scale analysis (modes and chords.) Prerequisite: MTHC 105 and MTHC 106.

JAZZ 406. Jazz Theory and Performance II. 3 Credits.
Second of four classes covering intermediate concepts in jazz improvisation, theory, and performance. Focuses on original and traditional melodic line creation, melodic and harmonic embellishment,
harmonic and melodic dictation (jazz ear training), and diatonic harmony including secondary dominant, tri-tone substitution and modulation as well as an in-depth study of the 7 modes of melodic minor. Prerequisite: JAZZ 405.

JAZZ 407. Jazz Theory and Performance III. 3 Credits.
Third of four classes covering concepts in jazz improvisation, theory, and performance. Deals with chord scale theory, synthetic scales (creation, analysis and harmonization), advanced poly-rhythm, transcription (analysis, deconstruction performance and utilization), Coltrane matrix (tri-tonic), and singing/ear training over chord progressions and standards. Prerequisite: JAZZ 406.

JAZZ 408. Jazz Ensemble. 0-1 Credits.
For undergraduate students. May be repeated for credit.

JAZZ 409. Jazz Combo. 0-1 Credits.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director.

JAZZ 410. Jazz Theory and Performance IV. 3 Credits.
Last of four classes covering advanced concepts in jazz improvisation, theory, and performance. Focuses on the synthesis and integration of materials from the other classes while also dealing with the use of melodic and rhythmic motives, use of space and pacing, group interaction, performance preparation and success, and dealing with performance anxiety. Prerequisite: JAZZ 407.

JAZZ 412. Vocal Jazz Ensemble. 0-1 Credits.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For undergraduate students. May be repeated for credit.

JAZZ 430. Introduction to Jazz Piano. 2 Credits.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 405 and JAZZ 230 or permission of instructor.

JAZZ 435. Jazz Pedagogy. 2 Credits.
Information and techniques necessary to teach a full jazz studies curriculum in any settings, including the college level. Special emphasis is placed on the teaching of jazz improvisation/theory.

JAZZ 439. Jazz Arranging. 2 Credits.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: JAZZ 405 and JAZZ 230 or permission of instructor.

JAZZ 505. Jazz Theory and Performance I. 3 Credits.
First of four classes covering concepts in jazz improvisation, theory, and performance. Focuses on the basics of melodic line creation, harmonic and melodic dictation (jazz ear training), an introduction to diatonic harmony (up to but not including secondary dominants) and basic major scale analysis (modes and chords.) Prerequisite: MTHC 105.

JAZZ 506. Jazz Theory and Performance II. 3 Credits.
Second of four classes covering intermediate concepts in jazz improvisation, theory, and performance. Focuses on original and traditional melodic line creation, melodic and harmonic embellishment, harmonic and melodic dictation (jazz ear training), and diatonic harmony including secondary dominant, tri-tone substitution and modulation as well as an in-depth study of the 7 modes of melodic minor. Prerequisite: JAZZ 505.

JAZZ 605. Jazz Theory and Performance III. 3 Credits.
Third of four classes covering concepts in jazz improvisation, theory, and performance. Deals with chord scale theory, synthetic scales (creation, analysis and harmonization), advanced poly-rhythm, transcription (analysis, deconstruction performance and utilization), Coltrane matrix (tri-tonic), and singing/ear training over chord progressions and standards. Prerequisite: JAZZ 506.

JAZZ 606. Jazz Theory and Performance IV. 3 Credits.
Last of four classes covering advanced concepts in jazz improvisation, theory, and performance. Focuses on the synthesis and integration of materials from the other classes while also dealing with the use of melodic and rhythmic motives, use of space and pacing, group interaction, performance preparation and success, and dealing with performance anxiety. Prerequisite: JAZZ 605.

JAZZ 608. Jazz Ensemble. 0-1 Credits.
For juniors, seniors, and graduate students. May be repeated for credit.

JAZZ 609. Jazz Combo. 0-1 Credits.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director.

JAZZ 612. Vocal Jazz Ensemble. 0-1 Credits.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit.

JAZZ 622. Studio Instruction. 2-4 Credits.
Studio instruction in jazz with emphasis placed on study and performance in jazz improvisation for juniors and seniors majoring in Jazz Studies BM. May be repeated for credit. Prerequisite: Majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

JAZZ 623. Senior Recital. 1 Credits.
Senior recital in Jazz for undergraduate performance majors pursuing the BM in Jazz Studies. Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: JAZZ 622.

JAZZ 624. Jazz Improvisation I. 2 Credits.
Study of techniques involved in jazz improvisation, including application of chord/scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor.

JAZZ 625. Jazz Improvisation II. 2 Credits.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor.

JAZZ 630. Introduction to Jazz Piano. 2 Credits.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor.

JAZZ 635. Jazz Pedagogy. 2 Credits.
Information and techniques necessary to teach a full jazz studies curriculum in any settings, including the college level. Special emphasis is placed on the teaching of jazz improvisation/theory.

JAZZ 659. Jazz Arranging. 2 Credits.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections.
Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor.

**JAZZ 705. Jazz Theory and Performance I.** 3 Credits.
First of four classes covering concepts in jazz improvisation, theory, and performance. Focuses on the basics of melodic line creation, harmonic and melodic dictation (jazz ear training), an introduction to diatonic harmony (up to but not including secondary dominants) and basic major scale analysis (modes and chords.)

**JAZZ 706. Jazz Theory and Performance II.** 3 Credits.
Second of four classes covering intermediate concepts in jazz improvisation, theory, and performance. Focuses on original and traditional melodic line creation, melodic and harmonic embellishment, harmonic and melodic dictation (jazz ear training), and diatonic harmony including secondary dominant, tri-tone substitution and modulation as well as an in-depth study of the 7 modes of melodic minor. Prerequisite: JAZZ 705.

**JAZZ 707. Jazz Theory and Performance III.** 3 Credits.
Third of four classes covering advanced concepts in jazz improvisation, theory, and performance. Deals with chord scale theory, synthetic scales (creation, analysis and harmonization), advanced poly-rhythm, transcription (analysis, deconstruction performance and utilization), Coltrane matrix (tritone), and singing/ear training over chord progressions and standards. Prerequisite: JAZZ 706.

**JAZZ 708. Jazz Ensemble.** 0-1 Credits.
For graduate students. May be repeated for credit.

**JAZZ 709. Jazz Combo.** 0-1 Credits.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director.

**JAZZ 710. Jazz Theory and Performance IV.** 3 Credits.
Last of four classes covering advanced concepts in jazz improvisation, theory, and performance. Focuses on the synthesis and integration of materials from the other classes while also dealing with the use of melodic and rhythmic motives, use of space and pacing, group interaction, performance preparation and success, and dealing with performance anxiety. Prerequisite: JAZZ 707.

**JAZZ 712. Vocal Jazz Ensemble.** 0-1 Credits.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For graduate students. May be repeated for credit.

**JAZZ 730. Introduction to Jazz Piano.** 2 Credits.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: Permission of instructor.

**JAZZ 735. Jazz Pedagogy.** 2 Credits.
Information and techniques necessary to teach a full jazz studies curriculum in any settings, including the college level. Special emphasis is placed on the teaching of jazz improvisation/theory.

**JAZZ 759. Jazz Arranging.** 2 Credits.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: Permission of instructor.

**Music Courses**

**MEMT 111. Class Guitar for Nonmajors.** 2 Credits.
Common chords, major and minor triads and major-minor sevenths, and fundamentals of music notation for guitar. Strumming and rudimentary finger picking. Performance of simple melodies on all six strings from standard notation. May be repeated for credit.

**MEMT 112. Performance Media:_____**. 0.5-1 Credits.
Laboratory class lessons in pedagogy and performance. May be repeated for credit in different specific media.

**MEMT 113. Performance Media: Brass.** 1 Credits.
Knowledge and skills needed to teach brass instruments in music education settings.

**MEMT 114. Performance Media: Woodwinds.** 1 Credits.
Knowledge and skills needed to teach flute and clarinet in music education settings.

**MEMT 115. Performance Media: Percussion.** 1 Credits.
Knowledge and skills needed to teach and use percussion instruments in music education settings.

**MEMT 117. Performance Media: Voice.** 1 Credits.
Knowledge and skills needed to teach and use voice functionally in music therapy settings.

**MEMT 118. Performance Media: Strings.** 1 Credits.
Knowledge and skills needed to teach string instruments in music education settings.

**MEMT 119. Performance Media: Guitar.** 1 Credits.
Knowledge and skills needed to teach guitar functionally in music education and music therapy settings.

**MEMT 120. Vocal Performance in English.** 0-1 Credits.
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language.

**MEMT 150. Introduction to Music Therapy.** 3 Credits.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities.

**MEMT 160. Principles of Music Education.** 1 Credits.
An overview of the music education field. History, philosophy, curricula, necessary skills and competencies for music educators, and alternative careers in music.

**MEMT 196. Group Leadership Skills in Music Therapy.** 2 Credits.
Music therapy group leadership skills; leading group singing, playing accompanying instruments, and developing effective delivery skills. Prerequisite: MEMT 150 Introduction to Music Therapy/MEMT 760 Principles of Music Therapy.

**MEMT 230. Performance Clinic: Band.** 1 Credits.
Continued development of the knowledge and skills needed to teach band in music education settings. Prerequisite: MEMT 113 and MEMT 114, or MEMT 113 and MEMT 115, or MEMT 114 and MEMT 115, or permission of the instructor.

**MEMT 231. Performance Clinic: Choral.** 1 Credits.
Continued development of the knowledge and skills needed to teach and use the singing voice in music education and music therapy settings.

**MEMT 232. Performance Clinic: Orchestra.** 1 Credits.
Continued development of the knowledge and skills needed to teach string instruments in music education settings. Prerequisite: MEMT 118 or permission of the instructor.

**MEMT 246. Fundamentals of Conducting.** 1 Credits.
This course deals with the techniques of the baton, with gestures, signs, and cures as generally used in conducting choral and instrumental
organizations. It includes the essentials of conducting techniques in both the choral and instrumental types of ensemble performance.

MEMT 250. Human Musical Learning and Development. 2 Credits.
Music learning and development from infancy through adulthood. Development of musical perception, cognition, performance skills, attitudes, and affective/aesthetic responses. Use of theoretical, knowledge-based rationale for building music instruction systems.

MEMT 251. Clinical Techniques for Children. 3 Credits.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. Prerequisite: MEMT 250. Corequisite: SPED 326.

MEMT 296. Clinical Techniques for Adults. 3 Credits.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components.

MEMT 311. Intermediate Class Guitar. 2 Credits.
Instruction in playing barre chords, blues and Latin strums, major and minor scales, position studies, and special effects such as the Travis pick, hammer on, and slurring techniques. Prerequisite: MEMT 116-Guitar; or MEMT 111; or permission of instructor.

MEMT 314. Performance Media: Woodwinds II. 1 Credits.
Knowledge and skills needed to teach saxophone and double reed instruments in music education settings. Prerequisite: MEMT 114 Performance Media: Woodwinds I.

MEMT 329. Rehearsal/Conducting Clinic: ___. 1 Credits.
Rehearsing and conducting ensembles appropriate for music education and music therapy. May be repeated for credit. Prerequisite: Permission of instructor.

MEMT 330. Rehearsal/Conducting Clinic: Band. 1 Credits.
Knowledge and skills needed to rehearse and conduct band ensembles. Prerequisite: MEMT 230 and MEMT 246 and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 331. Rehearsal/Conducting Clinic: Choral. 1 Credits.
Knowledge and skills needed to rehearse and conduct choral ensembles. Prerequisite: MEMT 231 and MEMT 246 for Music Education majors or MEMT 231. Corequisite: MEMT 246 for Music Therapy majors or permission of the instructor.

MEMT 332. Rehearsal/Conducting Clinic: Orchestra. 1 Credits.
Knowledge and skills needed to rehearse and conduct orchestral ensembles. Prerequisite: MEMT 232 and MEMT 246, and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 338. Rehearsal/Conducting Clinic: Non-traditional Ensemble. 1 Credits.
Rehearsing and conducting non-traditional/ORFF ensemble appropriate for music education and music therapy. Prerequisite: Admission to the MEMT Professional Sequence or permission of the instructor.

MEMT 341. Instructional Strategies in Music for Elementary Classroom Teachers. 2 Credits.
Child growth and development in music. Materials as they relate to a sequential music education curriculum in the elementary school. Prerequisite: Admission to the School of Education or the education division of the graduate school.

MEMT 350. Advanced Rehearsal/Conducting Clinic: Band. 1 Credits.
Advanced knowledge and skills needed to rehearse and conduct band ensembles, including attention to more difficult concert band literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 330 and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 351. Advanced Rehearsal/Conducting Clinic: Choral. 1 Credits.
Advanced knowledge and skills needed to rehearse and conduct choral ensembles, including attention to more difficult choral literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 331 and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 352. Advanced Rehearsal/Conducting Clinic: Orchestra. 1 Credits.
Advanced knowledge and skills needed to rehearse and conduct string orchestra ensembles, including attention to more difficult string orchestra literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 332 and admission into Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 367. Managing Behavior in the Musical Environment. 2 Credits.
Theories and techniques for managing the music classroom and clinic setting for best professional practice. Understanding the self and environment as management factors. Field practice of management techniques. Prerequisite: MEMT 250 and admission into the Music Education Professional Sequence or Music Therapy Professional Sequence; or with permission from the MEMT Division.

MEMT 396. Clinical Practicum. 1-3 Credits.
Supervised clinical practice in on-campus or other approved setting. May be repeated for credit. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division.

MEMT 407. The Exceptional Child in Music Education. 2 Credits.
Skills and knowledge needed to facilitate appropriate and productive integration of exceptional children and youth into music classroom settings. Prerequisite: MEMT 367, SPED 326, and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 408. Vocal Pedagogy. 1 Credits.
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as VOIC 408.) Prerequisite: MEMT 160, MEMT 231, MEMT 331 and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission from the MEMT division.

MEMT 419. Technology in Music Education. 1 Credits.
An introduction to the role and application of technology in K-12 school music settings, enabling students to become active agents in their growth of technological skills that support learning in the 21st century music classrooms. Prerequisite: Admission into the Music Education Professional Sequence.

MEMT 420. Teaching Elementary and Secondary General Music. 3 Credits.
Methods and materials for teaching music through singing, playing instruments, moving, listening, and creative activities to students in early childhood through adulthood, including those with disabilities. The course will also deal with music in diverse cultures and integrating music into the general curriculum. Prerequisite: MEMT 367 and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 421. Advanced General Music Teaching. 1 Credits.
Enhanced methodology and pedagogy course for the general music classroom; advanced instruction in teaching children to improvise, sing, play classroom instruments, listen, move, and create music based on specific pedagogies; advanced instruction in assessment strategies. This course is for undergraduate music majors in their senior year. Prerequisite: MEMT 420 and admission to the Music Education Professional Sequence.

MEMT 431. Choral Diction for Music Educators. 1 Credits.
Knowledge and skills needed to teach choral diction in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 432. Approaches to String Pedagogy. 1 Credits.
An examination of the concepts and skills associated with the most influential past and current pedagogical approaches to string education. Prerequisite: Admission to the Music Education Professional Sequence.

MEMT 433. Jazz Techniques. 1 Credits.
Knowledge and skills needed to teach jazz techniques in music education settings. Prerequisite: Admission into the Music Education Professional Sequence.

MEMT 435. Marching Band Techniques. 1 Credits.
Knowledge and skills needed to teach and administer marching bands in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 450. Teaching Choral Music. 2 Credits.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for choral music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 331, MEMT 420, and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 451. Teaching Instrumental Music. 2 Credits.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for instrumental music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 330, MEMT 420, and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 455. Psychology of Music. 3 Credits.
Psychological bases of music and human musical behavior. Study of musical sound perception, cognition, response, reproduction, and creation. Room Acoustics are studied. Research projects required. Prerequisite: MEMT 367, MEMT 420 (music education majors); and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission of the MEMT division.

MEMT 463. The Influence of Music on Behavior I. 3 Credits.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division.

MEMT 464. Music in Therapy. 3 Credits.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division.

MEMT 472. Music Education and Music Therapy Research Project. 1-3 Credits.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, and permission of instructor.

MEMT 497. Independent Study in: ____. 1-4 Credits.
Only one enrollment permitted each semester; a maximum of four hours will apply toward the bachelor's degree. May be repeated for credit. Prerequisite: Recommendation of advisor and consent of instructor.

MEMT 549. Internship in Teaching Music. 4-8 Credits.
A supervised teaching experience leading to initial music teacher certification. The student assumes the total professional role as a teacher of music in an approved school setting with level and subject area to be selected from either elementary general music or a secondary teaching area not covered in MEMT 496. This experience is a minimum of five weeks full time experience. It will begin the spring of the Senior Year right after the new year. Prerequisite: Admission into the Music Education Professional Sequence and MEMT 496.

MEMT 586. Seminar in Music Therapy Professional Development I. 1 Credits.
This seminar style course will focus on Internship Placement, Board Certification, and Professional Advocacy. Undergraduate Prerequisite: MEMT 463 and MEMT 464. Graduate Corequisite: MEMT 763 and MEMT 764.

MEMT 587. Seminar in Music Therapy Professional Development II. 1 Credits.
This seminar style course will focus on supervision, Ethics, and Professional Involvement in AMTA. Prerequisite: MEMT 586.

MEMT 596. Clinical Internship. 1-15 Credits.
Successful completion of six months of full-time clinical experience (minimum of 1,040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level.

MEMT 597. Individual Study in: ____. 1-15 Credits.
Successful completion of six months of full time clinical experience (minimum of 1040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level.
MEMT 598. Special Course: ____.  1-5 Credits.
A special course of study to meet current needs of education students -- primarily for undergraduates. May be repeated for credit.

MEMT 695. Developing Theoretical Framework for Evidence-Based Practice.  3 Credits.
The purpose of this course is to provide music therapy majors with the tools to read, evaluate, understand, and facilitate research in order to develop a theoretical framework for decision making in evidence-based clinical practice. Prerequisite: MEMT 464 Music in Therapy or MEMT 764 Music in Therapy and admission to the Music Therapy Professional Sequence.

MEMT 707. Mainstreaming/Inclusion in Music Education.  2 Credits.
Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Designed specifically for graduate students enrolled in the Graduate Licensure Program, or for those not already in possession of PK-12 Music Teacher Licensure. Prerequisite: SPED 326 and admission into the Music Education Professional Sequence; or with permission of the MEMT division.

MEMT 710. Professional Development.  1 Credits.
Participation in approved professional development conferences. Requires documentation of attendance, an annotated time log of activities, and a short paper. May be repeated for up to 3 credit hours.

MEMT 713. Advanced Brass Techniques.  1.5 Credits.
Advanced instruction of brass-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments.

MEMT 714. Advanced Woodwind Techniques.  1.5 Credits.
Advanced instruction of woodwind-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments.

MEMT 715. Advanced Percussion Techniques.  1.5 Credits.
Advanced instruction of percussion-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments.

MEMT 717. Advanced Low-String Techniques.  1.5 Credits.
Offers advanced methodologies, strategies, approaches, and materials specific to cello and bass instruction for the music education practitioner teaching in instrumental settings or clinical environments.

MEMT 718. Advanced High-String Techniques.  1.5 Credits.
Offers advanced methodologies, strategies, approaches, and materials specific to violin and viola instruction for the music education practitioner teaching in instrumental settings or clinical environments.

MEMT 735. Marching Band Technique.  1.5 Credits.
Offers advanced instruction of the methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments.

MEMT 753. Psychology of Music.  3 Credits.
Psychological bases of music and human musical behavior. Study of musical sound perception, cognition, response, reproduction and creation. Room acoustics are studied. Research projects required.

MEMT 755. Psychology of Music for the Music Education Practitioner.  3 Credits.
Examines psychological aspects of music and human musical behavior as they pertain to music instruction. Study of musical development, motivation, practice, performance anxiety, and the acquisition of musical skill.

MEMT 760. Principles of Music Therapy.  3 Credits.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities.

MEMT 761. Clinical Techniques for Children.  3 Credits.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components.

MEMT 762. Clinical Techniques for Adults.  3 Credits.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components.

MEMT 763. The Influence of Music on Behavior I.  3 Credits.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division.

MEMT 764. Music in Therapy.  3 Credits.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division.

MEMT 772. Music Education and Music Therapy Research Project.  1-3 Credits.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, permission of instructor.

MEMT 791. Music Education/Music Therapy Techniques: ____.  1-3 Credits.
Specific methodologies, strategies, approaches, and materials for music education/music therapy for specific populations, musical media, instructional settings, or clinical environments. May be repeated for credit.

MEMT 798. Special Course: ____.  1-5 Credits.
A special course of study to meet current needs of education professionals -- primarily for graduate students. May be repeated for credit.

MEMT 812. Research in Music Education and Music Therapy.  3 Credits.
Study of research in music education and music therapy. Required of all candidates for graduate degrees. Enrollment must precede or be concurrent with enrollment in thesis.

MEMT 813. History and Philosophy of Music Education.  3 Credits.
A study of music education with reference to its historical development and to educational psychology. Consideration of recent trends and the place of music in the school curriculum. Criteria for the evaluation of activities, courses, materials, and methods in a well-balanced program of music.
MEMT 814. Sociology of Music. 3 Credits.
A study of societal influence on musical thought and practice, both in historical perspective and in comparative study of contemporary societies. The relations between school and community music. The role of musical organizations, institutions, and agencies in American life.

MEMT 815. Musical Values and Aesthetics. 3 Credits.
Examination of musical values in the context of music's functions and uses. Diverse viewpoints are considered, with attention to philosophical and psychological aesthetics. Implications and applications of values systems for music education, music therapy, and other fields.

MEMT 816. Current Trends in Music Education. 3 Credits.
A comprehensive study of the elements that contribute to current practice and successful music programs (many of all of these may be anticipated dependent upon the class participants' needs): curriculum, standards, assessment, classroom management, pedagogy, leadership, organizational structure, budget and finance, scheduling, federal mandates, and administrative practices.

MEMT 817. Methodologies in Music Education. 3 Credits.
A survey of music methodologies (general, vocal, instrumental) used by teachers at the pre-school, elementary, middle/junior high, and high school levels.

MEMT 818. Behavior Management in Music. 3 Credits.
A study of behavioral theories and techniques as applied to classroom and clinical settings for music professionals. Emphasis on a conceptual framework for human behavior and the ameliorative aspects of music.

MEMT 819. Music in Early Childhood. 2 Credits.
Child development as related to musical development, including implications for participation in music from birth through age seven. Current trends in goals, objectives, materials, equipment, facilities, training and evaluation will be discussed.

MEMT 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Credits.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as COND 820.)

MEMT 821. 20th Century School Band & Orchestra. 3 Credits.
Examines instrumental music in the public school as a uniquely American phenomenon. A period-by-period approach to its development is taken, beginning with various precursors.

MEMT 822. Qualitative Research in MEMT. 3 Credits.
Provides an overview of theoretical concepts and methodologies specific to qualitative research within music education and music therapy. Prerequisite: MEMT 812.

MEMT 823. Seminar in: _____. 1-3 Credits.
May be repeated for credit.

MEMT 825. Choral Diction. 3 Credits.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as CHOR 825.)

MEMT 826. Adolescent Changing Voices. 3 Credits.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as CHOR 826.)

MEMT 828. Science-based Voice Education. 3-6 Credits.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as CHOR 828.) Prerequisite: Permission of instructor.

MEMT 830. Leadership and Program Development in Music Education. 2-3 Credits.
A comprehensive study of the elements of management, leadership, organizational structure, budget and finance, federal mandates, and administrative practices.

MEMT 835. Practical Applications of Advanced Methodology in the Music Classroom. 2-3 Credits.
A comprehensive study and application of the elements that contribute to current practice in methodology and pedagogy in the music classroom, encompassing elementary general, choral, orchestral, and band music.

MEMT 838. Orff Applications in Music Education and Music Therapy. 2 Credits.
The use of the Orff-Shulwerk approach in music education and music therapy. Course includes historical background, philosophical approach and practical application of the process. Prerequisite: Admission to professional sequence or permission from MEMT division.

MEMT 840. Development and Application of Improvisation Skills. 2-3 Credits.
Development of individual and group improvisation skills and their applications in professional practice.

MEMT 845. Curriculum Development in Music Education. 3 Credits.
Developing a practical and useful music curriculum that aligns theoretical/philosophical position, program goals, course objectives, instructional materials, learning activities, and assessments.

MEMT 850. Measurement of Musical Behavior. 3 Credits.
Measurement theory applied to the development and administration of measures of musical ability, achievement, attitude, and performance for the use in individual and program evaluation. Classical and innovative methods for establishing reliability and validity. Each student will develop and evaluate a measure of some type of musical behavior appropriate for an educational or therapeutic setting.

MEMT 854. Music Therapy in Pediatrics. 2 Credits.
The use of music therapy in individual and group pediatric settings. Course includes an overview of childhood illnesses, associated medical terminology, and therapy techniques used as contextual and procedural support. Prerequisite: Admission to professional sequence or permission from MEMT division.

MEMT 855. Music Therapy in Hospice and Bereavement. 2 Credits.
The use of music therapy for hospice patients and their families, as well as clients who are grieving due to death of a loved one. Course includes historical, theoretical and practical perspectives. Prerequisite: Admission to professional sequence or permission from MEMT division.

MEMT 857. Music Therapy in Gerontology. 2 Credits.
Theories and clinical applications of music therapy across the life span of older adults, including the young old, the middle old, and the old old. Special considerations will be given to persons with debilitating conditions including dementia, and to older persons’ professional and family caregivers. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor.

MEMT 858. Music Therapy in Medical Care and Wellness of Adult Persons. 2 Credits.
The theories and practice of music therapy as enhancement to health and wellness and to medical interventions for adults will include applications within the medical setting and in the home setting. Interventions will include, among others, approaches for stress management, medical procedural support, pre-operative and post-operative support, follow-up care in catastrophic illness, interventions in post-traumatic stress disorder, and others. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor.

MEMT 860. Assessment in Music Therapy Professional Practice. 2 Credits.
Skills and knowledge needed to assess and evaluate clients, goals, treatments and their effectiveness, program outcomes, program quality, and quality of care.

MEMT 861. Current Trends in Music Therapy. 2 Credits.
A comprehensive study of the elements that contribute to current practice in music therapy, but not limited to, professional competencies, code of ethics, assessment and implementation of interventions, leadership, organizational structure, budget and finance, scheduling and management of contracts, grant writing, and other administrative practices.

MEMT 863. The Influence of Music on Behavior II. 2 Credits.
A laboratory and research course to accompany or follow MEMT 763.

MEMT 864. Philosophy and Theory of Music Therapy. 3 Credits.
Concentrated, interdisciplinary study of conceptual foundations for music therapy.

MEMT 890. Practicum in Music Therapy. 1-16 Credits.
Advanced music therapy practice including clinical work with a population of the student's choice which incorporates music therapy program design, implementation, and evaluation. The student will work in consultation with qualified Music Therapy staff. May be repeated for credit.

MEMT 892. Supervision in Music Therapy I. 3 Credits.
Study and application of theoretical models and supervisory roles applicable to music therapy clinical supervision. Students will review developmental levels for supervisors and practicum students. Supervision of music therapy clinical practicum students will be required.

MEMT 893. Supervision in Music Therapy II. 3 Credits.
A model of practicum supervision will be applied in music therapy clinical practicum supervision. Video and/or tape recordings of supervision conferences with practicum students will be reviewed in consultation with qualified music therapy staff.

MEMT 895. Master's Project. 1-3 Credits.
May be repeated for credit.

MEMT 897. Independent Study: _____ 1-4 Credits.
May be repeated for credit. Prerequisite: Consent of advisor and instructor.

MEMT 898. Master's Oral Examination. 1 Credits.
An independent course in preparation for the non-thesis M.M.E. degree final examination. Prerequisite: Permission of the instructor.

MEMT 899. Master's Thesis. 1-6 Credits.
May be repeated for credit.

MEMT 910. Learning Theories and Music Education. 3 Credits.
(V) A broad survey of formal learning theories and other approaches to the teaching-learning situation, accenting implications for, applications to, and research needs in music education.

MEMT 915. Teaching Music in Higher Education. 3 Credits.
Knowledge, skills, and dispositions for graduate students in music who are preparing to teach at the college level. This course is directed toward the end of developing competencies and understandings that will contribute to one's becoming an effective college/university teacher.

MEMT 920. Doctoral Seminar in Music Education and Music Therapy. 0-1 Credits.
This course will emphasize strategies and skills for successful completion of the doctoral program, as well as strategies and skills to prepare doctoral students to contribute to the profession as college teachers, researchers, master teachers, and arts administrators. Course may be repeated for zero credit.

MEMT 921. Seminar in Performance and Pedagogy. 3 Credits.
Repertoire, performance practice, and pedagogical and stylistic problems relating to stringed instrument music before 1800. (Same as STRG 921.)

MEMT 922. Seminar in Performance and Pedagogy. 3 Credits.
Stringed instrument repertoire from 1800 to 1875. (Same as STRG 922.)

MEMT 923. Seminar in Performance and Pedagogy. 3 Credits.
Stringed instrument repertoire from 1875 to present. (Same as STRG 923.)

MEMT 925. Seminar in: ______ 1-3 Credits.
Special topics in Music Education & Music Therapy. May be repeated for credit.

MEMT 965. Advanced Methods in Experimental and Descriptive Research in Music. 3 Credits.
An advanced study of experimental and descriptive research techniques with careful investigation of research design, experimental control, analysis and manuscript composition. Consideration of recent trends in research methods and their place in the scholarly schemata will be reviewed. Prerequisite: MEMT 812 or permission of instructor.

MEMT 972. Research in Music Education. 2-5 Credits.
For students who are sufficiently qualified to conduct original investigations in this field. Consent of instructor necessary. May be repeated for credit.

MEMT 980. Advanced Topics: ______ 1-3 Credits.
A special course of study to meet current needs of education professionals -- primarily for post-master's level students. May be repeated for credit.

MEMT 995. Field Experience in: ______ 1-5 Credits.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. May be repeated for credit.

MEMT 996. Practicum in College Teaching. 1-3 Credits.
College teaching experience, guided by a major professor in the department. Open only to doctoral aspirants or candidates.

MEMT 997. Individual Study: ______ 1-4 Credits.
May be repeated for credit. Prerequisite: Prior graduate course work in the area of study and consent of Instructor.

MEMT 998. Seminar in: ______ 1-4 Credits.
May be repeated for credit.

MEMT 999. Doctoral Dissertation. 1-15 Credits.
May be repeated for credit.

Music Courses

MTHC 105. Theory I. 3 Credits.
The first semester of a two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music. Open to all KU students. Music majors and minors should take concurrently with MTHC 106.

**MTHC 106. Aural Skills I. 1 Credits.**
The first semester of a one-year aural skills course that trains students to hear and sing the melodies, rhythms, and harmonies associated with common-practice tonal music. Must be taken concurrently with MTHC 105.

**MTHC 115. Theory II. 3 Credits.**
The second semester of a two-year theory sequence that examines the harmonic, rhythmic, and formal organization of music. Open to all KU students. Music majors and minors should take concurrently with MTHC 116. Satisfies: Goal 1 Outcome 1 (GE11). Prerequisite: MTHC 105.

**MTHC 116. Aural Skills II. 1 Credits.**
The second semester of a one-year aural skills course that trains students to hear and sing the melodies, rhythms, and harmonies associated with common-practice tonal music. Must be taken concurrently with MTHC 115. Prerequisite: MTHC 106.

**MTHC 205. Theory III. 4 Credits.**
The third semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 115 and MTHC 116.

**MTHC 252. Introduction to Composition. 2 Credits.**
Fundamentals of musical composition, including melody, rhythm, harmony, notation, and instrumentation. Students will create new works for performance. Prerequisite: MTHC 115 and MTHC 116 or permission of instructor.

**MTHC 253. Composition. 2 Credits.**
For music theory and composition majors. Creative writing using basic concepts in harmony, melody, and form. May be repeated for credit. Prerequisite: MTHC 115 and MTHC 116 or permission of instructor.

**MTHC 301. Music Videos. 3 Credits.**
The analysis of music videos from 1981-present.

**MTHC 302. How to Make Music. 3 Credits.**
An introduction to techniques for composing Western music in various styles. Designed for students with little or no prior training in music. May not contribute to major requirements for School of Music students.

**MTHC 303. Writing Music for Guitar. 3 Credits.**
Fundamentals of guitar technique and writing for the instrument, using in-class workshops to focus on composition assignments for guitar. No musical experience is required and players of all levels are welcome to take the course. Students must supply their own guitar.

**MTHC 315. Theory IV. 4 Credits.**
The fourth semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Includes study of musical forms from the common practice period and analytical techniques for post-tonal music. Prerequisite: MTHC 205.

**MTHC 316. Tonal Form and Post-Tonal Techniques. 4 Credits.**
A study of musical forms from the common practice period through the present day and analytical techniques for post-tonal music. The class is designed for music education and music therapy majors. Prerequisite: MTHC 205, music education, or music therapy major.

**MTHC 355. Readings in Music Theory: ______. 1-4 Credits.**
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: Consent of instructor.

**MTHC 400. Graduate Review: Written Theory. 1 Credits.**
A review of basic harmonic and voice-leading principles relevant to the common-practice period. For graduate students deficient in undergraduate harmonic theory.

**MTHC 402. Graduate Review: Aural Skills. 1 Credits.**
A review ofaural and sight-reading skills relevant to the common-practice period. For graduate students deficient in undergraduate aural theory.

**MTHC 404. Graduate Review: Form. 1 Credits.**
A review of basic forms relevant to the common-practice period. For graduate students deficient in undergraduate form.

**MTHC 406. Graduate Review: Post-Tonal Music. 1 Credits.**
A review of basic theories and techniques relevant for understanding post-tonal music. For graduate students deficient in undergraduate post-tonal theory.

**MTHC 410. Form and Analysis. 3 Credits.**
Analysis of the formal designs of movement-length forms from the Baroque to the present day with an emphasis on performance and interpretation. Prerequisite: MTHC 315.

**MTHC 432. Introduction to the Analysis Contemporary Music. 3 Credits.**
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315.

**MTHC 433. Advanced Analysis of Contemporary Music. 3 Credits.**
Analysis seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 432.

**MTHC 442. Modal Counterpoint. 3 Credits.**
A study of modal counterpoint with original work and analysis. Prerequisite: MTHC 205.

**MTHC 455. Readings in Music Theory: ______. 1-4 Credits.**
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor.

**MTHC 460. Choral Arranging and Composition. 3 Credits.**
Introduction to arranging and composing for choruses of various genres, ages and abilities. Prerequisite: MTHC 315.

**MTHC 463. Survey in Jazz Composition and Arranging. 3 Credits.**
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the "Big Band Era") and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required.

**MTHC 470. Seminar in New Art Song. 3 Credits.**
Collaborative workshop for composers, singers, and collaborative pianists. Collaborative performance and analysis of recent art song. Collaborative composition and performance of new art song. Prerequisite: Consent of instructor.

**MTHC 471. Tonal Counterpoint. 3 Credits.**
A study of tonal counterpoint with original work and analysis. Prerequisite: MTHC 205.

**MTHC 474. Orchestration I. 3 Credits.**
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. Prerequisite: MTHC 205.

**MTHC 476. Orchestration II. 3 Credits.**
A continuation of MTHC 474. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 474.

**MTHC 477. Electro-Acoustic Composition I. 3 Credits.**
Survey of concepts and practices of electronic sound synthesis. Required of music theory and composition majors, and open to other music majors by consent of department. Prerequisite: MTHC 315.

**MTHC 480. Electro-Acoustic Composition II. 3 Credits.**
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 477.

**MTHC 498. Undergraduate Recital. 1 Credits.**
Composition recital for undergraduate music composition majors. Prerequisite: Permission of instructor.

**MTHC 499. Senior Research Project. 1-4 Credits.**
For seniors majoring in music theory who will normally enroll for two credits in each of the last two semesters. Students will write a scholarly paper on an approved topic. May be repeated for credit.

**MTHC 541. Eighteenth-Century Counterpoint. 3 Credits.**
A study of eighteenth century style with analysis and original work. Prerequisite: MTHC 205.

**MTHC 542. Sixteenth-Century Counterpoint. 3 Credits.**
A study of sixteenth-century style with analysis and original work. Prerequisite: MTHC 205.

**MTHC 563. Survey in Jazz Composition and Arranging. 3 Credits.**
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the "Big Band Era") and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required.

**MTHC 583. Composition. 2 Credits.**
Advanced composition including larger forms in a variety of media. Composition majors will present a public recital of original works during the fourth semester of enrollment. May be repeated for credit. Prerequisite: MTHC 253 or consent of instructor.

**MTHC 643. Contemporary Repertoire. 3 Credits.**
Comprehensive overview of major composers and works of the past beginning in the mid 20th Century, but focusing on music written in the last 40 years, major contemporary ensembles and granting organizations. Prerequisite: Graduate standing in MTHC or permission of instructor.

**MTHC 655. Readings in Music Theory: _____. 1-4 Credits.**
Investigation of a subject by means of directed readings of primary scholarly sources. For Graduate students. May be repeated for credit. Prerequisite: Consent of instructor.

**MTHC 670. Seminar in New Art Song. 3 Credits.**
Collaborative workshop for composers, singers, and collaborative pianists. Collaborative performance and analysis of recent art song. Collaborative composition and performance of new art song. Prerequisite: Consent of instructor.

**MTHC 674. Orchestration I. 3 Credits.**
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. Prerequisite: MTHC 205.

**MTHC 676. Orchestration II. 3 Credits.**
A continuation of MTHC 674. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 674.

**MTHC 678. Electro-Acoustic Composition I. 3 Credits.**
Survey of concepts and practices of electronic sound synthesis. Required of music theory and composition majors, and open to other music majors by consent of department. Prerequisite: MTHC 315 or MTHC 316.

**MTHC 680. Electro-Acoustic Composition II. 3 Credits.**
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 678 and consent of division.

**MTHC 701. Music Videos. 3 Credits.**
The analysis of music videos from 1981-present.

**MTHC 732. Introduction to the Analysis of Contemporary Music. 3 Credits.**
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315 or MTHC 316.

**MTHC 733. Advanced Analysis of Contemporary Music. 3 Credits.**
Analytical seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 732.

**MTHC 742. Modal Counterpoint. 3 Credits.**
A study of modal counterpoint with original work and analysis.

**MTHC 743. Contemporary Repertoire. 3 Credits.**
Comprehensive overview of major composers and works of the past beginning in the mid 20th Century, but focusing on music written in the last 40 years, major contemporary ensembles and granting organizations. Prerequisite: Graduate standing in MTHC or permission of instructor.

**MTHC 755. Readings in Music Theory: _____. 1-4 Credits.**
Investigation of a subject by means of directed readings of primary scholarly sources. For Graduate students. May be repeated for credit. Prerequisite: Consent of instructor.

**MTHC 760. Choral Arranging and Composition. 3 Credits.**
Introduction to arranging and composing for choruses of various genres, ages and abilities. Prerequisite: MTHC 315, graduate standing in MTHC, or permission of instructor.

**MTHC 763. Survey in Jazz Composition and Arranging. 3 Credits.**
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the "Big Band Era") and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required.

**MTHC 770. Seminar in New Art Song. 3 Credits.**
Collaborative workshop for composers, singers, and collaborative pianists. Collaborative performance and analysis of recent art song. Collaborative composition and performance of new art song. Prerequisite: Consent of instructor.
MTHC 771. Tonal Counterpoint. 3 Credits.
A study of tonal counterpoint with original work and analysis.

MTHC 774. Orchestration I. 3 Credits.
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra.

MTHC 776. Orchestration II. 3 Credits.
A continuation of MTHC 774. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 774.

MTHC 777. Electro-Acoustic Composition I. 3 Credits.
Survey of concepts and practices of electronic sound synthesis. For music theory and composition majors, open to other music majors by consent of department.

MTHC 778. History of Music Theory. 3 Credits.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MUSC 778.)

MTHC 780. Electro-Acoustic Composition II. 3 Credits.
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 777 and consent of division.

MTHC 789. Seminar on Selected Topics: _____ 0.5-3 Credits.
Topics vary by semester. May be repeated for credit.

MTHC 801. Advanced Analysis I. 3 Credits.
A bibliographic survey intended to explore aspects of both structure (rhythm, texture and timbre) and methodology (semiotics, gesture and cognition) that variously complement the pitch-based approaches to musical interpretation associated with Schoenbergian tonal analysis and pitch-class theory. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor.

MTHC 802. Advanced Analysis II. 3 Credits.
A bibliographic survey intended to explore in depth the pitch grammars developed by composers of Western Art Music since circa 1910, and the various methodologies assembled to codify them. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor.

MTHC 820. Seminar in Schenkerian Analysis. 3 Credits.
A study of the theories and analytical methodologies developed by the Austrian theorist Heinrich Schenker. Prerequisite: MTHC 410 or permission of the instructor.

MTHC 830. Pedagogy of Music Theory. 1-3 Credits.
Procedures for teaching theoretical concepts and skills. Survey of available texts and related materials. Three credits when offered during a full academic term; one-two credits when offered as a short-term institute. Prerequisite: MTHC 315 or MTHC 316 or permission of instructor.

MTHC 840. Pedagogy of Music Composition. 3 Credits.
This course provides an overview of pedagogical philosophies in music composition and is designed to prepare students for a teaching position in higher education. The course emphasizes broad critical understanding of historic, aesthetic, and theoretical perspectives pertinent to the field of composition pedagogy. Teaching methodologies are explored for one-on-one studio instruction, group lesson instruction, masterclass, and classroom instruction. Prerequisite: Consent of instructor.

MTHC 853. Advanced Composition. 1-6 Credits.
Essentially for theory and composition majors on the master's level. May be repeated for credit. Summer session limit one to three hours.

MTHC 877. Advanced Orchestration. 3 Credits.
Prerequisite: MTHC 776, or consent of department. May be repeated for credit.

MTHC 898. Recital. 1 Credits.
Recorded grade for MM Composition recital.

MTHC 899. Thesis. 1-6 Credits.
May be repeated for credit.

MTHC 953. Advanced Composition. 1-6 Credits.
Essentially for theory and composition majors on the doctoral level. May be repeated for credit. Summer session limit one to three hours.

MTHC 965. Doctoral Composition Recital. 2 Credits.
May be repeated for credit.

MTHC 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

MTHC 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

MTHC 999. Dissertation. 1-12 Credits.
May be repeated for credit.

Music Courses

MUS 100. Directed Study: _____. 1-4 Credits.
This is an all-purpose fill in the blank course for freshmen and sophomores. It can be used when need arises. May be repeated for credit.

MUS 177. First Year Seminar: _____. 3 Credits.
A limited-enrollment seminar course for first-time freshmen, organized around current issues in music. Course designed to meet the critical thinking learning outcome of the KU Core. May not contribute to major requirements for School of Music students. First year seminar topics are coordinated and approved by the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

MUS 300. Directed Studies: _____. 1-4 Credits.
This is an all-purpose fill in the blank course for juniors and seniors. It can be used when need arises. May be repeated for credit.

MUS 388. Curriculum and Pedagogy in: _____. 1 Credits.
Independent study. Prerequisite: Permission of Instructor.

MUS 481. Introduction to Music Recording. 3 Credits.
This is designed to provide foundational understanding and experiences in the technologies and techniques of music recording. The intent of the course is to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to record, edit, and produce music recordings, either in a commercial studio or a home studio.

MUS 483. Advanced Music Recording. 3 Credits.
This builds on the fundamentals covered in MUS 481 Intro to Music Recording. Industry specific techniques are covered. The primary focus is to expand the skills learned in the introduction course and apply them in a more in-depth manner. Prerequisite: MUS 481.

MUS 485. Practicum in Audio Recording. 3 Credits.
In this course the concepts and techniques learned in MUS 481 Intro to Music Recording and MUS 483 Advanced Music Recording to use in a commercial industry setting. Prerequisite: MUS 481 and MUS 483.
MUS 586. The Business of Music. 3 Credits.
A course covering commercial aspects of the music business, including publishing, copyright law, recording, live performance, the motion picture and radio business, composition, teaching, and music merchandising.

MUS 587. Entrepreneurship and Outreach. 3 Credits.
An expansion of knowledge of current entrepreneurship trends and approaches to arts management. Prerequisite: MUS 586. Open only to junior, senior, and graduate students.

MUS 588. Arts Management. 3 Credits.
A comprehensive overview of the arts management field. Prerequisite: MUS 586. Open only to junior, senior, and graduate students.

MUS 781. Introduction to Music Recording. 3 Credits.
Introduction to Music Recording is designed to provide foundational understanding and experiences in the technologies and techniques of music recording. The intent of the course is to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to record, edit, and produce music recordings, either in a commercial studio or a home studio.

MUS 783. Advanced Music Recording. 3 Credits.
This builds on the fundamentals covered in MUS 781 Intro to Music Recording. Industry-specific techniques are covered. The primary focus is to expand the skills learned in the introduction course and apply them in a more in-depth manner. Prerequisite: MUS 781.

MUS 785. Practicum in Audio Recording. 3 Credits.
In this course, the concepts and techniques learned in MUS 781 Intro to Music Recording and MUS 783 Advanced Music Recording will be used in a commercial industry setting. Prerequisite: MUS 781 and MUS 783.

MUS 800. Directed Study: ______. 1-4 Credits.
This is an all-purpose fill in the blank course for graduate students. It can be used when need arises. May be repeated for credit.

MUS 888. Curriculum and Pedagogy in: ______. 1 Credit.
Independent study. Prerequisite: Permission of instructor.

Music Courses

MUSC 135. Understanding Music. 3 Credits.
Honors version of MUSC 136/MUSC 336. Open only to students in the University Honors Program or by permission of instructor. Designed to aid non-music majors in developing skills needed for listening to music. Emphasis on masterworks of Western music. A student may receive credit for only one of the four courses numbers: MUSC 135, MUSC 335, MUSC 136, MUSC 336.

MUSC 136. Understanding Music. 3 Credits. HT H
Designed to aid non-music majors in developing skills needed for listening to and understanding music. Main emphasis on Western classical music, though other musical traditions are discussed. A student may receive credit in either MUSC 136 or MUSC 336, but not both. Satisfies: Goal 3 Arts and Humanities (GE3H), H Humanities (H), HT Historical Studies PC (HT).

MUSC 254. Collegium Musicum, Vocal. 0-1 Credits.
May be repeated for credit. (Same as CHOR 254.) Prerequisite: Permission of instructor.

MUSC 256. Collegium Musicum, Instrumental. 0-1 Credits.
May be repeated for credit. Prerequisite: Permission of instructor.

MUSC 298. Introduction to Jazz. 3 Credits. HT H/W
A survey of the history of jazz from its beginnings in the early twentieth century to the present. Open to music and non-music majors.

MUSC 302. The Broadway Musical. 3 Credits. H
A survey of the Broadway Musical from the early twentieth century to the present.

MUSC 309. History of Rock and Roll. 3 Credits. H
Survey of the history of rock and roll, starting with its origins in rhythm and blues and continuing to the present day. Open to both majors and non-majors.

MUSC 310. History of Film Music. 3 Credits. HT
A survey course for non-majors on the history of film music from silent films to the present. Students will use written texts, website materials such as streaming video and audio, and regular screening in an auditorium setting for assignments and papers.

MUSC 314. Exploring Hip Hop and Intersections in American Culture. 3 Credits.
Exploring Hip Hop & Intersections in American Culture. This course examines the multicultural origins of hip hop and how this small, African American Bronx-based subculture expanded into one of the most influential styles of music in the world. The course will begin by analyzing the cultural conditions out of which hip hop arose in the mid-1970s; from there it will turn to examining how hip hop music, over the last forty years, has sounded the identity of its creators. This includes critical analysis of music and lyrics, as well as musical production practices.

MUSC 315. History of Country Music. 3 Credits.
Study of country music in the U.S. from the early 1920's to the present, including performers, styles, historical context, and technology.

MUSC 318. Drumming Cultures of the World. 3 Credits.
Survey of drumming styles and its influence on culture, history, aesthetics, and beliefs from around the world (West Africa, the Caribbean, South America, East Asia, South Asia, the Middle East, Europe and North America). Includes evolution of the drum set and the global hip hop phenomenon. The main goal of this course is to learn about how these varied musical styles are interconnected. Open to all majors.

MUSC 320. Music History I. 3 Credits.
An introduction to music as an academic discipline, the fields of musicology and ethnomusicology, and a survey of representative world music cultures. Prerequisite: One year of music theory.

MUSC 335. Understanding Music - Study Abroad. 3 Credits.
A study abroad class in which students will develop skills in listening to music and placing that music into its cultural context with examples drawn from the Western repertories associated with the places to where the class will travel during the winter interterm, returning just before the spring semester begins. Not open to students with credit in: MUSC 135, MUSC 136, or MUSC 336.

MUSC 336. Understanding Music. 3 Credits. HT H
Designed to aid non-music majors in developing skills needed for listening to and understanding music. Main emphasis on Western classical music, though other musical traditions are discussed. A student may receive credit in either MUSC 136 or MUSC 336, but not both. Satisfies: Goal 3 Arts and Humanities (GE3H), H Humanities (H), HT Historical Studies PC (HT).

MUSC 337. Selected Topic in Music: ______. 1-3 Credits. HT H
A selected topic in music or an interdisciplinary topic in the fine arts. The course may be repeated for credit when topic varies. Open only to non-music majors.

MUSC 340. Music History II. 3 Credits.
A survey of major developments in Western music and its social, cultural, and political contexts from Antiquity to 1750. Prerequisite: MUSC 320.

MUSC 408. Music in East Asia. 3 Credits.
Survey of selected East Asian forms of musical theater and classical, popular, and traditional musics, with emphasis on historical, stylistic, and cultural considerations. Open to all KU students. (Same as EALC 408.)

**MUSC 436. Collegium Musicum, Instrumental. 0-1 Credits.** May be repeated for credit. Prerequisite: Permission of instructor.

**MUSC 440. Music History III. 3 Credits.**
A survey of major developments in Western music and its social, cultural, and political contexts from 1750 to the present. Prerequisite: MUSC 340.

**MUSC 450. Selected Topics in Music: ______. 0.5-3 Credits.** Varies based on the topic. Prerequisite: MUSC 320, MUSC 340, MUSC 440, and MUSC 480 or permission of instructor.

**MUSC 470. Music in World Cultures. 3 Credits. NW W**
An introduction to classical, folk, and popular musics and traditions of selected regions of the world, with emphasis on aural analysis and cultural considerations. Open to all KU students.

**MUSC 471. Music of Latin America. 3 Credits. H**
Survey of selected musics and traditions of Latin America and the Caribbean, with emphasis on historical, stylistic, and cultural considerations. Open to all KU students.

**MUSC 474. Graduate Review: Medieval. 1 Credits.**
A review of the practice of Western art music composed between c. 437 and 1420. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students.

**MUSC 475. Graduate Review: Renaissance. 1 Credits.**
A review of the practice of Western art music composed between c. 1420 and 1600. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students.

**MUSC 476. Graduate Review: Baroque. 1 Credits.**
A review of the practice of Western art music composed between c. 1600 and 1750. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students.

**MUSC 477. Graduate Review: Classic. 1 Credits.**
A review of the practice of Western art music composed between c. 1750 and 1815. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students.

**MUSC 478. Graduate Review: Romantic. 1 Credits.**
A review of the practice of Western art music composed between c. 1815 and 1900. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students.

**MUSC 479. Graduate Review: 20th-21st Centuries. 1 Credits.**
A review of the practice of Western art music composed between c. 1900 and the present day. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers.

This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students.

**MUSC 480. Music History IV. 3 Credits.**
A survey of music of the United States from the colonial period to the present, including classical and vernacular styles. Prerequisite: MUSC 440.

**MUSC 481. Music of the Middle Ages. 3 Credits.**
A concentrated survey of Western music from about 500 to 1400. Prerequisite: MUSC 320.

**MUSC 482. Music of the Renaissance. 3 Credits.**
A concentrated survey of Western music from about 1400 to 1600. Prerequisite: MUSC 340.

**MUSC 483. Music of the Baroque Era. 3 Credits.**
A concentrated survey of Western music from about 1600 1750. Prerequisite: MUSC 340 and MUSC 440.

**MUSC 484. Music of the Classical Era. 3 Credits.**
A concentrated survey of Western music from 1750 to 1815. Prerequisite: MUSC 440.

**MUSC 485. Music of the Romantic Era. 3 Credits.**
A concentrated survey of Western music from about 1815 to 1900. Prerequisite: MUSC 440 and MUSC 480.

**MUSC 486. Music of the Twentieth Century. 3 Credits.**
A concentrated survey of Western music during the twentieth century. Prerequisite: MUSC 480.

**MUSC 487. Music in America. 3 Credits.**
A concentrated survey of music in the United States. Prerequisite: One course in the field of musicology or permission of the instructor.

**MUSC 488. History of Opera. 3 Credits.**
A concentrated survey of the history of opera. Prerequisite: MUSC 340, MUSC 440, and MUSC 480.

**MUSC 491. History of the Symphony. 3 Credits.**
A concentrated survey of the history of the symphony. Prerequisite: MUSC 440 and MUSC 480.

**MUSC 492. History of Wind Band Music. 3 Credits.**
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440 and MUSC 480 or permission of the instructor.

**MUSC 494. Readings in Musicology: ______. 1-3 Credits.**
May be repeated for credit. Prerequisite: Minimum average of B in MUSC 320, MUSC 340, MUSC 440, MUSC 480 or equivalent, and permission of instructor.

**MUSC 499. Senior Thesis. 2 Credits.**
An original research project that will result in a scholarly paper of moderate size. May be repeated once for credit.

**MUSC 560. Music in World Cultures. 3 Credits. NW W**
An introduction to music as part of the cultural experience in India, Southeast Asia, the Orient, and Africa, with comparisons to Western traditions and influences on contemporary music.

**MUSC 650. Selected Topics in Music: ______. 0.5-3 Credits.**
Prerequisite: MUSC 320, MUSC 340, MUSC 440, and MUSC 480 or permission of instructor.

**MUSC 654. Collegium Musicum, Vocal. 0-1 Credits.**
May be repeated for credit. (Same as CHOR 654.) Prerequisite: Permission of instructor.

**MUSC 656. Collegium Musicum, Instrumental. 0-1 Credits.**
May be repeated for credit. Prerequisite: Permission of instructor.

**MUSC 708. Music in East Asia. 3 Credits.**
Survey of selected East Asian forms of musical theater and classical, popular, and traditional musics, with emphasis on historical, stylistic, and cultural considerations. Open to all KU students.

**MUSC 736. Collegium Musicum, Instrumental. 0-1 Credits.**
May be repeated for credit. Prerequisite: Permission of instructor.

**MUSC 750. Selected Topics in Music: _____ 0.5-3 Credits.**
May be repeated for credit. Prerequisite: Graduate standing or permission of instructor.

**MUSC 752. Music of the Middle Ages. 3 Credits.**
Prerequisite: MUSC 320.

**MUSC 753. Music of the Renaissance. 3 Credits.**
Prerequisite: MUSC 340.

**MUSC 754. Music of the Baroque Era. 3 Credits.**
Prerequisite: MUSC 340 and MUSC 440.

**MUSC 755. Music of the Classical Era. 3 Credits.**
Prerequisite: MUSC 440.

**MUSC 756. Music of the Romantic Era. 3 Credits.**
Prerequisite: MUSC 440 and MUSC 480.

**MUSC 757. Music of the Twentieth Century. 3 Credits.**
Prerequisite: MUSC 480.

**MUSC 759. Music in America. 3 Credits.**
A survey of historical developments from the Pilgrims to the present. (Same as AMS 737.) Prerequisite: One course in the field of music history or permission of the instructor.

**MUSC 760. History of Opera. 3 Credits.**
Prerequisite: MUSC 340, MUSC 440, and MUSC 480.

**MUSC 767. History of the Symphony. 3 Credits.**
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor.

**MUSC 768. History of Wind Band Music. 3 Credits.**
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440, MUSC 480, or permission of instructor.

**MUSC 770. Music in World Cultures. 3 Credits.**
An introduction to classical, folk, and popular musics and traditions of selected regions of the world, with emphasis on aural analysis and cultural considerations. Open to all KU students.

**MUSC 771. Latin American Music. 3 Credits.**
Survey of selected musics and traditions of Latin America and the Caribbean, with emphasis on historical, stylistic, and cultural considerations. Open to all KU students.

**MUSC 777. History of Music Theory. 3 Credits.**
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MTHC 777.)

**MUSC 794. Readings in Musicology: _____ 1-3 Credits.**
Investigation of a subject by means of directed reading of primary literary sources. May be repeated for credit. Prerequisite: A grade average of "B" in two musicology courses numbered 500 or above and consent of instructor.

**MUSC 801. Music Bibliography and Research. 3 Credits.**
Bibliography, research methods, and scholarly writing in music for entering graduate students. Prerequisite: Permission of instructor.

**MUSC 899. Thesis. 1-6 Credits.**
May be repeated for credit.

**MUSC 902. Seminar in Musicology. 3 Credits.**
A research course designed primarily for doctoral students in musicology. Prerequisite: MUSC 801, or its equivalent.

**MUSC 903. Seminar in Performance Practices. 3 Credits.**
Primary and secondary sources in performance practices dealing mainly with the seventeenth through nineteenth centuries, with implications applicable to student's performance medium.

**MUSC 940. Seminar on Selected Topics in Musicology: _____ 3 Credits.**
Each semester a topic (to be inserted in the blank) will be the basis for discussion, reports, and a research paper. May be repeated for credit provided no course duplication takes place.

**MUSC 970. D.M.A. Lecture-Recital. 1-4 Credits.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

**MUSC 972. D.M.A. Document. 1-4 Credits.**
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**MUSC 999. Dissertation. 1-12 Credits.**
May be repeated for credit.

### Music Courses

**OBOE 100. Oboe. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**OBOE 101. Oboe Reed Making. 0-1 Credits.**
The principles of oboe reed making, including tube cane selection, pre-gouging, gouging, shaping, tying and scraping reeds. Knife sharpening and tool maintenance will also be covered. Open only to freshmen and sophomores. May be repeated for credit.

**OBOE 121. Oboe. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**OBOE 221. Oboe. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**OBOE 300. Oboe. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**OBOE 301. Oboe Reed Making. 0-1 Credits.**
The principles of oboe reed making, including tube cane selection, pre-gouging, gouging, shaping, tying and scraping reeds. Knife sharpening and tool maintenance will also be covered. Open only to juniors and seniors. May be repeated for credit.

**OBOE 321. Oboe. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**OBOE 421. Oboe. 1-2 Credits.**
Music Courses

**ORCH 200. University Symphony Orchestra. 0-1 Credits.**
For freshmen and sophomores. Four hours full rehearsal and one hour sectional (string only) rehearsal each week throughout the school year. An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester and numerous out-of-town concerts, radio broadcasts, and local vespers performances. Acceptance for membership and playing positions is determined by tryout. May be repeated for credit.

**ORCH 400. Symphony Orchestra. 0-1 Credits.**
An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester as well as out-of-town concerts, radio broadcasts, and local vespers performances. Acceptance for membership and playing positions is determined by audition. May be repeated for credit.

**ORCH 406. University Orchestra. 0-1 Credits.**
For undergraduate students. Open to all students without audition. This chamber organization performs on campus as well as locally. The orchestra studies and performs music from the standard orchestral repertoire, along with lighter, popular works. May be repeated for credit.

**ORCH 600. University Symphony Orchestra. 0-1 Credits.**
For juniors, seniors, and graduate students. May be repeated for credit.

**ORCH 700. Symphony Orchestra. 0-1 Credits.**
An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester as well as out-of-town concerts, radio broadcasts, and local vespers performances. Acceptance for membership and playing positions is determined by audition. For graduate students. May be repeated for credit.

**ORCH 701. Workshop in: ______. 0.5-3 Credits.**
May be repeated for credit.

**ORCH 706. University Orchestra. 0-1 Credits.**
For graduate students. This chamber organization performs on campus as well as locally. The orchestra studies and performs music from the standard orchestral repertoire, along with lighter, popular works. May be repeated for credits.

Music Courses

**ORGN 100. Organ. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**ORGN 121. Organ. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**ORGN 221. Organ. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**ORGN 300. Organ. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**ORGN 320. Studio Class in Organ - Lab. 0 Credits.**
Studio performance of works prepared under individual instruction. May be repeated.

**ORGN 321. Organ. 1-2 Credits.**

---

Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**OBOE 422. Oboe. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**OBOE 622. Oboe. 2-4 Credits.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

**OBOE 623. Senior Recital. 1 Credits.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: OBOE 622.

**OBOE 711. Oboe. 1-3 Credits.**
For graduate students not majoring in oboe. Audition required. May be repeated for credit.

**OBOE 799. Artist Certificate Recital. 1 Credits.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**OBOE 810. Elective Master's Recital. 1 Credits.**
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in OBOE 811.

**OBOE 811. Oboe. 3-4 Credits.**
For graduate students majoring in oboe. May be repeated for credit. Summer session limit three hours.

**OBOE 899. Master's Recital. 1 Credits.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: OBOE 811.

**OBOE 921. Seminar in Performance. 3 Credits.**
A study of repertoire and performance practice relating to the baroque oboe during the seventeenth and eighteenth centuries.

**OBOE 922. Seminar in Performance. 3 Credits.**
A study of repertoire and extended performance techniques of the twentieth century.

**OBOE 961. Directed Performance. 3-4 Credits.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in oboe. May be repeated for credit. Summer session limit three hours.

**OBOE 965. Doctoral Recitals. 1-3 Credits.**
Maximum seven hours credit. May be repeated for credit.

**OBOE 970. D.M.A. Lecture-Recital. 1-4 Credits.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Summer session limit one to three credits. Prerequisite: Consent of instructor.

**OBOE 972. D.M.A. Document. 1-4 Credits.**
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**ORGN 402.** Master Class in Organ - Lab. 0 Credits.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated.

**ORGN 421.** Organ. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**ORGN 422.** Organ. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**ORGN 502.** Master Class in Organ - Lab. 0 Credits.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated.

**ORGN 608.** Organ Pedagogy. 2 Credits.
For seniors and graduate students majoring in organ or by permission of instructor. May be repeated for credit. Materials and methods of pedagogy. Lectures, discussion, demonstration teaching, planning, and evaluation. One beginning or lower level organ student assigned to each class member with teaching done under supervision of class instructor.

**ORGN 622.** Organ. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

**ORGN 623.** Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: ORGN 622.

**ORGN 702.** Master Class in Organ - Lab. 0 Credits.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated.

**ORGN 711.** Organ. 1-3 Credits.
For graduate students not majoring in organ. Audition required. May be repeated for credit.

**ORGN 720.** Studio Class in Organ-Lab. 0 Credits.
Studio performance of works prepared under individual instruction. May be repeated for credit.

**ORGN 799.** Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**ORGN 800.** Organ Building and Design. 3 Credits.
Acoustics; design, construction, and maintenance of organs; organ consulting, examination of organs.

**ORGN 801.** History of Organ Literature and Organ Design I. 3 Credits.
Organ literature and organ design from the Middle Ages, the Renaissance, and the Spanish, Italian, and English Baroque.

**ORGN 802.** History of Organ Literature and Organ Design II. 3 Credits.
Organ literature and organ design in the Dutch and German Baroque with special emphasis on J.S. Bach. Prerequisite: Permission of instructor.

**ORGN 803.** History of Organ Literature and Organ Design III. 3 Credits.
French organ literature and organ design from the 17th century to the present.

**ORGN 804.** History of Organ Literature and Organ Design IV. 3 Credits.
German, North American, British, Scandinavian and Eastern European organ literature and organ design from the Classic era to the present. Prerequisite: Permission of instructor.

**ORGN 805.** Selected Topics in Organ. 1-3 Credits.
An exploration of selected topics in organ design and literature. Topics change by semester. May be repeated for credit.

**ORGN 806.** Organ Pedagogy. 3 Credits.
Philosophy, methods, and materials of organ pedagogy. Prerequisite: Permission of instructor.

**ORGN 807.** Organ Study Tour. 1-3 Credits.
Study of European or North American organs through reading and site visits to instruments.

**ORGN 811.** Organ. 3-4 Credits.
For graduate students majoring in organ. May be repeated for credit. Summer session limit three hours.

**ORGN 899.** Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: ORGN 811.

**ORGN 921.** Seminar in Performance: _____ 3 Credits.
A detailed study of organ repertoire, performance practice, the history of organ building as it affects the performance of a particular body of literature, liturgical or other extra-musical contexts, and other influences on musical style. May be repeated for credit when topics vary.

**ORGN 961.** Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. program in organ. May be repeated for credit. Summer session limit three hours.

**ORGN 965.** Doctoral Recitals. 0-1 Credits.
Maximum credit, seven hours. May be repeated for credit.

**ORGN 970.** D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

**ORGN 972.** D.M.A. Document. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**Music Courses**

**PCUS 100.** Percussion. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**PCUS 121.** Percussion. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**PCUS 221.** Percussion. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

PCUS 300. Percussion. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

PCUS 321. Percussion. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

PCUS 421. Percussion. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

PCUS 422. Percussion. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

PCUS 622. Percussion. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

PCUS 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: PCUS 622.

PCUS 711. Percussion. 1-3 Credits.
For graduate students not majoring in percussion. Audition required. May be repeated for credit.

PCUS 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

PCUS 810. Elective Master's Recital. 1 Credits.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in PCUS 811.

PCUS 811. Percussion. 3-4 Credits.
For graduate students majoring in percussion. May be repeated for credit. Summer session limit three credits.

PCUS 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: PCUS 811.

PCUS 921. Seminar in Performance and Pedagogy. 3 Credits.
A study of the interpretive problems encountered in percussion music from the various historical periods, and a study of the performance practices in orchestral, band, chamber ensemble, and solo literature.

PCUS 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in percussion. May be repeated for credit. Summer session limit three hours.

PCUS 965. Doctoral Recitals. 1-3 Credits.
May be repeated for credit.

PCUS 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

PCUS 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

PENS 252. Percussion Ensemble. 0-1 Credits.
For freshmen and sophomores. Study and performance of works for various percussion instrument combinations. May be repeated for credit.

PENS 652. Percussion Ensemble. 0-1 Credits.
For juniors, seniors, and graduate students. Study and performance of works for various percussion instrument combinations. May be repeated for credit.

Music Courses

PIAN 100. Piano. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

PIAN 111. Elementary Keyboard Musicianship. 2 Credits.
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all students not majoring in music who have little or no music training.

PIAN 121. Piano. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

PIAN 144. Elementary Keyboard Skills I. 1 Credits.
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all music majors with little or no piano background.

PIAN 148. Elementary Keyboard Skills II. 1 Credits.
A continuation of PIAN 144.

PIAN 216. Chamber Music for Pianists. 1-2 Credits.
For freshmen and sophomores majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit.

PIAN 221. Piano. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

PIAN 229. Performance Class in Accompanying. 1 Credits.
A class in the performance of vocal and instrumental accompaniment. Prerequisite: May be repeated for credit.

PIAN 237. Accompanying for Dance. 1-3 Credits.
Instruction in dance accompanying. Open to freshman and sophomore pianists with permission of instructor.

PIAN 284. Intermediate Keyboard Skills I. 2 Credits.
Continuation of PIAN 148. Prerequisite: Permission of instructor.

PIAN 288. Intermediate Keyboard Skills II. 2 Credits.
Continuation of PIAN 284. Prerequisite: Permission of instructor.

PIAN 300. Piano. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**PIAN 310. Advanced Keyboard Skills. 2 Credits.**
The development of functional keyboard skills in sight reading, transposition, harmonization, improvisation, score reading, and playing by ear. Prerequisite: MTHC 115 or permission of instructor.

**PIAN 321. Piano. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**PIAN 336. Chamber Music for Pianists. 1-2 Credits.**
For juniors and seniors majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit.

**PIAN 421. Piano. 1-2 Credits.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**PIAN 422. Piano. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**PIAN 429. Performance Class Accompanying. 1 Credits.**
A class in the performance of vocal and instrumental accompaniment. May be repeated for credit.

**PIAN 437. Accompanying for Dance. 1-3 Credits.**
Instruction in dance accompanying. Open to junior and senior pianists with permission of instructor.

**PIAN 443. Piano Repertoire I. 3 Credits.**
Study and analysis of keyboard repertoire from its beginning through the Classical period.

**PIAN 444. Piano Repertoire II. 3 Credits.**
Study and analysis of keyboard repertoire of the Romantic and Modern periods.

**PIAN 447. Contemporary Piano Literature. 3 Credits.**
The study of piano literature focusing on music of mid-century modernists through the present day. Prerequisite: PIAN 443 and PIAN 444 or instructor permission.

**PIAN 448. The Contemporary Pianist. 3 Credits.**
Discover and perfect all of the tools required to become a successful pianist in the 21st Century by learning from the examples of the great pianists of yesterday and today. Prerequisite: PIAN 443 and PIAN 444 or instructor permission.

**PIAN 522. Piano Technology I. 1 Credit.**
An introduction to the principles of design, theory of operation, maintenance, and tuning of the piano. Lecture and laboratory. Open to junior, senior, and graduate students.

**PIAN 523. Piano Technology II. 1 Credit.**
A continuation of PIAN 522. Piano Technology I. Application of principles of design, theory of operation, maintenance, and tuning of the piano. Prerequisite: PIAN 522.

**PIAN 540. Piano Pedagogy I. 2-3 Credits.**
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: Permission of instructor.

**PIAN 546. Piano Pedagogy II. 2-3 Credits.**
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: PIAN 540 or permission of instructor.

**PIAN 622. Piano. 2-4 Credits.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

**PIAN 623. Senior Recital. 1 Credit.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: PIAN 622.

**PIAN 643. Piano Repertoire I. 3 Credits.**
Study and analysis of keyboard repertoire from its beginning through the Classical period.

**PIAN 644. Piano Repertoire II. 3 Credits.**
Study and analysis of keyboard repertoire of the Romantic and Modern periods.

**PIAN 646. Piano Pedagogy IV. 1-2 Credits.**
Practicum in piano instruction at the elementary to intermediate levels. Prerequisite: PIAN 640 or permission of instructor.

**PIAN 647. Contemporary Piano Literature. 3 Credits.**
The study of piano literature focusing on music of mid-century modernists through the present day. Prerequisite: PIAN 643 and PIAN 644 or instructor permission.

**PIAN 648. The Contemporary Pianist. 3 Credits.**
Discover and perfect all of the tools required to become a successful pianist in the 21st Century by learning from the examples of the great pianists of yesterday and today. Prerequisite: PIAN 643 and PIAN 644 or instructor permission.

**PIAN 711. Piano. 1-3 Credits.**
For graduate students not majoring in piano. Audition required. May be repeated for credit.

**PIAN 743. Piano Repertoire I. 3 Credits.**
Study and analysis of keyboard repertoire from its beginning through the Classical period.

**PIAN 744. Piano Repertoire II. 3 Credits.**
Study and analysis of keyboard repertoire of the Romantic and Modern periods.

**PIAN 747. Contemporary Piano Literature. 3 Credits.**
The study of piano literature focusing on music of mid-century modernists through the present day. Prerequisite: PIAN 743 and PIAN 744 or instructor permission.

**PIAN 748. The Contemporary Pianist. 3 Credits.**
Discover and perfect all of the tools required to become a successful pianist in the 21st Century by learning from the examples of the great pianists of yesterday and today. Prerequisite: PIAN 743 and PIAN 744 or instructor permission.

**PIAN 799. Artist Certificate Recital. 1 Credit.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

PIAN 811. Piano. 3-4 Credits.
For graduate students majoring in piano. May be repeated for credit. Summer session limit three hours.

PIAN 840. Advanced Piano Pedagogy I. 3 Credits.
The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels.

PIAN 846. Advanced Piano Pedagogy II. 3 Credits.
The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels. Prerequisite: PIAN 840.

PIAN 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: PIAN 811.

PIAN 921. Seminar in Performance and Pedagogy: ______. 3 Credits.
A detailed study of repertoire, performance practice, pedagogical, and stylistic problems relating to keyboard music. May be repeated for credit when topics vary.

PIAN 940. Special Projects in Piano Pedagogy. 3 Credits.
In-depth study of a student-selected topic in piano pedagogy. Prerequisite: PIAN 840 and PIAN 846.

PIAN 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in piano. May be repeated for credit. Summer session limit three hours.

PIAN 965. Doctoral Recitals. 1-3 Credits.
Maximum credit, seven hours. May be repeated for credit.

PIAN 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

PIAN 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

REC 100. Laboratory in Music Performance. 0 Credits.
This course deals with the performance of music. The goal is to increase the understanding of music and music performance through exposure to a wide variety of repertory and performance styles, mediums, techniques, and related issues. May be repeated.

Music Courses

SAXO 100. Saxophone. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

SAXO 121. Saxophone. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

SAXO 221. Saxophone. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

SAXO 300. Saxophone. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

SAXO 321. Saxophone. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

SAXO 421. Saxophone. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

SAXO 422. Saxophone. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

SAXO 622. Saxophone. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

SAXO 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: SAXO 622.

SAXO 711. Saxophone. 1-3 Credits.
For graduate students not majoring in saxophone. Audition required. May be repeated for credit.

SAXO 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

SAXO 810. Elective Master's Recital. 1 Credits.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in SAXO 811.

SAXO 811. Saxophone. 3-4 Credits.
For graduate students majoring in saxophone. May be repeated for credit. Summer session limit three hours.

SAXO 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: SAXO 811.

SAXO 921. Seminar in Performance. 3 Credits.
A study of repertoire and performance techniques from the saxophone's inception to 1950.

SAXO 922. Seminar in Performance. 3 Credits.
A study of repertoire and extended performance techniques from 1950 to the present.

SAXO 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in saxophone. May be repeated for credit. Summer session limit three hours.

SAXO 965. Doctoral Recitals. 1-3 Credits.
Maximum seven hours credit. May be repeated for credit.

**SAXO 970. D.M.A. Lecture-Recital. 1-4 Credits.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

**SAXO 972. D.M.A. Document. 1-4 Credits.**
A scholarly paper on a subject pertinent to the student's major field. Open only to the candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**Music Courses**

**STRG 424. String Pedagogy: ______. 1 Credits.**
Lectures, demonstrations, and discussions of such topics as physiological factors, style and interpretation, music editing, teaching materials and repertoire, planning, and evaluation. May be repeated for credit as instrument varies.

**STRG 921. Seminar in Performance and Pedagogy. 3 Credits.**
Repertoire, performance practice, and pedagogical and stylistic problems relating to stringed instrument music before 1800. (Same as MERM 921.)

**STRG 922. Seminar in Performance and Pedagogy. 3 Credits.**
Stringed instrument repertoire from 1800 to 1875. (Same as MERM 922.)

**STRG 923. Seminar in Performance and Pedagogy. 3 Credits.**
Stringed instrument repertoire from 1875 to present. (Same as MERM 923.)

**STRG 970. D.M.A. Lecture-Recital. 1-4 Credits.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

**STRG 972. D.M.A. Document. 1-4 Credits.**
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**Music Courses**

**TROM 100. Trombone. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**TROM 121. Trombone. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**TROM 221. Trombone. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**TROM 252. Trombone Choir. 0-1 Credits.**
For freshmen and sophomores. Study and performance of ensemble literature for the trombone. May be repeated for credit.

**TROM 300. Trombone. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**TROM 321. Trombone. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**TROM 421. Trombone. 1-2 Credits.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**TROM 422. Trombone. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**TROM 622. Trombone. 2-4 Credits.**
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trombone. May be repeated for credit.

**TROM 711. Trombone. 1-3 Credits.**
For graduate students not majoring in trombone. Audition required. May be repeated for credit.

**TROM 799. Artist Certificate Recital. 1 Credits.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**TROM 810. Elective Master's Recital. 1 Credits.**
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in TROM 811.

**TROM 811. Trombone. 3-4 Credits.**
For graduate students majoring in trombone. May be repeated for credit. Summer session limit three hours.

**TROM 899. Master's Recital. 1 Credits.**
Master's Degree Recital: The Master's Recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: TROM 811.

**TROM 961. Directed Performance. 3-4 Credits.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trombone. May be repeated for credit. Summer session limit three hours.

**TROM 965. Doctoral Recitals. 1-3 Credits.**
May be repeated for credit.

**TROM 970. D.M.A. Lecture-Recital. 1-4 Credits.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

**TROM 972. D.M.A. Document. 1-4 Credits.**
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**Music Courses**

**TRUM 100. Trumpet. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**TRUM 121. Trumpet. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**TRUM 221. Trumpet. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**TRUM 252. Trumpet Ensemble. 0-1 Credits.**
For freshmen and sophomores. Study and performance of ensemble literature for the trumpet. May be repeated for credit.

**TRUM 300. Trumpet. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**TRUM 321. Trumpet. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**TRUM 421. Trumpet. 1-2 Credits.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**TRUM 422. Trumpet. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**TRUM 622. Trumpet. 2-4 Credits.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

**TRUM 623. Senior Recital. 1 Credits.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: TRUM 622.

**TRUM 652. Trumpet Ensemble. 0-1 Credits.**
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trumpet. May be repeated for credit.

**TRUM 711. Trumpet. 1-3 Credits.**
For graduate students not majoring in trumpet. Audition required. May be repeated for credit.

**TRUM 799. Artist Certificate Recital. 1 Credits.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**TRUM 810. Elective Master's Recital. 1 Credits.**
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in TRUM 811.

**TRUM 811. Trumpet. 3-4 Credits.**
For graduate students majoring in trumpet. May be repeated for credit. Summer session limit three hours.

**TRUM 899. Master's Recital. 1 Credits.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: TRUM 811.

**TRUM 961. Directed Performance. 3-4 Credits.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trumpet. May be repeated for credit. Summer session limit three hours.

**TRUM 965. Doctoral Recitals. 1-3 Credits.**
Maximum credit, seven hours. May be repeated for credit.

**TRUM 970. D.M.A. Lecture-Recital. 1-4 Credits.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

**TRUM 972. D.M.A. Document. 1-4 Credits.**
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

**Music Courses**

**TUBA 100. Tuba. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**TUBA 121. Tuba. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**TUBA 221. Tuba. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**TUBA 300. Tuba. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**TUBA 321. Tuba. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**TUBA 421. Tuba. 1-2 Credits.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**TUBA 422. Tuba. 1-4 Credits.**
Applied music lessons for juniors and seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: Consent of instructor.

**TUBA 500. Tuba. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**TUBA 622. Tuba. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**TUBA 711. Tuba. 1-3 Credits.**
Applied music lessons for sophomores majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: Consent of instructor.
For graduate students not majoring in tuba. Audition required. May be repeated for credit.

TUBA 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

TUBA 810. Elective Master's Recital. 1 Credits.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in TUBA 811.

TUBA 811. Tuba. 3-4 Credits.
For graduate students majoring in tuba. May be repeated for credit. Summer session limit three hours.

TUBA 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: TUBA 811.

TUBA 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in tuba. May be repeated for credit. Summer session limit three hours.

TUBA 965. Doctoral Recitals. 1-3 Credits.
May be repeated for credit.

TUBA 970. D.M.A. Lecture-Recital. 1-4 Credits.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor.

TUBA 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a topic pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

TUEU 252. Tuba-Euphonium Consort. 0-1 Credits.
For freshmen and sophomores. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit.

TUEU 652. Tuba-Euphonium Consort. 0-1 Credits.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit.

Music Courses

VIOA 100. Viola. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

VIOA 121. Viola. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

VIOA 221. Viola. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

VIOA 300. Viola. 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

VIOA 321. Viola. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

VIOA 421. Viola. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

VIOA 422. Viola. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

VIOA 622. Viola. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

VIOA 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VIOA 622.

VIOA 711. Viola. 1-3 Credits.
For graduate students not majoring in viola. Audition required. May be repeated for credit.

VIOA 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

VIOA 811. Viola. 3-4 Credits.
For graduate students majoring in viola. May be repeated for credit. Summer session limit three hours.

VIOA 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VIOA 811.

VIOA 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in viola. May be repeated for credit. Summer session limit three hours.

VIOA 965. Doctoral Recitals. 1-3 Credits.
May be repeated for credit.

VIOA 972. D.M.A. Document. 1-4 Credits.
A scholarly paper on a topic pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor.

Music Courses

VION 100. Violin. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

VION 121. Violin. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

VION 221. Violin. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

VION 300. Violin. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

VION 421. Violin. 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

VION 422. Violin. 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

VION 622. Violin. 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

VION 623. Senior Recital. 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VION 622.

VION 711. Violin. 1-3 Credits.
For graduate students not majoring in violin. Audition required. May be repeated for credit.

VION 799. Artist Certificate Recital. 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

VION 811. Violin. 3-4 Credits.
For graduate students majoring in violin. May be repeated for credit. Summer session limit three hours.

VION 899. Master's Recital. 1 Credits.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VION 811.

VION 961. Directed Performance. 3-4 Credits.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violin. May be repeated for credit. Summer session limit three hours.

VION 965. Doctoral Recitals. 1-3 Credits.
May be repeated for credit to a maximum of seven hours.

Music Courses

VION 100. Violin. 1-2 Credits.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

VION 121. Violin. 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

VION 221. Violin. 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

VION 300. Violin. 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**VION 321. Violin. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**VION 421. Violin. 1-2 Credits.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**VION 422. Violin. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**VION 622. Violin. 2-4 Credits.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

**VION 623. Senior Recital. 1 Credits.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VION 622.

**VION 711. Violin. 1-3 Credits.**
For graduate students not majoring in violin. Audition required. May be repeated for credit.

**VION 799. Artist Certificate Recital. 1 Credits.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**VION 811. Violin. 3-4 Credits.**
For graduate students majoring in violin. May be repeated for credit. Summer session limit three hours.

**VION 899. Master's Recital. 1 Credits.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VION 811.

**VION 961. Directed Performance. 3-4 Credits.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violin. May be repeated for credit. Summer session limit three hours.

**VION 965. Doctoral Recitals. 1-3 Credits.**
Maximum of seven hours credit. May be repeated for credit.

**Music Courses**

**VNCL 100. Violoncello. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**VNCL 121. Violoncello. 1-4 Credits.**
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**VNCL 221. Violoncello. 1-4 Credits.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors).

**VNCL 300. Violoncello. 1-2 Credits.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**VNCL 321. Violoncello. 1-2 Credits.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**VNCL 421. Violoncello. 1-2 Credits.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**VNCL 422. Violoncello. 1-2 Credits.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**VNCL 622. Violoncello. 2-4 Credits.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels.

**VNCL 623. Senior Recital. 1 Credits.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VNCL 622.

**VNCL 711. Violoncello. 1-3 Credits.**
For graduate students not majoring in violoncello. Audition required. May be repeated for credit.

**VNCL 799. Artist Certificate Recital. 1 Credits.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**VNCL 811. Violoncello. 1 Credits.**
For graduate students majoring in violoncello. May be repeated for credit. Summer session limit three hours.

**VNCL 899. Master's Recital. 1 Credits.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VNCL 811.

**VNCL 961. Directed Performance. 3-4 Credits.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violoncello. May be repeated for credit. Summer session limit three hours.

**VNCL 965. Doctoral Recitals. 1-3 Credits.**
May be repeated for credit to a maximum of seven hours.

**Music Courses**

**VOIC 100. Voice. 1-2 Credits.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**VOIC 120. Vocal Performance in English. 1 Credits.**
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language.

**VOIC 121. Voice.** 1-4 Credits.
Applied music lessons for freshmen majoring in music. May be repeated for credit.

**VOIC 221. Voice.** 1-4 Credits.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (6 for performance majors).

**VOIC 270. Lyric Diction for Singers: _____, 1 Credits.**
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies.

**VOIC 300. Voice.** 1-2 Credits.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. Prerequisite: Permission of instructor and audition may be required.

**VOIC 320. Vocal Performance Class II.** 1 Credits.
Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Designed for junior/senior voice and theatre-voice majors. Prerequisite: Permission of instructor. Eligibility for VOIC 622.

**VOIC 321. Voice.** 1-2 Credits.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits.

**VOIC 405. Vocal Literature I.** 2 Credits.
A survey of English song.

**VOIC 406. Vocal Literature II.** 2 Credits.
A survey of German song.

**VOIC 408. Vocal Pedagogy.** 1 Credits.
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics. diagnosis and correction of vocal inefficiencies, teaching styles and strategies, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as MENT 408.)

**VOIC 421. Voice.** 1-2 Credits.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits.

**VOIC 422. Voice.** 1-2 Credits.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors.

**VOIC 470. Lyric Diction for Singers: _____, 1 Credits.**
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies.

**VOIC 490. Opera Workshop.** 0-4 Credits.
The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit.

**VOIC 492. Opera Production.** 1-4 Credits.
The preparation and performance of an opera role. May be repeated for credit.

**VOIC 500. Directed Study in:_____ 1-3 Credits.**
Investigation of a special topic or project. May be repeated for credit. Prerequisite: Consent of instructor.

**VOIC 520. Vocal Coaching.** 1 Credits.
In-depth investigation of elements of vocal performance such as language, musical style, tradition, and dramatic content and the communication thereof in preparation for the senior recital. Open to undergraduates majoring in voice and theatre/voice in the senior year, with consent of instructor. May be repeated for credit.

**VOIC 622. Voice.** 2-4 Credits.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits at the 121/221 levels.

**VOIC 623. Senior Recital.** 1 Credits.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VOIC 622.

**VOIC 670. Advanced Lyric Diction for Singers: _____, 1 Credits.**
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to graduate students in voice and opera performance, and to others with approval of instructor. May be repeated for credit as language varies.

**VOIC 704. Vocal Repertoire: _____, 2 Credits.**
A survey of selected topics in vocal repertoire to be chosen from categories such as: Italian, German, French, and English songs, oratorio literature, and art songs by women composers. The course may be repeated for credit when topic varies.

**VOIC 711. Voice.** 1-3 Credits.
For graduate students not majoring in voice. Audition required. May be repeated for credit.

**VOIC 720. Vocal Performance Class II.** 1 Credits.
Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Advanced repertoire and appropriate level of vocal and musical comprehension shall be expected from the graduate student. Prerequisite: Consent of instructor.

**VOIC 799. Artist Certificate Recital.** 1 Credits.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance.

**VOIC 811. Voice.** 3-4 Credits.
For graduate students majoring in voice. May be repeated for credit. Summer session limit three hours.

**VOIC 820. Vocal Coaching.** 1-4 Credits.
In-depth investigation of elements of vocal performance such as: language, musical style, tradition, and dramatic content and the communication thereof in preparation for the senior recital. Open to graduate voice majors with consent of instructor. May be repeated for credit.

**VOIC 890. Opera Workshop.** 0-4 Credits.
The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit.

**VOIC 892. Opera Production.** 1-4 Credits.
The preparation and performance of an opera role. May be repeated for credit.
The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.
The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasn.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

### Instrumental Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I. University Band or University Orchestra if placed by audition.

### Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

### Keyboard Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

### B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in Music is offered for students with interests in any area of music who also want to pursue a second degree or minor not in the School of Music.

A total of 120 credit hours (45 at the Jr/Sr level 300+) is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

**Bachelor of Fine Arts in Theatre-Voice**

**Theatre and Voice**

The Division of Voice offers the Bachelor of Fine Arts (B.F.A.) for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

The B.F.A. in Theatre and Voice degree requires 121 credits (45 at the Jr/Sr level 300+). Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the in-depth exploration of music as well as performing a junior recital and a senior recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for theatre/musical productions, or create their own path in music or music-related endeavors.

**The School of Music**

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.
Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Keyboard Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

### Bachelor of Music

Each student who is a candidate for the Bachelor of Music degree must carry a major in:

- Musicology,
- Music theory,
- Music composition,
- Music therapy, or
- Music performance, including Jazz.

A minimum of 120 credit hours (45 at the Jr/Sr level 300+) is required and is designed to further the student's knowledge, practice, and experience in their chosen major. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors. Individuals who complete the music therapy program are eligible to take the national music therapy board certification examination. The music therapy major does not lead to licensure to teach music in public schools.

### The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.
The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

**Bachelor of Music in Bassoon, Clarinet, Flute, Oboe, Saxophone**

A total of 120 credit hours (45 at the Jr/Sr level 300+) is required and is designed to further the student's knowledge, practice, and experience on their major instrument. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

**Instrumental Ensemble Policy**

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble\(^1\) each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

\(^1\) Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I. University Band or University Orchestra if placed by audition.

**Undergraduate Admission to the School of Music**

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Transfer Students**

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Keyboard Skills Placement Examination:**

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

**B.M. Degree Requirements for the Bassoon, Clarinet, Flute, Oboe, Saxophone Major**

A total of 120 credit hours (45 at the Jr/Sr level 300+) is required and is designed to further the student's knowledge, practice, and experience on their major instrument. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble\(^1\) each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

\(^1\) Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I. University Band or University Orchestra if placed by audition.

### Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

### Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

### Keyboard Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out
will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

Bachelor of Music in Musicology

A total of 120 credit hours (45 at the Jr/Sr level 300+) is required and is designed to further the student’s knowledge, practice, and experience in musicology. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice.

With this degree, students can go on to pursue graduate studies in music, or create their own paths in music or music-related endeavors.

Instrumental Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble1 each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I. University Band or University Orchestra if placed by audition.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission__). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission__). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Keyboards Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Keyboard Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

Music Composition

To graduate, the student must maintain a minimum grade-point average of 3.0 in music theory and composition courses on both the first- and second-year and the junior/senior levels.

Students majoring in music composition (B.A. or B.M.) must complete MTHC 105, MTHC 106, MTHC 115, MTHC 116, and MTHC 205 before preparing a portfolio of their work for application to the professional sequence. The earliest a student may submit a portfolio is the fourth semester. Transfer students must be in residence for at least 1 semester before they can submit a portfolio.

This portfolio must include recent work (musical compositions for composers), 2 letters of recommendation (1 from the student’s major instrument instructor and 1 from a MTHC professor who has had the student in a class), and a minimum grade-point average of 3.0 in MTHC courses. The student may be asked to provide a demonstration of musicality on his or her major instrument.

Portfolios are accepted once each semester for admission to the professional sequence the following semester. The portfolio is assessed by the MTHC faculty with one of 3 recommendations: admit, revise and resubmit next semester, or denied. Students in composition are not allowed to enroll in MTHC 583 Composition and MTHC 498 Undergraduate Recital without a favorable recommendation from the faculty.

B.M. Degree Requirements for the Music Composition Major

Students with a major in composition must offer in partial fulfillment of the degree requirements a recital of approximately 45 minutes duration consisting of original works in various media (MTHC 498). MTHC 499 is not required for the B.M. in Music Composition.

Pianists and organists take 16 credits of lessons (2 credits per semester) and do not take the additional 8 credits of piano, organ, and/or harpsichord lessons, while all other instrumentalists or vocalists take only 8 credits of lessons (1 credit per semester) and the additional 8 credits of the piano proficiency course sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288) and/or piano, organ, and/or harpsichord lessons.

A minimum of 120 hours (45 at the Jr/Sr level 300-) is required for the degree in Music Composition, distributed as follows:

**Total Hours** | 122 |
With this degree, students can go on to pursue graduate studies in music, or create their own paths in music or music-related endeavors.

**Instrumental Ensemble Policy**

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble 1 each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I. University Band or University Orchestra if placed by audition.

**Undergraduate Admission to the School of Music**

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Transfer Students**

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Bachelor of Music in Music Theory**

A total of 120 credit hours (45 at the Jr/Sr level 300+) is required and is designed to further the student's knowledge, practice, and experience in music theory. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice.
Keyboard Skills Placement Examination:
If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310).

Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

Music Theory
To graduate, the student must maintain a minimum grade-point average of 3.0 in music theory and composition courses on both the first- and second-year and the junior/senior levels.

Students majoring in music theory (B.A. or B.M.) must complete MTHC 105, MTHC 106, MTHC 115, MTHC 116, and MTHC 205 before preparing a portfolio of their work for application to the professional sequence. The earliest a student may submit a portfolio is the fourth semester. Transfer students must be in residence for at least 1 semester before they can submit a portfolio.

This portfolio must include recent work (scholarly papers for music theory), 2 letters of recommendation (1 from the student’s major instrument instructor and 1 from a MTHC professor who has had the student in a class), and a minimum grade-point average of 3.0 in MTHC courses. The student may be asked to provide a demonstration of musicality on his or her major instrument.

Portfolios are accepted once each semester for admission to the professional sequence. The portfolio is assessed by the MTHC faculty with one of 3 recommendations: admit, revise and resubmit next semester, or denied. Students in music theory are not allowed to enroll in MTHC 499 Senior Research Project without a favorable recommendation from the faculty.

B.M. Degree Requirements for the Music Theory Major
Students with a major in theory must offer in partial fulfillment of the degree requirements a senior project culminating in a scholarly paper on an approved topic (MTHC 499). MTHC 498 is not required for the B.M. in Music Theory.

The piano requirement may include the piano proficiency course sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288) and piano, organ, and/or harpsichord lessons.

A minimum of 120 hours (45 at the Jr/Sr level 300+) is required for the degree in Music Theory, distributed as follows:

Total Hours 120-122

Bachelor of Music in Music Therapy

Music Therapy

The program helps students develop competence for entry into the music therapy profession. The interdisciplinary curriculum emphasizes understanding of human behavior, musical and otherwise. It includes extensive work in music, behavioral science, biological science, and liberal arts, in addition to specific academic, clinical, and research studies in music therapy.

Music Therapy Program

The undergraduate music therapy program provides full preparation for entry into the profession. It culminates in the degree of Bachelor of Music with a major in music therapy. Graduates are prepared for general music therapy practice in a variety of settings, which may include, but are not limited to hospitals, schools, community health programs, wellness centers, and private and group settings across the age span. The KU music therapy program is approved by the American Music Therapy Association. Individuals who complete the program are eligible to take the national music therapy board certification examination. The music therapy major does not lead to licensure to teach music in public schools.

Advising

Students admitted to the music therapy program will be assigned an appropriate academic faculty advisor to work with the student throughout their academic career. Students are expected to consult with their advisor each semester to plan enrollment for the next semester. The advisor is available to help, to suggest ways to avoid course conflicts, to recommend courses particularly beneficial for various emphases, and to offer career guidance. The responsibility for taking appropriate courses and for meeting other requirements rests upon the student. Information regarding all requirements is in writing and available to students. Lack of knowledge of any requirement does not free the student from meeting that requirement. All students must sign up for a graduation check with the School of Music Student Services Office in 450 Murphy Hall one year prior to their graduation date.

Regardless of applied performance medium, each entering student should be able to sing independently, in tune, and with acceptable tone quality. Functional keyboard skills (accompanying, playing by ear, improvising, and transposing) are helpful. Experience working with others is also beneficial as well. Well-developed interpersonal skills are an asset.

Students are strongly encouraged to read the Music Therapy Undergraduate Program Handbook, which is available on the School of Music website (https://music.ku.edu/undergraduate-music-therapy-bm-handbook/) and from the Student Services Office, 450 Murphy Hall, and provides detailed procedures, suggestions, and specifications.

Admission

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M. in music therapy as the major on the KU application for admission. Music therapy majors are in plan MTP-BM in the School of Music.

Students pursuing the B.M. in music therapy degree should apply for admission to the professional sequence upon completion of the second semester of the sophomore year with 50 or more KU hours. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the director of music therapy. Music therapy majors who have been admitted to the professional sequence are in plan MTPPS-BM in the School of Music.

Students must be admitted to the music therapy professional sequence to enroll in upper-division music therapy courses. See the Music Therapy

Candidates are reviewed for admission periodically. No student may be admitted to the professional sequence for a semester during which he or she will be on academic probation. The application form for music therapy professional sequence admission is distributed to students prior to their time to apply. Information about the application process may be found on the KU School of Music website (https://music.ku.edu/music-therapy-professional-sequence/).

Instrumental Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A., B.M., and B.M.E.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble 1 each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I. University Band or University Orchestra if placed by audition.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Keyboard Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

Requirements for the B.M. with a Major in Music Therapy

The degree requires a minimum of 120 semester hours of credit (including 45 at the Junior/Senior 300+ level) appropriately distributed among general studies, the major, and supporting music areas and behavioral sciences. With careful planning, the program can be completed in about 4½ years. Four academic years of study and clinical work on campus are followed by a full-time, 6-month internship in an approved clinical institution.

The degree requires at least a 3.00 cumulative grade-point average in all course work and a minimum of 3.00 in all MENT courses. All music therapy majors must demonstrate proficiency in the major applied performance medium and in other performance areas.

All students must demonstrate functional vocal skills and ability to perform accompaniments on a portable chordal instrument, such as accordion, autoharp, guitar, or electric piano. These skills are assessed periodically throughout the program.

### Performance Requirements (28-31 hours)

#### Major Instrument
- 121 Applied music lessons (2 semesters) 4 hours
- 221 Applied music lessons (2 semesters) 4 hours
- 321 Applied music lessons (2 semesters) 4 hours
- 422 Applied music lessons (Senior Recital) (1 semester) 2 hours

#### Ensemble: Band, Orchestra, Chorus, etc.
7 semesters of participation for 7 credits total, including experience in small ensembles. 5 should be large ensembles.

#### Piano Skills
An audition is required. If skills are insufficient, remedial course work is necessary. Students with a major performance medium of piano or organ take only PIAN 310.

- PIAN 144 Elementary Keyboard Skills I
- PIAN 148 Elementary Keyboard Skills II
- PIAN 284 Intermediate Keyboard Skills I
- PIAN 288 Intermediate Keyboard Skills II
- PIAN 310 Advanced Keyboard Skills

#### Performance Techniques
- MGMT 150 Performance Media: Percussion 1 hour
- MGMT 119 Performance Media: Guitar 1 hour
- MGMT 117 Performance Media: Voice 1 hour
- or MGMT 120 Vocal Performance in English

#### Conducting/Rehearsing Skills
- MGMT 246 Fundamentals of Conducting 1 hour
- MGMT 338 Rehearsal/Conducting Clinic: Non-traditional Ensemble 1 hour

### Musicianship and Music Therapy Requirements (61 hours)

#### Code Title Hours

##### MGMT Professional Core
- MGMT 150 Introduction to Music Therapy 3 hours
- MGMT 196 Group Leadership Skills in Music Therapy 2 hours
- MGMT 200 Human Musical Learning and Development 2 hours
- MGMT 251 Clinical Techniques for Children 3 hours
- MGMT 296 Clinical Techniques for Adults 3 hours
- MGMT 455 Psychology of Music 3 hours
- MGMT 463 The Influence of Music on Behavior I 3 hours
- MGMT 464 Music in Therapy 3 hours
- MGMT 586 Seminar in Music Therapy Professional Development I 1 hour
- MGMT 587 Seminar in Music Therapy Professional Development II 1 hour
- MGMT 396 Clinical Practicum (1 hour/2 semesters and 2 hours/2 semesters) 6 hours
- MGMT 596 Clinical Internship 2 hours

##### Music Theory and Composition
- MTHC 105 Theory I (concurrent with MTHC 106) 3 hours
- MTHC 106 Aural Skills I 1 hour
- MTHC 115 Theory II (concurrent with MTHC 116) 3 hours
- MTHC 116 Aural Skills II 1 hour
- MTHC 205 Theory III 4 hours
- MTHC 315 Theory IV 4 hours

##### Recital Attendance
- REC 100 Laboratory in Music Performance (2 semesters) 0 hours

##### Musicology and Music Literature
- MUSC 320 Music History I 3 hours
- MUSC 440 Music History III 3 hours
- MUSC 480 Music History IV 3 hours

##### Music Electives (Level 300 and above needed to meet Jr/Sr graduation requirement.)
- Music electives 4 hours

### Music Therapy 4.5 Year Plan

Students with no prior piano experience should take the keyboard skills sequence (PIAN 144 - PIAN 288). Demonstration of skills is needed to pass/test out of PIAN 144 - PIAN 288. Students whose major performance medium is piano or organ should take PIAN 310 after completing two semesters of music theory (this course is only taken once in the fall term of the sophomore year).

- F = Fall only
- S = Spring only
- B = Both semesters

Total Hours 31

• Students must successfully complete the Clinical Musicianship Assessment before entering Clinical Practicum. This assessment is addressed across MEMT 251 and 296.

Professional Sequence

Professional Sequence Admission Requirements

Students should apply for admission to the Professional Sequence as early as possible and must be admitted before beginning the first semester of the junior year. Admission requirements:

1. Cumulative grade-point average of 3.00 or higher.
2. Grade-point average of 3.00 or higher in MEMT courses.
3. A grade of C or higher in each of the following courses:

<table>

Total Hours 29

1. Students must achieve admission to the music therapy professional sequence prior to enrolling in these courses.

• All MEMT professional courses as noted on the undergraduate music therapy degree requirement check sheet must be completed with a C or higher prior to beginning internship.

• Students must pass all Clinical Musicianship and Internship Assessments and Musicianship Portfolio.
• Students must request a graduation check from the School of Music Student Services Office approximately 1 year before the estimated internship date. Graduation checks before that time should occur with the student’s MEMT advisor.

• Upon acceptance to an internship site students must complete and turn in the Music Therapy Internship Information sheet to the Student Services office.

• Students must do the following in the final semester before leaving for internship:
  • review degree requirement check sheet to see that they have met all graduation requirements
  • submit an application for graduation online through Enroll and Pay
  • successfully complete the major applied instrument (422 Lessons with Senior Recital) including the senior half-recital

### Bachelor of Music in Organ and Church Music

A total of 124 credit hours (45 at the Jr/Sr level 300+) is required and is designed to further the student’s knowledge, practice, and experience of organ and church music. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

### Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

### Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

### Keyboard Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

### B.M. Degree Requirements for the Organ and Church Music Major

A total of 124 hours (45 at the Jr/Sr level 300+) is required for the degree in Organ and Church Music, distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>

Total Hours 120-122

Bachelor of Music in Voice

The Division of Voice offers the Bachelor of Music for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

A total of 124 (45 at the Jr/Sr level 300+) credit hours is required and is designed to further the student’s knowledge, practice, and experience in voice. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will study with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.
Keyboard Skills Placement Examination:
If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

B.M. Degree Requirements for the Voice Major

Music Teacher Licensure Program

Teacher licensure in Kansas is a function of the Kansas State Board of Education. Individuals who complete an approved music teacher licensure program are recommended to the state for licensure in music for grades pre-K through 12. Students must meet additional state requirements, such as passing specified standardized tests, before licenses are granted. Contact the Student Services Office, 450 Murphy Hall, for information.

Admission

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M.E. as their major on the KU application for admission. Music education majors are in plan ME-BME in the School of Music.

Students pursuing the B.M.E. must apply for admission to the professional sequence by the first Monday in February of the sophomore year. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the director of music education. Music education majors who have been admitted to the professional sequence are in plan MEPS-BME in the School of Music.

Students must be admitted to the music education professional sequence to enroll in upper-division music education courses. See the Music Education Undergraduate Program Handbook (https://music.ku.edu/undergraduate-bme-handbook/) for details.

No student may be admitted to the music education professional sequence for a semester during which he or she is on academic probation. The application form for music education professional sequence admission is distributed to students prior to their time to apply. Information about the application process may be found on the KU School of Music website (https://music.ku.edu/music-education-professional-sequence/).

Instrumental Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A., B.M., and B.M.E.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I. University Band or University Orchestra if placed by audition.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission
Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition and application information is available on the School of Music website (http://music.ku.edu/admission/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Keyboard Skills Placement Examination:

If a student has a background in piano playing, they may choose to take one or more Piano Quiz-Out tests. Successfully passing a Quiz-Out will exempt a student from having to take a particular class in the PIAN sequence (PIAN 144, PIAN 148, PIAN 284, PIAN 288, and PIAN 310). Students should check with their advisor about how this will impact their particular degree requirements.

Freshmen and transfer students with no previous piano study experience should enroll in PIAN 144. No examination or permission number is necessary. Students should check with their advisor about their particular degree requirements.

More information about the Keyboard Skills Placement Examination including deadlines is available on the School of Music website (https://music.ku.edu/entrance-exams/).

The Music Education Teacher Licensure Curriculum

The B.M.E. degree requires a minimum of 120 semester credit hours (including 45 at the Junior/Senior 300+ level) distributed among general studies, the major, professional education class work, and student teaching and internship. The degree requires at least a 3.00 cumulative grade-point average in all course work. Each student must participate in appropriate performing ensembles and demonstrate proficiency in a major applied performance medium and in other performance areas.

Ensemble (7 semesters, 7 hours)
7 hours of credit representing 7 semesters of participation. Large ensemble placement must be by audition. Wind and Percussion: 1 semester/1 credit marching band required. Vocal: 6 semesters/6 credits major ensemble and 1 semester/1 credit small ensemble required.

Piano Skills
An audition is required. If skills are insufficient, remedial course work (PIAN 144) is necessary. Students with a major performance medium is piano or organ should take only PIAN 310.

Music Education 4 Year Plan

Music Education majors are strongly encouraged to adhere to this sequence of courses.

Students with no prior piano experience should take the keyboard skills sequence (PIAN 144-PIAN 288). Demonstration of skills is needed to pass or test out of PIAN 144-PIAN 288. Students whose major performance medium is piano or organ should take PIAN 310 after completing 2 semesters of music theory (this course is only taken once in the fall term of the sophomore year).

- F = Fall only
- S = Spring only

1 Courses must be completed before admission to the Music Education Professional Sequence.
2 Music Theory I and II and Aural Skills I & II should be taken before Music History I or higher.

• Students must apply for admission to the Music Education Professional Sequence by the first Monday in February of the sophomore year.

Professional Sequence

Professional Sequence Admission Requirements

1. Cumulative grade-point average of 3.00 or higher.
2. Grades of C or higher in MATH 101 and 6 hours of English as listed on the application.
3. Satisfactory completion of “Criteria for Admission” courses as shown in the Application for Music Education Professional Sequence Admission.
4. The student must write and attach a one-page essay (12-point font, double-spaced) to the application form that answers the following question: As a music educator in your first year of teaching, reflect on how your music program could impact the community-at-large.
5. A fully completed application form and associated documents must be submitted to Dr. Jacob Dakon at j710d307@ku.edu via email attachment.

• Transfer students with more than 45 hours of transfer credit must complete the professional sequence application during the first semester of classes at KU.

• Students must achieve admission to the Music Education Professional Sequence prior to enrolling in these courses.

• Students must do the following during the final semester
  - register to take the PLT (Principles of Learning and Teaching) test
  - register to take the Praxis II Music Content test during the final semester
  - check their degree requirement check sheet to see that they have met all of the graduation requirements

• PLT and Praxis II Exams required for licensure, not for graduation. Required scores: PLT Exam 160 minimum, Praxis II Music Exam 152 minimum.

• Students must do the following before graduation:
  - submit an application for graduation online through Enroll and Pay at the beginning of their last semester
– successfully complete their major applied instrument (422) including
the senior half recital

Minor in Music

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Requirements for the Minor in Music

Open to All KU Students

Students must first audition to be accepted as music minors, then may earn a minor in music by taking 24 hours in the courses listed below. At least 12 hours must be junior/senior-level courses, numbered 300 and above (300+). A minimum grade-point average of 2.0 in the minor is required.

Nine junior/senior music credits numbered 300 and above to be chosen from:

Lessons on same instrument or voice at 300 level, ensembles, and/or music classes (MUS 586, Business of Music, and most MUSC - music history - courses are open to all KU students)

Undergraduate Certificate in Music Recording

The Certificate in Music Recording is designed to provide foundational understanding and experiences in the technologies, techniques, and business of music recording. The intent is not to provide comprehensive training in all non-performance aspects of the recording industry, but rather to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to function creatively in the music industry of today, while also preparing to be adaptable for the changing landscape of music production and consumption in the future. Non-music major students may also pursue the Music Enterprise Certificate.

Current Undergraduate Degree-Seeking Students: Undergraduate students in good standing (non-probationary) may submit a request (https://deptsec.ku.edu/~music/forms/form/105/) to add the Music Enterprise Certificate at any time during their course of study.

Current Undergraduate Students Outside of Music: Non-music undergraduate students in good standing (non-probationary) may submit a request (https://deptsec.ku.edu/~music/forms/form/106/) to add the Music Enterprise Certificate at any time during their course of study.

Contact Information

- Director of undergraduate Student Services: Rita Riley, rliley@ku.edu or 785-864-2954
- Graduate Student Academic Services: musicgrad@ku.edu or 785-864-1952.

A list of all course offerings can be found on the Schedule of Classes (https://classes.ku.edu/).

12 credits required for completion of the certificate.

Undergraduate Certificate in Music Enterprise

The Music Enterprise Certificate is a program enhancement option for undergraduate and graduate music major students designed to provide foundational understanding and experiences in establishing, managing, promoting, and otherwise successfully operating business enterprises in the music industry. The intent of the certificate is not to provide comprehensive training in all non-performance aspects of the music business, but rather, to allow students to explore how to combine their
Master of Music in Conducting

Master of Music in Conducting Degree Programs

The KU School of Music offers M.M. degree programs in the following areas:

- Choral conducting:
- Orchestral conducting; and
- Wind conducting.

M.M. in Conducting Admission

Applicants are expected to have educational backgrounds equivalent to the B.M. or B.M.E. degree from KU. They should have one or two years of experience in conducting. Such experience may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing ability on an instrument or in voice. Applicants must complete audition-interviews successfully before the divisional faculty and should provide a résumé of their conducting experience, including programs of public appearances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better.
M.M. in Conducting Degree Requirements

Diagnostic Examinations

All incoming graduate students, except those in the MM-Opera program, are required to take diagnostic exams in Music History and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master’s Recital

The conducting degree candidate must present a final concert-length recital consisting of a public choral or instrumental program. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than three weeks before the recital date. The Master’s recital must be given before the final oral exam can occur.

Final Oral Exam

Master’s degree students must schedule and pass a final oral examination. The student’s 3-member Graduate Advisory Committee consists of the student’s major professor, one member from the student’s major division and one musicology or music theory professor. This committee administers the final oral exam.

A program of study in band and orchestral conducting (minimum of 30 hours) is as follows:

Master of Music in Musicology

Master of Music in Musicology Degree Program

The Master of Music (M.M.) degree in musicology requires a minimum of 30 credits and is designed to further the student’s knowledge and in depth exploration of musicology (music history) at the post-baccalaureate level.

M.M. in Musicology Admission

Applicants are expected to have educational backgrounds equivalent to the B.A. or B.M. from KU or another accredited university. Applicants are expected to have a reading knowledge of German, French, Italian, Spanish, or any other foreign language approved by the department. A language deficiency may be satisfied after entrance into the program. Proficiency at the piano is encouraged. Applicants must submit samples of original scholarly writing. In addition to the required course work, students are encouraged to continue study of performance or composition.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. **Master of Music in Music Theory or Composition**

**Master of Music in Music Theory or Composition Degree Programs**

The Master of Music (M.M.) degrees in theory or composition require a minimum of 30 credits and are designed to further the student's knowledge and in-depth exploration of music theory or composition at the post-baccalaureate level.

**M.M. in Music Theory or Composition Admission**

Applicants are expected to have educational backgrounds equivalent to the B.A., the B.M. in music theory, or the B.M. in composition from KU. Composition applicants should submit scores and recordings (if available) of original compositions; theory applicants should submit research papers in music theory. Applicants are expected to have a reading knowledge of German, French, Italian, or Spanish. A language deficiency may be satisfied after entrance into the program. In addition to the required course work, students are encouraged to continue study of performance and participate in ensembles on their major instruments.

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. 1 The master’s thesis in composition shall consist of either a 20-minute work for large ensemble or a 30-minute chamber work, either of which may include electronic media. All thesis proposals must be approved by the MTHC faculty before the student begins work on the thesis.

Master of Music in Piano Performance and Pedagogy

Master of Music in Performance Degree Programs

M.M. degree programs in music performance:

- Bassoon
- Carillon
- Cello
- Church music
- Clarinet
- Collaborative Piano
- Double bass
- Euphonium
- Flute
- French horn
- Harp
- Oboe
- Opera performance
- Organ
- Percussion
- Piano
- Piano and Pedagogy
- Saxophone
- Trumpet
- Trombone
- Tuba
- Viola
- Violin
- Voice

M.M. in Performance Admission

The applicant must perform an audition before at least two members of the faculty of the major performance division. A video recording may be submitted in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/graduate-auditions/) for more details.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/ music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 department units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all coursework counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

M.M. in Performance Degree Requirements

Diagnostic Examinations

All incoming graduate students, except those in MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.
Master's Recital
A final solo recital is required for all master's degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed in the School of Music archives.

Final Oral Examination
All Master's students in Music must schedule and pass a Final Oral Exam during the semester the student plans to graduate. The Master's Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student's 3-member advisory committee. The committee is comprised of the student's major professor, one member from the student's major division, and one Musicology or Music Theory faculty member.

**Diagnostic Examinations**

All incoming graduate students are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

**Master's Recital**

A final solo recital is required for all master's degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed in the School of Music archives.

**Final Oral Examination**

All Master's students in Music must schedule a Final Oral Exam during the semester the student plans to graduate. The Master's Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student's 3-member advisory committee. The committee is comprised of two faculty members from the student's major division and a Musicology or Music Theory faculty member.

Students in the Master of Music program who play band or orchestral instruments must enroll in a major ensemble for a minimum of 2 semesters.

A program of study in brass and percussion is as follows:

**Master of Music in Music Performance: Organ, Church Music, and Carillon**

**Master of Music in Performance Degree Programs**

M.M. degree programs in music performance:

- Bassoon
- Carillon
- Cello
- Church music
- Clarinet
- Collaborative Piano
- Double bass
- Euphonium
- Flute
- French horn
- Harp
- Oboe
- Opera performance
- Organ
- Percussion
- Piano
- Saxophone
- Trumpet
- Trombone
- Tuba
- Viola
- Violin
- Voice

**M.M. in Performance Admission**

The applicant must perform an audition before at least two members of the faculty of the major performance division. In some cases, a video recording may be submitted in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/graduate-auditions/).

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.
Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

M.M. in Performance Degree Requirements
Diagnostic Examinations
All incoming graduate students, except those in MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Students in opera performance must take a minimum of 1 year each in French, German, and Italian before entering graduate studies or before completing the M.M. degree. For the master's degree program in voice, the language requirement is 1 year of 2 of the following: French, German, or Italian. Both programs have prerequisites in French, German, and Italian diction. Students found deficient in a particular area of diction must enroll in the specific course in which they are deficient and pass it with a minimum grade of C or demonstrate proficiency by passing a diction diagnostic examination. A student whose transcript shows she or he has passed a particular language diction course normally is considered proficient in the diction of that language.

Graduate Admission to the School of Music

The audio recording of the recital will be placed in the School of Music archives.

Final Oral Examination

All Master's students in Music must schedule and pass a Final Oral Exam during the semester the student plans to graduate. The Master's Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student's 3-member advisory committee. The committee is comprised of the student's major professor, one member from the student's major division, and one Musicology or Music Theory faculty member.

Students in the Master of Music program who play band or orchestral instruments must enroll in a major ensemble for a minimum of 2 semesters.

A program of study for students in bassoon, clarinet, flute, oboe, and saxophone (minimum of 30 credits) is as follows:

Master of Music Education in Music Education or Music Therapy

Master of Music Education

With a Major in Music Education or Music Therapy

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master’s Handbook available in the division office and online (https://music.ku.edu/graduate-handbooks/).

Music Education M.M.E. Program

Master of Music Education

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master’s Handbook available in the division office and online (https://music.ku.edu/graduate-handbooks/).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission

Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate licensure program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Three (3) letters of recommendation regarding applicant’s qualifications for graduate study in their selected program.
4. Submission of a video recording appropriate to degree of application.
5. Submission of resume.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (https://music.ku.edu/graduate-programs/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

M.M.E. with a Major in Music Education

Course and Proficiency Requirements

The degree requires a minimum of 30 hours of graduate credit. At least one-half of the required credit hours must be in courses open only to graduate students. At least 20 of the hours must be in regularly scheduled classes excluding directed study, research, and thesis or comprehensive examination (as applicable). The work must be distributed as indicated in the categories shown on the appropriate Master’s Degree Program Plan (https://music.ku.edu/mme/).

Course Distribution

- At least 17 hours in MEMT including MEMT 812 Research in Music Education and Music Therapy (3 hours), MEMT 899 Master’s Thesis (3-5 hours if thesis option) or MEMT 898 Comprehensive Examination (1 hour if nonthesis option), and additional hours to reach the minimum elected from 700- and 800-level MEMT courses, subject to the advisor’s approval. At least 2 courses must be at the 800 level.
- At least 10 graduate hours outside of MEMT, including
Music Therapy M.M.E. Program

Final Master's Examination (Thesis)

The student must be enrolled at the time the final master's exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final thesis copy to each committee member 2 weeks in advance of the scheduled exam date.

The candidate will begin by giving a twenty-minute oral presentation on his or her thesis, but the exam is not confined to that topic. Thereafter, the candidate will address questions posed by the committee arising from the candidate’s presentation and the thesis document.

Final Master's Examination (Non-Thesis)

The non-thesis option typically functions as a terminal degree and the work must be distributed as indicated in the categories shown on the appropriate Degree Program Plan. This option culminates with enrollment in a 1-credit hour comprehensive final examination (MEMT 898 Comprehensive Examination) and the subsequent portfolio and presentation.

The student must be enrolled at the time the final non-thesis master’s exam is held. The non-thesis master’s exam includes presenting a portfolio and will be scheduled for a period of 1 hour. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (https://music.ku.edu/graduate-handbooks/) in the MEMT Graduate Handbook.

Plan of Study

The Master of Music Education with a major in music education program plan is available online (https://music.ku.edu/mme/).

Music Therapy M.M.E. Program

Graduate Handbook available in the division office and online (https://music.ku.edu/graduate-handbooks/).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission

Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate licensure program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Three (3) letters of recommendation regarding applicant’s qualifications for graduate study in their selected program.
4. Submission of a video recording appropriate to degree of application.
5. Submission of resume.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (https://music.ku.edu/graduate-programs/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/musical theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better.
in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**M.M.E. with a Major in Music Therapy**

**Course and Proficiency Requirements**

The degree requires a minimum of 30 hours of graduate credit. At least one half of the required credit hours must be in courses open only to graduate students. At least 20 of the hours must be in regularly scheduled classes excluding directed study, research, and thesis or comprehensive examination (as applicable).

**Course Distribution**

- The program must include at least 17 hours of graduate work in the division, including MEmT 812 Research in Music Education and Music Therapy (3 hours), MEmT 864 Philosophy and Theory of Music Therapy (3 hours), MEmT 890 Practicum in Music Therapy (2 hours), MEmT 899 Master’s Thesis (3 hours if thesis option) or MEmT 898 Comprehensive Examination (1 hour if nonthesis option), and additional hours to reach the minimum elected from 700- and 800-level MEmT courses, subject to the advisor's approval. At least 2 courses must be at the 800 level. At least 9 of these hours must be in regularly scheduled courses.
- At least 10 hours in supportive studies outside MEmT.
- Proficiency as a performing musician must be demonstrated before the degree may be awarded.

The work is distributed as indicated in the categories on the appropriate Degree Program Plan found online (https://music.ku.edu/mme/). All of these selections are subject to the advisor’s approval.

The M.M.E. with a major in music therapy may be earned only by individuals eligible to sit for the national examination offered by the Certification Board for Music Therapists (CBMT).

**Final Master's Examination (Thesis)**

The student must be enrolled at the time the final master's exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student's major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student's responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (http://music.ku.edu/MME/requirements/) in the MEmT Graduate Handbook.

**Plan of Study**

The Master of Music Education with a major in music therapy program plan is available online (https://music.ku.edu/mme/).

**Doctor of Musical Arts**

**Programs**

View requirements for:

- Doctor of Musical Arts in Composition (p. 2239)
- Doctor of Musical Arts in Conducting (p. 2241)
- Doctor of Musical Arts in Music Performance: Brass and Percussion (p. 2243)
- Doctor of Musical Arts in Music Performance: Organ and Church Music (p. 2245)
- Doctor of Musical Arts in Music Performance: Piano (p. 2247)
- Doctor of Musical Arts in Music Performance: Piano Performance and Pedagogy (p. 2249)
- Doctor of Musical Arts in Music Performance: Strings (p. 2251)
- Doctor of Musical Arts in Music Performance: Voice (p. 2252)
- Doctor of Musical Arts in Music Performance: Woodwinds (p. 2254)

**Doctor of Musical Arts in Composition**

**Doctor of Musical Arts**

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance

**D.M.A. Admission**

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.
For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

Composition

Applicants should submit at least 3 scores of original works (including master’s thesis), recordings if available, and lists of past performances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next division headings, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

D.M.A. Degree Requirements

Research Skills and Engagement

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off campus.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student selects a faculty advisory committee, in consultation with the major advisor, subject to the consent of the faculty members involved, and approved by the associate dean. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations.

Recitals

Composition students must present a public program of original compositions with approximately 45 minutes of music and participate in at least one work as either a performer or conductor.

All recitals and public appearances are graded by the student’s graduate advisory committee chair. The student must achieve at least a grade of B on each recital for satisfactory completion of degree requirements.

Written and Oral Comprehensive Examinations

Composition doctoral students must take written qualifying examinations in composition, music theory and musicology when most of the course work has been completed and the research skills/responsible scholarship requirements have been fulfilled. All diagnostic deficiencies must be satisfied before taking the written qualifying and oral comprehensive exams. After successful completion of the written qualifying examinations, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee.
Dissertation in Composition

Candidates in composition must submit to the student's graduate advisory committee a proposal for a large-scale composition at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. The composition proposal should outline a large-scale work in a medium chosen in consultation with the committee director, reflecting the student’s primary focus within the profession of composition, and should include a preliminary analysis.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination. For students in composition, the examination is primarily a defense of the large-scale composition.

The student must receive at least a grade of B on the composition for satisfactory completion of degree requirements.

Examinations

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

(A work for large ensemble, a major concerto, a work for chorus and orchestra or an opera, or a major work involving live performers and electronic media. A written analysis of the work must be included after the title page in the full score.)

Composition majors must present a public program of original compositions approximately 45 minutes in duration before being admitted to the comprehensive examination.

Doctor of Musical Arts in Conducting

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

Conducting

Applicants are expected to have had experience in conducting that spans a period of not less than 2 years. This may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing ability on an instrument or in voice. Applicants are expected to submit preliminary audition materials that include a video audition of the applicant conducting in performance and in rehearsal, a recording of an ensemble trained and conducted by the applicant, and a prescribed formal analysis project. Details can be found at the band, choral, and orchestral links on the School of Music's website (http://music.ku.edu/). An entrance interview-audition is required for admission. The audition is heard by a committee composed of the Graduate Faculty of the conducting divisions. Approval by a majority of the committee is required for acceptance into the program. The audition may include

1. Harmonic and melodic dictation and/or sight-singing;
2. Score identification;
3. Score reading at the keyboard; and
4. Conducting from a band, choral, or orchestral score to be selected by the examiners.

Applicants may upload videos directly to their graduate application and Graduate Faculty in the ensemble divisions will review these recordings.

Students applying to the D.M.A. program in choral conducting must display a working knowledge of 2 of the following 4 languages: French, German, Spanish, and Italian. A working knowledge normally implies at least 2 semesters of undergraduate study.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/
music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

D.M.A. Degree Requirements
Research Skills and Engagement
Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off-campus.

Diagnostic Exams
All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and in choral, orchestral, and wind conducting must perform a total of 3 doctoral recitals. This number does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Doctoral conducting students are expected to perform 3 public, concert-length recitals. Up to 2 recitals may consist of the combination of works conducted with various official university ensembles over the course of several semesters. The third recital must be a single program with a major ensemble assigned as part of course work or teaching duties and presented as a regular program in that ensemble’s performance schedule. The third recital may include a complete performance of an opera, ballet/dance, or musical. A student who wishes to use an ensemble other than an official university ensemble must obtain permission to do so from the directors of ensembles.

For the first 2 required recitals in the D.M.A. program in performance and conducting, a recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than 3 weeks before the recital date. Normally, there is no recital preview for the final recital.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.
Document or Lecture-Recital

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Brass and Percussion

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master's recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video to be reviewed by the Graduate
Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/graduate-auditions/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

D.M.A. Degree Requirements

Research Skills and Engagement

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off-campus.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student will remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. students and Ph.D. students in Musicology and Music Theory take
written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Organ and Church Music

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/graduate-auditions/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.
Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**D.M.A. Degree Requirements**

**Research Skills and Engagement**

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18-part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off campus.

**Diagnostic Exams**

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

**Language Requirement**

All organ and church music doctoral students must demonstrate competence in one foreign language. Approved languages include French and German for organ majors and French, German, or Latin for Church Music majors. Students may petition the organ faculty for approval of a language other than those stated.

**Advisory Committee**

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

**Program of Study**

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

**Church Music with Choral Conducting emphasis** must present 2 choral recitals and 1 organ or voice recital. **Church Music with Organ emphasis** must present 2 organ recitals and 1 choral recital.

**Written and Oral Comprehensive Examinations**

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

**Document or Lecture-Recital**

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital
document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

**Examinations**

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

**Cognate**

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Piano Performance and Pedagogy

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the audition requirements set by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. Applicants may submit a video audition to their graduate application to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/graduate-auditions/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.
Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

D.M.A. Degree Requirements
Research Skills and Engagement
Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off campus.

Diagnostic Examinations
All incoming graduate students, except those in MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course. The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and
elective requirements may be used to meet the optional 12 credit
cognate.

**Doctor of Musical Arts in Music Performance: Strings**

**Doctor of Musical Arts**

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

**D.M.A. Admission**

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

**Performance**

The applicant must be prepared to perform a 40-minute recital program including the repertoire requirements listed by instrument on the Graduate Audition page: https://music.ku.edu/graduate-auditions. The applicant must perform an audition before at least two members of the faculty of the major performance division. In some cases, a video recording may be submitted in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/graduate-auditions/).

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**D.M.A. Degree Requirements**

**Research Skills and Engagement**

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
• At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master's degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student's supervisor must affirm that the course work and research involvement contribute to the student's dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off campus.

Diagnostic Examinations
All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. A student who does not submit a Program of Study by the end of the second semester shall not be permitted to enroll in their third semester of courses.

Recitals
All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Voice

Doctor of Musical Arts
The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in

• Church music (organ or choral conducting emphasis),
• Composition,
• Conducting (choral, orchestral, or wind), and
• Areas of performance.
D.M.A. Admission

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform as much as a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants.

View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

D.M.A. Degree Requirements

Research Skills and Engagement

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off campus.

Diagnostic Exams

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of
Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

**Written and Oral Comprehensive Examinations**

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

**Document or Lecture-Recital**

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

**Language and Diction**

Students in the D.M.A. program in voice must take or have taken a minimum of 1 year each of French, German, and Italian, and courses in English, French, Italian, and German diction before completing the D.M.A. program. If deficient in any language or diction coursework, as determined either through transcript evaluations or during the audition when selections from each language have been performed, the student must enroll in the specific course for that deficiency and pass with a grade of C or better. All deficiencies must be satisfied before the oral comprehensive exam can be scheduled.

**Examinations**

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

**Cognate**

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee.

### Doctor of Musical Arts in Music Performance: Woodwinds

#### Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

#### D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog. Further admission requirements are listed below.

#### Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. Applicants may submit a video audition with their graduate application to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/graduate-auditions/).
Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

D.M.A. Degree Requirements

Research Skills and Engagement

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

- Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (https://policy.ku.edu/graduate-studies/fulltime-enrollment/)
- At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major adviser if on campus, or with adequate liaison if off campus.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee.
Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee.

Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Philosophy

View requirements for:
- Doctor of Philosophy in Music (p. 2256)
- Doctor of Philosophy in Music Education (p. 2257)

Doctor of Philosophy in Music

Ph.D. in Music
The Ph.D. in Music is offered in Musicology or Music Theory.

Ph.D. in Music Admission
The Doctor of Philosophy degree in music is offered in musicology and music theory. The applicant is expected to hold a Master of Music degree with emphasis in musicology or music theory from KU or an equivalent master's degree from another accredited institution. In addition to the required transcripts and letters of recommendation, the applicant for admission to the Ph.D. program should submit a resume or CV of professional training and experience and samples of original scholarly writing.

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:
- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Doctor of Philosophy in Music Degree Requirements

Foreign Language Requirements
Aspirants to the Ph.D. degree in music theory and musicology are expected to have a reading knowledge of German, French, Italian, Spanish, or any other foreign language approved by the department. Reading proficiency must be demonstrated before scheduling the oral comprehensive examination. The student also may be advised to develop reading proficiency in another language or languages in order to pursue research for the dissertation.
Course of Study

Specific course work for each student is arranged individually in consultation with the student’s advisor. The Ph.D. program normally requires 4 years of full-time study beyond the master’s degree, with the first 2 years devoted to course work. A minimum of 18 credit hours is devoted to the dissertation, an original contribution to knowledge in the student’s research area.

Students in musicology must complete 2 semesters of MUSC 940 Seminar on Selected Topics in Musicology. Students in music theory must complete 2 semesters of MTHC 789 Seminar on Special Topics in Music Theory. In addition, students must complete at least 3 more 3-credit-hour courses in advanced musicology and at least 3 more 3-credit-hour courses in advanced music theory.

Although the Ph.D. program does not include a minor area, students are encouraged to continue their study of performance and/or composition, and may be advised to take non-music courses that are directly applicable to their fields of research for the dissertation.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2449) section of the online catalog.

Research Skills and Responsible Scholarship

Doctoral students are required to have training in both responsible scholarship and research skills pertinent to the doctoral level of research in their field of study.

To satisfy both components, Ph.D. students in Musicology or Music Theory must complete MUSC 801 Music Bibliography and Research (or its equivalent) and, if available, participate in advanced performance seminars.

Scholarly Presentation

Each candidate for the Ph.D. degree in musicology and music theory must make a public presentation of no less than 20 minutes on a scholarly topic. This requirement may be fulfilled by reading a paper at a national or regional meeting of a society in the student’s discipline or in a colloquium at KU.

Written and Oral Comprehensive Examinations

Students must take written examinations in music theory and musicology when most of the course work has been completed and research skills/responsible scholarship requirements have been fulfilled. Some major divisions also may require a written examination in the major area. Upon successful completion of all written examinations, the student is eligible to schedule the oral comprehensive examination administered by the graduate advisory committee. With the satisfactory completion of both written and oral comprehensive examinations the aspirant is admitted to candidacy for the degree of Doctor of Philosophy.

Dissertation Proposal

No later than the end of the semester after successful completion of the written and oral comprehensive examinations, the candidate, in consultation with the faculty dissertation committee, must submit a dissertation proposal of several pages with a preliminary bibliography, outline, and description of the project and research plan.

Final Oral Examination

Following completion of the dissertation, a final oral examination is scheduled in which the candidate presents and defends the results of dissertation research and is expected to respond to questions from the faculty committee. A grade of at least B must be achieved on the dissertation for satisfactory completion of the degree requirements.

Doctor of Philosophy in Music Education

Ph.D. in Music Education

The Doctor of Philosophy with an emphasis in either music education or music therapy focuses on research and scholarship. It is often sought by those who aspire to careers in research and graduate-level teaching. The requirements help the student develop broad and profound understanding of musical behavior, sophisticated skill and extensive experience in pursuing new knowledge of such behavior, and a rational system for evaluating the relationships between the specialty and other areas of human understanding. The program culminates with completion of a substantial piece of original research.

Ph.D. in Music Education Admission

Requirements for Regular Admission

1. Master's grade point average of at least 3.5 on a 4.0 scale.
2. Appropriate baccalaureate and master's degrees to support the individual's goals for doctoral study.
3. Three (3) letters of recommendation estimating the applicant's potential for success in doctoral study.
4. Documentation of at least 3 years successful full time experience, or its equivalent, as a professional music educator if seeking a concentration in music education, or at least 5 years successful full-time experience as a professional music therapist, or its equivalent, if seeking a concentration in music therapy.
5. Submission of a video recording appropriate to the degree emphasis.
6. A reasoned statement of professional goals and research interests.
7. An interview with the appropriate faculty for area of emphasis.
8. Final official degree conferred transcripts(s) must be sent directly from all previous colleges or universities.
10. Other supporting materials may be required.

Additional detailed admission requirements and information are found on the School of Music website (https://music.ku.edu/music-education-music-therapy/).

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (https://music.ku.edu/graduate-programs/) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B or better in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Ph.D. in Music Education Degree Requirements**

**Research Skills**

Doctoral students in music education and music therapy at KU must demonstrate research skills by completing 3 research projects suitable for publication. These may be developed and completed independently or in consultation with appropriate doctoral faculty members. There must be a project for three different types of research methodology, usually representing methods of descriptive, experimental, and historical (including the history and logic of ideas) research. If those methods are chosen the descriptive and experimental research articles should be presented in APA style. The historical research article may be presented in Turabian, MLA, or APA style. The student may propose other divergent methodologies if those fit his/her program of study more adequately.

It is up to the doctoral program planning committee to approve the methodologies each student utilizes.

Each completed project is reviewed by the student's doctoral planning committee, which rules in the majority whether the project is of sufficient quality for publication in a national, refereed research journal in music education or music therapy. The committee chair will determine if the projects will be reviewed by additional faculty not a part of the program planning committee. Single-author studies that have been published or accepted for publication in such journals may be used to demonstrate these skills.

Completion of each of the 3 research projects must be certified by the student's mentor/advisor in music education or music therapy on the MEMT Doctoral Check list in the student's file in the MEMT office. The mentor/advisor must submit an appropriate MEMT Do-All form after the completion of each project.

Responsible scholarship requirements are met by satisfactory completion of courses MEMT 812 Research in Music Education and Music Therapy and MEMT 920 Doctoral Seminar in Music Education and Music Therapy.

**Preliminary and Comprehensive Examinations**

The student must pass a series of examinations, culminating with the comprehensive oral examination.

The music education and music therapy Ph.D. handbook is available online (https://music.ku.edu/graduate-handbooks/) and includes information about patterns of course work, the Ph.D. minor, examinations, and the dissertation.

**Plan of Study**

Course requirements for the doctoral degree are flexible. The Ph.D. program requires a minor. Each student's program is planned specifically in light of his or her background and to meet the needs of the anticipated academic and professional career. However, each student is expected to achieve a broad understanding of human musical behavior and to become skilled in research. Professional competence, not hours of credit per se, is the underlying requisite for conferring the degree.

The student works with her or his faculty advisor to complete a Degree Requirement Program Plan. The advisor submits the completed program plan with the MEMT Do-All form.

**Graduate Certificate in Music Enterprise**

The Music Enterprise Certificate is a program enhancement option for undergraduate and graduate music major students designed to provide foundational understanding and experiences in establishing, managing, promoting, and otherwise successfully operating business enterprises in the music industry. The intent of the certificate is not to provide comprehensive training in all non-performance aspects of the music business, but rather, to allow students to explore how to combine
their own musical interests and priorities with the tools and concepts necessary to function creatively in the music industry of today, while also preparing to be adaptable for the changing landscape of music production and consumption in the future. Non-music major students may pursue the Music Enterprise Certificate by permission of the Associate Dean for Academic Affairs in Music.

Current Music Graduate Degree-Seeking Students: Graduate students in good standing (non-probationary) may declare for the Music Performance Certificate at any time during their course of study. There are no admission requirements for current music graduate students.

Current Graduate Students outside of Music: Non-music graduate students in good standing (non-probationary) who wish to be admitted to the Certificate program must apply directly to the certificate by completing the application to add a Graduate Certificate for current degree-seeking students (https://gograd.ku.edu/register/current_ku_certificate/) (online form submission). Applicants will be invited to interview with the Director of the Program who will determine whether the student has the necessary background.

Certificate-Seeking Students (non-degree seeking): Students applying directly to the Certificate program must apply directly to KU Graduate Certificate Program (http://gradapply.ku.edu/apply/) (online form submission). Applicants will be invited to interview with the Director of the Program who will determine whether the student has the necessary background.

12 credits are required to complete the certificate.

MUS 586 is a prerequisite for MUS 587 and MUS 588.

**Graduate Certificate in Music Performance**

The Graduate Certificate in Music Performance offers a one-year program providing an intensive period of post-baccalaureate study in music performance or conducting. It is intended for exceptionally gifted and accomplished performers and conductors seeking professional performing careers, but not wishing to engage in academic studies required for a graduate degree. Study is available in woodwinds, brass, percussion, strings, piano, voice, organ, church music, jazz, carillon and conducting (band, orchestra and choir).

**Admission to Music Performance Graduate Certificate Program**

Candidates for admission to the Graduate Certificate in Music Performance must provide proof of a bachelor’s degree in keeping with the Admission to Graduate Study policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/).

Current Music Graduate Degree-Seeking Students: Graduate students in good standing (non-probationary) may declare for the Music Performance Certificate at any time during their course of study. There are no admission requirements and no cost for current music graduate students.

Current Graduate Students outside of Music: Non-music graduate students in good standing (non-probationary) who wish to be admitted to the Certificate program must apply directly to the certificate by completing the application to add a Graduate Certificate for current degree-seeking students (https://gograd.ku.edu/register/current_ku_certificate/) (online form submission - no cost). Applicants will be invited to audition with the Area Coordinator for the program of interest, who will determine whether the student has the necessary background.

Certificate-Seeking Students (non-degree seeking): Students applying directly to the Certificate program must apply directly to KU Graduate Certificate Program (http://gradapply.ku.edu/apply/) (online form submission, cost: $30). Applicants will be invited to audition with the Area Coordinator for the program of interest, who will determine whether the student has the necessary background.

Twelve (12) credit hours must be completed during one year of study to obtain the Graduate Certificate in Music Performance. An additional twelve (12) credit hours in music performance must be completed if continuing for a second year of study.*

Courses are in the following categories (credit hours are per year):

- Applied Studio Instruction (6)
- Large Ensemble (2)
- Chamber music/Jazz Combo/Accompanying/Coaching (2)
- Recital (1)
- Graduate Elective (500 level or above) (1)

*International Graduate Students

Federal regulations require F-1 international graduate students to maintain an enrollment of 9 credit hours per semester until their final semester of enrollment. Elective courses in the School of Music or courses in the AEC may be taken to reach this enrollment. Students enrolling in a combination of AEC and music courses will be issued a “pathway” I-20 instead of a Certificate I-20.

**Applied Studio Instruction Courses**

Students are required to enroll in 3 credit hours each semester in applied studio instruction ___711 with the appropriate faculty member.

**Large Ensemble**

Students are required to enroll in 1 credit hour each semester in a large ensemble specific to their area of instruction.

**Chamber music/Jazz Combo/Accompanying/Coaching**

Students are required to enroll in 1 credit hour each semester in a course specific to their area of instruction.

**Recitals**

Students are required to enroll in 1 credit hour of recital in the final semester of their course load.

MUS 799 Artist Certificate Recital
Elective Courses

Students can enroll in any graduate-level course in the School of Music that will contribute to their certificate study.

Graduate Certificate in Music Recording

The Certificate in Music Recording is designed to provide foundational understanding and experiences in the technologies, techniques, and business of music recording. The intent is not to provide comprehensive training in all non-performance aspects of the recording industry, but rather to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to record, edit, and produce music recordings, either in a commercial studio or a home studio, while also preparing to be adaptable for the changing landscape of music production and consumption in the future.

Admission to Music Recording Graduate Certificate Program

Candidates for admission to the Graduate Certificate Program must provide proof of a bachelor’s degree in keeping with the Admission to Graduate Study policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/).

Current Music Graduate Degree-Seeking Students: Graduate students in good standing (non-probationary) may submit a request (https://deptsec.ku.edu/~music/forms/form/30/) to add the Music Recording Certificate at any time during their course of study. There are no admission requirements and no cost for current music graduate students.

Current Graduate Students Outside of Music: Non-music graduate students in good standing (non-probationary) who wish to be admitted to the Certificate program must apply directly to the certificate by completing the application to add a Graduate Certificate for current degree-seeking students (https://gograd.ku.edu/register/current_ku_certificate/) (online form submission - no cost).

Certificate-Seeking Students (non-degree seeking): Students applying directly to the Certificate program must apply directly to KU Graduate Certificate Program (http://gradapply.ku.edu/apply/) (online form submission, cost: $30).

Graduate Certificate in Piano Pedagogy

The Graduate Certificate in Piano Pedagogy requires a minimum of 12 credit hours of graduate-level coursework. Non-music majors and non-degree-seeking students are welcome to apply. A list of all course offerings can be found on the Schedule of Classes (https://classes.ku.edu/). Course selections must be approved by the area coordinator in Piano Performance.

Faculty Contact & Area Coordinator: Scott McBride Smith, smcb smith@ku.edu

Graduate Student Academic Services: musicgrad@ku.edu or 785-864-1952

Current Music Graduate Degree-Seeking Students: Graduate students in good standing (non-probationary) may submit a request to the Area Coordinator, in Piano, to add the Piano Pedagogy Graduate Certificate at any time during their course of study. There are no admission requirements for current music graduate students.

Current Graduate Students Outside of Music: Non-music graduate students in good standing (non-probationary) who wish to be admitted to the Certificate program must apply directly to the Certificate program by completing the application to add a Graduate Certificate for current degree-seeking students (https://gograd.ku.edu/register/current_ku_certificate/) (online form submission). Applicants may be invited to interview with the Area Coordinator of the Program who will determine whether the student has the necessary background.

Certificate-Seeking Students (non-degree seeking): Students applying directly to the Certificate program must apply directly to KU Graduate Certificate Program (http://gradapply.ku.edu/apply/) (online form submission, cost: $30).

A list of all course offerings can be found on the Schedule of Classes (https://classes.ku.edu/).

There are three required courses and one elective for a total of 12 credits. They must be taken in sequence.

Nursing

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, students use the catalog of the year they entered KU, see the catalog archives (http://catalog.ku.edu/archives/) and advisor (http://www.advising.ku.edu/) for details.

The School of Nursing is one of three schools at the University of Kansas Medical Center (http://www.kumc.edu/) (KUMC) in Kansas City, Kansas. Academic programs at KUMC are offered through the Schools of Health Professions, Medicine, and Nursing. In addition to the Kansas City campus location, the School of Nursing also has a campus location in Salina, Kansas. The Office of Graduate Studies at KUMC (http://www.kumc.edu/academic-affairs/graduate-studies.html) handles matters related to graduate programs in Health Professions, Medicine, and Nursing.

The KU School of Nursing’s baccalaureate, master’s, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (CCNE) (https://www.aacnnursing.org/CCNE/). CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate program, APRN certificates, and DNP APRN specialties also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse-Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (ACME) (https://www.midwife.org/acme/) of the American College of Nurse-Midwives, 8403 Colesville Road, Suite 1550, Silver Spring, MD, 20910, (240) 485-1800.

School of Nursing Degree Programs

Graduate Certificate - Psychiatric/Mental Health Nurse Practitioner (p. 2312)

Undergraduate Programs

The Bachelor of Science in Nursing (BSN) (p. 2282) program prepares baccalaureate generalist nurses for professional nursing practice. The American Association of Colleges of Nursing’s (AACN) Essentials of Baccalaureate Education for Professional Nursing Practice provide the framework for this first step in professional nursing education (AACN, 2008). The roles of the baccalaureate generalist include: provider of care; designer/manager/coordinator of care; and member of a profession. Baccalaureate generalist education provides the foundation for all graduate nursing education. This traditional BSN program is a full-time program, requiring on-campus attendance. The traditional BSN program is offered through both the Kansas City and Salina campus locations.

The online RN to BSN (https://catalog.ku.edu/nursing/bs/#admissiontext) program provides registered nurses (RN) a flexible format to complete the baccalaureate degree and expand career options. The program is online, and can be completed in one calendar year of full-time study or up to five years of part-time study. Students can enter the program at any semester, i.e., spring, summer or fall. In the KU School of Nursing’s RN to BSN program, students will refresh skills and learn new ones, with a curriculum that will broaden abilities in many areas, including leadership and critical thinking.

The Community College Nursing Partnership (CCNP) (https://catalog.ku.edu/nursing/bs/#admissiontext) offers the convenience of staying at a community college while pursuing both the Associate Degree in Nursing (ADN) and the Bachelor of Science in Nursing (BSN). The program bypasses the traditional prelicensure associate degree nursing step. Instead, the curriculum makes it possible for students to complete the ADN and BSN simultaneously, through on-campus courses at the community college and online courses through KU School of Nursing. After completing the CCNP program, eligible students are awarded both an ADN from the partner community college and a BSN from KU School of Nursing, and are eligible to take the National Council Licensure Examination (NCLEX) for registered nurses.
High School Preparation

High school students planning to enter the baccalaureate program in nursing are encouraged to follow a general college preparatory course of study. Such a course usually emphasizes basic preparation in English, a foreign language, mathematics, natural science, and social sciences.

Graduate Programs

Basic admission requirements are listed in the Graduate Studies (p. 2449) section of the online catalog. Individual graduate programs may have additional specific requirements including prerequisite undergraduate courses. These are listed or referenced in program descriptions. Combined degree options are available.

The School of Nursing offers the following graduate programs:

- Master of Science (p. 2288) - Nursing
- Master of Science (p. 2288) (https://catalog.ku.edu/nursing/ms-health-informatics/#text) - Health Informatics
- Doctor of Nursing Practice (p. 2294)
- Doctor of Philosophy (p. 2291)
- Nursing Certificate Programs (p. 2298)
- Interprofessional Certificate Programs (p. 2298)

For online information about graduate programs, visit the S (http://nursing.kumc.edu/academics.html) school of Nursing website (http://nursing.kumc.edu/). (http://nursing.kumc.edu/academics.html)

In addition to the graduate degree and graduate certificate options, the School of Nursing periodically also has post-doctoral fellowship opportunities available to DNP or PhD-prepared applicants seeking additional skill-development opportunities in clinical practice or research, respectively. Current opportunities are listed on the KU School of Nursing website (http://nursing.kumc.edu/).

Undergraduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/). The School of Nursing Handbook (https://www.kumc.edu/school-of-nursing/academics/student-handbook.html) also contains policies, procedures, and guidance helpful for students.

Academic Forgiveness

Academic forgiveness does not apply in the School of Nursing undergraduate programs.

Application

Each undergraduate program (i.e., BSN, RN to BSN, CCNP) abides by specific application requirements and deadlines. More details can be found within the description of each program.

Credit/No Credit

Undergraduate students may choose to select a Credit/No Credit option for one course enrollment per semester. This option is not available for courses required of the student's major or minor program of study. For more information, visit the KU Policy Library (https://policy.ku.edu/). Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages. The KU School of Nursing does not accept Credit classes where a Credit is awarded for the grade of D.

Grading

All courses designated “NURS” or “NRSG” must be completed with a grade of C or better to meet requirements for graduation. Courses in which grades of D and F are earned do not count toward graduation. All undergraduate clinical/practicum courses must be completed with a “satisfactory” to meet requirements for graduation. No student will be allowed to graduate with an “unsatisfactory” in a clinical course.

Theory courses are graded on a letter-grade basis. Undergraduate clinical and skills courses are graded on a satisfactory/unsatisfactory basis. Nursing electives with a clinical component may be graded with a combination of letter grades and satisfactory/unsatisfactory or letter grades only. Grades in graduate theory courses and clinical/practicum courses are letter grades. The faculty member(s) for each course establishes the minimum requirements for each letter/satisfactory grade.

No undergraduate student may graduate with:

1. nursing GPA below 2.0, and/or
2. cumulative GPA below 2.0, and/or
3. unsatisfactory grades

If necessary to maintain the minimum course grade of a “C” or “S”, a student may repeat a course once to earn the necessary grade. Failure to achieve a “C” or “S” in two nursing courses, or the repeated nursing course, will result in dismissal from the School of Nursing at semester’s end. If the second failure is in a course at the end of the first rotation, the student will be prohibited from beginning a new course in the second rotation. The student may complete courses currently in progress.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent of their graduating class may graduate With Distinction. The upper third of those students awarded With Distinction may graduate With Highest Distinction. The list is compiled each spring and includes August, December, and May graduates.

Honor Roll

Students with grade-point averages of 3.5 who have completed at least 12 hours are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Honors Graduates

For students who complete the School of Nursing’s Honors Program, designation of Departmental Honors appears on the transcript.

Probation

Students whose cumulative grade-point average (GPA) falls below 2.0 are placed on probation. The Assistant Dean of Student Affairs and Enrollment Management notifies the student by letter. It is the student’s responsibility to seek a conference with the Student Affairs advisor. The
student and the Student Affairs advisor assess the situation jointly and make appropriate recommendations.

A student is removed from probation when, upon completion of the next 12 credit hours of enrollment, the student's cumulative GPA is equal to or greater than 2.0. Only courses required for the nursing major (i.e., junior/senior course work) apply toward the required GPA average for removal from probation. No student may graduate with a nursing and overall grade-point average less than 2.0.

If a student on probation does not attain a cumulative GPA equal to or greater than 2.0 at the end of the probationary semester, the student is dismissed for academic reasons.

Program Completion Time Limit

Bachelor of Science in Nursing degree requirements must be completed within five years of the date of first enrollment in BSN program courses.

Reactivation After Program Departure

Students who are not continuously enrolled each semester (except for the Summer session) must request to have their records reactivated. If a student has not enrolled in over a year, their eligibility to have their status re-activated will be verified with the School of Nursing by the Office of the Registrar. Prior performance in nursing coursework and available space in the program will be considered.

Readmission to a School of Nursing Program

When a student who has withdrawn completely from the School of Nursing (voluntarily or through academic dismissal) wishes to reenter the appropriate program in the School, the following procedure should be followed:

1. Completion of a new application form with application fee
2. Submission of any transcripts which include coursework not already on file in the School of Nursing
3. Statement from the applicant describing his/her activities since the last enrollment in the School of Nursing
4. Statement about the reasons the applicant thinks the request for readmission should be approved
5. These items will be reviewed by the School of Nursing Student Admission and Progressions Committee and the applicant will be informed of the decision

Repetition of Courses

For admission to the School of Nursing, grades in all courses taken and retaken are included in the grade-point average. All grades are considered for calculation of honors and awards.

Transfer of Credit

CredTran (http://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU. Only transfer grades of C- or higher apply toward graduation at KU.

Graduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/). For Graduate Studies regulations, see Office of Graduate Studies, Medical Center Campus (p. 2454) section of this catalog. The School of Nursing Handbook (https://www.kumc.edu/school-of-nursing/academics/student-handbook.html) also contains policies, procedures, and guidance helpful for students.

Grades

The basic grading system of Graduate Studies is an A, B, C, D, F, system, where A designates above-average graduate work; B, average graduate work; C, passing but not average graduate work; D and F, failing graduate work. D and F grades do not count toward a graduate degree.

“P” Grades

The letter P is used in this system only to indicate participation in thesis, dissertation, and research enrollments directly related to thesis or dissertation, or in the first semester enrollment of a two-semester sequence course. When the student’s performance is considerably above or below expectations in research enrollments directly related to thesis or dissertation, with permission of the Vice Chancellor for Academic Affairs, instructors may assign a letter grade (A, B, C, D, or F). Upon completion of thesis or dissertation, as evidenced by the presentation of a thesis or dissertation, a letter grade (A, B, C, D, or F) shall be reported by the instructor for the last term of thesis or dissertation hour(s) in which the student was enrolled. This grade is to be based largely on the final product. The “I” grade is not appropriate for enrollment in thesis, dissertation, and research and will not be accepted.

Incompletes

For enrollments other than thesis, dissertation, or research, the letter I is used to indicate coursework that has been of passing quality, some part of which is, for good reason, unfinished. The grade of I for graduate courses shall remain unchanged on the student’s record except that should the student subsequently complete the coursework, the instructor would then change the I to a letter grade, i.e., A, B, C, D, or F. In addition, the School of Nursing has established a policy that a student in the Master of Science degree program, the Doctor of Nursing Practice program or Doctor of Philosophy in nursing Program has a maximum of one year from the time she/ he receives an I in a nursing course to complete the requirements for the course and receive a grade for the course. The instructor has the prerogative to require a shorter time for completion of the requirements. If the student wishes to receive credit for a course incomplete for longer than 1 year, the student then must enroll and repeat the coursework. Any exception to this rule would be determined by petition to the Student Admission and Progression Committee. The student should inquire with departments outside the School of Nursing regarding their policies for incomplete coursework, because those policies may differ.

Graduate Program Completion Time Limit

Students have 7 years in which to complete the requirements for the Master of Science degree and 8 years to complete the Doctoral degree.
(Ph.D. or D.N.P) in Nursing. Extension of the limit may be granted in exceptional circumstances for up to 1 year at a time by the Graduate Division of a student’s school or college upon receipt of a satisfactorily documented petition from the student and a letter of support from the thesis or dissertation advisor. If the program is not completed within the time limit and an extension has not been granted, those courses which are over 7 or 8 years old must be repeated. If, for any reason, a master’s student is unable to enroll in coursework in any semester or summer session, the student must notify the Office of Student Affairs. In some circumstances, a leave of absence may be appropriate.

Probationary Policy
If a student falls below a 3.0 GPA in any semester or term, that student will be placed on academic probation. The student attending full-time (9 semester credits) must attain an overall B average in the next semester of full-time enrollment to be removed from probation. Part-time students will be evaluated at the end of each subsequent semester to determine their progress toward raising the overall GPA to 3.0. No more than the equivalent of a semester of full-time study will be allowed on probation. Students admitted on probation will be removed from probation upon completion of the first 9 hours if the overall GPA is above 3.0. If the GPA is below 3.0, the student will face academic dismissal.

Nursing (Graduate) Courses
IPHI 820. Program, Project, and Communication Planning. 2 Credits.
Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed.

IPHI 850. Introduction to Health Informatics. 2 Credits.
This course provides a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices.

IPHI 851. Transforming Health Care through Use of Information Systems and Technology. 3 Credits.
The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will be explored for their impact on patient care and safety. The role of legal, regulatory, ethical, and security issues will be discussed as they apply to clinical and consumer information technologies. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

IPHI 852. Health Data Theory and Practice. 3 Credits.
Data science concepts and database theory as related to healthcare settings will be introduced. Simple database modeling, design, and manipulation will be explored using a database management system and a query language. Key data science methods, such as data wrangling and visualization, will be leveraged for decision making. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

IPHI 853. Abstraction and Modeling of Healthcare Information. 3 Credits.
The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified healthcare information requirements. Object-oriented techniques, such as Unified Modeling Language and Unified Modeling Methodology, will be introduced to facilitate process analysis and design proposal development. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum. It is recommended that students take IPHI 820 prior to this course.

IPHI 854. Knowledge Management in Health Care. 3 Credits.
Knowledge management is the creation, communication, and leveraging of a healthcare organization’s knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge workers and their impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach to support a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum. It is recommended that students take IPHI 820 prior to this course.

IPHI 856. Health Informatics Practicum. 1-3 Credits.
In collaboration with health informatics faculty and preceptors, students design an experience to facilitate the application of theories and research related to health informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: IPHI 850, 851, 852, 853, 854, leadership electives, and focus area electives, or consent of instructor.

IPHI 858. Health Informatics Practicum: Pharmacy. 4 Credits.
In collaboration with health informatics faculty and preceptors, students design an experience to facilitate application of theories and research related to health informatics in a pharmacy setting. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. This course is only open to students enrolled in the dual PharmD and Health Informatics programs. Prerequisite: IPHI 850, 851, 852, 853, 854 and focus area electives, or consent of instructor.

IPHI 860. Health Informatics Scholarly Project. 2 Credits.
This research or evidence-based project course is designed for students to apply knowledge from their coursework. Students will work with a faculty mentor on components of a research, quality improvement, or evidence-based practice project. The student will create a scholarly document. Prerequisite: A research course and two informatics courses, or consent of instructor.

IPHI 861. Introduction to Telehealth Policy and Practice. 3 Credits.
Course focus is on telehealth concepts and skills development with emphasis on historical aspects, priority areas, an introduction to policy, and equitable access to care. Evolving telehealth services including telemedicine, e-health, mobile health, and telemonitoring are introduced. This course aligns with the accreditation competencies set by health professions, population health and clinical practice programs, and telehealth best practices established by state and national agencies and experts in the field.

IPHI 862. Developing Telehealth Programs. 3 Credits.
Course focus is on telehealth concepts and skills development with emphasis on needs assessment frameworks, service delivery models, financial models, and process flows. Evaluation and quality improvement models are introduced and applied to aid in planning, training, and preparing staff and the patient for telehealth services. Policy and reimbursement guidelines will be used throughout to determine service
types and plan for sustainability. This course aligns with the accreditation competencies set by health professions, population health and clinical practice programs, and telehealth best practices established by state and national agencies and experts in the field. Prerequisite: IPHI 861: Introduction to Telehealth Policy and Practice or consent of instructor.

**IPHI 863. Applications of Telehealth Methods and Models. 3 Credits.**
Course focus is on telehealth concepts and skills development with emphasis on best practices for building a telehealth program. Program improvement and sustainability concepts will be applied to address current service needs, adapt to future practice, and identify gaps to ensure equitable access to telehealth services. This course aligns with the accreditation competencies set by health professions, population health and clinical practice programs, and telehealth best practices established by state and national agencies and experts in the field. Prerequisite: IPHI 861-Introduction to Telehealth Policy & Practice and IPHI 862-Developing Telehealth Programs or consent of instructor.

**IPHI 957. Health Informatics, Human Factors, and Ergonomics as Applied to Patient Safety. 3 Credits.**
The use of information systems including medical devices is paramount in achieving patient safety. Students will attain an inclusive understanding of how human factors and ergonomic principles can be used to improve patient safety in the design, implementation, and evaluation of information systems and medical devices. Additionally, healthcare professionals will acquire skills to appropriately apply error reduction strategies developed in high reliability organizations. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

**IPHI 958. Knowledge Representation and Interoperability. 3 Credits.**
The need to exchange clinical information consistently between healthcare providers, care settings, researchers, and others requires syntactic and semantic interoperability. Requirements and approaches to meet interoperability will be explored. Standards for messaging, terminology, and knowledge representation will be investigated. KU DNP students may count this course as 2 credit hours of lecture and 1 credit hour of practicum.

**Nursing (Graduate) Courses**

**NRSG 700. Analysis of Variance for Nursing Research. 2 Credits.**
In this course, students will learn appropriate analytic approaches for experimental and quasi-experimental research designs. Basic statistical foundations such as distributional assumptions and hypothesis testing will be reviewed. Essential statistical concepts, including effect size, power and sample size, and error rates will be discussed in the context of experimental designs. The core focus of the course will be a general linear model approach to analysis of variance (ANOVA) methods including one-way ANOVA, contrasts and post hoc tests, factorial designs, analysis of covariance (ANCOVA), and repeated measures ANOVA. Applications of methods for nursing and healthcare research will be examined. Prerequisite: Graduate level introductory statistics course or consent of instructor.

**NRSG 722. Scholarly Writing for the Health Professional. 3 Credits.**
Development of scholarly writing skills is emphasized to promote professional communication and to enhance professional image. Students enrolled in this interdisciplinary course analyze their own and others’ writing to improve their written communications. Writing skills are practiced and developed by critiquing published articles, and by preparing written memorandums, letters, abstracts, and a manuscript. Legal and ethical issues related to the publication process are explored. Prerequisite: Admission to the graduate program, or consent of instructor.

**NRSG 748. Theories for Practice and Research. 3 Credits.**
Theory development and analysis techniques provide the framework for the study of concepts and theories from nursing and related disciplines. Particular emphasis will be placed on the relationship of theory and research in the development of nursing knowledge to support evidence-based practice. This course will enhance the decision-making skills for choosing and using concepts and theories that guide practice. Prerequisite: Admission to the graduate nursing program, or consent of instructor.

**NRSG 754. Health Care Research. 3 Credits.**
This course will enable the student to synthesize nursing knowledge and make recommendations to translate research findings into practice within diverse health care settings. Research methods, processes and findings for use in practice will be critically evaluated. Emphasis will be placed on formulating relevant research questions from theory and practice. Prerequisite: Admission to the graduate nursing program, Graduate Statistics, or consent of instructor.

**NRSG 755. Professionalism in Advanced Nursing Practice. 3 Credits.**
An analysis of economic, political, legal, ethical, professional, societal and cultural issues is conducted within the context of advanced nursing practice. Application of concepts essential to understanding, influencing and leading change in health care delivery specific to advanced nursing practice is emphasized. Prerequisite: Admission to the graduate nursing program, or consent of instructor.

**NRSG 800. Primary Palliative Care. 2 Credits.**
Palliative care provides physical, psychosocial, and spiritual care to persons and families living with serious or progressive illness. This course will draw on experiences with patients, families, and persons with serious illness and will help prepare learners to provide evidence-based primary palliative care to diverse patient populations across the lifespan and in multiple settings. Topics of palliative care assessment, symptom assessment and management, interprofessional collaboration, communication, and leadership in palliative care will be explored. Prerequisite: NRSG 801, 812, 813 or instructor consent.

**NRSG 801. Advanced Health Assessment and Clinical Reasoning. 3 Credits.**
The purpose of this course is to develop knowledge and skills for advanced clinical nursing practice, including comprehensive history and physical exam across lifespan. Content on special populations, communication with patients and care teams, cultural considerations, health promotion and prevention, and use of electronic health records will be discussed with opportunity for application. Prerequisite: Corequisite: NRSG 812: Advanced Pathophysiology, or permission of course faculty.

**NRSG 804. Interpreting Research for Applied Science. 3 Credits.**
Research relevant to therapeutic intervention comes from a variety of disciplines involving varied research designs and analysis strategies. Students in this course will examine selected research studies and gain skill in analyzing methods and results as well as in applying research findings to practical problems. Students also will design their own research project reflecting their area of interest. Prerequisite: Corequisite: NRSG 748, 754, and 755 or consent of instructor.

**NRSG 805. Understanding Disability through Mass Media. 2 Credits.**
This class is an overview of how mass media frames disability for the public. This course will focus on issues related to disability and the mass media representation including journalism, TV, film, advertising
and the internet. Topics discussed will be the various models of media representation of disability, the impact of stigma in mass media imagery, the impact of cultural and media representations on the experiences of people with disabilities, content created by and for people with disabilities, news about disability rights in the US society, and “hidden” disabilities. Also considered will be the healthcare response to these images and to people with disabilities. The course will be offered online in a synchronous format. Prerequisite: Consent of instructor.

NRSG 806. Advanced Physiology. 3 Credits.
A course designed to lead to an advanced comprehension of the physiology of organ systems in the human in both cellular and organ processes. Physiology subject matter relevant to clinical health sciences include membrane transport, muscle, cardiovascular, respiratory, renal, gastrointestinal, neurological, and endocrine function. Cellular mechanisms include the structure and function of ion channels and pumps, mechanisms of calcium regulation, excitation-coupling processes. Prerequisite: Admission to the School of Nursing or consent of instructor.

NRSG 807. Genetics in Primary Care. 2 Credits.
This course is designed to give the primary care nurse practitioner and other graduate nursing students a foundation in medical genetics. The basics of genetics, common genetic disorders and genetic testing are discussed. The application of this knowledge to counsel individuals at risk for genetic disorders is emphasized through the use of case studies. Ethical, legal and clinical practice issues and perspectives of primary care counseling in genetics are addressed. Prerequisite: Admission to the Graduate Nursing Program or Consent of Instructor.

NRSG 808. The Social Context for Health Care Policy. 2 Credits.
Using a local/single clinical issue students examine ways to abstract this issue into a social policy context. Local exemplars are used throughout the course to demonstrate the leadership and structural systems required to effect change in policy. Strategies to identify constituencies and build coalitions are studied. Prerequisite: NRSG 755, or consent of instructor.

NRSG 809. Health Promotion and Complementary Therapeutics. 3 Credits.
Current trends in health promotion and clinical preventive care across the lifespan are examined. Specific guidelines for assisting clients to maintain/improve health and/or prevent illness are reviewed. Attention is given to the roles of the health care provider and care recipient in screening, communication, and counseling. The use of complementary (non-pharmacological) therapeutics in assisting clients to achieve goals of health promotion is examined. The recommendations and use of non-pharmacological interventions will be evaluated based on research findings related to selection of therapeutics and measurement of expected outcomes following use of a particular intervention. Prerequisite: Admission to the graduate nursing program, or consent of instructor.

NRSG 811. Principles of Clinical Epidemiology. 3 Credits.
Principles of Clinical Epidemiology introduces the basic concepts of epidemiology with meaningful clinical and translational applications to healthcare. This course is designed to equip graduate students to make informed high-quality evidence-based decisions in clinical care and to develop answerable research questions regarding structural, social, and health conditions impacting the population. Students will be able to efficiently and effectively search the literature for high quality evidence and make responsible clinical decisions when there is weak evidence to balance clinical knowledge, experience, and research. This course will introduce epidemiological concepts and definitions by beginning with a historical overview of epidemics to public health surveillance of interventions for pandemics. Prerequisite: NRSG 754 Health Care Research or consent of instructor.

NRSG 812. Advanced Pathophysiology. 3 Credits.
Course focus is the in-depth scientific knowledge base relevant to selected pathophysiological states confronted in advanced nursing practice. This information provides a foundation for clinical assessment and the formulation of decisions related to clinical diagnosis and the management of therapeutic regimens. Age specific and developmental alterations are correlated with clinical diagnosis and management. Application is made through age appropriate examples. Prerequisite: Admission to the graduate nursing program or consent of instructor.

NRSG 813. Advanced Pharmacology. 3 Credits.
The clinical application of specific categories of drugs, commonly encountered in primary care settings is discussed. The use of protocols, prescription writing, and the ethical/legal, and economic issues surrounding the advanced nurses’ role in prescribing and monitoring pharmacologic therapies in the ambulatory setting are explained. Factors such as age-appropriate content related to pharmacokinetics, dosages, expected outcomes, and side effects of the drugs are discussed. First line versus second line drugs, alternate drugs, drug interactions, adjusting drug dosages, patient education, and compliance issues related to drug therapy are addressed. The nurse’s role and responsibility related to data collection, problem identification, and consultation with the physician is explored. Application is made through age-appropriate case studies. Prerequisite: NRSG 812 Advanced Pathophysiology or consent of instructor.

NRSG 820. Clinical Dynamics and Interventions in Diabetology. 3 Credits.
A complexity science framework is used to discuss current and innovative concepts and trends in the care of person with diabetes. The disease process of diabetes, preventive measures, complications, pharmacologic, technologic, lifestyle interventions and self-management techniques based on current evidence are presented and analyzed in relations to care of persons with diabetes across age groups and in different settings. Consideration is given the complexity of the co-morbidities that accompany diabetes as well as the special approaches to age appropriate treatment and cultural diversity factors that influence care. External barriers that contribute to decrease in quality outcomes are analyzed and innovative solutions are proposed. Prerequisite: NRSG 801, NRSG 813, or Consent of Instructor.

NRSG 821. Global Perspective and Diversity in Healthcare. 2 Credits.
Cultural receptivity is integrated into the collaboration, development, and implementation of health programs at the local, national, and international level. Frameworks that emphasize the meanings of health and healthcare; prevention and management; and related ethical, economic, and social justice concerns are introduced. Students partner with a community of interest to understand their health and illness beliefs, identify barriers to healthcare access, integrate the historical, social, political and economic forces that impact healthcare. Together they plan and implement appropriate strategies to influence positive community outcomes. Prerequisite: NRSG 880, or consent of instructor.

NRSG 827. Advanced Concepts in Public Health Nursing. 2 Credits.
Public health is addressed in terms of common values and interests as well as particular client populations (vulnerable and at risk groups) across the lifespan. Health promotion and disease prevention for whole communities and selected vulnerable and at risk aggregates are emphasized. Ethical and social justice concerns as well as public policy and legislative issues in population-focused health care are discussed. Selected models, concepts, theories, and research in public health provide the framework for identifying, exploring, prioritizing and planning interventions for public health concerns. Ultimately, a grant proposal...
NRSG 828. Public Health Nursing: Practicum I. 3 Credits.
Students are provided with an opportunity to explore advanced practice roles within the context of public health needs. Based on each student's goals and interests, health-related needs of identified populations are assessed, analyzed, and synthesized; and a plan of action is proposed. Prerequisite: Corequisite: NRSG 827, or consent of instructor.

NRSG 829. Public Health Practicum. 3 Credits.
Students will complete an intensive practicum in a community/public health setting. Prerequisite: NRSG 827, NRSG 828 or Consent of Instructor.

NRSG 839. Global Perspectives and Diversity in Healthcare: Practicum. 1-2 Credits.
Students will have the opportunity to integrate concepts and theories of global health and diversity by direct program planning, delivery, and evaluation of care activities in a vulnerable population. Students will partner with a community of interest to provide directed advanced nursing care and leadership activities, including population/organizational assessment, intervention, and evaluation. Emphasis will be placed on building cultural competence with an understanding of the historical, social, political, and economic forces of health within a specific community setting or geographic area. The worldview of the individual/population/organization will be respected and integrated into all aspects of health care delivery. Prerequisite: NRSG 826 or consent of instructor.

NRSG 841. Reproductive Endocrinology. 2 Credits.
In-depth examination of the anatomy and physiologic processes of reproduction are studied, and will include normal growth and development, as well as clinical genetics. Essential information will be focused on understanding of the reproductive hormones. With a complete understanding of menstrual hormone regulation, students will be better prepared to apply concepts to alterations that are encountered with maturation/development, puberty, pregnancy, lactation, menopause, and management of common sexual and reproductive needs (such as contraception). Prerequisite: NRSG 812 or Consent of Instructor.

NRSG 844. Advanced Psychiatric Assessment. 3 Credits.
Advanced psychiatric assessment of children, adults, and the elderly will be covered, including conducting patient-centered, culturally competent interviews in simulated situations. Epidemiology of psychiatric disorder is addressed. Assessment for psychiatric diagnoses of substance abuse, mood and anxiety disturbances, psychosis, dementia and disorders arising in childhood and adolescence are emphasized. Assessment of dangerous behaviors and crisis intervention is covered. Prerequisite: Corequisite: NRSG 801, or consent of instructor.

NRSG 850. Mental Health Assessment of Infants, Children and Adolescents. 3 Credits.
This is an advanced course in infant, child and adolescent mental health assessment development for those individuals who desire to gain greater knowledge and understanding of complex mental health issues in children, adolescents and their families. The course focus is to identify deviations between normal and abnormal development. Identification of environmental and social determinates will be examined. Recognition of pre-birth risk factors affecting children and protective measure that promote positive growth and development will be discussed. Assessment tools and strategies for effective assessment will be reviewed. Emphasis on the legal and ethical issues regarding safety and well-being of children and families will be addressed. Prerequisite: NRSG 748, or consent of instructor.

NRSG 851. Psychopharmacology for Advanced Nursing Practice. 3 Credits.
Understanding of the neuron, neurotransmitter and receptor functioning as the basis for psychopharmacotherapy is emphasized in developing the knowledge for prescribing and monitoring psychotropic medications for clients diagnosed with psychiatric disorders. The major classes of psychotherapeutic drugs, their mechanism of action, metabolism, interaction, adverse and side effects are discussed. Drug development is reviewed and ethical and legal issues involved in prescribing across the lifespan are covered. Knowledge is applied to case studies that include differentiating drugs, dosages and response to clients’ internal environment, racial/ethnic background, and age. Prerequisite: NRSG 844 or equivalent; or consent of instructor.

NRSG 854. Knowledge Management in Healthcare. 3 Credits.
Includes 2 credit hour lecture and 1 credit hour practicum. Knowledge management is the creation, communication, and leveraging of a healthcare organization’s knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge worker and his/her impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach supporting a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. (Same as IPHI 854.) Prerequisite: NRSG 820 or consent of instructor.

NRSG 870. Designing a Student Learning Environment. 3 Credits.
The roles of both the educator and student in designing a learning environment provide the framework for analyzing pedagogical philosophies, theories, ethical/legal issues, and research related to teaching strategies and education. The interprofessional focus is on best practices and research-based strategies to promote various learning styles and create an active learning environment that increases student retention and learning success for diverse, multicultural student populations. Attention will be given to the relationship between the setting, methodologies of clinical teaching, and the assessment of competencies. Prerequisite: NRSG 748, NRSG 754, or consent of instructor.

NRSG 871. Curriculum/Program Planning and Evaluation. 3 Credits.
Philosophies, methods, and processes of curriculum and instruction in health professions’ education provide the framework for discussing curricular and program planning theories/models, resources for decision making, research, and evaluation methods that create a learner-centered environment. Attention is given to frameworks for program evaluation, methods of data collection, and the ethics and standards of evaluation practice. The influence of societal trends, and current health professions issues relevant to curriculum planning are addressed. Emphasis is on strategies for anticipating future societal needs and developing educational curriculum to meet those needs. Matters of diversity, inclusion, interprofessional practice, workforce development, and ethics/legal issues in curriculum planning and education also are included. Prerequisite: NRSG 748, NRSG 754, or consent of instructor.

NRSG 873. Technologies for Teaching and Learning. 3 Credits.
This course will focus on various technologies that can be used to facilitate learning in different health professional environments. Learners will explore theories and models that support technology for the enhancement of teaching and learning. Emphasis is placed on aligning technologies with content and context, curriculum, equity and accessibility, policy, and physical and financial resources. Prerequisite:
NRSG 870. enrollment in a health-related graduate program, or Consent of Instructor.

NRSG 874. Health Professions Educator Preceptorship. 3 Credits.
The role components of the health professions educator are implemented with a preceptor in selected educational settings. Opportunities are provided to utilize teaching and learning strategies, research findings, and evaluation methods with diverse students. Professional issues, educational trends, changing role of the educator, and self-assessment are incorporated in accompanying modules. Prerequisite: NRSG 870, NRSG 871, NRSG 873.

NRSG 877. Foundations in Education and Learning. 3 Credits.
A complexity science framework is used to present the basic and advanced technical aspects of radiological tests used in the care of adult and pediatric patients in the diagnostic work up of the etiology of the health problem. The science that forms the basis for all studies (cathode) films as well as computerized scanning and magnetic resonance imaging tests is covered in the course. The emphasis is on the appropriate choice of radiological tests in the work-up of the patient's health problem. Also, advanced practice nurses will learn a framework for evaluating the findings of the radiological test, and the clinical implications of the findings. Prerequisite: Corequisite: NRSG 818, or NRSG 868, or NRSG 869, or NRSG 849, or NRSG 840, or consent of instructor.

NRSG 880. Organizational Foundations for Leading Change. 3 Credits.
Self-discovery as a foundation for professional development while exploring the concepts of leader, manager and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical and other issues that constrain and destabilize organizations and strategies to restore equilibrium are explored. (Same as HP&M 840.) Prerequisite: NRSG 748, or consent of instructor. Prerequisite/Corequisite: NRSG 755.

NRSG 881. Applied Budgeting and Finance. 3 Credits.
Leaders apply basic principles associated with program, project and service-line fiscal management, price setting, budget preparation, cost-benefit/break-even analysis, managed-care contracting, and interpreting financial ratios while concurrently acquiring a financial vocabulary to communicate with various stakeholders. Financial reports such as balance sheets, budget forms and expense reports are studied and formulated related to government agencies, small clinical operations, grant-funded projects, and start-up programs. Staffing models and the staffing-quality equation are analyzed for the purpose of projecting human resource requirements. Prerequisite: NRSG 880, HP&M 822, or Consent of Instructor.

NRSG 883. Complexity Science Approaches to Improve Organizational Effectiveness. 3 Credits.
This course introduces complexity science principles with the aim of improving the quality and effectiveness of healthcare organizations. Traditional approaches to quality improvement will be contrasted with tools and metrics that can be applied in complex organizations. Principles that relate to embeddedness, diversity, distributed control, co-existence of order and disorder, nonlinearity, inability to predict, emergence, and functioning at the edge of chaos will be introduced. Prerequisite: NRSG 880, or consent of instructor.

NRSG 884. Topics in Organizational Leadership. 3 Credits.
Investigation of current and futuristic issues and trends relevant to organizational leadership.

NRSG 885. Evaluation and Analysis for Healthcare Effectiveness. 2 Credits.
Systematic approaches for analyzing and evaluation processes of care delivery and their impact on client populations, organizational processes, and communities are considered. Research concepts and methods are used in a systems context. Program evaluation, performance improvement, and other methods of measuring outcomes are examined for their utility within the health care setting. Linkages between program evaluation and regulatory policy are studied. Prerequisite: NRSG 754. Prerequisite/Corequisite: NRSG 880 or Consent of Instructor.

NRSG 886. Organizational Leadership Practicum. 1-3 Credits.
The knowledge, skills, and abilities learned throughout the course of study are integrated in this practicum experience designed to develop further specialized knowledge. The faculty and preceptor provide support and guidance to help interpret experiences, and gain a broader worldview within organizational leadership. Students design an experience to facilitate application of theories and research related to organizational leadership. Emphasis is on expanding the capacity of the emerging leader in leading change, facilitating advanced communication skills, and demonstrating one or more areas of leadership expertise. Students negotiate a leadership project to be completed within the practicum. Prerequisite/Corequisite: NRSG: 808, 820, 826, 881, 882 or 883, 885, 891 & HP&M 822, or consent of instructor.

NRSG 888. Clinical Specialty Practicum for Nurse Educators. 1-3 Credits.
The Master of Science, Nursing Education Specialty prepares educators with direct care expertise in a specific clinical area of practice. Students will identify a practice area and complete a practicum with sustained clinical experiences designed to strengthen patient care delivery skills at the master's level. Direct care is defined as nursing care provided to individuals or families that is intended to achieve specific health goals or health outcomes. The course is collaboratively designed by the student and a faculty facilitator who has expertise in the clinical practice area desired by the student. The practicum may be completed in a wide range of settings such as acute and critical care, long term care, home health, community-based settings, etc. and prepares the student for advanced nursing practice care. Prerequisite: NRSG: 755, NRSG 801, NRSG 812, NRSG 813, NRSG 870, and NRSG 880 or consent of instructor.

NRSG 889. Grant Writing. 3 Credits.
All aspects of preparing grant applications are covered. This includes writing an actual grant application containing all the usual elements of grants--budgets, biosketches, resources, and scientific text. In addition, different funding agencies, building research teams, the review process, responding to reviewers, and resubmitting grants will be covered. Prerequisite: Appropriate research methods and statistics courses in student's current graduate program (at least 2 statistics courses, one including content of multiple regression), and permission of instructor. For students in the Outcomes Management and Research Concentration: prerequisites: HP&M 821 or PRVM 800. Same as ANAT 869 and HP&M 788.

NRSG 890. Independent Study in Nursing. 1-5 Credits.
Intensive study in an area of interest with experiences selected according to the student's written purposes, conceptual framework, objectives and evaluation (1-5 credit hours). Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed.

**NRSG 891. Human Resources and Workforce Development. 3 Credits.**

The focus of this course is to understand the leadership functions of human resource management in organizations to create a competitive edge through employee empowerment. Core human resource concepts are introduced and applied to optimize human capital within a variety of healthcare settings, including compensation and benefits, employee recognition, and employee/labor relations. National, regional and local strategies and workforce trends are discussed related to best practices for the selection, retention, and management as a healthcare employer of choice. Prerequisite: All Leadership Core Courses, or consent of instructor. Same as HP&M 854.

**NRSG 892. Independent Study in Nursing Practicum. 1-5 Credits.**

Intensive practicum in a specified area of interest with experiences selected according to aims that are mutually agreed upon by faculty and student. Prerequisite: None

**NRSG 893. Preparing for Healthcare Practice in Rural Communities. 2 Credits.**

Establishing and maintaining healthy rural communities is dependent on preparation of the rural healthcare workforce. This includes professionals living and working in rural communities as well as distant providers who contribute services and/or support through telehealth. Students will explore broad patterns of health and illness in rural communities, evaluate resources and develop advanced strategies to meet the diverse needs of rural communities. Prerequisite: Prerequisites: NRSG 748, NRSG 754, NRSG 809, or Consent of Instructor.

**NRSG 895. Grant Writing for Nursing Science. 1 Credit.**

All aspects of preparing grant applications are reviewed including developing the purpose, aims, approach, methods, budget, biosketch, and resources and facilities. In addition, the importance of building a research team and identifying suitable funding agencies will be covered. Prerequisite: Prerequisite: None. Corequisite: NRSG 896.

**NRSG 896. Grant Writing Application. 2 Credits.**

The student will work with their faculty research mentor to develop a federal level grant application (NIH, HRSA, AHRQ, or foundation) in preparation for submission. The funding proposal will be developed in conjunction with the NRSG 895 Grant Writing for Nursing Science course that provides information related to grant application structure and key issues. The mentor will provide content expertise and will work with the student to develop the specific content for a grant application. The final product will be a grant proposal suitable for submission. Prerequisite: Prerequisites: Current enrollment in the PhD in Nursing program or Consent of Instructor. Corequisites: NRSG 895.

**NRSG 898. Scholarly Project in Nursing. 2 Credits.**

The scholarly project course is designed for students to apply knowledge from their research/evidence-based practice coursework into practice. Emphasis is placed on experiential learning on the conduct of research, quality improvement, or evidence-based practice scholarship. Students will work with a faculty mentor on components of a research, quality improvement, or evidence-based practice project. Prerequisite: NRSG 754 plus one leadership specialty track course, or consent of instructor.

**NRSG 899. Thesis. 1-6 Credits.**

Prerequisite: NRSG 754, and one core track course.

**NRSG 901. Primary Care I: Adult-Gerontology Health. 3 Credits.**

The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis and treatment formulation for the health care needs of adults across the life span in multiple care settings. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis and management of common episodic, chronic, and complex conditions affecting health. Students develop skills in critical thinking, analysis and synthesis of data from a variety of sources, and use of evidence-based practice guidelines in diagnosing and managing health care needs. In addition to cultural & spiritual diversity, students learn how patient preferences in health care decision making are incorporated in a focus on person-centered care. Prerequisite: NRSG 801, NRSG 812, and NRSG 813.

**NRSG 902. Primary Care II: Adult-Gerontology Health. 3 Credits.**

The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis and treatment formulation for the health care needs of adults across the life span in multiple care settings. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis and management of common episodic, chronic, and complex conditions affecting health. Students develop skills in critical thinking, analysis and synthesis of data from a variety of sources, and use of evidence-based practice guidelines in diagnosing and managing health care needs. In addition to cultural & spiritual diversity, students learn how patient preferences in health care decision making are incorporated in a focus on person-centered care. Prerequisite: NRSG 901 or consent of instructor.

**NRSG 903. Primary Care Practicum I: Adult/Gerontology - Nurse Practitioner. 2-4 Credits.**

This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the adult-gerontology primary care nurse practitioner as a provider of direct health care services. The patient population of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Within this role, the adult-gerontology primary care nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: NRSG 902, or Consent of Instructor.

**NRSG 904. Primary Care Practicum II: Adult/Gerontology - Nurse Practitioner. 4 Credits.**

This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the adult-gerontology primary care nurse practitioner as a provider of direct health care services. The patient population of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Within this role, the adult-gerontology primary care nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: NRSG 903 or Consent of Instructor.
NRSG 905. Primary Care Practicum III: Adult/Gerontology - Nurse Practitioner. 2-4 Credits.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the adult-gerontology primary care nurse practitioner as a provider of direct health care services. The patient population of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Within this role, the adult-gerontology primary care nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: NRSG 904 or Consent of Instructor.

NRSG 910. Methodology for Historical Research. 3 Credits.
This course is designed to provide students with knowledge about what constitutes historical scholarship and research application experience in historical research methods. Students will learn how to construct historical research questions and select the appropriate study designs, data collection procedures and analyses of the data. The course focuses on content on techniques and issues involved in generating research areas, designing and implementing studies, and analyzing and interpreting the results. This course includes a historical research application experience. This could be as an individual, small group or large group in an area of interest concerning nursing or health topics. Prerequisite: NRSG 754 or Consent of Instructor.

NRSG 911. Tools for Practice Doctorate Scholarship. 3 Credits.
Foundations and applications of tools and methods to develop advanced practice project proposals across diverse settings are explored. Scholarly evidence from a variety of sources is used to develop project proposals that enhance patient care, staff development, and organizational leadership. Relevant practice theories such as quality improvement and evaluation models serve as project proposal guides. Students acquire knowledge and skills to support professional development, to write advanced practice project proposals, and to advance doctoral scholarship. Prerequisite: NRSG 804, or consent of instructor.

NRSG 912. Business Strategies for Healthcare Leaders. 3 Credits.
The learner will develop advanced leadership skills focusing on business strategies in a variety of healthcare and industry settings in the private and public sector. Through application, analysis, synthesis and evaluation methods, using a variety of approaches to modern day business challenges, the learner is positioned to gain a high-level, mind-raising attitude about how to think differently in addressing organizational and business problems, and supporting organizational success. Practice experiences in the Leadership major (which includes the Organizational Leadership, Public Health Nursing, and Nursing Informatics specialty areas) are designed to assimilate learning associated with coursework objectives, thereby facilitating program objectives. Practice hours may be acquired through a variety of activities such as: practice contact hours, immersion into real-word experiences through interviewing and other explorative means, completing or creating specified policies or processes, demonstrating competencies in experiential learning activities, or any combination of these components. All activities require supervised academic experience. Prerequisite: NRSG: 808, 820, 880, 881, 882 or 883, 885, 891 & HP&M 822, or Consent of Instructor.

NRSG 914. Primary Care I: Family Health. 3 Credits.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional & interprofessional approach to assessment, differential diagnosis and treatment formulation for the primary care needs of individuals and families across the lifespan. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis, and management of common episodic, chronic, and complex conditions affecting health. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing primary care needs. In addition to cultural and spiritual diversity, students learn patient preferences in health care decision making with a focus on person centered care. Prerequisite: NRSG 801, NRSG 812, and NRSG 813.

NRSG 915. Primary Care II: Family Health. 3 Credits.
The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional & interprofessional approach to assessment, differential diagnosis and treatment formulation for the primary care needs of individuals and families across the lifespan. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis, and management of common episodic, chronic, and complex conditions affecting health. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing primary care needs. In addition to cultural and spiritual diversity, students learn patient preferences in health care decision making with a focus on person centered care. Prerequisite: NRSG 914 or consent of instructor.

NRSG 916. Primary Care Practicum I: Family Nurse Practitioner. 2-4 Credits.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 915 or Consent of Instructor.

NRSG 917. Primary Care Practicum II: Family Nurse Practitioner. 4 Credits.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 916 or Consent of Instructor.

NRSG 918. Primary Care Practicum III: Family Nurse Practitioner. 2-4 Credits.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the
lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 917, or consent of instructor.

NRSG 919. Foundations for Leading and Communicating in Organizations. 3 Credits.
Theoretical foundations in organizational decision making and communication will enhance students’ development of expertise in assessing organizations, identifying systems issues, and facilitating organization- and system-wide improvements in healthcare. Traditional approaches to organizing and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures and populations. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to accurately assess, design and lead high performing healthcare organizations in a dynamic world. Prerequisite: NRSG 829 or 833 or 856 or 886 ( Practicum respective to specialty) and NRSG 941, or consent of instructor.

NRSG 920. Microsystems in Health Care Operations. 3 Credits.
Competencies necessary for studying clinical Microsystems and examining their influence on patient safety, satisfaction, and other clinical outcomes are developed in this course. Microsystems will be determined, deconstructed, analyzed for best practice, and re-constituted for the purpose of improved organizational performance. The roots of quality improvement are traced and quality improvement application within a microsystem environment is explored. Key topics include: assessment tools and models, continuous quality improvement theory, evidence-based practice, performance improvement methods (measurement, statistics, problem identification and analysis, control charts) and the development of team-based problem solving and resolution. Students examine productivity and cost indicators, strategic and operational planning, healthcare finance, relationship-building, collaboration techniques, and leadership principles. Prerequisite: Completion of graduate program in organization leadership or nursing administration, or consent of instructor.

NRSG 921. Nurse-Midwifery I: Sexual, Reproductive, and Gynecologic Health in Primary Care. 3 Credits.
The knowledge and skills necessary to promote health, prevent illness, and manage primary health care needs, including sexual, reproductive, and gynecologic care across the lifespan will be provided. Theory- and research-based therapeutic management of acute, episodic and chronic conditions across the lifespan will be explored. Professional values including standards of practice, culture, legal issues, ethics, and advanced practice roles, will be addressed. The health care delivery system will be analyzed for cost effectiveness and sensitivity in primary care. Prerequisite: NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 841, or Consent of Instructor.

NRSG 922. Nurse-Midwifery II: Preconception and Prenatal Care. 3 Credits.
Care during the antepartum period is presented, with a focus on strategies for risk reduction and early identification of deviation from normal. Biopsychosocial, and cultural, and family influences on preconception and pregnancy are analyzed. Concepts of evidence-based practice, ethics, legal and political issues, nutrition, genetics, pharmacotherapeutics, and health promotion are included. Prerequisite: NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 921, or consent of instructor.

NRSG 923. Nurse-Midwifery III: Postpartum and Newborn Care. 2 Credits.
Synthesis of the nurse-midwifery philosophy for postpartum and newborn periods is conceptualized. Health maintenance for postpartum persons and infants is explored. Evidence-based practice, ethics, legal and political issues, nutrition, pharmacotherapeutics, and health promotion are included. The nurse-midwifery role in consultation, collaboration, and referral are addressed. Prerequisite: Prerequisite: NRSG 922, or Consent of Instructor. Corequisite: NRSG 924.

NRSG 924. Nurse-Midwifery IV: Intrapartum Care. 3 Credits.
Nurse-midwifery care of uncomplicated women in the intrapartum period is presented and analyzed. Intrapartum and immediate postpartum deviations from normal, complications and emergency events are addressed. Concepts of evidence-based practice, ethics, legal and political issues, nutrition, pharmacotherapeutics, and health promotion are included. Prerequisite: Prerequisite: NRSG 922 or Consent of Instructor. Corequisite: NRSG 923.

NRSG 925. Care of Women in The Antepartal Period Practicum. 2 Credits.
This clinical practicum focuses on competencies for management of pregnant women in various health care environments. Health promotion and risk reduction in pregnant women are emphasized. Management experiences in the advanced practice role include antepartal risk-assessment, consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 841, NRSG 922 or Consent of Instructor. Corequisite: NRSG 926 or Consent of Instructor.

NRSG 926. Primary Care of Women Across the Lifespan Practicum. 2 Credits.
This practicum focuses on clinical competencies for the advanced practice nurse providing primary care and gynecologic management of women throughout the lifespan. Health promotion, complementary therapies, and evidence-based models of health care delivery are incorporated in the care of women. Clinical management experiences in the advanced practice role include but are not limited to: family planning, gynecologic health, and primary care for women from adolescence through menopause. Clinical experiences will include consultation, collaboration, and/or referral when medically necessary. Prerequisite: NRSG 841, NRSG 921 or Consent of Instructor. Corequisite: NRSG 925 or Consent of Instructor.

NRSG 927. Childbearing Family Practicum: Intrapartum, Postpartum, and Newborn. 3 Credits.
Competencies for nurse-midwifery management according to national standards of practice for the care of healthy women during labor, birth, and postpartum are demonstrated; additionally, competencies for nurse-midwifery management according to national standards of practice for the care of newborns are demonstrated. The development of a skill base for intrapartum, postpartum, and newborn emergencies is addressed. Nurse-midwifery management practice provides experience in the role of care provider during normal labor, delivery, postpartum, and newborn periods. This care may include consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 923, NRSG 924. Completion of Intermediate or Advanced Fetal Heart Monitoring Course within past 3 years. Up to-date Neonatal Resuscitation Program (NRP) certification.

NRSG 928. Nurse-Midwifery Integration Practicum. 4 Credits.
The theoretical, clinical and role components of care as delivered by the advanced nurse-midwife student are implemented through an intensive supervised clinical practicum. Advanced professional clinical skills and evidence-based practice in the assessment, management and care of women and newborns are applied. Emphasis is on increased independence and decision-making embracing the function, scope and practice of nurse-midwifery practice. Prerequisite: NRSG 925, NRSG 926, NRSG 927 or Consent of Instructor.
NRSG 929. Psychotherapeutic Interventions I: Psychiatric Mental Health Nurse Practitioner. 3 Credits.
Focus is placed on assessing vulnerabilities, social determinants and resilience as they relate to health promotion, disease prevention, symptom management, and behavior change. Mental health and common psychiatric disorders such as depression and anxiety throughout the life span are discussed. Evidence-based brief psychotherapeutic intervention frameworks including psychotherapy are applied to individuals, groups, and families across the life span. Professional issues that commonly occur in implementing the advanced practice role in psychiatric and mental health care are emphasized. Prerequisite: NRSG 748, NRSG 754, NRSG 801, NRSG 810, NRSG 812, NRSG 813, NRSG 844, NRSG 850, or Consent of Instructor. Prerequisite/Corequisite: NRSG 851.

NRSG 930. Psychotherapeutic Interventions II: Psychiatric Mental Health Nurse Practitioner. 3 Credits.
This theory course focuses on recovery-oriented, person-centered approaches for individuals, families, and populations with complex and persistent alterations in mental health functioning. Factors that affect mental health functioning will be explored with a focus on interventions that facilitate recovery including psychopharmacology. In addition, policies and socioeconomic factors that influence the delivery of mental health services will be analyzed. Emphasis is placed on identifying the unique role of the psychiatric mental health nurse practitioner (PMHNP) within an integrated, client-centered delivery system. Prerequisite: NRSG 929 or consent of instructor.

NRSG 931. Psychotherapeutics Practicum I: Psychiatric Mental Health Nurse Practitioner. 2 Credits.
This course is the first of three practicum courses. The focus of this clinical course is to apply theories and evidence-based findings in a clinical setting serving culturally diverse individuals, groups, and families. Students will have opportunities to conduct comprehensive psychiatric assessments, formulate diagnoses, and conduct therapy in conjunction with an interdisciplinary team. Prerequisite: NRSG 930, or Consent of Instructor.

NRSG 932. Psychotherapeutics Practicum II: Psychiatric Mental Health Nurse Practitioner. 4 Credits.
In this second of three practicum courses, students will apply recovery oriented, evidence-based frameworks such as biobehavioral, pharmacologic and psychosocial to individuals and groups across the lifespan with complex alterations in functioning. The psychiatric mental health nurse practitioner in collaboration with interdisciplinary team members and families coordinates person-centered culturally sensitive care. Ethical principles and legal issues are identified and integrated into care. Prerequisite: NRSG 931 or Consent of Instructor.

NRSG 933. Psychotherapeutics Practicum III: Psychiatric Mental Health Nurse Practitioner. 3-4 Credits.
In this third of three clinical practicum courses, students will demonstrate integration of knowledge from previous courses in implementing the psychiatric mental health nurse practitioner role. This includes using diagnostic reasoning, evidence-based therapy, biobehavioral, and psychoeducational interventions with culturally diverse clients from different age groups. Students will implement care within interdisciplinary teams using consultation and referral as needed to deliver person-centered culturally sensitive care. Students will work with age groups needed to meet the role of psychiatric nurse practitioner across the lifespan. Prerequisite: NRSG 932, or Consent of Instructor.

NRSG 934. Foundations of Data Science. 3 Credits.
The course is designed to provide students with foundational knowledge about data science and big data. Students will learn the skills to participate on and lead interprofessional teams analyzing health and other related data to build knowledge and apply findings to practice. Topics to be examined will include diverse types and sources of data, data management techniques, exploratory data analysis approaches, and data visualization. Prerequisite: Admission to the SON PhD program, Graduate level research course (NSRG 754 or equivalent), or Consent of Instructor.

NRSG 935. Professionalism and Scholarship Workshop. 2 Credits.
Building a foundation for advanced study is explored in the context of professionalism and scholarship. Strategies for promoting professional development while preparing for future roles as nurse scholars and nurse scientists are examined. Students are introduced to a model of scholarship that includes discovery, integration, application, and teaching. Issues associated with scientific integrity in academics, research, and services are identified and examined. Students are introduced to methods for conducting and synthesizing literature that is essential to the doctoral level student. Prerequisite: Admission to the Doctoral Program or Consent of Instructor.

NRSG 936. Philosophy of Nursing Science. 2 Credits.
This course examines the origins and development of western philosophy and science. Students will explore nursing knowledge from diverse philosophical perspectives as well as the natural and human sciences. Different conceptions of broad topics such as knowledge, personhood, the body, and technology will be examined for the investigation of nursing phenomena. Prerequisite: Admission to the PhD program, graduate level nursing theory course, or Consent of Instructor.

NRSG 937. Innovative Theories and Models for Nursing Science. 3 Credits.
This course explores innovative models and theories to guide nursing science. Historical foundations of theory are traced to current trends and future possibilities in theory development, application, and evaluation. Strategies for using existing theoretical knowledge for nursing science and to foster new knowledge are also examined. Prerequisite: NRSG 936 or Consent of Instructor.

NRSG 939. Precision Health. 3 Credits.
This course focuses on precision health as an emerging approach for health promotion, disease prevention and treatment that considers individual variability in genes, environment, and lifestyle (also known as the determinants of health). Students will learn to more accurately predict prevention and treatment strategies for various populations. This course will assist students in understanding the National Institute of Nursing Research (NINR) pathway to precision science that focuses on personalized strategies to prevent and manage symptoms across diverse populations and settings. Students will also learn about the vision reflected in the Precision Medicine Initiative to accelerate discoveries that can provide nurse scientists with new tools, knowledge, and therapies for individuals and populations. Prerequisite: Admission to Doctoral Program or consent of instructor.

NRSG 941. Preparing for Doctoral Leadership. 2 Credits.
Skills in leading, managing, and following as the doctoral graduate assumes critical roles within academia, the healthcare system, or other business entities are developed and strengthened. Students prepare to lead teams and change in healthcare through developmental exercises, career trajectory planning, and critical appraisal and application of leadership and communication theories, and power and politics to promote equity. Prerequisite: Admission to a School of Nursing Doctoral Program or consent of instructor.

NRSG 945. Synthesis Workshop I. 1 Credits.
Leadership development and technologic applications are integrated with theoretical, statistical, and research methods. Doctoral leadership skills are refined and tested through case study simulations of theory
and research applications in diverse practice settings. A qualifying examination concludes the Workshop consisting of a written and oral case study simulation. Prerequisite: BIOS 730 and BIOS 740 or equivalent, NRSG 941, NRSG 942, NRSG 946, or Consent of Instructor. Prerequisite/ Corequisite: NRSG 877.

NRSG 946. Measurement Principles and Practice. 3 Credits.
Classical measurement theory and related measurement concepts are the focus of this course. Various approaches to instrumentation are examined. Students use existing data to evaluate selected measures, with emphasis on reliability and validity. They also critically analyze published reports of instrumentation for research. Basic knowledge of concept analysis is expected prior to enrollment. Prerequisite: NRSG 940, or consent of instructor.

NRSG 948. Methods for Assessing Organizational and Clinical Practice Outcomes. 2 Credits.
This course will provide a broad overview of concepts in design and measurement strategies that are applicable to doctoral projects. A variety of approaches will be used to evaluate organizational, sociotechnical, population health, or clinical issues. Different methods, measures, and data sources relevant to these issues will be explored. Prerequisite: NRSG 754 or consent of instructor.

NRSG 949. Synthesis Workshop II. 1 Credits.
Content from the full range of doctoral courses including theory, research, statistics and professional development is integrated and synthesized. Strategies for using these content areas to meet program objectives and students' professional objectives are explored. A qualifying examination, consisting of a written and oral case study simulation, concludes the Workshop. Prerequisites: Completion of all doctoral course work. Pre/ Corequisite: NRSG 970.

NRSG 950. Symptom Science in Nursing. 3 Credits.
In this course, students will determine personalized strategies to identify, prevent, and treat the adverse symptoms of acute and chronic illness across diverse populations and settings. Biological and behavioral dynamics of symptoms (e.g., dyspnea, fatigue, impaired sleep/insomnia, pain, depression) that can change the trajectory of chronic illnesses, and how the dynamics can be optimized and maintained to prevent symptom relapse, will be discussed. Various innovative care delivery models (e.g. interdisciplinary, family-based), research methods (e.g. community engaged research, pragmatic trials) and technologies (e.g. eHealth) will be reviewed that can be used to improve symptom management and change the chronic illness trajectory especially among individuals who experience disparate health outcomes. Prerequisite: Admission to Doctoral Program or consent of instructor.

NRSG 951. Biomarkers. 3 Credits.
This course builds a foundation for doctoral students to understand how biomarkers can be used as targets for therapeutic and clinical interventions. Students will describe potential biomarkers for measures of normal biological processes, pathogenic processes, or pharmacologic responses. Biological elements ("biomarkers") associated with symptoms and symptom experiences across populations and conditions will be explored. Students are introduced to direct and indirect biomarkers and the various methods for sampling. Issues associated with sensitivity and specificity of particular biomarkers are examined. Prerequisite: Admission to Doctoral Program or consent of instructor.

NRSG 952. Qualitative Research Methods and Application. 4 Credits.
Qualitative methodologies, such as ethnography, phenomenology/ hermeneutics, grounded theory, and their epistemological origins are explored. Emphasis is placed on the appropriateness of each approach in diverse settings. Students are guided in formulating qualitative research questions and developing component parts of a qualitative research proposal. Students complete simulated qualitative research activities to gain experience in data collection and analysis. Prerequisite: NRSG 754 Health Care Research, or admission to the doctoral program.

NRSG 953. Quantitative Research Methods and Application. 4 Credits.
The course is designed to provide students with knowledge and research application experience in quantitative research methods. Students will learn how research questions lead to different study designs, data collection procedures, and analyses in nursing and health care. The course focuses on content on methodological techniques and issues involved in generating research questions and hypotheses, designing and implementing quantitative studies, and analyzing and interpreting results. The course includes a quantitative research application experience provided through the exercise in planning, conducting, and interpreting analyses with existing data. Prerequisite: NRSG 946 Measurement Principles and Practice, NRSG 934 Foundations of Data Science, BIOS 730 Applied Linear Regression, or consent of instructor.

NRSG 954. DNP Synthesis Workshop. 1 Credits.
Students will have the opportunity to demonstrate synthesis, integration, and translation of knowledge and skills acquired throughout the first half of the DNP program and during this course. Sessions and activities will focus on doctoral leadership and role transition, scientific inquiry and research application, applications of theory, and specific practice/ program related competencies. A qualifying examination concludes the course. Prerequisite: NRSG 748, NRSG 755, NRSG 804, NRSG 808; for Advanced Practice major, completion of NRSG 801, NRSG 812, and NRSG 813, and one specialty course; for Leadership major, completion of IPHI 820; NRSG 826, NRSG 880, NRSG 885, NRSG 948 or Consent of Instructor.

NRSG 959. Research Experience. 1-4 Credits.
This practicum is an intensive research experience with a specific faculty mentor. It involves working on part of the faculty mentor's current research or on a subject closely related to the mentor's work. The student submits a proposal for this research experience to the faculty mentor. After approval by the faculty mentor, the proposal undergoes necessary review and approval processes (e.g. Human Subjects Committee - IRB approval with departmental administrative review). The outcome of this experience is a paper prepared in publishable form on the research conducted or other scholarly dissemination as agreed upon (e.g. conference presentation). Prerequisite: Consent of instructor.

NRSG 960. Dissemination and Implementation Science in Healthcare. 3 Credits.
This course is designed for doctoral-level learners interested in conducting dissemination and implementation research and applying implementation strategies to improve the uptake and sustainability of evidence-based guidelines, interventions, and innovations in healthcare. Learners are introduced to the field of implementation science; theories and frameworks; research designs, measures, and analyses; implementation strategies; fidelity and adaptation; evaluation; and sustainability. Learners also examine how dissemination research and practice influences the generation, uptake, and spread of policy and guides healthcare decision making. Learners work together to co-design a dissemination or implementation science project to address a critical issue that impacts health or health systems. Leadership competencies for supporting dissemination and implementation research and practice also are explored. Prerequisite: For PhD students: NRSG 952 and NRSG 953. For DNP students: NRSG 804. For interprofessional students: doctoral level research methods or analysis course. Or consent of instructor. Pre or Corequisites: DNP students: NRSG 948.
NRSG 962. Nurse-Midwifery Professionalism Seminar. 2 Credits.
Building upon concepts of professionalism in advanced nursing practice, the nurse-midwifery student will analyze historical, political, legal, ethical, professional, societal, and cultural issues within the midwifery profession. Application of concepts essential to understanding, influencing, and leading change in midwifery will be emphasized. Prerequisite: Consent of Instructor.
NRSG 963. Advanced Leadership Residency. 1-9 Credits.
The advanced leadership residency is designed to expand the DNP student's breadth and depth of leadership knowledge and skills in an area of practice at the aggregate/systems/organization level. Students will have the opportunity to enhance their existing advanced leadership skills in one or more of the following areas: organizational and systems leadership for enhancing healthcare outcomes; quality improvement strategies to support decision-making; prediction and evaluation of practice outcomes; patient safety initiatives; health care policy; creating and sustaining change at organizational and policy levels; or ethics related to healthcare systems; information technology; knowledge management; or population health. Prerequisite: Corequisite: NRSG 919 and NRSG 941, or consent of instructor.
NRSG 964. Advanced Clinical Residency. 1-9 Credits.
The advanced clinical residency is designed to expand the DNP student's breadth and depth of clinical knowledge and skills in an area of practice. The focus can be either on the delivery of sub-specialty care services or full spectrum primary care services. Students will have the opportunity to enhance their existing advanced practice skills in one or more of the following areas: the diagnosis and management of ambulatory patients with complex diagnoses and comorbid conditions in the context of family, community and culture; the diagnosis and management of patients with complex diagnoses and/or comorbid conditions who present with acute changes in health status requiring interventions available only in an acute care setting; and the diagnosis and management of patients who are unable to function independently due to age related alteration in mental and physical status, developmental, perceptual and physical disability and chronic, degenerative illness. Students will synthesize clinical knowledge and use evidence-based decision making to construct symptom-based assessments, advanced differential diagnoses, independent therapeutic interventions, and outcome evaluation of the care of clients. Prerequisites: Post-BSN students: final practicum course or consent of instructor. Post-Master's students: A minimum of 1000 clinical hours in your current or previous work following graduation from an accredited Master's in Nursing program; National certification in your area of expertise (e.g. family, adult, psych, pediatric, CNM, etc.).
NRSG 966. Nurse-Midwifery Practicum I. 4 Credits.
This practicum course is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a nurse-midwife. This clinical practicum focuses on competencies for the management of patients in a variety of midwifery practice environments, including gender-based healthcare/women's health and care of newborns. Management experiences in the advanced practice role of nurse-midwife include health promotion and disease prevention, risk assessment, care of well persons, identification of deviations from normal, and consultation/collaboration/referral when medically necessary. Prerequisite: NRSG 924 or Consent of Instructor.
NRSG 967. Nurse-Midwifery Practicum II. 2 Credits.
This practicum course is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as a nurse-midwife. This clinical practicum focuses on competencies for the management of patients in a variety of midwifery practice environments, including gender-based healthcare/women's health and care of newborns. Management experiences in the advanced practice role of nurse-midwife include health promotion and disease prevention, risk assessment, care of well persons, identification of deviations from normal, and consultation/collaboration/referral when medically necessary. Prerequisite: Admission to midwifery specialization. Corequisite: NRSG 921.
NRSG 968. Nurse-Midwifery Practicum III: Integration. 4 Credits.
This practicum course is the third practicum course in a series of three practicum courses that prepares the student for entry into practice as a nurse-midwife. Advanced professional clinical skills and evidence-based practice are applied in a variety of midwifery practice environments, including gender-based/women's health and care of newborns. Emphasis is on increased independence and decision-making as the student embraces the function, scope, and practice of nurse-midwifery. Prerequisite: NRSG 967 or Consent of Instructor.
NRSG 969. Nurse-Midwifery Practicum IV: Ethics. 4 Credits.
The theoretical, clinical, and role components of care as delivered by the advanced student are implemented through an intensive supervised clinical practicum, which is the fourth practicum course in a series of four practicum courses that prepares the student for entry into practice as a nurse-midwife. Prerequisites: NRSG 926, NRSG 930, or consent of instructor.
The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis, and treatment formulation for the care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 973 or Consent of Instructor.

NRSG 975. Acute Care Practicum I: Adult-Gero NP. 4 Credits.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 976 Acute Care Practicum II: Adult-Gero NP or Consent of Instructor.

NRSG 976. Acute Care Practicum II: Adult-Gero NP. 2-4 Credits.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: Pre or Co-Req: NRSG 973 or Consent of Instructor.

NRSG 977. Acute Care Practicum III: Adult-Gero NP. 2-4 Credits.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 975 Acute Care Practicum I: Adult-Gero NP or Consent of Instructor. Co-Req: NRSG 974 Acute Care Practicum II: Adult-Gero NP.
determined by the student and selected faculty member. Prerequisite: Prior graduate course work in the area of study and consent of instructor.

**NURS 330. Pharmacology I. 2 Credits.** Pharmacodynamics and pharmacokinetics of drug therapy across the lifespan are discussed in order to provide a basic understanding of the patient’s reaction to a drug both therapeutically and adversely, and to predict potential drug interactions. Personal, genetic, and environmental factors affecting drug therapy are assessed in order to provide a comprehensive data base for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse’s role in drug administration, assessment of drug effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 328, NURS 329, NURS 332, NURS 333 or consent of instructor.

**NURS 331. Basic Assessment and Clinical Skills. 3 Credits.** Skills necessary to perform basic patient assessment and clinical skills are discussed and demonstrated. Opportunities are provided in a laboratory setting for students to demonstrate cognitive and psychomotor competencies of therapeutic interventions and assessment of the individual patient across the life span. The emphasis is on interviewing techniques, physical examination, and psychomotor skills. Developmental factors and risk factors, including genetic and environmental, that affect the patient’s health will be explored. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 328, NURS 329, NURS 332, NURS 333 or consent of instructor.

**NURS 332. Health and Illness: Foundations of Nursing. 3 Credits.** Concepts basic to the art and science of nursing are introduced as a foundation for safe, quality patient care. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Evidence-based principles of nursing and health promotion are integrated to prepare the student to meet the health-related needs of a patient. The nurse’s role as a member of the interdisciplinary team will be examined. Prerequisite: Corequisite: NURS 331, NURS 327, NURS 328, NURS 329, NURS 330, NURS 333, or consent of instructor.

**NURS 333. Practicum I: Foundations of Nursing. 1 Credits.** Evidence-based clinical reasoning is applied in the care of individual patients with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 331, or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 333, or consent of instructor.

**NURS 334. Professional Development II: Image, Roles, and Ethics. 3 Credits.** Ethical principles are applied to care of persons in diverse settings. Team building and group process skills are explored to facilitate students working within teams. The role of the nurse as a member of the interprofessional team is examined using concepts of ethics, advocacy, group process, and team building. The professional responsibilities and role of the advocate will be explored. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor.

**NURS 335. Quality Improvement. 2 Credits.**
Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 336, NURS 337, NURS 338, or consent of instructor.

NURS 336. Alterations in Physiological Functioning II. 3 Credits.

Building on NURS 321, this course expands knowledge of pathophysiological changes that occur within the environments of the individual in the presence of dysfunction or disease. The most common alterations in selected physiological systems are presented as a framework for clinical reasoning. Relevant risk factors, epidemiology, pathophysiologic mechanisms, and clinical manifestations across the life span (fetuses, children, pregnant women, adults, and older adults) are discussed. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 337, NURS 338, or consent of instructor.

NURS 337. Pharmacology II. 2 Credits.

In this second sequential course, students continue their study of pharmacology across the lifespan. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drugs' effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 337, NURS 338, or consent of instructor.

NURS 338. Health and Illness: Nursing Across the Lifespan. 3 Credits.

A greater sophistication of clinical judgment is developed to achieve safe and quality outcomes using multiple ways of knowing including nursing knowledge. Emphasis is placed on managing the care of patients experiencing acute and chronic illnesses and promoting health across the lifespan. Strategies to empower and engage patients/designees in all aspects of the health care process are examined. Evidenced-based therapeutic nursing interventions that meet a patient's holistic health needs will be expanded. Perspectives of other health care members will be recognized in order to collaborate and work effectively as a team to provide interdisciplinary care. Technology and communication skills are integrated as methods to support safe processes of care. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, or consent of instructor.

NURS 339. Practicum II: Nursing Across the Lifespan. 3 Credits.

Students engage patients in active partnerships to manage acute and chronic illness and promote health across the lifespan. Multiple sources of evidence are incorporated into the planning, implementation and evaluation of nursing care including nurse sensitive quality indicators. Coordination, integration and continuity of care for multiple patients will be applied in the healthcare microenvironment. Emphasis is placed on further development of clinical judgment and interprofessional collaboration to ensure safe and quality outcomes. Technology and information management tools are utilized to support safe processes of care across the lifespan. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 327, NURS 328, NURS 329, NURS 330, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, or consent of instructor.

NURS 345. Nursing of Children: Practicum. 2 Credits.

Evidenced-based clinical reasoning is applied in the care of children with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor.

NURS 346. Nursing of Adults: Practicum. 2 Credits.

Evidenced-based clinical reasoning is applied in the care of adults with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor.

NURS 347. Introduction to Healthcare Practices in Rural Communities. 2 Credits.

This course offers a broad overview of the unique challenges that are encountered in rural healthcare. Introduction to the role of the nurse within the rural healthcare setting and community is provided. Students will explore patterns of health, illness, and resources that meet the diverse needs of rural communities. Students will examine the influence of the rural community health on care practice. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339.

NURS 352. Client Assessment for the Practicing Nurse. 3 Credits.

Opportunities are provided, in a laboratory setting and with simulations, to demonstrate competencies in assessment of the individual client system across the life span. Historical data collection and psychological and physical assessment are reviewed. Interviewing techniques and the four basic methods of physical examination (inspection, percussion, palpation, and auscultation) are presented. Critical thinking is emphasized to cluster data to select and support nursing diagnoses. Prerequisite: Admission to the School of Nursing and RN licensure, or consent of instructor.

NURS 356. Using Technology and Informatics to Improve Patient Safety. 3 Credits.

Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a statistics course.

NURS 357. Introduction to the Baccalaureate Nurse Role. 3 Credits.

Contemporary issues confronting the nursing profession are discussed. Personal accountability, professional boundaries, and group process skills are explored to facilitate students working within interprofessional health care teams. Students will examine their own beliefs and values, establish personal and professional boundaries, and develop their personal philosophy of nursing. Students will explore how their lived experience will
impact their professional practice. Prerequisite: Admission to the School of Nursing or consent of instructor.

**NURS 382. Honors Seminar. 1 Credits.**
This seminar provides the Honors nursing student the opportunity to explore topics of interest and begin reviewing the current research literature on a given topic. Emphasis is placed on interaction with active nurse researchers to enable the student to identify available research opportunities in ongoing studies. Students are introduced to the application of various methods used to address nursing questions. Prerequisite: Admission to the Nursing Honors Program.

**NURS 401. Basic Spanish for Nurses. 2 Credits.**
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Students will develop working language skills, learning techniques for optimal communication, phonetics, morphology, grammar, understanding sentence structure, conjugation and cultural aspects applicable to the current health care environment. The goal is to achieve proficiency and confidence when using the Spanish language with Hispanic patients. Prerequisite: None or Consent of Instructor.

**NURS 402. Health Care of the Older Adult. 2-3 Credits.**
Students will explore concepts and theories to increase their knowledge base of the complex challenges that face older adults and their families. Emphasis will be on promotion, maintenance and restoration of health and wellness, and the prevention of disease. Internal and external environmental factors will be assessed including biophysical, psychological, behavioral, sociocultural, economic and political. Students will utilize case examples and discussion to practice integrating communication and clinical skills into the role of the nurse as a client advocate and professional health team member. A clinical experience option for one-credit hour is offered for students to provide direct care to older adults in a variety of settings. Prerequisite: NURS 360, NURS 420, NURS 434 or consent of instructor.

**NURS 408. Spirituality in Healthcare. 2 Credits.**
The focus of this elective is to explore the relationship between spirituality and a person's health. A non-religious approach with a focus on global spiritual traditions and needs will be explored. Prerequisite: Admission to the School of Nursing or consent of instructor.

**NURS 410. Primary Women's Health Care Across the Lifespan. 3 Credits.**
