All academic units can be found on the left. If you are unsure how to find your major, start with Liberal Arts & Sciences.

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details). Other years’ catalogs»

The University of Kansas is accredited by the Higher Learning Commission (https://www.hlcommission.org/component/directory/?Itemid=&Action=ShowBasic&instId=1302) (hlcommission.org), a regional accreditation agency recognized by the U.S. Department of Education. In addition, certain Lawrence and Medical Center campus programs have specialized accreditation (https://accreditation.ku.edu/).
Architecture & Design

Introduction
The University of Kansas

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

The University of Kansas School of Architecture and Design has been using interdisciplinary learning to produce pioneering leaders for more than 100 years. Our experienced, diverse faculty and innovative degree paths promote the development of creative talent that fits each student’s personal interests and abilities. Students learn through the processes of designing, drawing, and making, learning to solve problems through design-thinking, taking advantage of a wide array of global study opportunities, community engagement, and collaborative research.

Our courses are significantly influenced by the practical input of architects and designers from major firms the world over. These employers consistently say that those who receive degrees from KU are not only able to contribute as soon as they begin work, but also quickly ascend to leadership positions. Prepared as designers, critical thinkers, and problem solvers, graduates enjoy personal career fulfillment and serve, enrich, and sustain their professions and communities.

Architectural Facilities

Master of Architecture (5-year) (p. 45)
Bachelor of Science in Interior Architecture (p. 49)
Master of Architecture (3-year and 2-year) (p. 50)
Master of Arts in Architecture (p. 52)
Doctor of Philosophy in Architecture (p. 53)
Undergraduate Certificate in Architecture Acoustics (p. 55)
Graduate Certificate in Architectural Acoustics (p. 55)
Graduate Certificate in Architecture of Health and Wellness (p. 55)
Graduate Certificate in Building Information Modeling (BIM) (p. 55)
Graduate Certificate in DesignBuild (p. 55)
Graduate Certificate in Historic Preservation (p. 56)
Graduate Certificate in Participatory Design (p. 56)
Graduate Certificate in Urban Design (p. 57)

Bachelor of Fine Arts in Design (p. 67)
Minor in Design (p. 77)
Minor in Design Entrepreneurship (p. 78)
Minor in Photography (p. 78)
Undergraduate Certificate in Book Arts (p. 79)
Master of Arts in Design with a concentration in Design Management (p. 80)
Master of Arts in Design with a concentration in Interaction Design (p. 81)
Graduate Certificate in Book Arts (p. 82)

Facilities

The School of Architecture & Design (ArcD) at the University of Kansas is committed to providing students with facilities and resources to prepare for careers as designers, architects, and creative leaders.

Marvin Hall, located on historic Jayhawk Boulevard, offers connections to most ArcD campus facilities, resources, and people. Built in 1908, the four-level building houses ArcD academic services and administration offices, Department of Architecture studios and faculty offices, and multiple facilities that support students in all academic programs.

The Forum, designed and built in 2014 by ArcD students in the Studio 804 program, sits directly centered between the two campus buildings that have long been home to our academic departments. This light-filled LEED Platinum-certified glass, steel, and timber structure is a gathering place for our school community and a venue to welcome visitors. The Forum includes a 121-seat lecture hall and a multipurpose space with moveable exhibition walls, flexible furniture systems, and digital displays. The Forum Commons, a student lounge and exhibition gallery, connects The Forum to Marvin Hall.

The 160,000-square-foot Chalmers Hall, next to Marvin Hall, houses the main Design Department programs, including studios and classrooms. The building also houses the Art and Design Gallery, Art Supply Store, and Chalmers Café which were fully renovated by students in 2017. Chalmers has multi-platform computer labs with the latest software for photography, animation, CAD, 3-D modeling, video production, desktop publishing, scanning, illustration, large-and medium-format plotters, and color and black-and-white laser printers. Unique satellite computer areas are dedicated to each type of work. Also located here is a traditional film lab that includes a dark room for black-and-white photography, as well as a digital processing lab with dedicated spaces for video and digital image production. An equipment check-out facility allows students to borrow equipment they will need for photography assignments.

East Hills Design-Build Center, at 66,000 square feet, the East Hills Design-Build Center is the largest academic makerspace in the world. Home to multiple Architecture and Industrial Design design-build studios, the steel and concrete building contains fabrication labs, collaborative research spaces, a computer lab, and multiple cavernous assembly areas for ArcD students and researchers.

The historic Chamney Farm, located on KU’s West Campus on the site of a former dairy farm, is home to the school’s Center for Design Research (CDR). The award-winning LEED Platinum-certified building...
connects the converted native limestone farmhouse and restored 19th-century barn. The CDR is a working laboratory and incubator that brings together KU students, faculty, and industry representatives. This project was completed in 2011 by KU Studio 804 design-build students.

Marvin Studios (more commonly referred to as “The Mud Hut”) is home to studios, presentation space, and advanced digital fabrication labs. Students in both departments have access to advanced computer systems and automated tools to create 3D prototypes, manufacture products, and research innovative material applications.

Snow Hall, overlooking Potter Lake and Memorial Stadium stands directly across Jayhawk Boulevard from Marvin Hall and houses architecture and interior architecture studios, flexible presentation spaces, offices, and a computer lab. Located in a unified space on the first floor of Snow Hall, facilities include large studio spaces, a flexible presentation gallery, and is home to PhD in Architecture student offices.

The Helen Foresman Spencer Museum of Art houses the only comprehensive art collection in Kansas. Collections are particularly noteworthy in medieval art, 17th- and 18th-century German and Austrian painting, sculpture, American painting, prints, American photography, Japanese art of the Edo period, textiles, and decorative arts. Spencer Museum sponsors exhibitions, lectures, films, workshops, and activities that support curricular instruction in the arts.

The KU Libraries have over 5.7 million volumes in seven library locations. In addition to the physical collections, students and faculty have access to more than 1.5 million electronic books, 168,000 electronic journals, and 1,733 subscription databases. An important resource for the School of Architecture and Design is the Murphy Art and Architecture Library, which has a collection of approximately 182,000 volumes.

Undergraduate Programs

Degree programs available to entering first-year students include a 5-year professional Master of Architecture (p. 45); a professional Bachelor of Fine Arts (p. 67) in design with concentrations in Illustration and Animation, Industrial Design, Photography, and Visual Communication Design and a Bachelor of Science in Interior Architecture.

Admission

Information on undergraduate admission standards and requirements, as well as application procedures and deadlines, is found on the Department of Architecture, Department of Design and Interdisciplinary Programs pages. Visit the Office of Admissions (http://admissions.ku.edu/) (http://admissions.ku.edu) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions. Students who plan to transfer into programs and need advising assistance should contact Architecture and Design Admissions Office (http://www.arch.ku.edu) at 785-864-3167 or specific Design information at http://design.ku.edu/AppIsytoKU at 785-864-2073.

Advising

In addition to advising and academic assistance from KU offices, the School has individual advisors for each student. Advisors are available throughout the course of study by appointment, and students are expected to see their advisors at enrollment times. For Architecture and Interior Architecture and advising information, students should contact Laura Leonard at lauraleonard@ku.edu or 785-864-5130. For design advising information (http://design.ku.edu/advising/), contact Zac Shields at ZacShields@edu or 785-864-2959.

University Honors Program

The School encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu/). Students should be aware that the course load for professional architecture and design degrees may make it difficult to participate in the Honors Program.

Graduate Programs

Graduate programs include

- Master of Architecture (p. 50) (M.Arch.), a 2- year or 3-year professional degree for students already holding bachelor’s degrees in any field;
- Doctor of Philosophy in Architecture (p. 53) (Ph.D.);
- Master of Arts (M.A.) in Architecture; (p. 52)
- Master of Arts (p. 80) (M.A.) in Design with a concentration in Design Management & Strategy;
- Master of Arts (p. 81) (M.A.) in Design with a concentration in Interaction & User Experience Design

Undergraduate Scholarships and Financial Aid

Awards and scholarships are available to students at all year levels. All students who wish to be considered for KU financial aid or for the scholarships available within the School must complete applications with Financial Aid and Scholarships (http://financialaid.ku.edu/).

Graduate Fellowships and Assistantships

For information about graduate assistantships, contact the School of Architecture and Design. (http://www.saadp.ku.edu/)

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

The Office of Financial Aid and Scholarships (http://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations

For information about University regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Absences

A student with excessive absences may be withdrawn from the course by the dean.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is a free or external elective not in your major or minor. Students must submit an online form during the two week period designated by the University in order to elect a course for Credit/No Credit. For more information, visit the KU Policy Library (http://www.policy.ku.edu/).
**Warning:** Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Credit/No Credit is allowed for electives not in the major. It is not allowed for required courses or electives in the major.

ARCH 690 can only be graded as Satisfactory/Unsatisfactory.

**Graduation with Distinction and Highest Distinction**

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

**Honor Roll (Dean’s List)**

Students in the upper 10 percent of undergraduate student body who have completed at least 15 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

**Maximum and Minimum Semester Enrollment**

No student may enroll in more than 19 credits without the approval of the department. No more than 15 hours for architecture students and no more than 9 hours for design students may be taken in summer session without permission of the respective departments.

**Prerequisites and Corequisites**

The School strictly enforces prerequisites for all courses. Students enrolled in a course without successfully completing the appropriate prerequisites may be administratively dropped with notice in the first weeks of the semester.

**Probation**

**Master of Architecture, Bachelor of Arts in Architectural Studies, Interior Architecture, and Bachelor of Fine Arts in Design**

**Probation**

Student records are reviewed after each semester. A student is placed on probation if the KU semester or cumulative grade-point-average is below 2.0. Students placed on probation are sent a letter stating the length of probation and the requirements for being returned to good standing.

**Continued on Probation**

A student on probation may be continued on probation for one more semester if the following KU semester and cumulative grade-point-averages show considerable improvement, but the semester or cumulative grade-point-average is lower than 2.0.

**Dismissal**

A student may be dismissed for poor scholarship if any of the following situations apply:

1. Fall and spring KU semester or cumulative grade-point-averages are below 2.0 with no considerable improvement.
2. The student has been placed on probation and has failed to meet the conditions required to return to good standing.
3. The student has repeatedly failed to make progress toward graduation.

**Reinstatement**

Appeals for reinstatement may be submitted to the department’s probation committees at 200 Marvin Hall. A student reinstated has one semester to return to good standing.

**Good Standing**

Students with KU semester and cumulative grade-point-averages of 2.0 or above are in good standing.

**Required Work in Residence**

**Architecture Students**

All architecture students must complete 30 hours of KU work.

**Design Students**

Six of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

**Transfer of Credit**

CredTran (http://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

**Architecture and Design Students**

Only grades of C- or higher are accepted in transfer credit toward a degree. Architecture students who wish to transfer design courses may do so only upon submission of a portfolio of work done in such courses. Placement in the professional curriculum is based on completed course work, a review of the comprehensive portfolio of prior work in architecturally oriented courses, and on a space-available basis. The student must conform to the work in residence requirements stated above.

**Design Students**

Grades for studio related course work must be B or higher for transfer credit. Applicants with a lapse of four or more years since their last full-time enrollment may not expect studio credits to be accepted for transfer.

**Architecture Courses**

ARCH 100. *Architectural Foundations I.* 4 Credits.

An introductory design studio directed toward the development of spatial thinking and the skill necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include demonstrating observational and analytical skills through freehand drawing, full-scale studies in the making of objects that explore the relationship between 2D and 3D through mapping and extruding, and the design of a sequence of architectural spaces that explores path-space relationships and threshold. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought, including orthographic projection, paraline drawing, exploded views, and measured perspective. Open only to students in Architectural Engineering. Prerequisite: Approval from the Dean of the School of Architecture and Design.

ARCH 101. *Architectural Foundations II.* 4 Credits.
A continuation of ARCH 100, with major emphasis on the design relationships between architectural space, human experience, and the environment. This course focuses on the basic design of a small architectural work on a real site, beginning with site analysis, the construction of a 3-dimensional site model, the learning of organizational principles, and the understanding of how the use of precedent can inform design. The design process itself is highly iterative, from 2- and 3-dimensional parti diagramming to generate ideas, to 3D investigations at different architectural scales. In design development, students learn the impact of internal programmatic forces and external site forces on design, including the seasonal and diurnal variations in natural lighting through sun path diagrams. By the end of the semester, students will have worked through the fundamental processes of building design towards the synthesis and presentation of a final scheme. Prerequisite: ARCH 100. Open only to students in Architectural Engineering.

ARCH 103. Introduction to Architecture. 3 Credits.
An introduction to the study and practice of architecture. This course aims at orienting the student to the various disciplinary facets which make up the total architectural curriculum as well as to the various professional roles which architects can be expected to perform. Architectural study is seen as both an art and a science, and architectural practice is seen as a complex, interdisciplinary professional activity. Students taking this course must bring a lap top computer to class.

ARCH 104. Principles of Modern Architecture. 3 Credits.
A lecture course covering the emergence of technological, theoretical and aesthetic principles of modern design beginning with the socio-cultural impact of industrialization and the crisis in architecture at the end of the 19th century. Attention is given to functionalist theory, mechanical analogies and the so-called machine aesthetic of 1910-1930 and to the precedents of important design principles of modern architecture, including modular coordination, the open plan, interlocking universal space, unadorned geometry, structural integrity, programmatic and tectonic expression, efficiency and transparency and briefly explores their development in post-war and late 20th century examples.

ARCH 108. Architectural Foundations I. 6 Credits.
An introductory design studio directed towards the development of spatial thinking and the skills necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include direct observation: drawing, analysis and representation of the surrounding world, and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include but are not limited to freehand drawing, orthographic projection, para-line drawing, basic computer skills, and basic materials investigation. Students must bring a lap top computer to this class. Prerequisite: Approval from the Dean of the School of Architecture and Urban Planning.

ARCH 109. Architectural Foundations II. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to the human body as well as the architectural form. Students will engage in drawing, perspective projection, model building, and basic computer graphics. Students must bring a lap top computer to this class. Prerequisite: ARCH 108.

ARCH 110. Introduction to Computing. 3 Credits.
This course prepares students for design computation topics in the degree program. Topics covered in the class include computer basics, bitmap representation, vector-based graphics, 3-D modeling, scene modeling, building modeling, production of technical drawings, and other issues. These topics are covered in relation to architectural representation and involve skill development in both 2-D and 3-D modeling. The course includes projects that align with those covered in first-year design studios, presenting students with an alternative tool for the representation of two-dimensional diagrams and three-dimensional models. Requirements: Laptop computer with software that meets course specifications. Prerequisite: Must be admitted as a first-year student in the School of Architecture & Design.

ARCH 177. If These Walls Could Talk: Exploring KU Campus Architecture. 3 Credits.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in architecture. May not contribute to major requirements in architecture. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

ARCH 208. Form and Function. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on introducing students to the basic form determinants of architecture from limited scope exercises to complete building designs. Using diagrams and sketches, plans, sections, elevations and models, students explore the spatial ordering of human activity, site and landscape analysis, light and air modulation, simple environmental controls and energy conservation, basic framing systems, volumetric organization and the materials of building skins and envelopes. Students must bring a laptop computer to this class. Prerequisite: ARCH 109.

ARCH 209. Sustainability, Site, and Context. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on the synthesis of basic form determinants of medium-sized, multi-story public building in the urban environment. Students will demonstrate competence in basic architectural design, and preparedness for the third-year focus on materials and methods of building construction. Students are required to bring a laptop computer to this class. Prerequisite: ARCH 208.

ARCH 215. Professional Communications. 3 Credits.
This course is an introduction to visual and oral communication skills. It will build practical skills to design and communicate ideas to a variety of audiences. This practice-based approach will introduce the students to two major fundamentals of communications. Oral competency, through presentations and writing; and visual communications through color theory, layout design, and branding. The students will have an opportunity to present their work through one on one discussions, small and large group presentations. The course is intended to equip students with the practice-based tools to communicate and demonstrate their design ideas in relation to different fields and to a variety of audiences in practical situations. Prerequisite: ARCH 109.

ARCH 281. Design Workshop II: Design Thinking. 3 Credits.
This course aims to enhance student's abilities to apply concepts and methods associated with design thinking with an emphasis on ill-structured problem-solving and human-centered design. Students will gain exposure to design thinking processes including forecasting, scenario planning and various forms of analysis all of which help shape a robust problem statement that forward design innovation. This material will be covered through class discussions, readings, and a number of assignments and projects. Students will have the opportunity to develop their design-thinking competence through their final project which may
be at the level of models, product, spatial, building and/or community designs.

ARCH 359. Special Problems. 1-3 Credits. 
Special problems in architecture. The study of a particular problem in architecture involving individual research and presentation. Conferences and reports. (May be taken for Credit/No Credit.) Prerequisite: Student must submit to his or her faculty advisor, in advance, a statement of the problem he or she wishes to pursue, the methodology he or she plans to use in the program, and the objectives of the special problems. He or she must also be in agreement with the faculty member he or she proposes as instructor for the course.

ARCH 380. Design Workshop: Ideas and Methods in Planning and Design. 3 Credits.
This course focuses on design methods, ideas and approaches at the city, neighborhood and community levels. The course will introduce approaches to urban design and planning which are responsive to social, environmental and ecological issues. The goal is to develop core competencies in design thinking such as analyzing specific problems and developing possible design interventions by understanding relevant theories and analyzing case studies. Students will critically analyze past and current urban trends through case studies to inform design ideas for more equitable and sustainable communities. This material will be covered through class discussions, readings, and a number of design-oriented team projects and assignments.

ARCH 400. Interior Architecture Studio I. 6 Credits.
This course is an introduction to the basic principles and elements used in spatial organization, innovative design solutions and the practice of interior architecture, from predesign through final presentations. Prerequisite: Must be admitted to the Bachelor of Arts in Architecture Studies with an emphasis in Environmental Design.

ARCH 401. Interior Architecture Studio II. 6 Credits.
This course is an introduction to materials resources, specifications and sustainability; and helps students further their understanding of the design process by creating innovative design solutions and spatial organization for interior architecture. Prerequisite: Must be admitted to the Bachelor of Arts in Architecture Studies with an emphasis in Environmental Design.

ARCH 501. Architectural Foundations I. 6 Credits.
An introductory design studio directed towards the development of spatial thinking and the skills necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include direct observation: drawing, analysis and representation of the surrounding world and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include but are not limited to freehand drawing, orthographic projection, para-line drawing, basic computer skills and basic materials investigations. Students must bring a lap top to class. Prerequisite: Admission to M.Arch. III program and/or permission of the Chair of Architecture.

ARCH 502. Architectural Foundations II. 6 Credits.
A continuation of the Architectural studio sequence with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to the human body as well as the architectural form. Students will engage in drawing, perspective projection, model building, and basic computer graphics. Students must bring a lap top computer to this class. Prerequisite: ARCH 501 studio and admission to M.Arch 3-yr program and permission of the Chair of Architecture.

ARCH 503. Form and Function. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on introducing students to the basic form determinants of architecture—from limited scope exercises to complete building designs. Using diagrams and sketches, plans, sections, elevations and models, students explore the spatial ordering of human activity, site and landscape analysis, light and air modulation, simple environmental controls and energy conservation, basic framing systems, volumetric organization and the materials of building skins and envelopes. Students must bring a lap top computer to this class. Prerequisite: ARCH 502 and/or permission of the Chair of Architecture.

ARCH 504. Sustainability and Context. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on the synthesis of basic form determinants of medium-sized, multi-story public building in the urban environment. Students will demonstrate competence in basic architectural design, and preparedness for the third-year focus on materials and methods of building construction. Students are required to bring a laptop computer to this class. Prerequisite: ARCH 503 studio or permission of the Chair of Architecture.

ARCH 508. Material and Tectonics. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on studies in urban spaces and design development of building envelopes as related to urban public-life, structural and mechanical systems, and principles of sustainability. Students shall work individually on an advanced building design. Work will focus on medium scale, multi-story, urban-infill, buildings developed to an appropriate level of technical resolution as evidenced in clear schematic wall sections and structural proposals. Students shall demonstrate an understanding of formal ordering and building-concept development as related to the tectonic form determinants. Students are required to bring a laptop computer to this studio class. Prerequisite: ARCH 209.

ARCH 509. Designbuild. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on materiality and construction of built assemblies through hands-on activities. Development of craft, process, collaboration and technical documentation skills will be primary objective of the course. Students are required to bring a laptop computer to this studio class. Prerequisite: ARCH 209 and must be current student in the 3.5 or 5 year M.Arch degree or Arch Studies degree.

ARCH 510. Architectural Detailing. 3 Credits.
Architectural detailing during design and construction phases is a fundamental skill set for architectural practice. This course will focus on technical drawing skills and professional drawing standards and conventions, including construction documentation, shop drawings, and analytical drawing techniques aimed at exploration and communication of the technical aspects of architectural design. Prerequisite: ARCH 209.

ARCH 515. Building Information Modeling. 3 Credits.
This course will expose students to building information modeling: a digital representation of the building process that facilitates exchange and interoperability of information in digital format. The focus will be on the software's potential for reducing the information loss that occurs during each handoff of the project during the traditional delivery method. Possibilities for integrated practice including lifecycle costing and knowledge management are discussed.

ARCH 516. Portfolio Development. 3 Credits.
The aim of the course is to teach practical presentation skills using computer software, in addition to graphic design theories and strategies. This course will provide an opportunity for students to design and produce a design portfolio appropriate for internship and/or graduate school applications. Prerequisite: ARCH 208.

ARCH 520. Architectural Acoustics. 3 Credits.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor.

ARCH 521. Electro-Acoustical Systems. 3 Credits.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor.

ARCH 524. Structures I. 3 Credits.
The fundamental principles of structural behavior including stress and deformation in structural components and systems. Open to architecture students only. Prerequisite: PHSX 114.

ARCH 529. Problems in Architectural Acoustics. 1.5 Credits.
This course has the objective to introduce the students to practical problem-solving in architectural acoustics. Precedents will be introduced to frame discussions on how proper acoustical conditions can be realized within the functional parameters of a particular architectural space. Student will develop understanding of how sound behaves in an enclosed architectural space. The course will include several visits to existing architectural spaces that have specific acoustical requirements and interesting acoustical characteristics.

ARCH 530. Environmental Systems I. 3 Credits.
This introductory course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: climate and weather, environmental health, indoor air quality, thermal comfort, passive and active systems and design strategies for heating, ventilating, and air-conditioning, building acoustics, mechanical noise control, and building management systems. Prerequisite: PHSX 114.

ARCH 531. Environmental Systems II. 3 Credits.
This course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: daylighting, electrical lighting systems, electrical power distribution systems, alternative energy sources, communication systems, plumbing, transportation, and life safety systems. Prerequisite: ARCH 530.

ARCH 539. Global History of Construction and Materials. 3 Credits.
This course offers a survey of the global history of structural systems, construction techniques, and building materials from pre-history to contemporary times. The course will emphasize that historical evolution of construction system has not only been informed by technical and mathematical innovations, but has also been determined by the cultural practices of a region. Examples will be taken from across the globe to show that structure and construction have been historically associated with diverse cultural values and had profound influence on the evolution of architecture and the spatial practices of society.

The first unit of the two-part survey history course explores the historical changes of architecture in relation to civilizational change, techno-spatial experiments and town-building efforts, from the earliest evidence of human dwelling to the beginning of the industrial revolution. Emphasis is on the architecture as an integrated development of commercial, technological, and ideological transferences among different regions, nascent religious groups and evolving political enterprises. In regard to the geographical and geopolitical regions, the course includes South and Central America, Europe, Classical Greece and Italy, Asia Minor, North Africa and Asia.

ARCH 541. Global History of Architecture II: From Industrial Revolution to Present (1700 CE-Present). 3 Credits.
The second unit of study of the two-part survey history course offers a global perspective of the development of modern architecture from the industrial revolution to contemporary times. This course traces the genealogy of modern architecture to its multiple roots in European enlightenment, global dissemination of industrial knowledge, invention of new building materials and techniques, and development of architectural theory. Emphasis is on the historical context of how the diverse approaches of architects from different regions create variations of formal expressions, spatial program and theoretical underpinning, and thus create multiple meanings and images of modern architecture. Prerequisite: ARCH 340 or ARCH 540 or ARCH 640 or consent of instructor.

ARCH 552. Ethics and Leadership in Professional Practice. 3 Credits.
This course takes the perspective that architectural design is inherently an ethical act. Through this lens, students will learn the essentials of office practices, the many definitions of client and their roles in the design process, the legal responsibilities of the profession, the importance of continuous professional development and the obligation the profession has to provide civic leadership in regard to the built and natural environment.

ARCH 560. Site Design. 3 Credits.
This course introduces concepts of architectural context and site through a combination of lectures and field studies. Natural, social and built systems are presented using a range of perspectives, including holistic ones. Students will develop visual and written skills of analysis through specific site analytic and design techniques. Application exercises and ongoing analysis assignments are required. Restricted to 3.5 and 5 year Master of Architecture students. Prerequisite: ARCH 208 for undergraduate students.

ARCH 600. Special Topics in Architecture: ______. 3 Credits.
This course is for the study of architectural topics on a one time or experimental basis in response to changing needs and/or resources in the Program. It may be offered concurrently by different instructors under different subtitles as announced in the Timetable. May be repeated for credit. Prerequisite: Varies by topic.

ARCH 601. Design Research. 3 Credits.
This course will examine issues in architectural research. It will provide an overview of graduate level studies with regard to definitions, methods, skills, and techniques. The course will consist of lectures, seminars, readings and guest presentations. The class will enable students to make informed judgments about matters of quality and quantity on architectural issues. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to produce papers and essays, make sample research proposals, and other research based assignments. Limited to students in M. Arch Program with Undergraduate status. Prerequisite: ARCH 608.

ARCH 602. Accelerated Design IV. 6 Credits.
Graduate studio emphasizing urban context and design theories and architectural tectonics. Students will undertake developing a detailed wall assembly, represented through drawings and/or models. Prerequisite:
ARCH 508 and 509 (see studio grading policy) or permission of the Chair of Architecture.

ARCH 605. Visualizing Site and Natural Environmental Systems. 3 Credits.
This course advances empirical understanding and abilities to visualize natural forces as they both shape and affect siting and designing buildings that shape human experience. Students will develop abilities to demonstrate the principles of environmental systems’ design, how design criteria can vary by geographic region and the tools used for performance assessment. In-class and applied studies will help students learn about site characteristics, soils, topography, solar systems, ecology, climate, building orientation, active and passive heating and cooling, solar geometry, day-lighting and natural ventilation. Prerequisite: ARCH 109 or equivalent.

ARCH 608. Urban Dwelling. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on program analysis and design of urban building(s) and urban spaces with culture, context and precedent as major form determinants. Students are required to bring a laptop computer to this studio class. Prerequisite: ARCH 508 and ARCH 509; or ARCH 602.

ARCH 609. Integrated Design. 6-9 Credits.
An advanced architectural design studio with major emphasis on an architectural design project that uses previously learned skills through synthesizing user requirements, regulatory requirements, site conditions, accessible design, and consideration of environmental impacts. Students should also demonstrate the ability to make design decisions while integrating previously learned building envelope systems and assemblies, structural systems, environmental control systems, life safety systems, and building performance. The project design process and final product should be documented to demonstrate above abilities by using technical drawings and well-researched written documentation in addition to other means of visual representation. Prerequisite: ARCH 608.

ARCH 610. Integrated Design Documentation. 3 Credits.
Integrated design documentation, including drawings and specifications, is fundamental to the development a professional architectural project. This course is designed to complement and support ARCH 609 Integrated Design Studio in the technical documentation of the studio project and to shed light on professional expectations for design documentation. Prerequisite: ARCH 510. Corequisite: ARCH 609 Integrated Design Studio.

ARCH 614. Freehand Drawing. 3 Credits.
Open to all SADP non-graduating students interested in enhancing current freehand drawing skills, generally in the architectural realm. While a broad range of expression and graphic materials is explored, emphasis is on drawing as a notational skill, the instrument of creative expression for professional purposes as well as for lifelong artistic fulfillment. Prerequisite: Consent of instructor.

ARCH 615. Integrated Systems. 3 Credits.
This course provides a holistic understanding of building systems and active sustainable strategies. Students will examine the appropriate selection, development, and integration of environmental and structural systems covered in previous architecture courses. An emphasis is placed on the interconnectedness of these systems to building form, function, and performance. Use of simulation programs are expanded upon to quantify building performance. Prerequisite: Must be admitted to M.Arch I, II or III or Bachelor of Arts in Architectural Studies degrees.

ARCH 620. Theory of Urban Design. 3 Credits.
An examination of the relationship between architecture and urban design through contemporary interpretations of future urban form and the determinants of the location, spatial structure, growth and decline of cities. Foundations for an interdisciplinary synthesis are examined in an attempt to bridge the hiatus between large-scale architectural design and incremental adjustments to urban dynamics. Prerequisite: Must have completed ARCH 208 and be enrolled in ARCH 209 during the spring semester this course is offered.

ARCH 622. Material Investigations. 3 Credits.
This course will provide opportunities for students to learn about research methods in the realm of architectural materials. The course will have two concurrent phases: the first phase will consist of a series of field trips and lectures. The purpose of the first phase is to understand how materials are developed and made, the research involved in their development, and what are their characteristics and potential applications. The second phase will consist of a self-directed research project based on the students’ natural curiosity about a particular material or process. The project will have three components: 1) a research agenda, rigorously developed and executed; and 2) a “built” component, with actual materials, executed by the students’ own hands and financial resources; and 3) final documentation of the research project.

ARCH 623. Building Practicum. 3 Credits.
The building technology practicum is offered as a course that will afford students a “real world” experience outside of the academic setting. Students can bring their own project proposals to the practicum committee or faculty members on the committee can suggest local preservation efforts, including planning and administration, or actual physical implementation of such projects. It could also be in the interest of some students to develop skills in a specific area, i.e. model building, architectural photography, historic reconstruction, or technical documentation. Those interested in specific areas will need to work closely with the practicum committee to develop a working list of goals and objectives. Students can elect to work individually or in teams, can work outside of the semester schedule with grades assigned at the completion of the project, and will be bound by a contract approved by the practicum committee.

ARCH 624. Structures II. 3 Credits.
A continuation of ARCH 524, with focus on applying learned principles to basic contemporary structural systems such as concrete, steel, and wood framing systems. Open to architecture students only. Prerequisite: ARCH 524 or ARCH 620 and ARCH 621.

ARCH 626. Building Technology I: Construction Systems and Assemblies. 3 Credits.
This course is an introduction to the materials, processes and craft of construction. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction and the more abstract processes of design. Teaching method includes modeling and hands-on building experiences. Prerequisite: ARCH 200 or ARCH 209 or Corequisite: ARCH 408 or ARCH 409 or ARCH 503.

ARCH 627. Building Technology II: Culture of Building Technology. 3 Credits.
A continuation of ARCH 626. Introduction to industrialized production. A consideration of the detailed sub-systems and cultural practices that comprise the built environment, and the factors responsible for their design and installation. Includes discussion of building codes, mechanisms of failure, and materials selection. Lectures and demonstrations by the instructors and visitors, films, slide projections, quizzes and written examinations. A student should demonstrate an
understanding of elementary systems of construction and be able to relate this understanding to the design process. Prerequisite: ARCH 626.

ARCH 629. Acoustic Studio. 3 Credits.
This course has the objectives of introducing the art and science of "listening" to architectural spaces; exploring, from both historical and current viewpoints, how proper acoustical conditions have and can be realized within the aesthetic and functional parameters of the particular architectural space; understanding the importance of building acoustics in architectural design; obtaining the ability to discuss building acoustics with the proper use of acoustical terms and descriptions; and understanding the basics of how sound behaves in an enclosed architectural space. The course will include several visits to existing architectural spaces that have specific acoustical requirements and interesting acoustical characteristics.

ARCH 630. Theory of Architecture. 3 Credits.
An examination of architectural theories that understand the designed environment as a cultural medium and product of a sociocultural process that expresses values and ideas. Understanding of these theories will be enhanced through the analysis of paradigmatic buildings, urban form and ideologies that have influenced architectural culture.

ARCH 635. Visualizing Airflow In and Around Buildings. 3 Credits.
It is often difficult to predict the way certain environmental design features will perform if not built and tested which can be costly and time consuming. This course will analyze the performance of such designs in an efficient and cost-effective manner within a visual medium using computational fluid dynamics (CFD). CFD will provide a visual understanding of airflow behavior in and around buildings. In addition, thermal comfort and air quality will be investigated in this animated environment. The culmination of the course will be an analysis of a portion of one's studio design project. Prerequisite: ARCH 530.

ARCH 637. Architecture and Cosmos. 3 Credits.
Ideas of symmetry, harmony, proportion, and ideal form have long been used by architectural theorists and practitioners as a way of translating a traditional knowledge of the world into architectural form. Such traditional knowledge is embedded in the mathematics of Pythagoras, the philosophy of Plato, and the four part study of the cosmos (known in Western thought as "the quadrivium"—arithmetic, geometry, music, and astronomy). This course will entail the study of selected readings in this intellectual tradition as well as the analysis of buildings as they relate to the concepts learned through this study. Prerequisite: ARCH 641, History of Architecture II: Renaissance, or consent of instructor.

ARCH 639. Current/Historical Directions in Architecture. 3 Credits.
A study of contemporary or historical trends in architecture which relate to the development of individual or broad philosophies of architecture.

ARCH 646. American Architectural History. 3 Credits.
This course surveys the history of architecture in the USA from the beginning of European settlements to mid-20th century. It is organized based on place types that include, among others, towns, houses, housing, commercial developments, civic structures, agricultural and rural buildings and settlements, and religious buildings and communities. It also covers a range of topics such as architectural styles, typologies, building tectonics, patterns of diffusion, and socio-economic factors that influenced the development of these historic place types.

ARCH 647. Historic Preservation Theory. 3 Credits.
This course presents the historical development and contemporary status of the theories and philosophies of historic preservation. It particularly covers the concepts and approaches developed by UNESCO for the management of tangible and intangible cultural heritage resources worldwide and the related international charters, conventions, operational guidelines, and institutions. Using international case studies, it illustrates a range of theoretical, philosophical, ethical, and practical issues and debates in historic preservation in a global context.

ARCH 648. Historic Preservation Planning. 3 Credits.
The focus of this course is on the development of concepts and practices of retrieving, recycling, and curating the built environment from the mid-nineteenth century to the present. After a series of introductory readings and discussions, students are encouraged to investigate particular environmental, technological, social, or ideological questions of their choice, focusing on structures that demonstrate persistence over great distances and, co-existing with this persistence, ability to accommodate changes over time.

ARCH 649. Historic Preservation Technology. 3 Credits.
This course introduces students to architectural historiography and preservation technology. It covers a range of curatorial issues in preservation and adaptive reuse of historic buildings. The topics include technical documentation of historic buildings, archival research, assessment of causes of deterioration and preservation needs in historic buildings, selection of preservation strategies, and techniques of building material preservation. Also covered are the integration of sustainable technologies into historic construction and examination of the ecological advantages of adaptive reuse and preservation.

ARCH 658. Programming and Pre-Design Issues. 3 Credits.
This course will introduce the concepts, methods, techniques, and information used by the architect to establish the parameters of a project, prior to entering the formal design process. The course will introduce the student to the social, technical, leagan and economic dimensions of architectural programming. The content will introduce the core competencies in programming, site, and environmental analysis required by the profession. Programming theory, research techniques, information analysis, evaluation of significance, and creative synthesis of the multivalent factors acting upon the pre-design process of project definition will be covered. Exercises may include programming and analysis of projects and sites assigned in the Architectural Design Studio sequence. Prerequisite: ARCH 209 or ARCH 504.

ARCH 665. History of Urban Design. 3 Credits.
An exploration of the evolution of cities through the cultural and spatial development of human settlement patterns. The role of cities in the transformations of human culture from tribal communities to post-industrial society is defined in terms of the historical origins of urban institutions and functions and their transformation into spatial structure and physical form.

ARCH 690. Architecture Study Abroad. 5-6 Credits.
May be repeated up to a maximum of 18 credits. Students participate in a study abroad program approved by the Architecture Chair. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/unsatisfactory basis.

ARCH 691. Architecture Practicum. 6 Credits.
Based upon the student's approved proposal, each student will explore the process of creating the built environment by working in a setting that is intended to provide a new perspective for that student. The range of venues may include non-profit organizations, research settings, hands-on building experiences, and other professional settings as approved by the instructor. Students evaluation will include an assessment by the supervisor in the practicum settings as well as on a final paper using appropriate graphics to illustrate key points. Graded on a satisfactory/unsatisfactory basis.

ARCH 692. Documentation. 2-3 Credits.
Students will document their experience in ARCH 690 or another approved study abroad program. This is intended as a critical reflection upon the student's experience and is additional documentation produced beyond the work done for the study abroad credit. The final product will include a written paper, using appropriate graphics to illustrate key points.

ARCH 695. Internship Documentation. 3 Credits.
Students will document their experience in ARCH 691 or other approved internship or relevant work experience. The purpose of this course is to give students a structured opportunity to select, explore, research, and document a topic relevant to their internship experience and that goes beyond the work done for the internship credit.

ARCH 700. Directed Readings in Architecture. 1-3 Credits.
Individual study of special topics and problems. May be repeated for credit. Prerequisite: Graduate standing.

ARCH 720. Architectural Acoustics. 3 Credits.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor.

ARCH 721. Electro-Acoustical Systems. 3 Credits.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor.

ARCH 730. The Environmental Psychology of Health and Well-Being. 3 Credits.
This seminar examines the theories and understandings that address the health and well-being outcomes resulting from the complexity of interaction between human beings, their behavior, and designed systems or objects and how this varies across the life course. Environmental stimulation, orientation, control, restoration and their relationship to health outcomes through mediating concepts including stress, place identity and person-environment fit will be addressed. Students will engage in several research/assessment projects through the semester. Participation in class discussion will be an essential component of the class. Prerequisite: Graduate status or consent of the instructor.

ARCH 731. Architecture of Health. 3 Credits.
This is a seminar that will focus on the architectural dimensions of health and wellness. The course will investigate the ways the environment contributes to the well being (physical, emotional, spiritual) of people. The history of healthcare environments will be explored to show how healthcare environments have evolved to meet changing medical protocols and environmental technologies. A range of contemporary building types will studied, from critical-care hospitals to assisted-living residences and health spas. Students will research bibliographic sources, prepare case studies of existing health and wellness environments and prepare preliminary planning and design proposals for an environment that human well being.

ARCH 735. Graduate Seminar in Environmental Systems. 3 Credits.
The intention of this seminar is to provide a substantive overview of the literature and themes in environmental systems. It will serve to introduce students to skills required to conduct research in environmental systems. In addition, the course will entail discussions of students' works in progress, peer review sessions, and completion of a conference paper.

ARCH 762. Urban Design Studies. 3 Credits.
Seminar concerned with the factors, processes, techniques, and current issues in urban design practice.

ARCH 799. Independent Study. 1-3 Credits.
May be repeated for credit up to a total of nine (9) credits. Prerequisite: Graduate standing and consent of instructor.

ARCH 800. Special Topics in Architecture: . 1-3 Credits.
Advanced or experimental courses on specialized topics representing unique or changing needs and resources in the graduate program in architecture.

ARCH 802. Urban and Community Issues II. 6 Credits.
Continuation of the critical and rigorous investigations into issues of urban and community design with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 801.

ARCH 803. Design-Build and Materiality I. 6 Credits.
An advanced studio with an emphasis on issues of design-build and/or materiality with a focus on problem-setting, discovery, and analysis. Students are required to bring a lap top computer to this studio class. Prerequisite: ARCH 609 and/or consent of the Architecture Department Chair.

ARCH 804. Design-Build and Materiality II. 6 Credits.
Continuation of the critical and rigorous investigations into issues of design-build and/or materiality with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 803.

ARCH 805. Sports & Entertainment Internship. 6 Credits.
Faculty-directed investigations within the context of a 7-Month Sports & Entertainment professional internship experience will focus on the development of a research topic related to Sports or Entertainment architecture or Sports or Entertainment urban district planning. Prerequisite: ARCH 609 and acceptance into the sports and entertainment option.

ARCH 806. Sports & Entertainment Capstone Studio. 6 Credits.
An advanced studio focused on research and design concepts for large-scale architectural projects including stadiums, convention centers, entertainment venues, and other recreational facilities, with an emphasis on urban site analysis, programming, concept design, and building technology. Students are required to bring a laptop computer. Prerequisite: ARCH 805.

ARCH 807. Health and Wellness Design Internship. 6 Credits.
Investigations of the connections between built environments and human health and well-being. Students are exposed to environmental issues of healthcare design through seven-month professional internships in firms doing significant work in this field. Prerequisite: Successful completion of ARCH 609 and acceptance into the Health and Wellness design option.

ARCH 808. Health and Wellness Design Capstone Studio. 6 Credits.
An advanced capstone studio with an emphasis on investigations into healthy and sustainable environments and a focus on problem-solving, research, and design synthesis. The course builds on the real-world experience gained by students in their ARCH 807 internships. Prerequisite: ARCH 807.

ARCH 809. Study Abroad. 6 Credits.
An advanced studio abroad involving directed investigations with a focus on problem-setting, discovery, and analysis. Prerequisite: ARCH 609.

ARCH 810. Public Interest Design Studio. 6 Credits.
An advanced studio with an emphasis on engaging community stakeholders and the general public, with a focus on problem-setting, discovery, and analysis. Prerequisite: ARCH 809.

ARCH 811. Architectural Investigation I. 6 Credits.
A workshop-based course involving approved self and group directed investigations in a particular area of architectural investigation with a focus
on problem-setting, discovery and analysis. Students are required to bring a laptop computer to this studio class. Prerequisite: ARCH 609.

ARCH 812. Architectural Investigation II. 6 Credits.
Continuation of the critical and rigorous investigations in a particular area of architectural investigation with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 811.

ARCH 813. Urban Design Internship and Cooperatives. 6 Credits.
Faculty-directed investigations within the context of a 7-month Urban Design professional internship experience will focus on the development of research topics related to urban design. It has an emphasis on professional collaboration and scholarship. Prerequisite: ARCH 609 and acceptance into the Urban Design Internship program.

ARCH 814. Urban Design Capstone Studio. 6 Credits.
An advanced studio centered upon the research and development of transformational urban design projects, including district framework strategies, infrastructure and public realm proposals. Projects will emphasize site research and analysis; urban equity and access; public space programming; ecological resiliency; architectural concepts and emergent technology. Students are required to bring a laptop computer. Prerequisite: Successful completion of ARCH 813 or an equivalent studio as approved by Architecture Program Chair.

ARCH 815. Global Internship: _______. 6 Credits.
An architectural internship that is part of the global internship program with a focus on international architectural design practice, and professional development. Prerequisite: ARCH 609 and acceptance into the Global Internship Program.

ARCH 816. Global Internship Documentation. 3 Credits.
A documentation and reflective analysis of the experience, and professional development of the student during their Global architectural internship. Prerequisite: ARCH 609 and acceptance into the Global Internship Program. Corequisite: ARCH 815.

ARCH 830. Designing Healthy Places and Communities. 3 Credits.
This seminar investigates the research-based evidence regarding health outcomes at four different levels of dwelling: settlement, institution, home and proximate. Research domains that will be explored include how the urban fabric impacts active living; the role of public parks in urban health; environmental factors on health outcomes in hospitals and workplaces; environmental pathogens in the home; and ergonomics. Healthy design will be understood as an important variable impacting people’s health by: increasing physical activity; reducing injury; improving air and water quality; minimizing environmental degradation; decreasing mental health stresses; and strengthening social fabric. Environmental assessment audits appropriate at various scales as well as space syntax as an analytic tool will be introduced and utilized. Participation in class discussion will be an essential component of the class. The semester will include a problem-based service-learning project requiring application of research in a real-life setting and active student reflection. Prerequisite: Graduate status or consent of the instructor.

ARCH 899. Thesis or Project Research. 1-6 Credits.
Independent study, research and project work leading to the submission of a master’s thesis or master’s project. May be repeated for credit. Note: In some cases a Comprehensive Oral Examination Option may be substituted. Prerequisite: Permission of the Architecture Program Chair.

ARCH 930. Doctoral Seminar I. 1 Credit.
The purpose of this discussion-based seminar is to explore issues of architectural research from a variety of perspectives. May be repeated up to a maximum of two (2 credits). Prerequisite: Admission to the Ph.D. in Architecture Program or consent of the Architecture Program Chair.

ARCH 931. Theories of Architectural Inquiry. 3 Credits.
This course will introduce the doctoral student to the major historical and theoretical foundations of architectural research. Architectural inquiry will be defined from diverse and distinct perspectives, and it will be assumed that buildings should be viewed as physical and cultural artifacts, as elements within larger social, natural and urban contexts, and as products of design and fabrication processes. The course will be a seminar format in which students will contribute to the discussions through independent research and critical analyses of the assigned readings and lectures. Prerequisite: Admission to the Ph.D in Architecture Program or consent of the Architecture Program Chair.

ARCH 951. Methods of Inquiry in Architectural Research. 3 Credits.
This course will provide students a foundation in methods of inquiry in researching the built environment. The purpose is to train students in developing research strategies applicable to the areas of design-fabrication processes, dwelling and community, and health and sustainability. Students will be exposed to a variety of methods of inquiry drawn from a number of disciplines. Through critical reading and content analysis, students will consider the value of scholarly research, learn to develop research questions, understand the nature of evidence, and the writing, presentation and illustration of scholarship. The course will be a seminar format in which students will contribute to the discussions through independent research and critical analyses of the assigned readings and lectures. Prerequisite: Admission to the Ph.D. in Architecture Program or consent of the Architecture Program Chair.

ARCH 958. Research Practicum Preparation. 1-6 Credits.
In this course, the students will frame a research question and develop a research proposal. The course is intended to serve as preparation for ARCH 959. Prerequisite: ARCH 931 and ARCH 951.

ARCH 959. Research Practicum. 4 Credits.
This is a research project undertaken and completed under the supervision of the student’s major professor. The student designs, executes, and completes a small scale research project and produces a document of publishable quality within his/her area of inquiry. The project is intended to serve as a pilot study leading towards the dissertation. Prerequisite: ARCH 958.

ARCH 999. Doctoral Dissertation. 1-9 Credits.
Individual research work. A minimum of nine credits is required for the degree. May be repeated for credit. Prerequisite: Successful completion of the Comprehensive Oral Examination.

Architecture Courses
IA 205. Professional Communications Skills. 3 Credits.
This course is an introduction to visual and oral communication skills. It will build practical skills to design and communicate ideas to a variety of audiences. This practice-based approach will introduce the students to two major fundamentals of communications. Oral competency, through presentations and writing; and visual communications through composition, color theory, typography and branding. The students will have an opportunity to present their work through one on one discussions, small and large group presentations. The course is intended to equip students with the practice-based tools to communicate and demonstrate their design ideas in relation to different fields and to a variety of audiences in practical situations. Prerequisite: ARCH 109 and ARCH 110.

IA 208. Interior Architecture Studio I. 6 Credits.
This second-year design studio is responsible for introducing students to the basic application of design determinants of interior architecture in which precedents research, programming, design, and presentation skills are developed. Design solution methodologies for medium and small scale interior spaces allow students to explore complex spatial configurations and programming, user centered design solutions, human psychology, behavior in space, and the ability to apply accessibility requirements in their design solutions. Students will demonstrate their explorations with written narratives, visual presentations and visual communication skills not limited to, sketching, diagramming, photography, digital representations, and physical models. Prerequisite: IA 208 Interior Architecture Studio I.

IA 209. Interior Architecture Studio II. 6 Credits.
A continuation of IA 208 Interior Architecture Studio, the emphasis of this design studio is to develop the application of design determinants in which architecture/design precedent study, programming, materials and furniture integration, and presentation skills are developed. Design solution methodologies for medium scale interior spaces allow students to explore complex spatial configurations and programming, user centered design solutions, furnishings, manufactured products, materials and finishes integrations. Students further develop design skills to address human psychology and behavior in space, and the ability to apply accessibility requirements in their design solutions. Students will demonstrate their explorations with written narratives, verbal presentations and visual communication skills not limited to, sketching, diagramming, photography, digital representations, and physical models. Prerequisite: IA 208 Interior Architecture Studio I.

IA 210. Human Factors in the Built Environment. 3 Credits.
This course provides an introduction to human factors theory, data, and analysis from an architectural perspective. Topics covered include how proxemics, anthropometrics, ergonomics, and material choices in the built environment impact our psychology, behaviors, and health. Furthermore, students will learn how human-centered design can be used to create optimal environments for diversity and inclusion. Open to students enrolled in the Interior Architecture degree. Restricted to students in the IA program. Prerequisite: Must be admitted to the IA program and ARCH 109.

IA 220. Sustainable Interior Materiality. 3 Credits.
This course is an introduction to the application of materials, processes, specification, and craft in the construction of the built environment. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction related to materials selections and the abstract processes of tectonics design. Students will demonstrate their explorations through different methods including model building and hands-on building experiences. Prerequisite: IA 210.

IA 230. Lighting Design and Technology. 3 Credits.
An exploration of topics on natural lighting and illuminance in interior spaces. Includes light sources, technology, specifications of luminaires and design applications through technical drawings. Prerequisite: IA 208, IA 510.

IA 240. History and Theory of Built Environments I. 3 Credits.
Chronological survey of historic architectural and interior environments in European and non-European contexts from Classical periods up to the 19th Century. Emphasis is on how social, cultural, political and economic influences have shaped the built environment around the world, including cross-influences on furniture, material culture, design objects, and major European art movements during these periods. Prerequisite: Sophomore standing.

IA 241. History and Theory of Built Environments II. 3 Credits.
Chronological survey of historic architectural and interior environments in European and non-European contexts from Classical periods up to the 19th Century. Emphasis is on how social, cultural, political and economic influences have shaped the built environment around the world, including cross-influences on furniture, material culture, design objects, and major European art movements during these periods. Prerequisite: Sophomore standing.

IA 300. Special Topics in Interior Architecture: ______. 3 Credits.
Study of special topics related to interior architecture in response to changing needs and/or resources of the interior architecture degree program. It may be offered concurrently by different instructors under different subtitles as announced in the semester timetable. May be repeated for credit. Prerequisite: Varies by topic.

IA 308. Interior Architecture Studio III. 6 Credits.
This third-year architecture studio builds on the skills developed in the second-year IA Studios. It covers design development of a nonresidential medium scale project. Students work individually to explore application of complex programming, spatial configuration, sustainability, lighting design, acoustics, psychology of a space, human experience, and ability to apply code and accessibility requirements to their projects. Students will explore manufactured products and furniture systems with an emphasis on material selections and specifications. Students will demonstrate their explorations with written narratives, verbal presentations, and visual communication skills not limited to, sketching, diagramming, photography, digital representations, and physical models. Prerequisite: IA 209.

IA 309. Advanced Interior Architecture Studio. 6 Credits.
Continuation of the Interior Architecture studio sequence with an emphasis developing advanced skills of design process, design research, building codes and regulations, materiality, technical documentation, and design production. Prerequisite: IA 308.

IA 322. Furniture Design. 3 Credits.
This course explores the methodology of furniture design and construction. Investigative studies of theory, materials and construction methods of classical, modern, and contemporary furniture design result in a basic knowledge of human factors, design processes, and tectonics. Students will develop skills in design and construction of a piece of furniture from using interior millwork to advanced digital technology. Prerequisite: IA 220.

IA 341. History of Interior Architecture. 3 Credits.
This lecture course offers a survey of interior spaces and built environments in relationship to historical, architectural, religious, political, cultural, and social context of different eras. This course provides a global overview of the historical evolution of interior spaces and furnishings from pre-historic times to the 20th century and covers geographical areas of Europe, America, Latin America, Asia, Middle-East and Africa. Students will be asked to demonstrate their learnings in the form of research, drawings, and written papers. Prerequisite: Must be admitted to the IA Program and ARCH 541.

IA 359. Special Problems. 1-3 Credits.
Special problems in Interior Architecture. This study of a particular problem in Interior Architecture involving individual research and presentation, conferences and reports. Prerequisite: Student must submit to his/her faculty advisor in advance, a statement they wish to pursue. The instructor must give permission to study with the student.

IA 390. Study Abroad. 5 Credits.
Students participate in a study abroad program approved by the IA program. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be admitted to the IA Degree program.

**IA 401. Professional Internship. 3 Credits.**
Students will have an opportunity to work in a professional firm approved by the IA program. In addition to the work experience students will document their internship or relevant work experience. The purpose of this course is to give students a structured opportunity to select, explore, research, and document a topic relevant to their internship experience. Prerequisite: IA 508.

**IA 405. Professional Communications Skills. 3 Credits.**
This course is an introduction to visual and oral communication skills. It will build practical skills to design and communicate ideas to a variety of audiences. This practice-based approach will introduce the students to two major fundamentals of communications. Oral competency, through presentations and writing; and visual communications through composition, color theory, typography and branding. The students will have an opportunity to present their work through one on one discussions, small and large group presentations. The course is intended to equip students with the practice-based tools to communicate and demonstrate their design ideas in relation to different fields and to a variety of audiences in practical situations. Prerequisite: Must be admitted to the BS Interior Architecture degree.

**IA 408. Design Research. 3 Credits.**
A seminar-based elective that exposes students to critical interior design research approaches, including but not limited to programming, post-occupancy evaluations (POE), global and cultural dimensions, and design thinking. Topics variable on accreditation needs, represented by subtitles as announced in the semester timetable. May be repeated for credit. Prerequisite: IA 308.

**IA 409. Integrated Interior Architecture Studio. 6 Credits.**
An advanced studio with an emphasis given to the student’s demonstration of integration of all previously learned design skills. These include program analysis, space configuration, formal design composition, structure, materials and methods of construction, technical development of interior spaces, environmental systems, lighting design, acoustics, code and regulation compliance, and principles of sustainability. Students should also demonstrate an appropriate awareness of history, theory, and culture of the given context. The level of project development should be demonstrated by technically precise drawings and well-researched written documentation in additional to other means of representation. Students work in groups and with professional consultants. Prerequisite: IA 308.

**IA 508. Interior Architecture Studio III. 3 Credits.**
This third-year architecture studio builds on the skills developed in the second-year IA Studios. It covers design development of a nonresidential medium scale project. Students work individually to explore application of complex programming, spatial configuration, sustainability, lighting design, acoustics, psychology of a space, human experience, and ability to apply code and accessibility requirements to their projects. Students will explore manufactured products and furniture systems with an emphasis on material selections and specifications. Students will demonstrate their explorations with written narratives, verbal presentations, and visual communication skills including but not limited to, sketching, diagramming, photography, digital representations and physical models. Prerequisite: IA 209 Interior Architecture Studio II.

**IA 509. Design-Build Studio. 6 Credits.**
A continuation of the Interior Architecture studio sequence with major emphasis on materiality and construction of built assemblies through hands-on activities. Development of craft, process, collaboration and technical documentation skills will be primary objective of the course. Prerequisite: Must have completed IA 209 Studio.

**IA 510. Human Factors in The Built Environment. 3 Credits.**
This course provides an introduction to human factors theory, data, and analysis from an architectural perspective. Topics covered include how proxemics, anthropometrics, ergonomics, and material choices in the built environment impact our psychology, behaviors, and health. Furthermore, students will learn how human-centered design can be used to create optimal environments for diversity and inclusion. Open to students enrolled in the Interior Architecture degree. Restricted to students in the IA program. Prerequisite: Must be admitted to the IA program.

**IA 511. Ergonomics. 3 Credits.**
This course focuses on analyzing human perception and behavioral patterns in the built environment and the study of natural, cultural, social and ethical patterns and rituals. Students will survey and design a series of solutions for design problems addressing relationships between the organic and human-made environments as they relate to human experience. These explorations will be demonstrated by written narratives, universal design solutions, wayfinding techniques and ergonomics studies. Prerequisite: Must be admitted to the IA degree plan.

**IA 520. Products Materials and Specifications. 3 Credits.**
This course is an introduction to the application of materials, processes, specification, and craft in the construction of the built environment. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction related to materials selections and the abstract processes of tectonics design. Students will demonstrate their explorations through different methods including model building and hands-on building experiences. Prerequisite: Must be admitted to the IA degree plan.

**IA 522. Furniture Design. 3 Credits.**
This course explores the methodology of furniture design and construction. Investigative studies of theory, materials and construction methods of classical, modern, and contemporary furniture design result in a basic knowledge of human factors, design processes, and tectonics. Students will develop skills in design and construction of a piece of furniture from using interior millwork to advanced digital technology. Prerequisite: IA 520 Products, Materials and Specifications.

**IA 541. History of Interior Architecture. 3 Credits.**
This lecture course offers a survey of interior spaces and built environments in relationship to historical, architectural, religious, political, cultural, and social context of different eras. This course provides a global overview of the historical evolution of interior spaces and furnishings from pre-historic times to the 20th century and covers geographical areas of Europe, America, Latin America, Asia, Middle-East and Africa. Students will be asked to demonstrate their learnings in the form of research, drawings, and written papers. Prerequisite: Student must be in the IA program and have taken ARCH 540.

**IA 609. Integrated Interior Architecture Studio. 6 Credits.**
An advanced studio with an emphasis given to the student’s demonstration of integration of all previously learned design skills. These include program analysis, space configuration, formal design composition, structure, materials and methods of construction, technical development of interior spaces, environmental systems, lighting design, acoustics, code and regulation compliance, and principles of sustainability. Students should also demonstrate an appropriate awareness of history, theory, and culture of the given context. The level of project development should be demonstrated by technically precise drawings and well-researched written...
documentation in additional to other means of representation. Students work in groups and with professional consultants. Prerequisite: IA 508 Interior Architecture Studio III.

**IA 690. Study Abroad. 5 Credits.**
Students participate in a study abroad program approved by the IA program. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be admitted to the IA Degree program.

**Design Courses**

**ADS 300. Foundations in Interaction Design. 3 Credits.**
This course examines the fundamental principles and materials underlying the interactions between people, artifacts, and systems. Students will be introduced to a variety of new tools and techniques that will facilitate the prototyping of interactions/user interfaces/experiences of mobile devices, desktop devices, cars, games, consoles, kiosks, and/or apps. Projects, lectures and tutorials will provide a working knowledge of fundamental principles, processes and current tools. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

**ADS 320. KU Design Symposium. 1 Credits.**
Visiting Design professionals discuss various aspects of their work and the industry of Design. Professionals from all the Design areas of the Department are represented: Illustration & Animation, Industrial Design, Photography, and Visual Communication Design. Alternative courses may be allowed to count in place of ADS 320 in limited cases for students with immutable time conflicts. Students enrolled in this course must attend all sessions of the symposium each semester in order to earn a passing grade in the course. Open to all KU students. Graded on a satisfactory/unsatisfactory basis.

**ADS 325. Design Thinking & Research Methodologies. 3 Credits.**
Introduction to the principles of design thinking, design processes, design strategies and methods, including techniques and tools for the development of human-technology interfaces. Abstract through concrete representation methods and techniques will be applied to interaction design projects/problems. Information collection and analysis methods, scenario and prototyping methods, evaluation methods (empirical), creativity methods, and task-oriented methods (non-empirical) will also be considered. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

**ADS 340. History and Philosophy of Design. 3 Credits.**
Survey of design history from 1800 to present with emphasis on graphics, architecture, industrial and interior design movements, individuals and their influences. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

**ADS 401. Design Ethics. 3 Credits.**
Since the time of Socrates, philosophers have struggled with understanding everyday moral dilemmas. In this course, we will look at how cultures throughout history have framed everyday moral choices and how those choices apply to working as a designer/artist/architect in our contemporary world. Through presentations, guest lectures, small group discussions, and role-playing experiences, we will question and analyze ethical and moral problems faced by today's shapers of culture. This course is named after industrial designer Victor Papanek, who served as a Distinguished Professor of Architecture & Design at KU from 1981 until his death in 1998. His 1971 book "Design for the Real World" is credited as being one of the first publications which challenged designers to understand their social and ecological responsibilities. Open to all students admitted to majors and minors offered by the Department of Design. Other students may request instructor permission to enroll. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

**ADS 411. Design Trends and Forecasting. 3 Credits.**
This course introduces students to principles and theories from various disciplines concerning an understanding of cultural trends and micro-trends. Emphasis is placed on adaptation of these theories to an understanding of the practice of trends research and trend forecasting within the design practice, as well as how trends can be integrated into the designer's thinking and making process. Open to all students.

**ADS 530. Intra Design Problems: ______. 3 Credits.**
A collaborative studio across all Design Department areas of study. Students of the different areas will be organized into work groups and conduct in-depth research, investigate new problem solving methodologies, develop new applications and working knowledge of specialized subjects. Prerequisite: Junior level or higher standing in Design or Architecture or permission of the instructor.

**ADS 531. Internship Credit. 1-6 Credits.**
Students develop professional skills and problems solving through applied work with an employer in a Design field. Supervision by a professional designer, and prior approval by the relevant Area Coordinator is mandatory. May be repeated twice for credit. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Junior level or higher standing in the Design Department.

**ADS 532. Study Abroad: ______. 3 Credits.**
Students will participate in a Design focused study abroad program. The student will be required to attend group meetings prior to the trip along with development of research topics of interest. Simple documentation would be required - sketchbook/journal responding to day-to-day itinerary and other events, following the trip and presented for a grade. Prerequisite: Junior level or higher standing in Design or with permission of the instructor. Corequisite: ADS 533.

**ADS 533. Study Abroad Documentation. 3 Credits.**
Consists of research work prior to the trip as well as follow-up and required studio work due after return. A portfolio of work will be required for a grade. Course will also fulfill Design-specific requirements or studio credits for other majors. Areas may designate specific Design courses as substitutions for this course. Prerequisite: Junior level or higher standing in Design with permission of the instructor. Corequisite: ADS 532.

**ADS 560. Topics in Design: ______. 3 Credits.**
A study of different topics in different semesters in a special area of interest to a staff member and suitable qualified students. May be repeated for credit. Prerequisite: Junior standing in department or permission of instructor.

**ADS 580. Special Problems in Design. 1-6 Credits.**
A study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and advisor prior to enrollment in the course. A student may not take more than six credit hours of special problems in any one semester. Prerequisite: Junior standing in department.

**ADS 601. Design Ethics. 3 Credits.**
Since the time of Socrates, philosophers have struggled with understanding everyday moral dilemmas. In this course, we will look at how cultures throughout history have framed everyday moral choices and how those choices apply to working as a designer/artist/architect in our contemporary world. Through presentations, guest lectures, small group discussions, and role-playing experiences, we will question and analyze ethical and moral problems faced by today's shapers of culture. This course is named after industrial designer Victor Papanek, who served
as a Distinguished Professor of Architecture & Design at KU from 1981 until his death in 1998. His 1971 book “Design for the Real World” is credited as being one of the first publications which challenged designers to understand their social and ecological responsibilities. Open to all graduate students. Prerequisite: Graduate student status.

**ADS 710. Advanced Human Factors in Interaction Design. 3 Credits.**

The study of human factors principles and guidelines are fundamental to interaction design. In this course, these principles will be illustrated and applied to real-world design projects/problems. Human physical and cognitive capabilities, computer-human interface and systems properties, interaction design methods, and the physical and socio-cultural environment will be considered. Fundamental issues in human-centered systems, basic research methods, including statistics and literature searches, will be included. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 712. Advanced Design Methods. 3 Credits.**

This course will cover the principles of design thinking, design processes, design strategies and methods, including techniques and tools for the development of human-technology interfaces. Abstract through concrete representation methods and techniques will be applied to interaction design projects/problems. Information collection and analysis methods, scenario and prototyping methods, evaluation methods (empirical), creativity methods, and task-oriented method (non-empirical) will also be considered. Methods common to design-related disciplines in the social sciences, business, architecture, communication studies and engineering are integrated. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 714. Service and User Experience Design. 3 Credits.**

Business products, services and environments are often intermingled in ways that require more holistic ways of thinking and development. A challenge of service innovation is to design with an understanding of the many dimensions of human experience and satisfaction. This course elaborates how, where, when, and why design can enhance the value of business services. Theory, methods, and practice aspects of services design are presented. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 720. Graduate Seminar in Design. 1 Credits.**

Comparative studies of various areas of specialization in design. Repeat for credit to a maximum of six credit hours.

**ADS 730. Directed Reading in Design. 1-3 Credits.**

Research reading and presentation of reports on specific subjects related to the students major area of specialization. Required of all graduate students.

**ADS 740. Special Problems in Design. 1-6 Credits.**

An in-depth study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and graduate advisor prior to enrollment in the course.

**ADS 750. Design Management. 3 Credits.**

Design Management has been described as “applied innovation” or the methodical capturing of talent and resources available inside and outside an organization to create valuable new offerings, brands, and business models. This course explores the design functions in business as a means to solve difficult challenges and develop new market-facing opportunities. Subjects include brand value creation, differentiation, coordination, and transformation. Numerous cases will be discussed. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 751. Design Scenarios and Simulations. 3 Credits.**

Most organizations are imaginatively challenged and experience difficulty innovating and marketing new concept offerings. Conventional methods spotting and validating new opportunities often lack the persuasive power necessary for change to occur. Scenario-based design and simulation offers ways to vividly representing a future that is different from the past. This course presents theory, methods and practice aspects of design scenario construction and simulation. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 760. Strategic Design Innovation. 3 Credits.**

As companies struggle with the demands of increasing consumer, intense competition and downward price pressures, there is a corresponding increase in the demand for more innovative business models and higher-value offerings. These forces have significantly broadened the strategic scope of design. Advanced, multi-disciplinary design teams are being engaged early to help guide new business and product development efforts. Why, where, when, and how this is done in order to deliver on the promise of innovation is the subject of this course. Prerequisite: ADS 750 or instructor permission.

**ADS 765. Interaction Design. 3 Credits.**

Interaction Design is about creating products, services or environments that offer significant experiential value to people and economic value to organizations. This course engages the comprehensive subject of design for human experience. Building on the gamut of human factors and design methods knowledge, this offers hands-on experience in the research, analysis, modeling and simulation of original and experientially compelling design solutions. ADS 710 must be taken prior to or concurrently with this course. Prerequisite: Corequisite: ADS 710 or instructor permission.

**ADS 850. Studio Teaching Practice. 1 Credits.**

Graduate students only. Must hold an assistant instructor or teaching appointment. Credit earned does not satisfy any credit requirement for a degree. Graded on a satisfactory/unsatisfactory basis.

**ADS 860. Graduate Synthesis and Applications Seminar. 1 Credits.**

Group discussion and presentations on timely industry topics. Topics will be substantial, bridging relevant program subjects and professional area boundaries. May be repeated for up to six credit hours in subsequent semesters.

**ADS 861. Thesis Research Seminar. 1 Credits.**

Approaches to producing original design research. Methods, resources, topics and projects are discussed and evaluated. May be repeated for up to six credit hours in subsequent semesters. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 890. Thesis. 1-8 Credits.**

This course involves substantive individual research and thesis development, as well as regular discussions between student and instructor/advisor. Your ADS 890 instructor serves as your thesis advisor, and chairs your thesis committee. A thesis topic and research focus is expected very early in the term, followed by a formal thesis proposal containing clear objectives, schedule and deliverables. When green lighted, the proposed thesis is then executed by the student who prepares and presents the work to their thesis committee for evaluation. Prerequisite: Successful completion of ADS 861 and either ADS 750 or ADS 765.

**Design Courses**

**BDS 100. Design Thinking. 1 Credits.**
Design, like almost every industry, profession, school or major on campus, is forever being changed by technology, it’s reach, global access, and social innovation. From the basics of how to think like a designer or how to design a better presentation in powerpoint to how design can be situated in businesses and organizations to create innovative new products, services or social change. This course will give students an awareness of design in our everyday world; an understanding of some of the cultural, theoretical, conceptual, and practical issues related to design and designing. The ultimate goal is that by the end of this course students will know how design contributes to contemporary society and how they might use this understanding throughout their life in little and big ways. Open to all majors. Graded on a satisfactory/unsatisfactory basis.

BDS 101. Design Thinking and Making. 3 Credits. 
This course is an introduction to creative problem-solving and the fundamentals of two-, three-, and four-dimensional design. Drawing, Photography, and 2D and 3D models are used in this course as a means of design thinking to visually represent problems and solutions. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

BDS 102. Design Thinking and Making II. 3 Credits. 
This is a course for all Design Department majors and serves as a continuation of BDS 101 with a greater emphasis on examining the relationships between design and other systems: environment, society and culture, and technology and economics. One and a half hours of lecture and six hours of studio-lab per week. Students must receive at least a grade of C (2.0) in this course to continue in their Design program. Prerequisite: Must be admitted into the Design Department and have completed BDS 101 and 103 with at least a grade of C (2.0) or equivalent course work, or receive instructor permission. Prerequisite: BDS 101 and 103.

BDS 103. Drawing for Design. 3 Credits. 
This course will focus on drawing as a tool of communication through freehand exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. Some identified sections of this course will also use two-and-three dimensional modeling software. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

**Design Courses**

**ILLU 200. Foundations in Image Making. 3 Credits.**
Presentation of fundamental principles for communication through visual language. Exploration of theories in visual perception and visual communication, with focus on reading and developing visual images for intended meaning. Emphasis is placed on concept development, compositional exploration, color theory, the affect of value and color on images, and the significance of reference creation. Prerequisite: BDS 101 and BDS 103 with semester grades of "C+" or higher or instructor permission.

**ILLU 205. Drawing Media for Illustration I. 3 Credits.**
Exploration of problems in drawing for various reproduction processes. Emphasis on perspective, head drawing, the clothed and nude figure, nature illustration, perspective, and environments. Various drawing media and materials are explored. Prerequisite: ILLU 200 and VISC 200 with semester grades of "C+" or higher or instructor permission.

**ILLU 305. Image Making. 3 Credits.**
Concentrated study in developing methodologies for producing contemporary illustration. Emphasis is placed on concept development, composition exploration, value and color studies, and reference creation. Required for Illustration majors as a pre-review course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 200.

**ILLU 315. Introduction to Illustration. 3 Credits.**
Concentrated study in developing skills and techniques with media and materials that are employed in producing contemporary illustration. Continued emphasis on methods of research and idea generation. Prerequisite: ILLU 200 and VISC 200 with semester grades of "C+" or higher or instructor permission.

**ILLU 405. Drawing Media for Illustration II. 3 Credits.**
Students will explore various drawing and painting media to continue developing their mastery of representational imagery for illustration. Reference collecting, model making, and the creating of photographic reference material will be addressed. Emphasis on mark making, value and color relationships, and placing the figure in an environment is also covered. Prerequisite: ILLU 205 and ILLU 315 with semester grades of "C+" or better or instructor permission.

**ILLU 410. Fundamentals of Animation. 4 Credits.**
Concentrated study in developing skills and techniques with digital media and materials employed in producing basic contemporary animation. Development of concept, script, storyboard, and use of audio, music and sound effects are part of this animation experience. Prerequisite: ILLU 205 and ILLU 315 with semester grades of "C+" or higher or instructor permission.

**ILLU 415. Illustration Concepts. 3 Credits.**
Focus of this course is to learn how to think visually. Concentrated study on developing different forms of concepts for illustration. Continued development of technical skills and visual literacy to gain insight on how to make images that communicate unique ideas clearly. Prerequisite: ILLU 405 and ILLU 410 with semester grades of "C+" or higher or instructor permission.

**ILLU 425. Concept Art. 3 Credits.**
Introductory exploration of the process, skills and concepts necessary for successful concept art character design and effective blending of matte painting and film. Drawing will be of primary concern for this course, yet exploring digital means of character development will also be introduced. Prerequisite: Successful completion of ILLU 405 and ILLU 410 with semester grades of "C+" or higher or instructor permission.

**ILLU 435. Sequential and Narrative Illustration. 3 Credits.**
Exploration of thematic illustration through the development of a series of images based on a topic or story. Aspects of continuity, consistency, storytelling, pacing, editing, packaging and a holistic method of developing illustration are addressed. Prerequisite: ILLU 415 and ILLU 425 with semester grades of "C" or higher or instructor permission.

**ILLU 445. Advanced Concept Art. 3 Credits.**
Continuation in exploration of the process, skills and concepts for successful concept art character design, along with continued development of digital characters and 3D modeling. Prerequisite: ILLU 415 and ILLU 425 with semester grades of "C" or higher or permission of instructor.

**ILLU 510. Advanced Animation. 4 Credits.**
Continued development of concepts, scripts, storyboards, and use of audio, music and sound effects in the production of a 1-3 minute animated film. Prerequisite: Prior completion of ILLU 410, ILLU 435, and ILLU 445 with semester grades of "C" or higher.

**ILLU 535. Promotion and Marketing for Illustration I. 3 Credits.**
Focus will be on preparation for entering the profession. Development and completion of a self-promotion and marketing package will supplement and support the senior portfolio. Contemporary business practices and legal issues will be addressed. Prerequisite: ILLU 435 and ILLU 445 with semester grades of "C" or higher.

ILLU 545. Promotion and Marketing for Illustration II. 4 Credits.
Continuation of phase development and completion of a self-promotion and marketing package from ILLU 535. Additional business practices and legal issues will be addressed. Prerequisite: ILLU 510 and ILLU 535 with semester grades of "C" or higher.

Design Courses

INDD 200. Foundations in Industrial Design. 3 Credits.
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in prototyping, drawing, computer modeling, digital fabrication, and presentation are demonstrated and developed. Prerequisite: BDS 101 and BDS 103 with semester grades of "C+" or higher or instructor permission.

INDD 212. Drawing for Industrial Design I. 3 Credits.
This course will focus on drawing as a tool of communication through a variety of exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. This course will also use two- and three-dimensional modeling software necessary for all industrial designers. Prerequisite: BDS 101 and BDS 103 with semester grades of "C+" or better or instructor permission.

INDD 284. Basic Industrial Design Studio. 3 Credits.
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. Prerequisite: INDD 200 and INDD 212 with semester grades of "C+" or higher or instructor permission.

INDD 302. Intermediate Industrial Design Studio. 4 Credits.
This course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. Prerequisite: INDD 284 and INDD 312 with semester grades of "C+" or higher or instructor permission.

INDD 308. Materials and Processes. 3 Credits.
A study of modern materials, manufacturing processes, and construction methods applicable to the fields of industrial design and interior design. Design analysis of existing products, furniture, building components, and storage systems. Design assignments in furniture, storage systems, and interior space arrangements with emphasis on materials and construction. Field trips to area manufacturing and design facilities. Prerequisite: INDD 284 and INDD 312 with semester grades of "C+" or higher or instructor permission.

INDD 312. Drawing for Industrial Design II. 3 Credits.
Sketching allows product designers to generate ideas quickly, without committing resources to any single idea. This course continues to focus on sketching/drawing as a tool of communication through a variety of exercises that continues to explore form and proportion, composition, dimensional illusion and expressive characteristics. Prerequisite: INDD 200 and INDD 212 with semester grades of "C+" or better or instructor permission.

INDD 320. Directed Readings in Industrial Design. 1 Credits.
This course is an alternative to ADS 320 (Hallmark Symposium) for Industrial Design students with unavoidable scheduling conflicts. Students will watch relevant films and digital media, read important texts and articles, attend lectures, then compose and submit careful reflections on those media and experiences. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Department of Design in the School of Architecture & Design and department permission.

INDD 350. Computer-Aided Design. 3 Credits.
Students will develop the skills needed to efficiently built parametric CAD models consistent with industrial design professional standards using Solidworks, an industry standard solid modeling software. Emphasis will be placed on how to translate 2D designs into 3 Dimensional models, focusing on design for manufacturing, understanding complex surfacing, and assemblies. Students will learn how to create photorealistic renderings using Keyshot. Prerequisite: INDD 302 with a semester grade of "C" or higher or instructor permission.

INDD 378. Problems in Industrial Design: ______. 3 Credits.
Individual and/or group research projects in one of several specific design areas which will be identified on a semester by semester basis. May be repeated for credit. Prerequisite: INDD 302 with a semester grade of "C" or higher or permission of instructor.

INDD 446. Advanced Industrial Design Studio. 3 Credits.
Continuation of INDD 284 and 302 but encompassing design problems of greater complexity including group research and problem solving assignments in advanced product and service design. Advanced techniques in problem solving, concept communication, visualization, and overall design expression will be demonstrated and explored. Prerequisite: INDD 302 with a semester grade of "C" or higher or instructor permission.

INDD 448. Professional Industrial Design Studio Practices. 3 Credits.
Continuation of Industrial Design studios, projects are longer requiring a high level of demonstrated design ability for successful completion. Issues regarding professional ethics, accountability, and responsibility to public and client are discussed and implemented. Professional design, presentation, and visualization skills will be demonstrated and explored. Finished designs will include full production technical specifications. Prerequisite: INDD 446 with a semester grade of "C" or higher or instructor permission.

INDD 508. Materials and Processes. 3 Credits.
A study of modern materials, manufacturing processes, and construction methods applicable to the fields of industrial design and interior design. Design analysis of existing products, furniture, building components, and storage systems. Design assignments in furniture, storage systems, and interior space arrangements with emphasis on materials and construction. Field trips to area manufacturing and design facilities. Prerequisite: Permission of instructor.

INDD 510. Human Factors and Ergonomics. 3 Credits.
Introduction to the field of human factors appropriate to industrial, interior, interaction, and visual design. The course will cover a wide range of topics that fall underneath the umbrellas of cognitive ergonomics and physical ergonomics. This course aims to examine the cognitive and physical constraints of the human system and how design can address those issues. Prerequisite: INDD 302 with a semester grade of "C" or higher or instructor permission.

INDD 512. Methods in Design. 3 Credits.
Introduction to the study of methods of designing common to industrial, interior, and visual design. Evaluation methods (semantic differential), creativity methods (scenario writing), and task-oriented method: (PERT/CPM) will be considered in relation to design problems. Open to non-design students. Prerequisite: Corequisite: INDD 302 for industrial design majors or ENVD 200 for environmental design majors respectively. Consent of instructor for all other students.

**INDD 555. Portfolio. 3 Credits.**
Work directed toward maximizing the quality and effectiveness of the individual student's professional portfolio. Prerequisite: INDD 446 with a semester grade of "C" or higher or instructor permission.

**INDD 580. Senior Industrial Design Studio. 4 Credits.**
Course requires the negotiation and accomplishment of a comprehensive body of work, comprising independent research, ideation, refinement, detail technical specifications, renderings, and a working and tested prototype of your final design. A final report of the project is required documenting your design process, the depth and complexity of which are commensurate with expectations for entry-level professionals. Faculty may consider national or international competitions as appropriate substitutions for student derived briefs, where applicable. The nature and scope of the work (1-2 projects maximum), as well as details of anticipated accomplishment must be outlined by the student and approved by the instructor prior to the beginning of the second week of classes. In exceptional circumstances, projects may extend into both semesters, via INDD 581—this requires permission/negotiation with faculty and is to be declared as an aspiration at start of INDD 580. Prerequisite: INDD 448 and INDD 555 with semester grades of "C" or higher.

**INDD 581. Senior Industrial Design Studio II. 4 Credits.**
Course requires the negotiation and accomplishment of a comprehensive body of work, comprising independent research, ideation, refinement, detail technical specifications, renderings, and a working and tested prototype of your final design. A final report of the project is required documenting your design process, the depth and complexity of which are commensurate with expectations for entry-level professionals. Faculty may consider national or international competitions as appropriate substitutions for student derived briefs, where applicable. The nature and scope of the work (1-2 projects maximum), as well as details of anticipated accomplishment must be outlined by the student and approved by the instructor prior to the beginning of the second week of classes. In exceptional circumstances, projects may be a continuation of those started in INDD 580—this requires permission/negotiation with faculty and is to be declared as an aspiration at start of INDD 580. Prerequisite: INDD 580 with a semester grade of "C" or higher or instructor permission.

**INDD 715. Industrial Design. 2-6 Credits.**
Research-oriented advanced study in industrial design. Prerequisite: Graduate major in industrial design or consent of instructor.

**INDD 815. Industrial Design. 2-6 Credits.**
Prerequisite: INDD 715.

**Design Courses**

**PHTO 101. Fundamentals of Photography. 3 Credits.**
Open to students of all disciplines and experience levels, this course provides an introduction to the medium and language of photography. Basic DLSLR camera operation and workflow will be accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. A digital camera with full manual controls is required - RAW capable preferred.

**PHTO 177. First Year Seminar: Picturing Place: Photographing Lawrence. 3 Credits.**
Are you new to KU, Lawrence, or even the Midwest? Would you like to know your new home better? The act of photographing - observing, participating, being present - can accelerate a connection to Place. In this digital photography class, each student will identify a specific community or environment within the Lawrence area to photograph repeatedly and meaningfully over the course of the semester. Class time will be spent reviewing and refining the work, discussing its context, introducing research methods for deeper understanding of the chosen topic, and gaining inspiration from relevant historic and contemporary models of photographic inquiry. By the end of the semester, the student will have strengthened both their visual literacy skills and their ties to their new surroundings. All photographic experience levels welcome.

**PHTO 200. Foundations in Photography: Digital. 3 Credits.**
Foundations in Photography (Digital) explores the technical and creative possibilities of digital photography from image capture to print and the web. This advanced introductory-level studio course covers manual camera operation with dSLR or mirrorless digital cameras, basic digital processing workflow with Adobe software, and inkjet print or digital output methods, accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. A digital camera with full manual controls and RAW capable is preferred; a limited number of cameras are available for check-out.

**PHTO 201. Photography I. 4 Credits.**
The first of the two-part foundational Photography sequence, this majors-only course provides students with a rigorous immersion into the formal, technical, and conceptual concerns and challenges of photography by way of the view camera. Embracing both the wet and digital darkrooms, students shoot and develop sheet film that is then utilized to produce both traditional and digital prints. Intermediate digital editing methods are introduced and explored. View cameras are provided. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 101 and PHTO 200 with grades of C (2.0) or higher.

**PHTO 202. Photography II. 4 Credits.**
The second of the two-part foundational Photography sequence, this advanced course builds upon PHTO 201 with additional emphasis on color, RAW workflow, and advanced methods for digital capture, manipulation, editing, and compositing. Additionally, students work extensively with large-format inkjet printers to create custom ICC printing profiles. A digital SLR (RAW capable) camera with full manual controls is required. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHTO 201 with a grade of C or higher or permission of instructor.

**PHTO 205. Foundations in Photography: Darkroom. 3 Credits.**
This introductory studio explores the technical and creative possibilities of black & white film photography. PHTO 205 covers manual camera operation using 35mm film cameras, darkroom film developing, and silver-gelatin printing methods, accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. Cameras are provided for check-out. No darkroom experience necessary.

**PHTO 210. Understanding Photographs. 3 Credits.**
Understanding Photographs is a lecture-based course that focuses on developing a critical understanding of how images, paired with culture and society, generate meaning in both the historical and contemporary contexts. Open to students of all disciplines and experience level.
PHOTO 303. Photography I: View Camera. 4 Credits.
The first of the two-part second-year foundational Photography sequence for Photography majors, this course provides students with a rigorous immersion into the formal, technical, and conceptual concerns and challenges of photography by way of the view camera. Embracing both the wet and digital darkrooms, students shoot and develop sheet film that is then utilized to produce both traditional and digital prints. Intermediate digital editing methods are introduced and explored. View cameras are provided. Prerequisite: Admission to the Photography Major or Minor and PHTO 200 or PHTO 205 with a semester grade of “C+” or higher or instructor permission. Priority will be given to Photography majors.

PHOTO 304. Photography II: Color Digital. 4 Credits.
The second of the two-part foundational Photography sequence, this advanced course builds upon PHTO 303 with additional emphasis on color, RAW workflow, and advanced methods for digital capture, manipulation, editing, and compositing. Additionally, students work extensively with large-format inkjet printers to create custom ICC printing profiles. A digital SLR (RAW capable) camera with full manual controls is required. Prerequisite: Admission to the Photography major or minor and PHTO 303 with a semester grade of “C+” or higher, or instructor permission.

PHOTO 305. Photography III: The Moving Image. 4 Credits.
This course serves as an introduction to the principles and challenges of photography as a time-based medium. Fundamental concepts of production are introduced and explored through hands-on exercises, class presentations and discussions, lectures, critiques, and individual and group projects. Prerequisite: Successful completion of PHTO 304 with a semester grade of “C” or higher.

PHOTO 313. Lighting Studio. 3 Credits.
Lighting Studio is a fundamental course in awareness, modification, and control of light. Students work extensively with strobe and continuous light sources. Principles of natural and artificial light are introduced, explored, and applied through hands-on assignments both in and out of the studio environment. Prerequisite: Admission to the Photography major or minor and PHTO 304 with a semester grade of “C” or higher or instructor permission.

PHOTO 314. The Moving Image. 3 Credits.
This course serves as an introduction to the principles and challenges of photography as a time-based medium. Fundamental concepts of production are introduced and explored through hands-on exercises, class presentations and discussions, lectures, critiques, and individual and group projects. Prerequisite: Admission to the Photography major or minor and PHTO 304 with a semester grade of “C” or higher or instructor permission.

PHOTO 315. Experimental Processes. 3 Credits.
Experimental Processes is an introduction to the understanding and production of image-based works utilizing experimental approaches and alternative processes in an interdisciplinary environment. Prerequisite: Admission to the Photography major or minor and PHTO 304 with a semester grade of “C” or higher or permission of instructor.

PHOTO 316. Professional Practices. 3 Credits.
This course provides an introduction to standards and conventions with regards to professional photographic practice. Topics include portfolio development, copyright, contracts, grant/statement writing, presentation methods, and self-promotion. Prerequisite: PHTO 400 or PHTO 402 each with a semester grade of “C” or higher or instructor permission.

PHOTO 360. The Photobook. 3 Credits.
This class introduces students to the many potentials of photographic imagery in book form, from the traditional monograph to the narrative or lyrical and experimental. Considerations of sequencing, context, text, design, materiality, meaning, and production methods will be explored through book examples, readings, discussions, and in-class exercises. The class will culminate in the design and production of a hand-made or on-demand book. Prerequisite: PHTO 304 with a grade of C or higher or declaration of the Undergraduate Certificate in Book Arts or admission to the Photography Minor or instructor permission.

PHOTO 400. Junior Seminar. 3 Credits.
This junior-level seminar is focused primarily on the development of independent and collaborative projects through an on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photographic practice through assigned readings, presentations, and group discussion. Prerequisite: PHTO 304 with a semester grade of “C” or better or instructor permission.

PHOTO 402. Photo Media Seminar. 3 Credits.
This upper-level seminar is focused primarily on the development of independent and collaborative projects through an on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photographic practice through assigned readings, presentations, and group discussion. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: PHTO 304 or instructor permission.

PHOTO 450. Senior Seminar. 3 Credits.
This senior-level seminar is focused primarily on the further development of independent and collaborative projects through an on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photographic practice through assigned readings, presentations, group discussions, and rotating special topics. Prerequisite: PHTO 400 with a semester grade of “C” or higher or instructor permission.

PHOTO 500. Portfolio and Thesis. 4 Credits.
Taken the final semester of study, this capstone course guides students through the research, development, and refinement of a final body of photographic work and appropriate supplemental materials. Methods and strategies of presentation and dissemination are discussed and explored. Prerequisite: PHTO 450 with a semester grade of “C” or higher or instructor permission.

PHOTO 513. Advanced Lighting Studio. 3 Credits.
A continuation of the skills and principles discussed in PHOTO 313. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHOTO 313 or instructor permission.

PHOTO 514. Advanced Moving Image. 3 Credits.
A continuation of the skills and principles discussed in PHOTO 314. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHOTO 314 or instructor permission.

PHOTO 515. Advanced Experimental Processes. 3 Credits.
A continuation of the skills and principles covered in PHOTO 315. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHOTO 315.

PHOTO 560. Special Topics in Photography: ______. 3 Credits.
Special topics courses in Photography vary by instructor and provide additional opportunities for interdisciplinary research and advanced specialized study. A semester grade of "C" or higher is required in order for this course to count toward the "Major Studies Electives" component of the Photography major. May be repeated for credit. Prerequisite: PHTO 304 with a semester grade of "C" or higher or instructor permission.

**Design Courses**

**VISC 177. First Year Seminar:** 3 Credits.
A limited enrollment, seminar course for Freshmen, addressing current issues in Graphic Design. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of Academic Programs and Experiential Learning. Prerequisite: Open to freshmen only (less than 30 hours).

**VISC 200. Foundations in Typography:** 3 Credits.
Introduces the discipline, function, and tradition of typography as it relates to visual/verbal communication. Emphasis is on interrelationships of letter, word, line, and page. Projects examine two-dimensional typographic space, sequence, and information hierarchy. Prerequisite: BDS 101 and BDS 103 with semester grades of "C+" or higher or instructor permission.

**VISC 201. Visual Communication Design:** 3 Credits.
Presentation of fundamental concepts of visual and non-visual communication. Exploration of various theories of visual perception and visual communication with emphasis on reading visual images for meaning and making meaning through the construction of visual images and typography. A special laboratory section will include design thinking and making strategies and processes which are common to visual communication design from the hand-made to the computer. This course is for non-Visual Communication majors. Prerequisite: Corequisite: BDS 102.

**VISC 202. Elements of Typography:** 3 Credits.
Introduces the discipline, function, and tradition of typography as it relates to visual/verbal communication. Emphasis is on interrelationships of letter, word, line, and page. Projects examine two-dimensional typographic space, sequence, and information hierarchy. Prerequisite: VISC 200 and ILLU 200 with semester grades of "C+" or higher or instructor permission.

**VISC 204. Principles of Visual Communication:** 3 Credits.
Visual communication problems involving the student in the translation of verbal concepts and design theory into visual images. This course focuses attention on the process of defining problems, gathering information, and formulating clear, powerful, and persuasive visual statements. Introduction to methods of research, idea generation, and image making will be an integral part of this course. Prerequisite: VISC 200 and ILLU 200 with semester grades of "C+" or higher or instructor permission.

**VISC 302. Typographic Systems:** 4 Credits.
Further exploration of typographic form and manipulation of variables which affect content; stresses the importance of typographic composition as an integral component of visual communication design. Projects examine advanced structures of typographic space, work-image structure, and typographic details and aesthetic. Prerequisite: VISC 202 and VISC 204 with semester grades of "C+" or higher or instructor permission.

**VISC 304. Designing Understanding:** 4 Credits.
Exploration of the relationships among people, places, and the visual objects and information they use. Attention on the different roles of the designer as observer, empathizer, communicator and experience builder. Introduction to information design processes and procedures of understanding by ordering data into useful and persuasive information tools and experiences. Various methodologies will be explored for visualizing information for clarity, resonance, and editorial voice with special attention to the relationships among audience and context in the creation of meaning. Prerequisite: VISC 202 and VISC 204 with semester grades of "C+" or higher or permission of instructor.

**VISC 310. Letterpress:** 3 Credits.
This course concentrates on the traditional methods of hand typesetting, using the Department of Design's collection of lead and wood type. Learn how to use a pica rule, composing stick, leading, spacing material, the California Job Case, mix ink and operate a Vandercook proof press and C&P or Golding platen. Be inspired by visits to Special Collections. Emphasis will be placed on the acquisition of skills and the creative use of type and images. Prerequisite: BDS 101 with a semester grade of "C+" or higher or instructor permission.

**VISC 360. The Photobook:** 3 Credits.
This class introduces students to the possibilities of visual communication through photobook design, from the traditional monograph to the narrative or lyrical and experimental. Considerations of sequencing, context, text, materiality, meaning, and production methods will be explored through book examples, readings, discussions, and in-class exercises. Visual Communication students will partner with a photographer in the class to design and produce a hand-made or on-demand book. Prerequisite: VISC 304 with a semester grade of "C+" or higher or declaration of the Undergraduate Certificate in Book Arts or instructor permission.

**VISC 402. Designer as Author:** 3 Credits.
Building from the structures and approaches of VISC 302, the course is a research-based examination of traditional, non-traditional and expressive uses of the typographic medium. Projects emphasize the student as both content generator as well as designer and include development of text + image narrative, word as image and typographic "voice" while further refining technical proficiency. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher.

**VISC 404. Designing for Social Interactions:** 3 Credits.
Introduces the discipline of designing for dynamic media (i.e., internet, on screen, multi-media.) Emphasis will be placed on concept development and on the fundamental principles of information hierarchy, user experience, navigation strategies, site development and site architecture. Projects, lectures and tutorials will provide a working knowledge of current tools and techniques, while exploring the issues of narrative structure, rhythm, space, animation, sound, and video. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher.

**VISC 405. Designing Brand Identity:** 3 Credits.
A brand's visual identity expresses an organization's big idea of what it is, how it lives in the world, who is serves and why. Simply put, it identifies, explains and persuades. A visual brand identity needs to engage and communicate to specific audiences while differentiating the brand from its competition. This class will explore the creation of brand identity elements such as logos, icons and symbols, as well as how these can be organized into a "system of parts" that can communicate across multiple applications. Additionally, logo, symbol and iconography workflow and methods of brand identity ideation and conceptualization will also be explored. Prerequisite: Successful completion of VISC 302 and VISC 304 with semester grades of "C+" or higher and successful completion of the Second Year Full Review or instructor permission.

**VISC 410. Digital Letterpress:** 3 Credits.
In this course students will explore the possibilities that digital technologies offer to the letterpress printer, including laser cutting and polymer platemaking. Students will learn how to prepare digital files to make negatives, and to process and print polymer plates on the Vandercook press. Emphasis will be placed on creativity and craft.
Starting with the simplest of techniques, projects will grow in increasing technical and aesthetic complexity. No previous letterpress experience is required. Knowledge of Adobe InDesign and Illustrator is essential. Prerequisite: Permission of instructor.

**VISC 414. Publication and Editorial. 3 Credits.**
Exploration of topics dealing intensively with editorial concept and format organization. Projects stress advanced problems in the integration of text and image through the development of complex and variable structures. Emphasis on thorough researching of content and audience as well as understanding of production/execution implications of solutions. Prerequisite: VISC 302 and VISC 304 with semester grades of C+ or higher or instructor permission.

**VISC 415. Motion Graphics. 3 Credits.**
Introduction to the elements, principles and history of motion design. Emphasis on the conceptualization, planning and storyboarding of time-based media with respect to some specific, clearly stated aesthetic and/or communicative purpose. Students will examine methods for synthesizing still & moving imagery, typography and audio, in motion, using Adobe After Effects in combination with other software such as Final Cut Pro, Illustrator and Photoshop. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 420. Exhibition Design. 3 Credits.**
This course will explore how exhibitions are conceptualized, designed and made. It will look at the role of curators, exhibition designers, graphic designers as well as the audience of cultural institutions. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 425. Environmental Graphics. 3 Credits.**
This course will examine core principles and practices of environmental graphic design. Many of these concepts will be concerned with the visual aspects of wayfinding, communicating identity and information, and shaping the idea of place. Some of the topics discussed will include: signage, exhibit design, identity graphics, pictogram design, mapping, civic design and themed environments. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 435. Book Arts. 3 Credits.**
Producing books in editions is a complex undertaking. Students work in teams to create or compile content of their choosing, then edit, design, and bind their own books in a small edition. The class combines both traditional letterpress technology and digital interface for the creation of text and image. Each student receives two copies of the team’s final book, one copy is archived in Special Collections at the Spencer Research Library. Prerequisite: BDS 101 with a semester grade of "C+" or instructor permission.

**VISC 440. Bookmaking. 3 Credits.**
Students will learn to make a variety of book structures and enclosures, from historical to contemporary. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of bindings for future reference. Students will document paper that is made in class and create a record for themselves, other students, and the Department of Design. Prerequisite: BDS 101 with a semester grade of "C+" or higher or instructor permission.

**VISC 455. Designing Information. 3 Credits.**
Making preliminary visualizations, models, and prototypes. Examines words, diagrams, type, and sequencing to restructure messages so that they tell a story more effectively. Editing images to make messages clear, unambiguous and understandable by their intended audience(s). Designing the appearance of an information product so that users can find what they want and understand it when they get there. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 520. Designing for Change. 4 Credits.**
Exploration of branding, service and interaction design opportunities that respond to real-life complexity: audiences, systems and contexts. Introduces business and design thinking strategies associated with brand development and the idea that design plays a vital role in our local, national, and global society and well-being. Emphasis on the methods of thinking and research which precede the making of design as well as the importance of writing and verbal presentation to the visual communication design profession. Prerequisite: VISC 404 and VISC 405 with semester grades of "C" or higher or instructor permission.

**VISC 525. Senior Problems. 3 Credits.**
Goal-oriented graphic design problem-solving with emphasis on research, analysis, and synthesis of complex visual problems. Will allow for in-depth study of professional design issues and topics; provides a forum for multi-disciplinary collaboration with related professional disciplines. May be repeated for credit. Prerequisite: VISC 530 with a semester grade of "C" or higher, or instructor permission.

**VISC 530. Portfolio. 4 Credits.**
Instruction in the organization and presentation of a professional quality visual portfolio. Readings, feedback and online collaborations will focus on the development of a focused portfolio consistent with the individual student's pursuits. Prerequisite: VISC 402 and VISC 520 with semester grades of "C" or higher or instructor permission.

**VISC 560. Special Topics in Visual Communication: ___. 3 Credits.**
A study of different topics in different semesters in a special area of visual communication. Entry by permission of instructor. May be repeated for credit.

**VISC 706. Graphics. 3-6 Credits.**

**VISC 710. Letterpress. 3 Credits.**
This introductory course in letterpress will instruct the student in methods for printing from moveable type and other type-high surfaces. The discipline will be explored from a historic as well as artistic perspective. Emphasis will be placed on the acquisition of skills and vocabulary, and the creative use of type and techniques. Prerequisite: Graduate student status and instructor permission.

**VISC 712. Letterpress II: Form and Content. 3 Credits.**
Artists' books are books created as original works of art that push the boundaries of the traditional book. This course will focus on the interdependence of form and content through studio work, readings, and the examination of historical and contemporary models. Students will explore a wide range of book structures from basic to innovative. Final outcomes will combine images, hand set type, and digital processes to create both one-of-a-kind, and limited edition artists' books. VISC 710 is recommended, but not required. Open to all majors. Prerequisite: Permission of the instructor.

**VISC 735. Book Arts. 3 Credits.**
Combines wide range of traditional letterpress and digital processes for type and image for individually determined student book projects. Projects will culminate in a small printed and bound edition. Prerequisite: Graduate student status and instructor permission.

**VISC 740. Bookmaking. 3 Credits.**
This course will seek to acquaint the student with the origins of the book, paper, and pre-paper writing surfaces. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of structures and variations for future reference. Students will
document paper that is made in class and create a record for themselves, other students, and the School of Architecture & Design. Prerequisite: Graduate student status and instructor permission.

Department of Architecture

Introduction

Architecture is inherently an interdisciplinary field of study, integrating knowledge from art, science, and the humanities. As a method of practice, it is a complex, collaborative, professional activity aimed at improving the quality of life for people and the planet. The discipline requires creative, critical, agile, and integrative thinking. Architecture deals with highly complex problems and aims to solve them not only competently, but in a way that ennobles society. The curriculum responds to these considerations by offering a series of overlapping sequences in professional and academic coursework.

Mission

The Department of Architecture engages in progressive knowledge generation, dissemination, and application through its core activities of teaching, scholarship, and service to enhance the quality of life for people and the planet. The department furthers this mission by offering the following degree programs:

- The Master of Architecture (a NAAB-accredited professional degree),
- the Master of Architecture Track I (5+ year) (p. 45)
- the Master of Architecture Track II (2-year) (p. 50)
- the Master of Architecture Track III (3-year) (p. 50)
- The Bachelor of Science in Interior Architecture (p. 49), and
- 2 post-professional graduate degrees,
- the Master of Arts in Architecture (p. 52)
- the Ph.D. in Architecture (p. 53)

Undergraduate Programs

Master of Architecture Program (Track I: 5+ year)

"In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (http://www.naab.org/) (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards. Masters’ degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree."

— National Architectural Accrediting Board

Prospective students who apply for admission to the accredited 5-year degree program and are accepted through the undergraduate admissions process are admitted directly into the Master of Architecture (M.Arch) Track I program. M.Arch (Track I) is a National Architectural Accrediting Board (NAAB) accredited professional degree that makes graduates eligible to sit for licensure examinations to become licensed architects. These students pay undergraduate tuition through the first 4 years and receive the Bachelor of Arts in Architectural Studies after completing 4 years of study, then move on to graduate student status for the final year. Students holding a baccalaureate degree apply through graduate admissions and enter a 3-plus-year program (those holding a preprofessional degree in architecture receive advanced standing and usually complete the degree in 2 years plus 1 summer).

Bachelor of Arts in Architectural Studies

The B.A. in Architectural Studies is designed to serve as a platform or foundational degree for students who plan to specialize in architecture and other disciplines that focus on the design, planning, and construction of the built environment. It is awarded to M.Arch Track I students when they complete the first 4 years of study.

Bachelor of Science in Interior Architecture

The Bachelor of Science in Interior Architecture trains students to become professional interior designers who focus on creating spaces with people in mind based on design research evidence. The Interior Architecture curriculum is compliant with CIDA (Council for Interior Design Accreditation) Professional Standards. The 4-year program has also been aligned with the School’s NAAB-accredited Master of Architecture (M.Arch) degree; students have the option of getting accepted in a 2-year track of M.Arch with advanced standing upon completing the B.S. degree in Interior Architecture.

Graduate Programs

The Department of Architecture offers 3 distinct plans for graduate study:

1. A Master of Architecture (M.Arch.), a 3-year professional degree for students already holding bachelor’s degrees in any field (those with architecture degrees are considered for advanced placement to graduate in 2 years + one summer);
2. A Master of Arts in Architecture (M.A.) — Academic/Research Track for students interested in the study of architecture from an academic and scholarly perspective;
3. A Doctor of Philosophy in Architecture (Ph.D.) for students interested in engaging in robust, innovative inquiry that adds to the body of knowledge in architecture and its related fields.

Of these 3 degree programs, the 3-year Master of Architecture (M.Arch) is a National Architectural Accrediting Board (NAAB) accredited professional degree that makes graduates eligible to sit for licensure examinations. The other degrees are post-professional degrees that do not place the student on the path for architectural registration. Students seeking a career change into a professional curriculum should apply for admission to the 3-year M.Arch. degree.

Courses

ARCH 100. Architectural Foundations I. 4 Credits.

An introductory design studio directed toward the development of spatial thinking and the skill necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include demonstrating observational and analytical skills through freehand drawing, full-scale studies in the making of objects that explore the relationship between 2D and 3D through mapping and extruding, and the design of a sequence of architectural spaces that explores path-space relationships and threshold. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought, including orthographic projection,
paraline drawing, exploded views, and measured perspective. Open only to students in Architectural Engineering. Prerequisite: Approval from the Dean of the School of Architecture and Design.

ARCH 101. Architectural Foundations II. 4 Credits.
A continuation of ARCH 100, with major emphasis on the design relationships between architectural space, human experience, and the environment. This course focuses on the basic design of a small architectural work on a real site, beginning with site analysis, the construction of a 3-dimensional site model, the learning of organizational principles, and the understanding of how the use of precedent can inform design. The design process itself is highly iterative, from 2- and 3-dimensional parti diagramming to generate ideas, to 3D investigations at different architectural scales. In design development, students learn the impact of internal programmatic forces and external site forces on design, including the seasonal and diurnal variations in natural lighting through sun path diagrams. By the end of the semester, students will have worked through the fundamental processes of building design towards the synthesis and presentation of a final scheme. Prerequisite: ARCH 100. Open only to students in Architectural Engineering.

ARCH 103. Introduction to Architecture. 3 Credits.
An introduction to the study and practice of architecture. This course aims at orienting the student to the various disciplinary facets which make up the total architectural curriculum as well as to the various professional roles which architects can be expected to perform. Architectural study is seen as both an art and a science, and architectural practice is seen as a complex, interdisciplinary professional activity. Students taking this course must bring a laptop computer to class.

ARCH 104. Principles of Modern Architecture. 3 Credits.
A lecture course covering the emergence of technological, theoretical and aesthetic principles of modern design beginning with the socio-cultural impact of industrialization and the crisis in architecture at the end of the 19th century. Attention is given to functionalist theory, mechanical analogies and the so-called machine aesthetic of 1910-1930 and to the precedents of important design principles of modern architecture, including modular coordination, the open plan, interlocking universal space, unadorned geometry, structural integrity, programmatic and tectonic expression, efficiency and transparency and briefly explores their development in post-war and late 20th century examples.

ARCH 108. Architectural Foundations I. 6 Credits.
An introductory design studio directed towards the development of spatial thinking and the skills necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include direct observation: drawing, analysis and representation of the surrounding world, and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include but are not limited to freehand drawing, orthographic projection, para-line drawing, basic computer skills, and basic materials investigation. Students must bring a laptop computer to this class. Prerequisite: Approval from the Dean of the School of Architecture and Urban Planning.

ARCH 109. Architectural Foundations II. 6 Credits.
A continuation of the Architectural studio sequence with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to the human body as well as the architectural form. Students will engage in drawing, perspective projection, model building, and basic computer graphics. Students must bring a laptop computer to this class. Prerequisite: ARCH 108.

ARCH 110. Introduction to Computing. 3 Credits.
This course prepares students for design computation topics in the degree program. Topics covered in the class include computer basics, bitmap representation, vector-based graphics, 3-D modeling, scene modeling, building modeling, production of technical drawings, and other issues. These topics are covered in relation to architectural representation and involve skill development in both 2-D and 3-D modeling. The course includes projects that align with those covered in first-year design studios, presenting students with an alternative tool for the representation of two-dimensional diagrams and three-dimensional models. Requirements: Laptop computer with software that meets course specifications. Prerequisite: Must be admitted as a first-year student in the School of Architecture & Design.

ARCH 177. If These Walls Could Talk: Exploring KU Campus Architecture. 3 Credits.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in architecture. May not contribute to major requirements in architecture. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

ARCH 208. Form and Function. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on introducing students to the basic form determinants of architecture from limited scope exercises to complete building designs. Using diagrams and sketches, plans, sections, elevations and models, students explore the spatial ordering of human activity, site and landscape analysis, light and air modulation, simple environmental controls and energy conservation, basic framing systems, volumetric organization and the materials of building skins and envelopes. Students must bring a laptop computer to this class. Prerequisite: ARCH 109.

ARCH 209. Sustainability, Site, and Context. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on the synthesis of basic form determinants of medium-sized, multi-story public building in the urban environment. Students will demonstrate competence in basic architectural design, and preparedness for the third-year focus on materials and methods of building construction. Students are required to bring a laptop computer to this class. Prerequisite: ARCH 208.

ARCH 215. Professional Communications. 3 Credits.
This course is an introduction to visual and oral communication skills. It will build practical skills to design and communicate ideas to a variety of audiences. This practice-based approach will introduce the students to two major fundamentals of communications. Oral competency, through presentations and writing; and visual communications through color theory, layout design, and branding. The students will have an opportunity to present their work through one on one discussions, small and large group presentations. The course is intended to equip students with the practice-based tools to communicate and demonstrate their design ideas in relation to different fields and to a variety of audiences in practical situations. Prerequisite: ARCH 109.

ARCH 281. Design Workshop II: Design Thinking. 3 Credits.
This course aims to enhance student’s abilities to apply concepts and methods associated with design thinking with an emphasis on ill-structured problem-solving and human-centered design. Students will gain exposure to design thinking processes including forecasting, scenario planning and various forms of analysis all of which help shape a robust problem statement that forward design innovation. This material
will be covered through class discussions, readings, and a number of assignments and projects. Students will have the opportunity to develop their design-thinking competence through their final project which may be at the level of models, product, spatial, building and/or community designs.

ARCH 359. Special Problems. 1-3 Credits.
Special problems in architecture. The study of a particular problem in architecture involving individual research and presentation. Conferences and reports. (May be taken for Credit/No Credit.) Prerequisite: Student must submit to his or her faculty advisor, in advance, a statement of the problem he or she wishes to pursue, the methodology he or she plans to use in the program, and the objectives of the special problems. He or she must also be in agreement with the faculty member he or she proposes as instructor for the course.

ARCH 380. Design Workshop: Ideas and Methods in Planning and Design. 3 Credits.
This course focuses on design methods, ideas and approaches at the city, neighborhood and community levels. The course will introduce approaches to urban design and planning which are responsive to social, environmental and ecological issues. The goal is to develop core competencies in design thinking such as analyzing specific problems and developing possible design interventions by understanding relevant theories and analyzing case studies. Students will critically analyze past and current urban trends through case studies to inform design ideas for more equitable and sustainable communities. This material will be covered through class discussions, readings, and a number of design-oriented team projects and assignments.

ARCH 400. Interior Architecture Studio I. 6 Credits.
This course is an introduction to the basic principles and elements used in spatial organization, innovative design solutions and the practice of interior architecture, from predesign through final presentations. Prerequisite: Must be admitted to the Bachelor of Arts in Architecture Studies with an emphasis in Environmental Design.

ARCH 401. Interior Architecture Studio II. 6 Credits.
This course is an introduction to materials resources, specifications and sustainability; and helps students further their understanding of the design process by creating innovative design solutions and spatial organization for interior architecture. Prerequisite: Must be admitted to the Bachelor of Arts in Architecture Studies with an emphasis in Environmental Design.

ARCH 501. Architectural Foundations I. 6 Credits.
An introductory design studio directed towards the development of spatial thinking and the skills necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include direct observation; drawing, analysis and representation of the surrounding world and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include but are not limited to freehand drawing, orthographic projection, para-line drawing, basic computer skills and basic materials investigation. Students must bring a laptop to class. Prerequisite: Admission to M.Arch III program and/or permission of the Chair of Architecture.

ARCH 502. Architectural Foundations II. 6 Credits.
A continuation of the Architectural Foundations sequence with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to the human body as well as the architectural form. Students will engage in drawing, perspective projection, model building, and basic computer graphics. Students must bring a laptop computer to this class. Prerequisite: ARCH 501 studio and admission to M.Arch 3-yr program and permission of the Chair of Architecture.

ARCH 503. Form and Function. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on introducing students to the basic form determinants of architecture from limited scope exercises to complete building designs. Using diagrams and sketches, plans, sections, elevations and models, students explore the spatial ordering of human activity, site and landscape analysis, light and air modulation, simple environmental controls and energy conservation, basic framing systems, volumetric organization and the materials of building skins and envelopes. Students must bring a laptop computer to this class. Prerequisite: ARCH 502 and/or permission of the Chair of Architecture.

ARCH 504. Sustainability and Context. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on the synthesis of basic form determinants of medium-sized, multi-story public building in the urban environment. Students will demonstrate competence in basic architectural design, and preparedness for the third-year focus on materials and methods of building construction. Students are required to bring a laptop computer to this class. Prerequisite: ARCH 503 studio or permission of the Chair of Architecture.

ARCH 508. Material and Tectonics. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on studies in urban spaces and design development of building envelopes as related to urban public-life, structural and mechanical systems, and principles of sustainability. Students shall work individually on an advanced building design. Work will focus on medium scale, multi-story, urban-infill, buildings developed to an appropriate level of technical resolution as evidenced in clear schematic wall sections and structural proposals. Students shall demonstrate an understanding of formal ordering and building-concept development as related to the tectonic form determinants. Students are required to bring a laptop computer to this studio class. Prerequisite: ARCH 209.

ARCH 509. Designbuild. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on materiality and construction of built assemblies through hands-on activities. Development of craft, process, collaboration and technical documentation skills will be primary objective of the course. Students are required to bring a laptop computer to this studio class. Prerequisite: ARCH 209 and must be current student in the 3.5 or 5 year M.Arch degree or Arch Studies degree.

ARCH 510. Architectural Detailing. 3 Credits.
Architectural detailing during design and construction phases is a fundamental skillset for architectural practice. This course will focus on technical drawing skills and professional drawing standards and conventions, including construction documentation, shop drawings, and analytical drawing techniques aimed at exploration and communication of the technical aspects of architectural design. Prerequisite: ARCH 209.

ARCH 515. Building Information Modeling. 3 Credits.
This course will expose students to building information modeling: a digital representation of the building process that facilitates exchange and interoperability of information in digital format. The focus will be on the software’s potential for reducing the information loss that occurs during each handoff of the project during the traditional delivery method.
Possibilities for integrated practice including lifecycle costing and knowledge management are discussed.

ARCH 516. Portfolio Development. 3 Credits.
The aim of the course is to teach practical presentation skills using computer software, in addition to graphic design theories and strategies. This course will provide an opportunity for students to design and produce a design portfolio appropriate for internship and/or graduate school applications. Prerequisite: ARCH 208.

ARCH 520. Architectural Acoustics. 3 Credits.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor.

ARCH 521. Electro-Acoustical Systems. 3 Credits.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor.

ARCH 524. Structures I. 3 Credits.
The fundamental principles of structural behavior including stress and deformation in structural components and systems. Open to architecture students only. Prerequisite: PHSX 114.

ARCH 529. Problems in Architectural Acoustics. 1.5 Credits.
This course has the objective to introduce the students to practical problem-solving in architectural acoustics. Precedents will be introduced to frame discussions on how proper acoustic conditions can be realized within the functional parameters of a particular architectural space. Student will develop the understanding of how sound behaves in an enclosed architectural space. The course will include several visits to existing architectural spaces that have specific acoustical requirements and interesting acoustical characteristics.

ARCH 530. Environmental Systems I. 3 Credits.
This introductory course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: climate and weather, environmental health, indoor air quality, thermal comfort, passive and active systems and design strategies for heating, ventilating, and air-conditioning, building acoustics, mechanical noise control, and building management systems. Prerequisite: PHSX 114.

ARCH 531. Environmental Systems II. 3 Credits.
This course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: daylighting, electrical lighting systems, electrical power distribution systems, alternative energy sources, communication systems, plumbing, transportation, and life safety systems. Prerequisite: ARCH 530.

ARCH 539. Global History of Construction and Materials. 3 Credits.
This course offers a survey of the global history of structural systems, construction techniques, and building materials from pre-history to contemporary times. The course will emphasize that historical evolution of construction system has not only been informed by technical and mathematical innovations, but has also been determined by the cultural practices of a region. Examples will be taken from across the globe to show that structure and construction have been historically associated with diverse cultural values and had profound influence on the evolution of architecture and the spatial practices of society.

The first unit of the two-part survey history course explores the historical changes of architecture in relation to civilizational change, techno-spatial experiments and town-building efforts, from the earliest evidence of human dwelling to the beginning of the industrial revolution. Emphasis is on the architecture as an integrated development of commercial, technological, and ideological transferences among different regions, nascent religious groups and evolving political enterprises. In regard to the geographical and geopolitical regions, the course includes South and Central America, Europe, Classical Greece and Italy, Asia Minor, North Africa and Asia.

ARCH 541. Global History of Architecture II: From Industrial Revolution to Present (1700 CE-Present). 3 Credits.
The second unit of study of the two-part survey history course offers a global perspective of the development of modern architecture from the industrial revolution to contemporary times. This course traces the genealogy of modern architecture to its multiple roots in European enlightenment, global dissemination of industrial knowledge, invention of new building materials and techniques, and development of architectural theory. Emphasis is on the historical context of how the diverse approaches of architects from different regions create variations of formal expressions, spatial program and theoretical underpinning, and thus create multiple meanings and images of modern architecture. Prerequisite: ARCH 340 or ARCH 540 or ARCH 640 or consent of instructor.

ARCH 552. Ethics and Leadership in Professional Practice. 3 Credits.
This course takes the perspective that architectural design is inherently an ethical act. Through this lens, students will learn the essentials of office practices, the many definitions of client and their roles in the design process, the legal responsibilities of the profession, the importance of continuous professional development and the obligation the profession has to provide civic leadership in regard to the built and natural environment.

ARCH 560. Site Design. 3 Credits.
This course introduces concepts of architectural context and site through a combination of lectures and field studies. Natural, social and built systems are presented using a range of perspectives, including holistic ones. Students will develop visual and written skills of analysis through specific site analytic and design techniques. Application exercises and ongoing analysis assignments are required. Restricted to 3.5 and 5 year Master of Architecture students. Prerequisite: ARCH 208 for undergraduate students.

ARCH 600. Special Topics in Architecture: ______. 3 Credits.
This course is for the study of architectural topics on a one time or experimental basis in response to changing needs and/or resources in the Program. It may be offered concurrently by different instructors under different subtitles as announced in the Timetable. May be repeated for credit. Prerequisite: Varies by topic.

ARCH 601. Design Research. 3 Credits.
This course will examine issues in architectural research. It will provide an overview of graduate level studies with regard to definitions, methods, skills, and techniques. The course will consist of lectures, seminars, readings and guest presentations. The class will enable students to make informed judgments about matters of quality and quantity on architectural issues. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to produce papers and essays, make sample research proposals, and other research based assignments. Limited to students in M. Arch Program with Undergraduate status. Prerequisite: ARCH 608.

ARCH 602. Accelerated Design IV. 6 Credits.
Graduate studio emphasizing urban context and design theories and architectural tectonics. Students will undertake developing a detailed wall assembly, represented through drawings and/or models. Prerequisite: ARCH 508 and 509 (see studio grading policy) or permission of the Chair of Architecture.

ARCH 605. Visualizing Site and Natural Environmental Systems. 3 Credits.
This course advances empirical understanding and abilities to visualize natural forces as they both shape and affect siting and designing buildings that shape human experience. Students will develop abilities to demonstrate the principles of environmental systems’ design, how design criteria can vary by geographic region and the tools used for performance assessment. In-class and applied studies will help students learn about site characteristics, soils, topography, solar systems, ecology, climate, building orientation, active and passive heating and cooling, solar geometry, day-lighting and natural ventilation. Prerequisite: ARCH 109 or equivalent.

ARCH 608. Urban Dwelling. 6 Credits.
A continuation of the Architectural Studio sequence with major emphasis on program analysis and design of urban building(s) and urban spaces with culture, context and precedent as major form determinants. Students are required to bring a laptop computer to this studio class. Prerequisite: ARCH 508 and ARCH 509; or ARCH 602.

ARCH 609. Integrated Design. 6-9 Credits.
An advanced architectural design studio with major emphasis on an architectural design project that uses previously learned skills through synthesizing user requirements, regulatory requirements, site conditions, accessible design, and consideration of environmental impacts. Students should also demonstrate the ability to make design decisions while integrating previously learned building envelope systems and assemblies, structural systems, environmental control systems, life safety systems, and building performance. The project design process and final product should be documented to demonstrate above abilities by using technical drawings and well-researched written documentation in addition to other means of visual representation. Prerequisite: ARCH 608.

ARCH 610. Integrated Design Documentation. 3 Credits.
Integrated design documentation, including drawings and specifications, is fundamental to the development a professional architectural project. This course is designed to complement and support ARCH 609 Integrated Design Studio in the technical documentation of the studio project and to shed light on professional expectations for design documentation. Prerequisite: ARCH 510. Corequisite: ARCH 609 Integrated Design Studio.

ARCH 614. Freehand Drawing. 3 Credits.
Open to all SADP non-graduating students interested in enhancing current freehand drawing skills, generally in the architectural realm. While a broad range of expression and graphic materials is explored, emphasis is on drawing as a notational skill, the instrument of creative expression for professional purposes as well as for lifelong artistic fulfillment. Prerequisite: Consent of instructor.

ARCH 615. Integrated Systems. 3 Credits.
This course provides a holistic understanding of building systems and active sustainable strategies. Students will examine the appropriate selection, development, and integration of environmental and structural systems covered in previous architecture courses. An emphasis is placed on the interconnectedness of these systems to building form, function, and performance. Use of simulation programs are expanded upon to quantify building performance. Prerequisite: Must be admitted to M.Arch I, II or III or Bachelor of Arts in Architectural Studies degrees.

ARCH 620. Theory of Urban Design. 3 Credits.
An examination of the relationship between architecture and urban design through contemporary interpretations of future urban form and the determinants of the location, spatial structure, growth and decline of cities. Foundations for an interdisciplinary synthesis are examined in an attempt to bridge the hiatus between large-scale architectural design and incremental adjustments to urban dynamics. Prerequisite: Must have completed ARCH 208 and be enrolled in ARCH 209 during the spring semester this course is offered.

ARCH 622. Material Investigations. 3 Credits.
This course will provide opportunities for students to learn about research methods in the realm of architectural materials. The course will have two concurrent phases: the first phase will consist of a series of field trips and lectures. The purpose of the first phase is to understand how materials are developed and made, the research involved in their development, and what are their characteristics and potential applications. The second phase will consist of a self-directed research project based on the students’ natural curiosity about a particular material or process. The project will have three components: 1) a research agenda, rigorously developed and executed; and 2) a “built” component, with actual materials, executed by the students’ own hands and financial resources; and 3) final documentation of the research project.

ARCH 623. Building Practicum. 3 Credits.
The building technology practicum is offered as a course that will afford students a "real world" experience outside of the academic setting. Students can bring their own project proposals to the practicum committee or faculty members on the committee can suggest local preservation efforts, including planning and administration, or actual physical implementation of such projects. It could also be in the interest of some students to develop skills in a specific area, i.e. model building, architectural photography, historic reconstruction, or technical documentation. Those interested in specific areas will need to work closely with the practicum committee to develop a working list of goals and objectives. Students can elect to work individually or in teams, can work outside of the semester schedule with grades assigned at the completion of the project, and will be bound by a contract approved by the practicum committee.

ARCH 624. Structures II. 3 Credits.
A continuation of ARCH 524, with focus on applying learned principles to basic contemporary structural systems such as concrete, steel, and wood framing systems. Open to architecture students only. Prerequisite: ARCH 524 or ARCH 620 and ARCH 621.

ARCH 626. Building Technology I: Construction Systems and Assemblies. 3 Credits.
This course is an introduction to the materials, processes and craft of construction. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction and the more abstract processes of design. Teaching method includes modeling and hands-on building experiences. Prerequisite: ARCH 200 or ARCH 209 or Corequisite: ARCH 408 or ARCH 409 or ARCH 503.

ARCH 627. Building Technology II: Culture of Building Technology. 3 Credits.
A continuation of ARCH 626. Introduction to industrialized production. A consideration of the detailed sub-systems and cultural practices that comprise the built environment, and the factors responsible for their design and installation. Includes discussion of building codes, mechanisms of failure, and materials selection. Lectures and
ARCH 629. Acoustic Studio. 3 Credits.
This course has the objectives of introducing the art and science of "listening" to architectural spaces; exploring, from both historical and current viewpoints, how proper acoustical conditions have and can be realized within the aesthetic and functional parameters of the particular architectural space; understanding the importance of building acoustics in architectural design; obtaining the ability to discuss building acoustics with the proper use of acoustical terms and descriptions; and understanding the basics of how sound behaves in an enclosed architectural space. The course will include several visits to existing architectural spaces that have specific acoustical requirements and interesting acoustical characteristics.

ARCH 630. Theory of Architecture. 3 Credits.
An examination of architectural theories that understand the designed environment as a cultural medium and product of a sociocultural process that expresses values and ideas. Understanding of these theories will be enhanced through the analysis of paradigmatic buildings, urban form and ideologies that have influenced architectural culture.

ARCH 635. Visualizing Airflow In and Around Buildings. 3 Credits.
It is often difficult to predict the way certain environmental design features will perform if not built and tested which can be costly and time consuming. This course will analyze the performance of such designs in an efficient and cost effective manner within a visual medium using computational fluid dynamics (CFD). CFD will provide a visual understanding of airflow behavior in and around buildings. In addition, thermal comfort and air quality will be investigated in this animated environment. The culmination of the course will be an analysis of a portion of one's studio design project. Prerequisite: ARCH 530.

ARCH 637. Architecture and Cosmos. 3 Credits.
Ideas of symmetry, harmony, proportion, and ideal form have long been used by architectural theorists and practitioners as a way of translating a traditional knowledge of the world into architectural form. Such traditional knowledge is embedded in the mathematics of Pythagoras, the philosophy of Plato, and the four part study of the cosmos (known in Western thought as "the quadrivium"—arithmetic, geometry, music, and astronomy). This course will entail the study of selected readings in this intellectual tradition as well as the analysis of buildings as they relate to the concepts learned through this study. Prerequisite: ARCH 641, History of Architecture II: Renaissance, or consent of instructor.

ARCH 639. Current/Historical Directions in Architecture. 3 Credits.
A study of contemporary or historical trends in architecture which relate to the development of individual or broad philosophies of architecture.

ARCH 646. American Architectural History. 3 Credits.
This course surveys the history of architecture in the USA from the beginning of European settlements to mid-20th century. It is organized based on place types that include, among others, townships, housing, commercial developments, civic structures, agricultural and rural buildings and settlements, and religious buildings and communities. It also covers a range of topics such as architectural styles, typologies, building tectonics, patterns of diffusion, and socio-economic factors that influenced the development of these historic place types.

ARCH 647. Historic Preservation Theory. 3 Credits.
This course presents the historical development and contemporary status of the theories and philosophies of historic preservation. It particularly covers the concepts and approaches developed by UNESCO for the management of tangible and intangible cultural heritage resources worldwide and the related international charters, conventions, operational guidelines, and institutions. Using international case studies, it illustrates a range of theoretical, philosophical, ethical, and practical issues and debates in historic preservation in a global context.

ARCH 648. Historic Preservation Planning. 3 Credits.
The focus of this course is on the development of concepts and practices of retrieving, recycling, and curating the built environment from the mid-nineteenth century to the present. After a series of introductory readings and discussions, students are encouraged to investigate particular environmental, technological, social, or ideological questions of their choice, focusing on structures that demonstrate persistence over great distances and, co-existing with this persistence, ability to accommodate changes over time.

ARCH 649. Historic Preservation Technology. 3 Credits.
This course introduces students to architectural historiography and preservation technology. It covers a range of curatorial issues in preservation and adaptive reuse of historic buildings. The topics include technical documentation of historic buildings, archival research, assessment of causes of deterioration and preservation needs in historic buildings, selection of preservation strategies, and techniques of building material preservation. Also covered are the integration of sustainable technologies into historic construction and examination of the ecological advantages of adaptive reuse and preservation.

ARCH 658. Programming and Pre-Design Issues. 3 Credits.
This course will introduce the concepts, methods, techniques, and information used by the architect to establish the parameters of a project, prior to entering the formal design process. The course will introduce the student to the social, technical, leagan and economic dimensions of architectural programming. The content will introduce the core competencies in programming, site, and environmental analysis required by the profession. Programming theory, research techniques, information analysis, evaluation of significance, and creative synthesis of the multivalent factors acting upon the pre-design process of project definition will be covered. Exercises may include programming and analysis of projects and sites assigned in the Architectural Design Studio sequence. Prerequisite: ARCH 209 or ARCH 504.

ARCH 665. History of Urban Design. 3 Credits.
An exploration of the evolution of cities through the cultural and spatial development of human settlement patterns. The role of cities in the transformations of human culture from tribal communities to post-industrial society is defined in terms of the historical origins of urban institutions and functions and their transformation into spatial structure and physical form.

ARCH 690. Architecture Study Abroad. 5-6 Credits.
May be repeated up to a maximum of 18 credits. Students participate in a study abroad program approved by the Architecture Chair. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/unsatisfactory basis.

ARCH 691. Architecture Practicum. 6 Credits.
Based upon the student's approved proposal, each student will explore the process of creating the built environment by working in a setting that is intended to provide a new perspective for that student. The range of venues may include non-profit organizations, research settings, hands-on building experiences, and other professional settings as approved by the instructor. Students evaluation will include an assessment by the supervisor in the practicum settings as well as on a final paper using
appropriate graphics to illustrate key points. Graded on a satisfactory/unsatisfactory basis.

ARCH 692. Documentation. 2-3 Credits.
Students will document their experience in ARCH 690 or another approved study abroad program. This is intended as a critical reflection upon the student's experience and is additional documentation produced beyond the work done for the study abroad credit. The final product will include a written paper, using appropriate graphics to illustrate key points.

ARCH 695. Internship Documentation. 3 Credits.
Students will document their experience in ARCH 691 or other approved internship or relevant work experience. The purpose of this course is to give students a structured opportunity to select, explore, research, and document a topic relevant to their internship experience and that goes beyond the work done for the internship credit.

ARCH 700. Directed Readings in Architecture. 1-3 Credits.
Individual study of special topics and problems. May be repeated for credit. Prerequisite: Graduate standing.

ARCH 720. Architectural Acoustics. 3 Credits.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor.

ARCH 721. Electro-Acoustical Systems. 3 Credits.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor.

ARCH 730. The Environmental Psychology of Health and Well-Being. 3 Credits.
This seminar examines the theories and understandings that address the health and well-being outcomes resulting from the complexity of interaction between human beings, their behavior, and designed systems or objects and how this varies across the life course. Environmental stimulation, orientation, control, restoration and their relationship to health outcomes through mediating concepts including stress, place identity and person-environment fit will be addressed. Students will engage in several research/assessment projects through the semester. Participation in class discussion will be an essential component of the class. Prerequisite: Graduate status or consent of the instructor.

ARCH 731. Architecture of Health. 3 Credits.
This is a seminar that will focus on the architectural dimensions of health and wellness. The course will investigate the ways the environment contributes to the well being (physical, emotional, spiritual) of people. The history of healthcare environments will be explored to show how healthcare environments have evolved to meet changing medical protocols and environmental technologies. A range of contemporary building types will be studied, from critical-care hospitals to assisted-living residences and health spas. Students will research bibliographic sources, prepare case studies of existing health and wellness environments and prepare preliminary planning and design proposals for an environment that human well being.

ARCH 735. Graduate Seminar in Environmental Systems. 3 Credits.
The intention of this seminar is to provide a substantive overview of the literature and themes in environmental systems. It will serve to introduce students to skills required to conduct research in environmental systems. In addition, the course will entail discussions of students' works in progress, peer review sessions, and completion of a conference paper.

ARCH 762. Urban Design Studies. 3 Credits.
Seminar concerned with the factors, processes, techniques, and current issues in urban design practice.

ARCH 799. Independent Study. 1-3 Credits.
May be repeated for credit up to a total of nine (9) credits. Prerequisite: Graduate standing and consent of instructor.

ARCH 800. Special Topics in Architecture. 1-3 Credits.
Advanced or experimental courses on specialized topics representing unique or changing needs and resources in the graduate program in architecture.

ARCH 802. Urban and Community Issues II. 6 Credits.
Continuation of the critical and rigorous investigations into issues of urban and community design with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 801.

ARCH 803. Design-Build and Materiality I. 6 Credits.
An advanced studio with an emphasis on issues of design-build and/or materiality with a focus on problem-setting, discovery, and analysis. Students are required to bring a laptop computer to class. Prerequisite: ARCH 609 and/or consent of the Architecture Department Chair.

ARCH 804. Design-Build and Materiality II. 6 Credits.
Continuation of the critical and rigorous investigations into issues of design-build and/or materiality with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 803.

ARCH 805. Sports & Entertainment Internship. 6 Credits.
Faculty-directed investigations within the context of a 7-Month Sports & Entertainment professional internship experience will focus on the development of a research topic related to Sports or Entertainment architecture or Sports or Entertainment urban district planning. Prerequisite: ARCH 609 and acceptance into the sports and entertainment option.

ARCH 806. Sports & Entertainment Capstone Studio. 6 Credits.
An advanced studio focused on research and design concepts for large-scale architectural projects including stadiums, convention centers, entertainment venues, and other recreational facilities, with an emphasis on urban site analysis, programming, concept design, and building technology. Students are required to bring a laptop computer. Prerequisite: ARCH 805.

ARCH 807. Health and Wellness Design Internship. 6 Credits.
Investigations of the connections between built environments and human health and well-being. Students are exposed to environmental issues of healthcare design through seven-month professional internships in firms doing significant work in this field. Prerequisite: Successful completion of ARCH 609 and acceptance into the Health and Wellness design option.

ARCH 808. Health and Wellness Design Capstone Studio. 6 Credits.
An advanced capstone studio with an emphasis on investigations into healthy and sustainable environments and a focus on problem-solving, research, and design synthesis. The course builds on the real-world experience gained by students in their ARCH 807 internships. Prerequisite: ARCH 807.

ARCH 809. Study Abroad. 6 Credits.
An advanced studio abroad involving directed investigations with a focus on problem-setting, discovery, and analysis. Prerequisite: ARCH 809.

ARCH 810. Public Interest Design Studio. 6 Credits.
An advanced studio with an emphasis on engaging community stakeholders and the general public, with a focus on problem-setting, discovery, and analysis. Prerequisite: ARCH 809.
ARCH 811. Architectural Investigation I. 6 Credits.
A workshop-based course involving approved self and group directed investigations in a particular area of architectural investigation with a focus on problem-setting, discovery and analysis. Students are required to bring a lap top computer to this studio class. Prerequisite: ARCH 609.

ARCH 812. Architectural Investigation II. 6 Credits.
Continuation of the critical and rigorous investigations in a particular area of architectural investigation with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 811.

ARCH 813. Urban Design Internship and Cooperatives. 6 Credits.
Faculty-directed investigations within the context of a 7-month Urban Design professional internship experience will focus on the development of a research topic related to urban design. It has an emphasis on professional collaboration and scholarship. Prerequisite: ARCH 609 and acceptance into the Urban Design Internship program.

ARCH 814. Urban Design Capstone Studio. 6 Credits.
An advanced studio centered upon the research and development of transformational urban design projects, including district framework strategies, infrastructure and public realm proposals. Projects will emphasize site research and analysis; urban equity and access; public space programming; ecological resiliency; architectural concepts and emergent technology. Students are required to bring a laptop computer. Prerequisite: Successful completion of ARCH 813 or an equivalent studio as approved by Architecture Program Chair.

ARCH 815. Global Internship: _____ 6 Credits.
An architectural internship that is part of the Global Internship program with a focus on international architectural design practice, and professional development. Prerequisite: ARCH 609 and acceptance into the Global Internship Program.

ARCH 816. Global Internship Documentation. 3 Credits.
A documentation and reflective analysis of the experience, and professional development of the student during their Global architectural internship. Prerequisite: ARCH 609 and acceptance into the Global Internship Program. Corequisite: ARCH 815.

ARCH 830. Designing Healthy Places and Communities. 3 Credits.
This seminar investigates the research-based evidence regarding health outcomes at four different levels of dwelling: settlement, institution, home and proximate. Research domains that will be explored include how the urban fabric impacts active living; the role of public parks in urban health; environmental factors on health outcomes in hospitals and workplaces; environmental pathogens in the home; and ergonomic health. Healthy design will be understood as an important variable impacting people’s health by: increasing physical activity; reducing injury; improving air and water quality; minimizing environmental degradation; decreasing mental health stresses; and strengthening social fabric. Environmental assessment audits appropriate at various scales as well as space syntax as an analytic tool will be introduced and utilized. Participation in class discussion will be an essential component of the class. The semester will include a problem-based service-learning project requiring application of research in a real-life setting and active student reflection. Prerequisite: Graduate status or consent of the instructor.

ARCH 899. Thesis or Project Research. 1-6 Credits.
Independent study, research and project work leading to the submission of a master’s thesis or master’s project. May be repeated for credit. Note: In some cases a Comprehensive Oral Examination Option may be substituted. Prerequisite: Permission of the Architecture Program Chair.

ARCH 930. Doctoral Seminar I. 1 Credits.
The purpose of this discussion-based seminar is to explore issues of architectural research from a variety of perspectives. May be repeated up to a maximum of two (2 credits). Prerequisite: Admission to the Ph.D. in Architecture Program or consent of the Architecture Program Chair.

ARCH 931. Theories of Architectural Inquiry. 3 Credits.
This course will introduce the doctoral student to the major historical and theoretical foundations of architectural research. Architectural inquiry will be defined from diverse and distinct perspectives, and it will be assumed that buildings should be viewed as physical and cultural artifacts, as elements within larger social, natural and urban contexts, and as products of design and fabrication processes. The course will be a seminar format in which students will contribute to the discussions through independent research and critical analyses of the assigned readings and lectures. Prerequisite: Admission to the Ph.D in Architecture Program or consent of the Architecture Program Chair.

ARCH 951. Methods of Inquiry in Architectural Research. 3 Credits.
This course will provide students a foundation in methods of inquiry in researching the built environment. The purpose is to train students in developing research strategies applicable to the areas of design-fabrication processes, dwelling and community, and health and sustainability. Students will be exposed to a variety of methods of inquiry drawn from a number of disciplines. Through critical reading and content analysis, students will consider the value of scholarly research, learn to develop research questions, understand the nature of evidence, and the writing, presentation and illustration of scholarship. The course will be a seminar format in which students will contribute to the discussions through independent research and critical analyses of the assigned readings and lectures. Prerequisite: Admission to the Ph.D in Architecture Program or consent of the Architecture Program Chair.

ARCH 958. Research Practicum Preparation. 1-6 Credits.
In this course, the students will frame a research question and develop a research proposal. The course is intended to serve as preparation for ARCH 959. Prerequisite: ARCH 931 and ARCH 951.

ARCH 959. Research Practicum. 4 Credits.
This is a research project undertaken and completed under the supervision of the student's major professor. The student designs, executes, and completes a small scale research project and produces a document of publishable quality within his/her area of inquiry. The project is intended to serve as a pilot study leading towards the dissertation. Prerequisite: ARCH 958.

ARCH 999. Doctoral Dissertation. 1-9 Credits.
Individual research work. A minimum of nine credits is required for the degree. May be repeated for credit. Prerequisite: Successful completion of the Comprehensive Oral Examination.

Courses

IA 205. Professional Communications Skills. 3 Credits.
This course is an introduction to visual and oral communication skills. It will build practical skills to design and communicate ideas to a variety of audiences. This practice-based approach will introduce the students to two major fundamentals of communications. Oral competency, through presentations and writing; and visual communications through composition, color theory, typography and branding. The students will have an opportunity to present their work through one on one discussions, small and large group presentations. The course is intended to equip students with the practice-based tools to communicate and demonstrate their design ideas in relation to different fields and to a variety of audiences in practical situations. Prerequisite: ARCH 109 and ARCH 110.
IA 208. Interior Architecture Studio I. 6 Credits.
This second-year design studio is responsible for introducing students to the basic application of design determinants of interior architecture in which precedents research, programming, design, and presentation skills are developed. Design solution methodologies for small and medium scale interior spaces allow students to explore spatial configurations, programming, user centered design solutions, human psychology, behavior in space. There is an introduction to accessibility requirements. Students will learn to demonstrate their explorations with verbal presentations and visual communication skills including but not limited to sketching, diagramming, photography, digital representations and physical models. Prerequisite: ARCH 108 Architecture Foundations I and ARCH 109 Architecture Foundations II.

IA 209. Interior Architecture Studio II. 6 Credits.
A continuation of IA 208 Interior Architecture Studio, the emphasis of this design studio is to develop the application of design determinants in which architecture/design precedent study, programming, materials and furniture integration, and presentation skills are developed. Design solution methodologies for medium scale interior spaces allow students to explore complex spatial configurations and programming, user centered design solutions, furnishings, manufactured products, materials and finishes integrations. Students further develop design skills to address human psychology and behavior in space, and the ability to apply accessibility requirements in their design solutions. Students will demonstrate their explorations with written narratives, verbal presentations and visual communication skills not limited to, sketching, diagramming, photography, digital representations, and physical models. Prerequisite: IA 208 Interior Architecture Studio I.

IA 210. Human Factors in the Built Environment. 3 Credits.
This course provides an introduction to human factors theory, data, and analysis from an architectural perspective. Topics covered include how proxemics, anthropometrics, ergonomics, and material choices in the built environment impact our psychology, behaviors, and health. Furthermore, students will learn how human-centered design can be used to create optimal environments for diversity and inclusion. Open to students enrolled in the Interior Architecture degree. Restricted to students in the IA program. Prerequisite: Must be admitted to the IA program and ARCH 109.

IA 220. Sustainable Interior Materiality. 3 Credits.
This course is an introduction to the application of materials, processes, specification, and craft in the construction of the built environment. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction related to materials selections and the abstract processes of tectonics design. Students will demonstrate their explorations through different methods including model building and hands-on building experiences. Prerequisite: IA 210.

IA 230. Lighting Design and Technology. 3 Credits.
An exploration of topics on natural lighting and illumination in interior spaces. Includes lighting sources, technology, specifications of luminaires and design applications through technical drawings. Prerequisite: IA 208, IA 510.

IA 240. History and Theory of Built Environments I. 3 Credits.
Chronological survey of historic architectural and interior environments in European and non-European contexts from Classical periods up to the 19th Century. Emphasis is on how social, cultural, political and economic influences have shaped the built environment around the world, including cross-influences on furniture, material culture, design objects, and major European art movements during these periods. Prerequisite: Sophomore standing.

IA 241. History and Theory of Built Environments II. 3 Credits.
Chronological survey of historic architectural and interior environments in European and non-European contexts from Classical periods up to the 19th Century. Emphasis is on how social, cultural, political and economic influences have shaped the built environment around the world, including cross-influences on furniture, material culture, design objects, and major European art movements during these periods. Prerequisite: Sophomore standing.

IA 300. Special Topics in Interior Architecture: ______. 3 Credits.
Study of special topics related to interior architecture in response to changing needs and/or resources of the interior architecture degree program. It may be offered concurrently by different instructors under different subtitles as announced in the semester timetable. May be repeated for credit. Prerequisite: Varies by topic.

IA 308. Interior Architecture Studio III. 6 Credits.
This third-year architecture studio builds on the skills developed in the second-year IA Studios. It covers design development of a nonresidential medium scale project. Students work individually to explore application of complex programming, spatial configuration, sustainability, lighting design, acoustics, psychology of a space, human experience, and ability to apply code and accessibility requirements to their projects. Students will explore manufactured products and furniture systems with an emphasis on material selections and specifications. Students will demonstrate their explorations with written narratives, verbal presentations, and visual communication skills including but not limited to, sketching, diagramming, photography, digital representations and physical models. Prerequisite: IA 209.

IA 309. Advanced Interior Architecture Studio. 6 Credits.
Continuation of the Interior Architecture studio sequence with an emphasis developing advanced skills of design process, design research, building codes and regulations, materiality, technical documentation, and design production. Prerequisite: IA 308.

IA 322. Furniture Design. 3 Credits.
This course explores the methodology of furniture design and construction. Investigative studies of theory, materials and construction methods of classical, modern, and contemporary furniture design result in a basic knowledge of human factors, design processes, and tectonics. Students will develop skills in design and construction of a piece of furniture from using interior millwork to advanced digital technology. Prerequisite: IA 220.

IA 341. History of Interior Architecture. 3 Credits.
This lecture course offers a survey of interior spaces and built environments in relationship to historical, architectural, religious, political, cultural, and social context of different eras. This course provides a global overview of the historical evolution of interior spaces and furnishings from pre-historic times to the 20th century and covers geographical areas of Europe, America, Latin America, Asia, Middle-East and Africa. Students will be asked to demonstrate their learnings in the form of research, drawings, and written papers. Prerequisite: Must be admitted to the IA Program and ARCH 541.

IA 359. Special Problems. 1-3 Credits.
Special problems in Interior Architecture. This study of a particular problem in Interior Architecture involving individual research and presentation, conferences and reports. Prerequisite: Student must submit to his/her faculty advisor in advance, a statement they wish to pursue. The instructor must give permission to study with the student.

IA 390. Study Abroad. 5 Credits.
Students participate in a study abroad program approved by the IA program. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be admitted to the IA Degree program.

**IA 401. Professional Internship. 3 Credits.**
Students will have an opportunity to work in a professional firm approved by the IA program. In addition to the work experience students will document their internship or relevant work experience. The purpose of this course is to give students a structured opportunity to select, explore, research, and document a topic relevant to their internship experience. Prerequisite: IA 508.

**IA 405. Professional Communications Skills. 3 Credits.**
This course is an introduction to visual and oral communication skills. It will build practical skills to design and communicate ideas to a variety of audiences. This practice-based approach will introduce the students to two major fundamentals of communications. Oral competency, through presentations and writing; and visual communications through composition, color theory, typography and branding. The students will have an opportunity to present their work through one on one discussions, small and large group presentations. The course is intended to equip students with the practice-based tools to communicate and demonstrate their design ideas in relation to different fields and to a variety of audiences in practical situations. Prerequisite: Must be admitted to the BS Interior Architecture degree.

**IA 408. Design Research. 3 Credits.**
A seminar-based elective that exposes students to critical interior design research approaches, including but not limited to programming, post-occupancy evaluations (POE), global and cultural dimensions, and design thinking. Topics variable on accreditation needs, represented by subtitles as announced in the semester timetable. May be repeated for credit. Prerequisite: IA 308.

**IA 409. Integrated Interior Architecture Studio. 6 Credits.**
An advanced studio with an emphasis given to the student's demonstration of integration of all previously learned design skills. These include program analysis, space configuration, formal design composition, structure, materials and methods of construction, technical development of interior spaces, environmental systems, lighting design, acoustics, code and regulation compliance, and principles of sustainability. Students should also demonstrate an appropriate awareness of history, theory, and culture of the given context. The level of project development should be demonstrated by technically precise drawings and well-researched written documentation in additional to other means of representation. Students work in groups and with professional consultants. Prerequisite: IA 308.

**IA 508. Interior Architecture Studio III. 3 Credits.**
This third-year architecture studio builds on the skills developed in the second-year IA Studios. It covers design development of a nonresidential medium scale project. Students work individually to explore application of complex programming, spatial configuration, sustainability, lighting design, acoustics, psychology of a space, human experience, and ability to apply code and accessibility requirements to their projects. Students will explore manufactured products and furniture systems with an emphasis on material selections and specifications. Students will demonstrate their explorations with written narratives, verbal presentations, and visual communication skills including but not limited to, sketching, diagramming, photography, digital representations and physical models. Prerequisite: IA 209 Interior Architecture Studio II.

**IA 509. Design-Build Studio. 6 Credits.**
A continuation of the Interior Architecture studio sequence with major emphasis on materiality and construction of built assemblies through hands-on activities. Development of craft, process, collaboration and technical documentation skills will be primary objective of the course. Prerequisite: Must have completed IA 209 Studio.

**IA 510. Human Factors in The Built Environment. 3 Credits.**
This course provides an introduction to human factors theory, data, and analysis from an architectural perspective. Topics covered include how proxemics, anthropometrics, ergonomics, and material choices in the built environment impact our psychology, behaviors, and health. Furthermore, students will learn how human-centered design can be used to create optimal environments for diversity and inclusion. Open to students enrolled in the Interior Architecture degree. Restricted to students in the IA program. Prerequisite: Must be admitted to the IA program.

**IA 511. Ergonomics. 3 Credits.**
This course focuses on analyzing human perception and behavioral patterns in the built environment and the study of natural, cultural, social and ethical patterns and rituals. Students will survey and design a series of solutions for design problems addressing relationships between the organic and human-made environments as they relate to human experience. These explorations will be demonstrated by written narratives, universal design solutions, wayfinding techniques and ergonomics studies. Prerequisite: Must be admitted to the IA degree plan.

**IA 520. Products Materials and Specifications. 3 Credits.**
This course is an introduction to the application of materials, processes, specification, and craft in the construction of the built environment. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction related to materials selections and the abstract processes of tectonics design. Students will demonstrate their explorations through different methods including model building and hands-on building experiences. Prerequisite: Must be admitted to the IA degree plan.

**IA 522. Furniture Design. 3 Credits.**
This course explores the methodology of furniture design and construction. Investigative studies of theory, materials and construction methods of classical, modern, and contemporary furniture design result in a basic knowledge of human factors, design processes, and tectonics. Students will develop skills in design and construction of a piece of furniture from using interior millwork to advanced digital technology. Prerequisite: IA 520 Products, Materials and Specifications.

**IA 541. History of Interior Architecture. 3 Credits.**
This lecture course offers a survey of interior spaces and built environments in relationship to historical, architectural, religious, political, cultural, and social context of different eras. This course provides a global overview of the historical evolution of interior spaces and furnishings from pre-historic times to the 20th century and covers geographical areas of Europe, America, Latin America, Asia, Middle-East and Africa. Students will be asked to demonstrate their learnings in the form of research, drawings, and written papers. Prerequisite: Student must be in the IA program and have taken ARCH 540.

**IA 609. Integrated Interior Architecture Studio. 6 Credits.**
An advanced studio with an emphasis given to the student's demonstration of integration of all previously learned design skills. These include program analysis, space configuration, formal design composition, structure, materials and methods of construction, technical development of interior spaces, environmental systems, lighting design, acoustics, code and regulation compliance, and principles of sustainability. Students should also demonstrate an appropriate awareness of history, theory, and culture of the given context. The level of project development should be demonstrated by technically precise drawings and well-researched written
documentation in addition to other means of representation. Students work in groups and with professional consultants. Prerequisite: IA 508 Interior Architecture Studio III.

IA 690. Study Abroad. 5 Credits.
Students participate in a study abroad program approved by the IA program. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be admitted to the IA Degree program.

Master of Architecture (5-year)

Master of Architecture (Track I: 5-Year Program)
The Master of Architecture is a NAAB-accredited professional degree program and is an essential aspect of preparing for the professional practice of architecture. Graduates of this program will complete a recognized internship program (such as the Architectural Experience Program) and successfully complete the Architectural Registration Examination are able to become licensed architects.

The Track I program is designed for students entering from high school or transferring from another undergraduate program. The curriculum is designed so as to be completed within 5 calendar years, but to do so demands sustained concentration and focus.

The 172 credit curriculum is divided into three segments: Foundations, Core and Professional Options.

The Foundations segment involves two foundation design studios and introductory lecture courses examining the discipline of architecture. A unique aspect of our program is that immediately upon commencing their studies at KU, first-year students enter into architecture-specific design studios and are immediately ensconced in the program’s culture.

The Core is a six-semester sequence that addresses the wide range of skills and understanding required for the practice of architecture, including history and theory, technology, professional practice, and integrating this knowledge within design projects of increasing scale and complexity. The Core culminates in a comprehensive studio experience in which students demonstrate their readiness to enter the profession of architecture.

Professional Options: The architecture profession has become an extremely diverse field. Seeking to provide our students the greatest opportunity within that diversity, the final year of the curriculum allows a student to explore a more-focused professional option of their choosing. This experience allows students to craft an area of specialization or a domain of architecture that may otherwise be addressed superficially within a professional curriculum. Currently, students are investigating design-build processes, researching sustainable design practices, participating in internship-based Co-Op programs, pursuing healthcare and urban design as areas of specialization, and engaging in service-learning opportunities around the globe.

Within the 172 credits required to graduate, students will also have a study abroad experience and complete coursework in a variety of other academic disciplines. Students will be exposed to the social sciences, the physical sciences, the humanities and the arts. Study abroad options currently includes spending a semester in Denmark, Germany, England, or Australia, traveling to Central America, Asia, or Europe during intersessions, or working in an international architecture office in Paris and Asia.

Students in the Department of Architecture M.Arch Track I program will be awarded a Bachelor of Arts in Architectural Studies when they complete a minimum of 136 credits of courses as outlined in the degree plan and fulfill all KU Core course requirements after the first 4 years of undergraduate studies.

Professional Registration and Licensing

Although state laws vary, professional registration as an architect in Kansas involves the completion of three aspects: receiving an accredited professional degree (such as the M.Arch.), completion of internship requirements (for information on the Architectural Experience Program, see www.ncarb.org), and successful completion of all sections of the Architectural Registration Examination (http://www.ncarb.org) (ARE). Upon successful completion of these three aspects, the applicant may use the title “architect” and may practice as an architect, either as an individual or as a licensed professional in an office performing professional services.

Undergraduate Admission

First-year and transfer students may be admitted to the 5-year Master of Architecture degree program. Contact:

Joan Weaver, Admissions Coordinator
School of Architecture and Design (https://arcd.ku.edu/), University of Kansas
200 Marvin Hall
1465 Jayhawk Blvd.
Lawrence, KS 66045
arch@ku.edu (archku@ku.edu)
For undergraduate applications, write to:
KU Office of Admissions (http://admissions.ku.edu/)
KU Visitor Center
1502 Iowa St.
Lawrence, KS 66045
785-864-3911
adm@ku.edu

Applications

Applications for the Fall semester should be submitted during the student’s senior year in high school. The priority application deadline is November 1, and the final application deadline is February 1. Completed applications are reviewed, and applicants are notified of their admission status. A complete application includes sixth-semester transcript, ACT scores, and a list of courses in progress. Applications received after February 1 are considered but are less likely to be accepted due to space limitations.

Transfer students should apply by October 1 for the spring semester and by the priority deadline of November 1 for the summer and fall terms. The final application deadline is February 1. Space limitations apply to transfer students. Transfer applications received after February 1 are likely to be denied for reasons not connected with the applicant's academic qualifications. The School of Architecture and Design encourages applications from women and members of minority groups.
High School Students

High school students are encouraged to apply for admission if they have a cumulative GPA of at least 3.2 and have a minimum SAT of 1050 and if they will meet the following preparation thresholds by the time they graduate:

- 3 or more years of math ending with calculus (preferred),
- 3 or more years of natural science including physics,
- 3 or more art/drawing classes. Art/drawing classes are preferred over additional drafting or technical courses (1 semester of drafting is adequate).

Students who are already at the University of Kansas may apply to the M.Arch. program by February 1 for admission in the following fall. Students must have a cumulative college GPA of 3.5 or higher and space must be available to be admitted to the M.Arch. program.

Transfer Students

Transfer students may be admitted, if space is available, and if they have an overall grade-point average of at least 3.5.

International Students

The School of Architecture and Design admits only exceptional students from other countries. Standards for admission are set according to the traditions and grading policies of those countries. In some countries, for example, the grade of A is almost never given, while in other countries the A grade is more frequently seen. The number of students admitted depends on the space available on February 1.

Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Master of Architecture Degree Requirements

Credit hours in the 5-year Master of Architecture curriculum are distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Design/Synthesis</td>
<td>60</td>
<td></td>
</tr>
<tr>
<td>Architecture Support Courses</td>
<td>57</td>
<td></td>
</tr>
<tr>
<td>Architecture and Professional Electives</td>
<td>30</td>
<td></td>
</tr>
<tr>
<td>General Education Courses</td>
<td>25</td>
<td></td>
</tr>
<tr>
<td>Total Hours</td>
<td>172</td>
<td></td>
</tr>
</tbody>
</table>

Students must maintain a 2.0 grade-point average to remain in good standing and to graduate.

Students are required to complete at least 30 credit hours at the graduate level (fifth year), based on the NAAB Accreditation requirements.

The core of the curriculum is a sequence of design studios composing approximately 1/3 of the total degree requirements. Students complete sequences in graphics, structures, building construction, environmental technology, and architectural history and theory, and meet a study abroad requirement. Course work in site planning, urban design, and professional practice completes the professional content.

In addition to professional courses, students are expected to complete coursework in a variety of academic disciplines, reflecting the interdisciplinary nature of architecture. These general education requirements include course work in mathematics, physics, English, communication, humanities and Western civilization, fine arts, and the natural and social sciences.

In the final year of the program, students participate in a chosen year-long professional option which may include an internship. Options are defined by faculty strengths and the emerging needs of the profession. They offer students the opportunity to focus on a particular area of interest that is one of the professional choices or specializations available after graduation.

- Students in the Design-Build option participate in our national award-winning Studio 804, where they collaboratively design and construct a sustainable building.
- Students in the Health and Wellness option are expected to complete a 7-month professional work experience in an architectural firm engaged in design for health followed by a service-learning studio.
- Globalized Practice in Asia or Paris introduces students to the increasingly multinational nature of architectural practice; students are placed in an internship abroad for a semester followed by a campus studio in the final semester.
- Professional Practice Internship in Sports and Entertainment or General Practice
- Co-Op programs based on internships

This is an ambitious program of study, averaging 18 credit hours a semester. It is highly recommended that students either

1. attempt to enter with advanced-placement credit for general education courses such as calculus, physics, environmental studies, or geography and/or
2. plan to take 6 hours of general education requirements during a summer (this may be completed at a local community college).

Requirements and Policies

Core Courses for Selection

Core Goal 2.2 course (Suggest IA 405)  3
Core Goal 4.1 Course                  3
Core Goal 3 Social Science Course     3
Study Abroad Requirement

Students must fulfill a 6-credit-hour study abroad requirement by participating in eligible study abroad programs and enrolling in ARCH 690 (6 hours).

1. Participation in any school-directed short-term study abroad program, usually in the summer or winter (but including any during regular semesters), meets the requirement.

2. Participation in any of the school's academic-year or semester study abroad programs in Germany, England, Denmark, Australia, and Spain automatically fulfills the study abroad requirement; however, to fulfill the total degree requirements, students must complete an additional 6 hours of electives.

3. Participation in other university-sponsored study abroad programs or programs at other college-level institutions approved by KU for transfer credit might meet the requirement. But the student's proposal requires approval by the Architecture Chair.

4. International students, for whom enrollment in the school is already a study abroad experience, automatically meet the requirement; however, to fulfill the total degree requirements, they may need to complete an additional 6 hours of electives.

All students are encouraged to meet with their professional advisor by the end of the second year to begin planning to fulfill the study abroad requirement.

Portfolio Requirement

All students must maintain a record of work as they proceed through the program. This must be in the form of a portfolio and must include examples of at least one major project from each semester of the design sequence, starting with the foundation studios in the first year. It is recommended that all major projects be included in the portfolio as well as selected examples of work from support and elective courses such as building technology, construction documents, and photography.

Studio Grading Policy

Work evaluated as “satisfactory” is graded C. Work evaluated as “more than satisfactory” is graded B. Work evaluated as “exceptional” is graded A. Work evaluated as “less than satisfactory” is graded D. Work evaluated as “failing” is graded F. Information on the studio grade appeal procedure is available in the Dean's Office.

If a student receives a grade of D in a design studio in any semester, he or she is placed on notice by the school, regardless of the overall grade-point average. To be removed from this status, the student must perform satisfactory work in the next semester of design. If in any subsequent semester the student receives another grade of D, he or she must repeat that studio before advancing in the sequence. If the student receives a grade of D in 2 consecutive studios, he or she must repeat the entire design year in which the first D was given.

Computer Requirement

All students in the Master of Architecture program must supply a computer for digitally based architectural studios. Students must follow a checklist of minimum hardware- and software- requirements when they purchase a computer. The specifications for architectural studio computing are on the school’s website (http://www.sadp.ku.edu).

Substitution of Courses

A student who wishes to select certain courses not in the prescribed curriculum may petition through the Chair.

Credit for ROTC Courses

Students may enter the Reserve Officers Training Corps to train for commissions as regular or reserve officers. An allowance of 6 hours of military science, aerospace studies, or naval science may be substituted for free electives in the M.Arch. program. A student who enters one of the ROTC programs but discontinues military training and does not receive a commission may not apply credits for ROTC courses toward a degree in architecture. If a student does not receive a commission because of circumstances beyond his or her control (such as a medical discharge), he or she may use ROTC credits as part of the requirements for the degree as indicated above.

Activity Courses

The School of Architecture and Design does not accept physical education (HSES) activity courses for fulfilling graduation requirements.

Career Opportunities

The M.Arch. is a NAAB accredited professional degree. The following options are open to students after they complete it:

1. Graduates may seek to refine and augment their professional capabilities through experience in an office under a licensed architect. Such experience qualifies the graduate for admission to the appropriate examination for licensing and practice as an architect or may precede admission to graduate school. Increasingly, graduates are finding alternative career options, including work in urban design, design-build firms, interior design, historic preservation, and many others.

2. Qualified students may pursue graduate study in Ph.D. in architecture programs or in areas related to architecture and environmental design, such as urban planning, law, psychology, social welfare, public administration, or business.

Prescribed Curriculum

Master of Architecture (5-year)

A total of 172 credit hours is required. Substitutions in the prescribed curriculum may be made only by petition to the department.

Students are in Undergraduate Status for enrollment in the first 4 years and begin Graduate Status enrollment in the final year of this program.

**Total Hours 172**

**NOTE:** Students admitted to the Master of Architecture degree prior to 2023 will follow the curriculum in place at the time of their admission (see the KU Archived Academic Catalogs).

1. Limit of 64 transfer credits used from Community Colleges.
2. HSES Activity courses do not count for this degree plan.
3. Studios are strictly sequenced and should be taken in the listed semester. Only 509 and 510 can be taken at either Fall or Spring of the third year. KU Core Goal courses outside Architecture and Undergraduate level ARCH Elective can be taken out of sequence. Consult an advisor prior to enrollment each semester to ensure proper course sequencing and fulfillment of requirements.
4. Study Abroad is a required component of the M.Arch Degree. Students can study abroad as soon as the Winter Break of their second year. Consult your major’s check sheet and your advisor if considering internships, study abroad, etc.

5. Students should plan to complete all KU Core courses by the summer after 4th-year.

6. The Bachelor of Arts in Architectural Studies may be awarded to students who fulfill the requirements of all 136 credits of the first four years’ courses as outlined in the degree plan, meet all KU Core course requirement, and apply after completing the Spring semester of Year 4.

7. Students will become graduate status after they complete the Year 4 of study. Students are required to take a minimum of 30 Graduate Credits. At least 15 credits out of the 30 Graduate Credits need to be at 700 level and above. Up to six credits of Graduate Level Architecture electives can be taken during the Spring semester of 4th year to count towards Graduate Credits.

**Bachelor of Science in Interior Architecture**

Professional interior designers are responsible for creating thoughtful spatial experiences that directly influence people’s comfort, wellbeing, efficiency, functionality, and overall positive outcomes. Interior designers have the expertise to generate aesthetically unique interior layouts, specify furniture, material finishes, lighting & acoustics, and produce holistic spaces that are inclusive, inspirational, and imaginative. The Bachelor of Science in Interior Architecture trains students to become professional interior designers who focus on creating environments with people in mind based on design research evidence. Students are exposed to real-life experiences through design projects as well as internships. Students also participate in study abroad experiences. The Interior Architecture curriculum is compliant with CIDA (Council for Interior Design Accreditation) Professional Standards.

The 4-year program has been aligned with the School’s NAAB-accredited Master of Architecture (M.Arch) degree; students have the option of getting accepted in a 2-year track of M.Arch with advanced standing upon completing the B.S. degree in Interior Architecture. This allows well-qualified students to earn a B.S. in Interior Architecture degree and a professional Master of Architecture degree in six years and one summer, rather than the seven years it would normally take to earn each degree separately.

New and transfer students may be admitted to the Bachelor of Science in Interior Architecture and Design. Contact:

University of Kansas
Joan Weaver, Admissions Coordinator
200 Marvin Hall
1465 Jayhawk Blvd
Lawrence, KS 66045
arch@ku.edu

For applications contact:

KU Office of Admissions
KU Visitor Center
1502 Iowa St.
Lawrence, KS 66045
785-864-3911

adm@ku.edu

**Applications**

Applications for the Fall semester should be submitted during the student’s senior year in high school. The priority application deadline is **November 1**, and the final application deadline is **February 1**. Completed applications are reviewed, and applicants are notified of their admission status. A complete application includes sixth-semester transcript, ACT scores, and a list of courses in progress. Applications received after February 1 are considered but are less likely to be accepted due to space limitations.

Complete the online KU application by going to www.admissions.ku.edu (https://www.ku.edu/admissions/) and selecting the School of Architecture and Design, and then selecting the appropriate degree. This online application will serve as both your application for admission to KU and to the School of Architecture and Design. Make sure that you complete and submit the Architecture Interest Profile which will become part of the online application once you’ve selected your degree.

Transfer students should apply by **October 1** for the spring semester and by the priority deadline of November 1 for the summer and fall terms. The final application deadline is **February 1**. Space limitations apply to transfer students. Transfer applications received after February 1 are likely to be denied for reasons not connected to the applicant’s academic qualifications. The School of Architecture and Design encourages applications from women and members of minority groups.

**High School Students**

High school students are encouraged to apply for admission if they have a cumulative GPA of at least 3.2 and have a minimum ACT of 23 or a minimum SAT of 1050 and if they meet the following preparation thresholds by the time they graduate:

- 3 or more years of math ending with calculus (preferred)
- 3 or more years of natural science including physics
- 3 or more art/drawing classes. Art/drawing classes are preferred over additional drafting or technical courses (1 semester of drafting is adequate).

**Transfer Students**

Transfer students may be admitted, if space is available, and if they have an overall grade-point average of at least 3.0.

**International Students**

The School of Architecture and Design admits only exceptional students from other countries. Standards for admission are set according to the traditions and grading policies of those countries. In some countries, for example, the grade of A is almost never given, while in other countries the A grade is more frequently seen. The number of students admitted depends on the space available on February 1.

Visit the Office of International Student Services for information about international admissions.

The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformity with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education.

However, the pre-professional degree is not, by itself, recognized as an accredited degree.

This Master of Architecture degree is accredited by the National Architectural Accrediting Board (NAAB). Students who have completed previous course work in an approved NAAB architecture curriculum or a pre-professional architectural degree program may achieve advanced standing. All requests for advanced standing are evaluated using the minimum qualifications for graduate study at KU, the student performance criteria established by NAAB, and procedures approved by the architecture graduate studies committee. This degree requires a sequence of 6 semesters and 2 summers of architectural design studio/synthesis experiences, each of which is accompanied by associated professional graduate courses. The program also has a required study abroad component, planned to occur during a student's summer or winter semester. The degree plan is constituted of a total of 123 credit hours.

There are 2 tracks and 4 typical entry points to this curriculum:

**Track III (Degree designed for candidates who have an undergraduate degree in a discipline other than architecture, 3-Year)**

1. Students without backgrounds in architecture who hold bachelor's degrees in non-design-oriented disciplines enter the first year of the curriculum which begins in the summer session. The first year of the curriculum is 2 academic semesters and 2 summer sessions. The total number of credit hours required is 117-123 depending on the student's background.

2. Students without backgrounds in architecture who hold bachelor's degrees in a design discipline usually begin course work with the fall semester of the first year. Other curricular requirements may potentially be waived after careful vetting of the student's educational background. The total number of credit hours required for graduation is likely to be approximately 108.

**Track II (Degree designed for candidates who have a pre-professional degree in architecture, 2-Year)**

3. Students with a pre-professional degree in architecture, such as a Bachelor of Arts in Architectural Studies, are likely to be placed in the second year of the curriculum if they have a background in architecture design studios. This is commonly referred to as the 4+2 option. Students interested in being placed in this way should make this clear in their statements. These students normally are asked to complete four studios (synthesis experiences), a study abroad experience, and architecture support courses whose number and content are determined on a case-by-case basis. The total number of credit hours required for graduation depends on the student's previous preparation and is highly variable, but is likely to be approximately 63-72 hours.

4. Students who already possess an accredited professional Bachelor of Architecture degree generally enter a three-semester program that requires a study abroad experience during a summer or winter session as well as the final year of the curriculum. The total number of credit hours required for graduation depends on the student's previous preparation and is highly variable, but a minimum of 36 hours is required.

**Graduate Admission**

Regardless of background or career goals, a person whose previous records indicate the ability to succeed with advanced work may be admitted to one of the graduate programs. Admission requires a bachelor's degree and a grade-point average of 3.0 from KU or another
accredited institution or foreign university with substantially equivalent requirements for the bachelor’s degree. A complete application for admission consists of the following materials:

1. Graduate application (http://www.graduate.ku.edu/).
2. One unofficial transcript where the undergraduate degree is confirmed and one copy of the transcript where any graduate degree/credit was earned (if applicable).
3. Three letters of recommendation from persons qualified to comment on the applicant’s intellectual abilities and probable success in graduate study.
4. Application fee, nonrefundable check or money order payable to the University of Kansas (See Admission in the Graduate Studies (p. 2449) section of the online catalog for further information).
5. Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/?num1.5)
6. A statement of interest indicating the applicant’s career goals and the relationship of these goals to the specific option chosen (Those seeking advanced placement in the M.Arch. program should make this clear in this statement).
7. A portfolio of work demonstrating the candidate’s strengths. Examples may include design or creative work and writing samples. The portfolio is limited to 10 megabytes (not zipped) in PDF format. Upload under other documents.
8. Graduate Record Examination (GRE) test results (not required but preferred).
9. For international students, a financial statement showing minimum financial support for the first year of study (see the admissions page on the school’s website (http://www.sadp.ku.edu/)).

Submit your graduate application and upload all application materials online (http://www.graduate.ku.edu/). Please contact the Admissions Coordinator if you have any questions:

The University of Kansas
Department of Architecture
Marvin Hall
1465 Jayhawk Blvd., Room 206
Lawrence, KS 66045

Be sure to check the school’s website (http://www.sadp.ku.edu/) for updates to the admission process or requirements.

Master of Architecture Degree Requirements

M.Arch. Curriculum (3-year or 2-year)

The curriculum is designed in 3 parts. The first 2 semesters plus 2 summer sessions offer an accelerated education in the foundations of architecture as a professional discipline. The second academic year emphasizes professional development, with the comprehensive studio as a capstone experience. The program also has a required study abroad component, usually planned to occur during a student’s summer or winter semester. The third and final year offers students a choice of options for an inquiry of enhanced depth typical in graduate education. This allows students to develop a specialization by the time they complete the professional degree.

Students who have completed previous coursework in an approved NAAB architecture curriculum or a pre-professional architectural degree program may achieve advanced standing. All requests for advanced standing are evaluated using the minimum qualifications for graduate study at KU, the student performance criteria established by NAAB, and procedures approved by the architecture graduate studies committee. The timing of course offerings is subject to change. Please visit the school’s website (http://www.sadp.ku.edu/) for the most current information.

| Total Hours | 123 |

NOTE: Students admitted to the Master of Architecture degree prior to 2023 will follow the curriculum in place at the time of their admission (see the KU Archived Academic Catalogs).

Students who have completed previous coursework in an approved NAAB architecture curriculum or a pre-professional architectural degree program may achieve advanced standing and are likely to be placed in the second year of the curriculum.
Master of Arts in Architecture

The post-professional M.A. in Architecture is a research-based academic program for students interested in the study of architecture from an academic and scholarly perspective. It requires 36 credit hours of course work, independent study, and research. The program is designed for highly motivated students with well-defined interests who wish to pursue individualized plans of study that draw upon the diverse resources of the graduate faculty at the master level.

APPLICATION GUIDELINES

Admission to the MA/PhD program is based upon the capability of the applicant to complete advanced doctoral studies through a demonstrated ability to think critically; to understand and apply analytical concepts; and to conduct substantive, innovative, and original inquiry that contributes to the theoretical and/or methodological foundations of the discipline of architecture.

To ensure the highest level of faculty support and proper level of faculty guidance, the program seeks to accept those students whose research interests are best matched with faculty specializations and expertise. It is essential that the applicant, in their written Statement of Purpose, establish a clear connection between the applicant’s interests and those of the faculty.

Required Components of the Application Package

1. Completion of the appropriate Graduate Student Application Form (http://graduate.ku.edu/application-process/) and associated application fee.
2. One official transcript from all colleges and universities from which credit has been received.
3. Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate Study, (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/?num1.5)
4. Graduate Record Examination (GRE) test results (not required, but preferred). Applications will still be reviewed without GRE scores. Applicants may be asked to submit GRE scores later, if needed.
5. Vita or resume.
6. Statement of purpose outlining your reasons for pursuing the MA/PhD in Architecture (not to exceed 1500 words).
7. Three letters of recommendation from educational and/or professional references that can speak on the applicant’s behalf regarding his/her research and academic potential, and ability to succeed in a doctoral program.
8. Portfolio of work illustrating the applicant’s interests and abilities in architecture-related inquiry. This portfolio should be representative of the applicant’s most significant work and may include design projects, research papers, academic papers, scholarly and/or professional presentations, or other work relevant to the applicant’s area of interest (limited to 10 MB (not zipped) in PDF format). Upload under “other documents.” The portfolio should be no longer than 15 pages.

A limited number of teaching or research assistantships are available. Interested candidates should include a separate statement requesting an assistantship in their application package (Maximum 150 words).

Application Deadline

All materials must be postmarked no later than January 15 and uploaded here (http://graduate.ku.edu/ku-graduate-application/). The application will be reviewed as they become available for review. Admission decisions will generally be taken by the end of January to take advantage of different graduate funding opportunities available in the University.

Vita or Resume

The vita or resume is to be a maximum of 5 pages. The format is determined by the applicant and should include background information about the applicant’s education, professional/work experience, professional certification or licensure, professional affiliations, and evidence of significant accomplishments such as grants received, publications, presentations, awards, competitions and/or other activities deemed significant by the applicant.

Statement of Purpose

The Statement of Purpose is one of the most important components in the application package. As a personal expression of interest, this statement distinguishes applicants from each other and clarifies the relationship between each applicant’s interests and the scholarship occurring among KU faculty. The Statement of Purpose should elaborate upon information provided in the transcripts and vita/resume and deliver a concise description of the applicant’s objectives, including research interests. This information is critical and, for that reason, the Statement of Purpose should reflect a clear rationale for pursuing the MA/PhD in Architecture.

The statement should:

• Describe the research that you anticipate pursuing if admitted to the program. The ideas should be clear, well stated, and specific.
• Describe your qualifications to undertake this research and reference your own or other related work if appropriate.
• Describe how your interests are compatible with our faculty interests.
• Describe the applicant’s career goals and how attainment of the MA/PhD will contribute to those goals.

The admissions committee needs a clear understanding of each applicant’s objectives and interests in order to ensure compatibility with the faculty interests.

The statement of purpose is a maximum of 1500 words (Times Roman, 10-point font, single spaced, double space between paragraphs).

MA students need to complete at least 36 credit hours of coursework to receive their degree. The coursework includes 12 hours of foundation courses, 12 hours of courses in a major area of research, 6 hours of guided study leading to a Comprehensive Oral Exam, and a research thesis or a final project.

Doctor of Philosophy in Architecture

Introduction

Architecture is inherently an interdisciplinary field of study, integrating knowledge from art, science, and the humanities. As a method of practice, it is a complex, collaborative, professional activity aimed at improving the quality of life for people and the planet. The discipline requires creative, critical, agile, and integrative thinking. Architecture deals with highly complex problems and aims to solve them not only competently, but in a way that ennobles society. The curriculum responds to these considerations by offering a series of overlapping sequences in professional and academic course work.

The Ph.D. in Architecture educates students to become more valuable to society through academic, business, and government organizations that require greater artistic, scientific, and investigative skills. It offers candidates opportunities to develop and deepen their education in 3 important ways:

• Enhancing research and analytical skills with rigorous methods of inquiry and synthesis;
• Acquiring advanced knowledge specific to their area(s) of inquiry through comprehensive scholarly investigations and distinguished documentation; and
• Developing the ability to communicate knowledge in a clear and eloquent manner.

To realize this goal, the faculty has made a commitment to create, along with doctoral students, a climate in which scholarship and creativity can flourish. Underlying the advanced study of architecture at KU is an ethic regarding architectural inquiry and architectural practice; one that sustains the question, “What ought we do as architects and researchers to enhance the quality of life on this planet?” Examples of inquiry at KU that exemplify this underlying question are

• Progressive models of practice embracing evidence-based design and design-build practices;
• Affordable housing with a sensitive aesthetic;
• Material investigations to create more affordable and sustainable building practices;
• Rigorous evaluations of built artifacts to inform better design practice;
• Translation of empirical findings of person-place interaction research into design guidelines; and
• Critical perspectives on human settlement patterns.

Our research is founded on an ethical position. We are not involved in research simply to generate knowledge for its own sake but rather to improve the human condition through more thoughtful built form. The overall focus is on developing understanding that may inform the critical delivery processes by which humane architecture is created.

Note: Contact the Architecture department or program for more information about the Research and Skills and Responsible Scholarship requirement for doctoral students.

APPLICATION GUIDELINES

Admission to the MA/PhD program is based upon the capability of the applicant to complete advanced doctoral studies through a demonstrated ability to think critically; to understand and apply analytical concepts; and to conduct substantive, innovative, and original inquiry that contributes to the theoretical and/or methodological foundations of the discipline of architecture.

To ensure the highest level of faculty support and proper level of faculty guidance, the program seeks to accept those students whose research interests are best matched with faculty specializations and expertise. It is essential that the applicant, in their written Statement of Purpose, establish a clear connection between the applicant’s interests and those of the faculty.

Required Components of the Application Package

1. Completion of the appropriate Graduate Student Application Form (http://graduate.ku.edu/application-process/) and associated application fee.
2. One official transcript from all colleges and universities from which credit has been received.
3. TOEFL or IELTS scores for international applicants (contact Architecture Admissions Coordinator for minimum scores).
4. Graduate Record Examination (GRE) test results (not required, but preferred). Applications will still be reviewed without GRE scores. Applicants may be asked to submit GRE scores later, if needed.
5. Vita or resume.
6. Statement of purpose outlining your reasons for pursing the MA/PhD in Architecture (not to exceed 1500 words).
7. Three letters of recommendation from educational and/or professional references that can speak on the applicant’s behalf regarding his/her research and academic potential, and ability to succeed in a doctoral program.
8. Portfolio of work illustrating the applicant’s interests and abilities in architecture-related inquiry. This portfolio should be representative of the applicant’s most significant work and may include design projects, research papers, academic papers, scholarly and/or professional presentations, or other work relevant to the applicant’s area of interest (limited to 10 MB (not zipped) in PDF format). Upload under “other documents.” The portfolio should be no longer than 15 pages.
A limited number of teaching or research assistantships are available. Interested candidates should include a separate statement requesting an assistantship in their application package (Maximum 150 words).

**Application Deadline**

All materials must be postmarked no later than January 15 and uploaded here (http://graduate.ku.edu/ku-graduate-application/). The application will be reviewed as they become available for review. Admission decisions will generally be made by the end of January to take advantage of different graduate funding opportunities available in the University.

**Application Contact Information**

Graduate Admissions
1450 Jayhawk Blvd., Room 313 Strong Hall
Lawrence, KS 66045
785.864.3140
graduateadm@ku.edu

Admissions Coordinator for Architecture
School of Architecture and Design
1465 Jayhawk Blvd., Room 205 Marvin Hall
Lawrence, KS 66045
785.864.3167
arch@ku.edu (archku@ku.edu)

**Vita or Resume**

The vita or resume is to be a maximum of 5 pages. The format is determined by the applicant and should include background information about the applicant’s education, professional/work experience, professional certification or licensure, professional affiliations, and evidence of significant accomplishments such as grants received, publications, presentations, awards, competitions and/or other activities deemed significant by the applicant.

**Statement of Purpose**

The Statement of Purpose is one of the most important components in the application package. As a personal expression of interest, this statement distinguishes applicants from each other and clarifies the relationship between each applicant’s interests and the scholarship occurring among KU faculty. The Statement of Purpose should elaborate upon information provided in the transcripts and vita/resume and deliver a concise description of the applicant’s objectives, including research interests. This information is critical and, for that reason, the Statement of Purpose should reflect a clear rationale for pursuing the MA/PhD in Architecture.

The statement should:

- Describe the research that you anticipate pursuing if admitted to the program. The ideas should be clear, well stated, and specific.
- Describe your qualifications to undertake this research and reference your own or other related work if appropriate.
- Describe how your interests are compatible with our faculty interests.
- Describe the applicant’s career goals and how attainment of the MA/PhD will contribute to those goals.

The admissions committee needs a clear understanding of each applicant’s objectives and interests in order to ensure compatibility with the faculty interests.

The statement of purpose is a maximum of 1500 words (Times Roman, 10-point font, single spaced, double space between paragraphs).

**Ph.D. Degree Requirements**

**General Plan of Study**

The Ph.D. in Architecture degree program is carefully crafted to allow students to engage in rewarding and potentially revolutionary scholarly investigation steeped in an atmosphere of rigorous academic pursuit. The 49-credit-hour curriculum is divided into three parts: foundation, concentrations, and advanced study. In the foundation, students must take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 930</td>
<td>Doctoral Seminar I</td>
<td>1</td>
</tr>
<tr>
<td>ARCH 931</td>
<td>Theories of Architectural Inquiry</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 951</td>
<td>Methods of Inquiry in Architectural Research</td>
<td>3</td>

<td>1</td>
</tr>
<tr>
<td>ARCH 959</td>
<td>Research Practicum</td>
<td>4</td>
</tr>
<tr>
<td>Major Course</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

Concentrations are major (12 credit hours minimum) and minor (9 credit hours minimum) curricula developed by the student in concert with the major professor. The student becomes a candidate upon passing the comprehensive examination. As a candidate, the student enters the advanced studies portion of the curriculum and begins work on the dissertation. The student must be continuously enrolled (http://policy.ku.edu/graduate-studies/doctoral-candidacy/) until all requirements for the degree are completed. A minimum of 9 dissertation credit hours is required for the degree. What follows under "Degree Plan" is a sample plan of study.

Undergraduate Certificate in Architecture Acoustics

The Certificate in Architectural Acoustics will be earned primarily by architecture and architectural engineering students who have shown a major interest in this specialized field which relates to room acoustics, architectural noise control, mechanical and electrical system noise control, and electro-acoustic systems.

To receive the Certificate in Architectural Acoustics students must complete 12 hours from the courses listed below, including either ARCH 520/ARCH 720 or ARCH 521/ARCH 721 or ARCE 620.

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>

For further information, please contact: Jason Pittman (pittman.jason.k@ku.edu).

Graduate Certificate in Architecture of Health and Wellness

Completion of the requirements for the Graduate Certificate of Health & Wellness Design varies according to each student’s academic situation. All students are required to take ARCH 731. Students in the NAAB accredited Master of Architecture program would complete the certificate by taking ARCH 807 and ARCH 808 in the final year of the program. Students not enrolled in the professional Master of Architecture program would take a total of fifteen (15) graduate hours in courses approved by the Health & Wellness faculty.

<table>
<thead>
<tr>

</tbody>
</table>

For further information contact Dr. Kent Spreckelmeyer, Professor of Architecture, kents@ku.edu.

Graduate Certificate in Building Information Modeling (BIM)

Admitted Graduate students would enroll in at least 12 credit hours:

The certificate program is currently revising the courses and will provide the updated information later. Please contact the department for inquiries.

Graduate Certificate in DesignBuild

It has been estimated that the majority of architecture and design schools in the United States now have some form of design-build experience; however, KU Architecture and Design remains one of the nation’s leaders in design-build education. Pioneering this philosophical tradition, KU
Architecture and Design is home to Studio 804, a two-semester advanced design-build studio that has been the recipient of numerous design awards and publications, including a monograph titled “Studio 804: An Architectural Experience”, published by Artifice Books. In addition to Studio 804, KU Architecture and Design offers ARCH 509 Designbuild Studio, an umbrella for several design-build studios such as the award-winning Dirt Works Studio and Dotte Agency, a public interest designbuild collective. Beyond design-build studios, the school offers furniture design, digital fabrication and robotics, and material investigations courses.

The Design-Build Certificate program aims to provide students with hands-on, material-based, experiential learning opportunities, anchored by the internationally acclaimed and award-winning designbuild studios at KU. This certificate is open to students in architecture, interior architecture, design, architectural engineering, and other allied disciplines. The certificate is available as a Continuing Professional Education (CPE) opportunity for outside professionals as well.

Total Credit Hours Required for Completion: 12

There are three primary paths to earn the Design-Build Certificate:
1) Studio 804: ARCH 803 Design-Build & Materiality I (6) + ARCH 804 Design-Build & Materiality II (6)
2) Design-Build+: ARCH 509 Design-Build Studio (6) + (2) additional qualifying 3-credit hour courses
3) Elective Courses: (4) qualifying 3-credit hour courses

Selected ARCH 600 Special Topics in Architecture and ARCH 700 Directed Readings in Architecture courses, with a focus on designbuild activities, may be eligible to fulfill the certificate program course requirements (syllabus submission required for certificate program director’s approval). Additionally, any of the above courses could be replaced with ARCH 799: Independent Study or ARCH 800 Special Topics in Architecture, focusing on the specific subject area.

Graduate Certificate in Historic Preservation

Working with historic buildings and neighborhoods, related legislation, and adaptive-reuse of historic structures are essential parts of the professional practice of architects, planners, and art historians. Their work often requires the repurposing and reuse of the existing building stock, which is a critical part of sustainable development. As well, the documentation, preservation, and interpretation of history as represented through historic buildings and landscapes is a vital aspect of any community’s civic pride. This Graduate Certificate of Historic Preservation is designed to provide students with the essential professional knowledge and skills in taking care of historic buildings and historic townscapes.

This Certificate is also open to students in American Studies, Anthropology, Art History, Geography, Museum Studies, World Regional Study Programs, Urban Planning, and the Global Awareness Certificate Program. The Certificate is available as a Continuing Professional Education (CPE) opportunity for outside professionals as well.

Students must complete 12 credit hours from the courses listed below.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 646</td>
<td>American Architectural History</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 647</td>
<td>Historic Preservation Theory</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 648</td>
<td>Historic Preservation Planning</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 649</td>
<td>Historic Preservation Technology</td>
<td>3</td>
</tr>
</tbody>
</table>

If needed any of the above courses could be replaced with ARCH 700: Directed Readings focusing on the specific subject area. These courses may be available via distance delivery or online.

Please direct questions regarding the Graduate Certificate of Historic Preservation to: Dr. Kapila D. Silva, Professor of Architecture, kapilads@ku.edu and Amy Van de Riet, Historic Preservation Technology Course Coordinator, amy.vanderiet@ku.edu.

Graduate Certificate in Participatory Design

The Graduate Certificate of Participatory Design (formerly Public Interest Design) is designed to provide students with the essential professional knowledge and skills in a truly community-engaged design process.

Total Credit Hours for Completion: 12 credits

Students may elect 12 hours of graduate-level credit from the courses listed below to satisfy specific curricular requirements for this certificate program. Students are required to take one ARCH 700 Directed Readings class in Participatory Design. Students in the professional M.Arch program may enroll in one of the Architecture Design Courses (ARCH 608 or ARCH 810) and complete the certificate requirements by taking one additional participatory design elective (ARCH 800 or another ARCH 700).

When signing up for the studio section, inquire with the contact below.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 700</td>

<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 608</td>
<td>Urban Dwelling (each year, one/more of these listed Design Studios may have been pre-approved as a designated participatory design studio. When signing up for the studio section, inquire with the program director to develop the reflective documentation required.)</td>
<td>6</td>
</tr>
</tbody>
</table>

Please direct questions regarding the Designbuild Graduate Certificate to: Chad Kraus, Associate Professor of Architecture, ckraus@ku.edu.

Applicants must meet all admissions requirements for certificate-seeking graduate admission as defined by the University’s policy on Admission to Graduate Study.
The Urban Design Certificate program enhances students’ ability to concentrate on topics related to sustainable place-making and creating human-scale spaces by focusing on urban theory, history, and design.

Total Credit Hours for Completion: 12

These courses allow both M. Arch Students and non-degree students to achieve this certificate. All students working towards the Urban Design Certificate are required to take ARCH 620 for 3 credits.

Students in the professional M.Arch. program can complete ARCH 814 for 6 credits. Both M.Arch students and students from outside the Department of Architecture can take urban-focused courses in ARCH and UBPL to fulfill the remaining credits.

Courses to choose from: ARCH 600 to participate on a team in the Hines Urban Land Institute urban design competition, ARCH 600 or ARCH 800 on Urban-focused topics, ARCH 700 for urban-focus independent study, or UBPL 735

<table>
<thead>
<tr>

Questions regarding the Urban Design Certificate should be directed to Andrew Moddrell, Associate Professor of Architecture, andrew.moddrell@ku.edu

Department of Design

Introduction

The Department of Design advances the professional work of thoughtful, creative, and meaningful design to delight, inspire, and serve the needs of people. Design is the planning that lays the basis for creation and development of every object or system people use. Design programs train students to be problem solvers who consider the aesthetic, functional, and user-focused aspects of an object or a process. This requires considerable integrative research, thought, modeling, interactive adjustments, and redesign.

KU is an accredited institutional member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Undergraduate Programs

The department offers a professional B.F.A. degree program with concentrations in the following:

- Illustration & Animation
- Industrial Design
- Photography
- Visual Communication Design

Courses for KU Students Not Admitted to Design

Students in other KU schools may enroll in Design courses for credit subject to the availability of classroom space with the permission of the instructor of the course.

Department Policy on Professionalism & Attendance

Design is a collaborative profession. Clear verbal skills are important in communicating one’s ideas to clients and Design team members, and professional conduct can have a significant impact on the ability of a Designer to succeed. Because of the importance of professionalism in communication and conduct, students should maintain themselves according to the following guidelines:

- Attend each session of class in its entirety.
- Come prepared to present their concepts, discuss how the form of their design supports their concept, and describe how they arrived at their ideas.
- Participate in critiques and discussions with a spirit of mutual respect. Providing comments to one’s peers is a privilege. Students will benefit
from both giving and receiving feedback - one does not have to "like" another's work, but must provide insightful commentary in a courteous and productive manner.

- Maintain a positive and open-minded attitude.
- Demonstrate self-discipline and eagerness to participate.
- Consistently strive for the highest standards of quality in work and conduct.

Failure to abide by the guidelines and policy notes stated in this policy will lower a student's grade by one full letter grade or more.

CELL PHONE USAGE:

Students are required to turn their cell phones off or on silent and refrain from browsing the web, using social media, checking email, text messaging, etc. during class, lectures, and demonstrations. Students may use these devices only during designated break times.

SUBMISSION OF LATE WORK:

All projects and assignments are due at the beginning of class on the date set by the instructor. Late projects will be penalized by lowering the project grade by one full letter grade for each day that it is late. Late projects will not be accepted beyond three days after the original due date. Instructors may elect not to accept late work, but must note their policy regarding late work in the syllabus for each class.

PENALTIES FOR EXCESSIVE ABSENCES:

Each class is a significant financial investment (http://affordability.ku.edu/costs/) by each student, is based on sequential information and projects, and requires the full participation of each student. Each session of class missed or coasted through is a wasteful and impedes the student's ability to succeed in that class. For those reasons, students are required to attend classes in which they are enrolled and/or intend to enroll, must be on time for each session of class, and must remain in attendance for each entire session of class. Attendance will be taken at the beginning of each session of class.

In the event of any absence, students are responsible for obtaining all missed information, materials, and assignments from the class period(s) during which they were absent. Students who are absent must complete all assignments by the due date originally assigned for the work.

For each class that meets twice per week, only three absences will be allowed for any reason during the course of a given semester. A semester total of four absences in a given class that meets twice per week will result in a penalty of one letter grade in that class. A semester total of five absences in a given class that meets twice per week will result in a semester grade of "F" in that class. In case of exceptional circumstances, instructors may make exceptions to this policy at their discretion.

For each class that meets only once per week, only two absences will be allowed for any reason during the course of a given semester. A semester total of three absences for a given class that meets once per week will result in a penalty of one letter grade in that class. A semester total of four absences in a given class that meets once per week will result in a semester grade of "F" in that class. In case of exceptional circumstances, instructors may make exceptions to this policy at their discretion.

A semester total of three "late" marks in any given class will be equivalent to one absence with respect to this policy.

In order to ensure that students are connected with support services at the university when appropriate, and to ensure that students are duly reminded of the possible consequences of continued truancy, instructors should submit an Absence Warning Form after two absences for a class that meets twice per week or after one absence for a class that meets once per week.

RELIGIOUS HOLIDAYS:

If any scheduled course meeting conflicts with mandated religious observance, the student must notify the instructor prior the day of the observance that the student will be absent.

MEDICALLY-RELATED ABSENCES:

Because of the fast-paced, project-based nature of studio curricula, absences as the result of a medical condition will count in the same way as non-medical absences. Excessive absence for any reason, as outlined in this policy, are irreparably detrimental to a student's ability to succeed in our studio curriculum.

If a student is facing an extended illness, the student or their designee should contact the relevant instructor(s) as soon as possible to discuss ramifications of future absences and possible solutions.

ALTERNATIVE ATTENDANCE POLICIES:

Instructors may implement amended versions of this policy at their discretion, which supersedes this policy for the class(es) for which the policy is implemented. Regardless, the attendance policy used for a class must be documented in the syllabus for that class in order to be considered valid.

School of Architecture & Design Policy on Plagiarism & Academic Misconduct

If a student tries to copy someone's work or take someone's idea and pass it off as their own they will suffer the penalties as outlined in the KU Student Code of Rights and Responsibilities.

All work that students hand in for a course must be made and created by them, over the course of this semester, exclusively for the course in question.

Academic misconduct by a student shall include, but not be limited to, disruption of classes; threatening an instructor or fellow student in an academic setting; giving or receiving of unauthorized aid on examinations or in the preparation of notebooks, themes, reports, or other assignments; knowingly misrepresenting the source of any academic work; unauthorized changing of grades; unauthorized use of University approvals or forging of signatures; falsification of research results; plagiarizing of another's work; violation of regulations or ethical codes for the treatment of human and animal subjects; or otherwise acting dishonestly in research. See full policy (https://design.ku.edu/arcd-academic-misconduct-policy/). (http://design.ku.edu/academic-misconduct-policyprocedure/)
The Department of Design’s procedures regarding allegations of plagiarism and academic misconduct are outlined here (https://design.ku.edu/department-academic-misconduct-procedures/).

Expected Workload
The minimum standard workload for courses at the University of Kansas (https://policy.ku.edu/registar/credit-hour/) entails a ratio of at least 2 hours of outside-of-class work per week for each credit hour. For instance, a typical 3-credit-hour course at KU features at least 6 hours of outside-of-class work each week.

In order to provide impactful training and prepare students for the rigor of professional work in Design, courses offered by the Department of Design often exceed that minimum standard. Students can anticipate 3 or more hours of outside-of-class work per week for each credit hour. This means that a 3-credit-hour course offered by the Department of Design usually features at least 9 hours of outside-of-class work each week, and a 4-credit-hour course offered by the Department of Design usually features at least 12 hours of outside-of-class work each week. Variability certainly exists due to student aptitude, instructors’ pedagogical strategies, and other factors, though these guidelines can be trusted as a general rule.

Because of the intense workload of Design courses, we recommend that students avoid extracurricular engagements that would have them working more than 10-15 hours per week. We realize that isn’t always possible, and our department’s academic advisor may be able to help you find a healthy balance! Please contact our department’s academic advisor (https://design.ku.edu/contact-our-advisor/) if you have questions or concerns about your workload.

Accommodation for Students with Documented Disabilities (ADA)
The Student Access Center (http://access.ku.edu/) coordinates academic accommodations and services for all eligible KU students with documented disabilities. If you have a documented disability for which you wish to request accommodations and have not contacted the Student Access Center, please do so as soon as soon as possible. They are located in 22 Strong Hall and can be reached at 785-864-4064 (V/TTY). Information about their services is also available at http://access.ku.edu/. Students should work with the Student Access Center to contact their instructor(s) at the start of each semester to make arrangements for any needed accommodations.

Minimum Grade Requirements, Minimum KU Cumulative GPA Required for Graduation
All students must earn or exceed certain minimum semester grades for courses in the “Foundation Studies” and “Major Studies” requirements of the Design BFA in order to continue in the program. Failure to earn the minimum required semester grade in a “Foundation Studies” course may require that the student in question repeat the course and earn the minimum required grade before they would be able to continue in the Design studio sequence. Failure to earn the minimum required semester grade in a “Major Studies” course may prohibit a student from continuing in the Design program entirely and may require that they select a new major area of study beyond Design. In most cases, “Foundation Studies” and “Major Studies” courses are only offered once per year. In addition to being listed on course syllabi and in relevant course descriptions, these specific grade requirements are outlined here (https://design.ku.edu/minimum-grades/).

Students in the Department of Design must maintain or exceed a 2.0 KU Cumulative Graduation GPA in order to graduate with our BFA in Design.

Graduate Programs
The department offers the following graduate degree programs:

• Master of Arts (M.A.) in Design with a concentration in Design Management & Strategy
• Master of Arts (M.A.) in Design with a concentration in Interaction & User Experience Design

Please visit the Graduate Studies (http://www.graduate.ku.edu) website for more information.

Courses
ADS 300. Foundations in Interaction Design. 3 Credits.
This course examines the fundamental principles and materials underlying the interactions between people, artifacts, and systems. Students will be introduced to a variety of new tools and techniques that will facilitate the prototyping of interactions/user interfaces/experiences of mobile devices, desktop devices, cars, games, consoles, kiosks, and/or apps. Projects, lectures, and tutorials will provide a working knowledge of fundamental principles, processes, and current tools. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

ADS 320. KU Design Symposium. 1 Credits.
Visiting Design professionals discuss various aspects of their work and the industry of Design. Professionals from all the Design areas of the Department are represented: Illustration & Animation, Industrial Design, Photography, and Visual Communication Design. Alternative courses may be allowed to count in place of ADS 320 in limited cases for students with immutable time conflicts. Students enrolled in this course must attend all sessions of the symposium each semester in order to earn a passing grade in the course. Open to all KU students. Graded on a satisfactory/unsatisfactory basis.

ADS 325. Design Thinking & Research Methodologies. 3 Credits.
Introduction to the principles of design thinking, design processes, design strategies and methods, including techniques and tools for the development of human-technology interfaces. Abstract through concrete representation methods and techniques will be applied to interaction design projects/problems. Information collection and analysis methods, scenario and prototyping methods, evaluation methods (empirical), creativity methods, and task-oriented methods (non-empirical) will also be considered. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

ADS 340. History and Philosophy of Design. 3 Credits.
Survey of design history from 1800 to present with emphasis on graphics, architecture, industrial and interior design movements, individuals and their influences. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

ADS 401. Design Ethics. 3 Credits.
Since the time of Socrates, philosophers have struggled with understanding everyday moral dilemmas. In this course, we will look at how cultures throughout history have framed everyday moral choices and how those choices apply to working as a designer/artist/architect in our contemporary world. Through presentations, guest lectures, small group discussions, and role-playing experiences, we will question and analyze ethical and moral problems faced by today’s shapers of culture. This course is named after industrial designer Victor Papanek, who served as a Distinguished Professor of Architecture & Design at KU
from 1981 until his death in 1998. His 1971 book "Design for the Real World" is credited as being one of the first publications which challenged designers to understand their social and ecological responsibilities. Open to all students admitted to majors and minors offered by the Department of Design. Other students may request instructor permission to enroll. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

**ADS 411. Design Trends and Forecasting. 3 Credits.**

This course introduces students to principles and theories from various disciplines concerning an understanding of cultural trends and micro-trends. Emphasis is placed on adaptation of these theories to an understanding of the practice of trends research and trend forecasting within the design practice, as well as how trends can be integrated into the designer's thinking and making process. Open to all students.

**ADS 530. Intra Design Problems: ______. 3 Credits.**

A collaborative studio across all Design Department areas of study. Students of the different areas will be organized into work groups and conduct in-depth research, investigate new problem solving methodologies, develop new applications and working knowledge of specialized subjects. Prerequisite: Junior level or higher standing in Design or Architecture or permission of the instructor.

**ADS 531. Internship Credit. 1-6 Credits.**

Students develop professional skills and problems solving through applied work with an employer in a Design field. Supervision by a professional designer, and prior approval by the relevant Area Coordinator is mandatory. May be repeated twice for credit. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Junior level or higher standing in the Design Department.

**ADS 532. Study Abroad: ______. 3 Credits.**

Students will participate in a Design focused study abroad program. The student will be required to attend group meetings prior to the trip along with development of research topics of interest. Simple documentation would be required - sketchbook/journal responding to day-to-day itinerary and other events, following the trip and presented for a grade. Prerequisite: Junior level or higher standing in Design or with permission of the instructor. Corequisite: ADS 533.

**ADS 533. Study Abroad Documentation. 3 Credits.**

Consists of research work prior to the trip as well as follow-up and required studio work due after return. A portfolio of work will be required for a grade. Course will also fulfill Design-specific requirements or studio credits for other majors. Areas may designate specific Design courses as substitutions for this course. Prerequisite: Junior level or higher standing in Design or with permission of the instructor. Corequisite: ADS 532.

**ADS 560. Topics in Design: ______. 3 Credits.**

A study of different topics in different semesters in a special area of interest to a staff member and suitable qualified students. May be repeated for credit. Prerequisite: Junior standing in department or permission of instructor.

**ADS 580. Special Problems in Design. 1-6 Credits.**

A study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and advisor prior to enrollment in the course. A student may not take more than six credit hours of special problems in any one semester. Prerequisite: Junior standing in department.

**ADS 601. Design Ethics. 3 Credits.**

Since the time of Socrates, philosophers have struggled with understanding everyday moral dilemmas. In this course, we will look at how cultures throughout history have framed everyday moral choices and how those choices apply to working as a designer/artist/architect in our contemporary world. Through presentations, guest lectures, small group discussions, and role-playing experiences, we will question and analyze ethical and moral problems faced by today's shapers of culture. This course is named after industrial designer Victor Papanek, who served as a Distinguished Professor of Architecture & Design at KU from 1981 until his death in 1998. His 1971 book "Design for the Real World" is credited as being one of the first publications which challenged designers to understand their social and ecological responsibilities. Open to all graduate students. Prerequisite: Graduate student status.

**ADS 710. Advanced Human Factors in Interaction Design. 3 Credits.**

The study of human factors principles and guidelines are fundamental to interaction design. In this course, these principles will be illustrated and applied to real-world design projects/problems. Human physical and cognitive capabilities, computer-human interface and systems properties, interaction design methods, and the physical and socio-cultural environment will be considered. Fundamental issues in human-centered systems, basic research methods, including statistics and literature searches, will be included. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 712. Advanced Design Methods. 3 Credits.**

This course will cover the principles of design thinking, design processes, design strategies and methods, including techniques and tools for the development of human-technology interfaces. Abstract through concrete representation methods and techniques will be applied to interaction design projects/problems. Information collection and analysis methods, scenario and prototyping methods, evaluation methods (empirical), creativity methods, and task-oriented method (non-empirical) will also be considered. Methods common to design-related disciplines in the social sciences, business, architecture, communication studies and engineering are integrated. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 714. Service and User Experience Design. 3 Credits.**

Business products, services and environments are often intermingled in ways that require more holistic ways of thinking and development. A challenge of service innovation is to design with an understanding of the many dimensions of human experience and satisfaction. This course elaborates how, where, when, and why design can enhance the value of business services. Theory, methods, and practice aspects of services design are presented. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

**ADS 720. Graduate Seminar in Design. 1 Credits.**

Comparative studies of various areas of specialization in design. Repeat for credit to a maximum of six credit hours.

**ADS 730. Directed Reading in Design. 1-3 Credits.**

Research reading and presentation of reports on specific subjects related to the students major area of specialization. Required of all graduate students.

**ADS 740. Special Problems in Design. 1-6 Credits.**

An in-depth study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and graduate advisor prior to enrollment in the course.

**ADS 750. Design Management. 3 Credits.**

Design Management has been described as "applied innovation" or the methodical capturing of talent and resources available inside and outside an organization to create valuable new offerings, brands, and business models. This course explores the design functions in business as a means to solve difficult challenges and develop new market-facing
opportunities. Subjects include brand value creation, differentiation, coordination, and transformation. Numerous cases will be discussed. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

ADS 751. Design Scenarios and Simulations. 3 Credits.
Most organizations are imaginatively challenged and experience difficulty innovating and marketing new concept offerings. Conventional methods spotting and validating new opportunities often lack the persuasive power necessary for change to occur. Scenario-based design and simulation offers ways to vividly representing a future that is different from the past. This course presents theory, methods and practice aspects of design scenario construction and simulation. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

ADS 760. Strategic Design Innovation. 3 Credits.
As companies struggle with the demands of increasing consumer, intense competition and downward price pressures, there is a corresponding increase in the demand for more innovative business models and higher-value offerings. These forces have significantly broadened the strategic scope of design. Advanced, multi-disciplinary design teams are being engaged early to help guide new business and product development efforts. Why, where, when, and how this is done in order to deliver on the promise of innovation is the subject of this course. Prerequisite: ADS 750 or instructor permission.

ADS 765. Interaction Design. 3 Credits.
Interaction Design is about creating products, services or environments that offer significant experiential value to people and economic value to organizations. This course engages the comprehensive subject of design for human experience. Building on the gamut of human factors and design methods knowledge, this offers hands-on experience in the research, analysis, modeling and simulation of original and experientially compelling design solutions. ADS 710 must be taken prior to or concurrently with this course. Prerequisite: Corequisite: ADS 710 or instructor permission.

ADS 850. Studio Teaching Practice. 1 Credits.
Graduate students only. Must hold an assistant instructor or teaching appointment. Credit earned does not satisfy any credit requirement for a degree. Graded on a satisfactory/unsatisfactory basis.

ADS 860. Graduate Synthesis and Applications Seminar. 1 Credits.
Group discussion and presentations on timely industry topics. Topics will be substantial, bridging relevant program subjects and professional area boundaries. May be repeated for up to six credit hours in subsequent semesters.

ADS 861. Thesis Research Seminar. 1 Credits.
Approaches to producing original design research. Methods, resources, topics and projects are discussed and evaluated. May be repeated for up to six credit hours in subsequent semesters. Prerequisite: Admission to the MA in Design Management or MA in Interaction Design or instructor permission.

ADS 890. Thesis. 1-8 Credits.
This course involves substantive individual research and thesis development, as well as regular discussions between student and instructor/advisor. Your ADS 890 instructor serves as your thesis advisor, and chairs your thesis committee. A thesis topic and research focus is expected very early in the term, followed by a formal thesis proposal containing clear objectives, schedule and deliverables. When green lighted, the proposed thesis is then executed by the student who prepares and presents the work to their thesis committee for evaluation. Prerequisite: Successful completion of ADS 861 and either ADS 750 or ADS 765.

Courses

BDS 100. Design Thinking. 1 Credits.
Design, like almost every industry, profession, school or major on campus, is forever being changed by technology, it’s reach, global access, and social innovation. From the basics of how to think like a designer or how to design a better presentation in powerpoint to how design can be situated in businesses and organizations to create innovative new products, services or social change. This course will give students an awareness of design in our everyday world: an understanding of some of the cultural, theoretical, conceptual, and practical issues related to design and designing. The ultimate goal is that by the end of this course students will know how design contributes to contemporary society and how they might use this understanding throughout their life in little and big ways. Open to all majors. Graded on a satisfactory/unsatisfactory basis.

BDS 101. Design Thinking and Making. 3 Credits.
This course is an introduction to creative problem-solving and the fundamentals of two-, three-, and four-dimensional design. Drawing, Photography, and 2D and 3D models are used in this course as a means of design thinking to visually represent problems and solutions. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

BDS 102. Design Thinking and Making II. 3 Credits.
This is a course for all Design Department majors and serves as a continuation of BDS 101 with a greater emphasis on examining the relationships between design and other systems: environment, society and culture, and technology and economics. One and a half hours of lecture and six hours of studio-lab per week. Students must receive at least a grade of C (2.0) in this course to continue in their Design program. Prerequisite: Must be admitted into the Design Department and have completed BDS 101 and 103 with at least a grade of C (2.0) or equivalent course work, or receive instructor permission. Prerequisite: BDS 101 and 103.

BDS 103. Drawing for Design. 3 Credits.
This course will focus on drawing as a tool of communication through freehand exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. Some identified sections of this course will also use two-and three-dimensional modeling software. Prerequisite: Admission to a major and/or minor offered by the Department of Design or instructor permission.

Courses

ILLU 200. Foundations in Image Making. 3 Credits.
Presentation of fundamental principles for communication through visual language. Exploration of theories in visual perception and visual communication, with focus on reading and developing visual images for intended meaning. Emphasis is placed on concept development, compositional exploration, color theory, the affect of value and color on images, and the significance of reference creation. Prerequisite: BDS 101 and BDS 103 with semester grades of “C+” or higher or instructor permission.

ILLU 205. Drawing Media for Illustration I. 3 Credits.
Exploration of problems in drawing for various reproduction processes. Emphasis on perspective, head drawing, the clothed and nude figure, nature illustration, perspective, and environments. Various drawing media
and materials are explored. Prerequisite: ILLU 200 and VISC 200 with semester grades of "C+" or higher or instructor permission.

**ILLU 305. Image Making. 3 Credits.**
Concentrated study in developing methodologies for producing contemporary illustration. Emphasis is placed on concept development, composition exploration, value and color studies, and reference creation. Required for Illustration majors as a pre-review course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 200.

**ILLU 315. Introduction to Illustration. 3 Credits.**
Concentrated study in developing skills and techniques with media and materials that are employed in producing contemporary illustration. Continued emphasis on methods of research and idea generation. Prerequisite: ILLU 200 and VISC 200 with semester grades of "C+" or higher or instructor permission.

**ILLU 405. Drawing Media for Illustration II. 3 Credits.**
Students will explore various drawing and painting media to continue developing their mastery of representational imagery for illustration. Reference collecting, model making, and the creating of photographic reference material will be addressed. Emphasis on mark making, value and color relationships, and placing the figure in an environment is also covered. Prerequisite: ILLU 205 and ILLU 315 with semester grades of "C+" or better or instructor permission.

**ILLU 410. Fundamentals of Animation. 4 Credits.**
Concentrated study in developing skills and techniques with digital media and materials employed in producing basic contemporary animation. Development of concept, script, storyboard, and use of audio, music and sound effects are part of this animation experience. Prerequisite: ILLU 205 and ILLU 315 with semester grades of "C+" or higher or instructor permission.

**ILLU 415. Illustration Concepts. 3 Credits.**
Focus of this course is to learn how to think visually. Concentrated study on developing different forms of concepts for illustration. Continued development of technical skills and visual literacy to gain insight on how to make images that communicate unique ideas clearly. Prerequisite: ILLU 405 and ILLU 410 with semester grades of "C+" or higher or instructor permission.

**ILLU 425. Concept Art. 3 Credits.**
Introductory exploration of the process, skills and concepts necessary for successful concept art character design and effective blending of matte painting and film. Drawing will be of primary concern for this course, yet exploring digital means of character development will also be introduced. Prerequisite: Successful completion of ILLU 405 and ILLU 410 with semester grades of "C+" or higher or instructor permission.

**ILLU 435. Sequential and Narrative Illustration. 3 Credits.**
Exploration of thematic illustration through the development of a series of images based on a topic or story. Aspects of continuity, consistency, storytelling, pacing, editing, packaging and a holistic method of developing illustration are addressed. Prerequisite: ILLU 415 and ILLU 425 with semester grades of "C" or higher or instructor permission.

**ILLU 445. Advanced Concept Art. 3 Credits.**
Continuation in exploration of the process, skills and concepts for successful concept art character design, along with continued development of digital characters and 3D modeling. Prerequisite: ILLU 415 and ILLU 425 with semester grades of "C" or higher or permission of instructor.

**ILLU 510. Advanced Animation. 4 Credits.**
Continued development of concepts, scripts, storyboards, and use of audio, music and sound effects in the production of a 1-3 minute animated film. Prerequisite: Prior completion of ILLU 410, ILLU 435, and ILLU 445 with semester grades of "C" or higher.

**ILLU 535. Promotion and Marketing for Illustration I. 3 Credits.**
Focus will be on preparation for entering the profession. Development and completion of a self-promotion and market package will supplement and support the senior portfolio. Contemporary business practices and legal issues will be addressed. Prerequisite: ILLU 435 and ILLU 445 with semester grades of "C" or higher.

**ILLU 545. Promotion and Marketing for Illustration II. 4 Credits.**
Continuation of phase development and completion of a self-promotion and market package from ILLU 535. Additional business practices and legal issues will be addressed. Prerequisite: ILLU 510 and ILLU 535 with semester grades of "C" or higher.

### Courses

**INDD 200. Foundations in Industrial Design. 3 Credits.**
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in prototyping, drawing, computer modeling, digital fabrication, and presentation are demonstrated and developed. Prerequisite: BDS 101 and BDS 103 with semester grades of "C+" or higher or instructor permission.

**INDD 212. Drawing for Industrial Design I. 3 Credits.**
This course will focus on drawing as a tool of communication through a variety of exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. This course will also use two- and three-dimensional modeling software necessary for all industrial designers. Prerequisite: BDS 101 and BDS 103 with semester grades of "C+" or better or instructor permission.

**INDD 284. Basic Industrial Design Studio. 3 Credits.**
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. Prerequisite: INDD 200 and INDD 212 with semester grades of "C+" or higher or instructor permission.

**INDD 302. Intermediate Industrial Design Studio. 4 Credits.**
This course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. Prerequisite: INDD 284 and INDD 312 with semester grades of "C+" or higher or instructor permission.

**INDD 308. Materials and Processes. 3 Credits.**
A study of modern materials, manufacturing processes, and construction methods applicable to the fields of industrial design and interior design. Design analysis of existing products, furniture, building components, and storage systems. Design assignments in furniture, storage systems, and interior space arrangements with emphasis on materials and construction. Field trips to area manufacturing and design facilities. Prerequisite: INDD 284 and INDD 312 with semester grades of "C+" or higher or instructor permission.

**INDD 312. Drawing for Industrial Design II. 3 Credits.**
Sketching allows product designers to generate ideas quickly, without committing resources to any single idea. This course continues to focus on sketching/drawing as a tool of communication through a variety of exercises that continues to explore form and proportion, composition, dimensional illusion and expressive characteristics. Prerequisite: INDD 200 and INDD 212 with semester grades of "C+" or better or instructor permission.

**INDD 320. Directed Readings in Industrial Design. 1 Credits.**
This course is an alternative to ADS 320 (Hallmark Symposium) for Industrial Design students with unavoidable scheduling conflicts. Students will watch relevant films and digital media, read important texts and articles, attend lectures, then compose and submit careful reflections on those media and experiences. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Department of Design in the School of Architecture & Design and department permission.

**INDD 350. Computer-Aided Design. 3 Credits.**
Students will develop the skills needed to efficiently build parametric CAD models consistent with industrial design professional standards using Solidworks, an industry standard solid modeling software. Emphasis will be placed on how to translate 2D designs into 3 Dimensional models, focusing on design for manufacturing, understanding complex surfacing, and assemblies. Students will learn how to create photorealistic renderings using Keyshot. Prerequisite: INDD 302 with a semester grade of "C" or higher or instructor permission.

**INDD 378. Problems in Industrial Design: ______. 3 Credits.**
Individual and/or group research projects in one of several specific design areas which will be identified on a semester by semester basis. May be repeated for credit. Prerequisite: INDD 302 with a semester grade of "C" or higher or permission of instructor.

**INDD 446. Advanced Industrial Design Studio. 3 Credits.**
Continuation of INDD 284 and 302 but encompassing design problems of greater complexity including group research and problem solving assignments in advanced product and service design. Advanced techniques in problem solving, concept communication, visualization, and overall design expression will be demonstrated and explored. Prerequisite: INDD 302 with a semester grade of "C" or higher or instructor permission.

**INDD 448. Professional Industrial Design Studio Practices. 3 Credits.**
Continuation of Industrial Design studios, projects are longer requiring a high level of demonstrated design ability for successful completion. Issues regarding professional ethics, accountability, and responsibility to public and client are discussed and implemented. Professional design, presentation, and visualization skills will be demonstrated and explored. Finished designs will include full production technical specifications. Prerequisite: INDD 446 with a semester grade of "C" or higher or instructor permission.

**INDD 508. Materials and Processes. 3 Credits.**
A study of modern materials, manufacturing processes, and construction methods applicable to the fields of industrial design and interior design. Design analysis of existing products, furniture, building components, and storage systems. Design assignments in furniture, storage systems, and interior space arrangements with emphasis on materials and construction. Field trips to area manufacturing and design facilities. Prerequisite: Permission of instructor.

**INDD 510. Human Factors and Ergonomics. 3 Credits.**
Introduction to the field of human factors appropriate to industrial, interior, interaction, and visual design. The course will cover a wide range of topics that fall underneath the umbrellas of cognitive ergonomics and physical ergonomics. This course aims to examine the cognitive and physical constraints of the human system and how design can address those issues. Prerequisite: INDD 302 with a semester grade of "C" or higher or instructor permission.

**INDD 512. Methods in Design. 3 Credits.**
Introduction to the study of methods of designing common to industrial, interior, and visual design. Evaluation methods (semantic differential), creativity methods (scenario writing), and task-oriented method: (PERT/CPM) will be considered in relation to design problems. Open to non-design students. Prerequisite: Corequisite: INDD 302 for industrial design majors or ENVD 200 for environmental design majors respectively. Consent of instructor for all other students.

**INDD 555. Portfolio. 3 Credits.**
Work directed toward maximizing the quality and effectiveness of the individual student's professional portfolio. Prerequisite: INDD 446 with a semester grade of "C" or higher or instructor permission.

**INDD 580. Senior Industrial Design Studio. 4 Credits.**
Course requires the negotiation and accomplishment of a comprehensive body of work, comprising independent research, ideation, refinement, detail technical specifications, renderings, and a working and tested prototype of your final design. A final report of the project is required documenting your design process, the depth and complexity of which are commensurate with expectations for entry-level professionals. Faculty may consider national or international competitions as appropriate substitutions for student derived briefs, where applicable. The nature and scope of the work (1-2 projects maximum), as well as details of anticipated accomplishment must be outlined by the student and approved by the instructor prior to the beginning of the second week of classes. In exceptional circumstances, projects may extend into both semesters, via INDD 581--this requires permission/negotiation with faculty and is to be declared as an aspiration at start of INDD 580. Prerequisite: INDD 448 and INDD 555 with semester grades of "C" or higher.

**INDD 581. Senior Industrial Design Studio II. 4 Credits.**
Course requires the negotiation and accomplishment of a comprehensive body of work, comprising independent research, ideation, refinement, detail technical specifications, renderings, and a working and tested prototype of your final design. A final report of the project is required documenting your design process, the depth and complexity of which are commensurate with expectations for entry-level professionals. Faculty may consider national or international competitions as appropriate substitutions for student derived briefs, where applicable. The nature and scope of the work (1-2 projects maximum), as well as details of anticipated accomplishment must be outlined by the student and approved by the instructor prior to the beginning of the second week of classes. In exceptional circumstances, projects may be a continuation of those started in INDD 580--this requires permission/negotiation with faculty and is to be declared as an aspiration at start of INDD 580. Prerequisite: INDD 580 with a semester grade of "C" or higher or instructor permission.

**INDD 715. Industrial Design. 2-6 Credits.**
Research-oriented advanced study in industrial design. Prerequisite: Graduate major in industrial design or consent of instructor.

**INDD 815. Industrial Design. 2-6 Credits.**
Prerequisite: INDD 715.

**Courses**

**PHTO 101. Fundamentals of Photography. 3 Credits.**
Open to students of all disciplines and experience levels, this course provides an introduction to the medium and language of photography.
Basic DSLR camera operation and workflow will be accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. A digital camera with full manual controls is required - RAW capable preferred.

**PHTO 177. First Year Seminar: Picturing Place: Photographing Lawrence. 3 Credits.**

Are you new to KU, Lawrence, or even the Midwest? Would you like to know your new home better? The act of photographing - observing, participating, being present - can accelerate a connection to Place. In this digital photography class, each student will identify a specific community or environment within the Lawrence area to photograph repeatedly and meaningfully over the course of the semester. Class time will be spent reviewing and refining the work, discussing its context, introducing research methods for deeper understanding of the chosen topic, and gaining inspiration from relevant historic and contemporary models of photographic inquiry. By the end of the semester, the student will have strengthened both their visual literacy skills and their ties to their new surroundings. All photographic experience levels welcome.

**PHTO 200. Foundations in Photography: Digital. 3 Credits.**

Foundations in Photography (Digital) explores the technical and creative possibilities of digital photography from image capture to print and the web. This advanced introductory-level studio course covers manual camera operation with dSLR or mirrorless digital cameras, basic digital processing workflow with Adobe software, and inkjet print or digital output methods, accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. A digital camera with full manual controls and RAW capable is preferred; a limited number of cameras are available for check-out.

**PHTO 201. Photography I. 4 Credits.**

The first of the two-part foundational Photography sequence, this majors-only course provides students with a rigorous immersion into the formal, technical, and conceptual concerns and challenges of photography by way of the view camera. Embracing both the wet and digital darkrooms, students shoot and develop sheet film that is then utilized to produce both traditional and digital prints. Intermediate digital editing methods are introduced and explored. View cameras are provided. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 101 and PHTO 200 with grades of C (2.0) or higher.

**PHTO 202. Photography II. 4 Credits.**

The second of the two-part foundational Photography sequence, this advanced course builds upon PHTO 201 with additional emphasis on color, RAW workflow, and advanced methods for digital capture, manipulation, editing, and compositing. Additionally, students work extensively with large-format inkjet printers to create custom ICC printing profiles. A digital SLR (RAW capable) camera with full manual controls is required. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 101 and PHTO 200 with grades of C (2.0) or higher.

**PHTO 205. Foundations in Photography: Darkroom. 3 Credits.**

This introductory studio explores the technical and creative possibilities of black & white film photography. PHTO 205 covers manual camera operation using 35mm film cameras, darkroom film developing, and silver-gelatin printing methods, accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. Cameras are provided for check-out. No darkroom experience necessary.

**PHTO 210. Understanding Photographs. 3 Credits.**

Understanding Photographs is a lecture-based course that focuses on developing a critical understanding of how images, paired with culture and society, generate meaning in both the historical and contemporary contexts. Open to students of all disciplines and experience level.

**PHTO 303. Photography I: View Camera. 4 Credits.**

The first of the two-part second-year foundational Photography sequence for Photography majors, this course provides students with a rigorous immersion into the formal, technical, and conceptual concerns and challenges of photography by way of the view camera. Embracing both the wet and digital darkrooms, students shoot and develop sheet film that is then utilized to produce both traditional and digital prints. Intermediate digital editing methods are introduced and explored. View cameras are provided. Prerequisite: Admission to the Photography Major or Minor and PHTO 200 or PHTO 205 with a semester grade of "C+" or higher or instructor permission. Priority will be given to Photography majors.

**PHTO 304. Photography II: Color Digital. 4 Credits.**

The second of the two-part foundational Photography sequence, this advanced course builds upon PHTO 303 with additional emphasis on color, RAW workflow, and advanced methods for digital capture, manipulation, editing, and compositing. Additionally, students work extensively with large-format inkjet printers to create custom ICC printing profiles. A digital SLR (RAW capable) camera with full manual controls is required. Prerequisite: Admission to the Photography major or minor and PHTO 303 with a semester grade of "C+" or higher, or instructor permission.

**PHTO 305. Photography III: The Moving Image. 4 Credits.**

This course serves as an introduction to the principles and challenges of photography as a time-based medium. Fundamental concepts of production are introduced and explored through hands-on exercises, class presentations and discussions, lectures, critiques, and individual and group projects. Prerequisite: Successful completion of PHTO 304 with a semester grade of "C" or higher.

**PHTO 313. Lighting Studio. 3 Credits.**

Lighting Studio is a fundamental course in awareness, modification, and control of light. Students work extensively with strobe and continuous light sources. Principles of natural and artificial light are introduced, explored, and applied through hands-on assignments both in and out of the studio environment. Prerequisite: Admission to the Photography major or minor and PHTO 304 with a semester grade of "C" or higher or instructor permission.

**PHTO 314. The Moving Image. 3 Credits.**

This course serves as an introduction to the principles and challenges of photography as a time-based medium. Fundamental concepts of production are introduced and explored through hands-on exercises, class presentations and discussions, lectures, critiques, and individual and group projects. Prerequisite: Admission to the Photography major or minor and PHTO 304 with a semester grade of "C" or higher or instructor permission.

**PHTO 315. Experimental Processes. 3 Credits.**

Experimental Processes is an introduction to the understanding and production of image-based works utilizing experimental approaches and alternative processes in an interdisciplinary environment. Prerequisite: Admission to the Photography major or minor and PHTO 304 with a semester grade of "C" or higher or permission of instructor.

**PHTO 316. Professional Practices. 3 Credits.**

This course provides an introduction to standards and conventions with regards to professional photographic practice. Topics include portfolio development, copyright, contracts, grant/statement writing, presentation
methods, and self-promotion. Prerequisite: PHTO 400 or PHTO 402 each with a semester grade of “C” or higher or instructor permission.

PHTO 360. The Photobook. 3 Credits.
This class introduces students to the many potentials of photographic imagery in book form, from the traditional monograph to the narrative or lyrical and experimental. Considerations of sequencing, context, text, design, materiality, meaning, and production methods will be explored through book examples, readings, discussions, and in-class exercises. The class will culminate in the design and production of a hand-made or on-demand book. Prerequisite: PHTO 304 with a grade of C or higher or declaration of the Undergraduate Certificate in Book Arts or admission to the Photography Minor or instructor permission.

PHTO 400. Junior Seminar. 3 Credits.
This junior-level seminar is focused primarily on the development of independent and collaborative projects through an on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photographic practice through assigned readings, presentations, and group discussion. Prerequisite: PHTO 304 with a semester grade of “C” or better or instructor permission.

PHTO 402. Photo Media Seminar. 3 Credits.
This upper-level seminar is focused primarily on the development of independent and collaborative projects through on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photographic practice through assigned readings, presentations, and group discussion. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: PHTO 304 or instructor permission.

PHTO 450. Senior Seminar. 3 Credits.
This senior-level seminar is focused primarily on the further development of independent and collaborative projects through an on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photography practice through assigned readings, presentations, and group discussion. Prerequisite: PHTO 400 with a semester grade of “C” or higher or instructor permission.

PHTO 500. Portfolio and Thesis. 4 Credits.
Taken the final semester of study, this capstone course guides students through the research, development, and refinement of a final body of photographic work and appropriate supplemental materials. Methods and strategies of presentation and dissemination are discussed and explored. Prerequisite: PHTO 450 with a semester grade of “C” or higher or instructor permission.

PHTO 513. Advanced Lighting Studio. 3 Credits.
A continuation of the skills and principles discussed in PHTO 313. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHTO 313 or instructor permission.

PHTO 514. Advanced Moving Image. 3 Credits.
A continuation of the skills and principles discussed in PHTO 314. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHTO 314 or instructor permission.

PHTO 515. Advanced Experimental Processes. 3 Credits.
A continuation of the skills and principles covered in PHTO 315. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHTO 315.

PHTO 560. Special Topics in Photography. 3 Credits.
Special topics courses in Photography vary by instructor and provide additional opportunities for interdisciplinary research and advanced specialized study. A semester grade of “C” or higher is required in order for this course to count toward the “Major Studies Electives” component of the Photography major. May be repeated for credit. Prerequisite: PHTO 304 with a semester grade of “C” or higher or instructor permission.

Courses
VISC 177. First Year Seminar: ______. 3 Credits.
A limited enrollment, seminar course for Freshmen, addressing current issues in Graphic Design. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

VISC 200. Foundations in Typography. 3 Credits.
Introduces the discipline, function, and tradition of typography as it relates to visual/verbal communication. Emphasis is on interrelationships of letter, word, line and page. Projects examine two-dimensional typographic space, sequence and information hierarchy. Prerequisite: BDS 101 and BDS 103 with semester grades of “C+” or higher or instructor permission.

VISC 201. Visual Communication Design. 3 Credits.
Presentation of fundamental concepts of visual and non-visual communication. Exploration of various theories of visual perception and visual communication with emphasis on reading visual images for meaning and making meaning through the construction of visual images and typography. A special laboratory section will include design thinking and making strategies and processes which are common to visual communication design from the handmade to the computer. This course is for non-Visual Communication majors. Prerequisite: Corequisite: BDS 102.

VISC 202. Elements of Typography. 3 Credits.
Introduces the discipline, function, and tradition of typography as it relates to visual/verbal communication. Emphasis is on interrelationships of letter, word, line and page. Projects examine two-dimensional typographic space, sequence and information hierarchy. Prerequisite: VISC 200 and ILLU 200 with semester grades of “C+” or higher or instructor permission.

VISC 204. Principles of Visual Communication. 3 Credits.
Visual communication problems involving the student in the translation of verbal concepts and design theory into visual images. This course focuses attention on the process of defining problems, gathering information, and formulating clear, powerful, and persuasive visual statements. Introduction to methods of research, idea generation, and image making will be an integral part of this course. Prerequisite: VISC 200 and ILLU 200 with semester grades of “C+” or higher or instructor permission.

VISC 302. Typographic Systems. 4 Credits.
Further exploration of typographic form and manipulation of variables which affect content; stresses the importance of typographic composition as an integral component of visual communication design. Projects examine advanced structures of typographic space, work-image structure, and typographic details and aesthetic. Prerequisite: VISC 202 and VISC 204 with semester grades of “C+” or higher or instructor permission.

VISC 304. Designing Understanding. 4 Credits.
In this course students will explore the possibilities that digital technologies offer to the letterpress printer, including laser cutting and polymer platemaking. Students will learn how to prepare digital files to make negatives, and to process and print polymer plates on the Vandercook press. Emphasis will be placed on creativity and craft. Starting with the simplest of techniques, projects will grow in increasing technical and aesthetic complexity. No previous letterpress experience is required. Knowledge of Adobe InDesign and Illustrator is essential. Prerequisite: Permission of instructor.

**VISC 414. Publication and Editorial. 3 Credits.**

Exploration of topics dealing intensively with editorial concept and format organization. Projects stress advanced problems in the integration of text and image through the development of complex and variable structures. Emphasis on thorough researching of content and audience as well as understanding of production/execution implications of solutions. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 415. Motion Graphics. 3 Credits.**

Introduction to the elements, principles and history of motion design. Emphasis on the conceptualization, planning and storyboarding of time-based media with respect to some specific, clearly stated aesthetic and/or communicative purpose. Students will examine methods for synthesizing still & moving imagery, typography and audio, in motion, using Adobe After Effects in combination with other software such as Final Cut Pro, Illustrator and Photoshop. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 420. Exhibition Design. 3 Credits.**

This course will explore how exhibitions are conceptualized, designed and made. It will look at the role of curators, exhibition designers, graphic designers as well as the audience of cultural institutions. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 425. Environmental Graphics. 3 Credits.**

This course will examine core principles and practices of environmental graphic design. Many of these concepts will be concerned with the visual aspects of wayfinding, communicating identity and information, and shaping the idea of place. Some of the topics discussed will include: signage, exhibit design, identity graphics, pictogram design, mapping, civic design and themed environments. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 435. Book Arts. 3 Credits.**

Producing books in editions is a complex undertaking. Students work in teams to create or compile content of their choosing, then edit, design, and bind their own books in a small edition. The class combines both traditional letterpress technology and digital interface for the creation of text and image. Each student receives two copies of the team's final book, one copy is archived in Special Collections at the Spencer Research Library. Prerequisite: BDS 101 with a semester grade of "C+" or instructor permission.

**VISC 440. Bookmaking. 3 Credits.**

Students will learn to make a variety of book structures and enclosures, from historical to contemporary. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of bindings for future reference. Students will document paper that is made in class and create a record for themselves, other students, and the Department of Design. Prerequisite: BDS 101 with a semester grade of "C+" or higher or instructor permission.

**VISC 455. Designing Information. 3 Credits.**
Making preliminary visualizations, models, and prototypes. Examines words, diagrams, type, and sequencing to restructure messages so that they tell a story more effectively. Editing images to make messages clear, unambiguous and understandable by their intended audience(s). Designing the appearance of an information product so that users can find what they want and understand it when they get there. Prerequisite: VISC 302 and VISC 304 with semester grades of "C+" or higher or instructor permission.

**VISC 520. Designing for Change. 4 Credits.**

Exploration of branding, service and interaction design opportunities that respond to real-life complexity: audiences, systems and contexts. Introduces business and design thinking strategies associated with brand development and the idea that design plays a vital role in our local, national, and global society and well-being. Emphasis on the methods of thinking and research which precede the making of design as well as the importance of writing and verbal presentation to the visual communication design profession. Prerequisite: VISC 404 and VISC 405 with semester grades of "C" or higher or instructor permission.

**VISC 525. Senior Problems. 3 Credits.**

Goal-oriented graphic design problem-solving with emphasis on research, analysis, and synthesis of complex visual problems. Will allow for in-depth study of professional design issues and topics; provides a forum for multi-disciplinary collaboration with related professional disciplines. May be repeated for credit. Prerequisite: VISC 530 with a semester grade of "C" or higher, or instructor permission.

**VISC 530. Portfolio. 4 Credits.**

Instruction in the organization and presentation of a professional quality visual portfolio. Readings, feedback and online collaborations will focus on the development of a focused portfolio consistent with the individual student's pursuits. Prerequisite: VISC 402 and VISC 520 with semester grades of "C" or higher or instructor permission.

**VISC 560. Special Topics in Visual Communication: _____ 3 Credits.**

A study of different topics in different semesters in a special area of visual communication. Entry by permission of instructor. May be repeated for credit.

**VISC 706. Graphics. 3-6 Credits.**

**VISC 710. Letterpress. 3 Credits.**

This introductory course in letterpress will instruct the student in methods for printing from moveable type and other type-high surfaces. The discipline will be explored from a historic as well as artistic perspective. Emphasis will be placed on the acquisition of skills and vocabulary, and the creative use of type and techniques. Prerequisite: Graduate student status and instructor permission.

**VISC 712. Letterpress II: Form and Content. 3 Credits.**

Artists' books are books created as original works of art that push the boundaries of the traditional book. This course will focus on the interdependence of form and content through studio work, readings, and the examination of historical and contemporary models. Students will explore a wide range of book structures from basic to innovative. Final outcomes will combine images, hand set type, and digital processes to create both one-of-a-kind, and limited edition artists' books. VISC 710 is recommended, but not required. Open to all majors. Prerequisite: Permission of the instructor.

**VISC 735. Book Arts. 3 Credits.**

Combines wide range of traditional letterpress and digital processes for type and image for individually determined student book projects. Projects will culminate in a small printed and bound edition. Prerequisite: Graduate student status and instructor permission.

**VISC 740. Bookmaking. 3 Credits.**

This course will seek to acquaint the student with the origins of the book, paper, and pre-paper writing surfaces. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of structures and variations for future reference. Students will document paper that is made in class and create a record for themselves, other students, and the School of Architecture & Design. Prerequisite: Graduate student status and instructor permission.

### Bachelor of Fine Arts in Design

The mission of the Department of Design is to seek to engage its students in the practice of design thinking and visualization to create beautiful, innovative, and responsible solutions (products, spaces, systems, messages, and services) that respond to human needs and enhance the quality of everyday life.

The Department of Design encompasses a rich tradition and a long history of educating students to engage in current paradigms toward defining the future of design practice. Exceptional faculty and state-of-the-art facilities provide an environment that cultivates and optimal educational experience in each area of undergraduate and graduate study through innovative and comprehensive curricula and experiences. Students gain insights from lectures and workshops with world-renowned designers, collaborations with industry partners, and opportunities to participate in short-term study abroad programs and semester-long internships in the US and abroad.

Check out a selection of great student work:

- Illustration & Animation (https://www.behance.net/KU-Illustration/)
- Industrial Design (https://www.behance.net/ku-industrialdesign/)
- Photography (https://www.behance.net/KU-Photography/)
- Visual Communication Design (https://www.behance.net/KU-VisCom/)
- Outside of class projects: (https://www.behance.net/KU_BlitzWorkshops/) Study Abroad, Workshops and Blitzes

The University of Kansas Department of Design is an accredited institutional member of the National Association of Schools of Art and Design (https://nasad.arts-accredit.org/) (NASAD).

### Undergraduate Admissions Requirements

#### Incoming Freshmen

Admission to the Department of Design is selective and competitive. Students can complete the online University of Kansas application by going to admissions.ku.edu (https://admissions.ku.edu/). This application serves as the application for admission to KU, admission to the Department of Design, and eligibility for scholarships (https://admissions.ku.edu/tuition-scholarship/freshman/).

Applicants must submit a portfolio (https://arcd.ku.edu/undergraddesignadmissions/) and must be admissible to KU (https://admissions.ku.edu/freshman-requirements-deadlines/) by assured admission or individual review according to the following criteria:

- 21+ ACT (1060+ SAT) and 3.25+ GPA
- or
24+ ACT (1160+ SAT) and 3.0+ GPA

Portfolio:
- Required for all applicants.
- 10-15 images of creative work and a brief essay question.
- Learn more and submit a portfolio here (https://arcd.ku.edu/undergraddesignadmissions/).

Application Deadlines:
- Priority Consideration - Nov. 1
- Final Deadline - Feb. 1

Portfolios are not reviewed until after the deadlines. Decision letters are sent approximately one month after the deadline.

Transfer Students
Admission to the Department of Design is selective and competitive. Complete the online application by going to admissions.ku.edu (http://admissions.ku.edu/) and selecting the School of Architecture and Design, then select your major. This application will serve as your application to KU, the Department of Design and University scholarships (https://admissions.ku.edu/tuition-scholarship/transfer/).

In addition, students must submit a portfolio (https://arcd.ku.edu/undergraddesignadmissions/).

Requirements
- Must have a 3.0+ cumulative GPA from previous institutions, including KU
- Complete online application (https://admissions.ku.edu/i-am/transfer/)
- Submit official transcripts to the KU Office of Admissions (https://admissions.ku.edu/transfer-requirements-deadlines/transfer-college-credits/)
- Submit portfolio (https://arcd.ku.edu/undergraddesignadmissions/)

Application Deadlines
- Spring: Oct. 1
- Fall: Feb. 1

Transferring credits to KU
Utilize KU’s credit transfer tool (http://credittransfer.ku.edu/) to learn more about how your courses may transfer to KU. Please note transfer studio courses with a grade of C+ or lower will not be accepted by the Department of Design for credit. Transfer general education courses with a grade of D+ or lower will not be accepted by the Department of Design.

International Students
Admission to the Department of Design is selective and competitive. International students should apply through the Office of International Recruitment and Undergraduate Admissions (http://irua.ku.edu/).

Requirements
- Total TOEFL IBT score of 70+ or Total IELTS score of 6.0+
- Must have at least a 3.0+ cumulative GPA on a 4.0-point scale
- Complete Online Application (https://irua.ku.edu/apply/)
- Submit Portfolio (https://arcd.ku.edu/undergraddesignadmissions/)

Application Deadlines
- Spring: Oct. 1
- Fall: Feb. 1

Current KU Students (change of school)
Admission to the Department of Design is selective and competitive. Students must fill out the Change of School form (http://registrar.ku.edu/change-school/) and select their major. This form will serve as your application to the Department of Design. In addition, students must submit a portfolio (https://arcd.ku.edu/undergraddesignadmissions/).

Requirements
- Must have a 3.0+ cumulative GPA from previous institutions, including KU
- Complete Change of School Form (http://registrar.ku.edu/change-school/)
- Submit Portfolio (https://arcd.ku.edu/undergraddesignadmissions/)

Application Deadlines
- Spring: Oct. 1
- Fall: Feb. 1

Students Seeking Readmission and Non-Degree Seeking Students
Admission to the Department of Design is selective and competitive. If you've taken classes at KU before or wish to take a class that won't necessarily count toward a degree at KU, please follow these application instructions (https://admissions.ku.edu/apply/). If you have taken courses at another institution since attending KU, please follow the application process for transfer students (http://design.ku.edu/transfer/).

Requirements
- Complete the appropriate application to KU online (https://admissions.ku.edu/apply/).
- Applications are reviewed on a case-by-case basis. Some applicants may be asked to submit a portfolio (https://arcd.ku.edu/undergraddesignadmissions/) for consideration.

Application Deadlines
- Spring: Oct. 1
- Fall: Feb. 1

Portfolio Requirement
All applicants must submit a portfolio to be considered for admission to the Department of Design.

Portfolios are submitted online through SlideRoom. Please select "Undergraduate Student - Portfolio Submission (https://kudesign.slideroom.com/)" from the directory. For technical
The Illustration & Animation program prepares students to develop and refine methodologies in image-making while acquiring an effective use of visual language and problem solving skills. Technical skills and techniques, as well as a refined understanding of composition, color, and value are developed through the introduction and exploration of traditional and contemporary media. Business and legal issues of the industry are addressed that prepare students for numerous professional options that include print media, book publishing, motion graphics, entertainment, gallery installation, fashion, toys and games, and surface design.

Industrial Design
Graduates of KU’s Industrial Design program are particularly attractive to potential employers because of our well-rounded and rigorous curriculum. Our students find career opportunities in a wide variety of disciplines including product design, furniture design, exhibit design, package design, human factors, design research and product planning. The variety of products and systems that fall within the potential scope of an industrial designer's work is extremely broad. Examples range from household appliances to aircraft interiors, furniture to major electronics equipment, transportation and vehicles, and myriad other product areas.

Photography
The Photography program at the University of Kansas is dedicated to evaluating and redefining the medium of photography. Through in-depth instruction, students develop a diverse technical skill set, becoming proficient in both analog and digital practices. The program encourages a strong work ethic, and places emphasis on visual literacy. Graduates of the Photography program at the University of Kansas leave with exceptional visual communication skills, fully prepared to successfully engage in a wide range of possible careers in lens-based media.

Visual Communication Design
Visual Communication Designers shape the information that everybody sees, uses and experiences. The Visual Communication Design program at KU prepares students for current professional demands and provides students with the fundamental design thinking, making and process skills required to build a rewarding career and facilitate life-long learning. Career options for visual communication designers include a wide range of areas such as traditional print media, magazine and book design, corporate marketing communications, branding, packaging design, exhibition and environmental design, motion graphic design, website design, interface design and more.

General Degree Requirements
Total Credit Hours Required for the Design BFA
In order to earn the Bachelor of Fine Arts in Design degree, students must complete a total of at least 120 credit hours. At least 45 of those credit hours must be completed at the 300+ level (also referred to as “junior/senior” level). At least 30 credit hours must be completed through KU (also referred to as “taken in residence”) to receive a degree from the department and KU.

Maximum Number of Applicable Activity Credit Hours
Only three hours of activity and/or performance work (e.g. HSES 108 or BAND 210) will count toward the degree.

Maximum Accepted Age of Studio Transfer Credit
Transfer courses with course codes ADS, BDS, ILLU, INDD, PHTO, and VISC will not be accepted to fulfill requirements in the Studio & Professional Requirements component of the Design BFA if they are older than three calendar years from the semester to which the student is admitted to the Department of Design.
Remedial Courses
Remedial courses - those numbered below 100, such as MATH 2 - will not be counted toward the requirements of the Design BFA and may only serve only as prerequisites to other courses.

Minimum Required Grades for Foundation Studies and Major Studies Courses
Specific minimum grades are required for each course in the Foundation Studies and Major Studies requirements of the Design BFA. Failure to meet these minimum grade requirements can result in an extended track to graduation or prohibition from continuing in a student's concentration in the Design BFA. These minimum grades are documented each course's catalog description as well as at https://arcd.ku.edu/minimum-grades-sequenced-courses/.

Minimum GPA Required to graduate from the Design BFA
Students must earn or exceed a 2.0 KU Cumulative Graduation GPA in order to be eligible to graduate from any concentration in the Design BFA.

Second Year Full Review
After completing second-year spring-semester Major Studies courses, students are required to participate in a portfolio review that is organized according to each student's concentration in the Design BFA, as outlined below:

Illustration & Animation:
• Students are required to participate in a portfolio review of all course content produced in both fall and spring semester Illustration & Animation courses. The Illustration & Animation faculty use this review to determine if a student's work is at a satisfactory level. Supplemental to the grade portion of the Portfolio Review, students are also evaluated on attendance, work habits, attitude, and the ability to listen and learn from constructive criticism.

Industrial Design:
• The Portfolio Review is of all projects produced in both the fall and spring semesters in Industrial Design courses: INDD 212, INDD 284 and INDD 302. The Industrial Design faculty use this review to determine if the student's work is at an above satisfactory level. Supplemental to the grade portion of the Portfolio Review, students are also evaluated on attendance, work habits, attitude and the ability to listen and learn from constructive criticism.

Photography:
• The primary component of the review is the submission of a photographic portfolio (10-15 images) of work made over the course of the previous year. Each portfolio is evaluated by a faculty committee upon the following criteria: originality, treatment of form and composition, engagement with subject matter and medium, quality of ideas, technical ability, and craftsmanship. In addition to the use of portfolio, students are also evaluated on attendance, work habits, professionalism, participation, and GPA.

Visual Communication Design:
• The Portfolio Review is of all projects produced in both the fall and spring semesters in Visual Communication Design courses. The Visual Communication Design faculty use this review to determine if the students' work is at a satisfactory level. Supplemental to the grade portion of the Portfolio Review, students are also evaluated on attendance, work habits, attitude, and the ability to listen and learn from constructive criticism.

In addition to passing the Second-Year Full Review, students must earn or exceed the minimum required grades for their spring-semester Major Studies courses to continue in the studio sequence for their concentration of the Design BFA.

Students who fail to pass the Second-Year Full Review and/or fail to earn or exceed the minimum required grades for their spring-semester Major Studies courses do not have the option of repeating any Major Studies coursework and must change their major.

Breadth of Study Requirements
Written & Oral Communication
At least 12 credit hours of courses in written and oral communication are required of all Design students, consisting of:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101</td>
<td>Composition Communication</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 102</td>
<td>Critical Reading and Writing (Written Commun)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>ENGL 105 Honors Introduction to English</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Select one of the following:</td>
<td></td>
</tr>
<tr>
<td>ENGL 203</td>
<td>Topics in Reading and Writing: _____</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 205</td>
<td>Freshman-Sophomore Honors Proseminar: _____</td>
<td></td>
</tr>
<tr>
<td>ENGL 209</td>
<td>Introduction to Fiction</td>
<td></td>
</tr>
<tr>
<td>ENGL 210</td>
<td>Introduction to Poetry</td>
<td></td>
</tr>
<tr>
<td>ENGL 211</td>
<td>Introduction to the Drama</td>
<td></td>
</tr>
<tr>
<td>KU Core Goal GE22 (Oral Communication)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

Students whose ACT/SAT/AP scores have exempted them from ENGL 101 and/or ENGL 102 may need to complete 3-6 credit hours of additional General Elective courses in order to meet the minimum credit hour requirements of their degree. Students who earn credit for ENGL 101, 102, and/or 105 through AP or IB credit may be exempted from taking those additional General Elective courses in some cases.

Historical Context
At least 12 credit hours of historical context courses will be required of all Design students, consisting of the following for students in the Illustration & Animation, Industrial Design, and Visual Communication Design concentrations of the Design BFA:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HA 150</td>
<td>History of Western Art: Ancient Through Medieval</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Fulfills KU Core Goal AE42 (Global Awareness)</td>
<td></td>
</tr>
<tr>
<td>or HA 160</td>
<td>History of Western Art : Ancient Through Medieval, Honors</td>
<td></td>
</tr>
</tbody>
</table>
All students in Design must complete at least 9 credit hours at the 300+ level in the same general topic or subject area beyond the Departments of Design and Visual Art. The credit hours for the Academic Concentration requirement cannot also fulfill other requirements of the Design BFA.

Suggested courses and more information is available at https://arcd.ku.edu/academic-concentration-requirement (https://arcd.ku.edu/academic-concentration-requirement/).

### General Electives

Students completing the Illustration & Animation concentration of the Design BFA must complete 3 credit hours of General Elective coursework in order to meet the minimum total credit hours required for their degree.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>

### Illustration & Animation

#### Studio & Professional Requirements

The curriculum of the Design BFA centers on a carefully-sequenced pathway of unique studio courses that constitutes a four-year track to graduation from the fall semester of the year of a student’s admission. More information about our studio sequence is available at https://arcd.ku.edu/policies-and-resources (https://arcd.ku.edu/policies-and-resources/). Required courses for the Studio & Professional Requirements of the Illustration & Animation concentration of the Design BFA are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADS 340</td>
<td>History and Philosophy of Design</td>

### Industrial Design

#### Studio & Professional Requirements

The curriculum of the Design BFA centers on a carefully-sequence pathway of unique studio courses that constitutes a four-year track to graduation from the fall semester of the year of a student's admission. More information about our studio sequence is available at [https://arcd.ku.edu/policies-and-resources](https://arcd.ku.edu/policies-and-resources). Required courses for the Studio & Professional Requirements of the Industrial Design concentration of the Design BFA are as follows:

#### Industrial Design

- VISC 414 Publication and Editorial
- VISC 435 Book Arts
- VISC 440 Bookmaking
- Studio Elective See note below.

Total Hours 19

Note: A Studio Elective can be any studio course in the Departments of Design, Architecture, or Visual Art at the 300+ level.

Each of the four concentrations of the Design BFA degree consist of a carefully-arranged sequence of courses that follow a four-year track from the fall semester of a student’s year of admission to the program. On the sample graduation plans for each concentration as outlined below, sequenced courses are marked with an (S) and must be taken in the listed order. Such courses are only available in either fall or spring semesters and cannot be compressed into an accelerated time frame.

Students should note the Second-Year Full Review and the minimum required grades for sequenced courses. These policies may affect a student’s track to graduation, pending academic performance. Each of these policies is outlined under the “Degree Requirements” tab on this page.

The plans below are samples. Non-sequenced requirements of the degree can be fulfilled prior to admission to the Department of Design, and/or may be taken during summer semesters. Students should work with their academic advisor to ensure proper enrollment.

In order to qualify for admission to the Minor in Design, the interested
student must hold a KU Cumulative Graduation GPA (just KU grades) of
at least a 2.0. A portfolio is not prerequisite for admission to the Minor in
Design.

Application Link & Deadline:
In order to be considered for admission to the Minor in Design, students
will need to submit this application webform (https://deptsec.ku.edu/
~sadp/form/40/). Successful applications received by August 1 will
grant admission for the immediately-following fall semester. Successful
applications received by January 1 will grant admission for the
immediately-following spring semester. Applications received from
students who don’t meet the GPA requirement listed above will be denied.

Total Required Credit Hours, 300+ Level (Jr/Sr) Credit Hours:
The minor consists of at least 18 credit hours, 12 credit hours must be
completed at the 300+ level (Jr/Sr level).

Residency Requirements:
At least 9 credit hours of courses required for the minor must be
completed at KU.

GPA Requirements:
A minimum GPA of 2.0 is required across all courses taken for the minor.

Specific Course Requirements:
Admission is prerequisite to enrolling in all courses for the minor except
ADS 320. PHTO 101, PHTO 200, and PHTO 210 are also available as
studio elective options prior to admission.

Design Studies: (15 credit hours)

Notes:

• The Department of Design may approve substitutions to these course requirements in rare cases. For instance, a student who leaves studies in one of our majors may be allowed to substitute other Department of Design coursework in place of certain requirements of the Design Minor at the discretion of the department.

• Students may enroll in ADS 320 (KU Design Lecture Series), PHTO 101 (Fundamentals of Photography), and/or PHTO 200 (Fundamentals in Photography) without prior admission to the Minor in Design. Admission to the minor is prerequisite to enrollment in all other courses required for the Minor in Design.

• Admission to the Minor in Design does not guarantee enrollment in courses required for the minor. Space in required courses is available on a first-come, first-served basis. The Department of Design works carefully to build in capacity for our major and minor students to take their required courses, though we’re unable to guarantee accommodation for all possible students in every semester.

• For courses which require instructor permission to enroll, students should email the instructor listed for the section in which they’d like to enroll to request permission. Information about available sections and listed instructors is available on classes.ku.edu (https://classes.ku.edu/). Enrollment into such courses is not guaranteed.

• Students whose primary interest is Photography should consider our Minor in Photography!

Questions?

For assistance with enrollment planning, please schedule an appointment with your academic advisor.

For assistance with questions regarding the Minor in Design curriculum, course availability, or other questions about the program, please contact the Department of Design’s academic advisor (https://design.ku.edu/contact-our-advisor/).

Minor in Design Entrepreneurship

The Minor in Design Entrepreneurship aligns existing Design and Entrepreneurship coursework in order to provide holistic training to students who wish to apply design thinking and methodologies into commercial applications. Students participating in the minor would take four courses in successful venture creation through the Center for Entrepreneurship, one course in Design thinking and methodologies, then a capstone Design course in which they’ll apply all that they’ve learned in their other minor coursework.

Admission Requirements:

In order for a student to qualify for admission to the Minor in Design Entrepreneurship, that interested student must hold a KU Cumulative Graduation GPA (just KU grades) of at least 2.0. A portfolio is not prerequisite to admission to the Minor in Design Entrepreneurship.

Application Link & Deadline:

In order to be considered for admission to the Minor in Design Entrepreneurship, students will need to submit this application webform (https://deptsec.ku.edu/~sadp/form/51/). Qualifying applications received by August 1 will grant admission for the immediately-following fall semester. Qualifying applications received by January 1 will grant admission for the immediately-following spring semester. Applications received from students who don’t meet the GPA requirement listed above will be denied.

Total Required Credit Hours, 300+ Level (jr/sr) Credit Hours:
The Minor in Design Entrepreneurship requires 18 credit hours of coursework (6 courses), all of which are taken at the 300+ (jr/sr) level.

Residency Requirement:

At least 9 credit hours of coursework completed for the minor must be completed at KU.

GPA Requirement:

A minimum GPA of at least 2.0 is required across all courses completed for the minor.

Specific Course Requirements:

Admission to the minor is not prerequisite for enrollment in ENTR courses. Admission is prerequisite for enrollment in ADS courses.

Minor in Photography

The Minor in Photography emphasizes visual literacy, critical thinking, and creative and professional practice. Successful candidates will cultivate an advanced visual language in support of their major studies and exit the program with a working technical and conceptual grasp of photography as an expressive and communicative medium.

Admission to the Minor in Photography is selective and competitive, with applications for admission to the minor reviewed in the spring semester of each year.

Admission to the Minor in Photography is selective and competitive. Students must either have completed or be enrolled in PHTO 200 when applying for admission to the minor. Students may also enroll in PHTO 210, HA 380, and/or ADS 320 regardless of the status of their admission to the minor, though they should keep in mind that admission to the minor is competitive.

Application Requirements:

Applications to the Photography Minor are reviewed in the spring semester each year and are due by midnight on the night of April 15. Applications must include the following:

• A short essay (200-400 words) responding to the following questions:
  • Why do you want to pursue the Photography Minor?
  • How do you see the Photography Minor complementing your area of study?
• A portfolio of your 10 strongest images
• A PDF of your advising report (available at my.ku.edu > Academics > My Progress in the lower right corner)

Applications are accepted here each spring semester. (https://kudesign.slideroom.com/#/login)

**Total Required Credit Hours, Required 300+ (Jr/Sr) Credit Hours:**
The Minor in Photography requires 18 credit hours of coursework, 12 credit hours of which must be completed at the 300+ (Jr/Sr) level.

**Residency Requirements:**
At least 9 credit hours of coursework required for the minor must be completed at KU.

**Required Graduation GPA, Minimum Grade Requirements:**
A minimum GPA of 2.0 must be met or exceeded across all required courses for the Minor in Photography in order to earn the minor. Most courses for the minor require minimum semester grades in order to count toward the minor. When applicable, the minimum required semester grade for a course is listed in its description.

**Course Requirements:**
*Foundation* (6 credit hours, available without instructor permission prior to admission):

Master of Arts in Design with Concentration in Design Management & Strategy

The Department of Design advances the professional work of thoughtful, creative, and meaningful design to delight, inspire, and serve the needs of people. Design is the planning that lays the basis for creation and development of every object or system people use. Design programs train students to be problem solvers who consider the aesthetic, functional, and user-focused aspects of an object or a process. This requires considerable integrative research, thought, modeling, interactive adjustments, and redesign.

The M.A in Design with a concentration in Design Management and Strategy explores in depth the design function in business as an important integrative, and often interdisciplinary, area. The curriculum couples a rigorous, practical understanding of business with design’s natural capacity for handling diverse input, creative problem-solving, and human-centered understanding.

The Design Management and Strategy program is for prospective students who already hold design-related baccalaureate degrees and are seeking specialized study in management. Applicants should have at least 2 years of full-time professional work experience in design or a design-related field.

The master’s student in design management and strategy should demonstrate an advanced ability to solve design problems, manage teams and processes, communicate clearly, and produce excellent goal-directed outcomes. The graduate will have completed significant course work and a thesis that documents independent discovery and research and will have passed an oral examination on that work. For more information about the program M.A. in Design Management and Strategy.

The design department offers 2 Master of Arts degrees, which share a core curriculum.

The M.A. in Design Management and Strategy educates students in the theory, methods, and practices relevant to managing design in an organizational and business context. The program gives students the requisite knowledge to augment their professional skills and abilities, perform as effective design managers, and advance their careers.

The M.A. in Interaction and User Experience educates students in the theory, methods, and practices of interaction design. It gives students the requisite professional knowledge, skills, and abilities to perform as interaction designers.

KU is an accredited institutional member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

M.A. in Design Management Admission

By permission of the Kansas Board of Regents, application for admission to graduate programs in the Department of Design may be refused if available instructional space does not allow addition of more students. The application deadline for Fall is April 1 and October 1 for Spring.

A departmental graduate faculty committee reviews transcripts and evaluates applications to determine admission qualifications. Applicants to the M.A. programs must have undergraduate and/or professional backgrounds judged by the Graduate Faculty to be appropriate preparation for the specialization selected.

A complete application for admission consists of the following materials:

1. Graduate application (http://www.granduate.ku.edu/) and application fee (See Admission in the Graduate Studies (p. 2449) section of the online catalog for further information);
2. 1 unofficial copy of the transcript from all colleges or universities attended, showing receipt of a bachelor’s degree, and 1 unofficial copy of the transcript showing any graduate degree or credit earned;
3. 3 letters of recommendation from people in a position to comment on your abilities and performance;
4. Statement of design philosophy and approach;
5. A portfolio of your design work, or if your previous degree was not in a design related discipline, samples of written work or other creative artifacts you have produced. Portfolio should represent the scope of your experience, knowledge, skills, and abilities to date. Please include documentation of each project: the challenge it was intended to address, the process involved, your role and the role of others in its execution. Please upload your portfolio digitally under “other documents” during the online application process. The portfolio is limited to 10 megabytes (not zipped) in PDF format;
6. For international students, a financial statement showing minimum financial support for the first year of study (see the Admissions page on the school’s website (http://www.sadp.ku.edu/)).
7. Evidence of language proficiency if the native tongue is not English.
8. Graduate Record Examination (GRE) test results (preferred).

Submit your graduate application and application materials online (http://www.granduate.ku.edu/). Please contact the Admissions Coordinator if you have any questions:

The master's student in interaction design and user experience should have at least 2 years of full-time professional work study in a versatile, rapidly growing professional design discipline. Interaction design and user experience defines the contextual behavior of artifacts, and user-focused aspects of an object or a process. This requires considerable integrative research, thought, modeling, interactive adjustments, and redesign.

**Interaction Design and User Experience** involves researching and fashioning products, services, and systems that are useful, usable, and desirable. Interaction design and user experience offers a human-centered approach to innovation, creatively mediating how businesses engage with customers and how brands and organizations can become more relevant in the marketplace. Broadly speaking, interaction design and user experience defines the contextual behavior of artifacts, environments, and systems.

The Interaction Design program is for prospective students who already hold design-related baccalaureate degrees and are seeking advanced study in a versatile, rapidly growing professional design discipline. Applicants should have at least 2 years of full-time professional work experience in design or a design-related field.

The master’s student in interaction design and user experience should demonstrate the ability to conduct original design research, translate research insights into design input, and produce an interactive artifact of relevance and quality. The graduate will have completed significant course work and a thesis that documents independent discovery and research and will have passed an oral examination on that work. For more information about the program M.A in Interaction Design and User Experience. ([http://design.ku.edu/ma-interaction-design/](http://design.ku.edu/ma-interaction-design/))

The design department offers 2 Master of Arts degrees, which share a core curriculum.

**Important Notes:**

While VISC 710 and VISC 740 are specifically required for the certificate, they are not prerequisite for enrollment in course options for the Studio, Cultural & Historical Electives component of the certificate.

In order to officially earn the Certificate in Book Arts, students must email Linda Tallev (program coordinator, ltalleur@ku.edu) and Addison Kingsbury (academic advisor, akingsbury@ku.edu) to declare the certificate. Students should do so when they know that they intend to pursue the certificate.

HELPFUL CONTACTS:

Linda Tallev, Program Coordinator and Instructor: ltalleur@ku.edu
Addison Kingsbury, Academic Advisor: akingsbury@ku.edu

Applicants must meet all admissions requirements for certificate-seeking graduate admission as defined by the University's policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/).

Master of Science in Supply Chain Management and Logistics (p. 149)
Doctor of Philosophy in Business (p. 150)
Graduate Certificate in Entrepreneurship (p. 154)

Introduction

In the School of Business, students acquire a rigorous education that prepares them for positions in a dynamic and competitive global environment.

The University of Kansas School of Business is accredited by the Association to Advance Collegiate Schools of Business International (http://www.aacsb.edu/).

Undergraduate Programs

The school offers the Bachelor of Science (p. 129) degree in business on the Lawrence campus and the Bachelor of Business Administration (p. 135) on the KU Edwards Campus.

The undergraduate curriculum develops a foundation for lifelong education and growth. The strength of the program is based not only on the quality of the professional course offerings but also on the offerings of other KU divisions, particularly in the social sciences, natural sciences, and humanities. Students acquire a foundation education in business and management with emphasis on analytical skills and obtain a liberal arts and sciences education from their work outside the school. Students are also required to complete a six-course sequence in professionalism to prepare them for their careers as business leaders.

The B.S.B. degree on the Lawrence campus offers advanced electives in various areas of business. Eight undergraduate majors and a co-major in international business are available:

- Accounting
- Business administration
- Business analytics
- Finance
- Information systems
- Management and leadership
- Marketing
- Supply chain management
- International Business co-major (must be paired with another business major)

Business minors may be earned in business analytics, entrepreneurship, information systems, international business, human resources, supply chain management, marketing, and management and leadership. Certificate programs in professional selling, insurance and risk management, and banking are also available to complement a student's program of study. The baccalaureate programs in the School of Business, and independently the accounting program, are accredited by the Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/).

Resources and Opportunities

Study Abroad

The school encourages students to incorporate study abroad into their programs. Student and Academic Services can help students plan their studies to meet KU requirements while they are abroad. The school works with students and the KU Office of Study Abroad to select programs and courses appropriate to their interests and majors. Contact the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, 785-864-3742.

Job Shadowing

One on One, Jayhawks on the Job, allows business students to shadow a business professional during the course of a workday. The program offers students a daylong experience that enhances their understanding of a particular field and the business world, allows an opportunity for students to learn more about themselves and refine their career goals, and provides an opportunity for students to network with business professionals.

Internship Program

Internships offer students the opportunity to build on, apply, and assess the concepts that are developed through the curriculum and to further professional growth through meaningful real-world job experiences. The internship experience provides many benefits, from enhancing your knowledge of an industry or business field to increasing confidence in yourself and your abilities. Internships offer an opportunity to improve your professional skills, familiarize yourself with the business environment, network with business professionals, and refine your personal and career goals and aspirations. The school representative must approve the internship work experience. Not all positions qualify for internship credit.
Library Resources
The Anschutz Library offers a closed reserve service and reference services including a small print collection. The large collection in Watson Library offers additional reference and research materials. The business/economics bibliographer in the reference department can help business students use the library system. Spencer Research Library has an excellent collection on the history of economic thought and a special collection of business papers and records.

Computer Resources
Open Computing Resources
Open computer resources are located in 1057 Capitol Federal Hall and the McCarthy Finance Lab in 2035 Capitol Federal Hall. The computers are available to business undergraduate and graduate students for classroom assignments and individual research projects.

The Horejsi Family Teaching Lab
Equipped with 30 PCs, the Horejsi Family Teaching Lab located in 3047 Capitol Federal Hall is intended for teaching classes that make heavy use of computers.

Faculty
The school’s faculty consists of professors drawn from first-rank universities throughout the nation. The faculty enjoys a national reputation for research productivity and teaching success.

Graduate Programs
Four graduate degree programs are offered:

- Master of Business Administration (p. 142).
- Master of Science (p. 149).
- Master of Accounting (p. 146).
- Doctor of Philosophy (p. 150).

Four degree programs are offered jointly with other departments:

- MBA/J.D. with the School of Law.
- MBA/Pharm.D. in Pharmacy.
- MBA with a graduate certificate in petroleum management with the School of Engineering.

General admission requirements and the content of each of these programs are discussed on their pages of the online catalog.

Resources and Opportunities
Study Abroad
The school encourages students to incorporate study abroad into their programs. Student and Academic Services can help students plan study to meet KU requirements while they are abroad. The school works with students and the KU Office of Study Abroad to select programs and courses appropriate to their interests and majors. The Horejsi Family Teaching Lab
Equipped with 30 PCs, the Horejsi Family Teaching Lab located in 3047 Capitol Federal Hall is intended for teaching classes that make heavy use of computers.

Faculty
The school’s faculty consists of 59 professors drawn from first-rank universities throughout the nation. The faculty enjoys a national reputation for research productivity and teaching success.

Undergraduate Advising
Academic advisors from Jayhawk Academic Advising are available in the Student and Academic Services (https://business.ku.edu/services/student-and-academic-services/) office, 1160 Capitol Federal Hall, to help students meet their academic goals. These advisors are experienced in the business curriculum and the many options available to business students. Advisors help students choose classes and make efficient progress towards graduation. Students should take primary responsibility for their academic careers by consulting advisors, becoming familiar with the undergraduate curriculum and graduation requirements, and complying with all guidelines. It is recommended that students meet with an advisor every semester and especially at key milestones such as in preparation for a study abroad experience, deciding whether to add a minor or certificate to a program of study, and in advance of the final
Admission is competitive. Applications are due February 15 for fall admission and September 15 for spring admission.

Graduate Advising
The MBA office in Capitol Federal Hall coordinates advising for MBA and M.S. students. The MAcc office coordinates advising for MAcc students, and the doctoral office coordinates advising for Ph.D. students. Staff members advise students about program requirements, course prerequisites, and program planning. Students based at the KU Edwards Campus typically receive advising sessions over the phone and by email. Advising sessions are optional.

Undergraduate Scholarships and Financial Aid
The school awards scholarships to current business students annually.

To be considered for need-based scholarships, file the Free Application for Federal Student Aid (https://studentaid.gov/h/apply-for-aid/fafsa) (FAFSA) by March 1. A few scholarships are available for incoming first-year students. High school students interested in majoring in business should contact Financial Aid and Scholarships (http://financialaid.ku.edu/), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66045, 785-864-4700, for information about federal and state funded financial aid programs.

Additional scholarships are available for students who plan to study abroad. Study abroad scholarship application procedures are typically announced each semester and have application due dates in late September for winter and spring study abroad and in March for summer and fall study abroad.

Graduate Fellowships and Assistantships
For information about graduate assistantships, contact the School of Business (https://business.ku.edu/).

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (http://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations
For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://policy.ku.edu/).

Business Honor Code
Students taking any business course must sign a pledge of academic honesty at the end of all examinations. Upon application to the school, each student must electronically sign an honor code form, available from the School of Business (https://business.ku.edu/services/student-academic-services/honor-code/).

Change of School
Admission is competitive. Applications are due February 15 for fall admission and September 15 for spring admission.

Credit/No Credit
A Credit/No Credit option is available to all degree-seeking undergraduates. For more information, visit the KU Policy Library (http://policy.ku.edu/).

However, undergraduate students may not elect to take required business courses, including microeconomics and macroeconomics, as Credit/No Credit.

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Graduation with Distinction and Highest Distinction
Undergraduates whose KU professional grade-point averages rank in the upper 10 percent of their graduating class graduate with distinction.

The upper 3 percent of those awarded distinction graduate with highest distinction.

Honor Roll
Undergraduates with grade-point averages of 3.5 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean's list in the fall and spring semesters. An honor roll notation appears on the transcript.

Maximum and Minimum Semester Enrollment
No student may enroll for more than 20 hours a semester, or more than 9 hours in a summer session without permission from an undergraduate advisor.

Nonresidence Study Before the Last 30 Hours
Before the last 30 hours required for the degree, students may, under certain conditions, take courses at other institutions and transfer the credit to KU. Before enrolling in a nonresidence course, check on how your courses will transfer to KU (http://credittransfer.ku.edu/) or complete KU's standard form, Request for Tentative Evaluation of Transfer Credit, in your dean's office or in College Student Academic Services for students in the College. After completing the course work, you must request that an official transcript be sent to the Office of Admissions (http://admissions.ku.edu/), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911. For transcripts to be official, they must be mailed from the college or university directly to KU. Faxed transcripts are not accepted for posting of transfer credit.

Nonresidence credit includes all credits from another college or university taken after initial enrollment at KU, military service courses, and other undergraduate course work not formally offered in the Schedule of Classes (http://classes.ku.edu/).

 Majors must submit the Request for Tentative Evaluation of Transfer Credit form before they enroll.
Prerequisites and Corequisites

The student is responsible for checking course prerequisites before enrollment. Course rosters are checked before the start of each semester and again after the last day to add classes online. Students who are enrolled in a course without its prerequisites are administratively dropped without notice during the first four weeks of the semester.

Probation

Placed on Probation
An undergraduate student whose cumulative grade-point average, either overall or at KU (in all courses or professional courses), is lower than 2.5 is placed on probation for the following semester.

Continued on Probation
A student on probation is continued on probation for one more semester if the KU semester grade-point average is at least 2.5, but the cumulative grade-point average, either overall or at KU (in all courses or professional courses), is lower than 2.5.

Returned to Good Standing
A student on probation is returned to good standing if the cumulative grade-point average, both overall and at KU (in all courses and professional courses), is at least 2.5.

Dismissed
A student on probation may be dismissed for failure to earn a KU grade-point average of at least 2.5 (in all courses and professional courses) in the next semester of enrollment, or if after two consecutive semesters on probation, the cumulative grade-point average, either overall or at KU (in all courses and professional courses), is not at least 2.2. Students are readmitted through the competitive admission process. Those students are dropped from all courses for the next semester and must complete a Change of School form.

Required Work in Residence

No baccalaureate degree is granted to a student who has not completed at least 30 semester credit hours of residence courses at KU. No exceptions are granted.

Transfer of Credit

CredTran (http://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Courses completed at other institutions are accepted to fulfill graduation requirements (e.g., in place of specifically prescribed courses), only if they are substantially equivalent as indicated by course description, hours of credit, and prerequisites. For professional courses not listed on CredTran (http://credittransfer.ku.edu/), the student must submit a petition along with a course syllabus to the School of Business. Petition forms are available on the School of Business website at this location (https://business.ku.edu/student-and-academic-services/requests-petitions-transfer-credit-substitutions/).

Only transfer grades of C- or higher apply toward graduation from the School of Business at KU.

Graduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://policy.ku.edu/).

Business Career Services

Business Career Services (https://business.ku.edu/business-career-services/) (BCS) provides a variety of resources including recruiting (on-campus interviews) for full-time and internship positions facilitated through KU Career Connections/Symplicity, an online job and internship database; individual career advising; and a variety of workshops and events—to name a few.

Other BCS services include

- Individual career advising with trained counselors
- Business career fair
- Résumé review
- Mock interviews and interview preparation assistance
- Workshops on various career-related topics
- Online resource libraries
- Salary information
- Mobile app, KU Business Career Plus

The faculty and career services staff are committed to providing a strong student-oriented program to help students develop career objectives and target job opportunities. The BCS cannot guarantee jobs, but it will make every effort to bring together the job-seeking candidate and potential employers in accordance with their needs, abilities, and interests.

Business graduates have been successful in finding employment in their areas of interest. Positions have been available nationwide, regardless of academic area or business degree.

Students are encouraged to register with the BCS as early as possible. An early start can mean wider access to potential employment opportunities. Registrants' may include one or more résumés in a web-based database, allowing access by the BCS and employers. This allows the BCS to perform résumé referrals quickly and companies to conduct their own résumé searches. Students can update their résumés at any time from any Internet-linked computer or affiliated app.

Post-graduation plans for graduates are collected and analyzed annually. Information on the number of degrees granted, percentage of graduates employed, and average starting salaries can be found on the School of Business website (https://business.ku.edu/+).

Contact Business Career Services for more information at 785-864-5591, kubuscareer@ku.edu.

Courses

ACCT 200. Fundamentals of Financial Accounting. 4 Credits.
Accounting 200 is an introduction to the concepts of business and the measurement systems used to control and evaluate business activities. This course is designed to be of interest to all students regardless of discipline.

ACCT 201. Managerial Accounting I. 3 Credits.
A continuation of Financial Accounting I. A study of concepts of materials, labor, and overhead control; budget administration; cost accounting systems including standard costing; full costing and direct costing; income determination; differential costing; break-even analysis; accounting
statement analysis; and use of return on investment as a basis for management decisions. Prerequisite: ACCT 200.

ACCT 205. Survey of Accounting. 3 Credits.
This course is an introduction to accounting. The overarching objective of the course is to prepare students for careers in any business by providing them with a solid foundation in financial accounting and reporting without overloading them with the mechanics and procedures more appropriate for future accountants. The focus of the course is 3-statement model -- that is, using the income statement, balance sheet and cash flow statement simultaneously both to provide clearer insights into a business and to make more informed decisions. With a strong emphasis on the interpretation of real-world financial statements, the course teaches students how to read, analyze, and interpret financial accounting data. (Not open to students with credit in ACCT 200.) Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1.

ACCT 230. Introduction to the Accounting Profession. 1 Credits.
This course is designed to introduce students to the accounting profession and learn about the following topics: the Accounting program at the KU School of Business; job search strategies and preparation; developing networking skills; experiential learning opportunities such as internships, job shadowing, study abroad programs, and TA positions; the CPA exam and other professional certifications and organizations; career opportunities with an accounting degree, including how an accounting degree can help in careers outside of accounting; and the role of accounting in business, including the role of ethics and professionalism in accounting. Check with your Major to see which 230 course it recommends (ACCT 230, BSAN 230, BUS 230, FIN 230, IST 230, MKTG 230 or SCM 230) and when it encourages you to take it. Not open to students with credit in ACCT 303. Prerequisite: ACCT 200.

ACCT 300. Special Topics in Accounting: ___. 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of accounting topics not covered by established courses. Prerequisite: Determined for each topic by the instructor. Enrollment restricted.

ACCT 303. Introduction to the Accounting Profession. 1 Credits.
This course will focus on Accounting as a profession. Prospective and current accounting students will be exposed to a variety of topics. These include, but are not limited to, career options in Accounting, the CPA exam, ethics in the profession, current issues in Accounting, professional standards, the Accounting major, and the five-year Accounting program. Prerequisite: ACCT 200 or coenrollment in ACCT 200.

ACCT 311. Information Systems for Accountants. 3 Credits.
This course provides an overview of how to understand, analyze, and control computerized information systems, and is designed to provide the computer tools and knowledge so that today's business or accounting student will be tomorrow's successful and complete manager, consultant, accountant, and/or auditor. The topics covered in this course will include computer technology, internal control in a computer environment, computer auditing, systems analysis and design, database systems, networking, electronic commerce, and specific systems applications. Hands on experience will be obtained through projects and various software packages. This course will count as an advanced business elective. Not open to students with credit in BBA 407. Prerequisite: ACCT 201 and IST 202 or IST 301. Enrollment restricted.

ACCT 313. Financial Analysis and Analytics. 3 Credits.
This course is a unique study of how stakeholders use accounting, financial and non-financial information, analytics, and visualizations in evaluating businesses and making informed decisions. Prerequisite: ACCT 200 or ACCT 205.

ACCT 320. Intermediate Accounting I. 3 Credits.
A study of generally accepted accounting principles (GAAP) underlying the preparation and interpretation of general-purpose financial statements with emphasis on the principles of revenue recognition, matching revenues and related costs, and the determination of proper balance sheet valuations of assets and liabilities. The asset side of the balance sheet is the primary emphasis though the entire financial statements are used in examples throughout the course. Prerequisite: ACCT 201.

ACCT 321. Intermediate Accounting for Finance. 3 Credits.
An intermediate accounting course with emphasis on interpretation of general-purpose financial statements and the related disclosure notes. Includes understanding interrelationships among the various financial statements and analyzing the effects of transactions on the financial statements. Common and significant accounts/transactions will be analyzed, especially those relating to the financing and equity sections of the financial statements. Not open to students with credit in ACCT 320 or ACCT 323 or ACCT 410 or ACCT 411. Prerequisite: FIN 310 or FIN 311. Enrollment restricted.

ACCT 322. Intermediate Accounting I, Honors. 3 Credits.
Interpretation and application of financial accounting standards, with an emphasis on U.S. Generally Accepted Accounting Principles (GAAP) and ancillary treatment of International Financial Reporting Standards (IFRS). General coverage of all financial statements, with specific attention placed upon the balance sheet. A primary focus of the course is on the comprehension of foundational principles, concepts, and theories underlying financial reporting. Only open to students admitted to the University Honors Program, the School of Business Honors Program, or by consent of the instructor. Prerequisite: ACCT 201.

ACCT 325. Managerial Accounting II. 3 Credits.
An analysis of cost systems and their application in the determination, analysis and control of manufacturing and distribution costs. Emphasis is on managerial planning and control. Prerequisite: ACCT 201. Enrollment restricted.

ACCT 326. Managerial Accounting II, Honors. 3 Credits.
Honors treatment of this course involves an analysis of cost systems and their application in the determination, control and analysis of manufacturing and distribution costs. Emphasis is on managerial planning and control. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: ACCT 201. Enrollment restricted.

ACCT 330. Introduction to Taxation. 3 Credits.
An introduction to the role of taxes in society with a primary emphasis on the tax implications of business transactions. By the end of this course students should be able to: recognize common tax issues from presented facts; apply basic tax rules and regulations to compute taxable income and tax liability for individuals and entities; incorporate tax costs and tax savings into calculations of the net present value of cash flows; recognize tax planning opportunities or problems inherent in common business and investment transactions; identify tax policy issues suggested by or underlying particular provisions of the tax law. Prerequisite: Corequisite: ACCT 320 or equivalent.

ACCT 331. Introduction to Taxation, Honors. 3 Credits.
An introduction to the role of taxes in society with a primary emphasis on the tax implications of business transactions. By the end of this course students should be able to: recognize common tax issues from presented facts; apply basic tax rules and regulations to compute taxable income and tax liability for individuals and entities; incorporate tax costs and tax savings into calculations of the net present value of cash flows; recognize tax planning opportunities or problems inherent in common business and investment transactions; identify tax policy issues suggested by or
underlying particular provisions of the tax law. Prerequisite: ACCT 320 or equivalent. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

**ACCT 400. Special Topics in Accounting: _____**. 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of accounting topics not covered by established courses. Prerequisite: Determined for each topic by the instructor. Enrollment restricted.

**ACCT 410. Intermediate Accounting II. 3 Credits.**
A continuation of the study of generally accepted accounting principles (GAAP) underlying the preparation and interpretation of general-purpose financial statements. The focus of this course is on the liability and equity sections of the balance sheet, including such topics as loans, bonds, leases, pensions, accounting for income taxes, equity transactions, employee stock options, earnings per share, and cash flows. Application of many of the authoritative accounting pronouncements is illustrated. Prerequisite: ACCT 320 or equivalent. Enrollment restricted.

**ACCT 411. Intermediate Accounting II, Honors. 3 Credits.**
Honors treatment of this course is a continuation of the study of generally accepted accounting principles (GAAP) underlying the preparation and interpretation of general-purpose financial statements. The focus of this course is on the liability and equity sections of the balance sheet, including such topics as loans, bonds, leases, pensions, accounting for income taxes, equity transactions, employee stock options, earnings per share, and cash flows. Application of many of the authoritative accounting pronouncements is illustrated. Prerequisite: ACCT 320 or equivalent and FIN 310 or equivalent. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

**ACCT 425. Accounting Information Systems. 3 Credits.**
This course provides an overview of how accounting and business professionals use information systems to support business processes and produce information, such as financial statements, that can be analyzed and used to make decisions. Topics covered in this course include, but are not limited to, computer technology; business transaction processing; threats and controls in a computerized accounting system; database design and controls; tools used by accountants for automation and analytics; and an accountant’s role in designing, developing, implementing, and maintaining an information system. Hands on experience will be obtained through projects that require the use of various software packages. Not open to students with credit in ACCT 311 or BBA 407. Prerequisite: Corequisite: ACCT 320 or equivalent, IST 202 or BSAN 310, and IST 310. Enrollment restricted.

**ACCT 500. Special Topics in Accounting: _____**. 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of accounting topics not covered by established courses. Prerequisite: Determined for each topic by the instructor. Enrollment restricted.

**ACCT 515. Accounting Professional Communications. 3 Credits.**
This course is designed to improve the professional communications skills of students interested in pursuing careers in accounting. Topics covered include communication styles, communication approaches for different styles, listening skills, client interactions, appropriate communication channels, receiving feedback, and presentation skills.

**ACCT 522. Individual Taxation. 3 Credits.**
This course focuses on determination of tax, filing status, dependency exemptions, gross income inclusions, exclusions, deductions for AGI, itemized deductions, property transactions, capital gain/loss netting, business and investment expenses, hobby losses, rental activities, cost recovery, amortization, depletion, passive activities, individual tax credits, business and investment losses, casualty losses, bad debts, employee expenses, individual AMT, employment taxes, tax policy, tax rate structures, individual income tax compliance, fringe benefits, retirement plans, taxation of financial instruments, overview of estate and gift taxation. Prerequisite: ACCT 330 or equivalent.

**ACCT 525. Specialized Accounting Practices. 3 Credits.**
This course is an extension of the study of financial accounting practices to include specialized industries that have particular or varied forms of GAAP applications and reporting not typically covered in other financial accounting courses. Topics include a range of specialized industries, with a focus on the accounting and reporting models of not-for-profit organizations and state and local governments. Prerequisite: ACCT 320 or equivalent.

**ACCT 543. Introduction to Auditing. 3 Credits.**
The fundamental concepts of audit risk, evidence accumulation and materiality are applied to financial statement audits using established accounting principles as the criterion for evaluating fair presentation. Audit objectives and procedures are studied in relation to the opinion which the auditor expresses on clients’ financial statements. Financial statement audits are compared with other types of engagements performed by public accountants, and with other types of audits, such as compliance and operational audits. Prerequisite: ACCT 311 or ACCT 425 and ACCT 410 or ACCT 411. Enrollment restricted.

**ACCT 544. Introduction to Auditing, Honors. 3 Credits.**
Honors treatment of this course involves the fundamental concepts of audit risk, evidence accumulation and materiality are applied to financial statement audits using established accounting principles as the criterion for evaluating fair presentation. Audit objectives and procedures are studied in relation to the opinion which the auditor expresses on clients’ financial statements. Financial statement audits are compared with other types of engagements performed by public accountants, and with other types of audits, such as compliance and operational audits. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: ACCT 311 or ACCT 425 and ACCT 410 or ACCT 411.

**ACCT 545. Advanced Taxation of Business Entities I. 3 Credits.**
This is an advanced taxation course that focuses on the taxation of corporations, partnerships, and S corporations and provides an introduction to accounting for income taxes under ASC 740. This class is intended for all students interested in taxation and those planning to take the Certified Public Accounting exam. Prerequisite: ACCT 330 or equivalent. Enrollment restricted.

**ACCT 599. Internship in Accounting. 1-3 Credits.**
Internships provide opportunities for students to combine their academic education with a meaningful experience in the business world. Accounting internships allow students to explore career pathways in accounting, further their professional growth, expand professional networks, and increase the relevancy of their academic course work. The internship course combines job-related activities of the accounting internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the Director of the Internship Program prior to the internship experience. Students may not receive more than three hours of internship credit from ACCT 599. ACCT 599 may count as an Accounting elective for students majoring in Accounting. Prerequisite: Approval of the internship; two of the following: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311, SCM 310 or SCM 311. Enrollment restricted.
ACCT 701. Financial Accounting. 3 Credits.
Financial accounting provides information to decision-makers external to the business, such as investors and lenders. The course describes the process through which economic information is captured, validated, and distributed externally in the form of financial statements. It also covers the contents of the major financial statements, focusing on how the various accounts are defined and measured and how the information can be used by external decision-makers. Enrollment restricted.

ACCT 706. Accounting. 3 Credits.
This course introduces students to the creation and application of financial accounting information and financial statements for decision making by corporate stakeholders, and to the use of internal accounting information for decision making by firm management. Enrollment restricted.

ACCT 708. Accounting and Finance for Professionals. 3 Credits.
This course is an introduction to financial and managerial accounting. It also serves as a bridge to basic financial decision-making. It will introduce the concepts of business and the measurement systems used to control and evaluate business activities. It will also explore costing systems and the use of accounting data as a basis for management planning and decision making, using basic tools such as return on investment. Not open to School of Business students.

ACCT 710. Business Writing for Accountants. 3 Credits.
This course is designed to improve students' professional writing skills. The course will emphasize effectively determining and meeting writing goals; writing with the readers' perspective in mind; employing a writing strategy to increase efficiency and effectiveness when writing; thinking critically about writing; writing clearly, concisely, and effectively within the context of business and accounting; avoiding common grammar errors; writing in a professional tone; reviewing and editing in an effective manner; and drafting email, client letters, and memos in an effective and professional manner using proper format. Not open to students with credit in BUS 105. Prerequisite: Admission to the MAcc program. Enrollment restricted.

ACCT 721. Advanced Accounting. 3 Credits.
A series of topics related mainly to financial accounting for corporations. Includes accounting for acquisitions and consolidations, asset impairments and derivative instruments. Also includes accounting for partnership equity. Prerequisite: ACCT 410 or equivalent. Enrollment restricted. Admission to the MAcc program.

ACCT 722. Researching Financial Accounting Issues. 3 Credits.
This course focuses on developing research and analytical skills. While the specific topics covered vary by year, students will research evolving recognition, measurement, and disclosure issues using the FASB's Accounting Standards Codification (ASC) and apply what they learn to actual financial statements. Students will also develop data analytics skills focusing on the methodologies and tools used to (1) transform raw data into workable data sets and (2) analyze these data sets for decision-making purposes, mainly in the context of assurance services. Prerequisite: Admission to the MAcc program. Enrollment restricted.

ACCT 724. Accounting Theory. 3 Credits.
The goal of this course is to foster an understanding of the importance of accounting in capital markets and an intuitive approach to accounting problem-solving while simultaneously preparing students for professional certification. This course has two main components. First, students develop a conceptual and practical understanding of theories related to asymmetric information, information signaling, and the decision usefulness of accounting information. Second, students establish and extend their competence across a variety of complex financial accounting topics. Prerequisite: ACCT 410 or ACCT 411 and Admission to the MAcc program. Enrollment restricted.

ACCT 726. Advanced Managerial Accounting - Information for Business Decisions. 3 Credits.
Through judicious use of quantitative methods including statistical decision theory, this course provides a conceptual analysis of several prominent managerial accounting topics. This course is intended to assist both public accountants and management accountants to understand management decision-making processes and information requirements thereof. Prerequisite: Admission to the MAcc program. Enrollment restricted.

ACCT 727. Accounting and Professional Ethics. 3 Credits.
It may be easy to determine the most ethical choice in a professional setting. However, standing up for our values and "taking action" is often the hardest part. Knowing what to say and how to say it can give us courage to stand up for those values. As with any skill, practice builds muscle-memory. Therefore, this course will focus on identifying values and the factors that encourage ethical decision-making within the accounting profession, determining how to communicate those values, and most importantly, practicing the communication of those values. This course will explore the ethical principles and rules contained within the AICPA's Code of Professional Conduct and other ethical rules specific to the accounting profession. Prerequisite: Admission to the MAcc program. Enrollment restricted.

ACCT 728. Financial Analysis. 3 Credits.
The objective of this course is to provide a framework for students to use accounting and other financial information to evaluate businesses and make informed decisions. The framework will include strategic analysis, accounting analysis, financial analysis, forecasting and valuation. Prerequisite: Admission to the MAcc program. Enrollment restricted.

ACCT 729. Corporate Finance for Accountants. 3 Credits.
This course is a unique study of how corporate finance and corporate financial policies drive financial statements. In addition to the traditional introductory finance topics, this course will cover more specialized corporate finance topics, such as mergers and acquisitions, bankruptcies, risk management, multinational finance and business sustainability and reporting. Finally, this course provides students with critical thinking skills to recognize the impact of corporate finance and corporate financial policies on financial statements. This course is not open to students with an undergraduate degree in Finance. Prerequisite: Admission to the MAcc program. FIN 310 or equivalent. Enrollment restricted.

ACCT 731. Tax Practice, Procedure, and Research. 3 Credits.
A course designed to develop an understanding of ethical guidance in the tax practice, with a focus on the constitutional and legislative sources of tax law, administrative regulations and rulings and judicial interpretations. In addition, the topics of working with the IRS, tax practice and administration and tax planning basics will also be covered. Finally, research and communication of tax issues and problems will be covered which will include the use of an online tax research service and drafting various types of tax related communications. Prerequisite: ACCT 330 or equivalent. Enrollment restricted. Corequisite: ACCT 545 and admission to the MAcc program.

ACCT 732. Advanced Taxation of Corporations. 3 Credits.
This is an advanced corporate tax course that focuses on the taxation of corporate operations, formations, capital structure, liquidating and non-liquidating distributions, redemptions, partial and complete liquidations, accumulated earnings tax, and personal holding company tax. It also may cover incentive-based compensation, installment sales, tax policy, corporate acquisitions and reorganizations, consolidated returns, and constructive dividends. The course culminates with a focus on subchapter
C compliance and documentation of research and findings of unique tax issues related to the compliance process. Prerequisite: ACCT 330 or equivalent and admission to MAcc program. Enrollment restricted. Corequisite: ACCT 731 and ACCT 735.

**ACCT 733. Tax Planning. 3 Credits.**
A study of the fundamentals of Federal estate and gift taxation, the income taxation of estates and trusts, and various aspects of family tax planning. Prerequisite: ACCT 330 or equivalent. Enrollment restricted.

**ACCT 734. Multijurisdictional Tax and Planning. 3 Credits.**
This course provides an exploration of the taxation of business entities by multiple taxing jurisdictions (interstate and international). The course will cover key state taxation issues including nexus, allocation, tax base and apportionment. It will also explore constitutionality, significant judicial decisions, state income tax planning and indirect taxes. The course will also provide an overview of cross-border and international tax issues emphasizing "outbound" investments and activities of U.S. taxpayers. Cross border planning and anti-deferral provisions will also be covered. Prerequisite: ACCT 545 and admission to the MAcc program.

**ACCT 735. Income Tax Accounting and Compliance. 3 Credits.**
This course focuses on objectives, principles and scope of ASC 740, basic tax provision calculation including current and deferred tax expense/benefit, permanent and temporary book vs. tax differences, mechanics of deferred tax accounting, provision to return reconciliations, income tax footnote disclosures, effective income tax rate reconciliation, intraperiod allocation and valuation allowances, income tax payable reconciliations, equity compensation, business combinations and uncertainty in income tax positions (FIN 48). In addition, a multi-year income tax provision case study and introduction to OneSource Tax provision software will also be part of the course. Finally, preparation of a corporate income tax return and review of the affiliated group and consolidated return rules will also be covered in the course. Prerequisite: Admission to the MAcc program. Corequisite: ACCT 545.

**ACCT 736. Advanced Taxation of Business Entities II. 3 Credits.**
This is an advanced taxation course that expands on the topics studied in ACCT 545: Advanced Taxation of Business Entities I. Topics include the taxation of corporations and pass-through entities and their investors regarding entity formation, distributions, redemptions/withdrawals, and liquidations. The course also addresses treatment of the investors, such as the calculation of ownership basis, applicable loss limitations, and allocation of income to pass-through owners. Additionally, transactions between entity and investor are examined, as appropriate. Prerequisite: ACCT 545 and admission to the MAcc program.

**ACCT 740. Fraud Examination and Forensic Accounting - Application. 3 Credits.**
This course applies generally accepted fraud examination and forensic accounting methods and processes to investigate financial statement frauds. Students will learn to assess evidence, create hypotheses and develop an argument based on the best persuasive evidence. The course will incorporate actual financial statement frauds, such as WorldCom, and other fraud schemes. The course will also cover topics such as document analysis, witness behavior and interviews, managing chain of custody evidence and obtaining targeted information from IT professionals. Additionally, since fraud examinations and forensic accounting investigations often end up in a court of law, students will learn about litigation projects, specifically, the basics of damages and expert witness testimony. Prerequisite: Enrollment restricted. Admission to the MAcc program.

**ACCT 741. Fraud Examination and Forensic Accounting - Theory. 3 Credits.**
Explores various academic approaches to fraud to include factors learned from other disciplines such as sociology and psychology. Students will review the vast body of knowledge gained by practitioners throughout the world and will attempt to apply these factors to the prevention of financial statement and occupational (employee) fraud. Some of the topics covered include: skimming transactions, identity fraud, computer schemes, money laundering, bribery and kickbacks, and corporate espionage. Prerequisite: Enrollment restricted. Admission to the MAcc program.

**ACCT 742. Advanced Auditing. 3 Credits.**
Current auditing philosophy, standards, techniques, and professional judgment are extensively investigated and related to auditing activities. Special emphasis is given to the design of audit programs in relation to the client's system of internal control and the effect of such factors as relative risk and materiality. Other topics include auditors' legal liability, professional ethics, the impact of electronic data processing and statistical techniques, and the preparation of auditors' reports and qualifications therein. Prerequisite: ACCT 543 or equivalent. Enrollment restricted. Admission to the MAcc program.

**ACCT 743. Accounting Information System Risks and Controls. 3 Credits.**
Students learn how to perform the risk assessments that auditors use to plan a top-down, risk-based assurance engagement. Using auditing standards and internal control frameworks as a guide, students learn how auditors (a) evaluate market conditions, industry practices, and client business activities to assess the risk of financial misstatement, (b) search potential misstatements by analyzing patterns of fluctuations in related financial statement accounts, and (c) assess the effectiveness of internal controls that protect technology-driven financial reporting processes from errors and irregularities. Prerequisite: ACCT 543 or equivalent. Enrollment restricted. Admission to the MAcc program.

**ACCT 746. Accounting Analytics. 3 Credits.**
This course will prepare students to think critically about how to leverage accounting data to make decisions mainly in the financial accounting and auditing contexts. Students will develop an analytics mindset through hands-on assignments and projects using common accounting analytics software applications adopted in practice. These assignments involve manipulating and transforming raw data into workable data sets, using data visualization and other tools to analyze these data sets for decision-making purposes, and communicating the results of the analyses. The course also exposes students to practitioner and academic perspectives on analytics through a combination of readings, class discussions, and practitioner presentations. Prerequisite: Admission to the MAcc program. ACCT 543. Enrollment restricted.

**ACCT 747. International Financial Reporting Standards II. 1 Credits.**
This course will follow an independent study model with students identifying IFRS topics they wish to study further. Having successfully mastered the basic IFRS materials offered in IFRS I, this course will allow students an opportunity to explore a specific IFRS topic of interest with an in-depth research paper. Topics must be approved in advance. Students will interact with the professor to determine appropriate research material and obtain guidance to their research, the paper and their conclusions. Students are encouraged to work at their own pace in order to obtain the best possible outcome from their research activity. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the MAcc program. Enrollment restricted.

**ACCT 749. Internal Auditing. 3 Credits.**
This course is designed to improve and enhance your knowledge of internal auditing, information systems auditing, and written and oral communications skills. The course will discuss the role of the Internal
Financial accounting provides information to decision-makers external to the business, such as investors and lenders. The course describes the process through which economic information is captured, validated, and distributed externally in the form of financial statements. It also covers the contents of the major financial statements, focusing on how the various accounts are defined and measured and how the information can be used to spot the unusual and the tenacity to discover the cause. To have the willingness to scrutinize details, without losing sight of the big picture; understand financial deception in order to detect it and to develop deterrence measures; understand evidence-gathering and investigative procedures; accept that everything you do will be challenged; develop the confidence to handle the challenge and respond; begin the development of your “Professional Skepticism;” apply your computer skills; produce exceptional quality written reports; enhance your verbal presentation skills and refine your time management technique. Prerequisite: ACCT 543 or ACCT 544 or equivalent and Admission to the MAcc program. Enrollment restricted.

ACCT 750. Corporate Taxation. 3 Credits.
This class will cover two key areas of corporation taxation. The first portion of the class will be focused on understanding basic corporation taxation principles including business income, deductions, and accounting methods. The second focus area of the course will be on the principles of ASC 740 -- Accounting for Income Taxes. This material will include the basic rules applicable to the accounting and auditing of income taxes. Students will understand the basic principles of corporate taxation and the various complexities associated with accounting for income taxes; be able to prepare a fairly complex tax provision using Microsoft Excel; and analyze and interpret the data that will be used to compile a tax provision. Students will understand the tax attributes of various entities; the tax principles of business income, deductions and accounting methods including being able to differentiate between permanent and temporary differences; understand the basic principles of accounting for income taxes including financial statement classification and footnote disclosures; be able to prepare a tax provision and interpret the data utilized in the preparation process; understand the basic principles of FIN 48 -- Uncertainty in Income Taxes; understand other taxation areas of required review or complexity within a corporation including state and local taxes and taxes related to foreign operations. Prerequisite: ACCT 330 or equivalent and Admission to the MAcc program. Enrollment restricted.

ACCT 799. Internship in Accounting. 1-3 Credits.
Internships provide opportunities for students to combine their academic education with a meaningful experience in the business world. Accounting internships allow students to explore career pathways in accounting, further their professional growth, expand professional networks, and increase the relevancy of their academic coursework. The internship course combines job-related activities of the accounting internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the Director of the Internship Program prior to the internship experience. Students may not receive more than three hours of internship credit. Enrollment restricted and by permission only. Prerequisite: Admission to the MAcc program.

ACCT 810. Accounting. 3 Credits.
Financial accounting provides information to decision-makers external to the business, such as investors and lenders. The course describes the process through which economic information is captured, validated, and distributed externally in the form of financial statements. It also covers the contents of the major financial statements, focusing on how the various accounts are defined and measured and how the information can be used by external decision-makers. This course is open only to students in the full-time MBA program.

ACCT 895. Graduate Seminar in Accounting: ___. 0.5-5 Credits.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted.

ACCT 898. Independent Study for Master's Students. 1-6 Credits.
Individual study of selected current problems in the field of accounting to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

ACCT 928. Introduction to Accounting Research. 3 Credits.
Students will gain an understanding of the history and future of significant streams of archival-based accounting research. Students will replicate seminal studies, learn to calculate important variables used in prior literature, and gain an understanding of the various methodologies used in archival-based research.

ACCT 929. Seminar in Archival-Based Accounting Research. 3 Credits.
Students will gain an understanding of the history and future of significant streams of archival-based accounting research. Students will replicate seminal studies, learn to calculate important variables used in prior literature, and gain an understanding of the various methodologies used in archival-based research.

ACCT 930. Seminar in Auditing Research I. 3 Credits.
Students will gain in-depth knowledge of specific streams of the empirical/archival auditing literature. Topics may vary over time depending upon the interests of the students and instructor. Possible topics include (but are not limited to): the role of the auditor and audit committee in corporate governance, the auditing environment including regulation, audit quality, the pricing of audit and assurance services, litigation against auditors, and international auditing research. Students are expected to critically analyze and suggest ways to improve and extend the extant literature. The seminar will also include hands on analysis of data used in archival auditing research.

ACCT 932. Seminar in Financial Accounting Research I. 3 Credits.
Students will gain in-depth knowledge of specific streams of financial accounting research. Topics may vary over time depending upon the interests of the students and instructor. Possible topics include (but are not limited to): the role of the auditor and audit committee in corporate governance, the auditing environment including regulation, audit quality, the pricing of audit and assurance services, litigation against auditors, and international auditing research. Students are expected to critically analyze and suggest ways to improve and extend the extant literature. The seminar will also include hands on analysis of data used in archival auditing research.

ACCT 934. Seminar in Empirical Tax Research I. 3 Credits.
Students will gain in-depth knowledge and understanding how taxes affect decision-making, asset prices, equilibrium returns, and the financial and operational structure of firms.

ACCT 936. Accounting Research Design and Corporate Governance Seminar. 3 Credits.
This course aids in developing a strong intuition for the research design methodologies that are commonly used in archival research.
Additionally, this course will introduce corporate governance related topics, specifically related to the role of top executives in the financial reporting process.

**ACCT 995. Doctoral Seminar in Accounting:** 2-5 Credits.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

**ACCT 998. Independent Study for Doctoral Students:** 1-5 Credits.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team.

**ACCT 999. Doctoral Dissertation:** 1-12 Credits.
(V) Individual research work. Graded on a satisfactory progress/limited progress/no progress basis.

### Courses

**BBA 200. Special Topics in Business Administration:** 1-5 Credits.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of business topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor.

**BBA 301. Business and the Economy:** 3 Credits.
This course teaches students how market processes drive wealth creation in an economy so that they can apply the knowledge as citizens and business people. Examples of topics covered include valuation and opportunity cost, decision rights in society and organizations, trust and money, trade and specialization, prices and profits, and the special roles of consumers and entrepreneurs.

**BBA 302. Legal Aspects of Business:** 3 Credits.
A course designed to acquaint the student with the basic principles of law that are applicable to business transactions in the modern business world and the legal systems.

**BBA 303. Survey of Management and Leadership:** 3 Credits.
This course is designed to acquaint students with traditional business management ideas, recent management thinking, and the contemporary application of both to the management functions of planning, organizing, leading and controlling. A survey of a wide variety of topics is offered, generally including goal setting, strategy formulation and implementation, managerial decision making, structure and design of organizations, corporate culture, organizational change and development, human resources management, managing diversity, leading, motivation, communication, teamwork, quality control, management control systems, operations and service management, entrepreneurship and small business management, managerial ethics, corporate social responsibility, and management in the global environment.

**BBA 304. Marketing:** 3 Credits.
A study of marketing from the point of view of the business firm. Topics include the structure of the marketing system, the nature of marketing management, consumer behavior, marketing research, product policy, channels of distribution policy, and analytical techniques useful to marketing management.

**BBA 305. Operations and Supply Chain Management:** 3 Credits.
Introduces some of the most widely used models from management science in business decision making. Topics include decision making under uncertainty, resource allocation models, and production and operations/supply chain management. Prerequisite: MATH 365 or equivalent statistics course which includes college algebra.

**BBA 306. Finance:** 3 Credits.
This course consists of the analysis of problems relating to estimating the financial needs of an enterprise and to evaluating the alternative means of providing and utilizing both temporary and permanent capital. The relationship of current financial decisions with financial policy is analyzed from the viewpoint of management and the stockholder. Prerequisite: Completion of ACCT 200 and college algebra or higher math course.

**BBA 308. Business Policy and Strategy:** 3 Credits.
This course exposes students to the role of general management in complex organizations. The cases, conceptual materials, and projects are selected to provide students with opportunities to analyze and formulate strategic decisions that allow businesses to create and sustain competitive advantages. Knowledge and skills gained in previous business courses, including marketing, finance, and quantitative methods, will be applied to problems associated with the totality of organizational strategic activity. Prerequisite: BBA 303, BBA 304, BBA 305, and BBA 306 or co-enrollment in one of these courses. Enrollment restricted to students admitted to the Bachelor of Business Administration Major.

**BBA 309. Business Analytics:** 3 Credits.
This course will provide an overview of analytics in the business context. The concepts and practices of analytical modeling and analysis will be covered. An analytics topology to make sense of the variety of analytics types, techniques, and processes, will be introduced. The course will also cover the data side of analytics including data sourcing, basic data modeling, data discovery, data cleansing, and data preparation. Analytics techniques for the exploration, discovery, experimentation, creation of KPIs and metrics will be used in hands-on exercises. The human side of analytics-communication, conversation, and collaboration will be discussed and utilized in class and homework exercises. Prerequisite: Completion of college algebra or higher math course and completion of MATH 365 or equivalent statistics course.

**BBA 400. Special Topics in Business Administration:** 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of topics not covered by established courses. Prerequisite: Determined for each topic by the instructor. Enrollment restricted to students admitted to the Bachelor of Business Administration Major.

**BBA 402. Human Resources Management:** 3 Credits.
This course addresses the ways that firms manage employment relationships, including staffing, training and development, compensation, performance appraisal, labor-management relations, employment law, career management, and job design. Upon completion of the course, students will be able to identify and address these topics from a general management perspective.

**BBA 403. Ethical Decision Making in Business:** 3 Credits.
This course is designed to provide students with: (a) a grounding in the psychological and philosophical foundations of business ethics; (b) the ability to recognize ethical problems; (c) an exposure to many of the ethically sensitive issues facing corporations and managers in business today (e.g., layoffs, outsourcing, employee whistle-blowing, employee privacy, employee health and safety, marketing and advertising, environmental issues, discrimination, and the global responsibilities of business); and (d) the tools for analyzing and reaching closure on ethical problems. Students will study the role of ethics in the relation of business to employees, consumers, and society. Students in this course will have the opportunity to engage in stimulating class discussions, justify ethical positions in case study analyses, investigate ethical issues in their own
future professional lives, and develop and present their solutions for
typical ethical problems faced by managers in organizations.

**BBA 404. Entrepreneurship. 3 Credits.**
In this course the student examines the disciplines which comprise the
critical success factors in entrepreneurship and develops a fundamental
understanding of the basic skill set required to manage his/her own
business. Learning will be achieved by both study and discussion of
key entrepreneurial business issues as well as the critical appraisal
of new venture business plans as presented in the text. Readings in
entrepreneurship and case studies, contained in the text as well as in
video presentations, will be used to illustrate the essential entrepreneurial
management issues. Enrollment restricted to students admitted to the
Bachelor of Business Administration Major.

**BBA 406. Advanced Finance - Principle and Applications. 3
Credits.**
This course covers the theory and professional practice in three areas of
finance. (1) The processes investors follow in selecting where to place
their savings are detailed. (2) The investment and financing issues faced
by firms are investigated. (3) The financial intermediaries that facilitate
the flow of funds between investors and firms are studied. Prerequisite:
BBA 306. Enrollment restricted to students admitted to the Bachelor of
Business Administration Major.

**BBA 407. Excel Expertise and Certification. 3 Credits.**
This course focuses on the fundamental Excel functions and tools that
are used by business professionals. Students will be exposed to a wide
variety of Excel features such as data tables, formulas and functions,
and charts. After learning about these essential Excel topics, students
will apply their knowledge of Excel by solving many different business
problems. This course covers material that must be mastered in order to
pass the Microsoft Excel Specialist® exam.

**BBA 408. Accounting Elective: _____ 3 Credits.**
This is a variable-topic seminar. Its purpose is to allow the occasional
offering of accounting topics not covered by established courses.
Prerequisite: Determined for each topic by the instructor. Enrollment
restricted to students admitted to the Bachelor of Business Administration
Major.

**BBA 409. Management of Small Business. 3 Credits.**
This course looks at the unique aspects of owning and managing a
small business, family business or franchise, with the owners having
close control over operations and management decisions. Students will
examine the startup options of buying, starting, or franchising; operations
and human resources management; the unique factors of the family
business; marketing, including setting prices, choosing a location,
developing competitive advantage, positioning, and promotion with limited
resources; financial statements, accounting systems, financing, cash flow
and the working-capital cycle; and exit through selling, bequeathing, or
dissolving the business.

**BBA 410. Project Management. 3 Credits.**
This course develops a systems view of business so students can
more effectively integrate project management into their business
strategy. A common language and knowledge of project management
concepts, principles and practices is developed. Students will develop
an understanding of what project management involves, how it relates
to other functional management areas, and its role in an organization's
structure and leadership. Topics are covered in the order they appear in
the project lifecycle starting with project selection and bidding and ending
with project acceptance and close out. Topics covered in this course
include: the importance and role of project management, the contextual
nature of projects, and managing scope, cost, time, and risk in project
management.

**BBA 411. Introduction to International Business. 3 Credits.**
This course provides an overview of the key concepts, analytical
frameworks and institutions that underlie international business. Particular
attention is paid to the cultural and social diversity present in the world
as well as the economic theories that explain the benefits of trade and
underpin the agreements governing such international transactions. Not
open to students with credit in IBUS 410 or IBUS 480.

**BBA 412. Professional Selling Skills. 3 Credits.**
This course surveys the practice of professional selling steps in a logical
and orderly sequence. The course covers an assortment of selling
skills such as listening, communications, handling objections, and
closing. Students are taught that successful salespeople learn to be a
helper, a problem solver and an advisor to the customer. The successful
salesperson will unselfishly persuade a prospective customer to buy a
good, a service or an idea that benefits the customer. Finally, the course
will provide the student with an understanding of how the function of
professional selling fits into the overall marketing mix. The content of the
course will include lectures, case discussion, and role-plays.

**BBA 413. Advanced Leadership Principles. 3 Credits.**
This course provides an introduction to business and personal leadership
skills. Students will learn the major frameworks and perspectives for
understanding and developing organizational leaders. Students will also
develop an understanding of the skills and behaviors demonstrated by
effective business leaders; these include establishing direction, aligning
others behind that direction, motivating and inspiring, and generally
promoting organizational change and transformation. Class pedagogy
will emphasize methods that will allow students to recognize and develop
their own leadership capabilities. A key goal will be establishing a
leadership development mindset that will drive students' future personal
and professional development efforts. Prerequisite: BBA 303.

**BBA 500. Individual Research in Business. 1-5 Credits.**
Individual study of selected topics in business not otherwise available to
the student. Topics selected to be determined by the special interests and
objectives of the student in consultation with a faculty member who will
supervise the reading and research. Prerequisite: Approval of proposed
plan of study by the instructor. Enrollment restricted to students admitted
to the Bachelor of Business Administration Major. Enrollment restricted.

**BBA 610. Intermediate Financial Accounting I. 3 Credits.**
This course focuses on generally accepted accounting principles (GAAP)
underlying the preparation and interpretation of general-purpose financial
statements. The asset side of the balance sheet with be stressed
although the complete financial statements will be used throughout the
course. Topics include the principles of revenue recognition, matching
revenues and related costs, and the determination of proper balance
sheet valuations of assets and liabilities. Prerequisite: ACCT 201 or
equivalent. Enrollment restricted to students admitted to the Bachelor of
Business Administration Major.

**BBA 620. Intermediate Financial Accounting II. 3 Credits.**
This course is a continuation of the study of generally accepted
accounting principles (GAAP) underlying the preparation and
interpretation of general-purpose financial statements. The liability and
equity sections of the balance sheet will be emphasized, including
loans, bonds, leases, pensions, accounting for income taxes, equity
transactions, employee stock options, earnings per share, and cash flows.
The course will also cover the application of many of the authoritative
accounting pronouncements. Prerequisite: BBA 610, ACCT 320, or
Courses

BE 301. Managerial Economics. 3 Credits.
This course uses economic theory and methodology to understand and improve managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures and business policies. Course content includes demand, production, cost analysis, supply and demand analysis, price and non-price modes of competition, market structure, and economic efficiency. Not open for credit to students in BBA 301 or ECON 524. Prerequisite: ECON 142 or ECON 143, and ECON 144 or ECON 145.

BE 302. Managerial Economics, Honors. 3 Credits.
Honors treatment of this course includes uses of economic theory and methodology to understand and improve managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures and business policies. Course content includes demand, production, cost analysis, supply and demand analysis, price and non-price modes of competition, market structure, and economic efficiency. Not open for credit to students in ECON 524. Prerequisite: ECON 142 or ECON 143 and ECON 144 or ECON 145. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

BE 305. Economics of Business. 3 Credits.
Students learn how market processes drive wealth creation in an economy so that they can apply the knowledge as citizens and businesspeople. Examples of topics covered include: valuation and opportunity cost, decision rights in society and organizations, trust and money, trade and specialization, prices and profits, and the roles of consumers and entrepreneurs.

BE 701. Business Economics. 3 Credits.
This course uses economic theory and methodology to understand and improve managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures and business policies. Course content includes demand, production, cost analysis, supply and demand analysis, price and non-price modes of competition, market structure, and economic efficiency. Enrollment restricted.

BE 718. Managerial Economics. 3 Credits.
This course covers principles of microeconomic analysis and methodology used in managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures for business strategy. Course content includes demand, cost and production analysis, supply and demand analysis, price and non-price competition, market structure, the basic elements of game theory, and the economics of information.

BE 817. Advanced Managerial Economics. 3 Credits.
(F) This course is designed primarily for doctoral candidates in business administration. It will provide a rigorous analytical approach to developing and understanding an integrated economic model of the business firm and its environment. The student will be expected to learn the theory and understand how it can be applied to solve problems in business. Upon completion of the course the student should also possess an understanding of how economic analysis relates to and can be used in his/her own field of research. Masters students may enroll with consent of instructor.

Courses

BLAW 300. Special Topics in Business Law: _____. 1-5 Credits.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of business law topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor.

BLAW 301. Legal Aspects of Business. 3 Credits.
A course designed to acquaint the student with the basic principles of law that are applicable to business transactions in the modern business world and the legal systems. Not open to students with credit in BBA 302.

BLAW 302. Legal Aspects of Business, Honors. 3 Credits.
Honors treatment of this course involves acquainting students with the basic principles of law that are applicable to business transactions
in the modern business world and the legal systems. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

BLAW 500. Individual Research in Business Law. 1-5 Credits.
Individual study of selected topics in business law not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: BLAW 301 or BLAW 302; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted.

BLAW 505. Legal Aspects of the Management Process. 3 Credits.
A course designed to acquaint students with the basic principles of agency relationships, such as partnerships, limited liability companies, and corporations, with special emphasis on the problems encountered by managers and directors in operating a corporation. The course should acquaint a student with how to create and operate a corporation in light of current federal and state enactments. Prerequisite: BLAW 301 or BLAW 302. Enrollment restricted.

BLAW 515. Commercial Law. 3 Credits.
An advanced course in legal aspects of business with emphasis on the Uniform Commercial Code. Prerequisite: BLAW 301 or BLAW 302. Enrollment restricted.

BLAW 525. Negotiations and Dispute Settlement. 3 Credits.
This course involves the study of the theory and practice of dispute resolution and negotiation in business mediation (facilitated negotiation). Conflict resolution in the workplace, including grievance procedures, will be considered. Students are required to apply concepts studied through role playing simulations. Not open to students with credit in BLAW 525 or MGMT 525. (Same as MGMT 525.) Prerequisite: MGMT 310 or MGMT 311 and BE 301 or BE 302 or by permission of instructor. Enrollment restricted.

BLAW 701. Introduction to the Legal Environment of Business. 2 Credits.
A course focused on understanding legal rights and duties and ethical responsibilities in the business environment and identifying and addressing legal risks in business decision making. This is an introductory course which includes an overview of several foundational areas of law that are highly relevant to business.

BLAW 703. Legal Aspects of Business Organizations. 3 Credits.
This course focuses on a selection of legal topics and their importance to those serving as public and private accountants, corporate officers, directors, and other business decision-makers. Topics include agency law; formation/termination, management/financial structure, and other legal implications of different legal forms of business (such as partnerships, corporations, LLCs); rights and liabilities of individuals operating within these organizations; professional liability, securities regulation, and debtor-creditor rights, security interests and UCC sales. This course is not a CPA review course and does not cover all of the topics tested on the CPA exam. Rather, decision-making from a legal perspective within a professional environment is the primary focus of the course. Enrollment restricted.

Courses

BSAN 202. Statistics. 3 Credits.
An introduction to statistical inference techniques with emphasis on the application of these techniques to decision making in a firm. Topics include probability theory, random variables, probability distribution functions, estimation, test of hypothesis, regression, correlation, and introduction to statistical process control. Prerequisite: MATH 115, MATH 121, MATH 125, MATH 141 or MATH 145.

BSAN 230. Introduction to Business Analytics, Information Systems, and Supply Chain Management Professions. 1 Credits.
In this course, we focus on the Business Analytics, Information Systems, and Supply Chain Management professions and cover a variety of topics. Topics include, but are not limited to, career opportunities; the importance of professional mentorship; professional membership with groups/associations; appropriate industry certifications; graduate education content, timing, and opportunities; the role of career broadening experiences; and ethical dilemmas within the professions. We emphasize both current practice and projected industry trends and involve guest speakers. This course is cross-listed with IST 230 and SCM 230. Check with your Major to see which 230 course it requires or recommends (ACCT 230, BSAN 230, BUS 230, FIN 230, IST 230, MKTG 230 or SCM 230) and when it encourages you to take it. (Same as IST 230 and SCM 230.) Prerequisite: BUS 210 or concurrent enrollment.

BSAN 302. Quantitative Methods and Data Analysis. 3 Credits.
This course will cover quantitative methods and techniques of data analysis that are useful in solving common problems that arise in all the functional areas of business. Upon completion of this course, given a business problem, students will be expected to know how to formulate a mathematical model which is appropriate to the problem, to fit the model to available data, and to interpret the model results to derive actionable insights. Examples of quantitative methods and data analysis that may be taught include: multiple regression, analysis of variance, statistical process control, linear programming, non-linear optimization and decision making under uncertainty. Prerequisite: MATH 115 or MATH 121 or MATH 125 or MATH 141 or MATH 145 and DSCI 202 or BSAN 202.

BSAN 310. Introduction to Business Analytics. 3 Credits.
This course will provide an overview of analytics in the business context. The concepts and practices of analytical modeling and analysis will be covered. An analytics topology to make sense of the variety of analytics types, techniques, and processes, will be introduced. The course will also cover the data side of analytics including data sourcing, basic data modeling, data discovery, data cleansing, and data preparation. Analytics techniques for the exploration, discovery, experimentation, creation of KPIs and metrics will be used in hands-on exercises. The human side of analytics-communication, conversation, and collaboration will be discussed and utilized in class and homework exercises. Prerequisite: Corequisite: BSAN 202 or DSCI 202 and IST 310.

BSAN 311. Introduction to Business Analytics, Honors. 3 Credits.
Honors treatment of this course will provide an overview of analytics in the business context. The concepts and practices of analytical modeling and analysis will be covered. An analytics topology to make sense of the variety of analytics types, techniques, and processes, will be introduced. The course will also cover the data side of analytics including data sourcing, basic data modeling, data discovery, data cleansing, and data preparation. Analytics techniques for the exploration, discovery, experimentation, creation of KPIs and metrics will be used in hands-on exercises. The human side of analytics-communication, conversation, and collaboration will be discussed and utilized in class and homework exercises. Prerequisite: Corequisite: BSAN 202 or DSCI 202 and IST 310.
Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

BSAN 320. Fundamentals in Application Development. 3 Credits.
This course provides an introduction to software development concepts and techniques. Students will develop an understanding of the software development process through hands-on programming assignments.
and projects. The course emphasizes problem solving, initiative, and teamwork within an information systems framework. Not open to students with credit in IST 320. Prerequisite: Corequisite: IST 202 or BSAN 310 and IST 310. Enrollment restricted.

BSAN 325. Systems Analysis and Design. 3 Credits.
This will take students through the entire systems development life cycle from the first contact with a customer through analysis and design to the implementation of the customer's system. It will introduce the student to the field of systems analysis and design, basic systems analysis tools, and the procedures for conducting systems analysis. Topics covered will include the role of the systems analyst in the organization, concepts, philosophies and trends in system analysis and design, and tools and techniques for such analysis. Not open to students with credit in IST 325. Prerequisite: IST 202 or BSAN 310. Enrollment restricted.

BSAN 326. Database Management Systems. 3 Credits.
This course introduces the fundamental concepts and implementation of the database development process and relational database systems. The student will be exposed to database development issues, SQL methodology, and entity-relationship models. Not open to students with credit in BSAN 326 or IST 326. (Same as IST 326.) Prerequisite: Corequisite: IST 202 or BSAN 310 and IST 310. Enrollment restricted.

BSAN 400. Special Topics in Business Analytics: _____.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of supply chain management topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

BSAN 410. Project Management. 3 Credits.
This course provides initial exposure to concepts related to the project management discipline generally, while focusing on management of information technology projects in particular. The course is organized to emphasize core project management knowledge areas developed by the Project Management Institute, and it stresses the benefits of a disciplined, formal project management methodology. Students completing the course will gain an appreciation for the complex nature of projects and be better prepared to be an effective member of project teams encountered in many types of organizations. Not open to students with credit in IST 410 or MGMT 472. Prerequisite: IST 202 or IST 310. Enrollment restricted.

BSAN 412. HR Management Analytics. 3 Credits.
The course introduces students to the field of human capital analytics and measurement. It provides an overview of the evolution of human capital measurement, and guides students through various types of methods organizations use to understand the impact of people programs and initiatives on their organization. The importance of human capital analytics in business decisions is examined, including leader and manager use of data, basic analysis, reporting and presentation of data, benchmarking, and other use cases and trends. The course will provide a foundation of knowledge with the intent of developing the student's capabilities to be more prepared and equipped to advance the use of human capital measurement to drive business decisions. (Same as MGMT 412.) Prerequisite: Completion of MGMT 310 or MGMT 311. Enrollment restricted.

BSAN 415. Data Analysis and Forecasting. 3 Credits.
This course is concerned with the analysis and interpretation of data encountered in business and economics. The course gives students experience in data analysis that can be usefully applied in a wide variety of real life situations and hands on experience in using statistics programs, such as R, to analyze various types of data. Topics covered may include multiple regression, logistic regression, ARIMA time series models, classification methods, forecasting, building statistical models, and model validation. Not open to students with credit in SCM 415. Prerequisite: BSAN 202 or DCSI 202 and SCM 310 or SCM 311. Enrollment restricted.

BSAN 418. Modeling and Risk Analysis. 3 Credits.
An introduction to the concepts, methodologies, and applications of risk analysis and modeling. This course is designed primarily to develop practical modeling skills with spreadsheet software. To accomplish this, material from across the finance discipline will be covered as well as material from the supply chain management discipline. Examples from corporate finance, investments, financial derivatives, real estate, personal finance, and supply chain management methods will be used to demonstrate modeling. Not open to students with credit in FIN 418 or FIN 460 or SCM 418. Prerequisite: FIN 310 or FIN 311. Enrollment restricted.

BSAN 420. Data Visualization in Business. 3 Credits.
The ability to accurately and effectively analyze and communicate business data in paramount in today's world of business analytics and big data. Increasingly, professionals are being asked to use business data as a crucial component of everyday business decisions -- competitive advantage is gained in companies that can analyze and visualize data successfully to help them make business decisions. This course will focus on data visualization through applied, hands-on projects that will help students produce, analyze, and communicate data in a variety of business sectors. A principle focus of the course will be the use of data analysis programs and associated visualization techniques. Not open to students with credit in SCM 400 - Data Visualization. Prerequisite: IST 310, BSAN 310, and BSAN 326. Enrollment restricted.

BSAN 430. Marketing Analytics. 3 Credits.
This course introduces advanced analytical methods in the examination of data from a variety of sources to provide marketing professionals with the tools necessary to engage in today's data rich decision-making environment. Predictive models and other multivariate statistical techniques will be covered with an emphasis on practical application. Not open to students with credit in MKTG 400 - Marketing Analytics or MKTG 470. Prerequisite: BSAN 415 or MKTG 415 or SCM 415. Enrollment restricted.

BSAN 440. Foundations in Business Analytics. 3 Credits.
Introduces students to the key business, computational and data competencies needed by business analysts for effective data-driven decision making. The course focuses on how structural as well as unstructured "big data" can be used to help decision makers improve organizational competitiveness. Students will learn fundamental skills for business analytics: data manipulation, data visualization and statistical methods to gain experience with different software tools used for data analysis and reporting. Not open to students with credit in IST 495. Prerequisite: Successful completion of BSAN 326 or IST 326. Enrollment restricted.

BSAN 450. Data Mining and Predictive Analytics. 3 Credits.
Overview of techniques for gathering, exploring, transforming, modeling, and summarizing data sets including very large data sets, both structured and unstructured. Basic data mining techniques including neural networks, decision trees, clustering algorithms, linear programs, text and web mining in business setting. Modeling approaches include techniques from supervised and unsupervised machine learning. Discussion of data cleaning and data preparation issues, including noise, missing and unbalanced data, discrete versus continuous features, and feature selection. Some techniques are implemented from scratch, while in other cases real-world tools such as R, Python packages and commercial data modeling tools are applied to large-scale data sets. Prerequisite: BSAN 415 or SCM 415. Enrollment restricted.

BSAN 460. Supply Chain Analytics. 3 Credits.
A Supply Chain Management perspective for leveraging and implementing business analytics tools & concepts. Primary points of focus include Supply Chain applications, data set collection, information systems infrastructure requirements and optimizing SCM efficiency & value. Course format to include lecture, in-class lab work (R or Python), case studies and guest lecturers. (Same as SCM 460.) Prerequisite: SCM 401 or BSAN 440.

BSAN 465. Customer Relationship Management. 3 Credits.
This course offers a comprehensive introduction to the strategy and tactics of customer relationship management (CRM). Particular emphasis is given toward identifying the key strategic principles inherent in the customer-centric focus that underlies a successful CRM program. Topics include: Fundamentals of CRM strategy, marketing metrics, customer profitability analysis, choice modeling, techniques for evaluating model performance and applications of CRM to marketing campaign management. Students will be instructed on how to implement the CRM techniques using various software tools and real-world data. (Same as MKTG 465 and SCM 425.) Not open to students with credit in BSAN 465 or MKTG 465 or SCM 425 or MKTG 400 - Customer Relationship Management. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

BSAN 480. Business Analytics Capstone. 3 Credits.
A case-based, project-oriented approach to data driven decision making based on company's mission and strategic objectives. This is the senior course tying together all the knowledge learned into a senior project. Prerequisite: BSAN 440 or IST 495. Prerequisite or Corequisite: BSAN 450. Enrollment restricted.

BSAN 500. Individual Research in Business Analytics. 1-5 Credits.
Individual study of selected topics in business analytics not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: Approval of proposed plan of study by the instructor. Enrollment restricted.

BSAN 599. Internship in Business Analytics. 1-3 Credits.
Internships provide opportunities for students to combine their academic education with a meaningful experience in the business world. Business Analytics internships allow students to explore career pathways in accounting, further their professional growth, expand professional networks, and increase the relevancy of their academic course work. The internship course combines job-related activities of the business analytics internship position with a set of academic requirements. Internships for credit must be approved prior to the internship experience. Students may not receive more than three hours of internship credit from BSAN 599. Prerequisite: Approval of the internship; two of the following: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311, SCM 310 or SCM 311. Enrollment restricted.

BSAN 701. Statistical Decision Making. 3 Credits.
This course provides an introduction to data gathering and analysis with an emphasis on problem solving for decision making and process improvement in a business setting. The role of numerical data in the understanding of business problems and in the evaluation of planned improvements is studied, along with the study of variation commonly occurring in business processes and methods of reducing this variation. Statistical software is used to supplement data analysis and aid in the problem solving. Topics covered may include statistical methods such as exploratory data analysis, graphical analysis, Pareto analysis, stratification analysis, confidence intervals, correlation, linear regression, and control charts. Enrollment restricted.

BSAN 706. Statistics. 3 Credits.
This course covers basic statistical tools for understanding data in organizations. The principal objectives of the course are to learn data analysis techniques and to learn how to apply statistical tools to help understand common problems in organizations. Course content includes data gathering and problem analysis tools, probability distributions and features of distributions (means, standard deviations, Normal distribution, and Binomial distribution), stratification analysis, Pareto analysis, correlation, confidence intervals, simple hypothesis testing, linear regression, and analysis of variance.

BSAN 710. Statistical Modelling. 3 Credits.
This course applies covers the development of statistical models that represent actual data and the use of these models to understand the important characteristics of that data. Statistical models including multiple regression, logistic regression, and time series models. The course will cover a process to build statistical models to represent actual data. This process teaches students how to select a statistical model for a given data set, how to estimate the parameters in that model, how to check to see if that model adequately fits the data, and when necessary how to modify that model. Students will gain model building experience by using R software on actual data. Prerequisite: A statistics class that covers basic statistical methods through multiple regression.

BSAN 718. Introduction to Business Analytics. 3 Credits.
This course will provide an overview of the field of business analytics, the concepts and processes with which data is sourced, prepared, and managed as a strategic business asset. Analytics techniques involving data modeling, querying, and the exploration of data for discovering trends and patterns will be discussed and applied.

BSAN 720. Data and Visual Analytics. 3 Credits.
Presenting quantitative information in visual form is an essential communication skill for data professionals. This course instructs students in various visualization techniques and software. Students will learn how to: (1) ask interesting questions about the business and policies, (2) identify data that can be used to answer those questions, (3) collect, clean and document the data, (4) explore and analyze the data with statistical and graphical techniques, (5) create compelling, informative and accurate visualizations and (6) present these visualizations to educated audiences. Prerequisite: Corequisite: BSAN 710.

BSAN 726. Data Management, Databases, and Data Warehousing. 3 Credits.
The effective use of data across firms to deliver fast and intelligent services presents one of the most critical challenges to today's business leaders. This course is designed to introduce students to concepts and techniques in the theory, design, implementation, and administration of databases both on premis and cloud. Topics to be covered include the database design process, the entity-relationship (ER) model, relational and non-relational databases, queries in Structured Query Language (SQL), database administration, and big data analysis. The students will be exposed to using traditional relational databases along with using various non-relational based architectures such as Hadoop, Spark, and NoSQL. This is a project-based course that will provide hands-on experience using "real life" applications. This course focuses on the skills and concepts needed to design and query databases and therefore contribute to companies' competitive positions. Prerequisite: Corequisite: BSAN 710.

BSAN 730. Large Scale Data Analysis. 3 Credits.
In today's world, large volume of data is being generated every second by individuals and organizations across the globe. Organizations are working towards efficiently storing, managing, and analyzing complex and large datasets for generating business value from big data. In this course, students will learn about the challenges in handling as well as analyzing
big data. Classroom exercises and group assignments will cover topics in
big data technologies including Hadoop, Spark, Microsoft R, etc. Students
will be exposed to foundational data science methods, techniques, and
tools used in big data analytics. Prerequisite: BSAN 710 and BSAN 750.

BSAN 735. Data Security. 3 Credits.
The massive increase in the rate of novel cyber-attacks has made data-
mining-based techniques a critical component in detecting security
threats. The course covers various applications of data mining in
computer and network security. Topics include: Overview of the state
of information security; malware detection; network and host intrusion
detection; web, email, and social network security; authentication and
authorization anomaly detection; alert correlation; and potential issues
such as privacy issues and adversarial machine learning. Prerequisite:
BSAN 710 and BSAN 726 or concurrent enrollment.

BSAN 740. Optimization and Prescriptive Analytics. 3 Credits.
Data-driven decision making is key to establishing and maintaining a
competitive edge in the modern business world. Optimization methods
and techniques operationalize data to provide answers to business
decision-making problems. In this course students will be exposed to a
variety of such optimization methodologies including linear, non-linear,
and integer programming, heuristics, simulation modeling, and certainty/
uncertainty quantification. Students will apply these methods to problems
in finance, marketing, and operations using Excel-based solvers and other
state-of-the-art software. Prerequisite: BSAN 710 and BSAN 726.

BSAN 745. Advanced Machine Learning. 3 Credits.
Qualitative data, such as text, images, and networks, permeate many
aspects of the business world and, when appropriately harnessed
and leveraged, promise to provide a wealth of information and insight.
This course therefore adopts a data-centric approach to machine
learning, focusing on transforming, exploring, and learning from such
qualitative data, predominantly focusing on text. Students gain practical
experience through real-world examples and the use of real-world data,
with emphasis placed on the immediate business benefit such data can
provide. Instruction is given predominantly in either Python or R, with little
to no previous experience in either language required. Topics include:
processing and transforming qualitative data, sentiment-extraction
and analysis, topic modeling, network analysis, web scraping, and
both shallow and deep learning applied to text, images, and networks.
Prerequisite: BSAN 710, BSAN 726 and BSAN 750.

BSAN 746. Accounting Analytics. 3 Credits.
This course covers the analysis of data as it pertains to accounting
professionals. The focuses include analytic techniques for decision
making and the examination of “big data” involving accounting
information. Hands-on experiences will develop skills with select software
tools used in data analytics for accounting professionals.

BSAN 750. Data Mining and Machine Learning. 3 Credits.
This course introduces students to foundational machine learning
methods and techniques that can be applied to rich data sources common
to many complex, real-world business problems. The material presented
emphasizes a hands-on analytics experience using programming
languages such as R and Python. Topics include: exploratory data
analysis, data preparation, and both supervised (e.g., logistic regression,
etc.) and unsupervised (e.g., clustering, etc.) learning methods, among
other topics of the instructor’s choosing. Prerequisite: Corequisite:
BSAN 710.

BSAN 760. Data Driven Business Strategy. 3 Credits.
Ultimately, business analytics is about using data, analytics, and
algorithms to make prescriptive predictions about future events and
decisions. This course will take a holistic approach to helping participants
understand the key factors involved, from data collection to analysis to
prediction and insight. Projects will give students hands-on experience
developing and running a data science pipeline to ensure that the correct
business predictions are being made. Emphasis will be on merging
technical skills with critical thinking and communication skills to ensure
that robust analytics are being created for business benefit. Prerequisite:
BSAN 710, BSAN 726 and BSAN 750.

BSAN 770. Healthcare Analytics. 3 Credits.
Healthcare is one of the most critical industry sectors today due to its
immediate impact on the lifestyle and wellbeing of individuals across
different strata of the society. In this course, we will learn about the
healthcare eco-system, healthcare information systems, and data analysis
tools useful in analyzing healthcare data for improving health-related
outcomes. We will explore data generated using personal health-gadgets
such as activity monitors, electronic health records, health statistics
reports, and other sources and understand how business analytics can
be used to assist medical decision-making and improve organizational
practices.

BSAN 775. Financial Risk Analytics. 3 Credits.
The financial services industry is undergoing significant changes, making
the use of data and information technology increasingly important in
driving business decisions and managing risk. This course provides a
practical introduction to financial risk analytics with a focus on data-driven
modeling, computation, and statistical estimation of credit and market
risks. Real data case studies will be used throughout the course.

BSAN 780. Analytics Capstone. 3 Credits.
The Business Analytics capstone course comprises a project or practicum
that exposes students to a real business problem, which they will solve
using visualization, data mining, and optimization techniques. The
problems are solicited from businesses, although students are welcome
to propose projects as well. The student will work on an analytics project
and prepare a comprehensive project report documenting the findings
and recommendations. This course guides students through the process
of developing and executing an original data analysis project aimed at
addressing a public policy, political or governance challenge. The project
can come from an extension of a project completed in a previous class
or be part of a corporate internship. Prerequisite: BSAN 710, BSAN 720,
BSAN 726 and BSAN 750.

BSAN 795. Special Topics Decision Science: _____. 2-5 Credits.
A variable-topic course open to graduate and selected undergraduate
students meeting the requirements established by faculty members
offering the course. Prerequisite: Determined by the instructor. Enrollment
restricted.

BSAN 810. Statistics and Decision Tools. 3 Credits.
This course covers basic statistical tools for solving problems in
organizations. The principal objectives of the course are to learn a
strategy to solve organizational problems, to learn some data gathering
and data analysis techniques, to learn how to interpret data and
understand variation in data, and to learn how to reduce variation in
organizational processes and output. Course content includes data
gathering and problem analysis tools, probability distributions and features
of distributions (means, standard deviations, Normal distribution, and
Binomial distribution), stratification analysis, Pareto analysis, correlation, confidence intervals, simple hypothesis testing, linear regression, and analysis of variance. This course is open only to students in the full-time MBA program.

**BSAN 820. Business Analytics. 3 Credits.**
Business analytics is an essential business capability enabling the effective use of data to provide insight and support business decision making. This course will provide an overview of the field of business analytics, the concepts and processes with which data is sourced, cleansed, structured, and prepared as a strategic business asset will be introduced. Analytics techniques involving data modeling, and the exploration, discovery, and experimentation of data for discovering trends and patterns will be discussed and applied. The people side of analytics and data systems such as communication, visualization, and collaboration will be covered. This course is open only to students in the full-time MBA program.

**BSAN 895. Graduate Seminar in Decision Sciences: _____ 0.5-5 Credits.**
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted.

**BSAN 898. Independent Study for Master’s Students. 1-6 Credits.**
Individual study of selected current problems in the field of decision science to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

**BSAN 920. Probability for Business Research. 4 Credits.**
(F) This course covers the basic theory of probability and its use for research in the business disciplines. The course is designed primarily for Ph.D. students in the business school. Prerequisite: Doctoral standing and two semesters of calculus, or consent of instructor.

**BSAN 921. Statistics for Business Research. 4 Credits.**
(S) This course covers the basic theory of statistics and its use for research in the business disciplines. The course is designed primarily for Ph.D. students in the School of Business. Prerequisite: DSCI 920 or BSAN 920.

**BSAN 922. Advanced Regression. 3 Credits.**
This course presents various statistical tools for undertaking quantitative research in business. The regression model under the full ideal conditions is discussed, along with methodological issues that arise when these ideal conditions are violated, as often occurs in business research. A high degree of theoretical rigor is maintained, along with an emphasis on practical applications through the use of assignments that require data analysis. Prerequisite: DSCI 921 or BSAN 921 or consent of instructor.

**BSAN 934. Seminar in Probability and Statistics: _____ 3 Credits.**
(V) This course will cover advanced topics in probability and statistics with application to various business disciplines. Topics covered may vary and will depend on the instructor. Examples of topics that may be covered are time series models, stochastic processes, uncertainty in artificial intelligence, multivariate statistics, etc. Prerequisite: DSCI 920 and DSCI 921 or BSAN 920 and BSAN 921, or consent of instructor.

**BSAN 935. Seminar in Optimization: _____ 3 Credits.**
(V) This course will cover basic and advanced topics in optimization theory and applications. Examples of topics that may be covered are linear programming, nonlinear programming, dynamic programming, multiple-criteria decision making, habitual domain theory for forming winning strategies and effective decision making and game theory. Prerequisite: Linear algebra and real analysis or consent of instructor.

**BSAN 936. Management Science Research Seminar. 1 Credits.**
The seminar will discuss current research in management science topics such as artificial intelligence, statistics, optimization, decision making, decision support systems, and production/operations management. Topics covered will reflect the research interests of the instructor and participants. Participants are required to lead the discussion for at least one paper of their choice. Graded on a satisfactory/unsatisfactory basis.

**BSAN 995. Doctoral Seminar in Analytics and Operations: 1-5 Credits.**
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

**BSAN 998. Independent Study for Doctoral Students. 1-5 Credits.**
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team.

**BSAN 999. Doctoral Dissertation. 1-12 Credits.**
(V) Individual research work. Graded on a satisfactory progress/limited progress/no progress basis.

### Courses

**BUS 101. Business Majors, Careers and Professional Skills. 3 Credits.**
This course acquaints students with the nature of business majors and careers. With this knowledge, students can explore, engage and implement their academic and career interests within business. Students are introduced to the curricula requirements, expectations of business students, possible career paths, and the necessary professional skills in the business environment. Prerequisite: Open only to students with fewer than 60 hours.

**BUS 110. Introduction to Professionalism. 1 Credits.**
In this course, we position School of Business students for a productive university experience and lay the groundwork for their personal and professional development. We teach it through the lens of self-discovery, self-awareness, self-management, academic planning, personal and professional development, and well-being. This course is open only to students pursuing a BSB degree. Students are encouraged to enroll in their first semester at the School.

**BUS 120. Emerging Topics in Business. 1 Credits.**
In this course, we expose School of Business students to several cutting edge topics, trends and technologies (collectively, "topics") affecting businesses and business people and encourage students to think about how they will thrive in the face of change. We cover 3-6 topics during the semester. This course open only to BSB degree-seeking students, who are encouraged to enroll during their second semester in the School.

**BUS 150. Foundations of Business. 3 Credits.**
This course introduces students to the intellectual foundations, historical context, and current environment for modern business, focusing on underlying economic and ethical concepts that guide allocation of resources. Examples of the topics covered include scarcity and property rights, fairness and equity, liberty and externalities, gains and losses from trade, competition and monopoly, intellectual property, and globalization. Enrollment restricted.

**BUS 177. First Year Seminar in Business. 3 Credits.**
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in business. Course is designed to meet the critical thinking learning outcome of the KU Core. Does not contribute to major requirements in business. First-year seminar topics are coordinated and approved through the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

BUS 200. Business Leadership Seminar. 1 Credits.
This course provides students with structured opportunities to engage in active career and major exploration, support leadership development, build professional skills, and promote self-discovery. The class is held for one hour a week and additional out-of-class activities are required. May be taken more than once; total credit not to exceed four hours. Prerequisite: Admission to the Business Leadership Program. Enrollment is restricted.

BUS 210. Career Management and Planning. 1 Credits.
In this course, we connect School of Business students with a career advisor and focus them on building up their career-related knowledge and skills. Students will choose focused learning activities that meet their specific career goals and needs, and they will improve their professional resume and interviewing skills. This course only open to BSB-degree-seeking students with 30 or more credit hours. Students are encouraged to enroll their sophomore year or, if later, their first semester upon admission. Prerequisite: BUS 110 or concurrent enrollment.

BUS 230. Introduction to Professions in Business. 1 Credits.
In this course, we explore the breadth of careers available to students earning a business degree and cover a variety of career related topics in multiple business disciplines. We emphasize both current practice and projected industry trends and involve guest speakers. Students are encouraged to take this course (or ACCT 220, BSAN 220, FIN 220, IST 220, MKTG 220 or SCM 220) their sophomore year or their first year at the School, whichever is later. Check with your advisor to see which 220 course the major requires and when it encourages you to take it. Prerequisite: BUS 210 or concurrent enrollment.

BUS 300. Special Topics in Business: ___. 1-3 Credits.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of business topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor.

BUS 305. Business Writing. 3 Credits.
This course explores the theory and practice of written communication in business. Students learn strategies for writing clearly, effectively, and in a professional tone and format within different business contexts that require both expository and persuasive writing styles. This course focuses entirely on the writing process, including developing ideas, organizing, drafting, revising, and editing. Classes provide students multiple opportunities to write drafts, receive feedback, and revise their work. This is done in the context of analyzing, discussing, and critiquing different forms of business writing. Not open to students who have taken BUS 105. Prerequisite: Goal 2, Outcome 1.

BUS 310. Internships with Impact. 1-3 Credits.
Students will apply skills developed through the School of Business curriculum in an approved internship experience. Students must secure and perform a professional-level internship and complete other BUS 310 requirements. Students should review the BUS 310 Internship Course Guide for requirements for the internship and enrollment. Enrollment in BUS 310 must be approved by the Employer Relations & Internships program team prior to the internship experience. Students will receive one credit hour but may be considered for up to three credit hours under limited circumstances. Prerequisite: BUS 210 or equivalent. Approval by Employer Relations & Internships program team.

BUS 330. Directed Study in Business Topics. 1-3 Credits.
Individual study of selected topics in business administration not otherwise available to non-business majors. Topics selected will be determined by special interest and objectives of the student in consultation with the faculty member who will supervise the directed study or research. Prerequisite: 3.0 grade-point average, major in a field other than business administration and/or accounting, and permission of instructor offering the directed study and of the director of the undergraduate program.

BUS 399. Internship in Business. 1 Credits.
Internships provide opportunities for students to integrate their academic education with a meaningful experience in the business world. Internships allow students to further their professional growth, explore career pathways, expand professional networks, and increase the relevancy of their academic course work. The internship course combines job-related activities of the internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the coordinator of the internships prior to the internship experience. BUS 399 is limited to one (1) credit hour per offering, but students may count a maximum of two (2) cumulative credit hours of BUS 399 toward degree requirements. Internships must satisfy specific criteria in order to qualify for academic credit. Contact Business Career Services in 1130 Capitol Federal Hall for information regarding the process of having an internship evaluated for academic credit. Prerequisite: Approval of the internship; two of the following: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311, SCM 310 or SCM 311. Enrollment restricted.

BUS 400. Special Topics in Business: ___. 1-5 Credits.
A special variable-topic seminar open to seniors and graduate students meeting the requirements established by the faculty members offering the particular seminar. Its purpose is to allow the occasional offering of business-related topics not adequately covered in any regular course available to students of the School of Business. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

BUS 410. Professionalism Capstone. 1 Credits.
In this senior level course, we recognize student accomplishment under the Business School's points program; help students integrate and synthesize their development while at college; and lay the groundwork for a successful transition to life after college. Prerequisite: BUS 110, BUS 120, BUS 210, BUS 230 or equivalent and the BUS 410 Points Prerequisite, as stated in the applicable BUS 410 Professionalism Capstone Course Guide. Not available to students with fewer than 90 credit hours.

BUS 450. Literary and Historical Narratives for Professional Enrichment, Honors. 3 Credits.
This course develops larger possibilities and purposes for students' professional lives through a sampling of timeless narratives that transcend the circumstances of their own time and place. Through a seminar format, students will enjoy the opportunity and pleasures of discovering or remembering the wisdom of leadership unbounded by time or place. A business endeavor demands careful reasoning and creative action if it is to serve those to whom it obligates itself. Timeless literary and historical narratives are a deep well of learning that develop, support, and elevate professional enrichment. Only open to students admitted to the University Honors Program, the Business Honors Program, or by permission of the instructor. Enrollment by application only.
BUS 500. Individual Research in Business. 1-5 Credits.
Individual study of selected topics in business not otherwise available to
the student. Topics selected to be determined by the special interests and
objectives of the student in consultation with a faculty member who will
supervise the reading and research. Prerequisite: FIN 310 or FIN 311,
MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or
SCM 311; 3.0 professional grade point average and approval of proposed
plan of study by the instructor. Enrollment restricted.

BUS 725. Capstone. 6 Credits.
The capstone course emphasizes leadership, analysis, and decision-
making in a practical business environment, where students will
demonstrate synthesis and mastery of the concepts explored in previous
courses. The course is designed around four discrete blocks in which
students will focus their learning through a combination of in-depth study
and reflection, with each block ending with a data-driven case study
intended to measure individual understanding and application of the ideas
addressed in that particular block. Ultimately, the goal of this course is
to posture the student to provide practical leadership and sound decisions in
dynamic and complex business environment, achieving what the ancient
Greeks termed “pronoia” -practical wisdom that weaves together
judgment, intellect, and experience to drive better decision-making in
business leaders.

BUS 801. Professional Skills Development. 0.5 Credits.
A series of workshops for graduate business students to provide
foundational and supplemental skill development in such areas as
leadership training, career development, communications, negotiations,
ethical behavior, technology, business writing, and market-based thinking.
This course is open only to students in the full-time MBA program.

BUS 810. Kansas Small Business Projects. 1-4 Credits.
The course provides an active learning opportunity to complement
classroom learning. Many different enrichment activities can be used to
provide an opportunity to apply classroom knowledge to specific
situations. Some examples of possible enrichment activities include, but
are not limited to case competitions, community consulting activities,
communication skills workshops, leadership and team building exercises,
intensive simulation. The principal objectives of the course are to enhance
“doing” skills and help students turn classroom knowledge into action, to
emphasize collaboration and team initiatives, to develop collaborative and
cooperative behaviors, and to develop an understanding of how “failure”
can ultimately be the best learning tool. Topics will vary depending on the
enrichment activity. This course may be repeated for credit. This course is
open only to students in the full-time MBA program.

BUS 811. Application and Integration Course. 4 Credits.
The course provides an active learning opportunity to complement
classroom learning. Many different enrichment activities can be used to
provide an opportunity to apply classroom knowledge to specific
situations. Some examples of possible enrichment activities include, but
are not limited to case competitions, community consulting activities,
communication skills workshops, leadership and team building exercises,
intensive simulation. The principal objectives of the course are to enhance
“doing” skills and help students turn classroom knowledge into action, to
emphasize collaboration and team initiatives, to develop collaborative and
cooperative behaviors, and to develop an understanding of how “failure”
can ultimately be the best learning tool. Topics will vary depending on the
enrichment activity. This course may be repeated for credit. This course is
open only to students in the full-time MBA program.

BUS 825. Internship Program. 1 Credits.
The Internship Program provides a continuous learning opportunity
between the first and second year of MBA studies which compliments the
comprehensive, research based in class learning with a full immersion
clinical experience. The principal objectives of the course are to acquire
a meaningful work related education, witnessing how the classroom
instruction translates to practical applications and to develop interpersonal
and executional skills. This course provides clinical applications of
business problem solving and consulting. The course links the models
and theories studied in the classroom with field applications to solve real
business problems requiring real time analysis, consideration of practical
alternative strategies, determination of sales and profit implications of the
recommended course of action. A principal objective is for the student
to acquire first-hand industry knowledge and witness varying client
management styles. Topics include consulting processes and successful
consultant characteristics, hypothesis generation, problem identification
and differentiation of root cause vs. symptom, application of market
research methods, solution modeling, and presentation of solution. This
course is open only to students in the full-time MBA program.

BUS 895. Regionalism - From Concepts to Working Models. 2 Credits.
This seminar course introduces students to the concept of regionalism
and progresses through the development of working models for regional
approaches to business/economic development and governance. Topics
include understanding the complexities related to doing business and
governing in the Kansas City region, models of effective leadership
necessary to manage and govern in the region, the economic impact of
border wars, economic incentive policies that promote small business
growth and entrepreneurs, and moving regionalism from concepts to
working models.

BUS 901. Research Issues in Business Administration. 2 Credits.
(FS) A core course for Ph.D. students (with the exception of Finance and
Management) majoring in business administration. Provides a workshop
format for discussion of the currently prevalent research methodologies
and problems being addressed in the areas of accounting, finance,
human resources management, information systems, marketing, decision
sciences, organizational behavior, and strategic management. All Ph.D.
students and faculty are encouraged to attend workshops of interest.
Prerequisite: Admission to the Ph.D. program.

BUS 902. Teaching Seminar. 1 Credits.
(F) The objective of this course is to improve the teaching effectiveness
of the participants. Highly effective teachers demonstrate their teaching
techniques and discuss the reasons underlying their actions. School of
Business Ph.D. students are required to take this seminar during the first
semester in which they are the instructor of record for a course.

BUS 903. Responsible Conduct of Research. 2 Credits.
The major objectives of this doctoral level course on the responsible
conduct of research are to build students’ abilities to analyze ethical
issues, and to expose students in advance to various issues that may
arise while engaging in the research endeavor. Issues will be covered that
arise in such areas as research design, data collection and management,
the use of human subjects, data analysis, authorship, publication, peer
review, and other aspects of professional practice.

Courses
DSCI 400. Special Topics in Decision Sciences: _____ 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional
offering of decision science topics not covered by established courses.
Prerequisite: Determined for each topic by instructor. Enrollment
restricted.

DSCI 500. Individual Research in Decision Sciences. 1-5 Credits.
Individual study of selected topics in decision sciences not otherwise
available to the student. Topics selected to be determined by the special
interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted.

DSCI 712. Advanced Statistics I. 2 Credits.
This class covers the process of building statistical models from observed data: including identifying an appropriate model, checking the fit of the model to observed data, and using the model to make inferences. An emphasis is upon development of models that can help answer questions of interest. The class covers multiple regression, variable selection in multiple regression, analysis of variance and logistic regression. Prerequisite: DSCI 701 or an introductory statistics class. Enrollment restricted.

DSCI 715. Managing for Quality Improvement. 3 Credits.
This course will take a closer look at various aspects of the total quality theory and its practices. Particular attention will be paid to the foundations of total quality theory including Deming's 14 principles of management and key tenants of Juran and Crosby. Additional topics include an examination of the continual improvement process in theory and action, strategies for getting started, and issues to address during a transformation into a total quality model of operation. Prerequisite: DSCI 702. Enrollment restricted.

DSCI 716. Business Analytics Models. 2 Credits.
This course will cover construction and solution of analytic models for problems in the business domain using spreadsheet software. Examples of analytic models are linear, nonlinear, and integer programming models. Examples of business problems are advertising, workforce scheduling, aggregate planning, blending, production process, financial, transportation, assignment, network flows, and shortest path determination.

DSCI 717. Business Analytics Projects. 2 Credits.
Business analytic projects are assigned to teams in this class and the teams are charged with identifying the project problem, obtaining data relevant to the problem, developing a model that represents the problem, and using the model and the data to make inferences relevant to the project. The data analysis tools that have been covered in previous classes will be used to help perform these projects. Prerequisite: DSCI 712, DSCI 713, DSCI 716, IST 713, and DSCI 714.

DSCI 720. Operations Management. 2 Credits.
This course is a survey of the strategic concepts and techniques used in managing the operations function in both the manufacturing and the service sectors. The course has the following principal objectives: to identify different kinds of operations problems and understand their impact on business and to apply basic operations analysis techniques to provide business solutions and to find improvement strategies. Topics covered include process and cycle time analysis, capacity planning, service operation and waiting line management, sales and operations planning, inventory management, and constraint management. Prerequisite: DSCI 701 or DSCI 810. Enrollment restricted.

DSCI 730. Managing Customer Focused Enterprises. 2 Credits.
An introduction to management principles supporting the concept that a primary goal of a business is to meet the needs of its customers. To accomplish this goal, organizations must design, build, and deliver products and services that meet customer needs in a resource effective manner. Topics covered include the role of the customer, the nature of process improvement in meeting customer needs in a cost effective manner, the view of the organization as a system, the reduction of variation in all organizational processes, the nature of continual organizational learning, and the responsibilities of management in this approach.

DSCI 740. Seminar in Decision Sciences: 1-5 Credits.
This course will cover theories of decision making under uncertainty and competition. Examples of topics that may be covered are Bayesian decision theory, game theory, habitual domain theory for forming winning strategies and effective decision making. Automated aids for decision making such as expert systems may also be covered. Prerequisite: DSCI 701 and DSCI 702, or consent of instructor. Enrollment restricted.

DSCI 746. Contemporary Issues in Operations Management. 3 Credits.
This course will examine the major manufacturing and the operating strategies used by firms today. A partial list of these strategies include quality improvement, theory of constraints, just-in-time, and manufacturing planning and control systems. Pros and cons of each strategy will be discussed. Implementation issues will also be discussed. Prerequisite: DSCI 702. Enrollment restricted.

Courses

ENTR 177. The Entrepreneurial Mindset. 3 Credits.
Entrepreneurs are passionate, creative, idea people. They ask the tough why not questions, they seek and seize opportunities, they rarely accept the status quo, and throughout history entrepreneurs have developed innovative answers to the most challenging issues in technology, business and society. This course will allow students to become rigorous, versatile and agile thinkers by flexing their own critical thinking muscles through an examination of the entrepreneurial mindset. What made entrepreneurs like Steve Jobs, Bill Gates, Mary Kay, Mark Zuckerberg, and Oprah so wildly successful? Are there common characteristics that you may want to adopt to increase the likelihood of your own success? We'll look at them, and look at ourselves to see if and how to apply their innovative techniques to our own pursuits. Maybe starting the next Apple Computer company is in your future. First year seminar topics are coordinated and approved through the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

ENTR 300. Special Topics in Entrepreneurship: 1-5 Credits.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of business topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by the instructor.

ENTR 301. Starting Your Own Business. 3 Credits.
In this course the student examines the disciplines which comprise the critical success factors in entrepreneurship and develops a fundamental understanding of the basic skill set required to manage his/her own business. The course will emphasize the Entrepreneurial Process in which each of the following disciplines will be introduced so that the student understands meaning, interrelationship and the application of the subject matter. First the student will be introduced to entrepreneurship and the personal attributes which historically have produced successful entrepreneurs. Further, the student will learn how to evaluate business opportunities via Feasibility Analysis which encompasses industry and competitor analysis, developing an effective business model, building a new venture team, developing an effective marketing plan, assessing the new ventures financial strengths and preparing the proper ethical and legal foundation for the new business. Finally, on completion of the course the student will possess a beginning comprehension for getting financing for the new venture and preparing for the challenges of business growth.

ENTR 302. Financing Your Own Business. 3 Credits.
This course introduces the non-business student to the language of business, accounting, and its applications in the financial management of new and small business environments. Students will learn how to account for the various activities of the start-up and early stage new venture as well as the importance, utility and construction of financial statements. Further, students will acquire the ability to construct financial projections for a start-up firm and monitor the financial performance of the growing business with a focus on cash flow management. Finally, students will be introduced to various remedies in the event that performance does not meet expectations. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1, or instructor approval.

ENTR 303. Marketing Your Own Business. 3 Credits.
This course focuses on the marketing development of new business ideas for small businesses including creating an environment conducive to innovation, recognizing business opportunities, assessing the industry and its potential customer segments, barriers to entry and competitive set. In addition, students will acquire an understanding of the primary marketing tools available to the entrepreneur to drive customer awareness, initial and repeat purchase and the ability to fully integrate each of those tools into a cohesive, integrated marketing plan, all on an extremely limited budget as typifies start up businesses. Upon successful completion of the course, students will understand how to plan an entrepreneurial marketing program, implement it and evaluate its performance. This includes market analysis, segmentation, the marketing mix of product, price, promotion and distribution and marketing strategy, both long term and annually. Prerequisite: ENTR 301 or ENTR 410, or instructor approval.

ENTR 304. Launching Your Own Business. 3 Credits.
This course provides the student with an opportunity to prepare a complete go-to-market business plan for a new venture which leverages the students' major area of study so that following graduation the student has the option of pursuing self employment in the launch of their own business. The students' expertise from their area of major study will be combined with the entrepreneurial skills acquired from the prior three courses in this Certificate sequence. Ideally, this course will originate from the students’ school of origin, either selected from a roster of existing qualifying courses or independent study with a faculty member in the students’ field of major study. In the event that the students’ school of major study cannot provide the teaching resources for independent study, it will be provided by the School of Business, Center for Entrepreneurship. If the faculty at the students’ school of origin wants to develop a specific course which completes the Certificate requirements, course preparation funding has been arranged via a grant from the Kauffman Foundation. Prerequisite: ENTR 303.

ENTR 400. Special Topics in Entrepreneurship: ____. 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of entrepreneurship topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

ENTR 410. Building Entrepreneurial Competency. 3 Credits.
Build your entrepreneurial competency—a way of thinking about problem-solving that can be applied across every industry and every type of organization. Topics may include opportunity recognition, opportunity feasibility, idea validation through experimentation, business model construction, and learning from failure. Satisfies: Goal 6 Outcome 1 (AE61). Not open to students with credit in ENTR 301 or BBA 404. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1, or instructor approval.

ENTR 430. Corporate Entrepreneurship. 3 Credits.
This course explores challenges to entrepreneurship and innovation in large established organizations and how entrepreneurial principles can be applied to drive competitive advantage. Applications include exploration and development of new products, business processes, markets, customers, and organizational structures. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1, or instructor approval.

ENTR 450. Entrepreneurship Capstone. 3 Credits.
An integrative, highly experiential course centering on new venture creation. Students will apply cross-disciplinary knowledge and skills to solve a complex entrepreneurial problem and demonstrate the feasibility of a new entrepreneurial venture. Prerequisite: ENTR 410, or instructor approval.

ENTR 460. Entrepreneurial Finance. 3 Credits.
This course explores finance through an entrepreneurial lens – both from the perspective of the entrepreneur and from the investor, using numerous case studies and examples to illustrate topics. Topics may include designing revenue models, forms and stages of financing, capital structures for new ventures, and evaluating financial statements. Not open to students with credit in ENTR 302. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1, or instructor approval.

ENTR 470. Entrepreneurial Marketing. 3 Credits.
An emerging business venture may have the most innovative technology or distinctive service offering, but if there are no customers, the venture is likely to fail. This course is about how a new venture gets, keeps and grows customers to successfully build the business, often under the constraint of limited resources and a high degree of uncertainty. Not open to students with credit in ENTR 303. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1, or instructor approval.

ENTR 480. Small Business Management. 3 Credits.
Small business is a unique form of entrepreneurship, and owners face challenges and opportunities that are distinct from scalable startups and large established organizations. This course looks at the various aspects of owning and managing a small business, family business or franchise, with the owners having close control over operations and management decisions. Not open to students with credit in BBA 409. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1, or instructor approval.

ENTR 490. Solving Wicked Problems. 3 Credits.
Wicked problems are those that are seemingly impossible to solve. This course examines complex and challenging societal problems, and how they might be addressed through the tools of entrepreneurship. This course will utilize numerous case studies and examples to illustrate problems and explore solutions. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1, or instructor approval.

ENTR 500. Individual Research in Entrepreneurship: ____. 1-5 Credits.
Individual study of selected topics in entrepreneurship not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Enrollment restricted.

ENTR 701. Building Entrepreneurial Competency. 3 Credits.
Build your entrepreneurial competency—a way of thinking about problem solving that can be applied across every industry and every type of organization. Topics may include opportunity recognition, opportunity feasibility, idea validation through experimentation, business model construction and learning from failure. Prerequisite: Accredited undergraduate degree.

ENTR 702. Entrepreneurial Finance. 3 Credits.
This course explores finance through an entrepreneurial lens – both from the perspective of the entrepreneur and from the investor, using numerous case studies and examples to illustrate topics. Topics may include designing revenue models, forms and stages of financing, capital structures for new ventures, and evaluating financial statements. Prerequisite: Accredited undergraduate degree.

**ENTR 703. Entrepreneurial Marketing. 3 Credits.**

An emerging business venture may have the most innovative technology or distinctive service offering, but if there are no customers, the venture is likely to fail. This course is about how a new venture gets, keeps, and grows customers to successfully build the business, often under the constraint of limited resources and a high degree of uncertainty. Prerequisite: Accredited undergraduate degree.

**ENTR 704. Launching Your Own Business. 3 Credits.**

This course provides the student with an opportunity to prepare a complete go-to-market business plan for a new venture which leverages the students’ major area of study so that following graduation the student has the option of pursuing self employment in the launch of their own business. The students’ expertise from their area of major study will be combined with the entrepreneurial skills acquired from the prior three courses in this Certificate sequence. Ideally, this course will originate from the students’ school of origin, either selected from a roster of existing qualifying courses or independent study with a faculty member in the students’ field of major study. In the event that the students’ school of major study cannot provide the teaching resources for independent study, it will be provided by the School of Business, Center for Entrepreneurship. If the faculty at the students’ school of origin wants to develop a specific course which completes the Certificate requirements, course preparation funding has been arranged via a grant from the Kauffman Foundation. Not open to students in the School of Business. Prerequisite: ENTR 703.

**ENTR 850. Advanced Entrepreneurship. 3 Credits.**

This course will focus on identifying and evaluating the business opportunity, the strategies to be developed and implemented as well as entrepreneurial capabilities required for marketplace success. Development of a robust and compelling business concept will be emphasized. Analyses of the industry, competition, the new business points of strategic leverage, creation of an effective business model and funding strategies will be studied. Financing the new venture, sourcing and structuring the required deal capital will be explored and attention to managing rapid growth and exit strategies will be provided.

**ENTR 895. Graduate Seminar Entrepreneurship: _____ 0.5-5 Credits.**

A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

**ENTR 898. Independent Study for Master’s Students. 1-6 Credits.**

Individual study of selected current problems in the field of entrepreneurship to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

**Courses**

**FIN 101. Personal Finance. 3 Credits.**

This course will provide the tools to help you better understand and improve the financial decisions you’ll make throughout your life. You will learn how to analyze the financial effects of spending and investing decisions and how to use credit well, including credit cards. You will develop an understanding of the basics of mortgages, purchase (buy) versus lease (rent) decisions, savings, investments, and insurance. You will acquire an appreciation of the time value of money that provides a foundation for reasonable financial planning. Given the basic tools and terminology you’ll learn, the course will help you develop solutions to various practical financial problems that you will face. Not open to students who have taken FIN 301. This course is open to all university students.

**FIN 208. Principles of Insurance and Risk Management. 3 Credits.**

This course provides an introduction to risk and insurance. Topics include an introduction to moral hazard and adverse selection. The identification and evaluation of risk are emphasized. Business and personal risk are considered, as well as the use of insurance as a risk management tool. Not open to students who have taken FIN 408 or Business School students.

**FIN 230. Introduction to the Finance Profession. 1 Credits.**

In this course, we introduce current Finance students to possible career opportunities in the profession. Students will have an opportunity to interact with current Finance professionals in multiple fields. We emphasize both current practice and projected industry trends and involve guest speakers. Note: Check with your Major to see which 230 course it requires (ACCT 230, BSAN 230, BUS 230, FIN 230, IST 230, MKTG 230 or SCM 230) and when it encourages you to take it. Prerequisite: BUS 210 or concurrent enrollment.

**FIN 301. Personal Finance. 3 Credits.**

This course will provide the tools to help you better understand and improve the financial decisions you’ll make throughout your life. You will learn how to analyze the financial effects of spending and investing decisions and how to use credit well, including credit cards. You will develop an understanding of the basics of mortgages, purchase (buy) versus lease (rent) decisions, savings, investments, and insurance. You will acquire an appreciation of the time value of money that provides a foundation for reasonable financial planning. Given the basic tools and terminology you’ll learn, the course will help you develop solutions to various practical financial problems that you will face. Not open to students who have taken FIN 101. This course is open to all university students.

**FIN 302. Finance Scholars I: Introduction to Financial Institutions. 1 Credits.**

This course acquaints students with the financial institutions. Topics include a review of major international, national, regional money center institutions, investment management and other related institutions. The management and key revenue generators for these institutions will also be discussed. Enrollment restricted.

**FIN 303. Finance Scholars II: Financial Careers and Institutions. 1 Credits.**

This course acquaints students with the careers in financial institutions. Topics include: careers in major international, national, and regional money center institutions; ethical issues related to financial careers; a comparison of recruiting practices in investment banks, investment management, and corporate finance positions. Placement and recruiting practices in those institutions would be reviewed. Enrollment restricted.

**FIN 304. Careers in Finance. 1 Credits.**

This course will introduce current Finance students to the possible career opportunities in the profession. Students will have the opportunity to interact with current Finance professionals in multiple fields. Emphasis is on current practice and projected industry trends. Prerequisite: FIN 310 or coenrollment in FIN 310.
FIN 305. Finance and Accounting. 3 Credits.
This course introduces students to the basics of financial accounting and financial decision making by business firms. Topics include analysis of financial statements to understand a firm's financial health and performance, valuation of securities, capital budgeting, risk and return, debt and equity financing, and the cost of capital. Not open to students with credit in BBA 306, FIN 310, or FIN 311. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1.

FIN 310. Finance. 3 Credits.
This course consists of the analysis of problems relating to estimating the financial needs of an enterprise and to evaluating the alternative means of providing and utilizing both temporary and permanent capital. The relationship of current financial decisions with financial policy is analyzed from the viewpoint of management and the stockholder. Prerequisite: Prior completion of ACCT 200; ECON 142 or ECON 143 and prior completion or co-enrollment in BSAN 202, DSCI 202 or DSCI 301.

FIN 311. Finance, Honors. 3 Credits.
Honors treatment of this course consists of the analysis of problems relating to estimating the financial needs of an enterprise and to evaluating the alternative means of providing and utilizing both temporary and permanent capital. The relationship of current financial decisions with financial policy is analyzed from the viewpoint of management and the stockholder. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: Prior completion of ACCT 200; ECON 142 or ECON 143 and prior completion or co-enrollment in BSAN 202, DSCI 202 or DSCI 301.

FIN 324. Enterprise Risk Management. 3 Credits.
Students are introduced to a holistic approach to risk management, with emphasis on hazard, operational, financial, and strategic risks. Best practices for risk planning, identification, analysis, treatment, and monitoring are explored. Guest-speakers from industry share their experiences and bring enterprise risk management concepts to life. Prerequisite: FIN 305.

FIN 400. Special Topics in Finance: ____. 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of finance topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

FIN 408. Principles of Insurance and Risk Management. 3 Credits.
This course provides an introduction to risk and insurance. Topics include an introduction to moral hazard and adverse selection. The identification and evaluation of risk are emphasized. Business and personal risk are considered, as well as the use of insurance as a risk management tool. Not open to students who have taken FIN 208. Enrollment restricted.

FIN 410. Investment Theory and Applications. 3 Credits.
This course emphasizes the theoretical and practical aspects of investments. Financial instruments such as common stocks, bonds, options, futures, and mutual funds are analyzed in a theoretical context using efficient market theory, capital market theory, option pricing, and stock valuation models. Experience in practical applications is generally obtained through the use of case studies. Prerequisite: FIN 310 or FIN 311. Enrollment restricted.

FIN 411. Investment Theory and Applications, Honors. 3 Credits.
Honors treatment of this course emphasizes the theoretical and practical aspects of investments. Financial instruments such as common stocks, bonds, options, futures, and mutual funds are analyzed in a theoretical context using efficient market theory, capital market theory, option pricing, and stock valuation models. Experience in practical applications is generally obtained through the use of case studies. Prerequisite: FIN 310 or FIN 311. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

FIN 413. Financial Markets and Intermediaries. 3 Credits.
Explores the financial institutions that create credit and liquidity for businesses and other borrowers, the financial instruments that facilitate credit and liquidity creation, and the markets in which those instruments are sold or traded. Special emphasis is paid to commercial banks, mortgage banks, insurance companies and investment banks are also discussed. Presents and analyzes the workings of money markets, bond markets, commercial loan markets, mortgage markets and foreign exchange markets. Throughout the course, the determination of interest rates, as well as the sources and implications of credit risk, liquidity risk and interest rate risk, are central to the discussion. The course closes with an introduction to risk management at financial intermediaries using on-balance sheet (e.g., loan underwriting, asset-liability management) and off-balance sheet (e.g., asset securitization, interest rate, foreign exchange and credit derivatives) tools. Prerequisite: FIN 310 or FIN 311. Enrollment restricted.

FIN 414. Financial Markets and Intermediaries, Honors. 3 Credits.
Honors treatment of this course explores the financial institutions that create credit and liquidity for businesses and other borrowers, the financial instruments that facilitate credit and liquidity creation, and the markets in which those instruments are sold or traded. Special emphasis is paid to commercial banks, but non-depository intermediaries such as finance companies, mortgage banks, insurance companies and investment banks are also discussed. Presents and analyzes the workings of money markets, bond markets, commercial loan markets, mortgage markets and foreign exchange markets. Throughout the course, the determination of interest rates, as well as the sources and implications of credit risk, liquidity risk and interest rate risk, are central to the discussion. The course closes with an introduction to risk management at financial intermediaries using on-balance sheet (e.g., loan underwriting, asset-liability management) and off-balance sheet (e.g., asset securitization, interest rate, foreign exchange and credit derivatives) tools. Prerequisite: FIN 310 or FIN 311. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

FIN 415. Corporate Finance. 3 Credits.
Building on the concepts of present value, the focus of this course is on the theory of and methods for corporate asset selection. The course includes coverage of important technical issues such as risk analysis, evaluation of mutually exclusive projects, capital rationing, and leasing. Some attention usually will be devoted to the topic of project financing. Prerequisite: FIN 310 or FIN 311. Enrollment restricted.

FIN 416. Corporate Finance, Honors. 3 Credits.
Honors treatment of this course builds on the concepts of present value. The focus of this course is on the theory of and methods for corporate asset selection. The course includes coverage of important technical issues such as risk analysis, evaluation of mutually exclusive projects, capital rationing, and leasing. Some attention usually will be devoted to the topic of project financing. Prerequisite: FIN 310 or FIN 311. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

FIN 420. International Finance. 3 Credits.
The economic determinants of exchange rates are discussed. This is followed by an examination of the financing problems faced by the multinational corporation and the international portfolio manager, arising from the international nature of their environment. Topics include spot,
forward, futures, and options markets in foreign currency, international risk management, purchasing power parity, interest rate parity, covered interest arbitrage, and contemporary issues in international financial management. Prerequisite: FIN 413 or FIN 414. Enrollment restricted.

FIN 421. International Finance, Honors. 3 Credits.
Honors treatment of this course consists of the discussion of economic determinants of exchange rates. This is followed by an examination of the financing problems faced by the multinational corporation and the international portfolio manager, arising from the international nature of their environment. Topics include spot, forward, futures, and options markets in foreign currency, international risk management, purchasing power parity, interest rate parity, covered interest arbitrage, and contemporary issues in international financial management. Prerequisite: FIN 413 or FIN 414. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Enrollment restricted.

FIN 422. Financial Modeling. 3 Credits.
This course is designed to develop practical financial modeling skills. Students will build financial models in Excel using actual case studies, current methodologies, best practices, and sensitivity analyses. The course will give an in-depth understanding of financial statement modeling, DCF, trading comps, and transaction comps modeling. Prerequisite: FIN 310 or FIN 311. Enrollment restricted.

FIN 424. Operational Risk Management. 3 Credits.
This course explores real and financial risks faced by businesses and the management of those risks. Topics include risk identification, risk evaluation, and the management of risk through the use of insurance. Prerequisite: FIN 310.

FIN 425. Futures and Options. 3 Credits.
This course examines the use of forwards, futures, swaps, options, and related financial derivatives for hedging, arbitrage, and speculative purposes in the global environment. The course focuses on understanding how firms can manage interest rate risk, exchange rate risk, and commodity price risk using these derivatives. The emphasis is on understanding the motivation and the techniques behind financial engineering with these derivatives, as practiced by firms and individuals to maximize value in global markets. Prerequisite: FIN 410 or FIN 411. Enrollment restricted.

FIN 426. Real Estate Investment. 3 Credits.
Students study real estate as an investment asset class. Students first study home pricing, mortgage financing, the buy-versus-rent decision, and other aspects of residential real estate. Then students study investment fundamentals of income-producing commercial property segments (multifamily, office, industrial, and retail). Students apply economic concepts and analytical models for valuing income-producing properties. Finally, students investigate investment vehicles for portfolio investment in real estate such as REITs, real estate-sensitive industrial sectors, mutual funds, and ETFs. (Not open to students with credit in FIN 400: Real Estate Investment.) Prerequisite: FIN 413 or FIN 414. Enrollment restricted.

FIN 435. Commercial Banking. 3 Credits.
An in-depth study of commercial banking. The primary focus is the value maximization of the bank, given the legal, technological, economic, and competitive constraints facing bank managers. A second focus is the central role played by commercial banks in financing small, middle-market, and large businesses. The course emphasizes bank investment decisions (e.g., underwriting loans), financing decisions (generating deposits, capital adequacy), risk-management decisions (loan portfolio diversification, managing credit risk and liquidity, hedging interest rate risk), bank business strategies, and the government regulations under which banks must operate. Prerequisite: FIN 413 or FIN 414. Enrollment restricted.

FIN 445. Fixed Income. 3 Credits.
This course is an introduction to bond markets and bond derivatives. Bonds and associated financial derivatives include securities that promise a fixed income stream and by extension all securities whose valuation and hedging are related to interest rates. The objective of this course is to provide students with a guide to financial markets, institutions and instruments associated with debt funds and help them to understand the determinants of the general level and structure of interest rates. The focus of this course is on the concepts and tools that are useful to understand and interpret real world issues related to debt markets. Prerequisite: FIN 410 or FIN 411 and FIN 413 or FIN 414. Enrollment restricted.

FIN 448. Business Valuation. 3 Credits.
Apply finance principles to measure and manage the value of companies using a professional's step-by-step approach. In this course, students estimate free cash flows, economic value added, and cost of capital. They also forecast accounting statements, compare absolute and relative valuation techniques, and evaluate restructuring opportunities and potential flexibility options. Prerequisite: FIN 415 or FIN 416. Corequisite: ACCT 321 or ACCT 410 or ACCT 411. Enrollment restricted.

FIN 450. Applied Portfolio Management, Honors. 4 Credits.
Honors treatment of this course provides the student with practical portfolio experience. Students actually and collectively manage funds in an endowed account of the benefit of the University and the School of Business. Experienced instructors, speakers, and financial analysts from Wall Street give the class a hands-on real life experience in analyzing and managing securities. The student will be familiarized with many different applied valuation procedures such as cash flows and growth models in an event driven context, as well as market capitalization techniques. Individual securities and stock options are analyzed on a continuing basis. Prerequisite: FIN 410 or FIN 411. Enrollment by application only.

FIN 454. Portfolio Strategy. 3 Credits.
Investors construct portfolios by choosing allocations across asset classes and by selecting funds or managers within each asset class. This course will (1) examine methods to forecast return and risk across asset classes, including fixed income, equities, real assets, venture capital, buyouts, and hedge fund strategies, (2) describe ways to evaluate the performance of fund managers relative to appropriate benchmarks, and (3) consider optimal allocations among fund managers in various asset classes. Prerequisite: FIN 410 or FIN 411. Enrollment restricted.

FIN 455. Commercial Credit Analysis. 3 Credits.
In this course, students will learn about the assessment of a company's creditworthiness, loan terms, structuring of loan contracts, loan monitoring, and problem-loan management in the context of commercial lending. Students will also receive an introduction to credit risk modeling. Prerequisite: FIN 415 or FIN 416.

FIN 462. Mergers and Acquisitions. 3 Credits.
This is a course about corporate "deals" - corporate transactions that change who owns a business or who controls it. Naturally, the course covers classical mergers and acquisitions, including the financial, strategic and regulatory issues. However, it also covers corporate governance and control, IPO's (initial public offerings), financial distress, and venture capital and private equity. Finally, deals require deal-makers - the investment bankers. We'll touch on aspects of investment banking, an industry that majors in finance and MBA's often work in or have contact with. Prerequisite: FIN 415 or FIN 416. Enrollment restricted.

FIN 466. Entrepreneurial Finance. 3 Credits.
The entrepreneurial finance course will focus on valuing and financing young high-growth potential private companies (start-ups). The objective is for the students to learn how to make investment and financing decisions (and how to distinguish good from bad investments) in an environment characterized by very high degrees of uncertainty and information asymmetry. We will address this topic from two distinct perspectives: the perspective of users (entrepreneurs) and suppliers (venture capitalists and other private equity investors) of capital. In the beginning of the semester we will first take the perspective of the individual entrepreneur (or manager). We will focus on identifying good ideas (evaluating projects using different valuation techniques), separating them from bad ideas, and placing a quantitative value on these opportunities. This part will review different valuation methods used to value start-up companies. We will also deal with issues such as forecasting cash flows of a start-up firm and ways to grow the firm using internal resources. Then we will turn our attention to the next step in the entrepreneurial process - raising capital to take advantage of good opportunities. Specifically we will consider venture capital (independent venture capitalists, angels, and corporate venture capitalists) as a source of financing for start-ups. This part will provide overview of the venture capital industry (players, organizational forms, contracting) and introduce students to the challenges of structuring venture capital deals. In addition, we will cover other ways of raising capital to aid the growth of the entrepreneurial firm. The focus will be on the private debt market as well as other alternative sources of financing for start-up firms (SBA loans, SBICs, mezzanine financing, L/Cs, etc.). Finally, we will study the ways to harvest the ventures (IPOs, acquisitions, LBOs). Prerequisite: FIN 415 or FIN 416. Enrollment restricted.

FIN 468. Corporate Financial Policy. 3 Credits.
The course will have three primary objectives. First, students will review basic valuation methods, including instruction on the location of relevant resources. Some advanced valuation techniques will be examined, e.g., APV, multiples and capital cash flow. Finally, students will work to apply these techniques to particular corporate financial decisions. Prerequisite: FIN 415 or FIN 416. Enrollment restricted.

FIN 492. Honors Topics and Problems in Finance: ____. 1-5 Credits.
This honors topics seminar is open only to students meeting the requirements established by faculty members offering the course. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

FIN 500. Individual Research in Finance. 1-5 Credits.
Individual study of selected topics in finance not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: Approval of proposed plan of study by the instructor. Enrollment restricted.

FIN 600. Advanced Portfolio Management. 3 Credits.
This course is designed to give students increased practical portfolio experience. Students actually and collectively manage funds in an endowment account of the benefit of the University and the School of Business. Students will analyze portfolio decisions and determine the risk/reward profile of the portfolio. The student will apply many different valuation models to current and potential equity holdings in the portfolio. Individual securities and stock options are analyzed on a continuing basis. Enrollment restricted.

FIN 701. Finance. 3 Credits.
This course provides an overview of the challenges associated with the financial management of firms. The focus is on the practices followed by managers in raising and investing capital so as to maximize value. Topics include cash planning, working capital management, operating and financial risks, valuation of real and financial assets, and the cost of capital. Prerequisite: ACCT 701 or ACCT 706.

FIN 702. Business Finance for Supply Chain Management. 3 Credits.
This course provides an overview of the challenges associated with the financial management of firms. The focus is on the practices followed by managers in raising and investing capital so as to maximize value. Topics include cash planning, working capital management, operating and financial risks, valuation of real and financial assets, and the cost of capital. Prerequisite: ACCT 706.

FIN 706. Finance. 3 Credits.
This course provides an overview of the challenges associated with the financial management of firms. The focus is on the practices followed by managers in raising and investing capital so as to maximize value. Topics include cash planning, working capital management, operating and financial risks, valuation of real and financial assets, and the cost of capital. Prerequisite: ACCT 706.

FIN 710. Investments I. 3 Credits.
This course covers financial instruments and markets used by investment professionals and the key concepts used in the construction and management of equity portfolios. Emphasis is placed on understanding and managing investment risk, on the concept of market efficiency, and the role of financial markets and institutions in shaping the investment environment. Topics include financial instruments; financial markets and institutions; risk and return; portfolio optimization; asset pricing models; and behavioral finance. Prerequisite: FIN 701. Enrollment restricted.

FIN 711. Investments II. 2 Credits.
This course covers bonds, bond markets, options, futures, and derivative securities. Emphasis is placed on the features, risks and valuation of fixed income and derivative securities. Topics include types of bonds and bond terminology; valuation of bonds; derivatives including options, futures and swaps; and risk, return and diversification. Prerequisite: FIN 710. Enrollment restricted.

FIN 712. Business Investment. 2 Credits.
This course examines the tools for assessing the value of projects and capital investments, and the use of these tools in financial decision-making in public and private corporations. Topics to be covered include estimating the cost of capital, computing and discounting projected cash flows, capital budgeting, real options, and the intersection between business investment and strategy. Prerequisite: FIN 701. Enrollment restricted.

FIN 713. Business Financing. 2 Credits.
This course examines how firms finance their projects and investments, and how those corporate financing decisions impact firm value. Topics covered include capital structure, payout policy, security issuance, mergers and acquisitions, and corporate governance. Prerequisite: FIN 712. Enrollment restricted.

FIN 720. Advanced Investments. 2 Credits.
This course covers asset pricing models used by investment professionals to evaluate the performance of actively managed portfolios, such as mutual funds and hedge funds. Emphasis is placed on understanding managerial risk-taking and risk-adjusted performance. Topics include the Capital Asset Pricing Model (CAPM); multi-factor models; statistical analysis of portfolio returns; benchmark portfolios; the risk and assessment of portfolio performance; and the theory of active portfolio management. Prerequisite: FIN 711. Enrollment restricted.

FIN 724. Operational Risk Management. 3 Credits.
This course explores real and financial risks faced by businesses and the management of those risks. Topics include risk identification, risk
evaluation, and the management of risk through the use of insurance. Prerequisite: FIN 701.

FIN 725. Business Valuation. 2 Credits.
This course applies finance principles to measure and manage the company value. In this course students estimate free cash flows, economic value added, and cost of capital. They forecast accounting statements and compare absolute and relative valuation techniques. Prerequisite: FIN 701 or ACCT 810 and ACCT 720. Enrollment restricted.

FIN 726. Financial Statement Analysis. 2 Credits.
This course covers topics in financial accounting and financial statement analysis. Accounting topics are taught from an external decision-maker's perspective. The course is intended to help students read and understand complex financial statements, and to extract key financial information from a mass of detail. Topics will vary over time but can include analyses of cash flows, quality and persistence of earnings, income recognition, restructuring, other special charges and off-balance sheet financing. Prerequisite: ACCT 701 or ACCT 810. Not open to MAcc students or students with credit in ACCT 320, ACCT 410, ACCT 721, or ACCT 722. Enrollment Restricted.

FIN 728. Fair Valuation. 3 Credits.
Apply finance principles to value entire businesses as well as their assets and liabilities, primarily based on financial reporting and tax accounting standards. The course begins with conducting valuation research, reorganizing financial statements, and interpreting financial ratios. Then values are estimated using the income (discounted cash flow) method, the market (multiples) method, and the asset (adjusted cost) method. In addition, the valuations of typical intangible assets including goodwill are addressed, and option valuation techniques for contingent items are introduced. The course also examines discounts for lack of control and for lack of marketability. Prerequisite: FIN 310 or FIN 701 or equivalent.

FIN 735. International Finance. 2 Credits.
Markets for foreign exchange and foreign exchange derivatives are examined. This is followed by an exploration of financial decisions faced by multinational corporations and international portfolio managers, and how such decisions are affected by global economics conditions and various international risk factors. Topics can include managing foreign exchange exposure, financing the global firm, foreign direct investment and political risk, multinational capital budgeting, and international portfolio theory and diversification. Prerequisite: FIN 701 or ACCT 810. Enrollment restricted.

FIN 749. Advanced Topics in Finance: _____ 3 Credits.
A variable-topic course open only to graduate students in the Working Professional MBA program. Finance Topics can include derivatives and risk management, alternative investment strategy, entrepreneurial finance, fixed income, real estate finance, or other similar topics in finance, investments or valuation.

FIN 751. Corporate Finance. 3 Credits.
This course explores how businesses evaluate investment opportunities, deploy capital to enhance firm value, and raise capital to support business investment and growth. Principal objectives include: understanding the application of discounted cash flow techniques to evaluate investment opportunities and potential acquisitions; understanding alternative valuation techniques and their use in the analysis of real options; understanding how both young and mature firms raise capital from financiers and financial markets, as well as the factors that affect how firms choose to raise capital; and understanding the interaction between a firm's financing structure and its investment and payout policies. Topics include discounted cash flow techniques, real options analysis, capital structure, dividend payout policy, security issuance, mergers and acquisitions, and corporate governance. Prerequisite: FIN 706 or equivalent.

FIN 752. Financial Institutions and Markets. 3 Credits.
This course explores the financial institutions that create credit and liquidity for businesses and other borrowers, the financial instruments that facilitate credit and liquidity creation, and the markets in which those instruments are sold or traded. Current issues in conjunction with historical and evolutionary developments are a hallmark of this course. Throughout the course, the determination of interest rates, as well as the sources and implications of credit risk, liquidity risk and interest rate risk, are central to the discussion. The course closes with an introduction to risk management at financial intermediaries using on-balance sheet (e.g., loan underwriting, asset-liability management) and off-balance sheet (e.g., asset securitization, interest rate and credit derivatives) tools. Prerequisite: FIN 706 or equivalent.

FIN 753. Investments. 3 Credits.
This course introduces theoretical concepts and analytical tools essential to investment management by individual investors and portfolio managers. The goal of this class is to provide a structure to address investment problems in a systematic manner. Topics include security risk and return; portfolio theory; valuation of financial instruments such as bonds, common stocks, and options; asset allocation; and performance evaluation of portfolios and portfolio managers. Prerequisite: FIN 706 or equivalent.

FIN 754. Advanced Topics in Finance. 3 Credits.
A variable-topic course open only to graduate students who have completed the Foundations and Pillar certificate courses. Topics can include international finance, derivatives and risk management, alternative investment strategy, entrepreneurial finance, fixed income, real estate finance, or other similar topics in finance, investments or valuation. Prerequisite: FIN 706 or equivalent.

FIN 808. Principles of Insurance and Risk Management. 3 Credits.
This course provides an introduction to risk and insurance. Topics include an introduction to moral hazard and adverse selection. The identification and evaluation of risk are emphasized. Business and personal risk are considered, as well as the use of insurance as a risk management tool.

FIN 810. Financial Management. 3 Credits.
This course provides an overview of the problems associated with the financial management of business firms. The focus is on the practices followed by managers in raising and investing capital so as to maximize value. Prerequisite: ACCT 810.

FIN 820. Macroeconomics and Financial Markets. 3 Credits.
This course explores the national and global macro economies and the influence of financial markets on decision-making by firms and individuals. Understanding, analyzing, and forecasting economic indicators are key aspects of this course. The objectives of this course are to understand economic indicators and observe their impacts on national and global economies, to appreciate how financial markets aggregate economic information into interest rates and securities prices and thus influence decision-making by firms and individuals, to use data to construct forward-looking economic models, to understand and use economic indicators in short-run business decision-making and long-run business planning, and to appreciate how government policies can enhance or impair the functioning of markets and the behavior of firms and individuals. Topics in the course include economic growth, employment and labor markets, inflation, exchange rates, monetary policy, fiscal policy, capital markets, credit markets, economic indicators, trend analysis and forecasts, the language of the economics, and the financial press. This course is open
only to students in the full-time MBA program. Prerequisite: ACCT 810 and FIN 810. This course is only open to Full Time MBA Students.

FIN 821. Corporate Finance. 3 Credits.
This course explores how businesses evaluate investment opportunities and deploy capital to enhance firm value. Principal objectives include identification of incremental cash flows and growth options generated by business investment, application of discounted cash flow techniques to evaluate investment opportunities and firms, understanding of alternative valuation techniques and their use in the analysis of real options, understanding interactions between a firm's financing structure and its investment policies, and identification of managerial incentives and how a firm's governance structure affects investment policy and firm valuation. Topics include incremental cash flow identification, discounted cash flow techniques, real options analysis, leverage, cost of capital, corporate governance. Prerequisite: ACCT 810 and FIN 810. This course is open only to students in the full-time MBA program.

FIN 824. Operational Risk Management. 3 Credits.
This course explores real and financial risks faced by businesses and the management of those risks. Topics include risk identification, risk evaluation, and the management of risk through the use of insurance. Prerequisite: FIN 810.

FIN 830. Investments. 3 Credits.
This course introduces theoretical concepts and analytical tools essential to investment management by individual investors and portfolio managers. The goal of this class is to provide MBA students with a structure to address investment problems in a systematic manner. Topics include factors that affect security risk and return, portfolio theory, valuation and selection of financial instruments such as bonds, common stocks, and options, asset allocation in a portfolio framework, and performance evaluation of portfolios and portfolio managers. Principal objectives are to apply financial theory and develop analytical models that explain security risk and return in a portfolio framework, to explain risks and returns associated with alternative asset allocation strategies, to evaluate the performance of portfolios and portfolio managers, and to value securities such as bonds, stocks, and options. Prerequisite: FIN 810. This course is open only to students in the full-time MBA program.

FIN 831. Financing Business Growth. 3 Credits.
This course evaluates alternative means of financing business operations and capital investment. The principal objectives are to evaluate the effects of alternative financial structures on a firm's risk, cost of capital, and valuation; to understand how young entrepreneurial firms raise capital from financiers and financial markets, including sources such as angel investors, bank loans, venture capital, private equity, and initial public offerings; to understand how mature firms raise capital via seasoned equity issuance, corporate bonds, and leases, and how financial terms affect mergers and acquisitions, and to appreciate how firms engage in financial restructuring, including bankruptcy, subsequent to financial distress. Topics include leverage and financial risk, venture capital, private equity, public equity, bond financing, leasing, financial distress. Prerequisite: FIN 810. This course is open only to students in the full-time MBA program.

FIN 832. Derivatives and Risk Management. 3 Credits.
This course focuses on understanding how firms manage interest rate risk, exchange rate risk, and commodity price risk using derivative instruments such as forwards, futures, swaps, and options. The emphasis is on the motivation, issues, and techniques behind financial engineering with these derivatives, as practiced by firms and individuals to maximize value in global markets. The principal objectives are to identify sources of risk to businesses and financial institutions, including commodity price risk, interest rate risk, and exchange rate risk; to understand institutional features and pricing of derivative instruments such as forwards, futures, swaps, and options; to use derivative instruments and other risk management tools to hedge financial and operational risks for both financial and non-financial firms and to appreciate the limitations of risk management and hazards such as "model risk" and counterparty risk. Topics include financial and operating risk assessment; valuation of forwards, futures, swaps, and options; use of derivative instruments and other risk management tools to hedge financial and operational risk; limitations and hazards of risk management. Prerequisite: FIN 810. This course is open only to students in the full-time MBA program.

FIN 840. Applied Portfolio Management. 4 Credits.
This course provides the student with practical portfolio experience. Students actually and collectively manage funds in an endowment account for the benefit of the University and the School of Business. Experienced instructors, speakers, and financial analysts from Wall Street give the class a hands-on real life experience in analyzing and managing securities. The student will be familiarized with many different applied valuation procedures such as cash flows and growth models in an event driven context, as well as market capitalization techniques. Individual securities and stock options are analyzed on a continuing basis for inclusion or exclusion in the portfolio. Prerequisite: FIN 410 or FIN 411 or FIN 810 or ACCT 810. Enrollment by application only.

FIN 898. Independent Study for Master's Students. 1-6 Credits.
Individual study of selected current problems in the field of finance to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

FIN 901. Current Research in Finance. 2 Credits.
This course provides a seminar format for a discussion of the currently prevalent research topics, methods, and problems being addressed in the area of finance. All first year PhD students in finance will enroll in this course their first semester in the doctoral program.

FIN 937. Seminar in Business Finance. 3 Credits.
This course is designed to develop the students' analytical abilities. Course material is of a theoretical and empirical nature. Advanced topics in financial management of business firms are covered. Special emphasis is given to long-term financing topics. Prerequisite: Admitted to the Business Ph.D. program.

FIN 938. Seminar in Investments. 3 Credits.
A study of advanced topics in investments, capital markets, and portfolio theory. Special emphasis is given to the theory of efficient markets. The course is designed to cover recent analytical and empirical literature in the investment area. Prerequisite: Must be admitted to the Business Ph.D. program.

FIN 939. Seminar in Financial Institutions. 3 Credits.
A survey of the academic literature in financial institutions. The reading list will vary depending on the instructor. May include both seminal theoretical papers and/or recent empirical studies on the role and importance of financial institutions in market economies. Prerequisite: Consent of Instructor.

FIN 995. Doctoral Seminar in Finance: 2-5 Credits.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

FIN 998. Independent Study for Doctoral Students. 1-5 Credits.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team.

FIN 999. Doctoral Dissertation. 1-12 Credits.
(V) Individual research work. Graded on a satisfactory progress/limited progress/no progress basis.

Courses

IBUS 300. Special Topics in International Business: _____. 1-5 Credits.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of international business topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor.

IBUS 400. Special Topics in International Business: _____. 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of international business topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

IBUS 410. Introduction to International Business. 3 Credits.
This course provides an overview of the international business environment and explores its implications for firms and managers. Students will analyze the political, economic, legal and socio-cultural forces that shape the conduct of business in and across divergent cultural and institutional settings and examines theories and trends in international trade and investment from the perspective of a manager doing business across borders. Not open to students with credit in BBA 307. Prerequisite: ECON 144 or ECON 145. Enrollment restricted or permission of the instructor.

IBUS 415. Business in Latin America. 3 Credits.
This course analyzes the unique aspects of the Latin American business environment and the major managerial issues that are likely to confront firms and individuals doing business in the region. The first part of the course develops analytic skills for assessing country environments. The second part of the course focuses on making corporate and managerial decisions in the Latin American context. Prerequisite: Corequisite: IBUS 410 or permission of the instructor. Enrollment restricted.

IBUS 425. Business in China. 3 Credits.
This course analyzes the unique aspects of the Chinese business environment and the major managerial issues that are likely to confront firms and individuals doing business in the country. The first part of the course develops knowledge about the country and skills for assessing it as a place for business. The second part of the course focuses on the performance of key management functions in the Chinese context such as marketing, finance, supply chain and human resource management. Prerequisite: Corequisite: IBUS 410 or permission of the instructor. Enrollment restricted.

IBUS 462. Comparative and Cross-Cultural Management. 3 Credits.
This course examines in depth how culture, in all its aspects, is the major determinant of successful organizational performance and management practices in the global workplace. This is accomplished by comparing and contrasting various cultural norms and values, and demonstrating how those differences impact business in the areas of communication (verbal and nonverbal), relationship building, the role of the manager, the functioning of teams and group dynamics, negotiation, conflict resolution, and decision making. Students will also examine the influences of culture on legal and governmental considerations in business, organization structures and corporate culture. The basis for cultural norms and comparisons used in this course are drawn from all areas of the world. The emphasis is on developing the awareness and skills necessary for managing multicultural diversity in both domestic and international settings. Prerequisite: Corequisite: MGMT 310 or MGMT 311 or permission of the instructor. Enrollment restricted.

IBUS 480. International Management. 3 Credits.
This course provides an overview of the essential managerial issues that firms and individuals will confront and must master to successfully operate in the international business setting. This is accomplished by introducing the student to an array of practical concepts, analytical frameworks and vital managerial techniques that will be useful to the international manager. Specific topics covered include the role of culture in global business, ethics and social responsibility in a multicultural setting, strategic development and organizational structure models for multinational operations, methods for analyzing and evaluating potential foreign markets and modes for foreign market entry. Also covered is the impact of a global scope of operations on basic management functions including marketing, finance, and human resource management. Not open to students with credit in BBA 307. Prerequisite: Corequisite: MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and FIN 310 or FIN 311 or permission of the instructor. Enrollment restricted.

IBUS 500. Individual Research in International Business. 1-5 Credits.
Individual study of selected topics in international business not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted.

IBUS 701. International Business. 3 Credits.
This course aims to provide an understanding of the basic concepts, institutions, and practices of international business, and their implications for business decision making. Topics include the causes and consequences of globalization, the political, economic, legal and socio-cultural differences across countries, and the institutional arrangements governing cross-border flows of trade, investment and intellectual property. Enrollment restricted.

IBUS 718. International Business. 3 Credits.
This course examines the basic concepts, institutions, and practices of international business, and their implications for business decision-making. The main objectives of this course include developing an understanding of cross-national differences in political, economic, legal, and socio-cultural systems. The course will place special emphasis on understanding the unique institutions of emerging economies and their implications for doing business in these countries, and the effects of differences in culture on the practice of management in different parts of the world. Topics include the principal theories of national decision policies on, and international institutional arrangements for international trade and foreign direct investment. The course will examine the key factors affecting a firm’s foreign market entry decisions.

IBUS 730. International Business Strategy. 2 Credits.
This course examines the important managerial issues arising from a firm's expansion into the international arena and introduces analytical frameworks and management techniques that are essential for an international manager. Specific topics covered include foreign market
entry decisions, strategies and organizational structures for managing a multinational corporation, and management of various functional areas (such as production, marketing, finance and human resources) in an international setting. Prerequisite: MGMT 704 and IBUS 701 or IBUS 820. Enrollment restricted.

IBUS 731. Comparative and Cross-Cultural Management. 2 Credits.

This course explores how culture, in all of its aspects, is a major determinant of organizational practices and performance. We analyze how and why organizational communication and practices vary from one culture to another, as well as why certain values and cultural contexts might make particular management styles more successful than others. Finally, we will investigate the possibilities for transferring certain practices between cultures. Prerequisite: IBUS 701 or IBUS 820. Enrollment restricted.

IBUS 740. Business Practices in China. 3 Credits.

This course provides students an opportunity to learn about business in China by observing it in practice. Students will travel to China to visit a variety of companies and meet with their managers to learn about the unique opportunities and challenges faced by companies operating in China. Company visits will be selected to include both manufacturing and services firms and to reflect a variety of ownership structures (foreign subsidiaries, locally-owned companies, joint-ventures, etc.). Lectures from faculty at a Chinese host institution will provide specific information on the local business environment and cultural, historical and institutional context. Prerequisite: IBUS 701 or IBUS 718 or IBUS 820. Enrollment restricted.

IBUS 741. Business Practices in Latin America. 2 Credits.

This course provides students an opportunity to learn about business in Latin America by observing it in practice. Students will travel to a Latin American country to visit a variety of companies and meet with their managers to learn about the unique opportunities and challenges faced by companies operating in Latin America. Company visits will be selected to include both manufacturing and services firms and to reflect a variety of ownership structures (foreign subsidiaries, locally-owned companies, joint-ventures, etc.). Lectures from faculty at a Latin American host institution will provide specific information on the local business environment and cultural, historical and institutional context. Prerequisite: IBUS 701 or IBUS 820 and IBUS 721. (Please note: This course involves travel abroad and required PRIOR completion of both IBUS 701 and IBUS 721.) Enrollment restricted.

IBUS 820. International Business. 3 Credits.

This course aims to provide an understanding of the basic concepts, institutions, and practices of international business, and their implications for business decision making. The main objectives of this course include developing an understanding of cross-national differences in political, economic, legal and socio-cultural systems. The course will place special emphasis on understanding the unique institutions of emerging economies and their implications for doing business in these countries, and the effects of differences in culture on the practice of managements in different parts of the world. Topics include the principal theories of, government policies on, and international institutional arrangements for international trade and foreign direct investment. The course will examine the key factors affecting a firm’s foreign market entry decisions. Students will apply these theories to the analysis of a country’s business environment and the formulation of international business decisions. This course is open only to students in the full-time MBA program.

IBUS 895. Graduate Seminar in International Business: ____. 0.5-5 Credits.

A variable-topic seminar opens only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted.

IBUS 898. Independent Study for Master’s Students. 1-6 Credits.

Individual study of selected current problems in the field of business management to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

Courses

IST 204. Excel Essentials for Business. 1 Credits.

This course focuses on the fundamental Excel functions and tools that are used by business professionals. Students will be exposed to a wide variety of Excel features such as data tables, formulas and functions, and charts. After learning about these essential Excel topics, students will apply their knowledge of Excel by solving many different business problems. This course covers material that must be mastered in order to pass the Microsoft Excel Specialist® exam. Not open to students who are concurrently enrolled or have credit in IST 310 or IST 321. Graded on a satisfactory/unsatisfactory basis.

IST 205. Survey of Information Systems. 3 Credits.

This course focuses on the use of information systems in business. Topics will include components of information systems, types of information systems, development of information systems, and uses and benefits of information systems. Relevant technology issues such as security, privacy and ethics will also be introduced. In addition to content on information systems, the course will cover the basic principles of Microsoft Office. (Not open to students with credit in IST 202 or 301.)

IST 230. Introduction to Business Analytics, Information Systems, and Supply Chain Management Professions. 1 Credits.

In this course, we focus on the Business Analytics, Information Systems, and Supply Chain Management professions and cover a variety of topics. Topics include, but are not limited to, career opportunities; the importance of professional mentorship; professional membership with groups/associations; appropriate industry certifications; graduate education content, timing, and opportunities; the role of career broadening experiences; and ethical dilemmas within the professions. We emphasize both current practice and projected industry trends and involve guest speakers. This course is cross-listed with IST 230 and SCM 230. Check with your Major to see which 230 course it requires or recommends (ACCT 230, BSAN 230, BUS 230, FIN 230, IST 230, MKTG 230 or SCM 230) and when it encourages you to take it. (Same as BSAN 230 and SCM 230.) Prerequisite: BUS 210 or concurrent enrollment.

IST 310. Introduction to Information & Management Productivity Systems. 3 Credits.

This course introduces essential components of information systems and examines how information systems provide the foundation for modern businesses. Additionally, the course introduces the analysis of business data and solving business problems with spreadsheet software. The course also focuses on the role of information systems in facilitating digital transformation by leveraging information technology and data. Students are expected to master intermediate and advanced spreadsheet skills such as logical functions, PivotTables, and macros. Students must bring a portable computing device that runs the most current full version of Microsoft Excel that is available for free from KU to every class session. Prerequisite: ACCT 200.

IST 312. Information Systems for Managers. 3 Credits.
This course provides an overview of how to understand, analyze, and design computerized information systems, and is designed to provide the computer tools and knowledge so that today’s business student will be tomorrow’s successful and complete manager and/or consultant. The topics covered in this course include computer technology, internal control in a computer environment, strategic information systems planning, systems analysis and design, database systems, networking, and various software packages. This course will count as an advanced business elective. Not open to students with credit in ACCT 311. Prerequisite: ACCT 201 and IST 202 or IST 301. Enrollment restricted.

**IST 320. Fundamentals of Software Development. 3 Credits.**
This course provides an introduction to software development concepts and techniques. Students will develop an understanding of the software development process through hands-on programming assignments and projects. The course emphasizes problem solving, initiative, and teamwork within an information systems framework. Not open to students with credit in BSAN 320. Prerequisite: Corequisite: IST 202 or BSAN 310 and IST 310. Enrollment restricted.

**IST 325. Systems Analysis and Design. 3 Credits.**
This will take students through the entire systems development life cycle from the first contact with a customer through analysis and design to the implementation of the customer’s system. It will introduce the student to the field of systems analysis and design, basic systems analysis tools, and the procedures for conducting systems analysis. Topics covered will include the role of the systems analyst in the organization, concepts, philosophies and trends in systems analysis and design, and tools and techniques for such analysis. Not open to students with credit in BSAN 325. Prerequisite: IST 202 or BSAN 310. Enrollment restricted.

**IST 326. Database Management Systems. 3 Credits.**
This course introduces the fundamental concepts and implementation of the database development process and relational database systems. The student will be exposed to database development issues, SQL methodology, and entity-relationship models. Not open to students with credit in BSAN 326 or IST 326. (Same as BSAN 326.) Prerequisite: Corequisite: IST 202 or BSAN 310 and IST 310. Enrollment restricted.

**IST 330. Fundamentals of Business Computer Networking. 3 Credits.**
This course introduces business students to the terms and concepts of networking in the business environment. This course balances practical application and network theory. It examines common architecture models, transmission media, network topologies, and protocols in both local area network (LAN) and wide area network (WAN) environments. The course also delves into the operating characteristics of the Internet and various applicable protocol suites. Conceptual learning is supported by team exercises and projects. Prerequisite: IST 202 or BSAN 310. Corequisite: IST 320. Enrollment restricted.

**IST 400. Special Topics in Information Systems Technology: . 1-5 Credits.**
This is a variable-topic seminar. Its purpose is to allow the occasional offering of information systems technology topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

**IST 401. Management of Integrated Information Systems/ERP. 3 Credits.**
This course provides an introduction to Enterprise resource planning (ERP) systems. We explore process integration of business-wide functions (controlling, production planning, demand management, sales and distribution) as required and supported by ERP implementations. The objectives of the course include: (1) understanding processes and data needs of different business functions; (2) understanding alternative information systems solutions and the challenges of independent information systems and; (3) understanding ERP systems as solutions to business process integration. Not open to students with credit in SCM 404. Prerequisite: IST 202 or BSAN 310. Enrollment restricted.

**IST 405. Contemporary Information Technology Topics. 3 Credits.**
This course examines a wide range of innovative information technologies (IT) which have both technical and strategic implications for businesses. These IT innovations affect all functions of businesses. Topics include Web 2.0, Web 3.0, next generation Web, social networking technology, virtual world, pervasive computing, ubiquitous computing, unified communications (unification), IT utility, on-demand computing, grid computing, Web services, service-orientation architecture, business intelligence, data mining, search technology and applications (Google), next generation Web search, virtualization (server, hardware), storage fabrics, open source, IT outsourcing, personal technology, healthcare IT, green IT, security and privacy, Internet policy, regulation global control, and the gap between IT and business (goals and strategies). This course is available to all undergraduate and graduate students in the business school. Prerequisite: IST 202 or BSAN 310. Enrollment restricted.

**IST 410. IT Project Management. 3 Credits.**
This course provides initial exposure to concepts related to the project management discipline generally, while focusing on management of information technology projects in particular. The course is organized to emphasize core project management knowledge areas developed by the Project Management Institute, and it stresses the benefits of a disciplined, formal project management methodology. Students completing the course will gain an appreciation for the complex nature of projects and be better prepared to be an effective member of project teams encountered in many types of organizations. Not open to students with credit in BSAN 410 or MGMT 472. Prerequisite: IST 202 or IST 310. Enrollment restricted.

**IST 435. Information Security. 3 Credits.**
This course provides an introduction to a wide range of topics associated with managing the security of information systems and related data in a business environment. Topics addressed include cryptography and security of operating systems, databases, networks... both wired and wireless, and telecommunications systems. Security issues are examined related to application development and to the use of the Internet as a business medium. Other elements of security are reviewed: physical security, disaster recovery and business resumption planning, change control, and so forth. On successful completion of the course, each student will be better able to: a. Understand and appreciate risks associated with business information systems infrastructures and the formal nature of these threats. b. Evaluate various risks associated with information systems. c. Envision controls that might mitigate these risks. d. Possess the ability to effectively articulate the threats and need for appropriate controls to others, be they higher management, peers, or subordinates. Prerequisite: IST 202 or BSAN 310. Enrollment restricted.

**IST 492. Honors Topics and Problems in Information Systems and Technology: . 1-5 Credits.**
This honors topic seminar is open only to students meeting the requirements established by faculty members offering the course. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor.

**IST 495. Foundations in Business Analytics. 3 Credits.**
Introduces students to the key business, computational and data competencies needed by business analysts for effective data-driven decision making. The course focuses on how structural as well as unstructured “big data” can be used to help decision makers improve organizational competitiveness. Students will learn fundamental skills for
business analytics: data manipulation, data visualization and statistical methods to gain experience with different software tools used for data analysis and reporting. Not open to students with credit in BSAN 440. Prerequisite: Completion of BSAN 326 or IST 326. Enrollment restricted.

**IST 500. Individual Research in Information Systems Technology. 1-5 Credits.**

Individual study of selected topics in information systems technology not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311, and SCM 310 or SCM 311; approval of the Area Director. Enrollment restricted.

**IST 701. Managerial Information Systems. 2 Credits.**

This course provides a broad, managerial level introduction to fundamental information technology concepts and terminology and the application of those concepts in business organizations. It addresses a variety of topics including: the Internet, intranets, and extranets; relational database theory; hardware, software, and networking concepts; the system development life cycle, project management; eBusiness/eCommerce; knowledge management; enterprise resource planning; ethical considerations related to information technology advances; and organizational considerations related to information systems. The course focuses on the knowledge and expertise required for managers to successfully leverage information systems assets in a business setting.

**IST 702. Systems Development. 3 Credits.**

This course focuses on the practical issues of system development. A main objective of the course is to teach students system development through programming projects. In addition, the course examines the software engineering issues involved in system development, including usability and design issues, and alternative systems development processes. To enhance the quality of the system developed, the course also looks into software testing and evaluation issues. This course is not open to students with credit in IST 320. Prerequisite: IST 202 or IST 310 or IST 701 or concurrent enrollment in IST 701. Enrollment restricted.

**IST 704. Database Management. 3 Credits.**

This course provides insight to the managerial and organizational issues that surround the development and implementation of database systems in organizations. Students will undertake a project that allows them to experience the database development process while learning and practicing modern data modeling techniques. Students will also study the value that databases have to the organization and the impact that databases have on decision-making processes. Students also will study strategic issues that impact database development and will research the latest advances in database management systems and other emerging technology to gain insight on how these advances will impact the future of database development. This course is not open to students with credit in IST 326. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted.

**IST 706. Systems Analysis and Design. 3 Credits.**

This course develops skills with regard to the Analysis and Design activities typically encountered in an organizational software development environment. It emphasizes structured project planning, analysis and design techniques, including Project Estimation Methods, Data Flow Diagrams, Entity-Relationship Diagrams, and the application of CASE (Computer-Aided Software Engineering) Tools. The teaching methods will combine classroom experience with an analysis and design case study using role-play techniques to simulate an actual analysis and design scenario. This course is not open to students with credit in IST 325. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted.

**IST 708. Strategic Information Systems Planning. 3 Credits.**

This course has two objectives. The first objective is to give graduate students an understanding of the need for high level IT strategy in organizations. This is accomplished through case analysis, the experiential learning of strategic concepts and through interaction with IT executives. IT strategy is explored at the executive levels of an organization. The second objective of the course is to give students experience working on projects/research and presenting materials as is done in developing IT strategy for real organizations. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted.

**IST 709. Business Computer Networking. 3 Credits.**

This course has two objectives. The first objective is to give graduate students an understanding of the need for high level IT strategy in organizations. This is accomplished through case analysis, the experiential learning of strategic concepts and through interaction with IT executives. IT strategy is explored at the executive levels of an organization. The second objective of the course is to give students experience working on projects/research and presenting materials as is done in developing IT strategy for real organizations. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted.

**IST 712. Information Security. 3 Credits.**

This course will introduce, at a managerial rather than highly technical level, a range of topics associated with security of information systems and related data in a business environment. Topics addressed include selected cryptography concepts and the security of operating systems, databases, networks—both wired and wireless, and telecommunications systems. The course also considers security issues related to application development, including management of the change control process, and to the use of the Internet as a business medium. Students will also address physical security, disaster recovery, business resumption planning, and managerial planning and techniques involved in creating a security conscious organization. This course is not open to students with credit in IST 335. Prerequisite: IST 701. Enrollment restricted.

**IST 713. Data Management. 3 Credits.**

Businesses today collect and manage large volume of data in a variety of types, forms, and sources for myriad uses. To provide necessary skills to data scientists and analysts, this course introduces traditional data management concepts and techniques as well as contemporary information retrieval and processing innovations. Topics include database fundamentals, database query techniques, data marts and data warehouse, information retrieval and Web search, NoSQL movement and practices, data management for analytics, distributed data management and cloud computing, and other emerging trend and techniques. Enrollment restricted.

**IST 715. E-Commerce: An Integrative Perspective. 3 Credits.**

This course examines how organizations and individuals exploit the Internet and other emerging information technology to conduct business in an information era. This course combines practice and theory to examine successes, failures, and common practices when using information technology for e-commerce activities. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted.

**IST 720. Developments in Software Technology. 3 Credits.**

This course is an introduction to object-oriented (OO) technology and the object paradigm. We explore the object paradigm, its benefits and limitations. Specifically, we study a state-of-art technique for OO modeling. We also apply this technique to the analysis and design of a system, and implement the concepts with OO programming. Students will gain practical experience in OO analysis, design, and implementation through projects with an OO programming language. Prerequisite: IST 702. Enrollment restricted.
IST 725. Contemporary Information Technology Topics. 3 Credits.
This course examines a wide range of innovative information technologies (IT) which have both technical and strategic implications for businesses. These IT innovations affect all functions of businesses. Topics include Web 2.0, Web 3.0, next generation Web, social networking technology, virtual world, pervasive computing, ubiquitous computing, unified communications (unification), IT utility, on-demand computing, grid computing, Web services, service-oriented architecture, business intelligence, data mining, search technology and applications (Google), next generation Web search, virtualization (server, hardware), storage fabrics, open source, IT outsourcing, personal technology, healthcare IT, green IT, security and privacy, Internet policy, regulation, global control, and the gap between IT and business (goals and strategies). This course is not open to students with credit in IST 405. Prerequisite: IST 202 or IST 301 or IST 701.

IST 730. IT Project Management. 3 Credits.
This course provides initial exposure to concepts related to the project management discipline generally, while focusing on management of information technology projects in particular. The course is organized to emphasize core project management knowledge areas developed by the Project Management Institute, and it stresses the benefits of a disciplined, formal project management methodology. Students completing the course will gain an appreciation for the complex nature of projects and be better prepared to be an effective member of project teams encountered in many types of organizations. This course is not open to students with credit in IST 410. Prerequisite: IST 202 or IST 301 or IST 701.

IST 799. Internship in Information Systems. 1-3 Credits.
Internships provide opportunities for students to combine their academic education with a meaningful experience in the business world. Accounting internships allow students to explore career pathways in accounting, further their professional growth, expand professional networks, and increase the relevancy of their academic coursework. The internship course combines job-related activities of the accounting internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the Director of the Internship Program prior to the internship experience. Students may not receive more than three hours of internship credit. Enrollment restricted and by permission only.

IST 895. Graduate Seminar Information Systems: ____. 0.5-5 Credits.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted.

IST 898. Independent Study for Master’s Students. 1-6 Credits.
(V) Individual study of selected current problems in the field of information systems to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

IST 995. Doctoral Seminar in Information Systems: ____. 2-5 Credits.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

IST 999. Doctoral Dissertation. 1-12 Credits.

Courses

MGMT 230. Introduction to the Management Profession. 1 Credits.
In this course, we introduce current Management students to possible career opportunities in the profession. Students will have an opportunity to interact with current Management professionals in multiple fields. We emphasize both current practice and projected industry trends and involve guest speakers. Note: Check with your Major to see which 230 course it requires (ACCT 230, BSAN 230, BUS 230, FIN 230, IST 230, MKTG 230 or SCM 230) and when it encourages you to take it. Prerequisite: BUS 210 or concurrent enrollment.

MGMT 300. Special Topics in Management: ____. 1-5 Credits.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of management topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor.

MGMT 305. Survey of Management and Leadership. 3 Credits.
This course is designed to acquaint students with traditional business management ideas, recent management thinking, and the contemporary application of both to the management functions of planning, organizing, leading and controlling. A survey of a wide variety of topics is offered, generally including goal setting, strategy formulation and implementation, managerial decision making, structure and design of organizations, corporate culture, organizational change and development, human resources management, managing diversity, leading, motivation, communication, teamwork, quality control, management control systems, operations and service management, entrepreneurship and small business management, managerial ethics, corporate social responsibility, and management in the global environment. (Not open to students with credit in BBA 303, MGMT 310 or MGMT 311.) Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1.

MGMT 310. Principles of Management. 3 Credits.
This course serves as an introduction to the study of the management functions of planning, organizing, leading and controlling. Students will apply these fundamental management functions through the study of various topics such as the history of management, organizational ethics and social responsibility, diversity and inclusion within organizations, problem solving and decision making, strategic and operational planning, techniques for motivating employee performance, leadership theories and organizational behavior concepts, human resources management, and management control systems including the budgeting process in organizations. Prerequisite: Completion of ECON 142 or ECON 143, ACCT 200, PSYC 104 or PSYC 105, and prior completion or core-requirement in ACCT 201 and BSAN 202 or DSCI 202 or DSCI 301.

MGMT 311. Principles of Management, Honors. 3 Credits.
The honors treatment of this course serves as an introduction to the study of the management functions of planning, organizing, leading and controlling. Students will apply these fundamental management functions through the study of various topics such as the history of management, organizational ethics and social responsibility, diversity and inclusion within organizations, creative problem solving and decision making, strategic and operational planning, techniques for motivating employee performance, leadership theories and organizational behavior concepts, human resources management, and management control systems including the budgeting process in organizations. Only open to students admitted to the University Honors Program, the School of Business Honors Program, or by consent of the instructor. Prerequisite: Completion
of ECON 142 or ECON 143, ACCT 200, PSYC 104 or PSYC 105, and prior completion or co-enrollment in ACCT 201 and BSAN 202 or DSCI 202 or DSCI 301.

MGMT 400. Special Topics in Management. 1-5 Credits. This is a variable-topic seminar. Its purpose is to allow the occasional offering of management topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

MGMT 405. Ethical Decision Making in Business. 3 Credits. This course is designed to provide students with: (a) a grounding in the psychological and philosophical foundations of business ethics; (b) the ability to recognize ethical problems; (c) an exposure to many of the ethically sensitive issues facing corporations and managers in business today (e.g., layoffs, outsourcing, employee whistle-blowing, employee privacy, employee health and safety, marketing and advertising, environmental issues, discrimination, and the global responsibilities of business); and (d) the tools for analyzing and reaching closure on ethical problems. Students will study the role of ethics in the relation of business to employees, consumers, and society. Students in this course will have the opportunity to engage in stimulating class discussions, justify ethical positions in case study analyses, investigate ethical issues in their own future professional lives, and develop and present their solutions for typical ethical problems faced by managers in organizations. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 410. Human Resources Management. 3 Credits. This course addresses the ways that firms manage employment relationships, including staffing, training and development, compensation, performance appraisal, labor-management relations, employment law, career management, and job design. Upon completion of the course, students will be able to identify and address these topics from a general management perspective. Prerequisite: MGMT 310 or MGMT 311. Sports Management majors may petition for entry to the course with completion of the following prerequisite: MGMT 305, ECON 142, or ECON 143, and an introductory statistics course (DSCI 202 or DSCI 301), HSES 310, MATH 365, PSYC 300). Enrollment restricted.

MGMT 412. HR Management Analytics. 3 Credits. The course introduces students to the field of human capital analytics and measurement. It provides an overview of the evolution of human capital measurement, and guides students through various types of methods organizations use to understand the impact of people programs and initiatives on their organization. The importance of human capital analytics in business decisions is examined, including leader and manager use of data, basic analysis, reporting and presentation of data, benchmarking, and other use cases and trends. The course will provide a foundation of knowledge with the intent of developing the student's capabilities to be more prepared and equipped to advance the use of human capital measurement to drive business decisions. (Same as BSAN 412.) Prerequisite: Completion of MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 413. Recruiting and Selecting Effective Employees. 3 Credits. What makes for a great employee? The answer will depend on the fit between the person and the organization. One size does not fit all. This course covers policies and procedures for recruitment, selection and staffing to enhance organizational effectiveness. Students learn about individual differences, how to measure these differences, and how to ensure the organization’s recruitment and selection processes are reliable, valid, legal and “fair.” Topics will include (i) conducting a job analysis for creating job descriptions, (ii) recruiting candidates, and (iii) setting up selection procedures through initial screening and resume review, the employment interview, general and specific ability tests, personality tests, assessment centers, performance tests, integrity testing, and drug testing. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 416. Training, Development, and Management Careers for Individuals and Organizations. 3 Credits. This course focuses on principles and practices in designing and administering performance management and reward systems. Employee performance measurement at both the individual and group levels is reviewed. Using performance measurement information for administrative decision-making and employee development is discussed. The impact of reward systems on employee recruitment, satisfaction and individual and firm-level performance is examined, including establishing pay structures, individual and group-based pay-for-performance plans, executive pay issues, government influences, and employee benefits. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 419. Managing Performance and Compensation. 3 Credits. The focus of this course is how the legal environment affects the management of employees. The topics covered include laws on employment discrimination, employment-at-will, and negligent hiring, the Occupational Safety and Health Act, the National Labor Relations Act, the Fair Labor Standards Act, and the Family and Medical Leave Act. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 431. Legal Environment for Managing Employees. 3 Credits. The focus of this course is how the legal environment affects the management of employees. The topics covered include laws on employment discrimination, employment-at-will, and negligent hiring, the Occupational Safety and Health Act, the National Labor Relations Act, the Fair Labor Standards Act, and the Family and Medical Leave Act. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 434. International Human Resource Management. 3 Credits. Whether a company has a domestic or an international footprint, there is little doubt that it is impacted by global competition for markets and for talent. This course increases students’ understanding of core HRM activities as they are conducted in a global context. These activities include staffing, performance management, training and development, compensation, and labor relations. These topics are examined in the light of cultural and institutional differences. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 437. Developing Management Skills. 3 Credits. This course enhances leadership and other people-related skills of students in order to strengthen their capacity to manage others effectively. The course begins by focusing on self-awareness and self-management. Students also learn systems for classification of people on the basis of personality, behavior and attitudes. Other topics covered include communication skills, time management, techniques for controlling stress, problem solving, reading people's emotions and intentions more effectively, effective team leadership, coaching and counseling, delegation and empowerment, conflict resolution, motivation, and effective discipline techniques. The focus of the course is on skill acquisition and development. Other pedagogy involves readings, personality and behavior inventories, role-playing, and case analyses. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted.

MGMT 440. Advanced Organizational Behavior. 3 Credits. This course addresses the impact of individual, group and organizational influences on human behavior within organizations. Building on the
selected to provide the student with decision-making opportunity in major areas of managerial concern: environmental opportunities and constraints, formulation of business policy, and policy implementation mechanisms. Knowledge and skills gained in previous business courses, including marketing, finance, and quantitative methods, will be applied to problems associated with the totality of organizational activity. Not open to students with credit in BBA 308. Prerequisite: FIN 310 or FIN 311; IST 310; MKTG 310 or MKTG 311; MKTG 310 or SC 310 and Senior standing (90 hours completed). Enrollment restricted.

MGMT 499. Business Policy and Strategy, Honors. 3 Credits.
Honors treatment of this course exposes the student to the role of general management in complex organizations. The cases, conceptual materials, and projects are selected to provide the student with decision-making opportunity in major areas of managerial concern: environmental opportunities and constraints, formulation of business policy, and policy implementation mechanisms. Knowledge and skills gained in previous business courses, including marketing, finance, and quantitative methods, will be applied to problems associated with the totality of organizational activity. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: FIN 310 or FIN 311; IST 310; MGMT 310 or MGMT 311; MKTG 310 or MKTG 311 and SC 310 or SC 311 and Senior standing (90 hours completed).

MGMT 500. Individual Research in Management. 1-5 Credits.
Individual study of selected topics in management not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 and MKTG 311 and SC 310 or SC 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted.

MGMT 525. Negotiations and Dispute Settlement. 3 Credits.
This course involves the study of the theory and practice of dispute resolution and negotiation in business mediation (facilitated negotiation). Conflict resolution in the workplace, including grievance procedures, will be considered. Students are required to apply concepts studied through role playing simulations. Not open to students with credit in BLAW 525 or MGMT 525. (Same as BLAW 525.) Prerequisite: MGMT 310 or MGMT 311 and BE 301 or BE 302 or by permission of instructor. Enrollment restricted.

MGMT 701. Organizational Behavior. 3 Credits.
This course focuses on human behavior in organizations. It helps the student learn to think systemically and critically about organizations, to appreciate knowledge building in the organization sciences, and to apply that knowledge in the work setting. Topics covered may include: individual differences and motivation, work and group design, leading and decision making, organization design and culture, and organization change and development.

MGMT 704. Strategic Management. 3 Credits.
Strategic Management has as its primary objective the development of an understanding of the role of general management from both a conceptual and operating standpoint. The course is based on the strategic management framework emphasizing the evaluation of an organization's strategic situation and the formulation of viable alternative strategies required to deal with the challenges facing the organization. Attention is focused on the development of organizational objectives and the formulation of strategies at the business and operating levels. Prerequisite: MGMT 701, FIN 701, and MKTG 701. Enrollment restricted.

MGMT 705. Ethical Decision Making in Business. 3 Credits.
This course is designed to provide students with: (a) a grounding in the psychological and philosophical foundations of business ethics; (b) the ability to recognize ethical problems; (c) an exposure to many of the ethically sensitive issues facing corporations and managers today in each of the functional areas of business (management, accounting, finance, information systems, and marketing); and (d) the tools for analyzing and reaching closure on ethical problems. Students will study the role of ethics in the relation to the individual, manager, organization, and global business environment. Students in this course will have the opportunity to engage in stimulating class discussions, justify ethical positions in case study analyses, investigate ethical issues in their own future professional lives, and develop and present their solutions for typical ethical problems faced by managers in organizations after fully exploring the ethical dimensions of both sides of a given issue. Prerequisite: MGMT 701. Enrollment restricted.

MGMT 706. Managing People. 3 Credits.
This course addresses topics, challenges and processes associated with business-related people issues. The principal objectives are to increase understanding of human and group behavior in organizations; to learn how to effectively motivate and lead individuals and groups; to increase effectiveness in managing oneself and others in team settings; and to increase understanding of human resource policies and practices that help create and sustain competitive advantage through people. Course topics include individual differences, motivation, groups, leadership, strategic HR, employment law, staffing, compensation, performance management, and training and development.

MGMT 710. Leadership Philosophy and Practice. 3 Credits.
This course emphasizes an exploration of ideas about leadership that are practice-oriented. The material covered is based primarily on ethnographic and clinical inquiry rather than social scientific research. A central theme of this material, some of which is philosophical in nature, is the focus on learning and the role of reflection in both the leadership process itself and in the process of developing leaders. Varieties of topics are covered, including foresight, intuition, practical reason, critical thinking, reflective practice, and ethical judgment. A key goal is to move the student into a position where he or she can begin to take control of their own leadership development process. The course is structured so as to give students the opportunity to reflect on their experiences, analyze those experiences using the conceptual material, and then enter into systematic dialogue on these issues with other students and the instructor. The ultimate product of this learning process is the creation of a detailed personal leadership development plan. Prerequisite: MGMT 701. Enrollment restricted.

MGMT 711. Human Resources Management. 2 Credits.
The purpose of this course is to acquaint students with the rationale and tools for creating a sustainable competitive advantage through human resources. The management of human resources - people and their human capital - is approached from the perspective of the practicing manager as opposed to that of the human resources specialist. The major topics covered include staffing, training and development, performance management, compensation and benefits, job design, facets of employment law, and employee (labor-management) relations. Prerequisite: BE 701, DSCI 701 and MGMT 701. Enrollment restricted.

MGMT 712. Economic, Environment, and Social Sustainability in Business. 3 Credits.
This course introduces students to conducting business and pursuing organizational goals sustainably. It includes principles (scientific, economic, and cultural) to guide decision-making for sustainability, metrics to assess sustainability [e.g. the integrated or triple bottom line], and the application of sustainability concepts to business functions.

Aspects of global environmental sustainability [energy, water, agriculture, resource use and waste] are considered. The use of cases, discussion of best practices, and attention to relevant skills help students gain familiarity with sustainable business practices and develop their capabilities to contribute to firm efforts to operate more sustainably. Enrollment restricted.

MGMT 713. Managing People: Applications and Skills. 2 Credits.
The goal of this course is to increase the capacity of the student to manage others effectively. It begins by focusing on self-awareness and self-management. Students also learn systems for classification of people on the basis of behavior and attitudes. Topics covered may include time management, problem solving, reading people, coaching and counseling, delegation and empowerment, conflict resolution, motivation and discipline. The focus is on skill acquisition and the learning approaches including readings, inventories, role playing and case analysis. Prerequisite: MGMT 701. Enrollment restricted.

MGMT 718. Business Law and Ethics. 3 Credits.
This course has two purposes: 1) to provide a foundation for understanding the relation between law and business and 2) to address ethical decision-making and the management of ethics in the workplace. Topics include classifications of law; legal processes; emerging legal issues; alternative dispute resolution; recognition of ethical issues; ethical analysis frameworks; and the management of ethical responsibilities in a global business environment.

MGMT 719. Strategic Management. 3 Credits.
The principal objectives of this course are to learn how to perform strategic analyses of competitive contexts external to the firm, how to leverage firm specific resources and capabilities for competitive advantage, how to exploit specific strategic perspectives such as game theory and real options, and to learn how to make more effective strategic decisions within the firm. Topics include: industry analysis, firm level strategy, resources and capabilities, intangible resources, firm structure, industry evolution, game theory, real options, managerial discretion, and multinational strategy. Prerequisite: BE 718.

MGMT 722. Corporate Strategy. 3 Credits.
The objective of this course is to help students build an understanding of how competitive strategy may lead to the creation and persistence of competitive advantage in diversified firms. In contrast to the core Strategic Management (MGMT 704) course, which is designed to address how firms develop competitive advantage in a single market, this course analyzes how advantage can be created through the configuration and coordination of activities across multiple markets. Examples of corporate strategies include vertical integration, cooperative alliances, corporate diversification, mergers and acquisitions, and so forth. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted.

MGMT 725. Strategic Management of Technological Innovation. 3 Credits.
This course focuses on the dynamics of industries driven by technological innovation. It strives to help students think strategically about appraising and managing technological innovation and new product deployment. Specific topics covered include how innovations emerge, their type and pattern of diffusion, and their meaning to businesses and society. In depth coverage is given to dominant designs and industry standards, decisions on entry timing of new technologies, resource allocation among multiple attractive innovation projects, and capturing the value created by innovations. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted.

MGMT 727. Strategy Implementation. 2 Credits.
The course focuses on the principles and methods of implementing strategies, both at the business unit and corporate levels. Strategy is
discussed as the primary driver of organization structure, processes, systems, culture and skills in successful organizations. The role of the general manager as the architect of implementation is highlighted. Topics covered include: different forms of structure, behavior and output controls; organization design, information systems design, reward systems and organizational culture. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted.

MGMT 728. Managing Strategic Direction and Change. 2 Credits.
This course focuses on executive actions needed to create and sustain high performance of firms. The vision, credibility, and human skills that executives need to set strategic direction are explored extensively. A major part of the course covers strategic and organizational change practices that can be used to motivate employees to alter their patterns of behavior to meet the shifting needs of the firm's strategy. Emphasis is placed on theories of effective change implementation, mutual engagement and shared diagnosis, organizational redesign, reinforcing new behaviors, organizational culture and change, and the political dynamics of strategic change. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted.

MGMT 732. Recruiting and Selecting Effective Employees. 3 Credits.
Building on selected fundamental principles from psychology, economics, and sociology, this course emphasizes the importance of sound measurement practices for the acquisition of effective human talent by organizations. Topics covered include job analysis for selection procedure development, legal and fairness issues, recruitment, initial screening, employment testing, and the employment interview. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted.

MGMT 734. Compensation and Rewards. 2 Credits.
This course focuses on principles, policies and practices in designing and administering compensation and reward systems. It covers frameworks and applications useful for achieving organizational effectiveness through pay systems that help promote a competent and committed workforce. Topics include: developing pay structures, formulating and implementing pay level strategies, assessing and managing employee performance, pay-for-performance issues, legal issues, executive compensation and employee benefits. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted.

MGMT 738. Developing People and Careers. 2 Credits.
This course is designed with an emphasis on effective talent management for practicing managers and includes individual and organizational perspectives. Topics include assessing training needs; designing, developing, delivering and evaluating training and development investments; and career management planning, strategies and progression, including succession planning. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted.

MGMT 740. Appraising and Managing Employee Performance. 2 Credits.
This course covers the measurement/appraisal of employee performance at the individual and small work group/team levels, and the use of appraisal information in administrative decision-making, employee coaching, employee counseling, and individual/team performance improvement. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted.

MGMT 741. International Human Resources Management. 2 Credits.
This course introduces students to the major issues associated with managing people in the context of the global marketplace. The focus is on understanding human resource issues that are unique to international business and strategies for effectively addressing them. These issues include staffing, performance management, compensation and labor relations. These topics are considered in the context of factors such as culture, socio-politics, legal regulations, and education. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted.

MGMT 751. Strategic Organizational Design and Change Management. 3 Credits.
This course focuses on the principles and methods of implementing strategies. Strategy is focused upon as the primary driver of organization structure, processes, systems, culture, and skills in successful organizations. A major part of the course covers strategic and organizational change practices that can be used to motivate employees to meet the shifting needs of the firm's strategy. Emphasis is placed on theories of effective change implementation, mutual engagement and shared diagnosis, organizational redesign, reinforcing new behaviors, organizational culture and change, and the political dynamics of strategic change. Prerequisite: MGMT 706 and MGMT 719.

MGMT 752. Developing Effective Management and Team Skills. 3 Credits.
This course enhances skills to improve students' capacity and ability to manage others effectively. The focus of the course is on skill acquisition and development. Topics covered include negotiation and conflict resolution in organizations, communication skills, and collaborative team skills, along with other skills managers use in their day-to-day work. The course promotes self-awareness and reflection upon individual traits and abilities through self-assessments. Other pedagogy involves readings, personality and behavior inventories, and case analyses. Prerequisite: MGMT 706.

MGMT 753. Leadership. 3 Credits.
This course will emphasize an exploration of ideas about leadership that are practice-oriented. The central themes of this material, some of which is philosophical in nature, are the focus on learning and the role of reflection in the leadership process and the process of developing leaders. A variety of topics are covered, including foresight, intuition, practical wisdom, critical thinking, reflective practice, ethical judgment, and articulating relationally responsive understandings of alternative futures. Students are provided the opportunity to reflect on and narrate their leadership-related crucible experiences, analyze those experiences using the conceptual material, and then enter into systematic dialogue on these issues with other students and the instructor. The ultimate product of this learning process will be the creation of a personal leadership development plan. Prerequisite: MGMT 706.

MGMT 754. Managing Internationally. 3 Credits.
This course explores the important managerial issues arising from a firm's expansion into the international arena and examines the analytical frameworks and management techniques that are essential for an international manager. Topics covered include strategies and organizational structures for managing a multinational corporation and management of various functional areas (such as production, marketing, finance, and human resources) in an international setting. Considerable attention is paid to how and why organizational communication and practices vary from one culture to another, as well as why certain values and cultural contexts might make particular management styles more successful than others. Prerequisite: IBUS 718 and MGMT 719.

MGMT 755. Project Management. 3 Credits.
This course is designed to help students gain an understanding of the formal project management process and its relationship to other functional management areas, as well as an organization's structure and leadership. The project lifecycle will be examined starting with project selection and bidding and ending with project acceptance and close out. Specific topics covered in this course include: the importance and role of strategic
project management, the contextual nature of projects, and managing project communication, scope, cost, time, and risk for a successful implementation of the project.

MGMT 761. Strategy and Organization Design. 2 Credits.
The course is based on the strategic management framework emphasizing the evaluation of an organization's strategic situation and the formulation of viable alternative strategies required to deal with the challenges facing the organization as it tries to develop strategies and resources for competitive advantage. Special emphasis is placed on the principles and methods of implementing strategies. Strategy is discussed as the primary driver of organization structure, processes, systems, culture and skills in successful organizations. The role of the general manager as the architect of implementation is highlighted. Prerequisite: Corequisite: MGMT 706 and enrollment in the MS-OL Program.

MGMT 762. Management Skills and Teams. 2 Credits.
Managerial effectiveness is critically dependent upon the ability to influence, persuade, motivate and get things done with and through other people in the organization. Integrating concepts from MGMT 706 with cutting-edge concepts drawn from the latest behavioral science research, this course focuses on questions such as: "How does one influence the behavior of others in the organization and direct their behavior toward the achievement of organizationally relevant goals?" and "How does one maximize the performance of the teams we become a part of?" Topics include: person-environment fit, power and influence, organizational culture, cross-cultural management and high performance teams. Case based and reading intensive, the course also includes self-assessment exercises aimed at personal introspection and development. Prerequisite: MGMT 706 and enrollment in the MS-OL Program.

MGMT 763. Leadership Capstone. 2 Credits.
This course focuses on the student's ability to synthesize the learning experience through case analyses and a comprehensive capstone leadership project that demonstrates the knowledge, character, and reasoning capacity expected to lead successfully in a contemporary business environment. Leveraging the leadership foundation and personal leader development plan from MGMT 710, this course uses a combination of professional readings and scenario-based leader case studies to enhance individual and team leadership skills while posturing the student to lead effectively in an increasingly complex world. Pedagogy involves professional reading and discourse, personality and behavior inventories, and practical case analyses. Prerequisite: MGMT 710 and enrollment in the MS-OL Program.

MGMT 781. Managing Strategic Direction and Change. 3 Credits.
The course focuses on the principles and methods of implementing strategies. Strategy is focused upon as the primary driver of organization structure, processes, systems, culture and skills in successful organizations. A major part of the course covers strategic and organizational change practices that can be used to motivate employees to meet the shifting needs of the firm's strategy, theories of effective change implementation, mutual engagement and shared diagnosis, organizational redesign, reinforcing new behaviors, organizational culture and change, and the political dynamics of strategic change.

MGMT 782. Developing Effective Management and Team Skills. 3 Credits.
This course enhances skills to improve students' capacity and ability to manage others effectively. The focus of the course is on skill acquisition and development. Topics covered include negotiation and conflict resolution in organizations, communication skills, and collaborative team skills, among other skills managers use in their day-to-day work. The course promotes self-awareness and reflection upon individual traits and abilities through self-assessments. Other pedagogy involves readings, personality and behavior inventories, and case analyses.

MGMT 783. Ethical Decision Making in Business. 3 Credits.
This course is designed to provide students with: (a) a grounding in the psychological and philosophical foundations of business ethics; (b) the ability to recognize ethical problems; (c) an exposure to many of the ethically sensitive issues facing corporations and managers today in each of the functional areas of business (management, accounting, finance, information systems, and marketing); and (d) the tools for analyzing and reaching closure on ethical problems. Students will study the role of ethics in the relation to the individual, manager, organization, and global business environment. Students in this course will have the opportunity to engage in stimulating class discussions, justify ethical positions in case study analyses, investigate ethical issues in their own future professional lives, and develop and present their solutions for typical ethical problems faced by managers in organizations after fully exploring the ethical dimensions of both sides of a given issue.

MGMT 784. Leadership Capstone. 3 Credits.
This course focuses on the students' ability to synthesize the learning experience through the application and exploration of case studies and a capstone leadership project. Combines individual leadership assessment with enhances skills to improve students' capacity and ability to manage others effectively. Varieties of topics are covered, including foresight, intuition, practical reason, critical thinking, reflective practice, and ethical judgment. A key goal is to move the student into a position where he or she can begin to take control of their own leadership development process. The course is structured so as to give students the opportunity to reflect on their experiences, analyze those experiences using the conceptual material, and then enter into systematic dialogue on these issues with other students and the instructor. The ultimate product of this learning process is the creation of a detailed, exportable organizational leadership development plan.

MGMT 810. Managing People. 3 Credits.
This course addresses topics, challenges and processes associated with business-related people issues. The principal objectives are to increase understanding of human and group behavior in organizations; to learn how to effectively motivate and lead individuals and groups; to increase effectiveness in managing oneself and others in team settings; and to increase understanding of human resource (HR) policies and practices that help create and sustain competitive advantage through people. Course topics include individual differences, motivation, groups, leadership, strategic HR, employment law, staffing, compensation, performance management, and training and development. This course is open only to students in the full-time MBA program.

MGMT 820. Business Law and Ethics. 3 Credits.
This course has two purposes: to explore the relationship between law and business and provides a foundation for further understanding of business relevant laws and to address ethical decision-making and the management of ethics in the work place. Topics include classifications of law, federalism, court systems, civil judicial process, alternative dispute resolution, ethical analysis tools, recognition of ethical issues, organizational dimensions that impact ethical behavior, and the management of ethical responsibilities in a global business environment. This course is open only to students in the full-time MBA program.

MGMT 830. Global Strategic Management. 3 Credits.
Global Strategic Management is a capstone Strategic Management course infused with applications to global business. The principal objectives of the course are to learn the basics of strategic decision making and how strategy integrates functional area policies in organizations; to understand how industries affect firm strategies; to
understand how firms develop resources and capabilities for competitive advantage; to examine key strategic decisions or areas such as vertical integration, diversification, technology and market entry; and to understand how globalization affects core aspects of strategic business decisions. Topics include firm strategy, industry analysis, resources and capabilities, cost and differentiation advantage, organizing for competitive advantage, strategic change, technology-based competition, multinational strategy, vertical integration, and diversification. This course is open only to students in the full-time MBA program.

MGMT 831. Business Consulting. 3 Credits.
This course provides clinical applications of business problem solving and consulting. The course objectives are to link models and theories with field applications to solve real business problems; to acquire first-hand industry knowledge and witness varying client management styles; to learn time management skills and acquire a practical "tool kit" for diverse business problem solving; to apply problem solving techniques in both corporate and client consulting environments; and to enhance team interaction and leadership capabilities. Topics include consulting processes and successful consultant characteristics, hypothesis generation, problem identification and differentiation of root cause vs. symptom, market research methods, solution modeling, prep and presentation of solution, keys to consulting effectiveness. This course is open to those with admission to a graduate business program.

MGMT 885. Business Consulting. 3 Credits.
Through experiential learning using live consulting assignments, students will achieve understanding of the linkage between models and theories studied in the classroom and application in the field; direct interaction with clients at sophisticated corporate organizations; and first-hand experience in addressing significant business challenges with impactful and strategically correct solutions. Students will enhance their team and leadership skill capacities through interaction with other team members. This course is not open to students with credit in MGMT 485.

MGMT 895. Graduate Seminar in Management: ______. 0.5-5 Credits.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted.

MGMT 898. Independent Study for Master's Students. 1-6 Credits.
Individual study of selected current problems in the field of business management to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

MGMT 901. Current Research in Management. 1 Credit.
This course provides a workshop format for a discussion of the currently prevalent research topics, methods, and problems being addressed in the areas of human resources management, organizational behavior, and strategic management. All first year PhD students in HRM, OB, and SM will typically enroll in this course during their first semester in the doctoral program. Students will enroll in this course with their respective faculty advisors, who will work out a schedule of research seminars that each student must attend and participate in during the semester. Prerequisite: Admission to the School of Business PhD Program in HRM, OB, or SM, or permission of the Management Area Director.

MGMT 905. Macro Management Research Methods. 3 Credits.
This course is designed to develop in students an ability to analyze research reports critically and to provide skills in designing, performing, and reporting original Management research. Data preparation methodologies include sample bias corrections and missing data treatments. The course also covers practical application of what are typically considered to be "macro" research methods such as endogeneity treatments, panel data analysis, advanced linear models like logit, probit and binomial regression, and basic econometrics, and so forth to Management research topics. Students prepare and defend an original research proposal as part of this course. Recommended to be taken early in the program for Human Resource Management, Organizational Behavior, and Strategic Management doctoral students. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MGMT 906. Micro Management Research Methods. 3 Credits.
This course is designed to develop in students an ability to analyze research reports critically and to provide skills in designing, performing, and reporting original Management research. Methodologies ranging from naturalistic field studies to laboratory experiments are reviewed along with various data collection strategies and construct measurement and validation. The course also covers practical application of what are typically considered to be "micro" research methods such as Hierarchical Linear Modeling, Structural Equation Modeling, Factor Analysis, and so forth to Management research topics. Students prepare and defend an original research proposal as part of this course. Recommended to be taken early in the program for Human Resource Management, Organizational Behavior, and Strategic Management doctoral students. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MGMT 916. Major Management Theories. 3 Credits.
This course provides an advanced survey of the essential theories about organizations and people that comprise contemporary Management theory. As such, it covers topics from diverse Management fields such as Organizational Theory, Strategy, Human Resource Management, Organizational Behavior, and Ethics. In doing so, this course also covers the historical evolution of evidence and theory in Management research as well as describing current debates and emphases in these various specific streams of research as well as opportunities for cross-fertilization. The intent is to prepare students to create a base level of knowledge that will enable doctoral students to effectively participate in the research conversations in Management as both consumers and producers of research. Students are expected to write a major research paper as part of this course. This course is primarily for School of Business Ph.D. students, but other advanced graduate students may enroll with the permission of the instructor. Prerequisite: Doctoral standing or masters students with at least one undergraduate or M.B.A. level behavioral science course or consent of instructor.

MGMT 950. Acquiring and Preparing Human Resources. 3 Credits.
This seminar focuses on staffing organizations and the training and development of human capital to produce effective performance of work. It covers individual differences in work performance, job/work analysis, recruitment, selection, new hire socialization, training, development, and career management. Topics include, but are not limited to: job performance theory, recruitment, principles of assessment (e.g., validity, performance prediction, generalizability), selection tools (e.g., general mental ability tests, personality inventories, aptitude tests, interviews), applicant reactions, legal issues (e.g., adverse impact, discrimination), learning theory, training design, transfer, training evaluation, instructional methods, development methods, and career models. Typically, reading assignments are articles from research journals (e.g., Journal of Applied Psychology, Personnel Psychology). Typically, students are required to write a substantial paper on a major aspect of human resources approved...
by the Professor. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

**MGMT 951. Retaining and Utilizing Human Resources. 3 Credits.** This seminar focuses on human resource programs that retain and strategically utilize human capital to produce effective work performance, positive employee attitudes (e.g., commitment, satisfaction, engagement), and enhanced firm productivity. Topics covered include, but are not limited to: the nature of human capital, compensation systems and benefits, performance appraisal, work/family policies, strategic human resource management frameworks, employment contracts, turnover, mobility, and reemployment job search. Typically, reading assignments are articles from research journals (e.g., Journal of Applied Psychology, Personnel Psychology). Typically, students are required to write a substantial paper on a major aspect of human resources approved by the Professor. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

**MGMT 953. Seminar in Organizational Behavior. 3 Credits.** This seminar provides a broad survey of theory and research in organizational behavior—i.e., research related to individual and group behavior in an organizational context. Organizational behavior concerns the set of approaches to understanding and predicting how people in organizations think, feel, and act, both as individuals and in relation to others in groups and organizations, and the outcomes (individual attitudes, task performance, citizenship behavior, deviance, etc.). The major objective of this course is to provide seminar members with a solid overview of the organizational behavior literature. Upon completion of the course, the student should be able to discuss theory and research in the major topic areas of organization behavior, critique theory and research in these areas, and integrate material within and across topics. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

**MGMT 954. Individual and Interactionist Perspectives of Organizations. 3 Credits.** This seminar focuses on conceptual and empirical research in organizational behavior that seeks to understand how the interaction between individuals and organizational facets influences their sense-making and identity. The implications of these processes for employees' well-being, performance, and careers will be discussed. Readings will address such topics as: Social Cognitive Theory, Self-efficacy, Creativity, Employee Attachment and Job Attitudes, Individual Differences, Person-Environment Fit, Careers, Employee Well-being, Emotions, Attribution Theory, Sense-making processes, Identity, Organizational Culture, Multi-level Theorizing and Research, and Cross-cultural Dimensions/Globalization. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

**MGMT 955. Economic Theories of Strategic Management. 3 Credits.** This seminar surveys the scholarly literature in Strategic Management that is based on economic modeling of human and firm behavior. Topics include but are not limited to: Industrial Organization Economics, Transaction Costs Economics, Property Rights Theory, Agency Theory, Resource-Based View and Dynamic Capabilities, and Real Options Theory. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

**MGMT 956. Behavioral Theories of Strategic Management. 3 Credits.** This seminar surveys the scholarly literature in Strategic Management that is based on behavioral, psychological and sociological theories. Topics include but are not limited to: Behavioral Theory of the Firm, Behavioral Models of Strategic Decision Making, Strategy Formation, Strategic Leadership including CEO's, Boards and Top Management Teams, Organizational Demography, Cognition in Strategic Decision Making, Power & Politics in Strategy Development. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

**MGMT 995. Doctoral Seminar in Management. 3-5 Credits.** A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

**MGMT 996. Independent Study for Doctoral Students. 1-5 Credits.** Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the student. Graded on a satisfactory/unsatisfactory basis.

**Courses**

**MKTG 101. Enlightened Consumption. 3 Credits.** An introduction to consumer behavior and its application to issues related to individual and societal well-being. Some of the topics include consumption and sustainability, how to detect and resist persuasion tactics, how to be a smart consumer and save money, and consumer rights. Students will learn to think critically about consumer decision-making and view consumer behavior not only from a personal vantage point but also from a broader societal perspective. This course is designed to be of interest to all undergraduate students regardless of discipline.

**MKTG 230. Introduction to the Marketing Profession. 1 Credits.** In this course, we focus on Marketing as a profession and cover a variety of topics. Topics include, but are not limited to, current trends in Marketing, professional expectations, job search strategies and preparation, and the four most common career tracks for a Marketing major: Professional Sales, Analytics, Brand Management, and Advertising/Communications. We emphasize both current practice and projected industry trends and involve guest speakers. Note: Check with your Major to see which 200 course it requires or recommends (ACCT 230, BSAN 230, BUS 230, FIN 230, IST 230, MKTG 230 or SCM 230) and when it encourages you to take it. Graded on a satisfactory/unsatisfactory basis. Prerequisite: BUS 210 or concurrent enrollment.

**MKTG 305. Survey of Marketing. 3 Credits.** This course introduces the student to marketing from the perspective of the business firm. Topics included are the marketing system, consumer and industrial behavior, market segmentation and positioning, product policy, channels of distribution, pricing strategy, sales management, and marketing communications. (Not open to students with credit in BBA 304, MKTG 310 or MKTG 311.) Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1.

**MKTG 310. Marketing. 3 Credits.** A study of marketing from the point of view of the firm. Topics include the nature of marketing, consumer behavior, marketing research, design of marketing mix (product, price, promotion, and place), and analytical techniques useful to marketing management. Prerequisite: ECON 142 or ECON 143, ACCT 200, and PSYC 104 or PSYC 105. Prior completion or co-enrollment in DSCI 202 or BSAN 202.
MKTG 311. Marketing, Honors. 3 Credits.
Honors treatment of this course involves a study of marketing from the point of view of the firm. Topics include the nature of marketing, consumer behavior, marketing research, design of marketing mix (product, price, promotion, and place), and analytical techniques useful to marketing management. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: ECON 142 or ECON 143, ACCT 200, and PSYC 104 or PSYC 105. Prior completion or co-enrollment in DSCI 202 or BSAN 202.

MKTG 315. Sales Force Management. 3 Credits.
Managing a sales force is a key marketing activity and a natural progression of a successful career in professional selling. Several factors contribute to the success of the sales force in meeting a firm’s objectives. These include sales force structure, sales force sizing, territory alignment, market segmentation and selection, compensation, and pricing policies. Accordingly, the primary objective of this course is to familiarize you with the concepts, methodologies, and tools for making sound decisions in these areas. Not open to business students. Prerequisite: MKTG 305.

MKTG 316. Professional Selling Skills. 3 Credits.
This course surveys the practice of professional selling steps in a logical and orderly sequence. The course covers an assortment of selling skills such as listening, communications, handling objections, and closing. Students are taught that successful salespeople learn to be a helper, a problem solver and an advisor to the customer. The successful salesperson will unselfishly persuade a prospective customer to buy a good, a service or an idea that benefits the customer. Finally, the course will provide the student with an understanding of how the function of professional selling fits into the overall marketing mix. The content of the course will include lectures, case discussion, and role-plays. Not open to business students. Prerequisite: MKTG 305.

MKTG 400. Special Topics in Marketing: ______. 1-5 Credits.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of marketing topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted.

MKTG 411. Introduction to Consumer Behavior. 3 Credits.
A study of the buyer’s information acquisition, evaluation, purchasing, and post-purchasing evaluation process. Emphasis is placed upon social psychological theories and their implications on the understanding and prediction of consumers’ behavior. The student, from the standpoint of the marketing manager, will apply behavioral science concepts to the problems of planning, pricing, and promotion decisions. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

MKTG 412. Introduction to Consumer Behavior, Honors. 3 Credits.
Honors treatment of this course involves study of the buyer’s information acquisition, evaluation, purchasing, and post-purchasing evaluation process. Emphasis is placed upon social psychological theories and their implications on the understanding and prediction of consumers’ behavior. The student, from the standpoint of the marketing manager, will apply behavioral science concepts to the problems of planning, pricing, and promotion decisions. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: MKTG 310 or MKTG 311.

MKTG 415. Marketing Research for Managers. 3 Credits.
This course introduces the student to the fundamentals of marketing research and analytical approaches to marketing problems. The material is presented from an applied point of view and is designed to familiarize the student with those aspects of marketing research with which the marketing manager is likely to interact. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

MKTG 420. Integrated Marketing Communications. 3 Credits.
This course will deal with the use of advertising, sales promotion, and public relations as elements in a promotional program. The emphasis of this course will be on the efficient use of an organization’s resources to accomplish communication goals through effective promotional strategy. A good part of the course will be spent examining the communication process; the nature of the receiver and how information is processed; determination of promotional objectives; promotional budget; media decisions, and measuring the effectiveness of the promotional campaigns. The goal of the course is to enable the students to better evaluate and devise a marketing communications program for any given product, service, or idea. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

MKTG 425. Sales Force Management. 3 Credits.
Managing a sales force is a key marketing activity and a natural progression of a successful career in professional selling. Several factors contribute to the success of the sales force in meeting a firm’s objectives. These include sales force structure, sales force sizing, territory alignment, market segmentation and selection, compensation, and pricing policies. Accordingly, the primary objective of this course is to familiarize you with the concepts, methodologies, and tools for making sound decisions in these areas. Enrollment Restricted. Not open to non-business students. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

MKTG 426. Professional Selling Skills. 3 Credits.
This course surveys the practice of professional selling steps in a logical and orderly sequence. The course covers an assortment of selling skills such as listening, communications, handling objections, and closing. Students are taught that successful salespeople learn to be a helper, a problem solver and an advisor to the customer. The successful salesperson will unselfishly persuade a prospective customer to buy a good, a service or an idea that benefits the customer. Finally, the course will provide the student with an understanding of how the function of professional selling fits into the overall marketing mix. The content of the course will include lectures, case discussion, and role-plays. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted to Business students.

MKTG 427. Advanced Selling Skills. 3 Credits.
This skills-based course will offer students the opportunity to further develop as consultative sales professionals. It will expand on the basic sales process with an emphasis on identifying needs, presenting solutions, responding to and overcoming objectives, and asking for the sale. Emphasis will be placed on role-play opportunities and industry interaction, supplemented by lectures and case discussions. Prerequisite: MKTG 316, or MKTG 426, or JOUR 611. Enrollment restricted.

MKTG 428. Sales Analytics. 3 Credits.
This course will introduce students to various analytical tools and models used in the professional selling process. The course will demonstrate how these quantitative tools are used in the planning of sales programs, the determination of individual customer potential, and the evaluation of the effectiveness of specific sales strategies.

MKTG 430. New Product Management. 3 Credits.
This course deals with the strategies, techniques, and methods used to develop and market a new product. An important aspect of the course deals with anticipating and managing change that can affect a firm’s marketing opportunities and response. Also emphasized is the need for a disciplined process of development. Subjects examined include innovative thinking, identification, and development of marketing opportunities,
Marketing mix strategies, and implementation. Prerequisite: MKTG 310, MKTG 311 or consent of instructor. Enrollment restricted.

**MKTG 435. Marketing Strategy. 3 Credits.**

The emphasis of this course is strategic marketing analysis and planning. Concepts and methods for the strategic analysis of product-market definition, segmentation, product positioning, and new product planning are examples of individual subjects that are covered. However, the primary objective is to integrate various topics into a strategic planning framework. An important component of the course is the application of concepts to realistic marketing problems through the use of comprehensive marketing simulations or in-depth cases that capture the dynamics of the marketing environment. Students will learn how to identify markets, assess company strengths and weaknesses, target market segments, analyze competition, and develop specific functional strategies in such areas as product development, pricing, distribution, and promotion. Prerequisite: MKTG 415. Enrollment restricted.

**MKTG 440. Global Marketing. 3 Credits.**

Today businesses compete in a global environment. As such, marketing managers must recognize the global nature of their markets and must develop the knowledge background, sensitivity, and skills required to successfully operate in this dynamic setting. This course examines the array of activities required to select, gain entry, and compete in a location other than the “home” country. Also examined is the influence that culture, environment, government regulation, and economic systems can have upon marketing mix decisions (product, price, promotion, distribution) related to localization, standardization, and local adaptation. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

**MKTG 443. Digital Marketing and Social Media. 3 Credits.**

This course aims to provide the theoretical knowledge and practical insights for integrating social media and digital marketing into the traditional marketing mix, understanding and engaging social media consumers, and monitoring and measuring the results of these efforts. Students will learn how to manage digital and social media, be able to understand the psychology of online consumers, the impact of digital and social media on traditional marketing strategy, review the digital and social media marketing process, critically evaluate the various social media platforms and online content, and successfully measure the impact of digital marketing efforts. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

**MKTG 444. Services Marketing. 3 Credits.**

This course aims to prepare students for careers that entail managing service businesses or service aspect of any business. It will help students understand the unique needs and challenges faced by service companies and those manufacturing companies that rely on services for their differential advantage (e.g., automobiles, appliances) in a complex global environment. As such, it should be relevant to all students, but especially to those who wish to work in service functions/industries (e.g., accounting, advertising, banking, finance, healthcare, hospitality, insurance, retailing, sales, supply chain management.) Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

**MKTG 448. Managing Brands. 3 Credits.**

This course provides students with the knowledge and skills required to design a strategic brand management plan. Emphasis is placed on building, measuring, and managing brand equity. Some topics covered in the course include developing a brand strategy, designing and implementing brand marketing programs, measuring and interpreting brand performance, and growing and sustaining brand equity. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

**MKTG 453. Retailing, Distribution Channel and Supply Chains. 3 Credits.**

This course exposes students to the many facets of retailing and provides a basic understanding of retailing concepts. At the completion of the course, students will understand the challenges of starting, managing, expanding, and succeeding in retailing. The course covers major functions that comprise the retailing task, including the decision tools used, planning strategy formulation, implementation and control in retail management. The content of the course should be useful for students interested in working in the retail sector, desiring to work for companies that interface with retailers and/or for those with a general management and entrepreneurial interest. Not open to students with credit in SCM 453. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

**MKTG 455. Pricing. 3 Credits.**

The primary objective of this course is to examine the concepts and tools required to effectively manage the pricing function. Both strategic and tactical aspects of pricing will be covered with a view to identify profit-boosting practices across a range of professional contexts - as product managers, business unit managers, management consultants, and entrepreneurs. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

**MKTG 458. Marketing, Supply Chains, and Geographic Information Systems. 3 Credits.**

This course is designed to engage students in critical discussions, analysis and use of Geographic Information Systems (GIS) in a variety of business sectors. Additionally, the course will introduce students to GIS systems used to make business decisions through hands-on and applied assignments. Upon completion, student will understand how GIS and related systems are applied to and utilized by businesses, as well as how to employ basic GIS programs to help solve a variety of business problems. Not open to students with credit in MKTG 458 or GEOG 458. Prerequisite: MKTG 310. Enrollment restricted.

**MKTG 460. Practicum in Advertising and Promotional Plan Development. 3 Credits.**

The course is an experiential approach to promotional campaign development with an emphasis on promotional strategy as a single component of the total marketing strategy. Student teams work with actual businesses to address the business's individual marketing needs. Students conduct environmental and industry analysis and primary and secondary market research to identify target markets, develop a marketing strategy, promotional objectives, product positioning, brand development and ROI measures for a promotional strategy. Students then complete media planning, creative execution, and budgeting and present the project to the business. Prerequisite: MKTG 310 or MKTG 311 and at least two of the following three courses: MKTG 411 or MKTG 412, MKTG 415, or MKTG 435. Enrollment restricted.

**MKTG 465. Customer Relationship Management. 3 Credits.**

This course offers a comprehensive introduction to the strategy and tactics of customer relationship management (CRM). Particular emphasis is given toward identifying the key strategic principles inherent in the customer-centric focus that underlies a successful CRM program. Topics include: Fundamentals of CRM strategy, marketing metrics, customer profitability analysis, choice modeling, techniques for evaluating model performance and applications of CRM to marketing campaign management. Students will be instructed on how to implement the CRM techniques using various software tools and real-world data. (Same as BSAN 465 and SCM 425.) Not open to students with credit in BSAN 465 or MKTG 465 or SCM 425 or MKTG 400 - Customer Relationship Management. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

**MKTG 470. Marketing Analytics. 3 Credits.**
This course introduces advanced analytical methods in the examination of data from a variety of sources to provide marketing professionals with the tools necessary to engage in today's data-rich decision-making environment. Predictive models and other multivariate statistical techniques will be covered with an emphasis on practical application. Not open to students with credit in BSAN 430 or MKTG 400 - Marketing Analytics. Prerequisite: BSAN 415 or MKTG 415 or SCM 415. Enrollment restricted.

MKTG 471. Sports and Entertainment Marketing. 3 Credits.
This course examines the marketing mix of product, place, promotion, and pricing in the multi-billion dollar sports and entertainment industries. The scope of the course will include both the marketing of sports and entertainment products and properties, as well as marketing through sports and entertainment (as a promotional vehicle to market other products). A variety of sports at the high school, intercollegiate, amateur, and professional levels will be considered. Through textbook and journal article readings, case analyses, and virtual simulations, students will explore the conceptualization of the marketing planning process, market and consumer research, target market ("fan" persona) characteristics and segmentation, audience usage and consumption patterns, endorsements, sponsorships, and branding. Additionally, through in-class discussion topics the student will focus on reinforcing topics presented in the class as well as current event or seasonal topics including, but not limited to Super Bowl, college football, March Madness, and the Olympics. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

MKTG 500. Individual Research in Marketing. 1-5 Credits.
Individual study of selected topics in marketing not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the readings and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted.

MKTG 701. Marketing Management. 3 Credits.
This course examines the marketing function of the firm, primarily from a managerial perspective. The topics examined include: marketing concepts, segmentation, and decisions related to positioning, products, pricing, distribution, and promotion.

MKTG 706. Marketing. 3 Credits.
This course is designed to equip students with basic concepts associated with the marketing function. Principal objectives are to discuss the role of marketing in an organization, to describe the processes of buyer behavior and the impact of these processes on marketing decisions, to develop an understanding of approaches used to segment markets and factors influencing the selection of target markets, to develop an understanding of elements of the marketing mix (product, price, communications, channels) and factors affecting decisions in these areas, and to integrate these concepts into an effective marketing strategy.

MKTG 714. Discovering & Evaluating New Product Opportunities. 3 Credits.
Rapid shifts in technology and consumer preferences make new products critical to a firm's portfolio. This course highlights the value of a disciplined approach in bringing new products and services to market. Specific topics covered include models for opportunity identification, understanding customer preferences and perceptions, and gauging market demand. Multidimensional scaling, factor analysis, clustering, preference regression and conjoint analysis are some techniques used in this course. Prerequisite: MKTG 701 or MKTG 810. Enrollment restricted.

MKTG 715. Consumer Behavior. 3 Credits.
This course is designed to review behavioral science concepts applicable to understanding behavior of consumers in the marketplace. It investigates the specific processes of consumer decision-making and purchasing, and the implications these have for marketing strategy. Topics covered include: effect of internal and external factors on consumer decision making, information processing, learning and memory, attitude formation and change, post-purchase behavior, ethical/social issues, effects on marketing strategy. Prerequisite: MKTG 701. Enrollment restricted.

MKTG 716. Global Marketing. 3 Credits.
This course is designed to provide a set of conceptual and managerial tools to students for undertaking marketing of products and services on a global scale. The topics covered in the course include economic and financial dimensions in global marketing, social and cultural aspects of the global market environment, regional market characteristics, political and legal issues in global marketing. A significant portion of the course is devoted to the study of competitive analysis and competitive strategy for the global markets, marketing information systems, various strategies for entering global markets, organization, planning and control of global marketing, and marketing mix decisions (product, price, promotion, and distribution) in a global setting. Prerequisite: MKTG 701. Enrollment restricted.

MKTG 717. Integrated Marketing Communications. 3 Credits.
The goal of this course is to enable the student to evaluate and devise a product/service marketing communications program. Emphasis will be placed on the efficient use of resources to accomplish communication goals through effective promotional strategy involving advertising, personal selling, sales promotion and publicity. Topics covered include the communication process, determination of promotional objectives, promotional budgeting, media planning, measuring effectiveness and ethical issues. Prerequisite: MKTG 701. Enrollment restricted.

MKTG 722. Marketing Strategy. 2 Credits.
The emphasis of this course is strategic marketing analysis and planning. Topics examined include (a) Situation and SWOT analyses and how these lead to an understanding of the firm's sustainable competitive advantage, (b) methods for the identification of segmentation within consumer and business markets, (c) the selection of target segments based upon competitive advantage and value, (d) positioning and differentiation within target segments, and (e) the development of brand strategy and action plans based upon segment positioning and differentiation. An important component of the course is the application of concepts to realistic marketing problems that captures the dynamics of marketing environments. Prerequisite: MKTG 701 or MKTG 810. Enrollment restricted.

MKTG 748. Managing Brands. 3 Credits.
This course provides students with the knowledge and skills required to design a strategic brand management plan. Emphasis is placed on building, measuring, and managing brand equity. Some topics covered in the course include developing a brand strategy, designing and implementing brand marketing programs, measuring and interpreting brand performance, and growing and sustaining brand equity. Prerequisite: MKTG 706.

MKTG 752. Integrated Marketing Communications. 3 Credits.
The goal of this course is to enable the student to evaluate and devise a product/service marketing communications program. Emphasis will be placed on the efficient use of resources to accomplish communication goals through effective promotional strategy involving advertising, personal selling, sales promotion and publicity. Topics covered include the communication process, determination of promotional objectives,
promotional budgeting, media planning, measuring effectiveness and ethical issues. Prerequisite: MKTG 706 or equivalent.

MKTG 753. Global Marketing. 3 Credits.
This course is designed to provide a set of conceptual and managerial tools to students for undertaking marketing of products and services on a global scale. The topics covered in the course include economic and financial dimensions in global marketing, social and cultural aspects of the global market environment, regional market characteristics, political and legal issues in global marketing. A significant portion of the course is devoted to the study of competitive analysis and competitive strategy for the global markets, marketing information systems, various strategies for entering global markets, organization, planning and control of global marketing, and marketing mix decisions (product, price, promotion, and distribution) in a global setting. Prerequisite: MKTG 706 or equivalent.

MKTG 754. Digital and Social Media Marketing. 3 Credits.
This course aims to provide the theoretical knowledge and practical insights for integrating social media and digital marketing into the traditional marketing mix, understanding and engaging social media consumers, and monitoring and measuring the results of these efforts. Students will learn how to manage digital and social media, be able to understand the psychology of online consumers, the impact of digital and social media on traditional marketing strategy, review the digital and social media marketing process, critically evaluate the various social media platforms and online content, and successfully measure the impact of digital marketing efforts. Specific topics to be discussed include: Search Engine Marketing, Google AdWords, Google Analytics and Facebook Insights. Prerequisite: MKTG 706 or equivalent.

MKTG 755. Customer Relationship Management. 3 Credits.
This course offers a comprehensive introduction to the strategy and tactics of customer relationship management (CRM). Particular emphasis is given toward identifying the key strategic principles inherent in the customer-centric focus that underlies a successful CRM program. Topics include: Fundamentals of CRM strategy, marketing metrics, customer profitability analysis, choice modeling, techniques for evaluating model performance and applications of CRM to marketing campaign management. Students will be instructed on how to implement the CRM techniques using various software tools and real-world data. Prerequisite: MKTG 706.

MKTG 810. Marketing Management. 3 Credits.
This course is designed to equip students with basic concepts associated with the marketing function. Principal objectives are to discuss the role of marketing in an organization, to describe the processes of buyer behavior and the impact of these processes on marketing decisions, to develop an understanding of approaches used to segment markets and factors influencing the selection of target markets, and to develop an understanding of elements of the marketing mix (product, price, communications, channels) and factors affecting decisions in these areas. This course is open only to students in the full-time MBA program.

MKTG 820. Marketing Intelligence. 3 Credits.
This course is an introduction to marketing research. The emphasis will be on providing an understanding of the value of marketing research and the tools to engage in the process. The objectives are to understand research planning, types of research and design, to determine appropriate sampling, data collections methods and research methodologies, to understand, apply and interpret fundamental concepts of data analysis and analysis software. Topics covered will include the research process, understanding data sources, qualitative research, measurement and scaling issues, questionnaire design, analysis of data, and the research report. Prerequisite: DSCI 810 and MKTG 810. This course is open only to students in the full-time MBA program.

MKTG 830. Understanding Customers. 3 Credits.
This course is designed to review behavioral science concepts applicable to understanding behavior of consumers in the marketplace. It investigates the specific processes of consumer decision making and purchasing, and the implications these have for marketing strategy. The course will cover the internal and external factors that affect consumer decision-making processes; the steps consumers go through before, during and following the purchase decision; theories of attitude formation, methods of attitude-measurement and attitude change. Topics include the effect of external factors (cultures, social class, reference groups, family), effect of internal factors (needs, motives, personality), the extended decision-making process, information processing, learning and memory, attitude formation and change, low-involvement decision making, post-purchase behavior, ethical/social issues, effects on marketing strategy. Prerequisite: MKTG 820. This course is open only to students in the full-time MBA program.

MKTG 832. Marketing Services and Managing Customer Relationships. 3 Credits.
This course is designed to fill the knowledge gap between managing products and managing services. It will help students understand the unique needs and challenges faced by service companies (and those manufacturing companies that rely on services for their differential advantage) in a complex global environment. The primary objective is to provide a set of conceptual and managerial tools for effective management and marketing of services. Broad topics include services characteristics, managing customer expectations, understanding service consumption behavior, service strategy, segmentation & positioning, creating service offerings, service quality, managing demand for services, service pricing. Topics pertaining to customer relationships include acquiring and retaining customers, customer profitability & lifetime value, customer satisfaction measurement, relationship marketing, and service recovery. Topics pertaining to managing service employees include empowering service employees, employees as living brands; globalization of services; and ethical issues in services marketing. Prerequisite: MKTG 820. This course is open only to students in the full-time MBA program.

MKTG 895. Graduate Seminar in Marketing: _____.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted.

MKTG 901. Introduction to Research Methods in Marketing. 3 Credits.
This course introduces key concepts that are critical in marketing academic and scientific research, as well as identifying the pros and cons of research methods and how multiple methods can complement each other. Students will gain an understanding of how the nature of research questions dictate the research methodology(ies) to most effectively address questions.

MKTG 951. Consumer Behavior. 3 Credits.
This seminar provides an overview of the current theories and methodological approaches associated with consumer behavior research. Main topics of the course include attention and information search, consumer memory structure, consumer knowledge, inference making, motivation/goal, consumer attitude and persuasion, judgment and decision making, self-perception and regulation, culture's influence on consumer behavior, and affect/emotion/mood. The content will be based on literature from multiple disciplines including marketing, psychology, sociology, and economics. Students will be required to critically analyze and synthesize the literature, with a view to formulate research proposals.
on issues that interest them. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MKTG 952. Introduction to Marketing Models. 3 Credits.
There is a rich tradition of using models to represent and analyze various marketing phenomena. An illustrative list of topics include: examining first-mover advantages, understanding response to price, analyzing new pricing formats, compensation design, interaction between marketing investments and stock market response, consumer surplus analysis, allocation of marketing resources, and decision support systems. Against this backdrop, the objectives of this course are two-fold: (i) to provide a non-technical overview of various modeling approaches employed in marketing, and (ii) apply one or more of these approaches to generate new research. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MKTG 953. Marketing Communications. 3 Credits.
This course focuses on fundamentals of marketing communications with a heavy emphasis on message-memory. Some of the topics covered in this course include memory (e.g., elderly adults). Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MKTG 954. Pricing and Strategy. 3 Credits.
This seminar exposes students to the various analytical approaches to understand and model pricing phenomena by examining the classic as well as contemporary works on pricing. The students will learn how to model strategic interactions in the marketplace using game theory and other analytical tools as well as theories such as auction theory, prospect theory, and mental accounting. Some of the topics covered in this course include price discrimination mechanisms, price as a competitive tool (e.g., entry deterrence), price as a promotional strategy, role of price in channel structure and strategy, and effect of price on consumer choice. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MKTG 955. Managerial Issues in Marketing. 3 Credits.
The course is designed to examine issues that influence managerial decision-making such as product management, behavioral pricing, marketing communications, and marketing models. Instructor’s research interest would dictate the emphasis on a particular topic. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MKTG 956. Consumer Judgment and Decision Making. 3 Credits.
The purpose of this course is to develop a solid foundation for critical thinking and research on judgment and decision making aspects of consumer behavior, marketing, and business in general. This graduate seminar may cover a wide range of behavioral research topics relevant to the study of judgment and decision making, such as utility theory, prospect theory, costly signaling theory and conspicuous consumption, sex differences in behavior and consumption, and hormonal influence on consumption. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MKTG 957. Affect, Cognition and Hedonic Consumption. 3 Credits.
This seminar takes a comprehensive look at the current and prior research on affect and cognitive processes, and specifically examines various aspects of consumption, both pleasant and unpleasant. Topics covered in this course include but are not limited to positive emotions, mindfulness, and various social, emotional, and cognitive determinants of consumer satisfaction, happiness, and well-being. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor.

MKTG 995. Doctoral Seminar in Marketing: _____ 2-5 Credits.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

MKTG 996. Independent Study for Doctoral Students. 1-5 Credits.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team.

MKTG 999. Doctoral Dissertation. 1-12 Credits.
(V) Individual research work. Graded on a satisfactory progress/limited progress/no progress basis.

Courses

SCM 230. Introduction to Business Analytics, Information Systems, and Supply Chain Management Professions. 1 Credits.
In this course, we focus on the Business Analytics, Information Systems, and Supply Chain Management professions and cover a variety of topics. Topics include, but are not limited to, career opportunities; the importance of professional mentorship; professional membership with groups/associations; appropriate industry certifications; graduate education content, timing, and opportunities; the role of career broadening experiences; and ethical dilemmas within the professions. We emphasize both current practice and projected industry trends and involve guest speakers. This course is cross-listed with IST 230 and SCM 230. Check with your Major to see which 230 course it requires or recommends (ACCT 230, BSAN 230, BUS 230, FIN 230, IST 230, MKTG 230 or SCM 230) and when it encourages you to take it. (Same as BSAN 230 and IST 230.) Prerequisite: BUS 210 or concurrent enrollment.

SCM 305. Survey of Decision Making in Business. 3 Credits.
An introduction to decision making under the uncertainty encountered in business and in everyday life. Covers selected topics in probability, statistics, economics, and operations research, and their application to complex problems in financial management, marketing, operations management, supply chain management, and quality management; as well as risks affecting everyday life, such as personal decisions in regard to careers, leadership, and wealth management. (Not open to students with credit in BBA 305, SCM 310 or SCM 311.) Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1.

SCM 310. Management Science and Operations Management. 3 Credits.
Introduces some of the most widely used models from management science in business decision making. Topics include decision making under uncertainty, resource allocation models, and production and operations management. Prerequisite: Prior completion or co-enrollment in DSCI 202 or BSAN 202.

SCM 311. Management Science and Operations Management, Honors. 3 Credits.
Honors treatment of this course introduces some of the most widely used models from management science in business decision making. Topics include decision making under uncertainty, resource allocation models, and production and operations management. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: Prior completion or co-enrollment in DSCI 202 or BSAN 202.

SCM 400. Special Topics in Supply Chain Management: _____ 1-5 Credits.
SCM 410. Introduction to Supply Chain Management. 3 Credits.
This course introduces the student to supply chain management. Students are presented the key concepts of supply chain management, the application of these concepts and are provided with the managerial knowledge of supply chain management through class discussions and case studies. Students discover the impact of information technologies, strategic alliances and logistics on supply chain management and the performance implication of supply chain management. Prerequisite: SCM 310 or SCM 311, FIN 310 or FIN 311, and MKTG 310 or MKTG 311. Enrollment restricted.

SCM 402. Procurement and Supplier Management. 3 Credits.
This course involves the study of supply management. Topics covered include the purchasing process, the role of the procurement function within the company, and the evaluation, selection and development of suppliers. The course is also designed to emphasize the importance of negotiations and managing contracts. Prerequisite: SCM 401. Enrollment restricted.

SCM 403. Logistics, Transportation and Warehouse Management. 3 Credits.
This course discusses the area of physical distribution management of supply chains. Attention is given to managerial responsibilities such as inventory management, network and transportation design, warehousing, closed-loop supply chains, and facility planning. Prerequisite: SCM 401. Enrollment restricted.

SCM 404. Management of Integrated Information System/ERP. 3 Credits.
This course provides an introduction to Enterprise resource planning (ERP) systems. We will evaluate the functions, processes and data requirements of business functions in an integrated framework. The objectives of the course include (1) understanding data needs of different business functions; (2) understanding alternative information systems solutions and the problems in independent information systems and; (3) understanding ERP systems as solutions to integration. Not open to students with credit in IST 401. Prerequisite: IST 202 or BSAN 310. Enrollment restricted.

SCM 410. Capstone in Supply Chain Management. 3 Credits.
Integrating and apply the theories, concepts, and methods taken in previous supply chain management courses through the use of readings, case studies, projects, and industry speakers. Prerequisite: SCM 401 and IST 202 or BSAN 310. Enrollment restricted.

SCM 415. Data Analysis and Forecasting. 3 Credits.
This course is concerned with the analysis and interpretation of data encountered in business and economics. One goal of the course is to develop skills in the analysis of data that can be used to solve problems, students are likely to encounter on the job. The course attempts to develop an attitude toward data analysis that can be usefully applied in a wide variety of real life situations. A variety of statistical tools are covered. In particular, the multiple regression model is covered with an emphasis on how the model can be used in situations involving economic data. Data analysis techniques are illustrated with examples and case studies using computers. This course is in the management sciences and operations management area. Not open to students with credit in BSAN 415. Prerequisite: SCM 310 or SCM 311. Enrollment restricted.

SCM 416. Supply Chain Modeling and Optimization. 3 Credits.
Design, develop, and use computer decision models for analysis of supply chain operations; computer intensive coursework emphasizing spreadsheet applications. Prerequisite: SCM 401. Enrollment restricted.

SCM 418. Modeling and Risk Analysis. 3 Credits.
An introduction to the concepts, methodologies, and applications of risk and analysis and modeling. This course is designed primarily to develop practical modeling skills with spreadsheet software. To accomplish this, material from across the finance discipline will be covered as well as material from the supply chain management discipline. Examples from corporate finance, investments, financial derivatives, real estate, personal finance, and supply chain management methods will be used to demonstrate modeling. Not open to students with credit in FIN 418 or FIN 460 or BSAN 418. Prerequisite: FIN 310 or FIN 311. Enrollment restricted.

SCM 420. Customer Focused Operations Service Management. 3 Credits.
The purpose of this course is to build the conceptual framework which drives an organization striving to operate in a customer-focused mode. This requires an integration of basic principles of marketing and operations in order to define the value-added in each of an organization’s products and/or services, to use this information to define the value-added in work, and to use this definition to improve the actual work. To do this effectively, requires leadership, empowerment, focused data, and a system view. The basic principles of each requirement will be discussed as well as their integration into a unified whole. Not open to students with credit in BSAN 420. Prerequisite: SCM 310 or SCM 311 and MKTG 310 or MKTG 311. Enrollment restricted.

SCM 425. Customer Relationship Management. 3 Credits.
This course offers a comprehensive introduction to the strategy and tactics of customer relationship management (CRM). Particular emphasis is given toward identifying the key strategic principles inherent in the customer-centric focus that underlies a successful CRM program. Topics include: Fundamentals of CRM strategy, marketing metrics, customer profitability analysis, choice modeling, techniques for evaluating model performance and applications of CRM to marketing campaign management. Students will be instructed on how to implement the CRM techniques using various software tools and real-world data. (Same as BSAN 465 and MKTG 465.) Not open to students with credit in BSAN 465 or MKTG 465 or SCM 425 or MKTG 400 - Customer Relationship Management. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

SCM 453. Retailing, Distribution Channel and Supply Chains. 3 Credits.
This course exposes students to the many facets of retailing and provides a basic understanding of retailing concepts. At the completion of the course, students will understand the challenges of starting, managing, expanding, and succeeding in retailing. The course covers major functions that comprise the retailing task, including the decision tools used, planning, strategy formulation, implementation and control in retail management. The content of the course should be useful for students interested in working in the retail sector, desiring to work for companies that interface with retailers and/or for those with a general management and entrepreneurial interest. Not open to students with credit in MKTG 453. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

SCM 458. Marketing, Supply Chains, and Geographic Information Systems. 3 Credits.
This course is designed to engage students in critical discussions, analysis and use of Geographic Information Systems (GIS) in a variety of business sectors. Additionally, the course will introduce students to GIS systems used to make business decisions through hands-on and
applied assignments. Upon completion, student will understand how GIS and related systems are applied to and utilized by businesses, as well as how to employ basic GIS programs to help solve a variety of business problems. Not open to students with credit in MKTG 458 or GEOG 458. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted.

SCM 460. Supply Chain Analytics. 3 Credits.
A Supply Chain Management perspective for leveraging and implementing business analytics tools & concepts. Primary points of focus include Supply Chain applications, data set collection, information systems infrastructure requirements and optimizing SCM efficiency & value. Course format to include lecture, in-class lab work (R or Python), case studies and guest lecturers. (Same as BSAN 460.) Prerequisite: SCM 401 or BSAN 440.

SCM 500. Individual Research in Supply Chain Management. 1-5 Credits.
Individual study of selected topics in supply chain management not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: Approval of proposed plan of study by the instructor. Enrollment restricted.

SCM 701. Introduction to Supply Chain Management. 3 Credits.
This overview covers a wide set of topics to develop a strategic view of supply chain management and to illustrate its interdisciplinary nature. The course has the following principal objectives: to introduce the strategic and operating issues and decisions involved in managing the operational and supply chain processes within and across firms; to understand the global and interdisciplinary nature of supply chain management; to understand the concept of supply chain coordination by managing information and inventory. Topics covered in the class include supply chain functions, forecasting and demand management, inventory management, managing information flows in supply chains, globalization and outsourcing, and supply chain technologies. Prerequisite: Corequisite: DSCI 701. Enrollment restricted.

SCM 702. Procurement and Supplier Management. 3 Credits.
This course involves the study of supply management. Topics covered include the purchasing process, the role of the procurement function within the company, and the evaluation, selection and development of suppliers. The course is also designed to emphasize the importance of negotiation and managing contracts. Prerequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers.

SCM 703. Transportation, Logistics Systems. 3 Credits.
This course discusses the area of physical distribution management of supply chains. Attention is given to managerial responsibilities such as network design, transportation methods, inventory management, warehousing, packaging and materials handling. Prerequisite: Corequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers.

SCM 704. Information Systems for Supply Chain Management. 2 Credits.
This course provides an introduction to Enterprise Resource Planning (ERP) systems. We will evaluate the functions processes and data requirements of business functions in an integrated framework. The objectives of the course include (1) understanding data needs of different business functions; (2) understanding alternative information systems solutions and the problems in independent information systems and; (3) understanding (ERP) systems as solution to integration. Prerequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers.

SCM 705. Project Management. 2 Credits.
An introduction to formal project management methods and practices presented in a fashion that builds upon experiences of the students in the class. At the end of the class, each student should: understand the formal project management discipline and methodology, appreciate at a high level different approaches to project management and when each might most effectively be applied, understand the importance and benefits of standard methodologies, be able to adapt such methods to unique situations, and learn the key features of some project management software.

SCM 706. Change Management. 2 Credits.
This course provides students an understanding of the processes driving change in the business world as well as the strategic implementation required of leaders that enables them to effectively manage their organizations in a changing environment. It is concerned with the development of specific actions, decisions and communications in times of change. The course is specifically designed to focus on changes in the environment for business, but in a way that business professionals and/or non-business people can be equally effective in the learning environment. Prerequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers.

SCM 710. Capstone in Supply Chain Management. 3 Credits.
Integrating and applying the theories, concepts, and methods taken in previous supply chain management courses through the use of readings, case studies, project and industry speakers. Prerequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers.

SCM 718. Operations and Supply Chain Management. 3 Credits.
This course covers a wide set of topics to develop both strategic and analytical skills in supply chain management. The course will provide a conceptual framework and a set of analytical tools to analyze, coordinate, and improve organizational processes. Objectives of the course include and introduction to the strategic and operating issues and decisions involved in managing the operational and supply chain processes within and across firms; an understanding of the concept of supply chain coordination by managing information and inventory; and to develop a basic understanding of purchasing, supplier relationship management, and outsourcing. Topics include process and cycle time analysis, lean/JIT production system, six sigma, inventory management, managing information flows in supply chains, and purchasing and supply management. Prerequisite: DSCI 706 or BSAN 706.

SCM 720. Procurement and Supplier Management. 2 Credits.
This course provides the students with an understanding of procurement, strategic sourcing and supplier management. The course has the following principal objectives: to introduce the basic concepts, terminology, tools of purchasing; to provide a conceptual framework of the trends and developments in global sourcing; to understand the techniques of negotiations; and to develop understanding of supplier relationship management. Topics covered in the course include purchasing process, policy, and procedures, purchasing law and ethics, supply management, supplier selection and evaluation, supplier relations management, global sourcing, and negotiations. Prerequisite: SCM 701 or SCM 820. Enrollment restricted.

SCM 721. Logistics and Distribution Management. 2 Credits.
This course addresses the theory and practice of designing distribution channels and logistics systems. The course has the following principal objectives: to understand how logistics management generates value to customers; to establish a sound foundation in transportation, fulfillment, and facility location to support global supply chains; and to develop the ability to design logistics systems and formulate integrated supply chain strategy, so that all components are not only internally synchronized but also tuned to fit corporate strategy, competitive realities and market needs. Topics covered include transportation & fulfillment, inventory management, facility location, warehousing, and global logistics. Prerequisite: SCM 701 or SCM 820. Enrollment restricted.
SCM 722. Information Systems for Supply Chain Management. 2 Credits.
This course examines information technology (IT) applications in the field of supply chain management, focusing on such issues as the breadth of IT tools and products available to support the planning, implementation and operation of supply chains, the process by which specific applications are selected by companies, and the implementation process. Among the other topics addressed in the course are the integration of IT systems between internal and external supply chain partners and the IT problems typically facing a company post acquisition. Prerequisite: SCM 701 or SCM 820. Enrollment restricted.

SCM 723. Lean Six Sigma. 2 Credits.
This course addresses the theory and practice of continuous process improvement through lean thinking and six sigma quality improvement. The course has the following principle objectives: to understand the process associated with continuous improvement in manufacturing and service organizations; to understand common tools that are useful in continuous improvement in manufacturing and service organizations; and to gain experience in the practice of continuous improvement. Topics covered include using the scientific method in continuous improvement; tools to understand and reduce variability like control charts, capability analysis, stratification analysis, Pareto analysis, etc; and tools to implement lean thinking like Kanban (pull systems), Takt time (process pacing to customer demand), one piece flow, Jodoka (error proofing); Heijunka (product leveling). Prerequisite: DSCI 701 or DSCI 810. Enrollment restricted.

SCM 820. Operations and Supply Chain Management. 3 Credits.
This introductory course covers a wide set of topics to develop both strategic and analytical skills in supply chain management. The course will provide a conceptual framework and a set of analytical tools to analyze, coordinate, and improve organizational processes. Objectives of the course include an introduction to the strategic and operating issues and decisions involved in managing the operational and supply chain processes within and across firms; an understanding of the concept of supply chain coordination by managing information and inventory; and to develop a basic understanding of purchasing, supplier relationship management, and outsourcing. Topics include process and cycle time analysis, lean/JIT production system, six sigma, inventory management, managing information flows in supply chains, and purchasing and supply management. This course is open only to students in the full-time MBA program.

SCM 831. Distribution Channels and Global Operations. 3 Credits.
This course addresses the theory and practice of designing distribution channels and global supply chains. The objectives of the course are to provide an understanding of different channels of distribution and the complexities of global operations along with their associated risks and rewards. The course will address topics in transportation, fulfillment, and facility location to support global supply chains. It will develop the ability to design logistics systems and formulate integrated supply chain strategy. The topics also include channels of distribution, warehousing, and global operations management. Prerequisite: SCM 820. This course is open only to students in the full-time MBA program.

SCM 895. Graduate Seminar in Supply Chain Management: 1-5 Credits.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course.

SCM 898. Independent Study for Master’s Students. 1-6 Credits.
Individual study of selected current problems in the field of supply chain management to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment.

SCM 995. Doctoral Seminar in Supply Chain Management. 2-5 Credits.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor.

SCM 998. Independent Study for Doctoral Students. 1-5 Credits.
Individual study of selected current problems in the field of business to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team.

SCM 999. Doctoral Dissertation. 1-12 Credits.
Individual research work. Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Science in Business
Since its founding in 1924, the School of Business at the University of Kansas has been committed to shaping tomorrow’s business leaders. The business school holds the gold standard of accreditation in business education, the Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/), for both the school and its accounting programs. With its focus on teaching and research, the KU School of Business bridges theory and practice to know where business is going. Learn more at business.ku.edu (https://business.ku.edu/).

Undergraduate Admission to the School of Business
There are two paths for admission to the School of Business:

1. Direct freshman admission
2. Competitive admission

Freshman Admission
Applicants accepted at KU with an interest in business are eligible for direct admission into the School of Business based on an index score calculated using high school GPA and ACT composite or SAT math and evidence-based reading and writing scores. The index score is calculated as ACT/10 + HS GPA = index score. The required index score is at least 5.55. Students should refer to the official ACT/SAT concordance table when comparing SAT scores to ACT scores. Directly admitted freshman must start the sequence of B.S.B. professionalism courses in their first semester.

Note: Freshman admission is not an option for students who change their major to business or pre-business after the start of their first semester of college at KU or elsewhere. Such students should apply for competitive admission.

Competitive Admission
Students who do not meet direct admission standards, transfer students, and students who start out at KU pursuing other majors can be admitted to the B.S.B. degree program through competitive admission. Current KU students applying for competitive admission process should apply for
a change of school during the semester in which they will complete the minimum requirements for admission. Applicants who are not currently KU students must first apply to KU and submit official transcripts for all previous colleges and universities attended to the Office of Admissions (http://admissions.ku.edu/) along with the application. To facilitate advising, current KU students applying for competitive admission are encouraged to submit change of school requests by September 15 for spring admission and by February 15 for fall admission. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Competitive admission to the B.S.B. program is subject to the following requirements:

- Sophomore standing (>30 credit hours completed)
- Completion of three pre-admission foundation courses or their equivalents, which must be taken for a grade:
  - ECON 142 - Principles of Microeconomics
  - ACCT 200 - Financial Accounting 1
  - BSAN 202 - Statistics or DSCI 202 - Statistics
- Greater than or equal to 2.5 GPA in overall, overall KU, professional, and KU professional coursework
- When the School of Business must accept grades of credit/no credit (contrary to standing School policy), an assigned grade of "credit" will be treated as a "C" or 2.0 for admission purposes. Exceptions and petitions may be considered on a case-by-case basis.
- Upon admission to the B.S.B. program students must enroll in BUS 150 - Foundations of Business and begin or continue the required B.S.B. professionalism course sequence.

**Academic Probation Policy**

Students admitted to the B.S.B. degree program by direct, competitive, or transfer admission whose overall GPA, overall KU GPA, professional GPA, KU professional GPA, or within-major GPA falls below 2.5 will be placed on academic probation. Following imposition of probation students must meet with their academic advisors to develop and implement an academic performance improvement plan. Probation will be rescinded after the subsequent academic term if relevant GPAs improve to above these thresholds; absent academic performance improvement students may be dismissed and may not register for School of Business courses with restricted enrollment except by special permission. Petitions for readmission will be evaluated on evidence of improvement in academic performance.

**Transfer Students**

Transfer students may find it to their advantage to enter KU before the junior year, because some required courses may be available only at KU. Students attending Kansas community colleges should consult their advisors and a KU School of Business academic advisor about course equivalents and articulation agreements to ensure progress toward the degree. The Office of Admissions provides a guide (http://credittransfer.ku.edu/) to how classes at your current or former school transfer to KU. You must submit official transcripts of course work completed to the Office of Admissions (http://admissions.ku.edu/) before a final determination can be made.

At least 30 hours of junior/senior professional course work must be completed at KU (courses in residence) for the student to be eligible for graduation. Only transfer grades of C- or higher apply toward graduation from the KU School of Business.

**64-Hour Rule**

A maximum of 64 hours of community college course work can be applied toward a KU business degree. All subsequent credit hours earned at a community college or other 2-year institution add an equivalent number of hours to the 120-hour minimum required to graduate.

**10-Year Rule**

Transfer business credits are limited to a 10-year span in which they can be considered equivalent to a KU School of Business course and satisfy any corresponding requirement. This 10-year limit begins on the date of completion of the credit. After 10 years, transfer business credits are treated as elective business credit, and a course repeat or update may be necessary.

**Tentative Evaluation of Credit**

Students are advised to work with an academic advisor if they are considering enrolling in a class outside of KU. Before enrolling in any non-KU courses, students should confirm the course transfers over properly in Credtran (https://admissions.ku.edu/apply/credit-transfer/) or submit course syllabi for approval by using the transfer credit evaluation form for business classes located here (https://business.ku.edu/student-and-academic-services/requests-petitions-transfer-credit-substitutions/).

**Readmission**

Students must submit an application for readmission to KU if their lapse in attendance is one semester or more. See the Office of Admissions for more information. Students may be readmitted to the School of Business if they left the school in good standing and it has been less than 5 years since they last attended.

**5-Year Rule**

If a student does not complete the business degree within 5 years of last attendance, the student must reapply through the competitive admission process. Students also must complete degree requirements in effect at the time of readmission to the business school regardless of the initial program.

**Dismissal**

Students who have been dismissed from the school must reapply through the competitive admission process.

**Bachelor of Science in Business Degree Requirements**

The School of Business offers a Bachelor of Science in Business (B.S.B.) with majors in accounting, business administration, business analytics, finance, information systems, management and leadership, marketing, and supply chain management. Also offered are a co-major in international business and various discipline-specific minors and certificate programs. Each major consists of the following components: general education courses, business foundation classes, international dimension requirement, major courses, and advanced business electives to satisfy requirements of specific majors, minors, and certificates. Degree program requirements are subject to change. It is the student’s responsibility to stay informed of requirements. To receive the B.S.B.
degree students must complete the degree requirements in effect at the
time they are admitted to the school.

**General Education Requirements**

All business majors are required to take the following course, which may
satisfy KU Core requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 322</td>
<td>Audience Centered Public Speaking in the Workplace</td>
<td>3</td>
</tr>
<tr>
<td>MATH 115</td>
<td>Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 125</td>
<td>Calculus I</td>
<td></td>
</tr>
<tr>
<td>PSYC 104</td>
<td>General Psychology</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Natural Science with lab</td>
<td></td>
</tr>
</tbody>
</table>

**Requirements for All Majors**

**Professionalism course sequence**

Starting with first-year students as of fall 2020, all business majors
must complete the required sequence of the following one-credit-hour
professionalism courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS 110</td>
<td>Introduction to Professionalism</td>
<td>1</td>
</tr>
<tr>
<td>BUS 120</td>
<td>Emerging Topics in Business</td>
<td>1</td>
</tr>
<tr>
<td>BUS 210</td>
<td>Career Management and Planning</td>
<td>1</td>
</tr>
<tr>
<td>BUS 310</td>
<td>Internships with Impact</td>
<td>1</td>
</tr>
<tr>
<td>BUS 410</td>
<td>Professionalism Capstone</td>
<td>1</td>
</tr>
</tbody>
</table>

In addition to these courses, students must complete a 230-level
introductions to professions course appropriate to their respective majors,
listed below.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introduction to the Accounting Profession</td>
<td>1</td>
</tr>
<tr>
<td>BUS 230</td>
<td>Introduction to Professions in Business</td>
<td>1</td>
</tr>
<tr>
<td>BSAN 230</td>

</tr>
<tr>
<td>MKTG 230</td>
<td>Introduction to the Marketing Profession</td>
<td>1</td>
</tr>
</tbody>
</table>

**Foundation Courses**

The following courses are considered foundation courses and must be
completed by all majors:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS 150</td>
<td>Foundations of Business</td>
<td>3</td>
</tr>
<tr>
<td>ECON 142</td>
<td>Principles of Microeconomics</td>
<td>3</td>
</tr>
</tbody>
</table>

**Core Courses and Capstone Course**

In addition to the business foundation courses, all majors must complete
the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 201</td>
<td>Managerial Accounting I</td>
<td>3</td>

<td></td>
</tr>
</tbody>
</table>

**International Dimension Requirement**

The International Dimension Requirement (IDR) is required of all students
graduating from the KU School of Business. To complete the IDR,
students must choose one of the following options:

**OPTION 1. FOREIGN LANGUAGE**

Complete through the fourth level (intermediate II) of courses in a modern
foreign language or earn equivalent proficiency as determined by the
appropriate language department. International students who have
completed the English proficiency requirement through the Applied
English Center (https://aec.ku.edu/) or receive passing TOEFL score
according to business school TOEFL Policy may use this to fulfill Option 1.

**OPTION 2. INTERNATIONAL STUDIES**

6 credit hours of courses completed in one or a combination of the
following categories:

1. (a) Study abroad credit hours from any study abroad program
   approved by KU.

Full PDF 2023-2024 131
2. (b) Contemporary regional/international studies/international business courses must be selected from a list available online (https://business.ku.edu/) and may be double-counted to meet General Education requirements. Courses in this category may be double-counted toward the corresponding business major and/or concentration.

Majors

Within the Bachelor of Science in Business degree, students may earn major(s) in accounting, business administration, business analytics, finance, information systems, management and leadership, marketing, or supply chain management. Each major has core and elective major courses which must be completed.

Program guides are available on the school's website (https://business.ku.edu/undergraduate-programs/degree-programs/).

Accounting Major

Accounting majors must complete four required courses (12 hours) and three ACCT elective courses (9 hours) with a grade-point average of at least 2.5. Students wishing to pursue academic eligibility for the Certified Public Accountant (CPA) exam or admittance to a Master of Accounting program must choose ACCT 330 (Introduction to Taxation) and ACCT 543 (Introduction to Auditing) as two of their three elective courses.

<table>

</tr>
</tbody>
</table>

Business Administration Major

This major offers a broad interdisciplinary approach. Discovering solutions to complex problems in a globalized marketplace requires a multidisciplinary and integrated approach. The major prepares students for a variety of job markets and career paths. The program is flexible, allowing students to develop in-depth skills in such areas as accounting, business law, finance, information systems, management and leadership, marketing, and supply chain management.

The major requires 21 hours of advanced business credit from courses numbered 320 or above. The 21 hours must be distributed across at least three of the following prefixes, with a minimum of 3 hours in each of the three prefixes selected: ACCT, BE, BLAW, BSAN, DSCI, ENTR, FIN, IBUS, IST, MGMT, MKTG, and SCM.

The student must satisfy all business graduation requirements for the B.S.B. and have a grade-point average of at least 2.2 in the 21 advanced business credit hours selected for the major.

Business Analytics Major

The goal of the Business Analytics program is to prepare students with the requisite knowledge to implement data gathering, cleansing, integration, and modeling tasks as well as data asset analysis for business applications. The program will build on the basic business core courses by adding the necessary courses in the Statistics, Data Domain, and Business Analytics Domain. These courses will cover statistical methods, data warehousing, dimensional modeling, big-data analytical methods, and visualization tools and techniques and will introduce topics such as data mining and predictive analytics. Students will have the skills and experience to create and manage big data initiatives as well as associated business processes facilitating large-scale business data analytics in organizations. Graduates will be able to serve as architects, change agents and analytics tool suite operators for business and government.

In addition to providing students with fundamental big data resource and infrastructure management skills, the program is also designed to provide graduates with exposure to applied areas (specifically Information Systems, Marketing or Supply Chain Management) through specific electives. Graduates will work as applied business analysts, data architects, data visualization experts, big data analysts, and data change agents. The areas of healthcare, public administration, mobile services, retail, manufacturing, and consulting service industries are all areas where analytics talent will provide significant business value.

The Business Analytics major must complete the following core courses with a grade-point average of at least 2.5:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSAN 326</td>
<td>Database Management Systems</td>
<td>3</td>
</tr>
<tr>
<td>BSAN 415</td>
<td>Data Analysis and Forecasting</td>
<td>3</td>
</tr>
<tr>
<td>BSAN 440</td>
<td>Foundations in Business Analytics</td>
<td>3</td>
</tr>
<tr>
<td>BSAN 450</td>
<td>Data Mining and Predictive Analytics</td>
<td>3</td>
</tr>
<tr>
<td>BSAN 480</td>
<td>Business Analytics Capstone</td>
<td>3</td>
</tr>
<tr>
<td>Two additional Business Analytics approved electives</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Finance

Finance majors must complete the following core courses with a grade-point average of at least 2.5:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 321</td>
<td>Intermediate Accounting for Finance</td>

</tr>
<tr>
<td>or FIN 416</td>
<td>Corporate Finance, Honors</td>
<td></td>
</tr>
<tr>
<td>FIN 400 or higher electives</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Information Systems Major

The information systems major exposes students to a range of studies focused on the effective use of information technologies in settings typical of business, governmental, and not-for-profit organizations. Students gain a comprehensive understanding of specific technologies as well as an appreciation of challenges involved with the application of such technologies in dynamic environments. The major equips graduates with both technical and managerial skill sets needed to begin careers in major
business and governmental entities or with major information systems consulting firms.

The information systems major must complete the following core courses with a grade-point average of at least 2.5:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>IST 320</td>

<td>Database Management Systems</td>
<td>3</td>
</tr>
<tr>
<td>IST 330</td>
<td>Fundamentals of Business Computer Networking</td>
<td>3</td>
</tr>
<tr>
<td>IST 410</td>
<td>IT Project Management</td>
<td>3</td>
</tr>
<tr>
<td>IST 320 or higher electives</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

### Management and Leadership Major

The management and leadership major gives students the knowledge and skills to be successful leaders and managers of people and organizations. Students learn to design and modify organizational structure, strategy, and processes to enhance organization performance in a socially and ethically responsible manner. They learn how to influence and direct change through a better understanding of organization politics, vision, and values. Students learn to influence and lead others effectively through skill development in communication, motivation, and conflict resolution. They develop self-awareness and an appreciation for individual differences, leading to more successful work relations. They learn to lead and follow in team settings and to use team-based problem-solving skills. Students learn to create competent and committed teams and organizations through the use of effective systems for employee hiring, development, compensation, and performance management. They also learn about the challenges of competing globally, including how to adapt organizational structures, processes, and functions such as production, marketing, finance, and human resources so that they function more effectively cross-culturally. Student learning is enhanced through supporting activities such as clubs, consulting projects, case competitions, and study abroad opportunities.

The Management and Leadership degree will require the completion of 21 hours of coursework with 12 hours of foundational courses described below. These courses must be completed with a grade-point average of at least 2.5:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 405</td>
<td>Ethical Decision Making in Business</td>

<td>3</td>
</tr>
</tbody>
</table>

### Marketing Major

The marketing major gives students the concepts and tools needed to succeed as marketing managers skilled in the creation, evaluation, and refinement of marketing programs that lead to valuable exchanges between channel partners, firms, and customers. Core concepts and tools are primarily provided through four required foundation courses: marketing, marketing research, marketing strategy, and digital marketing. The major offers numerous electives to reflect the breadth of the marketing function and to allow students to tailor their programs to individual preferences and career goals. Such opportunities as the marketing club, consulting projects, case competitions, and study abroad further enhance the learning experience.

The marketing major must complete the following core courses with a grade-point average of at least 2.5:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKTG 310</td>
<td>Marketing</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 311</td>
<td>Marketing, Honors</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 415</td>
<td>Marketing Research for Managers</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 435</td>
<td>Marketing Strategy</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 443</td>
<td>Digital Marketing and Social Media</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 400 or higher electives</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>
Supply Chain Management Major

Supply chain management professionals integrate the flow of materials, finances, and information from suppliers, manufacturers, wholesalers, distributors, and retailers to the final consumer and back again. The major gives students the basic skills to do this work. The demand for professionals in the field is rapidly growing as firms realize improved efficiency from good SCM practices. The field continues to evolve to become a proactive, strategic enterprise, often with global partners. Students typically have opportunities for internships and other experiential activities with businesses while they are in the program. The major offers a set of required core courses and electives.

The supply chain management major must complete the following core courses with a grade-point average of at least 2.5:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCM 401</td>
<td>Introduction to Supply Chain Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 402</td>
<td>Procurement and Supplier Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 403</td>
<td>Logistics, Transportation and Warehouse Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 404</td>
<td>Management of Integrated Information System/ERP</td>
<td>3</td>
</tr>
<tr>
<td>SCM-related electives</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

**Co-Major in International Business**

**International Business, Co-Major**

To earn a co-major in international business, a student must co-major with another B.S.B. major and successfully complete a total of at least 21 credit hours distributed as follows:

- **Required Knowledge:**
  - 9 credits from three required courses:
    - IBUS 410
    - IBUS 480
    - IBUS 462

- **Regional/Functional Knowledge:**
  - 6 credits from two of the following course options:
    - IBUS 415
    - IBUS 425
    - FIN 420
    - MKTG 440
    - MGMT 434

- **Elective:**
  - 3 or more credits from the following:
    - One or more additional courses from the Regional/Functional list above.
    - IBUS 300 or IBUS 400 or IBUS 500.
    - Course from School of Business IDR list (300 level or above).
    - Other related course as approved by the designated IB faculty member.
    - Approved Business School study abroad program.

- **Language Requirement:**
  - 4 semesters of a foreign language or proficiency equivalency (0 – 12 credits).

- **Study Abroad Requirement:**
  - Summer or semester study abroad program (minimum 6 weeks).

**Suggested Course Sequencing**

Students in the School of Business should consult with their academic advisor to plan and execute their paths toward desired degrees. Each student's circumstances (e.g., direct versus competitive admission, transfer credits, initial math placement, plans for study abroad, desired major, desire to achieve double-major or minor degrees, etc.) are unique. Consequently the scheduling suggestions identified below must be tailored to each student's circumstances with the assistance of an academic advisor.

</tbody>
</table>

Study Abroad

B.S.B. students frequently study abroad in year-long, semester-long, summer, and short-term study abroad programs -- while making progress to a four-year degree. Study abroad advisors in the School of Business are skilled at identifying suitable programs, helping students apply to study abroad programs, ensuring that credits earned abroad can be eligible for transfer to meet KU or School of Business degree requirements, and helping students apply for scholarships. Students are encouraged to visit [https://business.ku.edu/study-abroad](https://business.ku.edu/study-abroad) for additional information about study abroad opportunities and resources.

Graduation Requirements

Hours Required for Graduation

A minimum of 120 credit hours is required for graduation. Of the 120 hours, a student must earn at least 45 junior/senior hours and 30 residency hours (business courses numbered 300 or higher) completed within the KU School of Business.

- The 120-hour minimum to graduate is increased by the following:
  - More than 4 hours in physical education courses (HSES 112 and below).
  - More than 4 hours of music organization courses.
  - Any repeated courses for which a student has already received credit.
  - All subsequent credits earned at a community college or other 2-year institution after a student has completed a total of 64 community college credit hours.

Grade-Point Average Required for Graduation

To be eligible to graduate from the School of Business with any major, a student must earn a grade-point average of 2.5 in

1. Total hours attempted from all schools (including Independent Study through KU Continuing Education),
2. All professional (business courses including macro and micro economics) courses attempted from all schools,
3. Total hours attempted at KU, and
4. All professional (business courses including macro and micro economics) hours attempted at KU.

Students majoring in accounting, business analytics, finance, information systems, management and leadership, marketing, and supply chain management majors and co-majors in international business also must earn minimum grade-point averages of 2.5 in their respective major courses.

Independent Study Through KU Continuing Education

After admission to the school, students may complete up to 30 hours of Independent Study through KU Continuing Education. Prior approval from the school is recommended.

University Honors Program

Prebusiness majors who meet admission requirements for the University Honors Program (http://www.honors.ku.edu/) are strongly encouraged to participate in it. Its small, challenging classes provide an excellent opportunity for business majors to develop a strong base in liberal arts and sciences. Because its requirements fit well with the school’s distribution requirements, the program fits easily into the normal 4-year program.

Undergraduate Business Honors Program

The Business Honors Program allows an elite cadre of undergraduate business school students to participate in a special set of enrichments. Graduating with business honors requires that the students admitted to the programs complete at least 12 hours of business honors classes. They will also be expected to be deeply involved in the life of the school, routinely assuming leadership positions and taking advantage of experiential learning opportunities.

Bachelor of Business Administration

Business Administration B.B.A.

The Bachelor of Business Administration (B.B.A) exposes students to a broad range of topics such as business law, economics, finance, management, marketing and international business. The accredited BBA program curriculum provides a strong professional education within a broad liberal arts context.

Program outcomes include strong verbal and written communication skills, an aptitude for technology, data analysis proficiency, a global perspective on business and the ability to maintain good professional relationships. Flexible course schedules make it easy for full-time employees to earn their degrees as part-time students.

Accredited

The KU School of Business is proud to be accredited by the Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/). AACSB accreditation is the gold standard of quality in the world of business education.

Requirements

Ideal candidates are individuals wanting to gain business theory, practical knowledge and professional skills in preparation for careers as business leaders. Those interested should have earned an associate’s degree or equivalent credit hours and seek to complete requirements for a bachelor’s degree.
This program is funded by the Johnson County Education and Research Triangle (http://edwardscampus.ku.edu/johnson-county-education-research-triangle/) initiative.

B.B.A. Admission

Admission is competitive. Students should apply during the semester in which they will complete the minimum requirements for admission and after gaining admission to KU. The application is available on the Edwards Campus website (http://www.edwardscampus.ku.edu/bba/). Deadlines are December 1 for spring, May 1 for summer, and July 1 for fall entry. Students who meet the minimum admission standards are not guaranteed admission.

Prebusiness Preparation

Students planning to enter the School of Business should work toward completing pre-admission requirements first. Every student contemplating a business major in the School should enroll in a mathematics course during the first semester. Students must take the following courses before admission to the school:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 200</td>
<td>Fundamentals of Financial Accounting</td>
<td>4</td>
</tr>
<tr>
<td>ACCT 201</td>
<td>Managerial Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ECON 142</td>
<td>Principles of Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 144</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>Various</td>
<td>MATH 365, COMS 356, BIOL 570, SOC 380, etc., for example</td>
<td></td>
</tr>
</tbody>
</table>

See the Office of Admissions (http://admissions.ku.edu/) for more information.

Minimum Requirements

To satisfy minimum standards for admission to the School of Business, a student must

1. Complete 60 college credit hours including ACCT 200, ACCT 201, statistics (with prerequisite MATH 101), ECON 142, ECON 144, and PSYC 104 (or their equivalents).

Because admission is competitive, students who meet the minimum admission standards may not be admitted.

Guaranteed admission to the School of Business is possible when achievement of a grade-point average of 3.0 in all professional course work (business and economics) has been met at the time of application (in addition to the minimum requirements listed above).

Transfer Students

Transfer students may find it to their advantage to enter KU before the completion of their associate's degree, because some required courses may be available only at KU. Students attending Kansas community colleges should consult their advisors and a KU School of Business advisor about course equivalents and articulation agreements to ensure progress toward the degree. The Office of Admissions provides a guide (http://credittransfer.ku.edu/) to how classes at your current or former school transfer to KU. You must submit official transcripts of course work completed to the Office of Admissions (http://admissions.ku.edu/) before a final determination can be made.

At least 30 hours of junior/senior School of Business course work must be completed at KU (courses in residence) for the student to be eligible for graduation. As of fall 2008, only transfer grades of C- or higher apply toward graduation from the KU School of Business.

KBOR Transfer Pilot

Beginning with students admitted during the 2019-2020 academic year, the Kansas Board of Regents has initiated a transfer pilot program with Johnson County Community College under which a maximum of 75 hours of community college coursework may be applied toward a KU business degree at the University of Kansas Edwards Campus. A minimum of 45 credit hours must be earned at the University of Kansas in courses designated at the 300 level and above, and all degree requirement must be satisfied.

10-Year Rule

Transfer business credits are limited to a 10-year span in which they can be considered equivalent to a KU School of Business course and satisfy any corresponding requirement. This 10-year limit begins on the date of completion of the credit. After 10 years, transfer business credits are treated as elective business credit, and a course repeat or update may be necessary.

Tentative Evaluation of Credit

Before enrolling in a non-KU course, students may submit KU’s standard Request for Tentative Evaluation of Credit form to Student and Academic Services (https://business.ku.edu/services/student-and-academic-services/) for approval.

Readmission

Students must submit an application for readmission to KU if their lapse in attendance is one semester or more. See the Office of Admissions (https://admissions.ku.edu/) for more information. Students may be readmitted to the School of Business if they left the School in good standing and it has been less than 5 years since they last attended.

5-Year Rule

If a student does not complete the business degree within five years of last attendance, the student must reapply through the competitive admission process. Students also must complete degree requirements in effect at the time of readmission to the business school regardless of the initial program.

Dismissal

Students who have been dismissed from the School must reapply through the competitive admission process.

Bachelor of Business Administration Degree Requirements

KU Edwards Campus

This program for students who want to attain practical knowledge, business theory, and professional skills in preparation for careers as business leaders. It covers a broad range of topics including business law, economics, finance, management and leadership, marketing, and analytics. Calculus is not required.

This program responds to the needs and goals of non-traditional part-time students. The degree requires the completion of 39 credit hours of
BBA courses. The 18 hours of required courses are listed below, as well as available BBA electives to complete the additional 21 hours of BBA courses. To complete the degree, 45 hours must be at the junior/senior level, with at least 30 hours completed at KU. In addition to the credit hours listed below, School of Business graduation requirements apply.

- BBA 500 Individual Research in Business

Please visit the B.B.A. website (http://edwardscampus.ku.edu/overview-bachelors-business-administration-bba/) for further information.

Graduation Requirements

Grade-Point Average Required for Graduation

To be eligible to graduate from the School of Business, a student must earn a grade-point average of 2.2 in:

1. Total hours attempted from all schools (including Independent Study through KU Continuing Education).
2. All professional (business and economics) courses attempted from all schools.
3. Total hours attempted at KU, and
4. All professional hours attempted at KU.

B.B.A. candidates must achieve a 2.5 grade-point average in the 21 credit hours that include BBA 303, BBA 308, and the 5+ advanced business electives.

Tentative Evaluation of Credit

Before enrolling in a non-KU course, students must submit KU’s standard Request for Tentative Evaluation of Credit form to Student and Academic Services (https://business.ku.edu/services/student-and-academic-services/) for approval.

Independent Study Through KU Continuing Education

After admission to the school, students may complete up to 30 hours of Independent Study (http://www.independentsudy.ku.edu/) through KU Continuing Education. Prior approval from the school is recommended.

Minor in Business

Introduction

In the School of Business, students acquire a rigorous education that prepares them for positions in a dynamic and competitive global environment.

The University of Kansas School of Business is accredited by the Association to Advance Collegiate Schools of Business International (http://www.aacsb.edu/).

The Minor in Business is open to any KU undergraduate student.

Requirements for the Minor in Business

There are four (4) required courses. Students must complete two (2) elective classes. The minor requires completion of 18 hours (6 courses) with a cumulative grade-point average of 2.0 or higher in these courses. All business minor courses must be taken for a grade; credit/no credit is not permitted.

Students must declare the business minor by completing the declaration of minor form (http://business.ku.edu/degrees/business/minor/declare/) and are strongly encouraged to do so as early as possible.

Jack Lockton Undergraduate Certificate in Insurance & Risk Management
An initial required course, FIN 208 Principles of Insurance & Risk Management, is the gateway into the certificate program. To ensure required numeracy and critical thinking skills, ECON 142 Microeconomics (which satisfies KU Core goal 3S and is required for all BSB degree students) is a prerequisite to FIN 208. An additional course, FIN 424 Operational Risk Management, is also required. FIN 424 has FIN 310 Finance – required of all BSB degree students -- as a prerequisite.

An additional two courses from a specified list of eight courses in finance, marketing, management, and mathematics complete the course requirements. To be awarded the certificate students must complete the two required and two elective classes with a minimum GPA of 2.5.

Undergraduate Certificate in Professional Selling

1. Course Sequence

University’s Core requirement + the following three courses:

- MKTG 305/MKTG 310/MKTG 311: To provide an overview of the marketing process, and articulate the role of the sales force in the marketing mix. Offered every semester.
- Two courses specific to professional selling skills and sales management, as described below.
- MKTG 315/MKTG 425: SALES FORCE MANAGEMENT (Prerequisites: for MKTG 315 - MKTG 305 or MKTG 310, for MKTG 425 - MKTG 310 or 311). Enrollment in MKTG 315 restricted to non-business students. Enrollment in MKTG 425 restricted to business students.
- MKTG 316/MKTG 426/JOUR 611: PROFESSIONAL SELLING SKILLS (Prerequisites: for MKTG 316 - MKTG 305 or MKTG 310, for MKTG 426 - MKTG 310 or 311). Enrollment in MKTG 316 restricted to non-business students. Enrollment in MKTG 426 restricted to business students.

2. Additional Requirements

As part of the certificate, students will also be expected to participate in development activities such as attendance at workshops, summits, simulations, and contests. While some of these will be a part of the second course on professional selling, others will be in addition to the coursework.

Master of Business Administration

When you earn your MBA from The University of Kansas, you’ll receive a well-rounded education that not only supports your career goals, but also incorporates both the theoretical background and practical experience needed to succeed in today’s ever-changing global economy. Two types of MBA programs are offered at KU: 1) The Full-Time MBA based in Lawrence for those seeking a career change. 2) The Online MBA, for those seeking career enhancement.

The Full-Time Program includes 48 hours of coursework and can be completed in 16 months (3 semesters, plus a summer internship). The program is cohort-based and special emphasis is placed on experiential learning. Elective options are available in Finance, Marketing, Supply Chain Management, and Business Analytics. New students are admitted each fall semester. New students are admitted in the fall semester.

The Online MBA program includes 42 hours of coursework that can be completed in about two and a half years. The program is lock-step, with students taking two courses per semester. New students are admitted fall, spring, and summer.

The KU MBA programs are designed for business leaders, from the recent college graduate to the seasoned executive. If you are looking to advance, re-brand, change industries, or start your own business, a KU MBA will open the doors to new possibilities.

Baccalaureate Preparation

The Master of Business Administration program is open to graduates from areas other than business administration. It also provides an opportunity for continued study in management for graduates from a school or department of business. The only prerequisite coursework is college algebra or its equivalent.

Admission to MBA Programs

MBA programs are open to those who have earned a baccalaureate degree from an accredited college or university and whose undergraduate academic records, scores on the required standardized examination, and prior work experience indicate that they have the capability to complete the program. A Bachelor’s degree in Business Administration, specifically, is not required - other areas of study are also eligible. Admission to all programs in business is reviewed by the MBA Admissions Committee. Those who have not completed a baccalaureate degree are not eligible for enrollment in MBA courses.

Applicants for MBA graduate programs must take the Graduate Management Admission Test (http://www.mba.com/us/the-gmat-exam/register.aspx) administered by Pearson VUE. The GMAT is administered in most foreign countries and by appointment at designated testing centers throughout the United States. The test typically is taken during the academic year before the term for which admission is sought.

Regular Admission to MBA Programs

The admission committee looks at each applicant holistically for evidence of preparedness for graduate and MBA study. The minimum requirements for consideration include:

1. Bachelor’s Degree (or international equivalent) from an accredited university with a 3.0 cumulative GPA,
2. GMAT score of 500 or above (or an equivalent GRE score), and
3. A completed application.
4. Quality and length of post-graduate work experience,
5. Evidence of leadership.
6. Evidence of analytical ability.

A complete MBA application includes:

1. Completed application form
2. Official transcript with GPA and conferral of a Bachelor’s Degree (or international equivalent) from an accredited school
3. Resume or CV
4. Official GMAT or GRE or a waiver request
5. Personal Statement
6. Application fee
7. For international applicants only, IELTS or TOEFL score.

Additional Admission Notes:

PROVISIONAL ADMISSION TO THE MBA PROGRAM

Provisional admission may be offered to applicants who meet all requirements for admission but have a bachelor’s degree (or international...
equivalent) with a 2.0-3.0 cumulative GPA from an accredited university. Provisional admission affords one semester of enrollment in the MBA program, at the conclusion of which a 3.0 GPA must be earned or the student is subject to dismissal.

GRE vs GMAT Scores
The GMAT exam is preferred. However, we will accept a GRE score and review it based on a GMAT concordance.

International Applications:
Students whose native language is not English or who have not completed a degree from a college or university in the United States, Great Britain, Canada, or Australia are required to provide English proficiency scores to earn regular admission into the MBA and obtain a waiver from the AEC. International students in F-1 and J-1 status must also comply with Federal immigration requirements by pursuing a full course of study each semester to maintain their legal status. Students who require an F-1 or J-1 visa are not eligible for admission into the Working Professional MBA and/or Online MBA Part-Time Programs.

GMAT/GRE Waiver Policy for Professional MBA Programs
A GMAT or GRE score report is generally required as part of the application process for the Full Time MBA Program. It is used by the Admissions Committee to help assess an applicant's quantitative and analytical readiness for graduate study and the academic rigor of the KU MBA program. However, under special circumstances, candidates may request a GRE/GMAT waiver.

GMAT Waivers are automatically granted for students with a terminal degree. The GMAT is waived for individuals that have completed a J.D, M.D, D.O. or Ph.D. degree.

Check with the department for more information and instructions on how to submit a GMAT waiver.

Provisional Admission to the MBA Program
Provisional admission may be offered to applicants who meet all requirements for admission but have a bachelor's degree (or international equivalent) with a 2.0-3.0 cumulative GPA from an accredited university. Provisional admission affords one semester of enrollment in the MBA program, at the conclusion of which a 3.0 GPA must be earned or the student is subject to dismissal.

GMAT waivers are automatically granted for students with a terminal degree. The GMAT is waived for individuals that have completed a JD, MD, DO or PhD degree.

Check with the department for more information and instructions on how to submit a GMAT waiver.

Joint Degree Programs

Dual MBA and MS Business Analytics

The purpose of this dual degree program is to meet the demand for analytical skill sets in management. With an MS in Business Analytics (https://business.ku.edu/graduate-programs/ms-business-analytics/) offered on campus, we have the unique opportunity to join this high demand area of specialization with the MBA. By using the MS as a specialization, we can pair the programs in a 4-semester sequence. The program will be offered on the Lawrence Campus and will consist of 34 credit hours of MBA and 30 hours of MS coursework. The dual program will take two years to complete and includes a summer internship.

Dual MBA and Bachelors of Engineering

The KU MBA and Bachelors of Engineering bridge program (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/undergraduate-engineering-bridge-program/) allows engineering students to begin taking MBA courses in their senior year of the engineering undergraduate program. Bridge program students will earn a Bachelor of Science from the School of Engineering and an MBA from the School of Business in about nine to ten semesters. A good fit for the program is a student on-pace to graduate in the spring of their senior year, prepared for an academically rigorous senior year, and meets the admission requirements of the Full-Time MBA program. The program will be offered on the Lawrence Campus and consist of 44 credit of MBA coursework. Students will complete the MBA coursework in a year and a half.

Dual MBA and Pharm.D.

This dual degree program allows students to earn an MBA from the School of Business (http://business.ku.edu/) and a Doctor of Pharmacy (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/mba-pharmd/) from the School of Pharmacy (http://pharmacy.ku.edu/) by extending their professional graduate study. The MBA/Pharm.D. program is combined with the Full-Time MBA Program on the Lawrence Campus. Students will take 34 hours to complete the MBA portion of this dual degree. Students gain competence and expertise in the complementary fields of business management and pharmacy.

Prospective students must submit an application and be accepted to the School of Pharmacy first. Students must meet the prerequisites of and be accepted by both schools. Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

Dual MBA and JD

This program combines in 4 years of study the 3-year Juris Doctor (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/mba-jd/) program offered by the School of Law (http://law.ku.edu/) and the Full-Time MBA program offered by the School of Business. It entails 40 hours of MBA coursework and 76 hours of law coursework. It is for students who plan to engage in corporate law practice or enter business using law training as background. It offers training in the convergent fields of business management and law.

Students must meet the admission requirements of each school and should be admitted by both the School of Law and the School of Business. The Law School Admission Test and the Graduate Management Admission Test are required. A student who decides to enter the program after beginning the first year in the School of Law or in the MBA program should discuss the plan with the associate dean or program director of each school as early as possible. Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

The School of Business follows general Graduate Studies policy requiring a 3.0 cumulative grade-point average for all coursework counted toward any master’s degree. The School of Law requires a minimum cumulative grade-point average of 2.0 (C) in all law school work. Grades received in any law courses credited toward fulfillment of the MBA degree requirements are incorporated into the MBA grade-point average, which ultimately must be 3.0 for the awarding of the MBA degree.

Dual MBA and M.Arch. Degree Program

The Master of Business Administration/Master of Architecture dual degree program is designed for students intending to pursue a career in architecture, development, construction, and/or business. Students completing the dual degree program earn an MBA from the KU School of Business (https://business.ku.edu/) and an M.Arch. from the KU School of Architecture and Design (http://arcd.ku.edu/). Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

Students complete 106 credit hours in the Master of Architecture (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/m-arch/) program and 34 credit hours in the School of Business. Prospective dual degree students must already be students in the Master of Architecture program and must apply and be accepted by the School of Business. New students must complete the architecture curriculum before starting the MBA curriculum and must declare their intention before completing the first year of the architecture curriculum. Typically, the MBA is completed during the final year of study. Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

Dual MBA and MD

This dual degree offered in partnership with the KU Medical Center allows MD students an opportunity to earn an MBA in one year. The MBA/MD program (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/mba-md/) is offered full-time at the Lawrence campus. Students will take 34 hours to complete the MBA portion of this dual degree. Students gain competence and expertise in the complementary fields of business management and medicine.
Prospective students must submit an application and be accepted to the School of Medicine first. Students must meet the prerequisites of and be accepted by both schools. Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

**Dual MBA and Physical Therapy (DPT)/Occupational Therapy (OT)**

The purpose of this joint degree program is to meet the demand for business courses in the Physical Therapy (DPT) (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/mba-dpt/) and Occupational Therapy (OT) (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/#MBA-ODT) programs and prepare physical therapists to run their future practices with business efficacy. The program will be offered on the Lawrence Campus and will consist of 34 credit hours of MBA coursework. Students will complete the MBA portion in one academic year. The DPT and OT curriculums will remain unchanged.

Prospective students must submit an application and be accepted to the School of Health Professions first. Students must meet the prerequisites of and be accepted by both schools. Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

**MBA with a Graduate Certificate in Petroleum Management**

The MBA program with a graduate certificate in Petroleum Management (https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/mbadot/mbapm/) from the School of Engineering (http://www.engr.ku.edu/) is offered full time on the Lawrence campus. It meets the requirements of active-duty U.S. Naval Supply Corps officers who usually are assigned to billets requiring this training upon completion of study at KU. Other students interested in the intersection of the management of fuels and business are also encouraged to apply to this program. Students typically take a minimum of 43 hours of MBA coursework and 15 hours of Engineering coursework during this two-year program.

**Master of Business Administration Degree Requirements**

**Full-Time MBA Degree Program**

The Full-Time MBA program features an emphasis on cohort learning. The community-building begins each August with orientation and is integrated throughout the program. The Full-Time MBA program in Lawrence requires 48 credit hours over 16 months. Students are admitted to the program only once a year in the fall semester. Requirements are designed for a person holding a baccalaureate degree in any field, with no specific course requirements in business or related areas. Transfer credit is not accepted to this program. Due to the accelerated nature of this program, students who receive a failing grade in a course or have less than 3.0 after the first semester may be dismissed upon recommendation of the MBA team.

The 48 hours in the MBA program consist of 30 credit hours in ten core classes, 6 credit hours of application classes, and 12 credit hours of specialized track classes. Prior to the beginning of the final semester, students select a track of specialized track classes.

Master of Accounting

Overview

Earning a Master of Accounting (MAcc) degree not only expands a student's education and job options, it amplifies earning potential and career advancement. On average, over 90 percent of graduates secure a job by graduation. From coast to coast, in every major metropolitan area of the country, even the world, KU MAcc graduates find success.

For students who have never considered accounting, a MAcc can be an excellent gateway into a career they’re passionate about through a route they never thought to explore. The MAcc program welcomes students from many different backgrounds who are looking to enhance their professional options.

The KU MAcc program offers a challenging curriculum, acclaimed faculty and opportunities for experiential learning that provide a comprehensive graduate program. The University of Kansas School of Business is accredited by the Association for the Advancement of Collegiate Schools of Business International (http://www.aacsb.edu/) (AACSB). Not only is the School of Business as a whole AACSB-accredited, but the accounting program also holds the distinction.

Less than 5 percent of the 15,000 business programs worldwide earn an AACSB accreditation, and even fewer programs are dually accredited. Attending an AACSB-accredited program ensures students receive relevant coursework taught by highly qualified faculty who are working on the most current issues in the profession.

Two Master of Accounting programs are offered at KU: 1) the Full-Time program in Lawrence and 2) the Working Professional program based at the Edwards Campus in Overland Park.

Baccalaureate Preparation

The Full-Time Master of Accounting program offers a 30 credit hour degree for students with baccalaureate degrees in accounting equivalent to that required for accreditation by the AACSB. Deficiencies in the undergraduate program result in additional hours being required for the degree.

The Working Professional Master of Accounting program length varies based upon the pace at which students complete classes. Most students with baccalaureate degrees in accounting equivalent to that required for accreditation by the AACSB can complete the program in 5 semesters. Deficiencies in the undergraduate program result in additional hours being required for the degree.

Admission to the Master of Accounting Programs

Full-Time Program

The Full-Time MAcc program is open to graduates who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records, scores on required standardized examinations, and/or prior work experience indicate that they have the capability to complete the program. Admission to the program is limited on the basis of space, facilities, faculty, and other resources.

Applicants from schools other than the University of Kansas can contact the MAcc office to verify whether they are required to submit Graduate Management Admission Test (GMAT) scores.

Working Professional Program

The Working Professional MAcc program is open to working professional graduates who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records, and prior work experience indicate that they have the capability to complete the program. Admission to the program is limited on the basis of space, facilities, faculty, and other resources.

Applicants for the Working Professional program are not required to take the GMAT. Applicants are required to complete an interview with the MAcc Admission Committee to assess work experience and capability to complete the program. Applicants will be contacted to schedule the interview subsequent to review of application by committee.

Both Programs

All applications for admission to the Full-Time MAcc program must include:

1. Transcripts: Non-KU graduates must submit OFFICIAL paper or electronic transcripts as part of the application process. KU students may upload a copy of their “KU Advising Report” in lieu of an official transcript.
2. The score from the applicant's GMAT, if applicable.
3. Proof of English proficiency, if required: Students whose native language is not English or who have not completed a degree from a college or university in the United States, Great Britain, Canada, or Australia must obtain and submit satisfactory scores on the Test of English as a Foreign Language or International English Language Testing System (IELTS).
4. Two letters of recommendation.
5. Pledge to support the Honor System of the School of Business.
7. Three essays.
8. $65 application fee ($85 for international students).

Completed applications are reviewed by committee, and action is taken on them periodically throughout the year. Each applicant is notified by letter of the action taken on his or her application.

Graduate applications (http://graduate.ku.edu/) are submitted online. For detailed application steps and answers to frequently asked questions, please visit the Getting Admitted section of our Full-Time (https://business.ku.edu/graduate-programs/master-of-accounting/getting-admitted/) program website (https://business.ku.edu/degrees/accounting/maacc/apply/) or our Working Professional (https://edwardscampus.ku.edu/macc-program-application-steps/) program website.

All admissions to any graduate program in business are subject to and in accordance with all rules and regulations. See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.
Curriculum

Full-Time Program

The Full-Time MAcc program offers four different tracks of coursework, allowing students to specialize in assurance, tax, advisory/consulting services or corporate accounting. Each track requires 30 credit hours, but the number and type of required courses and electives in each track varies. Students with a non-accounting undergraduate degree will take an additional set of classes prior to their track coursework.

Assurance (Audit)

The Assurance (Audit) track curriculum prepares students for a career in external audit at public accounting firms. External auditors examine financial records and assess internal controls to ensure a company’s financial statements are presented fairly and in accordance with generally accepted accounting principles.

Tax

The Tax track curriculum prepares students to meet the demands of a career in taxation, including positions in public accounting or corporate tax. There are many opportunities to specialize as a tax professional, including state and local tax, international tax, transfer pricing and estate and trust planning.

Advisory/Consulting Services

The Advisory/Consulting Services track curriculum helps students develop the skills necessary to become successful advisors in a complex and diverse business world. Advisory and consulting services careers vary greatly and include risk management, IT audit, performance improvement, fraud and forensics, business valuation and mergers and acquisitions.

Corporate

The Corporate track curriculum prepares students for a career outside of public accounting, including private industry, not-for-profit and government. Typical entry-level positions are in the areas of corporate accounting and internal audit.

See the Curriculum (https://business.ku.edu/graduate-programs/master-of-accounting/curriculum/) page of our website for more detailed track information.

Working Professional Program

The Working Professional MAcc program offers students at least two classes per semester. Although a specific track is not required for Working Professional students, courses offered are similar to those in the Full-Time Corporate track. Students are required to complete a total of 30 credit hours.

Students with a non-accounting undergraduate degree will take an additional set of classes prior to their track coursework.

Contact Information

For more information about the KU Master of Accounting programs, please see our Full-Time website (http://www.macc.ku.edu) and/or our Working Professional website (http://edwardscampus.ku.edu/macc/) or email kuaccounting@ku.edu.

Master of Science in Business Analytics

Business analytics aims to turn big data into actionable intelligence. To that end, business analysts use a variety of statistical and quantitative methods, computational tools, and predictive models – as well as their knowledge of finance, the corporate world, and the economy – to make data-driven decisions. With the emergence of today’s data-driven revolution, the Business Analytics Master’s program trains participants in how to uncover highly relevant data insights using advanced analytics and technologies. A joint report by PwC and the Business-Higher Education Forum indicates that data science and analytics job postings will rise 2.72 million by 2020, and revealed that by 2021, 69 percent of employers will seek candidates with data science and analytics skills.

The goal of the Business Analytics program is to prepare students with the requisite knowledge to implement data gathering, cleansing, integration, and modeling tasks as well as data asset analysis for business applications. The program will build on the basic business core courses by adding the necessary advanced courses in the Statistics, Data, and Business Analytics Domains. These courses will cover statistical methods, data warehousing, dimensional modeling, big-data analytical methods, and visualization tools and techniques and will introduce topics such as machine learning and predictive analytics. Students will have the skills and experience to create and manage big data initiatives as well as associated business processes facilitating large-scale business data analytics in organizations. Program graduates will not only drive decision-making across companies and government agencies, but will also act as catalysts for growth.

Admission to MS in Business Analytics

MS programs are open to those who have earned a baccalaureate degree from an accredited college or university and whose undergraduate academic records, scores on the required standardized examination, and prior work experience indicate that they have the capability to complete the program. Admission to all programs in business is reviewed by the Admissions Committee.

Applicants for Business graduate programs must take the Graduate Management Admission Test (http://www.mba.com/us/the-gmat-exam/register.aspx) administered by Pearson VUE. The GMAT is administered in most foreign countries and by appointment at designated testing centers throughout the United States. The test typically is taken during the academic year before the term for which admission is sought.

Regular Admission

The admission committee looks at each applicant holistically for evidence of preparedness for graduate study. The minimum requirements for consideration include:

1. Bachelor’s Degree (or international equivalent) from an accredited university with a 3.0 cumulative GPA,
2. GMAT score (or GRE score)
3. A completed application.
4. Quality and length of post-graduate work experience,
5. Evidence of leadership.
6. Evidence of analytical ability.
A complete application includes:

1. Completed application form
2. Official transcript with GPA and conferral of a Bachelor’s Degree (or international equivalent) from an accredited school
3. Resume or CV
4. Official GMAT or GRE or a waiver request
5. Application fee
6. For international applicants only, IELTS or TOEFL score.

**Additional Admission Notes:**

**KU Business Undergraduate GMAT Waiver for the MS in Business Analytics Program**

A GMAT waiver may be granted to students that have earned or will earn a KU business undergraduate degree before starting the Masters in Business Analytics program. KU undergraduate business students must have an overall GPA of 3.5 or higher and have earned a B or better in all DSCI, BSAN, IST, and Math courses taken. A GMAT waiver does not guarantee admission into the MS in BSAN program. If you believe you may qualify for a GMAT waiver, reach out to Jinae Krieshok (jinae@ku.edu) for GMAT waiver submission instructions.

**Provisional Admission**

Provisional admission may be offered to applicants who meet all requirements for admission but have a bachelor’s degree (or international equivalent) with a 2.0-3.0 cumulative GPA from an accredited university. Provisional admission affords one semester of enrollment in the program, at the conclusion of which a 3.0 GPA must be earned or the student is subject to dismissal.

**GRE vs GMAT Scores**

The GMAT exam is preferred. However, we will accept a GRE score and review it based on a GMAT concordance.

**International Applications**

Students whose native language is not English or who have not completed a degree from a college or university in the United States, Great Britain, Canada, or Australia are required to provide English proficiency scores to earn regular admission and obtain a waiver from the AEC. International students in F-1 and J-1 status must also comply with Federal immigration requirements by pursuing a full course of study each semester to maintain their legal status.

**Curriculum of the proposed program**

The Business Analytics program is designed on the fundamental principles of Business Analytics.

Themes should include: Hands on learning, projects and real world case studies. Working with leading companies to solve Business Problems and challenges with Business Analytics.

Also, graduates will not only learn to work with multiple tools, data sets, and solutions, but will learn to tell the value of Business Analytics to better business decision-making and overall business success.

The main student cohort for the Business Analytics program will be students that will be full-time for two consecutive semesters with an optional summer session. The core courses in the curriculum include:

24 total credits – **Core** common for all students

- BSAN 713: Data Management in Analytics (3 cr.)
- BSAN 710: Statistical Modelling (3 cr.)
- BSAN 720: Data and Visual Analytics (3 cr.)
- BSAN 740: Analytical Optimization (3 cr.)
- BSAN 730: Large Scale Data Analytics (3 cr.)
- BSAN 750: Data Mining and Machine Learning (3 cr.)
- BSAN 705: Business Analytics Strategy (3 cr.)
- BSAN 780: Analytics Capstone (capstone project) (3 cr.) (Can be done as Internship as well)

6 total credits – **elective courses (choose 2)**

- BSAN 735: Data Security and Analytics (3 cr.)
- BSAN 715: Analytics Application Development (3 cr.)
- BSAN 745: Advanced Machine Learning and AI (3 cr.)
- BSAN 760: Accounting Analytics (3 cr.)
- BSAN 770: Healthcare Analytics (3 cr.)
- BSAN 775: Financial Risk Analytics (3 cr.)
- BSAN 777: Marketing Analytics (3 cr.)

Total Credit Hours: 30

Students pursuing a master’s degree in Business Analytics will develop the following knowledge and skills:

- creative thinking and critical reasoning
- advanced data analysis skills
- statistical analysis and visualization skills
- strategic communication
- strategy development
- ethics
- written and oral communication

While the program does not require an internship, students may articulate credit for relevant internship experiences. No more than three hours of credit will be articulated for internship credit toward the requirements for the graduate degree.

Through our strong AI Board, representing top the top firms regionally, we are actively working to create a pipeline for projects, jobs and internships that will benefit students in both the Undergraduate and Graduate Business Analytics Programs.

Through this strategic partnerships with industries and corporate sponsors that will allow for a variety of experiential learning opportunities in the core and elective courses. Real world examples, cases and data will be used throughout the program to provide unique meaningful learning and relevant experiences in and out of the classroom.
Master of Science in Organizational Leadership

Candidates must complete a minimum of 30 semester hours of graduate credit. Students must fulfill the following requirements:

1. Earn credit in required courses toward a Master’s Degree in Organizational Leadership.
2. Complete a capstone course.
3. Complete a comprehensive project in Organizational Leadership, prepared and evaluated by at least three Graduate Faculty members in the area.

It is expected that students at the Command and General Staff College (CGSC) will transfer 6 credit hours to KU to satisfy the elective requirements below. Non-military students or those not enrolled at the CGSC will take these 6 elective hours through the KU Online MBA program.

Undergraduate prerequisites that were not completed during the undergraduate program must be taken during initial enrollment and do not count toward fulfillment of the degree requirement of 30 hours.

30 Credit Hour Program (online and classroom classes):

3 total credits – required online course

- MGMT 706: Managing People (3 cr.)

9 total credits – online courses (students must complete three)

- ACCT 706: Accounting (3 cr.)
- DSCI 706: Statistics (3 cr.)
- BE 718: Economics (3 cr.) or FIN 706: Finance (3 cr.)
- MKTG 706: Marketing (3 cr.)

12 total credits – classroom courses common for all students

- MGMT 7xa: Strategy and Organization Design (2 cr.)
- MGMT 705: Ethical Decision Making in Business (2 cr.)
- MGMT 7xb: Management Skills and Teams (2 cr.)
- MGMT 710: Leadership Philosophy and Practice (2 cr.)
- MGMT 728: Managing Strategic Direction and Change (2 cr.)
- MGMT 7xc: Leadership Capstone (capstone project) (2 cr.)

6 total credits – elective courses

- Recognized in coordination with Army University for elective coursework completed by resident Command and General Staff Officer Course students.
- Other students must complete elective coursework as part of the MS-OL program. These courses may be completed at the Edwards Campus or through the Online MBA.

30 Total Credits

Applicants must meet all admissions requirements for certificate-seeking graduate admissions as defined by the University’s policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/).

Master of Science in Supply Chain Management and Logistics

The Master of Science degree program is for students who have completed a baccalaureate degree in business or a related degree as prescribed by the Association to Advance Collegiate Schools of Business and want to do concentrated study in a specific business area. Deficiencies in a student’s undergraduate program result in additional hours being required for the degree. These are determined before or at the time of initial enrollment.

Supply chain management is only available to U.S. Army majors, or major-eligible captains stationed at Fort Leavenworth in Leavenworth, Kansas. The program is lock-step, 24 credit hours from KU and must be completed in 2 semesters. Six hours of credit are afforded students from concurrent course work at Command and General Staff College.

Admission to Master’s Programs

All graduate programs are open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records, scores on the required standardized examination, and prior work experience indicate that they have the capability to complete the program. Admission to all programs in business is limited on the basis of space, facilities, faculty, and other resources.

All applications for admission to the M.S. programs must include

1. Graduate application (http://graduate.ku.edu/ku-graduate-application/); (http://graduate.ku.edu/ku-graduate-application/)
2. 1 official transcript of each college and university record;
3. Scores on the TOEFL if required;
4. A current résumé; and

Completed applications are reviewed by committee, and action is taken on them periodically throughout the year. Each applicant is notified by Graduate Studies of the action taken on his or her application.

All admissions to any graduate program in business are subject to and in accordance with all rules and regulations. See Admission (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=) in the Graduate Studies section of the online catalog for more information.

Submit your graduate application online (http://graduate.ku.edu/ku-graduate-application/). Send original transcripts of all completed college and university course work and all other requested application materials to the school:

M.S. Degree Requirements

Candidates must complete a minimum of 30 semester hours of graduate credit. Students must fulfill the following requirements:

1. Earn credit in required courses toward a MS in Supply Chain Management.
2. Complete a capstone course.
3. Pass a comprehensive examination in the concentration, prepared and evaluated by at least three Graduate Faculty members in the area.

Financial Aid

Students admitted to the Ph.D. program receive financial assistance. Contingent on satisfactory progress and availability of funds, the school provides financial assistance to most students for the first 4 years of their programs. Financial assistance is available in varying degrees through assistantships, fellowships, grants, loans, and employment.

Assistantships

During the first year, most doctoral students are appointed as research or teaching assistants. During 2022-23, a graduate teaching assistantship paid about $2,300 a month, and a 50-percent-time graduate research assistantship paid about $2,300 a month plus tuition and fees. Appointment as a graduate teaching assistant at 40-percent time or more entitles the student to a 100-percent tuition waiver.

For non-native speakers of English, an appointment as a graduate teaching assistant is only made after the student passes the SPEAK test or the Test of Spoken English administered by KU’s Applied English Center (https://aec.ku.edu/).

Fellowships and Grants

The School of Business has been successful in nominating doctoral students for fellowships and grants from sources outside the school. Business students have received awards from the Richard D. Irwin Foundation, Kauffman Foundation, the American Institute of Certified Public Accountants, Beta Gamma Sigma, the American Accounting Association, Accounting Doctoral Scholars, and KU. These awards allow the student to receive support for a semester while working on his or her dissertation.

The School of Business maintains active files on these and other sources of fellowships and grants, recommends qualified students for the awards, and works closely with students in submitting application materials.

Visit the Graduate Studies website for information about other funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Assistance in the form of loans or employment is available through:

Financial Aid and Scholarships (http://financialaid.ku.edu/)

Ph.D. Admission

The applicant must hold at least a bachelor’s degree from an accredited college or university. No specific undergraduate preparation in business is required.

The applicant must demonstrate competence as a scholar through a high level of previous academic performance and high percentile scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE). Scores may not be older than five years at the time of application. In addition, international applicants must present high scores on the Test of English as a Foreign Language (TOEFL), or IELTS.

Finally, the applicant must demonstrate the ability for doctoral study in business, either by a record of achievement in previous professional or academic experience, including research and scholarship, or through letters of recommendation and a personal interview.

These requirements are intended only as suggestions for minimum admission standards. They should not be construed as a guarantee of admission to the Ph.D. program.

A $65 nonrefundable application fee for domestic students and $85 for international students, payable to the University of Kansas, must accompany all applications.

Submit your graduate application online (http://www.graduate.ku.edu/).

Doctor of Philosophy in Business

The program is designed for students who wish to become tenure-track scholars and scholar-teachers. Our program is selective and rigorous, yet it provides a collegial, supportive, and intellectually stimulating atmosphere for original research and effective teaching by providing mastery of the knowledge in a particular field, a thorough understanding of research methodology, the ability to communicate effectively, and the motivation for continuing self-education. Students must specialize in a concentration and develop a broad knowledge of other areas of business and their interrelationships in the management function.

The program is limited in size so each student can work closely with faculty members to receive substantial individual attention.

Ph.D. Degree Requirements

By the end of the third semester of the aspirant’s program (excluding summer sessions), an aspirant must complete the following qualifier requirements. All aspirants must demonstrate some proficiency in doing original research of publishable quality and some proficiency in teaching.

Accounting

Ph.D. students must take the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

Supporting Areas
Coursework in the area of concentration is supplemented and
strengthened by study in one or two supporting areas. A supporting
area is one that supplements and complements the concentration. The
aspirant also may propose an interdisciplinary concentration that is a combination of these disciplines or may include
emphases such as international business, law, and economics. The
aspirant must take at least five advanced courses in the concentration.
These courses may include those offered outside the School of Business.

Concentration
Each aspirant, with the assistance of her or his faculty advisor and
the area faculty, selects an area of concentration from the traditional
business disciplines of accounting, analytics & operations, finance,
human resources management, marketing, organizational behavior, and
strategic management. An aspirant also may propose an interdisciplinary
concentration that is a combination of these disciplines or may include
emphases such as international business, law, and economics. The
aspirant must take at least five advanced courses in the concentration.
These courses may include those offered outside the School of Business.

Supporting Areas
Coursework in the area of concentration is supplemented and
strengthened by study in one or two supporting areas. A supporting
area is one that supplements and complements the concentration. The
aspirant satisfies the supporting area requirement by taking at least 4
advanced courses in the supporting areas (at least 2 courses in each of
2 supporting areas or at least 4 courses in 1 supporting area). Courses
recommended for preparation for the qualifier assessment may not be
included in satisfying the supporting area requirement.

Probation and Dismissal Guidelines
To be in good standing, a student must maintain a 3.0 cumulative grade-
point average; if the grade-point average falls below 3.0, the student is
placed on probation. This is followed by a letter to the student confirming
the probation and explaining the student’s options.

A student is placed on probation for one academic semester. If the
cumulative grade-point average has not risen to 3.0 in the next semester
of enrollment (excluding summers), the student can either be dismissed or
allowed to continue on probation. Continued probation requires the area
director for the student’s concentration to write a letter to the Ph.D. Team
explaining why the student should be allowed to continue.

A graduate student can be dismissed on the recommendation of the area
director for the student’s concentration. Usually, a graduate student is
dismissed because of a low grade-point average; however, failure of
examinations or failure to make satisfactory progress toward the degree
is also cause for dismissal. Academic dismissal should occur before a

Policy for KU School of Business Ph.D.
Program on Academic Misconduct:
We believe that doctoral students should be held to a higher standard
with regard to academic integrity than other students in the School given
their future role in doing research and teaching in the university setting
as well as enforcing such standards in their own classes. To this end,
the faculty of the KU School of Business provides a course, BUS 903 -
Responsible Conduct in Research, that is required of each student in the
Ph.D. program.

Consistent with USRR 2.5.1 and existing Graduate Studies Policies
on “Good Academic Standing” and “Dismissed Enrollment,” this document
discusses the guidelines for probation and dismissal of doctoral students
who commit academic misconduct. The Ph.D. program administrators
will regularly check with the Provost’s office for any records of misconduct
by business doctoral students in any class at KU (inside or outside of
the School of Business). For example, these checks will occur (but are
not limited to): (a) at the end of the first year for use in the qualifying
review process; (b) prior to start of any teaching responsibilities; (c) prior
to comprehensive exams; (d) prior to the dissertation proposal defense.
Instances of misconduct will be shared with the members of the Ph.D.
team, advisor, and deans of the School.

The first case of any academic misconduct in a class anywhere in the
university may result in probation or dismissal of the student depending
on the severity of the misconduct and the student’s response. It is
expected that the advisor, Ph.D. team chair and team members, and
Ph.D. program director will all be granted access to the details of a
misconduct case by the professor involved. If probation, the conditions for
the probation are set by the Ph.D. team chair and Ph.D. program director
in consultation with the advisor and Ph.D. team members. The conditions
may include (but are not limited to) such assignments as reviewing the
literature on the area of the responsible conduct in research violated
by the misconduct and/or reviewing the material covered in the target
class. These conditions and the choice of probation vs. dismissal will be
based on the details of each individual case. Importantly, if the student is
not dismissed as a result of the first offense and if the conditions for
the probation are not met in a timely manner, or if a second act of misconduct
occurs, the student will likely be dismissed from the Ph.D. program.

Dissertations will also be reviewed by the advisor and program director
for academic misconduct before being submitted to the Research and
Graduate Studies Office. Academic misconduct on a dissertation is
grounds for dismissal from the program. Academic misconduct on the
dissertation that is not discovered until after graduation may be grounds
for revoking the Ph.D. degree. In summary, the Ph.D. program in the KU
School of Business seeks to maintain the highest standards of academic
integrity with this policy.

Research Methodology
When preparing for the qualifier assessment, area groups should ensure
that the student’s program includes adequate preparation in research
methodology.

Responsible Scholarship
Students in the first or second year must enroll in BUS 903 Responsible
Conduct of Research. This course builds students’ abilities to analyze

These courses should be completed in the first 2 years of a student’s
program. At or before the end of the aspirant’s third semester in the
program, a qualifier assessment team, composed of five faculty members,
holistically determines whether or not a student continues in the program.

The aspirant for the Ph.D. in business administration must have an
area of concentration, supporting areas, and preparation in research
methodology.

Ph.D. program administrators will regularly check with the Provost’s office for any records of misconduct
by business doctoral students in any class at KU (inside or outside of
the School of Business). For example, these checks will occur (but are
not limited to): (a) at the end of the first year for use in the qualifying
review process; (b) prior to start of any teaching responsibilities; (c) prior
to comprehensive exams; (d) prior to the dissertation proposal defense.

Instances of misconduct will be shared with the members of the Ph.D.
team, advisor, and deans of the School.

The first case of any academic misconduct in a class anywhere in the
university may result in probation or dismissal of the student depending
on the severity of the misconduct and the student’s response. It is
expected that the advisor, Ph.D. team chair and team members, and
Ph.D. program director will all be granted access to the details of a
misconduct case by the professor involved. If probation, the conditions for

not dismissed as a result of the first offense and if the conditions for
the probation are not met in a timely manner, or if a second act of misconduct
occurs, the student will likely be dismissed from the Ph.D. program.

Dissertations will also be reviewed by the advisor and program director
for academic misconduct before being submitted to the Research and
Graduate Studies Office. Academic misconduct on a dissertation is
grounds for dismissal from the program. Academic misconduct on the
dissertation that is not discovered until after graduation may be grounds
for revoking the Ph.D. degree. In summary, the Ph.D. program in the KU
School of Business seeks to maintain the highest standards of academic
integrity with this policy.

Research Methodology
When preparing for the qualifier assessment, area groups should ensure
that the student’s program includes adequate preparation in research
methodology.

Responsible Scholarship
Students in the first or second year must enroll in BUS 903 Responsible
Conduct of Research. This course builds students’ abilities to analyze

ethical issues and introduces students to various issues that may arise while engaging in the research endeavor.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

**Teaching**

Students enroll in BUS 902 Teaching Seminar during the first semester in which they teach independently. Before the completion of the Ph.D. program, all students also must have teaching experience equivalent to teaching at least 2 undergraduate courses independently in 2 different semesters.

**Examinations**

To advance to candidacy, the student must pass a written-oral comprehensive examination in the concentration. Finally, the student must pass an oral defense of the dissertation research proposal and the dissertation.

**Graduate Certificate in Entrepreneurship**

**Entrepreneurship Certificate**

The Certificate in Entrepreneurship is a series of courses designed to help undergraduates and graduate students start, finance, plan, and launch their own business in their major or favorite subject. You will learn how to be your own boss, realize your dream job and acquire wealth by becoming an entrepreneur with the following courses:

| Interdisciplinary Education Programs (p. 315) | Minor in Education Studies (p. 315) |

Introduction

Founded in 1909, the University of Kansas School of Education & Human Sciences educates future teachers, administrators, counselors, psychologists, and health and sport professionals. The School offers a variety of programs at Joseph R. Pearson Hall and Robinson Center on the Lawrence campus. The KU School of Education & Human Sciences also offers several graduate degree programs, as well as an undergraduate degree in Exercise Science, at the KU Edwards Campus in Overland Park, Kansas.

Mission Statement

View the mission statement (https://soehs.ku.edu/mission-vision/) of the School of Education & Human Sciences.

Nationally Accredited Programs (https://soehs.ku.edu/mission-vision/accreditation/)

Council for Accreditation of Educator Preparation (CAEP)

The University of Kansas School of Education and Human Sciences educator preparation programs (https://soehs.ku.edu/academics/) are accredited under the Council for the Accreditation of Educator Preparation (CAEP) Standards, for a period of 7 years, from January 1, 2022, to December 31, 2029.

American Psychological Association (APA)

The Counseling Psychology and School Psychology doctoral programs offered by the School of Education & Human Sciences at the University of Kansas are accredited by the American Psychological Association (APA) (http://www.apa.org/ed/accreditation/): 750 First Street, NE, Washington, DC 20002-4242; Phone: (202) 336-5979 - TDD/TTY: (202) 336-6123. Both the School of Psychology Ed.S. and Ph.D. programs are approved by the National Association of School Psychologists (NASP), NCATE, and Kansas State Department of Education (KSDE).

Undergraduate Programs

School of Education and Human Sciences programs prepare teachers and sport and health professionals through the following majors:

- Community Health
- Elementary Education
- Education Elementary Unified
- English Education – Secondary Grades
- Exercise Science
- Foreign Language Education
- Physical Education Plus
- History and Government Education – Secondary Grades
- Sport Management
- Unified Early Childhood Education

Undergraduate programs feature extensive coursework in subject areas taught by expert faculty and real world experiences or concentrations in areas of interest or future study.

School of Education & Human Sciences also offers the following minors:

- Education Studies
- Sport Management

University Honors Program

The school encourages qualified students to participate in the University Honors Program (https://honors.ku.edu/).

Teacher Preparation Program Reports

The Title II Report (https://soehs.ku.edu/mission-vision/accreditation/) provides information about the performance of KU School of Education & Human Sciences teacher education program students on required state examinations. This data is part of the Title II report required by the federal government.

Graduate Programs

To facilitate preparation for specific types of professional service and teaching, graduate study in education has been organized into the program areas encompassed by these departments:

- Curriculum and Teaching (p. 214) includes programs in curriculum and instruction, including the fields relating to elementary and secondary education.
- Educational Leadership and Policy Studies (p. 253) comprises programs in educational administration, social and cultural studies in education, and higher education.
- Health, Sport, and Exercise Sciences (p. 287) offers areas of study in exercise science, health science, pedagogy, and sports management.
- Educational Psychology (p. 268) offers programs in counseling psychology, school psychology, and educational psychology and research.
Special Education (p. 315) offers programs in autism spectrum disorder, early childhood unified, high-incidence disabilities, low-incidence, and secondary transition education and services.

Further information on graduate study may be found on the departmental sections of the online catalog.

**Undergraduate Advising**

Prospective undergraduates should contact the School of Education and Human Sciences Advising Center, 221 J.R. Pearson Hall, soehsadvising@ku.edu, 785-864-9616, when considering an Education or Human Sciences major. Working closely with School of Education and Human Sciences advisors is critical for admission to the programs and timely graduation.

**Graduate Advising**

Graduate advising is done at the department and program level. For more information, please contact the director of graduate studies in your department or program.

All education students have a graduate or faculty advisor and should know and be in contact with the advisor to whom they have been assigned. Students who are unsure of their advisor should contact their academic department for information.

**Undergraduate & Graduate Scholarships and Financial Aid**

Since 1958, the KU School of Education and Human Sciences has offered financial support through academic scholarships to thousands of students. These scholarships are awarded to students in addition to the scholarships made available through the university as a whole. Scholarships are awarded on a competitive basis and are available for KU School of Education and Human Sciences students in on-ground and hybrid programs (freshman and fully online students are not eligible). To be considered for an award, KU School of Education and Human Sciences students should complete the SOEHS application (https://soehs.ku.edu/admission/scholarships/) that is typically due in mid-February each year for the following academic year.

Additional funds may be available from the University of Kansas Financial Aid & Scholarships (http://affordability.ku.edu/).

**Graduate Fellowships and Assistantships**

For information about graduate assistantships, contact the School of Education and Human Sciences (http://www.soe.ku.edu/).

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

**Undergraduate University Regulations**

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (https://policy.ku.edu/).

**C Minimum**

A student must earn a grade of C- or higher in COMS, ENGL, and MATH prerequisite requirements. A grade lower than a C- is not acceptable in any teacher education course. Some programs may have additional minimum grade point requirements for specific classes. Consult School of Education & Human Sciences advisors for details.

**Credit/No Credit**

Only 6 hours of Credit/No Credit is allowed before a student is admitted into the School of Education and Human Sciences. Once admitted, a student cannot take a class Credit/No Credit for any program requirement.

**Graduation with Distinction and Highest Distinction**

Undergraduates whose grade-point averages rank in the upper 10% of their graduating class graduate with distinction. The upper 3% of those awarded distinction graduate with highest distinction.

**Honor Roll**

Students with a semester grade-point average of 3.75 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

**Maximum Semester Enrollment**

No student may enroll for more than 19 hours a semester, or more than 9 hours in a summer session without permission from an undergraduate advisor and the Associate Dean.

**Maximum Community College Credit Allowed**

A maximum of 64 community college hours may be counted toward a student’s degree.

**Probation and Warning**

**Academic Warning**

An academic warning is issued to students with a semester grade-point average below a 2.75.

**Informal Probation**

An undergraduate student whose KU + Transfer Cumulative grade-point average is lower than 2.75 for a second semester is placed on official probation for the following semester.

**Returned to Good Standing**

An undergraduate student on probation is returned to good standing if the KU + Transfer Cumulative grade-point average is at least 2.75.
Dismissed

A student on official probation is dismissed for failure to earn a KU + Transfer Cumulative grade-point average of at least 2.75 at the end of the official probation semester. Those students are dropped from all School of Education & Human Sciences courses for the next semester. Students may be readmitted by returning to the minimum 2.75 KU + Transfer Cumulative GPA requirement.

Required Work in Residence

To be eligible for SOEHS undergraduate degrees, a student must complete at least 30 hours at KU and at least 30 hours after being admitted to the School of Education & Human Sciences. Up to 6 hours of work done at another institution may be accepted as part of the last 30 hours.

Transfer of Credit

Before the last 30 hours required for the degree, students may, under certain conditions, take courses at other institutions and transfer the credit to KU. Before enrolling in a course that will be transferred to meet program requirements, students should obtain approval from their assigned School of Education and Human Sciences advisor. In some cases, students may need to petition that the course be allowed to meet a requirement. Please note, some transfer courses will not meet KU Core requirements.

Some courses have already been evaluated and approved by KU; they are listed on Cred/Ttran [https://credittransfer.ku.edu/] website.

After completing the course work, you must request that an official transcript be sent to the Office of Admissions [https://admissions.ku.edu/], KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911. For transcripts to be official, they must be mailed or sent electronically from the college or university directly to KU. Faxed transcripts are not accepted for posting of transfer credit.

Nonresidence credit includes all credits from another college or university taken after initial enrollment at KU, military service courses, and other undergraduate course work not formally offered in the Schedule of Classes [https://classes.ku.edu/].

The School of Education and Human Sciences follows the regulations and policies of the University [https://policy.ku.edu/]. In some cases, the School of Education and Human Sciences and departmental policies are more restrictive than those of the broader University. Students are encouraged to work closely with their department and advisor for specifics.

Graduate Regulations

The School of Education and Human Sciences follows the regulations and policies [http://policy.ku.edu/] of the University and of Graduate Studies (for example: Academic probation [http://policy.ku.edu/graduate-studies/ academic-probation/], enrollment status [http://policy.ku.edu/graduate-studies/fulltime-enrollment/], grading policies [http://policy.ku.edu/graduate-studies/grading/], grievances [http://policy.ku.edu/graduate-studies/grad-student-grievance-policy/], etc.). In some cases, School of Education and Human Sciences and departmental policies are more restrictive than those of the broader University. Students are encouraged to work closely with their department and advisor for specific program requirements.

While all of these policies are important, the School of Education and Human Sciences follows the policies outlined below regarding the academic performance of our graduate students.

Good Academic Standing

Evaluation of graduate student academic standing includes, but is not limited to, consideration of performance in and progress through a graduate program according to program expectations.

Graduate students must maintain an expected level of performance throughout their program. Criteria for evaluating satisfactory performance include, but are not limited to:

1. For degree- and certificate-seeking students, a minimum cumulative grade point average (GPA) of 3.0 or higher and, for non-degree-seeking students, a cumulative graduate GPA of 2.0 or higher. Students must have a 3.0 minimum GPA to graduate with a KU graduate degree.
2. For students enrolled in dissertation, master's thesis or project hours the expectation is that students will make satisfactory academic progress. Earning a grade of NP in one semester or earning a grade of LP in consecutive semesters may indicate a lack of satisfactory academic progress and may result in probation or dismissal.
3. Academic and scholarly integrity;
4. Compliance with academic policies at the university, school, and departmental level; and
5. For degree- and certificate-seeking students, satisfactory progress toward completion of the degree or certificate, as determined by the program. Progress may be determined by factors including:
   a. Satisfactory completion of coursework, milestones, exams, or other program components on a specified timeframe; and
   b. Official time to degree and total time in program.

Failure to maintain an expected level of performance will result in a student not being in good academic standing. Lack of good academic standing will result in the graduate program placing the student on probation or dismissal from the program (for more information, please see the policies on academic probation [http://policy.ku.edu/graduate-studies/ academic-probation/] and dismissed enrollment [http://policy.ku.edu/ graduate-studies/dismissed-enrollment/?num2.2]).

Academic Probation

Upon falling below a cumulative graduate grade-point average of 3.0, computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, or earning a grade of NP (no progress) in thesis, project or dissertation, the student is placed on probation by the graduate division of the school/college. The grades of SP, LP, NP and I, for which no numerical equivalents are defined, are excluded from the GPA computation.

If the student's overall graduate average has been raised to 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to good academic standing. If not, the student is not permitted to re-enroll and will be dismissed unless the graduate division of the school/college acts favorably on a departmental recommendation for the student to continue study.

If a student earns a grade of NP in dissertation hours, master's project or thesis any semester, the student will be placed on academic probation for
the following semester until they receive a LP or SP. Earning consecutive semesters with a grade of LP may also place a student on academic probation. Students are encouraged to meet with their advisor to discuss their progress. Students who do not make satisfactory progress may be discontinued from their program at any time.

If a student earns a grade of NP (equivalent to grade of F or No Credit) in dissertation hours, master's project or thesis any semester, prior to earning 18 dissertation hours or in the required hours for master's project or thesis, those hours will not count towards their graduation requirement. A student must enroll in those credit hours again the following semester and earn at least a LP for them to apply to their degree requirements. Students must have a SP in the final semester of their enrollment of this milestone.

View the current policy on academic probation (http://policy.ku.edu/graduate-studies/academic-probation/).

Degrees Offered through the School of Education and Human Sciences

Certificate Programs

An application is required in order to be admitted to and pursue a Graduate Certificate. Degree-seeking graduate students who wish to apply to a certificate program must be in good standing in their departments or programs. An individual who is not currently a degree-seeking graduate student at KU must be admitted directly to a graduate certificate program.

With the consent of the certificate-granting department, degree-seeking or non-degree seeking students may count up to two (2) courses — for a maximum of 8 credit hours— taken at KU prior to admission to the certificate program toward the graduate certificate. Any course credits that are counted are subject to the specific certificate coursework requirements in the certificate program. Graduate certificates are not granted retroactively and no exceptions to this two-course limit will be granted. Students who withdraw from a degree program and subsequently seek admission to a certificate program are subject to these same limits (i.e., 8 hours).

If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking students, applicable courses taken for the graduate certificate program may be counted toward the degree with the approval of the degree-granting program as long as the student is enrolled in the degree program prior to completing the last certificate requirement.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

Graduate credit from another institution may not be transferred to a KU graduate certificate program. Graduate courses taken at KU may count toward both a graduate degree and graduate certificate(s) as long as the student is admitted and enrolled in the intended program prior to completion of the last required course. If the courses were taken as a KU non-degree seeking student, a Count Toward Degree form must be submitted prior to approval for graduation or approval of the certificate.

The courses taken in the graduate certificate program will be listed on the student’s transcript and recognition of the earned certificate will also be posted on the transcript. The awarding of graduate certificates will coincide with the August, December and May graduations at the University of Kansas.

Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

Completion of a graduate certificate is not a guarantee of licensure or endorsement of any kind. It is each student’s responsibility to determine the licensure and endorsement requirements in his or her state and to apply for the licenses or endorsements necessary for his or her career goals.

View the current graduate certificate policies and processes (http://policy.ku.edu/graduate-studies/certificate-programs/).

View the current policy on eligibility and admission to a graduate certificate program (http://policy.ku.edu/graduate-studies/grad-certification-program-admission/). A current list of all certificate programs is available on the KU Academics page (http://www.ku.edu/academics/).

Master’s Degree Programs

Master’s degrees are granted on satisfactory completion of not less than 1 academic year, or its equivalent, of graduate study. Broadly, the School provides 4 options for the master’s degree with specific requirements set by each program and department.

- The thesis option (minimum 30 graduate credit hours of study),
- The project or portfolio option (minimum 30 graduate credit hours of study), and
- The examination option (minimum 36 graduate credit hours of study)
- Coursework only option - culminating in a capstone course (students will work with the department as to how many credit hours are required)

At least 20 of the credit hours required for the thesis and project option master’s programs must be in regular course work, as contrasted with independent study and similar enrollments. Students pursuing the 36-hour examination program option must have 26 hours in regular course work.

Master of Arts

A candidate for the Master of Arts degree completes work both in education and in a teaching area (other than physical education). For students who choose the thesis or project option, a minimum of 30 hours of graduate credit is required for this degree, of which no fewer than 10 and no more than 15 hours must be earned in the teaching area. Some work must be elected in at least 2 of the approved graduate program areas in the School of Education and Human Sciences. Currently, the School of Education and Human Sciences only offers one Master of Arts degree in Curriculum & Instruction (https://catalog.ku.edu/education/curriculum-teaching/ma/with an emphasis in Teaching English as a Second Language).

The MA candidate may complete a thesis in the concentration by enrolling in Master’s Thesis (6 hours maximum credit applicable to degree requirements) or complete the project option by enrolling in Master’s Project (4 hours maximum applicable to degree requirements).

Students may also pursue the written examination option (36 hours of coursework applicable to degree requirements). Students who pursue the written examination option must take 36 hours of coursework
applicable to degree requirements. Check with the Curriculum and Teaching department for specific requirements for this program.

Master of Science (Counseling Psychology)

A candidate for the degree of Master of Science in Counseling Psychology (http://epsy.so.ku.edu/academics/cpsy/masters/) earns a concentration in mental health counseling. A minimum of 60 credit hours is required for this degree, about 50 of which are prescribed, with the rest made up of electives approved by the student's advisor. The candidate must complete a Master's Thesis (3 hours maximum credit applicable to degree requirements), or complete a Master's Project (3 hours applicable to degree requirements), or complete a written comprehensive examination. Check with the Educational Psychology department for specific requirements for each option.

Master of Science in Education

The Master of Science in Education is offered in several departments, some with specific concentrations. A minimum of 30 credit hours is required.

The MSE candidate may complete a thesis in the concentration by enrolling in Master’s Thesis (6 hours maximum credit applicable to degree requirements) or complete the project option by enrolling in Master’s Project (4 hours maximum applicable to degree requirements). Students may also pursue the written examination option (36 hours of coursework applicable to degree requirements). Some programs offer the option to complete the degree through coursework only; these programs offer a culminating capstone course to complete the degree. Check with the department for specific program graduation requirements.

Requirements for all Master’s Degrees

Students must acquaint themselves thoroughly with departmental requirements for the degree, which may be in addition to general requirements and those of the School of Education and Human Sciences. Consistent with Graduate Studies’ general regulations, it is the student’s responsibility to know and observe all university, school, department, and academic program regulations and procedures relating to the graduate program.

In no case will a regulation be waived or an exception be granted because a student pleads ignorance of, or contends that he or she was not informed of requirements, regulations, procedures, or deadlines. Petitions for other reasons may be accepted. Consult with your department and/or advisor for information on this process.

Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

All master’s programs require a graduate class in research and evaluation methods (i.e. EPSY 715), successfully completed during the first 12 hours.

Students are required to make satisfactory progress towards their degree as determined by the faculty in their department and may be discontinued for failure to do so.

All graduate students enrolled in master’s programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first two weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. These dates can be verified on the Graduate School calendar.

View the current Lawrence and Edwards Campus policy on master’s enrollment requirements (http://policy.ku.edu/graduate-studies/ma-enrollment-requirements/).

Master's Program Time Constraints

Normal expectations are that most master’s degrees are typically completed in two years of full-time study. However, master’s degree students are allowed seven years for completion of all degree requirements assuming satisfactory progress.

In cases in which compelling reasons or circumstances recommend a one-year extension, the Graduate Division, on recommendation of the department/committee, has authority to grant the extension. In cases where more than eight years are requested, the School of Education and Human Sciences Associate Dean for Graduate Studies considers petitions for further extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant them.

Some departments may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the department in which they plan to study. View the current Lawrence and Edwards Campus policy on master’s program time constraints (http://policy.ku.edu/graduate-studies/ma-program-time-constraints/).

Continuous Enrollment

Students are expected to maintain continuous enrollment (fall & spring) while in their academic program.

A student may petition the Graduate Division through the department for a leave of absence if they experience extraordinary circumstances (e.g. cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. Appropriate documentation related to these extraordinary circumstances may be requested from the student directly.

Evidence of progress towards degree will also be a determining factor in the decision to grant a leave of absence. If approved, a leave of absence is typically granted for one year, with the possibility of extension upon request. The time taken for a leave of absence does not count against the student’s time to degree. However, after an absence of five years, a master’s candidate loses status as such and must apply for readmission to the program and the Graduate Division.

If a student has been actively enrolled in a graduate program and has not applied for a leave of absence, but has not been enrolled for one academic year, they will be discontinued from their program. If they wish to return, they will need permission from the department and will need to submit the Permit to Re-Enroll form and must reapply for graduate admission.

Transfer Credit

The transfer credit option allows master’s students to count graduate coursework completed at a regionally-accredited institution toward their KU degree. Students can transfer up to 9 credit hours toward their master’s degrees. The department, advisor, School of Education and Human Sciences, and Dean of Graduate Studies must approve the transfer request. The course(s) and grade(s) will then appear on the student’s KU transcript as the KU course equivalent.
Some restrictions apply to what non-KU courses can be counted toward a KU master's degree:

- Only courses taken for graduate credit and graded B or higher (3.0 on a 4.0 scale or higher) can be transferred.
- The courses in question cannot have counted toward any previously completed undergraduate or graduate degrees.
- Courses must be current (taken within the last 7 years).
- KU does not accept transfer credit for educational institutes, workshops, or work/life experience.
- Courses must be approved by the student's department as fulfilling a specific, regular degree requirement (including elective coursework) and should be equal in rigor to KU's graduate coursework, as reflected in the course description and syllabus.

To begin the transfer process, students should contact their departments to submit the required transferring materials, including an official transcript reflecting the courses from the other institution to be transferred in, as well as descriptions and/or syllabi for the courses in question. The department, advisor, and department chair will then determine whether the course may count for KU credit and, if so, what KU course is equivalent.

**Count Toward Degree**

The count toward degree process is distinct from transfer credit, which only applies to courses taken at another institution. In the count toward degree process, a student may be allowed to count graduate coursework taken as a graduate non-degree seeking student at KU toward a graduate degree. No more than 9 credit hours may be counted in this way, assuming the degree-granting department endorses the request and the courses in question meet the University's criteria for graduate credit. The student must contact the department to complete a Count Toward Degree form, which must then be submitted to the School of Education and Human Sciences Graduate Associate Dean for review and approval.

If the form is approved, the School of Education and Human Sciences and the department will include the counted courses when verifying that degree requirements have been met.

Students should be advised that graduate coursework taken as a non-degree-seeking student already counts into the calculation of the student's graduate GPA, but the count towards degree form is still required for the coursework to count toward completion of degree requirements. The change is not otherwise reflected on the student's transcript.

With the exception of coursework completed via a pre-approved co-enrollment arrangement, graduate coursework completed as an undergraduate degree-seeking or undergraduate non-degree seeking student may not be counted toward a graduate degree at KU.

Graduate courses taken at KU may count toward both a graduate degree and graduate certificate(s) as long as the student is admitted and enrolled in the intended program prior to completion of the last required course. If the courses were taken as a non-degree-seeking student, a Count Toward Degree form must be submitted prior to approval for graduation or approval of the certificate.

**Reduced Hour Degree**

Kansas Board of Regents policy defines 30 hours as the minimum for master's degrees at KU. Departments may petition for a reduced-hour master's degree for individual students. A reduction in hours is distinct from a transfer of credit and is reserved for those students especially well-prepared to complete a graduate-level degree and who are able to maintain a superior grade point average. If approved, a student will be allowed to complete his or her degree by enrolling in up to 6 fewer hours of graduate credit than is typically required for that degree. No coursework is transferred and no modifications to the transcript are made. This policy is enacted in rare circumstances.

To find out more about reduced-hour degrees, please contact your department directly. The department must support the request and the School of Education and Human Sciences Graduate Associate Dean must approve it before the reduced degree requirements will be granted.

**Minimum KU Hours**

In all cases, a minimum of 15 credits toward a master’s degree must be earned in graduate coursework at the University of Kansas.

**Master’s Final exam, Thesis, Project, OR Capstone Course**

A final general examination, defense of the thesis, completion of the master’s project (or portfolio) in the major subject or capstone course is required of all candidates for the Master of Arts, Master of Science or Master of Science in Education. The degree program and the Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher grade-point average) and not have a grade of I (incomplete) in any course, before scheduling the final general examination, thesis defense, project or culminating capstone.

At the option of the department, the examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged. Master’s examinations are administered by a committee of at least three members of the Graduate Faculty. The composition of the committee should include at least one tenure-track faculty member. Students work closely with their department to determine committee composition. The examination is held during the semester of the student’s final enrollment in course work. The thesis/project defense should be held when they have been substantially completed and are in the final semester of their enrollment. The department’s request to schedule the general examination must be made on or before the date set by the Graduate Division, normally a minimum of two weeks before the examination date.

Students earning a master’s thesis degree must have completed at least one hour of thesis enrollment before the master’s degree may be awarded. See the Graduate Studies website (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/) for information and requirements related to submitting the thesis electronically.

View the current Lawrence and Edwards Campus policy on master’s final examinations (http://policy.ku.edu/graduate-studies/masters-final-exams/).

**Master’s Student Oral Exam Committee Composition**

If there is an oral component of the exam, attendance is governed by the Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance/) policy.

When the master’s student final examination is partly or entirely oral (i.e., thesis defense), the oral portion of the examination must be conducted by a committee that meets the following conditions:
1. Master’s committees are composed of at least three voting members.
2. The majority of committee members serving on a master’s student oral examination committee must be tenured/tenure-track faculty holding regular or dissertation graduate faculty status in the candidate’s department/program of study. Tenured/tenure-track faculty who are appointed as courtesy faculty within the program/department are considered (for the purposes of committee composition) to be faculty of that program/department.
3. Beyond the majority requirement, additional members may hold any graduate faculty status, including regular, dissertation, or special status. This third member can be, but need not be, a member of the candidate’s department/program.

As long as the conditions above are met, the committee may include more than three members.

The master’s committee chair must be tenured/tenure-track faculty holding regular or dissertation graduate faculty status in the candidate’s department/program of study. While master’s committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair. The co-chair can hold any graduate faculty status.

Substitutions of the committee chair (and/or co-chair) are prohibited after the committee has been approved by the Graduate Division of the school or college. If a committee chair (and/or co-chair) needs to be replaced, the revised committee must be approved by the Graduate Division of the school or college in advance of the exam.

Substitutions of the committee members are permitted as long as the new members hold regular or dissertation graduate faculty status. Special members can be added after the committee has been approved by the Graduate Division of the school or college, but these additions must be approved by the Graduate Division of the School of Education and Human Sciences in advance of the exam.

**GRADING FOR THESIS AND PROJECT**

Master’s students who choose the thesis or project option will be graded using the grading scale established in USRR 2.2.5 (http://policy.ku.edu/governance/USRR/#art2sect2). It evaluates a student's thesis/project as demonstrating satisfactory progress (SP), limited progress (LP), or no progress (NP). A grade of SP must be assigned for a student’s final semester of enrollment in thesis/project. The SP indicates that the final product was of satisfactory quality to earn the degree.

If a student earns a grade of NP in thesis/project hours any semester, the student will be placed on academic probation for the following semester until they receive a LP or SP for thesis/project hours. Students are encouraged to meet with their advisor to discuss their progress. Earning consecutive semesters or LP may also place a student on academic probation. Students who do not make satisfactory progress may be discontinued from their program at any time.

If a student earns a grade of NP (equivalent to grade of F or No Credit) in master’s project or thesis any semester, those hours will not count towards their graduation requirement. A student must enroll in those credit hours again the following semester and earn at least a LP for them to apply to their degree requirements. Students must have a SP in the final semester of their enrollment of this milestone.

**Master’s Thesis Submission**

When the master’s candidate has passed the final oral examination and the members of the committee have signed the thesis, a title page and acceptance page with original signatures must be delivered to the Graduate Division of the school in which the student’s program resides so that completion of degree requirements may be officially certified. As a requirement of graduation, the candidate must publish the thesis electronically and pay all applicable fees. Learn more about the electronic submission and publication process here (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/).

Theses will be made available through UMI/Proquest and KU ScholarWorks, unless there is an embargo in place or special circumstances pertain as outlined in the KU Embargo policy (http://policy.ku.edu/graduate-studies/embargo-policy/).

**Specialist in Education-School Psychology**

The Specialist in Education program consists of 2 years of full-time graduate study (about 70 semester credit hours) followed by a third year of internship. Check with the Educational Psychology department for specific requirements.

**Doctoral Degree Programs**

**Doctor of Philosophy with a Major in Education (Ph.D.)**

The Doctor of Philosophy degree is awarded for mastering a field of scholarship, learning the methods of investigation appropriate to that field, and completing a substantial piece of original research. The degree is intended to produce highly competent scholars who are prepared to be university faculty members and other professionals, to conduct and evaluate original research, to teach at the college/university level, and to provide discipline-related leadership to the field and to the public.

The Ph.D. is offered in all School of Education and Human Sciences departments.

Although the courses and the research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The aspirant for the Ph.D. is expected to be a well-educated person and should have acquired a broad base of general knowledge, both as preparation for more advanced work and as a means of knowing how the concentration is related to other fields of human thought.

**Advisory Committee**

A student admitted to study for the Ph.D. is known as an aspirant for the degree until the comprehensive examination has been passed. After passing this examination, the student is known as a candidate for the degree.

Each student must have an advisory committee consisting of at least three members of the Graduate Faculty. One member of the committee serves as the chair. The student meets with this committee before completing 12 hours of course work to plan and formally approve an appropriate program leading to the Ph.D. The approved program plan (https://soehs.ku.edu/events-resources/forms-documents/), signed by members of the committee and the student, is placed in the student’s file in the School of Education and Human Sciences Graduate Division office.

**Requirements**

Students must acquaint themselves thoroughly with departmental requirements for the degree, which may be in addition to general requirements and those of the School of Education and Human Sciences.
Consistent with Graduate Studies’ general regulations, it is the student’s responsibility to know and observe all university, school, department, and academic program regulations and procedures relating to the graduate program.

In no case will a regulation be waived or an exception be granted because a student pleads ignorance of, or contents that he or she was not informed of requirements, regulations, procedures, or deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

Students are required to make satisfactory progress towards their degree as determined by the faculty in their department and may be discontinued for failure to do so.

**Time Limit-Maximum Tenure**

After being admitted to a doctoral program at KU, students who are making satisfactory progress must complete all degree requirements in eight years. Students who complete the master’s degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master’s degrees (excluding some professional terminal degrees) should be completed in two years of full-time study, and both master’s and doctorate in six years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.

In cases in which compelling circumstances exist, students can petition for a one-year extension of their time limit with the support of their advisory committee. Doctoral students requesting a time extension must have an approved dissertation proposal on file prior to being granted the extension. In rare cases, students can request a second extension with support from their dissertation chair and committee and a clear plan for how they will complete the final degree requirements. All extensions must be approved by the Graduate Division in the School of Education and Human Sciences.

Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation defense, a re-evaluation of the student’s candidacy status is necessary to verify recency of knowledge. Re-evaluation of the student’s candidacy status can include retaking the comprehensive written or oral examination or through some other means approved by the chair and the dissertation committee.

**Transfer Credit**

Because general requirements do not specify a minimum number of hours for the degree, no transfer of credits is allowed. Departments do, however, consider relevant prior graduate work in setting up programs of study leading to the doctorate.

**Continuous Enrollment**

Students are expected to maintain continuous enrollment (fall & spring) while in their academic program. Summer enrollment is optional unless the student is completing a milestone (i.e., comprehensive exam, proposal defense, or dissertation defense). See below for post-comprehensive examination enrollment policy.

A student may petition the Graduate Division through the department for a **leave of absence** during either the pre- or post-comprehensive examination period if they experience extraordinary circumstances (e.g., cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. Appropriate documentation related to these extraordinary circumstances may be requested from the student directly.

Evidence of progress towards degree will also be a determining factor in the decision to grant a leave of absence. If approved, a leave of absence is typically granted for one year, with the possibility of extension upon request. The time taken for a leave of absence does not count against the student’s time to degree. However, after an absence of five years, a doctoral aspirant or candidate loses status as such and must apply for readmission to the program and the Graduate Division.

If a student has been actively enrolled in a graduate program and has not applied for a leave of absence, but has not been enrolled for one academic year, they will be discontinued from their program. If they wish to return, they will need permission from the department and will need to submit the Permit to Re-Enroll form and must reapply for graduate admission.

**Residence Requirement**

The general purpose of the residency requirement is to allow for a concentrated period of immersion in formal study, and the close association of the aspirant with faculty, graduate student colleagues, and other university resources. Because the Ph.D. is a scholarly, research-oriented degree, residency is met through academic involvement in the graduate program.

Residency must be completed and the residency agreement (https://soehs.ku.edu/events-resources/forms-documents/) filed prior to comprehensive examinations and cannot include dissertation hours.

The residency requirement is not measured merely in hours of enrollment or of credit in courses counted towards a degree, but should also include academic and professional activities appropriate to the field of study (i.e., engaging with a professor in research, publishing, presenting at a conference, writing grants, etc.). These activities should be arranged with your advisor. Though they are not part of the formal residency approval process, they are an expectation of the Ph.D. degree.

**The formal residency can be met in 2 ways:**

1. **Students who hold a 50% Graduate Assistant, Graduate Teaching Assistant or a Graduate Research Assistant (GA/GTA/GRA) position during residency, need to enroll in two consecutive semesters following one of the three patterns outlined below:**
   - Spring enrollment of 6 credit hours and fall enrollment of 6 credit hours;
   - Spring enrollment of 6 credit hours and summer enrollment of 3 credit hours;
   - Summer enrollment of 3 credit hours and fall enrollment of 6 credit hours.

2. **Students without a 50% GA, GTA or GRA position during residency, need to enroll in two consecutive semesters following one of the three patterns outlined below:**
   - Spring enrollment of 9 credit hours and fall enrollment of 9 credit hours;
   - Spring enrollment of 9 credit hours and summer enrollment of 6 credit hours;
• Summer enrollment of 6 credit hours and fall enrollment of 9 credit hours.

In unusual and rare circumstances, if a student cannot meet the above residency enrollment requirements, they should meet with their advisor and develop a plan to meet the spirit of the residency requirement. Such a plan must be approved in advance through departmental and School petition processes. These exceptions will not be automatically approved.

The student, with the help of the advisory committee, must file in the Graduate Division office, a residence plan congruent with School of Education and Human Sciences requirements before the beginning of the formal residence period. This plan may be filed as a part of the overall program plan.

Residency must be completed prior to comprehensive exams and may not include dissertation and college teaching hours.

Program Area
In applying for doctoral study, students specify a program area in which formal classes and research work are to be done and in which they expect to become a scholar. A minimum of 36 credit hours is required in the major area, excluding credits used to fulfill research skills and the dissertation requirements. The doctoral core requirement (EDUC 800) may be included as part of the major if it is consistent with the student’s area of study and if doing so is supported by the student’s department and doctoral committee.

Fifty-percent of the student’s major must be 800-level or above (18 credit hours). The program must include at least 6 credit hours outside of the student’s home department, not including courses required to fulfill the student’s research skills component or the doctoral core (EDUC 800).

Course work completed at KU or at another institution as part of a previous graduate degree, cannot be used to meet the credit hour requirements for this degree.

Upon admission to doctoral study, students who have not completed a research and evaluation methods course for the education master’s degree must take the course, e.g. EPSY 715, during the first doctoral enrollment. The course taken to fulfill this requirement, whether taken at KU or at another institution, does not count toward any doctoral requirements.

Core Requirement
All students are required to complete a Responsible Conduct of Research course as specified by their program.

The course, EDUC 800: Education as a Field of Scholarship, is required for all Ph.D. students except for those in HSES and Counseling Psychology.

Teaching Experience
Some programs require students to satisfactorily complete at least 1 semester of supervised college teaching experience under the direction of a KU faculty member. This may be completed during the semester in which the student takes the comprehensive examination. This experience does not count towards the 36 credit hour requirement. Documentation of the student’s supervised college teaching experience or enrollment in the departmental college teaching course must be submitted to the Graduate Division office. Contact your program for specifics.

Research Skills
Before being admitted to the comprehensive examination, the student must have completed the research skills requirements established for the degree. Specific research skills requirements vary with department and program, but all reflect the expectation of a significant research skills component distinct from the dissertation but strongly supportive of it. The Ph.D. research skills requirement includes completion of at least 12 graduate hours relevant to the aspirant’s research: statistics, measurement and assessment, qualitative methods, and historical and philosophical methods. When the aspirant has particularly strong research skills, up to 6 hours, excluding credit hours for the required master’s course in research methods and evaluation, whether taken at KU or elsewhere, may be waived using prior B-level or higher graduate course work upon the approval of their advisory committee. At least 9 of the 12 credit hours must be 800 level or above. The 12 credit hours cannot include EPSY 715 or its program equivalent.

Comprehensive Examination
When a Ph.D. aspirant has completed the required course work at a satisfactory level and has completed the research skills requirement and all other departmental requirements prerequisite to the comprehensive examination, the department asks the School of Education and Human Sciences Graduate Division office to schedule the comprehensive examination. The graduate student must be in good academic standing (3.0 or higher grade-point average) and not have a grade of I (incomplete) in any course, before scheduling their comprehensive examination.

The examination request must be made to the School’s Graduate Division Office at least 3 weeks before the date of the written portion of the examination. Doctoral students in Counseling Psychology and School Psychology should refer to their department for timing of the comprehensive examination.

Students must be enrolled when they take the exam. During the semester in which the student takes their comprehensive examination, the student can be enrolled in no more than 6 credits of required regularly scheduled coursework. All required research skills courses must be completed prior to the semester in which the student takes their comprehensive examination. These course requirements can be petitioned under exceptional circumstances.

The examining committee must consist of at least 5 members (usually including the advisory committee). All must be graduate faculty, and 3 of the 5 must be regular faculty from the student’s home department. In some circumstances, faculty that hold courtesy appointments in the department may represent the department majority but cannot be the chair. For more information visit the KU Policy library: Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/oral-exam-committee-composition/), Graduate Studies Representative on Doctoral Exam Committees (http://policy.ku.edu/graduate-studies/graduate-studies-representative-on-doctoral-exam-committees/) and Graduate Faculty Appointments. (https://policy.ku.edu/graduate-studies/graduate-faculty-appointments/)

The comprehensive examination consists of both written and oral parts and covers the major area pursued by the student, as well as the minor area, if one is required by the student’s program. The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student’s performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until
at least 90 days have elapsed since the last unsuccessful attempt or by petition.

Students in Ph.D. education programs must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All 5 members of the student’s comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral, focuses on advanced knowledge in the major and any appropriate related areas. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated.

**Dissertation Proposal Committee and Proposal**

Upon passing the comprehensive examination, the aspirant becomes a candidate for the Ph.D.

The dissertation committee must consist of at least five members and may include members from other departments and divisions or, on occasion, members from outside the university. All members of the committee must be chosen from the Graduate Faculty, and the chair must, in addition, be authorized to chair doctoral dissertations. A prospective member of the committee from outside the university must have gained KU graduate faculty status before being appointed on the committee.

Doctoral aspirants may begin work on the dissertation after they complete the equivalent of one full-time semester of doctoral study in regular student status. However, students may first enroll in dissertation credit hours only during the semester in which they take their comprehensive examinations. Dissertation hours taken during that semester count toward the minimum of 18 hours of dissertation credit only if the examinations are passed during that same semester. Dissertation hours taken prior to the semester in which the student passes the comprehensive examination will not count towards degree requirements or the dissertation hour requirements.

The dissertation proposal must be read by a minimum of 3 dissertation committee members. One copy of the approved dissertation proposal title sheet, signed by these members of the dissertation committee, along with an electronic copy of the proposal must be submitted to the School of Education and Human Sciences Graduate Division office.

**Post-comprehensive Examination Continuous Enrollment**

After passing the comprehensive examination, the candidate must be continuously enrolled (http://policy.ku.edu/graduate-studies/doctoral-candidacy) (fall and spring, and summer if completing a milestone) until the degree is completed. Students must enroll for at least 6 hours a semester (fall and spring) until they reach 18 post-comprehensive hours or all degree requirements are completed (whichever comes first). At least one of the 6 hours must be in dissertation every term until the dissertation is defended and uploaded. The other hours can be in non-required dissertation related coursework and/or field experience/internship as required by the program. If the dissertation is not completed after 18 hours, then the candidate must enroll in 1 hour of dissertation per term (fall and spring) until they have passed their final oral defense and uploaded their dissertation. Students who have completed the dissertation but still have remaining degree requirements (i.e., internship) must continue to enroll in at least one credit hour each semester (fall and spring) until all degree requirements are met.

Summer enrollment in dissertation hours is required only when students complete major milestones in the summer (i.e., comprehensive examination, proposal meeting, dissertation defense) or require significant faculty time. If students are completing a milestone in the summer prior to earning 18 hours of post-comprehensive exam enrollment, they must enroll in at least 3 dissertation hours in the summer. After completing the 18 hour requirement, summer enrollment requires 1 dissertation hour of enrollment.

Post-comprehensive enrollment may include enrollment during the semester in which the comprehensive examination has been passed. Dissertation hours taken during the semester in which the student passes the comprehensive examination count towards the 18 hour requirement, as does enrollment in field experience/internship. Other required coursework taken this semester does not count towards the 18 hours. Students who do not pass the examination cannot apply dissertation hours to degree requirements. Dissertation hours taken in semesters prior to passing the comprehensive examination will not count towards the post-comprehensive continuous enrollment requirement.

Non-required coursework that is related to the dissertation and/or internship/field experience credits taken after the comprehensive examination semester may be counted towards the 18 hours post-comprehensive examination requirement. However, students are required to enroll in at least 1 dissertation hour per term (fall and spring) until passing the final oral defense and uploading the dissertation.

Check with the department regarding specific post-comprehensive enrollment requirements.

Candidates may petition the School of Education and Human Sciences Graduate Division for a leave of absence during the period between the comprehensive examination and the final dissertation oral under extraordinary circumstances outlined above.

**Dissertation**

The candidate must present a dissertation showing the results of original research. The dissertation for the Ph.D. considers applied or basic concerns and results in conclusions that have broad theoretical implications. The format and style of a student’s dissertation is left to the discretion of the student, the advisor, and the dissertation committee, but format and style options may be constrained or dictated by Graduate Studies policies. The dissertation is prepared under the direction of the dissertation committee. The minimum number of post-comprehensive dissertation hours in the Ph.D. program is 18 or until done. Instructions regarding the proper form of the final document (http://graduate.ku.edu/etd-formatting-and-working-multimedia-files/) may be obtained from the School of Education and Human Sciences Graduate Division office.

**Grading for Dissertation Hours**

Dissertation hours are graded using the grading scale established in USRR 2.2.5 (http://policy.ku.edu/governance/USRR/#art2sect2). It evaluates a student’s dissertation as demonstrating satisfactory progress (SP), limited progress (LP), or no progress (NP). A grade of SP must be assigned for a student’s final semester of enrollment in their dissertation.
The SP indicates that the final product was of satisfactory quality to earn the degree.

If a student earns a grade of NP in dissertation hours any semester, the student will be placed on academic probation for the following semester until they receive a LP or SP. Students are encouraged to meet with their advisor to discuss their progress. Earning consecutive semesters with the grade of LP may also place a student on academic probation. Students who do not make satisfactory progress may be discontinued from their program at any time.

If a student earns a grade of NP (equivalent to grade of F or No Credit) in dissertation, those hours will not count towards their 18 hour post-comprehensive enrollment requirement. A student must enroll in those dissertation credit hours again the following semester and earn at least a LP for them to apply to their degree requirements. Students must have a SP in the final semester of their enrollment of this milestone.

**Final Oral Examination**

When the dissertation has been tentatively accepted by the dissertation committee, and approved as ready for defense, the chair of the dissertation committee must notify the department of the date and time of the proposed defense, committee members, and dissertation title. This notification must be made at least three weeks before the desired defense date.

The committee for the final oral examination ([http://policy.ku.edu/graduater-studies/final-oral-exams/](http://policy.ku.edu/graduater-studies/final-oral-exams/)) must consist of at least five members (the members of the dissertation committee plus other members of the Graduate Faculty recommended by the committee chair and the department and appointed by the Graduate Division). At least one member must be from a department other than the major department. This member represents the Graduate Studies and must be a member of the Graduate Faculty with Regular or Dissertation status. A majority of the committee members must be from the student's department.

The examination covers the dissertation and the candidate's concentration area. The candidate passes the final examination if a majority of the official examining committee members (including the chair) approves the candidate's performance. When the final oral examination has been passed, the dissertation committee reports a grade of Honors, Satisfactory, or Unsatisfactory. Candidates who fail the final oral examination may be allowed to repeat it upon the recommendation of the dissertation committee.

**Dissertation Copies**

When the final oral examination has been passed and the dissertation has been signed by the members of the dissertation committee, a title page and acceptance page with original signatures and ETD Release form and other paperwork are to be delivered to the Graduate Division so that completion of degree requirements may be officially certified.

**Doctor of Education (Ed.D.)**

The Doctor of Education is a professional degree intended primarily for practitioners in education rather than for researchers, for whom the Ph.D. is the appropriate degree plan. The Ed.D. is offered in the department of Curriculum & Teaching (curriculum and instruction), and the department of Educational Leadership & Policy Studies (educational administration, higher education).

**Advisory Committee**

A student admitted to study for the Ed.D. is considered an aspirant for the degree until the comprehensive examination has been passed. After passing this examination, the student is considered a candidate for the degree. Each student must have an advisory committee of at least 3 members of the Graduate Faculty from within the department. This internal department majority may include one non-tenure track faculty member from within the department. One member of the committee serves as the chair. The student must confer with this committee before completing 12 hours of course work to formally approve an appropriate program leading to the Ed.D. The approved program plan ([https://soehs.ku.edu/events-resources/forms-documents/](https://soehs.ku.edu/events-resources/forms-documents/)), signed by members of the committee and the student, is placed in the student's file in the School of Education and Human Sciences Graduate Division office.

**Requirements**

Students must acquaint themselves thoroughly with departmental requirements for the degree, which may be in addition to general requirements and those of the School of Education and Human Sciences. Consistent with Graduate Studies' general regulations, it is the student's responsibility to know and observe all university, school, department, and academic program regulations and procedures relating to the graduate program.

In no case will a regulation be waived or an exception be granted because a student pleads ignorance of, or contends that he or she was not informed of requirements, regulations, procedures, or deadlines.

Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

Students are required to make satisfactory progress towards their degree as determined by the faculty in their department and may be discontinued for failure to do so.

**Time Limit-Maximum Tenure**

After being admitted to a doctoral program at KU, students who are making satisfactory progress must complete all degree requirements in eight years. Students who complete the master's degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master's degrees (excluding some professional terminal degrees) should be completed in two years of full-time study, and most master's and doctorate in six years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.

In cases in which compelling circumstances exist, students can petition for a one-year extension of their time limit with the support of their advisory committee. Doctoral students requesting a time extension must have an approved dissertation proposal on file prior to being granted the extension. In rare cases, students can request a second extension with support from their dissertation chair and committee and a clear plan for how they will complete the final degree requirements. All extensions must be approved by the Graduate Division in the School of Education and Human Sciences.

Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation...
defense, a re-evaluation of the student’s candidacy status is necessary to verify recency of knowledge. Re-evaluation of the student’s candidacy status can include retaking the comprehensive written or oral examination or through some other means approved by the chair and the dissertation committee.

Transfer Credit

Because general requirements do not specify a minimum number of hours for the degree, no transfer of credits is allowed. Departments do, however, consider relevant prior graduate work in setting up programs of study leading to the doctorate.

Continuous Enrollment

Students are expected to maintain continuous enrollment (fall & spring) while in their academic program. Summer enrollment is optional unless there is a required course or if the student is completing a milestone (i.e., comprehensive exam, proposal defense, or dissertation defense).

A student may petition the Graduate Division through the department for a leave of absence during either the pre- or post-comprehensive examination period if they experience extraordinary circumstances (e.g., cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. Appropriate documentation related to these extraordinary circumstances may be requested from the student directly.

Evidence of progress toward degree will also be a determining factor in the decision to grant a leave of absence. If approved, a leave of absence is typically granted for one year, with the possibility of extension upon request. The time taken for a leave of absence does not count against the student’s time to degree. However, after an absence of five years, a doctoral aspirant or candidate loses status as such and must apply for readmission to the program and the Graduate Division.

If a student has been actively enrolled in a graduate program and has not applied for a leave of absence, but has not been enrolled for one academic year, they will be discontinued from their program. If they wish to return, they will need permission from the department and will need to submit the Permit to Re-Enroll form and must reapply for graduate admission.

Period of Continuous Study

The Ed.D. period of continuous study requirement is fulfilled according to its purpose and with maximal benefit to the doctoral aspirant. It is recognized that the typical Ed.D. student works full-time while enrolling in their doctoral program.

In all options it has been recognized that continuous involvement in formal study and the close association with faculty and graduate student colleagues, which are the general goals of this requirement may be enhanced, particularly for the professional/practitioner degree aspirant, by related professional activities—if such experiences are directly related, contributory to and coordinated with on-campus courses and research.

The period of continuous study must be completed and form (https://soehs.ku.edu/events-resources/forms-documents/) filed prior to comprehensive examinations and cannot include dissertation hours.

The following is required:

Enrollment in two consecutive semesters following one of the three patterns outlined below

• Spring enrollment of 6 credit hours and fall enrollment of 6 credit hours;
• Spring enrollment of 6 credit hours and summer enrollment of 3 credit hours;
• Summer enrollment of 3 credit hours and fall enrollment of 6 credit hours.

The student, with the help of the advisory committee, must file in the Graduate Division office a period of continuous study plan congruent with School of Education and Human Sciences requirements before the beginning of the formal period of continuous study. This plan may be filed as a part of the overall program plan. This policy is petitionable as long as the aspirant is continuously enrolled for 3 semesters in a row.

Program Area

All candidates for the Ed.D. must complete a minimum of 27 credit hours in their major area, excluding credits used to fulfill Research Skills, Dissertation, and the doctoral practicum requirements. Coursework completed at KU or at another institution as part of a previous graduate degree, cannot be used to meet the credit hour requirements for this degree.

Research Skills

Upon admission to doctoral study, students who have not completed a research and evaluation methods course for the education master’s degree must take the course, e.g., EPSY 715, during the first doctoral enrollment. The course used to fulfill this requirement, whether taken at KU or at another institution, does not count toward any doctoral requirements.

Before being admitted to the comprehensive examination, students must have successfully completed the research skills requirements that demonstrate satisfactory evidence that they possess the professional research skills of advanced practitioners in their concentrations, as established for the degree. Specific research skills requirements vary with department and program, but all reflect the expectation of a significant research skills component distinct from the dissertation but strongly supportive of it.

The Ed.D research skills requirement includes completion of at least 9 graduate hours relevant to understanding, promoting and evaluating professional practice, including, statistics, assessment and evaluation, qualitative methods, and/or historical and philosophical methods. When the aspirant has particularly strong research skills, up to 3 hours, excluding credit hours for the required master’s course in research methods and evaluation, whether taken at KU or elsewhere, may be waived using prior B-level or higher graduate course work upon the approval of their advisory committee. At least 6 of the 9 credit hours must be 800 level or above. The 9 credit hours cannot include EPSY 715 or its program equivalent.

Responsible Conduct of Research

All students must satisfy departmental and university requirements regarding the responsible conduct of research. Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for Ed.D. students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship (http://policy.ku.edu/graduate-studies/doctoral-research-skills-requirement/) are listed in the KU Policy Library.
Doctoral Practicum/Field Experience Enrollment
Ed.D. aspirants must complete a 3-credit-hour practicum/field experience. Specific requirements for this practicum/field experience are available from students’ departments.

Comprehensive Examination
When an Ed.D. aspirant has completed the required course work at a satisfactory level and has completed the research skills requirement and all other departmental requirements prerequisite to the comprehensive examination, the department asks the School of Education and Human Sciences Graduate Division office to schedule the comprehensive examination. The student must be in good academic standing (3.0 or higher grade-point average) and not have a grade of I (incomplete) in any course, before scheduling their comprehensive examination. The examination request must be made to the School’s Graduate Division Office at least 5 weeks before the date of the written portion of the examination.

Students must be enrolled when they take the exam. During the semester in which the student takes their comprehensive examination, the student can be enrolled in no more than 6 credits of required regularly scheduled coursework. All required research skills courses must be completed prior to the semester in which the student takes their comprehensive examination. These course requirements can be petitioned under exceptional circumstances.

The examining committee must consist of at least 5 members (usually including the advisory committee). All must be graduate faculty, and 3 of the 5 must be regular faculty from the student’s home department. In some cases, faculty that hold courtesy appointments in the department may represent the department majority but cannot be the chair. For more information visit the KU Policy library: Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/oral-exam-committee-composition/), Graduate Studies Representative on Doctoral Exam Committees (http://policy.ku.edu/graduate-studies/graduate-studies-representative-on-doctoral-exam-committees/) and Graduate Faculty Appointments (https://policy.ku.edu/graduate-studies/graduate-faculty-appointments/).

The comprehensive examination consists of both written and oral parts and covers the major area pursued by the student. The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student’s performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt or by petition.

Students in Ed.D education programs must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All 5 members of the student’s comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral focuses on the ability to relate program knowledge to tasks and problems faced by practitioners. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated.

Dissertation Proposal Committee and Proposal
Upon passing the comprehensive examination, the aspirant becomes a candidate for the Ed.D.

The dissertation committee must consist of at least five members and may include members from other departments and divisions or, on occasion, members from outside the university. All members of the committee must be chosen from the Graduate Faculty, and the chair must, in addition, be authorized to chair doctoral dissertations. A prospective member of the committee from outside the university must have gained KU Graduate Faculty status before appointment to the committee.

Doctoral aspirants may work on the dissertation after they complete the equivalent of one full-time semester of doctoral study in regular student status and may use their practicum experience in preparation for the dissertation. However, students may first enroll in dissertation credit hours only during the semester in which they take their comprehensive examinations. Dissertation hours taken during that semester count toward the post-comprehensive enrollment requirements. Dissertation hours taken prior to the semester in which the student passes the comprehensive examination, will not count towards degree requirements or the post-comprehensive hour requirements.

The dissertation proposal must be read by a minimum of 3 dissertation committee members. One copy of the approved dissertation proposal title sheet, signed by these members of the dissertation committee, along with an electronic copy of the proposal must be submitted to the School of Education and Human Sciences Graduate Division office.

Post-comprehensive Examination Continuous Enrollment
After passing the comprehensive examination, the candidate must be continuously enrolled (http://policy.ku.edu/graduate-studies/doctoral-candidacy/) (fall and spring, and summer if completing a milestone) until the degree is completed. Students must enroll for at least 6 hours a semester (fall and spring) until they reach 18 post-comprehensive hours or all degree requirements are completed (whichever comes first). At least one of the 6 hours must be in dissertation every term until the dissertation is defended and uploaded. The other hours can be in non-required dissertation related coursework and/or field experience/internship as required by the program. If the dissertation is not completed after 18 hours, then the candidate must enroll in 1 hour of dissertation per term (fall and spring) until they have passed their final oral defense and uploaded their dissertation. Students who have completed the dissertation but still have remaining degree requirements (i.e., internship) must continue to enroll in at least one credit hour each semester (fall and spring) until all degree requirements are met.

Summer enrollment in dissertation hours is required only when students complete major milestones in the summer (i.e., comprehensive examination, proposal meeting, dissertation defense) or require significant faculty time. If students are completing a milestone in the summer prior to earning 18 hours of post-comprehensive exam enrollment, they must enroll in at least 3 dissertation hours in the summer. After completing the 18 hour requirement, summer enrollment requires 1 dissertation hour of enrollment.
Post-comprehensive enrollment may include enrollment during the semester in which the comprehensive examination has been passed. Dissertation hours taken during the semester in which the student passes the comprehensive examination count towards the 18 hour requirement, as does enrollment in field experience/internship. Other required coursework taken this semester does not count towards the 18 hours. Students who do not pass the examination cannot apply dissertation hours to degree requirements. Dissertation hours taken in semesters prior to passing the comprehensive examination will not count towards the post-comprehensive continuous enrollment requirement.

Non-required coursework that is related to the dissertation and/or internship/field experience credits taken after the comprehensive examination semester may be counted towards the 18 hours post-comprehensive examination requirement. However, students are required to enroll in at least 1 dissertation hour per term (fall and spring) until passing the final oral defense and uploading the dissertation.

Check with the department regarding specific post-comprehensive enrollment requirements.

Candidates may petition the School of Education and Human Sciences Graduate Division for a leave of absence during the period between the comprehensive examination and the final dissertation oral under extraordinary circumstances outlined above.

**Dissertation**

The candidate must present a dissertation that exhibits the application of existing knowledge in the major field of professional study. Ed.D. candidates may conduct an original study or satisfy the dissertation requirement by completing a comprehensive, critical assessment of the relevant literature on a major educational issue or problem. The dissertation should demonstrate the application of existing knowledge to the author’s area of professional practice. The format and style of a student’s dissertation is left to the discretion of the student, advisor, and committee, but format and style options may be constrained or dictated by the policy of the department from which the student is to receive the degree and by the Office of Graduate Studies. The dissertation is prepared under the direction of the dissertation committee.

Instructions regarding the proper form of the final document (http://graduate.ku.edu/etd-formatting-and-working-multimedia-files/) may be obtained from the School of Education Graduate Division office.

**Grading for Dissertation Hours**

Dissertation hours will be graded using the grading scale established in USRR 2.2.5 (http://policy.ku.edu/governance/USRR/#art2sect2). It evaluates a student’s dissertation as demonstrating satisfactory progress (SP), limited progress (LP), or no progress (NP). A grade of SP must be assigned for a student’s final semester of enrollment in their dissertation. The SP indicates that the final product was of satisfactory quality to earn the degree.

If a student earns a grade of NP in dissertation hours any semester, the student will be placed on academic probation for the following semester unless they receive a LP or SP. Students are encouraged to meet with their advisor to discuss their progress. Earning consecutive semesters with the grade of LP may also place a student on academic probation. Students who do not make satisfactory progress may be discontinued from their program at any time.

If a student earns a grade of NP (equivalent to grade of F or No Credit) in dissertation, those hours will not count towards their 18 hour post-

**Final Oral Examination**

When the dissertation has been tentatively accepted by the dissertation committee, and approved as ready for defense, the chair of the dissertation committee must notify the department of the date and time of the proposed defense, committee members, and dissertation title. This notification must be made at least three weeks before the desired defense date.

The committee for the final oral examination (http://policy.ku.edu/graduate-studies/final-oral-exams/) must consist of at least five members (the members of the dissertation committee plus other members of the Graduate Faculty recommended by the committee chair and the department and appointed by the Graduate Division). At least one member must be from a department other than the major department. This member represents Graduate Studies and must be a member of the Graduate Faculty with Regular or Dissertation status. A majority of the committee must be members of the student's home department. One of the 3 internal members may be a non-tenure track faculty member from within the department. The fourth member of the committee may be a non-tenure track faculty member with graduate faculty status from any department. For more information visit the KU Policy library: Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/oral-exam-committee-composition/) and Graduate Studies Representative on Doctoral Exam Committees (http://policy.ku.edu/graduate-studies/graduate-studies-representative-on-doctoral-exam-committees/).

The candidate passes the defense if a majority of the official examining committee members (including the chair) approves the candidate’s performance. When the final oral examination has been passed, the dissertation committee reports a grade of Honors, Satisfactory, or Unsatisfactory. Candidates who fail the final oral examination may be allowed to repeat it upon the recommendation of the dissertation committee.

**Dissertation Copies**

When the final oral examination has been passed and the dissertation has been signed by the members of the dissertation committee, a title page and acceptance page with original signatures and ETD Release form and other paperwork are to be delivered to the Graduate Division so that completion of degree requirements may be officially certified.

**University Career Center**

The University Career Center (https://career.ku.edu/), Summerfield Hall, Room 206, (ph:785-864-3624), provides career counseling and services for all KU students, including students in the School of Education & Human Sciences. The University Career Center hosts an Education Career Fair for students each fall and spring semester.

**Curriculum and Teaching Courses**

**C&T 100. Introduction to the Education Profession. 3 Credits.**

This course is designed to acquaint students with the profession of education by helping to increase an awareness of the role and characteristics of an effective teacher. Large and small group activities and assignments are dispersed throughout the semester to facilitate these outcomes. Students will be involved in observation of and participation...
with teachers and pupils in public school classrooms, which complement course activities and assignments. Students will work with a mentor pre-service teacher from the KU School of Education to provide discussions about each of the course objectives. C&T 100 is a pre-professional course. Successful completion of the course does not guarantee eventual admission to the School of Education's Teacher Education Program.

C&T 175. Introduction to Career Development. 1-5 Credits. This is the first course in a series of 2 courses focused on student career development. The purpose of this course is to provide structured career exploration and other experiences for students to: identify career interests, strengths, and skills through career assessments, job shadows, informational interviews, and short-term work experiences; develop an individualized career plan; begin developing a career portfolio by developing a resume, references list and cover letters. Students participate in structured, recurring work-based learning opportunities, and coursework as well as individual meetings with the instructor. Instruction and practice job-seeking and job maintenance skills are provided both in the classroom and in work-based learning experiences.

C&T 177. First Year Seminar: ____. 3 Credits. A limited-enrollment seminar course for first-time freshmen, addressing current issues related to curriculum and instruction in the field of education. Course is designed to meet the critical thinking outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

C&T 220. Career Development. 1-5 Credits. This is the second course in a series of 2 courses providing structured career development and is by appointment with the instructor. It provides structured experiences for students to: refine their career plan based on individual interests, strengths, and skills; learn and practice job-seeking and maintenance skills; participate in work-based learning; apply skills and experiences learned to enhance career plan and develop a career portfolio. Students participate in structured, recurring work-based learning opportunities and complete individualized projects related to career plans to contribute to students' career portfolios. Students consult with the instructor on their individualized projects and career portfolios. Prerequisite: Successful completion of C&T 175.

C&T 235. Cultural Diversity, Equity, and Inclusion in K-12 Schools. 3 Credits. This course explores cultural diversity in K-12 settings through a critical analysis of several key themes: power, privilege, and difference. Students will examine the social construction of race, ethnicity, gender, social class, sexuality, language, and abilities within the classroom. This course examines topics including: gender bias, racism, white privilege, income inequality, as well as the educational and social experiences of students from historically marginalized backgrounds. Fieldwork experience is a required component of this course.

C&T 290. Introduction to Secondary Science and Mathematics Teaching. 1 Credit. This course allows KU students to explore teaching in science or mathematics as a career as well as gain and practice collaborative and communication skills. Students teach combined science/math lessons in local elementary classrooms in order to obtain firsthand experience with planning and implementing inquiry-based curriculum. This course is part of a STEM Teach sequence. C&T 290 is part of a sequence of courses that allow STEM Teach students to earn a KU service learning certificate. Prerequisite: Admission to the Teacher Education Program.

C&T 291. Introduction to Science and Mathematics Teaching 2 (STEM Teach 2). 1 Credit. This course is for students who want to continue to explore math or science teaching. This goal will be accomplished by observing a mentor teacher and by teaching several lessons to a middle school math or science class. Students will build upon and practice lesson design skills that were developed in STEM Teach 1 and become familiar with excellent science and mathematics resources for middle school. As a result of the STEM Teach 2 experiences, students generally will able to make a decision as to whether they want to pursue a pathway to teacher licensure through the STEM Teach program. C&T 291 is part of a sequence of courses that allow STEM Teach students to earn a KU service learning certificate. Prerequisite: Successful completion of STEM Teach 1 (C&T 290).

C&T 301. Educational Technology in Elementary-Middle Education. 3 Credits. The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to elementary and middle school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program.

C&T 302. Educational Technology in Middle/Secondary Education. 3 Credits. The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to middle school and high school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program.

C&T 322. Curriculum and the Learner in the Elementary School. 3 Credits. Building on the experiences in C&T 100, this course will focus on the learner in the elementary setting. Learning occurs as a result of interaction among learners, teacher and subject matter in the classroom within a school in a community. The impact of the interactions of these students of learning of young children is studied in this course. Emphasis is given to the factors that influence curriculum decision-making, and methods that are considered in elementary grades curriculum and how it is delivered. Prerequisite: Admission to the Teacher Education Program.

C&T 324. Curriculum Learner in the Middle School and High School. 3 Credits. Building on experiences in C&T 100, this course will focus on the learner within the high school setting. Learning occurs in a classroom within a school in a community, and the nature and structure of these settings as well as their impact on learning is studied in this course. Emphasis is given to the curriculum, the factors that influence the curriculum, and the ways that goals for high school students are reflected in the high school curriculum. Prerequisite: Admission to the Teacher Education Program.

C&T 330. Instructional Approaches for ESOL Learners in the Elementary/Early Childhood Classroom. 3 Credits. Teaching English as a Second or Additional Language/Bilingual Education is designed to provide preservice elementary teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teaching skills needed to work with English language learners of elementary age, and to impart language instruction
in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are or should be available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program.

C&T 331. Instructional Approaches for ESOL Learners in the Middle/Secondary Classroom. 3 Credits.
This course is designed to provide preservice middle/secondary discipline specific teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teachings skills needed to work with English language learners of all ages, and to impart language instruction in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are or should be available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program.

C&T 335. Curriculum and Instruction in Middle and Secondary History and Government Classrooms. 3 Credits.
The purpose of this course is to help prepare students to teach social studies in the middle and secondary grades. Prerequisite: Admission to the teacher education program.

C&T 344. Children’s Literature in the Elementary School. 3 Credits.
A study of literature (poetry, folk literature, fiction, and nonfiction) appropriate for elementary school children with a focus on contemporary children’s books. Emphasis will be on selection of literature based on child development, literary quality, curriculum, and pluralism and the engagement of children in literature experiences from the interactive, reader response, and critical perspectives. Prerequisite: Admission to the Teacher Education Program.

C&T 347. Social Studies in the Elementary Classroom. 3 Credits.
A study of curricula, instructional strategies, and classroom organization for social studies education K–6. Emphasis is placed on the effective implementation of social studies programs in classroom settings. Prerequisite: Admission to the School of Education in elementary, middle, or secondary, or the Unified Early Childhood programs.

C&T 349. Science in the Elementary Classroom. 3 Credits.
In this course, you will develop an understanding of how children learn science and why science education is important. You will examine effective approaches to teaching, instructional materials, and student assessment and will learn how to plan and implement a science unit. The course will emphasize a guided-inquiry approach to science instruction appropriate for the abilities and interests of children in grades K–6. Prerequisite: Admission to the School of Education.

C&T 351. Mathematics for the Elementary Classroom. 3 Credits.
This course is a study of the curriculum, instructional strategies, and classroom organization for mathematics in grades K–6. Emphasis is placed on the effective implementation of mathematics programs in classroom settings. Prerequisite: Admission to the School of Education.

C&T 352. Literacy Instruction in the Primary Grades (K-3). 3 Credits.
This course is intended to develop the attitudes, knowledge, and skills necessary to effectively instruct primary grades (K-3) children through the development of literacy skills: reading, writing, listening, speaking, spelling, and handwriting. The major goals of this course are for the prospective teacher to develop an understanding of literacy development of the primary-grades child, current literacy theories, and the ability to work with a number of approaches to promote literacy learning and a positive attitude toward literacy in all primary-grades students who may have different needs due to language, culture, learning challenges, and/or differing stages of development. This course is to be taken concurrently with C&T 353, Literacy Practicum in the Primary Grades. Prerequisite: Admission to the Teacher Education Program.

C&T 353. Literacy Practicum in the Primary Grades. 1 Credits.
This supervised practicum is intended to allow the pre-service teacher to apply the knowledge gained in C&T 352, Literacy Instruction in the primary grades (K-3), by teaching children in the primary grades. To be taken concurrently with C&T 352 Prerequisite: Admission to the Teacher Education Program.

C&T 354. Literacy Instruction in the Intermediate Grades. 3 Credits.
C&T 354 is designed to introduce pre-service teachers to the principles and methods of facilitating language and literacy development of students in third through sixth grade. Pre-service teachers also will have an opportunity to teach an elementary grade student(s). Prerequisite: Admission to the Teacher Education Program. This course is to be taken concurrently with C&T 355, Literacy Practicum in the Intermediate Grades.

C&T 355. Literacy Practicum in the Intermediate Grades (4-6). 1 Credits.
This supervised practicum is intended to allow the preservice teacher to apply the knowledge gained in C&T 354, Literacy Instruction in the intermediate grades (4-6), by teaching children in the intermediate grades. To be taken concurrently with C&T 354. Prerequisite: Admission to the Teacher Education Program.

C&T 356. Understanding Dyslexia in Early Childhood. 1 Credits.
In this 1-credit online course, UEC preservice teachers will learn about issues related to dyslexia. For example, preservice teachers will learn (a) how dyslexia is defined and the characteristics of students identified with dyslexia; (b) about screenings and diagnostic assessments that help teachers make informed instructional decisions; (c) how to teach reading to students at-risk for or identified with dyslexia; and (d) how to help students address some co-morbidities that are often associated with dyslexia. This course aligns with C&T 352: Literacy in the Primary Grades and C&T 353: Literacy Practicum in the Primary Grade. Along with C&T 352/353, this course addresses the Kansas Department of Education (KSDE) expectations about dyslexia for teacher preparation programs. Concurrent enrollment in C&T 352 and C&T 353 is required. Prerequisite: Admission to the Teacher Education Program.

C&T 359. Literacy in the Content Areas. 1 Credits.
An introduction to reading in relation to specific areas of art, music and health and physical education. Focus on specialized vocabulary and literature related to each area. Introduction of specific strategies to teach vocabulary and comprehension and to integrated units of study. Prerequisite: Admission to certification program in music education, art education, health education, or physical education.

C&T 360. Knowing and Learning in Mathematics and Science. 3 Credits.
This course focuses on issues of what it means to learn and know science and mathematics. What are the standards for knowing we will use? How is knowing and learning structured and how does what we know change and develop? For the science and mathematics educator, what are the tensions between general, cross-disciplinary characterizations of knowing (e.g. intelligence) and the specifics of coming to understand
powerful ideas in mathematics and science? What are the links between knowing and developing in learning theory, and the content and evolution of scientific ideas. Also, current issues and tensions in education will be discussed, especially as it relates to mathematics and science instruction.

C&T 366. Classroom Interactions in Mathematics and Science. 3 Credits.
To make prospective teachers aware of multiple models of teaching (including direct instruction, inquiry teaching and use of small groups); the advantages, disadvantages and uses of each; and what each model requires of teachers. To allow prospective teachers to explore ways of probing student understanding through authentic assessment, evaluating student understanding through student artifacts, and enhancing student understanding through lesson plans built around models of how people learn. To make prospective teachers aware of equity and diversity issues in classroom teaching and ways of ensuring that all students have an opportunity to learn. To make students aware of the proficiencies for licensure recognized by UKanTeach and Kansas State Board of Education and facilitate students' demonstration and documentation of these through their development of a professional portfolio. To develop students' capacity to identify and evaluate best teaching practices as presented in research literature. Prerequisite: C&T 360.

C&T 380. English as a Global Language. 3 Credits.
In this course, we will explore the political, cultural, historical, and economic factors that drive English's status as a global language and the demand to learn it. We will attend to such questions as, Why a global language, and why English? Is the spread of English necessarily natural, neutral, and beneficial? Then, we will consider implications of answers to the above questions on teaching English internationally, since TESOL positions overseas provide ideal opportunities for college-age Americans to live and work abroad. The projects assigned are intended to teach students to think critically about issues related to prominence of English teaching/learning around the world.

C&T 401. Professional Learning Seminar I. 1 Credits.
This is the first in a series of three consecutive professional learning seminars. The primary purpose of the professional learning seminars is to collaboratively engage KU teacher education students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that pre-service teacher education students face in the schools. Faculty and students will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the philosophical, and psychological. The professional learning seminars are designed around key features of effective professional learning communities and sustained professional development for teachers. Features include supportive, collaborative learning, shared personal and professional practice, and collective inquiry of teaching and learning. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Teacher Education Program.

C&T 403. Professional Learning Seminar III. 1 Credits.
The primary purpose of the professional learning seminars is to collaboratively engage KU teacher education students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that pre-service teacher education students face in the schools. Faculty and students will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the philosophical, and psychological. The professional learning seminars are designed around key features of effective professional learning communities and sustained professional development for teachers. Features include supportive, collaborative learning, shared personal and professional practice, and collective inquiry of teaching and learning. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Teacher Education Program and successful completion of C&T 402.

C&T 420. Teaching Kansas Government and Contemporary Public Policy Issues: ______. 3 Credits.
A study of the constitution, organization, functions, and processes of Kansas government, of contemporary public policy issues with local, state and national implications, and of strategies for teaching these in middle and secondary classrooms. Prerequisite: Admission to the School of Education and POLS 110.

C&T 423. Assessing English Language Learners. 3 Credits.
This course provides an introduction and overview of basic principles in assessing English language learners (ELLs) in the context of U.S. preK-12 classrooms and schools. With a focus on addressing equity issues, the course: 1) provides the context and rationale for variety of approaches to assessment; 2) discusses assessment related academic language in the content classroom; 3) discusses the multiple purposes of assessments; and 4) reviews how assessment results can inform educators, students, families, and community members. Prerequisite: C&T 330 or C&T 331.

C&T 424. Second Language Acquisition for preK-12 TESOL Educators. 3 Credits.
This course provides an introduction to the process of second language acquisition as it relates to English language learners (ELLs) in a U.S. preK-12 context. Particular attention is given to the influence of cognitive, affective, and sociocultural factors in second language acquisition. Current developments in second language acquisition are reviewed and evaluated in keeping with the needs of professionals in the context of second language education. Prerequisite: C&T 330 or C&T 331.

C&T 430. Teaching Literature for Young Adults. 3 Credits.
Teaching literature (novel, short story, poetry, drama, nonfiction) suitable for students in the middle school, the junior high school, and the senior high school. Ethnic literature, censorship, bibliographies, and other relevant sources of information about books for young adults will be studied. Prerequisite: Admission to the School of Education.

C&T 448. Reading and Writing Across the Curriculum. 3 Credits.
Content area teachers do far more than impart information to students. They play an important role in guiding middle/secondary students as they use reading and writing as tools for learning. This course includes an overview of the state and national reading and writing scores of adolescents. Students will then be introduced to the basic processes or ways in which individuals may learn to read and write. The course continues with a focus on the instructional strategies and materials that promote the development of reading and writing in the context of teaching new information. Additionally, the course emphasizes the informal methods educators can use, on an on-going basis, to diagnose their
students ability to comprehend content material. Finally, appropriate fix-up strategies will be modeled. Prerequisite: Admission to the Teacher Education Program.

C&T 449. Understanding Dyslexia and Supporting Students in Middle and Secondary Schools. 1 Credits.
In this 1-credit online course, middle and secondary preservice teachers to begin acquiring an understanding of dyslexia and the characteristics that students with dyslexia might display in the classroom and on academic/social tasks. Preservice teachers will learn how dyslexia is identified, how to teach students identified with dyslexia, and how to help students address some co-morbidities that are often associated with dyslexia such as organization, memory and concentration. Prerequisite: Admission to the Teacher Education Program.

C&T 460. Project Based Instruction in Mathematics and Science. 3 Credits.
This course will have three essential components. The first will be a theory-driven perspective accounting for what we know of how people learn and how project-based instruction improves student learning in math and science. The second component will provide the students with support as they develop their own project-based unit. The third component will be field experiences consisting of two parts: 1) observation of well-implemented project-based instruction in local schools and 2) teaching project-based activities in an informal education setting. Prerequisite: C&T 360.

C&T 489. Advanced Teaching Practicum. 1 Credits.
This supervised practicum is intended to allow the pre-service teacher to apply knowledge gained in SPED 507; C&T 448, ELPS 537; and C&T 540, C&T 541, C&T 542, C&T 543 and C&T 544: Advanced (Content Area) Methods by teaching children in the middle/secondary grades. To be taken concurrently with SPED 507; C&T 448, ELPS 537; and C&T 540, C&T 541, C&T 542, C&T 543 and C&T 544: Advanced (Content Area) Methods. Prerequisite: Admission to the Teacher Education Program.

C&T 490. Student Teaching. 6-7 Credits.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Successful completion of fall practicum experiences and demonstration of appropriate professional dispositions.

C&T 491. TESOL Practicum for Kansas State Endorsement. 3 Credits.
The TESOL Practicum allows individuals to gain supervised experience in Teaching English to Speakers of Other Languages (TESOL) for a professional KSDE ESOL endorsement and advancement. Prerequisite: Completion of all TESOL endorsement courses.

C&T 494. Internship. 6-7 Credits.
A supervised internship experience leading to initial certification. The student assumes the total professional role as a teacher in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Successful completion of all practicum experiences and demonstration of appropriate professional dispositions.

C&T 495. Seminar: Developing the Teaching Portfolio. 3 Credits.
This course serves to instruct students in the research, teaching, and writing components of developing a teaching portfolio. The seminar will provide a forum for discussion and deeper exploration into topics and issues related to working in the school setting, teaching, and developing a professional teaching philosophy. Graded on a satisfactory/fail basis. Prerequisite: Enrollment in Student Teaching or Internship during the Spring semester.

C&T 497. Independent Study in: _____ 1-2 Credits.

Only one enrollment permitted each semester. A maximum of four hours will apply toward the bachelor's degree. Prerequisite: Recommendation of advisor and consent of instructor.

C&T 499. Bachelor's Project. 4-6 Credits.
A formal report of some aspect of the field experience that relates formal learning and in situ experience to program planning, implementation, and evaluation. Topic will be selected in consultation with the project advisor. Prerequisite: C&T490 and C&T 491 (C&T 491 may be taken concurrently).

C&T 500. Student Teaching in: ____. 1-6 Credits.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Admission to the Student Teaching program.

C&T 501. Student Teaching Practicum in: ____. 1-6 Credits.
A supervised classroom teaching experience under the direction of an experienced teacher and in close relationship with a university supervisor. Prerequisite: Admission to the Graduate Certification Program and approval of advisor.

C&T 503. International Perspectives in Primary and Secondary Education. 3 Credits.
This course is will expose students to a variety of debates and developments related to primary and secondary education in our globalized era. Students will survey educational systems from the US and selected world regions, comparing and contrasting them in terms of access, funding, curriculum, and pedagogy. They will investigate educational systems from the perspective of international development while addressing issues of local vs. national or international control, tradition vs. global advancement, and other challenges and trade-offs. Prerequisite: Junior standing or higher, or permission of instructor. The course is suitable for advanced undergraduate and master's degree seeking students.

C&T 530. Curriculum and Instruction in Foreign Language Classrooms. 3 Credits.
A study of philosophy, objectives, curriculum, instructional strategies, and evaluation in teaching foreign language at the K-12 levels. Prerequisite: Admission to the Teacher Education Program.

C&T 533. Curriculum and Instruction in Middle & Secondary English/Language Arts Classrooms. 3 Credits.
This is an English/Language Arts methods course that focuses on curriculum development and instructional strategies appropriate for teaching English/Language Arts in grades 5-12. Prerequisite: Admission to the Teacher Education Program.

C&T 537. Curriculum and Instruction in Middle and Secondary Science Classrooms. 3 Credits.
The purpose of this course is to help you prepare to teach science in the middle and secondary grades. The instructor designed the class sessions and learning tasks to enable you to make progress toward achieving the Kansas Science Teaching Standards and Kansas Professional Education Standards. Prerequisite: Admission to the Teacher Education Program.

C&T 539. Curriculum and Instruction in Middle and Secondary Mathematics Classrooms. 3 Credits.
This course is designed to provide focused study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12. Prerequisite: Admission to the Teacher Education Program.

C&T 540. Advanced Practices in Teaching English in the Middle and Secondary Schools. 3 Credits.
The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching English/Language Arts in grades 5-12 and as a final readiness for the undergraduate student teaching experience. Prerequisite: Admission to the Teacher Education Program.

C&T 541. Advanced Practices in Teaching Social Studies in Middle/Secondary Schools. 3 Credits.
Advanced study of curriculum development and instructional strategies appropriate for teaching social studies in grades 6-12 and application of learning in a middle/secondary classroom. Prerequisite: C&T 355; SPED 326 and, C&T 324

C&T 542. Advanced Practices in Teaching Science in the Middle and Secondary Schools. 3 Credits.
This course is designed as a final readiness for the semester-long student teaching experience and the Kansas Performance Teaching Portfolio to be completed during that student teaching experience. The course deals with the analysis, adaptation, and application of varied instructional designs to implement curricula in specific science areas in grades 5-12. Prerequisite: Admission to the middle-level licensure program in science education at the undergraduate level or one of the graduate licensure programs in middle/secondary science. Successful completion of C&T 537.

C&T 543. Advanced Practices in Teaching Mathematics in the Middle and Secondary Schools. 3 Credits.
The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12 and as a final readiness for the undergraduate of GLP student teaching experience. Prerequisite: Admission to the middle-level licensure program in mathematics education at the undergraduate level or the GLP in middle or secondary mathematics. Successful completion of C&T 539.

C&T 544. Advanced Practices: Situating Foreign Language Content, Dispositions, Skills & Tools Language Classroom. 3 Credits.
This is an advanced Foreign Language methods course that focuses on the critical importance of the socio-linguistic environment of foreign language classrooms. Prerequisite: Admission to the Teacher Education Program.

C&T 598. Special Course: _____ . 1-5 Credits.
A special course of study to meet current needs of education students, primarily for undergraduates.

C&T 649. An International Teaching Experience. 3 Credits.
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director.

C&T 707. Project Based Instruction. 3 Credits.
This course will emphasize exploring, designing, and evaluating materials and pedagogy to work toward the design of project-based curriculum and instruction. Topics focus on the principles of project-based instruction as well as multiple models for its use in the classroom.

C&T 709. Foundations of Curriculum and Instruction. 3 Credits.
Basic concepts and processes of curriculum and instruction, including theories, planning models, resources for decision-making, current trends, research, and proposals for improvement of curriculum and instruction.

C&T 730. Understanding Talent. 3 Credits.
This course addresses the social, cognitive, affective, and other developmental aspects of talent as manifested in children and youth with high potential. The course provides an opportunity to examine characteristics, strengths, and needs of children and their families. The course focuses on the foundational aspects of gifted/ talented education: educational and political history of the field, etiology of extraordinary potential, and identification and assessment techniques, instruments, and systems. Included in the course are relevant research, policies and regulations, services, and information resources. Prerequisite: SPED 425, SPED 431, SPED 725, or equivalent introductory course on exceptional children and youth.

C&T 739. Internship in Teaching: _____ . 1-6 Credits.
A supervised internship experience leading to initial certification. The student assumes the total professional role as a teacher in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Admission to a Curriculum and Instruction licensure program. Instructor permission required to enroll.

C&T 740. Foundations of Reading: Process, Theory, and Instruction. 3 Credits.
It is the purpose of this course to introduce students to the foundations of the reading process, developmental levels, theory, models, and procedures at the emergent, elementary, and secondary levels. Elements of cultural, linguistic, and ethnic diversity that affect the reading process are included. Students work with research related to the reading process, remediation, and assessment.

C&T 741. Comprehension and Study Strategies for Use with Multiple Texts. 3 Credits.
It is the purpose of this course to examine research, theory, and practice in reading comprehension. Emphasis is placed on the application of strategies for various text types (expository, narrative, persuasive, and technical) for teaching reading comprehension and study skills across content areas in the K-12 classrooms. Prerequisite: C&T 740 or permission of the instructor.

C&T 743. Writing and Spelling Development and Instruction. 3 Credits.
A study of the research base on writing, spelling, speaking, and listening for teaching the language arts; an overview of development in writing and spelling, the writing and spelling processes and instruction, and strategies for integrating the language arts. Prerequisite: Admission to a masters program within the School of Education, C&T 740 or permission of the instructor.

C&T 745. Reading and the English Language Learner. 3 Credits.
The course focuses on the literacy development, research, and effective teaching practices that support emerging bilinguals (EBs) becoming literate. The course examines how reading, writing, speaking, and viewing in a new language are similar and/or dissimilar from these modalities in a first language. Cognitive, sociocultural, linguistic and educational perspectives are investigated as part of this examination.

C&T 748. Reading and Writing Across the Curriculum. 3 Credits.
In C&T 748, preservice content teachers, who have had no previous literacy courses, are introduced to the basic processes of reading and to instructional strategies and materials that promote the development of reading, writing, and studying in the context of teaching new information. Additionally, we discuss the ways in which teachers diagnose, in an
informal, on-going basis, their students’ abilities to comprehend the material they are teaching.

C&T 749. An International Teaching Experience. 3 Credits.  
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director.

C&T 770. Pedagogical Considerations in the 21st Century Classrooms. 3 Credits.  
Exploration of pedagogy in the 21st century classroom and examination of current learning environments and strategies available to enhance student learning and engagement. Prerequisite: Admission to graduate program in the School of Education. Admission to a non-degree program in the School of Education.

C&T 797. Special Project in: _____ 2 Credits.  
Implementation of the curriculum project planned in C&T 734 or C&T 735; implementation and assessment of the special project will occur during the internship. Prerequisite: C&T 734, C&T 735, and C&T 736.

C&T 798. Special Course: _____ 1-5 Credits.  
A special course of study to meet current needs of education professionals—primarily for graduate students.

C&T 800. Foundations of Curriculum Development. 3 Credits.  
This course is designed for students to gain a functional understanding of the historical, philosophical, political, psychological, and cultural factors which affect the designing and implementation of curriculum at several levels: the individual classroom, the team, the school, the larger administrative unit, the state, and the nation. Prerequisite: C&T 709 or permission of instructor.

C&T 801. Planning for School Improvement. 3 Credits.  
This course will emphasize the latest research and practice related to school reform and student success, particularly professional development and data analysis as they relate to standards, curricula, assessment, and instruction embedded in a school improvement plan. Discussions will provide a pathway for teachers to contribute to the development and implementation of an identified district’s school improvement plan. You will function as a teacher member of a school improvement team to assimilate and synthesize research and practice into the development, revision, and/or assessment of a school improvement plan for a specific school site. Prerequisite: Enrollment is restricted to students admitted to the online Curriculum and Instruction Master’s program.

C&T 802. Curriculum Planning for Educational Settings. 3 Credits.  
A focus on organizing and managing curriculum development in educational settings. Such curricular decisions as writing philosophies, setting goals and objectives, selecting and organizing content, and designing and monitoring evaluation procedures will be emphasized. Providing leadership for the collaborative process of curriculum planning in organizational settings will receive attention.

C&T 803. Differentiating Curriculum and Instruction. 3 Credits.  
This course is designed for educators interested in expanding curriculum and instruction to accommodate diverse learners in the classroom, K-12. Topics include: models, methods, and resources for differentiating curriculum and instruction, designing and modifying differentiated curriculum, evaluating student learning, and introducing students, parents and colleagues to differentiation. An evidence-based, practical course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School.

C&T 806. Instructional Strategies and Models. 3 Credits.  
Analysis of models of teaching which represent distinct orientations toward students and how they learn. The application of these models is complemented by the study of research evidence on effective teaching strategies. Prerequisite: C&T 709.

C&T 807. Multicultural Education. 3 Credits.  
In order to provide the student with an understanding of multicultural education, the course will examine the effects of such issues as ethnicity in America, the melting pot theory, separatism, cultural pluralism, legal issues, and bilingual education upon the curriculum and instruction in today’s classrooms. It will include an evaluation of materials for bias and stereotypes.

C&T 808. Qualitative Research: Curriculum Inquiry. 3 Credits.  
Curriculum Inquiry provides an opportunity to reflect, explore, understand, and broaden perspectives of curriculum through examining the theories, methodologies, strategies, and design of qualitative research. This course is designed to develop a common understanding of the major elements of qualitative research, while offering each student an opportunity to examine research topics and methods of personal interest, with particular attention to curricular issues. The course also includes practical experience with various modes of data collection and analysis.

C&T 809. Creative Thinking and Learning. 3 Credits.  
This course provides an opportunity to investigate the nature of the creative process in educational settings. The knowledge base for the course builds from foundations of creativity, principles and theories of identifying and enhancing creative production, and affective learner variables. The course blends classic and contemporary works in creativity, and features the application of theories and models of the origins and development of creativity to promoting creative thinking and learning among children, youth and adults. Participants learn about, apply, and adapt techniques for defining and identifying creative potential and for encouraging creative thinking in educational settings. Prerequisite: Admission to graduate school.

C&T 816. Culturally Responsive Pedagogy. 3 Credits.  
U.S. schools are increasingly multilingual spaces, where new waves of migration and refugee resettlement are reshaping the linguistic landscape of previously English-dominant spaces. It is from this perspective that this course explores the history and evolution of culturally responsive pedagogy—beginning with its origin in U.S. multicultural education, to its expansion into the education of culturally and linguistically diverse learners, to its adoption in English language education more broadly, and TESOL teacher education more specifically (in the U.S. and abroad). The course will highlight the curricular and instructional approaches that undergird CRP and the future global direction of this pedagogical approach.

C&T 817. Contact, Change & American English. 3 Credits.  
This course introduces the sociolinguistic topics of language change and variation through a study of the historical evolution of what has come to be known as modern American (U.S.) English. The course will explore the historical instances of contact between English and other languages that have resulted in significant and minor changes, as well as regional variations to spoken and written American English. It will also discuss the pedagogical and research implications of these changes for teaching English in the U.S. and abroad.

C&T 818. Language, Discourse and Ideology. 3 Credits.
Language, Discourse and Ideology adopts an interdisciplinary approach to exploring the language ideologies that shape English language development in EFL, ESL, and Bilingual / Dual Immersion contexts. The study of language ideology is a subfield of Sociolinguistics and is linked to issues of language, ideologies about language, and language as a vehicle for ideology. Though language is a focus of this course, the course is “not about language alone. Rather, ...[it addresses] ties of language to identity, to aesthetics, to morality, and to epistemology” (Woolard 1998: 3) and the ways in which these uses of language reflect and reproduce language ideologies. The course is open to graduate students across the School of Education with an interest in language, English as a Second/Foreign language, and policy planning and curriculum studies. It is also open to students in anthropology, linguistics, sociology and related fields with an interest in language use in educational contexts.

C&T 819. Foreign Language/EFL Teaching Methods. 3 Credits.
This course addresses foreign language/EFL teaching methods and techniques that are related to second language acquisition theories and appropriate for the teaching of foreign languages/EFL to children, adolescents, and adult learners. Prerequisite: Admission to a graduate program (Master or Doctorate.)

C&T 820. Methods of Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
The purpose of this course is to study the objectives and methods of ESL/Bilingual education. Students will examine methods and techniques of teaching: listening, speaking, reading, and writing in the ESL/Bilingual Education settings. The course will also emphasize the importance of culture in second language teaching, and self-evaluation of teaching and instructional materials. Prerequisite: Corequisite: C&T 709.

C&T 821. Assessment in Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
This course provides an overview of diagnostic techniques and instruments used to identify and remediate specific learning difficulties associated with normal second language development in the area of listening, speaking, reading, and writing. The course includes a review of research concerning assessment as it relates to error analysis in the second language context. Prerequisite: Corequisite: C&T 820.

C&T 822. Second Language Acquisition for Teaching English to Speakers of Other Languages Educators (TESOL). 3 Credits.
This course provides an intensive review of the theory and research base of second language acquisition. Particular attention is given to the influence of research trends in linguistics and psychology on second language education theory and practice. Current trends in second language education are examined in light of the historical theory base. Prerequisite: C&T 820.

C&T 823. Intercultural Competence for Teaching English to Speakers of Other Languages Educators (TESOL). 3 Credits.
This course includes the study of the interrelationship of language and culture and the use of multicultural training techniques to develop cultural awareness and positive attitudes in the second language classroom. Emphasis is on the integration of culture in the second language curriculum. Prerequisite: C&T 820 or C&T 803.

C&T 824. Problems in Second Language Instruction. 3 Credits.
This course presents a study of curricula and instruction in the second language setting at all levels with emphasis on educational research concerning these issues. Particular attention is given to developing competency in locating and utilizing sources of information and to preparing the research document. The course facilitates practical problem solving in the second language learning context. Prerequisite: C&T 820.

C&T 825. Advanced Practicum in Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
This course provides a supervised teaching experience in a setting appropriate to the goals of the prospective ESL/Bilingual teacher: elementary, secondary, or adult. Particular attention is given to lesson planning, classroom management, and the development of self-evaluation techniques. This course will also emphasize structured classroom observation prior to teaching and techniques for developing and maintaining positive working relationships with other professionals in the school setting. Prerequisite: C&T 820, C&T 821, and C&T 822 or C&T 824.

C&T 826. Linguistic Analysis for Teaching English to Speakers of Other Languages Educators (TESOL). 3 Credits.
This course offers pre- and in-service teachers the basic foundations of language analysis necessary for the teaching of second/foreign languages. The course covers basic linguistic topics common to all human languages (grammatical, phonological, and semantic aspects) with the intent to help teachers understand and address common language problems that students face when learning English as a second/foreign language.

C&T 827. Teaching Pronunciation for Foreign Language/Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
The objective of this course is to give prospective language teachers the requisite theoretical and practical background for making decisions concerning pronunciation teaching. This course provides second and foreign language teachers with the necessary knowledge and skills to address the teaching of pronunciation in the foreign /language classroom. After a review of theoretical and practical research dealing with universal human speech perception and production, implications for the design of appropriate strategies and lessons to teaching pronunciation, both at the segmental and suprasegmental levels, are addressed. Prerequisite: C&T 444, C&T 820 or C&T 822.

C&T 828. Language and Identity. 3 Credits.
This interdisciplinary seminar explores the interrelationship between language and identity, and the role of language in developing identities of second language learners.

C&T 829. Teaching English to Speakers of Other Languages in Global Context (TESOL). 3 Credits.
The purpose of this course is to investigate contemporary issues in and key concepts pertaining to Teaching English to Speakers of Other Languages (TESOL) throughout the world. We will examine primary research and employ a sociocultural lens to better understand how the phenomenon of globalization has shaped how, why, and the conditions under which English is taught and learned on different continents, as well as critiquing research methods and approaches to studying English language teaching and learning.

C&T 840. Emergent Literacy and Beginning Reading. 3 Credits.
A study of emergent literacy through the beginning stages of literacy development. Course content focuses on the history, theory, and research that supports instructional reading practices for children Pre-kindergarten through grade 2. Prerequisite: C&T 740, C&T 741, or permission of instructor.

C&T 841. Early Intervention in Reading Practicum. 3 Credits.
A case study approach to the instruction of children in need of early intervention in reading. Requires assessment, instruction, and case reports of tutored children. Prerequisite: C&T 740 or permission of instructor. Concurrent enrollment or previous enrollment in C&T 840 is required.
C&T 842. Supporting Striving Readers: Adolescent through Adult. 3 Credits.
A study of the characteristics and multiple causes of reading and writing difficulties, principles and procedures for diagnosing and remediating reading difficulties, how to provide individual and group intervention strategies, communicate diagnostic information, and gain awareness of the impact of research on instructional decision-making for students with reading difficulties. Prerequisite: Admission to a masters program within the School of Education, C&T 740, C&T 741, C&T 840, and C&T 841, or permission of instructor.

C&T 843. Supporting Striving Readers Practicum. 3 Credits.
Case study approach to the treatment of pre-adolescent through adults with reading disabilities. Requires diagnostic testing of the learner, compilation of case study reports, and participating in staffing for the purpose of designing remedial reading programs. Students also participate in implementation of remedial programs with pre-adolescent through adults through tutoring in either a clinical setting or a public school setting. Prerequisite: C&T 740, C&T 840, C&T 841, or permission of instructor. Concurrent enrollment or previous enrollment in C&T 842 is required.

C&T 844. The Reading Program: Coordination and Supervision. 3 Credits.
An overview of the role of the reading coordinator/supervisor and that individual's responsibility for the components of a balanced reading program. Emphasis will be given to assessment of the reading program, strategies for change, improving the reading program, in-service programs, working with other school personnel, providing services, and public relations. Prerequisite: C&T 740, C&T 741, C&T 840, C&T 841, C&T 842, and C&T 843.

C&T 850. Seminar in Science and Mathematics Educational Research. 3 Credits.
The primary purpose of this course is to examine literature in science and mathematics education in order to better understand research in these fields from both a historical and contemporary perspective. The process of examining literature in these fields will be used to help understand how to plan, conduct, and evaluate research in science and math education. This course emphasizes both qualitative and quantitative research in science and math education.

C&T 851. Modern Approaches to Middle/Secondary School Mathematics. 3 Credits.
A study of aspects of curriculum and instruction in middle/secondary school mathematics programs, including research on teaching and learning mathematics. Prerequisite: Teaching experience in middle-level or high school mathematics or permission of instructor.

C&T 852. Instruction in Mathematics and Science. 3 Credits.
In this course, students will explore a variety of research-based instructional theories, models, and strategies for teaching and learning of mathematics and science. They will apply and evaluate the usage of one instructional strategy in an action research project in their classrooms. Prerequisite: C&T 709.

C&T 854. Assessment and Evaluation in Science and Mathematics. 3 Credits.
The primary purpose of this course is to examine assessment and evaluation in science and mathematics, including assessment of students, teachers, schools, and educational programs. The course will examine technical characteristics of various assessment methods including both traditional and alternative methods. In addition, the course will analyze and discuss various controversial issues in assessment such as authentic assessment, and large scale assessment, and large scale assessments, assessment for accountability, and equity issues.

C&T 855. Curriculum in Science and Mathematics. 3 Credits.
A survey of the concepts and processes that provide the focus of modern science and mathematics curricula will be central to the course. Students develop a standards-based framework for a school science or mathematics program. The course includes an analysis of national and state recommendations for the reform of science and mathematics education in the context of our state and local educational systems, which is applied by evaluating exemplary instructional materials and activities appropriate for classroom use. Prerequisite: C&T 709.

C&T 857. Practicum in Mathematics Education. 1-3 Credits.
Intensive supervised experience working with improvement of mathematics curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in mathematics education and prior consent of practicum supervisor.

C&T 858. Connecting Research to Classroom Practice in Mathematics. 3 Credits.
This course will explore current research on issues important to mathematics teachers so they can use research to support and improve their classroom practice. Prerequisite: Teaching experience or permission of instructor.

C&T 859. Issues in Mathematics or Science Education: _____ . 1-3 Credits.
A study of issues in a particular area of mathematics or science education. The course may be repeated for different topics. Prerequisite: Admission to graduate study.

C&T 862. Trends and Issues in Social Studies Instruction. 3 Credits.
A study of trends and issues relating to, and needed changes in the content, organization, emphasis, resources and equipment, methods, devices and evaluation in the social studies. Consideration of related problems such as achieving meaning and understanding, providing for individual differences, providing motivation, the cooperative assignment and socialized recitation. Students will be permitted to concentrate on those problems of particular interest to them. Prerequisite: Nine hours of Education including educational psychology.

C&T 870. Instructional Media Development. 3 Credits.
The purpose of this course is to help students acquire fundamental technical skills required for developing various instructional media products. This course takes a hands-on, practical approach to creating various computer-based instructional materials, such as digital image, audio, video, and computer animation for Web and mobile devices. This course is prerequisite for several courses in the program. No previous design or development experience is required.

C&T 871. Foundations of Learning Technology. 3 Credits.
This course provides a comprehensive overview of the historical and theoretical foundations of learning technologies. The goal of this course is to provide students with a survey of the research literature and definitions of terminology central to the field. Special emphasis is on current and emerging learning science research and how it can be applied to the creation of technology supported learning environments.

C&T 872. Social Media Technology. 3 Credits.
This course provides students with an introduction to the use of social media and cloud computing. Social media and cloud computing enable individuals to create, collaborate, and share information. Students will develop implementation strategies and acceptable use policies for the
use of social media and cloud computing in the context of K-16 education, government, and corporate settings.

C&T 873. Integration of Learning Technology. 3 Credits.
This course focuses on strategies for integrating learning technologies in K-12 schools, universities, corporate and government settings. Topics cover the National Educational Technology Standards that apply information technology to: a) inspire learning and creativity, b) develop digital-age learning experiences and assessments, c) model digital-age work, d) advance digital citizenship, and e) engage in professional growth and leadership. Students produce a comprehensive electronic portfolio that describes the theoretical perspectives that guide their technology integrations strategies and presents evidence that demonstrates their competencies.

C&T 874. Constructivist Learning Technology. 3 Credits.
To be effective, educational technologies must be designed based on what we know about how people learn. This course explores (1) important constructivist learning theories, (2) how such learning theories can be used in designing and developing computer-based learning environments, and (3) how student learning can be assessed in those environments. This course is suitable for students who wish to learn how constructivist learning technologies can change the way we teach and learn new knowledge to improve student learning.

C&T 875. Design of Learning Technology. 3 Credits.
This course introduces instructional design theories and production techniques for developing and evaluating learning technology resources and systems. Students apply their understandings of instructional systems design and learning theories as they work in teams to develop learning technology solutions for specific clients in real-world settings.

C&T 876. Online Learning Design and Development. 3 Credits.
The course provides an overview of the knowledge and skills for that are essential for designing and developing online instruction. The goal of the course is for students to acquire the analysis, design, development, and evaluation skills needed to facilitate learning in both asynchronous and synchronous online learning environments. Special emphasis is on learning design, and the evaluation of online learning solutions for education, medicine, military, business, and industry.

C&T 877. Games and Simulations for Learning. 3 Credits.
This course provides an introduction to the design and development of games, gamification, and simulations for learning and instruction. Emphasis is on the selection and design of interactive learning environments for K-16 education and workforce training. Topics include a review of the essential elements of game design, rapid prototyping, the psychology of gaming, game technology, and research related to the use of games, gamification, and simulations in K-16 education and workforce training.

C&T 890. Bridging Theory to Practice: Capstone Portfolio. 3 Credits.
This capstone course provides a space and opportunity for students to reflect on their learning in the M.S.E. online programs. Students will create a digital portfolio demonstrating their knowledge and skills related to the C&T learning outcomes. Students will demonstrate their engagement with relevant literature and explain how they can use, share, or apply their learning from the program to their current or future context. Prerequisite: Students must have achieved a minimum grade point average of 3.0 on a 4.0 basis in their Curriculum & Instruction master's program in order to be eligible to enroll.

C&T 896. Seminar in: _____. 1-4 Credits.

C&T 897. Independent Study. 1-4 Credits.

Prerequisite: Consent of advisor and instructor.

C&T 898. Master’s Project. 1-4 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

C&T 899. Master’s Thesis. 1-6 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

C&T 900. Current Trends & Issues in Curriculum & Instruction. 3 Credits.
The course, taught as a capstone seminar, will provide a review of current trends and issues in theories, practices, and events within curricular and instructional efforts in American education. Topics studied may include constructivism, connectivism in the digital age, contemporary theories and theorists such as Vygotsky, online instruction and the Internet's potential and growth, the new Cult of Efficiency, stigmatization and standardized testing, and charter schools. Student composition of each class will influence the final syllabus, which may include other topics reflective of student interests and goals. The class is designed for those in the final course phase of their doctoral studies. Students in their first or second semester of their programs will not be encouraged to enroll in the class.

C&T 901. Contemporary Research of Teaching Effectiveness. 3 Credits.
A review of recent research on the conceptualization, measurement, and improvement of teaching effectiveness. Particular attention is given to the history of efforts to improve teaching, to the reasons why such efforts have often been unsuccessful, and to the recent contributions of the “micro-criteria” approach to the problem.

C&T 902. Directed Readings. 3 Credits.
Directed Readings course is intended for students wishing to study an area not covered by or regularly offered in an existing course, or the subject of a course that is not regularly offered in the Curriculum & Teaching Department. This course is individually designed by C&T faculty with reading loads, writing requirements and academic expectations comparable to other doctoral level courses in the department. Prerequisite: Admission to the Ph.D. or Ed.D. program. Successful completion of C&T 920 or C&T 922 or by instructor permission.

C&T 903. Curriculum Supervision. 3 Credits.
An intensive study of the theoretical and research bases for curriculum supervision and improvement. Topics include models and practices in supervision and staff development, skills and instruments used in curriculum assessment, coordination of both human and material resources, and the dynamics of change strategies.

C&T 904. Philosophical Questions in Curriculum and Teaching. 3 Credits.
This course addresses philosophical questions pertaining to curriculum and teaching across a range of educational contexts. These questions center on epistemology, ethics, and the assumptions underlying alternative approaches to research in education. Students completing this course should be able to engage in philosophical inquiry and apply relevant philosophical literature and principles to the examination of curriculum and teaching.

C&T 905. Teacher Education in the U.S.. 2 Credits.
A study of the development, issues, and programs for the preparation of teachers. Open to all regular graduate students.

C&T 906. Qualitative and Curriculum Inquiry: Analysis and Interpretation. 3 Credits.
Supports novice researchers in extending their understanding of the theoretical frameworks underlying qualitative research, qualitative methodologies, the research process and its relationship with curriculum inquiry. During the course we will discuss various forms of qualitative
This course introduces students to the processes of planning, conducting, and evaluating mathematics and science research and evaluation in education. This course emphasizes the methods and techniques used in both quantitative mathematics and science research and evaluation methodologies. Prerequisite: A PRE course in statistics.

C&T 970. Fostering Teacher Growth and Inquiry. 3 Credits.
Students will explore theory and research related to professional learning with a focus on the professional learner, professional contexts, and professional learning activities. Students also will learn about and design a pilot study that is set in a relevant professional context. Prerequisite: Admission to the Ed.D. program in the Department of Curriculum & Teaching or consent of instructor.

C&T 971. Planning and Conducting Educator Inquiry in Professional Settings. 3 Credits.
Students will explore theory and research related to student learning and its relationship to the professional learner, professional contexts, and professional learning activities. Students will learn how to conduct a needs assessment in educational settings, and design and implement professional learning based on the needs assessment data. Students will also implement the pilot study that they designed in C&T 970. Prerequisite: C&T 970.

C&T 972. Connecting Professional Growth and Student Learning. 3 Credits.
Students will synthesize theory and research related to (a) curriculum and instruction, and (b) the relationship between student learning and professional learner, with respect to their career goals. Students will write a report and present findings from their pilot study and the professional learning they implemented in C&T 971. Prerequisite: C&T 970 and C&T 971.

C&T 975. Writing Literature Reviews. 1 Credits.
This course is designed to give doctoral students an introduction to writing literature reviews. The course will address the process of writing a literature review as well as the types of literature reviews that appear in dissertation study proposals and dissertations. The course is a 1-credit seminar that is designed to complement other coursework taken in the doctoral program. Prerequisite: Admission to a doctoral program in the University of Kansas, or permission from the instructor.

C&T 977. Teaching with Technology in Higher Education. 3 Credits.
The purpose of this course is to support the use of technology to deliver, manage, and design pedagogically sound learning experiences. The course will draw upon the fields of instructional design and educational technology and is theoretically grounded in critical digital pedagogy. Learners are asked to bring their own disciplinary lens to authentic design, technology, and teaching challenges. The course will be offered in a hybrid format with in-class sessions and with supporting online meetings and modules. The course will be organized into modules.

C&T 980. Seminar in Mixed Methods Research. 3 Credits.
The purpose of this course is to provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. This introduction consists of defining mixed methods research and describing the history and foundations of this form of research. We will then examine types of mixed methods designs available and discuss the process of research as it relates to each of these designs.

C&T 990. Capstone Seminar. 3 Credits.
This course will provide students in the Doctor of Education program with capstone experiences in the areas of curriculum and instruction in
The course provides the prospective teacher with an overview of the legal foundations of the American educational system including the ways schools and school districts are organized and run; the role of various levels of government and various governmental and educational officials in controlling education; the rights of students and teachers; the terms, conditions, and responsibilities of teacher employment. Prerequisite: Admission to the Teacher Education Program.

ELPS 540. Ethics in Education. 3 Credits.
This course examines practices and policies occurring in k-12 and postsecondary educational institutions through the lenses provided by ethics. During the semester, we will read, discuss, and write about ethics in education from both theoretical and practical perspectives. Prerequisite: Junior standing or higher. The course is suitable for advanced undergraduate and master's degree seeking students.

ELPS 598. Special Course:. 1-5 Credits.
A special course of study to meet current needs of education students, primarily for undergraduates.

ELPS 627. Growing Up in Urbanizing America. 3 Credits.
A study of the changing role and character of childhood and youth as stages of life in the context of American urban and social history, with particular attention to education and human development. Prerequisite: Junior standing or higher.

ELPS 718. Human Performance Technology. 3 Credits.
This course will provide an introduction to the field of human performance technology (HPT) and how it is applied to productivity and efficiency problems in the workplace. Performance improvement methods include data gathering, analysis, change management, implementation, measurement and the integration of technology. The goal of this course is to provide students with a survey of the research literature and definitions of terminology central to the field of performance improvement. Special emphasis is on current and emerging technology and how it can be applied to human performance improvement in education and the workplace.

ELPS 750. Principalship. 3 Credits.
An introduction to the role, responsibilities, expectations and major duties of elementary, middle, and high school building administrators. Students are presented typical problems faced by school administrators through simulations and role playing and are expected, through reflection and discussion, to develop viable solutions.

ELPS 752. Education Law. 3 Credits.
A study of legal principles and issues affecting educational policy making and practice with emphasis on student and teacher rights, equity, and the administration of schools. Prerequisite: Admission to graduate study.

ELPS 755. Human Resource Management. 3 Credits.
An overview of the theory and practice of the management, recruitment, selection, compensation, placement, and development of personnel in the school setting.

ELPS 756. Data-Driven Leadership. 3 Credits.
The course focuses on the role and effective use of school related data and its analysis in making decisions regarding school improvement, meeting the needs of students with exceptionalities, evaluating educational programs, developing student management strategies, and using instructional technology.

ELPS 757. Education in American Society. 3 Credits.
A study of the roles and goals of education in the United States, the interrelationships among schools and students, teachers, administrators, and parents, and the culture of schools.
ELPS 773. School and Society in Comparative Education. 3 Credits.
Analysis of the role of social science in comparative education as perceived by different philosophies or schools of thought, such as Marxism, phenomenology, empiricism, pragmatism, and linguistic analysis.

ELPS 774. Modern Educational Theorists. 3 Credits.
An in-depth study of prominent European thinkers who have contributed to educational theory and practice (e.g., Rousseau, Pestalozzi, Herbert, Froebel, Montessori, Nietzsche, Freid, Piaget, Ortega y Gasset, etc.). Prerequisite: ELPS 770 or ELPS 771 is recommended.

ELPS 780. Introduction to Higher Education Administration. 3 Credits.
This course is designed for beginning master’s degree students and for doctoral students who have had no previous administrative experience in college or university settings. Students will be introduced to the function and responsibilities of major administrative divisions of a college or university and to the major tasks of administration: planning, programming, budgeting, staffing, managing. An emphasis will be placed on current issues facing higher education and students will be introduced to the major journals of the field. As part of the course requirements, students will spend some time familiarizing themselves with one or more administrative offices on a college campus. Prerequisite: Admission to study in higher education at the graduate level.

ELPS 781. Student Affairs Administration in Higher Education. 3 Credits.
This course is designed to include the study of the history and development of student personnel services in higher education, the role and function of the student affairs administrator, contemporary issues and problems, and an understanding of the organization and role of student affairs administration within higher education settings. Prerequisite: Admission to the higher education program or permission of instructor.

ELPS 782. Diversity, Equity and Inclusion in Higher Education. 3 Credits.
This course provides an introduction to diversity, equity, and inclusion in higher education settings. The content introduces and applies key theories and concepts to the practice of student affairs.

ELPS 786. Introduction to College Leadership. 3 Credits.
This is an introductory course about college leadership that will provide an overview of concepts and theories for the practice of leadership in colleges and universities. Particularly, the content focuses on the application of theoretical perspectives for leadership practice. The aim of the course is to have students analyze and situate themselves as future higher education leaders and administrators. Subject matter includes, but is not limited to, topics such as: administrative leadership in higher education, fundamental leadership theories, managing people and conflict, fostering collaboration and leadership for diverse institutions.

ELPS 798. Special Course:. 1-5 Credits.
A special course of study to meet current needs of education professionals -- primarily for graduate students.

ELPS 820. Practicum in Educational Technology. 1-3 Credits.
Supervised practice in a media center in selection, classifying, designing, producing, and/or managing instructional materials. Prerequisite: C&T 770 and C&T 871.

ELPS 830. Foundations of Multicultural Education. 3 Credits.
This class provides students with an understanding of multicultural education as an instructional concept, educational reform movement, and systemic process meant to ensure educational equity for all people, especially those who have been inadequately served and/or historically discriminated against because of their racial/ethnic or linguistic backgrounds, gender or sexual orientation, socio-economic status, and special needs. Students will examine different theoretical approaches that inform the practice of multicultural education and explore the contribution of various social sciences to the field.

ELPS 831. Sociology of Education. 3 Credits.
This course will provide an introduction to the sociology of education. Specific topics will include: conflict over the purposes of education; how those purposes are or are not translated into actual classroom life; how educational systems have developed historically, how status, and more specifically race, class and gender relations, affect student experiences; and contemporary policy and reform movements. Prerequisite: Graduate Standing.

ELPS 832. History of Educational Thought. 3 Credits.
An examination of the major ideas that have shaped practice in the schools. Emphasis is placed on assisting the student with the development of a coherent and consistent personal philosophy of education upon which administrative practice can be based.

ELPS 833. Social Context of Urban Education. 3 Credits.
This course examines education in urban communities through the foundational disciplines of history, philosophy, and the social sciences. Particular attention is given to ways in which the changing social and political contexts of American cities affect the educational process.

ELPS 834. History and Philosophy of Education. 3 Credits.
A comprehensive study of influential persons and movements in the development of educational thought, Eastern and Western, from ancient times to the present. Emphasis on those ideas and historical roots which are relevant to contemporary issues in teaching and school administration.

ELPS 835. Philosophy of Education. 3 Credits.
An analytic inquiry into basic philosophical positions and issues relevant to education. The difference between ELPS 770 and ELPS 771 is that the latter is topically arranged and does not necessarily follow a historical sequence; it normally proceeds by problems and schools of thought.

ELPS 837. History of Education and Culture in America. 3 Credits.
A study of the relation between education and culture in America from colonial times to the present. American schools are considered in the wider context of cultural and social change.

ELPS 839. Historical Inquiry in Education. 3 Credits.
This course will provide an introduction to the methodology of historical research in education. This course is designed to fulfill the doctoral core requirement for research methods in education for students interested in doing this type of research. Specific topics will include: the historiography of education; working with primary and secondary documents; oral history as method and documentation, quantitative approaches to history; constructing historical narratives; the question of interpretation.

ELPS 852. School Resource Management. 3 Credits.
An examination of the sources and uses of fiscal resources in education including underlying concepts from economic theory, the impact of values on fiscal policy, state funding formulas, and school budgeting and accounting practices.

ELPS 853. Staff Evaluation and Development. 3 Credits.
An examination of current trends in personnel evaluation with a focus on clinical supervision and adult development. Students will participate in simulation exercises to develop skills in classroom observation, conferencing techniques, evaluation of teaching artifacts, and the construction of staff development plans.
ELPS 854. The Student in Society. 3 Credits.
A study of children and youth with particular emphasis on demographic characteristics of the population served by schools and implications of those characteristics for schools and schooling.

ELPS 856. Law and Special Education. 3 Credits.
This course focuses on laws that apply to special education. The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law and the judicial decisions interpreting those laws are reviewed. The course relates equal protection, procedural due process, and substantive due process doctrines to school practices affecting disabled children and examines the sex principles of P.L. 94-142 and similar principles in state legislation. This course is not the equivalent of or a substitute for ELPS 752. (Same as SPED 851.) Prerequisite: SPED 750 or permission of instructor.

ELPS 871. Introduction to Qualitative Research. 3 Credits.
An introduction to the foundations of and techniques associated with qualitative research methods. Students will practice interview and participant observation skills and will analyze and interpret data. Additional topics include crafting qualitative research questions, ethics of fieldwork, and establishing trustworthiness of data. Common traditions of qualitative methods employed in education and other related fields will be introduced.

ELPS 881. Leadership Theory and Practice in Education. 3 Credits.
The purpose of this course is to explore leadership in educational settings from a variety of perspectives. Readings come from a variety of disciplinary perspectives, such as sociology, organizational behavior, and psychology. The course considers various aspects of leadership and analyzes the leader's role from a symbolic perspective, as a manager of meaning, and critical change agent. The course challenges students to deconstruct leadership realities with the help of several critical perspectives with the goal of examine who the leaders are, who they will be in the future to address diverse educational organizations of tomorrow.

ELPS 882. Higher Education in the United States. 3 Credits.
The purpose of the course is to acquaint students in higher education, and students from other areas who intend to work in the post-secondary setting, with the history, philosophy and development of higher education in the United States. The course focuses on three periods: 1) the founding of Harvard to 1965; 2) dissent, disruption, and change, 1965-1979; and 3) the future and crucial issues, the 1980's. European higher education and its early influence on higher education in the United States is also examined.

ELPS 883. The College Student. 3 Credits.
The characteristics of college students; impact of college on student behavior, changing attitudes, values, beliefs, and the implications of recent research on traditional and new students for instructional and administrative practices.

ELPS 884. College Student Access, Persistence, and Success. 3 Credits.
The purpose of this course is to provide an introduction to the scholarly research about American college students, with a specific focus on college access, persistence and student success for various student populations. The course also provides an overview of the policy implications and practical applications of this research for college and university administrators.

ELPS 885. Assessment and Program Evaluation in Higher Education. 3 Credits.
Nature, objectives, and basic procedures of assessment and program evaluation as applied to the various aspects of higher education settings. In addition to basic procedures for evaluating programs, topics covered include accreditation, program review, benchmarking, student outcomes assessment, and evaluation of teaching in colleges and universities. Prerequisite: ELPS 715 or equivalent.

ELPS 886. Theory into Practice in Higher Education. 3 Credits.
This course is required as a final course for all master's students in higher education. It is designed to prepare students for professional life after graduation. Using a case study approach, students will examine the reality of practice in a variety of higher educational settings including relevant political and ethical factors. Prerequisite: Higher education students in last semester of master's coursework.

ELPS 887. Race and Social Class in Higher Education. 3 Credits.
The purpose of this course is to examine the ways in which race and class shape access to, and experiences in, American postsecondary education. To deepen our understanding of these matters, we will engage five books that explore the topic from a different perspective (e.g., for profit colleges, admissions at selective institutions, race conscious admissions, Students of Color at highly selective institutions, etc.)

ELPS 895. Internship. 1-5 Credits.
The on site development of the skills necessary to effectively function as a school building leader. Activities will be tailored to the needs of individual students in consultation with a university advisor and a field advisor. Internship credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

ELPS 896. Seminar in:. 1-4 Credits.
ELPS 897. Independent Study. 1-4 Credits.
Prerequisite: Consent of advisor and instructor.

ELPS 898. Master's Project. 1-4 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

ELPS 899. Master's Thesis. 1-6 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

ELPS 945. District Strategic Planning. 3 Credits.
A study of the principles and techniques necessary for planning, developing, implementing, and monitoring a district strategic plan for improving the educational programs of elementary and secondary schools.

ELPS 948. Research in Education Policy and Leadership. 3 Credits.
This course is an introduction to methods of inquiry in education policy and leadership studies. It is designed to help doctoral students explore possible research interests, formulate research questions, and to review a rich variety of approaches to inquiry in the field of education. Specific topics include: interview- and observation-driven studies, ethnography, feminist and narrative methods, legal and historical methods, questionnaire-driven studies, quantitative evaluation studies, and studies using administrative and large national data sources.

ELPS 949. Educational Policy and Politics. 3 Credits.
This course is an introduction to the field of education policy and the politics of education. The objective of the course is to provide students with an understanding of the forces that shape educational policy, with an emphasis on governance structures, stakeholders, public engagement, and current policy issues and political contexts.

ELPS 951. Supervision of Instruction. 3 Credits.
A study of the principles and techniques necessary for coordinating, monitoring, and improving the educational programs of elementary and secondary schools.

ELPS 952. School Finance: Policy and Practice. 3 Credits.
The objective of this course is to understand the financial systems and mechanisms used by states in the funding of elementary and secondary education in the United States. In simple language, we will be concerned with five basic issues: (1) Where the money comes from; (2) How it is redistributed; (3) How it is spent; (4) The relative effectiveness of spending decisions including selected international comparisons; and (5) How the previous four financial activities participate in a common financial ecology. The course provides an overview of theory and concepts central to the understanding of school finance with an emphasis on policy issues. It also examines the mechanics of school finance funding in light of state policies.

ELPS 953. District Human Resource Management. 3 Credits.
An in-depth study of theory and research in personnel administration. The focus will be on current literature dealing with empirical assessments of personnel theory and techniques. Specific concepts to be considered include the following: educator characteristics, job analysis and design, personnel recruitment, selection and evaluation techniques, staffing and development, and labor relations. Prerequisite: ELPS 755 or its equivalent.

ELPS 954. Sociology of Educational Organizations. 3 Credits.
This class is an overview of basic and advanced sociological and political theories of organization, with specific application to issues and problems in K-12 education. It is designed for graduate students and practicing educational leaders and administrators who intend to utilize research on organizations in their studies of the governance of schools, the sociology and politics of education, and education policy. The topics covered include the origins and nature of modern bureaucracy, formal structure and function, organizational control, transaction cost economics, population ecology, resource dependence, the new institutionalism, organizational effectiveness and legitimacy, organizational culture, power and politics, and change.

ELPS 955. District Business Management. 3 Credits.
This course emphasizes skills for effective and efficient business and financial management of school districts in a Kansas or Missouri context. Basic topics include: Short range and long range financial planning, analysis of financial statements, budget preparation, fund accounting and financial reporting, contracting of services including transportation and food services, staff salaries and benefits and insurance. The course also includes a number of strategic methods for institutional planning including: Cost Benefit Analysis, Cost Effectiveness Analysis, and enrollment, revenue and expenditure forecasting techniques. Prerequisite: ELPS 852 or its equivalent.

ELPS 956. District Leadership. 3 Credits.
The focus of the course is the role of the public school district superintendent. Organized study will include assigned readings, lectures, guest speakers, discussion, and the completion of a study project. The course will include consideration of such topics as boardmanship, community relations, district leadership, professional accountability, district maintenance and operations, professional employment and relationships with other agencies. The course is designed to serve the needs of those graduate students pursuing advanced study with the intention of completing requirements for district certification. Some students will also find the field appealing as an area for dissertation research. Prerequisite: Doctoral status in education administration or permission of instructor.

ELPS 957. Educational Policy, Ethics and Law. 3 Credits.
Course focuses on use of legal and moral reasoning in analysis of educational policy issues. Specific topics will vary depending on interests of instructor and students and current controversy. Examples of possible topics to be included: school desegregation, teacher collective bargaining, separation of church and school, equal educational opportunity. Prerequisite: ELPS 752, equivalent, or consent of instructor.

ELPS 958. American Educational Reform Movements: Past and Present. 3 Credits.
An examination of the origin, nature, and consequences of educational reform in the United States. The primary goal is to attain a balanced evaluation of current educational reform.

ELPS 959. Organization and Administration of Services for Exceptional Children. 3 Credits.
To aid administrators and prospective administrators responsible for organizing and administering programs of education for exceptional children, state and federal guidelines and regulations, legal aspects and financing of special education, planning a program, administering special services. (Same as SPED 971.) Prerequisite: Nine hours of Education including educational psychology and SPED 725.

ELPS 961. Conducting Quantitative Analysis In Educational Policy and Administration. 3 Credits.
This seminar addresses basic applied analytical skills for the study of topics in educational policy, leadership, and governance. It is designed to help professional doctoral students apply and extend their existing skills as they are working on their quantitative dissertations. Upon completion of this course, students should be able to: (1) draw on a basic repertoire of key methods that support applied analysis for professional doctoral students, (2) be able to determine the type of data and research design--and associated opportunities and constraints--pertaining to their research interests and the completion of their dissertation, and (3) make progress in aligning the conceptual and empirical components of their dissertation studies. Prerequisite: EPSY 710 or EPSY 711 or EPSY 870, or equivalent courses. Completion of quantitative research course requirements for the ELPS Ed.D. program.

ELPS 962. Advanced Quantitative Educational Policy Analysis. 3 Credits.
This seminar is designed to help students develop applied econometric skills for analysis of large scale data in policy studies, with particular emphasis on education. The techniques covered in the course are applied to a variety of substantive topics. These topics may change over time given changes in the national and local policy agendas and concerns. At this point, they include teacher and school effects on student performance, faculty productivity in higher education, access to and persistence in higher education, race and class issues in the K-12 achievement gap, decomposition of school and nonschool effects, neighborhood influence on student outcomes, the dropout problem, and minority over-representation in special education. Upon completion of this course, you should be able to: (1) draw on a basic repertoire of models for application to study of key questions in policy analysis, (2) be able to explore more advanced applications of the models covered in the course and also explore new models, and (3) determine the basic requirements of and challenges in designing rigorous empirical studies in policy analysis. Prerequisite: EPSY 810 or EPSY 811 or equivalent courses (note: this course is not a continuation of ELPS 961).

ELPS 969. Dissertation Seminar. 3 Credits.
This seminar is designed to facilitate proposal development for doctoral-level research in educational leadership and policy studies. The objective is to help students select and refine a topic, critically analyze existing research, set forth a theoretical framework, and design a research methodology suitable for your topic.

ELPS 970. Theory and Research in Administration. 3 Credits.
This course is designed as a graduate seminar to support advanced doctoral students as they begin the early stages of developing a dissertation. Students will explore and develop a research topic of interest
for the purposes of their culminating project. The course will introduce students to various approaches to research and published scholarship. Major emphasis is devoted to developing competencies and research skills to complete the dissertation and to engage in future research.

**ELPS 971. Comparative Education. 2 Credits.**
A factual, descriptive, and analytical study of national systems of formal education, or schooling, as exemplified in contemporary educational establishments. Organizational and administrative policies and teaching practices, with emphasis on Germany, France, England, U.S.S.R., People's Republic of China and Japan. Other nations may be examined on an individual project basis. The difference between ELPS 971 and ELPS 772 is the philosophical emphasis of the latter.

**ELPS 973. Research on College Students. 3 Credits.**
The purpose of this course is to critically examine the scholarly research about American college students from societal, developmental, research, and institutional perspectives and to review the policy implications and practical applications of these findings for college and university administrators.

**ELPS 974. Data Informed Decision Making in Higher Education. 3 Credits.**
This course will advance the students' skills needed to consume quantitative data and apply critical analyses of data within the context of higher education recognizing the social, cultural, and organizational factors that influence stakeholders and the stakeholders' acceptance of data-driven conclusions. This course provides students with an opportunity to practice making data-driven decisions to achieve institutional goals and missions.

**ELPS 975. Education, Technology and Social Change. 3 Credits.**
This interdisciplinary course provides an opportunity to read, reflect upon, and discuss ideas drawn from the emerging field of Science and Technology Studies (STS) in connection with education. Its focus is the interrelationships between technology, society, and education (defined broadly to include non-school and adult learning settings). It explores how knowledge, expertise, and authority are constructed within and across social and cultural groups, with particular attention social and economic inequality. It also considers the relationship between emerging technologies, educational experiences and the nature of "the self" in society, among other issues. Prerequisite: Admission to ELPS doctoral program, or permission of instructor.

**ELPS 979. Postsecondary Leadership and Practice. 3 Credits.**
This course is intended for doctoral students with significant administrative experience, this course focuses on the link between leadership theory and practice in postsecondary educational settings. The course content will provide students with a broad base of learning experiences related to leadership and leadership development with a specific focus on cultural dimensions, critical perspectives, and considerations for social justice in leadership. Students will be asked to reflect on their own journey of leadership identity and development and how that informs, supports, and influences practice as a higher education professional.

**ELPS 980. Finance of Higher Education. 3 Credits.**
This course is designed for advanced doctoral students in higher education, particularly those who will be preparing unit budgets or budget presentations and those who make and implement fiscal policy (e.g., financial aid offers). The course material covers different types of college and university budgeting -- incremental, zero-based and formula -- and their impact on university revenues; statewide coordination and its impact on programs, program duplication and funding; retrenchment and quality issues; the legislative role in budget preparation; unified and comparative management systems (e.g., WICHE and NCHEMS); and the impact of federal contracting and student aid policies.

**ELPS 981. Higher Education Law. 3 Credits.**
An overview of the developing law of higher education, with emphasis on and analysis of employer-employee relationships, student-faculty/administration relationships, and the impact of federal and state regulation on these relationships.

**ELPS 982. Faculty in Higher Education. 3 Credits.**
This course considers the role and circumstances of faculty in higher education including variations among different types of institutions. Topics include the history and demographics of the professoriate, the academic work environment and labor market, the role of faculty in institutional governance and policy making, and the social and political context of academia.

**ELPS 983. Curriculum Innovation in Higher Education. 3 Credits.**
A study of contemporary post-secondary curriculum with particular emphasis on the nature of curriculum, the organization and structure of academic programs, the nature of change in academic communities and exemplary innovative institutions.

**ELPS 985. Program Evaluation in Higher Education. 3 Credits.**
This course reviews evaluation and assessment processes typically used in higher education with an emphasis on application to practice. Topics such as developing, administering evaluation and assessment plans at the unit or college level, and reporting assessment/evaluation data are also emphasized. Prerequisite: The course assumes some prior knowledge of or experience with assessment and evaluation.

**ELPS 986. Organization and Governance of Higher Education. 3 Credits.**
A theory-based course aimed at providing an understanding of the governance and organization of academic institutions -- particularly universities. Emphasis is directed toward an analysis of decision-making in these complex organizations.

**ELPS 987. Diversity Leadership in Higher Education. 3 Credits.**
This advanced course examines diversity, equity and inclusion in higher education settings, with an emphasis on exploring how theory and research inform practice. This course is intended for doctoral level students.

**ELPS 995. Field Experience in: 1-5 Credits.**
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experience will be prepared independently by the student, a representative of the cooperating agencies, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

**ELPS 996. College Teaching Experience in: 2 Credits.**
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester-long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or the member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate's committee.

**ELPS 997. Individual Study. 1-4 Credits.**
Prerequisite: Prior graduate course work in the area of study and consent of instructor.

**ELPS 998. Seminar in: 1-4 Credits.**

**ELPS 999. Doctoral Dissertation. 1-15 Credits.**
Educational Psychology Courses

EPSY 106. Multicultural Student Leadership Seminar. 2 Credits.
This course will introduce students of color to leadership theory and develop personal skills in the areas of organizational, career, and community leadership. Topics covered include public speaking, group process, time management, and discussion of the special challenges for leaders of color. Prerequisite: Must have taken Hawk Link UNIV 101 and fewer than 60 hours credit from the University of Kansas.

EPSY 305. Development and Learning of the Child. 3 Credits.
An introduction to the study of children's thinking, behavior, and development in school, home, and community settings. Classic and contemporary theories of developmental and educational psychology will be addressed; these theories will provide a foundation for thinking about important contemporary issues in child development. Specific topics covered will include research methods for studying children's development, cognitive development, intelligence, language, emotional development, aggression, moral development, and family and peer relationships. Emphasis will be placed on the study of individuals and groups, describing the process of development, and considering educational implications of theory and research.

EPSY 306. Development and Learning of the Adolescent. 3 Credits.
An introduction to the study of adolescence (puberty to roughly age 18), with a focus on implications and applications for optimal adolescent development. Approaching development from an applied lens, the course will cover foundational information on brain and biological changes that occur during adolescence, as well as on integrating this foundational knowledge with theories of learning, motivation, cognition, and emotional and social development.

EPSY 310. Career and Life Planning. 3 Credits.
The purpose of this course is to assist students with career, academic, and life planning choices. Designed to be practical and hands-on, the course relies heavily on student engagement. Through conversation and exploration, students will develop a better understanding of themselves and their career options and leave with a road-map for the future. Classes will meet twice a week in small sections. Both in-class and out-of-class activities will focus on helping students identify interests and strengths, clarify values, explore academic and work alternatives, and develop skills that can be applied to career and life planning both now and in the future.

EPSY 320. Basics of Classroom Assessment. 1 Credit.
This course is designed for sophomores in the Teacher Education Program. It presents basic concepts and methods for classroom assessment. It is meant to be an introductory course and students are expected to enroll in EPSY 520 Classroom Assessment in their senior year.

EPSY 450. Introduction to Counseling Psychology. 3 Credits.
An historical and contemporary overview of the science and practice of counseling psychology, including trends in the roles and functions of counseling psychology practitioners, the research and scientific foundations of counseling practice, the psychological theories of counseling and psychotherapy that guide professional practice, and the ethical and professional issues confronting counseling practitioners. Prerequisite: PSYC 104.

EPSY 480. Promoting Student Social-Emotional Well-Being. 3 Credits.
This course is designed for the student interested in learning and applying knowledge of educational psychology. More specifically, the goal is to help students understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas resulting in the ability to design and implement developmentally appropriate, relevant, and rigorous learning experiences. In addition, students will learn how to create learning environments that support individual and collaborative learning that includes teacher and student use of technology, and encouraging positive social interaction, active engagement in learning, and self-motivation. An additional goal of the course will be to help students to learn to integrate social-emotional learning (SEL) with character development into their curriculum so that students will learn, practice and model essential personal life habits that contribute to academic, vocational, and personal success. The goal is to be able to sustain a caring and civil classroom environment, to help learners make healthy decisions, problem solve effectively, value excellence and be respectful and responsible citizens. Prerequisite: EPSY 305, or EPSY 306.

EPSY 497. Independent Study. 1-2 Credits.
Only one enrollment permitted each semester, a maximum of four hours will apply toward the bachelor's degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Recommendation of advisor and consent of instructor.

EPSY 515. Research Methods for McNair Scholars. 3 Credits.
This course provides participants in the McNair Scholars program with an understanding of research methods appropriate to their field so they can write proposals for their summer research projects. Prerequisite: Acceptance into the McNair Scholars Program.

EPSY 520. Classroom Assessment. 2 Credits.
This course is an introduction to the concepts and skills required to develop and evaluate various forms of formal and informal classroom assessments to determine student learning and teacher instructional effectiveness.

EPSY 575. Internship Exploration. 1-5 Credits.
This course provides academic credit for a supervised practical experience in an occupational area of interest. In addition to the work-related activity, students will complete reading and writing assignments, participate in on-line discussion and create a final portfolio of internship accomplishments. Credit hours (1-5) are based on number of hours at internship site in agreement with instructor. Prerequisite: Secured internship of 8 hours per week or more for semester in which student will be enrolled in the course; permission from instructor.

EPSY 580. Positive Psychology. 3 Credits.
An introduction to the core assumptions and research findings associated with human strengths and positive emotions. Also an exploration of interventions and applications informed by positive psychology in counseling and psychotherapy, and its application to school, work, family and other close relationships. (Same as PSYC 598.) Prerequisite: PSYC 104 or consent of instructor.

EPSY 598. Special Course: _____. 1-5 Credits.
A special course of study to meet current needs of education students--primarily for undergraduates.

EPSY 703. Constructive Classroom Discipline. 3 Credits.
This course will examine concepts and techniques of constructive classroom management. Various theoretical orientations including humanism and behaviorism will be considered. Emphasis will be on the identification of strategies that teachers can use (1) to facilitate an environment that reduces the likelihood of misbehavior occurring, and (2) to cope constructively with individuals and groups of children to resolve difficulties that arise in the classroom. The class should have value to
be admitted only by permission of the instructor, if space permits. Prerequisite: Permission of the instructor.

EPSY 742. Counseling Theory and Techniques. 3 Credits.
An introductory examination of several major theories of counseling and therapy including psychodynamic views, person-centered, behavioral, and cognitive-behavioral approaches. Attention given to research reviews and factors various theories have in common. Designed for graduate students in counseling psychology or allied fields. Prerequisite: Graduate student status or permission of the instructor.

EPSY 760. Ethics, Law, and Professional Issues in School Psychology. 3 Credits.
This course is intended to introduce the student to a) ethical principles, standards, and issues in the profession of psychology; b) legal issues involved in the practice of school psychology; c) problem-solving models to solve ethical and ethical-legal dilemmas; d) roles and functions of a school psychologist; and e) current topics in the field of school psychology. Prerequisite: Permission of the instructor.

EPSY 765. Mental Health in the Classroom. 3 Credits.
This course will help educators identify commonly occurring mental health problems as well as the ways in which they can affect students' achievement, classroom behavior, and social adjustment. You will also learn how to make effective referrals to resources available for students with mental health issues in both the district and the community.

EPSY 766. Positive Psychology in the Classroom. 3 Credits.
Positive psychology is the study of what is right and positive about people and institutions. Positive psychologists call for an equal focus on strengths and weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions and then move on to explore interventions and applications informed by this perspective in schools, as well as in domains personally relevant to the lives of educators such as work, family, and other close relationships.

EPSY 767. Social Emotional Learning. 3 Credits.
This course is designed for the student interested in learning and applying knowledge of educational psychology. More specifically, the goal is to help students understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas resulting in the ability to design and implement developmentally appropriate, relevant, and rigorous learning experiences. In addition, students will learn how to create learning environments that support individual and collaborative learning while encouraging positive social interaction, active engagement in learning, and self-motivation. An additional goal of the course will be to help students to learn to integrate social-emotional learning (SEL) with character development into their curriculum.

EPSY 770. Developmental Psychopathology: Diagnosis, Intervention, and Prevention. 3 Credits.
Foundations of child and adolescent psychopathology from a developmental and educational perspective. Classification, assessment, and etiology of clinical disorders. Examination of risk and protective factors associated with these various disorders. Coverage of empirically-based intervention strategies and prevention programs. Graduate student standing.

EPSY 797. Independent Readings and Research in: _____ 1-3 Credits.
Opportunity for students to participate in supervised reading and research in special topics of interest (for which regularly scheduled courses are not given). Topics and credit are arranged by advisement: May not be used to substitute for regularly scheduled course offerings. Intended for students with appropriate undergraduate or graduate preparation but without extensive graduate course background in the area of proposed study. (Students with extensive graduate work should enroll in EPSY 997; undergraduate students may enroll in EPSY 497.) Graded on a satisfactory/unsatisfactory basis.

EPSY 798. Special Course: ______. 1-5 Credits.
A special course of study to meet current needs of education professionals—primarily for graduate students. Graded on a satisfactory/unsatisfactory basis.

EPSY 800. Development during Youth and Adulthood. 3 Credits.
An examination from a life-span perspective of major issues affecting changes after adolescence. Topics include intelligence, identity, intimacy, the role of work, and moral concepts. Theoretical issues, research findings, and educational and social policy implications will be examined. Students will prepare papers on significant issues in the field and survey extensively the research and theoretical literature. Prerequisite: Prior enrollment in a course on naturalistic or experimental research methods.

EPSY 801. Advanced Mathematics and Mathematical Statistics for Educational and Social Scientists. 4 Credits.
Mathematical statistics and their mathematical underpinnings are presented in a condensed and accessible manner with details on how they function as parts of commonly used statistical models. Mathematical topics include advanced algebra, differentiation, multiple integration, numerical series, matrix algebra, and matrix calculus. Statistical topics include probability, random variables, probability density/mass functions, algebra of expectations and variances, sampling, asymptotics, and general families of distributions. Prerequisite: EPSY 710 or equivalent or permission of instructor.

EPSY 802. Child Development. 3 Credits.
This course covers core concepts and current research on environmental, individual, and interpersonal factors influencing development during childhood (birth - age 12). Topics covered include cognition, emotion, identity, and key social relationships (e.g., family, peers). Course emphasizes consideration of educational practices in the context of research on child development.

EPSY 803. Using R for Data Analysis. 3 Credits.
This course introduces R, the most popular free software environment for statistical computing, graphics, and data analysis. It will teach students about basic features of R, knowledge and skills of how to use R, interpret statistical results generated from R, and write methods and results in an academic and professional way. It will cover a variety of essential statistical procedures, including descriptive statistics, t-test, ANOVA, MANOVA, correlation, regression, reliability analysis, and factor analysis. The course will employ project-based teaching approach and allow students to work on research projects that they are interested in by using their own data or the data provided by the instructor. Prerequisite: EPSY 810 or EPSY 811 or equivalent course.

EPSY 805. Individual Intelligence Testing. 1-3 Credits.
Supervised experience in the administration, scoring, and interpretation of the major individual intelligence tests for children, adolescents, and adults. Other areas to be covered in this course will include models of intelligence and factors influencing intelligence; measurement characteristics of instruments used to assess cognitive abilities; ethical and legal issues in the use of intelligence tests; and the use of cognitive assessments for identification and diagnosis. Prerequisite: Permission of instructor.

EPSY 806. Issues in Human Growth and Development. 3 Credits.
An overview and analysis of selected issues in the field of human growth and development. The focus will be on current issues of a theoretical and methodological nature that affect the field of developmental psychology and applications to social and educational settings. Prerequisite: Prior completion of a course in developmental psychology.

EPSY 807. Theories and Research in Human Learning. 3 Credits.
An overview of important models, principles and research findings related to the learning process. Attention is given to theories of learning and information processing which attempt to explain perceptual behavior, verbal learning and memory and social learning processes. Emphasis is placed on student development of research proposals in the area of human learning and achievement. Prerequisite: Permission of instructor.

EPSY 808. Advanced Social Psychology: Theory, Research, and Professional Applications. 3 Credits.
This course presents major theoretical approaches and empirical findings in social psychology, including attitude formation and change, social influence, and intergroup relations. Interactions among self, relationships, group membership, and culture and how each influences thinking and behavior are addressed. This course also explores how key social identities, such as gender and race, impact social process and relationships. Course emphasizes consideration of educational and clinical practices in the context of research on social psychology. Prerequisite: Graduate standing in an EPSY program or permission of instructor.

EPSY 810. Regression and ANOVA: General Linear Models. 3 Credits.
Analysis of variance and regression models are presented under a unified framework. Multiple correlation/regression techniques, including polynomials, analysis of interactions, ANOVA using dummy coding, planned and post hoc comparisons, multiway ANOVA, orthogonal and non-orthogonal analysis of variance, analysis of covariance. Prerequisite: EPSY 710 or equivalent course.

EPSY 811. Analysis of Variance. 3 Credits.
Analysis of variance techniques including one-way ANOVA, planned and post hoc comparisons, multiway ANOVA, repeated measures ANOVA, and mixed designs. Prerequisite: EPSY 710 and EPSY 711.

EPSY 812. Meta-Analysis. 3 Credits.
Statistical methods to summarize results from multiple studies. Prerequisite: EPSY 811.

EPSY 814. Nonparametric Statistics. 3 Credits.
Methods of analysis for nominal and ranked data, multiway contingency table analysis. Prerequisite: EPSY 811.

EPSY 816. Evaluating School Programs. 3 Credits.
Methods and procedures for evaluating educational programs. Attention is given to the development and evaluation of goals and objectives, creation of designs to monitor processes and outcomes, utilization of test and measurement systems for assessing outcomes, establishing evaluation standards and criteria, and application of statistical analyses. Prerequisite: EPSY 710 or equivalent.

EPSY 818. Social Development. 3 Credits.
This course covers current research on environmental, individual, and interpersonal factors influencing social aspects of development, including the development of key social relationships (e.g., family, friends) across the lifespan, with a primary emphasis on childhood and adolescence. Topics covered include temperament and personality, self and identity, attachment, family relationships, peer relations, aggression, and prosocial
behavior. Course emphasizes consideration of educational and clinical practices in the context of research on social development.

**EPSY 820. Research and Practice in College Teaching. 3 Credits.**
This course emphasizes the application of key concepts from the psychology of learning, including organization of knowledge, motivation, and metacognition, to college-level teaching practice. In this course, students will develop and evaluate course-level learning goals, evaluate instructional materials for their use of inclusive teaching practices, identify characteristics of effective assessments, and reflect on and evaluate their own teaching practices in relation to course concepts.

**EPSY 822. Educational Scales, Questionnaires, and Sampling. 3 Credits.**
Development, construction, validation and scaling of noncognitive instruments including questionnaires, surveys, checklists, rating scales and unobtrusive measures. The sampling methodology is emphasized. Item construction and analysis and the development of subscales are stressed. Prerequisite: EPSY 720 or EPSY 725 and EPSY 710.

**EPSY 825. Positive Psychotherapy and Strength-Based Counseling. 3 Credits.**
Positive psychologists call for an equal focus on strengths and weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with positive traits and emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy. Each class will be organized as didactic presentation of core concepts, discussion of the assigned readings, and experiential learning activities. The tracking of the evolution of positive psychology is covered leading to its integration into the core change processes of integrated approaches to psychotherapy. The theories forming the foundation of the class include Broaden and Build, Hope Theory, the Complete State Model, and Self Determination. Multicultural perspectives on positive traits and change processes will provide an important context for the course.

**EPSY 830. Individual and Group Assessment. 3 Credits.**
A consideration of basic concepts pertaining to selection and interpretation of both standardized and non-standardized assessment procedures and devices with attention given to communicating assessment information within the context of the counseling relationship. Prerequisite: EPSY 725 or comparable undergraduate principles of measurement course.

**EPSY 835. Clinical Techniques in Academic Assessment and Intervention. 3 Credits.**
Students will learn techniques of formal and informal assessment of academic skills in school-aged students. In addition, students will learn consultation and intervention approaches and strategies for use with students who have academic delays. This course has a field-based practicum component. Prerequisite: Graduate student standing in the School Psychology program and permission of instructor.

**EPSY 836. Behavioral & Systems Neuroscience in Education. 3 Credits.**
This graduate-level course is designed to provide an overview of important models, principles and research findings related to behavioral and systems neuroscience in education. Attention is given to the basic structure of the nervous system, the fundamental units of the nervous system (the neuron and the synapse), the function of different components of the central nervous system, the sensory, motor, and memory systems, and the networking of these systems in perception, learning, and cognition. Also, attention is given to how the nervous system behaves with other brain structures that support fundamental mental abilities such as attention, cognitive control, emotion, language, memory, and social cognition. Finally, within these topics, attention is given to understanding how the nervous system works by studying the physiological basis of adaptive behaviors and maladaptive behaviors of the mind.

**EPSY 837. The Neuroscience of Motivation and Emotional Behaviors. 3 Credits.**
Using a neuroscience lens, this course focuses on integration of research and theory on motivation and emotion from across developmental, affective, cognitive, and social fields. Emotion and motivation are the core of human life and thought, without which we could not survive even in the most benign environments. This course examines how emotion and motivation innervate thought and behavior to enrich human experience and “bias” the decisions we make in everyday life, as well as how thought, behavior, and environment innervate emotion and motivation.

**EPSY 840. Guidance and Counseling in the Public Schools. 3 Credits.**
This course is designed to provide information about the organization and administration of guidance and counseling programs in the public schools. Non-majors wishing to know more about the role of the counselor can be admitted with approval of the instructor.

**EPSY 841. Center for Psychoeducational Services Practicum. 3 Credits.**
The primary purpose of this course is for students to develop individual counseling skills by working with clients in the Center for Psychoeducational Services. In this course you will implement a semi-structured positive psychology intervention with clients experiencing mood disorders and general psychological distress. Prerequisite: Enrollment in the CPSY MS program.

**EPSY 842. Counseling Practicum (Elementary, Secondary, Counseling Psychology). 3-6 Credits.**
This course is taken as one of the last courses in the master's degree counseling program. The primary purpose of the course is for the student to develop individual counseling skills while functioning in a counseling setting. In addition to individual skills, students are also encouraged to participate in group counseling and other counseling related activities within the particular counseling setting. Students enroll in practicum for the level most closely related to their professional goals, i.e., elementary, secondary, counseling psychology. Graded on a satisfactory/fail basis. Prerequisite: EPSY 740, EPSY 742, EPSY 830, EPSY 880, EPSY 890 and EPSY 896 (Advanced Skills) and prior or concurrent enrollment in EPSY 840, EPSY 844, EPSY 846 and EPSY 875. For MS Terminal track, EPSY 845 and EPSY 956 enrollment must be prior or concurrent as well. Pre-enrollment with practicum coordinator. Students currently on academic probation will not be allowed to enroll in practicum.

**EPSY 844. Theory of Group Counseling. 3 Credits.**
Focuses on issues in group counseling. Topics covered are types of groups, theoretical orientation of groups, stages of group development, group leadership, selection of members, ethical issues, and effectiveness of groups. Prerequisite: Students must be admitted to the Program in Counseling Psychology. Nonmajors must have prior written consent of instructor.

**EPSY 845. Substance Abuse Counseling. 3 Credits.**
The aim of this course is to provide advanced training in the area of substance abuse and substance addictions counseling to graduate students in the helping professions. Topics covered include practical guidelines, specific intervention strategies, treatment principles, legal
and ethical responsibilities, and issues within the field. Prerequisite: EPSY 740, EPSY 742.

EPSY 846. Career Development. 3 Credits.
Stresses the importance of career development in education, with an emphasis on developmental life planning. Course includes topics such as delivery systems, utility of career development theory, sexism and racism in career development and counseling, the effects of sex role socialization, nature of the world of work, evaluation of career information, use of career information in individual and group counseling, and the role of empirical research in career development theory and practice.

EPSY 850. Human Relationship Skills in the Classroom. 3 Credits.
The purpose of this course is to provide educators with an awareness and skill training in basic human relationship/communication skills. The course is focused on skills that provide educators with effective communication skills for working with students, educators, and parents.

EPSY 855. Psychoeducational Clinic I: Assessment, Consultation, and Intervention. 3 Credits.
This is a practical course where students apply previous learning and gain experience in assessment and intervention with children, families, and school consultation. Team collaboration, peer review, and case conferences are essential elements of this course. Students work with clients in the on-campus learning center under supervision. Topical seminars also are included throughout the semester. Prerequisite: Graduate student standing in the School Psychology program and permission of instructor.

EPSY 860. Assessment of Behavior Problems and Personality. 3 Credits.
The purpose of this course is to examine appropriate assessment techniques for the evaluation of behavior problems. Interview procedures, behavioral observation strategies, behavior rating scales and checklists, self-report inventories, and rational theoretical techniques will be introduced. The intent is to place these assessment approaches in their theoretical contexts and to discuss how they could be used by pupil personnel specialists to understand the problem behavior and plan interventions to enhance students' personal adjustment and achievement in the classroom. Prerequisite: EPSY 770, graduate standing in the School of Psychology program, or permission of instructor.

EPSY 865. Psychoeducational Clinic 2: Assessment, Consultation, and Intervention. 3 Credits.
A continuation of School Psychology Clinic I where students will be performing the same activities at a higher level of autonomy and independence. Prerequisite: Graduate student standing in the School Psychology program, EPSY 855, and permission of instructor.

EPSY 870. Quantitative Methods for Research in Educational Leadership and Policy Studies. 3 Credits.
This course addresses the conceptual basis of statistical analysis with an emphasis on applied data analysis. The use of descriptive statistics, distributions, graphic displays, hypothesis testing, group comparison, and analyses of relationships among variables to explore research questions in education will be covered. This course is designed specifically for Ed.D. students in the School of Education. Students in other degree programs may not enroll. Prerequisite: This course is open only to Ed.D. students in the School of Education.

EPSY 871. Crisis and Disaster Counseling. 3 Credits.
This course provides advanced training in Crisis and Disaster Counseling to graduate students in the helping professions, providing students with the foundation, knowledge, and skills to effectively help those in crisis. Practical guidelines, specific intervention strategies, treatment principles, legal and ethical responsibilities, and self-care regarding crisis work will be discussed and integrated. Prerequisite: EPSY 740 and EPSY 742; or consent from instructor.

EPSY 875. Understanding Cultural & Individual Differences in Professional Psychology. 3 Credits.
Examines the role of culture in human behavior and its influence in counseling theories, practice, and research. The course will assist students develop multicultural awareness, understanding, and skills in working with people from diverse racial, social, cultural, and individual backgrounds. The course will provide opportunities for self-examination of cultural assumptions/values in order to develop multicultural competence. Prerequisite: EPSY 742 or equivalent.

EPSY 880. Ethical and Legal Issues in Psychology and Counseling. 3 Credits.
An examination of legal, ethical, and professional standards and issues affecting the practice of professional psychology. Topics include legislative regulation of professional psychology, ethical standards and codes of conduct for psychology and related mental health professions, standards of professional practice, and issue of practice liability and risk management.

EPSY 882. History and Systems of Psychology. 3 Credits.
A historical survey of the evolution of concepts, theories, and systems of thought in psychology with an emphasis on their relationship to contemporary issues in psychological theory, research, and practice. Prerequisite: Graduate standing in EPSY or consent of the instructor.

EPSY 885. Projective Assessment. 3 Credits.
The major goal of the course is to integrate information about a person from one or more projective tests into a useful summary. The projective assessment instruments to be used include the Rorschach (using the Exner system of scoring and interpretation), the Thematic Apperception Test, and projective drawings (e.g., Draw-A-Person test). Prerequisite: At least one graduate-level course in measurement and one graduate course in assessment plus consent of the instructor.

EPSY 888. Evidence Based Practice in Counseling Psychology. 3 Credits.
This course is an introduction to the skills involved in a small number of Evidence Based Treatments, in the context of understanding their place in the pursuit of Evidence Based Practice. The course includes readings, videos, and discussion of the treatments, with a heavy experiential component of role plays and reviews on video through the Center for Psychoeducational Services. The emphasis is on developing initial skills in the selected treatments. Prerequisite: Graduate student in Counseling Psychology or permission of the instructor.

EPSY 890. Diagnosis and Psychopathology. 3 Credits.
An examination of psychological disorders from a counseling psychology perspective that emphasizes strengths. The course will cover the current version of the Diagnostic and Statistical Manual (DSM), as well as alternative taxonomies, exploring personality as it ranges from normal personality styles to personality disorders, and the full range of mental disorders. The emphasis is on identifying and assessing these phenomena and understanding behavioral and possible treatment implications. Prerequisite: Degree seeking status in Counseling Psychology or consent of instructor.

EPSY 893. Internship in School Counseling. 2 Credits.
Two consecutive enrollments covering a period of one academic year. During this time the student prepares a portfolio of skills competencies, classroom guidance programs presented, and other experiences appropriate to the student's school level. Supervision will be conducted on an individual basis and will include a minimum of two site visits per
EPSY 895. Field Experience in: ___. 1-5 Credits.
Supervised and directed experiences in selected educational or mental health settings. The campus-based instructor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the campus-based instructor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit in this and additional field experience enrollments may not exceed eight hours. Graded on a satisfactory/fail basis. Prerequisite: EPSY 842 and consent of the practicum coordinator.

EPSY 896. Seminar in: ___. 1-3 Credits.
Prerequisite: Permission of instructor.

EPSY 897. Independent Study. 1-4 Credits.
Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of advisor and instructor.

EPSY 898. Master’s Project. 1-4 Credits.
Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Prior or concurrent enrollment in EPSY 710, EPSY 715, or EPSY 790.

EPSY 899. Master’s Thesis. 1-6 Credits.
Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Prior or concurrent enrollment in EPSY 710.

EPSY 901. Research Practicum in: ___. 1-3 Credits.
This course is designed to give students experience in conducting research. It is expected that students will take this course for at least two consecutive semesters. (This course fulfills the requirement by the School of Education for a two semester, research practicum course.) Prerequisite: Doctoral student status in a program in the Department of Educational Psychology.

EPSY 902. Research Methodology in Education. 3 Credits.
An examination and study of the problems and procedures which relate to the validity of research methods. Emphasis will be placed on reading the current literature on research methodology. Students are required to develop a research proposal. Prerequisite: EPSY 811 and EPSY 720 or EPSY 725.

EPSY 905. Fundamentals of Multivariate Modeling. 3 Credits.
In this course, contemporary approaches to multivariate analysis using mixed-effects models estimated with maximum likelihood and Bayesian methods are presented. Classical topics in multivariate analysis including multivariate analysis of variance and exploratory factor analysis, are covered in the context of mixed-effects models, preparing students for subsequent courses and research that use such model-based methods. Topics include extensions of linear models (regression and analysis of variance) for non-normal data with link functions, introductory matrix algebra, missing data modeling techniques, models for repeated measures data, and path analysis models for multivariate regression evaluating both moderation and mediation effects. Prerequisite: EPSY 810 and experience with a statistical software package.

EPSY 906. Latent Trait Measurement and Structural Equation Models. 3 Credits.
Contemporary measurement theory and latent variable models for scale construction and evaluation, including confirmatory factor analysis, item response modeling, diagnostic classification models, and structural equation modeling. (Same as CLDP 948.) Prerequisite: EPSY 905 and instructor permission.

EPSY 908. Structural Equation Modeling II. 3 Credits.
The purpose of this course is to introduce students to advanced topics in Structural Equation Modeling. Topics to be covered include multilevel models, latent growth models, mixture models and approaches to handling missing and/or non-normal data. Students will be exposed to various statistical software programs and will be expected to become proficient in utilizing EQS. Prerequisite: EPSY 906 or equivalent course.

EPSY 910. Practicum in School Psychology. 3 Credits.
Supervised practice in the application of psychological theory to educational problems. Includes work useful with exceptional children as well as experiences in the application of such areas as mental hygiene and learning theory to problems involving the total school population. Prerequisite: Permission of advisor and instructor.

EPSY 911. Advanced Practicum in School Psychology. 3 Credits.
A continuation of EPSY 910 with special emphasis on remedial techniques associated with learning difficulties. Prerequisite: EPSY 910 and permission of advisor and instructor.

EPSY 914. Generalized Linear Mixed Models. 3 Credits.
In this course, contemporary methods for the analysis of data that are not normally distributed are presented. Generalized linear mixed models are linear models that map independent or predictor variables onto any type of outcome space of dependent variables. Such models involve the choice of distribution for the dependent variables and a link function to map predictors onto key parameters of the dependent variables distributions. Topics include logistic regression, nominal distributions, count distributions, and distributions for censored, skewed, or otherwise irregular continuous data. Random effects or latent variables are included for each type of model. Prerequisite: EPSY 905 or consent of instructor.

EPSY 918. Seminar in Current Issues in Counseling Psychology. 1 Credits.
An examination of selected current issues in counseling psychology. Prerequisite: Doctoral student status in a program in the Department of Educational Psychology.

EPSY 921. Measurement Theory and Practice I. 3 Credits.
This course provides thorough grounding in modern validity theory including its historical precedents and derivation of classical test theory and item response theory and their application for item analysis and estimation of test reliability and standard error of measurement. Prerequisite: EPSY 725 or EPSY 811 or equivalent.

EPSY 922. Measurement Theory and Practice II. 3 Credits.
Students will learn the assumptions and application of classical test theory and item response theory approaches to scaling and reporting, standard setting, equating, identification of item and test bias, and other topics intended to prepare students for research and development regarding large-scale assessments. Prerequisite: EPSY 921.

EPSY 923. Advanced Theory and Applications of Item Response Theory. 3 Credits.
This course is designed to acquaint students with knowledge of advanced theory and applications in the field of item response theory (IRT). Topics to be covered include: advanced IRT models for dichotomous and polytomous, multidimensional, rater effects, and testlet-based item response data, estimation of parameters for these models and related software, and goodness of fit tests. The course will also focus on some advanced applications using these models, including test development, test score equating, differential item functioning, scoring and score reporting, Monte Carlo simulation studies, and innovative test designs. Prerequisite: EPSY 922 or equivalent course.

EPSY 925. Computer Programming and Applications for Educational Research, Measurement and Statistics. 3 Credits.
The purpose of this course is to provide advanced students in the areas of educational research, psychometrics, and statistics with techniques for computer programming, analysis, and carrying out research using computer simulations. The topics covered are: Programming with Fortran languages, data manipulation and management, analysis, simulation of data according to statistical and psychometric models, numerical techniques for matrix operations, sampling from distributions, solutions for non-linear equations, and Markov-Chain Monte-Carlo techniques. There are no prerequisites for this course, but those students who have coursework through the multivariate statistics level will benefit most from this course. Other suggested courses include those related to psychological and educational measurement, classical test theory, item response theory, and research methods.

EPSY 926. Hierarchical Linear Modeling. 3 Credits.
This course provides students with an introductory background in the basic principles and applications of hierarchical linear modeling (HLM). The course will review both the conceptual issues and methodological issues in using hierarchical linear modeling by working step-by-step with real data sets. Prerequisite: EPSY 904.

EPSY 931. Computer-Based Testing. 3 Credits.
Computer-based testing holds the promise of increasing test validity and reliability while reducing the logistical problems associated with large-scale assessment. This seminar will provide an overview of what we have learned about administering tests on computer between the 1960s and today. The focus will be on measurement issues, but depending on class interest topics will vary. A prior course in item response theory is desirable but not required. Prerequisite: EPSY 725 or equivalent course.

EPSY 932. Diagnostic Testing. 3 Credits.
There is a great demand for more useful, more actionable test scores. Traditional large-scale group administered tests do not provide this kind of information due to low reliabilities of, or high inter-correlations among, sub-scores. This course will explore approaches used by individually administered tests to provide diagnostic information, new psychometric models that hold promise of providing better diagnostic information, and implications for test design. A primary focus will be on how psychometric models can be used with diagnostic subscores that are more reliable and less correlated than traditional approaches. Prerequisite: PRE 922 or equivalent course.

EPSY 939. Grant Writing for Social Scientists. 3 Credits.
This course seeks to improve writing and research skills for social scientists (e.g., counseling psychologists, educational psychologists, school psychologists, and speech-language pathologists) within grant writing. Developing grant writing skills for social scientists is essential to acquiring competitive funding from government agencies and private foundations. It requires specific content knowledge, writing proficiency, strong research skills, creativity, and persistence. This course will provide students with the basic skills, principles, and techniques necessary to develop a competitive funding proposal.

EPSY 940. Advanced Studies in Educational Psychology and Research. 3 Credits.
A course designed to offer a comprehensive view of the field of educational psychology and research. The course will treat a series of thematic areas with a focus on latest developments and emerging theories in learning, development and quantitative methods. Intended for post-master's level students. Prerequisite: Prior graduate level course work in development, learning, measurement, and statistics.

EPSY 941. Bayesian Statistics. 3 Credits.
The purpose of this course is to acquaint advanced quantitative students with the fundamentals of Bayesian data analysis. The goals of the class are to introduce Bayesian inference, starting from the philosophical perspective, and provide methods for implementing Bayesian analysis for a variety of different statistical models. Class time is balanced between theoretical perspectives and practical applications. Topics covered include: a review of basic probability, Bayes’ rule, probability distributions, Markov Chain Monte Carlo (MCMC) estimation and software for its implementation, and applications of MCMC to a variety of statistical models. Prerequisite: EPSY 905 or equivalent or consent of instructor.

EPSY 945. Clinical Supervision and Consultation. 3 Credits.
This course is designed to provide students with a knowledge foundation of clinical supervision and consultation theories and models, modes/forms of supervision, the supervisory/consulting relationship, legal and ethical considerations in the provision of supervision/consultation, and supervision research issues. Prerequisite: EPSY 948.

EPSY 947. Specialist Research. 1-4 Credits.
EPSY 948. Advanced Practicum I. 3 Credits.
Designed to be the initial advanced practicum for first year doctoral students. Attention is directed to development of a broad range of basic and advanced skills. Graded on a satisfactory/fail basis. Prerequisite: EPSY 842 or equivalent.

EPSY 949. Advanced Practicum II. 3 Credits.
Intensive counseling practice, including group and individual supervision, that may be taken either through Counseling and Psychological Services or an approved site outside of the university. Focus is on the acquisition and demonstration of advanced counseling skills. Two consecutive semesters (Fall, Spring) of enrollment are required of doctoral students. Responsibility to the site is for a continuous nine months, with fall semester responsibilities ending on the first day of spring semester classes. A grade of incomplete will be granted at the end of the regular fall grading period, with the regular fall grade being granted after completion of fall semester responsibilities. Graded on a satisfactory/fail basis. Prerequisite: Satisfactory completion of EPSY 948 and prior or concurrent enrollment in EPSY 951.

EPSY 951. Psychodiagnostic Assessment. 3 Credits.
Survey of selected psychodiagnostic instruments currently in use and their administration, scoring, and interpretation. Emphasis will also be placed on the use of the clinical interview as an assessment tool, case conceptualization/diagnosis, and integrative report writing. Prerequisite: Completion of EPSY 830 and degree-seeking status in Counseling Psychology or consent of instructor.

EPSY 952. Advanced Counseling Theory and Research. 3 Credits.
An advanced treatment of theory, research, and practice issues central to Counseling Psychology. Topics include theoretical and research paradigms in Counseling Psychology; the relationship of theory and research to practice; and evidence on factors influencing counseling processes and outcomes. Prerequisite: Counseling Psychology doctoral student status or consent of instructor.

EPSY 954. Vocational Psychology. 3 Credits.
A survey of the major career development theories in counseling psychology. Models and methods of career counseling will be reviewed and integrated from the different theoretical perspectives. The empirical support of each theory and needed research will be identified. The course will include presentation of theories of career development and their specific applicability in counseling. The career development of special groups (women, the culturally different, non-whites) will be studied as well as alternative methods of delivery in career development and counseling. Prerequisite: Completion of EPSY 846 or equivalent, and Ph.D. degree-seeking status in Counseling Psychology or consent of instructor.
EPSY 955. Research Methods in Counseling Psychology. 3 Credits.  
This course is a foundational course in research methods and design in counseling psychology. The course covers (a) design type and threats to design validity, (b) the formulation of research problems, (c) research instrumentation/measures, (d) data analytic methods, (e) interpreting data, and (f) ethical issues, research integrity, and the responsible conduct of research. Prerequisite: EPSY 710 and EPSY 711 or equivalent. Doctoral student in Counseling Psychology or consent of instructor.

EPSY 956. Theory of Couples and Family Counseling. 3 Credits.  
A survey of contemporary systems of couples and family counseling. Consideration of couple and family function/dysfunction, theoretical models of family interaction, models of counseling practice and methods, and research on couples and family counseling. Prerequisite: Degree-seeking status in Counseling Psychology or consent of instructor.

EPSY 960. Assessment of Infants, Toddlers, and Young Children. 3 Credits.  
The purpose of this course is to introduce the student to the assessment of various domains related to the development of infants, toddlers, and young children. The student will learn how to use formal and informal assessment techniques for screening, diagnostic, educational planning, and educational evaluation purposes. An emphasis will be placed on the linkage between assessment and intervention. This course is designed for students in the applied psychology fields (i.e., school psychology, counseling psychology, clinical child psychology, and clinical psychology). Prerequisite: EPSY 705, EPSY 725, EPSY 805 and permission from the instructor.

EPSY 965. Foundations of Psychoeducational Consultation. 3 Credits.  
This is the first of a two semester sequence of courses on school-based consultation. The course is a combination lecture-laboratory experience that introduces the student to the literature, theory, and techniques of consultation. Prerequisite: Approval of instructor.

EPSY 975. Therapeutic Intervention: Home and School. 3 Credits.  
The course includes a review of literature and theory as well as supervised practice. Therapeutic intervention is broadly conceived, including individual and group counseling, and parent and teacher consultation. The importance of the family-school relationship is stressed. Prerequisite: Permission of instructor and completion of course on counseling.

EPSY 980. Advanced Topics: _____ 1-3 Credits.  
A special course of study to meet current need of education professionals--primarily for post-master's level students.

EPSY 990. Internship in Counseling Psychology. 1 Credits.  
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved counseling psychology field setting. Supervision and directed experiences coordinated by the student's advisor, the program training director, and internship setting supervisors. Required of all counseling psychology doctoral students. Prerequisite: Doctoral degree-seeking status in counseling psychology, completion of Ph.D. comprehensive examinations, and consent of counseling psychology faculty.

EPSY 991. Ed.S. Internship. 1-2 Credits.  
This course has two components: 1) a supervised experience as a practicing school psychologist, and 2) a group supervision class emphasizing case presentations and other integrative practice elements. The student functions as a provisionally certified school psychologist. Prerequisite: Completion of Ed.S. degree.

EPSY 992. Ph.D. Internship in School Psychology. 1-2 Credits.  
This is a one year, supervised experience in an approved setting. The structure and content of the experience follows guidelines of several professional organizations including The American Psychological Association and the National Association of School Psychologists. Prerequisite: Approval of School Psychology committee.

EPSY 995. Field Experience in: ______ 1-5 Credits.  
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

EPSY 996. College Teaching Experience in: ______ 1-5 Credits.  
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate's committee.

EPSY 997. Individual Study. 1-4 Credits.  
Graded on a satisfactory/fail basis. Prerequisite: Prior graduate course work in the area of study and consent of instructor.

EPSY 998. Seminar in: ______ 1-4 Credits.  
Graded on a satisfactory/fail basis.

EPSY 999. Doctoral Dissertation. 1-15 Credits.  
Graded on a satisfactory progress/limited progress/no progress basis.

Education Courses

EDUC 698. Professional Development Micro-Credential: ______ 1 Credits.  
The Professional Development Micro-credential aims to serve the workforce needs for post-baccalaureate students wishing to expand their professional competencies in the fields the School serves. The credentials will support specific workforce development by enabling professionals to have access to advanced knowledge, skills and tools in selected areas of identified need, offering not only professional work development, but in addition, the potential for career advancement and change.

EDUC 800. Education as a Field of Scholarship. 3 Credits.  
An intensive interdisciplinary examination of classic and current scholarship in education, for students in Ph.D. programs in the School of Education. It surveys the interdisciplinary range of scholarship and inquiry in education, as preparation for careers in research. The course features discussion of exemplary studies, both for their contributions to various fields, but also with regard to research methods, related ethical issues and the responsible conduct of research. Prerequisite: Admission to Ph.D. in Education Program.

Health Sport & Exercise Sci Courses

HSES 104. Physical Activity in: ______ 0.5-1 Credits.  
An accurate description of the activity or activities will be given in the Schedule of Classes. Graded on a satisfactory/unsatisfactory basis.

HSES 108. Basic Skill Instruction in: ______ 0.5-2 Credits.  
(An accurate description of the activity or activities will be given in the Timetable.)

HSES 110. Intermediate Skill Instruction in: ______ 0.5-2 Credits.
HSES 112. Advanced Skill Instruction in: _____  0.5-2 Credits.
(An accurate description of the activity or activities will be given in the Timetable.)

HSES 200. Coaching Certification for Youth Sports.  2 Credits.
This course will examine theories, practices, methods and techniques used to coach youth sports. Emphasis will be upon training, conditioning, sports psychology, nutrition, organization and management as prescribed by the National Federation of Interscholastic Coaches' Education Program. Students will have opportunity to receive coaching certification. Prerequisite: Basic fitness and knowledge of the activities. Open to pre-HSES and HSES majors, or by consent of instructor.

HSES 204. Gymnastics.  2 Credits.
Instruction and analysis in the eleven gymnastics events for men and women. Skill performance, spotting and teaching techniques, lesson and unit plan construction, and teaching practicum constitute the basic focus of this course. Class meets three days per week with one hour being a laboratory session. Prerequisite: Basic fitness and knowledge of the activities. Open to HSES majors and minors, or by consent of instructor.

HSES 210. Instruction and Analysis in Swimming.  1 Credits.
Study of the skills to be included in the instruction of swimming and the analysis of skill performance involved. Presentation of instructional techniques and practice in instruction of learning experiences are included.

HSES 214. Physical Education Activities for Elementary School Children.  2 Credits.
This course will introduce the student to a variety of physical education activities that are appropriate for children in grades K-6. Age appropriate activities demonstrated in this course include: individual and group games, self testing games, stunts and tumbling experiences, physical fitness, modified sports, and movement exploration. Class participation will be expected for all students. Prerequisite: Open to pre-HPE and HPE majors.

HSES 218. Lifeguard Training.  2 Credits.
The course involves American Red Cross certification in lifeguarding which includes rescue techniques and safety procedures. It also includes first aid and CPR certifications. Each student will be asked to identify common hazards associated with various types of aquatic facilities and develop skills necessary to recognize a person in a distress or drowning situation and to effectively rescue that person. This course will help each student to understand the lifeguard/employer and lifeguard/patron relationship as well as provide explanations, demonstrations, practice and review of the rescue skills essential for lifeguards. Prerequisite: HSES 112 Advanced Skill Instruction in Swimming or consent of instructor.

HSES 220. Officiating of: _____  1 Credits.
A study of the rules and techniques of officiating. Students will officiate during laboratory sessions. The activities offered in officiating are: basketball, football, gymnastics, softball, swimming, track and field, and volleyball. Prerequisite: Basic competency in the sport to be officiated, or consent of instructor.

HSES 222. Water Safety Instruction.  2 Credits.
This course is designed to train instructor candidates to teach American Red Cross Swimming and Water Safety courses. Through practice teaching sessions, students will plan and organize skill development utilizing the various educational methods and approaches applicable to swimming and water safety instruction. Students will also learn the correct swimming styles taught by the Red Cross. Prerequisite: HSES 112 Advanced Skill Instruction in Swimming or consent of instructor.

HSES 224. Lifeguard Training Instructor.  2 Credits.
This course is designed as a lecture/laboratory course, meeting for one hour three days per week. Each instructor candidate (student) will have an opportunity for skill development necessary to instruct American Red Cross Lifeguard Training courses. Through practice teaching sessions, emphasis will be placed on enforcing safety precautions, identifying errors, providing effective instruction, and skills correction. After successful completion of this course, the student will be certified to instruct the following American Red Cross Aquatic courses: (1) lifeguard training, (2) waterfront lifeguarding, (3) CPR for professional rescue, and (4) community first aid. Prerequisite: HSES 218 or lifeguard training.

HSES 236. Practicum in: _____  1-3 Credits.
A description of the activities offered will be provided in the Timetable. Prerequisite: Consent of instructor.

HSES 240. The Coaching of Football.  2 Credits.
A complete study of the theoretical aspects of the fundamentals of football. Study of defensive and offensive tactics for each position. Prerequisite: Sophomore standing.

HSES 244. Introduction to Physical Education and Sport Studies.  3 Credits.
The study of the history, foundational concepts, and current principles of physical education and sport programs.

HSES 248. First Aid.  2 Credits.
This course is designed to teach emergency treatment of injuries, wounds, hemorrhage, burns, and poisoning. Emphasis is placed on the techniques of rescue breathing, CPR, and emergency bandaging. American Red Cross certification is included.

HSES 250. Introduction to Athletic Training.  3 Credits.
Introduction to the health profession of Athletic Training. Course content includes: risk management, pathology, emergency management, musculoskeletal, and general medical conditions of the injured athlete. Prerequisite: Concurrent enrollment in HSES 251.

HSES 251. Introduction to Athletic Training Practicum.  1 Credits.
This course is designed to introduce the beginning skills to the pre-professional athletic training student. Emphasis will be placed on basic athletic training procedures including but not limited to preventative taping, bracing, and padding techniques as well as various other procedures and techniques related to the prevention, care, and management of athletic related injuries/illnesses. Prerequisite: Concurrent enrollment in HSES 250 or transfer credit.

HSES 252. The Coaching of Basketball.  2 Credits.
Theory of basketball, including methods of teaching fundamentals; individual and team offense and defense; various styles of play and methods of coaching. Prerequisite: Sophomore standing.

HSES 260. Personal and Community Health. 3 Credits.
Emphasis on healthful and intelligent living and the application of the fundamental principles of health.

HSES 262. Life Skills Training for Intercollegiate Athletics. 2 Credits.
This course will focus on issues surrounding drug use, testing, and prevention in sports and will incorporate life skills training in the areas of career transition, stress and time management, performance enhancement, strategic learning skills, and the dynamics of communication and leadership.

HSES 264. The Coaching of Individual Sports. 2 Credits.
An analysis of coaching techniques and study of materials for the coaching of gymnastics, swimming, golf, tennis, and wrestling.

HSES 269. Introduction to Exercise Science. 3 Credits.
A study of the various components of physical fitness and the wellness and the implications for developing programs to promote good health and fitness. Lectures and laboratory sessions will be centered on practical knowledge and experiences designed to help individuals enhance their own health, as well as develop sound programs for others. The topics discussed include cardiovascular fitness, body composition, muscular strength, flexibility, evaluation of fitness components, training program design, nutrition, weight management, and facts and fallacies of nutrition and fitness.

HSES 289. Introduction to Sport Management. 3 Credits.
This course provides an overview of the field of sport management including the principles of leadership and management and the fundamentals of personnel management, financial management, marketing, strategic planning, sport ethics, sport law, time management, stress management, facility management, and event management applied to sport settings.

HSES 290. Safety Education. 3 Credits.
A survey of safety problems as they exist in society today, with emphasis on preventive, corrective, and compensatory procedures.

HSES 299. Careers in Sport Management. 3 Credits.
In this course, students will learn about the professional world of sport management. Specifically, those enrolled will be exposed to the multitude of career paths in the sporting world. Additionally, students will learn numerous internship and job search skills such as political skill, networking, and personal branding.

HSES 300. Study Abroad Topics in: _____. 1-5 Credits.
A course designed to enhance international experience in topic areas related to health, sport, and exercise sciences at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Permission of the department.

HSES 302. Practicum in Adaptive Physical Education for PK-12 Students. 2 Credits.
Emphasis will be on instructional techniques that are used for the inclusion of all students in physical education learning experiences. Students will develop an understanding of how to deliver physical education activities that may be part of an individual education program. A practicum experience in a public school adaptive physical education setting will be required. Prerequisite: PE Plus advisor approval required.

HSES 305. Methods of Strength Training and Conditioning. 3 Credits.
This course will provide the students with the scientific principles and the hands-on experience to develop resistance exercise and related conditioning programs for a wide range of populations, including those focusing on general fitness, therapeutic rehabilitation and sport performance. Prerequisite: Anatomy, physiology, and admission to the Exercise Science undergraduate program, or permission of instructor.

HSES 306. Principles of Personal Training. 3 Credits.
Designed to prepare individuals who are interested in becoming certified personal trainers (CPT) through the National Strength and Conditioning Association, or to enhance their own training goals. Instruction is provided describing basic exercise physiology as well as the principles of developing a personal training regimen for a typical gym trainee. Course experiences will reinforce training principles and teach the basic skills necessary for certification. Prerequisite: Accepted to School of Education or instructor permission.

HSES 307. Tactical Strength and Conditioning. 3 Credits.
This course will provide students with methods and techniques associated with assessing, programming, and training tactical-based athletes and professionals. Tactical athletes include military, law enforcement, firefighter, protective services, rescue, and other emergency personnel. Students will apply scientific knowledge to develop training programs to improve performance outcomes, decrease injury, evaluate nutritional strategies, and implement relevant and safe strength and conditioning programs. This course will be designed to prepare students to take the Tactical Strength and Conditioning Facilitator (TSAC-F) certification examination proposed by the National Strength and Conditioning Association (NSCA).

HSES 308. Drugs and Diseases in Society. 3 Credits.
This course is an overview of human disease processes as well as legal and illegal use of drugs and narcotics for treatment or recreational purposes. Both communicable and degenerative diseases will be covered with regards to prevention, transmission, effects, management, and treatment. Legal drugs and illegal drugs will be discussed with regards to their treatment or abuse potential, legislative issues, and consumer education. Reflective thinking will be used to formulate improved perspectives on the roles of drugs and diseases in society. Prerequisite: Admission to Community Health Program or consent of instructor.

HSES 310. Research and Data Analysis in Health, Sport, and Exercise Sciences. 3 Credits.
This course provides formal instruction in the areas of test administration, general statistics, and basic research design. Emphasis will be placed upon the interpretation of statistical data, evaluation of data, and basic methodologies utilized in health, sport, and exercise sciences research. Data collection, analysis, and evaluation will be an integral part of the class.

HSES 315. Methods of Teaching Elementary Physical Education. 3 Credits.
This course will provide an introduction to instructional planning for elementary physical education. It will train students to utilize research and best practice as it relates to effective teaching skills in elementary physical education. Students will systematically learn such skills and apply them in a variety of laboratory experiences in elementary schools. Prerequisite: PE Plus advisor approval required.

HSES 320. Methods of Teaching Secondary Physical Education. 3 Credits.
This course provides a systematic approach to the development of effective teaching skills in secondary physical education. Students receive practical and field experiences that enable them to observe and practice managerial, instructional, and interpersonal skills necessary to produce
HSES 330. Principles of Nutrition and Health. 3 Credits.
This course will provide an introduction to the basic principles of nutrition, with an emphasis on application of these principles to improve overall health. Topics include: guidelines for a balanced diet, index of nutritional quality, energy requirements and balance, weight management and obesity, nutritional quackery, sports nutrition, nutrition for children and elderly, and eating disorders.

HSES 331. Sport and Exercise Nutrition. 3 Credits.
Provides a basic understanding of the influence of nutrition on sport and exercise performance. Nutrition for sport performance, including hydration, nutrient timing strategies for various athletes, and use and regulation of ergogenic aids and nutritional supplements will be covered to apply this knowledge to develop a critical understanding of the nutritional and practical dietary needs of individuals participating in sport and exercise. Prerequisite: Accepted to School of Education or instructor approval.

HSES 335. Clinical Field Experience. 1-3 Credits.
Clinical Field Experience is designed to allow students who plan to pursue clinical careers the opportunity to observe and assist (as appropriate) in the evaluation and/or treatment of patients by licensed clinicians in fields such as medicine, physical therapy, and cardiac rehabilitation. Only one enrollment permitted each semester. A maximum of six hours will apply towards the bachelor's degree, or a maximum of three credit hours will apply towards the bachelor's degree if the student subsequently enrolls in HSES 580 (Internship). Prerequisite: Admittance to the Community Health or Exercise Science undergraduate degree program in HSES.

HSES 340. Instructional Strategies in Motor Development. 2 Credits.
This course is designed to provide students with an examination of current theories of motor development throughout the life cycle. Emphasis is placed on content regarding the development of fundamental motor skills, physical growth and development, and assessment. Prerequisite: PE Plus advisor approval required.

HSES 341. Instructional Strategies in Physical Education for Elementary Classroom Teachers. 1 Credits.
The application of child growth and development principles to physical education. The use of materials as related to a sequential physical education curriculum in the elementary school will also be included. Prerequisite: Prior or concurrent enrollment in C&T 322 or equivalent.

HSES 350. Care and Prevention of Athletic Injuries. 3 Credits.
The introductory study of the prevention, immediate care, and treatment of athletic related injuries and illnesses. This course is designed to cover the basic fundamentals of injury/illness recognition as well as discuss the various strategies for the prevention and care of injuries to the physically active. Prerequisite: Successful completion of Human Anatomy (BIOL 240) or equivalent course and proof of current first aid certification (i.e. American Red Cross) or successful completion of First Aid course (HSES 248).

HSES 351. Foundations of Athletic Training. 1 Credits.
This course is designed to introduce the practical skills and psychomotor clinical competencies of the beginning student-athletic trainer. Emphasis will be placed on basic athletic training procedures including but not limited to preventative taping, bracing, and padding techniques as well as various other procedures and techniques related to the prevention, care, and management of athletic related injuries/illnesses. Open to Athletic Training majors only. Prerequisite: Human Anatomy, First Aid, concurrent enrollment in HSES 350.

HSES 352. Therapeutic Modalities. 3 Credits.
This course is the study of therapeutic modalities utilized in treatment and rehabilitation of athletic injuries. Prerequisite: HSES 250 or the transfer equivalent, Admission to the Athletic Training Program.

HSES 353. Athletic Training Practicum I. 2 Credits.
The first in a sequence of six practical/clinical experiences for the Athletic Training Student, under the direct supervision of a Preceptor. Prerequisite: Admission to Athletic Training program, HSES 250 and HSES 251.

HSES 354. Lower Extremity Evaluation. 3 Credits.
This course teaches a systematic approach to athletic injury evaluation of the lower extremity, thorax, and abdomen. Prerequisite: Admission to the Athletic Training Program, HSES 353, concurrent enrollment HSES 355.

HSES 355. Athletic Training Practicum II. 2 Credits.
This course is the second in a sequence of six practicum/clinical experience courses for the athletic training student. Prerequisite: Admission to Athletic Training program and concurrent enrollment in HSES 354.

HSES 358. Creative Movement and Dance Appreciation. 3 Credits.
Students will experience the following types of dance: creative movement, ballroom dance, folk, square, and line dance. An appreciation for dance will be developed through the study of the pioneers of dance and the critique of local dance performances. Prerequisite: PE Plus advisor approval required.

HSES 365. Peer Health Education. 3 Credits.
The course is designed to train students in peer health education, as peer health educators in college settings, and as trainers, training adolescents in community health settings for grades 6-12 peer health education. Subject content and teaching methodologies will be emphasized in the ten content areas of health with special emphasis on alcohol, drugs, tobacco, stress reduction, mental health and human sexuality. Prerequisite: HSES 260 or instructor consent.

HSES 369. Kinesiology. 3 Credits.
This course is designed primarily for students in the field of exercise science who already have taken an introductory course in human anatomy and who need a more detailed exposure to concepts of functional movement anatomy. This course will provide a detailed study of the skeletal and muscular systems to include identification of the origin, insertion, and action of the major muscles of the human body. Students will become proficient in the use of directional and movement terminology used to describe movement and be able to identify the plane/axis as well as the agonist and antagonist muscles involved in a movement. Prerequisite: A course in human anatomy, admission to School of Education.

HSES 370. Health and Pathophysiology. 3 Credits.
The course is designed to assist students in the development of a basic understanding of the anatomical structures and physiological processes that are central to the development of various diseases/disorders. Students will apply this knowledge to an evidence-based model for choosing and developing appropriate lifestyle and health-related interventions (e.g. exercise, nutrition, stress management), both for health enhancement and disease prevention. Prerequisite: BIOL 240 and BIOL 246; or admittance to HSES exercise science, community health, or athletic training programs.

HSES 371. Medical Terminology for Health Professionals. 3 Credits.
A study of medical terminology. This course will include: analysis of root words, prefixes and suffixes for understanding medical language; origin, modern usage and abbreviations.

HSES 372. Exercise Physiology. 3 Credits.
A fundamental study of the physiological adjustments that occur within the body during exercise. The presentation of this material is particularly oriented toward a basic understanding of the physiological systems as they are affected by the activity of a normal coaching or teaching situation. The physiological values of exercise are also stressed. Prerequisite: Three hours of physiology.

HSES 375. Neuromuscular Exercise Physiology and Motor Control. 3 Credits.
This course explores the control of human movement from an exercise neuropsychology perspective. Emphasis will be placed on the understanding the interactions between the nervous system and muscular systems in the control of muscle force/power production and the control of movement under a variety of contexts. These contexts include responses and adaptations to exercise training, the aging process, and in a variety of neuromuscular disorders. Prerequisite: BIOL 240 and BIOL 246.

HSES 378. The Coaching of Volleyball. 2 Credits.
Theory of volleyball, including methods of teaching fundamentals, individual and team offense and defense. Various styles of play and methods of coaching. Efficient performance of the skills during game conditions will be emphasized.

HSES 379. The Coaching of Softball. 2 Credits.
Theory and fundamentals of coaching softball. Methods of coaching, as well as team offense, defense, and strategies will be stressed. Efficient performance of the skills during game conditions will be emphasized. Prerequisite: Consent of instructor.

HSES 380. Sociology of Sport. 3 Credits.
A survey of the current literature concerning the scope of sociology in sport, the interaction of people in sport, the social systems controlling sport, and the small group dynamics in sport. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 381. Sport Ethics. 3 Credits.
This course will help students develop their abilities to reason morally through an examination within competitive sports of ethical theories, moral values, intimidation, gamesmanship, and violence, eligibility, elimination, winning, commercialization, racial equity, performance-enhancing drugs, and technology. Students will develop a personal philosophy of sport and learn how to apply a principled decision-making process to issues in sport. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 382. Sport Facilities and Event Management. 3 Credits.
This course will provide students with a solid grasp of the fundamental skills in sport facility and event management and the knowledge base to apply those skills in a real world environment. Students will learn about planning, designing and financing the construction of new sport facilities, sport facility management of regular and special events, sporting event planning and game day operations. Prerequisite: Admission in the Sport Management major or minor and completion of HSES 289.

HSES 384. Sport Law. 3 Credits.
This course is intended to introduce undergraduate students to the major legal issues in amateur and professional sports including dispute resolution, tort law, contract law, constitutional law, statutory law, labor and antitrust law and intellectual law. Students will also learn about risk management, gender equity, the Americans with Disabilities Act and agency law and sports agents. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 385. Psychological Aspects of Exercise. 3 Credits.
This course is designed for students interested in optimizing motivation and adherence to exercise among individuals in a wide range of physical activity settings (e.g., health clubs, corporate fitness, and physical therapy/rehab). The course content will include a review of the literature highlighting the psychological benefits of exercise, the theoretical advances in understanding the psychological aspects influencing individuals’ participation in physical activity, and an introduction to strategies and techniques for professionals attempting to foster motivation and adherence to exercise among their clients. Prerequisite: Admission to the Community Health program or instructor consent.

HSES 390. The Coaching of Track and Field. 2 Credits.
Designed to acquaint the student with the fundamentals of track and field athletics.

HSES 395. Concepts in Health and Wellness. 3 Credits.
This is designed as an introductory course into the profession of School and Community Health Education. Regardless of a person’s areas of specialization in Health Education, there are commonalities shared by all of us who are charged with the responsibility of providing education about health. Course emphasis will focus on: defining health education; history of health education; roles and competencies of health educators; theoretical bases for the profession; planning, implementing, administering, and evaluating health programs; settings for health education; future issues. Prerequisite: HSES 260.

HSES 403. Health Behavior Theory. 3 Credits.
This class will be an introduction to the primary models and theories used in health behavior research and health promotion practice. These models and theories undergird the development of successful health-related programs and interventions, and will help guide educators in the development of innovative and effective programming. The course will cover individual, interpersonal, community-level, and ecological theories, and students will have the opportunity to apply these theories to health behaviors of interest.

HSES 410. Program Design in Physical Education. 3 Credits.
The study of physical education curriculum models and extraclass programs appropriate for students in grades PK-12. Students will receive practical and field experiences related to program design and implementation. They will learn techniques appropriate for program evaluation as well as the assessment of student sport skills and fitness. Prerequisite: PE Plus advisor approval required.

HSES 418. Health Aspects of Aging. 3 Credits.
This course will consist of a Holistic Health approach to the various components of the aging process. Special emphasis will be placed on the demographic aspects of aging; normal aging changes and deviations in the aging process (pathophysiology); the relationship between mental and physical health, and the implications for the promotion of risk reduction and prevention principles that can effectively improve the quality of life for older individuals. Prerequisite: A course in personal and community health.

HSES 434. Consumer Health. 3 Credits.
This course will be a comprehensive examination of the factors involved in the selection of health products and services. Topics of discussion will be: protection laws and services, fraudulent practices and products, consumerism, and traditional and alternative health care. There will also be an in-depth examination of how to assess and evaluate health based products that are available to consumers. Prerequisite: Admission to the Community Health Program or consent of instructor.
HSES 440. Applied Sport and Performance Psychology. 3 Credits.
This course will examine the psychological principles and techniques that are applied to improve sport performance and other fields of achievement (e.g., exercise and wellness, music, and academics). Special attention will be given to psychological aspects of injury and rehabilitation, psychological conditioning, psychological training methods, coaching philosophy, the social psychology of team members, and components of peak performances.

HSES 453. Communicable and Degenerative Diseases. 3 Credits.
This course is designed to introduce the student to the study of the basic concepts/principles of disease process. Special emphasis will be placed on the etiology, origin, symptoms, treatment, body defenses, primary prevention, host, agent, (microbes) and environmental factors affecting disease occurrence, prevention and control measures. Topical application of the fundamental concepts of microbiology in school/community health practice will be critically discussed. The natural history of disease and disease classification will be highlighted. Many disease topics (both communicable and chronic, degenerative diseases) will be discussed. Prerequisite: A course in personal and community health.

HSES 455. Manual Therapy Techniques and Emergency Care Instructor Training. 3 Credits.
The purpose of the course is to train students in a Manual Therapy Technique for use in the clinical setting. The course is also designed to certify students as instructors in American Red Cross First Aid, CPR and AED courses as well as instructors for the CPR/AED for the Healthcare Provider. Prerequisite: Completion of HSES 352, HSES 354, HSES 456 and HSES 459 or equivalency from an accredited Athletic Training Education Program or have current First Aid and CPR/AED for the Healthcare Provider certification.

HSES 456. Upper Extremity Evaluation. 3 Credits.
This course teaches a systematic approach to athletic injury evaluation of the upper extremity, head and spine. Prerequisite: Admission into the Athletic Training program, HSES 354, and HSES 355. Corequisite: HSES 457.

HSES 457. Athletic Training Practicum III. 2 Credits.
This course is third in a sequence of six practicum/clinical experience courses for the athletic training student. Prerequisite: Admission into the Athletic Training program and concurrent enrollment in HSES 456.

HSES 458. General Medical/Pharmacology. 3 Credits.
This course will cover general medical conditions/illnesses and over the counter, prescription, and illegal pharmacologic agents commonly encountered in physically active populations. The course will cover recognition of illnesses and diseases, immediate care and medical referral, basic principles of pharmacology, pharmacological agents used in the treatment of various pathologies, and other general medical and pharmacological topics encountered by athletic trainers. Prerequisite: Admission into the Athletic Training Program, HSES 459 and HSES 460.

HSES 459. Rehabilitation. 3 Credits.
This course is the study of rehabilitation principles and techniques used to safely return a physically active individual to their sport/ activity following injury. Prerequisite: Admission into the Athletic Training program, HSES 456, and HSES 457.

HSES 460. Athletic Training Practicum IV. 2 Credits.
This course is the fourth in a sequence of six practicum/clinical experience courses for the athletic training student. Prerequisite: Admission into the Athletic Training program, HSES 457, and concurrent enrollment in HSES 459.

HSES 461. Organization and Administration of Athletic Training. 3 Credits.
This course examines the organizational and administrative aspects of the Athletic Training profession. Course content includes: program management, employment, budget, facility design, risk management, documentation and medical records, insurance, legal and practice regulations, prevention and health promotion, history, and organization of the profession. Prerequisite: HSES 459, HSES 460, and concurrent enrollment in HSES 462.

HSES 462. Athletic Training Practicum V. 2 Credits.
This course is the fifth in a sequence of six practicum/clinical experience courses for the athletic training student. Prerequisite: Admission into the Athletic Training Program and concurrent enrollment in HSES 461.

HSES 463. Senior Capstone in Athletic Training. 2 Credits.
This course is designed to allow senior Athletic Training Students to review previous content and prepare for the BOC certification exam as well as explore areas of professional development. Prerequisite: Admission into the Athletic Training program, HSES 561, and HSES 562.

HSES 464. Athletic Training Practicum VI. 2 Credits.
This course is the final practicum/clinical experience course for the athletic training student. Prerequisite: Admission into the Athletic Training program and concurrent enrollment in HSES 463.

HSES 465. Program Assessment and Evaluation. 3 Credits.
This course will offer an introduction and hands-on application of program assessment and evaluation techniques in health education. As health educators and program planners, we are required not only to develop innovative programs and interventions to address community- and school-based health concerns, but also to give evidence that our efforts are both adequate and effective. Successful program assessment and evaluation incorporate knowledge of basic research methods as well as the theoretical understanding of health behaviors.

HSES 466. Program Planning in Health Education. 3 Credits.
This course is designed to provide the students with an in-depth knowledge of proven health planning models that can be used for program development and intervention. Students will learn how to develop attainable program goals and objectives which will allow programs and interventions to evolve into useful forms of community-based health education. Prerequisite: Students must be admitted to the School of Education and the Community Health Program.

HSES 467. Introduction to Health Education. 3 Credits.
This course will provide an overview of the various health education professions. Topics emphasized in the course are: the nature of health education, an in-depth description of community health, the school health program, and identifying program and services of voluntary and services of voluntary and official health and welfare organizations. Prerequisite: Admission to the School of Education and the Community Health Program.

HSES 468. Methods and Materials in Health Education. 3 Credits.
Emphasis is placed on the presentation and preparation of health topics along with the recommended resources and materials available. The teaching method is emphasized and student participation is stressed. Students will observe health teachers in the public schools and identify and discuss these methods as they relate to the methods present in the class. Prerequisite: Admission to HPE teacher certification program or consent of instructor.

HSES 470. Biomechanics. 3 Credits.
The course is designed to cover a basic understanding of the anatomical and mechanical principles of human movement. Areas covered will be joint and segmental movement, muscle actions, time-displacement motion...
description, forces causing or inhibiting motion, and stability. Special attention will be given to the application of the theoretical concepts in movement activities. Prerequisite: Anatomy, admission to the Exercise Science program, or permission of instructor.

HSES 473. Clinical Fitness Evaluation Techniques. 3 Credits.
This course will provide the student with the knowledge and skills to assess components of physical fitness in adults including cardiorespiratory fitness, body composition, strength, and flexibility. In addition, specific emphasis will be placed on the development of exercise and weight management prescriptions. Students completing the course will have the skills to take the Health Fitness Instructor Certification exam given by the American College of Sports Medicine. Prerequisite: Exercise physiology and research and data analysis in HSES or equivalents.

HSES 474. Exercise Biochemistry. 3 Credits.
This course will examine the processes that underlies the use and production of energy for exercise. Topics that will be explored include glycogenolysis and glycolysis in muscle, cellular oxidation of pyruvate, lipid metabolism, metabolism of proteins and amino acids, molecular biology, neural and endocrine control of metabolism, and local fatigue during exercise. Emphasis will be placed on carbohydrates, protein, and lipid metabolism and the acute and chronic effects that exercise has on these processes. Prerequisite: HSES 472.

HSES 475. Undergraduate Research in Health, Sport, and Exercise Sciences. 1-3 Credits.
The course is designed to allow students to collaborate on an active research project under the supervision of a faculty member in HSES. Only one enrollment permitted each semester. A maximum of six hours will apply towards the bachelor's degree. Prerequisite: Enrollment by Instructor permission only. Successful completion of IRB training via the CITI training program in the KU eResearch system.

HSES 480. Physical Activity and Exercise Management Individuals with Disabilities. 3 Credits.
An in-depth study of how physical activity and exercise can be a part of the treatment plan for people who have chronic disease or a disability. A variety of physical activity and exercise intervention programs and models will be presented and discussed, as well as protocols for baseline testing and post-treatment testing. A portion of this course will focus on how physical activity and exercise can prevent motor functioning deterioration in people who have a disability or limited functional movement. Prerequisite: Admission to the School of Education Exercise Science or Athletic Training programs and a course in human anatomy and physiology, or consent of instructor.

HSES 481. Sport Fundraising and Sponsorship. 3 Credits.
In this course, students will take an in-depth look at the sport fundraising and sponsorship realms. Specifically, students will focus on revenue-generating operations within sport organizations. Example topics include major gift fundraising, naming rights and other major sponsorships, annual funds, premium inventory, and trends in these evolving fields. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 482. Drugs in Society. 3 Credits.
This course is designed to provide an in-depth exposure to basic drug classification, pharmacological effects, causes of drug abuse to society, common treatment modalities, and effective prevention/intervention strategies. In addition, consumer issues related to drug use, drug legislation, and drug education programs for school and community implementation will be discussed. Prerequisite: A course in personal and community health or consent of instructor.

HSES 483. Sport Finance and Economics. 3 Credits.
This course will help students gain an understanding of the critical importance of budgeting and financing sports-related industries based on sound financial principles and methods of financial control. Students will learn how economic principles shape the major national industry of sport. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 484. Sport in Film. 3 Credits.
In the course, students will critically engage and interpret a series of popular sport-related films. By the end of the course, students will be able to write and think critically about the role that film in general, and sport-based films in particular, play in promoting and challenging dominant perceptions of gender, sexuality, nationalism, race, social class, and ability.

HSES 485. Sport Communication. 3 Credits.
This course examines the complex and evolving field of sport communication including personal, organizational, and external perspectives of sport communication. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 486. Sport Marketing. 3 Credits.
This course is intended to provide undergraduate students with basic knowledge and competencies in definitions of marketing and sport marketing, understanding the unique aspects of sport marketing, marketing planning process, consumer demographics and psychographics, the marketing mix, segmentation and target marketing, marketing proposal preparation, sponsorship, endorsement, merchandising, fundraising, marketing goals and objectives, sport consumer and consumer behavior, industry segmentation, special events, ticket sales and their use in promotion, the role of the media, television marketing ratings and shares and venue and event marketing. The proposed content of this course will address each of these expectations. Prerequisite: Admission to the Sport Management major or minor and completion of HSES 289.

HSES 487. Personnel Management in Sport. 3 Credits.
This course provides students with an overview of the requisite communication skills and concepts of leadership and management as they relate to sport managers. Students will learn how leadership and management practitioners, utilizing effective communication techniques, shape successful sport organizations. Additional emphasis will be placed on building and nurturing relationships with people as a key to effective management. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 488. Pre-Internship Seminar. 1 Credits.
This course will prepare students for their actual semester-long Internship experience. Students will be provided with background information on available internship sites to assist in their site-selection decision. Students will learn about different management styles they may encounter, the traits and characteristics of effective and productive employees, common rules of the workplace and internship experiences of previous HSES Interns. Prerequisite: All HSES students must be in final semester prior to Internship.

HSES 489. Health and Human Sexuality. 3 Credits.
The course is designed to encompass the various components of human sexuality as well as to demonstrate applicable teaching techniques for sex education. Included in the content of the course are: human sexual response, sexually transmitted diseases, family planning, sex roles, rape, sexual preferences, and topics such as sexuality and the handicapped, sexuality and the mass media, and sexuality and the church. Teaching techniques such as values clarification, non-verbal communications, role
HSES 490. Issues in Intercollegiate Athletics. 3 Credits.
Intercollegiate athletics is a multi-billion-dollar industry. Because of the high stakes now associated with intercollegiate college athletics, the complexity of issues within athletics have grown as well. This course provides students with an understanding of the operation and decision-making process in intercollegiate athletics. Students will explore subjects such as NCAA compliance, legal aspects of college sport, and financial implications of decisions made within athletics. Prerequisite: Admission to the major or minor in sport management.

HSES 497. Independent Study. 1-3 Credits.
Only one enrollment permitted each semester; a maximum of six hours will apply toward the bachelor's degree. This course cannot be taken as a substitute for a required course. Prerequisite: Recommendation of advisor and consent of instructor and department chairperson.

HSES 499. Internship in Sport Management. 2-16 Credits.
A full-time work experience in the sport industry (40 hours per week). This experience is actual work in a sport management setting in which management practices are applied. Student interns are directed and evaluated by a faculty member with appropriate supervision by an on-site professional. Student interns must keep an accurate accounting of hours with a performance work diary. Grades/credit for the internship are determined by a faculty member with input from the on-site supervisor. Prerequisite: Completion of all Sport Management coursework. Admission to the Sport Management Internship program.

HSES 500. Student Teaching in Physical Education. 14 Credits.
A supervised teaching experience in an approved school settings, teaching physical education for a minimum of 15 weeks at the elementary (Grades PK-5) and secondary (Grades 6-12) levels. Prerequisite: PE Plus advisor approval required.

HSES 501. Seminar in Teaching Physical Education. 2 Credits.
Student teachers will receive instruction in the completion of a teacher work sample required for teacher licensure in the state of Kansas. They will also be prepared to enter the job market through advisement on resume writing, interviewing skills and online portfolio development. Prerequisite: PE Plus advisor approval required.

HSES 502. Camp Leadership and Counseling. 2 Credits.
Involves a complete study of the organization and administration of the various types of camps. It is designed to familiarize the student with camp leadership responsibilities; the development of the camp, the program involving camp crafts, outdoor cookery, hikes and outings, singing, and simple guidance of the individual camper. Prerequisite: General psychology plus three hours in sociology.

HSES 515. Assessment of Motor Development and Motor Control of Exceptional Children. 3 Credits.
Standardized motor assessment tools appropriate for use with exceptional children with motor difficulty will be critiqued and practiced. A battery of tests to measure developmental lag or structural deviation will be selected and administered to determine the motor control of exceptional children and the results will be interpreted. Prerequisite: Six hours of physical education course work.

HSES 528. Techniques of Athletic Training - I Lower Extremity. 3 Credits.
This course provides a comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the lower extremity, abdomen, and thorax, as well as the study of common illnesses/diseases that affect the physically active. Procedures for reporting and evaluating injuries/illnesses will be discussed so that appropriate injury management and referral may take place. The etiological factors common to athletic injuries, as well as specific signs and symptoms of various athletic related pathological conditions, will be discussed. Prerequisite: Human Anatomy, Human Anatomy Lab, Care and Prevention of Athletic Injuries, and admission to the Athletic Training Program.

HSES 529. Techniques of Athletic Training - II Upper Extremity. 3 Credits.
The comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the upper extremity, head, and spine. Procedures for evaluating and reporting injuries/illnesses will be discussed as well as etiological factors and common signs/symptoms of various related pathological conditions. The purpose of this course is to prepare students with the skills necessary to accurately recognize the signs/symptoms of injuries and conditions in order to determine the nature and severity of the problem as well as establishing a proper care plan and medical referral when appropriate. Prerequisite: HSES 528 Techniques of Athletic Training - I Lower Extremity.

HSES 578. Health Internship Seminar. 2 Credits.
Students enrolled in the internship will learn how to analyze professional health environments, examine intervention programs, and understand models used to develop health based programs. Discussions surrounding the internship experience will be facilitated by the health education faculty. Topics will relate to all phases of the internship experience. The intent of this course is to better prepare the student for entering the health profession. Discussions will be held on conflict resolution in the workplace, professional development, professional behavior and etiquette. Prerequisite: Concurrent enrollment in HSES 580 Internship in Health.

HSES 580. Internship in: ___. 2-16 Credits.
A supervised internship experience in an approved setting. The specific type of internship experience and the credits for that particular experience will be outlined in the appropriate program of the student. Prerequisite: Admission to a HSES Internship Program.

HSES 581. Athletic Training Practicum I: Recognition and Evaluation. 4 Credits.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury/illness recognition and evaluation during their clinical and field experience. Specific skills addressed in HSES 528 will be practiced, applied, and mastered during this experience. Prerequisite: Admission to the Athletic Training program. Concurrent enrollment in HSES 528.

HSES 582. Athletic Training Practicum II: Management and Treatment. 4 Credits.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury/illness evaluation, and the management and treatment of athletic injuries through a variety of therapeutic modalities during their clinical and field experience. Specific skills addressed in HSES 529 and HSES 654 will be practiced, applied, and mastered during this experience. Prerequisite: HSES 581 and concurrent enrollment in HSES 529 and HSES 654.

HSES 583. Athletic Training Practicum III: Rehabilitation. 4 Credits.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury rehabilitation/reconditioning through a variety of therapeutic exercise techniques during their clinical and field experience. Specific skills addressed in HSES 656 will be practiced, applied, and mastered during this experience. Prerequisite: HSES 582, concurrent enrollment in HSES 656.

HSES 584. Athletic Training Practicum IV: Senior Sport Experience. 4 Credits.
This course provides a culminating practical experience for the student-athlete. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills obtained during previous coursework as well as apply administrative and management skills obtained in HSES 658. This course is intended to allow the Senior student more freedom and responsibility in decision making regarding the health care of an athletic team. Prerequisite: HSES 583, concurrent enrollment in HSES 658.

HSES 598. Special Course: ______. 1-5 Credits.
A special course of study to explore current trends and issues in health and physical education - primarily for undergraduates.

HSES 605. Administering Health Related Programs. 3 Credits.
This course will consist of an analysis of administration as it relates to both school and community health programs. The focus will be on administrative models and techniques used to establish and maintain sound health programs in school and community settings. Prerequisite: Six hours of health education or consent of instructor.

HSES 671. Applied Biomechanics. 3 Credits.
This course will examine the qualitative biomechanical analysis of human movement directed towards the goals of performance improvement and injury prevention and rehabilitation. Specifically, this course will provide students with a basic knowledge of the biomechanical foundations of human movement, the knowledge and skills necessary to complete a systematic analysis and evaluation of human motor performance, and the ability to determine and provide interventions that are likely to improve movement in athletic, clinical, educational, and work environments. Prerequisite: A course in human anatomy, admission to the HSES Teacher Certification Program or consent of instructor.

HSES 714. Motor Development During Growth. 3 Credits.
Motor development in childhood and adolescence and its relationship to physical growth. Factors influencing motor learning and development will be explored. This course provides basic understanding of the neuromuscular changes and abilities of children and adolescents. Prerequisite: A course in kinesiology and anatomy.

HSES 715. Understanding Research in HSES. 3 Credits.
This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course provides an overview of basic, general knowledge of various research methodologies. Students should expect to study much of this material in greater depth through additional work before being fully prepared to conduct independent research. However, this course should enhance their ability to locate, read, comprehend, and critically analyze research articles and reports. Topics in the course include quantitative and qualitative methods and designs, historical and descriptive research, and program evaluation. (This course fulfills the requirement of a research methods course in the first 12 hours of graduate study.) Prerequisite: Must be an admitted HSES graduate student.

HSES 730. Advanced Concepts in Nutrition. 3 Credits.
A study of the nutritional factors that affect health at all ages. Specific nutritional needs and effects of deficiency states on health will also be addressed. The course will also include the physiological and biochemical mechanisms involved in the use of nutrients for human growth and development as well as the production of energy through the metabolic process. Prerequisite: HSES 330 or equivalent experience and permission of instructor.

HSES 771. Internship in Exercise Science. 6 Credits.
A supervised internship experience in an approved exercise science setting. Students will gain experience through a hands-on approach via clinical and/or research settings. The specific type of internship experience will be agreed upon by the student and their academic advisor. Prerequisite: Successful completion of at least 24 graduate credit hours.

HSES 777. Practicum in Health Education and Wellness Promotion. 1-3 Credits.
This course is designed to provide practical community health experiences in health education and wellness promotion, including: assessment, planning, implementation and program evaluation. With approval of the instructor, students may choose their practicum focus in any of the ten content areas of health: mental and emotional, family living, growth and development, nutrition, personal health, alcohol tobacco and other drugs, communicable and chronic diseases, injury prevention and safety, consumer health and environmental health. Prerequisite: Enrolled in graduate school and consent of the instructor.

HSES 779. Physiology of Functional Aging. 3 Credits.
The course has been designed to address issues and concepts relating to the biological aging process as a foundation for physical performance, general fitness, and health status. The biological concepts are applied to the human physiological aging process and the systems involved as well as the possible interventions that may effect that process. The several theories associated with physiological aging are also addressed as related to the physiological systems and current research that may impact the understanding of these theories. Prerequisite: A course in basic biology.

HSES 780. Internship in Teaching Physical Education: ______. 1-16 Credits.
A supervised internship experience leading to initial physical education teacher certification. The student assumes the total professional role as a teacher of physical education in an approved school setting.

HSES 795. Traditions and Principles in Health Education. 3 Credits.
This course is designed to explore the philosophy and principles which provide the foundation of health education as an academic discipline. Specific topics include: history of the profession, theories of health behavior and behavior change, principles of learning applied to health communications, health promotion practices, professional preparation, and the integration of philosophical and ethical ideals into program planning and implementation.

HSES 798. Special Course: ______. 1-5 Credits.
A special course of in-depth study exploring current trends and issues in health and physical education - primarily for undergraduates.

HSES 801. Sport Facilities. 3 Credits.
The purpose of this course is to study current developments and trends in the financing, programming, design, and construction of facilities for intercollegiate athletics and professional sports. Prerequisite: Admitted to
graduate school. A course in the administration/management of sport or consent of the instructor.

HSES 803. Health Behavior Theory. 3 Credits.
Given that theories of health behavior drive research and practice in health education, the purpose of this course is to familiarize students with the major theories and planning models related to health behavior change. Particular focus will be applied to the role of theory in health promotion and critical analysis of the application of theory to guide research practices. Prerequisite: Health major or consent of the instructor.

HSES 804. Sport Psychology. 3 Credits.
This course is designed to introduce students to the current research and theoretical perspectives in the sport psychology literature. Specifically, students will gain a broad understanding of the three major areas of sport psychology: social psychology (e.g., motivation), performance enhancement (e.g., mental skills training), and psycho-physiology (e.g., impact of anxiety on performance). Prerequisite: Admission in the health program or consent of the instructor.

HSES 805. Laboratory Experiments and Analysis--Exercise Physiology. 3 Credits.
Students will learn the techniques of operating various types of laboratory equipment and will conduct small-scale lab experiments in areas such as respiration, circulation, metabolism, strength, neuromuscular function, cardiac function, and body composition. Special emphasis will be placed on laboratory techniques of assessing physical fitness. Prerequisite: A course in exercise physiology.

HSES 806. Stress Management. 3 Credits.
The long-range objectives of this course are to assist students in gaining stress management knowledge; to help them to formulate improved perspectives on various stress management techniques; and consequently apply the developing constructs in their lives with a sense of purpose and self-responsibility. Prerequisite: Two courses in health education or consent of instructor.

HSES 807. Current Literature in Exercise Physiology. 2 Credits.
A wide range of topics from the exercise physiology literature will be discussed. Instructor and students will present reports to the group centered on current research findings with discussion aimed at application of these results to physical exercise and training. Prerequisite: A basic course in exercise physiology or consent of instructor.

HSES 808. Biomechanics of Human Movement. 3 Credits.
This course will examine the movements and the structure and function of human beings by means of the methods of mechanics. An emphasis will be placed on the two primary goals of biomechanics: performance improvement and injury prevention and rehabilitation. Topics to be covered include the kinematics and kinetics of human movement, muscle mechanics, bone and joint mechanics, and the biomechanics of musculoskeletal injury. Prerequisite: Courses in calculus, physics, anatomy, and biomechanics, or consent of instructor.

HSES 810. Advanced Exercise Physiology. 3 Credits.
An advanced study of the physiological and biomechanical aspects of muscular, cardiovascular, and respiratory function as the human is engaging in exercise. The topics of energy metabolism, hormones, and nutrition as related to exercise also are presented. Prerequisite: A basic course in exercise physiology.

HSES 812. Current Issues in Health. 3 Credits.
This course is designed to review and discuss current issues in various health-related areas. The focus will be on relevant issues and topics that are guiding and directing the health profession. The range of topics discussed will vary from popular literature to scientific research and cover such areas as health education, community health, and health over the lifespan. Students in the course will be expected to report, discuss, and interact with each other concerning the issues as they are reported. Prerequisite: A graduate course in health or consent of the instructor.

HSES 814. Implementing Health Programs. 3 Credits.
The purpose of this course is to explore planning models used for designing, implementing and managing health promotion programs. Students will be trained to develop objectives, assess determinants, select methods and strategies, pre-test program materials, and adopt and implement promotional plans. Problem based and community-based learning experiences will be provided. Prerequisite: A health major or permission from the instructor.

HSES 817. Practical Aspects of Aerobic and Resistance Training. 3 Credits.
This course will be a discussion of various concepts related to aerobic and resistance training. By the end of the semester, the student should be able to demonstrate an understanding of information presented in this course by achieving satisfactory evaluations of presentations, papers, and an examination of the following topics: energy metabolism, general adaptations of aerobic and resistance training, exercise techniques for aerobic and resistance training, periodization of training, testing and evaluation of aerobic and resistance training performance, and exercise prescription for aerobic and resistance training. Prerequisite: Undergraduate course in exercise physiology or consent of instructor.

HSES 818. Legal Aspects of Public Health Education. 3 Credits.
This course is designed to enhance understanding of the variety of legal issues which affect health educators and their audiences. Specifically, this course will survey federal, state, and local public health laws and regulations which may proscribe health education content and the health educator’s actions. Legislation will be analyzed and the practical impact of the health educator upon the legislative process will be emphasized. Prerequisite: A course in community health or consent of instructor.

HSES 823. Behavior Modification in Health and Exercise. 3 Credits.
This course will examine the behavioral principles that influence health and exercise practices. Theories of human behavior, reinforcement theory, and models of self-esteem will serve as the foundation for studying behavior change. Society influences will be strongly emphasized. Course topics will include exercise determinants, motivation, social support, and effective promotion strategies. Prerequisite: Admitted to Graduate School or consent of instructor.

HSES 824. Epidemiology and Concepts of Disease Causation. 3 Credits.
This course involves the study of the etiology and natural history of infectious and non-infectious diseases including vector control, host defenses and resistance, investigation of disease outbreaks, mental health and public health. The course deals with detailed analytic and descriptive epidemiology and their implications for improving our understanding of health and diseases; epidemiologic consequences of nuclear war and retrospective and prospective approaches in epidemiological research. Contemporary developmental methods for disease prevention will be critically reviewed. Prerequisite: HSES 573, or equivalent, or consent of instructor.

HSES 825. Skeletal Muscle Physiology. 3 Credits.
This course will provide the student with an in-depth study of the structure and development, contractile mechanics, and neuromuscular system as it relates to the skeletal musculature. Structure and Development - muscle fiber, motor neuron, neuromuscular junction, muscle receptors, muscle formation, development of muscle innervation. Putting Muscles to Work - ion channels, pumps, and binding proteins, axoplasmic transport,
resting and action potentials, neuromuscular transmission, muscle contraction, motor units, exercise, muscle metabolism. The Adaptable Neuromuscular System - fatigue, loss of muscle innervation, recovery of muscle innervation, neurotrophism, disuse, muscle training, injury and repair, aging. Prerequisite: HSES 810 or equivalent.

HSES 828. Sport Finance. 3 Credits.
A study of the principles and applications of finance and economics in the sport industry. Strategic financial planning as a part of management responsibilities is highlighted. Prerequisite: Admitted to Graduate School.

HSES 830. Socio-Cultural Dimensions of Sport. 3 Credits.
Current literature concerning the impact of American social values and cultural patterns of sport and physical activity will be studied. Critiques of related research involving sport and social institutions, and socio-cultural groups in sport will be emphasized. Prerequisite: A course in Sociology of Sport or consent of instructor.

HSES 831. Ethics in the Sport Industry. 3 Credits.
This course is designed to help students learn to make morally reasoned decisions in various sport settings. This course will help prepare students to respond more responsibly when faced with challenging ethical dilemmas and guide them in learning to serve as role models for ethical conduct.

HSES 832. Physical Education Instructional and Assessment Methods. 3 Credits.
The study of research-based instructional and assessment methods appropriate for PK-12 physical education. Managerial, instructional, and supervisory skills will be developed. Traditional and alternative assessment tools will be discussed. Readings, observations (live and video), and practice teaching will prepare students to complete a practical experience and an action research project in a PK-12 school. Prerequisite: Admission to Graduate School.

HSES 833. Public Health Aspects of Exercise. 3 Credits.
This course describes the timeline for physiologic adaptations to long-term physical activity. It describes the effects of physical activity on chronic disease. It describes, from a population perspective, the effects of physical activity on the health of the nation. Prerequisite: 12 hours of HSES courses, or equivalent, or consent of instructor.

HSES 836. Physical Education Curriculum Models. 3 Credits.
An examination of the elements and processes of curriculum construction in physical education for elementary, secondary, and post-secondary institution, and the institutional and professional issues that affect these processes. A study of contemporary curricula structures in regard to planning, implementation, and evaluation of K-12 curricula and professional preparation curricula in physical education programs. Prerequisite: A course in physical education curriculum, or equivalent.

HSES 840. Organizational Behavior in Sport. 3 Credits.
This course utilizes a micro perspective to analyze the behavior and culture within sport organizations. Specifically, the student will study and learn how to apply management and leadership theories that have the potential to shape the work environment and will discuss how current topics in organizational behavior are particularly relevant to the sport industry. Prerequisite: Admitted to Graduate School. Consent of the instructor.

HSES 842. Sports Marketing. 3 Credits.
This course helps students gain a deeper understanding of sport marketing by examining in-depth the sport marketing mix of product, price, place, and promotion as well as marketing research, marketing strategy, market segmentation, branding, sponsorships, licensing, venue and event marketing, public relations, and global sport marketing.

HSES 850. Analysis Techniques for Health, Sport, and Exercise Sciences Laboratory and Field Data. 3 Credits.
Techniques for analyzing data gathered in Health, Sport, and Exercise Sciences laboratories and field studies will be presented in this course. Techniques for the recording of raw data, appropriate organization of raw data, selection of test for analysis of data, use of computer software, and computer programming for analysis and reporting results of the data will also be included. Prerequisite: PRE 710, PRE 720, or PRE 725.

HSES 866. Contemporary Trends in Elementary and Secondary Physical Education. 3 Credits.
An in-depth study into the research and other forms of literature will be made to study and examine the latest trends in elementary and secondary school physical education. Games, activities, dances, and rhythms will be presented and discussed relative to developmental levels of students grades K-12. Prerequisite: A methods course in teaching physical education or consent of instructor.

HSES 872. Exercise and the Cardiovascular System. 3 Credits.
This course will be a discussion of various concepts specifically related to exercise and the cardiovascular system. By the end of the semester, the student should be able to demonstrate an understanding of the interaction of exercise and cardiovascular system by achieving satisfactory evaluations on examinations, abstracts, and classroom presentations. The following topics will be discussed as they relate specifically to exercise: homeostasis and cardiovascular transport mechanisms, basic structure and function; characteristics of cardiac cells; the heart as a pump; the peripheral vascular system; vascular control; venous return and cardiac output; regulation of arterial pressure; cardiovascular responses to stress; and cardiovascular function in pathological situations. Prerequisite: Undergraduate course in exercise physiology or consent of instructor.

HSES 880. Internship in Sport Management. 1-10 Credits.
This course will provide for supervised and directed experiences in selected sport management settings. The graduate advisor will schedule observations of the internship, as well as regular conferences with the student. Written summaries and evaluations of the internship will be prepared by the student, the agency supervisor, and the university graduate faculty member. Prerequisite: Admission to the Graduate Program in Sport Management.

HSES 884. Legal Aspects of Sport. 3 Credits.
This course is intended to introduce graduate students to the basic concepts of the American legal system and the application of those to intercollegiate and professional sports. Particular emphasis will be given to risk management and preventive law. Other topics include: governance issues in intercollegiate and professional sports, contract law, employment discrimination, labor relations and collective bargaining, agency law and athlete agents, regulation of participation in intercollegiate and high school athletics, sport facility and event issues, participant liability issues, product liability issues, premises and spectator liability, participant violence in sports, and intellectual property law. Prerequisite: Admission to graduate program in School of Education.

HSES 885. Sport Sponsorship. 3 Credits.
The course provides a detailed examination of the relationship between sport and corporate sponsorship and strategies for selling sponsorship packages. Topics covered will include the theoretical rationale for sponsorship, creating and executing sponsorship agreements, determining the value of a sponsorship, evaluation of sponsorship activities, and techniques used to sell sponsorship packages.

HSES 886. Sport Fundraising. 3 Credits.
This course will serve three primary purposes. First is to provide the student with the ability to identify and explain important principles, models, guidelines, and challenges that come with managing sport fundraising.
projects. Next, this course will develop the skills necessary to be a successful sports fundraiser through comprehending the various methods woven throughout the book. Finally, this course will develop the ability to apply practical knowledge in an ethical and professional manner.

**HSES 890. Seminar in HSES. 3 Credits.**
This course is designed to provide a general research seminar learning experience for graduate students in HSES. In particular, students will learn about faculty research activities and interests from a variety of specialty areas both within KU and outside of KU. Through faculty and guest presentations, students will be exposed to a variety of design and methodologies used to conduct research in the specialty areas of HSES.

**HSES 892. Psychology of Physical Activity. 3 Credits.**
This course is designed for students interested in optimizing motivation and adherence to exercise among individuals in a wide range of physical activity settings (e.g., health clubs, corporate fitness, physical therapy). The course content includes a review of the literature highlighting the psychological benefits of exercise, the theoretical advances in understanding the psychological aspects of individuals’ participation in physical activity, and strategies and techniques for professionals attempting to foster motivation and adherence to exercise among their clients/members. Prerequisite: Admission to the health program or consent of the instructor.

**HSES 897. Independent Study. 1-4 Credits.**
Prerequisite: Consent of advisor and instructor.

**HSES 898. Master’s Project. 1-4 Credits.**
Graded on a satisfactory progress/limited progress/no progress basis.

**HSES 899. Master’s Thesis. 1-6 Credits.**
Graded on a satisfactory progress/limited progress/no progress basis.

**HSES 905. Advanced Concepts in Health Education. 3 Credits.**
This course is designed as an in-depth study of the pedagogy of health education. It is concerned with the effects of various health education models, new materials, and innovative teaching techniques. The effectiveness of various media such as films, slides, transparencies, microcomputers, and assessment tools will be analyzed. Research concerning innovations in education will be investigated along with a study of future trends in the field. Timely issues of controversy about health education practices and the effectiveness of values clarification activities will also be discussed.

**HSES 910. Biochemistry of Exercise. 3 Credits.**
This course will include an in-depth examination of metabolic and endocrine principles as they relate to physical exercise and training. Specific topics will include: substrate utilization in exercise, metabolic controls, muscle biochemistry, body composition, nutritional aspects and hormonal influences in exercise. Both instructor and students will report on the most current literature relating to the topics. Prerequisite: Human biodynamics or a course in biochemistry.

**HSES 926. Grant and Research Proposal Writing. 3 Credits.**
This is a course for students to examine the sources and areas which provide financial support for research projects. The areas of study include types of research funding available on a local, state, and federal level, the elements and design of writing a proposal and strategies involved in securing financial support for research. A focus for the course will center upon preparing a research proposal for funding. Prerequisite: PRE 710.

**HSES 940. Scientific Dimensions of Exercise and Health. 3 Credits.**
This course has been designed to bring together the many scientific factors relating exercise and physical activity to health and human function. The course focuses on the interdisciplinary nature of this relationship and reviews the physiological, sociological, psychological, and behavioral factors involved. Prerequisite: Fifteen hours of graduate level course work in health or physical education and admission to health or physical education doctoral program.

**HSES 980. Advanced Topics: _____ 1-3 Credits.**
A special course of study to meet current needs of education professionals -- primarily for post-master's level students.

**HSES 981. Current Issues in Health and Physical Education. 3 Credits.**
This course will explore the latest philosophical issues and controversies which are impacting the fields of health, physical education, and athletics. The student will explore the current and future ramifications of each issue and its potential effects on the profession. Prerequisite: Admission to the Health, Sport, and Exercise Sciences Doctoral Program.

**HSES 990. Doctoral Seminar. 3 Credits.**
This seminar based course will be designed to prepare the doctoral student for academic careers or careers in industry after they graduate. The topics covered will be promotion and tenure procedures and expectations, including but not limited to teaching, responsible conduct of research, professional ethics, historical ethical issues, evaluation of ethical dilemmas, and service expectations at research intensive institutions, regional comprehensive institutions and small liberal arts colleges. Industry career options will be discussed and guest speakers from various disciplines will be brought in to discuss options and expectations with this career path. Prerequisite: Doctoral student or permission of the instructor.

**HSES 995. Field Experience in: _____ 1-5 Credits.**
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

**HSES 996. College Teaching Experience in: _____ 3 Credits.**
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate’s committee.

**HSES 997. Individual Study. 1-4 Credits.**
Prerequisite: Prior graduate course work in the area of study and consent of instructor.

**HSES 999. Doctoral Dissertation. 1-15 Credits.**
Graded on a satisfactory progress/limited progress/no progress basis.

**Special Education Courses**

**SPED 261. Families and Professional Partnerships. 3 Credits.**
This course provides information on issues and practices related to working together in partnership with families of young children including those who have a young child with special needs. Emphasis will be placed on taking a family systems prospective and a family-centered approach to family support. Strategies for effective communication for the purpose of information sharing and collaborative planning with families are provided. Relevant current scientifically based evidence will be reviewed and discussed pertaining to these topics.
SPED 326. Teaching Exceptional Children and Youth in General Education. 3 Credits.
This course is designed for general education teacher trainees. It will provide them information about students with disabilities that they will have in their classrooms and the law governing special education and its implications for them as general educators. The course will address Individualized Educational Plans that are developed for students with disabilities and how general educators contribute to these plans. Students will learn about planning instruction that is differentiated to meet various learner needs, universal design principles and instructional tools, providing meaningful access to general education classrooms and curriculum for students with disabilities and designing and delivering appropriate accommodations and modifications to assist student learning. Prerequisite: Admission to the Teacher Education Program.

SPED 327. Instructional Practices for Students with Disabilities. 3 Credits.
This course focuses on effective, efficient strategies for delivering inclusive educational opportunities for students with significant support needs. Educator candidates will learn to structure, manage, teach and support social and emotional well-being for students with significant support needs. In this course, students will learn about systematic assessment and instructional procedures designed to meet students' academic, behavioral, and social-emotional needs. Prerequisite: SPED 326.

SPED 328. Using Technology to Plan and Design Instruction for All Students. 3 Credits.
This course addresses the use of technology to explore complex real world problems that impact an inclusive society. The course introduces and provides indepth information of education frameworks including Universal Design for Learning (UDL), Multi-tiered Systems of Support (MTSS), and Positive Behavior Interventions and Supports (PBIS). Students will engage in applying UDL and other support frameworks in content-based learning environments. These experiences will integrate "problem-based learning" (PBL) to understand disciplinary knowledge, solve problems, and develop skills in instruction with technology solutions being an integral component.

SPED 362. Introduction to Early Education and Early Childhood Special Education. 3 Credits.
This course is designed to provide an overview of the field of early education including early childhood education and early childhood special education. The historical, philosophical, research- base, policy and legal foundations for the field are discussed to provide the students with the knowledge to become an advocate for early learning opportunities (birth through grade 3) for all children and their families.

SPED 401. Professional Learning Seminar I. 1 Credits.
The purpose of the professional learning seminars is to collaboratively engage KU students. KU faculty, and school professionals in a continuous seminar that focuses on important issues that our KU students face in the schools. We will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the ethical conduct of professional teachers who make decisions each day that affect the lives of children and their families.

SPED 402. Professional Learning Seminar II. 1 Credits.
The purpose of the professional learning seminars is to collaboratively engage KU students. KU faculty, and school professionals in a continuous seminar that focuses on important issues that our KU students face in the schools. We will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the ethical conduct of professional teachers who make decisions each day that affect the lives of children and their families.

SPED 403. Professional Learning Seminar III. 1 Credits.
The purpose of the professional learning seminars is to collaboratively engage KU students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that our KU students face in the schools. We will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the ethical conduct of professional teachers who make decisions each day that affect the lives of children and their families.

SPED 439. Student Teaching: Unified Early Childhood. 6-9 Credits.
A supervised student teaching experience leading to initial teaching licensure in Kansas Unified Early Childhood (birth through grade 3). The student assumes the professional role as a teacher in an approved inclusive early childhood infant/toddler or preschool. Prerequisite: Admission to the Unified Early Childhood program. Approved application of intent to student teach.

SPED 440. Evid Based Prac in English/Lang Arts Literacy for Students Struggling or w/ IEPs: Beg Read & Writing. 2 Credits.
This course focuses on the development of foundational skills for planning, implementing, and assessing reading and literacy development for students with disabilities served in general education settings. Learning will focus on skills and dispositions to effectively plan with educational practitioners (general education, related services, paraprofessionals), to design curricular and instructional strategies to support and deliver high quality reading and literacy instruction to students with disabilities. The course will focus on how, as a teacher, one participates in tiered support systems and facilitates/ provides appropriately focused and intensive literacy instruction. Prerequisite: SPED 326, SPED 327, SPED 328.

SPED 441. Evidence Based Practices in Reading and Literacy for Students w/IEPs:Vocabulary&Comprehension Devel. 2 Credits.
This course focuses on the development of foundational skills for planning, implementing, and assessing reading and literacy development for students with disabilities served in general education settings with a focus on the "reading to learn" skills of vocabulary development, and comprehension in various content domains and texts. Learning will focus on skills and dispositions to effectively plan with educational practitioners (general education, related services, paraprofessionals), to design curricular and instructional strategies to support and deliver high quality reading and literacy instruction to students with disabilities. Prerequisite: SPED 326, SPED 327, SPED 328, SPED 440.

SPED 442. Evidence Based Practices in Mathematics, Science, and Social Studies for Students with IEPs. 2 Credits.
This course focuses on the development of foundational skills for planning, implementing, and assessing math, science, and social studies knowledge and skills for students with IEPs. The course will emphasize many of the "behind-the-scenes" strategies and activities that must be completed regularly and frequently with teaching colleagues to make progress in these three content areas possible for all elementary students. Prerequisite: SPED 326, SPED 327, SPED 328.

SPED 443. Evidence-based Strategies and Practices for Creating Positive, Productive Classrooms. 3 Credits.
This course focuses on effective, efficient strategies for setting up and monitoring classroom management practices for ALL students. In this course, students will learn about tiered systems of supports designed to meet students' academic, behavioral, and social-emotional needs. They will learn about the importance of designing positive behavioral interventions and supports based on the values and cultures of the community, with strong involvement from diverse families and community members. Prerequisite: SPED 326, SPED 327, SPED 328.
SPED 444. Classroom Assessment and Beyond. Practices for Students with IEPs. 3 Credits.
This course focuses on the development of foundational skills for classroom assessment. It includes planning for student learning, assessing student progress, communicating with students and families to track learning over time, and planning with colleagues to address learning needs and challenges that may emerge from progress monitoring.

SPED 446. Professional Learning Seminar UEC. 1 Credits.
The primary purpose of the professional learning seminars is to collaboratively engage KU students, KU faculty, and early childhood professionals in a continuous seminar that focuses on important issues that our KU students face in the ECE (birth - grade 3) programs. We will critically examine instructional practices that support all young learners belonging and success, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the philosophical and psychological. The professional learning seminars are designed around key features of effective professional learning communities and sustained professional development for early childhood educators. Features include supportive, collaborative learning, shared personal and professional practice, and collective inquiry of teaching and learning. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Teacher Education Program is required.

SPED 450. Disability in an American Context. 3 Credits.
This course is designed to introduce undergraduate students of any major to important theoretical and practical concepts regarding special education, disability, and diversity. Successful completion of this course fulfills one requirement for the School of Education minor in Education.

SPED 494. Internship-Specialized Instr in Gen Ed Elem Classrooms&Support Settings for Students w/Disabilities. 6 Credits.
A supervised field experience leading to initial teaching licensure in Elementary Education Unified (K-6). The teacher candidate assumes the total professional role as a teacher serving students with high incidence disabilities and low incidence disabilities in inclusive elementary classrooms and in support settings. Prerequisite: Admission to EEU program, completion of EEU program courses with B or better/enrollment in final semester of program, approved application of intent to complete internship.

SPED 495. Developing the ECU Teaching Portfolio. 1 Credits.
This course meets in conjunction with student teaching and includes assigned readings, participation, and writing. The seminar provides opportunities for candidates to discuss their transition from their role as an aspiring early educator to a career in early childhood education within birth to grade 3 community and public-school settings serving young children and their families. Candidates will engage instructional planning, implementation, and outcome assessment including reflection on their own successes and challenges as they move to becoming a qualified reflective early childhood educator. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Teacher Education Program is required.

SPED 497. Independent Study. 1-2 Credits.
Only one enrollment permitted each semester, a maximum of four hours will apply toward a bachelor's degree. Prerequisite: Recommendation of advisor and consent of instructor.

SPED 501. American Sign Language I (ASL I). 3 Credits. F1
This course will cover the development of American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes language around communicative purposes of everyday interaction.

SPED 502. American Sign Language II (ASL II). 3 Credits. F2
This is the second level course in American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes language around communicative purposes of everyday interaction. Prerequisite: SPED 501.

SPED 503. American Sign Language III (ASL III). 3 Credits. F3
This is the third level course in American Sign Language. The primary objective of the American Sign Language III “Signing Naturally” Level 2 curriculum is for students to continue using the two basic language skills: visual listening and signing. Prerequisite: SPED 502.

SPED 504. American Sign Language IV (ASL IV). 3 Credits. F4
This is the fourth level course in American Sign Language. The primary objective of the American Sign Language IV “Signing Naturally” Level 3 curriculum is for students to continue using the two basic language skills -- visual listening and signing. Prerequisite: SPED 503.

SPED 506. Advanced Practices for Children with Disabilities in the Elementary General Education Classroom. 3 Credits.
This course is designed to enable novice teachers to master and apply the instructional and communicative skills that will facilitate appropriate and productive inclusion of children and youth with exceptionalities within general education classrooms and other school settings. Specific research-based strategies in curriculum content acquisition (content enhancements, learning strategies, classwide-peer tutoring), and specific research-based strategies in behavior management will be learned and applied to real teaching experiences. Novice teachers will learn about collaborative structures found in schools to support student learning in general education settings (co-teaching, collaborative consultation, teacher/student support teams) and roles and responsibilities of teachers within these structures. Prerequisite: Admission to the Teacher Education Program.

SPED 507. Advanced Practices for Children with Disabilities Middle/Secondary General Education Classroom. 3 Credits.
This course is designed to enable novice teachers to master and apply the instructional and communicative skills that will facilitate appropriate and productive inclusion of middle and secondary age students with disabilities within general education classrooms and other school settings. Specific research-based strategies in curriculum content acquisition (content enhancements, learning strategies, classwide-peer tutoring), and specific research-based strategies in behavior management will be learned and applied to real teaching experiences. Novice teachers will learn about collaborative structures found in schools to support student learning in general education settings (co-teaching, collaborative consultation, teacher/student support teams) and roles and responsibilities of teachers within these structures. Prerequisite: Admission to the Teacher Education Program.

SPED 635. Introduction to Teaching Learners with Low-Incidence Disabilities in Inclusive Settings. 3 Credits.
This course examines current principles and inclusive practices for learners with significant disabilities. The course will focus on the extant research base concerning inclusive practices, characteristics of learners with low-incidence disabilities, and instructional strategies. Prerequisite: SPED 326 or equivalent.

SPED 641. Methods & Assessment/Literacy Interventions Struggling Learners&Students High-Incidence Disabilities. 3 Credits.
This course will provide in depth learning experiences targeting literacy; both reading and writing. Students will learn about assessment tools and assessment systems used in tiered support frameworks to determine the required intensity of literacy support and instruction needed by children/adolescents with adaptive special education needs, and will learn about
Evidence-based instructional approaches and curriculum developed for students with disabilities and struggling students in general. The course is intended for persons working toward the Kansas teaching license in teaching students needing an adapted curriculum. Prerequisite: SPED 730, admittance into the Adaptive program in the Department of Special Education, or permission of the instructor.

SPED 642. Assessment and Methods of Teaching Students with Low-Incidence Disabilities in Inclusive Settings. 3 Credits. This course prepares teacher candidates to assess students with disabilities using formal and informal measures, to use assessment information to develop a strengths-based inclusive Individual Education Program (IEP), to design instruction related to IEP goals and state standards, and to evaluate the effectiveness of that instruction using progress-monitoring techniques. Prerequisite: SPED 326.

SPED 650. Constructing Early Childhood Curriculum. 3 Credits. Students in this course will learn to design, implement and evaluate developmentally appropriate curricula and programs for children from birth through kindergarten. Issues of curriculum design and assessment are introduced as interrelated processes that include structuring learning environments and experiences that are responsive to children's interests and abilities. Students analyze and evaluate curriculum that focuses on the five developmental domains: a) social emotional development; b) cognitive development; c) language and communication development; d) adaptive behavior development; and e) gross and fine motor development and in addition the content domains of literacy, science, math, and fine art. Strategies for developing learning opportunities that are appropriate for young children, including children with special needs and children from diverse cultural, ethnic and linguistic backgrounds, will be explored. Prerequisite: Admission to School of Education UEC program.

SPED 661. Supporting Children with Significant Learning and Behavioral Challenges. 3 Credits. Students in this course will gain knowledge of the causes, and intervention and support approaches for young children with multiple and significant disabilities including neurological impairments, physical disabilities, sensory impairments, significant developmental disabilities, and challenging behavior. Emphasis is placed on environmental adaptations and direct instructional techniques to maximize independence as determined through systematic ecological inventories tailored to the individual child's strengths and needs. Information is also provided on assistive technology designed to provide appropriate supports. Functional behavioral assessment procedures, proactive intervention strategies, and developing collaborative support plans will be studied. Prerequisite: Admission to the Teacher Education Program.

SPED 663. Assessment Strategies in Early Education. 3 Credits. Examines the practice of gathering information for the purpose of making individual referral and instructional decisions for infants, toddlers, and young children with and without special needs. Discusses effective informal assessment techniques and emphasizes an ecological approach to gathering information. Introduces standardized assessment and screening instruments and provides an overview of the purposes and limitations of such tests. Prerequisite: Admission to the Teacher Education Program.

SPED 664. Inclusive Strategies and Intervention for Infants and Toddlers. 3 Credits. Emphasizes curriculum development and early intervention provision for infants and toddlers through the planning of appropriate learning experiences, the design of learning environments, developing Individual Family Service Plans (IFSP), promoting collaboration among families and the use of various methods of enhancing the child's development across the five (social-emotional, adaptive, cognitive, physical/movement, communication) development domains. The role of the educator/early interventionist in relation to the family and the child is examined. Curriculum resources and intervention strategies for infants and toddlers with special needs are reviewed with emphasis on interdisciplinary planning and implementation. Prerequisite: Admission to the Teacher Education Program.

SPED 665. Inclusive Strategies and Intervention for Preschoolers. 3 Credits. Provides the opportunity for students to develop and evaluate inclusive environments for young children. This course emphasizes meeting the needs of all young children through an integrated approach to planning, implementing and assessing instruction in all areas; linking assessment information to individualized instruction; developing Individual Educational Plans (IEPs) and promoting collaboration among families, schools and communities. Service delivery systems and transitions between early childhood programs are reviewed in relation to curriculum. Curriculum development for early childhood content areas (literacy and language, numeracy, science, social studies, physical education and the arts) and domains (language, social/emotional, physical, and cognitive) will be explored. Prerequisite: Admission to the Teacher Education Program.

SPED 666. Field Experience in Preschool. 1 Credits. This supervised field experience is intended to allow the pre-service teacher to apply the knowledge gained in SPED 665 Inclusive Strategies and Intervention for Preschoolers, by working with infants and toddlers in early intervention settings/programs. To be taken concurrently SPED 665. Prerequisite: Admission to the Teacher Education Program.

SPED 667. Field Experiences with Exceptional Children and Youth: ______. 1-3 Credits. A course designed to provide experiences for students to participate with exceptional children in public schools and/or residential facilities and with professional personnel associated with the lives of exceptional students including special education teachers, child care workers, therapists, etc. Students will have opportunities to participate as aides, tutors, and instructors with individual and small groups of exceptional youth in one or more placements. Through weekly meetings with the instructor students are guided to relate their experiences to the needs and services for exceptional children and youth. Prerequisite: SPED 635.

SPED 675. Practicum with Children and Youth with Disabilities: ______. 1-10 Credits. Intensive diverse and direct teaching experiences with children and youth with disabilities in educational settings. The course is differentiated from SPED 775 through the amount of scaffolding undergraduate students will receive when demonstrating skill application (e.g., undergraduates report and receive feedback on practicum experiences on a more frequent basis, reduced data collection requirements, more emphasis on cooperating teacher providing guidance, etc.). This practicum is a requirement for provisional endorsement according to KSDE. Students who have completed SPED 675 cannot enroll in SPED 775 within the same curricular area. Prerequisite: SPED 326.

SPED 701. American Sign Language I (ASL I). 3 Credits. This course will cover the development of American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes language around communicative purposes of everyday interaction.

SPED 702. American Sign Language II (ASL II). 3 Credits. This is the second level course American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes
language around communicative purposes of everyday interaction.
Prerequisite: SPED 701.

**SPED 703. American Sign Language III (ASL III). 3 Credits.**
This is the third level course in American Sign Language. The primary objective of the American Sign Language III "Signing Naturally" Level 2 curriculum is for students to continue using the two basic language skills: visual listening and signing. Prerequisite: SPED 702.

**SPED 704. American Sign Language IV (ASL IV). 3 Credits.**
This is the fourth level course in American Sign Language. The primary objective of the American Sign Language IV "Signing Naturally" Level 3 curriculum is for students to continue using the two basic language skills -- visual listening and signing. Prerequisite: SPED 703.

**SPED 723. Positive Behavior Interventions and Supports for Students with Low-Incidence Disabilities. 3 Credits.**
This course is designed to teach students how to apply behavioral principles in educational settings to support students with low incidence disabilities and complex communication needs in inclusive environments. Specifically, the course emphasizes (a) definition of behavior from a behavioral perspective, (b) measurement strategies including observation, time sampling, and frequency counts, (c) preventative and responsive strategies to address challenging behaviors, including reinforcement, (d) function-based assessment and intervention planning, (e) incorporating behavioral strategies into ongoing instruction, and (f) collaborating with families and other professionals to support prosocial behaviors and address challenging behaviors.

**SPED 725. Introduction to the Psychology and Education of Children and Youth with Disabilities. 3 Credits.**
This course provides an overview of current practices in the identification, placement, and education of students with disabilities. This course emphasizes on patterns of social, cognitive, language, and physical development. Social, political, and economic advocacy issues are also addressed. Prerequisite: One course in Child Development.

**SPED 730. Characteristics, Methods & Assessment: Intro Struggling Learners & Studnts High-Incidence Disabilities. 3 Credits.**
The course is designed as an introduction to the characteristics, assessment and identification process, and initial instructional and behavioral interventions needed to meeting the needs of students with high-incidence disabilities under the Kansas Adaptive Teacher Education Standards. The needs for specialized services to meet specific learning and/or behavioral needs will be presented. Frameworks for instruction and conceptualizing best practice will be introduced including the principles of Universal Design for Learning and the Multi-Tier System of Support. The role of the educator in identifying, understanding and implementing evidence-based practices is also examined. Curriculum resources and intervention strategies for students with high-incidence disabilities will be introduced with emphasis on tiered planning and implementation. The course is intended for persons working toward the Kansas teaching endorsement in the Special Education Adaptive Area. Prerequisite: Admission into the Adaptive endorsement teacher education program in the Department of Special Education or permission of the instructor.

**SPED 731. Supporting Children with Significant Learning and Behavioral Concerns. 3 Credits.**
Students in this course will gain knowledge of the causes, and intervention and support approaches for young children birth through 5 years with significant support needs. These include young learners with multiple and significant disabilities including neurological impairments, physical disabilities, sensory impairments including dual sensory impairments, complex health care needs, significant developmental disabilities and challenging behavior. Emphasis is placed on environmental adaptations and direct instructional techniques to maximize independence as determined through systematic ecological inventories tailored to the individual child's strengths and needs. Information is also provided on assistive technology designed to provide appropriate supports. Functional behavioral assessment procedures, proactive intervention strategies, and developing collaborative support plans will be studied. Prerequisite: Admission into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. SPED 752 or its equivalent, SPED 734 or its equivalent, and SPED 755 or its equivalent.

**SPED 734. Inclusive Strategies and Intervention for Infants and Toddlers. 3 Credits.**
Emphasizes curriculum development and early intervention provision for infants and toddlers through the planning of appropriate learning experiences, the design of learning environments, developing Individual Family Service Plans (IFSP), promoting collaboration among families and the use of various methods of enhancing the child's development across the five (social-emotional, adaptive, cognitive, physical, communication) developmental domains. The role of the educator/early interventionist in relation to the family and the child is examined. Curriculum resources and intervention strategies for infants and toddlers with special needs are reviewed with emphasis on interdisciplinary planning and implementation. Prerequisite: Admission into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor.

**SPED 735. Introduction to Teaching Learners with Low-Incidence Disabilities in Inclusive Settings. 3 Credits.**
This course examines current principles and inclusive practices for learners with significant disabilities. The course will focus on the extant research base concerning inclusive practices, characteristics of learners with low-incidence disabilities, and instructional strategies. Prerequisite: SPED 326 or equivalent.

**SPED 736. Foundations of Early Intervention. 3 Credits.**
This course explores evidence-based principles and practices of providing early intervention services, including requirements of IDEA Part C, mission and key principles of early intervention and recommended practices and standards. Students will engage in guided field observations of assessment, intervention and collaborative practices, reflective practice and teaming/coaching activities. (Same as SPLH 736.)

**SPED 737. Infants and Toddler with Significant Needs. 3 Credits.**
This course explores the challenges infants and toddlers with significant developmental needs face and how to best support their participation in daily activities. Challenges faced by medical, physical, communication, social-emotional, hearing, vision, and mental health issues will be discussed along with how to support these needs across disciplines and in the home and community activities. This course will provide in-depth review of the unique challenges these children and families face and how providers from various backgrounds can work together to best support children and families. Environmental adaptations and direct instructional techniques to maximize independence tailored to the infant and toddler's strengths and needs will be explored. Information is also provided on assistive technology designed to provide supports. Functional behavioral assessment procedures, proactive intervention strategies and psycho-educational approaches as well as the development of collaborative support plans will be studied. (Same as SPLH 737.)

**SPED 739. Special Education Early Childhood Unified Practicum. 1-3 Credits.**
A supervised field experience leading to initial teaching licensure in Kansas early childhood unified (birth through kindergarten). The student assumes the total professional role as a teacher in an approved inclusive
early childhood program to include infant/toddler and preschool or kindergarten. Prerequisite: Admission to ECU licensure program.

**SPED 741. Methods & Assessment: Literacy Interventions Struggling Learners & Students High-Incidence Disabilities. 3 Credits.**
This course will provide in depth learning experiences targeting literacy; both reading and writing. Students will learn about assessment tools and assessment systems used in tiered support frameworks to determine the required intensity of literacy support and instruction needed by children/adolescents with adaptive special education needs, and will learn about evidence-based instructional approaches and curriculum developed for students with disabilities and struggling students in general. The course is intended for persons working toward the Kansas teaching license in teaching students needing an adapted curriculum. Prerequisite: SPED 730, admittance into the Adaptive program in the Department of Special Education, or permission of the instructor.

**SPED 742. Assessment and Methods of Teaching Students with Low-Incidence Disabilities in Inclusive Settings. 3 Credits.**
This course prepares teacher candidates to assess students with disabilities using formal and informal measures, to use assessment information to develop a strengths-based inclusive Individual Education Program (IEP), to design instruction related to IEP goals and state standards, and to evaluate the effectiveness of that instruction using progress-monitoring techniques. Prerequisite: SPED 635 or 735.

**SPED 743. Methods: Functional Behavioral Assessment, Positive Behavior Support and Classroom Management. 3 Credits.**
This course provides a problem-solving approach and the framework for teaching and assessment strategies to develop pro-social behavior in students with disabilities and their typical peers in classrooms and whole school contexts. Students assess problem behavior, discover the functions of problem behavior, and learn pro-social alternatives in home, school, and community settings. Prerequisite: SPED 730 or permission of instructor.

**SPED 746. Assessment and Supports for Students with Complex Communication Needs. 3 Credits.**
This course prepares teacher candidates to assess students with complex communication needs, to use assessment findings to develop communication supports, to implement communication supports in natural settings, and to progress monitor communication development. Prerequisite: SPED 642 or SPED 742.

**SPED 750. Curriculum and Methods in Early Childhood. 3 Credits.**
This is a curriculum and methods course that addresses how to design, implement and evaluate developmentally appropriate curricula and programs for children from birth to six years of age. Issues of curriculum design and assessment are introduced as interrelated processes that include structuring learning environments and experiences that are responsive to children's interests and abilities. Strategies for developing learning opportunities that are appropriate for young children, including children with special needs and children from diverse cultural, ethnic and linguistic backgrounds, will be explored. Students analyze and evaluate curriculum that focuses on facilitating progress in the domains of a) social emotional development; b) cognitive development; c) language and communication development; d) adaptive behavior development and e) gross and fine motor development. Students also analyze and evaluate curriculum standards and frameworks for the young child's acquisition of concepts, skills and dispositions that support the development of early competencies and interest in literacy, mathematics, the sciences, social studies, the arts and individual and group sports. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. SPED 752 or its equivalent (may be taken concurrently).

**SPED 752. Overview of Early Childhood and Early Childhood Special Education. 3 Credits.**
The course serves as an introduction to the profession including historical, philosophical, social and psychological foundations, awareness of value, ethical and legal issues, staff relations and the importance of becoming an advocate for children and families. Students will analyze/interpret trends in early education, including diversity, early childhood special education, family centered practices, legislation, public policy, and developmentally appropriate practice. The two key professional organizations, National Association for the Education of Young Children (NAEYC) and Division of Early Childhood for the Council for Exceptional Children (DEC), recommended practices serve as the foundation for understanding the roles, knowledge and competencies of the early educator. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor.

**SPED 753. Assessment in Early Education. 3 Credits.**
This course examines the practice of gathering information for the purpose of making individual referral and instructional decisions for infants, toddlers, and young children with and without special needs. Discusses effective informal assessment techniques and emphasizes an ecological approach to gathering information. Introduces standardized assessment and screening instruments and provides an overview of the purposes and limitations of such tests. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor.

**SPED 755. Inclusive Strategies and Interventions for Preschoolers: 3 Credits.**
This is a methods course that covers instructional approaches and procedures that offer developmentally appropriate, effective and inclusive early intervention for preschool and kindergarten age children who experience developmental delays, disabling conditions or who are at-risk for developmental problems and disabilities. It is directed toward: (a) "how" to teach, or the technical components of developing and delivering effective instruction that provide access to the general early childhood curriculum within recognized approaches to early childhood education for young children, and (b) the "what" to teach, or the selection of developmentally and individually appropriate child objectives as well as specific materials and specialized instructional approaches. The relationship of instructional planning to state and federal mandates will also be considered. The course is primarily intended for persons who are currently working toward certification in the ECSE program area. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. SPED 752 (may be taken concurrently).

**SPED 756. Special Education Leadership. 3 Credits.**
This is an introductory course in special education law and policy implementation. It is designed to provide school and district administrators, and other special education stakeholders, with a basic understanding of key points in the history of special education law and policy. It focuses primarily on the Individuals with Disabilities Education Act (IDEA) and its core concepts, with particular attention to Least Restrictive Environment (LRE). This course is designed to provide a working knowledge of IDEA's procedural requirements, the preferred practices associated with implementing the procedures in schools, criticism of these practices and their implementation, and ideas for
addressing these criticisms in ways that promote more equitable and inclusive special education practices. Prerequisite: Degree in Special Education, School Psychology, or related fields.

**SPED 757. History, Context, and Critique of Special Education. 3 Credits.**
This course is designed to provide school and district administrators, and other special education stakeholders with a general understanding of the history of the treatment of individuals with disabilities and the development of special education law and policy over time. It foregrounds current issues in the post-IDEA organization of the field, highlighting the goals and challenges of democratic leadership and civic professionalism in relation to special education. The course concludes with a final paper and online presentation examining how history, disability, difference and justice inform special education leadership, both in theory and in practice. Prerequisite: Degree in Special Education, School Psychology, or related fields.

**SPED 758. Appropriate Education and Least Restrictive Environment. 3 Credits.**
This course is designed to give school and district administrators, and other special education stakeholders interested in special education leadership, a deep understanding of two core principles of the Individuals with Disabilities Education Act (IDEA). These are: (1) appropriate education; and (2) least restrictive environment. The course continues the same pattern established in the previous courses for this four-course program. It introduces these core IDEA concepts, features a week of criticisms of those concepts, and follows with a week on remedies to address key issues identified. The last two modules of the course focus on the Individualized Educational Plan and inclusive practices. The course concludes with a final project. Prerequisite: Degree in Special Education, School Psychology, or related fields.

**SPED 759. Non-Discriminatory Evaluation, Parent Participation, and Procedural Due Process. 3 Credits.**
This course is designed to give school and district administrators, and other special education stakeholders interested in special education leadership, a deep understanding of three of the core principles of the Individuals with Disabilities Education Act (IDEA). These are: (1) non-discriminatory evaluation; (2) parent participation; and (3) procedural due process. The course continues the same pattern established in the previous courses for this four-course program. It introduces these three core IDEA concepts, features a week of criticisms of those concepts, and follows with a week on remedies to address key issues identified. The last two modules of the course focus on the Individualized Educational Plan and inclusive practices. The course concludes with a final project. Prerequisite: Degree in Special Education, School Psychology, or related fields.

**SPED 760. Introduction to Autism Spectrum Disorders. 3 Credits.**
An introductory graduate-level course on autism spectrum disorder. Addresses characteristics of children and youth with autism spectrum disorder. Also surveys trends, issues, and evidence-based practices promoting academic, social, behavioral, and communicative development of learners with autism spectrum disorder.

**SPED 772. Participation with Children and Youth with Disabilities: _____. 1-3 Credits.**
A course designed to provide field experiences with children and youth with disabilities in settings where educational services are provided. Students work directly with professionals such as special education teachers, general education teachers, therapists and other support personnel. Students participate as aides, tutors, and instructors with individual and small groups of children and youth. Ongoing meetings with supervisors are designed to facilitate both reflection and strategic learning.

**SPED 775. Practicum with Children and Youth with Disabilities: _____. 1-10 Credits.**
Intensive diverse and direct teaching experiences with children and youth with disabilities in educational settings. This practicum is a requirement for provisional endorsement according to KSDE. Students who have completed SPED 775 cannot enroll in SPED 675 within the same curricular area. Prerequisite: Varies by topic.

**SPED 785. Application of Assessment Information for Exceptional Children and Youth: Autism Spectrum Disorder. 3 Credits.**
An analysis of information derived from assessment instruments and procedures appropriate to measuring the social and cognitive development of exceptional children and youth. Provides experiences in determining assessment data required in the development of individualized educational programs (IEP). Attention is also given to the design of informal assessment procedures, specific to the needs of exceptional children and youth. Experience is provided in the preparation and presentation of assessment data for use in instructional planning conferences. Prerequisite: SPED 760; SPED 860; SPED 785.

**SPED 789. Special Course: _____. 1-5 Credits.**
A special course designed to address topical issues. Graded on a satisfactory/unsatisfactory basis.

**SPED 800. Teaching Language and Communication Skills to Students with Autism and Developmental Disabilities. 3 Credits.**
Course covers aspects of communicative behavior of learners with autism and other developmental disabilities. Emphasis is on a verbal behavior approach and evidence-based practices for teaching communication skills including symbol exchange systems, augmentative and alternative communication strategies, and speech generating devices. Methods for evaluating intervention fidelity and effects on communicative behavior are covered along with strategies to support collaboration between speech and language pathologists and other individualized education team members. Prerequisite: Completion of SPED 760 and SPED 860 or instructor approval.

**SPED 803. Mathematics Development and Intervention for Students with Learning Disabilities (K-5). 3 Credits.**
Designed for teachers, specialists who manage intervention programs, and graduate students pursuing intervention research in mathematics, this course explores mathematics development, methods for designing and testing mathematics interventions, and procedures for developing mathematics programs for students. The focus of this course is on the mathematical development and intervention for students with learning disabilities at the elementary level (K-5), considerations for students learning English alongside learning mathematics, and tiered interventions in general and special education.

**SPED 841. Advncd Methds&Asmnt:Learng Stratg&Contnt Mastery Struggling Learners&Stdnts High-Incidence Disabilit. 3 Credits.**
This course is designed for graduate students enrolled in the Masters of Science Program with an emphasis in school-age populations primarily with high mild disabilities or seeking to obtain a license to teach students...
need an adapted curriculum in Kansas. Course experiences focus on how to identify and implement evidenced-based practices designed to increase the success of students with mild disabilities in mathematics, social studies, science, and language arts through their participation in general and special education classrooms primarily in grades 4-12. This course emphasizes practices associated with understanding and evaluating curricular demands, monitoring student progress in content-area courses, providing tiered supports and accommodations in teaching, using assessment and grading alternatives, and incorporating the principles of explicit and strategic instruction to design instruction that will promote and enhance content-area learning. The course is intended for persons working toward the Kansas teaching license in teaching students needing an adapted curriculum. Prerequisite: SPED 730, SPED 741, admittance into the High Incidence Disabilities program in the Department of Special Education, or permission of the instructor.

SPED 842. Methods in Access and Inclusion in the Core Curriculum. 3 Credits.
This course focuses on foundational skills for setting up an inclusive program that meets the needs of students with low-incidence disabilities in general education settings. The course will emphasize many of the "behind-the-scenes" strategies and activities that must be completed on a regular basis to make inclusive education effective and efficient. Prerequisite: SPED 635 or SPED 735 and SPED 642 or SPED 742.

SPED 843. Advanced Methods & Assessment: Strategies for Students with Significant Behavior, Social & Emotional Need. 3 Credits.
This course is designed to introduce educators and related service professionals to prevention and intervention related to a broad range of antisocial, aggressive, and behavioral problems. Approaches focus on understanding and addressing the precipitating factors related to inappropriate behavior, short-term approaches for immediate crises, and problem-solving strategies for longer-term change. Course content will include antisocial, aggressive, and violent behavior; options for classroom interventions; school and system-oriented interventions, and ethical and legal issues involved in various prevention and intervention approaches. Class work will focus on literature, research-based intervention approaches, and case work illustrating specific approaches and programs. Prerequisite: SPED 631 or SPED 731, SPED 741, and SPED 743.

SPED 844. Advanced Methods in Access and Inclusion in the Core Curriculum. 3 Credits.
This course develops critical skills for implementing an inclusive program that meets the needs of students with low-incidence disabilities in general education settings. The course will emphasize many of the day-to-day strategies and activities that must be completed on a regular basis to make inclusive education effective and efficient for all learners. Prerequisite: SPED 635 or SPED 735 and SPED 642 or SPED 742.

SPED 851. Law and Special Education. 3 Credits.
This course focuses on laws that apply to special education, especially "Individuals with Disabilities Education Act" and "No Child Left Behind Act." The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law, and judicial decisions interpreting those laws are reviewed. The course relates equal protection, procedural due process, and substantive due process doctrines to school practices affecting students with disabilities and examines the six principles of P.L. 94-142 and similar principles in state legislation. (Same as ELPS 856.)

SPED 852. Citizens with Disabilities, Public Policy, and Policy Analysis. 3 Credits.
Students to analyze public policy that affects citizens with disabilities, various models of analysis are brought to bear on federal policy (e.g., education, transportation, housing, institutionalization, protection and advocacy, medical assistance, employment, vocational rehabilitation, and others). This course is not valid for core requirement in history and/or philosophy of education. Prerequisite: SPED 851 or permission of instructor.

SPED 854. Family and Interprofessional Collaboration in Special Education. 3 Credits.
This course is designed to provide knowledge and skills to implement federal and state mandates for special education and related services programs as they relate to building and maintaining relationships with families of students with disabilities, and developing effective school programs. It covers procedures for developing, implementing, and evaluating (a) instructional accountability for special education students' participation in district and state assessment; (b) relationships between general and special education personnel and programs; (c) roles and responsibilities; (d) interdisciplinary team planning including families; (e) coordinating, educating, and supervising paraeducators; and (f) general management responsibilities associated with instruction of children and youth with disabilities. Course topics will include collaboration in schools, community systems and families, historical perspectives of family life and school involvement, effective relationships between home, school, community, communication among professionals and with families, school-based programs, home-based programs, and multicultural considerations. Prerequisite: SPED 631 or SPED 731, or SPED 632 or SPED 732, or SPED 735.

SPED 856. Transition Education and Services from Childhood through Adulthood. 3 Credits.
The purpose of this course is to provide a background in career development and transition education for persons with disabilities from middle school through adulthood. Emphasis is placed on IDEA requirements for transition services, career development and transition processes, transition services assessment, secondary special education curricular implications, career development and transition service needs, collaborative services in schools and communities to promote quality transition services, and issues and trends in transition education and services.

SPED 857. Career Development for Youth. 3 Credits.
The purpose of this course is to provide graduate students in special education and related areas who are specializing in secondary school/transition programs with an overview of career development for youth with disabilities. Emphasis is placed upon theory and practice related to career development, work-based learning, and school and community vocational training models. Prerequisite: SPED 856.

SPED 858. Assessment for Transition Planning. 3 Credits.
This course is designed to provide a review of psychometric principles and their utility as a foundation for quality assessment in transition assessment and planning for youth with disabilities. Formal and informal assessments across a range of transition planning areas are reviewed and evaluated. Skills in curriculum-based assessment, rating scales, situational assessment, and functional assessment are emphasized. Prerequisite: SPED 856 or permission of instructor.

SPED 859. Interagency Services for Transition to Adulthood. 3 Credits.
The purpose of this course is to provide an overview of interagency and community services and systems for adolescents and young adults with disabilities. Emphasis is placed on theory and practice related to interagency collaboration; systems change efforts in transition services; and state-of-art practices regarding supporting individuals with disabilities in community employment, living, socialization, community participation, and other areas of adult life. Prerequisite: SPED 856.
SPED 860. Education of Children and Youth with Disabilities: Autism Spectrum Disorder.  3 Credits.
This course is designed to prepare students to implement evidence-based strategies for individualized and group instruction. Methods for developing and implementing overall treatment/educational programs, planning or selecting curriculum/service models for programs, and developing instructional materials are emphasized. Procedures for managing classroom staff and service resources, coordinating educational programs with families, other service personnel and program support staff, and monitoring overall program effectiveness are addressed. Prerequisite: SPED 760.

SPED 861. Blending Academics and Transition.  3 Credits.
The purpose of this course is to provide graduate students with research evidence of each of the components of universal design for learning within access to the general academic curriculum: multiple means of representation, expression, and engagement. Prerequisite: SPED 856.

SPED 862. Work-Based Learning.  3 Credits.
The purpose of this course is to provide graduate students with models and strategies to develop and coordinate meaningful work experiences for youth with disabilities. Emphasis is placed on practical strategies for engaging with community businesses, developing and customizing jobs and supporting youth in the workplace. Prerequisite: SPED 856.

SPED 863. Student Engagement in School and Community.  3 Credits.
The purpose of this course is to provide graduate students in special education and related areas who are specializing in secondary school/transition programs with an overview of models and issues pertaining to school and community engagement for secondary age youth. Prerequisite: SPED 856.

SPED 871. Advanced Practicum with Exceptional Children Needing an Autism Spectrum Curriculum.  3 Credits.
This is an advanced practicum experience for the graduate student teaching children and youth with autism spectrum disorder (ASD). The practicum is designed to provide intense, diverse and direct teaching experiences with children and youth who have learning and behavioral needs in the mild through moderate range and who have been identified with ASD. Prerequisite: SPED 760; SPED 860; SPED 785; SPED 790; SPED 800; SPED 743.

SPED 875. Practicum with Children and Youth with Disabilities: _____ 1-10 Credits.
This course is designed to provide intensive field work and direct teaching experiences with children and youth with disabilities in educational, residential, and clinical settings. Prerequisite: SPED 775.

SPED 897. Independent Study.  1-4 Credits.
Prerequisite: Consent of advisor and instructor.

SPED 898. Master's Project.  1-4 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

SPED 899. Master's Thesis.  1-6 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

SPED 930. Praxis Seminar: Scholarship and Writing.  3 Credits.
Course assists first-year doctoral students in (a) developing a scholarly identity and technical skills in the areas of teaching, scholarship, and service, (b) developing a critical understanding of the scholarship informing special education practices and policies through course readings and seminar discussions, and (c) developing the skills to complete a comprehensive, critical review of a topic in the field of special education and disability. Prerequisite: Doctoral student status in Special Education.

SPED 932. Praxis Seminar: Scholarship of Teaching.  3 Credits.
Course assists doctoral students in learning (a) what is known about effective teacher education, (b) how that knowledge is translated into practice, and (c) what methodologies can be enlisted to conduct cutting-edge teacher education research. Prerequisite: Doctoral student status in Special Education.

SPED 936. Cross-Spec I: Conceptual Issues in Special Education.  3 Credits.
The focus of the seminar is current and historically-significant disability-related special education issues and problems (e.g., inclusive education, effective instruction, race and social class bias) that both intersect and implicate the various special education doctoral specializations. Because such problems tend to be intractable, the seminar is designed to build student capacity for conceptualizing and addressing them by exploring forms of disciplinary, interdisciplinary, and specialization scholarship and inquiry applicable to (re)framing and potentially resolving them. Prerequisite: Doctoral student status in Special Education.

SPED 937. Cross-Specialization Seminar: Methodological and Conceptual Issues in Special Education.  3 Credits.
The purpose of this seminar is to enable doctoral students to develop an interdisciplinary stance in their research and teaching by building meaningful connections across three types of knowledge-metatheoretical foundations of the social science and humanities disciplines; methodological and theoretical knowledge of the social sciences/humanities and theoretically-oriented social professions; and specialized knowledge of education, special education, and related professions. The primary focus of the seminar is the methodological traditions of the social sciences/humanities and education and their application to historically-significant, intractable special education problems such as exclusion/segregation, instructional ineffectiveness, and race and class bias, all of which intersect and implicate our various doctoral specialization areas. The secondary focus is application of the theoretical knowledge of the social science/humanities disciplines and theoretically-oriented social professions to these and related contemporary special education problems.

SPED 949. Specialist Research.  1-4 Credits.

SPED 950. Civic Professionalism.  3 Credits.
This course is concerned with the relationship between professions and society in a democracy, and specifically, with the ethics and practices associated with the professions of education, special education, and other disability-related fields. Models of professionalism are compared and advantages of civic professionalism for individuals with disabilities and their families, the professions, and society as a whole are explored. Lessons drawn from disagreements over questions such as the nature and social consequences of the professions are used to broaden understanding of what professionalism could and should be in a democracy. Prerequisite: Admission to doctoral program.

SPED 951. Supprrting Early Childhood/Early Childhood Special Education Practitioners in Evidence Based Practice.  3 Credits.
This course will add to the formation of doctoral students as scholars who support practitioners as they strive to be effective consumers of research and implement evidence based practice. The course will address history and current trends, issues/problems and associated methodologies, key leaders, and schools of thought for the fields of Early Education/Early Childhood Special Education with a focus on educator preparation. This course includes active involvement in teaching Early Childhood Unified masters degree students participating in SPED 752. Overview of Early Childhood/Early Childhood Special Education. Doctoral students will help plan and teach SPED 752 course sessions as well as mentor SPED 752 students, who are developing understandings of and writing
about evidence based practice. Prerequisite: Admission to the Special Education Doctoral program or instructor permission.

**SPED 954. Disability, Justice and Democracy. 3 Credits.**
This course is concerned with what justice requires for people with disabilities, and in this regard, with the institutional, political, and cultural barriers to these requirements today and historically. As such, it is an interdisciplinary treatment of the place of disability in theories of justice from Rawls’s contractarian theory of justice through Nussbaum’s capabilities approach, as well as a critical-theoretic analysis of injustice toward people with disabilities from the Enlightenment to contemporary society. Prerequisite: SPED 950 or permission of the instructor.

**SPED 955. Intersectional Oppression in Special Education Policy and Practice. 3 Credits.**
This course is designed to explore the ways in which difference is traditionally perceived and responded to in special education policy and practices in the United States. We will examine how larger systems and individual perceptions about multiple forms of difference and larger social processes, intersectality, conspire to create particular forms of injustice. Students in the course will analyze the processes of intersectality to understand how students at the intersections of multiple oppressions experience education within communities of practice that enact, reproduce, and resist policies through their daily activities. We will build an understanding of intersectality as a “method and a disposition, a heuristic and an analytic tool.” Furthermore, we will explore how these students need access to opportunities to dismantle systemic inequities, which will support their engagement with formal learning communities such as schools. Prerequisite: Admittance to the Special Education doctoral program or instructor permission.

**SPED 956. Families, Diversity, and Special Education. 3 Credits.**
This course will engage students in analyzing, evaluating, and planning for conducting research into an array of equity issues for families of students with or considered “at risk” for disabilities associated with the programs and professionals that serve them. Students will critically engage the origins and reproduction of dominant discourses regarding families from diverse backgrounds, drawing on interdisciplinary frames and research approaches for identifying systemic inequities within educational institutions for families and their children from diverse racial, ethnic, social class, and linguistic backgrounds. Prerequisite: Admission to a doctoral program.

**SPED 957. Instructional Technology and Design for Individuals with Diverse Learning Needs. 3 Credits.**
This course is designed to provide students with a foundational understanding and analysis of emerging critical topics and research in instructional design, technology innovation, implementation of innovation across higher education and k-12 environments as it relates to struggling learners, especially individuals with disabilities. The focus of the course is to contextualize issues in design, planning, development, implementation, and evaluation of technology as it aligns to the needs of struggling learners and their peers with identified disabilities. Topics will include Assistive Technology (AT), Instructional Technology (IT), Universal Design (UD), Universal Design for Learning (UDL), models of instructional design, usability, human-factors/performance measurement, blended and online learning (higher education /k-12), adoption/abandonment, outcome measures, Technological Pedagogical Content Knowledge (TPACK) and current trending topics related to research, teacher education, and implementation of IDT in higher education and k-12 education, again, as it applies to the relevant needs of struggling learners and their peers with disabilities. Students will be required to coordinate requirements with research & teaching competencies and outcomes of the special education doctoral program specific to the IDT specialization. Prerequisite: Admission to a doctoral program.

**SPED 959. Advanced Research in Universal Design for Learning. 3 Credits.**
As we understand more about the learning process, the more we recognize the importance of design. Simple modifications to the learning environment and the instructional process can shape whether learners access, process, and develop understandings within the experience. As future leaders, it is important for you to understand and continually reflect on how the design elements within your research, teaching, and service will impact learners. Universal Design for Learning (UDL) provides a basis for thinking about the use of design within the learning process. As a scientifically-based instructional framework, UDL is focused on supporting the variability that exists in all learners. UDL integrates proactive as well as iterative instructional design across goals, methods, materials, and assessments to support the development of expert learners. This course is designed to expand on the foundational knowledge of UDL to support an interdisciplinary understanding across various fields of study that engage in the framework's advancement. Learners will develop understanding surrounding the contemporary issues and topics facing UDL in research, development, and implementation. Prerequisite: Admission to a doctoral program.

**SPED 960. Special Education Policy and Politics. 3 Credits.**
This course is concerned with political struggles associated with the formation of special education law and policy and its implementation in schools and associated institutions. Using an interdisciplinary theoretical framework that views policy development historically and institutionally, it analyzes the formation and implementation of the Individuals with Disabilities Education Act from its origins in disability-focused social movements to its implementation in largely resistive school organizations. Prerequisite: SPED 950 or permission of instructor.

**SPED 963. Self-Determination, Support Needs, and the Application of Positive Psychology to Disability. 3 Credits.**
Practices pertaining to the third wave of the disability movement and the third generation of inclusive education emphasize strengths-based models that conceptualization disability not as a deficit within the person, but in the context of the gap between personal capacity and the demands of the environment. This course will provide students with in-depth instruction and reading pertaining to 21st century understandings of disability, how strengths-based positive psychology can contribute to the education of students with extensive and pervasive support needs, and how supports-paradigms and assessments (Supports Intensity Scale for Children) can be used to identify and provide needed supports to students with more extensive support needs. Because the aforementioned changing understandings of disability and a movement to a supports paradigm emphasizes the importance of promoting the self-determination of all students, including students with extensive and pervasive support needs, the second half of the course will provide a life span survey of the self-determination construct, examining evidence-based theories...
of the construct and their application to the education of students with disabilities; the importance of promoting self-determination to academic and transition-related outcomes, and roles of families and others in the development of self-determination. Prerequisite: Admission to a Doctoral program.

**SPED 964. Inclusion & Access to General Education Curriculum for Secondary Students w/Extensive Support Needs. 3 Credits.**

IDEA requires that all students be involved with and progress in the general education curriculum. This course will build on the previous two courses in the specialization to overview supplementary aids and services, special education services, and related services necessary to ensure that students with extensive and pervasive support needs are provided instruction and are successful in the general education curriculum. The course will focus on the importance of inclusive education, and the role of universal design for learning in the education of students with significant cognitive disabilities. Prerequisite: Admission to a doctoral program.

**SPED 965. College and Career Readiness for Students with Extensive and Pervasive Support Needs. 3 Credits.**

School reform has emphasized college and career readiness for all students. This course will examine the application of College and Career Readiness (CCR) to students with extensive and pervasive support needs. Theory and research will be examined during this class focusing on methods, materials, and strategies to ensure a successful transition from secondary education to college or a career for students with significant cognitive disabilities. Three themes, reflecting improvement science, research and translation to practice, serve as foundations this course: (1) What is known about CCR from interdisciplinary theory and practice, (2) How do critical elements translate into successful translation for systems supporting students with significant disabilities, and (3) Is there consensus related to application of CCR theory and research for students with significant disabilities. Prerequisite: Admission to a doctoral program.

**SPED 966. Issues Related to Serving Students with Intensive Support Needs. 3 Credits.**

Course focuses broadly on current issues and trends in scientifically supported methods for identifying, assessing, and serving students with intensive support needs. Prerequisite: Admission to the Special Education doctoral program or instructor permission.

**SPED 968. Evidence-Based Practices for Students with Intensive Academic, Behavior, and Social Support Needs. 3 Credits.**

This course will focus on preventing the development of academic, behavior, and social challenges and responding effectively when challenges do occur. Course content will include the use of behavior and academic screening tools to detect and support students with and at risk for academic, behavior, and social challenges within comprehensive, integrated, three-tiered (CI3T) models of prevention. In addition, students will learn about evidence-based strategies, practices, and programs for supporting students with and without identified disabilities for whom Tier 1 efforts are insufficient. Students will develop their abilities to analyze, synthesize, and apply research methods related to design, implementation, and evaluation of Tiers 1, 2, and 3. Students will be required to coordinate requirements with research and teaching competencies and outcomes of the special educational doctoral program. Prerequisite: Admission to a doctoral program or permission from the instructor.

**SPED 971. Organization and Administration of Services for Children and Youth with Disabilities. 3 Credits.**

This course is designed to prepare administrators and prospective administrators for organizing and administering educational programs for students with disabilities. Major topics include a review of current trends in special education, state and federal guidelines and regulations, legal and financing aspects of special education, program planning, and administration of special services. (Same as ELPS 959.) Prerequisite: Nine hours of education including educational psychology and SPED 725.

**SPED 972. Issues and Trends in Special Education I. 2 Credits.**

This course is designed to assist first-year special education doctoral students organize and synthesize a conceptual and substantive map of the field of special education and introduce them to corresponding faculty research interests and resources. Emphasis is placed on the academic writing expectations and resources of the field, university, and department, and on building a cohort of students to address common issues and to provide a foundation for peer support throughout the doctoral program. Prerequisite: Admission to special education doctoral program or permission of instructor.

**SPED 975. Advanced Practicum with Children and Youth with Disabilities: _____ 1-10 Credits.**

Advanced development of conceptual and practical field-based skills. Prerequisite: SPED 775.

**SPED 980. Advanced Topics: _____ 1-3 Credits.**

A special course of study to meet current needs of education professionals -- primarily for post-master's level students.

**SPED 981. Changing Complex Systems. 3 Credits.**

This course is designed to provide students with an overview of seminal leadership and systems change literature. Prerequisite: Admission to doctoral program.

**SPED 983. Research Funding and Proposal Development. 3 Credits.**

This course is designed to teach a broad array of strategies associated with the development of successful proposals that will generate funds to support programmatic work. Among the topics covered in this course are sources of funding, strategies for conceptualizing and writing proposals, collaboration strategies, proposal peer-review process, and integrating proposal development activities into other professional responsibilities. Prerequisite: Admission to doctoral program and EPSY 710.

**SPED 985. Naturalistic Research. 3 Credits.**

This course is designed to develop skills in naturalistic or constructivist research, while situating it theoretically within the broader framework of modern and postmodern social inquiry, and exploring its social, political and ethical implications. The course develops students' skills in using this form of interpretive qualitative research, provides a theoretical framework for selecting inquiry paradigms, compares and contrasts positivist and constructivist inquiry, and reviews social and political implications of constructivist inquiry. Prerequisite: Six hours of statistics, measurement, and/or large or small group research design.

**SPED 990. Small Sample Empirical Research Methods. 3 Credits.**

This course provides a detailed examination of research methods for advancing knowledge and validating hypothetically useful treatments in situations in which sufficient sample sizes to conduct formal experiments are lacking, the question of interest is better addressed by multiple observations of treatment effects over time, and/or the question is best addressed by taking a variety of observations of a single unit of interest. Specifically, two small sample research methods will be examined in depth with examples and practical application experience: interrupted time series design for small samples ("single case" design), and Yin's empirical case study method. Prerequisite: Doctoral program admission or permission of instructor.

**SPED 992. Seminar in Early Childhood/Intervention. 3 Credits.**
This seminar examines research to support evidence-based practices that currently exist in the areas of early intervention and early childhood special education. The primary objective is to learn how to read and critically analyze studies that form the evidence base for several early intervention and early childhood special education practices. Primary goals of the class include the development of skills for evaluating research studies in early intervention and early childhood special education, and increasing knowledge of evidence-based practices in the early intervention literature. Prerequisite: Three courses in special education or permission of instructor.

**SPED 993. Advanced Concepts, Issues, and Trends Single Case Research for Special Education. 3 Credits.**
This course covers advanced concepts, issues, and trends in single case research. Topics include theoretical frameworks for single case, combining single case designs, observational measurement, rigor and outcomes analysis, and synthesis. Emerging statistical methods of analyzing single case experimental research are also covered. Prerequisite: SPED 990 or equivalent course.

**SPED 995. Field Experience in: _____ . 1-5 Credits.**
Supervised and directed experiences in selected educational settings. Instructors conduct regular observations and conference with students. Written summaries and evaluations of field experiences are prepared independently by the student, a representative of the cooperating agency, and the instructor. Open only to advanced students and field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

**SPED 996. College Teaching Experience. 2 Credits.**
This course is designed to prepare students for college teaching. Enrolled students shall engage in semester-long, planned, instruction that includes college classroom teaching under supervision. Planning shall be done with a member of the faculty who will supervise the experience.

**SPED 997. Individual Study. 1-4 Credits.**
Prerequisite: Prior graduate course work in the area of study and consent of instructor.

**SPED 998. Seminar in: _____. 1-4 Credits.**

**SPED 999. Doctoral Dissertation. 1-15 Credits.**
Graded on a satisfactory progress/limited progress/no progress basis.

---

**Curriculum and Teaching**

**Undergraduate Programs**

Students can prepare for teaching careers in the Department of Curriculum and Teaching. Undergraduate programs are offered in:

- Elementary Education – grades Kindergarten – 6th
- Elementary Education Unified - grades Kindergarten - 6th, for both general and special education classrooms
- English Education Secondary – grades 6th – 12th
- Foreign Language Education – grades pre-Kindergarten – 12th
- History & Government Education Secondary – grades 6th – 12th
- Unified Early Childhood Education – Birth – 3rd grade, for both general and special education classrooms

All programs offer multiple field experiences in relevant classroom settings in addition to teacher education courses and rigorous preparation in content areas.

The Academic Catalog is a guideline for policies and procedures in the School of Education and Human Sciences. However, academic program requirements change. Students are strongly encouraged to check the school’s website (https://soehs.ku.edu/) and the department for the most current information.

---

**Curriculum and Teaching**

**Graduate Programs**

Programs in curriculum and instruction prepare students to complete advanced degrees by addressing critical issues in learning, teaching, and curriculum, from local to global levels.

The department offers a broad range of graduate professional programs in curriculum and instruction, both online and at the KU Lawrence and Edwards campuses. Students should contact the appropriate program advisor for specific program requirements. Information about the department faculty is in the Faculty/Staff section of the department’s website.

For complete program information, visit the Department of Curriculum and Teaching (http://ct.soe.ku.edu/) or send an inquiry to ctedepartment@ku.edu.

Degree requirements are subject to change. Prospective and current students should obtain the current degree requirements from the department.

The Master of Arts (M.A.) with an emphasis in Teaching English to Speakers of Other Languages (TESOL) and Master of Science in Education (M.S.Ed.) are available for students who hold the bachelor’s degree and seek to advance their knowledge and skills in their professional areas or areas of interest. The department also offers Certificate programs in TESOL and Reading. The Doctor of Philosophy (Ph.D.) and Doctor of Education (Ed.D.) with a major in curriculum and instruction are for students who plan to pursue employment at the college level or assume major leadership positions in schools.

Graduate classes for the Ph.D. and M.A. programs are taught on the main campus in Lawrence. Courses for the Ed.D. program are taught in hybrid format on the KU Edwards Campus (https://edwardscampus.ku.edu/) in
Courses

C&T 100. Introduction to the Education Profession. 3 Credits.
This course is designed to acquaint students with the profession of education by helping to increase an awareness of the role and characteristics of an effective teacher. Large and small group activities and assignments are dispersed throughout the semester to facilitate these outcomes. Students will be involved in observation of and participation with teachers and pupils in public school classrooms, which complement course activities and assignments. Students will work with a mentor pre-service teacher from the KU School of Education to provide discussions about each of the course objectives. C&T 100 is a pre-professional course. Successful completion of the course does not guarantee eventual admission to the School of Education’s Teacher Education Program.

C&T 175. Introduction to Career Development. 1-5 Credits.
This is the first course in a series of 2 courses focused on student career development. The purpose of this course is to provide structured career exploration and other experiences for students to: identify career interests, strengths, and skills through career assessments, job shadows, informational interviews, and short-term work experiences; develop an individualized career plan; begin developing a career portfolio by developing a resume, references list and cover letters. Students participate in structured, recurring work-based learning opportunities, and coursework as well as individual meetings with the instructor. Instruction and practice job-seeking and job maintenance skills are provided both in the classroom and in work-based learning experiences.

C&T 177. First Year Seminar: ____. 3 Credits. U
A limited-enrollment seminar course for first-time freshmen, addressing current issues related to curriculum and instruction in the field of education. Course is designed to meet the critical thinking outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

C&T 220. Career Development. 1-5 Credits.
This is the second course in a series of 2 courses providing structured career development and is by appointment with the instructor. It provides structured experiences for students to: refine their career plan based on individual interests, strengths, and skills; learn and practice job-seeking and maintenance skills; participate in work-based learning; apply skills and experiences learned to enhance career plan and develop a career portfolio. Students participate in structured, recurring work-based learning opportunities and complete individualized projects related to career plans to contribute to students’ career portfolios. Students consult with the instructor on their individualized projects and career portfolios. Prerequisite: Successful completion of C&T 175.

C&T 235. Cultural Diversity, Equity, and Inclusion in K-12 Schools. 3 Credits.
This course explores cultural diversity in K-12 settings through a critical analysis of several key themes: power, privilege, and difference. Students will examine the social construction of race, ethnicity, gender, social class, sexuality, language, and abilities within the classroom. This course examines topics including: gender bias, racism, white privilege, income inequality, as well as the educational and social experiences of students from historically marginalized backgrounds. Fieldwork experience is a required component of this course.

C&T 290. Introduction to Secondary Science and Mathematics Teaching. 1 Credits.
This course allows KU students to explore teaching in science or mathematics as a career as well as gain and practice collaborative and communication skills. Students teach combined science/math lessons in local elementary classrooms in order to obtain firsthand experience with planning and implementing inquiry-based curriculum. This course is part of a STEM Teach sequence. C&T 290 is part of a sequence of courses that allow STEM Teach students to earn a KU service learning certificate.

C&T 291. Introduction to Science and Mathematics Teaching 2 (STEM Teach 2). 1 Credits.
This course is for students who want to continue to explore math or science teaching. This goal will be accomplished by observing a mentor teacher and by teaching several lessons to a middle school math or science class. Students will build upon and practice lesson design skills that were developed in STEM Teach 1 and become familiar with excellent science and mathematics resources for middle school. As a result of the STEM Teach 2 experiences, students generally will able to make a decision as to whether they want to pursue a pathway to teacher licensure through the STEM Teach program. C&T 291 is part of a sequence of courses that allow STEM Teach students to earn a KU service learning certificate. Prerequisite: Successful completion of STEM Teach 1 (C&T 290).

C&T 301. Educational Technology in Elementary-Middle Education. 3 Credits.
The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to elementary and middle school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program.

C&T 302. Educational Technology in Middle/Secondary Education. 3 Credits.
The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to middle school and high school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program.

C&T 322. Curriculum and the Learner in the Elementary School. 3 Credits.
Building on the experiences in C&T 100, this course will focus on the learner in the elementary setting. Learning occurs as a result of interaction among learners, teacher and subject matter in the classroom within a school in a community. The impact of the interactions of these students of learning of young children is studied in this course. Emphasis is given to the factors that influence curriculum decision-making, and methods that are considered in elementary grades curriculum and how it is delivered. Prerequisite: Admission to the Teacher Education Program.

C&T 324. Curriculum Learner in the Middle School and High School. 3 Credits.
Building on experiences in C&T 100, this course will focus on the learner within the high school setting. Learning occurs in a classroom within a school in a community, and the nature and structure of these settings as well as their impact on learning is studied in this course. Emphasis is given to the curriculum, the factors that influence the curriculum, and the
ways that goals for high school students are reflected in the high school curriculum. Prerequisite: Admission to the Teacher Education Program.

C&T 330. Instructional Approaches for ESOL Learners in the Elementary/Early Childhood Classroom. 3 Credits.
Teaching English as a Second or Additional Language/Bilingual Education is designed to provide preservice elementary teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teaching skills needed to work with English language learners of elementary age, and to impart language instruction in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are or should be available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program.

C&T 331. Instructional Approaches for ESOL Learners in the Middle/Secondary Classroom. 3 Credits.
This course is designed to provide preservice middle/secondary discipline specific teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teaching skills needed to work with English language learners of all ages, and to impart language instruction in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are or should be available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program.

C&T 335. Curriculum and Instruction in Middle and Secondary History and Government Classrooms. 3 Credits.
The purpose of this course is to help prepare students to teach social studies in the middle and secondary grades. Prerequisite: Admission to the teacher education program.

C&T 344. Children’s Literature in the Elementary School. 3 Credits.
A study of literature (poetry, folk literature, fiction, and nonfiction) appropriate for elementary school children with a focus on contemporary children’s books. Emphasis will be on selection of literature based on child development, literary quality, curriculum, and pluralism and the engagement of children in literature experiences from the interactive, reader response, and critical perspectives. Prerequisite: Admission to the Teacher Education Program.

C&T 347. Social Studies in the Elementary Classroom. 3 Credits.
A study of curricula, instructional strategies, and classroom organization for social studies education K-6. Emphasis is placed on the effective implementation of social studies programs in classroom settings. Prerequisite: Admission to the School of Education in elementary, middle, or secondary, or the Unified Early Childhood programs.

C&T 349. Science in the Elementary Classroom. 3 Credits.
In this course, you will develop an understanding of how children learn science and why science education is important. You will examine effective approaches to teaching, instructional materials, and student assessment and will learn how to plan and implement a science unit. The course will emphasize a guided-inquiry approach to science instruction appropriate for the abilities and interests of children in grades K-6. Prerequisite: Admission to the School of Education.

C&T 351. Mathematics for the Elementary Classroom. 3 Credits.
This course is a study of the curriculum, instructional strategies, and classroom organization for mathematics in grades K-6. Emphasis is placed on the effective implementation of mathematics programs in classroom settings. Prerequisite: Admission to the School of Education.

C&T 352. Literacy Instruction in the Primary Grades (K-3). 3 Credits.
This course is intended to develop the attitudes, knowledge, and skills necessary to effectively instruct primary grades (K-3) children through the development of literacy skills: reading, writing, listening, speaking, spelling, and handwriting. The major goals of this course are for the prospective teacher to develop an understanding of literacy development of the primary-grades child, current literacy theories, and the ability to work with a number of approaches to promote literacy learning and a positive attitude toward literacy in all primary-grades students who may have different needs due to language, culture, learning challenges, and or differing stages of development. This course is to be taken concurrently with C&T 353, Literacy Practicum in the Primary Grades. Prerequisite: Admission to the Teacher Education Program.

C&T 353. Literacy Practicum in the Primary Grades. 1 Credits.
This supervised practicum is intended to allow the pre-service teacher to apply the knowledge gained in C&T 352, Literacy Instruction in the primary grades (K-3), by teaching children in the primary grades. To be taken concurrently with C&T 352 Prerequisite: Admission to the Teacher Education Program.

C&T 354. Literacy Instruction in the Intermediate Grades. 3 Credits.
C&T 354 is designed to introduce pre-service teachers to the principles and methods of facilitating language and literacy development of students in third through sixth grade. Pre-service teachers also will have an opportunity to teach an elementary grade student(s). Prerequisite: Admission to the Teacher Education Program. This course is to be taken concurrently with C&T 355, Literacy Practicum in the Intermediate Grades.

C&T 355. Literacy Practicum in the Intermediate Grades (4-6). 1 Credits.
This supervised practicum is intended to allow the preservice teacher to apply the knowledge gained in C&T 354, Literacy Instruction in the intermediate grades (4-6), by teaching children in the intermediate grades. To be taken concurrently with C&T 354. Prerequisite: Admission to the Teacher Education Program.

C&T 356. Understanding Dyslexia in Early Childhood. 1 Credits.
In this 1-credit online course, UEC preservice teachers will learn about issues related to dyslexia. For example, preservice teachers will learn (a) how dyslexia is defined and the characteristics of students identified with dyslexia; (b) about screenings and diagnostic assessments that help teachers make informed instructional decisions; (c) how to teach reading to students at-risk for or identified with dyslexia; and (d) how to help students address some co-morbidities that are often associated with dyslexia. This course aligns with C&T 352: Literacy in the Primary Grades and C&T 353: Literacy Practicum in the Primary Grade. Along with C&T 352/353, this course addresses the Kansas Department of Education (KSDE) expectations about dyslexia for teacher preparation programs. Concurrent enrollment in C&T 352 and C&T 353 is required. Prerequisite: Admission to the Teacher Education Program.

C&T 359. Literacy in the Content Areas. 1 Credits.
An introduction to reading in relation to specific areas of art, music and health and physical education. Focus on specialized vocabulary and literature related to each area. Introduction of specific strategies to teach vocabulary and comprehension and to integrated units of study. Prerequisite: Admission to certification program in music education, art education, health education, or physical education.

C&T 360. Knowing and Learning in Mathematics and Science. 3 Credits.
This course focuses on issues of what it means to learn and know science and mathematics. What are the standards for knowing we will use? How is knowing and learning structured and how does what we know change and develop? For the science and mathematics educator, what are the tensions between general, cross-disciplinary characterizations of knowing (e.g., intelligence) and the specifics of coming to understand powerful ideas in mathematics and science? What are the links between knowing and developing in learning theory, and the content and evolution of scientific ideas. Also, current issues and tensions in education will be discussed, especially as it relates to mathematics and science instruction.

C&T 366. Classroom Interactions in Mathematics and Science. 3 Credits.
To make prospective teachers aware of multiple models of teaching (including direct instruction, inquiry teaching and use of small groups); the advantages, disadvantages and uses of each; and what each model requires of teachers. To allow prospective teachers to explore ways of probing student understanding through authentic assessment, evaluating student understanding through student artifacts, and enhancing student understanding through lesson plans built around models of how people learn. To make prospective teachers aware of equity and diversity issues in classroom teaching and ways of ensuring that all students have an opportunity to learn. To make students aware of the proficiencies for licensure recognized by UKanTeach and Kansas State Board of Education and facilitate students’ demonstration and documentation of these through their development of a professional portfolio. To develop students’ capacity to identify and evaluate best teaching practices as presented in research literature. Prerequisite: C&T 360.

C&T 380. English as a Global Language. 3 Credits.
In this course, we will explore the political, cultural, historical, and economic factors that drive English’s status as a global language and the demand to learn it. We will attend to such questions as, Why a global language, and why English? Is the spread of English necessarily natural, neutral, and beneficial? Then, we will consider implications of answers to the above questions on teaching English internationally, since TESOL positions overseas provide ideal opportunities for college-age Americans to live and work abroad. The projects assigned are intended to teach students to think critically about issues related to prominence of English teaching/learning around the world.

C&T 401. Professional Learning Seminar I. 1 Credits.
This is the first in a series of three consecutive professional learning seminars. The primary purpose of the professional learning seminars is to collaboratively engage KU teacher education students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that pre-service teacher education students face in the schools. Faculty and students will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the philosophical, and psychological. The professional learning seminars are designed around key features of effective professional learning communities and sustained professional development for teachers. Features include supportive, collaborative learning, shared personal and professional practice, and collective inquiry of teaching and learning. Prerequisite: Admission to the Teacher Education Program.

C&T 402. Professional Learning Seminar II. 1 Credits.
The primary purpose of the professional learning seminars is to collaboratively engage KU teacher education students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that pre-service teacher education students face in the schools. Faculty and students will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the philosophical, and psychological. The professional learning seminars are designed around key features of effective professional learning communities and sustained professional development for teachers. Features include supportive, collaborative learning, shared personal and professional practice, and collective inquiry of teaching and learning. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Teacher Education Program.

C&T 403. Professional Learning Seminar III. 1 Credits.
The primary purpose of the professional learning seminars is to collaboratively engage KU teacher education students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that pre-service teacher education students face in the schools. Faculty and students will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the philosophical, and psychological. The professional learning seminars are designed around key features of effective professional learning communities and sustained professional development for teachers. Features include supportive, collaborative learning, shared personal and professional practice, and collective inquiry of teaching and learning. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Admission to the Teacher Education Program and successful completion of C&T 402.

C&T 420. Teaching Kansas Government and Contemporary Public Policy Issues: ______. 3 Credits.
A study of the constitution, organization, functions, and processes of Kansas government, of contemporary public policy issues with local, state and national implications, and of strategies for teaching these in middle and secondary classrooms. Prerequisite: Admission to the School of Education and POLS 110.

C&T 423. Assessing English Language Learners. 3 Credits.
This course provides an introduction and overview of basic principles in assessing English language learners (ELLs) in the context of U.S. preK-12 classrooms and schools. With a focus on addressing equity issues, the course: 1) provides the context and rationale for variety of approaches to assessment; 2) discusses assessment related academic language in the content classroom; 3) discusses the multiple purposes of assessments; and 4) reviews how assessment results can inform educators, students, families, and community members. Prerequisite: C&T 330 or C&T 331.

C&T 424. Second Language Acquisition for preK-12 TESOL Educators. 3 Credits.
This course provides an introduction to the process of second language acquisition as it relates to English language learners (ELLs) in a U.S. preK-12 context. Particular attention is given to the influence of cognitive, affective, and sociocultural factors in second language acquisition. Current developments in second language acquisition are reviewed and evaluated in keeping with the needs of professionals in the context of second language education. Prerequisite: C&T 330 or C&T 331.

C&T 430. Teaching Literature for Young Adults. 3 Credits.
Teaching literature (novel, short story, poetry, drama, nonfiction) suitable for students in the middle school, the junior high school, and the senior
high school. Ethnic literature, censorship, bibliographies, and other relevant sources of information about books for young adults will be studied. Prerequisite: Admission to the School of Education.

C&T 448. Reading and Writing Across the Curriculum. 3 Credits. Content area teachers do far more than impart information to students. They play an important role in guiding middle/secondary students as they use reading and writing as tools for learning. This course includes an overview of the state and national reading and writing scores of adolescents. Students will then be introduced to the basic processes or ways in which individuals may learn to read and write. The course continues with a focus on the instructional strategies and materials that promote the development of reading and writing in the context of teaching new information. Additionally, the course emphasizes the informal methods educators can use, on an on-going basis, to diagnose their students ability to comprehend content material. Finally, appropriate fix-up strategies will be modeled. Prerequisite: Admission to the Teacher Education Program.

C&T 449. Understanding Dyslexia and Supporting Students in Middle and Secondary Schools. 1 Credits. In this 1-credit online course, middle and secondary preservice teachers to begin acquiring an understanding of dyslexia and the characteristics that students with dyslexia might display in the classroom and on academic/social tasks. Preservice teachers will learn how dyslexia is identified, how to teach students identified with dyslexia, and how to help students address some co-morbidities that are often associated with dyslexia such as organization, memory and concentration. Prerequisite: Admission to the Teacher Education Program.

C&T 460. Project Based Instruction in Mathematics and Science. 3 Credits. This course will have three essential components. The first will be a theory driven perspective accounting for what we know of how people learn and how project-based instruction improves student learning in math and science. The second component will provide the students with support as they develop their own project-based unit. The third component will be field experiences consisting of two parts: 1) observation of well-implemented project-based instruction in local schools and 2) teaching project-based activities in an informal education setting. Prerequisite: C&T 360.

C&T 489. Advanced Teaching Practicum. 1 Credits. This supervised practicum is intended to allow the pre-service teacher to apply knowledge gained in SPED 507; C&T 448, ELPS 537; and C&T 540, C&T 541, C&T 542, C&T 543 and C&T 544: Advanced (Content Area) Methods by teaching children in the middle/secondary grades. To be taken concurrently with SPED 507; C&T 448, ELPS 537; and C&T 540, C&T 541, C&T 542, C&T 543 and C&T 544: Advanced (Content Area) Methods. Prerequisite: Admission to the Teacher Education Program.

C&T 490. Student Teaching. 6-7 Credits. A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Successful completion of fall practicum experiences and demonstration of appropriate professional dispositions.

C&T 491. TESOL Practicum for Kansas State Endorsement. 3 Credits. The TESOL Practicum allows individuals to gain supervised experience in Teaching English to Speakers of Other Languages (TESOL) for a professional KSDE ESOL endorsement and advancement. Prerequisite: Completion of all TESOL endorsement courses.

C&T 494. Internship. 6-7 Credits. A supervised internship experience leading to initial certification. The student assumes the total professional role as a teacher in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Successful completion of all practicum experiences and demonstration of appropriate professional dispositions.

C&T 495. Seminar: Developing the Teaching Portfolio. 3 Credits. This course serves to instruct students in the research, teaching, and writing components of developing a teaching portfolio. The seminar will provide a forum for discussion and deeper exploration into topics and issues related to working in the school setting, teaching, and developing a professional teaching philosophy. Graded on a satisfactory/fail basis. Prerequisite: Enrollment in Student Teaching or Internship during the Spring semester.

C&T 497. Independent Study in:______. 1-2 Credits. Only one enrollment permitted each semester. A maximum of four hours will apply toward the bachelor's degree. Prerequisite: Recommendation of advisor and consent of instructor.

C&T 499. Bachelor's Project. 4-6 Credits. A formal report of some aspect of the field experience that relates formal learning and in situ experience to program planning, implementation, and evaluation. Topic will be selected in consultation with the project advisor. Prerequisite: C&T490 and C&T 491 (C&T 491 may be taken concurrently).

C&T 500. Student Teaching in:______. 1-6 Credits. A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Admission to the Student Teaching program.

C&T 501. Student Teaching Practicum in:______. 1-6 Credits. A supervised classroom teaching experience under the direction of an experienced teacher and in close relationship with a university supervisor. Prerequisite: Admission to the Graduate Certification Program and approval of advisor.

C&T 503. International Perspectives in Primary and Secondary Education. 3 Credits. This course is will expose students to a variety of debates and developments related to primary and secondary education in our globalized era. Students will survey educational systems from the US and selected world regions, comparing and contrasting them in terms of access, funding, curriculum, and pedagogy. They will investigate educational systems from the perspective of international development while addressing issues of local vs. national or international control, tradition vs. global advancement, and other challenges and trade-offs. Prerequisite: Junior standing or higher, or permission of instructor: The course is suitable for advanced undergraduate and master's degree seeking students.

C&T 530. Curriculum and Instruction in Foreign Language Classrooms. 3 Credits. A study of philosophy, objectives, curriculum, instructional strategies, and evaluation in teaching foreign language at the K-12 levels. Prerequisite: Admission to the Teacher Education Program.

C&T 533. Curriculum and Instruction in Middle & Secondary English/Language Arts Classrooms. 3 Credits. This is an English/Language Arts methods course that focuses on curriculum development and instructional strategies appropriate for teaching English/Language Arts in grades 5-12. Prerequisite: Admission to the Teacher Education Program.

C&T 537. Curriculum and Instruction in Middle and Secondary Science Classrooms. 3 Credits.
The purpose of this course is to help you prepare to teach science in the middle and secondary grades. The instructor designed the class sessions and learning tasks to enable you to make progress toward achieving the Kansas Science Teaching Standards and Kansas Professional Education Standards. Prerequisite: Admission to the Teacher Education Program.

C&T 539. Curriculum and Instruction in Middle and Secondary Mathematics Classrooms. 3 Credits.
This course is designed to provide focused study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12. Prerequisite: Admission to the Teacher Education Program.

C&T 540. Advanced Practices in Teaching English in the Middle and Secondary Schools. 3 Credits.
The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching English/Language Arts in grades 5-12 and as a final readiness for the undergraduate student teaching experience. Prerequisite: Admission to the Teacher Education Program.

C&T 541. Advanced Practices in Teaching Social Studies in Middle/Secondary Schools. 3 Credits.
Advanced study of curriculum development and instructional strategies appropriate for teaching social studies in grades 6-12 and application of learning in a middle/secondary classroom. Prerequisite: C&T 335; SPED 326 and, C&T 324

C&T 542. Advanced Practices in Teaching Science in the Middle and Secondary Schools. 3 Credits.
This course is designed as a final readiness for the semester-long student teaching experience and the Kansas Performance Teaching Portfolio to be completed during that student teaching experience. The course deals with the analysis, adaptation, and application of varied instructional designs to implement curricula in specific science areas in grades 5-12. Prerequisite: Admission to the middle-level licensure program in science education at the undergraduate level or one of the graduate licensure programs in middle/secondary science. Successful completion of C&T 537.

C&T 543. Advanced Practices in Teaching Mathematics in the Middle and Secondary Schools. 3 Credits.
The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12 and as a final readiness for the undergraduate of GLP student teaching experience. Prerequisite: Admission to the middle-level licensure program in mathematics education at the undergraduate level or the GLP in middle or secondary mathematics. Successful completion of C&T 539.

C&T 544. Advanced Practices: Situating Foreign Language Content, Dispositions, Skills & Tools Language Classroom. 3 Credits.
This is an advanced Foreign Language methods course that focuses on the critical importance of the socio-linguistic environment of foreign language classrooms. Prerequisite: Admission to the Teacher Education Program.

C&T 598. Special Course: ____. 1-5 Credits.
A special course of study to meet current needs of education students, primarily for undergraduates.

C&T 649. An International Teaching Experience. 3 Credits.
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director.

C&T 707. Project Based Instruction. 3 Credits.
This course will emphasize exploring, designing, and evaluating materials and pedagogy to work toward the design of project-based curriculum and instruction. Topics focus on the principles of project-based instruction as well as multiple models for its use in the classroom.

C&T 709. Foundations of Curriculum and Instruction. 3 Credits.
Basic concepts and processes of curriculum and instruction, including theories, planning models, resources for decision-making, current trends, research, and proposals for improvement of curriculum and instruction.

C&T 730. Understanding Talent. 3 Credits.
This course addresses the social, cognitive, affective, and other developmental aspects of talent as manifested in children and youth with high potential. The course provides an opportunity to examine characteristics, strengths, and needs of these children and their families. The course focuses on the foundational aspects of gifted/talented education: educational and political history of the field, etiology of extraordinary potential, and identification and assessment techniques, instruments, and systems. Included in the course are relevant research, policies and regulations, services, and information resources. Prerequisite: SPED 425, SPED 431, SPED 725, or equivalent introductory course on exceptional children and youth.

C&T 739. Internship in Teaching: ____. 1-6 Credits.
A supervised internship experience leading to initial certification. The student assumes the total professional role as a teacher in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Admission to a Curriculum and Instruction licensure program. Instructor permission required to enroll.

C&T 740. Foundations of Reading: Process, Theory, and Instruction. 3 Credits.
It is the purpose of this course to introduce students to the foundations of the reading process, developmental levels, theory, models, and procedures at the emergent, elementary, and secondary levels. Elements of cultural, linguistic, and ethnic diversity that affect the reading process are included. Students work with research related to the reading process, remediation, and assessment.

C&T 741. Comprehension and Study Strategies for Use with Multiple Texts. 3 Credits.
It is the purpose of this course to examine research, theory, and practice in reading comprehension. Emphasis is placed on the application of strategies for various text types (expository, narrative, persuasive, and technical) for teaching reading comprehension and study skills across content areas in the K-12 classrooms. Prerequisite: C&T 740 or permission of the instructor.

C&T 743. Writing and Spelling Development and Instruction. 3 Credits.
A study of the research base on writing, spelling, speaking, and listening for teaching the language arts; an overview of development in writing and spelling, the writing and spelling processes and instruction, and strategies for integrating the language arts. Prerequisite: Admission to a masters program within the School of Education, C&T 740 or permission of the instructor.

C&T 745. Reading and the English Language Learner. 3 Credits.
The course focuses on the literacy development, research, and effective teaching practices that support emerging bilinguals (EBs) becoming literate. The course examines how reading, writing, speaking, and viewing
in a new language are similar and/or dissimilar from these modalities in a first language. Cognitive, sociocultural, linguistic and educational perspectives are investigated as part of this examination.

C&T 748. Reading and Writing Across the Curriculum. 3 Credits.
In C&T 748, preservice content teachers, who have had no previous literacy courses, are introduced to the basic processes of reading and to instructional strategies and materials that promote the development of reading, writing, and studying in the context of teaching new information. Additionally, we discuss the ways in which teachers diagnose, in an informal, on-going basis, their students’ abilities to comprehend the material they are teaching.

C&T 749. An International Teaching Experience. 3 Credits.
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director.

C&T 770. Pedagogical Considerations in the 21st Century Classrooms. 3 Credits.
Exploration of pedagogy in the 21st century classroom and examination of current learning environments and strategies available to enhance student learning and engagement. Prerequisite: Admission to graduate program in the School of Education. Admission to a non-degree program in the School of Education.

C&T 797. Special Project in: _____. 2 Credits.
Implementation of the curriculum project planned in C&T 734 or C&T 735; implementation and assessment of the special project will occur during the internship. Prerequisite: C&T 734, C&T 735, and C&T 736.

C&T 798. Special Course: _____. 1-5 Credits.
A special course of study to meet current needs of education professionals--primarily for graduate students.

C&T 800. Foundations of Curriculum Development. 3 Credits.
This course is designed for students to gain a functional understanding of the historical, philosophical, political, psychological, and cultural factors which affect the designing and implementation of curriculum at several levels: the individual classroom, the team, the school, the larger administrative unit, the state, and the nation. Prerequisite: C&T 709 or permission of instructor.

C&T 801. Planning for School Improvement. 3 Credits.
This course will emphasize the latest research and practice related to school reform and student success, particularly professional development and data analysis as they relate to standards, curricula, assessment, and instruction embedded in a school improvement plan. Discussions will provide a pathway for teachers to contribute to the development and implementation of an identified district’s school improvement plan. You will function as a teacher member of a school improvement team to assimilate and synthesize research and practice into the development, revision, and/or assessment of a school improvement plan for a specific school site. Prerequisite: Enrollment is restricted to students admitted to the online Curriculum and Instruction Master’s program.

C&T 802. Curriculum Planning for Educational Settings. 3 Credits.
A focus on organizing and managing curriculum development in educational settings. Such curricular decisions as writing philosophies, setting goals and objectives, selecting and organizing content, and designing and monitoring evaluation procedures will be emphasized. Providing leadership for the collaborative process of curriculum planning in organizational settings will receive attention.

C&T 803. Differentiating Curriculum and Instruction. 3 Credits.
This course is designed for educators interested in expanding curriculum and instruction to accommodate diverse learners in the classroom, K-12. Topics include: models, methods, and resources for differentiating curriculum and instruction, designing and modifying differentiated curriculum, evaluating student learning, and introducing students, parents and colleagues to differentiation. An evidence-based, practical course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School.

C&T 806. Instructional Strategies and Models. 3 Credits.
Analysis of models of teaching which represent distinct orientations toward students and how they learn. The application of these models is complemented by the study of research evidence on effective teaching strategies. Prerequisite: C&T 709.

C&T 807. Multicultural Education. 3 Credits.
In order to provide the student with an understanding of multicultural education, the course will examine the effects of such issues as ethnicity in America, the melting pot theory, separation, cultural pluralism, legal issues, and bilingual education upon the curriculum and instruction in today's classrooms. It will include an evaluation of materials for bias and stereotypes.

C&T 808. Qualitative Research: Curriculum Inquiry. 3 Credits.
Curriculum Inquiry provides an opportunity to reflect, explore, understand, and broaden perspectives of curriculum through examining the theories, methodologies, strategies, and design of qualitative research. This course is designed to develop a common understanding of the major elements of qualitative research, while offering each student an opportunity to examine research topics and methods of personal interest, with particular attention to curricular issues. The course also includes practical experience with various modes of data collection and analysis.

C&T 809. Creative Thinking and Learning. 3 Credits.
This course provides an opportunity to investigate the nature of the creative process in educational settings. The knowledge base for the course builds from foundations of creativity, principles and theories of identifying and enhancing creative production, and affective learner variables. The course blends classic and contemporary works in creativity, and features the application of theories and models of the origins and development of creativity to promoting creative thinking and learning among children, youth and adults. Participants learn about, apply, and adapt techniques for defining and identifying creative potential and for encouraging creative thinking in educational settings. Prerequisite: Admission to graduate school.

C&T 816. Culturally Responsive Pedagogy. 3 Credits.
U.S. schools are increasingly multilingual spaces, where new waves of migration and refugee resettlement are reshaping the linguistic landscape of previously English-dominant spaces. It is from this perspective that this course explores the history and evolution of culturally responsive pedagogy--beginning with its origin in U.S. multicultural education, to its expansion into the education of culturally and linguistically diverse learners, to its adoption in English language education more broadly, and TESOL teacher education more specifically (in the U.S. and abroad). The course will highlight the curricular and instructional approaches that undergird CRP and the future global direction of this pedagogical approach.

C&T 817. Contact, Change & American English. 3 Credits.
This course introduces the sociolinguistic topics of language change and variation through a study of the historical evolution of what has come to be known as modern American (U.S.) English. The course will explore the historical instances of contact between English and other languages that have resulted in significant and minor changes, as well as regional variations to spoken and written American English. It will also discuss the pedagogical and research implications of these changes for teaching English in the U.S. and abroad.

C&T 818. Language, Discourse and Ideology. 3 Credits.
Language, Discourse and Ideology adopts an interdisciplinary approach to exploring the language ideologies that shape English language development in EFL, ESL, and Bilingual / Dual Immersion contexts. The study of language ideology is a subfield of Sociolinguistics and is linked to issues of language, ideologies about language, and language as a vehicle for ideology. Though language is a focus of this course, the course is “not about language alone. Rather, ...[it addresses] ties of language to identity, to aesthetics, to morality, and to epistemology” (Woolard 1998: 3) and the ways in which these uses of language reflect and reproduce language ideologies. The course is open to graduate students across the School of Education with an interest in language, English as a Second/Foreign language, and policy planning and curriculum studies. It is also open to students in anthropology, linguistics, sociology and related fields with an interest in language use in educational contexts.

C&T 819. Foreign Language/EFL Teaching Methods. 3 Credits.
This course addresses foreign language/EFL teaching methods and techniques that are related to second language acquisition theories and appropriate for the teaching of foreign languages/EFL to children, adolescents, and adult learners. Prerequisite: Admission to a graduate program (Master or Doctorate.)

C&T 820. Methods of Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
The purpose of this course is to study the objectives and methods of ESL/Bilingual education. Students will examine methods and techniques of teaching: listening, speaking, reading, and writing in the ESL/Bilingual Education settings. The course will also emphasize the importance of culture in second language teaching, and self-evaluation of teaching and instructional materials. Prerequisite: Corequisite: C&T 709.

C&T 821. Assessment in Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
This course provides an overview of diagnostic techniques and instruments used to identify and remediate specific learning difficulties associated with normal second language development in the area of listening, speaking, reading, and writing. The course includes a review of research concerning assessment as it relates to error analysis in the second language context. Prerequisite: Corequisite: C&T 820.

C&T 822. Second Language Acquisition for Teaching English to Speakers of Other Languages Educators (TESOL). 3 Credits.
This course provides an intensive review of the theory and research base of second language acquisition. Particular attention is given to the influence of research trends in linguistics and psychology on second language education theory and practice. Current trends in second language education are examined in light of the historical theory base. Prerequisite: C&T 820.

C&T 823. Intercultural Competence for Teaching English to Speakers of Other Languages Educators (TESOL). 3 Credits.
This course includes the study of the interrelationship of language and culture and the use of multicultural training techniques to develop cultural awareness and positive attitudes in the second language classroom.

Emphasis is on the integration of culture in the second language curriculum. Prerequisite: C&T 820 or C&T 803.

C&T 824. Problems in Second Language Instruction. 3 Credits.
This course presents a study of curricula and instruction in the second language setting at all levels with emphasis on educational research concerning these issues. Particular attention is given to developing competency in locating and utilizing sources of information and to preparing the research document. The course facilitates practical problem solving in the second language learning context. Prerequisite: C&T 820.

C&T 825. Advanced Practicum in Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
This course provides a supervised teaching experience in a setting appropriate to the goals of the prospective ESL/Bilingual teacher: elementary, secondary, or adult. Particular attention is given to lesson planning, classroom management, and the development of self-evaluation techniques. This course will also emphasize structured classroom observation prior to teaching and techniques for developing and maintaining positive working relationships with other professionals in the school setting. Prerequisite: C&T 820, C&T 821, and C&T 822 or C&T 824.

C&T 826. Linguistic Analysis for Teaching English to Speakers of Other Languages Educators (TESOL). 3 Credits.
This course offers pre- and in-service teachers the basic foundations of language analysis necessary for the teaching of second/foreign languages. The course covers basic linguistic topics common to all human languages (grammatical, phonological, and semantic aspects) with the intent to help teachers understand and address common language problems that students face when learning English as a second/foreign language.

C&T 827. Teaching Pronunciation for Foreign Language/Teaching English to Speakers of Other Languages (TESOL). 3 Credits.
The objective of this course is to give prospective language teachers the requisite theoretical and practical background for making decisions concerning pronunciation teaching. This course provides second and foreign language teachers with the necessary knowledge and skills to address the teaching of pronunciation in the foreign/second language classroom. After a review of theoretical and practical research dealing with universal human speech perception and production, implications for the design of appropriate strategies and lessons to teaching pronunciation, both at the segmental and suprasegmental levels, are addressed. Prerequisite: C&T 444, C&T 820 or C&T 822.

C&T 828. Language and Identity. 3 Credits.
This interdisciplinary seminar explores the interrelationship between language and identity, and the role of language in developing identities of second language learners.

C&T 829. Teaching English to Speakers of Other Languages in Global Context (TESOL). 3 Credits.
The purpose of this course is to investigate contemporary issues in and key concepts pertaining to Teaching English to Speakers of Other Languages (TESOL) throughout the world. We will examine primary research and employ a sociocultural lens to better understand how the phenomenon of globalization has shaped how, why, and the conditions under which English is taught and learned on different continents, as well as critiquing research methods and approaches to studying English language teaching and learning.

C&T 840. Emergent Literacy and Beginning Reading. 3 Credits.
A study of emergent literacy through the beginning stages of literacy development. Course content focuses on the history, theory, and research that supports instructional reading practices for children Pre-kindergarten
through grade 2. Prerequisite: C&T 740, C&T 741, or permission of instructor.

C&T 841. Early Intervention in Reading Practicum. 3 Credits.
A case study approach to the instruction of children in need of early intervention in reading. Requires assessment, instruction, and case reports of tutored children. Prerequisite: C&T 740 or permission of instructor. Concurrent enrollment or previous enrollment in C&T 840 is required.

C&T 842. Supporting Striving Readers: Adolescent through Adult. 3 Credits.
A study of the characteristics and multiple causes of reading and writing difficulties, principles and procedures for diagnosing and remediating reading difficulties, how to provide individual and group intervention strategies, communicate diagnostic information, and gain awareness of the impact of research on instructional decision-making for students with reading difficulties. Prerequisite: Admission to a masters program within the School of Education, C&T 740, C&T 741, C&T 840, and C&T 841, or permission of instructor.

C&T 843. Supporting Striving Readers Practicum. 3 Credits.
Case study approach to the treatment of pre-adolescent through adults with reading disabilities. Requires diagnostic testing of the learner, compilation of case study reports, and participating in staffing for the purpose of designing remedial reading programs. Students also participate in implementation of remedial programs with pre-adolescent through adults through tutoring in either a clinical setting or a public school setting. Prerequisite: C&T 740, C&T 840, C&T 841, or permission of instructor. Concurrent enrollment or previous enrollment in C&T 842 is required.

C&T 844. The Reading Program: Coordination and Supervision. 3 Credits.
An overview of the role of the reading coordinator/supervisor and that individual's responsibility for the components of a balanced reading program. Emphasis will be given to assessment of the reading program, strategies for change, improving the reading program, in-service programs, working with other school personnel, providing services, and public relations. Prerequisite: C&T 740, C&T 741, C&T 840, C&T 841, C&T 842, and C&T 843.

C&T 850. Seminar in Science and Mathematics Educational Research. 3 Credits.
The primary purpose of this course is to examine literature in science and mathematics education in order to better understand research in these fields from both a historical and contemporary perspective. The process of examining literature in these fields will be used to help understand how to plan, conduct, and evaluate research in science and math education. This course emphasizes both qualitative and quantitative research in science and math education.

C&T 851. Modern Approaches to Middle/Secondary School Mathematics. 3 Credits.
A study of aspects of curriculum and instruction in middle/secondary school mathematics programs, including research on teaching and learning mathematics. Prerequisite: Teaching experience in middle-level or high school mathematics or permission of instructor.

C&T 852. Instruction in Mathematics and Science. 3 Credits.
In this course, students will explore a variety of research-based instructional theories, models, and strategies for teaching and learning of mathematics and science. They will apply and evaluate the usage of one instructional strategy in an action research project in their classrooms. Prerequisite: C&T 709.

C&T 854. Assessment and Evaluation in Science and Mathematics. 3 Credits.
The primary purpose of this course is to examine assessment and evaluation in science and mathematics, including assessment of students, teachers, schools, and educational programs. The course will examine technical characteristics of various assessment methods including both traditional and alternative methods. In addition, the course will analyze and discuss various controversial issues in assessment such as authentic assessment, and large scale assessment, and large scale assessments, assessment for accountability, and equity issues.

C&T 855. Curriculum in Science and Mathematics. 3 Credits.
A survey of the concepts and processes that provide the focus of modern science and mathematics curricula will be central to the course. Students develop a standards-based framework for a school science or mathematics program. The course includes an analysis of national and state recommendations for the reform of science and mathematics education in the context of our state and local educational systems, which is applied by evaluating exemplary instructional materials and activities appropriate for classroom use. Prerequisite: C&T 709.

C&T 857. Practicum in Mathematics Education. 1-3 Credits.
Intensive supervised experience working with improvement of mathematics curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in mathematics education and prior consent of practicum supervisor.

C&T 858. Connecting Research to Classroom Practice in Mathematics. 3 Credits.
This course will explore current research on issues important to mathematics teachers so they can use research to support and improve their classroom practice. Prerequisite: Teaching experience or permission of instructor.

C&T 859. Issues in Mathematics or Science Education. 1-3 Credits.
A study of issues in a particular area of mathematics or science education. The course may be repeated for different topics. Prerequisite: Admission to graduate study.

C&T 862. Trends and Issues in Social Studies Instruction. 3 Credits.
A study of trends and issues relating to, and needed changes in the content, organization, emphasis, resources and equipment, methods, devices and evaluation in the social studies. Consideration of related problems such as achieving meaning and understanding, providing for individual differences, providing motivation, the cooperative assignment and socialized recitation. Students will be permitted to concentrate on those problems of particular interest to them. Prerequisite: Nine hours of Education including educational psychology.

C&T 870. Instructional Media Development. 3 Credits.
The purpose of this course is to help students acquire fundamental technical skills required for developing various instructional media products. This course takes a hands-on, practical approach to creating various computer-based instructional materials, such as digital image, audio, video, and computer animation for Web and mobile devices. This course is prerequisite for several courses in the program. No previous design or development experience is required.

C&T 871. Foundations of Learning Technology. 3 Credits.
This course provides a comprehensive overview of the historical and theoretical foundations of learning technologies. The goal of this course is to provide students with a survey of the research literature and definitions
of terminology central to the field. Special emphasis is on current and emerging learning science research and how it can be applied to the creation of technology supported learning environments.

C&T 872. Social Media Technology. 3 Credits.
This course provides students with an introduction to the use of social media and cloud computing. Social media and cloud computing enable individuals to create, collaborate, and share information. Students will develop implementation strategies and acceptable use policies for the use of social media and cloud computing in the context of K-16 education, government, and corporate settings.

C&T 873. Integration of Learning Technology. 3 Credits.
This course focuses on strategies for integrating learning technologies in K-12 schools, universities, corporate and government settings. Topics cover the National Educational Technology Standards that apply information technology to: a) inspire learning and creativity, b) develop digital-age learning experiences and assessments, c) model digital-age work, d) advance digital citizenship, and e) engage in professional growth and leadership. Students produce a comprehensive electronic portfolio that describes the theoretical perspectives that guide their technology integrations strategies and presents evidence that demonstrates their competencies.

C&T 874. Constructivist Learning Technology. 3 Credits.
To be effective, educational technologies must be designed based on what we know about how people learn. This course explores (1) important constructivist learning theories, (2) how such learning theories can be used in designing and developing computer-based learning environments, and (3) how student learning can be assessed in those environments. This course is suitable for students who wish to learn how constructivist learning technologies can change the way we teach and learn new knowledge to improve student learning.

C&T 875. Design of Learning Technology. 3 Credits.
This course introduces instructional design theories and production techniques for developing and evaluating learning technology resources and systems. Students apply their understandings of instructional systems design and learning theories as they work in teams to develop learning technology solutions for specific clients in real-world settings.

C&T 876. Online Learning Design and Development. 3 Credits.
The course provides an overview of the knowledge and skills for that are essential for designing and developing online instruction. The goal of the course is for students to acquire the analysis, design, development, and evaluation skills needed to facilitate learning in both asynchronous and synchronous online learning environments. Special emphasis is on learning design, and the evaluation of online learning solutions for education, medicine, military, business, and industry.

C&T 877. Games and Simulations for Learning. 3 Credits.
This course provides an introduction to the design and development of games, gamification, and simulations for learning and instruction. Emphasis is on the selection and design of interactive learning environments for K-16 education and workforce training. Topics include a review of the essential elements of game design, rapid prototyping, the psychology of gaming, game technology, and research related to the use of games, gamification, and simulations in K-16 education and workforce training.

C&T 890. Bridging Theory to Practice: Capstone Portfolio. 3 Credits.
This capstone course provides a space and opportunity for students to reflect on their learning in the M.S.E. online programs. Students will create a digital portfolio demonstrating their knowledge and skills related to the C&T learning outcomes. Students will demonstrate their engagement with relevant literature and explain how they can use, share, or apply their learning from the program to their current or future context. Prerequisite: Students must have achieved a minimum grade point average of 3.0 on a 4.0 basis in their Curriculum & Instruction master's program in order to be eligible to enroll.

C&T 896. Seminar in: ____. 1-4 Credits.

C&T 897. Independent Study. 1-4 Credits.
Prerequisite: Consent of advisor and instructor.

C&T 898. Master's Project. 1-4 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

C&T 899. Master's Thesis. 1-6 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

C&T 900. Current Trends & Issues in Curriculum & Instruction. 3 Credits.
The course, taught as a capstone seminar, will provide a review of current trends and issues in theories, practices, and events within curricular and instructional efforts in American education. Topics studied may include constructivism, connectivism in the digital age, contemporary theories and theorists such as Vygotsky, online instruction and the Internet's potential and growth, the new Cult of Efficiency, stigmatization and standardized testing, and charter schools. Student composition of each class will influence the final syllabus, which may include other topics reflective of student interests and goals. The class is designed for those in the final course phase of their doctoral studies. Students in their first or second semester of their programs will not be encouraged to enroll in the class.

C&T 901. Contemporary Research of Teaching Effectiveness. 3 Credits.
A review of recent research on the conceptualization, measurement, and improvement of teaching effectiveness. Particular attention is given to the history of efforts to improve teaching, to the reasons why such efforts have often been unsuccessful, and to the recent contributions of the “micro-criteria” approach to the problem.

C&T 902. Directed Readings. 3 Credits.
Directed Readings course is intended for students wishing to study an area not covered by or regularly offered in an existing course, or the subject of a course that is not regularly offered in the Curriculum & Teaching Department. This course is individually designed by C&T faculty with reading loads, writing requirements and academic expectations comparable to other doctoral level courses in the department. Prerequisite: Admission to the Ph.D. or Ed.D. program. Successful completion of C&T 920 or C&T 922 or by instructor permission.

C&T 903. Curriculum Supervision. 3 Credits.
An intensive study of the theoretical and research bases for curriculum supervision and improvement. Topics include models and practices in supervision and staff development, skills and instruments used in curriculum assessment, coordination of both human and material resources, and the dynamics of change strategies.

C&T 904. Philosophical Questions in Curriculum and Teaching. 3 Credits.
This course addresses philosophical questions pertaining to curriculum and teaching across a range of educational contexts. These questions center on epistemology, ethics, and the assumptions underlying alternative approaches to research in education. Students completing this course should be able to engage in philosophical inquiry and apply relevant philosophical literature and principles to the examination of curriculum and teaching.

C&T 905. Teacher Education in the U.S.. 2 Credits.
A study of the development, issues, and programs for the preparation of teachers. Open to all regular graduate students.

**C&T 906. Qualitative and Curriculum Inquiry: Analysis and Interpretation. 3** **Credits.**

Supports novice researchers in extending their understanding of the theoretical frameworks underlying qualitative research, qualitative methodologies, the research process and its relationship with curriculum inquiry. During the course we will discuss various forms of qualitative research methods, approaches to research, and perspectives in methodology relate to curriculum inquiry. We will explore the intertwining of data generation, analysis, and writing. In addition, we will focus on refining data generation techniques, strategies for data analysis, data interpretation, and various forms of reporting/writing. Prior coursework: Introduction to a graduate level qualitative research course or permission from the instructor. Prerequisite: Introduction to a graduate level qualitative research course or permission from the instructor.

**C&T 907. Critical Pedagogies. 3 Credits.**

This course examines the theories and practices of several educational orientations that comprise “critical pedagogy.” Students examine the historical roots and evolution of this broad orientation toward education. Recurring themes in the class are relations between knowledge and curriculum, the school and society, and teachers and students. Students completing the course should be able to analyze educational phenomena through a critical theoretical lens. Open to all doctoral students and advanced masters students with instructor permission.

**C&T 920. Introduction to the Curriculum & Instruction Doctor of Education Program. 1 Credits.**

This course is designed to provide first-year doctoral students an introduction of graduate study in the Doctor of Education (Ed.D.) program. The course will help students acculturate to University and Graduate School level expectations and conditions, and to begin the development of skills and abilities to translate theory and research into practice. Students will be guided through the critical skills of how planning and conducting research can translate to academic writing and scholarship in a field of study. Prerequisite: Admission to the Ed.D. program in curriculum and instruction.

**C&T 922. Introduction to the Curriculum & Instruction Doctor of Philosophy Program. 1 Credits.**

This seminar course introduces students to doctoral education, the faculty with whom they will work, the regulations and policies that guide their work and the structure and assessment for the Ph.D. program. This course will also assist students in becoming familiar with scholarship and planning, conducting, and sharing (writing and presenting) results of research. Prerequisite: Admission to the C&I Ph.D. program.

**C&T 924. Advanced Research in 2nd Language Teaching and Learning. 3 Credits.**

This course provides doctoral level students an in-depth overview of current issues in second language teaching and learning. Each week, we will explore research methodologies most appropriate for investigations of second language learning and teaching processes and the theoretical foundations that such research brings to light. Class reading assignments will draw from both “how to” handbooks and actual primary research, and students will engage in weekly reactions to and discussions of the readings. Students will also be guided in the development of research questions that target critical gaps in our current understanding of language teaching and learning. The culminating assignment is the preparation of a research proposal, an initial step toward the doctoral dissertation. Prerequisite: C&T 820, C&T 821, C&T 822, Admission to Doctoral Program; or permission of Instructor.

**C&T 940. Evaluation of Research in Reading. 3 Credits.**

This course is designed to support doctoral level students’ ability to evaluate research around the teaching of reading. Issues of theory, research design, and methodology will be taken into consideration. Additional purposes include fostering discussion about prominent literacy researchers, influential journals, and writing, as well as factors that influence reading research.

**C&T 951. Research and Evaluation in Mathematics and Science. 3 Credits.**

This course introduces students to the processes of planning, conducting, and evaluating mathematics and science research and evaluation in education. This course emphasizes the methods and techniques used in both quantitative mathematics and science research and evaluation methodologies. Prerequisite: A PRE course in statistics.

**C&T 970. Fostering Teacher Growth and Inquiry. 3 Credits.**

Students will explore theory and research related to professional learning with a focus on the professional learner, professional contexts, and professional learning activities. Students also will learn about and design a pilot study that is set in a relevant professional context. Prerequisite: Admission to the Ed.D. program in the Department of Curriculum & Teaching or consent of instructor.

**C&T 971. Planning and Conducting Educator Inquiry in Professional Settings. 3 Credits.**

Students will explore theory and research related to student learning and its relationship to the professional learner, professional contexts, and professional learning activities. Students will learn how to conduct a needs assessment in educational settings, and design and implement professional learning based on the needs assessment data. Students will also implement the pilot study that they designed in C&T 970. Prerequisite: C&T 970.

**C&T 972. Connecting Professional Growth and Student Learning. 3 Credits.**

Students will synthesize theory and research related to (a) curriculum and instruction, and (b) the relationship between student learning and professional learner, with respect to their career goals. Students will write a report and present findings from their pilot study the professional learning they implemented in C&T 971. Prerequisite: C&T 970 and C&T 971.

**C&T 975. Writing Literature Reviews. 1 Credits.**

This course is designed to give doctoral students an introduction to writing literature reviews. The course will address the process of writing a literature review as well as the types of literature reviews that appear in dissertation study proposals and dissertations. The course is a 1-credit seminar that is designed to complement other coursework taken in the doctoral program. Prerequisite: Admission to a doctoral program in the University of Kansas, or permission from the instructor.

**C&T 977. Teaching with Technology in Higher Education. 3 Credits.**

The purpose of this course is to support the use of technology to deliver, manage, and design pedagogically sound learning experiences. The course will draw upon the fields of instructional design and educational technology and is theoretically grounded in critical digital pedagogy. Learners are asked to bring their own disciplinary lens to authentic design, technology, and teaching challenges. The course will be offered in a hybrid format with in-class sessions and with supporting online meetings and modules. The course will be organized into modules.

**C&T 980. Seminar in Mixed Methods Research. 3 Credits.**

The purpose of this course is to provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. This introduction consists of defining mixed
methods research and describing the history and foundations of this form of research. We will then examine types of mixed methods designs available and discuss the process of research as it relates to each of these designs.

C&T 990. Capstone Seminar. 3 Credits.
This course will provide students in the Doctor of Education program with capstone experiences in the areas of curriculum and instruction in preparation for comprehensive examinations. Prerequisite: Admission to the Curriculum & Instruction Ed.D. program.

C&T 994. Advanced Topics: ______. 1-3 Credits.
A special course of study to meet current needs of education professionals -- primarily for post-master's level students.

C&T 995. Field Experience in: ______. 1-5 Credits.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agencies, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

C&T 996. Teaching and Learning in the College Classroom. 3 Credits.
This course identifies strategies of instruction, both face-to-face and online, for post-secondary learners. Students will analyze characteristics and needs of post-secondary learners and develop curriculum; for example, a syllabus, units, lessons, assessments, and course objectives, aligning objectives with assessments to learner outcomes for post-secondary learners. Prerequisite: Admission to a graduate program in the University of Kansas.

C&T 997. Individual Study. 1-4 Credits.
Prerequisite: Prior graduate course work in the area of study and consent of instructor.

C&T 998. Seminar in: ______. 1-4 Credits.

C&T 999. Doctoral Dissertation. 1-15 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Science in Education

Bachelor of Science in Education degrees from the Department of Curriculum and Teaching are offered in:

• Elementary Education – grades Kindergarten – 6th
• Elementary Education Unified - grades Kindergarten - 6th, in both general and special education classrooms
• English Education Secondary – grades 6th – 12th
• Foreign Language Education – grades pre-Kindergarten – 12th
• History & Government Education Secondary – grades 6th – 12th
• Unified Early Childhood Education – Birth – 3rd grade, in both general and special education classrooms

All programs prepare students to be leaders and professionals in education and to positively impact children, classrooms, families, and society. Undergraduate programs feature extensive coursework in subject areas taught by expert faculty and multiple field experiences in rural, urban and suburban communities. Added endorsement options in Teaching English to Speakers of Other Languages and Special Education are available.

The Elementary education program prepares students to teach all subjects to children in kindergarten through sixth grade. Students have a broad background in English, mathematics, humanities, social sciences, and the sciences coupled with teaching methods classes. Multiple classes include fieldwork in elementary schools to practice and refine teaching skills.

The Elementary Education Unified (EEU) education program prepares students to teach children in kindergarten through sixth grades in general education, special education, and inclusive classrooms, meeting the needs of all elementary students including those with identified disabilities and those at risk for delays. Students learn to structure rigorous learning experiences in multiple core academic content areas as well as address the social/emotional needs of individuals within and beyond each classroom, school, and into the global community.

The Secondary English education program mixes literature-based theory and knowledge with culturally rich readings and discussions. Courses taught by the English Department offer students learning options in rhetoric, linguistics, and literature.

The Foreign Languages education program offers majors in seven foreign languages: Chinese, French, German, Japanese, Latin, Russian or Spanish. Students in this program are encouraged to immerse themselves in the language by adding a Study Abroad experience. Note: Admission to the Chinese and Japanese languages is suspended pending licensure changes.

The Secondary History and Government education program includes multiple content courses in history, economics, political science, and geography from the College of Liberal Arts & Sciences. Students in the program learn how to engage middle and high school students in historical and contemporary topics using effective teaching strategies.

The Unified Early Childhood (UEC) education program leads to licensure for both general education and special education in infant, toddler, preschool, and kindergarten through third grade. Students in this program prepare to work in inclusive settings to meet the learning needs of young children, including those with disabilities.

Undergraduate Admission

Incoming Freshman Students:
Students can be admitted into teacher education programs as freshmen if they meet KU’s assured admission standards and declare a teacher education program as their major.

Incoming Transfer Students:
Students can be admitted into teacher education programs as transfer students if they are admitted to KU, declare a teacher education program as their major, and meet the following criteria:

• A KU + Transfer Cumulative GPA of at least 2.75

Current KU Students:
Students can be admitted into a teacher education program as current KU students if they meet the following criteria:

• A KU + Transfer Cumulative GPA of at least 2.75
Students that do not meet the requirements above can petition through the online SOEHS Admission Petition form. (https://soehs.ku.edu/events-resources/forms-documents/)

For information about initial admission to KU, visit the Office of Admissions (https://admissions.ku.edu/). Visit the Office of International Support Services (https://iss.ku.edu/) for information about international admissions.

**Bachelor of Science in Education Degree Requirements**

**Primary responsibility for meeting graduation requirements rests with the student.**

- Complete an approved program with a minimum of 120 credit hours of course work. At least 30 hours must be taken in residence.
- A 2.75 minimum KU + Transfer Cumulative GPA for all academic coursework, including transfer hours.
- No grade lower than a C- in any teacher education course and no grade lower than a C- in COMS, ENGL, and MATH prerequisite requirements.
- For History & Government, English, and Foreign Language: A 2.5 minimum KU + Transfer Cumulative GPA in content area courses.
- Other general regulations of the School and University, including KU Core Goal requirements. Successful completion of student teaching and/or internship with a grade of C- or higher.

**Requirements to begin student teaching and/or internship:**

- A minimum KU + Transfer Cumulative GPA grade-point average of 2.75 with no grade lower than a C- in any course in professional education.
- Continued demonstration throughout the program of professional dispositions as evaluated by program faculty each semester.
- For History & Government, English, and Foreign Language: A 2.5 minimum KU + Transfer Cumulative GPA in content area courses.

**Kansas Licensure Requirements**

- Passing score on the Educator Performance Assessment (KU-EPA).
- Passing score on the Principles of Learning and Teaching Examination and Praxis content examination(s).
- Completion of Bachelor of Science in Education degree – see above.

*Please note:* Each state has its own licensure requirements. Being eligible for a license in Kansas does not ensure that the applicant is eligible for licensure in other states.

**Unified Early Childhood (Birth–Grade 3) Major**

**Admission Requirements**

Freshmen will be admitted to the Unified Early Childhood Education program if they are admitted to KU with assured admission criteria and declare Unified Early Childhood Education as their major.

**Transfer Requirements**

Students will be admitted to the Unified Early Childhood Education program (from another institution or academic program) if they are admitted to KU with a minimum 2.75 GPA and declare Unified Early Childhood Education as their major.

**TRANSITION POINTS**

Transition Point #1: Progression to the Professional Block 1 requires that all Pre-Professional coursework is completed with a minimum cumulative GPA of 2.75. Must consult with a SOEHS advisor before entering the Professional Blocks. Students must complete the following:

1. Declare intent to continue in teacher education program and enter the professional sequence.
2. Earn a minimum cumulative grade point average of 2.75.
3. Clear a criminal background check prior to placement in schools.
4. Complete the non-academic factor survey.
5. Earn a minimum 2.50 GPA in the KU Core Curriculum and General Education courses.
6. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.

Transition Point #2: Progression into Professional Block 2 requires students to:

1. Earn a final grade of "C-" or better in required education courses.
2. Clear a criminal background check prior to placement in schools.
3. Have maintained an overall GPA of at least 2.75.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.
5. Approval by the Associate Dean for Teacher Education and Undergraduate Programs.

Transition Point #3: Progression into Professional Block 3 requires students to:

1. Earn a final grade of "C-" or better in Student Teaching.
2. Have maintained an overall GPA of at least 2.75.
3. Complete all required degree coursework except Block 3 coursework.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration and by university and clinical supervisors.

Transition Point #4: Completion of Program requires:

1. Successful completion of the KU-Educator Performance Assessment and all other School of Education & Human Sciences requirements.
2. Completion of all required degree coursework with a 2.75 or higher cumulative grade point average.
3. Achievement of a grade of "C-" or better in professional education courses including internship and student teaching.
4. Earning the B.S.E. degree.

Additional requirements to be eligible for an initial Kansas teaching license:

1. To qualify for a Kansas initial teaching license, candidates must complete a content knowledge assessment in each of the endorsement or teaching subject areas for which you completed a teacher preparation program and meet the minimum score set by the Kansas State Department of Education.
2. Candidates will also need to complete a pedagogy or teaching skills test, the Principles of Learning and Teaching and meet the minimum score set by the Kansas State Department of Education.

## Elementary (K–6) Major

### Admission Requirements

Freshmen will be admitted to the Elementary Education program if they are admitted to KU and declare Elementary Education as their major.

### Transfer Requirements

Students will be admitted to the Elementary Education program (from another institution or academic program) if they are admitted to KU and declare Elementary Education as their major.
### TRANSITION POINTS

Transition Point #1: Progression to the Professional Block 1 requires that all Pre-Professional coursework is completed with a minimum cumulative GPA of 2.75. Must consult with a SOEHS advisor before entering the Professional Blocks. Students must complete the following:

1. Declare intent to continue in teacher education program and enter the professional sequence.
2. Earn a cumulative grade point average of 2.75.
3. Have maintained an overall GPA of at least 2.75.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.
5. Approval by the Associate Dean for Teacher Education and Undergraduate Programs.

Transition Point #2: Progression into Professional Block 2 requires students to:

1. Earn a final grade of "C-" or better in required education courses.
2. Clear a criminal background check prior to placement in schools.
3. Have maintained an overall GPA of at least 2.75.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.
5. Approval by education faculty and administration.

Transition Point #3: Progression into Professional Block 3 requires students to:

1. Earn a final grade of "C-" or better in Student Teaching.
2. Have maintained an overall GPA of at least 2.75.
3. Complete all required degree coursework except Block 3 coursework.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration and by university and clinical supervisors.

Transition Point #4: Completion of Program requires:

1. Successful completion of the KU-Educator Performance Assessment and all other School of Education & Human Sciences requirements.
2. Completion of all required degree coursework with a 2.75 or higher cumulative grade point average.
3. Achievement of a grade of "C-" or better in professional education courses including internship and student teaching.
4. Earning the B.S.E. degree.

Additional requirements to be eligible for an initial Kansas teaching license:

1. To qualify for a Kansas initial teaching license, candidates must complete a content knowledge assessment in each of the endorsement or teaching subject areas for which they completed a teacher preparation program and meet the minimum score set by the Kansas State Department of Education.
2. Candidates will also need to complete a pedagogy or teaching skills test, the Principles of Learning and Teaching and meet the minimum score set by the Kansas State Department of Education.

Pre-Professional coursework is completed with a minimum cumulative GPA of 2.75. Must consult with a SOEHS advisor before entering the Professional Blocks. Students must complete the following:

1. Declare intent to continue in teacher education program and enter the professional sequence.
2. Earn a minimum cumulative grade point average of 2.75.
3. Clear a criminal background check prior to placement in schools.
4. Complete the non-academic factor survey.
5. Earn a minimum 2.50 GPA in the KU Core Curriculum and General Education courses.
6. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.

Transition Point #2: Progression into Professional Block 2 requires students to:

1. Earn a final grade of "C-" or better in required education courses.
2. Clear a criminal background check prior to placement in schools.
3. Have maintained an overall GPA of at least 2.75.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.
5. Approval by the Associate Dean for Teacher Education and Undergraduate Programs.

Transition Point #3: Progression into Professional Block 3 requires students to:

1. Earn a final grade of "C-" or better in Student Teaching.
2. Have maintained an overall GPA of at least 2.75.
3. Complete all required degree coursework except Block 3 coursework.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration and by university and clinical supervisors.

Transition Point #4: Completion of Program requires:

1. Successful completion of the KU-Educator Performance Assessment and all other School of Education & Human Sciences requirements.
2. Completion of all required degree coursework with a 2.75 or higher cumulative grade point average.
3. Achievement of a grade of "C-" or better in professional education courses including internship and student teaching.
4. Earning the B.S.E. degree.

Additional requirements to be eligible for an initial Kansas teaching license:

1. To qualify for a Kansas initial teaching license, candidates must complete a content knowledge assessment in each of the endorsement or teaching subject areas for which you completed a teacher preparation program and meet the minimum score set by the Kansas State Department of Education.
2. Candidates will also need to complete a pedagogy or teaching skills test, the Principles of Learning and Teaching and meet the minimum score set by the Kansas State Department of Education.

Admission and Transfer Requirements

Admission Requirements

Freshmen will be admitted to the Secondary Teacher Education program if they are admitted to KU meeting assured admission criteria and declare Secondary Teacher Education as their major.

Transfer Requirements

Students will be admitted to the Secondary Teacher Education program (from another institution or academic program) if they are admitted to KU with 2.75 GPA or higher and declare Secondary Teacher Education as their major.

TRANSITION POINTS

Transition Point #1: Progression to the Professional Block 1 requires that all Pre-Professional coursework is completed with a minimum cumulative GPA of 2.75. Must consult with a SOEHS advisor before entering the Professional Blocks. Students must complete the following:

1. Declare intent to continue in teacher education program and enter the professional sequence.
2. Earn a minimum cumulative grade point average of 2.75.
3. Clear a criminal background check prior to placement in schools.
4. Complete the non-academic factor survey.
5. Earn a minimum 2.50 GPA in the KU Core Curriculum and General Education courses.
6. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.

Transition Point #2: Progression into Professional Block 2 requires students to:

1. Earn a final grade of "C-" or better in required education courses.
2. Clear a criminal background check prior to placement in schools.
3. Have maintained an overall GPA of at least 2.75.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.
5. Approval by the Associate Dean for Teacher Education and Undergraduate Programs.

Transition Point #3: Progression into Professional Block 3 requires students to:

1. Earn a final grade of "C-" or better in Student Teaching.
2. Have maintained an overall GPA of at least 2.75.
3. Complete all required degree coursework except Block 3 coursework.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration and by university and clinical supervisors.

Transition Point #4: Completion of Program requires:

1. Successful completion of the KU-Educator Performance Assessment and all other School of Education & Human Sciences requirements.
2. Completion of all required degree coursework with a 2.75 or higher cumulative grade point average.
3. Achievement of a grade of "C-" or better in professional education courses including internship and student teaching.
4. Earning the B.S.E. degree.

Additional requirements to be eligible for an initial Kansas teaching license:

1. To qualify for a Kansas initial teaching license, candidates must complete a content knowledge assessment in each of the endorsement or teaching subject areas for which you completed a teacher preparation program and meet the minimum score set by the Kansas State Department of Education.

may complete their practicum as part of a study abroad experience, such as the TESOL Practicum in Korea.

The certificate courses will meet industry standards as provided by TESOL International. This certificate does not provide sufficient qualifications for a state license or endorsement to teach English as a Second Language (ESL) in U.S. K-12 public schools.

Effective December 2020: The School of Education & Human Sciences does not currently accepting applications for TEFL certificate program.

The TEFL Certificate is an online undergraduate program totaling 12 credit hours. The culminating experience is a supervised EFL practicum in which students are placed in a TESOL course for immigrants, refugees, or international students, such as the Applied English Center at KU, or they may complete their practicum as part of an approved study abroad experience, such as the TESOL Practicum in Korea.

Four courses comprise this online-delivered program. Students will take the following sequence as a cohort: C&T 380 - English as a Global Language, C&T 330 - Methods of Teaching English as a Foreign Language, C&T 424 - Second Language Acquisition, and C&T 491 - Practicum in Teaching English as a Foreign Language.

C&T 380: English as a Global Language

In this course, students explore the political, cultural, historical, and economic factors that drive English’s status as a global language and the demand to learn it. They attend to such questions as, Why a global language, and why English? Is the spread of English necessarily natural, neutral, and beneficial? Then, they consider implications of answers to the above questions on teaching English internationally, since English teaching positions overseas provide ideal opportunities for college-age Americans to live and work abroad. The projects assigned in the course are designed to teach students to think critically about issues related to prominence of English teaching and learning around the world. In addition, students will learn about employment and career opportunities as teachers of English as a Foreign Language, and prepare a resume that highlights their professionalism in EFL.

C&T 330: Methods of Teaching English as a Foreign Language

This course provides an overview of Teaching English as a Foreign Language, including theories of second language acquisition and the methodological practices that derive from those theories. Students will gain knowledge in and practice a variety of EFL approaches for teaching and assessing skills in speaking, listening, reading, and writing, and will compare the appropriateness of those approaches with respect to different international contexts and learners of different ages and linguistic and cultural backgrounds. Students will also gain knowledge of common EFL curriculum designs, and skills in curricular planning, lesson planning, and student assessment.

C&T 424: Second Language Acquisition

This course provides an introduction to the process of second language acquisition as it relates to English language learners (ELLs) in a U.S. preK-12 context. Particular attention is given to the influence of cognitive, affective, and sociocultural factors in second language acquisition. Current developments in second language acquisition are reviewed and evaluated in keeping with the needs of professionals in the context of second language education.

C&T 491: Practicum in Teaching English as a Foreign Language
The Practicum in TEFL allows individuals to gain supervised experience in Teaching English as a Foreign Language. It engages students in the direct application of theories of second language acquisition and models of English as a Foreign Language practice, either with immigrants, refugees, or international students in a U.S. setting or with children or adults of EFL abroad. In addition, students will acquire cross-cultural knowledge of educational settings in general and the English language classroom in particular through activities and experiences aimed at developing critical understandings of how culture affects educational practice and the role of English as an international language.

Master of Arts in Curriculum and Instruction

Programs in Curriculum and Instruction prepare students to complete advanced degrees by addressing critical issues in learning, teaching, and curriculum, from local to global levels.

The Master of Arts, Education (M.A.) in Curriculum and Instruction is a degree with a focus in Teaching English to Speakers of Other Languages (TESOL). TESOL is a term that comprises both TESL, Teaching English as a Second Language, and TEFL, Teaching English as a Foreign Language. This degree program is offered at the KU Lawrence campus only. The M.A. candidate completes graduate courses both in education and in TESOL. This provides the candidate an opportunity to gain advanced knowledge in education as well as in TESOL.

The M.A./TESOL is a cohort program that starts each fall semester, with required courses to help graduates achieve their goals. Students work with an advisor to choose electives based on individual career goals. There are three options for completing the M.A. degree: thesis, project, and examination. The thesis and project options each require a minimum of 30 graduate credit hours, culminating in successful defense of a thesis or project. The examination option requires a minimum of 36 graduate credit hours, culminating in successful completion of a comprehensive written examination.

Students who select the thesis or project options must complete at least 20 of the credit hours in regular course work, as contrasted with independent study and similar enrollments. Students who select the examination option must complete at least 26 credit hours in regular course work, as contrasted with independent study and similar enrollments.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Graduate Admission to the Department of Curriculum and Teaching

In addition to general requirements for admission to graduate study in the School of Education and Human Sciences, master’s degree programs in Curriculum and Instruction require completion of an appropriate undergraduate program and, in some instances, a teaching license. Materials describing all Curriculum and Instruction programs may be obtained from the department (http://ct.soe.ku.edu/).

Please refer to the graduate application for application deadlines.

Admission to the Master of Arts in Curriculum and Instruction Program (Domestic Applicants)

The following materials must be submitted:

- A completed domestic online graduate application (https://gradapply.ku.edu/).
- 1 official transcript of all previous undergraduate and graduate credit. Master’s applicants must have earned a bachelor’s degree with at least a 3.0 grade-point average on a 4.0 scale from an accredited university.
- 3 letters of recommendation. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
- A statement of career goals.
- A vita or résumé.

Admission to the Master of Arts in Curriculum and Instruction Program (International Applicants)

The following materials must be submitted:

- A completed international online graduate application (https://gradapply.ku.edu/).
- 2 official transcripts (1 in the original language and 1 in English translation) of all previous undergraduate and graduate credit. Master’s applicants must have earned a bachelor’s degree or equivalent with at least a 3.0 grade-point average on a 4.0 scale. The transcripts must contain the following information:
  - Completion of coursework required for degree
  - Degree earned and date the degree was conferred; if this is not on the transcript, applicants must also submit a degree certificate and/or diploma
  - Official stamp/seal from the school
- 3 letters of recommendation. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
- A statement of career goals.
- A vita or résumé.
- For students whose native language is not English, official scores on the TOEFL (IBT) of at least 23 in Listening, Reading and Writing must be submitted for consideration of admission to the Curriculum and Teaching Department. The IELTS (Academic) official score is
also accepted, with an overall score of at least 6.5, and scores of at least 6.0 in Listening, Reading and Writing. The PTE (Academic) official score is also accepted, with an overall score of at least 60 and scores of at least 55 in Listening, Reading and Writing. The TOEFL, IELTS or PTE scores must be less than two years old at the time of admission. TOEFL/IELTS/PTE scores may not be required if applicant meets the verification of English proficiency requirements as specified below:

Applicants who have earned a baccalaureate degree (or higher) in residence from an accredited university or from a foreign university which conducts all instruction in English and which maintains substantially equivalent bachelor's, master's, or doctoral degree requirements, will be considered fully proficient and will not be required to complete AEC testing or coursework. Degrees earned online may not be used to verify English proficiency.

Please note: Meeting minimum admission standards does not guarantee admission to the program.

All application materials should be submitted online with the graduate application. If there are application materials that cannot be uploaded with the online application, they may be emailed or mailed to the department:

M.A. in Curriculum & Instruction

There are three options for completing the M.A. degree: thesis, project and examination. The thesis and project options each require a minimum of 30 graduate credit hours culminating in successful defense of a thesis or project. The examination option requires a minimum of 36 graduate credit hours culminating in successful completion of a comprehensive examination.

In addition to the required coursework and final thesis, project or examination, students take a minimum of 10 and no more than 15 credit hours in a content area such as Linguistics.

The Curriculum and Instruction M.A. degree program is designed to produce graduates who possess a high level of knowledge of their subject area specialty and contemporary theories, procedures and research in curriculum and instruction.

Required course work for the M.A.:

Additional Degree Requirements:

All M.A./TESOL students must apply online to graduate by the deadline for the semester they will complete their degree requirements. Students should submit their application for degree at the beginning of the semester they plan to graduate.

Students must earn a minimum cumulative grade point average (GPA) of 3.00 on a 4.00 scale to be eligible to graduate. No course may be completed with a grade of U (unsatisfactory), and no course may be completed with a letter grade below C (2.00). If students do not have a minimum 3.00 GPA, they will be required to take additional courses in consultation with their advisor in order to raise their GPA to the minimum 3.00.

A final comprehensive examination in the major subject is required of all candidates for the Master of Arts in Education. Master’s examinations are administered by a committee of at least three members of the Graduate Faculty. The examination is held during the semester of the student’s final enrollment in course work and (in thesis programs) when the thesis has been substantially completed. The department’s request to schedule the general examination must be made on or before the date set by the School of Education and Human Sciences Graduate Division, normally a minimum of two weeks before the examination date.
The degree program adviser and the School of Education and Human Sciences Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher GPA) and that all other degree requirements are met before scheduling the final comprehensive examination.

Students who elect the Master's Thesis option must adhere to the thesis formatting requirements found on the Graduate Studies website. A successful oral examination conducted by an exam committee comprised of faculty members is required, following tentative approval of the written thesis. After a success thesis defense, the M.A./TESOL candidate must submit the thesis for publication and comply with all requirements in the KU Master's Thesis Submission and Publication policy.

The Department of Curriculum & Teaching views the defense of the thesis, presentation of the research project, presentation of the portfolio, and review of the written comprehensive examination as the Final Examination of the Master's degree. If a student receives a grade of Unsatisfactory on the final examination, it may be repeated on the recommendation of the degree program, but under no circumstances may it be taken more than three times.

Sample course work for the M.A./TESOL program follows. Students will also select a minimum of 10 and no more than 15 credits in related courses in a content area outside of Curriculum and Teaching, such as Linguistics, upon consultation with the faculty advisor. Total hours for the M.A./TESOL degree will vary, depending on which option the student elects to complete the degree.

**Master's Comprehensive Exam Option (minimum of 36 total credit hours)**

Additional elective courses to total a minimum of 36 credit hours if the comprehensive exam option is elected to complete the degree.

| Total Hours | 36-43 |

**Additional Degree Requirements**

All M.A./TESOL students must apply online to graduate by the deadline for the semester they will complete their degree requirements. Students should submit their application for degree at the beginning of the semester they plan to graduate.

Students must earn a minimum cumulative grade point average (GPA) of 3.00 on a 4.00 scale to be eligible to graduate. No course may be completed with a grade of U (unsatisfactory), and no course may be completed with a letter grade below C (2.00). If students do not have a minimum 3.00 GPA, they will be required to take additional courses in consultation with their advisor in order to raise their GPA to the minimum 3.00.

A final comprehensive examination in the major subject is required of all candidates for the Master of Arts in Education.

Master's examinations are administered by a committee of at least three members of the Graduate Faculty. The examination is held during the semester of the student's final enrollment in course work and (in thesis programs) when the thesis has been substantially completed. The department's request to schedule the general examination must be made on or before the date set by the School of Education and Human Sciences Graduate Division, normally a minimum of two weeks before the examination date.

The degree program adviser and the School of Education and Human Sciences Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher GPA) and that all other degree requirements are met before scheduling the final comprehensive examination.

Students who elect the Master's Thesis option must adhere to the thesis formatting requirements found on the Graduate Studies website. A successful oral examination conducted by an exam committee comprised of faculty members is required, following tentative approval of the written thesis. After a success thesis defense, the M.A./TESOL candidate must submit the thesis for publication and comply with all requirements in the KU Master's Thesis Submission and Publication policy (https://policy.ku.edu/graduate-studies/ma-thesis/) policy.

The Department of Curriculum & Teaching views the defense of the thesis, presentation of the research project, presentation of the portfolio, and review of the written comprehensive examination as the Final Examination of the Master's degree. If a student receives a grade of Unsatisfactory on the final examination, it may be repeated on the recommendation of the degree program, but under no circumstances may it be taken more than three times.
Master of Science in Education in Curriculum and Instruction

Programs in Curriculum and Instruction prepare students to complete advanced degrees by addressing critical issues in learning, teaching, and curriculum, from local to global levels.

The Master of Science in Education in Curriculum and Instruction provides the candidate an opportunity to:

- Develop a thorough understanding of the relationship of content and content-specific pedagogy
- Demonstrate an in-depth understanding of the content that they plan to teach and provide multiple explanations and instructional strategies so that all students learn
- Apply the ability to critique research and theories related to pedagogy and learning
- Convey an in-depth knowledge of research-based instructional strategies and technologies that help all students learn.

Students will complete a portfolio in their final course. This capstone course provides a space and opportunity for candidates to reflect on their learning in the M.S.E. online programs. Candidates will create a digital portfolio demonstrating their knowledge and skills related to the C&T learning outcomes.

Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Graduate Admission to the Department of Curriculum and Teaching

In addition to general requirements for admission to graduate study in the School of Education and Human Sciences, master’s degree programs in Curriculum and Instruction require completion of an appropriate undergraduate program and, in some instances, a teaching license. Materials describing all Curriculum and Instruction programs may be obtained from the department (http://ct.so.e.ku.edu/).

Admission to the online Master of Science in Education in Curriculum and Instruction Program (Domestic Applicants)

Refer to the graduate application for application deadlines.

The following materials must be submitted:

- A completed domestic online graduate application (https://gograd.ku.edu/apply/). The application fee is $65.
- 1 official transcript of all college records with at least a 3.0 grade-point average on a 4.0 scale. Applicants with a grade-point average below 3.0 will be considered for admission, but admission is not guaranteed.
- 3 letters of recommendation. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
- A statement of career goals.
- A vita or résumé.

Admission to the online Master of Science in Education in Curriculum and Instruction Program (International Applicants)

Refer to the graduate application for application deadlines.

The following materials must be submitted:

- A completed international online graduate application (https://gograd.ku.edu/apply/). The application fee is $65.
- 2 official transcripts of all undergraduate credit including degree conferral (1 in the original language and 1 in English translation) with at least a 3.0 grade-point average on a 4.0 scale. Applicants with a grade-point average below 3.0 will be considered for admission, but admission is not guaranteed. The transcript must contain the following information:
  - Completion of course work required for degree
  - Degree earned and date the degree was conferred; if this is not on the transcript, applicants must also submit a degree certificate and/or diploma
  - Official stamp/seal from the school
- 3 letters of recommendation. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
- A statement of career goals.
- A vita or résumé.
- For students whose native language is not English, official scores on the TOEFL (IBT) of at least 23 in Listening, Reading and Writing must be submitted for consideration of admission to the Curriculum and Teaching Department. The IELTS (Academic) official score is also accepted, with an overall score of at least 6.5, and scores of at least 6.0 in Listening, Reading and Writing. The PTE (Academic) official score is also accepted, with an overall score of at least 60, and scores of at least 55 in Listening, Reading and Writing. The TOEFL, IELTS or PTE scores must be less than two years old at the time of admission. TOEFL/IELTS/PTE scores may not be required if the applicant meets the verification of English proficiency requirements as specified below:

Applicants who have earned a baccalaureate degree (or higher) in residence from an accredited university or from a foreign university which conducts all instruction in English and which maintains substantially equivalent bachelor’s, master’s, or doctoral degree requirements, will be considered fully proficient and will not be required to complete AEC testing or coursework. Degrees earned online may not be used to verify English proficiency.
Please note: Meeting minimum admission standards does not guarantee admission to the program.

All application materials should be submitted online with the graduate application. If there are application materials that cannot be uploaded with the online application, they may be emailed or mailed to the department:

Master of Science in Education - Curriculum & Instruction with an emphasis in Reading Specialist Licensure Endorsement Track - online program

The Reading Specialist Licensure Endorsement track master’s option is intended for those seeking to earn their master’s degree in order to pursue state of Kansas licensure as a reading specialist. It is best for educators looking to transition to or start a career in reading education, who already hold initial licensure in their state.

Completion of this degree is not a guarantee of licensure or endorsement of any kind. It is each student’s responsibility to determine the licensure and endorsement requirements in his or her state and to apply for the licenses or endorsements necessary for his or her career goals.

The program is comprised of 11 courses for 33 total credit hours and can be completed in two years. The courses are delivered online in an 8-week format. To complete the program in two years, the following course sequence should be followed:

Master of Science in Education - Curriculum & Instruction with an emphasis in Reading Non-Licensure Track - online program

The Reading Non-Licensure master’s track option is not intended for initial teacher licensure nor for licensure as a reading specialist; most students enter the program with an active teacher’s license. It is best for administrators and those looking to deepen their knowledge of literacy strategies and language acquisition techniques.

The program is comprised of 10 courses for 30 total credit hours and can be completed in two years. The courses are delivered online in an 8-week format. To complete the program in two years, the following course sequence should be followed:

Doctor of Education in Curriculum and Instruction

Introduction

The Doctor of Education (Ed.D.) in Curriculum and Instruction prepares graduates for leadership positions working with teachers and other education professionals in a variety of settings that may include school districts, colleges and universities, state and federal education agencies, and educational non-profit organizations. The Ed.D. program places an emphasis on preparing leaders who can translate theory and research into practice and who can solve practical problems in an educational context. Graduates are prepared to be leaders in the profession by effectively fulfilling responsibilities in the areas of teaching, research, and service. The Ed.D. is a cohort program that starts each fall semester, with required courses to help graduates achieve these goals. Students work with an advisor and committee members to choose electives based on individual career goals.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.
Graduate Admission to the Department of Curriculum and Teaching

In addition to general requirements for admission to graduate study in the School of Education and Human Sciences, doctoral programs in Curriculum and Instruction require completion of appropriate undergraduate and graduate degree programs. Materials describing all Curriculum and Instruction programs may be obtained from the department (http://ct.soe.ku.edu/).

Please refer to the graduate application for application deadlines.

Admission to the Doctor of Education, Curriculum and Instruction Program (Domestic Applicants)

The following materials must be submitted:

• A completed domestic online graduate application (http://www.gradle.ku.edu/application-process/).
• 1 official transcript of all previous undergraduate and graduate credit. Doctoral applicants must have earned a Master’s degree or equivalent with at least a 3.5 grade-point average on a 4.0 scale.
• A statement of career goals addressing how this degree will help meet professional aspirations and areas of interest in curriculum and instruction. An appropriate length is 1 to 2 pages.
• 3 letters of recommendation; a letter from the master’s advisor is appropriate to include. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
• Writing sample: an article, paper or other scholarly composition originally written by the applicant. An appropriate length is 8 to 10 pages.
• A vitae or resume.

Please note: Meeting minimum admission standards does not guarantee admission to the program.

All application materials should be submitted online with the graduate application. If there are application materials that cannot be uploaded with the online application, they may be emailed or mailed to the department:

Doctor of Education, Curriculum and Instruction

The Doctor of Education (Ed.D.) in Curriculum and Instruction prepares graduates for leadership positions working with teachers and other education professionals in a variety of settings that may include school districts, colleges and universities, state and federal education agencies, and educational non-profit organizations.

Elective areas for advanced degrees in curriculum and instruction may include Curriculum Studies, Foreign Language Education, Language Arts/English Education, Literacy Education, Mathematics Education, Science Education, Social Studies Education, or Teachers of English to Speakers of Other Languages (TESOL) Education.

Doctoral aspirants should develop a program plan at the first enrollment or promptly thereafter. A copy of this program should be filed with the Graduate Division of the School of Education. The program plan must include:

• A minimum of 27 graduate credit hours in Curriculum and Instruction
• A minimum of 9 graduate credit hours in Research Skills
• Completion of the Responsible Conduct of Research requirement
• Completion of a 3-credit-hour field experience that will inform a Research Action Plan
• A minimum of 18 credit hours of dissertation, unless student successfully defends the dissertation earlier.

The Ed.D. in Curriculum and Instruction program is offered in a hybrid format, with courses that meet in-person on select Saturdays and evenings during the semester, and the remainder of each course is conducted online. The program is a cohort model that begins each fall and is designed to be completed in a structured, 3-year cycle. To complete the program in 3 years, the following course sequence should be followed, as well as the additional program requirements listed below the course sequence:

Total Hours 57-58

Additional Ed.D. program requirements

• Successful completion of written and oral comprehensive exams (typically conducted during the summer term with concurrent enrollment in C&T 972 and C&T 990).
The comprehensive examination consists of both written and oral parts and covers the major area pursued by the student. The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student’s performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt or by petition.

Students in the Curriculum and Instruction Ed.D. program must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All 5 members of the student’s comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral, focuses on advanced knowledge in the major and any appropriate related areas. The focus of the examination is the ability to relate program knowledge to tasks and problems faced by practitioners. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated.

Completion of the Post-comprehensive Enrollment requirement:
https://policy.ku.edu/graduate-studies(doctoral-candidacy).

Approval by the Human Research Protection Program (HRPP) of all research projects involving human subjects (if applicable).

Committee approval of the candidate’s dissertation proposal before the candidate is allowed to continue working toward the dissertation defense.

After successfully passing the comprehensive examination, students will have three semesters (including summer) to present a proposal to the dissertation committee. If the proposal is rejected by the dissertation committee, the student must resubmit a proposal the following semester. If the second attempt at the proposal is rejected, the student is dismissed from the program. Exceptions to the above policy would be given only if the student submits verification of extenuating circumstances preventing progress.

The dissertation proposal meeting, sometimes referred to as the dissertation proposal defense, is a time for candidates to meet with their dissertation committees to discuss the focus, direction, and methodologies of their dissertations. The proposal typically is comprised of the first three chapters of the dissertation and should follow the dissertation formatting requirements found on the Graduate Studies website. Candidates should submit their proposals to their committees at least two weeks prior to the dissertation proposal meeting. After consultation with the advisor, candidates arrange with their committee members a mutually-agreeable date and time for the proposal meeting.

Please refer to additional information about dissertation requirements in the KU Policy Library - Doctoral Dissertation: https://policy.ku.edu/graduate-studies(doctoral-dissertation).

Completion of the doctoral dissertation following all formatting and style requirements as directed by the candidate’s dissertation committee.

The candidate must present a dissertation that exhibits the application of existing knowledge in the major field of professional study. Ed.D. candidates may satisfy the dissertation requirement by completing a comprehensive, critical assessment of the relevant literature on a major educational issue or problem. This study should demonstrate the application of existing knowledge to the author’s area of professional practice. The format and style of a student’s dissertation is left to the discretion of the student, advisor, and committee, but format and style options may be constrained or dictated by the policy of the department from which the student is to receive the degree and by the Office of Graduate Studies. The dissertation is prepared under the direction of the dissertation committee. The minimum number of dissertation hours in the Ed.D. program is 18 (unless the candidate successfully defends earlier), although students need to maintain enrollment in dissertation hours until the final dissertation defense. Instructions regarding the proper form of the final document (http://graduate.ku.edu/etd-formatting-and-working-multimedia-files/) may be obtained from the School of Education and Human Sciences Graduate Division office. Any substantial divergences must be approved in advance as prescribed by the instructions, and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

Successful dissertation defense and submission for publication to UMI/ProQuest.

When the dissertation has been tentatively accepted by the dissertation committee, the chair of the dissertation committee may request the School of Education and Human Sciences Graduate Division Office to schedule the final oral examination. The examination covers the dissertation and the candidate’s concentration area. The candidate passes the final examination if a majority of the official examining committee members (including the chair) approves the candidate’s performance. When the final oral examination has been passed, the dissertation committee reports a grade of Honors, Satisfactory, or Unsatisfactory. Candidates who fail the final oral examination may be allowed to repeat it upon recommendation of the dissertation committee.

When the candidate has passed the final oral examination and the members of the dissertation committee have signed the dissertation, a title page and acceptance page with original signatures are to be delivered to the Graduate Affairs office of the school/college in which the student’s program resides so that completion of degree requirements may be officially certified. As a requirement of graduation, the candidate must arrange publication of the dissertation and payment of all applicable fees, through the electronic submission process found on the Graduate Studies website.

Application for degree and completion of required doctoral surveys and release forms as directed by the School of Education and Human Sciences Graduate Division Office.
Although the courses and the research leading to the Ed.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The aspirant for the Ed.D. is expected to be a well-educated person and should have acquired a broad base of general knowledge, both as preparation for more advanced work and as a means of knowing how curriculum and instruction is related to other fields of human thought.

**Note:** Contact the home department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship (https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/) are listed in the KU Policy Library.

### Doctor of Philosophy in Curriculum and Instruction

**Introduction**

The Doctor of Philosophy (Ph.D.) in Curriculum and Instruction prepares graduates for faculty positions at research or teaching universities and for positions as research scientists and post-doctoral fellows at universities or research centers. The Ph.D. program places an emphasis on preparing graduates whose primary interests are to engage in research and scholarship to advance the field of curriculum and instruction. Graduates are prepared to be leaders in the profession by effectively fulfilling responsibilities in the areas of research and scholarship, teaching, and service. The Ph.D. is a cohort program that starts each fall semester, with required courses to help graduates achieve these goals. Students work with an advisor and committee members to choose electives based on individual career goals. The Ph.D. may include electives such as Culturally Responsive Pedagogy, Curriculum and Instruction, Foreign Language Education, Language Arts/English Education, Literacy Education, Mathematics Education, Science Education, Social Studies Education, or Teachers of English to Speakers of Other Languages (TESOL) Education. Doctoral work includes a majority of credit hours in curriculum and instruction, additional hours in basic and applied research skills, and a dissertation involving original research in the student's specialization.

### Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

### Graduate Admission to the Department of Curriculum and Teaching

In addition to general requirements for admission to graduate study in the School of Education and Human Sciences, doctoral programs in Curriculum and Instruction require completion of appropriate undergraduate and graduate degree programs. Materials describing all Graduate and Instruction programs may be obtained from the department (http://ct.soeh.ku.edu/).

Please refer to the graduate application for application deadlines.

#### Admission to the Doctor of Philosophy, Curriculum and Instruction Program (Domestic Applicants)

The following materials must be submitted:

- A completed domestic online graduate application (http://www.graduate.ku.edu/application-process/).
- 1 official transcript of all previous undergraduate and graduate credit. Doctoral applicants must have earned a Master's degree or equivalent with at least a 3.5 grade-point average on a 4.0 scale.
- Graduate Record Examination (GRE) general test scores. The scores must be no older than 5 years prior to the application term. Official scores are required, sent from the testing institution directly to the Office of Graduate Studies.
- A statement of career goals addressing how this degree will help meet professional aspirations and areas of interest in curriculum and instruction. An appropriate length is 1 to 2 pages.
- 3 letters of recommendation; a letter from the master's advisor is appropriate to include. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
- Writing sample: an article, paper or other scholarly composition originally written by the applicant. An appropriate length is 8 to 10 pages.
- A vitae or resume.

#### Admission to the Doctor of Philosophy, Curriculum and Instruction Program (International Applicants)

The following materials must be submitted:

- A completed international online graduate application (http://www.graduate.ku.edu/application-process/).
- 2 official transcripts of all undergraduate and graduate credit including degree conferral (1 in the original language and 1 in English translation). Doctoral applicants must have earned a Master's degree or equivalent with at least a 3.5 grade-point average on a 4.0 scale. The transcripts must contain the following information:
  - completion of course work required for degree
  - Degree earned and date the degree was conferred; if this is not on the transcript, applicants must also submit a degree certificate and/or diploma
  - Official stamp/seal from the school
- Graduate Record Examination (GRE) general test scores. The scores must be no older than 5 years prior to the application term. Official scores are required, sent from the testing institution directly to the Office of Graduate Studies.
- A statement of career goals addressing how this degree will help meet professional aspirations and areas of interest in curriculum and instruction. An appropriate length is 1 to 2 pages.
- 3 letters of recommendation; a letter from the master’s advisor is appropriate to include. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
• Writing sample: an article, paper or other scholarly composition originally written by the applicant. An appropriate length is 8 to 10 pages.
• A vita or resume.
• A statement of account balance from the applicant's sponsor's bank. This statement must be on bank stationery. There must also be a letter of support from his/her sponsor if the bank statement is not in the applicant's name.
• For students whose native language is not English, official scores on the TOEFL (IBT) of at least 23 in Listening, Reading and Writing must be submitted for consideration of admission to the Curriculum and Teaching Department. The IELTS (Academic) official score is also accepted, with an overall score of at least 6.5, and scores of at least 6.0 in Listening, Reading and Writing. The PTE (Academic) official score is also accepted, with an overall score of at least 60 and scores of at least 55 in Listening, Reading and Writing. The TOEFL, IELTS or PTE scores must be less than two years old at the time of admission. TOEFL/IELTS/PTE scores may not be required if the applicant meets the verification of English proficiency requirements as specified below:

Applicants who have earned a baccalaureate degree (or higher) in residence from an accredited university or from a foreign university which conducts all instruction in English and which maintains substantially equivalent bachelor's, master's, or doctoral degree requirements, will be considered fully proficient and will not be required to complete AEC testing or coursework. Degrees earned online may not be used to verify English proficiency.

Please note: Meeting minimum admission standards does not guarantee admission to the program.

All application materials should be submitted online with the graduate application. If there are application materials that cannot be uploaded with the online application, they may be emailed or mailed to the department:

The University of Kansas
Department of Curriculum and Teaching
Joseph R. Pearson Hall
1122 W. Campus Road, Room 321
Lawrence, KS 66045

Contact us: ctdepartment@ku.edu

Doctoral aspirants should develop a program plan at the first enrollment or promptly thereafter. The program plan must include:

• A minimum of 36 graduate credit hours taken at the University of Kansas, exclusive of dissertation credits and the research requirement. At least 24 of these hours must be in the area of Curriculum and Instruction. A minimum of 18 of these hours must be at the 800-level or above, and at least six of these hours must be outside of the area of study.
• A minimum of 12 graduate credit hours in Research Skills (basic and applied research skills, including statistics, research design, and related requirements appropriate to the degree).
• Completion of EDUC 800, Education as a Field of Scholarship. This course fulfills the Responsible Conduct of Research requirement.
• Completion of C&T 996, Teaching and Learning in the College Classroom. The doctoral aspirant assists a professor for one semester or may be assigned to teach an undergraduate course under faculty supervision during the aspirant's doctoral program.
• 2 semesters, usually consecutive, must be spent in resident study at the University of Kansas.
• Successful completion of written and oral comprehensive exams
• Enrollment in dissertation hours. Please refer to the School of Education Graduate Regulations section of the Graduate Catalog for detailed enrollment requirements.
• Successful defense and submission for publication of the doctoral dissertation.

A copy of this program should be filed with the Graduate Division of the School of Education.

Although the courses and the research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The aspirant for the Ph.D. is expected to be a well-educated person and should have acquired a broad base of general knowledge, both as preparation for more advanced work and as a means of knowing how curriculum and instruction is related to other fields of human thought.

In addition to the Curriculum and Instruction Ph.D. program requirements listed above, all the following requirements must also be successfully completed. The Curriculum and Instruction Ph.D. program is typically completed in 4 to 5 years, but students are allowed 8 years to complete the program.

Curriculum and Instruction Ph.D. students must complete the following mandatory enrollment. Additional coursework as described above will be selected in consultation with the faculty advisor to create an individualized program that best suits the student's academic research interests.

Additional Ph.D. program requirements and information

• Completion of the Engagement and Enrollment in Doctoral Programs (https://policy.ku.edu/graduate-studies/engagement-enrollment-doctoral-programs/) requirement - 2 semesters, usually consecutive, must be spent in resident study at the University of Kansas.
• Completion of a supervised college teaching experience during the student's doctoral program, and submission of the College Teaching Experience Verification form to the School of Education and Human Sciences Graduate Division office. This experience may or may not be completed concurrently with enrollment in C&T 996, but
Students in the Curriculum and Instruction Ph.D. program must be completed prior to obtaining clearance to proceed with the comprehensive exams.

- **Successful completion of written and oral comprehensive exams**
  - The comprehensive examination consists of both written and oral parts and covers the major area pursued by the student. The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student's performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt or by petition.
  - Students in the Curriculum and Instruction Ph.D. program must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All 5 members of the student's comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral, focuses on advanced knowledge in the major and any appropriate related areas. The focus of the examination is the ability to relate program knowledge to tasks and problems faced by practitioners. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated.

- **Completion of the Post-comprehensive Enrollment (https://policy.ku.edu/graduate-studies/doctoral-candidacy/) requirement.**
- **Approval by the Human Research Protection Program (HRPP) of all research projects involving human subjects (if applicable).**
- **Committee approval of the candidate's dissertation proposal before the candidate is allowed to continue working toward the dissertation defense.**
  - After successfully passing the comprehensive examination, students will have three semesters (including summer) to present a proposal to the dissertation committee. If the proposal is rejected by the dissertation committee, the student must resubmit a proposal the following semester. If the second attempt at the proposal is rejected, the student is dismissed from the program. Exceptions to the above policy would be given only if the student submits verification of extenuating circumstances preventing progress.
  - The dissertation proposal meeting, sometimes referred to as the dissertation proposal defense, is a time for candidates to meet with their dissertation committees to discuss the focus, direction, and methodologies of their dissertations. The proposal typically is comprised of the first three chapters of the dissertation and should follow the dissertation formatting requirements found on the Graduate Studies website. Candidates should submit their proposals to their committees at least two weeks prior to the dissertation proposal meeting. After consultation with the advisor, candidates arrange with their committee members a mutually-agreeable date and time for the proposal meeting.

- **Please refer to additional information about dissertation requirements in the KU Policy Library - Doctoral Dissertation (https://policy.ku.edu/graduate-studies/doctoral-dissertation/).**

- **Completion of the doctoral dissertation following all formatting and style requirements as directed by the candidate's dissertation committee.**
  - The candidate must present a dissertation that exhibits the application of existing knowledge in the major field of professional study. Ph.D. candidates may satisfy the dissertation requirement by completing a comprehensive, critical assessment of the relevant literature on a major educational issue or problem. This study should demonstrate the application of existing knowledge to the author's area of professional practice. The format and style of a student's dissertation is left to the discretion of the student, advisor, and committee, but format and style options may be constrained or dictated by the policy of the department from which the student is to receive the degree and by the Office of Graduate Studies. The dissertation is prepared under the direction of the dissertation committee. The minimum number of dissertation hours in the Ph.D. program is 18 (unless the candidate successfully defends earlier), although students need to maintain enrollment in dissertation hours until the final dissertation defense. Instructions regarding the proper form of the final document may be obtained from the School of Education and Human Sciences Graduate Division office. Graduate Certificate in Reading

The online Graduate Certificate in Reading program at KU is designed to provide individuals with the knowledge to support the reading development and achievement of individuals from varied cultural and linguistic backgrounds; expand knowledge in reading assessment and methodologies; and develop instructional practices for students in the classroom and in intervention/remediation settings. The Graduate Certificate in Reading has two tracks: a non-endorsement track and an endorsement track.

Graduate Certificate in Reading Non-Endorsement Track

The online Graduate Certificate in Reading Non-Endorsement track builds on students’ existing educational experience, allowing them to focus on improving the reading outcomes of students in their classes even if they teach in another field such as math or science. This online Graduate Certificate in Reading Non-Endorsement track does not lead to initial licensure nor any licensure endorsement in the state of Kansas.

Graduate Certificate in Reading Endorsement Track

The online Graduate Certificate in Reading Endorsement track is intended for educators who hold a master's degree and wish to complete the requirements for state licensure as a reading specialist in the state of Kansas. It is best for currently licensed teachers in states where an additional endorsement in reading education is required.

This academic track satisfies the requirements for the reading specialist licensure endorsement in Kansas. Each state has its own requirements for obtaining a reading specialist license/certificate/endorsement. It is each student’s responsibility to determine the licensure requirements in their state by contacting their home state’s licensure or certification authority. No program can guarantee licensure.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Admissions Requirements

The following materials must be submitted:

- Completed online graduate application (https://gograd.ku.edu/apply/).
- Official transcript:
  - For domestic applicants, 1 official transcript of all college records with at least a 3.0 grade-point average on a 4.0 scale. Applicants with a grade-point average below 3.0 will be considered for admission, but admission is not guaranteed.
  - For international applicants, 2 official transcripts of all undergraduate credit including degree conferral (1 in the original language and 1 in English translation) with at least a 3.0 grade-
point average on a 4.0 scale. International transcripts will be evaluated for degree and grade-point equivalency. Applicants with a grade-point average below 3.0 will be considered for admission, but admission is not guaranteed. The transcript must contain the following information:

- Completion of course work required for degree
- Degree earned and date the degree was conferred; if this is not on the transcript, applicants must also submit a degree certificate and/or diploma
- Official stamp/seal from the school
- Statement of career goals/purpose
- Resume or curriculum vitae (CV)
- 3 letters of recommendation from professional or academic references. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
- Application fee of $30
- For students whose native language is not English, official scores on the TOEFL (IBT) of at least 23 in Listening, Reading and Writing must be submitted for consideration of admission to the Curriculum and Teaching Department. The IELTS (Academic) official score is also accepted, with an overall score of at least 6.5, and scores of at least 6.0 in Listening, Reading and Writing. The PTE (Academic) official score is also accepted, with an overall score of at least 60, and scores of at least 55 in Listening, Reading and Writing. The TOEFL, IELTS or PTE scores must be less than two years old at the time of admission. TOEFL/IELTS/PTE scores may not be required if the applicant meets the verification of English proficiency requirements as specified below:

Applicants who have earned a baccalaureate degree (or higher) in residence from an accredited university or from a foreign university which conducts all instruction in English and which maintains substantially equivalent bachelor's, master's, or doctoral degree requirements, will be considered fully proficient and will not be required to complete AEC testing or coursework. Degrees earned online may not be used to verify English proficiency.

Please note: Meeting minimum admission standards does not guarantee admission to the program.

All application materials should be submitted online with the graduate application. If there are application materials that cannot be uploaded with the online application, they may be emailed or mailed to the department:

Graduate Certificate in Reading Endorsement Track

The Graduate Certificate in Reading Endorsement track is comprised of 7 courses for 21 credit hours and can be completed in 1-1/2 years. The courses are delivered in an online 8-week format, with the exception of the two practicums which are 16 weeks each. To complete the program in 1-1/2 years, the following course sequence should be followed:

Graduate Certificate in Teaching English to Speakers of Other Languages

The online Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) helps to prepare educators to clear the language barrier for their students. This certificate program helps instructors of students from many culturally diverse backgrounds to ensure their students succeed in early childhood, K-12 or adult education classrooms. This program does not provide instruction in speaking English. It prepares educators to teach English to speakers of other languages and is not an English language program for second or other language learners. This online graduate certificate does not lead to initial licensure nor any licensure endorsement in the state of Kansas.

The Graduate Certificate in TESOL has two tracks: a non-endorsement track and an endorsement track.
positions within the field of TESOL. It does not prepare students for a TESOL licensure endorsement. Students will obtain general knowledge about the learning styles of English as a second or other language students in English-speaking classrooms and best practices for improving their learning outcomes.

Graduate Certificate in TESOL Endorsement Track

The Graduate Certificate in TESOL Endorsement track is best for currently licensed teachers in states where additional licensure endorsement is required for roles that involve the teaching of English language learners. This program will provide students with graduate-level knowledge about English language learners and how to best serve their needs in the classroom. This track is designed for currently licensed teachers in the state of Kansas.

Each state has its own requirements for obtaining a TESOL endorsement/license/certificate. It is each student’s responsibility to determine the licensure requirements in their state by contacting their home state’s licensure or certification authority. No program can guarantee licensure.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Admissions Requirements

The following materials must be submitted:

- Completed online graduate application (https://gograd.ku.edu/apply/).
- Official transcript:
  - For domestic applicants, 1 official transcript of all college records with at least a 3.0 grade-point average on a 4.0 scale. Applicants with a grade-point average below 3.0 will be considered for admission, but admission is not guaranteed.
  - For international applicants, 2 official transcripts of all undergraduate credit including degree conferral (1 in the original language and 1 in English translation) with at least a 3.0 grade-point average on a 4.0 scale. International transcripts will be evaluated for degree and grade-point equivalency. Applicants with a grade-point average below 3.0 will be considered for admission, but admission is not guaranteed. The transcript must contain the following information:
    - Completion of course work required for degree
    - Degree earned and date the degree was conferred; if this is not on the transcript, applicants must also submit a degree certificate and/or diploma
    - Official stamp/seal from the school
  - Resume or curriculum vitae (CV)
  - 3 letters of recommendation from professional or academic references. Each letter should be attached to the online recommendation form when it is submitted by the recommender.
  - Application fee of $30
- For students whose native language is not English, official scores on the TOEFL (IBT) of at least 23 in Listening, Reading and Writing must be submitted for consideration of admission to the Curriculum and Teaching Department. The IELTS (Academic) official score is also accepted, with an overall score of at least 6.5, and scores of at least 6.0 in Listening, Reading and Writing. The PTE (Academic) official score is also accepted, with an overall score of at least 60, and scores of at least 55 in Listening, Reading and Writing. The TOEFL, IELTS or PTE scores must be less than two years old at the time of admission. TOEFL/IELTS/PTE scores may not be required if the applicant meets the verification of English proficiency requirements as specified below:

Applicants who have earned a baccalaureate degree (or higher) in residence from an accredited university or from a foreign university which conducts all instruction in English and which maintains substantially equivalent bachelor’s, master’s, or doctoral degree requirements, will be considered fully proficient and will not be required to complete AEC testing or coursework. Degrees earned online may not be used to verify English proficiency.

Department of Educational Leadership and Policy Studies

Educational Leadership and Policy Studies Graduate Programs

The Department of Educational Leadership and Policy Studies (http://elps.soe.ku.edu/) offers a broad range of graduate professional programs in educational leadership and policy.

Graduate programs in educational leadership and policy studies promote the professional and intellectual development of practitioners, teachers, and scholars at all levels of education.

The department offers Master of Science in Education degrees in educational administration (PK-12), education and social policy, and higher education. The department also offers Ed.D. and Ph.D. degrees in educational leadership and policy studies with concentrations in educational administration, higher education, and policy studies (Ph.D. only).

Note: Prospective and current students can obtain the current degree requirements, program information and application deadlines from the department.

Courses

ELPS 200. Making Connections Between Schools and Community. 3 Credits.
This course is designed to increase the students' awareness of learning in the classroom and to familiarize them with the role of the school and the community. Institutions and resources that support children and families will be addressed through large and small group sessions and field experiences. Emphasis is given to the diverse nature of schools, communities, and their populations. In addition, the course will acclimate students with the School of Education programs, admissions procedures, and curriculum offerings. Successful completion of this course does not guarantee eventual admission of the School of Education's Teacher Education Program. Prerequisite: Successful completion of C&T 100.

ELPS 250. Education and Society. 3 Credits.
This course provides students with an introduction to key ideas and socio-historical forces that have shaped the contemporary educational system in the United States, drawing upon the disciplines of the historical, philosophical, and social foundations of education. The development of school and community relations will be a point of emphasis.

ELPS 450. Foundations of Education. 3 Credits.
A historical approach to the major social and philosophical foundations of American education, with an emphasis on the relation of educational theory to classroom practice.

ELPS 497. Independent Study in:. 1-2 Credits.
Only one enrollment permitted each semester. A maximum of four hours will apply toward the bachelor's degree. Prerequisite: Recommendation of advisor and consent of instructor.

ELPS 537. The Governance and Organization of Schools. 3 Credits.
The course provides the prospective teacher with an overview of the legal foundations of the American educational system including the ways schools and school districts are organized and run; the role of various levels of government and various governmental and educational officials in controlling education; the rights of students and teachers; the terms, conditions, and responsibilities of teacher employment. Prerequisite: Admission to the Teacher Education Program.

ELPS 540. Ethics in Education. 3 Credits.
This course examines practices and policies occurring in K-12 and postsecondary educational institutions through the lenses provided by ethics. During the semester, we will read, discuss, and write about ethics in education from both theoretical and practical perspectives. Prerequisite: Junior standing or higher. The course is suitable for advanced undergraduate and master's degree seeking students.

ELPS 598. Special Course:. 1-5 Credits.
A special course of study to meet current needs of education students, primarily for undergraduates.

ELPS 627. Growing Up in Urbanizing America. 3 Credits.
A study of the changing role and character of childhood and youth as stages of life in the context of American urban and social history, with particular attention to education and human development. Prerequisite: Junior standing or higher.

ELPS 718. Human Performance Technology. 3 Credits.
This course will provide an introduction to the field of human performance technology (HPT) and how it is applied to productivity and efficiency problems in the workplace. Performance improvement methods include data gathering, analysis, change management, implementation, measurement and the integration of technology. The goal of this course is to provide students with a survey of the research literature and definitions of terminology central to the field of performance improvement. Special emphasis is on current and emerging technology and how it can be applied to human performance improvement in education and the workplace.

ELPS 750. Principalship. 3 Credits.
An introduction to the role, responsibilities, expectations and major duties of elementary, middle, and high school building administrators. Students are presented typical problems faced by school administrators through
This is an introductory course about college leadership that will provide an overview of concepts and theories for the practice of leadership in colleges and universities. Particularly, the content focuses on the application of theoretical perspectives for leadership practice. The aim of the course is to have students analyze and situate themselves as future higher education leaders and administrators. Subject matter includes, but is not limited to, topics such as: administrative leadership in higher education, fundamental leadership theories, managing people and conflict, fostering collaboration and leadership for diverse institutions.

ELPS 798. Special Course:. 1-5 Credits.
A special course of study to meet current needs of education professionals -- primarily for graduate students.

ELPS 820. Practicum in Educational Technology. 1-3 Credits.
Supervised practice in a media center in selection, classifying, designing, producing, and/or managing instructional materials. Prerequisite: C&T 770 and C&T 871.

ELPS 830. Foundations of Multicultural Education. 3 Credits.
This class provides students with an understanding multicultural education as an instructional concept, educational reform movement, and systemic process meant to ensure educational equity for all people, especially those who have been inadequately served and/or historically discriminated against because of their racial/ethnic or linguistic backgrounds, gender or sexual orientation, socio-economic status, and special needs. Students will examine different theoretical approaches that inform the practice of multicultural education and explore the contribution of various social sciences to the field.

ELPS 831. Sociology of Education. 3 Credits.
This course will provide an introduction to the sociology of education. Specific topics will include: conflict over the purposes of education; how those purposes are or are not translated into actual classroom life; how educational systems have developed historically, how status, and more specifically race, class and gender relations, affect student experiences; educational systems have developed historically, how status, and more specifically race, class and gender relations, affect student experiences; and contemporary policy and reform movements. Prerequisite: Graduate Standing.

ELPS 832. History of Educational Thought. 3 Credits.
An examination of the major ideas that have shaped practice in the schools. Emphasis is placed on assisting the student with the development of a coherent and consistent personal philosophy of education upon which administrative practice can be based.

ELPS 833. Social Context of Urban Education. 3 Credits.
This course examines education in urban communities through the foundational disciplines of history, philosophy, and the social sciences. Particular attention is given to ways in which the changing social and political contexts of American cities affect the educational process.

ELPS 834. History and Philosophy of Education. 3 Credits.
A comprehensive study of influential persons and movements in the development of educational thought, Eastern and Western, from ancient times to the present. Emphasis on those ideas and historical roots which are relevant to contemporary issues in teaching and school administration.

ELPS 835. Philosophy of Education. 3 Credits.
An analytic inquiry into basic philosophical positions and issues relevant to education. The difference between ELPS 770 and ELPS 771 is that the latter is topically arranged and does not necessarily follow a historical sequence; it normally proceeds by problems and schools of thought.

ELPS 837. History of Education and Culture in America. 3 Credits.
A study of the relation between education and culture in America from colonial times to the present. American schools are considered in the wider context of cultural and social change.

**ELPS 839. Historical Inquiry in Education. 3 Credits.**
This course will provide an introduction to the methodology of historical research in education. This course is designed to fulfill the doctoral core requirement for research methods in education for students interested in doing this type of research. Specific topics will include: the historiography of education; working with primary and secondary documents; oral history and method and documentation, quantitative approaches to history; constructing historical narratives; the question of interpretation.

**ELPS 852. School Resource Management. 3 Credits.**
An examination of the sources and uses of fiscal resources in education including underlying concepts from economic theory, the impact of values on fiscal policy, state funding formulas, and school budgeting and accounting practices.

**ELPS 853. Staff Evaluation and Development. 3 Credits.**
An examination of current trends in personnel evaluation with a focus on clinical supervision and adult development. Students will participate in simulation exercises to develop skills in classroom observation, conferencing techniques, evaluation of teaching artifacts, and the construction of staff development plans.

**ELPS 854. The Student in Society. 3 Credits.**
A study of children and youth with particular emphasis on demographic characteristics of the population served by schools and implications of those characteristics for schools and schooling.

**ELPS 856. Law and Special Education. 3 Credits.**
This course focuses on laws that apply to special education. The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law and the judicial decisions interpreting those laws are reviewed. The course relates equal protection, procedural due process, and substantive due process doctrines to school practices affecting disabled children and examines the sex principles of P.L. 94-142 and similar principles in state legislation. This course is not the equivalent of or a substitute for ELPS 752. (Same as SPED 851.) Prerequisite: SPED 750 or permission of instructor.

**ELPS 871. Introduction to Qualitative Research. 3 Credits.**
An introduction to the foundations of and techniques associated with qualitative research methods. Students will practice interview and participant observation skills and will analyze and interpret data. Additional topics include crafting qualitative research questions, ethics of fieldwork, and establishing trustworthiness of data. Common traditions of qualitative methods employed in education and other related fields will be introduced.

**ELPS 881. Leadership Theory and Practice in Education. 3 Credits.**
The purpose of this course is to explore leadership in educational settings from a variety of perspectives. Readings come from a variety of disciplinary perspectives, such as sociology, organizational behavior, and psychology. The course considers various aspects of leadership and analyzes the leader's role from a symbolic perspective, as a manager of meaning, and critical change agent. The course challenges students to deconstruct leadership realities with the help of several critical perspectives with the goal of examine who the leaders are, who they will be in the future to address diverse educational organizations of tomorrow.

**ELPS 882. Higher Education in the United States. 3 Credits.**
The purpose of the course is to acquaint students in higher education, and students from other areas who intend to work in the post-secondary setting, with the history, philosophy and development of higher education in the United States. The course focuses on three periods: 1) the founding of Harvard to 1965; 2) dissent, disruption, and change, 1965-1979; and 3) the future and crucial issues, the 1980's. European higher education and its early influence on higher education in the United States is also examined.

**ELPS 883. The College Student. 3 Credits.**
The characteristics of college students; impact of college on student behavior, changing attitudes, values, beliefs, and the implications of recent research on traditional and new students for instructional and administrative practices.

**ELPS 884. College Student Access, Persistence, and Success. 3 Credits.**
The purpose of this course is to provide an introduction to the scholarly research about American college students, with a specific focus on college access, persistence and student success for various student populations. The course also provides an overview of the policy implications and practical applications of this research for college and university administrators.

**ELPS 885. Assessment and Program Evaluation in Higher Education. 3 Credits.**
Nature, objectives, and basic procedures of assessment and program evaluation as applied to the various aspects of higher education settings. In addition to basic procedures for evaluating programs, topics covered include accreditation, program review, benchmarking, student outcomes assessment, and evaluation of teaching in colleges and universities. Prerequisite: ELPS 715 or equivalent.

**ELPS 886. Theory into Practice in Higher Education. 3 Credits.**
This course is required as a final course for all master's students in higher education. It is designed to prepare students for professional life after graduation. Using a case study approach, students will examine the reality of practice in a variety of higher educational settings including relevant political and ethical factors. Prerequisite: Higher education students in last semester of master's coursework.

**ELPS 887. Race and Social Class in Higher Education. 3 Credits.**
The purpose of this course is to examine the ways in which race and class shape access to, and experiences in, American postsecondary education. To deepen our understanding of these matters, we will engage five books that explore the topic from a different perspective (e.g., for profit colleges, admissions at selective institutions, race conscious admissions, Students of Color at highly selective institutions, etc.)

**ELPS 889. Master's Project. 1-4 Credits.**
The on site development of the skills necessary to effectively function as a school building leader. Activities will be tailored to the needs of individual students in consultation with a university advisor and a field advisor. Internship credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

**ELPS 896. Seminar in:. 1-4 Credits.**

**ELPS 897. Independent Study. 1-4 Credits.**
Prerequisite: Consent of advisor and instructor.

**ELPS 898. Master's Project. 1-4 Credits.**
Graded on a satisfactory progress/limited progress/no progress basis.

**ELPS 899. Master's Thesis. 1-6 Credits.**
Graded on a satisfactory progress/limited progress/no progress basis.

**ELPS 945. District Strategic Planning. 3 Credits.**
A study of the principles and techniques necessary for planning, developing, implementing, and monitoring a district strategic plan for
improving the educational programs of elementary and secondary schools.

ELPS 948. Research in Education Policy and Leadership. 3 Credits.
This course is an introduction to methods of inquiry in education policy and leadership studies. It is designed to help doctoral students explore possible research interests, formulate research questions, and to review a rich variety of approaches to inquiry in the field of education. Specific topics include: interview- and observation-driven studies, ethnography, feminist and narrative methods, legal and historical methods, questionnaire-driven studies, quantitative evaluation studies, and studies using administrative and large national data sources.

ELPS 949. Educational Policy and Politics. 3 Credits.
This course is an introduction to the field of education policy and the politics of education. The objective of the course is to provide students with an understanding of the forces that shape educational policy, with an emphasis on governance structures, stakeholders, public engagement, and current policy issues and political contexts.

ELPS 951. Supervision of Instruction. 3 Credits.
A study of the principles and techniques necessary for coordinating, monitoring, and improving the educational programs of elementary and secondary schools.

ELPS 952. School Finance: Policy and Practice. 3 Credits.
The objective of this course is to understand the financial systems and mechanisms used by states in the funding of elementary and secondary education in the United States. In simple language, we will be concerned with five basic issues: (1) Where the money comes from; (2) How it is redistributed; (3) How it is spent; (4) The relative effectiveness of spending decisions including selected international comparisons; and (5) How the previous four financial activities participate in a common financial ecology. The course provides an overview of theory and concepts central to the understanding of school finance with an emphasis on policy issues. It also examines the mechanics of school finance funding in light of state policies.

ELPS 953. District Human Resource Management. 3 Credits.
An in-depth study of theory and research in personnel administration. The focus will be on current literature dealing with empirical assessments of personnel theory and techniques. Specific concepts to be considered include the following: educator characteristics, job analysis and design, personnel recruitment, selection and evaluation techniques, staffing and development, and labor relations. Prerequisite: ELPS 755 or its equivalent.

ELPS 954. Sociology of Educational Organizations. 3 Credits.
This class is an overview of basic and advanced sociological and political theories of organization, with specific application to issues and problems in K-12 education. It is designed for graduate students and practicing educational leaders and administrators who intend to utilize research on organizations in their studies of the governance of schools, the sociology and politics of education, and education policy. The topics covered include the origins and nature of modern bureaucracy, formal structure and function, organizational control, transaction cost economics, population ecology, resource dependence, the new institutionalism, organizational effectiveness and legitimacy, organizational culture, power and politics, and change.

ELPS 955. District Business Management. 3 Credits.
This course emphasizes skills for effective and efficient business and financial management of school districts in a Kansas or Missouri context. Basic topics include: Short range and long range financial planning, analysis of financial statements, budget preparation, fund accounting and financial reporting, contracting of services including transportation and food services, staff salaries and benefits and insurance. The course also includes a number of strategic methods for institutional planning including: Cost Benefit Analysis, Cost Effectiveness Analysis, and enrollment, revenue and expenditure forecasting techniques. Prerequisite: ELPS 852 or its equivalent.

ELPS 956. District Leadership. 3 Credits.
The focus of the course is the role of the public school district superintendent. Organized study will include assigned readings, lectures, guest speakers, discussion, and the completion of a study project. The course will include consideration of such topics as boardmanship, community relations, district leadership, professional accountability, district maintenance and operations, professional employment and relationships with other agencies. The course is designed to serve the needs of those graduate students pursuing advanced study with the intention of completing requirements for district certification. Some students will also find the field appealing as an area for dissertation research. Prerequisite: Doctoral status in education administration or permission of instructor.

ELPS 957. Educational Policy, Ethics and Law. 3 Credits.
Course focuses on use of legal and moral reasoning in analysis of educational policy issues. Specific topics will vary depending on interests of instructor and students and current controversy. Examples of possible topics to be included: school desegregation, teacher collective bargaining, separation of church and school, equal educational opportunity. Prerequisite: ELPS 752, equivalent, or consent of instructor.

ELPS 958. American Educational Reform Movements: Past and Present. 3 Credits.
An examination of the origin, nature, and consequences of educational reform in the United States. The primary goal is to attain a balanced evaluation of current educational reform.

ELPS 959. Organization and Administration of Services for Exceptional Children. 3 Credits.
To aid administrators and prospective administrators responsible for organizing and administering programs of education for exceptional children, state and federal guidelines and regulations, legal aspects and financing of special education, planning a program, administering special services. (Same as SPED 971.) Prerequisite: Nine hours of Education including educational psychology and SPED 725.

ELPS 961. Conducting Quantitative Analysis in Educational Policy and Administration. 3 Credits.
This seminar addresses basic applied analytical skills for the study of topics in educational policy, leadership, and governance. It is designed to help professional doctoral students apply and extend their existing skills as they are working on their quantitative dissertations. Upon completion of this course, students should be able to: (1) draw on a basic repertoire of key methods that support applied analysis for professional doctoral students, (2) be able to determine the type of data and research design--and associated opportunities and constraints--pertaining to their research interests and the completion of their dissertation, and (3) make progress in aligning the conceptual and empirical components of their dissertation studies. Prerequisite: EPSY 710 or EPSY 711 or EPSY 870, or equivalent courses. Completion of quantitative research course requirements for the ELPS Ed.D. program.

ELPS 962. Advanced Quantitative Educational Policy Analysis. 3 Credits.
This seminar is designed to help students develop applied econometric skills for analysis of large scale data in policy studies, with particular emphasis on education. The techniques covered in the course are applied to a variety of substantive topics. These topics may change...
over time given changes in the national and local policy agendas and concerns. At this point, they include teacher and school effects on student performance, faculty productivity in higher education, access to and persistence in higher education, race and class issues in the K-12 achievement gap, decomposition of school and nonschool effects, neighborhood influence on student outcomes, the dropout problem, and minority over-representation in special education. Upon completion of this course, you should be able to: (1) draw on a basic repertoire of models for application to study of key questions in policy analysis, (2) be able to explore more advanced applications of the models covered in the course and also explore new models, and (3) determine the basic requirements of and challenges in designing rigorous empirical studies in policy analysis. Prerequisite: EPSY 810 or EPSY 811 or equivalent courses (note: this course is not a continuation of ELPS 961).

ELPS 969. Dissertation Seminar. 3 Credits.
This seminar is designed to facilitate proposal development for doctoral-level research in educational leadership and policy studies. The objective is to help students select and refine a topic, critically analyze existing research, set forth a theoretical framework, and design a research methodology suitable for your topic.

ELPS 970. Theory and Research in Administration. 3 Credits.
This course is designed as a graduate seminar to support advanced doctoral students as they begin the early stages of developing a dissertation. Students will explore and develop a research topic of interest for the purposes of their culminating project. The course will introduce students to various approaches to research and published scholarship. Major emphasis is devoted to developing competencies and research skills to complete the dissertation and to engage in future research.

ELPS 971. Comparative Education. 2 Credits.
A factual, descriptive, and analytical study of national systems of formal education, or schooling, as exemplified in contemporary educational establishments. Organizational and administrative policies and teaching practices, with emphasis on Germany, France, England, U.S.S.R., People's Republic of China and Japan. Other nations may be examined on an individual project basis. The difference between ELPS 971 and ELPS 772 is the philosophical emphasis of the latter.

ELPS 973. Research on College Students. 3 Credits.
The purpose of this course is to critically examine the scholarly research about American college students from societal, developmental, research, and institutional perspectives and to review the policy implications and practical applications of these findings for college and university administrators.

ELPS 974. Data Informed Decision Making in Higher Education. 3 Credits.
This course will advance the students' skills needed to consume quantitative data and apply critical analyses of data within the context of higher education recognizing the social, cultural, and organizational factors that influence stakeholders and the stakeholders' acceptance of data-driven conclusions. This course provides students with an opportunity to practice making data-driven decisions to achieve institutional goals and missions.

ELPS 975. Education, Technology and Social Change. 3 Credits.
This interdisciplinary course provides an opportunity to read, reflect upon, and discuss ideas drawn from the emerging field of Science and Technology Studies (STS) in connection with education. Its focus is the interrelationships between technology, society, and education (defined broadly to include non-school and adult learning settings). It explores how knowledge, expertise, and authority are constructed within and across social and cultural groups, with particular attention social and economic inequality. It also considers the relationship between emerging technologies, educational experiences and the nature of "the self" in society, among other issues. Prerequisite: Admission to ELPS doctoral program, or permission of instructor.

ELPS 979. Postsecondary Leadership and Practice. 3 Credits.
This course is intended for doctoral students with significant administrative experience, this course focuses on the link between leadership theory and practice in postsecondary educational settings. The course content will provide students with a broad base of learning experiences related to leadership and leadership development with a specific focus on cultural dimensions, critical perspectives, and considerations for social justice in leadership. Students will be asked to reflect on their own journey of leadership identity and development and how that informs, supports, and influences practice as a higher education professional.

ELPS 980. Finance of Higher Education. 3 Credits.
This course is designed for advanced doctoral students in higher education, particularly those who will be preparing unit budgets or budget presentations and those who make and implement fiscal policy (e.g., financial aid offers). The course material covers different types of college and university budgeting -- incremental, zero-based and formula -- and their impact on university revenues; statewide coordination and its impact on programs, program duplication and funding; retermination and quality issues; the legislative role in budget preparation; unified and comparative management systems (e.g., WICHE and NCHEMS); and the impact of federal contracting and student aid policies.

ELPS 981. Higher Education Law. 3 Credits.
An overview of the developing law of higher education, with emphasis on and analysis of employer-employee relationships, student-faculty/administration relationships, and the impact of federal and state regulations on these relationships.

ELPS 982. Faculty in Higher Education. 3 Credits.
This course considers the role and circumstances of faculty in higher education including variations among different types of institutions. Topics include the history and demographics of the professoriate, the academic work environment and labor market, the role of faculty in institutional governance and policy making, and the social and political context of academia.

ELPS 983. Curriculum Innovation in Higher Education. 3 Credits.
A study of contemporary post-secondary curriculum with particular emphasis on the nature of curriculum, the organization and structure of academic programs, the nature of change in academic communities and exemplary innovative institutions.

ELPS 985. Program Evaluation in Higher Education. 3 Credits.
This course reviews evaluation and assessment processes typically used in higher education with an emphasis on application to practice. Topics such as developing, administering evaluation and assessment plans at the unit or college level, and reporting assessment/evaluation data are also emphasized. Prerequisite: The course assumes some prior knowledge of or experience with assessment and evaluation.

ELPS 986. Organization and Governance of Higher Education. 3 Credits.
A theory-based course aimed at providing an understanding of the governance and organization of academic institutions -- particularly universities. Emphasis is directed toward an analysis of decision-making in these complex organizations.

ELPS 987. Diversity Leadership in Higher Education. 3 Credits.
This advanced course examines diversity, equity and inclusion in higher education settings, with an emphasis on exploring how theory and
research inform practice. This course is intended for doctoral level students.

ELPS 995. Field Experience in:. 1-5 Credits.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experience will be prepared independently by the student, a representative of the cooperating agencies, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

ELPS 996. College Teaching Experience in:. 1-4 Credits.
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester-long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or the member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate’s committee.

ELPS 997. Individual Study. 1-4 Credits.
Prerequisite: Prior graduate course work in the area of study and consent of instructor.

ELPS 998. Seminar in: 1-4 Credits.

ELPS 999. Doctoral Dissertation. 1-15 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

Master of Science in Education in Educational Administration

The online Master's degree in Educational Administration (PK-12) at the University of Kansas School of Education and Human Sciences consists of 36 credit hours of coursework, including an extensive field-based practicum and a comprehensive interactive e-portfolio for licensure candidates, and a comprehensive exam for non-licensure candidates - all of which can be completed within two years.

For licensure candidates, the Internship Gateway course opens up halfway through the program after a student completes six courses. This allows the graduate students to start internship hours earlier than the final internship ELPS 895 course. While completing the remaining six courses for the master’s program, students will meet with their mentor and faculty instructor to discuss the internship requirements as they finish their 240 hours of field internship experience and build an e-Portfolio to complete the program. This program fulfills the academic requirements necessary for Kansas state licensure at the school (building) level, and is designed to accommodate working educators. The program is designed for part-time graduate students who currently hold initial teaching licensure and work in the classroom (or other positions such as instructional coach) in their schools. Depending on students educational administration career aspirations they will develop a demonstrated understanding of content and skills that have been aligned with universally-recognized standards such as the Professional Standards for Educational Leaders (http://npbea.org/wp-content/uploads/2017/06/Professional-Standards-for-Educational-Leaders_2015.pdf).

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Graduate Admission requirements:

Applicants for the 3 master’s programs, education and social policy, educational administration, and higher education administration, must submit the following materials:

(Individual program concentrations may require additional application materials (see below). Please check the departmental website or program advisor for additional information and application deadlines.)

1. A completed Graduate application (http://gradapply.ku.edu). (http://graduate.ku.edu/ku-graduate-application/)
2. 1 official transcript from each post-secondary collegiate institution attended.
3. Completed bachelor’s degree from an accredited college or university, or a foreign university with substantially equivalent bachelor’s degree requirements.
4. Statement of purpose with relevance of degree to career aspirations.
5. Three letters of recommendation evaluating the applicant’s capacity for rigorous graduate study and qualifications for leadership positions in education and related fields.
6. A vita or resume.
licensure candidates, we require our students experience a field-based practicum and digital portfolio that serves as a progressive tool to apply for administrative positions.

The online master’s in educational administration Non-Licensure Track* substitutes coursework for the internship requirement with the expectation that participants want to earn their Master’s and gain knowledge about leadership, but are not pursuing a license. For non-licensure candidates, we require a comprehensive exam.

Master of Science in Educational Technology

The School of Education and Human Sciences is not accepting students for the online and on-campus M.S.E in Educational Technology at this time.

The School of Education and Human Sciences is not accepting students for the online and on-campus M.S.E in Educational Technology at this time.

Higher Education Administration:

The higher education administration program requires a bachelor’s degree with a grade-point average (GPA) of at least a B (3.0 on a 4.0 scale). Applicants with an undergraduate GPA below 3.00 should contact a KU admissions advisor for more information. Letters of recommendation for this concentration should meet these criteria: one should be from an immediate supervisor and two from others in leadership positions (principal, grade level chair, instructional coach, etc).

MSE in Educational Administration (online format)

Online Format

The Master of Science in Education in Educational Administration program is designed to prepare experienced teachers for leadership roles at the building level. The program stresses fundamental knowledge degrees in educational leadership and educational policy development necessary for effective leadership. It consists of a set of integrated courses Graduate programs in educational leadership and experiences that provide opportunities for participants to extend their knowledge of pedagogy policy studies promote the professional and leadership, to enlarge their understanding of schooling, and to develop an appreciation of the political, economic and social forces that influence the decisions of educational leaders.

There are two tracks for this program:

The online master’s in educational administration Building Leadership Track includes an internship for students who intend to acquire a license as a principal or other building leader, either immediately following the program or at some point in the future. For licensure candidates, we require our students experience a field-based

See below for specific admissions requirements for the master’s concentrations:

Education & Social Policy:

The education and social policy program requires a bachelor’s degree with a grade-point average (GPA) of at least a B (3.0 on a 4.0 scale). It additionally requires a statement of purpose that describes the applicant’s interests related to education and social policy. Applicants must address their personal and academic background, professional goals, and life experiences that shaped the decision to pursue a master’s degree. They should also describe experiences or achievements that would help them contribute to the ELPS program; KU’s mission for promoting diversity, equity, and inclusiveness; and their professional aspirations once they complete the degree.

Educational Administration:

**Educational Technology**

The Master of Science in Educational Technology program consists of 36 hours of coursework, a practicum, an exam and the production of a portfolio that reflects the student's competencies. The program supports a wide range of career opportunities for positions at various institutions including: PK-12 school districts, community colleges, universities, governmental agencies and business organizations. The program addresses the needs of professional specialties to foster leadership in the integration, administration and design of educational technology. It is intended for those who are currently working in areas related to corporate training, human resource management, government and education.

Students are able to select tailored program coursework in consultation with their advisor and enhance their learning to fit their professional and educational needs.

The School of Education and Human Sciences is not accepting students for the online and on-campus M.S.E in Educational Technology at this time.

**Master of Science in Education in Higher Education Administration**

The Master's degree in Higher Education Administration at KU is primarily designed for individuals preparing for administrative careers in higher education. The program consists of 36 credit hours of integrated courses and hands-on experiences - all of which can be completed in two years.

The graduate program allows students to extend and apply their knowledge of colleges and universities, and to gain relevant experience in higher education administration. Graduate students will learn from expert scholars and practitioners, as well as fellow classmates, who bring diverse leadership experiences to the higher education administration program at KU.

Graduate students enrolled in the program, can expect to complete coursework and gain experiences that meet specific learning objectives, such as:

- Gain knowledge of organization, culture, diversity & history of higher education institutions
- Understand relevant research on student development theories and its impact on students
- Develop personal philosophy of equity in higher education grounded in scholarship
- Use literature to link higher education administration theory with practice
- Relate relevant assistantship experiences to classroom learning
- Differentiate between functional areas through hands-on internship experiences for graduate course credit
- Demonstrate proficient writing skills and mastery of APA format
Students admitted to the full-time Master’s degree program are required to secure and maintain a graduate assistantship at KU (or another local higher education institution). Students with a graduate assistantship (GA) are guaranteed in-state tuition, 6 credit hours paid for by KU per year, health insurance, and a stipend as part of their assistantship at KU. GA’s typically work between 20-30 hours per week. Additional financial support is also available beyond assistantship compensation. Contact program coordinator for more information. International students are encouraged to apply for GA positions but are not required to secure a position.

The number and type of available assistantships will vary slightly from year to year, though assistantship positions are typically available in the following offices:

- KU Student Housing
- Office of Admissions
- Office of First Year Experience (FYE)
- Jayhawk Academic Advising
- Student Involvement & Leadership Center (SILC)
- Office of Multicultural Affairs (OMA)
- Financial Aid & Scholarships

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Graduate Admission requirements:

Applicants for the 3 master’s programs, education and social policy, educational administration, and higher education administration, must submit the following materials:

(Individual program concentrations may require additional application materials (see below). Please check the departmental website or program advisor for additional information and application deadlines.)

1. A completed Graduate application (http://gradapply.ku.edu).
2. 1 official transcript from each post-secondary collegiate institution attended.
3. Completed bachelor’s degree from an accredited college or university, or a foreign university with substantially equivalent bachelor’s degree requirements.
4. Statement of purpose with relevance of degree to career aspirations.
5. Three letters of recommendation evaluating the applicant’s capacity for rigorous graduate study and qualifications for leadership positions in education and related fields.
6. A vita or resume.

See below for specific admissions requirements for the master’s concentrations:

Education & Social Policy:

The education and social policy program requires a bachelor’s degree with a grade-point average (GPA) of at least a B (3.0 on a 4.0 scale). It additionally requires a statement of purpose that describes the applicant’s interests related to education and social policy. Applicants must address their personal and academic background, professional goals, and life experiences that shaped the decision to pursue a master’s degree. They should also describe experiences or achievements that would help them contribute to the ELPS program; KU’s mission for promoting diversity, equity, and inclusiveness; and their professional aspirations once they complete the degree.

Educational Administration:

The educational administration program requires a bachelor’s degree with a grade-point average (GPA) of at least a B (3.0 on a 4.0 scale). Applicants with an undergraduate GPA below 3.00 should contact a KU admissions advisor for more information. Letters of recommendation for this concentration should meet these criteria: one should be from an immediate supervisor and two from others in leadership positions (principal, grade level chair, instructional coach, etc).

Higher Education Administration:

The higher education administration program requires a bachelor’s degree with a grade-point average (GPA) of at least a B (3.0 on a 4.0 scale). Letters of recommendation should include one from the applicant’s immediate supervisor, and at least one of the others should be from a professor.

Higher Education Administration:

The M.S.E. in Higher Education Administration consists of a set of integrated courses and experiences that provide an opportunity for participants to extend their knowledge of the histories, clienteles, and administrative functions of colleges and universities, and to gain relevant experience in higher education administration.

The program consists of 36 hours of course work. Courses are scheduled in 16-week formats during the fall and spring semesters, usually scheduled after 4:30 p.m. The summer session classes vary in time and format. The course work provides a substantive knowledge base in higher education and student affairs administration.

Students must hold an assistantship (https://elps.ku.edu/academics/higher-education-administration/masters/) or a full-time job in a related area while completing coursework. International students are not required to hold an assistantship. A sample sequence of courses is listed below:

students. Graduate students enrolled in the program can expect to:

- Address big questions in education, such as inequality, multiculturalism, and social justice – and social justice – and
- Increase their knowledge and ability to assess problems in contemporary education, particularly concerning questions of inequity, multiculturalism, and social justice.

Foundations of Education at some institutions. At KU, this master's degree program offers an individualized student experience that

As a field of study, Education and Social Policy is also known as Social Policy. The program permits students to complete a variety of courses, focusing on foundational questions and applications such as:

1. How has the present educational system developed, in the U.S. and worldwide?
2. How do poverty and inequality affect the school performance of children?
3. What knowledge should schools aim to impart?
4. How can education help achieve a more just, democratic, and multicultural society?
5. What are the ethical responsibilities of teachers and other educators in an unequal and changing society?
6. What are the competing purposes of education, and how do we make choices among them?

Capstone Project: Students will select one of two options for a capstone project:

Policy report. The policy report option gives students an artifact they can use on the job market. The report will analyze a contemporary educational policy issue and may include policy origin, intended objectives, surrounding debates, potential outcomes, unintended consequences, and other policy features.

Online portfolio. The online portfolio option allows students to create a portfolio of their learnings in the master's program. The online portfolio may include a page for curriculum vitae, research, teaching and learning, service, and other educational projects.

Doctor of Education in Educational Leadership and Policy Studies

Educational Leadership and Policy Studies Graduate Programs
The Ed.D. prepares educational practitioners to understand and apply the most advanced knowledge to their work. ELPS currently offers two concentrations within the EdD: Educational Administration and Higher Education Administration.

All Ed.D. students must complete a minimum of 27 hours in the major/ concentration (e.g. educational administration, higher education administration), 9 hours of research, a 3 credit hour practicum or field experience, and a dissertation. In addition, all Ed.D. aspirants complete a responsible conduct of research component that is integrated with the required coursework.

A Doctor of Education is available in either of the two concentrations below:
- Educational Administration
- Higher Education Administration

Ed.D. with a concentration in Educational Administration
The Ed.D. in Educational Administration at the University of Kansas prepares students to be PK-12 school district-level leaders and is designed to accommodate working educators. Taught by full-time faculty who are experts in their field, the program stresses fundamental knowledge and educational policy development necessary for effective leadership. Graduates fulfill the academic requirements necessary for state licensure endorsement in school district level administration.

Courses are delivered online with class connections through Zoom between 1-2 weeknights throughout the semester. The program is designed specifically for working practitioners in the field, with rich projects, collaborative opportunities, and progressive assignments applicable to licensure and district leadership.

Ed.D. with a concentration in Higher Education Administration
The Ed.D. in Higher Education Administration at KU is a degree designed for administrators in colleges and universities seeking to advance in their careers; for individuals intending to become faculty members in community colleges or other small colleges; and for individuals working in related non-profit organizations. Taught by full-time faculty who are recognized scholars with extensive administrative backgrounds, the program prepares practitioner-scholars who are able to apply the most recent scholarship and research skills to their professional practice.
Courses are delivered in online/hybrid format with in-person meetings four Saturdays per semester alternating between the Edwards and Lawrence campuses. Students who qualify for the MetroKC Tuition Rate should enroll in the Ed.D. in Higher Administration through KU Edwards Campus and complete a MetroKC Application.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Ed.D program application requirements:

Contact the department for application deadlines. Ed.D applicants must have a master’s degree or equivalent with at least a 3.0 grade point average on a 4.0 scale and must submit the following materials:

- Graduate application - check with the department regarding the application deadline
- 1 official transcript from each post-secondary collegiate institution attended
- Resume or CV
- Statement of purpose (see below for each concentration’s specific requirements)
- Letters of recommendations from three individuals
- Writing sample: an article, paper, or other composition
- Proof of English proficiency for non-native English speakers.

Visit https://gradapply.ku.edu/english-requirements/ for further details.

See below for specific application requirements for educational administration and higher education administration

Educational Administration

Applicants for the educational administration concentration should hold a full-time position in an educational setting with at least three years of full-time experience recommended. And of the letters of recommendation, one should be from the applicant’s immediate supervisor; if recent, they should include a letter from a former professor. The statement of purpose should address the items below. Applicants are encouraged to use the prompts as headings in their statement and to keep the statement succinct and to the point (no more than 5 pages, please):

1. Tell us about yourself, your professional goals, and how the Ed.D will help you achieve those goals.
2. Discuss your academic strengths and weaknesses, including any additional explanation for your transcripts.
3. As a full-time employee, motivation and support will be essential to your success as a full-time doctoral student. Provide relevant examples from your past that demonstrate your motivation and capacity to succeed. This is an opportunity for you to highlight areas of particular strength.

Higher Education Administration

Higher education letters of recommendation should evaluate the applicant’s capacity for rigorous graduate study and qualifications for leadership positions in education and related fields. The statement of purpose should address the following items. Applicants are encouraged to use the prompts as headings in their statement and to keep the statement succinct and to the point (no more than 5 pages, please)

1. Tell us about yourself, your professional goals, and how the Ed.D will help you achieve those goals.
2. Discuss your academic strengths and weaknesses, including any additional explanation for your transcripts.
3. As a full-time employee, motivation and support will be essential to your success as a full-time doctoral student. Provide relevant examples from your past that demonstrate your motivation and capacity to succeed. This is an opportunity for you to highlight areas of particular strength.
4. Describe how you anticipate being a doctoral student will change your normal daily routine (at work, at home) and how you plan to proactively address these changes.
5. Have you discussed your application for this program with your supervisor? What level of support do you anticipate you will receive at work?
6. Finally, what aspects of higher education are of particular interest to you as potential dissertation topics at this time?

Ed.D. Degree Programs

The Ed.D. prepares educational practitioners to understand and apply the most advanced knowledge to their work. ELPS currently offers two concentrations within the EdD: Educational Administration and Higher Education Administration.

All Ed.D. students must complete a minimum of 27 hours in the major/concentration (e.g. educational administration, higher education administration), 9 hours of research, a 3 credit hour practicum or field experience, a comprehensive examination, and a dissertation. In addition, all Ed.D. aspirants complete a responsible conduct of research component that is integrated with the required coursework.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship (http://policy.ku.edu/graduate-studies/doctoral-research-skills-requirement/) are listed in the KU Policy Library.

Students are encouraged to work with their faculty advisor in the first semester of their program to develop a program plan and residency agreement.

A general description of each concentration is given here.
Educational Administration

The educational administration concentration prepares teachers and administrators for school district leadership roles. Studies stress fundamental fields of knowledge and educational policy development necessary for effective leadership of school districts. The Ed.D. leads to licensure in Kansas at the district level. Students pursuing this degree from outside of Kansas should contact their licensing board to determine requirements for district level license. This concentration requires students to take classes in the summer.

**Degree Requirements for all Ed.D. Programs:**

**Comprehensive Examination:**

Per University and SOEHS policy, students must be in good academic standing and have completed all required coursework in order to take comprehensive exams (https://policy.ku.edu/graduate-studies/doctoral-oral-exams/).

The comprehensive exam consists of both a take-home, open book written exam followed by an oral exam. Students must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted.

To fail either component is to fail the examination. All 5 members of the student’s comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral focuses on the ability to relate program knowledge to tasks and problems faced by practitioners. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated.

The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt or by petition.

**Dissertation:**

After successfully completing the comprehensive exam, Ed.D. students will engage in work for their culminating project – the dissertation – and must be continuously enrolled (https://policy.ku.edu/graduate-studies/doctoral-candidacy/) per University and SOEHS policy until the dissertation is defended.

The dissertation is done under the supervision of an advisor and dissertation committee and consists of two parts. First, the student works with an advisor to write a dissertation proposal that outlines the purpose scope and methods of the dissertation study. The dissertation proposal must be approved by a committee of at least three faculty members and the signed title page and electronic proposal filed with the department and SOHES.

Upon approval of the proposal, the student may begin work on the dissertation research under the guidance of the advisor and dissertation committee (https://policy.ku.edu/graduate-studies/oral-exam-committee-composition/) (typically consisting of the members of the proposal committee and one tenure-track faculty member from another department who represents Graduate Studies), determines the dissertation is ready for defense, a defense may be scheduled. Committee make up – etc.

The completed dissertation must be defended within time period (https://policy.ku.edu/graduate-studies/engagement-enrollment-doctoral-programs/) established by the University and SOEHS for completion of doctoral degrees.

**Additional requirements**

To continue in the program, students must meet the University and SOEHS standards for being in good academic standing (https://
Doctor of Philosophy in Educational Leadership and Policy Studies

Educational Leadership and Policy Studies Graduate Programs

The Ph.D. in educational leadership and policy at the University of Kansas is a research degree that prepares individuals for roles as researchers, policy analysts, educational leaders, and faculty members for policy, PK-12, and higher education settings. This degree distinguishes itself by its focus on preparing graduates to be researchers who are making original scholarly contributions to the knowledge base in the field. Students typically take some courses in graduate programs in related fields such as sociology, public administration, and economics.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Ph.D. program application requirements:

Ph.D. applicants must have a bachelor’s and master’s degree from a regionally accredited institution, or an international university with substantially equivalent degree requirement. Applicants must have a minimum of a 3.00 undergraduate GPA, or an undergraduate GPA of less than 3.0 combined with a master’s or doctoral degree GPA of at least 3.0.

A bachelor’s degree followed by at least 30 hours of master’s level coursework that has not been applied toward another degree may be acceptable in some circumstances.

Applicants for the PHD program must submit the following materials:

1. Graduate application - check with the department regarding the application deadline
2. 1 official transcript from each post-secondary collegiate institution attended
3. Statement of purpose (5-8 pages maximum). Please describe your interests and commitment to the goals and curriculum of the ELPS Ph.D. program. It is recommended that you address your personal and academic background and your scholarly and related professional goals. You also could explain a specific research interest or a faculty member with whom you want to work. It is important that you thoroughly address your preferred area of specialization in the ELPS program and explain reasons why you would be a good fit (e.g., education policy, social and cultural studies in education, higher education administration, educational leadership). In addition, please address any life experiences that have shaped your decision to pursue a doctorate, along with personal experiences or achievements that would help you contribute to the ELPS program; to KU’s mission for promoting diversity, equity, and inclusiveness; and to your professional aspirations once you complete the degree.
4. Graduate Record Examination (GRE) scores are optional for doctoral candidates. The ELPS department relies on a holistic approach to evaluating applicants, involving a plurality of methods and information, rather than prioritizing standardized test scores such as GRE performance. While you are welcome to submit GRE scores as additional information, we do not have any cutoffs; and, not submitting your GRE score will not affect your application negatively
5. Letters of recommendations from three individuals who can speak directly to the applicant’s academic skills and potential for rigorous, independent doctoral level work. Preferably the letters will be from current or former professors but can also include a letter from an immediate supervisor.
6. CV or resume. Please include at a minimum: post-high school education; relevant professional and/or scholarly experience; research experience and other pertinent experience; honors, other recognitions received; conference presentations, publications, reports.
7. A Writing sample. The writing sample should demonstrate the applicant’s ability to think critically and/or analytically about an issue or a task as demonstrated in an academic paper or published article. We are looking for documents of substantive quality and length, though, there is no official minimum or maximum page limit.
9. Phone or video conference interview. After initial screening, ELPS faculty may invite the applicant for an interview to address remaining questions about their objectives and fit for the program. The interview may also involve an interactive evaluation of their scholarly skills and potential.

The SOEHS requires 36 hours in the major area. For the ELPS PhD, the 36 hours are distributed as follows:

1. Departmental Core—12 hours

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 800</td>
<td>Education as a Field of Scholarship</td>
<td>3</td>
</tr>
<tr>
<td>ELPS 831</td>
<td>Sociology of Education</td>
<td>3</td>
</tr>
<tr>
<td>ELPS 949</td>
<td>Educational Policy and Politics</td>
<td>3</td>
</tr>
<tr>
<td>ELPS 998</td>
<td>Seminar in: _____ (Educational Change/Innovation)</td>
<td>3</td>
</tr>
</tbody>
</table>

2. Concentration courses are determined in conjunction with advisor and advising committee—24 hours.

- 12-15 hours must be in ELPS. These are in addition to the courses in the departmental core. Typically, no more than two of the program courses may be taken as independent studies. More than two independent studies requires justification by student and advisor.
- 9-12 hours will be taken outside of ELPS
• One of the 8 total concentration courses must be a Diversity, Equity, and Inclusion course.

3. Research -- Minimum of 15 hours (EPSY 715 or its equivalent does not count toward the PhD)
   • Basic quantitative research course, e.g., EPSY 710 and EPSY 711
   • Basic qualitative research, e.g., ELPS 871
   • 2 Intermediate or advanced qualitative or quantitative courses (or equivalent depth in historical or philosophical methods)
   • A research design course taken early in a student’s program

Note: Students may seek to waive 6 hours of prior graduate statistics, qualitative, or methods courses upon approval of advisor/advising committee. For students seeking waivers, depending on career aspirations, it may be in their best interest to begin research courses at a higher level and take 12 hours of advanced research courses at KU.

Full-time study. (https://catalog.ku.edu/education/graduateregulationstext) Students must complete at least one year of full-time study (defined as 9 credit hours per semester). If one holds a GTA position or a related GRA position, full-time is defined as 6 credit hours per semester.

A College Teaching Experience is no longer required but is highly recommended for students who are not GTAs but who are interested in pursuing a faculty position.

PhD students should expect to engage in “co-curricular” activities appropriate to their career aspirations above and beyond the specific degree requirements. These include conducting and presenting research at conferences, engaging in internships with policy organizations, etc.

The Responsible Conduct of Research requirement is met through EDUC 800.

The program is offered in-person on the Lawrence Campus although some courses may be online or taken at the Edwards Campus.

Degree Requirements for all Ph.D. Programs: Comprehensive Examination:

Per University and SOEHS policy, students must be in good academic standing and have completed all required coursework in order to take comprehensive exams (https://policy.ku.edu/graduate-studies/doctoral-oral-exams/).

The comprehensive exam consists of both a take-home, open book written exam followed by an oral exam. Students must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted.

To fail either component is to fail the examination. All 5 members of the student’s comprehensive examination committee are involved in the evaluation process. The written comprehensive exam is determined by the student's committee and assesses students’ knowledge as well as ability to critically apply that knowledge to research and to the field of education. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated.

The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt or by petition.

Dissertation:

After successfully completing the comprehensive exam, Ph.D. students will engage in work for their culminating project – the dissertation – and must be continuously enrolled (https://policy.ku.edu/graduate-studies/doctoral-candidacy/) per University and SOEHS policy until the dissertation is defended.

The dissertation is done under the supervision of an advisor and dissertation committee and consists of two parts. First, the student works with an advisor to write a dissertation proposal that outlines the purpose scope and methods of the dissertation study. The dissertation proposal must be approved by a committee of at least three faculty members and the signed title page and electronic proposal filed with the department and SOHES.

Upon approval of the proposal, the student may begin work on the dissertation research under the guidance of the advisor and dissertation committee (https://policy.ku.edu/graduate-studies/oral-exam-committee-composition/)(typically consisting of the members of the proposal committee and one tenure-track faculty member from another department who represents Graduate Studies), determines the dissertation is ready for defense, a defense may be scheduled. Committee make up – etc.

The completed dissertation must be defended within time period (https://policy.ku.edu/graduate-studies/engagement-enrollment-doctoral-programs/) established by the University and SOEHS for completion of doctoral degrees.

Additional requirements

To continue in the program, students must meet the University and SOEHS standards for being in good academic standing (https://policy.ku.edu/graduate-studies/good-academic-standing/) as specified in the SOEHS graduate regulations tab.

Graduate Certificate in PK-12 Building Leadership

Graduate Certificate in PK-12 Building Leadership in Educational Administration

Program Info:

The Graduate Certificate in Educational Leadership consists of a 24 hour block of coursework, including an extensive field-based practicum and a comprehensive interactive e-portfolio. The typical sequence of required coursework takes four semesters to complete, two courses each term. The first semester includes the foundational course, ELPS 750 The Principalship, and the final semester includes ELPS 895, Internship. The
additional 18 credit hours of required coursework can be taken in any sequence. After a student completes two courses, the internship gateway course opens up. While completing the remaining six courses for the certificate program, students will meet with their mentor and faculty instructor as they finish their 240 hours of field internship experience. Students submit a comprehensive e-portfolio at the end of the program that documents their proficiencies with national and state standards in building leadership.

The Graduate Certificate in Educational Leadership is fully online and will have two designated start dates in any given academic year. Students are asked to reference exact dates for application deadlines and start dates.

The Graduate Certificate in Educational Leadership is a component of the University of Kansas’s state of Kansas approved licensure endorsement program in Building Leadership PK-12. To add "Building Leadership PK-12" endorsement to a professional license in the state of Kansas, candidates must complete the following: 1) the 24 credit hours that constitute the Graduation Certificate in Educational Leadership, 2) have an earned master’s and/or doctoral degree in an education related field, 3) have 5 years of accredited teaching experience, and 4) a passing score on the state-mandated licensure exam.

Completion of a graduate certificate is not a guarantee of licensure or endorsement of any kind. It is each student’s responsibility to determine the licensure and endorsement requirements in their or the student’s state and to apply for the licenses or endorsements necessary for their or the student's career goals.

**Graduate Admission to the School of Education and Human Sciences**

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

To be considered for acceptance into the certificate program in Educational Administration at the University of Kansas, the student must have:

- A current teaching license with 3-5 years of teaching experience in schools (most states require)
- A master’s or doctorate degree from an accredited program in an education-related field of study
- Current resume or C.V.
- Statement of Purpose: indicate relationship of licensure-only program of study to career goals
- One official copy of all previous university academic transcripts
- Three letters of recommendation from qualified education individuals that attest to candidate’s leadership abilities

Completion of Program:

Students will be able to complete this program in 2 years or less. Upon successful completion of the program and successful passing of a required state building leadership licensure exam, students will be eligible to add the building administration endorsement to their license in their corresponding state. It is strongly recommended that students check specific licensure requirements in their individual states.

**PK-12 Building Leadership Certificate Program Requirements:**

Completion of 24 credit hours:

**Department of Educational Psychology**

**Educational Psychology Graduate Programs**

The Department of Educational Psychology (http://pre.soe.ku.edu/) offers critical knowledge and skills needed in society today including research design, statistics, educational measurement, program evaluation, educational and psychological assessment, counseling and consultation. The department offers graduate training programs in counseling psychology, educational psychology and research, and school psychology.

**Courses**

**EPSY 106. Multicultural Student Leadership Seminar. 2 Credits.**

This course will introduce students of color to leadership theory and develop personal skills in the areas of organizational, career, and community leadership. Topics covered include public speaking, group process, time management, and discussion of the special challenges for leaders of color. Prerequisite: Must have taken Hawk Link UNIV 101 and fewer than 60 hours credit from the University of Kansas.

**EPSY 305. Development and Learning of the Child. 3 Credits.**

An introduction to the study of children's thinking, behavior, and development in school, home, and community settings. Classic and contemporary theories of developmental and educational psychology will be addressed; these theories will provide a foundation for thinking about important contemporary issues in child development. Specific topics covered will include research methods for studying children's development, cognitive development, intelligence, language, emotional development, aggression, moral development, and family and peer relationships. Emphasis will be placed the study of individuals and groups, describing the process of development, and considering educational implications of theory and research.
EPSY 306. Development and Learning of the Adolescent. 3 Credits.

An introduction to the study of adolescence (puberty to roughly age 18), with a focus on implications and applications for optimal adolescent development. Approaching development from an applied lens, the course will cover foundational information on brain and biological changes that occur during adolescence, as well as on integrating this foundational knowledge with theories of learning, motivation, cognition, and emotional and social development.

EPSY 310. Career and Life Planning. 3 Credits.

The purpose of this course is to assist students with career, academic, and life planning choices. Designed to be practical and hands-on, the course relies heavily on student engagement. Through conversation and exploration, students will develop a better understanding of themselves and their career options and leave with a road-map for the future. Classes will meet twice a week in small sections. Both in-class and out-of-class activities will focus on helping students identify interests and strengths, clarify values, explore academic and work alternatives, and develop skills that can be applied to career and life planning both now and in the future.

EPSY 320. Basics of Classroom Assessment. 1 Credits.

This course is designed for sophomores in the Teacher Education Program. It presents basic concepts and methods for classroom assessment. It is meant to be an introductory course and students are expected to enroll in EPSY 520 Classroom Assessment in their senior year.

EPSY 450. Introduction to Counseling Psychology. 3 Credits.

An historical and contemporary overview of the science and practice of counseling psychology, including trends in the roles and functions of counseling psychology practitioners, the research and scientific foundations of counseling practice, the psychological theories of counseling and psychotherapy that guide professional practice, and the ethical and professional issues confronting counseling practitioners. Prerequisite: PSYC 104.

EPSY 480. Promoting Student Social-Emotional Well-Being. 3 Credits.

This course is designed for the student interested in learning and applying knowledge of educational psychology. More specifically, the goal is to help students understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas resulting in the ability to design and implement developmentally appropriate, relevant, and rigorous learning experiences. In addition, students will learn how to create learning environments that support individual and collaborative learning that includes teacher and student use of technology, and encouraging positive social interaction, active engagement in learning, and self-motivation. An additional goal of the course will be to help students to learn to integrate social-emotional learning (SEL) with character development into their curriculum so that students will learn, practice and model essential personal life habits that contribute to academic, vocational, and personal success. The goal is to be able to sustain a caring and civil classroom environment, to help learners make healthy decisions, problem solve effectively, value excellence and be respectful and responsible citizens. Prerequisite: EPSY 305, or EPSY 306.

EPSY 497. Independent Study. 1-2 Credits.

Only one enrollment permitted each semester, a maximum of four hours will apply toward the bachelor’s degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Recommendation of advisor and consent of instructor.

EPSY 515. Research Methods for McNair Scholars. 3 Credits.

This course provides participants in the McNair Scholars program with an understanding of research methods appropriate to their field so they can write proposals for their summer research projects. Prerequisite: Acceptance into the McNair Scholars Program.

EPSY 520. Classroom Assessment. 2 Credits.

This course is an introduction to the concepts and skills required to develop and evaluate various forms of formal and informal classroom assessments to determine student learning and teacher instructional effectiveness.

EPSY 575. Internship Exploration. 1-5 Credits.

This course provides academic credit for a supervised practical experience in an occupational area of interest. In addition to the work-related activity, students will complete reading and writing assignments, participate in on-line discussion and create a final portfolio of internship accomplishments. Credit hours (1-5) are based on number of hours at internship site in agreement with instructor. Prerequisite: Secured internship of 8 hours per week or more for semester in which student will be enrolled in the course; permission from instructor.

EPSY 580. Positive Psychology. 3 Credits.

An introduction to the core assumptions and research findings associated with human strengths and positive emotions. Also an exploration of interventions and applications informed by positive psychology in counseling and psychotherapy, and its application to school, work, family and other close relationships. (Same as PSYC 598.) Prerequisite: PSYC 104 or consent of instructor.

EPSY 598. Special Course: _____ 1-5 Credits.

A special course of study to meet current needs of education students--primarily for undergraduates.

EPSY 703. Constructive Classroom Discipline. 3 Credits.

This course will examine concepts and techniques of constructive classroom management. Various theoretical orientations including humanism and behaviorism will be considered. Emphasis will be on the identification of strategies that teachers can use (1) to facilitate an environment that reduces the likelihood of misbehavior occurring, and (2) to cope constructively with individuals and groups of children to resolve difficulties that arise in the classroom. The class should have value to classroom teachers, school psychologists, counselors, and other school consultants.

EPSY 704. Advanced Educational Psychology: Learning Processes in Education. 3 Credits.

A study of the mental processes that influence learning and comprehension. The scope of the course will include individuals at all developmental levels and in a variety of educational settings. Key issues include the study of language, memory, concepts, motivation and social factors affecting learning processes.

EPSY 705. Human Development through the Lifespan. 3 Credits.

This course will cover the social, emotional, psychological, and cognitive changes that occur from conception through death. Methodological issues will also be addressed. Prerequisite: A graduate or undergraduate course in psychology.

EPSY 710. Introduction to Statistical Analysis. 3 Credits.

Emphasis on the conceptual underpinnings of statistical analysis of educational data. Includes univariate and bivariate descriptive statistics, sampling distributions, statistical estimation, hypothesis testing and procedures in testing statistical hypothesis for one and two sample designs. Prerequisite: Concurrent enrollment in EPSY 711 required, or with the permission of instructor on the basis of knowledge of statistical packages presented in EPSY 711.
EPsy 711. Lab for Introduction to Statistical Analysis. 1 Credits. Creation and manipulation of data sets. Analysis of data with statistical packages, with an emphasis on descriptive statistics, graphical procedures, and univariate parametric methods. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Concurrent enrollment in EPSY 710 or EPSY 811 or with the permission of the instructor.

EPsy 715. Understanding Research in Education. 3 Credits. This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course provides an overview of basic, general knowledge of various research methodologies. Students should expect to study much of this material in greater depth through additional course work before being fully prepared to conduct independent research. However, this course should enhance their ability to locate, read, comprehend, and critically analyze research articles and reports. Topics in the course include qualitative and quantitative methods and designs, historical and descriptive research, and program evaluation. (This course fulfills the requirement of a research methods course in the first 12 hours of graduate study.)

EPsy 725. Educational Measurement. 3 Credits. The course is an introduction to the application of the concepts of reliability, validity, and practicality to the development, selection, use, and interpretation of tests and other measuring instruments in the field of education. The concepts of norm referenced and criterion referenced tests; the interpretation and use of norms; standard scores, percentiles, quotients, and grade equivalents are among the topics covered. An understanding of the role of measurement in evaluation, diagnosis, selection and placement is included.

EPsy 740. Counseling and Interviewing Skills. 3 Credits. An experiential and performance-based course having three major objectives: 1) the acquisition of basic counseling skills and strategies by means of microcounseling training; 2) learning to use these skills effectively and appropriately in a simulated counseling session; 3) the students’ understanding of their personal characteristics and how these characteristics relate to functioning as an effective helping professional. This course should normally be taken at the earliest possible time in the student’s program. Open to counseling majors. Non-majors may be admitted only by permission of the instructor, if space permits. Prerequisite: Permission of the instructor.

EPsy 742. Counseling Theory and Techniques. 3 Credits. An introductory examination of several major theories of counseling and therapy including psychodynamic views, person-centered, behavioral, and cognitive-behavioral approaches. Attention given to research reviews and factors various theories have in common. Designed for graduate students in counseling psychology or allied fields. Prerequisite: Graduate student status or permission of the instructor.

EPsy 760. Ethics, Law, and Professional Issues in School Psychology. 3 Credits. This course is intended to introduce the student to a) ethical principles, standards, and issues in the profession of psychology; b) legal issues involved in the practice of school psychology; c) problem-solving models to solve ethical and legal-ethical dilemmas; d) roles and functions of a school psychologist; and e) current topics in the field of school psychology. Prerequisite: Permission of the instructor.

EPsy 765. Mental Health in the Classroom. 3 Credits. This course will help educators identify commonly occurring mental health problems as well as the ways in which they can affect students’ achievement, classroom behavior, and social adjustment. You will also learn how to make effective referrals to resources available for students with mental health issues in both the district and the community.

EPsy 766. Positive Psychology in the Classroom. 3 Credits. Positive psychology is the study of what is right and positive about people and institutions. Positive psychologists call for an equal focus on strengths and weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions and then move on to explore interventions and applications informed by this perspective in schools, as well as in domains personally relevant to the lives of educators such as work, family, and other close relationships.

EPsy 767. Social Emotional Learning. 3 Credits. This course is designed for the student interested in learning and applying knowledge of educational psychology. More specifically, the goal is to help students understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas resulting in the ability to design and implement developmentally appropriate, relevant, and rigorous learning experiences. In addition, students will learn how to create learning environments that support individual and collaborative learning while encouraging positive social interaction, active engagement in learning, and self-motivation. An additional goal of the course will be to help students to learn to integrate social-emotional learning (SEL) with character development into their curriculum.

EPsy 797. Independent Readings and Research in: _____ 1-3 Credits. Opportunity for students to participate in supervised reading and research in special topics of interest (for which regularly scheduled courses are not given). Topics and credit are arranged by advisement: May not be used to substitute for regularly scheduled course offerings. Intended for students with appropriate undergraduate or graduate preparation but without extensive graduate course background in the area of proposed study. (Students with extensive graduate work should enroll in EPSY 997; undergraduate students may enroll in EPSY 497.) Graded on a satisfactory/unsatisfactory basis.

EPsy 798. Special Course: ____ 1-5 Credits. A special course of study to meet current needs of education professionals--primarily for graduate students. Graded on a satisfactory/fail basis.

EPsy 800. Development during Youth and Adulthood. 3 Credits. An examination from a life-span perspective of major issues affecting changes after adolescence. Topics include intelligence, identity, intimacy, the role of work, and moral concepts. Theoretical issues, research findings, and educational and social policy implications will be examined. Students will prepare papers on significant issues in the field and survey extensively the research and theoretical literature. Prerequisite: Prior enrollment in a course on naturalistic or experimental research methods.

EPsy 801. Advanced Mathematics and Mathematical Statistics for Educational and Social Scientists. 4 Credits.
Mathematical statistics and their mathematical underpinnings are presented in a condensed and accessible manner with details on how they function as parts of commonly used statistical models. Mathematical topics include advanced algebra, differentiation, multiple integration, numerical series, matrix algebra, and matrix calculus. Statistical topics include probability, random variables, probability density/mass functions, algebra of expectations and variances, sampling, asymptotics, and general families of distributions. Prerequisite: EPSY 710 or equivalent or permission of instructor.

EPSY 802. Child Development. 3 Credits.
This course covers core concepts and current research on environmental, individual, and interpersonal factors influencing development during childhood (birth - age 12). Topics covered include cognition, emotion, identity, and key social relationships (e.g., family, peers). Course emphasizes consideration of educational practices in the context of research on child development.

EPSY 803. Using R for Data Analysis. 3 Credits.
This course introduces R, the most popular free software environment for statistical computing, graphics, and data analysis. It will teach students about basic features of R, knowledge and skills of how to use R, interpret statistical results generated from R, and write methods and results in an academic and professional way. It will cover a variety of essential statistical procedures, including descriptive statistics, t-test, ANOVA, MANOVA, correlation, regression, reliability analysis, and factor analysis. The course will employ project-based teaching approach and allow students to work on research projects that they are interested in by using their own data or the data provided by the instructor. Prerequisite: EPSY 810 or EPSY 811 or equivalent course.

EPSY 805. Individual Intelligence Testing. 1-3 Credits.
Supervised experience in the administration, scoring, and interpretation of the major individual intelligence tests for children, adolescents, and adults. Other areas to be covered in this course will include models of intelligence and factors influencing intelligence; measurement characteristics of instruments used to assess cognitive abilities; ethical and legal issues in the use of intelligence tests; and the use of cognitive assessments for identification and diagnosis. Prerequisite: Permission of instructor.

EPSY 806. Issues in Human Growth and Development. 3 Credits.
An overview and analysis of selected issues in the field of human growth and development. The focus will be on current issues of a theoretical and methodological nature that affect the field of developmental psychology and applications to social and educational settings. Prerequisite: Prior completion of a course in developmental psychology.

EPSY 807. Theories and Research in Human Learning. 3 Credits.
An overview of important models, principles and research findings related to the learning process. Attention is given to theories of learning and information processing which attempt to explain perceptual behavior, verbal learning and memory and social learning processes. Emphasis is placed on student development of research proposals in the area of human learning and achievement. Prerequisite: Permission of instructor.

EPSY 808. Advanced Social Psychology: Theory, Research, and Professional Applications. 3 Credits.
This course presents major theoretical approaches and empirical findings in social psychology, including attitude formation and change, social influence, and intergroup relations. Interactions among self, relationships, group membership, and culture and how each influences thinking and behavior are addressed. This course also explores how key social identities, such as gender and race, impact social process and relationships. Course emphasizes consideration of educational and clinical practices in the context of research on social psychology. Prerequisite: Graduate standing in an EPSY program or permission of instructor.

EPSY 810. Regression and ANOVA: General Linear Models. 3 Credits.
Analysis of variance and regression models are presented under a unified framework. Multiple correlation/regression techniques, including polynomials, analysis of interactions, ANOVA using dummy coding, planned and post hoc comparisons, multiway ANOVA, orthogonal and non-orthogonal analysis of variance, analysis of covariance. Prerequisite: EPSY 710 or equivalent course.

EPSY 811. Analysis of Variance. 3 Credits.
Analysis of variance techniques including one-way ANOVA, planned and post hoc comparisons, multiway ANOVA, repeated measures ANOVA, and mixed designs. Prerequisite: EPSY 710 and EPSY 711.

EPSY 812. Meta-Analysis. 3 Credits.
Statistical methods to summarize results from multiple studies. Prerequisite: EPSY 811.

EPSY 814. Nonparametric Statistics. 3 Credits.
Methods of analysis for nominal and ranked data, multiway contingency table analysis. Prerequisite: EPSY 811.

EPSY 816. Evaluating School Programs. 3 Credits.
Methods and procedures for evaluating educational programs. Attention is given to the development and evaluation of goals and objectives, creation of designs to monitor processes and outcomes, utilization of test and measurement systems for assessing outcomes, establishing evaluation standards and criteria, and application of statistical analyses. Prerequisite: EPSY 710 or equivalent.

EPSY 818. Social Development. 3 Credits.
This course covers current research on environmental, individual, and interpersonal factors influencing social aspects of development, including the development of key social relationships (e.g., family, friends) across the lifespan, with a primary emphasis on childhood and adolescence. Topics covered include temperament and personality, self and identity, attachment, family relationships, peer relations, aggression, and prosocial behavior. Course emphasizes consideration of educational and clinical practices in the context of research on social development.

EPSY 820. Research and Practice in College Teaching. 3 Credits.
This course emphasizes the application of key concepts from the psychology of learning, including organization of knowledge, motivation, and metacognition, to college-level teaching practice. In this course, students will develop and evaluate course-level learning goals, evaluate instructional materials for their use of inclusive teaching practices, identify characteristics of effective assessments, and reflect on and evaluate their own teaching practices in relation to course concepts.

EPSY 822. Educational Scales, Questionnaires, and Sampling. 3 Credits.
Development, construction, validation and scaling of noncognitive instruments including questionnaires, surveys, checklists, rating scales and unobtrusive measures. The sampling methodology is emphasized. Item construction and analysis and the development of subscales are stressed. Prerequisite: EPSY 720 or EPSY 725 and EPSY 710.

EPSY 825. Positive Psychotherapy and Strength-Based Counseling. 3 Credits.
Positive psychologists call for an equal focus on strengths and weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first
present an introduction to the core assumptions and research findings associated with positive traits and emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy. Each class will be organized as didactic presentation of core concepts, discussion of the assigned readings, and experiential learning activities. The tracking of the evolution of positive psychology is covered leading to its integration into the core change processes of integrated approaches to psychotherapy. The theories forming the foundation of the class include Broaden and Build, Hope Theory, the Complete State Model, and Self Determination. Multicultural perspectives on positive traits and change processes will provide an important context for the course.

EPSY 830. Individual and Group Assessment. 3 Credits.
A consideration of basic concepts pertaining to selection and interpretation of both standardized and non-standardized assessment procedures and devices with attention given to communicating assessment information within the context of the counseling relationship. Prerequisite: EPSY 725 or comparable undergraduate principles of measurement course.

EPSY 835. Clinical Techniques in Academic Assessment and Intervention. 3 Credits.
Students will learn techniques of formal and informal assessment of academic skills in school-aged students. In addition, students will learn consultation and intervention approaches and strategies for use with students who have academic delays. This course has a field-based practicum component. Prerequisite: Graduate student standing in the School Psychology program and permission of instructor.

EPSY 836. Behavioral & Systems Neuroscience in Education. 3 Credits.
This graduate-level course is designed to provide an overview of important models, principles and research findings related to behavioral and systems neuroscience in education. Attention is given to the basic structure of the nervous system, the fundamental units of the nervous system (the neuron and the synapse), the function of different components of the central nervous system, the sensory, motor, and memory systems, and the networking of these systems in perception, learning, and cognition. Also, attention is given to how the nervous system behaves with other brain structures that support fundamental mental abilities such as attention, cognitive control, emotion, language, memory, and social cognition. Finally, within these topics, attention is given to understanding how the nervous system works by studying the physiological basis of adaptive behaviors and maladaptive behaviors of the mind.

EPSY 837. The Neuroscience of Motivation and Emotional Behaviors. 3 Credits.
Using a neuroscience lens, this course focuses on integration of research and theory on motivation and emotion from across developmental, affective, cognitive, and social fields. Emotion and motivation are the core of human life and thought, without which we could not survive even in the most benign environments. This course examines how emotion and motivation innervate thought and behavior to enrich human experience and “bias” the decisions we make in everyday life, as well as how thought, behavior, and environment innervate emotion and motivation.

EPSY 840. Guidance and Counseling in the Public Schools. 3 Credits.
This course is designed to provide information about the organization and administration of guidance and counseling programs in the public schools. Non-majors wishing to know more about the role of the counselor can be admitted with approval of the instructor.

EPSY 841. Center for Psychoeducational Services Practicum. 3 Credits.
The primary purpose of this course is for students to develop individual counseling skills by working with clients in the Center for Psychoeducational Services. In this course you will implement a semi-structured positive psychology intervention with clients experiencing mood disorders and general psychological distress. Prerequisite: Enrollment in the CPSYS MS program.

EPSY 842. Counseling Practicum (Elementary, Secondary, Counseling Psychology). 3-6 Credits.
This course is taken as one of the last courses in the master's degree counseling program. The primary purpose of the course is for the student to develop individual counseling skills while functioning in a counseling setting. In addition to individual skills, students are also encouraged to participate in group counseling and other counseling related activities within the particular counseling setting. Students enroll in practicum for the level most closely related to their professional goals, i.e., elementary, secondary, counseling psychology. Graded on a satisfactory/fail basis. Prerequisite: EPSY 740, EPSY 742, EPSY 830, EPSY 880 and EPSY 896 (Advanced Skills) and prior or concurrent enrollment in EPSY 840, EPSY 844, EPSY 846 and EPSY 875. For M5 Terminal track, EPSY 845 and EPSY 956 enrollment must be prior or concurrent as well. Pre-enrollment with practicum coordinator. Students currently on academic probation will not be allowed to enroll in practicum.

EPSY 844. Theory of Group Counseling. 3 Credits.
Focuses on issues in group counseling. Topics covered are types of groups, theoretical orientation of groups, stages of group development, group leadership, selection of members, ethical issues, and effectiveness of groups. Prerequisite: Students must be admitted to the Program in Counseling Psychology. Nonmajors must have prior written consent of instructor.

EPSY 845. Substance Abuse Counseling. 3 Credits.
The aim of this course is to provide advanced training in the area of substance abuse and substance addictions counseling to graduate students in the helping professions. Topics covered include practical guidelines, specific intervention strategies, treatment principles, legal and ethical responsibilities, and issues within the field. Prerequisite: EPSY 740, EPSY 742.

EPSY 846. Career Development. 3 Credits.
Stresses the importance of career development in education, with an emphasis on developmental life planning. Course includes topics such as delivery systems, utility of career development theory, sexism and racism in career development and counseling, the effects of sex role socialization, nature of the world of work, evaluation of career information, use of career information in individual and group counseling, and the role of empirical research in career development theory and practice.

EPSY 850. Human Relationship Skills in the Classroom. 3 Credits.
The purpose of this course is to provide educators with an awareness and skill training in basic human relationship/communication skills. The course is focused on skills that provide educators with effective communication skills for working with students, educators, and parents.

EPSY 855. Psychoeducational Clinic I: Assessment, Consultation, and Intervention. 3 Credits.
This is a practical course where students apply previous learning and gain experience in assessment and intervention with children, families, and school consultation. Team collaboration, peer review, and case conferences are essential elements of this course. Students work with clients in the on campus learning center under supervision. Topical seminars also are included throughout the semester. Prerequisite:
Graduate student standing in the School Psychology program and permission of instructor.

**EPSY 860. Assessment of Behavior Problems and Personality. 3 Credits.**
The purpose of this course is to examine appropriate assessment techniques for the evaluation of behavior problems. Interview procedures, behavioral observation strategies, behavior rating scales and checklists, self-report inventories, and rational theoretical techniques will be introduced. The intent is to place these assessment approaches in their theoretical contexts and to discuss how they could be used by pupil personnel specialists to understand the problem behavior and plan interventions to enhance students’ personal adjustment and achievement in the classroom. Prerequisite: EPSY 770, graduate standing in the School of Psychology program, or permission of instructor.

**EPSY 865. Psychoeducational Clinic 2: Assessment, Consultation, and Intervention. 3 Credits.**
A continuation of School Psychology Clinic I where students will be performing the same activities at a higher level of autonomy and independence. Prerequisite: Graduate student standing in the School Psychology program, EPSY 855, and permission of instructor.

**EPSY 870. Quantitative Methods for Research in Educational Leadership and Policy Studies. 3 Credits.**
This course addresses the conceptual basis of statistical analysis with an emphasis on applied data analysis. The use of descriptive statistics, distributions, graphic displays, hypothesis testing, group comparison, and analyses of relationships among variables to explore research questions in education will be covered. This course is designed specifically for Ed.D. students in the School of Education. Students in other degree programs may not enroll. Prerequisite: This course is open only to Ed.D. students in the School of Education.

**EPSY 871. Crisis and Disaster Counseling. 3 Credits.**
This course provides advanced training in Crisis and Disaster Counseling to graduate students in the helping professions, providing students with the foundation, knowledge, and skills to effectively help those in crisis. Practical guidelines, specific intervention strategies, treatment principles, legal and ethical responsibilities, and self-care regarding crisis work will be discussed and integrated. Prerequisite: EPSY 740 and EPSY 742; or consent from instructor.

**EPSY 875. Understanding Cultural & Individual Differences in Professional Psychology. 3 Credits.**
Examines the role of culture in human behavior and its influence in counseling theories, practice, and research. The course will assist students develop multicultural awareness, understanding, and skills in working with people from diverse racial, social, cultural, and individual backgrounds. The course will provide opportunities for self-examination of cultural assumptions/values in order to develop multicultural competence. Prerequisite: EPSY 742 or equivalent.

**EPSY 880. Ethical and Legal Issues in Psychology and Counseling. 3 Credits.**
An examination of legal, ethical, and professional standards and issues affecting the practice of professional psychology. Topics include legislative regulation of professional psychology, ethical standards and codes of conduct for psychology and related mental health professions, standards of professional practice, and issue of practice liability and risk management.

**EPSY 882. History and Systems of Psychology. 3 Credits.**
A historical survey of the evolution of concepts, theories, and systems of thought in psychology with an emphasis on their relationship to contemporary issues in psychological theory, research, and practice. Prerequisite: Graduate standing in EPSY or consent of the instructor.

**EPSY 885. Projective Assessment. 3 Credits.**
The major goal of the course is to integrate information about a person from one or more projective tests into a useful summary. The projective assessment instruments to be used include the Rorschach (using the Exner system of scoring and interpretation), the Thematic Apperception Test, and projective drawings (e.g., Draw-A-Person test). Prerequisite: At least one graduate-level course in measurement and one graduate course in assessment plus consent of the instructor.

**EPSY 888. Evidence Based Practice in Counseling Psychology. 3 Credits.**
This course is an introduction to the skills involved in a small number of Evidence Based Treatments, in the context of understanding their place in the pursuit of Evidence Based Practice. The course includes readings, videos, and discussion of the treatments, with a heavy experiential component of role plays and reviews on video through the Center for Psychoeducational Services. The emphasis is on developing initial skills in the selected treatments. Prerequisite: Graduate student in Counseling Psychology or permission of the instructor.

**EPSY 890. Diagnosis and Psychopathology. 3 Credits.**
An examination of psychological disorders from a counseling psychology perspective that emphasizes strengths. The course will cover the current version of the Diagnostic and Statistical Manual (DSM), as well as alternative taxonomies, exploring personality as it ranges from normal personality styles to personality disorders, and the full range of mental disorders. The emphasis is on identifying and assessing these phenomena and understanding behavioral and possible treatment implications. Prerequisite: Degree seeking status in Counseling Psychology or consent of instructor.

**EPSY 893. Internship in School Counseling. 2 Credits.**
Two consecutive enrollments covering a period of one academic year. During this time the student prepares a portfolio of skills competencies, classroom guidance programs presented, and other experiences appropriate to the student’s school level: Supervision will be conducted on an individual basis and will include a minimum of two site visits per semester. Prerequisite: Must have school counseling position and a completed Masters degree from K.U. in School Counseling.

**EPSY 895. Field Experience in: _____ 1-5 Credits.**
Supervised and directed experiences in selected educational or mental health settings. The campus-based instructor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the campus-based instructor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit in this and additional field experience enrollments may not exceed eight hours. Graded on a satisfactory/fail basis. Prerequisite: EPSY 824 and consent of the practicum coordinator.

**EPSY 896. Seminar in: _____ 1-3 Credits.**
Prerequisite: Permission of instructor.

**EPSY 897. Independent Study. 1-4 Credits.**
Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of advisor and instructor.

**EPSY 898. Master’s Project. 1-4 Credits.**
Graded on a satisfactory/progress/limited progress/no progress basis. Prerequisite: Prior or concurrent enrollment in EPSY 710, EPSY 715, or EPSY 790.
EPSY 899. Master’s Thesis. 1-6 Credits.
Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Prior or concurrent enrollment in EPSY 710.

EPSY 901. Research Practicum in: _____ 1-3 Credits.
This course is designed to give students experience in conducting research. It is expected that students will take this course for at least two consecutive semesters. (This course fulfills the requirement by the School of Education for a two semester, research practicum course.) Prerequisite: Doctoral student status in a program in the Department of Educational Psychology.

EPSY 902. Research Methodology in Education. 3 Credits.
An examination and study of the problems and procedures which relate to the validity of research methods. Emphasis will be placed on reading the current literature on research methodology. Students are required to develop a research proposal. Prerequisite: EPSY 811 and EPSY 720 or EPSY 725.

EPSY 905. Fundamentals of Multivariate Modeling. 3 Credits.
In this course, contemporary approaches to multivariate analysis using mixed-effects models estimated with maximum likelihood and Bayesian methods are presented. Classical topics in multivariate analysis including multivariate analysis of variance and exploratory factor analysis, are covered in the context of mixed-effects models, preparing students for subsequent courses and research that use such model-based methods. Topics include extensions of linear models (regression and analysis of variance) for non-normal data with link functions, introductory matrix algebra, missing data modeling techniques, models for repeated measures data, and path analysis models for multivariate regression evaluating both moderation and mediation effects. Prerequisite: EPSY 810 and experience with a statistical software package.

EPSY 906. Latent Trait Measurement and Structural Equation Models. 3 Credits.
Contemporary measurement theory and latent variable models for scale construction and evaluation, including confirmatory factor analysis, item response modeling, diagnostic classification models, and structural equation modeling. (Same as CLDP 948.) Prerequisite: EPSY 905 and instructor permission.

EPSY 908. Structural Equation Modeling II. 3 Credits.
The purpose of this course is to introduce students to advanced topics in Structural Equation Modeling. Topics to be covered include multi-level models, latent growth models, mixture models and approaches to handling missing and/or non-normal data. Students will be exposed to the various statistical software programs and will be expected to become proficient in utilizing EQS. Prerequisite: EPSY 906 or equivalent course.

EPSY 910. Practicum in School Psychology. 3 Credits.
Supervised practice in the application of psychological theory to educational problems. Includes work useful with exceptional children as well as experiences in the application of such areas as mental hygiene and learning theory to problems involving the total school population. Prerequisite: Permission of advisor and instructor.

EPSY 911. Advanced Practicum in School Psychology. 3 Credits.
A continuation of EPSY 910 with special emphasis on remedial techniques associated with learning difficulties. Prerequisite: EPSY 910 and permission of advisor and instructor.

EPSY 914. Generalized Linear Mixed Models. 3 Credits.
In this course, contemporary methods for the analysis of data that are not normally distributed are presented. Generalized linear mixed models are linear models that map independent or predictor variables onto any type of outcome space of dependent variables. Such models involve the choice of distribution for the dependent variables and a link function to map predictors onto key parameters of the dependent variables distributions. Topics include logistic regression, nomial distributions, count distributions, and distributions for censored, skewed, or otherwise irregular continuous data. Random effects or latent variables are included for each type of model. Prerequisite: EPSY 905 or consent of instructor.

EPSY 918. Seminar in Current Issues in Counseling Psychology. 1 Credit.
An examination of selected current issues in counseling psychology. Prerequisite: Doctoral student status in a program in the Department of Educational Psychology.

EPSY 921. Measurement Theory and Practice I. 3 Credits.
This course provides thorough grounding in modern validity theory including its historical precedents and derivation of classical test theory and item response theory and their application for item analysis and estimation of test reliability and standard error of measurement. Prerequisite: EPSY 725 or EPSY 811 or equivalent.

EPSY 922. Measurement Theory and Practice II. 3 Credits.
Students will learn the assumptions and application of classical test theory and item response theory approaches to scaling and reporting, standard setting, equating, identification of item and test bias, and other topics intended to prepare students for research and development regarding large-scale assessments. Prerequisite: EPSY 921.

EPSY 923. Advanced Theory and Applications of Item Response Theory. 3 Credits.
This course is designed to acquaint students with knowledge of advanced theory and applications in the field of item response theory (IRT). Topics to be covered include: advanced IRT models for dichotomous and polytomous, multidimensional, rater effects, and testlet-based item response data, estimation of parameters for these models and related software, and goodness of fit tests. The course will also focus on some advanced applications using these models, including test development, test score equating, differential item functioning, scoring and score reporting, Monte Carlo simulation studies, and innovative test designs. Prerequisite: EPSY 922 or equivalent course.

EPSY 925. Computer Programming and Applications for Educational Research, Measurement and Statistics. 3 Credits.
The purpose of this course is to provide advanced students in the areas of educational research, psychometrics, and statistics with techniques for computer programming, analysis, and carrying out research using computer simulations. The topics covered are: Programming with Fortran languages, data manipulation and management, analysis, simulation of data according to statistical and psychometric models, numerical techniques for matrix operations, sampling from distributions, solutions for non-linear equations, and Markov-Chain Monte-Carlo techniques. There are no prerequisites for this course, but those students who have coursework through the multivariate statistics level will benefit most from this course. Other suggested courses include those related to psychological and educational measurement, classical test theory, item response theory, and research methods.

EPSY 926. Hierarchical Linear Modeling. 3 Credits.
This course provides students with an introductory background in the basic principles and applications of hierarchical linear modeling (HLM). The course will review both the conceptual issues and methodological issues in using hierarchical linear modeling by working step-by-step with real data sets. Prerequisite: EPSY 810 Regression Analysis (formerly EPSY 904).

EPSY 931. Computer-Based Testing. 3 Credits.
Computer-based testing holds the promise of increasing test validity and reliability while reducing the logistical problems associated with large-
scale assessment. This seminar will provide an overview of what we have learned about administering tests on computer between the 1960s and today. The focus will be on measurement issues, but depending on class interest topics will vary. A prior course in item response theory is desirable but not required. Prerequisite: EPSY 725 or equivalent course.

EPSY 932. Diagnostic Testing. 3 Credits.
There is a great demand for more useful, more actionable test scores. Traditional large-scale group administered tests do not provide this kind of information due to low reliabilities of, or high inter-correlations among, sub-scores. This course will explore approaches used by individually administered tests to provide diagnostic information, new psychometric models that hold promise of providing better diagnostic information, and implications for test design. A primary focus will be on how psychometric models can be used with diagnostic subscores that are more reliable and less correlated than traditional approaches. Prerequisite: PRE 922 or equivalent course.

EPSY 939. Grant Writing for Social Scientists. 3 Credits.
This course seeks to improve writing and research skills for social scientists (e.g., counseling psychologists, educational psychologists, school psychologists, and speech-language pathologists) within grant writing. Developing grant writing skills for social scientists is essential to acquiring competitive funding from government agencies and private foundations. It requires specific content knowledge, writing proficiency, strong research skills, creativity, and persistence. This course will provide students with the basic skills, principles, and techniques necessary to develop a competitive funding proposal.

EPSY 940. Advanced Studies in Educational Psychology and Research. 3 Credits.
A course designed to offer a comprehensive view of the field of educational psychology and research. The course will treat a series of thematic areas with a focus on latest developments and emerging theories in learning, development and quantitative methods. Intended for post-master's level students. Prerequisite: Prior graduate level course work in development, learning, measurement, and statistics.

EPSY 941. Bayesian Statistics. 3 Credits.
The purpose of this course is to acquaint advanced quantitative students with the fundamentals of Bayesian data analysis. The goals of the class are to introduce Bayesian inference, starting from the philosophical perspective, and provide methods for implementing Bayesian analysis for a variety of different statistical models. Class time is balanced between theoretical perspectives and practical applications. Topics covered include: a review of basic probability, Bayes' rule, probability distributions, Markov Chain Monte Carlo (MCMC) estimation and software for its implementation, and applications of MCMC to a variety of statistical models. Prerequisite: EPSY 905 or equivalent or consent of instructor.

EPSY 945. Clinical Supervision and Consultation. 3 Credits.
This course is designed to provide students with a knowledge foundation of clinical supervision and consultation theories and models, modes/ formats of supervision, the supervisory/consulting relationship, legal and ethical considerations in the provision of supervision/consultation, and supervision research issues. Prerequisite: EPSY 948.

EPSY 947. Specialist Research. 1-4 Credits.

EPSY 948. Advanced Practicum I. 3 Credits.
Designed to be the initial advanced practicum for first year doctoral students. Attention is directed to development of a broad range of basic and advanced skills. Graded on a satisfactory/fail basis. Prerequisite: EPSY 842 or equivalent.

EPSY 949. Advanced Practicum II. 3 Credits.
Intensive counseling practice, including group and individual supervision, that may be taken either through Counseling and Psychological Services or an approved site outside of the university. Focus is on the acquisition and demonstration of advanced counseling skills. Two consecutive semesters (Fall, Spring) of enrollment are required of doctoral students. Responsibility to the site is for a continuous nine months, with fall semester responsibilities ending on the first day of spring semester classes. A grade of incomplete will be granted at the end of the regular fall grading period, with the regular fall grade being granted after completion of fall semester responsibilities. Graded on a satisfactory/fail basis. Prerequisite: Satisfactory completion of EPSY 948 and prior or concurrent enrollment in EPSY 951.

EPSY 951. Psychodiagnostic Assessment. 3 Credits.
Survey of selected psychodiagnostic instruments currently in use and their administration, scoring, and interpretation. Emphasis will also be placed on the use of the clinical interview as an assessment tool, case conceptualization/diagnosis, and integrative report writing. Prerequisite: Completion of EPSY 830 and degree-seeking status in Counseling Psychology or consent of instructor.

EPSY 952. Advanced Counseling Theory and Research. 3 Credits.
An advanced treatment of theory, research, and practice issues central to Counseling Psychology. Topics include theoretical and research paradigms in Counseling Psychology; the relationship of theory and research to practice; and evidence on factors influencing counseling processes and outcomes. Prerequisite: Counseling Psychology doctoral student status or consent of instructor.

EPSY 954. Vocational Psychology. 3 Credits.
A survey of the major career development theories in counseling psychology. Models and methods of career counseling will be reviewed and integrated from the different theoretical perspectives. The empirical support of each theory and needed research will be identified. The course will include presentation of theories of career development and their specific applicability in counseling. The career development of special groups (women, the culturally different, non-whites) will be studied as well as alternative methods of delivery in career development and counseling. Prerequisite: Completion of EPSY 846 or equivalent, and Ph.D. degree-seeking status in Counseling Psychology or consent of instructor.

EPSY 955. Research Methods in Counseling Psychology. 3 Credits.
This course is a foundational course in research methods and design in counseling psychology. The course covers (a) design type and threats to design validity, (b) the formulation of research problems, (c) research instrumentation/measures, (d) data analytic methods, (e) interpreting data, and (f) ethical issues, research integrity, and the responsible conduct of research. Prerequisite: EPSY 710 and EPSY 711 or equivalent. Doctoral student in Counseling Psychology or consent of instructor.

EPSY 956. Theory of Couples and Family Counseling. 3 Credits.
A survey of contemporary systems of couples and family counseling. Consideration of couple and family function/dysfunction, theoretical models of family interaction, models of counseling practice and methods, and research on couples and family counseling. Prerequisite: Degree-seeking status in Counseling Psychology or consent of instructor.

EPSY 960. Assessment of Infants, Toddlers, and Young Children. 3 Credits.
The purpose of this course is to introduce the student to the assessment of various domains related to the development of infants, toddlers, and young children. The student will learn how to use formal and informal assessment techniques for screening, diagnostic, educational planning, and educational evaluation purposes. An emphasis will be placed on the
linkage between assessment and intervention. This course is designed for students in the applied psychology fields (i.e., school psychology, counseling psychology, clinical child psychology, and clinical psychology). Prerequisite: EPSY 705, EPSY 725, EPSY 805 and permission from the instructor.

EPSY 965. Foundations of Psychoeducational Consultation. 3 Credits. This is the first of a two semester sequence of courses on school-based consultation. The course is a combination lecture-laboratory experience that introduces the student to the literature, theory, and techniques of consultation. Prerequisite: Approval of instructor.

EPSY 975. Therapeutic Intervention: Home and School. 3 Credits. The course includes a review of literature and theory as well as supervised practice. Therapeutic intervention is broadly conceived, including individual and group counseling, and parent and teacher consultation. The importance of the family-school relationship is stressed. Prerequisite: Permission of instructor and completion of course on counseling.

EPSY 980. Advanced Topics: _____ 1-3 Credits. A special course of study to meet current need of education professionals--primarily for post-master's level students.

EPSY 990. Internship in Counseling Psychology. 1 Credits. Three consecutive enrollments, covering a minimum of eleven months of experience in an approved counseling psychology field setting. Supervision and directed experiences coordinated by the student's adviser, the program training director, and internship setting supervisors. Required of all counseling psychology doctoral students. Prerequisite: Doctoral degree-seeking status in counseling psychology, completion of Ph.D. comprehensive examinations, and consent of counseling psychology faculty.

EPSY 991. Ed.S. Internship. 1-2 Credits. This course has two components: 1) a supervised experience as a practicing school psychologist, and 2) a group supervision class emphasizing case presentations and other integrative practice elements. The student functions as a provisionally certified school psychologist. Prerequisite: Completion of Ed.S. degree.

EPSY 992. Ph.D. Internship in School Psychology. 1-2 Credits. This is a one year, supervised experience in an approved setting. The structure and content of the experience follows guidelines of several professional organizations including The American Psychological Association and the National Association of School Psychologists. Prerequisite: Approval of School Psychology committee.

EPSY 995. Field Experience in: ____. 1-5 Credits. Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

EPSY 996. College Teaching Experience in: ____. 1-5 Credits. To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate's committee.

EPSY 997. Individual Study. 1-4 Credits. Graded on a satisfactory/fail basis. Prerequisite: Prior graduate course work in the area of study and consent of instructor.

EPSY 998. Seminar in: ____. 1-4 Credits. Graded on a satisfactory/fail basis.

EPSY 999. Doctoral Dissertation. 1-15 Credits. Graded on a satisfactory progress/limited progress/no progress basis.

Master of Science in Counseling Psychology

M.S. Degree Program

The master's program in counseling psychology prepares individuals aspiring to work as counselors or in counseling-related fields or those hoping to proceed on into doctoral training. The curriculum provides a broad and general introduction to Counseling Psychology theory, research, and clinical practice. For the Master of Science in counseling psychology degree, students earn a concentration in mental health counseling.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Admission Requirements

The admission deadline is January 5 to begin course work in the following summer or fall.

Required Admission Materials

1. Graduate application (https://gradapply.ku.edu/) and application fee. See Admission in the (https://catalog.ku.edu/graduate-studies/GraduateStudies) section of the online catalog.

2. 1 copy of official transcripts of all previous college work, sent directly to Graduate Studies (http://www.graduate.ku.edu/). The original transcript is forwarded to the School of Education to complete licensing and/or certification paperwork. An undergraduate grade point average of 3.0 or higher is required for regular admission. If applicable, a graduate grade point average of 3.5 or higher is required for regular admission.

3. Letter of intent - 1-2 page statement outlining one's background and professional objectives

4. Resumé.
5. 3 letters of recommendation from people who can assess the applicant’s prospects for completing the program.

M.S. Degree Requirements

The mental health concentration requires about 60 credit hours of course work. Individuals wishing to become licensed professional counselors in Kansas need to meet additional requirements, described online (https://ksbsrb.ks.gov/). You also may wish to consult the American Counseling Association’s website (http://www.counseling.org/) for additional information. Besides a core of work in counseling psychology (including counseling theory, career development, interviewing, assessment, group counseling, professional issues, and practicum), work is required in developmental psychology, research, and diagnosis and psychopathology. All students complete either a thesis, a research project, or a comprehensive examination. After entering the program, students should meet with an advisor to plan a schedule for completing degree requirements. Students in the Kansas City area may take a few courses at the KU Edwards Campus (http://edwardscampus.ku.edu/) in Overland Park.

Master of Science in Education
in Educational Psychology and Research

The department of Educational Psychology (EPSY) (http://epsy.ku.edu/) offers the Educational Psychology and Research (EPR) program leading to a Master of Science in Education (M.S.Ed.) degree. This program includes instruction within two specialized areas of emphasis referred to as "tracks:" Development & Learning (D&L) and Research, Evaluation, Measurement and Statistics (REMS).

The Development & Learning track prepares students for work in schools, nonprofit agencies, and other applied settings, or for future doctoral training. The program includes coursework in the areas of human development, learning and cognition, and educational research methods, as well as completion of a master's thesis or project. The M.S.Ed. is typically completed in 2-3 years of full-time study.

The Research, Evaluation, Measurement, and Statistics (REMS) track prepares students for careers in educational measurement and quantitative methods. The program includes coursework in research methods, psychometrics, and statistical analysis. Students typically complete the M.S.Ed. in 2-3 years of full-time study.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Admission

In order to be eligible for admission to the M.S.Ed. degree program in EPR, students must first meet the admission requirements for graduate study at the University of Kansas. Admission to the degree program also requires recommendation for acceptance by the Educational Psychology and Research Program Committee.

January 5th is the application deadline for the M.S.Ed. program in Educational Psychology and Research. If accepted as an M.S.Ed.
candidate, enrollment begins in the summer or fall semester following the application deadline. The Educational Psychology and Research Program Committee can review only complete applications. It is the applicant's responsibility to ensure that her or his application is complete. Applicants are encouraged to email the department at epsy@ku.edu if they wish to check on the status of their application.

**Required Admission Materials**

**Required Admissions Materials:**

1. Graduate application (https://gradapply.ku.edu/) and application fee. See Admission in the Graduate Studies (http://catalog.ku.edu/graduate-studies/) section of the online catalog.

2. 1 copy of official transcripts of all previous college work, sent directly to Graduate Studies (http://www.grad.ku.edu/). The original transcript is forwarded to the School of Education to complete licensing and/or certification paperwork. An undergraduate grade point average of 3.0 or higher is required for regular admission. If applicable, a graduate grade point average of 3.5 or higher is required for regular admission.

3. The letter of intent should include the following:
   - Indicate whom you would like for an advisor and why.
   - Describe your career goals.
   - Describe how you see your career goals relating to this degree program; that is, describe how you see this program preparing you to meet your career objectives.
   - Describe past work or educational experiences related to this degree program.
   - Describe what skills/competencies and experiences you hope to gain in this program.
   - Describe any past research experiences and accomplishments.
   - Describe one research topic/issue that you would like to pursue in this program.
   - Please provide additional information concerning your background, experience, goals, or accomplishments/awards you believe are pertinent to your application.

4. Résumé.

5. Writing sample - an example of your best scholarly work.

6. 3 letters of recommendation from individuals in a position to evaluate the applicant's qualifications for graduate study.

**ADDITIONAL REQUIREMENTS FOR STUDENTS WHOSE FIRST LANGUAGE IS NOT ENGLISH**

The Applied English Center (AEC) maintains a check-in process for international students and non-native speakers of English. This process serves to confirm each student's level of English proficiency and determine whether English courses will be included as a requirement of the student's academic program. In order to graduate, students who are required to complete AEC courses must meet KU's English proficiency standards as demonstrated by their performance in AEC coursework and evaluations.

- Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed in the policy (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/) are not required to check in at the AEC.
- All other international students and non-native speakers of English who gain admission to campus-based programs are required to check in at the AEC upon arrival on campus.

It takes approximately eight to twelve weeks to process requests for visa documents to enter the United States for incoming international students. These requests cannot be processed unless all documentation has been received. Please consult the KU web site for International Support Services http://www.iss.ku.edu for important information.

**M.S.E. Degree Requirements**

**Area of Focus**

Students in the M.S.Ed. degree program select the area of Development & Learning (D&L) or Research, Evaluation, Measurement, and Statistics (REMS) on which to focus their studies.

M.S.Ed. students are required to:

- Take courses to satisfy our “Core Course Requirement” (18 credit hours).
- Take an additional two EPR courses (minimum of six credit hours) to establish an area of emphasis in one of the two tracks,
- Take an additional two courses (minimum of six credit hours) from departments other than EPSY, one of which must be from a department in the School of Education,
- Complete a master's thesis or project.

**Core Course Requirement**

Students must take at least one course in each of the 5 core areas:

- Learning and Instruction
- Human Development
- Research and Evaluation Methods
- Measurement
- Statistics

Examples of courses that satisfy the core course requirements include, but are not limited to:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPSY 704</td>
<td>Advanced Educational Psychology: Learning Processes in Education</td>
<td>3</td>

<td></td>
<td></td>
</tr>
<tr>
<td>EPSY 715</td>
<td>Understanding Research in Education (All students must take EPSY 715 to satisfy this core course requirement.)</td>
<td>3</td>
</tr>
<tr>
<td>Measurement &amp; Assessment</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Program Emphasis Courses

Students must take an additional two courses beyond the core requirements. These courses should reflect your area of interest. EPSY offers a variety of elective courses and seminars on special topics that satisfy this requirement.

Outside EPSY Courses

Students must take at least two courses offered by departments outside of EPSY. One of these courses must be from a department in the School of Education and Human Sciences and one from another department at the University of Kansas. For example, students have enrolled in courses from the Department of Psychology, Applied Behavioral Science, Mathematics, Communication Studies, the School of Social Welfare, and the School of Business.

Thesis/Project

All Master’s students in EPR must complete a master’s thesis or project. Each student must take a minimum of six master’s thesis or project credit hours. These credit hours allow students to focus on completing their thesis or project.

The EPR Master’s Plan of Study is used by students and their adviser to track progress toward their degree and can be downloaded by clicking on highlighted link above.

Specialist in Education in School Psychology

The program leads to the Specialist in Education (Ed.S.) degree. The curriculum prepares the student to work professionally as a school psychologist and to develop the skills of a psychoeducational consultant. The program emphasizes current issues and trends in school psychology.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Required Admission Materials

1. Graduate application (https://gradapply.ku.edu/) and application fee. See Admission in the Graduate Studies (http://catalog.ku.edu/graduate-studies/) section of the online catalog.

2. 1 copy of official transcripts of all previous college work, sent directly to Graduate Studies (http://www.graduate.ku.edu/). The original transcript is forwarded to the School of Education to complete licensing and/or certification paperwork. An undergraduate grade point average of 3.0 or higher is required for regular admission. If applicable, a graduate grade point average of 3.5 or higher is required for regular admission.

3. The letter of intent should include the following:

Describe your career goals; Describe how you see your career goals relating to this degree program (how you see this program preparing you to meet your career objectives); Describe past work or educational experiences related to this degree program; Describe what skills/competencies and experiences you hope to gain in this program; Describe any past research experiences and accomplishments; Describe one research topic/issue that you would like to pursue in this program; Please provide additional information concerning your background, experience, goals, or accomplishments/awards you believe are pertinent to your application.

5. Résumé.

6. GRE (general test) scores: Institution code, R6871; Major Field code, 3406. The GRE should have been taken within five years of the application date, and scores should typically equal or exceed the 50th percentile.

7. 3 letters of recommendation from individuals in a position to evaluate the applicant’s qualifications for graduate study.

Ed.S. Degree Requirements

The Ed.S. program prepares graduates to work effectively as school psychologists and to meet the recommendations of professional organizations and Kansas licensure requirements. The Ed.S. program is accredited by the National Association of School Psychologists (http://www.nasponline.org/), the National Council for Accreditation of Teacher Education (https://www.chea.org/national-council-accreditation-teacher-education/) through the CAEP accreditation system, and the Kansas State Department of Education (http://www.ksde.org/).

Program Requirements

The Ed.S. program consists of 2 years of full-time graduate study followed by a third year of internship. Students completing the program are qualified to work as a school psychologist in a school setting.

All students obtain competence in school psychology primarily by completing a sequence of prescribed courses and field-based experiences. However, there may be room in a student’s program for electives, depending on previous experiences and course work. The standard course sequence for students in the Ed.S. program is as follows:

<table>
<thead>
<tr>
<th>Year 1</th>
<th>Fall</th>

</tbody>
</table>
The Counseling Psychology doctoral program at KU admits approximately 6-8 students each fall. Both bachelor's level and master's level applicants are considered for admission. The admissions committee will select approximately 30 candidates to be interviewed. All faculty members and current students will have opportunities to participate in the interviews. Both group and individual interview activities will be conducted by faculty and current students on the Interview Day. Candidates who are offered admission are required to "accept" or "decline" the offer no later than April 15th. If a candidate on the alternate list receives an admission offer (which is usually close to April 15th), he/she has 7 days to act on the offer. If the offer is made on or after April 15th, the candidate has 3 days to make a definite decision.

**Recommended minimums for bachelor's level applicants**
- Completion of bachelor's degree in psychology or related field
- Cumulative undergraduate GPA of 3.0 or GPA of 3.25 for the major courses or the last 60 credits of the bachelor's degree
- Prior undergraduate course work in psychological research methods, measurement, and statistics (recommended).

**Recommended minimums for master's level applicants**
- Completion of master's degree in counseling or closely related field
- Graduate GPA of 3.5 or above.

**Alternative Criteria**
Applicants may be admitted under alternative criteria provided there is evidence that regular criteria do not adequately reflect the student's potential to succeed in the program. The faculty will review and make decisions on such applications on a case-by-case basis. The faculty reserves the right to require those who are admitted under the alternative criteria to take some background core courses before or during the first year of their doctoral training in the areas of general psychology.
required if the applicant is unable to appear for an in-person interview in the admission process.

(3) The Applied English Center (AEC) maintains a check-in process for international students and non-native speakers of English. This process serves to confirm each student’s level of English proficiency and determine whether English courses will be included as a requirement of the student’s academic program. In order to graduate, students who are required to complete AEC courses must meet KU’s English proficiency standards as demonstrated by their performance in AEC coursework and evaluations.

- Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed above are not required to check in at the AEC.
- All other international students and non-native speakers of English who gain admission to campus-based programs are required to check in at the AEC upon arrival on campus.

Required Admission Materials

1. Graduate application (https://gradapply.ku.edu/) and application fee. See Admission in the Graduate Studies (p. 2449) section of the online catalog.

2. 1 copy of official transcripts of all previous college work, sent directly to Graduate Studies (http://www.graduate.ku.edu/). The original transcript is forwarded to the School of Education to complete licensing and/or certification paperwork. An undergraduate grade point average of 3.0 or higher is required for regular admission. If applicable, a graduate grade point average of 3.5 or higher is required for regular admission.

3. Letter of intent - 1-2 page statement outlining one’s background and professional objectives

4. Resumé.

5. 3 letters of recommendation from people who can assess the applicant’s prospects for completing the program.

Additional Requirement for Students whose First Language is not English

Students’ oral expression and communication skills play an important role in their success in counseling psychology training programs. Therefore, the counseling psychology program faculty requires that all non-native English speaking applicants (international or domestic applicants) demonstrate their English proficiency by following the guidelines listed below before their applications are reviewed by the admissions committee.

(1) English proficiency - See KU’s policy on English Proficiency Requirements (https://gradapply.ku.edu/english-requirements/) for International Students. Please note: Due to the high demand for English proficiency in conducting counseling, our program requires each subscale score in the iBT TOEFL to be at least 24 or above, with no section score lower than 23.

(2) Zoom interviews or interviews through other on-line media will be required if the applicant is unable to appear for an in-person interview in the admission process.

(3) The Applied English Center (AEC) maintains a check-in process for international students and non-native speakers of English. This process serves to confirm each student’s level of English proficiency and determine whether English courses will be included as a requirement of the student’s academic program. In order to graduate, students who are required to complete AEC courses must meet KU’s English proficiency standards as demonstrated by their performance in AEC coursework and evaluations.

Timing of Comprehensive Exams.

Given the timing of internship placements through the national match process, School Psychology and Counseling Psychology Ph.D. students may be allowed to take comprehensive exams with up to 6 hours of non-required coursework remaining, so long as the remaining courses are not considered part of the research skills requirement, or part of the program core that will be the subject of examination. These remaining hours can count towards the required 18 post-comp hours although students are still required to enroll in dissertation hours.

Doctor of Philosophy in Educational Psychology and Research

The Department of Educational Psychology (EPSY) offers the Educational Psychology and Research (EPR) program leading to a Doctor of Philosophy (Ph.D.) degree. This program includes instruction within two specialized areas of emphasis referred to as "tracks": Development & Learning (D&L) and Research, Evaluation, Measurement and Statistics (REMS).

The Development & Learning track for the Doctor of Philosophy (Ph.D.) degree program prepares students for work as research scientists in educational psychology. Graduates work in a variety of settings, but most commonly seek faculty positions in higher education. The program includes coursework in the areas of human development (with a primary focus on child or adolescent development), learning and cognition, and educational research methods, as well as completion of a data-driven dissertation. Doctoral students develop their own research agenda around a relevant development and learning topic in collaboration with faculty. Research training includes presenting research at national conferences and publishing research in scientific journals. Teaching at the University is also an integral part of our doctoral education. The PhD is typically completed in 3-4 years of full-time study beyond the Master's degree.

The Research, Evaluation, Measurement, and Statistics (REMS) track prepares students for careers in educational measurement and quantitative research methods. The Ph.D. program includes coursework in research methods, psychometrics, and statistical analysis. Students typically complete the Ph.D. in 3-4 years of full-time study.

- REMS refers to the track of study that includes Research methods, Evaluation, Measurement, and Statistics.
- D&L refers to the track of study that includes Development and Learning.

Opportunities are available each year for students to be involved in basic and applied educational research.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

Admission Requirements:

In order to be eligible for admission into the Ph.D. degree program in EPR, students must first meet the admission requirements for graduate study at the University of Kansas. Admission to the degree program also requires recommendation for acceptance by the Educational Psychology and Research Program Committee.

December 15th is the application deadline for the Ph.D. program in Educational Psychology and Research. If accepted as a Ph.D. candidate, enrollment begins in the summer or fall semester following the application deadline. The Educational Psychology and Research Program Committee can review only complete applications. It is the applicant's responsibility to ensure that her or his application is complete. Applicants are encouraged to email the department at epsy@ku.edu if they wish to check on the status of their application.

Application Process Overview:

Each EPSY program has an admissions committee composed of three to five faculty members who specialize in that particular program area. Completed applications are reviewed shortly after the program's deadline date. The criteria for a complete application must be met, but are not the only conditions to assure an applicant's admission to a departmental program. Program admission ultimately depends on committee members' votes based on their perceptions of the applicant's potential for successful completion of the requested degree program and the availability of faculty to advise and direct the applicant's training.

Once the EPSY admissions committee has completed their review, a recommendation (to admit or deny) will be forwarded to the Office of Graduate Studies, where a final decision will be made. Applicants will then receive an official notification of the application decision by email.

Required Admissions Materials:

1. Graduate application (https://gradapply.ku.edu/) and application fee. See Admission in the Graduate Studies (http://catalog.ku.edu/graduate-studies/) section of the online catalog.

2. 1 copy of official transcripts of all previous college work, sent directly to Graduate Studies (http://www.grandude.ku.edu/). The original transcript is forwarded to the School of Education to complete licensing and/or certification paperwork. An undergraduate grade point average of 3.0 or higher is required for regular admission. If applicable, a graduate grade point average of 3.5 or higher is required for regular admission.

3. The letter of intent should include the following:

- Indicate whom you would like for an advisor and why.
- Describe your career goals.
- Describe how you see your career goals relating to this degree program; that is, describe how you see this program preparing you to meet your career objectives.
• Describe past work or educational experiences related to this degree program.
• Describe what skills/competencies and experiences you hope to gain in this program.
• Describe any past research experiences and accomplishments.
• Describe one research topic/issue that you would like to pursue in this program.
• Please provide additional information concerning your background, experience, goals, or accomplishments/awards you believe are pertinent to your application

5. Résumé.

6. Writing sample - an example of your best scholarly work.

7. 3 letters of recommendation from individuals in a position to evaluate the applicant's qualifications for graduate study.

ADDITIONAL REQUIREMENTS FOR STUDENTS WHOSE FIRST LANGUAGE IS NOT ENGLISH:
The Applied English Center (AEC) maintains a check-in process for international students and non-native speakers of English. This process serves to confirm each student's level of English proficiency and determine whether English courses will be included as a requirement of the student's academic program. In order to graduate, students who are required to complete AEC courses must meet KU's English proficiency standards as demonstrated by their performance in AEC coursework and evaluations.

• Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed in the policy (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/) are not required to check in at the AEC.

• All other international students and non-native speakers of English who gain admission to campus-based programs are required to check in at the AEC upon arrival on campus.

It takes approximately eight to twelve weeks to process requests for visa documents to enter the United States for incoming international students. These requests cannot be processed unless all documentation has been received. Please consult the KU web site for International Support Services http://www.iss.ku.edu for important information.

Ph.D. Degree Requirements

Area of Focus
Students in the Ph.D. degree program select a track—D&L or REMS—on which to focus their studies.

Program Core Course Requirements
All doctoral students must enroll in at least one course at or above the 800 level in each of the following program core areas. Examples of courses commonly chosen to meet these requirements are shown below.

School of Education Core Course Requirements

Under School of Education and Human Sciences policy, all Ph.D. students must complete "EDUC 800: Education as a Field of Scholarship." This course must be taken during the first year of a student's doctoral program.

Specialization Courses
All students must complete 8 courses (24 credit hours) in addition to the program and school core requirements. These "specialization courses" should complement a student's growing research focus and agenda. At least two of the 8 courses must be taken from academic units other than EPSY. Students consult with their advisers to identify courses that support their major area of study.

Dissertation Credit Hours
During the dissertation period, students must be enrolled continuously with a minimum of at least 6 credit hours each semester (excluding summers), until the student either graduates or reaches 18 credit hours post comprehensive exams. Students may begin enrollment in dissertation hours the semester in which they pass the oral comprehensive exam.

Additional Ph.D. Requirements

Ph.D. Residence Agreement
Doctoral students must be enrolled full-time for at least two consecutive semesters during their doctoral training. Consecutive full-time enrollment for two semesters can be attained from Fall, Spring, and Summer semesters.

Comprehensive Examination
Following completion of the majority of the specialization course work, a student must complete and pass a written preliminary comprehensive examination and then a comprehensive oral examination. The candidate, in consultation with his/her advisor, assembles a comprehensive examination committee. The program advisor and the exam committee
define the nature of these examinations. During the semester in which students plan to take their comprehensive exams, they should begin enrolling in dissertation hours.

**Dissertation**

Upon passing the written and oral portions of the comprehensive examination, doctoral candidates, in consultation with their advisors, assemble a dissertation committee. For information on post-comprehensive enrollment and general information about doctoral programs, see the Doctor of Philosophy section in the Graduate Studies portion of the online catalog.

**Doctor of Philosophy in School Psychology**

The program leads to the Doctor of Philosophy (Ph.D.) degree. Reflecting a "scientist-practitioner" training orientation, the doctoral program in School Psychology extends the student's knowledge and applied research and teaching skills. Knowledge in the psychological foundations contributes to the development of effective scientist-practitioner school psychologists who utilize psychological theories and scientific research to inform their practice. We also recognize that the science and practice of school psychology mutually influence each other—science informs practice and practice informs science—and that an understanding of individual, ethnic, and cultural diversity serves as a foundation to effective science and practice of school psychology. Therefore, the program offers a curriculum within which all students are expected to acquire and demonstrate a substantial understanding of and/or competence in:

1. Professional school psychology (i.e., psychodiagnostic assessment, consultation, intervention, professional practice/ethics, learning, development, statistics, psychoeducational measurement, research design, and special education);
2. Psychological foundations (i.e., biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, individual bases of behavior, and history and systems of psychology);
3. Research skills; and
4. Appreciation/sensitivity to individual, ethnic, and cultural diversity.

The program is typically a four-year program of full-time study, followed by a full-year internship in health psychology.

The program is housed in the KU School of Education and Human Sciences, which is accredited under the CAEP Accreditation System. The Ph.D. program is accredited by the American Psychological Association (APA) and is approved by the National Association of School Psychologists and Kansas Department of Education.

If you have any questions about the program’s APA accreditation status, please contact:

Office of Program Consultation and Accreditation (https://www.accreditation.apa.org/)
American Psychological Association
750 First Street, N.E.
Washington, DC 20002-4242
Phone: 202-336-5979
Fax: 202-336-5978
Email: apaaccred@apa.org

**Graduate Admission to the School of Education and Human Sciences**

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

**Admission**

The admission deadline is **December 15** to begin course work in the following summer or fall.

**Required Admissions Materials**

1. Graduate application (https://gradapply.ku.edu/) and application fee. See Admission in the Graduate Studies (http://catalog.ku.edu/graduate-studies/) section of the online catalog.

2. 1 copy of official transcripts of all previous college work, sent directly to Graduate Studies (http://www.graduate.ku.edu/). The original transcript is forwarded to the School of Education to complete licensing and/or certification paperwork. An undergraduate grade point average of 3.0 or higher is required for regular admission. If applicable, a graduate grade point average of 3.5 or higher is required for regular admission.

3. The letter of intent should include the following:

   - Describe your career goals; Describe how you see your career goals relating to this degree program (how you see this program preparing you to meet your career objectives); Describe past work or educational experiences related to this degree program; Describe what skills/competencies and experiences you hope to gain in this program; Describe any past research experiences and accomplishments; Describe one research topic/issue that you would like to pursue in this program; Please provide additional information concerning your background, experience, goals, or accomplishments/awards you believe are pertinent to your application.

5. Résumé.

6. GRE (general test) scores: Institution code, R6871; Major Field code, 3406. The GRE should have been taken within five years of the application date, and scores should typically equal or exceed the 50th percentile.

7. 3 letters of recommendation from individuals in a position to evaluate the applicant’s qualifications for graduate study.

The doctoral program adheres to a scientist-practitioner model of training. Doctoral study extends the student's applied, research, and teaching skills. Research skills are described under Doctor of Philosophy with a Major in Education. Completion of the program typically requires 4 years of full-time study followed by a full year of internship.

### Total Hours 8

Timing of Comprehensive Exams.

Given the timing of internship placements through the national match process, School Psychology and Counseling Psychology Ph.D. students may be allowed to take comprehensive exams with up to 6 hours of non-required coursework remaining, so long as the remaining courses are not considered part of the research skills requirement or part of the program core that will be the subject of examination. These remaining hours can count towards the required 18 post-comp hours although students are still required to enroll in dissertation hours.
Graduate Certificate in Mind, Brain, and Education

The Graduate Certificate in Mind, Brain, and Education is designed to draw on basic and applied interdisciplinary research from the disciplines of neuroscience, psychology, and cognitive science to explore human learning and development and to understand how research in these fields will generate innovative approaches to teaching, learning, and education.

Completion of the certificate in Mind, Brain, and Education represents an additional credential for graduate students from a variety of academic fields who are preparing for careers in research and teaching or professional practice. The certificate is designed for PK-16 teachers and instructors, administrators, and student support personnel, as well as organizational leaders, consultants, and policy makers seeking to explore how research from the learning sciences has the potential to inform the field of education. The cornerstone of this certificate centers on understanding the neural mechanisms of learning and development and the role of experience in shaping (neuroplasticity) the brain through the lifespan.

The timeframe for completion is four consecutive semesters (spread over two academic years). Enrolling in individual courses requires the permission of Dr. Orosco (Mind, Brain, and Education Advisor).

Enrollment in the program is open to students admitted to a regular KU graduate program as well as students who are not currently enrolled at KU. A Bachelor’s degree is required.

Graduate Admission to the School of Education and Human Sciences

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

To be considered for admission, prospective students must have completed a Bachelor’s degree with a GPA greater than 3.0. Applicants with an Undergraduate GPA below 3.0 should contact an admission advisor for information about provisional admissions.

International applicants must meet English language proficiency requirements. These requirements are located here (https://gradapply.ku.edu/english-requirements/).

For more information about our admission requirements, visit the Department of Educational Psychology (https://epsy.ku.edu/admission/) website.

Course requirements for the Graduate Certificate in Mind, Brain, and Education:

Department of Health, Sport, and Exercise Sciences

Health, Sport, and Exercise Sciences

The Department of Health, Sport, and Exercise Sciences (HSES) offers undergraduate and graduate degrees preparing students to work in health, sport, and exercise-related fields. HSES graduates apply their knowledge to serve as teachers, researchers, clinicians, managers, administrators and other professionals in academic, private, and public settings.
The department of Health, Sport, and Exercise Sciences (HSES) has a proud history. James Naismith, the inventor of basketball and KU's first basketball coach and athletic director began teaching physical education in 1898 – twelve years before the School of Education & Human Sciences (https://soehs.ku.edu/) came into existence.

In addition to its academic programs, HSES offers research opportunities for faculty and students in a variety of laboratories (https://hses.ku.edu/mission-vision/research-labs/), which include research in applied physiology, athletic performance, neuromechanics, exercise science, amateur sports, sport & exercise psychology and other areas.

The department is also active in community outreach with swim classes, the Sports Skills and Fitness School, and Hawk Fitness Academy for children.

In addition, the department offers physical activity classes (HSES 108) for KU students and fitness and recreation facilities (http://hses.ku.edu/community/recreation/) for faculty and staff.

**Undergraduate Programs**

The Department of Health, Sport, and Exercise Sciences offers the following undergraduate programs:

- Community Health
- Exercise Science
- Physical Education Plus – grades PreKindergarten – 12th
- Sport Management

All undergraduate programs include a strong general education component with a focus on the biological sciences in addition to coursework in the major.

The Department of Health, Sport, and Exercise Sciences also offers the following minor:

- Sport Management

The Academic Catalog is a guideline for policies and procedures in the School of Education & Human Sciences. However, academic program requirements change. Students are strongly encouraged to check the school's website (https://soehs.ku.edu/) and the department for the most current information.

**Labsories and Facilities**

HSES programs at all levels are supported by experiential education opportunities. The department maintains excellent laboratories for student and faculty research, including biomechanics, motor development/adaptive, applied physiology, sport management, and sport and exercise psychology. All students are exposed to the laboratories and clinics, which serve KU and the community. View (https://hses.ku.edu/mission-vision/research-labs/) further information about HSES labs and clinics.

**Graduate Programs**

Graduate work in health, sport, and exercise sciences includes an offering of courses leading to the Master of Science in Education and Doctor of Philosophy degrees. Entrance requirements include completion of an undergraduate program and admission to graduate studies through the Graduate Division of the School of Education.

HSES provides concentrated graduate study in the following specializations: Exercise Science (M.S.E.), Exercise Physiology (Ph.D.), Health & Psychology of Physical Activity (M.S.E. and Ph.D.), Physical Education Pedagogy (M.S.E.), and Sport Management (M.S.E. online) and Ph.D.

**Labsories and Facilities**

HSES programs at all levels are supported by experiential education opportunities. The department maintains excellent laboratories for student and faculty research, including biomechanics, motor development/adaptive, applied physiology, sports management, and sport and exercise psychology. All students are exposed to the laboratories and clinics, which serve KU and the community. View (http://hses.soe.ku.edu/research/) further information about HSES labs and clinics.

**Courses**

**HSES 104. Physical Activity in: _____**

An accurate description of the activity or activities will be given in the Schedule of Classes. Graded on a satisfactory/unsatisfactory basis.

**HSES 108. Basic Skill Instruction in: _____**

(An accurate description of the activity or activities will be given in the Timetable.)

**HSES 110. Intermediate Skill Instruction in: _____**

(An accurate description of the activity or activities will be given in the Timetable.)

**HSES 112. Advanced Skill Instruction in: _____**

(An accurate description of the activity or activities will be given in the Timetable.)

**HSES 200. Coaching Certification for Youth Sports. 2 Credits.**

This course will examine theories, practices, methods and techniques used to coach youth sports. Emphasis will be upon training, conditioning, sports psychology, nutrition, organization and management as prescribed by the National Federation of Interscholastic Coaches' Education Program. Students will have opportunity to receive coaching certification. Prerequisite: Open to physical education majors, or by consent of instructor. Students must pass the National Federation of Interscholastic Coaches' Education Program (NFICEP) examination before exiting the course.

**HSES 201. Team Sports. 2 Credits.**

This course will deal with Soccer, Touch Football, Basketball, Softball, and Volleyball. Practice in construction of lesson plans and unit plans, skill performance and peer teaching practicum are emphasized in each of the areas of team sports. Class meets three days per week with one hour being a laboratory session. Prerequisite: Basic fitness and knowledge of the activities. Open to HSES majors and minors, or by consent of instructor.

**HSES 202. Individual and Dual Sports. 2 Credits.**

Instruction and analysis in individual sports such as track and field, bowling or archery, and dual sports such as tennis, badminton or handball. Development of sport skills and rule knowledge are emphasized. Prerequisite: Basic fitness and knowledge of the activities. Prerequisite: Open to pre-HSES and HSES majors, or by consent of instructor.

**HSES 204. Gymnastics. 2 Credits.**

Instruction and analysis in the eleven gymnastics events for men and women. Skill performance, spotting and teaching techniques, lesson and unit plan construction, and teaching practicum constitute the basic focus of this course. Class meets three days per week with one hour being a laboratory session. Prerequisite: Basic fitness and gymnastics/tumbling experience. Open to HSES majors and minors, or by consent of instructor.
HSES 210. Instruction and Analysis in Swimming. 1 Credit.
Study of the skills to be included in the instruction of swimming and the analysis of skill performance involved. Presentation of instructional techniques and practice in construction of learning experiences are included.

HSES 214. Physical Education Activities for Elementary School Children. 2 Credits.
This course will introduce the student to a variety of physical education activities that are appropriate for children in grades K-6. Age appropriate activities demonstrated in this course include: individual and group games, self testing games, stunts and tumbling experiences, physical fitness, modified sports, and movement exploration. Class participation will be expected for all students. Prerequisite: Open to pre-HPE and HPE majors.

HSES 218. Lifeguard Training. 2 Credits.
The course involves American Red Cross certification in lifeguarding which includes rescue techniques and safety procedures. It also includes first aid and CPR certifications. Each student will be asked to identify common hazards associated with various types of aquatic facilities and develop skills necessary to recognize a person in a distress or drowning situation and to effectively rescue that person. This course will help each student to understand the lifeguard/employer and lifeguard/patron relationship as well as provide explanations, demonstrations, practice and review of the rescue skills essential for lifeguards. Prerequisite: HSES 112 Advanced Skill Instruction in Swimming or consent of instructor.

HSES 220. Officiating of: _____. 1 Credit.
A study of the rules and techniques of officiating. Students will officiate during laboratory sessions. The activities offered in officiating are: basketball, football, gymnastics, softball, swimming, track and field, and volleyball. Prerequisite: Basic competency in the sport to be officiated, or consent of instructor.

HSES 222. Water Safety Instruction. 2 Credits.
This course is designed to train instructor candidates to teach American Red Cross Swimming and Water Safety courses. Through practice teaching sessions, students will plan and organize skill development utilizing the various educational methods and approaches applicable to swimming and water safety instruction. Students will also learn the correct swimming styles taught by the Red Cross. Prerequisite: HSES 112 Advanced Skill Instruction in Swimming or consent of instructor.

HSES 224. Lifeguard Training Instructor. 2 Credits.
This course is designed as a lecture/laboratory course, meeting for one hour three days per week. Each instructor candidate (student) will have an opportunity for skill development necessary to instruct American Red Cross Lifeguard Training courses. Through practice teaching sessions, emphasis will be placed on enforcing safety precautions, identifying errors, providing effective instruction, and skills correction. After successful completion of this course, the student will be certified to instruct the following American Red Cross Aquatic courses: (1) lifeguard training, (2) waterfront lifeguarding, (3) CPR for professional rescue, and (4) community first aid. Prerequisite: HSES 218 or lifeguard training.

HSES 236. Practicum in: _____. 1-3 Credits.
A description of the activities offered will be provided in the Timetable. Prerequisite: Consent of instructor.

HSES 240. The Coaching of Football. 2 Credits.
A complete study of the theoretical aspects of the fundamentals of football. Study of defensive and offensive tactics for each position. Prerequisite: Sophomore standing.

HSES 244. Introduction to Physical Education and Sport Studies. 3 Credits.
The study of the history, foundational concepts, and current principles of physical education and sport programs.

HSES 248. First Aid. 2 Credits.
This course is designed to teach emergency treatment of injuries, wounds, hemorrhage, burns, and poisoning. Emphasis is placed on the techniques of rescue breathing, CPR, and emergency bandaging. American Red Cross certification is included.

HSES 250. Introduction to Athletic Training. 3 Credits.
Introduction to the health profession of Athletic Training. Course content includes; risk management, pathology, emergency management, musculoskeletal, and general medical conditions of the injured athlete. Prerequisite: Concurrent enrollment in HSES 251.

HSES 251. Introduction to Athletic Training Practicum. 1 Credit.
This course is designed to introduce the beginning skills to the pre-professional athletic training student. Emphasis will be placed on basic athletic training procedures including but not limited to preventative taping, bracing, and padding techniques as well as various other procedures and techniques related to the prevention, care, and management of athletic related injuries/illnesses. Prerequisite: Concurrent enrollment in HSES 250 or transfer credit.

HSES 252. The Coaching of Basketball. 2 Credits.
Theory of basketball, including methods of teaching fundamentals; individual and team offense and defense; various styles of play and methods of coaching. Prerequisite: Sophomore standing.

HSES 260. Personal and Community Health. 3 Credits.
Emphasis on healthful and intelligent living and the application of the fundamental principles of health.

HSES 262. Life Skills Training for Intercollegiate Athletics. 2 Credits.
This course will focus on issues surrounding drug use, testing, and prevention in sports and will incorporate life skills training in the areas of career transition, stress and time management, performance enhancement, strategic learning skills, and the dynamics of communication and leadership.

HSES 264. The Coaching of Individual Sports. 2 Credits.
An analysis of coaching techniques and study of materials for the coaching of gymnastics, swimming, golf, tennis, and wrestling.

HSES 269. Introduction to Exercise Science. 3 Credits.
A study of the various components of physical fitness and the wellness and the implications for developing programs to promote good health and fitness. Lectures and laboratory sessions will be centered on practical knowledge and experiences designed to help individuals enhance their own health, as well as develop sound programs for others. The topics discussed include cardiovascular fitness, body composition, muscular strength, flexibility, evaluation of fitness components, training program design, nutrition, weight management, and facts and fallacies of nutrition and fitness.

HSES 289. Introduction to Sport Management. 3 Credits.
This course provides an overview of the field of sport management including the principles of leadership and management and the fundamentals of personnel management, financial management, marketing, strategic planning, sport ethics, sport law, team management, stress management, facility management, and event management applied to sport settings.

HSES 290. Safety Education. 3 Credits.
A survey of safety problems as they exist in society today, with emphasis on preventive, corrective, and compensatory procedures.

HSES 299. Careers in Sport Management. 3 Credits.
In this course, students will learn about the professional world of sport management. Specifically, those enrolled will be exposed to the multitude of career paths in the sporting world. Additionally, students will learn numerous internship and job search skills such as political skill, networking, and personal branding.

**HSES 300. Study Abroad Topics in: _____**. 1-5 Credits.
A course designed to enhance international experience in topic areas related to health, sport, and exercise sciences at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Permission of the department.

**HSES 302. Practicum in Adaptive Physical Education for PK-12 Students.** 2 Credits.
Emphasis will be on instructional techniques that are used for the inclusion of all students in physical education learning experiences. Students will develop an understanding of how to deliver physical education activities that may be part of an individual education program. A practicum experience in a public school adaptive physical education setting will be required. Prerequisite: PE Plus advisor approval required.

**HSES 305. Methods of Strength Training and Conditioning.** 3 Credits.
This course will provide the students with the scientific principles and the hands-on experience to develop resistance exercise and related conditioning programs for a wide range of populations, including those focusing on general fitness, therapeutic rehabilitation and sport performance. Prerequisite: Anatomy, physiology, and admission to the Exercise Science undergraduate program, or permission of instructor.

**HSES 306. Principles of Personal Training.** 3 Credits.
Designed to prepare individuals who are interested in becoming certified personal trainers (CPT) through the National Strength and Conditioning Association, or to enhance their own training goals. Instruction is provided describing basic exercise physiology as well as the principles of developing a personal training regimen for a typical gym trainee. Course experiences will reinforce training principles and teach the basic skills necessary for certification. Prerequisite: Accepted to School of Education or instructor permission.

**HSES 307. Tactical Strength and Conditioning.** 3 Credits.
This course will provide students with methods and techniques associated with assessing, programming, and training tactical-based athletes and professionals. Tactical athletes include military, law enforcement, firefighter, protective services, rescue, and other emergency personnel. Students will apply scientific knowledge to develop training programs to improve performance outcomes, decrease injury, evaluate nutritional strategies, and implement relevant and safe strength and conditioning programs. This course will be designed to prepare students to take the Tactical Strength and Conditioning Facilitator (TSAC-F) certification examination proposed by the National Strength and Conditioning Association (NSCA).

**HSES 308. Drugs and Diseases in Society.** 3 Credits.
This course is an overview of human disease processes as well as legal and illegal use of drugs and narcotics for treatment or recreational purposes. Both communicable and degenerative diseases will be covered with regards to prevention, transmission, effects, management, and treatment. Legal drugs and illegal drugs will be discussed with regards to their treatment or abuse potential, legislative issues, and consumer education. Reflective thinking will be used to formulate improved perspectives on the roles of drugs and diseases in society. Prerequisite: Admission to Community Health Program or consent of instructor.

**HSES 310. Research and Data Analysis in Health, Sport, and Exercise Sciences.** 3 Credits.
This course provides formal instruction in the areas of test administration, general statistics, and basic research design. Emphasis will be placed upon the interpretation of statistical data, evaluation of data, and basic methodologies utilized in health, sport, and exercise sciences research. Data collection, analysis, and evaluation will be an integral part of the class.

**HSES 315. Methods of Teaching Elementary Physical Education.** 3 Credits.
This course will provide an introduction to instructional planning for elementary physical education. It will train students to utilize research and best practice as it relates to effective teaching skills in elementary physical education. Students will systematically learn such skills and apply them in a variety of laboratory experiences in elementary schools. Prerequisite: PE Plus advisor approval required.

**HSES 320. Methods of Teaching Secondary Physical Education.** 3 Credits.
This course provides a systematic approach to the development of effective teaching skills in secondary physical education. Students receive practical and field experiences that enable them to observe and practice managerial, instructional, and interpersonal skills necessary to produce student learning in 6-12 physical education classrooms. Prerequisite: PE Plus advisor approval required.

**HSES 330. Principles of Nutrition and Health.** 3 Credits.
This course will provide an introduction to the basic principles of nutrition, with an emphasis on application of these principles to improve overall health. Topics include: guidelines for a balanced diet, index of nutritional quality, energy requirements and balance, weight management and obesity, nutritional quackery, sports nutrition, nutrition for children and elderly, and eating disorders.

**HSES 331. Sport and Exercise Nutrition.** 3 Credits.
Provides a basic understanding of the influence of nutrition on sport and exercise performance. Nutrition for sport performance, including hydration, nutrient timing strategies for various athletes, and use and regulation of ergogenic aids and nutritional supplements will be covered to apply this knowledge to develop a critical understanding of the nutritional and practical dietary needs of individuals participating in sport and exercise. Prerequisite: Accepted to School of Education or instructor permission.

**HSES 335. Clinical Field Experience.** 1-3 Credits.
Clinical Field Experience is designed to allow students who plan to pursue clinical careers the opportunity to observe and assist (as appropriate) in the evaluation and/or treatment of patients by licensed clinicians in fields such as medicine, physical therapy, and cardiac rehabilitation. Only one enrollment permitted each semester. A maximum of six hours will apply towards the bachelor’s degree, or a maximum of three credit hours will apply towards the bachelor’s degree if the student subsequently enrolls in HSES 580 (Internship). Prerequisite: Admittance to the Community Health or Exercise Science undergraduate degree program in HSES.

**HSES 340. Instructional Strategies in Motor Development.** 2 Credits.
This course is designed to provide students with an examination of current theories of motor development throughout the life cycle. Emphasis is placed on content regarding the development of fundamental motor skills, physical growth and development, and assessment. Prerequisite: PE Plus advisor approval required.

**HSES 341. Instructional Strategies in Physical Education for Elementary Classroom Teachers.** 1 Credits.
The application of child growth and development principles to physical education. The use of materials as related to a sequential physical education curriculum in the elementary school will also be included. Prerequisite: Prior or concurrent enrollment in C&T 322 or equivalent.

**HSES 350. Care and Prevention of Athletic Injuries. 3 Credits.**
The introductory study of the prevention, immediate care, and treatment of athletic related injuries and illnesses. This course is designed to cover the basic fundamentals of injury/illness recognition as well as discuss the various strategies for the prevention and care of injuries to the physically active. Prerequisite: Successful completion of Human Anatomy (Biol 240) or equivalent course and proof of current first aid certification (i.e. American Red Cross) or successful completion of First Aid course (HSES 248).

**HSES 351. Foundations of Athletic Training. 1 Credits.**
This course is designed to introduce the practical skills and psychomotor clinical competencies of the beginning student-athletic trainer. Emphasis will be placed on basic athletic training procedures including but not limited to preventative taping, bracing, and padding techniques as well as various other procedures and techniques related to the prevention, care, and management of athletic related injuries/illnesses. Open to Athletic Training majors only. Prerequisite: Human Anatomy, First Aid, concurrent enrollment in HSES 350.

**HSES 352. Therapeutic Modalities. 3 Credits.**
This course is the study of therapeutic modalities utilized in treatment and rehabilitation of athletic injuries. Prerequisite: HSES 250 or the transfer equivalent, Admission to the Athletic Training Program.

**HSES 353. Athletic Training Practicum I. 2 Credits.**
The first in a sequence of six practical/clinical experiences for the Athletic Training Student, under the direct supervision of a Preceptor. Prerequisite: Admission to Athletic Training program, HSES 250 and HSES 251.

**HSES 354. Lower Extremity Evaluation. 3 Credits.**
This course teaches a systematic approach to athletic injury evaluation of the lower extremity, thorax, and abdomen. Prerequisite: Admission to the Athletic Training Program, HSES 353, concurrent enrollment HSES 355.

**HSES 355. Athletic Training Practicum II. 2 Credits.**
This course is the second in a sequence of six practicum/clinical experience courses for the athletic training student. Prerequisite: Admission to Athletic Training program and concurrent enrollment in HSES 354.

**HSES 358. Creative Movement and Dance Appreciation. 3 Credits.**
Students will experience the following types of dance: creative movement, ballroom dance, folk, square, and line dance. An appreciation for dance will be developed through the study of the pioneers of dance and the various dance forms. Prerequisite: PE Plus advisor approval required.

**HSES 365. Peer Health Education. 3 Credits.**
The course is designed to train students in peer health education, as peer health educators in college settings, and as trainers, training adolescents in community health settings for grades 6-12 peer health education. Subject content and teaching methodologies will be emphasized in the ten content areas of health with special emphasis on alcohol, drugs, tobacco, stress reduction, mental health and human sexuality. Prerequisite: HSES 260 or instructor consent.

**HSES 369. Kinesiology. 3 Credits.**
This course is designed primarily for students in the field of exercise science who already have taken an introductory course in human anatomy and who need a more detailed exposure to concepts of functional movement anatomy. This course will provide a detailed study of the skeletal and muscular systems to include identification of the origin, insertion, and action of the major muscles of the human body. Students will become proficient in the use of directional and movement terminology used to describe movement and be able to identify the plane/axis as well as the agonist and antagonist muscles involved in a movement. Prerequisite: A course in human anatomy, admission to School of Education.

**HSES 370. Health and Pathophysiology. 3 Credits.**
The course is designed to assist students in the development of a basic understanding of the anatomical structures and physiological processes that are central to the development of various diseases/disorders. Students will apply this knowledge to an evidence-based model for choosing and developing appropriate lifestyle and health-related interventions (e.g. exercise, nutrition, stress management), both for health enhancement and disease prevention. Prerequisite: BIOL 240 and BIOL 246; or admittance to HSES exercise science, community health, or athletic training programs.

**HSES 371. Medical Terminology for Health Professionals. 3 Credits.**
A study of medical terminology. This course will include: analysis of root words, prefixes and suffixes for understanding medical language; origin, modern usage and abbreviations.

**HSES 372. Exercise Physiology. 3 Credits.**
A fundamental study of the physiological adjustments that occur within the body during exercise. The presentation of this material is particularly oriented toward a basic understanding of the physiological systems as they are affected by the activity of a normal coaching or teaching situation. The physiological values of exercise are also stressed. Prerequisite: Three hours of physiology.

**HSES 375. Neuromuscular Exercise Physiology and Motor Control. 3 Credits.**
This course explores the control of human movement from an exercise neurophysiology perspective. Emphasis will be placed on the understanding the interactions between the nervous system and muscular systems in the control of muscle force/power production and the control of movement under a variety of contexts. These contexts include responses and adaptations to exercise training, the aging process, and in a variety of neuromuscular disorders. Prerequisite: BIOL 240 and BIOL 246.

**HSES 378. The Coaching of Volleyball. 2 Credits.**
Theory of volleyball, including methods of teaching fundamentals, individual and team offense and defense. Various styles of play and methods of coaching. Efficient performance of the skills during game conditions will be emphasized.

**HSES 379. The Coaching of Softball. 2 Credits.**
Theory and fundamentals of coaching softball. Methods of coaching, as well as team offense, defense, and strategies will be stressed. Efficient performance of the skills during game conditions will be emphasized. Prerequisite: Consent of instructor.

**HSES 380. Sociology of Sport. 3 Credits.**
A survey of the current literature concerning the scope of sociology in sport, the interaction of people in sport, the social systems controlling sport, and the small group dynamics in sport. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

**HSES 381. Sport Ethics. 3 Credits.**
This course will help students develop their abilities to reason morally through an examination within competitive sports of ethical theories, moral values, intimidation, gamesmanship, and violence, eligibility, elimination,
winning, commercialization, racial equity, performance-enhancing drugs, and technology. Students will develop a personal philosophy of sport and learn how to apply a principled decision-making process to issues in sport. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 382. Sport Facilities and Event Management. 3 Credits.
This course will provide students with a solid grasp of the fundamental skills in sport facility and event management and the knowledge base to apply those skills in a real world environment. Students will learn about planning, designing and financing the construction of new sport facilities, sport facility management of regular and special events, sporting event planning and game day operations. Prerequisite: Admission in the Sport Management major or minor and completion of HSES 289.

HSES 384. Sport Law. 3 Credits.
This course is intended to introduce undergraduate students to the major legal issues in amateur and professional sports including dispute resolution, tort law, contract law, constitutional law, statutory law, labor and antitrust law and intellectual law. Students will also learn about risk management, gender equity, the Americans with Disabilities Act and agency law and sports agents. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 385. Psychological Aspects of Exercise. 3 Credits.
This course is designed for students interested in optimizing motivation and adherence to exercise among individuals in a wide range of physical activity settings (e.g., health clubs, corporate fitness, and physical therapy/rehab). The course content will include a review of the literature highlighting the psychological benefits of exercise, the theoretical advances in understanding the psychological aspects influencing individuals' participation in physical activity, and an introduction to strategies and techniques for professionals attempting to foster motivation and adherence to exercise among their clients. Prerequisite: Admission to the Community Health program or instructor consent.

HSES 390. The Coaching of Track and Field. 2 Credits.
Designed to acquaint the student with the fundamentals of track and field athletics.

HSES 395. Concepts in Health and Wellness. 3 Credits.
This is designed as an introductory course into the profession of School and Community Health Education. Regardless of a person's areas of specialization in Health Education, there are commonalities shared by all of us who are charged with the responsibility of providing education about health. Course emphasis will focus on: defining health education; history of health education; roles and competencies of health educators; theoretical bases for the profession; planning, implementing, administering, and evaluating health programs; settings for health education; future issues. Prerequisite: HSES 260.

HSES 403. Health Behavior Theory. 3 Credits.
This class will be an introduction to the primary models and theories used in health behavior research and health promotion practice. These models and theories undergird the development of successful health-related programs and interventions, and will help guide educators in the development of innovative and effective programming. The course will cover individual, interpersonal, community-level, and ecological theories, and students will have the opportunity to apply these theories to health behaviors of interest.

HSES 410. Program Design in Physical Education. 3 Credits.
The study of physical education curriculum models and extraclass programs appropriate for students in grades PK-12. Students will receive practical and field experiences related to program design and implementation. They will learn techniques appropriate for program evaluation as well as the assessment of student sport skills and fitness. Prerequisite: PE Plus advisor approval required.

HSES 418. Health Aspects of Aging. 3 Credits.
This course will consist of a Holistic Health approach to the various components of the aging process. Special emphasis will be placed on the demographic aspects of aging; normal aging changes and deviations in the aging process (pathophysiology); the relationship between mental and physical health, and the implications for the promotion of risk reduction and prevention principles that can effectively improve the quality of life for older individuals. Prerequisite: A course in personal and community health.

HSES 434. Consumer Health. 3 Credits.
This course will be a comprehensive examination of the factors involved in the selection of health products and services. Topics of discussion will be: protection laws and services, fraudulent practices and products, consumerism, and traditional and alternative health care. There will also be an in-depth examination of how to assess and evaluate health based products that are available to consumers. Prerequisite: Admission to the Community Health Program or consent of instructor.

HSES 440. Applied Sport and Performance Psychology. 3 Credits.
This course will examine the psychological principles and techniques that are applied to improve sport performance and other fields of achievement (e.g., exercise and wellness, music, and academics). Special attention will be given to psychological aspects of injury and rehabilitation, psychological conditioning, psychological training methods, coaching philosophy, the social psychology of team members, and components of peak performances.

HSES 453. Communicable and Degenerative Diseases. 3 Credits.
This course is designed to introduce the student to the study of the basic concepts/principles of disease process. Special emphasis will be placed on the etiology, origin, symptoms, treatment, body defenses, primary prevention, host, agent, (microbes) and environmental factors affecting disease occurrence, prevention and control measures. Topical application of the fundamental concepts of microbiology in school/community health practice will be critically discussed. The natural history of disease and disease classification will be highlighted. Many disease topics (both communicable and chronic, degenerative diseases) will be discussed. Prerequisite: A course in personal and community health.

HSES 455. Manual Therapy Techniques and Emergency Care Instructor Training. 3 Credits.
The purpose of the course is to train students in a Manual Therapy Technique for use in the clinical setting. The course is also designed to certify students as instructors in American Red Cross First Aid, CPR and AED courses as well as instructors for the CPR/AED for the Healthcare Provider. Prerequisite: Completion of HSES 352, HSES 354, HSES 456 and HSES 459 or equivalency from an accredited Athletic Training Education Program or have current First Aid and CPR/AED for the Healthcare Provider certification.

HSES 456. Upper Extremity Evaluation. 3 Credits.
This course teaches a systematic approach to athletic injury evaluation of the upper extremity, head and spine. Prerequisite: Admission into the Athletic Training program, HSES 354, and HSES 355. Corequisite: HSES 457.

HSES 457. Athletic Training Practicum III. 2 Credits.
This course is third in a sequence of six practicum/clinical experience courses for the athletic training student. Prerequisite: Admission into the Athletic Training program and concurrent enrollment in HSES 456.

HSES 458. General Medical/Pharmacology. 3 Credits.
This course will cover general medical conditions/illnesses and over
the counter, prescription, and illegal pharmacologic agents commonly
encountered in physically active populations. The course will cover
recognition of illnesses and diseases, immediate care and medical
referral, basic principles of pharmacology, pharmacological agents used
in the treatment of various pathologies, and other general medical and
pharmacological topics encountered by athletic trainers. Prerequisite:
Admission into the Athletic Training Program, HSES 459 and HSES 460.

HSES 459. Rehabilitation. 3 Credits.
This course is the study of rehabilitation principles and techniques used to
safely return a physically active individual to their sport/activity following
injury. Prerequisite: Admission into the Athletic Training program,
HSES 456, and HSES 457.

HSES 460. Athletic Training Practicum IV. 2 Credits.
This course is the fourth in a sequence of six practicum clinical experience
courses for the athletic training student. Prerequisite: Admission into
the Athletic Training program, HSES 459, and concurrent enrollment in
HSES 459.

HSES 461. Organization and Administration of Athletic Training. 3
Credits.
This course examines the organizational and administrative aspects
of the Athletic Training profession. Course content includes; program
management, employment, budget, facility design, risk management,
documentation and medical records, insurance, legal and practice
regulations, prevention and health promotion, history, and organization
of the profession. Prerequisite: HSES 459, HSES 460, and concurrent
enrollment in HSES 462.

HSES 462. Athletic Training Practicum V. 2 Credits.
This course is the fifth in a sequence of six practicum clinical experience
courses for the athletic training student. Prerequisite: Admission into
the Athletic Training Program and concurrent enrollment in HSES 461.

HSES 463. Senior Capstone in Athletic Training. 2 Credits.
This course is designed to allow senior Athletic Training Students to
review previous content and prepare for the BOC certification exam
as well as explore areas of professional development. Prerequisite:
Admission into the Athletic Training program, HSES 561, and HSES 562.

HSES 464. Athletic Training Practicum VI. 2 Credits.
This course is the final practicum clinical experience course for the
athletic training student. Prerequisite: Admission into the Athletic Training
program and concurrent enrollment in HSES 463.

HSES 465. Program Assessment and Evaluation. 3 Credits.
This course will offer an introduction and hands-on application of program
assessment and evaluation techniques in health education. As health
educators and program planners, we are required not only to develop
innovative programs and interventions to address community- and
school-based health concerns, but also to give evidence that our efforts
are both adequate and effective. Successful program assessment and
evaluation incorporate knowledge of basic research methods as well as
the theoretical understanding of health behaviors.

HSES 466. Program Planning in Health Education. 3 Credits.
This course is designed to provide the students with an in-depth
knowledge of proven health planning models that can be used for
program development and intervention. Students will learn how to develop
attainable program goals and objectives which will allow programs and
interventions to evolve into useful forms of community based health
education. Prerequisite: Students must be admitted to the School of
Education and the Community Health Program.

HSES 467. Introduction to Health Education. 3 Credits.
This course will provide an overview the various health education
professions. Topics emphasized in the course are: the nature of health
education, an in-depth description of community health, the school
health program, and identifying program and services of voluntary and
services of voluntary and official health and welfare organizations.
Prerequisite: Admission to the School of Education and the Community
Health Program.

HSES 468. Methods and Materials in Health Education. 3 Credits.
Emphasis is placed on the presentation and preparation of health topics
along with the recommended resources and materials available. The
teaching method is emphasized and student participation is stressed.
Students will observe health teachers in the public schools and identify
and discuss these methods as they relate to the methods present in the
class. Prerequisite: Admission to HPE teacher certification program or
consent of instructor.

HSES 470. Biomechanics. 3 Credits.
The course is designed to cover a basic understanding of the anatomical
and mechanical principles of human movement. Areas covered will be
joint and segmental movement, muscle actions, time-displacement motion
description, forces causing or inhibiting motion, and stability. Special
attention will be given to the application of the theoretical concepts in
movement activities. Prerequisite: Anatomy, admission to the Exercise
Science program, or permission of instructor.

HSES 473. Clinical Fitness Evaluation Techniques. 3 Credits.
This course will provide the student with the knowledge and
skills to assess components of physical fitness in adults including
cardiorespiratory fitness, body composition, strength, and flexibility. In
addition, specific emphasis will be placed on the development of exercise
and weight management prescriptions. Students completing the course
will have the skills to take the Health Fitness Instructor Certification exam
given by the American College of Sports Medicine. Prerequisite: Exercise
physiology and research and data analysis in HSES or equivalents.

HSES 474. Exercise Biochemistry. 3 Credits.
This course will examine the processes that underlies the use and
production of energy for exercise. Topics that will be explored include
glycogenolysis and glycolysis in muscle, cellular oxidation of pyruvate,
lipid metabolism, metabolism of proteins and amino acids, molecular
biology, neural and endocrine control of metabolism, and local fatigue
during exercise. Emphasis will be placed on carbohydrates, protein, and
lipid metabolism and the acute and chronic effects that exercise has on
these processes. Prerequisite: HSES 472.

HSES 475. Undergraduate Research in Health, Sport, and Exercise
Sciences. 1-3 Credits.
The course is designed to allow students to collaborate on an active
research project under the supervision of a faculty member in HSES.
Only one enrollment permitted each semester. A maximum of six hours
will apply towards the bachelor’s degree. Prerequisite: Enrollment by
Instructor permission only. Successful completion of IRB training via the
CITI training program in the KU eCompliance system.

HSES 480. Physical Activity and Exercise Management Individuals
with Disabilities. 3 Credits.
An in-depth study of how physical activity and exercise can be a part of
the treatment plan for people who have chronic disease or a disability.
A variety of physical activity and exercise intervention programs and
models will be presented and discussed, as well as protocols for baseline
testing and post-treatment testing. A portion of this course will focus
on how physical activity and exercise can prevent motor functioning
deterioration in people who have a disability or limited functional
movement. Prerequisite: Admission to the School of Education Exercise
HSES 481. Sport Fundraising and Sponsorship. 3 Credits.
In this course, students will take an in-depth look at the sport fundraising and sponsorship realms. Specifically, students will focus on revenue-generating operations within sport organizations. Example topics include major gift fundraising, naming rights and other major sponsorships, annual funds, premium inventory, and trends in these evolving fields. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 482. Drugs in Society. 3 Credits.
This course is designed to provide an in-depth exposure to basic drug classification, pharmacological effects, causes of drug abuse to society, common treatment modalities, and effective prevention/intervention strategies. In addition, consumer issues related to drug use, drug legislation, and drug education programs for school and community implementation will be discussed. Prerequisite: A course in personal and community health or consent of instructor.

HSES 483. Sport Finance and Economics. 3 Credits.
This course will help students gain an understanding of the critical importance of budgeting and financing sports-related industries based on sound financial principles and methods of financial control. Students will learn how economic principles shape the major national industry of sport. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 484. Sport in Film. 3 Credits.
In the course, students will critically engage and interpret a series of popular sport-related films. By the end of the course, students will be able to write and think critically about the role that film in general, and sport-based films in particular, play in promoting and challenging dominant perceptions of gender, sexuality, nationalism, race, social class, and ability.

HSES 485. Sport Communication. 3 Credits.
This course examines the complex and evolving field of sport communication including personal, organizational, and external perspectives of sport communication. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 486. Sport Marketing. 3 Credits.
This course is intended to provide undergraduate students with basic knowledge and competencies in definitions of marketing and sport marketing, understanding the unique aspects of sport marketing, marketing planning process, consumer demographics and psychographics, the marketing mix, segmentation and target marketing, marketing proposal preparation, sponsorship, endorsement, merchandising, fundraising, marketing goals and objectives, sport consumer and consumer behavior, industry segmentation, special events, ticket sales and their use in promotion, the role of the media, television marketing ratings and shares and venue and event marketing. The proposed content of this course will address each of these expectations. Prerequisite: Admission to the Sport Management major or minor and completion of HSES 289.

HSES 487. Personnel Management in Sport. 3 Credits.
This course provides students with an overview of the requisite communication skills and concepts of leadership and management as they relate to sport managers. Students will learn how leadership and management practitioners, utilizing effective communication techniques, shape successful sport organizations. Additional emphasis will be placed on building and nurturing relationships with people as a key to effective management. Prerequisite: Admission to Sport Management major or minor and completion of HSES 289.

HSES 488. Pre-Internship Seminar. 1 Credits.
This course will prepare students for their actual semester-long Internship experience. Students will be provided with background information on available internship sites to assist in their site-selection decision. Students will learn about different management styles they may encounter, the traits and characteristics of effective and productive employees, common rules of the workplace and internship experiences of previous HSES Interns. Prerequisite: All HSES students must be in final semester prior to Internship.

HSES 489. Health and Human Sexuality. 3 Credits.
The course is designed to encompass the various components of human sexuality as well as to demonstrate applicable teaching techniques for sex education. Included in the content of the course are: human sexual response, sexually transmitted diseases, family planning, sex roles, rape, sexual preferences, and topics such as sexuality and the handicapped, sexuality and the mass media, and sexuality and the church. Teaching techniques such as values clarification, non-verbal communications, role playing, tape recordings, and problem solving are demonstrated with appropriate topics.

HSES 490. Issues in Intercollegiate Athletics. 3 Credits.
Intercollegiate athletics is a multi-billion-dollar industry. Because of the high stakes now associated with intercollegiate college athletics, the complexity of issues within athletics have grown as well. This course provides students with an understanding of the operation and decision-making process in intercollegiate athletics. Students will explore subjects such as NCAA compliance, legal aspects of college sport, and financial implications of decisions made within athletics. Prerequisite: Admission to the major or minor in sport management.

HSES 497. Independent Study. 1-3 Credits.
Only one enrollment permitted each semester; a maximum of six hours will apply toward the bachelor's degree. This course cannot be taken as a substitute for a required course. Prerequisite: Recommendation of advisor and consent of instructor and department chairperson.

HSES 499. Internship in Sport Management. 2-16 Credits.
A full-time work experience in the sport industry (40 hours per week). This experience is actual work in a sport management setting in which management practices are applied. Student interns are directed and evaluated by a faculty member with appropriate supervision by an on-site professional. Student interns must keep an accurate accounting of hours with a performance work diary. Grades/credit for the internship are site professional. Student interns must keep an accurate accounting of hours. Prerequisite: Completion of all Sport Management coursework. Admission to the Sport Management Internship program.

HSES 500. Student Teaching in Physical Education. 14 Credits.
A supervised teaching experience in an approved school settings, teaching physical education for a minimum of 15 weeks at the elementary (Grades PK-5) and secondary (Grades 6-12) levels. Prerequisite: PE Plus advisor approval required.

HSES 501. Seminar in Teaching Physical Education. 2 Credits.
Student teachers will receive instruction in the completion of a teacher work sample required for teacher licensure in the state of Kansas. They will also be prepared to enter the job market through advisement on resume writing, interviewing skills and online portfolio development. Prerequisite: PE Plus advisor approval required.

HSES 502. Camp Leadership and Counseling. 2 Credits.
Involves a complete study of the organization and administration of the various types of camps. It is designed to familiarize the student with camp
leadership responsibilities; the development of the camp, the program involving camp crafts, outdoor cookery, hikes and outings, singing, and simple guidance of the individual camper. Prerequisite: General psychology plus three hours in sociology.

HSES 515. Assessment of Motor Development and Motor Control of Exceptional Children. 3 Credits.
Standardized motor assessment tools appropriate for use with exceptional children with motor difficulty will be critiqued and practiced. A battery of tests to measure developmental lag or structural deviation will be selected and administered to determine the motor control of exceptional children and the results will be interpreted. Prerequisite: Six hours of physical education course work.

HSES 528. Techniques of Athletic Training - I Lower Extremity. 3 Credits.
This course provides a comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the lower extremity, abdomen, and thorax, as well as the study of common illnesses/diseases that affect the physically active. Procedures for reporting and evaluating injuries/illnesses will be discussed so that appropriate injury management and referral may take place. The etiological factors common to athletic injuries, as well as specific signs and symptoms of various athletic related pathological conditions, will be discussed. Prerequisite: Human Anatomy, Human Anatomy Lab, Care and Prevention of Athletic Injuries, and admission to the Athletic Training Program.

HSES 529. Techniques of Athletic Training - II Upper Extremity. 3 Credits.
The comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the upper extremity, head, and spine. Procedures for evaluating and reporting injuries/illnesses will be discussed as well as etiological factors and common signs/symptoms of various related pathological conditions. The purpose of this course is to prepare students with the skills necessary to accurately recognize the signs/symptoms of injuries and conditions in order to determine the nature and severity of the problem as well as establishing a proper care plan and medical referral when appropriate. Prerequisite: HSES 528 Techniques of Athletic Training - I Lower Extremity.

HSES 578. Health Internship Seminar. 2 Credits.
Students enrolled in the internship will learn how to analyze professional health environments, examine intervention programs, and understand models used to develop health based programs. Discussions surrounding the internship experience will be facilitated by the health education faculty. Topics will relate to all phases of the internship experience. The intent of this course is to better prepare the student for entering the health profession. Discussions will be held on conflict resolution in the work place, professional development, professional behavior and etiquette. Prerequisite: Concurrent enrollment in HSES 580 Internship in Health.

HSES 580. Internship in: _____ 2-16 Credits.
A supervised internship experience in an approved setting. The specific type of internship experience and the credits for that particular experience will be outlined in the appropriate program of the student. Prerequisite: Admission to a HSES Internship Program.

HSES 581. Athletic Training Practicum I: Recognition and Evaluation. 4 Credits.
This course provides a practical experience for the student-athlete. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury/illness recognition and evaluation during their clinical and field experience. Specific skills addressed in HSES 582 will be practiced, applied, and mastered during this experience. Prerequisite: Admission to the Athletic Training program. Concurrent enrollment in HSES 528.

HSES 582. Athletic Training Practicum II: Management and Treatment. 4 Credits.
This course provides a practical experience for the student-athlete. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury/illness evaluation, and the management and treatment of athletic injuries through a variety of therapeutic modalities during their clinical and field experience. Specific skills addressed in HSES 529 and HSES 654 will be practiced, applied, and mastered during this experience. Prerequisite: HSES 581 and concurrent enrollment in HSES 529 and HSES 654.

HSES 583. Athletic Training Practicum III: Rehabilitation. 4 Credits.
This course provides a practical experience for the student-athlete. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury rehabilitation/reconditioning through a variety of therapeutic exercise techniques during their clinical and field experience. Specific skills addressed in HSES 656 will be practiced, applied, and mastered during this experience. Prerequisite: HSES 582, concurrent enrollment in HSES 656.

HSES 584. Athletic Training Practicum IV: Senior Sport Experience. 4 Credits.
This course provides a culminating practical experience for the student-athlete. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills obtained during previous coursework as well as apply administrative and management skills obtained in HSES 658. This course is intended to allow the Senior student more freedom and responsibility in decision making regarding the health care of an athletic team. Prerequisite: HSES 583, concurrent enrollment in HSES 658.

HSES 598. Special Course: ____. 1-5 Credits.
A special course of study to explore current trends and issues in health and physical education - primarily for undergraduates.

HSES 605. Administering Health Related Programs. 3 Credits.
This course will consist of an analysis of administration as it relates to both school and community health programs. The focus will be on administrative models and techniques used to establish and maintain sound health programs in school and community settings. Prerequisite: Six hours of health education or consent of instructor.

HSES 671. Applied Biomechanics. 3 Credits.
This course will examine the qualitative biomechanical analysis of human movement directed towards the goals of performance improvement and injury prevention and rehabilitation. Specifically, this course will provide students with a basis knowledge of the biomechanical foundations of human movement, the knowledge and skills necessary to complete a systematic analysis and evaluation of human motor performance, and the ability to determine and provide interventions that are likely to improve movement in athletic, clinical, educational, and work environments. Prerequisite: A course in human anatomy, admission to the HSES Teacher Certification Program or consent of instructor.
HSES 714. Motor Development During Growth. 3 Credits.
Motor development in childhood and adolescence and its relationship
to physical growth. Factors influencing motor learning and development
will be explored. This course provides basic understanding of the
neuromuscular changes and abilities of children and adolescents.
Prerequisite: A course in kinesiology and anatomy.

HSES 715. Understanding Research in HSES. 3 Credits.
This course introduces the concepts and skills involved in understanding
and analyzing research in education and related areas. The course
provides an overview of basic, general knowledge of various research
methodologies. Students should expect to study much of this material
in greater depth through additional work before being fully prepared to
conduct independent research. However, this course should enhance
their ability to locate, read, comprehend, and critically analyze research
articles and reports. Topics in the course include quantitative and
qualitative methods and designs, historical and descriptive research, and
program evaluation. (This course fulfills the requirement of a research
methods course in the first 12 hours of graduate study.) Prerequisite: Must
be an admitted HSES graduate student.

HSES 730. Advanced Concepts in Nutrition. 3 Credits.
A study of the nutritional factors that affect health at all ages. Specific
nutritional needs and effects of deficiency states on health will also be
addressed. The course will also include the physiological and biochemical
mechanisms involved in the use of nutrients for human growth and
development as well as the production of energy through the metabolic
process. Prerequisite: HSES 330 or equivalent experience and permission
of instructor.

HSES 771. Internship in Exercise Science. 6 Credits.
A supervised internship experience in an approved exercise science
setting. Students will gain experience through a hands-on approach
via clinical and/or research settings. The specific type of internship
experience will be agreed upon by the student and their academic
advisor. Prerequisite: Successful completion of at least 24 graduate credit
hours.

HSES 777. Practicum in Health Education and Wellness
Promotion. 1-3 Credits.
This course is designed to provide practical community health
experiences in health education and wellness promotion, including:
assessment, planning, implementation and program evaluation. With
approval of the instructor, students may choose their practicum focus in
any of the ten content areas of health: mental and emotional, family living,
growth and development, nutrition, personal health, alcohol tobacco and
other drugs, communicable and chronic diseases, injury prevention and
safety, consumer health and environmental health. Prerequisite: Enrolled
in graduate school and consent of the instructor.

HSES 779. Physiology of Functional Aging. 3 Credits.
The course has been designed to address issues and concepts relating
to the biological aging process as a foundation for physical performance,
general fitness, and health status. The biological concepts are applied to
the human physiological aging process and the systems involved as well
as the possible interventions that may effect that process. The several
theories associated with physiological aging are also addressed as related
to the physiological systems and current research that may impact
the understanding of these theories. Prerequisite: A course in basic biology.

HSES 780. Internship in Teaching Physical Education: _____. 1-16
Credits.
A supervised internship experience leading to initial physical education
teacher certification. The student assumes the total professional role as a
teacher of physical education in an approved school setting.

HSES 795. Traditions and Principles in Health Education. 3 Credits.
This course is designed to explore the philosophy and principles which
provide the foundation of health education as an academic discipline.
Specific topics include: history of the profession, theories of health
behavior and behavior change, principles of learning applied to health
communications, health promotion practices, professional preparation,
and the integration of philosophical and ethical ideals into program
planning and implementation.

HSES 798. Special Course: _____. 1-5 Credits.
A special course of in-depth study exploring current trends and issues in
health and physical education - primarily for undergraduates.

HSES 801. Sport Facilities. 3 Credits.
The purpose of this course is to study current developments and trends
in the financing, programming, design, and construction of facilities for
intercollegiate athletics and professional sports. Prerequisite: Admitted to
graduate school. A course in the administration/management of sport or
consent of the instructor.

HSES 803. Health Behavior Theory. 3 Credits.
Given that theories of health behavior drive research and practice in
health education, the purpose of this course is to familiarize students
with the major theories and planning models related to health behavior
change. Particular focus will be applied to the role of theory in health
promotion and critical analysis of the application of theory to guide
research practices. Prerequisite: Health major or consent of the instructor.

HSES 804. Sport Psychology. 3 Credits.
This course is designed to introduce students to the current research and
theoretical perspectives in the sport psychology literature. Specifically,
students will gain a broad understanding of the three major areas of
sport psychology: social psychology (e.g., motivation), performance
enhancement (e.g., mental skills training), and psycho-physiology (e.g.,
impact of anxiety on performance). Prerequisite: Admission in the health
program or consent of the instructor.

HSES 805. Laboratory Experiments and Analysis--Exercise
Physiology. 3 Credits.
Students will learn the techniques of operating various types of laboratory
equipment and will conduct small-scale lab experiments in areas such
as respiration, circulation, metabolism, strength, neuromuscular function,
cardiac function, and body composition. Special emphasis will be placed
on laboratory techniques of assessing physical fitness. Prerequisite: A
course in exercise physiology.

HSES 806. Stress Management. 3 Credits.
The long range objectives of this course are to assist students in
gaining stress management knowledge; to help them to formulate
improved perspectives on various stress management techniques; and
consequently apply the developing constructs in their lives with a sense
of purpose and self-responsibility. Prerequisite: Two courses in health
education or consent of instructor.

HSES 807. Current Literature in Exercise Physiology. 2 Credits.
A wide range of topics from the exercise physiology literature will be
discussed. Instructor and students will present reports to the group
centered on current research findings with discussion aimed at application
of these results to physical exercise and training. Prerequisite: A basic
course in exercise physiology or consent of instructor.

HSES 808. Biomechanics of Human Movement. 3 Credits.
This course will examine the movements and the structure and function
of human bodies by means of the methods of mechanics. An emphasis
will be placed on the two primary goals of biomechanics: performance
improvement and injury prevention and rehabilitation. Topics to be
covered include the kinematics and kinetics of human movement, muscle mechanics, bone and joint mechanics, and the biomechanics of musculoskeletal injury. Prerequisite: Courses in calculus, physics, anatomy, and biomechanics, or consent of instructor.

HSES 810. Advanced Exercise Physiology. 3 Credits.
An advanced study of the physiological and biomechanical aspects of muscular, cardiovascular, and respiratory function as the human is engaging in exercise. The topics of energy metabolism, hormones, and nutrition as related to exercise are also presented. Prerequisite: A basic course in exercise physiology.

HSES 812. Current Issues in Health. 3 Credits.
This course is designed to review and discuss current issues in various health related areas. The focus will be on relevant issues and topics that are guiding and directing the health profession. The range of topics discussed will vary from popular literature to scientific research and cover such areas as health education, community health, and health over the lifespan. Students in the course will be expected to report, discuss, and interact with each other concerning the issues as they are reported. Prerequisite: A graduate course in health or consent of the instructor.

HSES 814. Implementing Health Programs. 3 Credits.
The purpose of this course is to explore planning models used for designing, implementing and managing health promotion programs. Students will be trained to develop objectives, assess determinants, select methods and strategies, pre-test program materials, and adopt and implement promotional plans. Problem based and community based learning experiences will be provided. Prerequisite: A health major or permission from the instructor.

HSES 817. Practical Aspects of Aerobic and Resistance Training. 3 Credits.
This course will be a discussion of various concepts related to aerobic and resistance training. By the end of the semester, the student should be able to demonstrate an understanding of information presented in this course by achieving satisfactory evaluations of presentations, papers, and an examination of the following topics: energy metabolism, general adaptations of aerobic and resistance training, exercise techniques for aerobic and resistance training, periodization of training, testing and evaluation of aerobic and resistance training performance, and exercise prescription for aerobic and resistance training. Prerequisite: Undergraduate course in exercise physiology or consent of instructor.

HSES 818. Legal Aspects of Public Health Education. 3 Credits.
This course is designed to enhance understanding of the variety of legal issues which affect health educators and their audiences. Specifically, this course will survey federal, state, and local public health laws and regulations which may prescribe health education content and the health educator's actions. Legislation will be analyzed and the practical impact of the health educator upon the legislative process will be emphasized. Prerequisite: A course in community health or consent of instructor.

HSES 823. Behavior Modification in Health and Exercise. 3 Credits.
This course will examine the behavioral principles that influence health and exercise practices. Theories of human behavior, reinforcement theory, and models of self-esteem will serve as the foundation for studying behavior change. Society influences will be strongly emphasized. Course topics will include exercise determinants, motivation, media representation, negative behaviors, self-efficacy, social support, and effective promotion strategies. Prerequisite: Admitted to Graduate School or consent of instructor.

HSES 824. Epidemiology and Concepts of Disease Causation. 3 Credits.
This course involves the study of the etiology and natural history of infectious and non-infectious diseases including vector control, host defenses and resistance, investigation of disease outbreaks, mental health and public health. The course deals with detailed analytic and descriptive epidemiology and their implications for improving our understanding of health and diseases; epidemiologic consequences of nuclear war and retrospective and prospective approaches in epidemiological research. Contemporary developmental methods for disease prevention will be critically reviewed. Prerequisite: HSES 573, or equivalent, or consent of instructor.

HSES 825. Skeletal Muscle Physiology. 3 Credits.
This course will provide the student with an in-depth study of the structure and development, contractile mechanics, and neuromuscular system as it relates to the skeletal musculature. Structure and Development - muscle fiber, motor neuron, neuromuscular junction, muscle receptors, muscle formation, development of muscle innervation. Putting Muscles to Work - ion channels, pumps, and binding proteins, axoplasmic transport, resting and action potentials, neuromuscular transmission, muscle contraction, motor units, exercise, muscle metabolism. The Adaptable Neuromuscular System - fatigue, loss of muscle innervation, recovery of muscle innervation, neurotrophism, disuse, muscle training, injury and repair, aging. Prerequisite: HSES 810 or equivalent.

HSES 828. Sport Finance. 3 Credits.
A study of the principles and applications of finance and economics in the sport industry. Strategic financial planning as a part of management responsibilities is highlighted. Prerequisite: Admitted to Graduate School.

HSES 830. Socio-Cultural Dimensions of Sport. 3 Credits.
Current literature concerning the impact of American social values and cultural patterns of sport and physical activity will be studied. Critiques of related research involving sport and social institutions, and socio-cultural groups in sport will be emphasized. Prerequisite: A course in Sociology of Sport or consent of instructor.

HSES 831. Ethics in the Sport Industry. 3 Credits.
This course is designed to help students learn to make morally reasoned decisions in various sport settings. This course will help prepare students to respond more responsibly when faced with challenging ethical dilemmas and guide them in learning to serve as role models for ethical conduct.

HSES 832. Physical Education Instructional and Assessment Methods. 3 Credits.
The study of research-based instructional and assessment methods appropriate for PK-12 physical education. Managerial, instructional, and supervisory skills will be developed. Traditional and alternative assessment tools will be discussed. Readings, observations (live and video), and practice teaching will prepare students to complete a practical experience and an action research project in a PK-12 school. Prerequisite: Admission to Graduate School.

HSES 833. Public Health Aspects of Exercise. 3 Credits.
This course describes the timeline for physiologic adaptations to long-term physical activity. It describes the effects of physical activity on chronic disease. It describes, from a population perspective, the effects of physical activity on the health of the nation. Prerequisite: 12 hours of HSES courses, or equivalent, or consent of instructor.

HSES 836. Physical Education Curriculum Models. 3 Credits.
An examination of the elements and processes of curriculum construction in physical education for elementary, secondary, and post-secondary institution, and the institutional and professional issues that affect these processes. A study of contemporary curricula structures in regard to planning, implementation, and evaluation of K-12 curricula and
professional preparation curricula in physical education programs. Prerequisite: A course in physical education curriculum, or equivalent.

HSES 840. Organizational Behavior in Sport. 3 Credits.
This course utilizes a micro perspective to analyze the behavior and culture within sport organizations. Specifically, the student will study and learn how to apply management and leadership theories that have the potential to shape the work environment and will discuss how current topics in organizational behavior are particularly relevant to the sport industry. Prerequisite: Admitted to Graduate School. Consent of the instructor.

HSES 842. Sports Marketing. 3 Credits.
This course helps students gain a deeper understanding of sport marketing by examining in-depth the sport marketing mix of product, price, place, and promotion as well as marketing research, marketing strategy, market segmentation, branding, sponsorships, licensing, venue and event marketing, public relations, and global sport marketing.

HSES 850. Analysis Techniques for Health, Sport, and Exercise Sciences Laboratory and Field Data. 3 Credits.
Techniques for analyzing data gathered in Health, Sport, and Exercise Sciences laboratories and field studies will be presented in this course. Techniques for the recording of raw data, appropriate organization of raw data, selection of test for analysis of data, use of computer software, and computer programming for analysis and reporting results of the data will also be included. Prerequisite: PRE 710, PRE 720, or PRE 725.

HSES 866. Contemporary Trends in Elementary and Secondary Physical Education. 3 Credits.
An in-depth study into the research and other forms of literature will be made to study and examine the latest trends in elementary and secondary school physical education. Games, activities, dances, and rhythms will be presented and discussed relative to developmental levels of students grades K-12. Prerequisite: A methods course in teaching physical education or consent of instructor.

HSES 872. Exercise and the Cardiovascular System. 3 Credits.
This course will be a discussion of various concepts specifically related to exercise and the cardiovascular system. By the end of the semester, the student should be able to demonstrate an understanding of the interaction of exercise and cardiovascular system by achieving satisfactory evaluations on examinations, abstracts, and classroom presentations. The following topics will be discussed as they relate specifically to exercise: homeostasis and cardiovascular transport mechanisms, basic structure and function; characteristics of cardiac cells; the heart as a pump; the peripheral vascular system; vascular control; venous return and cardiac output; regulation of arterial pressure; cardiovascular responses to stress; and cardiovascular function in pathological situations. Prerequisite: Undergraduate course in exercise physiology or consent of instructor.

HSES 880. Internship in Sport Management. 1-10 Credits.
This course will provide for supervised and directed experiences in selected sport management settings. The graduate advisor will schedule observations of the internship, as well as regular conferences with the student. Written summaries and evaluations of the internship will be prepared by the student, the agency supervisor, and the university graduate faculty member. Prerequisite: Admission to the Graduate Program in Sport Management.

HSES 884. Legal Aspects of Sport. 3 Credits.
This course is intended to introduce graduate students to the basic concepts of the American legal system and the application of them to intercollegiate and professional sports. Particular emphasis will be given to risk management and preventive law. Other topics include: governance issues in intercollegiate and professional sports, contract law, employment discrimination, labor relations and collective bargaining, agency law and athlete agents, regulation of participation in intercollegiate and high school athletics, sport facility and event issues, participant liability issues, product liability issues, premises and spectator liability, participant violence in sports, and intellectual property law. Prerequisite: Admission to graduate program in School of Education

HSES 885. Sport Sponsorship. 3 Credits.
The course provides a detailed examination of the relationship between sport and corporate sponsorship and strategies for selling sponsorship packages. Topics covered will include the theoretical rationale for sponsorship, creating and executing sponsorship agreements, determining the value of a sponsorship, evaluation of sponsorship activities, and techniques used to sell sponsorship packages.

HSES 886. Sport Fundraising. 3 Credits.
This course will serve three primary purposes. First is to provide the student with the ability to identify and explain important principles, models, guidelines, and challenges that come with managing sport fundraising projects. Next, this course will develop the skills necessary to be a successful sports fundraiser through comprehending the various methods woven throughout the book. Finally, this course will develop the ability to apply practical knowledge in an ethical and professional manner.

HSES 890. Seminar in HSES. 3 Credits.
This course is designed to provide a general research seminar learning experience for graduate students in HSES. In particular, students will learn about faculty research activities and interests from a variety of specialty areas both within KU and outside of KU. Through faculty and guest presentations, students will be exposed to a variety of design and methodologies used to conduct research in the specialty areas of HSES.

HSES 892. Psychology of Physical Activity. 3 Credits.
This course is designed for students interested in optimizing motivation and adherence to exercise among individuals in a wide range of physical activity settings (e.g., health clubs, corporate fitness, physical therapy). The course content includes a review of the literature highlighting the psychological benefits of exercise, the theoretical advances in understanding the psychological aspects of individuals' participation in physical activity, and strategies and techniques for professionals attempting to foster motivation and adherence to exercise among their clients/members. Prerequisite: Admission in the health program or consent of the instructor.

HSES 897. Independent Study. 1-4 Credits.
Prerequisite: Consent of advisor and instructor.

HSES 898. Master's Project. 1-4 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

HSES 899. Master's Thesis. 1-6 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

HSES 905. Advanced Concepts in Health Education. 3 Credits.
This course is designed as an in-depth study of the pedagogy of health education. It is concerned with the effects of various health education models, new materials, and innovative teaching techniques. The effectiveness of various media such as films, slides, transparencies, microcomputers, and assessment tools will be analyzed. Research concerning innovations in education will be investigated along with mass communication in the field. Timely issues of controversy about health education practices and the effectiveness of values clarification activities will also be discussed.

HSES 910. Biochemistry of Exercise. 3 Credits.
This course will include an in-depth examination of metabolic and endocrine principles as they relate to physical exercise and training.
Specific topics will include: substrate utilization in exercise, metabolic controls, muscle biochemistry, body composition, nutritional aspects and hormonal influences in exercise. Both instructor and students will report on the most current literature relating to the topics. Prerequisite: Human biodynamics or a course in biochemistry.

HSES 926. Grant and Research Proposal Writing. 3 Credits.
This is a course for students to examine the sources and areas which provide financial support for research projects. The areas of study include types of research funding available on a local, state, and federal level, the elements and design of writing a proposal and strategies involved in securing financial support for research. A focus for the course will center upon preparing a research proposal for funding. Prerequisite: PRE 710.

HSES 940. Scientific Dimensions of Exercise and Health. 3 Credits.
This course has been designed to bring together the many scientific factors relating exercise and physical activity to health and human function. The course focuses on the interdisciplinary nature of this relationship and reviews the physiological, sociological, psychological, and behavioral factors involved. Prerequisite: Fifteen hours of graduate level course work in health or physical education and admission to health or physical education doctoral program.

HSES 980. Advanced Topics: ______. 1-3 Credits.
A special course of study to meet current needs of education professionals—primarily for post-master’s level students.

HSES 981. Current Issues in Health and Physical Education. 3 Credits.
This course will explore the latest philosophical issues and controversies which are impacting the fields of health, physical education, and athletics. The student will explore the current and future ramifications of each issue and its potential effects on the profession. Prerequisite: Admission to the Health, Sport, and Exercise Sciences Doctoral Program.

HSES 990. Doctoral Seminar. 3 Credits.
This seminar based course will be designed to prepare the doctoral student for academic careers or careers in industry after they graduate. The topics covered will be promotion and tenure procedures and expectations, including but not limited to teaching, responsible conduct of research, professional ethics, historical ethical issues, evaluation of ethical dilemmas, and service expectations at research intensive institutions, regional comprehensive institutions and small liberal arts colleges. Industry career options will be discussed and guest speakers from various disciplines will be brought in to discuss options and expectations with this career path. Prerequisite: Doctoral student or permission of the instructor.

HSES 995. Field Experience in: ______. 1-5 Credits.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours.

HSES 996. College Teaching Experience in: ______. 3 Credits.
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate's committee.

HSES 997. Individual Study. 1-4 Credits.
Prerequisite: Prior graduate course work in the area of study and consent of instructor.

HSES 999. Doctoral Dissertation. 1-15 Credits.
Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Applied Science in Exercise Science

The Bachelor of Applied Science in Exercise Science can be a path to professions in personal training, strength and conditioning, corporate wellness, and military/law enforcement/first responder force readiness. Students admitted to the program have the option to complete this degree entirely online. The program curriculum includes a strong core of applied science courses in anatomy, physiology, kinesiology, strength and conditioning, personal training, and exercise physiology, as well as flexible elective options from a diverse mix of disciplines. Students will learn from faculty experts who are Fellows of the National Strength and Conditioning Association and the American College of Sports Medicine and experienced in the latest evidence-based practices in the field of exercise science.

Admissions:

Freshman Students:
Students can be admitted into the B.A.S. in Exercise Science program as freshmen if they meet KU’s assured admission standards and declare the Bachelor of Applied Science in Exercise Science as their major.

Transfer Students:
Students can be admitted into the B.A.S. in Exercise Science program as a transfer student if they are admitted to KU, declare the Bachelor of Applied Science in Exercise Science as their major, and meet the following criteria:

• KU + Transfer Cumulative GPA of at least 2.75 is required for admission to the program.

Priority Application Deadlines:
Mid-September for spring or early February for fall admission.

Students that do not meet the requirements above can petition through the online SOEHS Admission Petition form (https://soehs.ku.edu/events-resources/forms-documents/).

Prospective students should consult an advisor early in their first year to ensure fulfillment of the admission requirements and to plan for efficient completion of the program.

For information about initial admission to KU, visit the Office of Admissions (https://admissions.ku.edu/). Visit the Office of International Support Services (http://www.iss.ku.edu) for information about international admissions.

Graduation Requirements:

• All courses must be completed for graduation (at least 120 hrs.). At least 30 hours must be completed at KU.
A KU + Transfer Cumulative GPA of 2.75 is required for graduation (includes transfer hours).
- Other general regulations of the School and University, including KU Core Goal requirements.
- A maximum of 64 hours from any community college count toward cumulative hours.
- Requirements to begin internship, if student elects to complete an internship:
  - A minimum KU + Transfer Cumulative grade-point average of 2.75 with no grade lower than a C in any of the required program courses.
  - All program requirements must be completed before the internship.
  - See School of Education and Human Sciences Student resource for field experience for additional information.
- Military-affiliated students may receive elective credit hours upon evaluation of the Joint Services Transcript. https://admissions.ku.edu/militarycredit
- Additional credit for service may be granted on a per-class basis using 'credit by examination'. Please consult with a program advisor for specific details.

1. Must have a minimum grade of "C" or better.
2. Currently, only offered on the Edwards Campus
3. Currently, only offered on the Lawrence Campus
4. Any listed minor may be declared and completed as 18 elective credit hours OR taken as individual courses toward the required 18 required elective hours.
Bachelor of Science in Education

Bachelor of Science in Education degrees are offered in two programs:

- Community Health
- Physical Education Plus

The Community Health program prepares students for health-related careers in county, state and federal health departments, non-profit agencies, private ventures or agencies focusing on health promotion, corporate wellness, crisis intervention, drug/alcohol recovery, adoption, services for the elderly. In addition to general education requirements, the program includes major requirements, a complementary minor, and a 14 credit hour internship (40 hours a week for 14 weeks).

The Physical Education Plus program leads to teacher licensure for grades pre-Kindergarten through 12th in physical education. The program enables teacher candidates to 1) apply for a Kansas state teaching license with an endorsement in Physical Education (PK-12), and 2) prepare them to pursue endorsement in an additional secondary teaching field, or complete a minor in another academic area. In addition to a broad range of general education classes, students take coursework in biological and exercise sciences, teaching methods, and health and fitness related classes. Students in the program gain experience through practicums in school settings each semester. The final semester of the program consists of student teaching in two different grade levels.

Incoming Freshman Students: Students can be admitted into the Community Health or PE Plus program as freshmen if they meet KU's assured admission standards and declare Community Health or PE Plus as their major.

Incoming Transfer Students: Students can be admitted into Community Health or PE Plus as transfer students if they are admitted to KU, declare Community Health or PE Plus as their major, and meet the following criteria:

- A KU + Transfer Cumulative GPA of at least 2.75

Current KU Students: Students can be admitted into Community Health or PE Plus as current KU students if they meet the following criteria:

- A KU + Transfer Cumulative GPA of at least 2.75

Students that do not meet the requirements above can petition through the online SOEHS Admission Petition form. (https://soehs.ku.edu/events-resources/forms-documents/)

For information about initial admission to KU, visit the Office of Admissions (https://admissions.ku.edu/). Visit the Office of International Support Services (https://liss.ku.edu/) for information about international admissions.

Bachelor of Science in Education Degree Requirements

Primary responsibility for meeting graduation requirements rests with the student.

- Complete an approved program with a minimum of 120 credit hours of course work. At least 30 hours must be taken in residence.
- A 2.75 minimum KU + Transfer cumulative grade-point average for all academic coursework, including transfer hours.
- Minimum grades in some specific designated Physical Education Plus courses.
- Other general regulations of the School and University, including KU Core Goal requirements.
- Successful completion of student teaching and/or internship with a grade of C- or higher.

Requirements to begin student teaching and/or internship:

- A minimum KU + Transfer Cumulative grade-point average of 2.75 with no grade lower than a C- in any course in professional education.
- All program requirements except student teaching and internship must be completed before student teaching and internship.
- Continued demonstration throughout the program of professional dispositions as evaluated by program faculty each semester.

Additional Graduation requirements for Community Health

- Students presenting current certification in lieu of HSES 248 must take an additional two hours of course credit. Acceptable certifications: American Red Cross courses – Standard First Aid with CPR/AED OR Aid – Responding to Emergencies with CPR/AED. Please see SOEHS advisor for additional certification criteria.

Kansas Licensure Requirements for Physical Education Plus

- Passing score on the Educator Performance Assessment (KU-EPA).
- Passing score on the Principles of Learning and Teaching Examination and Praxis content examination(s).
- Completion of Bachelor of Science in Education degree – see above.

Please note: Each state has its own licensure requirements. Being eligible for a license in Kansas does not ensure that the applicant is eligible for licensure in other states.

Physical Education Plus Teacher Licensure Program (PK–12)

Admission requirements

Incoming Freshman Students: Students can be admitted into the PE Plus program as freshmen if they meet KU's assured admission standards and declare PE Plus as their major.

Incoming Transfer Students: Students can be admitted into PE Plus as transfer students if they are admitted to KU, declare PE Plus as their major, and meet the following criteria:

- A KU + Transfer Cumulative GPA of at least 2.75

Current KU Students: Students can be admitted into PE Plus as current KU students if they meet the following criteria:

- A KU + Transfer Cumulative GPA of at least 2.75

Students that do not meet the requirements above can petition through the online SOEHS Admission Petition form. (https://soehs.ku.edu/events-resources/forms-documents/)

TRANSITION POINTS
Transition Point #1: Students must consult with a SOEHS advisor before entering the Professional Blocks. Progression to Professional Block 1 requires students to:

1. Complete all Pre-Professional coursework with a minimum KU + Transfer Cumulative of 2.75.
2. Complete identified courses with the required minimum grade noted.
3. Consult with an SOEHS advisor to select a Plus option before entering the Professional Blocks.

Transition Point #2: Progression to Professional Block 3 requires students to:

1. Complete all previous coursework with a minimum KU + Transfer Cumulative of 2.75.
2. Complete identified courses with the required minimum grade noted.
3. Clear a criminal background check prior to placement in schools.
4. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.
5. Approval by the Associate Dean for Teacher Education and Undergraduate programs.

Transition Point #3: Progression to Professional Block 4 requires students to:

1. Complete all previous coursework with a minimum KU + Transfer Cumulative of 2.75.
2. Complete identified courses with the required minimum grade noted.
3. Complete all required degree coursework except Block 4 coursework.
4. Earn a final grade of "C-" or better in PE Teaching Practicum.
5. Demonstrate professional dispositions with minimal concerns noted by education faculty and administration.
6. Approval by the Associate Dean for Teacher Education and Undergraduate Programs.

Transition Point #4: Completion of Program requires:

1. Successful completion of the KU-Educator Performance Assessment and all other School of Education & Human Sciences requirements.
2. Completion of all required degree coursework with a 2.75 or higher cumulative grade point average.
3. Achievement of a grade of "C-" or better in professional education courses including practicum and student teaching.
4. Earning the B.S.E. degree.

Additional requirements to be eligible for an initial Kansas teaching license:

1. To qualify for a Kansas initial teaching license, candidates must complete a content knowledge assessment in each of the endorsement or teaching subject areas for which you completed a teacher preparation program and meet the minimum score set by the Kansas State Department of Education.
2. Candidates will also need to complete a pedagogy or teaching skills test, the Principles of Learning and Teaching and meet the minimum score set by the Kansas State Department of Education.

GRADUATION REQUIREMENTS

- All courses must be completed for graduation (at least 120 hrs.).
- A cumulative KU + Transfer Cumulative of 2.75 is required for graduation.

PRE-PROFESSIONAL COURSES (Must complete with 2.75 KU + Transfer Cumulative for transition to Professional Blocks)

Total Hours 59-60

1 A grade of “C-” or higher is required.
2 20 clock hours. Serve as a teaching aide for an adapted physical educator in a local district.
3 10-30 clock hours. Advisor-approved.
4 30 clock hours. Serve as a teaching aide in an elementary, middle, or junior high PE classroom.
5 Transition to Block 4 requires that all coursework is completed with a minimum KU + Transfer Cumulative GPA of 2.75. A KU + Transfer Cumulative GPA of 2.75 is required for graduation.

Community Health Admission

Admission Requirements:

Incoming Freshman Students: Students can be admitted into the Community Health program as freshmen if they meet KU’s assured admission standards and declare PE Plus as their major.

Incoming Transfer Students: Students can be admitted into Community Health as transfer students if they are admitted to KU, declare Community Health as their major, and meet the following criteria:
• A KU + Transfer Cumulative GPA of at least 2.75

Current KU Students: Students can be admitted into Community Health as current KU students if they meet the following criteria:

• A KU + Transfer Cumulative GPA of at least 2.75

Students that do not meet the requirements above can petition through the online SOEHS Admission Petition form. (https://inowformsprivate.ku.edu/fs/?form=SOEHS%20Admission%20Petition %20Form)

**Graduation Requirements**

• All courses must be completed for graduation (at least 120 hours)

• A KU + Transfer Cumulative GPA of at least 2.75

**Program Requirements**

1. **Code** | **Title** | **Hours**
---|---|---
**Prerequisite Requirements**
ENGL 101 | Composition (or exemption) | 3
ENGL 102 | Critical Reading and Writing | 3
MATH 101 | College Algebra: | 3
OR a MATH course higher than MATH 101 (Excluding MATH 103, MATH 109, MATH 110, or MATH 365) | 1
COMS 130 | Speaker-Audience Communication | 3
LDST 201 | Introduction to Leadership | 2
PSYC 104 | General Psychology | 3
or SOC 104 | Elements of Sociology | 3
Any course meeting KU CORE 3: Arts & Humanities | 3
Any course meeting KU CORE goal 4: LO 1 (Diversity) | 3
Biol 100 | Principles of Biology | 3
Biol 202 | Principles of Biology Laboratory | 1
HSES 248 | First Aid (or current certification) | 2
HSES 260 | Personal and Community Health | 3
**General Education Requirements can be taken prior to admission**
SOC 104 | Elements of Sociology | 3
or PSYC 104 | General Psychology | 3
COMS 246 | Introduction to Intercultural Communication | 3
or COMS 342 | Problem-Solving in Teams and Groups | 3
Social Science principal course meeting KU CORE goal 4: LO 2 (Global Awareness) | 3
BIOL 240 | Fundamentals of Human Anatomy | 3
BIOL 246 | Principles of Human Physiology | 3
JMC 320 | Introduction to Digital Marketing Communications, Advertising and Public Relations | 3
PHIL 160 | Introduction to Ethics | 3
**Post-Admission Requirements can only be taken after admission and MUST be taken in the semester indicated in order to avoid an extended program timeline**
HSES 308 | Drugs and Diseases in Society | 3
HSES 310 | Research and Data Analysis in Health, Sport, and Exercise Sciences (Fall Senior) | 3
HSES 330 | Principles of Nutrition and Health | 3
HSES 365 | Peer Health Education (Fall Senior) | 3
HSES 385 | Psychological Aspects of Exercise (Fall Junior) | 3
HSES 403 | Health Behavior Theory (Fall Junior) | 3
HSES 418 | Health Aspects of Aging (Fall Senior) | 3
HSES 466 | Program Planning in Health Education (Spring Junior) | 3
HSES 467 | Introduction to Health Education (Fall Junior) | 3
HSES 465 | Program Assessment and Evaluation (Spring Junior) | 3
HSES 489 | Health and Human Sexuality (Spring Junior or summer) | 3
HSES 578 | Health Internship Seminar (Spring Senior) | 2
HSES 580 | Internship in: Community Health (Spring Senior) | 14

**Minor Programs** 18-21

Students are required to complete one of the following minor programs: African American Studies (18 hours); Applied Behavioral Sciences (18 hours); Environmental Studies (18-20 hours); Psychology (18 hours); Spanish (20 hours); Sociology (18 hours); Women, Gender, and Sexuality Studies (18-21 hours). The courses in these programs CANNOT be used to satisfy the social sciences/humanities pre-admission requirements. ^4

**Total Hours** 120-123

^1 Students presenting current certification in lieu of HSES 248 must take an additional two hours of course credit. Acceptable certifications: American Red Cross courses - Standard First Aid with CPR/AED or Aid-Responding to Emergencies with CPR/AED. Please see SOEHS advisor for additional certification criteria.

^2 Students who have a 3.0 or greater cumulative GPA may petition to complete the internship at an approved site beyond the 50-mile radius. All coursework must be completed before the internship in approved. A 2.75 KU + Transfer Cumulative GPA is required before one can apply for the internship. Internship students are required to be present at the internship site a minimum of 40 hours per week for 14 weeks - NO EXCEPTIONS.

A minor program must be chosen from those listed and approved by your community health advisor or a health faculty member.

**Bachelor of Science in Exercise Science & Sport Management**

**Bachelor of Science degrees are offered in two programs:**

• Exercise Science
• Sport Management

The Exercise Science program at the University of Kansas prepares students for a variety of career paths after graduation, including admission to most physical therapy schools. Graduates may also work in agencies that dispense health- and fitness-related programs, such as commercial or private health and fitness centers, hospital exercise and cardiac rehabilitation programs, and corporate fitness centers or apply for graduate study in exercise physiology. It also serves as a foundation for
graduate-level work in health sciences, such as nursing, chiropractic, medicine (physician assistant, medical doctor, etc.), physical/occupational therapy or dietetics. The program combines rigorous coursework in the sciences with exercise science classes such as biomechanics, exercise biochemistry and neuromuscular exercise physiology.

The Sport Management program at the University of Kansas builds on general education and introductory courses through nine core courses and an 18-credit hour minor in business, psychology, or journalism & mass communications. Students complete courses in sociology of sport, sport ethics, sport facilities and event management, sport law, sport fundraising and sponsorship, sport finance and economics, sport communication, sport marketing, and personnel management. The culminating experience is a semester-long internship working in a student-selected area of sport management. This degree program prepares graduates for entry-level positions in intercollegiate athletics, professional sports, recreational programs, and the fitness industry.

Incoming Freshman Students: Students can be admitted into the Sport Management or Exercise Science program as freshmen if they meet KU’s assured admission standards and declare Sport Management or Exercise Science as their major.

Incoming Transfer Students: Students can be admitted into Sport Management or Exercise Science as transfer students if they are admitted to KU, declare Sport Management or Exercise Science as their major, and meet the following criteria:

- A KU + Transfer Cumulative GPA of at least 2.75

Current KU Students: Students can be admitted into Sport Management or Exercise Science as current KU students if they meet the following criteria:

- A KU + Transfer Cumulative GPA of at least 2.75

Students that do not meet the requirements above can petition through the online SOEHS Admission Petition form.

For information about initial admission to KU, visit the Office of Admissions (https://admissions.ku.edu/). Visit the Office of International Support Services (http://www.isss.ku.edu/) for information about international admissions.

Primary responsibility for meeting graduation requirements rests with the student.

- Complete an approved program with a minimum of 120 credit hours of course work. At least 30 hours must be taken in residence.

- A 2.75 minimum KU + Transfer Cumulative grade-point average for all academic coursework, including transfer hours.

- Other general regulations of the School and University, including KU Core Goal requirements.

- Successful completion of internship or approved electives.

Requirements to begin internship:

- A minimum KU + Transfer Cumulative grade-point average of 2.75.
- All program requirements must be completed before internship.

### Public and Population Health Minor (18 hrs.)  
**Required Courses:**
- HSCI 340 Introduction to Public Health (3)
- HSCI 440 Introduction to Epidemiology (3)
- HSCI 441 Population Health (3)
- HSCI 445 Introduction to Environmental Health (3)
- Select One Elective Course:
  - HEIM 415 Healthcare Delivery Systems (3)
  - HEIM 420 Legal Aspects of Healthcare (3)
  - SOC 424 Sociology of Health and Medicine (3)
  - SOC 425 Sociology of Global Health (3)
- Select One Statistics Course:
  - HEIM 575 Applied Statistics and Research Methods in Healthcare (3)
- BIOS 704 Principles of Statistics in Public Health (3)

### Public and Population Health Certificate (12 hrs.)  
- HSCI 340 Introduction to Public Health (3)
- HSCI 440 Introduction to Epidemiology (3)
- HSCI 441 Population Health (3)
- HSCI 445 Introduction to Environmental Health (3)

### Nutrition Minor (18 hrs.)  
**Required Courses:**
- HSCI 320 Principles of Nutrition (3)
- HSCI 420 Nutrition Through the Life Cycle (3)
- HSCI 421 Public Health Nutrition (3)
- HSCI 422 Nutrition Assessment (3)
- Select Two Elective Courses:
  - HSES 331 Sport and Exercise Nutrition (3)
  - HSCI 425 Nutrition Education (3)
  - HSCI 521 Advanced Nutrition and Metabolism (3)
  - HSCI 522 Advanced Sports Nutrition (3)

### Nutrition Certificate (12 hrs.)  
**Required Courses:**
- HSCI 320 Principles of Nutrition (3)
- or HSES 330 Principles of Nutrition and Health
- HSCI 420 Nutrition Through the Life Cycle (3)
- HSCI 421 Public Health Nutrition (3)
- HSCI 422 Nutrition Assessment (3)

---

1. Must have a minimum grade of "C-" or better.
2. Students may apply for an internship at an approved site once all coursework is completed. A 2.75 KU + Transfer Cumulative GPA is required before one can apply for an internship. Internship students are required to be present at the internship site a minimum of 40 hours per week for 16 weeks - NO EXCEPTIONS.
3. Currently, only offered on the Lawrence Campus
4. Currently, only offered on the Edwards Campus
5. Any listed minor may be declared and completed as 18 elective credit hours OR taken as individual courses toward the required 18 required elective hours.
6. Trigonometry must be completed as a sequence to MATH 101 (College Algebra) to meet degree requirements, unless a higher-level math is completed in its place (MATH 104-Precalculus Mathematics, MATH 115-Calculus I, or MATH 125-Calculus I).
7. HSES advisor approval needed.

**General Education Requirements (can be taken prior to admission)**

Select **FIVE** Upper Division Electives:

- HSES 484 | Sport in Film |
- HSES 598 | Special Course:_____ |
- AMS 330 | American Society |
- COMS 310 | Advanced Organizational and Professional Communication |
COMS 330  Effective Business Communication
COMS 335  Mass Media and Politics
ENGL 362  Foundations of Technical Writing
HSES 330  Principles of Nutrition and Health
HSES 489  Health and Human Sexuality
JMC 540  Sports, Media and Society
MGMT 310  Principles of Management
MGMT 470  Leadership in Business Organizations

Any course meeting KU CORE goal 1: LO 1 (Critical Thinking)  3
Any course meeting KU CORE goal 4: LO 2 (Global Awareness)  3

Post-Admission Requirements can only be taken after admission
HSES 380  Sociology of Sport  3
HSES 381  Sport Ethics  3
HSES 382  Sport Facilities and Event Management  3
HSES 384  Sport Law  3
HSES 481  Sport Fundraising and Sponsorship  3
HSES 483  Sport Finance and Economics  3
HSES 485  Sport Communication  3
HSES 486  Sport Marketing  3
HSES 487  Personnel Management in Sport  3
HSES 488  Pre-Internship Seminar  1
HSES 499  Internship in Sport Management  2  15

Students must complete at least one of the three minors below
(Business, Journalism, and Psychology)

Business Minor Courses can be taken prior to admission
ACCT 205  Survey of Accounting  3
IST 205  Survey of Information Systems  3
FIN 305  Finance and Accounting  3
MGMT 305  Survey of Management and Leadership  3
MKTG 305  Survey of Marketing  3
SCM 305  Survey of Decision Making in Business  3

Journalism Minor Courses can be taken prior to admission
JMC 101  Media and Society  1  3
JMC 104  Words at Work: Writing Essentials  1  3
JMC 300  Visual Storytelling  1  2
JMC 302  Information Exploration  1  3
JMC 304  Media Writing for Audiences  1  3
JMC 408  Media Law and Ethics  3
JMC Tech Tools Course (211-215)  1

Psychology Minor Courses can be taken prior to admission
General Psychology (3), Satisfied by:
PSYC 104  General Psychology  3
OR
PSYC 105  General Psychology, Honors  3
Psychology Required Electives (6), Satisfied by 2 courses chosen from:
PSYC 318  Cognitive Psychology  3
OR
PSYC 319  Cognitive Psychology, Honors  3
PSYC 333  Child Development  3
OR
PSYC 334  Child Development, Honors  3

PSYC 350  Psychological Disorders  3
OR
PSYC 351  Psychological Disorders, Honors  3
PSYC 360  Social Psychology  3
OR
PSYC 361  Social Psychology, Honors  3
PSYC 370  Behavioral Neuroscience  3
OR
PSYC 371  Behavior Neuroscience, Honors  3
PSYC 375  Cognitive Neuroscience  3
PSYC 380  Clinical Neuroscience  3
OR
PSYC 381  Clinical Neuroscience, Honors  3

Psychology Minor Remaining Electives (9). The remaining elective courses may include any undergraduate courses offered by the Department of Psychology including:
PSYC 480  Independent Study  1-5
PSYC 481  Research Practicum  1-5
PSYC 483  Undergraduate Internship in Psychology  1-3

A maximum of 3 hours of PSYC 480 or PSYC 481 or PSYC 483, or any combination of these 3 courses totaling 3 hours may count toward the minor.

1  Must have a grade of "C" or better.
2  Internships must be completed at an approved site within a 50-mile radius of Lawrence. Students who have a 3.0 or greater cumulative GPA may petition to complete the internship at an approved site beyond the 50-mile radius. All coursework must be completed before the internship is approved. A 2.75 cumulative GPA is required before one can apply for internship. Internship students are required to be present at the internship site a minimum of 40 hours per week for 15 weeks - NO EXCEPTIONS.

Minor in Sport Management

The minor in Sport Management will provide students with a core set of skills in sport management, including literacy in sport marketing, sport finance, personnel management, and the sociological aspects of sport. Students will also have a wide variety of electives from which to choose, including sport facilities, sport in film, sport communication, and experiential learning in sport.

This minor is designed for students with an interest in the theory of the sporting context and/or students who will use principles of the sport field in their anticipated profession.

Eligibility Requirements:

• Pre-requisite/Co-requisite: HSES 289 (can be completed during first semester of minor).
• 2.5 cumulative grade point average
• 40 total credit hours completed

In order to graduate with the minor, a minor GPA of 2.5 is required.

Minor in Sport Management Core Courses (12 Hours)
HSES 380 Sociology of Sport (3 Hours)
HSES 483 Sport Finance and Economics (3 Hours)
HSES 486 Sport Marketing (3 Hours)
HSES 487 Personnel Management in Sport (3 Hours)

Minor in Sport Management Electives (6 Hours)

*Students may choose any two (2) of the following courses*

- HSES 384 Sport Law
- HSES 485 Sport Communication
- HSES 381 Sport Ethics
- HSES 382 Sport Facilities and Event Management
- HSES 598 Special Topics (Including Experiential Learning in Sport)

**Undergraduate Certificate in Strength and Conditioning**

The strength and conditioning certificate will offer students the opportunity to take a complimentary selection of courses to prepare for careers in strength and conditioning, including personal training and tactical strength and conditioning. Several of the courses are coupled with respective certification exam eligibility as provided by the National Strength and Conditioning Association. Strength and conditioning coaches help various types of athletes maximize performance through strength training, periodized exercise, and nutritional programs using practical and applied principles. Strength and conditioning professionals work with athletes at all levels, including individuals that may retain the desire to improve their strength, speed, agility, and endurance. The certificate program will emphasize the physiological, biomechanical, and metabolic demands of the related occupations as well as the organizational structure of facilities and management.

Students must register for the strength and conditioning certificate by emailing exsciedws@ku.edu. Degree-seeking undergraduate students who wish to apply to a certificate program must be in good standing in their departments or programs with a minimum 2.5 GPA. An individual who is not currently a degree-seeking student at KU must be admitted to the University of Kansas, register for the strength and conditioning certificate program, and meet with the program advisor.

To complete the certificate in Strength and Conditioning, students must complete the following courses totaling 15 credit hours:

- HSES 305-Methods of Strength and Conditioning
- HSES 306-Principles of Personal Training
- HSES 307-Tactical Strength and Conditioning
- HSES 331-Sport and Exercise Nutrition
- HSES 350-Care and Prevention of Athletic Injuries

Upon completion of the five required courses, a student must apply for graduation of the certificate through the KU student portal.

**Master of Science in Education in Health, Sport, and Exercise Science**

Programs in the Department of Health, Sport, and Exercise Sciences (HSES) offer undergraduate and graduate degrees preparing students to work in health, sport, and exercise-related fields. HSES graduates apply their knowledge to serve as teachers, researchers, clinicians, managers, administrators and other professionals in academic, private, and public settings.

The Department of Health, Sport, and Exercise Sciences (HSES) offers the Masters of Science in Education (M.S.E.) degree with a major in Health, Sport and Exercise Science in the following specialization areas:

- Exercise Science
- Health Education and Psychology of Physical Activity
- Pedagogy
- Sport Management (Online)

**Graduate Admission to the School of Education and Human Sciences**

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

**Admission Requirements for the Department of Health, Sport and Exercise Science**

The following materials must be submitted for the master's degree:

**It is recommended that students applying for a M.S.E thesis option program contact a faculty member in their specialization area for an interview.**

- A completed online graduate application (https://gradapply.ku.edu/).
- 1 official transcript of all previous undergraduate and graduate credit.
- Personal statement
- 3 letters of recommendation
- A vita or resume.

Graduate Record Examination (GRE) Scores are required for master's degree admission into Exercise Science and Health Education and Psychology of Physical Activity

- 150 on the verbal section, 141 on the quantitative section, and 4.0 on the written analytical section
- GRE scores need to be sent directly to us from the Educational Testing Center (KU Institution code 6871, Department code 3909)
Please note: Meeting minimum admission standards does not guarantee admission to the program.

All application materials should be submitted online with the graduate application. If there are application materials that cannot be uploaded with the online application, they may be emailed or mailed to the department.

Graduate applicants who are non-native speakers of English must meet English Proficiency Requirements for Admission to Graduate Study (https://gradapply.ku.edu/english-requirements/). Documentation should be sent directly to the department.

International applicants must also provide some additional documentation, as described on the Graduate Admissions website (https://gradapply.ku.edu/International-requirements/).

Contact the department for application deadlines.

**Doctor of Philosophy in Health, Sport, and Exercise Science**

**Health, Sport, and Exercise Sciences**

Programs in the Department of Health, Sport, and Exercise Sciences (HSES) offer undergraduate and graduate degrees preparing students to work in health, sport, and exercise-related fields. HSES graduates apply their knowledge to serve as teachers, researchers, clinicians, managers, administrators and other professionals in academic, private, and public settings.

Doctoral students may pursue the Ph.D. degree with a major in Heath, Sport and Exercise Science in the following specialization areas:

- Exercise Physiology
- Health Education & Psychology of Physical Activity
- Sport Management

**Graduate Admission to the School of Education and Human Sciences**

Graduate programs in education are open to students with acceptable baccalaureate and graduate degrees whose academic records indicate
that they can do successful work at the graduate level. Applicants must provide evidence of ability to work successfully at the graduate level, including experience in and commitment to the profession.

Each department in the School of Education and Human Sciences sets its own application deadlines and admission criteria. Prospective graduate students should contact the appropriate department for more information.

See Admission in the Graduate Studies (p. 2449) section of the online catalog for more information.

**Admission Requirements for the Department of Health, Sport and Exercise Sciences**

Students applying for Ph.D. programs must contact a faculty member in their specialization area for a required interview.

- A completed online graduate application (https://gradapply.ku.edu/).
- 1 official transcript of all previous undergraduate and graduate credit.
- Personal statement
- 3 letters of recommendation
- A vitae or resume.

**Minimum Admission Requirements (Ph.D.)**

- Earned masters degree
- GPA requirement for regular admission - 3.5 GPA in your masters degree.
- Contact your desired advisor regarding the GRE requirements.

*Please note: Supporting documents to upload to your application: Meeting minimum admission standards does not guarantee admission to the program.*

All application materials should be submitted online with the graduate application. If there are application materials that cannot be uploaded with the online application, they may be emailed or mailed to the department.

**International Applicants**

International applicants can visit Graduate Admissions website (https://gradapply.ku.edu/International-requirements/) to learn more about the University’s requirements.

- Official transcripts from an international university (must include an English translation of all documents in addition to the official transcript in the original language, or documentation that the University’s mode of instruction is English.)
- Graduate applicants who are non-native speakers of English must meet English Proficiency Requirements for Admission to Graduate Study (https://gradapply.ku.edu/english-requirements/).

Contact the department for application deadlines.

HSES Graduate Admissions
1301 Sunnyside Ave., Room 161
Lawrence, KS 66045

**Ph.D. Degree Programs**

The Doctor of Philosophy degree is offered with emphases in exercise physiology, health education and psychology of physical activity, and sport management. Students must interview with a faculty advisor in the intended emphasis before admission.

Pre-aspirant status requires the prospective doctoral student to earn a grade-point average of at least 3.5 in the first 12 credit hours.

With the advisor, each student develops a plan of study consistent with the student’s needs and the faculty’s expertise. This includes:

- A minimum of 36 hours of major courses is required, excluding credits used to fulfill Research Skills and the Dissertation requirements. The HSES Core may be included as part of the major if it is consistent with the student’s area of study and if doing so is supported by the student’s department and doctoral committee. 50% of the student’s major must be at the 800-level or above. The program must include at least 6 credit hours outside of the student’s home department - not including courses required to fulfill the student’s research component or the HSES Core.  

- A minimum of 12 hours of research skills is required. At least 9 of the 12 credit hours must be 800-level or above. The 12 credit hours cannot include EPSY 715 or it’s program equivalent. Up to 6 hours of the required 12 may be waived by research coursework completed as part of a prior master’s degree. If not taken as a part of the student's master's degree, EPSY 715 must be taken during the student's first enrollment in doctoral study. This course does not count toward any doctoral requirement. Students must have completed all research skills courses before they are allowed to take the comprehensive examination.

- **HSES Core Course** - This requirement is met by students taking HSES 990, Doctoral Seminar.
- **Responsible Conduct of Research** - Student will work with their advisor to fulfill this 3 credit hour requirement.
- **College Teaching Experience** - Documentation of supervised college teaching experience (completed during the student's doctoral program) is required Programs may require that a student enroll in HSES 996, but these credits may not be used to fulfill credit hour requirements in the student’s major.
- **Comprehensive Exam** - In HSES doctoral programs, students do an alternative comprehensive exam. In this format, the student completes a research manuscript that is suitable for a mid-tier journal in their chosen field. Additionally, they complete a dissertation length literature review of the topic of interest. An oral defense is conducted after these two documents are deemed to be of a passing quality.
- **Dissertation** - A minimum of 18 credit hours of dissertation is needed for the doctoral degree. These credits cannot be applied to the student's major.
Students should obtain specific instructions and guidelines for graduate degrees from the department (https://hses.ku.edu/) and also from the School of Education graduate regulations section of the catalog.

Interdisciplinary Education Programs

The School of Education and Human Sciences has programs that prepare students for careers in education, education-related fields, health professions, human science professions, and sport management. The school offers an interdisciplinary minor in Education Studies. The Education Studies minor provides students from any undergraduate major the opportunity to understand the education system at all levels. The Education Studies minor does not lead to teacher licensure, nor does it prepare students to teach in schools.

Minor in Education Studies

The minor in Education Studies provides a solid grasp of essential theory and research in education, along with an opportunity to focus on particular aspects of the process of the educational system. The minor in Education Studies does not lead to teacher licensure, nor does it prepare students to teach. Rather, it offers a broad introduction to education as a field of study and as a fundamental human activity.

Benefits of the minor in Education Studies:

The Education Studies minor will provide a foundation for students interested in roles or careers that intersect with the schools, policy related to education and human development, and participation in a democratic society that is based on universal access to education. The goal is to provide undergraduates of any major the opportunity to develop an understanding of the legal, social, political, and economic forces that influence and shape educational policies.

Any student desiring to complete the minor in Education Studies should develop a program plan with their academic advisor from their major department. However, the School of Education & Human Sciences can develop a program plan with their academic advisor from their major department. Any student desiring to complete the minor in Education Studies should consult with their academic advisor today to see if a minor in Education Studies aligns with your career goals and academic program.

The Education Studies minor requires 18 hours of coursework.

SPED 326  Teaching Exceptional Children and Youth in General Education

EPSY 580  Positive Psychology

Department of Special Education

Special Education Graduate Programs

The Department of Special Education offers campus-based and online graduate programs for students interested in teaching, research, and professional service related to infants, toddlers, children, adolescents, and adults with low and high incidence disabilities and their families. Since the 1970s, the department’s master’s and doctoral programs have received national and international recognition. The faculty is known for its leadership to the field, and commitment to high-quality, inclusive learning and development opportunities for children and youth with low and high incidence disabilities, innovative field-based research, and preparation of highly effective educators, researchers, faculty preparing educators, and policy specialists. The annual U.S. News and World Report's graduate program survey consistently ranks KU at the top when compared to more than 200 graduate programs in this field. As one of the most comprehensive special educator preparation programs in the country, the department attracts students from many states and countries.

Programs Offered

Students may pursue a Master of Science in Education (M.S.E.) in one of 5 areas:

- Autism Spectrum Disorder (online) (https://catalog.ku.edu/education/special-education/mse/#requirementstext)
- High-Incidence Disabilities (online) (https://catalog.ku.edu/education/special-education/mse/#requirementstext)
- Low-incidence Disabilities (campus) (https://catalog.ku.edu/education/special-education/mse/#requirementstext)
- Secondary Transition Education and Services (online) (https://catalog.ku.edu/education/special-education/mse/#requirementstext)

Students may pursue a graduate certificate(s) in the following areas:

- Autism Spectrum Disorder (online) (https://catalog.ku.edu/education/special-education/mse/#requirementstext)
- High Incidence Disabilities Endorsement KS (online) (https://catalog.ku.edu/education/special-education/high-incidence-disabilities-endorsement-gradcert/)
- Graduate Certificate in Transition (online) (https://catalog.ku.edu/education/special-education/transition-gradcert/)
- Leadership in Special and Inclusive Education (online) (https://catalog.ku.edu/education/special-education/leadership-in-special-and-inclusive-education-gradcert/)
and transform educational and social institutions and their practices to engage, influence, and promote learning, equal opportunity, full participation, independent living, and economic self-sufficiency.

For degree- and certificate-seeking students, maintaining a minimum cumulative grade point average (GPA) of 3.0 or higher is required. A minimum cumulative grade point average (GPA) of 3.0 or higher is required to remain in good academic standing and in order to graduate.

Courses

**SPED 261. Families and Professional Partnerships. 3 Credits.**
This course provides information on issues and practices related to working together in partnership with families of young children including those who have a young child with special needs. Emphasis will be placed on taking a family systems prospective and a family-centered approach to family support. Strategies for effective communication for the purpose of information sharing and collaborative planning with families are provided. Relevant current scientifically based evidence will be reviewed and discussed pertaining to these topics.

**SPED 326. Teaching Exceptional Children and Youth in General Education. 3 Credits.**
This course is designed for general education teacher trainees. It will provide them information about students with disabilities that they will have in their classrooms and the law governing special education and its implications for them as general educators. The course will address Individualized Educational Plans that are developed for students with disabilities and how general educators contribute to these plans. Students will learn about planning instruction that is differentiated to meet various learner needs, universal design principles and instructional tools, providing meaningful access to general education classrooms and curriculum for students with disabilities and designing and delivering appropriate accommodations and modifications to assist student learning. Prerequisite: Admission to the Teacher Education Program.

**SPED 327. Instructional Practices for Students with Disabilities. 3 Credits.**
This course focuses on effective, efficient strategies for delivering inclusive educational opportunities for students with significant support needs. Educator candidates will learn to structure, manage, teach and support social and emotional well-being for students with significant support needs. In this course, students will learn about systematic assessment and instructional procedures designed to meet students' academic, behavioral, and social-emotional needs. Prerequisite: SPED 326.

**SPED 328. Using Technology to Plan and Design Instruction for All Students. 3 Credits.**
This course addresses the use of technology to explore complex real world problems that impact an inclusive society. The course introduces and provides indepth information of education frameworks including Universal Design for Learning (UDL), Multi-tiered Systems of Support (MTSS), and Positive Behavior Interventions and Supports (PBIS). Students will engage in applying UDL and other support frameworks in content-based learning environments. These experiences will integrate "problem-based learning" (PBL) to understand disciplinary knowledge, solve problems, and develop skills in instruction with technology solutions being an integral component.

**SPED 326. Introduction to Early Education and Early Childhood Special Education. 3 Credits.**
This course is designed to provide an overview of the field of early education including early childhood education and early childhood special education. The historical, philosophical, research- base, policy and legal foundations for the field are discussed to provide the students with the
knowledge to become an advocate for early learning opportunities (birth through grade 3) for all children and their families.

**SPED 401. Professional Learning Seminar I. 1 Credits.**
The purpose of the professional learning seminars is to collaboratively engage KU students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that our KU students face in the schools. We will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the ethical conduct of professional teachers who make decisions each day that affect the lives of children and their families.

**SPED 402. Professional Learning Seminar II. 1 Credits.**
The purpose of the professional learning seminars is to collaboratively engage KU students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that our KU students face in the schools. We will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the ethical conduct of professional teachers who make decisions each day that affect the lives of children and their families.

**SPED 403. Professional Learning Seminar III. 1 Credits.**
The purpose of the professional learning seminars is to collaboratively engage KU students, KU faculty, and school professionals in a continuous seminar that focuses on important issues that our KU students face in the schools. We will critically examine instructional practices, learning in real-world contexts, and analyze teaching and learning from multiple perspectives including the ethical conduct of professional teachers who make decisions each day that affect the lives of children and their families.

**SPED 439. Student Teaching: Unified Early Childhood. 6-9 Credits.**
A supervised student teaching experience leading to initial teaching licensure in Kansas Unified Early Childhood (birth through grade 3). The student assumes the professional role as a teacher in an approved inclusive early childhood infant/toddler or preschool. Prerequisite: Admission to the Unified Early Childhood program. Approved application of intent to student teach.

**SPED 440. Evid Based Prac in English/Lang Arts Literacy for Students Struggling or w/IEPs: Beg Read & Writing. 2 Credits.**
This course focuses on the development of foundational skills for planning, implementing, and assessing reading and literacy development for students with disabilities served in general education settings. Learning will focus on skills and dispositions to effectively plan with educational practitioners (general education, related services, paraprofessionals), to design curricular and instructional strategies to support and deliver high quality reading and literacy instruction to students with disabilities. The course will focus on the "reading to learn" skills of vocabulary development, and comprehension in various content domains and texts. Learning will focus on skills and dispositions to effectively plan with educational practitioners (general education, related services, paraprofessionals), to design curricular and instructional strategies to support and deliver high quality reading and literacy instruction to students with disabilities. Prerequisite: SPED 326, SPED 327, SPED 328, SPED 440.

**SPED 442. Evidence Based Practices in Mathematics, Science, and Social Studies for Students with IEPs. 2 Credits.**
