- Specific elective courses required by the student’s research committee are dependent upon the student’s area of research concentration. The total elective hours may vary according to needs. Elective courses may be chosen from the following list but are not limited to this list. Electives chosen are the ultimate decision of the student’s research advisor and research committee.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs are.

Students may start this program in the fall or spring semester. Th plan of study below shows a typical progression if the student starts in the fall semester. Course requirements are based on recommendations of the students’ academic advisory committee.
The Department of Dietetics & Nutrition and the University of Kansas Medical Center have a commitment to nondiscrimination, access and reasonable accommodation of students with disabilities. Therefore, all students admitted to the PhD Degree in Medical Nutrition Science must be able to meet the following requirements and expectations with or without an accommodation. The PhD degree prepares students to practice dietetics and nutrition and to interpret and participate in research in nutrition within academic and healthcare organizations. Graduates need knowledge and skills to function in diverse practice and research settings. All students who are admitted into the PhD degree program in Dietetics & Nutrition are able to do the following:

**Observe**: Specific observation skills include, but are not limited to, being able to accurately assess lectures, demonstrations, research, and practice situations in the practice and research of health sciences.

**Communicate**: Students must have the ability to use multiple communication techniques (oral, written, nonverbal) that enable them to communicate with research participants, teachers, health providers, and faculty. Students must be able to report to members of the team, express accurate information to research participants, and teach, explain, direct and counsel people.

**Psychomotor**: Students must have sufficient motor capacities and motilities to be able to generate, calculate, record, evaluate and transit information; prepare assignments; deliver public presentations to large and small audiences; collect specimens and perform basic tests and physical assessments on individuals, e.g. anthropometric assessments, finger sticks for blood glucose testing, using glucometers, assessing skin fold thickness, taking blood pressure; and/or working in institutional and food demonstration kitchens.

**Intellectual and Cognitive Abilities**: Students must be able to measure, calculate reason, analyze, synthesize, integrate, and remember to apply information. Creative problem solving and clinical reasoning requires all of these intellectual abilities.

**Professional and Social Attributes**: Students must exercise good judgment and promptly complete all responsibilities required of the program. They must develop mature, sensitive, and effective professional relationships with others. They must be able to tolerate taxing workloads and function effectively under stress. They must be able to adapt to changing environments, display flexibility, and function in the face of uncertainties and ambiguities. Concern for others, interpersonal competence, and motivation are requisites for the program.

### Health Information Management

The University of Kansas offers a bachelor of science in health information management, a dynamic health profession specialized in managing health data and information to improve health care delivery. This degree program entails the theory and application of this health profession with an emphasis on hands-on applied learning, as well as interprofessional education activities with other health care professionals in training. The curriculum focuses on health care management, data and information management practices, health information systems and technology, types of health care settings and how health services are delivered, and clinical concepts. Students in this program complete the final two years of their bachelor degree at the University of Kansas Medical Center campus.

Graduates of this program are positioned to become leaders in health care with the skills required to analyze and manage health data and

Reasonable accommodation will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide appropriate documentation of disability and submit a request for accommodation to:

The Office for Academic Accommodations

Cyn Ukoko, Senior Coordinator of Academic Accommodations

913-945-7035 or 711 TTY

cukoko@kumc.edu

1040 Dykes Library
information, including the systems, processes, and teams of people who work with health data and information. Those with a degree in health information management may find work in varieties of settings including healthcare technology companies, hospitals, physician offices, health insurance companies, and government agencies, among others. To learn more about this program and the profession of health information management, please visit the program website (http://www.kumc.edu/school-of-health-professions/health-information-management/academic-programs.html).

Upon successful completion of the program, students are eligible to take the American Health Information Management Association’s certification exam. Graduates passing this exam become credentialed and nationally recognized as a registered health information administrator (RHIA).

The bachelor’s degree in health information management is accredited by the Commission on Accreditation for Health Informatics and Information Management. (http://www.cahiim.org/)

Students interested in entering this field should contact an advisor (http://www.kumc.edu/school-of-health-professions/health-information-management/about-us.html) as early as possible in their collegiate careers to ensure prerequisite courses are completed on schedule. For more information, view the frequently asked questions (http://www.kumc.edu/school-of-health-professions/health-information-management/frequently-asked-questions.html) for prospective students.

Courses

HEIM 177. First Year Seminar. 3 Credits.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in health data and information management. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

HEIM 210. Introduction to Healthcare. 1 Credits.
This course is an introductory overview of the United States healthcare system. Course content emphasizes organizational structures and patient care settings in healthcare, healthcare professionals and their roles, as well as laws and regulations that influence how healthcare is paid for, quality is assessed, and healthcare data is protected. Current events in healthcare are also addressed. Open to all students.

HEIM 230. Medical Terminology. 3 Credits.
A study of the language of medicine including word construction, definitions, medical abbreviations, and use of terms related to various areas of medical science and health professions. Course requires students to be able to break down medical terms, understand their meanings and pronounce them correctly. This online course is designed for students interested in clinical and health professions.

HEIM 401. Introduction to Health Information Management (HIM). 3 Credits.
This course introduces students to the foundational concepts of health record content, characteristics and requirements, along with the operational processes designed to support and safeguard the healthcare data and information contained therein. Joint Commission survey process is also included. Industry standard software applications are used for applied, hands-on learning in this course.

HEIM 415. Healthcare Delivery Systems. 3 Credits.
This course is an in-depth overview of the United States healthcare system and focuses on the structure and function of services across settings. Special emphasis is placed on the history of healthcare, reimbursements and financing, health policy, outcomes (cost, quality, access) and the integration of care across delivery settings using health information technology.

HEIM 420. Legal Aspects of Healthcare. 3 Credits.
This course introduces the student to some of the basic legal principles found in healthcare and health information management (HIM). Fundamentals of law including statutory, regulatory, and judiciary practices are reviewed in the context of HIM including tort and liability. Emphasis is placed on HIPAA regulations. Patient legal rights and responsibilities as related to their healthcare are included, as well as fraud and abuse prevention and compliance.

HEIM 425. Pharmacology Concepts for Health Information Management. 2 Credits.
A fundamental overview of how drugs affect the human body and how the body impacts drugs used in pharmacotherapy. This course is designed to provide the student with the knowledge necessary for managing patient health information specific to medication administration and management. This course also covers pharmacology topics relevant to analyzing medication administration documentation in the patient health record. Prerequisite: Admission to BS in HIM program or instructor permission.

HEIM 435. Clinical Concepts for Health Information Management. 3 Credits.
This course examines ways in which health information professionals apply knowledge of clinical concepts in professional practice. Course content surveys professional practice roles and application of clinical knowledge in daily work, clinical documentation in health records, as well as diseases and conditions affecting the various body systems. Prerequisite: Anatomy and physiology lecture and lab, medical terminology, or instructor consent.

HEIM 450. Introduction to Professional Practices Experiences. 1 Credits.
This course is designed to provide students a better understanding of the various career opportunities in the Health Information Management field and develop skills required for professional environments. The emphasis is on professional behavior for health information management professionals in the workplace. Course content is intended to prepare students for site visits, professional practice experiences, internships, and their future careers.

HEIM 485. Independent Study in Health Information Management. 1-10 Credits.
The content will vary depending on material appropriate to students. May be repeated for additional credit utilizing a variety of projects and special assignments. Prerequisite: Permission of the program director.

HEIM 501. Information Resources and Professional Development. 2 Credits.
This course prepares students to effectively utilize information resources and technology on an academic medical center campus to foster success in the Health Information Management program, professional practice experiences and the health professions. Students will learn to apply software applications, project management strategies, and professional writing and literacy skills. This course has a special emphasis on professionalism, self-awareness, communication, collaboration and critical thinking.

HEIM 510. Professional Practice Experience / Lab I. 1 Credits.
This course provides a laboratory/professional practice experience opportunity for the application of concepts learned through previous coursework in addition to further exploration of advanced health information management topics, interprofessional education, and
HEIM 525. Healthcare Database and Architecture. 3 Credits.
This course is designed to help students understand databases and database management systems. Students will learn to model and understand database design, in conjunction with learning methods to structure data as records, tables, or objects. Students will also learn how query languages are used for searching, sorting, reporting, and other "decision support" activities to best utilize the available data. Along with acquiring knowledge fundamental to management of the electronic health record (EHR), students will develop general technical knowledge to become capable health information professionals. Prerequisite: IST 202, IST 205, or similar course.

HEIM 540. Health Information Systems. 3 Credits.
The increased use of technology to support health data and information continues to evolve. This course introduces students to core topics and concepts in health informatics, emphasizing the implementation and management of health information systems. Students learn the conceptual framework and foundational elements of health informatics, selecting and implementing systems through the Systems Development Life Cycle (SDLC), data and information infrastructure, privacy and security aspects, human-computer interaction frameworks and usability concepts, and current trends and supporting technologies.

HEIM 565. Clinical Terminologies and Classifications I. 4 Credits.
This course introduces classification systems and terminologies used in healthcare and the relationship of these systems to patient care, research, and reimbursement systems. Course content provides study and application of coding guidelines, conventions, and rules of coding systems. Prerequisite: HEIM 435 or permission of the instructor.

HEIM 567. Quality and Performance Improvement in Healthcare. 3 Credits.
This course provides instruction on the principles of quality (QI) and performance improvement (PI) in the context of healthcare. PI drivers, models, techniques, and processes are covered including workflow reengineering. QI program organization, management and effectiveness are addressed. This course also includes content on patient safety, risk management, resource management and assessment of provider competence.

HEIM 570. Introduction to Healthcare Management. 3 Credits.
This course introduces theoretical and applicable concepts of management with an emphasis on managing in healthcare organizations. Students explore traditional management roles as well as leadership concepts. Course content depicts management in the context of a complex stakeholder environment evidenced in the healthcare system of the United States.

HEIM 571. Human Resource Management in Healthcare. 3 Credits.
Through the course students will have the opportunity to obtain working knowledge of human resource management. Technology and the continuing uncertainty of the economy have affected many aspects of human resource management; a number of tasks formerly performed by an HR office are now the purview of department managers. The course will familiarize students with the environment in which HR functions and the tasks involved in managing people. Topics include: social sustainability, culture, vision, staffing needs analysis, recruiting and selecting, training, developing, retaining, motivating, and legal rights of the people within the rapidly changing business environment. Prerequisite: HEIM 570 Healthcare Management.

HEIM 575. Applied Statistics and Research Methods in Healthcare. 3 Credits.
Emphasis is on the statistical analysis of healthcare data. Content includes hospital-based statistics, an introduction to epidemiological concepts, research design and methodology, research ethics and protocol, hypothesis testing, data management, analysis and presentation. Prerequisite: HEIM 525 and MATH 365 or similar.

HEIM 585. Healthcare Reimbursement. 3 Credits.
This course examines complex financial systems within the United States healthcare system. Students explore content related to healthcare reimbursement methodologies and revenue cycle management.

HEIM 635. Clinical Terminologies and Classifications II. 3 Credits.
This course offers continued study of classification systems and terminologies used in healthcare and the relationship of these systems to patient care, research, and reimbursement systems. This course includes an introduction to the role of mapping between the various classification systems, nomenclatures and clinical terminologies used in healthcare. Prerequisite: HEIM 565 or permission of the instructor.

HEIM 661. Management Principles in Health Care. 3 Credits.
Introduction to basic principles of management and education and their application in the current healthcare environment. Course content includes: management, quality issues, budgeting, personnel issues, evaluation and application of management concepts, and educational methodologies. Cross listed with CLS 661 and RESP 661. Prerequisite: Admission to the Health Information Management Program or permission of the instructor.

HEIM 665. Topics in Health Information Management. 2 Credits.
This course will utilize case studies, student discussions and guest presentations to address the latest developments in the management of health information. Students will examine key issues and trends within HIM through a series of seminar topics and presentations.

HEIM 670. Independent Study in Health Information Management. 1-10 Credits.
The content will vary depending on material appropriate to students. May be repeated for additional credit utilizing a variety of projects and special assignments. Prerequisite: Permission of the program director.

HEIM 671. Leadership in Healthcare. 3 Credits.
This course applies key concepts in personal, professional and organizational leadership for healthcare management. Special emphasis is on strategic leadership and planning for enterprise-wide health information strategies. Students will focus on leadership styles with an emphasis on self-discovery and professional development within an ever-changing environment.

HEIM 676. Healthcare Analytics. 3 Credits.
This course covers data-driven, computer-based tools and data analysis techniques that aid decision-making in healthcare. Effective use of data analysis increases the quality of strategic and operative planning and reduces the time used for decision-making processes. The course focuses on data-driven techniques and tools including such topics as medical coding systems, database fundamentals, business performance monitoring (managerial dashboards), and data mining applied to the healthcare industry. A number of data mining and predictive modeling approaches are discussed to address specific issues in healthcare. Prerequisite: HEIM 575.

HEIM 679. Information Governance in Healthcare. 3 Credits.
This course examines the role of health information managers as facilitators and champions of information governance in healthcare organizations. Course content includes an exploration of the topic of
information governance, as well as introduces strategic considerations for enterprise processes, policies and procedures, standards, and metrics to support information governance efforts. Information is considered throughout the course as a strategic asset for organizational optimization. External users of information and related implications are also discussed.

HEIM 680. Management Internship. 3 Credits.
This is a four-week internship that provides the student with a management capstone experience with the activities and responsibilities commonly performed by the health information administrator. Students receive "hands-on" managerial experience. The internship may take place in any type of healthcare setting throughout the healthcare continuum and industry. Students interpret classroom theory into actual planning, organizing, assessing, and controlling situations in a health information department or related administrative or technical environment. Students are responsible for all costs including room, board, and transportation. Management internship sites are selected based upon such factors as: HIM experience, credentials of the student, expressed wishes from their internship choices. Prerequisite: Successful completion of all HIM professional coursework and/or permission of the instructor.

HEIM 681. Management Practicum. 3 Credits.
This practicum experience provides the student with a management capstone experience in the activities and responsibilities of the health information administrator. The specific practicum topics are selected based on the experience and credentials of the student. Prerequisite: Successful completion of all HIM professional coursework and/or permission of the instructor.

Bachelor of Science in Health Information Management

On-Campus Bachelor's Degree Program
In this bachelor's degree program, students work with the latest health information technology at the region's top academic health institution: the University of Kansas Medical Center (KUMC) in Kansas City, Kansas. Students typically enter this program after completing two years of prerequisite course work from a qualified accredited institution; once at KUMC, students complete their final 2 years of study. Graduates of this program are well-versed in managing health data and information, as well as managing people, processes, and information systems related to health data and information. For more information, please refer to the program website (http://www.kumc.edu/school-of-health-professions/health-information-management/bachelors-degree-for-undergraduates.html).

Online Bachelor's Degree-Completion Program
KU offers an online bachelor's degree-completion program for working professionals with the Registered Health Information Technician (RHIT) credential, credentialed professionals in a related health profession, military service members, and veterans. This program assists those who want to advance to a bachelor's degree in health information management. As an online program, it offers convenience and flexibility for students. For more information, please refer to the program website (https://www.kumc.edu/school-of-health-professions/academics/departments/health-information-management/academics/bachelors-degree-completion-program-(online-rhit-to-riha-).html).

Online Minor in Healthcare Management
KU offers a minor in healthcare management which introduces students to relevant topics for health care managers. Students complete coursework focused on health care administration, the United States health care system, health information privacy and security, finance and reimbursement concepts, and quality and performance improvement in health care. Students also gain knowledge and experience in health information systems and data management. Courses are offered online. For more information, please refer to the program website (https://www.kumc.edu/school-of-health-professions/academics/departments/health-information-management/academics/minor-in-health-care-management.html).

Prior to entering the program, students must complete two (2) years of undergraduate college course work – either from the KU Lawrence campus or another regionally accredited university or community college – with a total of at least 60 credit hours. No grade lower than a "C" is accepted in any prerequisite course. An overall grade point average of 2.5 (on a 4.0 scale) for college course work is required to apply.

Changes in health care require frequent curriculum content changes and course revisions. All prospective students should obtain ongoing advising from the department (http://www.kumc.edu/school-of-health-professions/health-information-management.html) to ensure the student's transcript meets current prerequisites. Additional advising is available at the Undergraduate Advising Center (http://advising.ku.edu/) in Lawrence.

KU Students: Students on the Lawrence campus should declare "pre health information management" as their major. Please contact the academic advisor for the School of Health Professions at the Undergraduate Advising Center (http://advising.ku.edu/) for advising.

Transfer Students: Students from other institutions need to verify that prerequisites are completed. Using the CredTran system (https://credittransfer.ku.edu/), students can verify equivalent course work is transferable and will meet the program requirements. Please contact the program advisor at him@kumc.edu with questions or for assistance in transferring to KU.

International students, or those for whom English is a second language, may have additional requirements relative to language proficiency, residency, and citizenship status. See more information. (http://www.kumc.edu/school-of-health-professions/information-for-international-applicants.html)

A background check is also required. Prospective students should review the program requirements and the complete list of application requirements on the department's website (https://www.kumc.edu/school-of-health-professions/academics/departments/health-information-management/academics.html).

Prerequisites

NOTE: Students may still apply if currently enrolled or working toward prerequisite course work. However, all prerequisites must be completed before starting the program.

Prospective students should visit the program website him.kumc.edu for the latest information.

Acceptance to this minor is subject to review. To request a declaration for the minor in healthcare management please visit the program website him.kumc.edu (http://him.kumc.edu).

The minor in healthcare management provides students with an in-depth understanding of the U.S. health care delivery system, with special emphasis on legal, regulatory and reimbursement issues. Students are introduced to relevant topics for healthcare managers and will be trained in privacy, security and confidentiality practices, and related requirements for health care professionals.

The minor requires students to complete 18 hours (6 courses) with a “C” or higher in all of the courses.

**IMPORTANT NOTE:** Courses are offered online.

The on-campus program begins each fall on the KU Medical Center campus in Kansas City, KS. and culminates in a 4-week capstone professional experience at the end of the spring semester of the second year. The online program begins both fall and spring semesters with individualized course plans.

Program requirements and course offerings are subject to change. Prospective students should visit the program website (http://www.kumc.edu/school-of-health-professions/health-information-management.html) for the latest information.

#### Total Hours

**60**

1. Students may choose any elective fulfilling the KU Core Goal 3, Natural Sciences (https://kucore.ku.edu/courses/).
2. BIOL 241 or BIOL 242 are lab courses for BIOL 240 and are recommended but not required.
3. BIOL 247 is the lab course for BIOL 246 and is recommended but not required.
4. KU requires students to take MATH 101 before taking ACCT 200; transfer students may not need to complete a MATH 101 equivalent if the accounting course they took elsewhere does not require MATH 101/101 equivalent.
5. Students may choose any elective fulfilling the KU Core Goal 4, Learning Outcome 2 (https://kucore.ku.edu/courses/).
Nuclear Medicine Technology

KU’s certificate program in nuclear medicine technology is a 12-month accredited program which prepares technologists to inject radiopharmaceuticals and use highly technical cameras and computers in a clinical setting. The program is a collaboration with the Department of Radiology and The University of Kansas Hospital together with the KU School of Health Professions at KU Medical Center in Kansas City, Kan.

A certificate from the University of Kansas is awarded to the student upon successful completion of the program. Graduates are eligible to take the national registry examinations given by the American Registry of Radiologic Technologists and/or the Nuclear Medicine Technology Certification Board.

More about this profession can be found on the program’s website (http://nuclearmedicine.kumc.edu/).

Courses

**NMED 70. Introduction to Nuclear Medicine and Medical Law and Ethics for the Imaging Professional. 3 Credits.**
An introductory overview of the field of nuclear medicine technology with includes medical terminology for clinical nuclear medicine, patient and nursing skills including phlebotomy and vital signs, departmental organization and function, and a basic overview of applied mathematical and statistical analysis used in clinical nuclear medicine. This course will also introduce to the imaging profession the legal aspects to patient care regarding patient rights, ethical theories, risk management, quality patient care. The student will participate in group discussion. Prerequisite: Acceptance into the Nuclear Medicine Training Program

**NMED 71. Nuclear Chemistry and Physics. 2 Credits.**
This course is designed to present the theories of nuclear chemistry and physics including theory of Bohr’s atom, radiation production, decay, physical half life and interaction with matter, chemical reactions and equations, review of periodic chart of elements and trilinear chart of nuclides. Prerequisite: College Physics and College Chemistry along with acceptance into the Nuclear Medicine Training Program

**NMED 72. Radiopharmacy I. 3 Credits.**
This course is designed to present the aspects of radiopharmaceuticals including safety and handling, methods of localization, pharmacology, dose calculation and record keeping, methods of production, and quality control. The course will begin to identify the clinical uses of radiopharmaceuticals as this course will be a prerequisite for Radiopharmacy II. Prerequisite: Acceptance into the Nuclear Medicine Training Program

**NMED 73. Clinical Procedures I. 3 Credits.**
This course is taught in modules corresponding to organ systems of the body from a technical point of view. Each module includes: review of anatomy and physiology, cross-sectional anatomy, clinical indications for nuclear imaging, nuclear imaging procedures, including radiopharmaceuticals for current clinical practices, image interpretation, and review. Prerequisite: Acceptance into the Nuclear Medicine Training Program

**NMED 74. Radiation Biology and Protection. 1 Credits.**
This course is designed to provide the student with an understanding of the effects of radiation on the human body at the cellular, organ and whole body levels including late of effects of radiation exposure and the risk to benefits ratio. This course will provide the students with current federal and state regulations in regards to safe handling, disposal, record keeping, and licensing for the clinical use of radiation. Prerequisite: Acceptance into the Nuclear Medicine Training Program

**NMED 75. Clinical Internship I. 6 Credits.**
Through supervised learning situations in a clinical nuclear medicine imaging department the student will gain knowledge and be required to demonstrate competence in specific imaging of nuclear medicine procedures, radiopharmaceutical distribution, imaging instrumentation, patient safety, occupational safety, and quality control practices in the clinical setting. Prerequisite: Acceptance into the Nuclear Medicine Training Program

**NMED 80. Nuclear Instrumentation, Medical Informatics and Quality Assurance. 3 Credits.**
This course is designed to familiarize the students with basic non-imaging and imaging with nuclear medicine equipment in the clinic. This course will include basic principles of operation, system configuration and performance characteristics of Scintillation cameras and PET systems, computers and quality control and assurance as required by manufacturer and regulatory agencies. It will introduce the student to various types of medical information systems and their uses in the medical imaging. Prerequisite: Acceptance into the Nuclear Medicine Training Program

**NMED 82. Radiopharmacy II. 1 Credits.**
This course is the advanced course to Radiopharmacy I. The students will have an understanding of the radiopharmaceuticals that are used in the clinical nuclear medicine department. This course will also cover monoclonal, polyclonal, peptides, PET, therapeutic radiopharmaceuticals, pharmacology, as well as advancement in research that is current on radiopharmaceuticals to be used in the nuclear clinical setting. Prerequisite: Radiopharmacy I

**NMED 83. Clinical Procedures II. 3 Credits.**
This course is taught in modules corresponding to organ systems of the body from a technical point of view. It also covers PET and CT. Each module includes: review of anatomy and physiology, cross-sectional anatomy, clinical indications for nuclear imaging, nuclear imaging procedures, including radiopharmaceuticals for current clinical practices, image interpretation and review. Prerequisite: Clinical Procedures I.
NMED 84. Clinical Internship II. 10 Credits.
Through supervised learning situations in a clinical nuclear medicine imaging department the student will gain knowledge and be required to demonstrate competence in specific imaging of nuclear medicine procedures, radiopharmaceutical distribution, imaging instrumentation, patient safety, occupational safety, and quality control practices in the clinical setting. Prerequisite: Clinical Internship I

NMED 85. Research Methods and Health Administration. 1 Credits.
This course is designed to familiarize the student in research methodology and advances in nuclear medicine for future developments. This course will also demonstrate the phases of research and research different divisions of the research cycle. The second portion of the class will familiarize the student with the administration techniques of health management. Health management will include billing, coding and budget and equipment selection processes of maintaining a nuclear medicine department. Prerequisite: Acceptance into the Nuclear Medicine Training Program.

NMED 90. Seminar. 3 Credits.
This course is designed to prepare the student for national boards in the field of nuclear medicine technology. The instructor and student will be responsible for in-class review of nuclear clinical procedures, nuclear instrumentation and quality assurance, radiopharmacy, radiation protection, and patient care. Students will be required to attend guest lectures and video conferences. Prerequisite: Clinical Procedures I and II, Radiopharmacy I and II, Nuclear Instrumentation and Quality Assurance, Radiation Biology and Protection and Introduction to Nuclear Medicine.

NMED 91. Clinical Internship III. 5 Credits.
Through supervised learning situations in a clinical nuclear medicine imaging department the student will gain knowledge and be required to demonstrate competence in specific imaging of nuclear medicine procedures, radiopharmaceutical distribution, imaging instrumentation, patient safety, occupational safety, and quality control practices in the clinical setting. Prerequisite: Clinical Internship II

Certificate in Nuclear Medicine Technology

KU's certificate program in nuclear medicine technology is a 12-month accredited program which prepares technologists to inject radiopharmaceuticals and use highly technical cameras and computers in a clinical setting. The program is a collaboration with the Department of Radiology and The University of Kansas Health System together with the KU School of Health Professions at KU Medical Center in Kansas City, Kansas.

A certificate from the University of Kansas is awarded to the student upon successful completion of the program. Graduates are eligible to take the national registry examinations given by the American Registry of Radiologic Technologists and/or the Nuclear Medicine Technology Certification Board.

More about this profession can be found on the program's website (https://www.kumc.edu/school-of-health-professions/academics/departments/respiratory-care-and-diagnostic-science/academics/nuclear-medicine-technology-certificate-program.html).

Applicants must currently be one of the following registered professionals or possess a bachelor's degree in a health science field such as biology or chemistry:

- Registered Radiology Technologist (ARRT)
- Diagnostic Medical Sonographer (ARDMS)
- Diagnostic Cardiac Sonographer (ARDMS)
- Certified Medical Technologist
- Registered Nurse
- Associate's degree in a medical imaging profession with current registry or licensure

Credentials or transcripts not from an accredited U.S. academic institution require evaluation by the KU Office of International Student Services before they can be accepted for eligibility.

The applicant may be a registry candidate but must pass the registry before entrance into the program.

Prerequisites
The following college courses must be completed to be eligible for this program:

- College algebra
- College English
- Computer science
- Chemistry with lab
- General physics
- Medical terminology
- Humanities course
- Social sciences course
- Human anatomy and human physiology
- Human anatomy or human physiology lab
- Speech/Oral communication

An overall grade point average of 2.5 (on a 4.0 scale) is required. In addition, student transcripts must document an individual course grade of no less than "C" on each prerequisite course (above).

Health and Physical Requirements
Good physical and mental health are essential to the field of nuclear medicine. Specifically, excellent visual acuity is necessary. The student must also have manual dexterity, sufficient hearing and speech, and good physical coordination in positioning patients and operating nuclear medicine equipment. Students must have full utility of both arms, hands and fingers in order to perform examinations and operate equipment. The ability to handle extremely heavy objects is required.

Background Check/Drug Screening
The Joint Commission requires all incoming students to pay for a background check (http://www.kumc.edu/school-of-health-professions/background-checks-and-drug-screening-for-students.html). Applicants will be asked to provide information and make the payment once officially accepted into the program. A drug screening may also be required.

For more information, please see the School of Health Professions.
background check information. (http://www.kumc.edu/school-of-health-proessions/background-checks-and-drug-screening-for-students.html)

International Students
An applicant is considered an international student if he or she requires a visa, or currently resides in the U.S. with non-immigrant status, or currently resides in the U.S. while applying for permanent residency. Additional requirements and documentation, such as proof of English language proficiency, are required for international students to become eligible for KU programs. Please review the information for international students (http://www.kumc.edu/school-of-health-professions/information-for-international-applicants.html) before applying.

Grade-point average and other requirements also apply. Prospective students should review the complete program eligibility requirements and application instructions on the program’s website (http://nuclearmedicine.kumc.edu).

The educational programs of the University of Kansas reserve the right to make changes without prior notice to any of the polices stated in this document.

The student spends 40 hours a week in the 12-month program, with time divided between classroom courses and clinical instruction. The Nuclear Medicine Division of the Department of Radiology at KU Medical Center performs a wide variety of diagnostic and therapeutic exams. The student will receive experience in nuclear pharmacy, patient care, imaging of bone, kidney, brain, lung, GI tract and cardiac function, Positron Emission Tomography and an overview of computed tomography. More details about the program curriculum can be found on the program’s website (https://www.kumc.edu/school-of-health-professions/academics/departments/respiratory-care-and-diagnostic-science/academics/nuclear-medicine-technology-certificate-program.html).

A certificate from the University of Kansas is awarded to the student upon successful completion of the program. Graduates are eligible to take the national registry examinations given by the American Registry of Radiologic Technologists and/or the Nuclear Medicine Technology Certification Board.

Nurse Anesthesia

Nurse anesthesia is one of many academic programs of the KU School of Health Professions (http://healthprofessions.kumc.edu) and is located on the campus of the KU Medical Center (http://www.kumc.edu) in Kansas City, Kan.

Beginning with the class entering summer 2016, the entry-level clinical doctorate in nurse anesthesia offered at KU is the Doctor of Nurse Anesthesia Practice, replacing the Doctor of Nursing Practice degree. The program draws upon the extraordinary academic and clinical resources offered by the University of Kansas Medical Center (http://www.kumc.edu) and The University of Kansas Health System (http://www.kumed.com), along with the many outstanding clinical affiliate sites (https://www.kumc.edu/school-of-health-professions/academics/departments/nurse-anesthesia-education/academics/clinical-education.html) to enhance the student's learning opportunities.

Program Philosophy

The program is dedicated to helping its graduates achieve full professional competence. The practice of nurse anesthesia requires a strong nursing foundation. The nurse anesthetist must be able to interpret the multiple science disciplines that contribute to nurse anesthesia professional education.

The complexity of contemporary anesthesia practice requires this integration. The nurse anesthetist must be able to practice competently and apply intelligently the humanistic, scientific, and technical skills of the profession.

Mission and Vision

The mission of the KU nurse anesthesia program is to produce an exemplary nurse anesthesia provider fully qualified to deliver safe, competent anesthesia services to the public. The KU Department of Nurse Anesthesia Education, in concert with the broad overall missions of the university, School of Health Professions, and Office of Graduate Studies provides quality graduate education, specific to the practice of nurse anesthesia, based on sound research in a scholarly academic and technologically superior clinical environment.

The vision of the program is to produce highly competent graduates, dedicated to serve the anesthesia health care needs of the public who will be recognized as national leaders and role models for nurse anesthesia education.

For more details, please visit the department’s website (http://www.kumc.edu/school-of-health-professions/nurse-anesthesia-education.html).

Courses

NURA 800. Professional Aspects of Anesthesia. 3 Credits.
This course includes orientation to the profession of nurse anesthesia. The student will gain an understanding of the anesthesia department management and organization. The history of anesthesia will be discussed. Ethical, psychological, professional adjustments and legal responsibilities of the nurse anesthetist will be presented.

NURA 801. Introduction to Clinical Practicum. 1 Credits.
Students will engage in clinical practice that involves introduction to basic anesthesia skills. Emphasis is given to patient assessment, anesthetic planning and management of the patient population of low risk categories. The course includes introduction to clinical problem solving and “call” experiences that address the trauma patient and emergency surgical/ anesthetic interventions for pathological states. Prerequisite: Permission of Instructor.

NURA 805. Clinical Anatomy. 4 Credits.
An intensive study of the major anatomical systems and regions of the body which have clinical significance for anesthetists and others. Particular attention devoted to the respiratory, cardiovascular, and nervous systems. Regional topics include the anatomy of the head, neck, vertebral column, thorax, axilla, and femoral triangle. Involves both...
lectures and cadaver dissection, plus appropriate models, x-ray films, and audiovisual materials. Prerequisite: Admission to the Nurse Anesthesia Program or permission of instructor.

**NURA 806. Advanced Physiology. 4 Credits.**
A course designed to lead to an advanced comprehension of the physiology of organ systems in the human in both cellular and organ processes. Physiology subject matter relevant to clinical health sciences include membrane transport, muscle, cardiovascular, respiratory, renal, water and electrolyte balance, gastrointestinal, and endocrine physiology as well as neurophysiology. Cellular mechanisms include the structure and function of ion channels and pumps, mechanisms of calcium regulation, excitation-coupling processes and mechanisms of oxidative cell damage and apoptosis. Prerequisite: Permission of instructor.

**NURA 808. Health Care Policy for Advanced Nursing Practice. 2 Credits.**
Students will utilize current clinical and legislative issues to examine ways to conceptualize the issues into social policy contexts. Assignments throughout the course are employed to both demonstrate and engage students in leadership and structural systems theories to effect change in healthcare policy. The course includes social policy development across the lifespan, leadership styles which influence change, and the implementation and analysis of policy solutions. Prerequisite: Successful completion of first three semesters of Doctor of Nurse Anesthesia Practice curriculum.

**NURA 809. Adv Pathophysiology. 3 Credits.**
A course designed to lead to advanced comprehension of pathophysiologic processes in the human body. Course content will build upon prior nursing education and professional experiences to provide a scientific basis for clinical application related to anesthetic planning and implementation. The intent of this course is to prepare the nurse anesthesia student to engage in critical thinking and problem-solving skills pertinent to the application of best practices involving anesthesia considerations for patients with pathological conditions. Prerequisite: NURA 806 Advanced Physiology.

**NURA 811. Advanced Theory in Anesthesia I. 3 Credits.**
This is the first of five successive courses relative to the didactic study of the art and science of nurse anesthesia. Students will acquire the knowledge base pertinent to the perioperative anesthetic management of ophthalmology and otorhinolaryngology procedures and patients with alterations in the endocrine system. Students enhance their critical thinking, problem-solving skills and ability to synthesize didactic information to the clinical environment. In addition, students will be required to engage in analysis of currently published research to identify "best practices" based on research evidence. Prerequisite: Permission of Instructor.

**NURA 812. Advanced Theory in Anesthesia II. 3 Credits.**
This is the second of five successive courses relative to the didactic study of the art and science of nurse anesthesia. Students will acquire the knowledge base pertinent to the perioperative anesthetic management of gastrointestinal and hepatobiliary disorders, bariatrics, robotic/ laparoscopic procedures, otorhinolaryngology disorders, and renal disorders. Students enhance their critical thinking, problem-solving skills and ability to synthesize didactic information to the clinical environment. In addition, students will be required to engage in analysis of currently published research to identify "best practices" based on research evidence. Prerequisite: Permission of Instructor.

**NURA 813. Advanced Theory in Anesthesia III. 2 Credits.**
This is the third of five successive courses relative to the didactic study of the art and science of nurse anesthesia. Students will acquire the knowledge base pertinent to the perioperative anesthetic management of obstetrical, neonatal and pediatric patients. Students enhance their critical thinking, problem-solving skills and ability to synthesize didactic information to the clinical environment. In addition, students will be required to engage in analysis of currently published research to identify "best practices" based on research evidence. Prerequisite: Permission of Instructor.

**NURA 814. Advanced Theory in Anesthesia IV. 3 Credits.**
This is the fourth of five successive courses relative to the didactic study of the art and science of nurse anesthesia. Students will acquire the knowledge base pertinent to the perioperative anesthetic management of neurosurgical, cardiovascular, thoracic, and transplantation patients. Students enhance their critical thinking, problem-solving skills and ability to synthesize didactic information to the clinical environment. In addition, students will be required to engage in analysis of currently published research to identify "best practices" based on research evidence. Prerequisite: Permission of Instructor.

**NURA 815. Advanced Theory in Anesthesia V. 3 Credits.**
This is the fifth of five successive courses relative to the didactic study of the art and science of nurse anesthesia. This is the final theory course of didactic study for the art and science of nurse anesthesia. Students will acquire the advanced knowledge pertinent to the perioperative anesthetic management of geriatric patients and patients undergoing orthopedic procedures. Students will enhance their critical problem-solving skills and ability to analyze/synthesize didactic anesthesia content for application to clinical practice. In addition, students will be required to review and engage in analysis of contemporary research to identify "best practices." The course content is provided as web-based and instructor facilitated learning. Prerequisite: Permission of Instructor.

**NURA 820. Information Systems and Data Management in Anesthesia. 1 Credits.**
Information systems, data management concepts, and their applications will be explored. This will enable the doctoral prepared nurse anesthetists to utilize resources to facilitate quality improvement, increase patient safety through outcome measurements, and improve resource utilization in the perioperative period. Prerequisite: Permission of instructor.

**NURA 821. Advanced Practicum in Anesthesia I. 2 Credits.**
This is the first of six courses relative to the application of the art and science of nurse anesthesia. Each section is designed to address specific surgical categories and the relevant patient care needs and risks. Completion of each course requires acquisition and refinement of clinical skills. Students will demonstrate progression in cognitive, psychomotor and affective skills appropriate to a professional nurse anesthetist. Prerequisite: Permission of Instructor.

**NURA 822. Advanced Practicum in Anesthesia II. 2 Credits.**
This is the second of six courses relative to the application of the art and science of nurse anesthesia. Each section is designed to address specific surgical categories and the relevant patient care needs and risks. Completion of each course requires acquisition and refinement of clinical skills. Students will demonstrate progression in cognitive, psychomotor and affective skills appropriate to a professional nurse anesthetist. Prerequisite: Permission of Instructor.

**NURA 823. Advanced Practicum in Anesthesia III. 2 Credits.**
This is the third of six courses relative to the application of the art and science of nurse anesthesia. Each section is designed to address specific surgical categories and the relevant patient care needs and risks. Completion of each course requires acquisition and refinement of clinical skills. Students will demonstrate progression in cognitive, psychomotor, and affective skills appropriate to a professional nurse anesthetist. Prerequisite: Permission of Instructor.
NURA 831. Advanced Chemistry and Physics. 2 Credits.
Chemical and physical principles including states and properties of matter, laws governing the behavior of gases, flow and vaporization, oxidation and combustion; principles of electricity and electrical safety; and chemical properties and structure-activity relationships as a foundation for pharmacology. Course will also cover pertinent areas of organic chemistry. Prerequisite: Permission of instructor.

NURA 833. Basic Principles of Anesthesia Practice. 3 Credits.
This course introduces students to the introductory principles and theories regarding the art and science of anesthesia practice. Students will develop a conceptual basis for practice gained through a systems approach applied to development of anesthesia care based upon a strong foundation in physical assessment, physiological monitoring, applications of pharmacology, anesthesia systems, physical and chemical basics. Prerequisite: Admission to the nurse anesthesia program or permission of instructor.

NURA 835. Advanced Physical Assessment and Patient Care Technology for Anesthesia. 3 Credits.
This course is designed to develop and refine the physical assessment skills of the practitioner as well as enhance their understanding, interpretation, and application of laboratory measurements and advanced diagnostic procedures in the perioperative setting. The course is arranged in a systems approach with emphasis placed on the cardiovascular, pulmonary, renal, neurological, and endocrine. Diagnostic procedures and laboratory values specific to each of these systems and their relevance to anesthesia principles and practice will be discussed. The selection of appropriate monitoring devices specific to each system related to individual patient needs will be discussed. Prerequisite: Permission of instructor.

NURA 839. Regional Anesthesia/Pain Management. 3 Credits.
Includes study of conductive anesthesia techniques, pharmacokinetics of local anesthetics, anatomical placement, and physiologic response. The course is inclusive of acute and chronic pain management techniques.

NURA 880. Advanced Topics: ____. 1-4 Credits.
Special study allowing a student to pursue a particular subject through readings, directed assignments, and conferences with a faculty member. Prerequisite: Consent of instructor.

NURA 889. Introduction to Theory, Research Methods and Evidence-Based Practice. 3 Credits.
Methods of theory development and analysis provide the foundation for the study of concepts and theories from nursing, anesthesiology and related scientific disciplines. Historical, scientific and philosophical frameworks relevant to the theoretical basis of nurse anesthesia are explored. The fundamentals of research methodology are examined including elements of design, measurement, statistical analysis and dissemination. The relationships between research, theory and practice are developed to create an awareness of how "best practice" resources support professional growth, competence and quality. Prerequisite: Permission of instructor.

NURA 892. Applied Statistics and Analysis in Health Care. 3 Credits.
Concepts include graduate-level statistical reasoning, statistical principles, and the role as the scientific basis for clinical and public health research and practice. Content includes hospital-based statistics, introduction to epidemiology, relationship of research design to statistical methods, research ethics/protocol, hypothesis testing, and data management. Prerequisite: Permission of instructor.

NURA 901. Evaluation and Application of Evidence-Based Practice in Anesthesia I. 1 Credits.
First of four courses in which the student will use analytic methods to critically appraise existing literature from nurse anesthesiaology and other disciplines to determine and implement the best evidence for practice. An exploration of the design, implementation and evaluation of quality improvement methodologies will lead the student to an appreciation of the safe, effective, efficient and timely delivery of patient-centered anesthesia care. Previous student knowledge in the domain of research analysis will be applied to the design of evidence-based interventions in current anesthesia practice. Prerequisite: Permission of instructor.

NURA 902. Evaluation and Application of Evidence-Based Practice in Anesthesia II. 1 Credits.
Second of four courses in which the student will use analytic methods to critically appraise existing literature from nurse anesthesiology and other disciplines to determine and implement the best evidence for practice. An exploration of the design, implementation and evaluation of quality improvement methodologies will lead the student to an appreciation of the safe, effective, efficient and timely delivery of patient-centered anesthesia care. Previous student knowledge in the domain of research analysis will be applied to the design of evidence-based interventions in current anesthesia practice. Prerequisite: Permission of instructor.

NURA 903. Evaluation and Application of Evidence-Based Practice in Anesthesia III. 1 Credits.
Third of four courses in which the student will use analytic methods to critically appraise existing literature from nurse anesthesiaology and other disciplines to determine and implement the best evidence for practice. An exploration of the design, implementation and evaluation of quality improvement methodologies will lead the student to an appreciation of the safe, effective, efficient and timely delivery of patient-centered anesthesia care. Previous student knowledge in the domain of research analysis will be applied to the design of evidence-based interventions in current anesthesia practice. Prerequisite: Permission of instructor.

NURA 904. Evaluation and Application of Evidence-Based Practice in Anesthesia IV. 1 Credits.
Fourth of four courses in which the student will use analytic methods to critically appraise existing literature from nurse anesthesiology and other disciplines to determine and implement the best evidence for practice. An exploration of the design, implementation and evaluation of quality improvement methodologies will lead the student to an appreciation of the safe, effective, efficient and timely delivery of patient-centered anesthesia care. Previous student knowledge in the domain of research analysis will be applied to the design of evidence-based interventions in current anesthesia practice. Prerequisite: Permission of instructor.

NURA 912. Leadership in Nurse Anesthesia I. 1 Credits.
First of two courses which focus the students on leadership projects which were designed in NURA 800, Professional Aspects of Anesthesia. Students will apply a variety of leadership theories as they conduct the projects with nurse anesthesia faculty supervision. At the conclusion of NURA 913, students will evaluate the projects and determine if goals were met, recognize which principles of leadership theory(ies) were utilized in the projects, and prepare an action plan for revisions. Presentations and self-analysis of the projects will be posted as VOPPTs on the ANGEL course site. Prerequisite: Permission of instructor.

NURA 913. Leadership in Nurse Anesthesia II. 1 Credits.
Second of two courses which focus the students on leadership projects which were designed in NURA 800, Professional Aspects of Anesthesia. Students will apply a variety of leadership theories as they conduct the projects with nurse anesthesia faculty supervision. At the conclusion of NURA 913, students will evaluate the projects and determine if goals were met, recognize which principles of leadership theory(ies) were utilized in the projects, and prepare an action plan for revisions. Presentations and
self-analysis of the projects will be posted as VOPPTs on the ANGEL course site. Prerequisite: Permission of instructor.

**NURA 924. Advanced Practicum IV. 2 Credits.**
Fourth of six clinically-based courses related to the art and science of advanced nurse anesthesia practice and care of patients with specialized anesthesia care. The courses are divided into sequential clinical practicum related to diverse patient types in both normal and abnormal states and for those requiring anesthesia care in specialized areas (cardiothoracic, obstetrics, neurosurgical, etc.) Participation in case presentations may be required as warranted by clinical events. An opportunity is provided to apply advanced clinical decision making skills and evidence-based research to the assessment, management, and evaluation of complex health care problems of a diverse patient population in the perianesthesia care setting. Prerequisite: Permission of instructor.

**NURA 925. Advanced Practicum V. 2 Credits.**
Fifth of six clinically-based courses related to the art and science of advanced nurse anesthesia practice and care of patients with specialized anesthesia care. The courses are divided into sequential clinical practicum related to diverse patient types in both normal and abnormal states and for those requiring anesthesia care in specialized areas (cardiothoracic, obstetrics, neurosurgical, etc.) Participation in case presentations may be required as warranted by clinical events. An opportunity is provided to apply advanced clinical decision making skills and evidence-based research to the assessment, management, and evaluation of complex health care problems of a diverse patient population in the perianesthesia care setting. Prerequisite: Permission of instructor.

**NURA 926. Advanced Practicum VI. 2 Credits.**
Sixth of six clinically-based courses related to the art and science of advanced nurse anesthesia practice and care of patients with specialized anesthesia care. The courses are divided into sequential clinical practicum related to diverse patient types in both normal and abnormal states and for those requiring anesthesia care in specialized areas (cardiothoracic, obstetrics, neurosurgical, etc.) Participation in case presentations may be required as warranted by clinical events. An opportunity is provided to apply advanced clinical decision making skills and evidence-based research to the assessment, management, and evaluation of complex health care problems of a diverse patient population in the perianesthesia care setting. Prerequisite: Permission of instructor.

**NURA 980. DNAP Senior Scholarly Project. 1-6 Credits.**
The DNAP Senior Scholarly Project is a merger of students’ accumulated knowledge base, didactic and clinical, relevant to the practice of nurse anesthesia in the Doctor of Nurse Anesthesia Practice (DNAP) curriculum. The Senior Scholarly Project requires that a practice-focused problem, issue, or concern be identified and examined in depth. The project will include application of an innovation or intervention suitable to an area of focus (e.g., organizational leadership, clinical practice, education, administration, etc.) that involves the development, evaluation, and dissemination of the project findings to a targeted audience. The DNAP Senior Scholarly Project is designed in a series of phases. Each phase is to be completed during an enrolled semester. Continuous enrollment in the project is required during the final year of the DNAP course of study. During each semester of enrollment in the DNAP Senior Scholarly Project, students will participate in project committee reviews lead by the assigned Advisory Committee Chair relative to the progression and completion of the project. The DNAP Senior Scholarly Project committee and the student share joint responsibility for the facilitation, progression, and completion of the scholarly project. Prerequisite: NURA 889, NURA 892, PRVM 800.

# Doctor of Nurse Anesthesia Practice

The doctorate in nurse anesthesia practice is a comprehensive 36-month program in which registered nurses receive extensive education in both the academic and clinical components of nurse anesthesia. Students learn to administer anesthesia to all patient populations in a variety of clinical settings using all current anesthesia techniques, and graduates are prepared to take the national certification examination required to become Certified Registered Nurse Anesthetists. The program is fully accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (https://www.coacnrna.org/), and the Kansas State Board of Nursing (http://www.ksbn.org/).

## Goals of the program

This doctorate program prepares the registered nurse to become a nurse anesthesia practitioner with the capability to deliver competent nurse anesthesia services, engage in research, and assume leadership roles in the profession. Strongly rooted in science, the program is designed for the most ambitious and brightest professionals. The basic science and clinical education opportunities help graduates succeed as advanced practice nurses with increased esteem, independence, and earning power.

- **Academic**
  
  Obtain an advanced body of specialized knowledge necessary to integrate didactic information and clinical data and formulate a comprehensive individualized care plan.

- **Clinical**
  
  Demonstrate ability to plan and administer a safe and physiologic anesthetic based on knowledge and synthesis of anesthetic principles and basic science study.

- **Research**
  
  Demonstrate an appreciation for the role, nature and conduct of research modalities and their application to practice and professional growth.

- **Professionalism**
  
  Integrate ethical, legal and cultural considerations with personal and professional value systems in nurse anesthesia.

## Faculty and Clinical Instruction

**Our full-time CRNA faculty,** with extraordinary levels of experience as nurse anesthetists, serve as advisors, teach classes and supervise students in the clinical setting. Anesthesiologists and CRNAs at The University of Kansas Hospital provide advanced clinical instruction. The specialty areas in which KU anesthesiologists have completed fellowships is diverse and impressive. Adjunct faculty at additional affiliate sites (https://www.kumc.edu/school-of-health-professions/academics/departments/nurse-anesthesia-education/academics/clinical-education.html) provide invaluable clinical instruction.

The Department of Nurse Anesthesia Education (http://na.kumc.edu/) is part of the KU School of Health Professions (http://healthprofessions.kumc.edu/) located on the KU Medical Center campus in Kansas City, KS.
Applications for this program are accepted online. Detailed instructions on how to apply are posted on the KU Department of Nurse Anesthesia (http://www.kumc.edu/school-of-health-professions/nurse-anesthesia-education/prospective-students/how-to-apply.html) website. The application period begins March 15 and closes July 15 each year. All prerequisites must be completed August first of the application year.

Students who are Kansas residents have the opportunity to apply for early decision. The early-decision application opens March 15 and closes May 15. Decisions about these interviews will be made in July each year.

The early decision application option includes all of the standard eligibility requirements (http://www.kumc.edu/school-of-health-professions/nurse-anesthesia-education/prospective-students/eligibility-and-requirements.html), as well as the following: Kansas residency is required, all five prerequisite courses must be completed at the time of application, and early-decision candidates must have all application materials to KU by the first of June. Please see more information here (http://www.kumc.edu/school-of-health-professions/nurse-anesthesia-education/prospective-students/early-decision-application-option.html), as well as our frequently asked questions regarding early decision (http://www.kumc.edu/school-of-health-professions/nurse-anesthesia-education/frequently-asked-questions.html#early). The Office of the Registrar has full residency requirements (https://www.kumc.edu/academic-and-student-affairs/departments/registars-office/tuition-and-fees/residency-for-tuition-and-fee-purposes.html).

Admission to the program is increasingly competitive. Decisions about interviews will be made in the fall of each year. Qualified applicants who are invited to attend a personal interview must attend their interview to be considered. Applicants receive notification of their acceptance to the program in November of each year. The program begins the first Tuesday after Memorial Day of each year.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution is required and must be documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts for all course work from all institutions are required upon acceptance into the program. A bachelor's degree in an appropriate discipline such as nursing, respiratory care, biological sciences, health care administration, pharmacology, psychology, or sociology, is required. A bachelor's degree in nursing is not required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative grade-point average requirement.

- Applicants must possess a cumulative grade-point average of at least a 3.0 on a 4.0 scale for his or her bachelor's degree program.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the minimum English proficiency requirement (http://catalog.ku.edu/graduate-studies/kumc/admissiontext).

- Applicants must be a registered nurse with two years of work experience as a licensed registered nurse. Experience as an LPN does not fulfill this requirement.

- Applicants must have at least one year of recent (within the past 2-3 years), full-time experience in an intensive-care unit. This year of ICU experience must be completed prior to the official enrollment date. The admissions committee has found that the most successful applicants have experience in adult ICU, such as cardiac ICU, surgical ICU or medical ICU. Pediatric ICU is acceptable, however, neonatal ICU and emergency department are not accepted. Applicants should have experience with the following:
  - continuous hemodynamic monitoring (PA catheters, Swan-Ganz)
  - ventilators
  - EKG interpretation
  - pharmacological monitoring (instituting, regulating and maintaining patients on drugs related to cardio pulmonary status or life-death situations)
  - independent decision-making necessary in the ongoing care of unstable patients

- All applicants accepted into the program are required to obtain RN licenses for Kansas, Missouri, Nebraska, and Oklahoma prior to the start of the program (end of May each year). Any license with restrictions will not be accepted.

- Students must have completed prerequisite courses in the following basic sciences: chemistry I and II, human anatomy, human physiology, microbiology, and one course in statistics. Courses may be taken at an accredited 2-year college but cannot be taken for credit by examination. A pass grade will not be accepted unless the applicant provides written verification from the institution that the pass designation is equivalent to a grade of C or higher. Applicants not having met all the prerequisites by the application deadline must submit proof of enrollment for any missing prerequisites. All prerequisites must be complete by the end of the summer semester of the year the applicant is applying to the program.

- A minimum grade of C is required in all prerequisite courses with the exception of human physiology. For human physiology a minimum grade of B is required and the course must have been taken within ten years of entering this program. Two semesters of combined human anatomy and physiology will also fulfill the human anatomy and human physiology requirements. If combined courses are used for this prerequisite, both must have a minimum grade of B and be taken within ten years of entering this program.

- Two references are required. Applicants are required to provide the names and contact information (including email addresses) of two (2) specific individuals when completing the online application. Family members and friends may not be included. The references must be provided by 1) a current nurse manager/supervisor and 2) an advanced-practice nurse or physician having routinely worked with and observed the work of the applicant. One of the references must be from the student's most recent ICU position.

- A resume or curriculum vitae is required and must include prior employment including details of all RN and ICU experience. It should also include participation in professional and/or voluntary organizations (e.g., hospital, alumni or nonprofit.)

- The applicant is required to provide a statement of purpose of 500 words or less to clearly explain future long-term goals as a nurse anesthesia provider and his or her hopes for contributions to the profession. Writing skills appropriate for graduate-level education are expected.

- Shadow experience. Applicants must shadow with either a CRNA or an anesthesiologist to gain a better understanding of the nurse anesthesia profession through both observation and discussion. Applicants are responsible for arranging their own shadow experience and ensuring that the anesthesia provider completes the shadow verification form (http://www.kumc.edu/Documents/shp/nurse-anesthesia/Shadow-Verification-Form-Feb2015.pdf). The shadow experience may be completed at any hospital, including the student's hospital of employment. If the applicant's hospital of employment does not fulfill the shadow experience requirement, the applicant must submit an alternate shadowing experience approved by the admissions committee.

- Three letters of recommendation are required. These letters should be from professional healthcare providers who are familiar with the applicant's performance in an academic setting. The letter must be submitted on the recommendation letter form (http://www.kumc.edu/Documents/shp/nurse-anesthesia/Reference-Letter-Form-Feb2015.pdf). This letter must be from a healthcare provider who has known the applicant for a period of at least one year. Applicants may also submit at least two additional letters of recommendation, one of which must be from a CRNA or anesthesiologist. The applicant must supply the name and contact information of the person who will submit the letter of recommendation. If the applicant cannot provide the letter of recommendation by the application deadline, they must provide written verification from the institution that the letter of recommendation is not submitted.
current employer, or one in which a relationship exists with an anesthesia provider. Arrangements can be made to shadow at The University of Kansas Hospital but are limited by faculty availability.

- A personal interview will be held for selected applicants.
- The Joint Commission requires all incoming students to complete and pay for a background check (p. 2456). This one-time fee must be paid directly to the company performing the background investigation. For more information, please see the School of Health Professions background check instructions. (http://www.kumc.edu/school-of-health-professions/background-checks-and-drug-screening-for-students.html)
- Applicants are required to have completed certifications in Advanced Cardiovascular Life Support, Basic Life Support, and Pediatric Advanced Life Support prior to starting the program, and must remain certified while in the program.
- CCRN certification is strongly recommended, but not required. If certified, a copy of the certification card must be uploaded with the application. Participation in professional and/or voluntary organizations or committees (e.g., hospital, alumni, nonprofits) is considered an advantage in the application evaluation.

Applicants will be assessed based on these requirements. Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

The Doctor of Nurse Anesthesia Practice (DNAP) program at the University of Kansas is designed with clinical experiences, class time, and study time. During the first 2 semesters, courses are mostly classroom-based during regular weekday hours. For the remainder of the program, students are assigned in the clinic with variable schedules, including 12-hour shifts outside of regular business hours. Students continue to take theory, research, and other courses during this time.

Much of the program's course work after the first year is web-based. This design permits more learning methods to be incorporated into the program and allows students to continue to gain knowledge through academic course work while developing their skills in the clinic.

Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 8 years is allowed.
- Successful completion of a minimum of 81 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Because of the sequential nature of the curriculum, any grades below "C" in any courses is grounds for non-progression and therefore the student may be considered for dismissal from the Program.
- Please note that grading in our clinical courses is more stringent (NURA 801, 821-823, and 924-926) with the following scale: 90-100 = "A", 80-89 = "B", 79 and below = Fail. A failing grade in a clinical course is grounds for dismissal.
- Successful completion of the University's Research Skills and Responsible Scholarship (http://catalog.ku.edu/graduate-studies/kumc/#programstext) requirement prior to the semester the research practicum is completed.
- Successful completion of NURA 889 Introduction to Theory, Research Methods and Evidence-Based Practice meets the Research Skills requirement.
- Successful completion of NURA 901 Evaluation and Application of Evidence-Based Practice in Anesthesia I meets the Responsible Scholarship requirement.
- Successful completion of a leadership project as indicated in course list below
- Successful completion of supervised clinical practicum as indicated in course list below.
- Successful completion of a senior scholarly project as indicated in course list below.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Students are required to maintain certifications in Advanced Cardiovascular Life Support (ACLS), Basic Life Support (BLS), and Pediatric Advanced Life Support (PALS) current throughout the program (at the student's expense.)
- Students must meet the clinical requirements for practice as required by the Council on Accreditation of Nurse Anesthesia Educational Programs. The requirements are posted on the Council on Accreditation of Nurse Anesthesia Educational Programs (https://www.coacnrna.org/Pages/default.aspx) website.
- Successful completion of the following courses:

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs.

The doctorate program in nurse anesthesia practice is a comprehensive 36-month program comprised of 81 credit hours in which registered nurses receive extensive education in both the academic and clinical components of nurse anesthesia. Students learn to administer anesthesia to all patient populations in a variety of clinical settings using all current anesthesia techniques, and graduates are prepared to take the national certification examination required to become Certified Registered Nurse Anesthetists.

### Technical Standards and Requirements

The Doctor of Nurse Anesthesia Practice degree signifies that the holder is an anesthetist prepared for entry into the practice of nurse anesthesia, thus it follows that graduates must have the knowledge and skills to function in a broad variety of clinical situations and to render a wide spectrum of patient care. This document delineates the cognitive, affective and psychomotor skills deemed essential to the completion of the program. If a student is not able to demonstrate the following skills and abilities, it is the responsibility of the student to request an appropriate accommodation. The University will provide reasonable accommodation as long as it does not fundamentally alter the nature of the nurse anesthetist program. The essential technical standards presented in this document are pre-requisite for matriculation, subsequent promotion from year to year, and ultimately graduation from the University of Kansas Clinical Doctorate in Nurse Anesthesia. These standards pertain to all matriculated students. All required courses in the curriculum are necessary in order to develop essential skills required to become a competent nurse anesthetist and to protect the health and safety of patients. Therefore, all students admitted to the nurse anesthesia program must be able to meet the following requirements and expectations with or without accommodation(s). Students are required to sign and return the technical standards form with their letter accepting a position in the program.

**NOTE:** Reasonable accommodation will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodation should provide appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

1. **Intellectual-Conceptual and Integrative and Quantitative Abilities.** The nurse anesthesia student must be able to:
   
a. use reason, analysis, calculations, problem solving, critical thinking, synthesis, self-evaluation and other learning skills to acquire knowledge, comprehend and synthesize complex concepts.
b. comprehend three dimensional relationships and to understand the spatial relationships of structures

c. identify significant findings from history, physical examination, and laboratory findings to determine the appropriate sequence of events to implement effective clinical treatments in a timely manner

d. acquire and develop clinical reasoning and judgment skills under pressure

e. interpret information derived from auditory, visual, written, and other visual data to determine appropriate patient management plans

f. recall and retain information in an efficient and timely manner

g. demonstrate proficiency in both oral and written English language and communicate knowledge to others when indicated

h. effectively analyzing complex clinical situations such as cardiac or pulmonary arrest or airway obstruction

i. effectively function as an attentive, productive and constructive member of a healthcare team

j. demonstrate self-awareness and self-assessment of one’s abilities and deficiencies or limitations and request help when needed.

2. Observational Skills. The nurse anesthesia student must be able to:

a. observe demonstrations and experiments in the basic sciences, including but not limited to, physiologic and pharmacologic demonstrations in animals, microbiological cultures, microscopic studies of microorganisms and tissues in normal and pathologic states.

b. observe a patient accurately at a distance or close at hand

c. discriminate variations in human responses to disease using visual (including color), auditory, tactile and other sensory cues

d. discriminate changes in monitoring devices and alarms using visual and auditory senses

e. Students must have visual acuity within normal ranges of motor facility appropriate to work within the confines of anesthetizing areas (with electronic monitoring and ventilatory equipment).

3. Communication. The nurse anesthetist student must be able to:

a. speak, hear and observe patients in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

b. communicate effectively and sensitively with patients, including not only speech but reading and writing.

c. communicate effectively and efficiently in oral and written form with all members of the health care team.

d. have hearing activity within normal ranges of motor facility appropriate to work within the confines of anesthetizing areas (with electronic monitoring and ventilator equipment).

4. Professional, Behavioral and Social Attributes. The nurse anesthesia student must be able to:

a. possess the emotional health required for full utilization of his/her intellectual abilities

b. exercise good judgment, the prompt completion of all responsibilities attendant the diagnosis and care of patients, and the development of mature sensitive and effective relationships with patients.

c. tolerate physically and emotionally taxing workloads

d. maintain composure and emotional stability during periods of high acute stress as well as periods of chronic stress

e. adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients.

f. display compassion, integrity, concern for others, open-mindedness, interpersonal skill, self-discipline, focus and motivation

g. accept criticism and respond by appropriate behavior modification

h. use supervision appropriately and act independently when indicated

5. Motor and tactile function. The nurse anesthesia student must be able to:

a. elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers

b. physically do basic laboratory tests and to read EKGs and x-rays

c. execute both gross and fine muscular movements, equilibrium and functional motor movements reasonably required to provide general care and emergency treatment to patients (ex: cardiopulmonary resuscitation, administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways and the suturing of simple wounds)

d. physically respond to emergency calls without locomotion or transportation limitation

e. document that no disease process exists which predisposes them to hepatic disorders

Occupational Therapy

The Department of Occupational Therapy Education (http://www.kumc.edu/school-of-health-professions/occupational-therapy-education.html) is one of eight departments of the KU School of Health Professions (http://healthprofessions.kumc.edu/) and is located on the KU Medical Center campus in Kansas City, KS.

• **Vision statement:** To transform occupational therapy and influence other health professions through leadership, education, and discovery.

• **Mission statement:** To develop learners who will impact the health and occupations of people and their communities through innovative and collaborative practice, education, research, and leadership.

KU’s occupational therapy programs are nationally recognized for excellence in producing leaders in education and research.

The department offers the following degree programs:
Entry-Level Doctorate, Occupational Therapy (OTD) (p. 666)

The entry-level doctorate is for students entering the profession of occupational therapy after acquiring a bachelor's degree at KU or another institution. Our transition to the OTD allows our students to gain greater in-depth practice knowledge, enhance leadership skills and provide experiences that allow our students to participate in policy and systems change to improve healthcare. The OTD culminates in a Doctoral Capstone which includes both a Capstone Project and Doctoral Experience. Graduates are eligible to take the national certification examination to obtain OT licensure. The first cohort of OTD students entered Fall 2019.

Post-Professional Doctorate, Occupational Therapy (OTD) (p. 663)

This is a post-professional, clinically-focused doctoral program designed for practicing occupational therapists wanting to pursue advancement in contemporary and evidence-based practice, professional leadership and foundations in teaching. A degree in occupational therapy from an accredited program, a master's degree, and a current license to practice as an occupational therapist are required for admission.

Therapeutic Science (Ph.D.) (p. 691)

Administered through the Department of Occupational Therapy Education, this research-focused doctoral program benefits from faculty expertise in many different departments and schools across the University of Kansas. It is designed to support interdisciplinary study of wellness and disability related to individuals and support systems.

Occupational Therapy (MS) Courses

OTMS 699. Special Projects. 1-6 Credits.
(1-6) An elective course to allow student investigation of special issues or problems relevant to applied research and/or practice, under the direction of a faculty member chosen by the student. Systematic coverage of current issues may include a research investigation or study related to pertinent sociocultural trends, practice factors, or emerging issues in service provision. Students will complete special projects such as oral presentations, written papers, or case analysis as negotiated with the faculty mentor. May be repeated for credit. Prerequisite: Enrollment as a non-degree seeking student and permission of the instructor.

OTMS 701. Professional Development. 3 Credits.
With an emphasis on leadership skills and professionalism, this course will include mentoring, supervising, managing, organizing presentations, and teaching, writing, and contributing through professional organizations (interdisciplinary and occupational therapy). Students professionalism on issues of concern to administrators, staff therapists, educators, or those in private practice. Prerequisite: Permission of Instructor.

OTMS 705. Multidisciplinary Theoretical Perspectives. 3 Credits.
Students will identify and explore the key theories in occupational therapy and those more specific to their emphasis area with an emphasis on those currently influencing clinical reasoning. Students will demonstrate an understanding of contemporary theories and be able to compare and contrast key theories. Students will develop rationales for theory guided interventions. Furthermore, they will develop an impact summary in their identified area of emphasis. Prerequisite: Permission of Instructor.

OTMS 735. Practice Models for Applied Science. 3 Credits.
Issues and trends relative to advanced application of theory, assessment and intervention with emphasis on pediatrics will be presented in lecture and discussion. Special projects will emphasize the student's special interests. Although faculty directed, student presentation will be emphasized.

OTMS 799. Special Topics in Occupational Therapy. 1-6 Credits.
An elective course to allow student investigation of special issues or problems relevant to applied research and/or practice, under the direction of a faculty member chosen by the student. Systematic coverage of current issues may include a research investigation or study related to pertinent sociocultural trends, practice factors, or emerging issues in service provision. Students will complete special projects such as oral presentations, written papers, or case analyses as negotiated with the faculty mentor. May be repeated for credit. Prerequisite: Permission of instructor.

OTMS 800. Research Proseminar. 1 Credits.
A proseminar conducted by the core graduate faculty in Occupational Therapy and Therapeutic Science. Twice-monthly meetings will involve student and faculty presentations of their current research, as well as provide more opportunities to obtain feedback on research proposals. May be taken more than once for a total of four credits. (Same as TS 800.)

OTMS 801. Applied Neuroscience. 3 Credits.
The course will address the major functions of the systems within the central nervous system and how they interact to produce responses to environmental demands. Sensory input, central processing, and output mechanisms will be analyzed. The student will then appraise human behavior in relation to function and dysfunction of the nervous system, both in formulating potential behavioral signs when a specific neurological site is presented, and in hypothesizing about neurological involvement when analyzing a particular individual's problems. Prerequisite: Undergraduate neuroscience course or permission of instructor.

OTMS 835. Interpreting Research for Applied Science. 3 Credits.
This on-line course examines selected research studies, analysis methods and results employed, and applies research findings to practical problems. Students will design their own research project reflecting their area of interest.

OTMS 890. Graduate Research. 1-6 Credits.
Students investigate an empirical question relevant to occupational therapy and write a literature review and a research proposal under the guidance of a faculty advisor. Pending approval of the proposal, the student will carry out initial phases of the project, including materials preparation and data collection.

OTMS 899. Thesis. 1-6 Credits.
Course requires data analyses, interpretation, and scholarly writing based on individual original research carried out under the guidance of the student's advisor. These activities, along with an oral presentation of research, must meet with approval of the student's advisory committee to complete thesis requirements. Prerequisite: OTMS 890.

Occupational Therapy Courses

OCTH 101. Introduction to Occupational Therapy. 1 Credits.
Survey of the profession of occupational therapy. Includes information on academic and professional requirements, career opportunities, general description, and history of the profession. Open to all students.

OCTH 601. Human Anatomy. 6 Credits.
The study of gross anatomy and neuroanatomy in relation to human function and behavior will introduce students to how occupational therapists use anatomical knowledge to gather information about clients. Learning opportunities include lecture and laboratory. Prerequisite:
Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 602. Orientation to the Occupational Therapy Profession. 3 Credits.
In OCTH 602, we will examine occupation, explore the underlying philosophy and history of the occupational therapy profession, and implications for current practice and future directions. We will establish expectations for professionalism and practice application of ethical and professional behaviors within the context of occupational therapy practice. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 605. Theory and Practice in Occupational Therapy. 2 Credits.
In OCTH 605, we will present established and emerging conceptual models of occupational therapy to guide students in exploration and discussion of assessment and intervention practices. Emerging professional reasoning skills and strategies will support individuals and small groups in synthesis and integration of theoretical concepts applied to diverse practice settings. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 622. Analysis and Adaptations of Occupations - I. 4 Credits.
In OCTH 622, we will study the role of occupations and factors influencing occupational performance using the "top-down/bottom-up" analytic approach recommended by the WHO and reinforced by the OT Practice Framework. This course will use service learning as the context for synthesizing an understanding of occupation, the occupational therapy process, and person-centered practice. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 630. Practicum - I. 2 Credits.
In OCTH 630, we will support students to experience and demonstrate person-centered and strength-based approaches when engaging individuals in their natural context, and to use observation, interview, and documentation skills to guide OT practice with children and families. Students will explore individual leadership strengths and styles to better understand individual roles within a complex system. Students as individuals and in small groups will undertake leadership assessment, reflection and application. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 635. Lifespan Development from an Occupational Perspective. 4 Credits.
In OCTH 635, we will examine in detail developmental theories and how they intersect with changes in occupations across the lifespan. We will promote an advanced understanding of participation in meaningful activities by practical experiences with real people in authentic settings. Students will gain an understanding and appreciation of the qualitative differences between typical and atypical occupational performance across the lifespan. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 645. Contexts of Occupation. 2 Credits.
In OCTH 645, contextual supports and features of physical, social, and other environments will be explored as potential tools to facilitate maintaining or enhancing occupational performance irrespective of disability status. The interaction of person, context, and environment will be explored through guided discussion, reflection, and extra-mural exploratory assignments. A culminating activity inspires teams of students to assemble course elements to develop a cohesive summary project with practical application. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 655. Neuroscience Analysis of Occupational Performance. 3 Credits.
In OCTH 655, we will build upon prior knowledge of neuroanatomy gained through OCTH 601. Principles of neuroscience will be interpreted in clinical application using a strength-based approach to advance understanding of nervous system function. The integration and function of neural systems will be considered in relation to specific challenges and capacity of the nervous system as a whole to support behavior. A practical application and problem-based perspective will be encouraged throughout the course, with students invited to consider consumer perspective and availability of potential supports. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 662. Physical Considerations in Facilitating Occupational Performance. 4 Credits.
In OCTH 662, we will appraise the impact of select medical conditions on person factors and occupational performance in everyday life using scientific reasoning. Students will implement occupational therapy assessment and intervention strategies integrated with knowledge of injury and disease processes to facilitate an understanding of occupational performance outcomes. Particular consideration will be given to addressing complex comorbidities within the context occupational performance. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 670. Practicum - II. 2 Credits.
In OCTH 670, we will employ the occupational therapy process, to participate in service provision to individuals through level I fieldwork experiences. We will build upon skills from OCTH 630 to advance leadership development and effective communication. This course will use both classroom and community-based practicum experiences. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 672. Psychiatric Considerations in Facilitating Occupational Performance. 3 Credits.
In OCTH 672, we will examine in detail occupational performance as influenced by psychological conditions using evidence-based practices and principles of mental health. We will emphasize the importance of considering individuals, groups and organizations with the context of occupational performance. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 680. Independent Study. 1-6 Credits.
An elective course to allow students to pursue areas of special interest under direction of faculty of his or her choice. Investigation of special issues relevant to an aspect of occupational therapy practice will include study of pertinent practice factors. Student will complete special projects relevant to the practice areas, such as oral presentation, written paper or case analyses. May be repeated for credit. Prerequisite: Permission of department and instructor (offered Spring, Summer and Fall).

OCTH 682. Analysis and Adaptation of Occupations - II. 2 Credits.
In OCTH 682, we will support students in service learning settings to expand OCTH 622 task analysis outcomes to include the occupational therapy practice framework to further analyze and apply the occupational therapy process using person-centered practice. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.
OCTH 690. Evaluation and Assessment of Occupational Performance. 2 Credits.
In OCTH 690, we will examine in detail principles of the evaluation process to analyze occupational performance across the lifespan. We will differentiate, select, interpret, and document both formal and informal measures within a person-centered and contextually relevant approach. Prerequisite: Open to students enrolled in the MOT graduate program or those with permission from the OTEd department.

OCTH 704. Planning and Intervention in Occupational Therapy. 2 Credits.
This course will use professional reasoning to analyze cases across the lifespan. We will work in small groups using a problem-based format with faculty mentors as we develop an occupational profile, occupational analysis and evidence-based intervention plans for each case.

OCTH 710. Service Management: Delivery Systems. 1 Credits.
This course will explore how service delivery systems influence pragmatic reasoning and occupational therapy practice. We will examine American and global health care systems along with occupational therapy health care delivery settings with a focus on quality, cost, and access related to service delivery. Teaching and learning experiences occur through lecture, on-line materials, class discussion and small group activities.

OCTH 715. Supervision, Team Relations, and Management Communication. 1 Credits.
This course emphasizes entry level skills related to supervision, teamwork, and communication within practice environments.

OCTH 720. Occupational Therapy Practice Models. 7 Credits.
This course will use practice models to guide evaluation and intervention in occupational therapy practice. Students will gain an understanding of historical and contemporary models, learn the evidence underlying each model and conduct assessments with a consumer from each of the contemporary models.

OCTH 725. The Research Process. 1 Credits.
This course will transition from understanding and appraising research (OCTH 783) to generating research (OCTH 790). The purpose of this course is to guide students through planning research by introducing the components of research and describing ways in which research may be conducted. The course reviews research ethics, writing research questions and hypotheses, sampling, measurement and data collection, components of quantitative and qualitative research, and information about disseminating research.

OCTH 730. Practicum III. 2 Credits.
This course will build upon practicum and level I fieldwork experiences to continue developing necessary skills for level II fieldwork experiences. We will determine the relevant variables for intervention, work collaboratively with others within each setting, analyze, and reflect upon the experience. We will analyze principles of evidence-based practice and occupation-based intervention.

OCTH 738. Special Topics in Practice. 1-3 Credits.
Focused study of theory application, professional topics and skills, and emerging practice questions. Learning experiences may be in the form of guided readings and discussion, directed projects, seminars, or community/clinical experience with focus on advanced supplemental or exploratory learning. Specific topics and formats will vary as they are generated by student interest and faculty expertise.

OCTH 750. Case-Based Clinical Reasoning. 2 Credits.
This course will apply the professional reasoning process to understand individuals’ occupational performance and analyze services provided based on cases from level II fieldwork experiences. We will participate in small group discussion using a problem-based format to conduct case analysis and develop evidence-based intervention plans.

OCTH 755. Issues and Trends Seminar. 1 Credits.
This course will analyze key professional, political, and cultural issues and trends that impact service provision and the populations served by occupational therapists. This seminar format incorporates student-driven service experiences, discussion forums, and small group work to examine issues/trends and recognize opportunities to shape the future of the occupational therapy profession.

OCTH 760. Professional Development and Leadership in Service Management. 3 Credits.
This course will discuss professional responsibilities and career development opportunities as they relate to leadership, administration, and management of occupational therapy services. We will use reflective assessments to identify professional leadership strengths and career paths. Students working in small work groups will apply management principles to develop and propose community-based health promotion programs.

OCTH 765. Family and Community Service Systems. 2 Credits.
This course will use professional reasoning to examine occupational practice within various delivery systems. We will use lecture and small group seminars to analyze systems from level II fieldwork experiences and develop a program evaluation plan based on collaborations between students and fieldwork supervisors.

OCTH 770. Level II Fieldwork, Part 1. 6 Credits.
A required full-time, three-month supervised experience in a facility meeting specified criteria. Qualified occupational therapists supervise the experience. Students will be exposed to a variety of age ranges and disabilities within different service delivery systems. Prerequisite: Satisfactory completion of required academic coursework.

OCTH 775. Level II Fieldwork, Part 2. 6 Credits.
A required full-time, three-month supervised experience in a facility meeting specified criteria. Qualified occupational therapists will supervise this experience. Students will be exposed to a variety of age ranges and disabilities within different service delivery systems. Ages, disabilities, and service provision systems for this course will differ from the student’s prior fieldwork experience. Prerequisite: Satisfactory completion of required academic coursework.

OCTH 776. Population-Based Clinical Reasoning. 3 Credits.
This course will consider population-based concepts and theories to identify, prioritize and meet the health and life participation needs of populations. Within an interprofessional online learning context, students collaborate to develop community-based assessment and intervention emphasizing promotion, maintenance and restoration of health and wellness and disease prevention for specific populations.

OCTH 780. Elective Level II Fieldwork. 3-6 Credits.
An elective (optional) supervised experience in a facility meeting specific criteria. Qualified occupational therapist will supervise this experience. This fieldwork would allow students to pursue areas of special interest. Length and time commitment of experience will be commensurate with credit hours (e.g. each credit requires 80 hours of fieldwork contact at specified site). Prerequisite: Satisfactory completion of required academic coursework and OCTH 770.

OCTH 783. Evidence-Based Practice. 2 Credits.
This course will review, appraise, and integrate various levels of evidence to inform occupational therapy practice. Students will learn where and how to find relevant evidence as well as what factors should be considered in the assessment of evidence. We will review statistics
and their use in interpreting outcome data. Students will also learn to
synthesize and translate evidence into useful information for practice.

OTCTh 790. Research Practicum and Professional Writing. 3
Credits.
This course will explore how the process of conducting a faculty-mentored
research project becomes a platform for developing occupational
therapy principles and for guiding practice, and how conveying meaning
to service recipients. Students' work will culminate in the formulation
of a decision-making paradigm for their future practice decisions.
PREREQUISITE: Permission of Department.

OTD 799. Practice and Research. 3 Credits.
This is an elective course that allows students to pursue areas of special
interest under the direction of a faculty member of his or her choice. This
course is designed to support students' learning as they complete their
pre-doctoral studies. Investigation of special issues relevant to an aspect
of occupational therapy practice will include study of pertinent practice
factors. Students will complete special projects relevant to the practice
areas of interest, such as an oral presentation, written paper, or case
analysis. May be repeated for credit. PREREQUISITE: Permission of
Department.

OTD 825. Qualitative Research Methods. 3 Credits.
This course is an introduction to qualitative research techniques. Students
will have several opportunities to gain hands-on experience using
fundamental qualitative research techniques to sharpen their data
collection, analysis and write-up skills. The goals of this course are
to better understand the role qualitative techniques play in research,
identify various ethical issues, interview and observation skills,
and develop foundation skills for collecting, analyzing and interpreting
qualitative data. Prerequisite: Permission of Department. Lecture course.

OTD 835. Quantitative Research for Applied Science. 3 Credits.
Research relevant to therapeutic intervention comes from a variety of
disciplines involving varied research designs and analysis strategies.
Students will in this course will examine selected research studies and gain
skill in analyzing methods and results as well as in applying research
findings to practical problems. Students will conduct a systematic review
on a specific area of occupational therapy practice.

OTD 950. Teaching Practicum. 1-3 Credits.
The purpose of this course is to provide practical learning whereby
students receive individual mentorship for the development,
implementation and evaluation of a teaching experience. Students will
be responsible for developing the material, instructing students, grading
assignments and evaluating the teaching experience. The teaching
experience is expected to include at least 12 hours of face to face
instruction (or the equivalent in on-line teaching or written materials).
Teaching experiences can include MOT program lectures or labs,
continuing education workshops, patient education programs, or staff
inservices or another experience that meets the time and competency
requirements. Prerequisite: A graduate level teaching methods course
such as NSG 873, NSG 874, C & T 740, C& T 840

OTD 860. Multidisciplinary Theoretical Perspectives. 3 Credits.
Students will identify and explore key theories in behavioral, social, and
occupational science with an emphasis on those currently influencing
clinical reasoning and applications to practice and/or research. Students
will demonstrate an understanding of multidisciplinary theoretical
frameworks and be able to compare and contrast key theories, while also
developing knowledge about theory guided research and practice.

OTD 865. Occupation-Based Practice. 3 Credits.
This course is designed to critically review Occupational Therapy theories,
research, practice models and frameworks using the tenets of occupation
based practice. Students will analyze seminal literature from occupational
science and relate theory and evidence to practice. Students will review
their specified area of practice to develop a proposed method of practice
that incorporates empirical evidence and practice methods. Finally,
students will select a mentor from their practice area to review their
proposal. Critical feedback will be incorporated into a final presentation
and paper. PREREQUISITE: Permission of Department.

OTD 875. Professional Development. 3 Credits.
This course will explore professional development from an advanced practice perspective. Students will examine aspects of advanced practice such as leadership (both work and professional), management, group and system communication and change agency. They will explore these topics within their current practice settings and select an area of advanced skills to explore in more depth. Students will develop an understanding of how they can impact systems and contribute to the development of healthcare professions.

**OTD 880. Program Evaluation. 3 Credits.**
Leadership in areas of specialty practice will require our graduates to critically evaluate their practice programs. In this course, students will explore the traditional and innovative ways to evaluate professional services and systems, and they will develop skills to conduct program evaluations. Students will examine the purpose and process of program evaluations in a variety of clinical settings. Through lecture, discussion and a project they will develop and execute a program evaluation in their area of practice. PREREQUISITE: Permission of Department.

**OTD 885. Advanced Practicum. 1-3 Credits.**
This practicum is designed to span 400 hours. Students will identify an area of practice through which they want to develop clinical initiatives and leadership. Selected field experiences will provide opportunities for program development, leadership, and information dissemination. Upon completion, the students will provide his or her clinical team with a program, or research based initiative, along with specified program evaluation methods. PREREQUISITE: Permission of Department and continuous enrollment until completion of competencies.

**OTD 890. Capstone Project. 1-3 Credits.**
The capstone project will comprise a scholarly report individualized to the scope of the project chosen. A capstone project report represents the application of knowledge as well as the search for it, and differs from a thesis such that student opinion and experience is involved. The student must negotiate capstone objectives, evaluation standards and any potential approvals prior to initiation of the project. PREREQUISITE: Permission of OTE Advisor/Mentor after completion of core, elective, and practicum coursework. Total capstone credit will equal 3 hours. Prerequisite: All core, elective, and practicum coursework.

**OTD 899. Special Projects. 1-3 Credits.**
This is an elective course that allows students to pursue areas of special interest under the direction of a doctoral faculty member of his or her choice. This course is designed to support doctoral training. Academic options range from research based studies and/or activities to critical analysis of clinical practice methods. Students will complete special projects relevant to their designated practice area of interest. Students must negotiate learning objectives, academic projects and evaluation standards with their mentor. May be repeated for credit. PREREQUISITE: Permission of department. LEC

**Therapeutic Science Courses**

**TS 800. Research Proseminar. 1 Credits.**
A proseminar conducted by the core graduate faculty in Occupational Therapy and Therapeutic Science. Twice-monthly meetings will involve student and faculty presentations of their current research, as well as provide more opportunities to obtain feedback on research proposals. May be taken more than once for a total of four credits. (Same as OTMS 800.)

**TS 805. Multidisciplinary Theoretical Perspectives. 3 Credits.**
Students will identify and explore key theories in behavioral and social science with an emphasis on those currently influencing clinical reasoning and applications to practice and/or research. Students will demonstrate an understanding of multidisciplinary theoretical frameworks and be able to compare and contrast key theories, while also developing knowledge about theory guided research and practice.

**TS 850. From Beliefs to Evidence. 1 Credits.**
Analysis of the role of beliefs about practice in professional culture and how beliefs are affected by the accumulation of research evidence. Topics include the nature of science and beliefs, the nature of evidence, and the debate over evidence-based practice. Students will use topics from their own professional interests for class presentations and written assignments. A minimum of two credits over two successive terms (Fall then Spring) is required (i.e., 1 credit each semester). Note this course alternates in succession with TS900 and TS950, and is offered in the Fall & Spring every 3rd year. Prerequisites: Permission of the instructor.

**TS 880. Special Projects. 1-6 Credits.**
An elective course to allow student investigation of special issues or problems relevant to applied research and/or practice, under the direction of a faculty member chosen by the student. Systematic coverage of current issues may include a research investigation or study related to pertinent sociocultural trends, practice factors, or emerging issues in service provision. Students will complete special projects such as oral presentations, written papers, or case analysis as negotiated with the faculty member. May be repeated for credit. Prerequisite: Permission of instructor.

**TS 900. Evolving Interdisciplinary Views of Disablement. 1 Credits.**
Assessment of how our social and cultural context defines notions of disability and disablement in our society. Topics include historical constructs of disability, public policy related to disability, and social paradigms of disability. Students will evaluate views of disablement from the perspective of their own discipline. A minimum of two credits over two successive terms (Fall then Spring) is required (i.e., 1 credit each semester). Note this course alternates in succession with TS850 and TS950, and is offered in the Fall & Spring every 3rd year. Prerequisite: Consent of the Instructor.

**TS 950. Designing Effective Knowledge Transfer. 1 Credits.**
Examination of the principles of knowledge transfer and diffusion of innovation as they relate to practices in therapeutic professions. Topics include the diffusion process, change agents, innovation adoption, and current diffusion methods. Students will evaluate diffusion processes that have occurred within their own professions. A minimum of two credits over two successive terms (Fall then Spring) is required (i.e., 1 credit each semester). Note this course alternates in succession with TS850 and TS950, and is offered in the Fall & Spring every 3rd year. Prerequisite: Consent of the instructor.

**TS 980. Advanced Study in Therapeutic Science. 1-9 Credits.**
Students engage in advanced study of a topic of their interest, guided by an appropriate mentor. Options for engaging in learning include directed readings, interpretation of evidence, discussions, and written syntheses of existing literature. Students typically enroll in offerings of this course several times over a series of successive terms, with the course sequence culminating in a written proposal for original research and an oral defense of that proposal (oral comprehensive examination). Prerequisite: Permission of instructor.

**TS 990. Dissertation in Therapeutic Science. 1-9 Credits.**
Research experience leading to dissertation for doctoral students in Therapeutic Science. Students enroll in offerings of this course over a series of successive terms, culminating in a written dissertation describing original research and an oral defense of the dissertation research. Prerequisite: Permission of instructor.
Occupational Therapy Doctorate Early Entry Courses

OTDE 700. Foundations in Occupational Therapy. 2 Credits.
This foundational course will support transition to the graduate program and the occupational therapy profession. Students will understand occupation as the foundation of the discipline and discuss the philosophy, history, current practice parameters and future directions of the occupational therapy profession. This course introduces students to constructs of professionalism including ethics and professional behaviors, interprofessionalism, and professional responsibilities within context of occupational therapy. Prerequisite: Acceptance to the entry-level professional OTD program of study.

OTDE 705. Functional Anatomy and Kinesiology to Support Occupational Performance. 3 Credits.
This course will focus on understanding of the physical components of human movement which serve as one foundation for occupational performance. The instructor will facilitate a section-based review of anatomy (e.g., shoulder, elbow, wrist, hand, hip, knee) integrated with the biomechanical and kinesiology principles that occur in typical and atypical movement within each section. The emphasis in this course will be on how to use biomechanical and kinesiology principles to guide the development of occupation-based interventions in people with various abilities across the lifespan through promotion, compensation, adaptation and prevention. Prerequisite: Acceptance to the entry-level doctoral program in Occupational Therapy.

OTDE 710. Professionalism in Context I: Interpersonal and Interprofessional. 2 Credits.
This course includes professional opportunities for students to apply interpersonal and interprofessional skills and professional reasoning through service learning. Students will gain understanding regarding occupational performance in medical, community and educational contexts across the lifespan. Students will participate in reflections through small group discussions, apply knowledge from fieldwork experiences, conduct assessments, and develop evidence-based interventions. The emphasis for this course in the series is becoming familiar with the interprofessional team process and structure. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 711. Professionalism in Context II. 3 Credits.
This course will explore the importance of context in understanding how the person, environment, and tasks all interact to guide occupational performance in everyday life. Students will apply the fundamentals of the evaluation process to assess occupational performance across the lifespan. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 715. Scholarly Practice I: Becoming an Evidence-Based Practitioner. 2 Credits.
This course provides a beginning structure for the development of foundational scholarship skills to support and inform evidence-based occupational therapy practice. Topics include university resources for scholarship; finding and evaluating evidence related to conditions, assessments, interventions, outcomes, populations, and patient experiences. Students will be guided in understanding and categorizing levels of evidence provided by primary sources, books, web resources & practice journals. Students will complete writing assignments and identify key elements of scientific reasoning. Prerequisite: Acceptance to the entry-level professional OTD program.

OTDE 716. Scholarly Practice II: Professional Writing. 2 Credits. This course builds on basic scholarship skills and will provide experience in communicating scholarly findings and articulating interpretation of study outcomes through professional writing. This process will reinforce familiarity with the American Psychological Association (APA) writing style. Writing clarity, good syntax, and proper grammar are essential components of professional writing, and will be considered when assigning grades. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 720. Theory to Practice in Occupational Therapy. 2 Credits.
This course prepares students to use occupational therapy theories and professional reasoning to guide the OT process of evaluation, intervention and outcomes. Students will explore contemporary themes in current OT theories and models and examine the roots of these ideas. Students will explore how theory develops and evolves and the potential role of occupational therapy theories to influence health and well-being of individuals, groups and populations. Prerequisite: Acceptance to the entry-level professional OTD program.

OTDE 725. Analysis & Adaptation I. 3 Credits.
This course will analyze the role of occupations and the factors influencing occupational performance in everyday contexts. This course will apply the occupational therapy practice framework to understand occupation as a means and end to occupational therapy practice. This course will use experiential learning for understanding occupation, the occupational therapy process, and person-centered practice. Prerequisite: Acceptance to the entry-level professional OTD program.

OTDE 726. Analysis & Adaptation II. 4 Credits.
This course will apply concepts of professional reasoning and the occupational therapy framework to explore the impact of selected medical and psychosocial conditions on person factors and occupational performance in everyday life. An understanding of these conditions is paired with appropriate occupational therapy assessments and task analysis to understand performance considerations and occupation as a therapeutic means and end to occupational therapy practice. This course will use practical lab and service learning experiences as a context for understanding performance considerations, occupation, the occupational therapy process, and person-centered. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 730. Population Health & Wellness. 3 Credits.
This course will present population-based concepts, theory, and evidence that link occupation, health, wellness, and quality of life and prioritize the health and life participation needs of populations. The course will draw from experiences with community partners to develop assessment and intervention emphasizing health promotion, maintenance and restoration of health and wellness and disease prevention for all populations in communities. Prerequisite: Acceptance to the entry-level professional OTD program.

OTDE 740. Neuroscience Foundations to Support Occupational Performance. 3 Credits.
Principles of neuroscience will be interpreted in clinical application using a strength-based approach to advance understanding of nervous system function. The integration and function of neural systems will be considered in relation to specific challenges and capacity of the nervous system as a whole to support behavior. A practical application and problem-based perspective will be encouraged throughout the course, with students invited to consider consumer perspective and availability of potential supports. Students will consider human behavior and occupational performance in relation to development and to function/dysfunction of the nervous system, both in formulating potential behavioral signs when
conduct of research as they begin to employ the research process. Students will develop research questions aligned with their interests for critical thinking skills of research to occupational therapy practice. Students will apply the evidence-based practice cycle, scientific method, and small group seminars to analyze systems from level II fieldwork contexts with considerations for the effects of a disability, conditions, and age on occupational performance using a person-centered approach. Prerequisite: Successful completion of all prior courses required by the OTDE curriculum.

OTDE 754. Occupational Performance and Participation Across the Lifespan - I. 3 Credits.
This course is part 1 of theory and practice related to children and adolescents. This course will emphasize the need to examine participation in meaningful activities within authentic contexts with considerations for the effects of a disability, conditions, and age on occupational performance using a person-centered approach. Prerequisite: Successful completion of all prior courses required by the OTDE curriculum.

OTDE 755. Occupational Performance and Participation Across the Lifespan - II. 3 Credits.
This course is part 2 of the OPPAL series that focuses on theory and practice related to children and adolescents. This course will emphasize the need to examine participation in meaningful activities within authentic contexts with considerations for the effects of a disability, conditions, and age on occupational performance. Prerequisite: Successful completion of all prior courses required by the OTDE curriculum.

OTDE 756. Occupational Performance and Participation Across the Lifespan - III. 5 Credits.
This course includes study about developmental theories and how occupations change across the lifespan related to adults and older adults. This course will emphasize the need to examine participation in meaningful activities within authentic contexts with considerations for the effects of a disability, conditions, and age on occupational performance. Prerequisite: Successful completion of all prior courses required by the OTDE curriculum.

OTDE 760. Policy and Advocacy for Occupational Therapy - I. 2 Credits.
This foundational course will introduce policies and the impact of professional advocacy on occupational therapy practice and systems. Students will understand what policy is, why policy matters, and how laws, payment/reimbursement policy, practice acts, and regulatory agencies shape our view of health, ability/disability, and OT practice. Self-assessments provide baseline information for professional development related to policy and advocacy. Prerequisite: Successful completion of all prior courses required by the OTDE curriculum.

OTDE 761. Policy and Advocacy for Occupational Therapy - II. 3 Credits.
This course will build on foundational policy information by introducing system-specific policies and the work of advocacy as applied to the OT profession, populations, and policy development/implementation. Students will examine policy within and across settings and systems that impact OT practice. Students will learn about stakeholders, policy development, and will demonstrate advocacy within teams, across public/private systems. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 795. Scholarly Practice III: Understanding Research Methodology. 3 Credits.
This course introduces students to the process of conducting research. Students will apply the evidence-based practice cycle, scientific method, and critical thinking skills of research to occupational therapy practice. Students will develop research questions aligned with their interests for OT practice needs, and then explore existing literature and evidence related to their research question. Students will learn about responsible conduct of research as they begin to employ the research process. Students will learn and practice the steps for quantitative research processes using a statistical software package. Students will learn the preliminary stages of how to write and put together the components of a manuscript for a peer-reviewed publication. Prerequisite: Successful completion of all prior courses required by the OTDE curriculum.

OTDE 815. Supporting Occupational Performance Across the Mental Health Continuum. 3 Credits.
This course will apply theory and evidence to occupational therapy practice across the continuum of mental health through mental illness in healthcare, social, and educational settings. Students will consider opportunities to support positive mental health for all people and support individuals with psychiatric disorders through assessment and intervention for meaningful, client-determined engagement in everyday life. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 845. Scholarly Practice IV: Interpreting, Integrating, and Translating Evidence. 4 Credits.
This course will emphasize the processes of conducting and disseminating a research study. Conducting a study includes activities such as subject recruiting, data management and analysis, and evaluating how findings may be used to guide practice. Disseminating research involves understanding how to frame the research based on stakeholder interests and could involve manuscript writing, professional presentations, or discussions with community agencies, families, or consumers. This course allows students to implement a research project based on research questions developed as part of the prior courses in the research sequence in this curriculum. Additionally, students will create a dissemination plan for a community agency wanting information to advance their mission. The goals are to produce an entry-level occupational therapist who is aware of the relation between good research and good practice, is capable of critical analysis of scientific and clinical research literatures, and who is aware of the need for problem identification, good research design and methodology, and the appropriate evaluation, interpretation, and presentation of research findings. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 850. Professionalism in Education. 2 Credits.
This course focuses on teaching and learning activities in a variety of contexts. This course builds on professional communication strategies introduced in previous Professionalism in Context I. Students will learn effective teaching strategies to communicate information to clients, families, and other professionals while gaining confidence as an entry-level occupational therapy practitioner. Students will gain experience in the development of scholarly presentations for health care professionals. Relationship development, the exchange of messages, conflict management, and a better understanding of the Self, will all contribute to the student's knowledge and understanding of the importance of effective communication in teaching. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 860. Professionalism in Practice I. 3 Credits.
Students will apply the professional reasoning process to understand individuals' occupational performance based on cases from level II fieldwork experiences. Students will conduct case analysis and develop evidence-based intervention plans. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 861. Professionalism in Practice II. 3 Credits.
This course will use professional reasoning to examine occupational practice within various delivery systems. Students will use lecture and small group seminars to analyze systems from level II fieldwork experiences and provide evidence to support the role of OT in innovative
and traditional practice settings. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 870. Contemporary Community Engagement. 2 Credits.
This course introduces the concept of community engagement as a strategy for supporting healthy individuals, populations, and communities. Students will reflect on professional experiences and interests to identify gaps in community resources that impact occupational justice. Students will gain competency in identifying health disparities, analyzing policy, and identifying and communicating with funding agencies to engage community interprofessional partnerships. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 900. Occupational Therapy Level II Fieldwork - Part I. 1-12 Credits.
The first of a required full-time, three-month supervised experience in a facility meeting specified criteria. Qualified occupational therapists supervise the experience. Students will be exposed to a variety of age ranges and disabilities within different service delivery systems. This course can be taken multiple times and must be taken until a total of 12 credit hours have been completed to meet degree requirements. Prerequisite: Satisfactory completion of required academic coursework with a cumulative grade point average of 3.0.

OTDE 901. Occupational Therapy Level II Fieldwork - Part II. 12 Credits.
The second required full-time, three-month supervised experience in a facility meeting specified criteria. Qualified occupational therapists supervise the experience. Students will be exposed to a variety of age ranges and disabilities within different service delivery systems. By the end of the three-month period, students will be expected to perform at the level of an entry-level therapist. Prerequisite: Satisfactory completion of required academic coursework with a cumulative grade point average of 3.0.

OTDE 902. Occupational Therapy Level II Fieldwork - Alternative. 6-12 Credits.
An alternative supervised experience in a facility meeting specific criteria. Qualified occupational therapists supervise the experience. By the end of the experience, students will be expected to perform at the level of an entry-level therapist. Prerequisite: Satisfactory completion of required academic coursework with a cumulative grade point average of 3.0.

OTDE 915. Professionalism in Leadership and Administration. 3 Credits.
This course will focus on professional responsibilities and essential skills associated with leadership, administration, and management of occupational therapy services. Students will gain knowledge in the principles of program evaluation, business aspects of practice, as well as supervisory and management issues. In addition, students will acquire skills in professional development and leadership skills for the entry-level practitioner. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 925. Independent Study - Special Topics. 1-3 Credits.
This is a learning experience tailored to the needs and interests of a student, focused on topic outside of the regular curriculum or explored in greater detail than is covered by the regular curriculum. The student will work closely with the faculty sponsor to define, pursue, and complete the project. This syllabus is accompanied by a "proposal" form, which must be completed and submitted for consideration by the faculty sponsor at least 8 weeks prior to the start of the term in which the experience will take place. Permission to enroll in this course will not be granted until the proposal has been reviewed and approved by the faculty sponsor. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum. Consent of the instructor.

OTDE 935. Independent Study - Study Abroad. 1-3 Credits.
This independent study experience allows occupational therapy students to explore the profession in an international setting. The experience must be closely coordinated with the Office of International Programs at KU Medical Center. The student establishes individual learning objectives with the OT department faculty mentor in the semester preceding the experience. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum. Consent of the instructor.

OTDE 950. Capstone Project Planning. 3 Credits.
This course is designed to foster development of in-depth and advanced knowledge in a specific interest area through guided planning of the Capstone Project. Students will pursue a literature review while considering the needs of a population or organization, and then propose a Capstone Project. This course supports student development of in-depth knowledge as they explore an area of: a) research and scholarship, b) policy and advocacy c) advanced practice, or other content area specified by ACOTE. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 951. Capstone Project Planning - III. 1 Credits.
This course will prepare students for their capstone experiences as they begin implementing a plan for their capstone project. Building upon the activities started in OTDE 950 & 951, this course supports student development of in-depth knowledge as they explore an area of: a) research and scholarship, b) policy and advocacy c) advanced practice, or other content area specified by ACOTE. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 980. Capstone Dissemination. 3 Credits.
Students will collaborate with faculty mentors and site supervisors to develop scholarly presentations for dissemination. Students will present the results of the capstone project to local, regional and/or national audiences. Students will assume a leadership role in identifying opportunities for publication of the capstone project and completing the submission. This course is completed in conjunction with the capstone experience to provide students with the opportunity to develop skills in professional presentations and publications. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

OTDE 990. Capstone Experience. 14 Credits.
Students will complete a 14-week practical experience at the completion of coursework and level II fieldwork experiences. This experience is designed to provide in-depth knowledge in a specific area of interest. Students will participate in practical experiences and scholarly activities designed to promote autonomous learning. Students will assume a leadership role in the implementation of the capstone project with guidance from faculty mentor and site supervisor. Prerequisite: Successful completion of all prior coursework required by the OTDE curriculum.

**Doctor of Occupational Therapy (Post-Professional)**

This program of study is directed at registered occupational therapists who are seeking advanced practice knowledge to support their adoption of pioneering approaches and opportunities, and to prepare them to be leaders in the field. This program focuses on innovation and professional leadership in practice. Offered entirely online, therapists can obtain this education while continuing to work in the profession.
This program is designed for students who already possess a Master’s degree in Occupational Therapy, or Bachelor’s degree in Occupational Therapy with a Master’s degree in another area and eligibility to practice professionally as an OT.

Applications for this program are accepted online. Detailed instructions on how to apply are available on the Department of Occupational Therapy Education (http://www.kumc.edu/school-of-health-professions/occupational-therapy-education/doctor-of-occupational-therapy.html) website. The application deadline is December 1 for students entering the following summer semester. Applications are not reviewed until all information is received.

Admission requirements:
A degree in occupational therapy and a master’s degree from an accredited institution is required and must be documented by submission of an official transcript indicating the degree has been conferred before entering the program.

Official transcripts for all courses taken from any institution are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative grade-point average requirement.

- Applicants must possess a cumulative grade-point average of at least a 3.2 on a 4.0 scale for his or her bachelor's degree program.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the minimum English proficiency requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- Applicants must provide documentation of registration as an occupational therapist (NBCOT in the USA, or equivalent in a country recognized by WOTF).
- A current resume or curriculum vitae is required and must include information on the applicant's background and educational and professional interests. Professional leadership contributions, as well as community-based volunteer leadership activities, should be highlighted.
- With the online application, applicants will submit a statement of career goals of approximately 400 or fewer words in length. Prepare a statement of your career goals that outlines the following:
  - Why you have chosen to pursue an OTD degree at this point in your career
  - What you hope to learn and achieve during your study toward this degree
  - How you plan to use this degree and what you hope to accomplish after you graduate
  - Three references are required, which can include a faculty member, advisor, employer, or other person familiar with the applicant's work and character.

After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs

Post-Professional OTD curriculum - This program focuses on specialization and professional leadership in practice. This innovative curriculum is intended for practicing OTs, and is designed to be responsive to professional demands and to meet the highest academic standards. Core work and specialization opportunities have been integrated across the curriculum to create a base of both advanced knowledge and specialty knowledge that will prepare graduates for leadership in their chosen areas of concentration. The curriculum incorporates 4 key components: evidence-based practice, professional leadership, specialty practice, and teaching.

Degree requirements:
- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.2 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (http://catalog.ku.edu/graduate-studies/kumc/#programtext) requirement. This is met by completing the following:
  - Identify and examine practice-focused problems and develop quantitative approaches to evaluate efficacy of solution strategies.
  - Explore program evaluation, efficacy of clinical methodology, and assessing client experience through narrative, interview, and other qualitative methodology by participating in qualitative coursework, appropriate for the student’s focus and approved by the OTD faculty mentor.
  - Identify professional standards and ethics.
  - Uphold professional standards and ethics as outlined in the OTD student handbook.
  - Maintain appropriate professional credentials while participating in the OTD program.
- Complete annual KUMC Conflict of Interest reporting form.
- Successful completion of a minimum of 36 credit hours.
- Successful completion of the culminating OTD 890 Capstone Project. This is an individually designed, mentored project that demonstrates a synthesis of the knowledge and skills developed in the program.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of the following courses:

Admitted to the University of Kansas Medical Center Occupational Leadership, teaching, and advanced practice. Therefore, all individuals are expected to develop expertise and demonstrate leadership, teaching, advanced practice, and evidence-based practice skills. Therefore, a candidate must be able to understand research, make correct observations, and engage in reasoning, analysis, and synthesis. The candidate will be expected to demonstrate judgment and evidence-based practice skills. Therefore, a candidate must be able to understand research, make correct observations, and engage in reasoning, analysis, and synthesis.

### Typical Plan of Study

The program's curriculum is a combination of online course meetings held at specific times and online learning activities on their own.

Prior to the first class, students will complete an online tutorial that will introduce them to Blackboard Collaborate.

**Total Hours 36**

This is an example plan of study as course offerings may vary by semester and year. Your plan of study will be finalized in consultation with your advisor.

### TECHNICAL STANDARDS

#### Post-Professional Occupational Therapy Doctoral Degree Program

A Doctoral Degree in Occupational Therapy signifies that the holder is prepared to assume leadership in clinical practice after developing advanced practice competencies. It follows that graduates must have the knowledge and skills to promote evidence-based practice, professional leadership, teaching, and advanced practice. Therefore, all individuals admitted to the University of Kansas Medical Center Occupational Therapy Doctoral degree program must have the following abilities and expectations with or without accommodations.

The following technical standards, in conjunction with the academic standards, are requirements for admission, promotion, and graduation. The term “candidate” refers to candidates for admission to the program as well as current students who are candidates for retention, promotion, or graduation. KU School of Health Professions maintains a strong commitment to equal educational opportunities for qualified students with disabilities who apply for admission to the program or who are already enrolled. The technical standards are not intended to deter any candidate for whom reasonable accommodation will allow the fulfillment of the complete curriculum. Candidates with disabilities are encouraged to contact the Academic Accommodations Office at (913) 945-7035 or cukoko@kumc.edu early in the application process to begin a confidential conversation about what accommodations they may need to meet these standards. This process is informed by the knowledge that students with varied types of disabilities have the ability to become successful health professionals.

1. **Problem Solving:** The culminating activity in the preparation of an occupational therapist is clinical reasoning. The post professional occupational therapy student is expected to develop advanced expertise and demonstrate leadership, teaching, advanced practice, and evidence-based practice skills. Therefore, a candidate must be able to understand research, make correct observations, and engage in reasoning, analysis, and synthesis.

2. **Judgment:** The candidate will be expected to demonstrate judgment in classroom and practical settings which shows an ability to make mature, sensitive, and effective decisions in the following areas: a) relationships with supervisors, peers, and patients/clients/consumers, b) professional behavior, and c) the effectiveness of intervention strategies. The candidate must demonstrate an understanding of the rationale and justification for his or her performance.

3. **Communication:** a) **Written communication:** The candidate must be able to assimilate information from written sources (texts, journals, medical/school records, etc.). The candidate must be able to attain, comprehend, retain, and utilize new information presented in written formats. Candidates are required to use information from written sources and must be able to produce appropriate written documentation. b) **Verbal and nonverbal communication:** Candidates must be able to produce the spoken word and to elicit information from patients/clients/consumers, supervisors, and peers with skills in describing not only factual information, but the more subtle cues of mood, temperament, and social responses. Communication with patients/clients and all members of the intervention or academic team must be accurate, sensitive, effective, and efficient. Response time to emergencies/crisis situations, as well as more routine communication must be appropriate to the situation or setting.

4. **Sensorimotor:** Candidates must have gross motor, fine motor, and equilibrium functions, as well as a functional use of the senses of vision, hearing, and the tactile sense that will enable them to perform the career tasks which are the target of their career paths.

5. **Behavioral and social attributes:** Candidates are expected to exhibit professional behaviors and attitudes during their participation in classroom, clinical, and research experiences. This includes, but is not limited to, appropriate written (including electronic messages) and spoken language, flexibility toward change, and acceptance of responsibility for one’s own conduct. Students are expected to exhibit a positive attitude toward patients/clients/consumers, peers, and supervisors.
Doctor of Occupational Therapy (Entry-Level)

In fall 2021, KU’s entry-level occupational therapy doctoral program (OTDE) applied for accreditation and was granted Preaccreditation Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA). This program has been designed to provide students with the skills necessary to work as occupational therapists in a range of healthcare, educational and community-based settings. The OTDE program is a three year full-time on-site commitment at the University of Kansas Medical Center campus, where lectures and labs are delivered. Upon completion of didactic coursework and fieldwork, students complete a doctoral capstone experience throughout the Kansas City metropolitan area, the state of Kansas, and/or across the country.

The program has completed an on-site evaluation by the Accreditation Council for Occupational Therapy Education (ACOTE) and has been granted the full seven-year Accreditation Status. This allows its graduates to be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

The program has completed an on-site evaluation by the Accreditation Council for Occupational Therapy Education (ACOTE) and has been granted the full seven-year Accreditation Status. This allows its graduates to be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

Accreditation Council for Occupational Therapy Education, 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE’s telephone number c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org (http://www.acoteonline.org/).

Applications for this program are accepted online and require two parts to be completed separately. Like many entry-level programs across the country, KU uses the Occupational Therapy Centralized Application Service (OTCAS) as the first part of the application process. In the second part, supplemental materials are submitted to KU using an online application portal.

Detailed instructions on how to apply are posted on the Department of Occupational Therapy Education (https://www.kumc.edu/school-of-health-professions/academics/departments/occupational-therapy-education/academics/entry-level-otd/how-to-apply.html) website. Application materials are accepted July 21-October 1 for the class entering the program in August of the following fall. All application materials must be received by October 1 for an application to be complete and qualified for review. Candidates must have completed an Associate of Applied Science degree in occupational therapy or an equivalent degree program. The required coursework must be completed before applying for admission. Students who have completed less than 60 semester credits of coursework must submit an official transcript showing how their coursework will be articulated as part of the program. KU encourages the submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from all coursework taken at any institution also are required. Although an application may be submitted while coursework is in progress, the student’s plan for completion prior to entering the program must be articulated as part of the application. Students with degrees from institutions outside the U.S. may be subject to transcript evaluation to verify the degree is equivalent to a U.S. degree and the student meets the minimum cumulative grade-point average requirement.

Applicants must possess a cumulative grade-point average (GPA) of at least a 3.2 on a 4.0 scale for his or her bachelor's degree program and specifically a 3.2 GPA on the specific prerequisite courses. Information documented on student transcripts will be used to calculate all grade point averages. Consistent with University of Kansas policy (https://policy.ku.edu/governance/USRR/#art2sect12), the admissions committee will replace grades of classes that have been repeated.

KANSAS RESIDENTS ONLY: Early admission application materials are accepted July 21-August 31 for the class entering the program in August of the following fall. All application materials must be received by August 31 for an application to be complete and qualified for review to be considered for early admission. If materials are submitted after August 31 the application will be reviewed with all applications between July 21-October 1. Minimum criteria for early admissions applications:

1. GPA 3.80 or higher
2. Resident of Kansas

ADMISSION REQUIREMENTS:

• A bachelor's degree in any field from a regionally accredited institution is required and must be documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from all coursework taken at any institution also are required. Although an application may be submitted while coursework is in progress, the student's plan for completion prior to entering the program must be articulated as part of the application. Students with degrees from institutions outside the U.S. may be subject to transcript evaluation to verify the degree is equivalent to a U.S. degree and the student meets the minimum cumulative grade-point average requirement.

• Applicants must possess a cumulative grade-point average (GPA) of at least a 3.2 on a 4.0 scale for his or her bachelor's degree program and specifically a 3.2 GPA on the specific prerequisite courses. Information documented on student transcripts will be used to calculate all grade point averages. Consistent with University of Kansas policy (https://policy.ku.edu/governance/USRR/#art2sect12), the admissions committee will replace grades of classes that have been repeated.

• The following prerequisite courses are required: abnormal psychology, lifespan development/developmental psychology, statistics, ethics, human physiology, human anatomy with a lab, a social science course, and medical terminology. Specific requirements for prerequisite courses are as follows:
  • Each course (except labs and medical terminology) must be a minimum of three credit hours. Medical terminology may be one credit hour.
  • Students must complete prerequisite coursework before beginning the program.
  • A passing grade of “C” or higher is required in all prerequisite courses and an overall 3.0 (4.0 scale) GPA for prerequisite courses. A grade of “D” is not considered a passing grade.
  • It's suggested human anatomy and physiology courses are completed prior to applying; however, this requirement is evaluated on an individual basis and alternatives may be taken into consideration.

• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the minimum English proficiency requirement (http://catalog.ku.edu/graduate-studies/kumc/#admissiontext).

• As part of the online application, applicants will submit a personal statement describing why occupational therapy is their chosen career, and how a degree in OT will support the applicant's personal and professional goals. This statement should include an explanation of how personal, professional, and educational background and experience have prepared the applicant for this career decision and a future in occupational therapy.

• Applicants will also submit a 500-word (or less) statement of interest in which he or she provides information about the reasons why the program at the University of Kansas is of interest. Unlike the personal/professional statement submitted to OTCAS about occupational therapy as a profession, this Interest statement should be specifically about the entry-level doctor of occupational therapy program at KUMC.

• Three separate references are required and should be written by a professional, advisor, instructor, supervisor, coach, or other adult contacts who can attest to the applicant's potential success in
Degree requirements:

- A background check (http://catalog.ku.edu/graduate-studies/kumc/#admissiontext) is required during the admission process; it may affect the student's eligibility to enter the program. This one-time fee must be paid directly to the company performing the background investigation. A drug screening may also be required. More information: School of Health Professions background check and drug screening policy. (http://www.kumc.edu/school-of-health-professions/background-checks-and-drug-screening-for-students.html)

- Applicants who have been convicted of a felony should be aware of the fact that application for licensure, certification, or registration will be subject to review and additional information may be requested. Based on the review process, denial of licensure, certification, and/or registration may occur and subsequent opportunities for employment may be compromised.

- All accepted students must submit copies of current, valid CPR and First Aid certifications prior to the program start date and maintain certification while in the program. Students need to complete the Basic Life Support for Healthcare Providers training (https://cpr.heart.org/en/cpr-courses-and-kits/healthcare-professional/basic-life-support-bls-training) through the American Heart Association. Applicants will be assessed based on these requirements. Admission requirements are subject to change.

Entry-level OTD curriculum - This subplan allows students who possess the appropriate prerequisite course work and an undergraduate degree to pursue a 3-year clinical doctorate degree that includes academic, practicum, and fieldwork preparation for professional practice in a variety of OT settings. Capstone and fieldwork experiences are offered throughout the Kansas City community, the state of Kansas and, in some cases, in states other than Kansas. Upon completion, students are eligible for the OT certification examination administered by NBCOT.

Only students who have successfully completed the entire three-year program are eligible for this certification exam, which is required for legal employment as a practicing OT.

Degree requirements:

- All students are enrolled as full-time students, and degree requirements are normally completed within 3 years of admission to the program. All academic preparation, fieldwork, and capstone in the professional program must be completed within 4.5 years of the first date of matriculation into the program.

- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate coursework.

- Successful completion of all courses with the grade of “C” or higher.

- Successful completion of required Level II fieldwork experiences with the grade of “B” or higher. A part-time optional Level II fieldwork experience will not count toward satisfying this requirement.

- Successful completion of a minimum of 112 credit hours, including academic course work and fieldwork experiences.

- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

- Successful completion of the following courses:

TECHNICAL STANDARDS

Entry-Level Occupational Therapy Doctoral Degree (OTDE) Program

Because an entry-level Occupational Therapy Degree signifies that the holder is eligible to sit for the National Board for Certification in Occupational Therapy exam and signifies that the holder is prepared for entry into the profession of occupational therapy, it follows that graduates must have the knowledge and skills to function in a broad variety of clinical, community, or school-based situations and to render a wide spectrum of occupational therapy services.

The following technical standards, in conjunction with the academic standards, are requirements for admission, promotion, and graduation. The term “candidate” refers to candidates for admission to the program as well as current students who are candidates for retention, promotion, or graduation. KU School of Health Professions maintains a strong commitment to equal educational opportunities for qualified students with disabilities who apply for admission to the program or who are already enrolled. The technical standards are not intended to deter any candidate for whom reasonable accommodation will allow the fulfillment of the complete curriculum. Candidates with disabilities are encouraged to contact the Academic Accommodations Office at (913) 945-7035 or cucoko@kumc.edu early in the application process to begin a confidential conversation about what accommodations they may need to meet these standards. This process is informed by the knowledge that students with varied types of disabilities have the ability to become successful health professionals.

Essential Motor Skills: The candidate must:

- have fine motor skills essential to perform such tasks as writing, typing, and manipulation of objects (such as wheelchair features and adaptive equipment), splint making, material development, or maneuvering equipment.

Essential Sensory Skills: The candidate must:

- accurately perceive objects in the environment.
- accurately observe human performance. For example, the candidate must be able to discern between a safe and an unsafe environment and between therapeutic and non-therapeutic behavior and contexts.

Essential Communication Skills: The candidate must:

- assimilate information from written sources (texts, journals, medical or school records, etc).
- attain, comprehend, retain, and use new information presented in written formats.
- independently complete assignments, tests, and professional documentation appropriately, in a timely manner, and in appropriate format.
- impact information so that it can be understood by others.
- elicit information from instructors, peers, persons receiving services, family members, and supervisors.
- follow verbal or written instruction in order to complete assignments.
- note and respond to factual information provided by others as well as to the more subtle cues of mood, temperament, and social responses.
- communicate with others accurately, sensitively, effectively, and succinctly.
- communicate in a timely manner and in a way that is appropriate to the situation.

Essential Cognitive Skills: The candidate must:

A). Clinical Reasoning:
- make correct observations and have the skills of comprehension, measurement, calculation, reasoning, integration, analysis, and synthesis. For example, the candidate must have the skills to conduct assessments accurately, compute test scores, analyze results and determine the impact of this information on intervention, while synthesizing a variety of input.
- recognize, label, and categorize information to draw conclusions. Then the candidate must be able to question, analyze, and judge the results of their conclusion.

B). Judgment:
- demonstrate judgment in classroom, laboratory, and fieldwork settings which shows an ability to make mature, sensitive, and effective decisions in appropriate situations.
- relate appropriately to instructors, peers, supervisors, and persons being served. For example, when provided with constructive feedback from an instructor or supervisor, the candidate will adapt behavior accordingly.
- demonstrate professional behaviors, such as timeliness and regular attendance.

Essential Behavioral/Social Skills: The candidate must:

- exhibit professional behaviors and attitudes during their participation in the classroom and in clinical situations. This includes, but is
Physical Therapy, Rehabilitation Science, and Athletic Training

The department offers the following programs:

The Master of Science in Athletic Training (p. 675) (MSAT) program offers the required entry-level degree for students planning to become athletic trainers.

The Doctor of Physical Therapy (p. 678) (DPT) program offers the required entry-level degree for students planning to become physical therapists.

In conjunction with the DPT program, the following dual degree programs (p. 681) are offered:

1. A dual DPT/MBA (p. 681) degree program is available to outstanding DPT students interested in becoming physical therapists prepared for the complicated health finance and management fields with business knowledge and experience.

2. A dual DPT/MHSA (p. 681) degree program prepares DPT students for management and leadership positions in health care organizations.

3. A dual DPT/Ph.D. (p. 681) in rehabilitation science degree program is available to outstanding applicants with backgrounds in health-related sciences who wish to become physical therapists and engage in research related to rehabilitation science.

The Doctor of Philosophy (Ph.D.) in Rehabilitation Science (https://catalog.ku.edu/health-professions/physical-therapy-rehabilitation-science/phd/) program prepares outstanding leaders who advance innovative interdisciplinary research in rehabilitation science.

The Department of Physical Therapy, Rehabilitation Science, and Athletic Training is one of eight departments of the KU School of Health Professions at the KU Medical Center in Kansas City, KS.

Courses

ATTR 701. Foundations in Athletic Training. 1 Credits.
Introduction to foundational content and basic skills of clinical practice for the athletic training profession. Specific emphasis is placed on behavioral practices of healthcare professionals and clinical skills in patient management. Prerequisite: Admission into the MSAT program or permission of instructor.

ATTR 708. Applied Anatomy. 1 Credits.
This course introduces how to use anatomical knowledge to gather basic examination information about the patient. Learning opportunities include lecture and laboratory. Prerequisite: Admission into the MSAT program or permission of instructor.

ATTR 709. Advanced Topics in Human Anatomy. 6 Credits.
The student will obtain a basic understanding of human gross anatomy with specific knowledge of upper and lower extremities, head and neck, back and neural structures. At the end of this course the student will be able to apply this knowledge of anatomy to functional and clinical situations. Prerequisite: Admission into the MSAT program or permission of instructor.

ATTR 713. Integrated Clinical Education I. 2 Credits.
This course consists of supervised experiences in a clinical setting and seminar sessions that provide opportunities for application of didactic course work. Emphasis will be placed on developing communication, interpersonal, and documentation skills, as well as other athletic training skills and procedures that have been introduced in courses. Prerequisite: Successful completion of the first semester of the MSAT curriculum or permission of instructor.

ATTR 714. Evaluation & Management I. 4 Credits.
Review of integrative human pathophysiology with an emphasis upon homeostatic mechanisms and etiologies of disease. The interrelationships of function and dysfunction at the molecular, cellular and tissue level (pathology), organ and systemic level (impairment) and to the total human body (functional limitations) will be applied in each of the body systems. Discussions and applied materials will be tailored to the athletic trainer with an emphasis on clinical tools to medically screen patients for the presence of symptoms and signs. Prerequisite: Successful completion of the first semester of the MSAT curriculum or permission of instructor.

ATTR 716. Interventions I. 2 Credits.
Application of the skills obtained in clinical coursework and clinical problem-solving using common athletic training interventions. Prerequisite: Successful completion of the first semester of the MSAT curriculum or permission of instructor.

ATTR 718. Documentation and Health Informatics. 1 Credits.
Emphasizes the development of effective documentation skills, including exposure to a variety of documentation formats across various practice
setting and implications for proper reimbursement. Concepts of healthcare informatics are introduced including use of an electronic documentation systems and the capability of information systems to support quality care. Disablers classification models, behavioral objectives, and functional outcome concepts are applied to organize patient data and identify treatment goals. Prerequisite: Successful completion of the first semester of the MSAT curriculum or permission of instructor.

ATTR 719. Applied Kinesiology and Biomechanics. 4 Credits.
This course involves a study of joint structure and function, and biomechanical principles underlying human motion. Emphasis is placed on the application of kinesiological principles to athletic training situations. Learning opportunities include lecture and laboratory. Prerequisite: Successful completion of the first semester of the MSAT curriculum or permission of instructor.

ATTR 723. Integrated Clinical Education II. 2 Credits.
This course consists of supervised experiences in a clinical setting and seminar sessions that provide opportunities for application of didactic course work. Emphasis will be placed on developing communication, interpersonal, and documentation skills, as well as other athletic training skills and procedures that have been introduced in courses. Prerequisite: Successful completion of the first 2 semesters of the MSAT curriculum or permission of instructor.

ATTR 724. Evaluation & Management II. 6 Credits.
Builds on the foundation from anatomy, kinesiology and biomechanics. Examination skills and treatment interventions that apply specifically to the musculoskeletal system are provided. Basic examination skills, gait analysis, and therapeutic exercise are discussed and reviewed for common orthopedic conditions. The course will integrate instruction with case-based clinical problem solving. Prerequisite: Successful completion of the first 2 semesters of the MSAT curriculum or permission of instructor.

ATTR 725. Research Seminar. 1 Credits.
An introduction to research in evidence-based practice that allows students to develop clinical questions and integrate evidence into clinical practice. Emphasis is placed on clinical research pertinent to athletic training. Prerequisite: Successful completion of the first 2 semesters of the MSAT curriculum or permission of instructor.

ATTR 726. Interventions II. 4 Credits.
Application of the skills obtained in clinical coursework and clinical problem-solving using common athletic training treatment interventions. Prerequisite: Successful completion of the first 2 semesters of the MSAT curriculum or permission of the instructor.

ATTR 727. Clinical Reasoning I. 1 Credits.
Explores the nature of clinical reasoning and involves self-reflection, informed decision making, and medical ethics in managing patient care. Knowledge and skills from the curriculum taught to this point will be incorporated through the use of case studies and simulations within the students’ educational exposure. The Capstone Project will be introduced. Prerequisite: Successful completion of the first 2 semesters of the MSAT curriculum or permission of instructor.

ATTR 755. Pharmacology. 2 Credits.
Pharmacological background for the clinical treatment of patients. Fundamentals of the actions of drugs including mechanisms of therapeutic and adverse effects. Prerequisite: Successful completion of the first semester of the MSAT curriculum or permission of instructor.

ATTR 793. Integrated Clinical Education III. 1 Credits.
This course consists of supervised experiences in a clinical setting and seminar sessions that provide opportunities for application of didactic course work. Emphasis will be placed on developing communication, interpersonal, and documentation skills, as well as other athletic training skills and procedures that have been introduced in courses. Prerequisite: Successful completion of the first 3 semesters of the MSAT curriculum or permission of instructor.

ATTR 800. Independent Study. 1-8 Credits.
Individually negotiated learning experiences appropriate to the interests and background of the student. Prerequisite: Admission to the MSAT program, or permission of instructor.

ATTR 807. Clinical Reasoning II. 1 Credits.
Application and integration of clinical reasoning and medical ethics in managing patient care. Knowledge and skills from the curriculum taught to this point will be incorporated through the use of case studies and simulations within the students’ educational exposure. The Capstone Project will continue. Prerequisite: Successful completion of the first 3 semesters of the MSAT curriculum or permission of instructor.

ATTR 812. Health Care Administration. 2 Credits.
Contemporary issues in health care which impact the practice of athletic training in the health care system. Changes in the US health care system will be discussed, including managed care, plus essential elements and principles of management in health care organizations, and an overview of human resources and operational management. Financial management specifically reimbursement for patient services, risk management, information management, and compliance will be discussed. Discussion of professional development is intertwined throughout the course. Students will be exposed to business development and entrepreneurial skills needed to practice. Prerequisite: Successful completion of the first 3 semesters of the MSAT curriculum or permission of instructor.

ATTR 813. Clinical Experience I. 2 Credits.
An immersive clinical experience that allows for graduated autonomy in developing and providing patient centered skills for successful health care practice. The student will work alongside and under the supervision of a Preceptor to experience all aspects of athletic training practice. Prerequisite: Successful completion of the first 3 semesters of the MSAT curriculum or permission of instructor.

ATTR 814. Evaluation & Management III. 3 Credits.
Incorporates concepts from anatomy, kinesiology, basic biomechanics and knowledge of peripheral joint examination and treatment. Terminology, examination, evaluation, development of a treatment plan and treatment techniques and basic differential diagnosis skills for the head, neck, and spine are taught. Prerequisite: Successful completion of the first 3 semesters of the MSAT curriculum or permission of instructor.

ATTR 816. Interventions III. 2 Credits.
Application of the skills obtained in clinical coursework and clinical problem-solving using common athletic training interventions. Prerequisite: Successful completion of the first 3 semesters of the MSAT curriculum or permission of instructor.

ATTR 818. Medical Imaging. 1 Credits.
An introduction to medical imaging and an overview of its role in the health care delivery system. Topics include basic imaging equipment with an emphasis on digital acquisition and processing. Factors affecting the quality of images and limitations to the techniques are reviewed. Imaging techniques covered include: X-rays, CT scans, Nuclear medicine, ultrasound, MRI and PET. This course will include a component covering the microscopic anatomy of cells. Prerequisite: Successful completion of the first 3 semesters of the MSAT curriculum or permission of instructor.

ATTR 821. Athletic Training Seminar. 1 Credits.
Graduate seminar focusing on current issues in athletic training and preparation for the athletic training credentialing exam. Prerequisite:
Successful completion of the first 4 semesters of the MSAT curriculum or permission of instructor. Corequisite: ATTR 843.

**ATTR 822. Behavioral Health. 2 Credits.**
Exploration of the development and integration of behavioral, psychosocial, and biomedical science knowledge and techniques relevant to the understanding of health and illness. Content will include application of knowledge and techniques to patient centered care. Prerequisite: Successful completion of the first 4 semesters of the MSAT curriculum or permission of instructor. Corequisite: ATTR 843.

**ATTR 824. Performance Enhancement. 1 Credits.**
Development and application of interventions to optimize sport performance. Prerequisite: Successful completion of the first 4 semesters of the MSAT curriculum or permission of instructor. Corequisite: ATTR 843.

**ATTR 827. Clinical Reasoning III. 1 Credits.**
Application and integration of clinical reasoning and medical ethics in managing patient care. Knowledge and skills from the curriculum taught to this point will be incorporated through the use of case studies and simulations within the students’ educational exposure. The Capstone Project will continue. Prerequisite: Successful completion of the first 4 semesters of the MSAT curriculum or permission of instructor. Corequisite: ATTR 843.

**ATTR 843. Clinical Experience II. 4 Credits.**
An immersive clinical experience that allows for graduated autonomy in developing and providing patient centered skills for successful health care practice. The student will work alongside and under the supervision of a Preceptor to experience all aspects of athletic training practice. Prerequisite: Successful completion of the first 4 semesters of the MSAT curriculum or permission of instructor.

**ATTR 863. Integrated Clinical Education IV. 1 Credits.**
This course consists of supervised experiences in a clinical setting and seminar sessions that provide opportunities for application of didactic course work. Emphasis will be placed on developing communication, interpersonal, and documentation skills, as well as other athletic training skills and procedures that have been introduced in courses. Prerequisite: Successful completion of the first 4 semesters of the MSAT curriculum or permission of instructor. Corequisite: ATTR 843.

**ATTR 883. Clinical Experience III. 8 Credits.**
An immersive clinical experience that allows for graduated autonomy in developing and providing patient centered skills for successful health care practice. The student will work alongside and under the supervision of a Preceptor to experience all aspects of athletic training practice. Prerequisite: Successful completion of the first 5 semesters of the MSAT curriculum or permission of instructor.

### Courses

**PTRS 702. Physical Therapy Documentation and Health Informatics. 1 Credits.**
Emphasizes the development of effective documentation skills, including exposure to a variety of documentation formats across various practice setting and implications for proper reimbursement. Concepts of healthcare informatics are introduced including use of an electronic documentation systems and the capability of information systems to support quality care. Disablement classification models, behavioral objectives, and functional outcome concepts are applied to organize patient data and identify treatment goals. Prerequisite: Successful completion of semester 1 of the DPT curriculum or permission of instructor.

**PTRS 703. Applied Anatomy. 1 Credits.**
This course introduces the learner to how physical therapists use anatomical knowledge to gather basic examination information about the patient. Prerequisite: Admission into the DPT program or permission of instructor.

**PTRS 704. Physical Therapy Interventions I. 3 Credits.**
This course focuses on development of skills required by the physical therapist in the generalist acute care environment. Emphasis is placed on body mechanics, workplace safety, infection control, basic mobility assessment, transfers, positioning, line management, responding to clinical emergencies, wheelchair basics, therapeutic exercises, assistive devices, gait training, plan of care and discharge planning. Prerequisite: Successful completion of semester 1 of the DPT curriculum or permission of instructor.

**PTRS 705. Physical Therapy Interventions II. 4 Credits.**
This course will introduce the principles and application of therapeutic biophysical agents. Students will apply skills obtained in previous course work and begin clinical problem-solving using common physical therapy treatment interventions. Topics include integumentary management for wound healing interventions, therapeutic modalities with an emphasis on the healing process, and electrical modalities. Prerequisite: Successful completion of the first 2 semesters of the DPT curriculum or permission of the instructor.

**PTRS 710. Advanced Topics in Human Anatomy. 6 Credits.**
The student will obtain a basic understanding of human gross anatomy with specific knowledge of upper and lower extremities, head and neck, back and neural structures. At the end of this course the student will be able to apply this knowledge of anatomy to functional and clinical situations. Prerequisite: Admission into the DPT program or permission of instructor.

**PTRS 711. Applied Kinesiology and Biomechanics. 4 Credits.**
This course involves a study of joint structure and function, and biomechanical principles underlying human motion. Emphasis is placed on the application of kinesiological principles to clinical physical therapy situations. Prerequisite: Successful completion of semester 1 of DPT curriculum or permission of instructor.

**PTRS 720. Integrated Clinical Experience I. 1 Credits.**
This course consists of supervised experiences in a clinical setting and seminar sessions that provide preliminary opportunities for application of didactic course work. Emphasis will be placed on the development of communication and interpersonal skills in the clinical setting, as well as documentation and physical therapy skills and procedures that have been introduced in courses. Prerequisite: Successful completion of semester 1 of the DPT curriculum or permission of instructor.

**PTRS 730. Integrated Clinical Experience II. 1 Credits.**
This course consists of supervised experiences in a clinical setting and seminar sessions that provide preliminary opportunities for application of didactic course work. Emphasis will be placed on the development of communication and interpersonal skills in the clinical setting, as well as documentation and physical therapy skills and procedures that have been introduced in courses. Prerequisite: Successful completion of the first 2 semesters of the DPT curriculum or permission of instructor.

**PTRS 745. Orthopedic Physical Therapy I. 6 Credits.**
This course builds on the foundation from anatomy, kinesiology and biomechanics. Examination skills and treatment interventions that apply specifically to the musculoskeletal system are provided. Basic examination skills for all peripheral joints, gait analysis, and therapeutic exercise are discussed and reviewed for common orthopedic conditions. The course will integrate instruction with case-based clinical problem solving. Prerequisite: Successful completion of the first 2 semesters of the DPT curriculum or permission of instructor.

**PTRS 746. Musculoskeletal Conditions and Management. 3 Credits.**

Mastery of physical therapy subjective and objective examination and treatment intervention for patients of all ages who present with a musculoskeletal problem with emphasis on amputation, prosthetics, upper and lower extremity orthoses, fracture management and connective tissue disorders. Emphasis will be placed on the most common clinical problems and physical therapy diagnoses. Prerequisite: Successful completion of the first 2 semesters of the DPT curriculum or permission of instructor.

**PTRS 750. Research in Evidence-Based Physical Therapy Practice. 3 Credits.**

An introduction to research in the evidence-based physical therapy practice including the Scientific Method, library and multimedia resources, research process, measurement theory (reliability and validity), research designs, experimental design principles, research ethics, critical review and analysis of research publications, statistical concepts, and writing of a research report and/research proposal. Throughout, emphasis is placed on clinical research pertinent to physical therapy. Prerequisite: Successful completion of the first 2 semesters of the DPT curriculum or permission of instructor.

**PTRS 807. Ethics in Health Care. 1 Credits.**

This course covers the basic ethical concepts, principles, relevant theories, and ethical decision-making models applied to major contemporary health care issues and dilemmas facing health professionals. Development of skills for ethical clinical decision making is the focus. Prerequisites: Permission of instructor.

**PTRS 817. Ethics in Health Care. 2 Credits.**

This course covers basic ethical concepts, principles, relevant theories and ethical decision-making models applied to major contemporary health care issues and dilemmas facing health professionals. Development of skills for ethical clinical decision making is the focus. Prerequisite: Successful completion of the first 6 semesters of the DPT curriculum or permission of instructor.

**PTRS 825. Exercise Physiology. 3 Credits.**

This course will provide entry-level DPT students with the knowledge of the physiological functions and adaptations of the human body with exercise. Emphasis will be placed on familiarizing students with sound medical rationale and the basis for treatment considering the immediate and long-term effects of exercise. Prerequisite: Successful completion of the first 3 semesters of the DPT curriculum, or consent of the instructor.

**PTRS 826. Cardiopulmonary Physical Therapy. 5 Credits.**

Anatomy, physiology and pathophysiology of the cardiovascular and pulmonary systems are studied and related to clinical signs and symptoms. Students are introduced to common evaluation and treatment techniques, as well as the rationale for including physical therapy in the management of cardiopulmonary conditions. These topics are discussed in conjunction with case studies and current research. Prerequisite: Successful completion of the first 5 semesters of the DPT curriculum or permission of instructor.

**PTRS 828. Medical Imaging. 1 Credits.**

An introduction to medical imaging and an overview of its role in the health care delivery system. Topics include an introduction to basic imaging equipment with an emphasis on digital acquisition and processing. Factors affecting the quality of images and limitations to the techniques are reviewed. Imaging techniques covered include: X-rays, CT scans, Nuclear medicine, ultrasound, MRI and PET. This course will also include a component covering the microscopic anatomy of cells. Prerequisite: Admission to the DPT program or permission of instructor.

**PTRS 830. Integrated Clinical Experience III. 2 Credits.**

This course consists of supervised experiences in a clinical setting and seminar sessions that provide intermediate opportunities for application of didactic course work. Emphasis will be placed on the development of communication and interpersonal skills in the clinical setting, as well as documentation and physical therapy skills and procedures that have been introduced in courses. Prerequisite: Successful completion of the first 4 semesters of the DPT curriculum or permission of instructor.

**PTRS 833. Pediatric Physical Therapy. 3 Credits.**

This course introduces fundamental concepts necessary for the entry-level physical therapist to examine, evaluate, and treat the pediatric client. Lecture and lab experiences emphasize a problem oriented approach to physical therapy management of children with musculoskeletal, neurological, and/or cardiopulmonary impairments. Students will learn to recognize components of normal and abnormal development, particularly during the first year of life. Prerequisite: Successful completion of the first 5 semesters of the DPT curriculum or permission of instructor.

**PTRS 840. Integrated Clinical Experience IV. 2 Credits.**

This course consists of supervised experiences in a clinical setting and seminar sessions that provide intermediate opportunities for application of didactic course work. Emphasis will be placed on the development of communication and interpersonal skills in the clinical setting, as well as documentation and physical therapy skills and procedures that have been introduced in courses. Prerequisite: Successful completion of the first 5 semesters of the DPT curriculum or permission of instructor.

**PTRS 845. Orthopedic Physical Therapy II. 6 Credits.**

This course incorporates concepts from anatomy, kinesiology and basic biomechanics, and knowledge of peripheral joint examination and treatment. Terminology, examination, evaluation, development of a treatment plan and treatment techniques and basic differential diagnosis skills for the spine and the temporomandibular joint are taught. Prerequisite: Successful completion of the first 4 semesters of the DPT curriculum or permission of instructor.

**PTRS 846. Orthopedic Physical Therapy III. 3 Credits.**

This course incorporates concepts from anatomy, kinesiology, biomechanics, and Orthopedic Physical Therapy I and II courses. Terminology, examination, evaluation, development of a treatment plan and treatment techniques and advanced differential diagnosis skills for complex peripheral and/or spinal disorders are taught. Prerequisite: Successful completion of the first 6 semesters of the DPT curriculum or permission of instructor.

**PTRS 852. Neurologic Physical Therapy and Rehabilitation I. 6 Credits.**

This course will introduce the principles of neuroscience and describe their application as relevant to physical therapists. The course will introduce the terminology of the nervous system and cover the major functions of the nervous systems. This course will also integrate neurophysiology and neuroanatomy into the clinical presentation of adults with neurologic pathology. The etiology, epidemiology signs, and symptoms of selected neurological conditions will be presented. The medical management of patients with nervous system disorders will be presented in relationship to the practice of physical therapy. The course
will introduce examination of impairments for persons with neuromuscular pathologies. Students will be presented with simple case studies and progress to more complex patient problems. Prerequisite: Successful completion of the first 4 semesters of the DPT curriculum or permission of instructor.

PTRS 853. Neurologic Physical Therapy and Rehabilitation II. 6 Credits.
This course will focus on rehabilitation approaches for people with neurologic pathology. Students will examine factors that contribute to the control of voluntary movement and the learning of motor skills, and develop an understanding of the relationship between the brain and the purposeful movements that make us human. Students will acquire the skills to hypothesize about the relationship of health conditions and body function/structure to limitations in activities and participation in adults with neurologic pathology. A clinical decision making approach will combine contemporary rehabilitation approaches, consideration of psychosocial and cognitive factors, and research evidence in the discussion of complex patient cases. After completing this course, students will demonstrate novice-level knowledge and skills necessary to complete a physical therapy examination and develop a comprehensive treatment plan for adults with neurologic pathology. Prerequisite: Successful completion of the first 5 semesters of the DPT curriculum or permission of the instructor.

PTRS 855. Pharmacology for Physical Therapists. 2 Credits.
Pharmacological background for the clinical treatment of patients referred to physical therapy. Fundamentals of the actions of drugs including mechanisms of therapeutic and adverse effects. Prerequisite: Successful completion of semester 1 of the DPT curriculum or permission of instructor.

PTRS 860. Evidence-Based Research Practicum I. 1 Credits.
Supervised and directed experiences in conducting evidence-based research activities. The research activities involved in this course are broadly defined with emphasis on the enhancement of evidence-based physical therapy practice. The student will be supervised by a member of the faculty. This course is the first of a two-part series of courses, including PTRS 861. Prerequisite: Successful completion of the first 3 semesters of the DPT curriculum or permission of instructor.

PTRS 861. Evidence-Based Research Practicum II. 1 Credits.
Supervised and directed experiences in conducting evidence-based research activities. The research activities involved in this course are broadly defined with emphasis on the presentation and communication of an evidence-based research project. The student will be supervised by a member of the faculty. This course is the second of a two-part series of courses, including PTRS 860. Prerequisite: Successful completion of the first 6 semesters of the DPT curriculum, or consent of instructor.

PTRS 865. Independent Study. 1-3 Credits.
Individually negotiated learning experiences appropriate to the interests and background of the student. Prerequisite: Admission to the DPT program, or permission of instructor.

PTRS 877. Administration in Physical Therapy. 2 Credits.
Designed to familiarize the entry-level therapist with contemporary issues in health care which impact the practice of physical therapy in the health care system. Changes in the US health care system will be discussed, including managed care, plus essential elements and principles of management in health care organizations, and an overview of human resources and operational management. Financial management specifically reimbursement for patient services, risk management, information management, and compliance will be discussed. Discussion of professional development is intertwined throughout the course. Students will be exposed to business development and entrepreneurial skills needed to expand or start up a physical therapy practice. Prerequisite: Successful completion of the first 3 semesters of the DPT curriculum or permission of instructor.

PTRS 882. Pathophysiology and Physical Therapist Screens. 6 Credits.
Review of integrative human pathophysiology with an emphasis upon homeostatic mechanisms and etiologies of disease. The interrelationships of function and dysfunction at the molecular, cellular and tissue level (pathology), organ and systemic level (impairment) and to the total human body (functional limitations) will be applied in each of the body systems. Discussions and applied materials will be tailored to the physical therapist with an emphasis on clinical tools to medically screen patients for the presence of symptoms and signs. Prerequisite: Successful completion of semester 1 of the DPT curriculum or permission of instructor.

PTRS 890. Specialities in Physical Therapy Practice. 2 Credits.
Requires students to apply the five elements of patient/client management for addressing multi-system impairments across diverse and complex patient populations. Exposure to physical therapy advanced practice specialty areas included, but not limited to, sport medicine, women's health, neurology, pediatrics, geriatrics, and oncology. Seminar format instruction incorporating case-based instruction, group discussion, and speakers with advanced clinical credentials. Prerequisite: Successful completion of the first 6 semesters of the DPT curriculum or permission of instructor.

PTRS 920. Full-Time Clinical Experience I. 6-8 Credits.
Nine to twelve weeks of full-time clinical experience. During the clinical rotation, the student will have the opportunity to develop the patient care skills needed for successful practice as a physical therapist. The student will work under the supervision of an experienced physical therapist in clinical settings affiliated with the program. Prerequisite: Successful completion of the first 7 semesters of the DPT curriculum or permission of instructor.

PTRS 921. Full-Time Clinical Experience II. 6-8 Credits.
Nine to twelve weeks of full-time clinical experience. During the clinical rotation, the student will have the opportunity to develop the patient care skills needed for successful practice as a physical therapist. The student will work under the supervision of an experienced physical therapist in clinical settings affiliated with the program. Prerequisite: Successful completion of the first 7 semesters of the DPT curriculum or permission of instructor.

PTRS 922. Full-Time Clinical Experience III. 6-8 Credits.
Nine to twelve weeks of full-time clinical experience. During the clinical rotation, the student will have the opportunity to develop the patient care skills needed for successful practice as a physical therapist. The student will work under the supervision of an experienced physical therapist in clinical settings affiliated with the program. Prerequisite: Successful completion of the first 7 semesters of the DPT curriculum or permission of instructor.

PTRS 923. Full-Time Clinical Experience IV. 2-6 Credits.
Three to nine weeks of full-time clinical experience. During the clinical rotation the student will have the opportunity to develop the patient care skills needed for successful practice as a physical therapist. The student will work under the supervision of an experienced physical therapist in clinical settings affiliated with the program. Prerequisite: Successful completion of the first 7 semesters of the DPT curriculum or permission of instructor.

PTRS 924. Specialized Clinical Experience. 1-6 Credits.
One and a half to nine weeks of clinical experience. During the clinical rotation the student will have the opportunity to have exposure to a different health care system such as an international clinical experience,
or a specialized area of physical therapy practice. The student will be under the supervision of an experienced physical therapist in clinical settings affiliated with the program. Prerequisite: Successful completion of the first 7 semesters of the DPT curriculum or permission of instructor.

Courses

REHS 760. Introduction to Matlab Programming. 1 Credits.
Introduction: matlab windows, input-output, file types, general commands; interactive computation; matrices and vectors, matrix and array operations, scripts and functions applications, graphics. Prerequisite: None

REHS 803. Research Observations. 1 Credits.
Students will be introduced to different types of research projects conducted in the department. Students will rotate in up to three research laboratories, sequentially, during a semester. The course is designed to help students select a faculty researcher to mentor them in their dissertation research. Prerequisite: Entry into the PhD in Rehabilitation Science program.

REHS 805. Seminar in Rehabilitation Science. 1 Credits.
Students will become familiar with the organization of an experimental scientific paper and learn how to critically assess papers in the field of rehabilitation science. Students will develop writing skills by summarizing scientific papers and communication skills by orally presenting and discussing research literature with his/her peers and colleagues, course coordinator and other faculty members. Prerequisite: Entry in the PhD program in Rehabilitation Science or permission of instructor.

REHS 856. Research Design and Methods I. 2 Credits.
An introduction to research design and methods including library and multimedia resources; research process; measurement theory (reliability and validity); experimental design principles; single subject design and other non-experimental design; critical thinking skill and procedure; critical review and analysis of a research article; basic scientific writing skills; and skills in writing a research report/manuscript. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 857. Research Design and Methods II. 2 Credits.
An introduction to research design and method including critically appraising the state of art on a research topic; conducting a systematic review of literature; basic concept of statistical analysis, performing and interpreting data analysis using parametric, non-parametric, or correlational analyses; preparation of a research proposal focusing on study rational, novelty, and research questions and hypotheses; ethical issues related to research; basic knowledge of bioinformatics; meta-analysis; and writing of a research proposal. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 862. Cellular and Molecular Basis of Rehabilitation. 2 Credits.
A study of the biology, at the cellular and molecular levels, of pathological processes that impair human function will highlight the mechanisms by which cells/tissues repair and/or adapt following disease/injury or aging. Emphasis will be placed on the body’s endogenous ability for rehabilitation or adaptation to disease/injury. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 864. Introduction to Rehabilitation Science. 3 Credits.
This course provides introduction to and overview of rehabilitation science, an interdisciplinary field of study that focuses on restoring functional capacity in a person and improving their interactions with the surrounding environment. Different areas of rehabilitation science will be presented. Features of the pathological conditions and targeted individuals, factors that contribute to the outcomes of the rehabilitation, research tools and measurements, potential optimal rehabilitation techniques, and directions of future research will be discussed. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 865. Independent Study. 1-3 Credits.
Individually negotiated learning experiences appropriate to the interests and background of the student. Prerequisite: Entry in the PhD in Rehabilitation Science program, or permission of instructor. IND

REHS 866. Developing Research Aims in Rehabilitation Science. 2 Credits.
Students will practice writing specific aims, hypothesis and general study design of a research proposal. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 870. Teaching Practicum. 1-3 Credits.
Directed experiences in a planned instructional activity. Student will write course objectives, plan and deliver lectures, produce practical and written exams and assign grades. Prerequisite: Entry in the PhD in Rehabilitation Science program or consent of instructor.

REHS 873. Research Practicum. 1-3 Credits.
This course is designed to provide supervised research experience in various laboratories in the department. Prerequisite: Entry in the PhD in Rehabilitation Science program, or consent of instructor.

REHS 875. Clinical Practicum. 1-3 Credits.
Specialized clinical training in a highly specific area of specialization. The primary purpose of this course is for the student to develop advanced clinical skills in his/her area of specialization. Prerequisite: Admission to the PhD in Rehabilitation Science program, and permission of instructor.

REHS 884. Motor Control and Learning. 3 Credits.
The course will explore the study of the conditions and factors that influence the acquisition, control, and performance of motor skills. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 886. Musculoskeletal Rehabilitation. 3 Credits.
This course will explore the current concepts in musculoskeletal rehabilitation. The healing process of different types of tissue will be reviewed. The pathophysiological mechanisms of pain and acute and chronic injuries will be studied. Examination, evaluation and treatment interventions for the principal musculoskeletal conditions will be reviewed and discussed. Current scientific literature will be investigated and group discussions will be directed to scientific evidence for the variety of rehabilitation practices in musculoskeletal conditions. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 887. Neurehabilitation. 3 Credits.
This course will provide an overview of the evidence of neurehabilitation interventions on all domains of the International Classification of Functioning in various neurological conditions. Following a review of neuroanatomy, neuropsychology, and clinical presentation of common neurological conditions, principles of neuroplasticity and functional re-organization in neurehabilitation will be outlined. Evidence of traditional concepts and emerging therapies in neurehabilitation will be presented. Prerequisite: Entry into the PhD in Rehabilitation Science program or permission of instructor.

REHS 889. Grant Writing. 3 Credits.
Research proposal writing for PhD comprehensive examinations and grant applications to federal and private funding agencies including all elements of the grant proposal - aims, innovation, significance and design. The process of grant proposal submission, review and resubmission
is covered. Prerequisite: Current enrollment in a recognized graduate degree program or permission of instructor.

**REHS 970. Instrumented Analysis of Human Biomechanical Function.** 3 Credits.
An in-depth study that provides critical analysis of equipment and other resources used in analyzing human motion, balance, strength, electrophysiological responses, and cardiorespiratory function. Students will be required to conduct a preliminary study, including design, methodology and data collection using one or more of these instruments. Prerequisite: Entry in the PhD in Rehabilitation Science program, or consent of instructor.

**REHS 980. Graduate Research.** 1-10 Credits.
Original laboratory investigation conducted under the supervision of a senior staff member. Prerequisite: Entry in the PhD in Rehabilitation Science program, or consent of instructor.

**REHS 990. Dissertation in Rehabilitation Science.** 1-10 Credits.
For students in advanced standing enrolled in the PhD in Rehabilitation Science program.

---

**Master of Science in Athletic Training**

The KU Master of Science in Athletic Training (https://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/ms-in-athletic-training.html) (MSAT) program is a 2-year full-time graduate program designed to prepare an entry-level practitioner and foster lifelong professional development. The program begins the Tuesday after Memorial Day and includes classroom, laboratory, scholarship, and clinical education opportunities.

As a leader in academic health sciences, the KU Medical Center (http://www.kumc.edu/) provides ample opportunity for athletic training students to interact with a large number of health care professionals as well as students from other disciplines.

**The master of science in athletic training at the University of Kansas is accredited by the Commission on Accreditation of Athletic Training Education (CAATE) (https://caate.net/).** 2001 K Street NW, 3rd Floor North, Washington, DC 20006; telephone: 512-733-9700. The KU athletic training program is compliant with all standards and received the maximum initial accreditation of five years. The next comprehensive program review will be in 2027-2028.

---

**Application Process**

Applications for this program are submitted online through the Athletic Training Centralized Application System (https://atcas.liaisoncas.com/applicant-ux/#/login) (ATCAS). Students accepted into the program must submit a secondary application using the KU online application (https://www.kumc.edu/academic-and-student-affairs/departments/registrars-office/admissions/online-application.html). Instructions for the secondary application are provided to students in their letter of offer.

Information on how to apply (http://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/ms-in-athletic-training/how-to-apply.html) is posted on the Master of Science in Athletic Training (https://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/ms-in-athletic-training.html) (MSAT) website. Students are admitted to begin during the summer semester only. Application materials are accepted July 1-March 15 for the class entering the program during the summer semester (Tuesday after Memorial Day). Review of applications will begin as they are received in ATCAS. All application materials should be received by March 15 for consideration. If space is available after the March 15 deadline, new or completed applications may be considered.

---

**Admission Requirements**

**The Graduate Record Examination (GRE) is not required for this program.**

**Undergraduate degree:** A bachelor’s degree in any field from a regionally accredited institution must be completed prior to the start of the program. Students may apply while course work still is in progress, but a plan for completion prior to entering the program must be articulated as part of the application. Students with degrees from institutions outside the U.S. may be subject to transcript evaluation to verify the degree is equivalent to a U.S. degree and the student meets the minimum cumulative grade-point average requirement. Prior to an offer of acceptance, the program may petition the graduate school for Individuals who have less than a 3.0 (on a 4.0 scale) on the transcript from the institution where their undergraduate degree was granted.

**Transcripts:** Official transcripts from all course work taken at any institution should be sent directly to the program via ATCAS. Students may not receive transcripts and forward them.

**Grade point average:** Applicants must possess an overall and prerequisite grade point average of 3.0 (on a 4.0 scale) to be eligible for this program. In addition, official student transcripts must document an individual course grade of no less than "C" on each prerequisite course. Information documented on student transcripts will be used to calculate all grade point averages. Consistent with University of Kansas policy, the admissions committee will replace grades of classes that have been repeated.

**Prerequisite courses:** Please note the following requirements related to prerequisite course work.

All prerequisite courses must be from a regionally accredited institution.

A single course may not be used to fulfill more than one prerequisite requirement (except a combined human anatomy/physiology class that is five (5) semester credits or greater and includes a laboratory may be used to fulfill both the anatomy and physiology requirements).

All prerequisite course work must be taken for a grade. Classes scored as pass/fail, credit/noncredit, or satisfactory/unsatisfactory are not acceptable. However CLEP, ACT and advanced placement credits are acceptable when officially documented on a college transcript.

All prerequisite course work must be completed before the start of the program. Preference will be given to students having completed at least 80% of the prerequisites at the time of application.

If a prerequisite course is taken more than once (even if at different universities), all instances that appear on the official transcript must be reported. The grades from the best score on each class will be used in prerequisite GPA calculations.

All courses below must be completed with the minimum grade "C" within the last 10 years.

**Required Courses:**

- Biology with lab (4 credits)
- Human anatomy with lab (4 credits)
• Human physiology with lab (4 credits)*
• Kinesiology, biomechanics, or human movement analysis course (3 credits)
• Exercise physiology (3 credits)
• Personal health, community health, or wellness (3 credits)
• Nutrition (3 credits)
• Psychology (3 credits)
• Physics with lab (4 credits)
• Chemistry with lab (4 credits)
• Statistics (3 credits)

* When taken together, two semesters of human anatomy and physiology (with laboratory) can fulfill this requirement. Alternatively, a single combined human anatomy and physiology course (with laboratory) of five semester credits or greater will meet the requirement.

References: Two references are required. One must be from a credentialed athletic trainer or international equivalent. The other should be from a faculty member, advisor, employer, etc. who can objectively attest to the applicant's aptitude, experience, and character. The recommendations may not be obtained from family members, friends, etc.

Background check: A background check (p. 2456) is required during the admission process; it may affect the student's eligibility to enter the program. This fee must be paid directly to the company performing the background investigation. A drug screening may also be required. More information: School of Health Professions background check and drug screening policy (http://www.kumc.edu/school-of-health-professions/background-checks-and-drug-screening-for-students.html). Applicants who have been convicted of a felony should be aware of the fact that application for licensure, certification, or registration will be subject to review and additional information may be requested. Based on the review process, denial of licensure, certification, and/or registration may occur and subsequent opportunities for employment may be compromised.

English Language Proficiency: Applicants whose native language is not English, whether domestic or international (http://www.kumc.edu/school-of-health-professions/information-for-international-applicants.html), must demonstrate they meet the minimum English proficiency requirement. Please see the Academic English Requirements (https://www.kumc.edu/academic-and-student-affairs/departments/office-of-international-programs/inbound-programs/information-for-students/academic-english-requirements.html) page regarding forms of verification.

Recommended observation: Applicants are expected to have a general understanding of health care and athletic training. Although KU does not require specific hours be documented, applicants are encouraged to invest the time needed to acquire knowledge of the role of athletic trainers in health care through a minimum of 40 hours of observation or volunteer experience with a credentialed athletic trainer.

Program Requirements

The Master of Science in Athletic Training is accredited by the Commission on Accreditation of Athletic Training Education (CAATE) (https://caate.net/). The master's degree program in athletic training prepares students for a career as an entry-level athletic trainer. The program includes classroom, laboratory, scholarship, and clinical education opportunities.

Degree requirements are normally completed within two years of admission to the program although a maximum of seven years is allowed per university policy.

Degree Requirements

• Successful completion of a minimum of 68 credit hours.
• Successful completion of all required clinical experiences.
• Cumulative grade-point average of at least 3.0 for all KU graduate course work.
• Enrollment in a minimum of one credit hour during the semester the student will graduate.
• Successful completion of the clinical reasoning capstone project.
• Successful completion of the following courses:

### Technical Standards
The KU Master of Science in Athletic Training (https://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/ms-in-athletic-training.html) program intends for its graduates to become competent and compassionate health care providers who are capable of entering the profession and meeting all requirements for credentialing as athletic trainers. Students are expected to develop a robust knowledge base and the requisite clinical skills, with the ability to appropriately apply their knowledge and skills, effectively interpret information, and contribute to patient-centered decisions across a broad spectrum of situations and settings related to athletic training.

The following technical standards, in conjunction with the academic standards, are requirements for admission, retention, and graduation. The term “candidate” refers to candidates for admission to the athletic training program as well as current athletic training students who are candidates for retention and graduation. The KU Master of Science in Athletic Training program maintains a strong commitment to equal educational opportunities for qualified students with disabilities who apply for admission to the program or who are already enrolled. The technical standards are not intended to deter any candidate for whom reasonable accommodation will allow the fulfillment of the complete curriculum. Candidates with disabilities are encouraged to contact the Academic Accommodations Office at (913) 945-7035 or cukoko@kumc.edu early in the application process to begin a confidential conversation about what accommodations they may need to meet these standards. This process is informed by the knowledge that students with varied types of disabilities have the ability to become successful health professionals.

### Observation
Candidates must acquire information as presented through demonstrations and experiences in the foundational sciences. Candidates must also:

- Evaluate patients accurately and assess their relevant health, behavioral, and medical information.
- Obtain and interpret information through a comprehensive assessment of patients, correctly interpret diagnostic representations of patients’ physiologic data, and accurately evaluate patients’ conditions and responses.
- Clinical Skills: Candidates must perform physical examinations and diagnostic maneuvers. These activities require some physical mobility, coordination of both gross and fine motor neuromuscular function, balance, and equilibrium. Candidates must also:
  - Provide general care and emergency treatment for patients and respond to emergency situations in a timely manner.
  - Meet applicable safety standards for the environment and follow universal precaution procedures.

### Communication
Candidates must exhibit interpersonal skills to enable effective caregiving of patients/clients. Candidates must also:

- Communicate effectively with all members of a multidisciplinary health care team, patients/clients, and those supporting patients/clients, in person and in writing.
- Clearly and accurately record information and accurately interpret verbal and nonverbal communication.

### Clinical Reasoning
Candidates must effectively interpret, assimilate, and understand complex information required to function within the athletic training curriculum. Candidates must also:

- Comprehend three-dimensional relationships and understand the spatial relationships of structures.
- Effectively participate in individual, small-group, and lecture learning modalities in the classroom, clinical, and community settings.
- Learn, participate, collaborate, and contribute as a part of a team.
- Synthesize information both in person and via remote technology.
- Interpret causal connections and make accurate, fact-based conclusions based on available data and information.
- Formulate a hypothesis and investigate potential answers and outcomes.
- Reach appropriate and accurate conclusions.

### Judgment
Candidates must exercise good judgment; promptly complete all responsibilities attendant to the diagnosis and care of patients; and develop mature, sensitive, and effective relationships with patients. Candidates must also:

- Effectively handle and manage heavy workloads, function effectively under stress.
- Adapt to changing environments, display flexibility, and learn to function in the face of the uncertainties inherent in the clinical problems of patients.
Behavioral and Social Attributes: Candidates are expected to exhibit professionalism, personal accountability, compassion, integrity, concern for others, and interpersonal skills. Candidates must:

- Accept and apply feedback and to respect boundaries.
- Care for all individuals in a respectful and effective manner regardless of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, genetic information, or any other protected status.

Professional Expectations: Candidates must understand, and function within, the legal and ethical aspects of the practice of athletic training. Candidates must also:

- Maintain and display ethical and moral behaviors commensurate with the role of an athletic trainer in all interactions with patients, faculty, staff, students, and the public.
- Maintain interest and motivation throughout the educational processes.

*The term "patient" throughout the document, refers to both patients and clients as referenced in the Standards and Procedures for Accreditation of Professional Programs in Athletic Training. ([https://caate.net/Programs/Professional/Professional-Program-Standards/](https://caate.net/Programs/Professional/Professional-Program-Standards/))

Revised by KUMC Office of Student Affairs, Office of General Counsel, Academic Accommodation Services and MSAT program: 11-2020.

Doctor of Physical Therapy

The KU Doctor of Physical Therapy (DPT) program is an accredited 3-year full-time graduate program designed to prepare a generalist physical therapy practitioner and to foster lifelong professional development. The program begins in late May or early June and includes classroom, laboratory, research and clinical learning experiences. Students participate in 36 weeks of full-time clinical experiences at clinical affiliate sites in the last year of the program.

As a leader in academic health sciences, the KU Medical Center provides ample opportunity for physical therapy students to interact with a large number of health care professionals as well as students from other disciplines.

Applications for this program are submitted online through the Physical Therapist Centralized Application Service (http://www.ptcas.org/home.aspx) (PTCAS). Detailed instructions on how to apply are available on the Department of Physical Therapy, Rehabilitation Science (http://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/doctor-of-physical-therapy/how-to-apply.html), and Athletic Training (http://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/doctor-of-physical-therapy/how-to-apply.html) website. Students are only admitted one time per year and start in the summer semester. The application deadline and program start dates may vary slightly from year to year. The deadline is usually around but no earlier than November 1st. Specific dates for each admissions cycle can be found on the PTCAS program page (https://ptcasdirectory.apta.org/523/University-of-Kansas-Medical-Center/).

Admission Requirements:

- A bachelor's degree from a regionally accredited institution is required and must be documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts for all courses taken from all institutions attended are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative grade-point average requirement.

- Applicants must possess a cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for his or her bachelor's degree program. Historically, applicants accepted to this program have had a cumulative GPA significantly higher than 3.0.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the minimum English proficiency requirement.

- A background check is required during the admission process and may affect the student's eligibility to enter the program.

- Prior to entering the program, applicants must have completed the prerequisite courses in basic sciences, mathematics, humanities and social sciences with a grade of "C" or higher on each and a minimum 3.0 grade-point average on a 4.0 scale. Pass/fail, credit/ non-credit or satisfactory/unsatisfactory scores are generally not acceptable; however, CLEP, ACT and Advanced Placement credits are acceptable when officially documented on a college transcript.

- All prerequisite basic science courses must have been completed within the last ten years.

- Three references are required, one of which must be from a physical therapist. It is recommended that the other two references be from a faculty member, advisor, employer and/or other person who can objectively attest to the applicant's aptitude, experience, and character.

- Applicants are expected to possess a general understanding of health care and physical therapy based upon prior employment, observation or volunteer experiences. Although KU does not require specific hours be documented, applicants are encouraged to invest the time needed to acquire knowledge of the role of physical therapists in health care.

Applicants will be assessed based on these requirements. After an applicant has been admitted, the program may grant a deferral of an applicant's admission for one year after which time the applicant must submit a new application unless an additional deferral is granted.

With the exception of Graduate Studies requirements, the KU Department of Physical Therapy, Rehabilitation Science, and Athletic Training reserves the right to waive any documentation normally required and to accept or deny admission whenever it believes sufficient information exists to make a decision. Admission requirements are subject to change. Other years' catalogs».

Please note the following requirements related to prerequisite course work:

- A single course may not be used to fulfill more than one prerequisite requirement (except a combined human anatomy/physiology class that is five semester credits or greater and includes a laboratory may be used to fulfill both the anatomy and physiology requirements).

- All prerequisite course work must be taken for a grade. Classes scored as pass/fail, credit/noncredit or satisfactory/unsatisfactory are generally not acceptable. However CLEP, ACT and Advanced Placement credits are acceptable when officially documented on a college transcript.
• All prerequisite course work must be completed before the start of the program. Preference will be given to students having completed at least 80% of the prerequisites at the time of application.

• If a prerequisite course is taken more than once (even if at different universities), all instances that appear on the official transcript must be reported. The grades from the best score on each class will be used in prerequisite GPA calculations.

Recommended Courses

The following courses are not required for admission, and grades from these courses will not be included in any prerequisite GPA calculations. However, our faculty believes incoming students will benefit tremendously from having taken these courses. Therefore, we strongly recommend these courses to prospective applicants:

• One course in exercise physiology.
• Courses that involve strong writing and communication skills.
• One course in kinesiology. This course should introduce the student to the anatomical and mechanical principles of human movement.

The Doctor of Physical Therapy (DPT) program at the University of Kansas is currently accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) (http://www.capteonline.org/home.aspx). The program is designed to prepare a generalist physical therapy practitioner and to foster lifelong professional development. The program includes classroom, laboratory, research and clinical learning experiences.

Degree Requirements:

• Degree requirements are normally completed within 3 years of admission to the program although a maximum of 8 years is allowed.
• Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
• Successful completion of the University’s Research Skills and Responsible Scholarship (http://catalog.ku.edu/graduate-studies/kumc/programtext) requirement prior to starting full-time clinical experiences.
• Successful completion of PTRS 750 Research in Evidence-Based Physical Therapy Practice, PTRS 860 Evidence-Based Research Practicum I, and PTRS 861 Evidence-Based Research Practicum II meets the Research Skills requirement.
• Successful completion of PTRS 817 Ethics in Health Care meets the Responsible Scholarship requirement.

• Successful completion of a minimum of 110 credit hours.
• Successful participation in 36 weeks of clinical experiences as outlined in options 1 and 2 below.
• Successful completion of a research practicum. This requirement is met by completing the PTRS 860 Evidence-Based Research Practicum I and PTRS 861 Evidence-Based Research Practicum II courses.
• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

• Successful completion of the following PTRS courses:

<table>

Options for completing the Clinical Experience requirement (minimum 24 credit hours).

**Option 1 for Fulfilling Clinical Experience Requirement**
The student enrolls in three 12-week experiences, two in the Fall and one in the Spring.

- PTRS 920 Full-Time Clinical Experience I 8
- PTRS 921 Full-Time Clinical Experience II 8
- PTRS 922 Full-Time Clinical Experience III 8

**Option 2 for Fulfilling Clinical Experience Requirement**
The student enrolls in four 9-week experiences, two in the Fall and two in the Spring.

- PTRS 920 Full-Time Clinical Experience I 6
- PTRS 921 Full-Time Clinical Experience II 6
- PTRS 922 Full-Time Clinical Experience III 6
- PTRS 923 Full-Time Clinical Experience IV 6

Students electing to pursue an international clinical experience or specialized clinical experience enroll in PTRS 924 Specialized Clinical Experience as an elective 1-6 credit hour course. The student enrolls in this course the semester they participate in the international clinical experience or specialized clinical experience. The number of credit hours for the course (1-6) are clinic-specific. The total number of credit hours for the clinical experience requirement (24) will remain the same for those completing an international clinical experience or specialized clinical experience under PTRS 924 Specialized Clinical Experience. However, the total number of credit hours of either PTRS 920 Full-Time Clinical Experience I, PTRS 921 Full-Time Clinical Experience II or PTRS 922 Full-Time Clinical Experience III will be decreased during the semester of the international clinical experience by the number of credit hours the student enrolls in for PTRS 924.

| Total Hours | 6 | 14 | 16 |
A dual Doctor of Physical Therapy (DPT) program is available to outstanding DPT students interested in becoming DPT and Master of Business Administration (MBA) or DPT and Master of Health Services Administration (MHSA) graduates. The DPT/MBA program is offered through the University of Kansas School of Business in Lawrence, Kansas, and consists of 34 credit hours of MBA coursework in the dual program. The DPT/MBA program can be completed in 4 years. Students will complete the MBA portion in one academic year, after successfully completing the first two years in the DPT curriculum. After finishing the MBA curriculum students return to the DPT curriculum to complete the final, third year. In the summer prior to the final year in the DPT curriculum, students enroll in PTRS 924 to complete an MBA project and prepare for DPT full-time clinical experiences. The DPT program requirements for graduation remain the same for students completing this dual degree program.

Students must be accepted into the DPT program in order to enter the DPT/MBA program. Interested students may apply during the second year of their DPT program to be accepted into the MBA program. The MBA program is offered through the University of Kansas School of Business in Lawrence, Kansas, and consists of 34 credit hours of MBA coursework in the dual program. The DPT/MBA program can be completed in 4 years. Students will complete the MBA portion in one academic year, after successfully completing the first two years in the DPT curriculum. After finishing the MBA curriculum students return to the DPT curriculum to complete the final, third year. In the summer prior to the final year in the DPT curriculum, students enroll in PTRS 924 to complete an MBA project and prepare for DPT full-time clinical experiences. The DPT program requirements for graduation remain the same for students completing this dual degree program.

In order to continue participating in the MBA component in the dual program, students must remain in good academic standing in the DPT program, including a minimum 3.0 grade point average in both programs. Students will not receive their MBA degree before the DPT is awarded. Any student who does not successfully complete the DPT program will need to take the 15 credit hours of MBA coursework that were waived by virtue of being in the dual DPT/MBA program, in order to earn the MBA degree.

A dual DPT and Master of Health Services Administration (MHSA) (p. 2119) degree program prepares DPT students for management and leadership positions in health care organizations. The MHSA portion of the curriculum combines social science and business content in the context of health care. As the health care environment becomes more complex and competitive, administrative skills will be important to individuals starting careers in physical therapy.

Students must be accepted into the DPT program in order to enter the DPT/MHSA program. Current DPT students interested in the dual DPT/MHSA program must apply and be accepted into the MHSA program. The MHSA program is offered through the Department of Population Health in the School of Medicine at the University of Kansas Medical Center and consists of 39 credit hours of MHSA coursework in the dual program. The DPT/MHSA program can be completed in 4 years; students will graduate with their DPT degree after 3 years and then finish the MHSA program in the next year. MHSA courses will begin in the fall semester of the second year of the DPT program. The DPT program requirements for graduation remain the same for students completing this dual degree program.

In order to continue in the DPT/MHSA program, students must remain in good academic standing in both the DPT and MHSA programs, including maintaining a minimum 3.0 grade point average in both programs. Students must also complete the DPT degree before the MHSA degree can be awarded. Any student who does not successfully complete the DPT program will need to take the 17 credit hours of MHSA coursework that were waived by virtue of being in the dual DPT/MHSA program, in order to earn the MHSA degree.

A dual DPT and Master of Business Administration (MBA) (p. 143) degree program is available to outstanding DPT students interested in becoming physical therapists prepared for the complicated health finance and management fields with business knowledge and experience.

A dual DPT and Master of Health Services Administration (MHSA) (p. 2119) degree program prepares DPT students for management and leadership positions in health care organizations. The MHSA portion of the curriculum combines social science and business content in the context of health care. As the health care environment becomes more complex and competitive, administrative skills will be important to individuals starting careers in physical therapy.

Students must be accepted into the DPT program in order to enter the DPT/MHSA program. Current DPT students interested in the dual DPT/MHSA program must apply and be accepted into the MHSA program.

The DPT/MHSA program is offered through the Department of Population Health in the School of Medicine at the University of Kansas Medical Center and consists of 39 credit hours of MHSA coursework in the dual program. The DPT/MHSA program can be completed in 4 years; students will graduate with their DPT degree after 3 years and then finish the MHSA program in the next year. MHSA courses will begin in the fall semester of the second year of the DPT program. The DPT program requirements for graduation remain the same for students completing this dual degree program.

In order to continue in the DPT/MHSA program, students must remain in good academic standing in both the DPT and MHSA programs, including maintaining a minimum 3.0 grade point average in both programs. Students must also complete the DPT degree before the MHSA degree can be awarded. Any student who does not successfully complete the DPT program will need to take the 17 credit hours of MHSA coursework that were waived by virtue of being in the dual DPT/MHSA program, in order to earn the MHSA degree.

A dual DPT and Master of Business Administration (MBA) (p. 143) degree program is available to outstanding DPT students interested in becoming physical therapists prepared for the complicated health finance and management fields with business knowledge and experience.
A dual DPT and Ph.D. in Rehabilitation Science (p. 683) degree program is available to outstanding applicants with backgrounds in health-related sciences who wish to become physical therapists and engage in rehabilitation science research. The applicants must first be accepted into the DPT program. Students may apply to the DPT/Ph.D. program with their initial DPT application, or during the first or second year of the DPT program. The DPT program requirements for graduation remain the same for students completing this dual degree program. While in the DPT program, DPT/Ph.D. students explore available research laboratories and projects to identify a mentor and project for their Ph.D. dissertation research, to facilitate their progression through the Ph.D. program. Students complete the Ph.D. program coursework after successfully completing and graduating from the DPT program.

Technical Standards

The KU Doctor of Physical Therapy program continually strives to develop caring physical therapists who exemplify the highest level of clinical expertise and knowledge and who are prepared to enrich the dignity and quality of the human experience by optimizing movement and maximizing functional potential. Because a Doctor of Physical Therapy degree signifies that the holder is eligible to sit for the National Physical Therapy Examination and signifies that the holder is prepared for entry into the profession of physical therapy, graduates must have the knowledge and skills to function in a broad variety of clinical, private, community, or school-based situations and to render a wide spectrum of physical therapy services.

The following technical standards, in conjunction with the academic standards, are requirements for admission, retention, and graduation of applicants and students, respectively.

The term “candidate” refers to candidates for admission to the physical therapy program as well as current physical therapy students who are candidates for retention and graduation. The KU DPT program maintains a strong commitment to equal educational opportunities for qualified students with disabilities who apply for admission to the program or who are already enrolled. The technical standards are not intended to deter any candidate for whom reasonable accommodation will allow the fulfillment of the complete curriculum. Candidates with disabilities are encouraged to contact the Academic Accommodations Office at (913) 945-7035 or cukoko@kumc.edu early in the application process to begin a confidential conversation about what accommodations they may need to meet these standards. This process is informed by the knowledge that students with varied types of disabilities have the ability to become successful health professionals.

1. Observation: Candidates must acquire information as presented through demonstrations and experiences in the foundational sciences. Candidates must also:
   • Evaluate patients accurately and assess their relevant health, behavioral, and medical information.
   • Obtain and interpret information through a comprehensive assessment of patients, correctly interpret diagnostic representations of patients’ physiologic data, and accurately evaluate patients’ conditions and responses.

2. Communication: Candidates must exhibit interpersonal skills to enable effective caregiving of patients/clients. Candidates must also:
   • Communicate effectively, with all members of a multidisciplinary health care team, patients/clients, and those supporting patients/clients, in person and in writing.

3. Clinical Skills: Candidates must perform physical examinations and diagnostic maneuvers. These activities require some physical mobility, coordination of both gross and fine motor neuromuscular function, balance, and equilibrium. Candidates must also:
   • Provide general care and emergency treatment for patients and respond to emergency situations in a timely manner.
   • Meet applicable safety standards for the environment and follow universal precaution procedures.

4. Clinical Reasoning: Candidates must effectively interpret, assimilate, and understand complex information required to function within the physical therapy curriculum. Candidates must also:
   • Comprehend three-dimensional relationships and understand the spatial relationships of structures.
   • Effectively participate in individual, small-group, and lecture learning modalities in the classroom, clinical, and community settings.
   • Learn, participate, collaborate, and contribute as a part of a team.
   • Synthesize information both in person and via remote technology.
   • Interpret causal connections and make accurate, fact-based conclusions based on available data and information.
   • Formulate a hypothesis and investigate potential answers and outcomes.
   • Reach appropriate and accurate conclusions.

5. Judgment: Candidates must exercise good judgment; promptly complete all responsibilities attendant to the diagnosis and care of patients; and develop mature, sensitive, and effective relationships with patients. Candidates must also:
   • Effectively handle and manage heavy workloads, function effectively under stress.
   • Adapt to changing environments, display flexibility, and learn to function in the face of the uncertainties inherent in the clinical problems of patients.
   • Self-assess behavior and performance and an understanding of the rationale and justification for their performance.

6. Behavioral and Social Attributes: Candidates are expected to exhibit professionalism, personal accountability, compassion, integrity, concern for others, and interpersonal skills. Candidates must:
   • Accept and apply feedback and to respect boundaries.
   • Care for all individuals in a respectful and effective manner regardless of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, genetic information, or any other protected status.
Admission Requirements:

Candidates must understand, and function within, the legal and ethical aspects of the practice of physical therapy. Candidates must also:

- Maintain and display ethical and moral behaviors commensurate with the role of physical therapist in all interactions with patients, faculty, staff, students, and the public.
- Maintain interest and motivation throughout the educational processes.

Doctor of Philosophy in Rehabilitation Science

The doctorate in rehabilitation science program is designed to prepare outstanding leaders who advance innovative interdisciplinary research in rehabilitation science. A major focus of the program is to advance the science of rehabilitation and to elucidate the scientific basis for the procedures and processes used in clinical practice.

Areas of research emphasis include human and animal studies designed to (1) promote an understanding of the pathophysiology of injury, disease, functional impairment, and associated disabilities, and (2) espouse the rationale for therapies designed to alleviate impaired human function and related physical and mental disabilities.

Applications for this program are submitted online. Detailed instructions on how to apply are available on the Department of Physical Therapy, Rehabilitation Science, and Athletic Training (http://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/phd-in-rehabilitation-science/how-to-apply.html) website. Students are admitted for the fall semester only. Applications for the fall semester must be received by February 1 for consideration.

Admission Requirements:

- A bachelor's degree from a regionally accredited institution is required and must be documented by submission of official transcript indicating the degree has been conferred before entering the program. A master's or other advanced degree is preferable. Official transcripts for all courses taken at any institution are also required. Applicants are not required to be physical therapists or possess a degree in physical therapy. Applicants are encouraged to have a broad background in biological sciences, including anatomy, physiology, neuroscience, exercise science, biochemistry, genetics, molecular and cell biology, as well as statistics.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative grade-point average requirement.

- Applicants must possess a cumulative grade-point average of at least a 3.0 on a 4.0 scale for his or her bachelor's degree program.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the minimum English proficiency requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- A current resume or curriculum vitae is required and must include information on the applicant's educational, professional, and research background. The following information will be critical to evaluate the applicant: research experience (including publications and abstracts), professional presentations, awards and honors, intellectual pursuits (continuing education, seminars attended, lectures, etc.), teaching/mentoring experiences and leadership roles.
- In the online application, a purpose of study will be submitted that provides a succinct explanation of relevant background information and experience indicated on the resume/curriculum vitae. Additionally, applicants are encouraged to identify research areas of interest they wish to pursue in the program. It is recommended, though not required, to identify one or more potential research mentors from the faculty of the Department of Physical Therapy, Rehabilitation Science, and Athletic Training (http://www.kumc.edu/school-of-health-professions/physical-therapy-and-rehabilitation-science/our-faculty.html) whose research programs are related to the applicant's field of interest.
- Three letters of recommendation are required. The recommendations should come from either a faculty member, advisor, employer or other person who is familiar with the applicant's work and character and can comment meaningfully on the applicant's performance in an academic and professional setting. At least one of the three letters of recommendation should come from the applicant's current place of employment or academic program. Letters may not be obtained from family members, friends, etc.

Applicant will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, the catalog of the year the student entered the program is used. Other years' catalogs are available online. The program consists of coursework, research experience, and completion of a doctoral dissertation including its oral defense. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. degree.

Degree Requirements:

- Degree requirements are normally completed within 4-5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University's Research Skills and Responsible Scholarship (http://catalog.ku.edu/graduate-studies/kumc/#programstext) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of the following courses meets the Research Skills requirement:

<table>

- Successful completion of the Residence Requirement (http://catalog.ku.edu/graduate-studies/kumc/#programstext) prior to the semester the Oral Comprehensive Examination is scheduled. The
Successful completion of the Oral Comprehensive Examination (http://catalog.ku.edu/graduate-studies/kumc/#programstext). This examination is an oral defense of a dissertation proposal written in a research grant format. The following skills are assessed as a part of the examination: the ability to critically synthesize literature on a specific topic, identify gaps in knowledge and design a significant research question to address the gaps, execute an independent research project, understand and use methodology and data analysis techniques and anticipate experimental outcomes. Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

• Successful completion of the Post-Comprehensive Enrollment (http://catalog.ku.edu/graduate-studies/kumc/#programstext) requirement.

• Enrollment in a minimum of one (1) credit hour of REHS 990 Dissertation in Rehabilitation Science the semester the student will defend dissertation and graduate.

• Successful completion of the Final Oral Examination (http://catalog.ku.edu/graduate-studies/kumc/#programstext) (dissertation defense). For this examination, the PhD candidate defends their written dissertation in an oral forum. The written dissertation consists of an introduction chapter, three experimental chapters (on average), and a chapter for the conclusions, clinical application and future directions. The dissertation should be composed at the level of a high quality scholarly work, with experimental chapters being suitable for peer reviewed publishing as separate manuscripts.

• Successful Dissertation Submission and Publication (http://catalog.ku.edu/graduate-studies/kumc/#programstext) (according to Office of Graduate Studies policy).

• Successful completion of the following core courses. The specific number of credit hours for REHS 870, REHS 873 and REHS 980 is determined in consultation with the student’s academic advisor.

### Technical Standards

The graduate of this program must have the knowledge and skills to function in a broad variety of clinical, research, academic and industrial settings. Although not all students will have the same experiences or require the same skills (some students may not work with laboratory chemicals or assist patients in transfers), it is still important that each student have the technical skills necessary, in case they are placed in those situations. Therefore, the following abilities and expectations must be met by all students of the program without reasonable accommodations.

1. **Essential Observational Requirements:**
   The PhD student must be able to:
   - Observe and perform laboratory and/or clinical tests in which human subjects, chemical, and/or biological (body fluids, culture materials, and tissue sections) are tested for their physical attributes including, but not limited to, movement, force, texture, color, sound, odor, viscosity, immunological, microbiological and histochemical components.
   - Read and comprehend text, numbers, and graphs displayed in print and on video.
   - Perform comparative observations of text, movement, shapes, graphs, colors etc.

2. **Essential Movement Requirements:**
   The PhD student must be able to:
   - Lift a minimum of 25 pounds (depending on the PhD dissertation project chosen by the student, some projects may not require any lifting, while others may require a minimum of 25 pounds weight lifting).
   - Travel to numerous laboratory/clinical sites.
   - Perform moderately taxing continuous physical work.
   - Control equipment and adjust instruments to perform laboratory procedures.
   - Manipulate a computer keyboard.

3. **Essential Communication Requirements:**
   The PhD student must be able to:
   - Comprehend technical and professional materials.
   - Follow verbal and written instructions.
   - Effectively, confidently, and sensitively converse with human research subjects.
   - Communicate effectively and efficiently with faculty members, fellow students, staff, and other members of research and health care community to convey information essential for studying and conducting research.

4. **Essential Intellectual Requirements:**
   The PhD student must:
   - Possess these intellectual skills: comprehension, measurement, mathematical calculations, problem solving, reasoning, integration, analysis, comparison, self-expression, and criticism.
   - Be able to exercise sufficient judgment to recognize and correct performance deviations.

5. **Essential Behavioral Requirements:**
   The PhD student must:
   - Be able to manage the use of time and be able to systematize actions in order to complete professional and technical tasks within realistic constraints
   - Possess the emotional health necessary to effectively employ intellect and exercise appropriate judgment.
   - Be able to provide professional and technical services while experiencing the stresses of heavy workloads, task-related uncertainty, emergent demands, and a distracting environment.
   - Be flexible and creative and adapt to professional and technical change.
   - Recognize potentially hazardous material, equipment, and situations and proceed safely in order to minimize risk of injury to human subjects, self, and other individuals.
   - Support and promote the activities of fellow students and of health care and research professionals. Promotion of peers helps to furnish a team approach to learning, task completion, problem solving, and patient care.
   - Be honest, compassionate, ethical, and responsible. The student must be forthright about errors or uncertainty. The student must be able to critically evaluate their own performance, accept constructive criticism, and look for ways to improve. The student

**Total Hours 72**
must be able to evaluate the performance of fellow students and tactfully offer constructive comments.

It is the student’s responsibility to notify the department if there is any reason they cannot meet the expectations of students in the PhD in Rehabilitation Science program, with or without reasonable accommodations. Reasonable accommodation will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of others. Students may contact KU Medical Center Office of Academic Accommodations (https://www.kumc.edu/academic-and-student-affairs/departments/academic-accommodation-services.html) (https://www.kumc.edu/academic-and-student-affairs/departments/academic-accommodation-services.html#&text=Contact us,pm)%20through%20our%20online%20system) to discuss accommodations.

Individuals with disabilities are encouraged to apply to the program. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the KU Medical Center Office of Academic Accommodations (https://www.kumc.edu/academic-and-student-affairs/departments/academic-accommodation-services.html), with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the program requirements.

Learning assistance, academic performance enhancement, and psychological services at KU Medical Center are free, confidential, and available at the Counseling and Educational Support Services (https://www.kumc.edu/academic-and-student-affairs/departments/counseling-and-educational-support-services.html).

Respiratory Care

KU offers a bachelor’s degree program in respiratory care. Students enter after completing two years of prerequisites taken from KU’s Lawrence campus or any regionally accredited two- or four-year college or university. The advanced curriculum and location at an academic medical center means students receive extensive experience in advanced respiratory therapy techniques.

For working professionals having graduated from a COARC-approved advanced practice level program, KU also offers a flexible online bachelor’s degree-advancement program in respiratory care. Students must already have the RRT credential and must take any missing prerequisite courses in addition to the online respiratory care courses to meet the credit-hour requirements for the bachelor’s degree.

Located at the region’s premier academic health center, the Department of Respiratory Care and Diagnostic Science is a part of the School of Health Professions (http://healthprofessions.kumc.edu/) on the medical center campus of the University of Kansas. KU Medical Center (http://www.kumc.edu/) is located in the heart of the Kansas City metropolitan area at 39th and Rainbow Boulevard—about 40 minutes away from the main KU campus (http://www.ku.edu/) in Lawrence, Kansas.

Advising and FAQ

For information about respiratory care at KU, please visit the department’s website (http://respiratorycare.kumc.edu). Students interested in entering this field should contact an advisor as early as possible in their collegiate career to ensure prerequisite course work will be completed on schedule. Advising and campus visits are available Monday–Friday by appointment.

Please email respiratory@kumc.edu for information. For advising on the KU Lawrence campus, please see the KU Undergraduate Advising Center (http://advising.ku.edu/).

Courses

RESP 200. Introduction to Respiratory Therapy. 1 Credits.

This course is intended to be an introductory course for learners who are entering college-level health care programs or for those who believe they may be interested in pursuing a career in Respiratory Therapy. Topics are appropriate for professions that involve direct patient care, as well as those that provide support services.

RESP 300. Introduction to Respiratory Care Procedures. 4 Credits.

An introductory course designed to acquaint the student with the fundamental theory, procedures, and equipment used in respiratory therapy. Emphasis is placed on understanding application of equipment and procedures to the patient, and the respiratory therapy treatment of patients requiring non-continuous ventilatory assistance. This course introduces such topics as cardiopulmonary resuscitation, bronchopulmonary hygiene, airway care, oxygen therapy, and cleaning and sterilization of equipment. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 301. Respiratory Care Evidence Based Practice I. 1 Credits.

This course is designed to provide the participant with a basic introduction to healthcare research with emphasis on evidence based practices. Students will learn how to identify a research question and conduct a proper literature search. This course will teach students the strengths and weaknesses of different search sources, how to review and critique a scientific article, and present the results of their literature review. Students will learn how to properly cite and develop a bibliography that is consistent with scientific writing, as well as, develop an introduction section of a research paper. This course will familiarize the students with cardiorespiratory medical terminology. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 302. Respiratory Care Evidence Based Practice II. 1 Credits.

This course is the continuation of Respiratory Care Evidence Based Practice I and designed to reinforce the principles of healthcare research, evidence based practices, and the medical terminology used in the cardiorespiratory sciences. Students will refine their ability to identify a research question, conduct a literature search, review and critique a scientific article, and present the results of their literature review. This course will continue to emphasize proper citation and bibliography documentation consistent with scientific writing. Prerequisite: RESP 301 and Enrollment in the Respiratory Care Education Program.

RESP 305. Cardiopulmonary Anatomy and Physiology. 2 Credits.

This course will introduce the student to normal anatomy and physiology of the cardiopulmonary systems. Students will focus on the etiology, and treatment of pulmonary and cardiac diseases, with emphasis on the pulmonary system.

RESP 306. Cardiopulmonary Pathophysiology. 2 Credits.

This course will introduce the student to normal cardiopulmonary systems, as well as, cardiopulmonary pathology. Students will focus on the etiology, pathophysiology, and treatment of pulmonary and cardiac diseases, with emphasis on the pulmonary system.

RESP 310. Clinical Pharmacology. 2 Credits.

The student will learn about adrenergic and parasympatholytic bronchodilators, corticosteroids, mucus-controlling drugs, surfactant
agents, antitussives, and the anti-infective drugs used for the treatment of respiratory disorder. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 315. Clinical Application I. 3 Credits.
This course introduces the beginning respiratory therapy student to the clinical environment. The student participates in clinically-oriented workshops, observation rotations, learning laboratory sessions, or simulations that focus on the application of respiratory therapy equipment, theory, patient management, and communication in the clinical setting. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 325. Mechanical Ventilators. 3 Credits.
This course contains such topics as arterial puncture, classification of mechanical ventilators and adjunct devices, and their application to the patient. Four hours of lecture/discussion and a 3 hour weekly laboratory acquainting the student with the rationale for continuous mechanical ventilation and the basic operation of adult, pediatric and neonatal mechanical ventilators. Emphasis is placed on the selection of appropriate equipment and assessment of its effect on the patient. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 326. Mechanical Ventilation Lab. 2 Credits.
This course contains such topics as arterial puncture, classification of mechanical ventilators and adjunct devices, and their application to the patient. 2 hour weekly laboratory acquainting the student with the rationale for continuous mechanical ventilation and the basic operation of adult, pediatric, and neonatal mechanical ventilators. Emphasis is placed on the selection of appropriate equipment and assessment of its effect on the patient. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 330. Pulmonary Function. 2 Credits.
Lecture and laboratory introducing the student to basic pulmonary function procedures. This course allows the student to practice pulmonary function tests and interpret the results. Lecture and laboratory topics include such topics as the measurement of lung volumes and capacities, body plethysmography, blood gas analysis, and flow volume loops. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 335. Clinical Application II. 4 Credits.
This course provides the respiratory therapy student with an introduction to the critical care setting. The student will begin to apply the procedures and equipment most often utilized in the intensive care areas. Emphasis is placed on continuous mechanical ventilation, artificial airways, airway care, and bedside pulmonary function testing. The student will assume limited patient care responsibility in the critical care areas. Prerequisite: RESP 315.

RESP 340. Respiratory Review I. 1 Credits.
Respiratory Care Review- This course provides a complete review of the junior year respiratory care curriculum and aids in the preparation for students to take the Self-Assessment examination. Upon successful completion, students will be prepared to begin the senior year curriculum. Prerequisite: Successful completion of the first and second semesters of the respiratory care curriculum.

RESP 341. Respiratory Review II. 2 Credits.
Respiratory Care Review- "Junior Respiratory Care Review". This is the second of a two-course series that provides a complete review of the junior-year respiratory care curriculum and aids in preparing students to take the Self-Assessment examination. Upon successful completion, students will be prepared to begin the senior-year curriculum. Prerequisite: Successful completion of the first semester of the respiratory care curriculum.

RESP 345. Clinical Application 3. 3 Credits.
This course is a continuation of the clinical sequence that provides the respiratory therapy student with experience in the critical care setting. The student applies the procedures and equipment utilized by respiratory care practitioners in the intensive care areas. Emphasis is placed on continuous mechanical ventilation, artificial airways, airway care, and bedside diagnosis. The student assumes progressively more patient care responsibility in the critical care areas under preceptor supervision. Prerequisite: Completion of RESP 335.

RESP 350. Clinical Application (special). 1 Credits.
This course provides the intermediate respiratory therapy student with opportunities to practice basic respiratory therapy procedures. Emphasis placed on performance of respiratory therapy procedures and application of equipment. This course emphasizes such topics as oxygen therapy, aerosol therapy, incentive spirometry, patient assessment, and IPPB therapy. The student will assume limited patient care responsibilities.

RESP 375. Clinical Special. 0 Credits.
This course provides the advanced respiratory therapy student with opportunities to refine procedural and evaluative skills in the critical care areas. The student will spend a minimum of twenty-four hours per week in the clinical setting. Emphasis is placed upon the students ability to evaluate the patients' clinical situation and recommend appropriate therapy modalities to the clinical supervisor. During this course the student will assume wider-ranging patient care responsibilities.

RESP 399. Generalist Practice. 1 Credits.
This course is designed to allow students the opportunity to improve and perfect skills acquired in the junior year clinical courses. Emphasis will be given to refining the students' abilities to assess patient status and administer appropriate therapy modalities. This course may also be used to assess respiratory therapy knowledge and skills of students transferring from other programs. Prerequisite: Permission of instructor.

RESP 400. Chronic Respiratory Disease Management: The Evolving Role of the Respiratory Therapist. 3 Credits.
This course is an introduction to the evolving role of respiratory therapists in health care, especially in the area of chronic disease management. The students will explore various trends that are contributing to the role respiratory therapy may play in patient care. Topics covered in this course include COPD and asthma management, pulmonary rehabilitation, cardiopulmonary exercise testing, home care, elderly care, nutritional care of the pulmonary patient, and communication skills necessary for patient education. Students in this course will gain an understanding of how they can contribute to an inter-professional team in order to provide safe and effective patient care. Presentation of topics in this course may include lecture, group work/discussion, audiovisual, computer and other multimedia aids. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 405. Advanced Critical Care. 4 Credits.
Concepts of the diseases and disorders that effect the critically ill adult are explored. Emphasis is placed on understanding common illnesses such as cardiac dysrhythmias, acute coronary syndrome, trauma of the chest and head, organ failure and toxin exposure as well as the other medical challenges of the critically ill patient. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 410. Neonatal Respiratory Care. 3 Credits.
This course is designed to provide the student with an introductory knowledge of fetal and newborn cardiorespiratory anatomy, physiology, development, pathophysiology, and care. Prerequisite: Senior year standing or permission of instructor.

RESP 411. Neonatal/Pediatric Respiratory Care Lab. 2 Credits.
This Course is designed to provide the student with an introductory knowledge of fetal and newborn cardiopulmonary anatomy, physiology, development, pathophysiology, and care in a lab setting. Prerequisite: Senior year standing.

RESP 415. Clinical Application IV. 4 Credits.
This course provides the advanced respiratory therapy student with opportunities to refine procedural and evaluative skills in the critical care areas. In the clinical setting emphasis is placed upon the student's ability to evaluate the patient's clinical situation and recommend appropriate therapy modalities to the clinical instructor. During this course the student will assume a progressively wider range of patient care responsibilities. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 420. Health Care Management, Ethics and Law. 2 Credits.
This course provides an overview of fundamental concepts in healthcare management, law, and ethics. Students will learn the skills and knowledge necessary to be successful in management leadership, management design, and managing diversity. Ethical concerns relevant to the healthcare manager will be addressed. Current and historical controversies in healthcare will be discussed. Upon completion of this course, students will have the knowledge to understand laws, ethics, and management principles of the complex healthcare landscape.

RESP 450. Chronic Respiratory Disease Management. 3 Credits.
This course is open only to online students. This course is an introduction to the evolving role of respiratory therapists in health care, especially in the area of chronic disease management. The students will explore various trends that are contributing to the role respiratory therapy may play in patient care. Topics covered in this course include COPD and asthma management, pulmonary rehabilitation, cardiopulmonary exercise testing, home care, elderly care, nutritional care of the pulmonary patient, and communication skills necessary for patient education. Students in this course will gain an understanding of how they can contribute to an inter-professional team in order to provide safe and effective patient care. Presentation of topics in this course may include lecture, group work/ discussion, audiovisual, computer and other multimedia aids.

RESP 460. ACCS Specialty Credential Prep. 3 Credits.
This course will serve as review of material covered on the NBRC Matrix for the NBRC Adult Critical Care Specialty Examination. The purpose of this course is to guide students in the review and preparation for the NBRC ACCS Specialty Examination. This will include weekly covered content, as well as practice exams.

RESP 465. NPS Specialty Credential Prep. 3 Credits.
This course will serve as review of material covered on the NBRC Matrix for the NBRC Neonatal/Pediatric Specialty Examination. The purpose of this course is to guide students in the review and preparation for the NBRC NPS Specialty Examination. This will include weekly covered content, as well as practice exams.

RESP 470. AE-C Specialty Credential Prep. 3 Credits.
This course will provide an in-depth review of asthma education based on the National Asthma Educator Certification Board (NAECB) detailed content outline. Including the asthma condition, patient and family assessment, asthma management and organizational issues. Prerequisite: Enrollment in Respiratory Care.

RESP 480. Simulation and Interprofessional Education (IPE). 3 Credits.
This introductory course is designed for health care students to learn key concepts of building and leading a collaborative health care team. The course addresses both the clinical and behavioral aspects of performance with emphasis on interprofessional simulation-based education. The course is offered in a self-paced online format with a competency-based approach. The course will be taught over an eight-week period. The object of the course is to introduce collaborative practice for providing patient-centered care. The student will be introduced to: Interprofessional education and collaborative practice terminology Core Competencies for Interprofessional Collaborative Practice Foundations of effective health care teamwork Leading a collaborative health care team Skills to develop and implement simulation-based education. Prerequisite: Enrollment in Respiratory Care.

RESP 490. Special Studies or Projects. 1-9 Credits.
This course involves individual study, research or projects in the field of respiratory care under instructor guidance. Written reports and periodic conferences are required. Content and unit credit will be determined by student-instructor conferences and/or departmental conferences. This course may be repeated for a maximum of nine credits. Prerequisite: Admission to the respiratory care program and consent of instructor.

RESP 495. Management, Ethics, and Law in Respiratory Care. 3 Credits.
This course is only open to online students. This course provides an overview of fundamental concepts in healthcare management, law, and ethics. Students will learn the skills and knowledge necessary to be successful in management leadership, management design, and managing diversity. Ethical concerns relevant to the healthcare manager will be addressed. Current and historical controversies in healthcare will be discussed. Upon completion of this course, students will have the knowledge to understand laws, ethics, and management principles of the complex healthcare landscape.

RESP 615. Respiratory Review III. 3 Credits.
This course involves individual student under instructor guidance. A series of practice exams are taken and discussed including a secured practice registry exam and clinical simulation exam. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 620. Community and Global Health. 3 Credits.
This course will explore a wide variety of major health issues that impact us as global citizens. Students will be exposed to an overview of challenges that face the world today as they learn about strategies and programs that promote health in a variety of settings. Through this course, students will become more culturally competent healthcare providers. They will learn about disparities related to ethnicity, socioeconomic issues, human rights, and resource limits as they relate to the health of populations. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 625. Clinical Application V. 4 Credits.
This course provides the student with the opportunity to integrate clinical activities and responsibilities related to neonatal and pediatric respiratory care. Prerequisites: Enrolled in Respiratory Care Program.

RESP 630. Lean Management. 3 Credits.
Lean Management-This course will introduce students to lean management principles such as Lean Six Sigma in healthcare. Students will learn process improvement through lean management concepts which will prepare them for management positions. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 640. Professional Communication. 3 Credits.
Professional Communication-this course will provide students with the tools they need to communicate clearly and effectively which will prepare them for the working world and leadership. Students will learn how to have crucial conversations on how to address serious issues via written or verbal. Prerequisite: Enrollment in the Respiratory Care Program.

RESP 650. Medical Writing & Research. 3 Credits.
This course is designed to introduce the student to the basics of health research and writing methods. Health care research is the necessary
foundation for meaningful improvements in clinical practice. This course will make the health research and writing process accessible, manageable, and enjoyable for health care students. Prerequisite: Enrollment in Respiratory Care.

RESP 655. Leadership Management. 3 Credits.
The objective of this course is to prepare undergraduate students to become successful leaders in healthcare by viewing leadership competencies by studying relevant and contemporary skills in today’s ever changing healthcare landscape. By the end of the course, students should have an understanding of how to approach complex leadership problems and comprehend them. Prerequisite: Senior year standing or permission of the instructor.

RESP 665. Capstone Project. 6 Credits.
This course is designed to give the student the opportunity to develop a project that is professionally relevant. This project will allow the student to explore opportunities such as implementing process change, protocol creation, and curriculum development. The course is individualized to the students’ intellectual interests and professional development. Prerequisite: 5 Core Courses (RESP 650, RESP 495, RESP 620, RESP 480, and RESP 450), 3 Track courses (RESP 460, RESP 470, RESP 465, RESP 630, RESP 640, RESP 655).

Bachelor of Science in Respiratory Care

Bachelor's Degree Program (On Campus)
KU offers a bachelor of science degree in respiratory care. Course work covers areas such as neonatal, pediatrics and adult critical care, management, education, sleep disorders, pulmonary rehabilitation, and cardiopulmonary diagnostics. Most students enter the program after completing the sophomore year of undergraduate study or after two years of community college course work. With an advanced curriculum and located at an academic medical center, students receive extensive experience in advanced respiratory therapy techniques. The program includes a semester-long clinical assignment during the senior year in the student's area of specialization.

Degree Advancement Program (Online)
The University of Kansas also offers a program for the respiratory therapist with the RRT credential to obtain a bachelor's degree. This program is perfect for students unable to be physically present on campus or those with schedule constraints which make traditional college class schedules a challenge. Courses (https://www.kumc.edu/school-of-health-professions/academics/departments/respiratory-care-and-diagnostic-science/academics/respiratory-care-degree-programs/respiratory-care-bachelors-degree/eligibility-and-requirements.html) in this program are Web-based and are available anytime from anywhere in the world with an Internet connection. Note: This program is only available to professional respiratory therapists having the RRT credential.

On-campus Bachelor's Degree Program
To be eligible for this program, two years of prerequisite course work are needed – either from the KU Lawrence campus or another regionally accredited university or community college. In order to complete prerequisites and recommended electives on-time and in the appropriate sequence, interested students should contact an academic advisor (https://outlook.office.com/mail/deeplink/compose/?mailto=mailto %3Aabarry2%40kumc.edu) for assistance in selecting courses.

Transfer students should be aware that all transfer courses for which they have requested credit must be equivalent to courses required at KU; otherwise, additional course work will be required. Graduates of an associate's degree respiratory care program are eligible to apply for advanced standing as seniors upon completion of all prerequisites.

A background check and documentation of shadow experience are required. Prospective students should review the program requirements, including prerequisite course work, and complete list of eligibility requirements (https://www.kumc.edu/school-of-health-professions/academics/departments/respiratory-care-and-diagnostic-science/academics/respiratory-care-degree-programs/respiratory-care-bachelors-degree/eligibility-and-requirements.html).

RRT-to-Bachelor’s Degree Bridge Program

Applicants must possess professional certification as a registered respiratory therapist (RRT) from the National Board for Respiratory Care, and an associate’s degree (or equivalent) from a regionally accredited, CoARC-approved advanced respiratory therapist program. Prior course work must include all the prerequisite courses listed below. An overall grade point average (GPA) of 2.5 (on a 4.0 scale) for college course work is required to enter the degree-completion program for RRTs. In addition, student transcripts must document an individual course grade of no less than “C” on each prerequisite course in math, chemistry, physics and biological sciences.

A minimum 120 hours of college credit are required to earn a bachelor’s degree from KU. Students will earn at least 30 credit hours during the respiratory care program.

Note: To be transferable, all prerequisite and respiratory care course work must be from an educational institution that is regionally accredited. This is not the same as national accreditation.

Prerequisite Courses

- Human Anatomy* (lab recommended)
- Human Physiology* (lab recommended)
- Microbiology (lab recommended)
- Chemistry
- Algebra
- English Composition I and II
- Oral Communication
- Humanities (2 courses)
- Psychology
- Sociology

*Students having completed a single combined anatomy and physiology course must complete either a second, higher-level A&P course, or a course in physiology only.

Requirements for On-campus Bachelor’s Degree Program

Two years of undergraduate course work — including at least 53 credit hours of specific prerequisites (https://www.kumc.edu/school-of-health-professions/academics/departments/respiratory-care-and-diagnostic-science/academics/respiratory-care-degree-programs/respiratory-care-bachelors-degree/prerequisites.html) — is required prior to entry into this program. Most KU Core requirements must be met by the prerequisites. While in the 2-year respiratory care program, students complete 60 hours of course credits in a prescribed sequence covering five academic semesters. Students are responsible for completing additional electives to fulfill the university’s requirement of 120 total credit hours for a bachelor’s degree from KU.

Total Hours 60

Professional Credentialing

Upon graduation, students will be prepared to sit for the national credentialing examinations. To be employed as a respiratory therapist, graduates must pass this exam and will be recognized with the Registered Respiratory Therapist (RRT) credential.

Requirements for Bachelor’s Degree-Completion Program

This program requires a minimum 30 credit hours of respiratory care course work. Upon acceptance, students work with an advisor to organize a graduation plan and select a clinical specialty area. Specialty areas include neonatal critical care, adult critical care, and respiratory care management. Other areas may be considered with advisor approval. To qualify for graduation, a minimum grade of C or better is required on all respiratory care courses. The university requires at least 120 hours of total college credit to receive a bachelor’s degree from KU. Previous course work in respiratory care may be eligible for transfer credit. The class schedule follows a typical semester and is designed to be delivered at an organized and manageable pace for the student.

1. This course involves individual study, research or projects in the field of respiratory care under instructor guidance. Written reports and periodic
conferences are required. Content and unit credit will be determined by student-instructor and/or departmental conferences. This course may be repeated for a maximum of 12 credits. Prior consent by the instructor is required to enroll in this course.

**Therapeutic Science**

Therapeutic Science is an interdisciplinary program that involves faculty across a variety of departments and schools at KU. This program is part of a growing trend to provide interdisciplinary doctoral-level training to address issues related to disability. The KU Therapeutic Science doctoral degree program (p. 691) is administered through the Department of Occupational Therapy Education (http://www.kumc.edu/school-of-health-professions/occupational-therapy-education.html) in the KU School of Health Professions.

This program is designed for students whose interests in disability and quality of life require an integrated, interdisciplinary course of study that cannot be provided by existing programs. Typically, applicants will already have obtained a graduate degree and have a professional credential or identity (e.g., occupational therapist, speech-language pathologist, licensed clinical social worker, clinical psychologist, special educator). Many are likely to be currently working in their chosen field related to issues of disability, but now seek to generate knowledge for understanding disability and improving quality of life for individuals with disabilities.

For more information, please visit the program website (http://www.kumc.edu/school-of-health-professions/therapeutic-science.html).

**Courses**

**TS 800. Research Proseminar. 1 Credits.**
A proseminar conducted by the core graduate faculty in Occupational Therapy and Therapeutic Science. Twice-monthly meetings will involve student and faculty presentations of their current research, as well as provide more opportunities to obtain feedback on research proposals. May be taken more than once for a total of four credits. (Same as OTMS 800.)

**TS 805. Multidisciplinary Theoretical Perspectives. 3 Credits.**
Students will identify and explore key theories in behavioral and social science with an emphasis on those currently influencing clinical reasoning and applications to practice and/or research. Students will demonstrate an understanding of multidisciplinary theoretical frameworks and be able to compare and contrast key theories, while also developing knowledge about theory guided research and practice.

**TS 850. From Beliefs to Evidence. 1 Credits.**
Analysis of the role of beliefs about practice in professional culture and how beliefs are affected by the accumulation of research evidence. Topics include the nature of science and beliefs, the nature of evidence, and the debate over evidence-based practice. Students will use topics from their own professional interests for class presentations and written assignments. A minimum of two credits over two successive terms (Fall then Spring) is required (i.e., 1 credit each semester). Note this course alternates in succession with TS900 and TS950, and is offered in the Fall & Spring every 3rd year. Prerequisite: Consent of the Instructor.

**TS 880. Special Projects. 1-6 Credits.**
An elective course to allow student investigation of special issues or problems relevant to applied research and/or practice, under the direction of a faculty member chosen by the student. Systematic coverage of current issues may include a research investigation or study related to pertinent sociocultural trends, practice factors, or emerging issues in service provision. Students will complete special projects such as oral presentations, written papers, or case analysis as negotiated with the faculty member. May be repeated for credit. Prerequisite: Permission of instructor.

**TS 900. Evolving Interdisciplinary Views of Disablement. 1 Credits.**
Assessment of how our social and cultural context defines notions of disability and disablement in our society. Topics include historical constructs of disability, public policy related to disability, and social paradigms of disability. Students will evaluate views of disablement from the perspective of their own discipline. A minimum of two credits over two successive terms (Fall then Spring) is required (i.e., 1 credit each semester). Note this course alternates in succession with TS850 and TS950, and is offered in the Fall & Spring every 3rd year. Prerequisite: Consent of the Instructor.

**TS 950. Designing Effective Knowledge Transfer. 1 Credits.**
Examination of the principles of knowledge transfer and diffusion of innovation as they relate to practices in therapeutic professions. Topics include the diffusion process, change agents, innovation adoption, and current diffusion methods. Students will evaluate diffusion processes that have occurred within their own professions. A minimum of two credits over two successive terms (Fall then Spring) is required (i.e., 1 credit each semester). Note this course alternates in succession with TS850 and TS900, and is offered in the Fall & Spring every 3rd year. Prerequisite: Consent of the Instructor.

**TS 980. Advanced Study in Therapeutic Science. 1-9 Credits.**
Students engage in advanced study of a topic of their interest, guided by an appropriate mentor. Options for engaging in learning include directed readings, interpretation of evidence, discussions, and written syntheses of existing literature. Students typically enroll in offerings of this course several times over a series of successive terms, with the course sequence culminating in a written proposal for original research and an oral defense of that proposal (oral comprehensive examination). Prerequisite: Permission of instructor.

**TS 990. Dissertation in Therapeutic Science. 1-9 Credits.**
Research experience leading to dissertation for doctoral students in Therapeutic Science. Students enroll in offerings of this course over a series of successive terms, culminating in a written dissertation describing original research and an oral defense of the dissertation research. Prerequisite: Permission of instructor.

**Doctor of Philosophy in Therapeutic Science**

Therapeutic Science is an interdisciplinary doctoral program involving faculty across a variety of departments and schools at KU. This program is part of a growing trend to provide interdisciplinary doctoral-level training addressing issues related to disability. The doctoral program in Therapeutic Science (http://www.kumc.edu/school-of-health-professions/therapeutic-science.html) is administered through the Department of Occupational Therapy Education (http://www.kumc.edu/school-of-health-professions/occupational-therapy-education.html) in the KU School of Health Professions.

This program is designed for graduate students with interests in disability and quality of life requiring an integrated, interdisciplinary course of study that cannot be provided by existing programs. Typically, applicants will already have obtained a graduate degree (or accumulated 24 research-related course credits at the graduate level) and have a
professional credential or identity (e.g., occupational therapist, speech-language pathologist, licensed clinical social worker, clinical psychologist, special educator). Many are likely to be working in their chosen field related to issues of disability, but now seek to generate knowledge for understanding disability and improving quality of life for individuals with disabilities. Recognizing the value of insights gained through application of theoretical knowledge in workplace settings, the curriculum purposely is flexible to allow students to pursue this program of study while working professionally.

The Master of Science in Occupational Therapy is available to occupational therapists with a bachelor’s degree to transition to the Therapeutic Science PhD program.

Applications to this program are submitted online. Detailed instructions on how to apply are posted on the program website (https://www.kumc.edu/school-of-health-professions/academics/departments/occupational-therapy-education/academics/phd-in-therapeutic-science.html). The program is administered through the Department of Occupational Therapy Education (http://www.kumc.edu/school-of-health-professions/occupational-therapy-education.html). Applications must be received by December 1 for consideration, with enrollment in course work typically beginning the following fall semester.

Admission requirements:

- A master’s degree from a regionally accredited institution is required, and must be documented by submission of official transcripts indicating the degree has been conferred before entering the program. Students with degrees from outside the U.S. must provide a transcript evaluation from an official, independent service, indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative grade-point average requirement.
- Applicants must possess a cumulative grade-point average of at least a 3.0 on a 4.0 scale in a bachelor’s degree program.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the minimum English proficiency requirement.
- A background check is required during the admission process; it may affect the student’s eligibility to enter the program.
- A current curriculum vitae or résumé is required and must include details of the applicant’s educational, professional, and research background.
- A brief statement of academic interests and professional goals will be submitted with the online application. This statement (no more than 300 words) should include how graduate education at the doctoral level will contribute to the attainment of the student’s career goals.
- Applicants will also provide a brief statement (2-3 paragraphs) of their research interests, describing how these interests align with expertise of faculty in the Therapeutic Science program. Applicants are encouraged to contact faculty prior to applying to the program.
- Three references are required and must be provided by faculty members, advisors, employers, or other people familiar with the applicant’s work and character.

Applicants will be assessed based on these requirements. In addition, the extent to which the applicant’s interests and goals correspond to those of the available faculty will be considered as part of the admissions review process.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The Ph.D. in Therapeutic Science (http://www.kumc.edu/school-of-health-professions/therapeutic-science.html) is an interdisciplinary program that involves faculty across a variety of departments and schools at KU that is administered through the Department of Occupational Therapy Education (http://ot.kumc.edu/) in the KU School of Health Professions. The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree requirements:

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a written qualifying exam after three semesters or 18 credit hours (whichever is completed first)
- Successful completion of the University’s Research Skills and Responsible Scholarship (http://catalog.ku.edu/graduate-studies/kumc/#programtext) requirement prior to scheduling of the Oral Comprehensive Examination. The goal of the RS&S requirement is to support the student in developing skills necessary for conducting ethical research, pursuing scholarly endeavors, and addressing research questions through a process that is thoughtful, strategic, and evidence-based.
- Successful completion of the Oral Comprehensive Examination (http://catalog.ku.edu/graduate-studies/kumc/#programtext) prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of TS 980 Advanced Study in Therapeutic Science which includes a written preliminary examination.
- Successful completion of the Oral Comprehensive Examination (http://catalog.ku.edu/graduate-studies/kumc/#programtext). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination. The format for this examination is an oral defense of a written dissertation proposal.
- Successful completion of the Post-Comprehensive Enrollment (http://catalog.ku.edu/graduate-studies/kumc/#programtext) requirement, typically through continuous enrollment TS 990 Dissertation in Therapeutic Science
- Successful completion of the Final Oral Examination (http://catalog.ku.edu/graduate-studies/kumc/#programtext) (dissertation defense.) At least 5 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination.
- Successful Dissertation Submission and Publication (http://catalog.ku.edu/graduate-studies/kumc/#programtext) (according to Office of Graduate Studies policy).
- Successful completion of a minimum of 60 credit hours including core courses, dissertation related coursework and interdisciplinary content coursework. This minimum number presumes the student already has at least 24 graduate credit hours in content courses and 6 hours in research methods and analysis courses that have been accumulated toward a master’s degree before beginning the Ph.D. program.

In addition to the core courses, and reflecting the interdisciplinary nature of the Therapeutic Science PhD program, students are
required to complete elective courses, focused scholarship, and research outcomes. The student's mentor must approve the plan of study.

- Successful completion of the following courses:

**Required Elective Courses**

30

This interdisciplinary program requires students to complete course work in the areas of: Interdisciplinary electives (6 credits), Advanced Study electives (3 credits), Focused Scholarship (6 credits), and Research (6 credits design and methods, 9 credits statistics/analysis)

**Total Hours**

60

The department will provide a program-specific handbook to each student upon their entry into the program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Therapeutic Science Program Director and the Office of Graduate Studies.

This table summarizes a typical plan of study for this program.

The details of these courses and their sequence have some degree of flexibility, and students should consult regularly with the academic advisor and research mentor to discuss options. A full-time student should expect to take 4-5 years to complete the minimum of 60 credit hours required by this program of study; most students accrue > 60 credit hours. Students pursuing the degree on a part-time basis will require longer. Unless special circumstances arise, the program must be completed within 8 years.

Doctor of Philosophy in Therapeutic Science

TECHNICAL STANDARDS

Doctoral Degree Program in Therapeutic Science

A Doctoral Degree in Therapeutic Science signifies that the holder is prepared to assume leadership in research programs related to human disability. It follows that graduates must have the knowledge and skills to articulate theory and perform scientific research. Therefore, all individuals admitted to the University of Kansas Medical Center Therapeutic Sciences degree program must have the following abilities and expectations with or without accommodations.

The following technical standards, in conjunction with the academic standards, are requirements for admission, promotion, and graduation. The term “candidate” refers to candidates for admission to the program as well as current students who are candidates for retention, promotion, or graduation. KU School of Health Professions maintains a strong commitment to equal educational opportunities for qualified students with disabilities who apply for admission to the program or who are already enrolled. The technical standards are not intended to deter any candidate for whom reasonable accommodation will allow the fulfillment of the complete curriculum. Candidates with disabilities are encouraged to contact the Academic Accommodations Office at (913) 945-7035 or cukoko@kumo.edu early in the application process to begin a confidential conversation about what accommodations they may need to meet these standards. This process is informed by the knowledge that students with varied types of disabilities have the ability to become successful health professionals.

1. **Problem Solving:** Candidates are expected to develop advanced expertise and demonstrate skill in leadership, teaching, research design, and data analysis. Therefore, a candidate must be able to understand research, make correct observations, and engage in reasoning, analysis, and synthesis.

2. **Judgment:** The candidate will be expected to demonstrate judgment in classroom, community, and other research settings that shows an ability to make mature, sensitive, and effective decisions in the following areas: a) relationships with supervisors, peers, and subjects/patients/clients/consumers/families, b) professional behavior, c) the effectiveness of intervention or other research strategies. The candidate must demonstrate and articulate an understanding of the rationale supporting decisions and processes, and be able to provide a justification for their actions and performance.

3. **Communication:** A) **Written communication:** The candidate must be able to assimilate information from written sources (texts, journals, databases, medical/school records, etc.). The candidate must be able to obtain, comprehend, retain, and use new information presented in written formats. Candidates are required to compile information from written sources, interpret that information, and produce appropriate written documentation. B) **Verbal and nonverbal communication:** Candidates must be able to communicate effectively in order to elicit information from subjects/patients/clients/consumers/families, as well as supervisors and peers. Candidates must possess the ability to convey factual information, but also to communicate the more subtle cues of mood, temperament, and social responses. Candidates must develop skill in providing feedback appropriately to others, as well as personal insight and responsiveness to feedback provided by others to the candidate. Communication with subjects/patients/clients/consumers/families and with all members of the research team or academic unit must be accurate, sensitive, effective, and efficient. Response time to emergencies/crisis situations, as well as more routine communication must be appropriate to the situation or setting.

4. **Sensorimotor:** Candidates must have sufficient gross motor, fine motor, and equilibrium functions, and functional use of sensory systems to enable them to perform all tasks essential to their career paths.

5. **Behavioral and social attributes:** Candidates are expected to exhibit professional behaviors and attitudes during participation in classroom, clinical, or research experiences. The candidate must be able to communicate effectively and sensitively with supervisors, peers, and subjects/patients/clients/consumers/families, including individuals from different backgrounds regardless of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, genetic information or any other protected class. This includes, but is not limited to, an ability to establish rapport and communicate with others, to use appropriate language, possess flexibility toward change, and to accept responsibility for one’s own conduct. Candidates are expected to exhibit a positive attitude toward supervisors, peers, and subjects/patients/clients/consumers/families.
Journalism & Mass Communications

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor [http://www.advising.ku.edu/] for details). Other years' catalogs [http://catalog.ku.edu/archives/] are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

Bachelor of Science in Journalism and Mass Communications (p. 709)
Minor in Journalism and Mass Communications (p. 712)
Undergraduate Certificate in Sports Media (p. 713)
Master of Science in Digital and Integrated Marketing Communications (p. 713)
Master of Science in Journalism and Mass Communications (p. 714)
Doctor of Philosophy in Journalism and Mass Communications (p. 716)
Graduate Certificate in Data Interpretation and Communication (p. 717)
Graduate Certificate in Social Media Strategy (p. 717)

The School of Journalism and Mass Communications

Values
The William Allen White School of Journalism and Mass Communications [http://www.journalism.ku.edu/] is guided by a set of core values. We value

• A diverse, collaborative, and dynamic student-centered environment.
• Excellence in learning, teaching, and mentoring.
• Free expression and conscientious, ethical journalism as cornerstones of a democratic society.
• Critical and creative thinking.
• Meaningful research and creative activity.
• Imaginative outreach and collaboration on this campus, in Kansas, and in the profession of journalism.

Mission
The mission of the school is to teach students to think critically and creatively while preparing them for careers in journalism, mass communications, and related fields and for graduate study. Graduates will

• Appreciate the value of freedom of expression and its importance in society.
• Be able to analyze mass media critically.
• Have an ethical framework for the practice of journalism and mass communication.
• Demonstrate understanding of the value of a diverse society, a diverse workplace, and the importance of reflecting that diversity in mass media.
• Demonstrate an understanding of the impact of changing media technologies on society.
• Demonstrate effective production and presentation skills for the media.
• Demonstrate an understanding of the importance of research for adding new knowledge and an ability to employ research techniques for analysis and interpretation.
• Demonstrate understanding of how communications organizations function and the important management issues they face.

The school is accredited by the Accrediting Council on Education in Journalism and Mass Communications.

Facilities
Stauffer-Flint Hall and Dole Human Development Center
The school's classrooms, laboratories, student media, and faculty offices are in Stauffer-Flint Hall and Dole Human Development Center. The school's Dean's office, Student Services office, The Agency, The University Daily Kansan, Media Crossroads, KUJH-TV, and the Journalism Resource Center are in Stauffer-Flint, as is the office of the Kansas Scholastic Press Association. The Dole Center houses multimedia labs, graduate student offices and classroom space.

Journalism Student Services Center
The Student Services Center, 117 Stauffer-Flint Hall, houses the Recruitment Coordinator, Career and Outreach Coordinator and Undergraduate Advising and Records. For prospective student questions about admissions to KU from a high school or transfer institution, please contact our Recruitment Coordinator at (785) 864-7620. For current KU students seeking admission to the School of Journalism, contact (785) 864-4080. Students who need advising, enrollment and graduation planning and assistance should also call (785) 864-4080.

Journalism Resource Center
Professional publications, copies of major national and state newspapers, and reference and research materials are available in the Journalism Resource Center, 210 Stauffer-Flint Hall. Students may check out computers for use in the Resource Center.

Undergraduate Programs
The school offers the Bachelor of Science (p. 709) degree in Journalism and Mass Communications. The program prepares students for careers in advertising, corporate communications, digital marketing communications, news, writing and editing, management, sports media, content creation, and sales in traditional media and emerging and converged media.

The school also offers a minor in journalism and mass communications (p. 712).

Courses for Nonmajors

University Honors Program

The school encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu/).

Graduate Programs

The William Allen White School of Journalism and Mass Communications offers two programs leading to the Master of Science (p. 714) in journalism – a scholarly thesis-based Mass Communications track in Lawrence, including a joint M.S.J.-J.D. option and an online Digital and Integrated Marketing Communications track. A Ph.D. in Journalism and Mass Communications is also available in Lawrence.

The Lawrence-based Mass Communications program focuses on deeper, theoretical understanding of the professions of the media. The student must complete 37 graduate credit hours with at least a B (3.0) average. A student completes a thesis and passes a general examination of his/her thesis.

Our online master's program in Digital and Integrated Marketing Communications trains graduates to build skills in digital marketing disciplines while also offering strategic marketing communications training from a managerial perspective. With certificates in Digital Marketing, Social Media Strategy and Integrated Marketing Communications, students can advance their careers as working professionals. The online program is divided into three certificates. The master's degree is earned by completing two of the three certificates, but students may choose to earn just one certificate. Students may work on these certificates independently, building credentials before they complete a master's degree. All classes are online. The program requires 30 hours of coursework to earn a master's degree.

The Ph.D. program in Journalism and Mass Communications is small and, therefore, selective. We admit four to six students per year to ensure close work with the faculty. We expect our students’ scholarly and research interests to intersect with those of our faculty. Students who hold a master’s in journalism complete at least 40 hours for the degree. The student completes study of appropriate research skills, designed in consultation with the faculty advisor. The student also must meet KU’s requirements for dissertation hours.

Undergraduate Scholarships and Financial Aid

All students with financial need should apply for Financial Aid and Scholarships (https://financialaid.ku.edu/apply-for-aid/). This office awards scholarships to incoming first-year students based on academic merit.

The School of Journalism and Mass Communications has a limited number of scholarships provided by donors who often specify the majors or the geographic areas from which recipients may be selected. Most scholarships from the school are reserved for students already admitted to our major. To receive a need-based scholarship from journalism, the student must have submitted the FAFSA form (https://studentaid.gov/h/apply-for-aid/fafsa/) and been determined to be eligible. Merit-based scholarships also are offered.

Scholarship applications are available beginning in October on the school’s website. The application deadline is typically in December. Notices of scholarships awarded by national journalism organizations are posted in Stauffer-Flint Hall and the Dole Center when they are received.

### Internships

Through the Career Center (https://journalism.ku.edu/career-center/), the school enables students to gain professional experience working as interns. Internships vary in time of year, duration, location, compensation, and required course work or other experience. Many students complete internships during the summer, but they also are available during the school year. Staff members provide further guidance on opportunities and requirements.

### Study Abroad

Journalism students study abroad in a variety of locations. Students should work with their journalism advisor and the Office of Study Abroad and Global Engagement (https://studyabroad.ku.edu/).
Graduate Fellowships and Assistantships
For information about graduate assistantships, contact the School of Journalism and Mass Communications.

Visit the Graduate Studies website for information about funding opportunities (https://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/apply-for-aid/) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations
For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Change of School
To change from one school to another, you must submit a Change of School form online (https://registrar.ku.edu/change-school/). Admission requirements are outlined in the catalog and on the School’s website.

Credit/No Credit
A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (http://policy.ku.edu/).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Journalism courses or courses in another school’s major or minor may not be taken for Credit/No Credit.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. In addition to a student’s academic record, other factors may be considered.

Honor Roll
Students with grade-point averages of 3.75 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. Credit/No Credit grades are not accepted. S grades are accepted. An Honor Roll notation appears on the transcript.

Maximum and Minimum Semester Enrollment
The normal enrollment is 15 to 16 hours a semester. A 12-hour enrollment is considered a minimum full-time enrollment. Enrollment in more than 18 hours a semester, or more than 9 hours during the summer session, requires special permission from the assistant dean for student services.

Nonresidence Study Before the Last 30 Hours
Before the last 30 hours required for the degree, students may, under certain conditions, take courses at other institutions and transfer the credit to KU. Before enrolling in a nonresidence course, check on how your courses will transfer to KU (https://admissions.ku.edu/transfer-requirements-deadlines/transfer-college-credits/) or complete KU’s standard form, Request for Tentative Evaluation of Transfer Credit, in your dean’s office or student services office or in College Advising and Student Services for students in the College. After completing the course work, you must request that an official transcript be sent to the Office of Admissions, (https://admissions.ku.edu/) KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911. For transcripts to be official, they must be mailed from the college or university directly to KU. Faxed transcripts are not accepted for posting of transfer credit.

Nonresidence credit includes all credits from another college or university taken after initial enrollment at KU, military service courses, and other undergraduate course work not formally offered in the Schedule of Classes (p. 14).

Majors must submit the Request for Tentative Evaluation of Transfer Credit form before they enroll.

Prerequisites and Corequisites
Course prerequisites are strictly enforced. Students are administratively dropped from courses for which they do not meet prerequisites. Waiver is not granted if the prerequisite course was taken and failed or taken and not completed.

Probation
Students admitted to the school must do the following in order to remain in the school in good standing:

• Maintain a 2.5 cumulative KU grade-point average and a 2.5 journalism grade-point average.

Students failing to meet the condition above are placed on probation for 1 semester. If a student does not raise their cumulative KU and/or journalism grade-point averages to 2.5, they are dismissed from the school.

Students who fail to complete JMC 101 with a C (2.0) or better have their admission rescinded.

Repetition of Courses
The School of Journalism and Mass Communications follows the university’s course repeat and grade replacement policy.

Required Work in Residence
No baccalaureate degree is granted to a student who has not completed at least 30 semester credit hours of residence courses at KU. No exceptions are granted.

To earn a bachelor’s degree from KU, you must complete the last 30 hours of credit for the degree by resident study. You may petition the dean for a waiver.
Time Limits

Students are encouraged to complete the undergraduate degree in 4 years or less. Students experiencing a break in enrollment may return within five years of the last class they attended as an enrolled undergraduate journalism student and complete their coursework under the requirements in place at the time they left. They must maintain continuous enrollment to finish their coursework after they re-enroll.

If it has been longer than five years, students may be readmitted under the current degree requirements in place when they return.

Transfer of Credit

CredTran (https://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

A maximum of 18 hours of undergraduate JMC coursework may be applied from another institution. Courses with grades of D+ or lower are not accepted for transfer credit.

Graduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Journalism Career Center

The Career Center (https://journalism.ku.edu/career-center/), 120 Stauffer-Flint Hall, helps students find internships and jobs. Each year, leading media outlets, advertising agencies, and corporations in the state and the nation visit campus to interview students. The Career Center also maintains an online database of internships and jobs that is updated frequently.

Courses

JMC 101. Media and Society. 3 Credits.
Introductory course open to all KU students. The course emphasizes the use of critical and creative thinking as tools to better consider the reliability of information received through newspapers, magazines, radio and television, online media, trade publications, advertising, and business communications. The class also surveys media ethics, economics, technology, and the function and impact of media on a free society. The course is designed for pre-journalism students, students considering journalism as a major, and students from other disciplines who take it as an elective. Not open to seniors. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum.

JMC 104. Words at Work: Writing Essentials. 3 Credits.
This course introduces the formats and language used in professional writing. This course also covers structure, usage, clarity, punctuation and other mechanics, which students apply in writing. Students will learn proper attribution practices, write pieces in various formats and practice the revision process. The course is designed for beginning journalism students, students considering journalism as a major, and students from other disciplines who wish to improve their writing skills and learn principles of professional writing. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum.

JMC 150. Stand and Deliver. 3 Credits.
The ability to inform or persuade confidently through presentation is an incalculable skill no matter where students choose to direct their careers. This course introduces students to presentation approaches, effective oral communication fundamentals, audience analysis, support technologies and structural development. Students will assess their own communication styles and strengths, understand presentation purposes and types, research, edit and organize material, use graphics concepts and techniques to design formats for value-added content, and practice coherent, relevant and well-articulated stories. Students will apply what they learn in a variety of situations, from individual expository speeches to group business proposals. Open to all undergraduate students.

JMC 177. First Year Seminar: ___. 3 Credits. SC
A limited-enrollment, seminar course for first-time freshman, organized around current issues in journalism or media. Course is designed to meet the critical thinking learning outcome of the KU Core. First year seminar topics are coordinated and approved by the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

JMC 200. Topics in Journalism: ___. 3 Credits.
Topics course in Journalism.

JMC 201. Current Issues in Journalism. 3 Credits.
An in-depth investigation of a current event or issue confronting the various professions of journalism. The class will examine the implications of the event/issue for professional values, ethics, diversity and free expression. Prerequisite: JMC 101 with a grade of 2.0 or better.

JMC 205. Career Exploration and Planning. 1 Credits.
This course will provide students instruction in career planning connected to their major and ultimately life after graduation. Topics include career interests and work styles. Prerequisite: JMC 101 and JMC 104 with a C (2.0) or higher. Not open to seniors.

JMC 210. Basic Video Production. 2 Credits.
This course instructs and prepares students to work with multiple media-studio and live production. This is a lab-intensive course designed with live newsroom and live in-the-field productions. Students will have the opportunity to learn behind the scene skills; studio and live camera, floor directing, lighting, audio, basic PhotoShop and field producing skills in production of newscasts and other reports. May be taken twice.

JMC 211. Tech Tools: Audio / Video. 1 Credits.
This hands-on course helps students develop skills in audio and video production and editing using industry standard tools including Audition, Premiere and Rush.

JMC 212. Tech Tools: Graphic Design. 1 Credits.
This hands-on course will help students develop graphic design skills to create vector graphics, documents and mockups in InDesign, Illustrator and XD.

JMC 213. Tech Tools: Visuals. 1 Credits.
This hands-on course will allow students to develop basic skills in mobile photography, image editing, and animation using Photoshop, Lightroom and After Effects.

JMC 214. Tech Tools: Presentation. 1 Credits.
This hands-on course will help students develop visual presentation skills and an awareness of accessibility issues in Powerpoint, Keynote and Google Slides.

JMC 215. Tech Tools: Web Coding. 1 Credits.
This hands-on course helps students build skills in Wordpress as well as basic coding in HTML and CSS.

JMC 260. Agency: Introduction. 3 Credits.
The course familiarizes students with the business, roles, scope and culture of the strategic communications business, including its advertising, public relations and related components. It includes an introduction to
brand and creative messaging strategy, critical and creative thinking processes. It also focuses on developing a toolbox of principles for evaluating critical thinking and creative ideas. This class is a prerequisite or corequisite to working in The Agency.

**JMC 300. Visual Storytelling. 2 Credits.**
This course is about understanding how an idea becomes something you can see and how the media use visuals in the most efficient and effective ways possible. Students will develop a visual vocabulary and personal aesthetic as they expand their skills in the use of the digital toolbox— including presentation design, and the use of the graphics, typography, color, photography (still and video) and audio. They will put their learning into practice through production of visual projects for diverse audiences served by print, online and broadcast media. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 101 with a grade of 2.0 or better. It is highly recommended that students take at least one Tech Tools section concurrently.

**JMC 302. Information Exploration. 3 Credits.**
This course addresses the central role of information literacy and information sources in news and strategic communication. Students learn to gather information by using a wide range of research tools and techniques. They advance their critical thinking by practicing to evaluate the credibility of the information sources they access. They learn to analyze and synthesize the information they collect, in preparation to communicate it. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum.

**JMC 304. Media Writing for Audiences. 3 Credits.**
This course will emphasize journalistic and strategic writing in creating coherent and engaging content. It will build on JMC 104, helping students sharpen their writing and interviewing skills for text and audio/video and sharpen their judgment in choosing information, sources and story forms. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Students must be admitted to the School of Journalism and Mass Communications, journalism minor or in an approved concentration in order to enroll in JMC 304. Prerequisite: JMC 101, and JMC 104 or passage of the School's Grammar Basics course. May be taken after or concurrently with JMC 302.

**JMC 305. Writing for Media, Honors. 3 Credits.**
An Honors section of JMC 304. This course will emphasize journalistic and strategic writing in creating coherent and engaging content. It will build on JMC 104, helping students sharpen their writing and interviewing skills for text and audio/video and sharpen their judgment in choosing information, sources and story forms. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Students must be admitted to the School of Journalism and Mass Communications, journalism minor or in an approved concentration in order to enroll in JMC 305. Prerequisite: JMC 101, and JMC 104 or passage of the School's Grammar Basics course. May be taken after or concurrently with JMC 302. Open only to students in the KU Honors Program.

**JMC 308. Ethics in a Wired World. 3 Credits.**
This course surveys and applies theories, principles and critical-thinking strategies for making ethical decisions related to personal and professional use of media. Students will examine and strive to resolve specific ethics challenges posed by participation in media such as Facebook, Twitter, LinkedIn, Blackboard, news media websites, dating websites, and more. Course is not open to students, including minors, enrolled in the School of Journalism and Mass Communications.

**JMC 309. Data Storytelling. 3 Credits.**
This course will prepare students to draw conclusions from data and statistical evidence, in order to generate insights, support managerial decisions, and communicate compelling stories. Students learn and practice all components of the data workflow, including accessing and collecting data, assessing the credibility of data, using spreadsheets to organize and analyze data, drawing inferences from data, and communicating data with text and visualizations. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 302 with a grade of 2.0 or better. Students must be admitted to the School of Journalism and Mass Communications, journalism minor or in an approved concentration to enroll.

**JMC 315. Health and Science Communication. 3 Credits.**
This course introduces students to principles of digital marketing communication, advertising and public relations in the context of health and science communication. Students learn how these principles can be applied to (1) promote behaviors and causes that aim to improve life and wellbeing, (2) strategically respond to health and environmental challenges, and (3) address misinformation or disinformation pertaining to health and science communication. Particular attention is paid to the effects of health and science communication on underserved populations. Students learn best practices in the field, including ethical considerations and legal requirements, and work on assignments to communicate with diverse audiences.

**JMC 319. Topics in Journalism and Mass Communications:**
---. 1 Credits.
A brief overview of a skill or concept relevant to journalism and mass communications. Prerequisites vary depending on topic; see Notes for specifics. May be repeated for credit up to three times for three hours maximum. Prerequisite: Varies by topic.

**JMC 320. Introduction to Digital Marketing Communications, Advertising and Public Relations. 3 Credits.**
Students develop an understanding of how communication practitioners develop effective, research-based digital integrated marketing communications plans to accomplish their goals. It examines the role of communications in strategic planning and explores career opportunities in professions such as digital marketing communications, advertising and public relations. JMC 320 provides insight into how communicators use critical and creative thinking to gather, organize, evaluate and deliver information in a culturally diverse environment. JMC 320 provides the foundation for core courses in the Digital Marketing Communications, Advertising and Public Relations concentration. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: Completion of JMC 101 with a grade of C (2.0) or higher.

**JMC 330. Sports Media in the 21st Century. 3 Credits.**
This course examines the role of mass media in shaping and influencing sports and popular culture. Students will be prompted to think critically about historical and current media practices as they relate to sports and their role in society. The course is designed for pre-journalism students, students considering journalism as a major, and students from other disciplines who take it as an elective. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum.

**JMC 340. Creative Concepting. 3 Credits.**
This course focuses on fundamental concepting skills necessary for creative content development from ideation to concept presentation. Students will explore and work through the creative concepting process to inspire and produce creative media. Ideation and concepting projects are grounded in real-world messaging challenges and audience understanding. Requirement: Must obtain a grade of C (2.0) or above to advance in the curriculum. Prerequisite: Admission to the School of Journalism and Mass Communications and JMC 101, JMC 104 and JMC 260.

**JMC 341. Applied Video Editing. 1 Credits.**
This hands-on course will help students develop their video editing and motion graphic skills. Students will consider brand voice and audience needs while building a variety of video content. Students will explore which types of videos are most effective on different platforms and apps. Note: Students need regular access to Adobe Creative Suite. Prerequisite: JMC 211.

**JMC 342. Applied Graphic Design. 1 Credits.**
This hands-on course will help students solve media design problems using graphic design. Students will consider brand voice and audience needs while building digital portfolio pieces. Note: Students need regular access to Adobe Creative Suite. Prerequisite: JMC 212.

**JMC 345. Audience Experience. 3 Credits.**
This course teaches students to research, understand, develop, and produce creative content for diverse audiences across an audience journey in a multimedia, omnichannel digital environment. Known as audience experience, or brand experience, this set of principles and skills is fundamental to the development of creative content in a digital, multi-platform, multi-screen audience environment. Requirement: Must obtain a grade of C (2.0) or above to advance in the curriculum. Prerequisite: Admission to the School of Journalism and Mass Communications and JMC 101, JMC 104, and JMC 260 or JMC 330.

**JMC 406. Media Practicum. 1-3 Credits.**
The Media Practicum provides students opportunities to earn credit while gaining practical education and experience working in units of campus media, including the University Daily Kansan/Jayhawk Media Group, KUJH-TV and Media Crossroads, as well as community-based media organizations associated with the William Allen White School of Journalism and Mass Communications, including the Statehouse news bureau and the Eudora Times. Students complete work under supervision of an instructor with defined outcomes and measures, preparing them for work in the media profession. Prerequisite: JMC 101 and JMC 104. Corequisite of JMC 304.

**JMC 408. Media Law and Ethics. 3 Credits.**
This course examines the ethical and legal foundations of mass communication in the United States and related challenges inherent in the practice of professional communication. Students will study freedom of expression concepts through the joint lens of First Amendment law and ethical decision-making processes. Both ethical and legal assessments of a variety of speech, persuasive media, and press issues, including privacy, intellectual property, and libel, will be discussed. The course will introduce key ethical and legal theories, codes, and principles and will use case studies and decision-making models to address important challenges within the ethical and legal practices of professional communication. Prerequisite: JMC 101 with a C (2.0) or higher.

**JMC 409. Special Topics in: _____. 2-4 Credits.**
Prerequisite: Approval of instructor.

**JMC 410. Media Photography. 3 Credits.**
The study of photography including light, cameras, lenses and exposure combined with the practice of photography for media. Students will learn to photograph news, sports, events and portraits. The course will also stress the ethics and practice of digital editing using software. Students will need frequent access to a camera that conveniently allows for setting ISO, aperture and shutter speed. Prerequisite: JMC 300 with a grade of C (2.0) or above.

**JMC 415. Multimedia Reporting. 3 Credits.**
Hands-on instruction in the gathering, writing, and presentation of news and information for newspapers, magazines, television, radio, and online media. Student work may appear in campus media. A 75-question test on grammar, usage and AP style will be required as part of the course. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 302 with a C (2.0) or above and JMC 304 (or JMC 305) with a C (2.0) or above.

**JMC 419. Multimedia Editing. 3 Credits.**
This course emphasizes principles of editing for written and visual expression, logic, visual presentation, organization, and news judgment for all forms of media: newspaper, magazine, broadcast, and online. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 302 with a C (2.0) or above and JMC 304 (or JMC 305) with a C (2.0) or above.

**JMC 420. Advanced Digital Marketing Communications, Advertising and Public Relations. 3 Credits.**
This course deepens students' exposure to and understanding of digital marketing communications, advertising and public relations. Students use secondary research and social media analytics to develop and evaluate their own online campaign through a series of assignments that build upon each other, such as conducting a situation analysis and proposing a strategic plan. Students identify various communication tactics as well as analyze and discuss opportunities and challenges facing digital marketing, advertising and public relations practitioners, with an emphasis on diversity and ethics. JMC 420 challenges students to use theories of communication and persuasion to solve particular communication problems for specific audiences. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: For students starting at KU Summer 2022 and before: Admission to the School of Journalism and Mass Communications and JMC 320 with a grade of C (2.0) or above. For students starting at KU Fall 2022 and after: Admission to the School of Journalism and Mass Communications, JMC 304, JMC 309, and JMC 320 all with grades of C (2.0) or above.

**JMC 430. Communicating Sports Information. 3 Credits.**
Students will explore the principles and practices of public relations in sports organizations. Emphasis will be placed on understanding media relations, storytelling with statistics, and skills essential for sports communication professionals, including writing sports news releases and producing video and audio content for diverse sports audiences; understanding the rules of the games; and developing risk management and crisis communication strategies for sports organizations. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Students must be admitted to the School of Journalism and Mass Communications to enroll. Prerequisite: JMC 304 (or JMC 305), and JMC 320 or JMC 345.

**JMC 440. Creative Video Producing/Directing. 3 Credits.**
This course focuses on contemporary perspectives, critical ideas, and advanced techniques, tools, and skills necessary to produce creative video connected to a target audience. Students work in crews or teams to develop, produce, edit, and complete a final video. The course works from concept to final product and includes additional readings and assignments. Must obtain a grade of C (2.0) or higher to advance in the curriculum. Prerequisite: JMC 340 and JMC 345, or permission of instructor. Recommended: JMC 211.

**JMC 445. Creative Audio Production and Podcasting. 3 Credits.**
In this course, students will learn and apply advanced skills of audio storytelling and production. These skills include identifying a content topic, creating a story, identifying the audience(s), scripting, recording, and editing the audio, and distributing across channels. Students will use these skills to plan and produce a podcast series. Must obtain a grade of C (2.0) or higher to advance in the curriculum. Prerequisite: JMC 340 and JMC 345, or permission of instructor. Recommended: JMC 211.

**JMC 450. Project Management. 1 Credits.**
This course covers the fundamental concepts of managing a creative project and some of the technological tools available for a team to manage a project. Requirement: Must obtain a grade of C (2.0) or higher to advance in the curriculum. Prerequisite: JMC 101, JMC 104, and JMC 260 or JMC 304. Co-requisite: JMC 340, JMC 345, JMC 420, JMC 415, or JMC 419.

JMC 460. Research Methods in Digital Marketing Communications, Advertising and Public Relations. 3 Credits.
Students learn the theory and application of the most frequently used quantitative and qualitative research methods for primary data collection in digital marketing communications, advertising and public relations. The course promotes critical thinking and problem solving through identifying and formulating audience-specific research questions and hypotheses, instrument development, data collection, data analysis, and reporting. Students work individually and in groups to design, plan, and conduct research. The course deliverables include customized research instruments and comprehensive, evidence-based data analysis reports using narrative and statistics. Students also learn about the ethical conduct of research and how to develop projects that are inclusive and cater to diverse audiences. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: For students starting at KU Summer 2022 and before: Admission to the School of Journalism and Mass Communications and JMC 320 with a grade of C (2.0) or above. For students starting at KU Fall 2022 and after: Admission to the School of Journalism and Mass Communications, JMC 304, JMC 309, and JMC 320 all with grades of C (2.0) or above.

JMC 488. Laboratory in Media Production. 1-3 Credits.
This course offers students an opportunity to work with multiple media-studio and live production. This is a lab-intensive course designed with live newsroom and/or live in-the-field productions. Students will serve as producers/anchors and directors for programs at KUJH, Media Crossroads and other media. No student may earn more than four hours total in JMC 506, JMC 507, and/or JMC 508, and no student may earn more than nine hours combined for course work in JMC 210, JMC 488, JMC 507, and JMC 508. Excess hours of practicum will add hours to the total number of hours needed to meet graduation requirements. Limit of three hours enrollment in JMC 488 in a student's total course work. Prerequisite: JMC 210 or instructor permission.

JMC 500. Topics in Journalism: _____ . 2-3 Credits.
Prerequisite: Eight hours of journalism. If a section is designated Advanced Media, the prerequisite is JMC 415 and JMC 419, each with a grade of 2.0 or above.

JMC 503. History of Journalism and Mass Communication. 3 Credits.
A survey of the history of the American media emphasizing appreciation and understanding of the technological, social, and cultural trends affecting newspapers, magazines, radio, and television broadcasters, and online media. The class may focus on one segment of journalism history, which will be listed in that semester's timetable. The course may be repeated when the focus varies. Prerequisite: Junior standing.

JMC 505. Professional Development. 1 Credits.
Preparation in skills needed in seeking internships and permanent employment, including resume and application letter writing, interviewing and professional presentations. Prerequisite: JMC 345, JMC 415, JMC 430 or JMC 460 with a grade of 2.0 or higher.

JMC 506. Directed Studies in Journalism. 1-3 Credits.
Undergraduate research project. Students must submit a written proposal to be approved by the instructor before enrollment. Proposal form can be found on Journalism School website or advising office and must be received by Journalism advising office by the 16th day of the semester. Limit of three hours enrollment in a student's total course work. Prerequisite: 2.5 grade point average overall and in Journalism.

JMC 507. Practicum in Journalism (Professional). 1-3 Credits.
Practical experience in a supervised professional setting. Students enrolled receive credit for professional experience in advertising, public relations, news-editorial, radio, television, photojournalism, video production, project management, content creation, website management, communications, social media and related fields. Supervision is provided by the employer offering the professional experience. Enrollment requires consent of instructor. Students must also be registered with the Journalism Career Center. Students may earn one credit hour for working at least 40 hours over the duration of the semester, two credit hours for working at least 80 hours, or three credit hours for working at least 120 hours. Limit of three hours enrollment in JMC 507 in a student's total coursework. No student may have more than four hours total in JMC 506, JMC 507, and JMC 508. A student is allowed to receive credit and financial compensation. Graded on a satisfactory/unsatisfactory basis. Prerequisite: JMC 345, JMC 415, JMC 430 or JMC 460 with a grade of 2.0 or above, and good academic standing in Journalism and Mass Communications.

JMC 534. Diversity in Media. 3 Credits.
A study of mass media images and portrayals of race, class, and gender in society. The course examines media representations of African-Americans, Latinos, Native Americans, and Asian Americans, as well as media images of masculinity and femininity. The course also explores media images of groups traditionally under-represented in the media, including gays and lesbians, the elderly, the poor, and the disabled. Students study media portrayals in journalism, entertainment, public relations and advertising. The course encourages students to think critically about media images and analyze the role mass media play in reinforcing cultural stereotypes. Prerequisite: 8 hours of Journalism.

JMC 540. Sports, Media and Society. 3 Credits.
The role of mass media in shaping and influencing sports and popular culture. Students will think critically about currently accepted media and sports practices, particularly at the Division I college level. Guest speakers represent media and athletics. Discussion, presentation, paper and essay exam. Prerequisite: Junior standing.

JMC 545. Magazine Publishing. 3 Credits.
This is an entrepreneurial course in which students work in pairs to come up with an idea for a new magazine, write a business plan and design pages for it. In the process, students learn about magazine media today, how to identify need, understand audience and competition, how to plan an editorial product in print and online, how to develop circulation/promotion and advertising plans, and how to create a visual identity for a magazine. Students also learn how to write a business plan persuasively and concisely, and to edit for continuity. The outcome is a portfolio-quality project that demonstrates critical thinking, writing and design skills. Prerequisite: JMC 302 with a grade of C (2.0) or above and JMC 304 (or JMC 305 Writing for Media, Honors) with a grade of C (2.0) or above.

JMC 550. Digital Media. 3 Credits.
This course will allow students to go deeper into one area of news, build their portfolios and prepare for internships. Each section has a separate emphasis: multimedia broadcast, multimedia reporting, or editing/production. The Multimedia Broadcast section will advance the student's understanding of reporting, writing, shooting and editing video for online and KUJH-TV. The section produces content for KUJH-TV newscasts and for an online audience. The Multimedia Reporting section will provide an immersive reporting opportunity for students in the News and Information track. It allows students to report stories for the University Daily Kansan and Kansan.com. Reporting students will produce depth
stories and cover breaking news as it happens. This section prepares students for internships and advanced media courses. In the Editing/Production section, students will work for the University Daily Kansan and Kansan.com, editing stories, writing headlines and cutlines, creating packages, working on search engine optimization and social media, and building graphics. The course gives students hands-on experience with editing on deadline for digital and print, as well as a deeper understanding of news and current production processes. Requirement: Must obtain a grade of C (2.0) or higher to advance in the curriculum. Prerequisite: JMC 415, and JMC 419 each with a grade of C (2.0) or higher.

**JMC 551. Advanced Multimedia Reporting. 3 Credits.**

This course allows students to report stories for the University Daily Kansan and Kansan.com. Students in this course will produce enterprise and spot news content. This section prepares students for internships and upper-level courses. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 415, and JMC 419 each with a grade of C (2.0) or higher.

**JMC 552. Broadcast Reporting. 3 Credits.**

This course advances the student's understanding of reporting, writing, shooting and editing video for online and KUJH-TV. The section produces content for KUJH-TV newscasts and for an online audience. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 415, and JMC 419 each with a grade of C (2.0) or higher.

**JMC 553. Advanced Editing and Production. 3 Credits.**

In this course, students edit stories, write display type for multiple platforms, work on digital analytics and social media, and prepare news for print and digital publication. The course gives students hands-on experience with editing on deadline and production processes. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 415, and JMC 419 each with a grade of C (2.0) or higher.

**JMC 560. Message Development in Digital Marketing Communications, Advertising and Public Relations. 3 Credits.**

Students exercise both critical and creative thinking to develop multimedia writing and design skills. Students begin addressing clients' needs by applying research on product or service benefits, brand identity, competition and audience motivations. The research informs students' creative briefs, which are used to craft messages such as social media posts, advertisements (print and video), and news releases, targeting specific personas. In addition to honing critical thinking skills, students combine strategy, design, writing and production skills to contribute to their professional portfolio. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Prerequisite: JMC 300, JMC 302, JMC 304 (or JMC 305, Honors) JMC 320, JMC 420, and JMC 460 all with grades of C (2.0) or above. Only open to Journalism and Mass Communications majors.

**JMC 570. Content Creation & Website Management. 3 Credits.**

This course will introduce students to the development and management of websites including the development of creative content, content management systems (CMS), user experience and search engine optimization. Students learn how to approach content, logical organization, hierarchy and navigation for the target audience(s). Students will also learn best practices for website accessibility and use audience analytics to track the website’s effectiveness. Will need regular access to Adobe Creative Suite. Students must earn a C (2.0) or better to advance in the curriculum. Prerequisite: JMC 340, JMC 345 and Junior standing.

**JMC 575. Sports Message Strategies. 3 Credits.**

This course will emphasize the application of sports communication strategies related to advertising, promotions, marketing communication, and branding. Students will learn to identify and implement appropriate messaging strategies for disseminating information, handling crisis situations, and fostering rapport with relevant sports publics, including media, sponsors, historically marginalized audiences, and existing fanbases. Students will also critically analyze how different platforms influence message strategies. Must be completed with a grade of C (2.0) or higher to advance in the JMC curriculum. Students must be admitted to the School of Journalism and Mass Communications to enroll. Prerequisite: JMC 430 with a C (2.0) or higher.

**JMC 585. Multimedia Sports Journalism. 3 Credits.**

The course would be a hands-on, in-your-face, portfolio-building opportunity for students who want to venture into sports journalism. It would allow students to write sports stories, do live play-by-play, develop video stories and cover live events. It will also introduce them to sports journalism beyond the playing field. Must obtain a grade of C or higher to advance in the curriculum. Prerequisite: JMC 415 and JMC 419, or JMC 560, all of which must be passed with a C (2.0) or higher, or instructor permission. Students must be admitted to the School of Journalism and Mass Communications in order to enroll in JMC 585.

**JMC 590. International Journalism. 3 Credits.**

This course explores print, broadcast and online media in industrialized and developing nations. It examines how government rules and restrictions affect press freedoms, examines the effects of technology on access to information, explores how the U.S. media cover news in foreign countries, explores how foreign media cover news events in the United States, and examines coverage of critical current events. The goal of the course is to make students aware of the effects of mass media in a global economy. Prerequisite: Eight hours of Journalism.

**JMC 595. Gamification. 3 Credits.**

Gamification is the application of the elements of gaming that engage and retain players to entertainment and non-entertainment content. Students in this course will be introduced to key elements of gamification: how to create their own model game: the history of games; models and approaches to drive engagement with gamified content; how psychological (and sometimes physical) rewards drive engagement; the cultural and critical social context for games and gamers; and, the selection of appropriate platforms and approaches for effective games. Students will create a model game using Adobe XC and other applications. Note: Need regular access to Adobe Creative Suite. Prerequisite: Eight hours of Journalism & Mass Communications or permission of instructor.

**JMC 600. School Journalism and Publications. 3 Credits.**

(Open only to education majors and journalism teachers in elementary and secondary schools.) A study of the use of publications in the teaching of secondary school journalism, and an analysis of problems in supervising school newspapers, magazines, and yearbooks. The course covers staff organization, writing and editing, make-up, typography, advertising, and illustration. Students learn through lectures, projects, practice assignments, and directed study of newspapers, yearbooks, and current teaching materials.

**JMC 608. Ethics and Professional Practice. 3 Credits.**

This course surveys techniques of moral analysis, argument, and decision-making for use by practitioners in both news and persuasive journalism. It employs classical ethical theory, moral reasoning models, and critical-thinking skills to resolve ethical choices through case studies involving reporters, editors, broadcasters, and practitioners in advertising, marketing, and public relations. Prerequisite: Eight hours of Journalism.

**JMC 610. Advanced Visual Media. 3 Credits.**

Students will learn advanced photography principles, including documentary photography, use of flash, advanced lighting techniques,
advanced software skills, and innovative imaging, as well as integration of still and video images. Emphasis on the creation of a digital portfolio, plus creating or finding an outlet for publication. Students should have semester-long access to a camera with multiple lenses that allows for manual exposure adjustment. Students should also have regular access to a detachable electronic flash. Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 410 with a grade of C (2.0) or higher, or permission of instructor.

**JMC 611. Sales Strategies. 3 Credits.**
The class focuses on the important basics of effective communication, attitudinal and strategic business skills that help persuade, convince and influence others. Communications skills such as asking the right questions, learning to present by taking care of your audience, effective listening and writing are all integrated into the class. Also business skills such as time management, customer service, handling objections, negotiations and business development are just a few of the necessary skills to be successful in a marketing, strategic communications or news path career. Experiential learning is a key element of the class as students have the opportunity to work directly with marque companies in the Kansas City/Lawrence area to learn the value of their sales process and unique selling propositions. The interaction with these industry professionals plus classroom guest speakers provide great experiential learning and career networking opportunities. The class also fulfills a requirement for the Certificate in Professional Selling offered through the Business School. Prerequisite: Junior standing.

**JMC 612. Visual Design and Production. 3 Credits.**
This course approaches design as a visual problem-solving process. Students create a digital portfolio that uses advanced storytelling techniques and showcases digital media competency. The process explores a number of possible solutions, encouraging students to expand their perspectives and to explore innovative and creative approaches. The resulting portfolio builds a bridge from student work to professional practice. Prerequisite: Completion of JMC 300 with a grade of C (2.0) or higher. Must be admitted to the School of Journalism to take JMC 612.

**JMC 613. Global Communications. 3 Credits.**
This course examines the process by which professional communicators operate in a global multicultural environment. It aims to instill an appreciation for the challenges in communicating across cultures, beginning with research and continuing through examining or creating culturally appropriate messages to be delivered in country-specific ways. The course covers differences among cultures and their communication styles, economic systems, demographics, politics, regulatory environment, research practices and media systems. Through case studies and projects, this course gives students a framework from which to address the challenges of global communications. Final projects may include writing a research paper pertaining to an aspect of global digital marketing communications, advertising and public relations, or creating messages to solve a communication problem for a specific audience. Prerequisite: Junior standing.

**JMC 615. Social Media and Emerging Technologies. 3 Credits.**
This course examines significant changes in strategic communication approaches brought about by the networked information society. Students will study effective ways for organizations to identify social technographies of key audiences, create social media content, disseminate messages and evaluate social media-based strategic communication initiatives. This course combines theoretical and hands-on approaches to issues. Students will work in groups to analyze, evaluate and develop social media strategies for organizations chosen for their case study research. Prerequisite: JMC 460 with a grade of C (2.0) or above or consent of the instructor. Open to non majors with permission of the instructor.

**JMC 616. Financial Basics for Communicators. 3 Credits.**
An overview of how business and markets operate; balance sheets, income statements and statements of cash flows; how to create and interpret budgets, particularly for non-profit organizations; key documents and regulations of business; how to use various tools of analysis, and how to make personal finance decisions. Each student follows one public company for the semester and explores various aspects of its operations. Prerequisite: Junior standing and completion of JMC 415 Multimedia Reporting or JMC 560 (or JMC 435) with a grade of C (2.0) or better. Open to non majors.

**JMC 617. Multimedia Management and Leadership. 3 Credits.**
The course addresses challenges faced by managers and leaders in traditional and non-traditional environments. The course explores a range of management and leadership concepts, including organizational culture, organizational change, functions of managers, leadership theory, motivation and reinforcement. Also explores in some detail the new world of work and what it means to be a "contingent employee" or "free agent." Prerequisite: At least one course designated as Advanced Media or JMC 460 (or JMC 568). Open to non majors with permission of the instructor.

**JMC 618. First Amendment and Society. 3 Credits.**
An examination of the history and philosophy of freedom of speech and press and the limitations imposed upon those rights by statute, common law, and court decisions resolving conflicts with other constitutional rights. Critical-thinking skills and case analysis focus on the roles, rights, and responsibilities of the news and persuasive media in a free society. This course is open to all students at the University of Kansas. It emphasizes the importance of freedom of expression in a free society. Students study key media law court decisions and explore free speech issues more broadly to embrace the philosophical thinking that led to the development of the First Amendment. Prerequisite: Junior standing.

**JMC 620. TV News-Advanced Media. 3 Credits.**
This course instructs and prepares students to work with multiple media-writing, reporting, web, graphics and live elements-to tell stories on the appropriate media platform. This is a lab-intensive course designed with live newsroom and live in-the-field reporting. Students will also have the opportunity to use producer and directing skills in production of newscasts and other reports. Classroom discussions will concentrate on refining and developing the skills you've learned in previous broadcast news courses, and on discussion and critical evaluation of professional standards and ethics. We will hold critique sessions of your lab work. We try to maintain flexibility in the class discussion topics in order to make them relevant to your lab work and to current issues in broadcast journalism. Requirement: Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 551, JMC 552, or JMC 553 with a grade of C (2.0) or higher. Only open to Journalism majors. Students must be in good academic standing to take this course.

**JMC 621. Data Reporting and Visualization-Advanced Media. 3 Credits.**
This class will advance the student's understanding and use of data driven journalism and its effective presentation. It will expand their knowledge of the skills necessary to be a data driven journalist and guide them in the creation of a stories and complementary visuals based on database analysis. Everyone in the class will learn the basic coding skills that the field requires, use those skills to acquire data, and create multiple data driven journalism stories, some of which will be used in media. Requirement: Must obtain a grade of C or higher (2.0). Prerequisite: JMC 551, JMC 552, or JMC 553 with a C (2.0) or better. Only open to Journalism majors. Students must be in good academic standing to take JMC 621.

**JMC 625. Digital Media Tools-Advanced Media. 3 Credits.**
In Digital Media Tools, students learn to negotiate multiplatform newrooms, acquiring skills in online production, audience engagement, analytics, social media account management and interactive multimedia storytelling. Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 551, JMC 552 or JMC 553, or both JMC 420 and JMC 460, with a grade of C (2.0) or higher, or instructor permission. Only open to Journalism and Mass Communications majors. Students must be in good academic standing to take this course.

**JMC 626. Multimedia Sports Journalism-Advanced Media. 3 Credits.**  
This course offers students practical experience in the production of compelling sports stories that reach beyond the playing surface. Multimedia tools will be used to examine social, economic, political, racial and personal issues involving athletes and athletics. Must obtain a grade of C (2.0) or higher. Students must be admitted to the School of Journalism and Mass Communications and in good academic standing to enroll in JMC 626. Prerequisite: JMC 551, JMC 552 or JMC 553 with a C (2.0) or higher.

**JMC 630. Depth Reporting-Advanced Media/Capstone. 3 Credits.**  
This is an enterprise reporting class designed to give students hands-on experience covering important issues that impact individuals and communities in Kansas and beyond. Students will produce multimedia stories that include government, social and cultural issues, business, human interest, and non-profit agencies. Requirement: Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 550, JMC 551, JMC 552, or JMC 553 with a grade of C (2.0) or higher. Students who started at KU prior to Fall 2012 only need to complete JMC 415 and JMC 419 with a grade of C (2.0) or higher as a prerequisite. Only open to Journalism majors. Students must be in good academic standing to take this course.

**JMC 635. Statehouse Reporting-Advanced Media/Capstone. 3 Credits.**  
The purpose of this class is to provide students with an immersive public affairs reporting experience at the State Capitol in Topeka while covering the important statewide issues of the day. Students will be assigned to cover the statehouse for specific media outlets and assist those media in fulfilling their public-service missions to their communities. Requirement: Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 551, JMC 552, or JMC 553 with a grade of C (2.0) or higher. Only open to Journalism majors. Students must be in good academic standing to take this course.

**JMC 636. Documentary-Advanced Media/Capstone. 3 Credits.**  
The study of the field and functions of non-broadcast television: the use of video by business, educational, medical, governmental, and non-profit organizations. Students plan and produce typical video materials, such as training tapes, employee orientations, community relations, new product demonstrations and self-paced instructional programs, designed for both internal and external audiences. Must earn a C (2.0) or higher. Prerequisite: JMC 551, JMC 552, or JMC 553 with a grade of C (2.0) or above. Only open to Journalism majors. Students must be in good academic standing in order to enroll in JMC 636.

**JMC 640. Campaigns in Digital Marketing Communications, Advertising and Public Relations. 3 Credits.**  
Students produce a campaign to solve a communication problem for an established organization. Students work with an actual client to develop a campaign from the initial research to the final recommendation. By applying the knowledge, experience and skills gained in previous courses, students confirm their readiness to enter the profession. Requirement: Must obtain a grade of C (2.0) or above. Prerequisite: Senior standing, good standing in the School of Journalism and Mass Communications, and JMC 420, JMC 460, and JMC 560 all with grades of C (2.0) or above.

**JMC 645. Media Arts Capstone. 3 Credits.**  
All students in the Media Arts & Production concentration are required to take the Media Arts & Production capstone course during or near their final term. The culmination of all prior coursework, this course requires students to complete a significant creative body of work connected to a strategic enterprise or messaging campaign connected to a target audience. This is the required final course in the Media Arts & Production concentration in the William Allen White School of Journalism and Mass Communications. Need access to Adobe Creative Suite. Requirement: Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 340 and 345 plus 6 hours of Media Arts & Production electives, all with grades of C (2.0) or above, and Junior standing. Only open to Journalism & Mass Communications majors. Students must be in good standing to take this course.

**JMC 650. Magazine Journalism-Advanced Media. 3 Credits.**  
Students in the course will produce different kinds of articles (departments and longer stories that fit key categories in magazines, including service articles, profiles and informational articles) for a real magazine. The magazine could be in print, online or take some other form. Students will gain an understanding of different parts of a magazine, the difference between departments and articles, and how to report and write short articles and longer substantive stories. Must obtain a grade of C (2.0) or higher. Students must be in good academic standing in order to enroll in JMC 650. Only open to Journalism students. Prerequisite: JMC 551, JMC 552, or JMC 553 with a grade of C (2.0) or higher. Only open to Journalism majors. Students must be in good academic standing to take this course.

**JMC 660. Professional Capstone - Advanced Media/Capstone. 3 Credits.**  
Students build on their student media experiences by working at a professional news outlet, where they are expected to generate or produce material that contributes to the published journalism content of that media outlet. Students may work across a variety of news functions including, but not limited to, reporting, editing, videography, producing, directing, design, photography or web/social production. Instructor will meet with students and their supervisors for individual mid-semester and end-of-semester conferences/evaluations. Successful completion of the course requires students to prepare a résumé reel or portfolio of their work and have that work evaluated by a news professional. Must obtain a grade of C (2.0) or higher. This class meets the Journalism School requirements as a capstone class. Prerequisite: One course designated as Advanced Media with a grade of C (2.0) or higher, and permission of instructor. Only open to Journalism and Mass Communications majors. Students must be in good academic standing to take this course.

**JMC 670. Intellectual Property in Practice. 3 Credits.**  
For those involved with the creation, production, and/or management of media and creative products, understanding Intellectual Property (IP) law in the digital age is of critical significance. American IP law grants and protects creators' property rights to encourage the production of creative works. This course provides students with the critical skills and knowledge to protect their rights and to avoid infringing upon the rights of others. In addition, the course will cover ramifications of recent technical developments and the courts' evolving notion of what constitutes Fair Use. Prerequisite: Junior standing or permission of instructor.

**JMC 675. Cultivating Sports Audiences Capstone. 3 Credits.**  
This course builds on knowledge of message strategies students have learned in previous classes to address real-world goals for sports organizations and teams. Students will work with a sports industry client to develop a plan for addressing communication-related objectives such as building fan loyalty, improving customer experience, and expanding sponsorship value or opportunity. Must be completed with a grade of C.
(2.0) or higher. Students must be admitted to the School of Journalism and Mass Communications and in good academic standing to enroll. Prerequisite: Junior standing and JMC 575 with a C (2.0) or higher.

JMC 690. Media Innovation-Advanced Media/Capstone. 3 Credits.

The primary goal of this course is to challenge students to create a marketable final project. By studying the concepts of innovation, entrepreneurial planning and the information needs of multiple audiences, students will develop a business concept for a viable creative media enterprise. The course will require students to integrate principles, theories and methods learned in other JMC courses. The course will also introduce students to entrepreneurial practices and critical thinking in a multi-format, small-group laboratory. Requirement: Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 551, JMC 552, or JMC 553, or JMC 560, with a grade of C (2.0) or higher. Only open to Journalism and Mass Communications majors. Students must be in good academic standing to take this course.

JMC 691. Community Journalism-Advanced Media/Capstone. 3 Credits.

Students work at a community newspaper, television station or online operation; and either cover the news, produce or edit the news. Instruction includes newsroom coaching and evaluation by professional journalists. Classroom instruction covers such issues as analyzing media content, diversifying story sources, and practical ethical decisions faced by the students. Instructors also meet with students for individual conferences. Students must complete a written project and present it to the class and to the news professionals. Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 551, JMC 552, or JMC 553 with a grade of C (2.0) or higher. Only open to Journalism majors. Students must be in good academic standing to take this course.

JMC 692. Sports on the Beat Capstone. 3 Credits.

Students build on their experiences writing sports journalism content by researching, writing, and posting about a single sports team or organization. Students may work in different sports news functions including, but not limited to, reporting, videography, producing, directing or web/social producing. Successful completion of the course requires students to prepare a résumé reel or portfolio of their work and then have that reel or portfolio evaluated by a professional in sports journalism. Must obtain a grade of C (2.0) or higher. This class meets the Journalism School requirements as a capstone class. Only open to Journalism and Mass Communications majors. Students must be in good academic standing to take this course. Prerequisite: Senior standing and JOUR 626 with a C (2.0) or higher or one course designated as an Advanced Media Lab with a grade of C (2.0) or higher, or permission of instructor.

JMC 695. Critical Issues in Emerging Media. 3 Credits.

This course provides an in-depth exploration of current social issues in the internet media landscape. Topics covered include: the digital divide, social media economics, data privacy, disinformation and misinformation, media consolidation and ownership. Students will survey business issues and critical social issues in today’s internet media landscape. Prerequisite: Eight hours of courses in the William Allen White School of Journalism & Mass Communications and Junior standing.

JMC 699. Reporting and Editing for Multimedia-Advanced Media. 3 Credits.

An intense eight-week summer reporting and editing experience. Two three-hour class sessions each week will focus on the proper concepts and techniques of reporting and editing across platforms. Students will be required to research, report and edit news stories for publication in student media and/or a themed course website. Students also will meet one-on-one on an ongoing basis with the instructor to review work. Must obtain a grade of C (2.0) or higher. Prerequisite: JMC 551, JMC 552, or JMC 553 with a grade of 2.0 or above. Only open to Journalism majors. Students must be in good standing to take this course.

JMC 700. Advanced Topics in Journalism: ______. 2-3 Credits.

Prerequisite: Graduate standing in Journalism or related field or permission of instructor. Other prerequisites may be listed with the specific course.

JMC 711. Sales Strategies. 3 Credits.

Students learn how to identify consumer, client, news source or employer needs and how to use their product, service or other skills to solve that need in today’s evolving media world. This requires delivering the solution in a way the audience understands best, which is a fundamental to every strategic message or interaction with a news source. Even though students work in a media sales context, the purpose of the course is not to turn out professional media sales people, but to enhance strategic communication abilities.

JMC 712. Visual Design and Production. 3 Credits.

This course approaches design as a visual problem-solving process. Students create a digital portfolio that uses advanced storytelling techniques and showcases digital media competency. The process explores a number of possible solutions, encouraging students to expand their perspectives and to explore innovative and creative approaches. The resulting portfolio builds a bridge from student work to professional practice. Prerequisite: Must be admitted to the School of Journalism.

JMC 715. Social Media Strategic Communication. 3 Credits.

This course examines significant changes in strategic communication approaches brought about by the networked information society. Students will study effective ways for organizations to identify social technographics of key audiences, create social media content, disseminate messages and evaluate social media-based strategic communication initiatives. This course combines theoretical and hands-on approaches to issues. Students will work in groups to analyze, evaluate and develop social media strategies for organizations chosen for their case study research.

JMC 718. First Amendment. 3 Credits.

An examination of the history and philosophy of freedom of speech and press and the limitations imposed upon those rights by statute, common law, and court decisions resolving conflicts with other constitutional rights. Critical-thinking skills and case analysis focus on the roles, rights, and responsibilities of the news and persuasive media in a free society. This course is open to all students at the University of Kansas. It emphasizes the importance of freedom of expression in a free society. Students study key media law court decisions and explore free speech issues more broadly to embrace the philosophical thinking that led to the development of the First Amendment.

JMC 725. Digital Media Tools - Advanced Media. 3 Credits.

In Digital Media Tools, students learn to negotiate multiplatform newsrooms, acquiring skills in online production, audience engagement, analytics, social media account management and interactive multimedia storytelling.

JMC 734. Diversity in Media. 3 Credits.

A study of mass media images and portrayals of race, class, and gender in society. The course examines media representations of African-Americans, Latinos, Native Americans, and Asian Americans, as well as media images of masculinity and femininity. The course also explores media images of groups traditionally under-represented in the media, including gays and lesbians, the elderly, the poor, and the disabled. Students study media portrayals in journalism, entertainment, public relations and advertising. The course encourages students to think
critically about media images and analyze the role mass media play in reinforcing cultural stereotypes.

**JMC 740. Strategic Campaigns. 3 Credits.**
Students produce a campaign to solve a strategic communications problem for an established organization. Students work with an actual client to develop a campaign from the initial research to the final recommendation. By applying the knowledge, experience and skills gained in previous courses, students confirm their readiness to enter the profession.

**JMC 741. Sports, Media and Society. 3 Credits.**
The role of mass media in shaping and influencing sports and popular culture. Students will think critically about currently accepted media and sports practices, particularly at the Division I college level. Guest speakers represent media and athletics. Discussion, presentation, paper and essay exam. Prerequisite: Junior Standing.

**JMC 750. Magazine Journalism - Advanced Media. 3 Credits.**
Students in the course will produce different kinds of articles (departments and longer stories that fit key categories in magazines, including service articles, profiles and informational articles) for a real magazine. The magazine could be in print, online or take some other form. Students will gain an understanding of different parts of a magazine, the difference between departments and articles, and how to report and write short articles and longer substantive stories.

**JMC 790. International Journalism. 3 Credits.**
A study of mass media images and portrayals of race, class, and gender in society. The course examines media representations of African-Americans, Latinos, Native Americans, and Asian Americans, as well as media images of masculinity and femininity. The course also explores media images of groups traditionally under-represented in the media, including gays and lesbians, the elderly, the poor, and the disabled. Students study media portrayals in journalism, entertainment, public relations and advertising. The course encourages students to think critically about media images and analyze the role mass media play in reinforcing cultural stereotypes.

**JMC 801. Media Communication Theories. 3 Credits.**
A comprehensive review of the theoretical and philosophical underpinnings of media research and practices. This seminar offers a range of perspectives and covers various interpretative, cultural, and critical approaches to understanding mass communication in various contexts. Each student drafts a literature review about a topic of the student's choice.

**JMC 802. Media Communication Methods. 3 Credits.**
An introduction to methodological approaches to the study of media. Qualitative and quantitative methodologies are reviewed. The class emphasis is on learning appropriate research tools to scientifically learn about messages, media, and audiences. Each student devises a research project during the course. Prerequisite: JMC 801 or concurrent enrollment in JMC 801.

**JMC 803. Research in Action. 3 Credits.**
Covers the activities, functions, and operations of both traditional mass media and new media. The course provides a combination of historical context, current events, and a future perspective. Topics include the business and economics of the media, the role of the media, and rights and responsibilities. Prerequisite: JMC 802.

**JMC 804. Mass Communication Methodology I-Qualitative. 3 Credits.**
Advanced study of qualitative methodological approaches to the study of media. The class emphasis is using interpretative research tools and techniques from narrative analysis, to ethnography, historical analysis, to critical cultural approaches to learn about messages, media, and audiences. Each student devises a research project during the course. Prerequisite: JMC 901, JMC 801 and JMC 802 or permission of instructor.

**JMC 805. Mass Communication Methodology II-Quantitative. 3 Credits.**
Advanced study of quantitative methodological approaches to the study of media. The class emphasis is using social scientific research tools and techniques ranging from content analysis to conducting surveys to experimental designs to learn about messages, media, and audiences. Special focus will be on learning to use SPSS and statistical techniques. Each student devises a research project during the course. Prerequisite: JMC 901, JMC 801 and JMC 802 or permission of instructor.

**JMC 806. College Teaching. 3 Credits.**
Teaching revolves around learning. So a course about teaching must by nature focus on learning about learning. This course will cover more than learning, but learning will be central, both in terms of how you can help your students learn but also how teaching itself is really about learning. The class is rooted in the philosophy of teaching as an intellectual and scholarly activity, and it draws heavily on approaches that have proved effective for learners of all types.

**JMC 807. Research Funding. 3 Credits.**
The course is designed to introduce the theoretical and practical skills in developing proposals for internally or externally funded research or applied interventions. Although the focus of the course is on research funding opportunities offered by federal entities, as they offer the most comprehensive and challenging environment for sponsored research, a portion of the course will be dedicated to non-profit and private funding opportunities, as well as to the development of non-research proposals.

**JMC 810. Crisis Communications. 3 Credits.**
An organization's reputation is perhaps its most valuable asset, yet reputations are most vulnerable in times of crisis. In this class, effective crisis communications will be studied as a means to preserve and defend reputation and maintain business continuity. Students will look at all aspects of crisis communications including typology of crises; history of crisis communications; theoretical basis for effective crisis response and communications; and crisis communications planning methodologies and strategies.

**JMC 815. Investigation and Conference. 1-3 Credits.**
Specialized work by qualified students under direction of the graduate faculty. Investigation and research studies. Prerequisite: Ten hours of graduate work in journalism.

**JMC 819. Writing for Marketing Communications. 3 Credits.**
A writing-intensive course focusing on articles and other works about marketing communication, management, general business and related subjects. Students read and discuss a core of designated work as well as works they select on their own. Students write reports, executive summaries and analytical briefings in which they synthesize these readings and apply marketing and management concepts to their own written work.

**JMC 820. Marketing Fundamentals. 3 Credits.**
The course is designed to provide a fundamental understanding of marketing theory and process and how these theories relate to integrated marketing communications. Specific focus will be spent on the marketing environment, the marketing mix, market segmentation, planning, execution and measurement. As part of the class, students will learn the components of a marketing plan and how to develop a plan based on specific quantifiable organizational objectives.

**JMC 821. Integrated Marketing Communications and Sales Strategies. 3 Credits.**
JMC 822. Digital Marketing Analytics. 3 Credits.
This course focuses on tools and analytical software used to analyze digital marketing programs. Students will learn how to apply the right tool to the right objective to be able to evaluate paid search programs, web traffic and response, website user experience, email marketing effectiveness and more. The course will use applied learning strategies to give students the opportunity to work with and understand the value of multiple tools. Prerequisite: JMC 820.

JMC 823. Branding in Marketing Communications. 3 Credits.
Cases and topics in the development and execution of branding in marketing communications plans. The course emphasizes how organizations define actual brand problems and attempt to solve them. Prerequisite: JMC 820.

JMC 824. Creative Process. 3 Credits.
An examination of the creative process and techniques of creative problem solving. The course gives students numerous opportunities to solve a variety of marketing communications problems. Students have an opportunity to visit with individuals who practice creativity in their professional lives and individuals who study creativity as scholars.

JMC 825. Relationship Marketing. 3 Credits.
This course explores principles of relationship marketing and its application to marketing communications. Student will explore marketing relationships and how they are formed while broaden their view of customers. They will also learn the importance of relationship-building within and between organizations and individuals and develop an understanding of how organizations integrate relationship building into their integrated marketing efforts while exploring how relationship marketing concepts relate to strategic planning, marketing management, sales and communications. Other topics covered include exploring customer satisfaction, loyalty and retention; exploring influencer marketing and influencer marketing tools; and developing value proposition statements and audience personas. Prerequisite: JMC 820.

JMC 827. Marketing Ethics. 3 Credits.
An examination of the ethical issues, philosophies, and decision-making systems that affect marketing communications. Through studies of specific business cases, students gain insight into the cultural, legal, and social decisions that affect an organization's future.

JMC 828. Financial Fundamentals for Communicators. 3 Credits.
This course covers a wide range of financially-related concepts from the perspective of the communications function. Topics include: financial markets; finding and using key Securities and Exchange Commission filings; understanding the balance sheet, income statement and cash flows; financial analysis; investor relations; impact of Sarbanes-Oxley; corporate governance issues; building and using budgets; and impact of these concepts for not-for-profits.

JMC 829. Marketing Communications Research. 3 Credits.
Students learn how marketing and media research help determine the success of an organization's marketing planning and strategic communications processes. Students study and conduct primary and secondary research - both qualitative and quantitative - including focus groups, ethnography and surveys. Prerequisite: JMC 820 or permission of instructor.

JMC 830. Web 3.0 and User X. 3 Credits.
Web design and user interaction continues to advance and evolve. This course will describe how an organization's web presence must be designed with the user experience as the focus. Students will gain an understanding of effective site design, how to measure and evaluate users' experience while interacting with the site, how to optimize the site for e-commerce as well as other web marketing goals. Principles and processes of User Experience Design (UXD) will be emphasized. Prerequisite: JMC 820.

JMC 831. Technologies in Marketing Communications. 3 Credits.
Explores new and emerging technologies and their impact on the delivery of marketing messages. Students will work with the instructor on identifying areas of relevance to them, and on identifying ways to keep up with changes in technology, innovation and audiences.

JMC 832. Leadership and Management in Marketing Communications. 3 Credits.
This course examines cases and topics of leadership as a process in a marketing communication organization. As a manager's duties evolve from performing tasks to managing relationships and strategic organizational outcomes, the capacity to lead becomes critical to personal and organizational success. Topics will focus on the role of leadership and vision, strategy, communication, ethics, social responsibility, group dynamics, and change. Prerequisite: JMC 820.

JMC 833. Social Media and Integrated Marketing Communications. 3 Credits.
Developments in information technology and online social networking have posed opportunities and challenges for those who practice and research marketing, advertising or public relations. This course combines theoretical and hands-on approaches to developing and implementing effective ways for organizations to analyze, create and share social media content, engage key audiences via relevant digital channels, and integrate social media initiatives into overall communication strategies. Students will use various platforms and tools to conduct social media analytics, evaluate social media campaigns, and develop social media planning for the organization chose for their case study.

JMC 834. International and Multicultural Marketing Communications. 3 Credits.
The speed and scope of modern marketing communication have made the world a much smaller place. This course explores how international companies use advertising, public relations, promotion, personal selling and other methods to communicate in a global multicultural environment. Students gain a broader understanding of the characteristics of people in different countries and cultures, especially how they rely on media for information about products and services to meet their needs.

JMC 835. Search Engine Optimization/Search Engine Marketing (SEO/SEM). 3 Credits.
Search engines are the largest drivers of online traffic, and search is an essential part of every brand's digital marketing mix. In this class, students will learn how to craft a targeted, effective inbound marketing campaign. The class will explore search engine marketing (SEM) and search engine optimization (SEO) best practices, and the ranking signals that search engines consider when evaluating websites and content. Students will learn how to apply SEO basics like keyword research, website optimization, and content optimization. Students will also learn how to create, launch and manage Google Ads paid search campaigns, and measure the effectiveness of those campaigns. Prerequisite: JMC 820.

JMC 836. Digital Marketing Compliance/Privacy/Legal. 3 Credits.
Digital marketing allows for marketing communicators to reach stakeholders in more ways than ever. However, that comes with a responsibility to operate in a legal and ethical fashion. In this course,
students will learn about the important legal and compliance issues inherent in digital marketing. Topics include privacy regulations and laws (both U.S. and international) around management of customer data, appropriate email marketing practices and legal concerns when making organizational or product claims. Prerequisite: JMC 820.

**JMC 837. Marketing Automation/CRM. 3 Credits.**
Sales prospecting and inbound marketing as well as customer relationship management have become increasingly important focus areas for marketing leaders. In this class, you’ll learn about the various marketing automation platforms and systems that allow organizations to optimize and automate their marketing efforts through workflows, smart lists, engagement-based triggers, and more. Students will both learn how these systems increase efficiency while also gaining proficiency in various open source and fee-based marketing automation software systems (including earning certificates showing proficiency as a part of the class). Prerequisite: JMC 820.

**JMC 838. Capstone Project in Digital Marketing. 3 Credits.**
This course is designed for students to apply knowledge learned throughout the program into a culminating project. Individuals will work with the instructor to define an applied project in an area of digital marketing that is of interest to them. Prerequisite: JMC 820 and 27 hours completed in the program, or instructor/program director approval.

**JMC 840. Seminar in: _____ 3 Credits.**
Research in the issues and development of media. Seminars focus on topics of current and historical interest. Students develop projects and presentations in special areas of interest and expertise. Course may be repeated under different topics.

**JMC 850. Capstone in Marketing Communications. 3 Credits.**
In this capstone course, students use the skills they have developed in the integrated marketing communications program to create a strategic integrated marketing communication plan for a client. The process involves the use of techniques such as research, branding, advertising, public relations, promotion, as well as other activities. Through the project, students demonstrate their knowledge of marketing communications and work with team members to meet an organization's strategic marketing communication needs. Prerequisite: JMC 820 and 24 hours or permission of instructor.

**JMC 851. Professional Skills I. 3 Credits.**
This course offers the opportunity for a student group of students to develop an individualized project to enhance professional communications skills. The student or group works in conjunction with a graduate faculty advisor to develop a suitable project, presenting a proposal for approval to the School's Graduate Director. The proposal must specify the nature of the project, the products to be delivered, a timeline for completion, and expected impact. Prerequisite: Admission to a KU graduate program.

**JMC 852. Professional Skills II. 3 Credits.**
This course offers the opportunity for a student or group of students to develop an individualized project to enhance professional communications skills. The student or group works in conjunction with a graduate faculty advisor to develop a suitable project, presenting a proposal for approval to the School's Graduate Director. The proposal must specify the nature of the project, the products to be delivered, a timeline for completion, and expected impact. Prerequisite: Admission to a KU graduate program; satisfactory completion of JMC 851.

**JMC 861. Data Collection I. 3 Credits.**
This course helps students understand secondary research methods, shows students how to delve into library resources with a deep search component, and gives students a framework for understanding research credibility. Prerequisite: Successful completion of JMC 860.

**JMC 862. Data Collection II. 3 Credits.**
This course explores primary research methods for creating and expanding databases. Students explore such areas as tools, processes and best practices for primary data collection. Prerequisite: Successful completion of JMC 861.

**JMC 863. Data Analysis. 3 Credits.**
This course gives students a framework for basic statistics to explore relationships, solve problems, and answer questions. They gain an understanding of how to apply descriptive and predictive statistics to interpret and communicate results of data meaningfully. Prerequisite: Successful completion of JMC 862.

**JMC 864. Data Visualization and Presentation. 3 Credits.**
This course helps students use digital resources to communicate results of data analysis effectively to appropriate audiences. Students learn to evaluate, interpret and present the results of data analysis using a variety of media. Prerequisite: Successful completion of JMC 863.

**JMC 865. Analyzing Audiences. 3 Credits.**
This course focuses on identifying appropriate audiences for media and information, as well as gathering information and analyzing audiences using primary and secondary sources. It includes creating, analyzing and interpreting analytics for websites, mobile technology and other forms of media. Prerequisite: Successful completion of JMC 820.

**JMC 866. Social Media Strategy. 3 Credits.**
This course will provide a broad overview of the social media landscape, examining the development and use of various platforms, best practices in the use of social media, and the tools available for managing social media and social media analytics. The course will take a strategic approach focusing on social media as a conduit for larger content strategy and will cover such areas as content marketing, content curation, behavioral targeting, and segmenting target markets on social networks. Students will create a social media plan for themselves or their organization. Prerequisite: Successful completion of JMC 820.

**JMC 867. Social Media Metrics. 3 Credits.**
This course will examine the evaluation, tools and best practices in integrating social media metrics into a strategic plan. Students will gain the following skills: Measure social media effectiveness through the use of appropriate metrics; Analyze social media metrics; Choose the best way to evaluate social media messages; Explore various types of software for evaluating social media; Apply best practices to social media evaluation. Prerequisite: Successful completion of JMC 820.

**JMC 868. Information in Context. 3 Credits.**
This writing-intensive course explores the many ways that disciplinary focus influences the meaning and understanding of information. It helps students approach problem-solving in an interdisciplinary way, and allows them to understand how context can open new paths to understanding and meaning. Prerequisite: Successful completion of JMC 820.

**JMC 869. Information Insight II. 3 Credits.**
Students enroll in this course upon completion of all courses in the social media and data certificates. They complete a capstone project, drawing on work they have done in previous courses, conducting additional research, receiving feedback from the instructor and their peers, and reflecting on their study in the Digital Content Strategy program. Prerequisite: Successful completion of JMC 860, JMC 861, JMC 862, JMC 863, JMC 864, JMC 865, JMC 866, JMC 867, JMC 868.

**JMC 899. Master's Project/Thesis. 3 Credits.**
The student, with the guidance of a master's project/thesis committee, completes execution of the project or thesis. In addition, the student completes the final, general examination and the presentation/defense.
of the project or thesis. Prerequisite: EPSY 710, EPSY 711, JMC 801, JMC 802, JMC 803 and JMC 804 or JMC 805.

**JMC 901. Introduction to Doctoral Studies. 1 Credits.**
This course is a portal to doctoral education. Students learn about the structure, function and culture of higher education and the role of doctoral studies in academe. The course examines issues such as tenure, promotion, finances, expectations of the professoriate and the role of professors in academe. The course presents human subjects protocols in research and the role of the scholar and the professional in maintaining ethical standards in the academy and in applied work in mass communications industries. Prerequisite: Admission to Journalism PhD program or permission of instructor.

**JMC 999. Dissertation. 1-9 Credits.**
The student, with the guidance of a dissertation committee, completes execution of the dissertation. In addition, the student completes the final examination and the presentation/defense of the dissertation. Prerequisite: EPSY 710, EPSY 711, JMC 801, JMC 802, JMC 803, JMC 804, JMC 805, JMC 806 and JMC 807.

### Bachelor of Science in Journalism and Mass Communications

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor [http://www.advising.ku.edu/] for details). Other years’ catalogs ([http://catalog.ku.edu/archives/](http://catalog.ku.edu/archives/)) ([http://www.ku.edu/academics/catalogs/](http://www.ku.edu/academics/catalogs/))

### Undergraduate Admission to the School of Journalism and Mass Communications

There are 2 paths for admission to the William Allen White School of Journalism and Mass Communications:

**Path 1: Direct admission from high school**
Students will be considered for admission to the School of Journalism and Mass Communications directly out of high school if they

- Admitted to KU by assured admission and
  - 3.25 or higher high school GPA (no test score required/ regardless of test score submitted) or
  - 3.00 or higher high school GPA and 21 ACT/1060 SAT

The conditions above are minimum requirements. Students must first meet admission requirements for the University of Kansas. Visit the Office of Admissions ([http://admissions.ku.edu/](http://admissions.ku.edu/)) for information about admission to KU. Visit the International Recruitment & Undergraduate Admissions ([http://irua.ku.edu/](http://irua.ku.edu/)) office for information about international admission. High school GPA is based on a 4.0 scale. Admission is competitive. If the school must set an admissions quota, students with the highest ACT (or SAT-I) scores and grade-point averages will be accepted.

**Path 2: Change of school admission**
Transfer students and current KU students who do not declare journalism as their major prior to the first semester of the first year may apply for admission if they

- Complete or are enrolled in 24 or more credit hours (either at KU or another institution) with grade-point averages of 2.5 or higher and
- Complete or are enrolled in JMC 101 Media and Society the semester of application and
- Earn a C or higher in JMC 101 (if applying while enrolled in JMC 101, admission is rescinded if a C or higher is not earned)
- Students who have completed journalism courses beyond JMC 101 with less than a 2.5 Journalism GPA will be considered on a case-by-case basis.

Students applying with more than 60 hours of college credit (at KU, another institution, or a combination of both) must meet with a journalism advisor to determine their admission eligibility.

Admission is competitive. The number of students admitted each semester depends on the number graduating in the preceding semester and the school’s overall capacity. The school uses a student’s transfer cumulative grade-point average if they do not have a KU cumulative grade-point average. The school does not combine transfer and KU cumulative grade-point averages.

**Admission requirements are subject to change.** A student’s first semester of college is the first semester in which they enroll after high school graduation.

### Requirements for Good Standing

Students admitted to the school must do the following in order to remain in the school and in good standing:

- Complete JMC 101 Media and Society with a grade of 2.0 or higher.
- Maintain a 2.5 KU cumulative grade-point average and a 2.5 journalism grade-point average. If either or both GPAs drop below 2.5, students will be placed on probation for 1 semester. At the end of the probation semester, the School will re-evaluate the student’s GPAs. If the student has not raised their GPAs to 2.5 or higher, the student will be dismissed from the School. The student may reapply once their GPAs are above 2.5. In extreme circumstances, the probation period may be extended to a second semester, if the student provides documentation of circumstances beyond the student’s control. This decision is made at the discretion of the associate dean, in consultation with the advising office.

### General Degree Requirements

In addition to the KU Core requirements are the following general degree requirements:

- One additional unit that satisfies a Goal 4 learning outcome of the KU Core.

*note: This unit cannot be used to simultaneously satisfy another KU Core learning outcome.

### Graduation Requirements

In addition to general degree requirements, the following graduation requirements must be met:
To earn the Bachelor of Science degree in Journalism and Mass Communications, students must complete a minimum required total of 48 hours in journalism courses. Twenty-two credit hours form the journalism core and are taken by all students. The candidate must have completed a minimum of 48 hours in journalism and at least 60 hours outside journalism within the 120-hour total. Students admitted to KU fall 2016 through summer 2020 must complete a minimum of 42 hours in journalism courses.

1. The candidate must have earned at least 120 hours of college credit. Courses below the 100-level (like MATH 2), more than 48 hours of journalism, more than 4 hours of physical education activities, or more than 4 hours of military science are not included in the 120 hours required to graduate. Only 18 transfer hours in journalism may be counted toward the 120 hours needed for graduation. A maximum of 64 hours may be transferred from a community college.

2. The candidate must have completed a minimum of 48 hours in journalism and at least 60 hours outside journalism within the 120-hour total. Students admitted to KU fall 2016 through summer 2020 must complete a minimum of 42 hours in journalism courses.

3. The candidate must have at least a 2.5 KU grade-point average overall and in all journalism courses at KU.

4. The candidate must have earned at least 45 hours in upper-division courses, numbered 300 and above.

5. The candidate must complete area distribution requirements in one of two ways:
   a. an 18-hour minor outside journalism or
   b. a second degree outside journalism.

6. The candidate must have met all requirements of the school. Transfer students must have met the equivalent of those requirements, as outlined above.

7. The candidate must apply to graduate early in their final semester.

8. The candidate must complete a minimum of 30 hours in residence after being admitted to the school.

The primary responsibility for meeting graduation requirements rests with the student. Some graduation requirements are subject to change.

Consult the Journalism Student Services office for current information.

### Two Undergraduate Degrees

A student who has earned a B.A. or B.S. degree and wishes to earn a second undergraduate degree in journalism is expected to meet the school’s requirements for area distribution, general degree, and journalism and to complete a minimum of 60 hours outside journalism. A candidate for a second undergraduate degree must have earned a minimum grade-point average of 2.5 in previous college work to be considered for admission to the school. A student must complete a minimum of 30 credit hours in residence after admission to the school. Admission is competitive.

### Course Requirements for Journalism Majors

To earn the Bachelor of Science degree in Journalism and Mass Communications, students must complete a minimum required total of 48 hours in journalism courses. Twenty-two credit hours form the journalism and mass communications core and are taken by all students. Each student must also complete 15 credit hours for the Multimedia Journalism, Digital Marketing Communications, Advertising & Public Relations, and Sports Media & Society concentration, or 18 credit hours for the Media Arts & Production concentration. Students also take journalism electives, three hours of which must fulfill the journalism diversity requirement (satisfied by JMC 201, 534, 590 or 613).

Please note that several JMC courses require a C (2.0) or better to progress in the curriculum and/or fulfill the degree requirement. Students should pay close attention to course descriptions for these details.

Minor in Journalism and Mass Communications

The William Allen White School of Journalism and Mass Communications prides itself on providing quality education and job-building skills in a student-focused environment. This 18-credit hour program helps students learn to be effective communicators.

Admission to the Minor

Students should complete the admission application online (http://journalism.ku.edu/undergraduate/) at journalism.ku.edu.

Admission Requirements

Admission is limited and competitive. Completion of 24 credit hours with a 2.5 cumulative grade-point average and at least a C in JMC 101 is required. Students may apply during the semester they are completing JMC 101. Students who have completed journalism courses beyond JMC 101 with less than a 2.5 Journalism GPA will be considered on a case-by-case basis.
case basis. Transfer students must earn a minimum KU cumulative GPA of 2.5 during their first semester.

**Regulations**

Students must earn a grade of C (2.0) or better in JMC 101, 104 and other select JMC courses to fulfill minor requirements.

**Requirements for the Minor**

**Curriculum Requirements**

A total of 18 hours is required for the minor. Students are allowed a choice of additional elective hours, not to exceed a total of 24 JMC credit hours. The journalism minor requires a 2.5 GPA in journalism and a 2.5 cumulative GPA at KU.

<table>

</table>

Students complete 12 additional JMC credit hours, of which, at least 6 must be at the 300-level or higher. Students must meet all stated pre-requisites for each course to enroll.

**Total Hours**

18

If you would like to know more about the Journalism and Mass Communications minor, please contact journalism advising at jadvising@ku.edu (jour_advising@ku.edu) or 785-864-4080.

**Undergraduate Certificate in Sports Media**

The Sports Media Certificate is designed to provide fundamental knowledge and skills for developing and managing the communications within and surrounding the amateur, collegiate and professional sports industries. It is open to students in any journalism concentration. Courses are primarily taken in the junior and senior years.

Students must complete at least 12 credit hours as described below to earn the Sports Media Certificate.

JMC 210 is a pre-requisite to JMC 488, but students with previous video production experience may be allowed to enroll with instructor permission.

**Master of Science in Digital and Integrated Marketing Communications**

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years’ catalogs (http://catalog.ku.edu/archives/)»

**Graduate Admission**

Admission is based primarily on the student’s undergraduate record, references, writing samples, and their personal experience. Applicants who have baccalaureate degrees in journalism, as well as those with no academic or professional background in journalism, are eligible to apply for the online Digital and Integrated Marketing Communications (DIMC) course of study.

**Applications**

**Application Deadlines**

Students may enter the Digital and Integrated Marketing Communications program in the fall or summer semesters. Applicants to the Digital and Integrated Marketing Communications program may apply for fall admission by the deadline of June 1. The application deadline for the summer, which begins in June, is the preceding February 1.

**Application Materials**

Applications can be considered only after these items have been submitted:

1. Application Deadline: June 1
2. One official transcript of all college-level courses. (from each college attended) Expected GPA: 3.0 or above. Submit to graduateadm@ku.edu (gapc@ku.edu)
3. A current resume
4. Three letters of reference from persons familiar with the student’s academic or professional work or potential for graduate study
5. Applicants must also submit three writing samples or samples of professional work that reflect your years of experience
6. A personal statement of objectives
7. Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/?num1.5)
8. International students are required to submit evidence of financial support

Submit your graduate application online (http://www.graduate.ku.edu/ku-graduate-application/). Applicants to the Digital and Integrated Marketing Communications program should send official transcripts
our master's program in Digital and Integrated Marketing Communications trains graduates to build skills in digital marketing disciplines while also offering strategic marketing communications curriculum from a managerial perspective. With courses offered in Digital Marketing, Social Media Strategy and Integrated Marketing Communications, students can advance their careers as working professionals. The master's degree is earned by completing 30 credit hours, or students may choose to earn a certificate in social media (15 credit hours). Students may work on this certificate independently, building credentials before they elect to complete the full master's degree. All classes are online.

The program starts with Marketing Fundamentals. The course is designed to provide a fundamental understanding of marketing theory and process and how these theories relate to Integrated Marketing Communications. Specific focus will be spent on the marketing environment, the marketing mix, market segmentation, planning, execution and measurement. As part of the class, students will learn the components of a marketing plan and how to develop a plan based on specific quantifiable corporate objectives.

**Graduate Admission**

Admission is based primarily on the student’s undergraduate record, references, and writing samples. Applicants who have baccalaureate degrees in journalism, as well as those with no academic or professional background in journalism, are eligible to apply for the Journalism and Mass Communications program or the online Digital and Integrated Marketing Communications (DIMC) course of study.

Applicants for the online Digital and Integrated Marketing Communications (DIMC) course of study are also evaluated on their professional experience.

**Applications**

**Application Deadlines**

The School has a "rolling admission process." Students may enter the Journalism and Mass Communications program in fall or spring semesters. Students interested in Graduate Teaching Assistant positions, scholarships and awards should apply by January 2.

Students may enter the Digital and Integrated Marketing Communications program in the fall or summer semesters. Applicants to the Digital and Integrated Marketing Communications program may apply for fall admission by the deadline of June 1. The application deadline for the summer, which begins in June, is the preceding February 1.

**Application Materials**

Applications can be considered only after these items have been submitted:

1. A completed online graduate application (http://www.graduate.ku.edu/ku-graduate-application/).
2. An official transcript of all college-level courses from each college or university attended.
3. Three letters of reference from persons familiar with the applicant’s abilities. At least one academic reference is preferred and required for those who graduated within the past five years.
4. A written, 250-word statement of the applicant’s academic and professional objectives.
5. Applicants for the Journalism and Mass Communications program must include two writing samples.
6. A current résumé.
7. Applicants for the online Digital and Integrated Marketing Communications course of study must include three samples of professional work that reflect the applicant’s years of experience.
8. Nonrefundable application fee payable online to the University of Kansas.
9. Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/?num1.5)
10. International students must submit proof that they have the financial resources to cover annual expenses.

Submit your graduate application online (http://www.graduate.ku.edu/ku-graduate-application/). Applicants to Journalism and Mass Communications program or the online Digital and Integrated Marketing Communications (DIMC) course of study may apply for fall admission by the deadline of June 1. The application deadline for the summer, which begins in June, is the preceding February 1.
Communications, Digital and Integrated Marketing Communications, and the M.S. in Journalism/J.D. program should send official transcripts of all college and university course work to Graduate Admissions (graduateadm@ku.edu) or to the school:

The University of Kansas School of Journalism and Mass Communications
Stauffer-Flint Hall
Attn: Graduate Advisor
1435 Jayhawk Blvd.
Lawrence, KS 66045

M.S. in Journalism
The Journalism School offers two M.S. options: Journalism and Mass Communications, and the Joint M.S.J.-J.D. degree.

Mass Communications
This track is focused on deeper, theoretical understanding of the professions of the media. Students with an interest in professional performance may take two courses in which they design one or more professional projects. To earn the degree, a student must complete 37 graduate credit hours with at least a B (3.0) average. Each student must complete and pass a general examination of the thesis. The thesis defense constitutes the final general examination.

Major Components of 37-Hour Requirement
The student entering the program takes

• 16 hours in core courses in Mass Media and Mass Communications, Methodology, Quantitative or Qualitative Research, including statistics.
• 18 hours of electives either inside or outside the school. The student may elect to design and produce one or two professional projects (such as a series of in-depth news stories or media business cases).

The student also completes an acceptable project/thesis (JMC 899) for 3 hours.

Core Course Requirements
The core graduate courses help students develop strong research and critical-thinking skills. 5 courses and 1 lab are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPSY 710</td>
<td>Introduction to Statistical Analysis</td>
<td>3</td>
</tr>
<tr>
<td>EPSY 711</td>
<td>Lab for Introduction to Statistical Analysis</td>
<td>1</td>
</tr>
<tr>
<td>JMC 801</td>
<td>Media Communication Theories</td>
<td>3</td>
</tr>
<tr>
<td>JMC 802</td>
<td>Media Communication Methods</td>
<td>3</td>
</tr>
<tr>
<td>JMC 803</td>
<td>Research in Action</td>
<td>3</td>
</tr>
<tr>
<td>JMC 804</td>
<td>Mass Communication Methodology I-Qualitative</td>
<td>3</td>
</tr>
<tr>
<td>JMC 805</td>
<td>Mass Communication Methodology II-Quantitative</td>
<td>3</td>
</tr>
</tbody>
</table>

Professional Skills Requirements
The student may enroll in JMC 851 and JMC 852 (Professional Skills). The student develops and produces a master’s-level professionally based project or projects with the approval of the advisor and ADGS. The projects help the student expand and advance professional skills.

Advanced Course Requirements
The student completes 6 graduate-level electives, and an acceptable project/thesis:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>JMC 899</td>
<td>Master's Project/Thesis</td>
<td>3</td>
</tr>
<tr>
<td>Electives</td>
<td></td>
<td>16</td>
</tr>
</tbody>
</table>

General Examination
Each student must pass an oral examination of the thesis, which constitutes the final general examination. That examination must cover the totality of the student's master's experience. The examination will be given and evaluated by a committee of three graduate faculty members who serve on the student's thesis committee.

Enrollment Requirements after Completing Course Requirements
There is no requirement for continuous enrollment after courses are completed and prior to completing the thesis. Students must be enrolled in at least one hour of credit in the semester in which they graduate.

A student must complete the M.S.J. degree within seven years of admission.

Outside Courses
A student may take up to six credit hours outside the school. Any student who wants to take an elective course outside the school must have permission from the instructor of the course, the school offering the course, and the graduate director of the journalism school prior to enrolling in the course. The student should be prepared to indicate how the course contributes to the master’s program. Submission of a course description or syllabus from the course may be required for approval.

Final General Examination
Each student must pass a final general examination before graduating.

Joint M.S.J.-J.D.
The joint M.S. in journalism and J.D. degree program combines into approximately 3½ years of full-time study the Master of Science in journalism and the Juris Doctor (p. 718) programs offered by the School of Journalism and Mass Communications and the KU School of Law. The joint degree program offers students academic grounding in both disciplines to prepare them for the professional practice of journalism, law, or media law.

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years’ catalogs» (http://catalog.ku.edu/archives/)

Admission

KU Graduate Admission Standards. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. The bachelor’s degree is not acceptable if it contains credit awarded for work experience that was not directly supervised by faculty members of an accredited university or not evaluated in units that identify the academic content.

Journalism School Requirements

- Master’s degree or equivalent with at least a 3.5 GPA on a 4.0 scale.
- Graduate application: Apply online at http://www.graduate.ku.edu/ (http://graduate.ku.edu/application-process/).
- Application fee (nonrefundable).
- Resume or CV.
- An official transcript from the undergraduate degree-granting institution AND all previous graduate credit, including the master’s degree, sent electronically to the Graduate Application Processing Center. A hard copy is acceptable if the institution cannot send electronic transcripts.
- Examples of research and scholarship. Links to online articles are acceptable.
- Candidates will be required to answer a survey in their application related to their research focus area.
- 3 references, including one from the master’s advisor.
- Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/?num1.5)
- International students are required to submit evidence of financial support.

In exceptional cases, students with a bachelor’s degree may be admitted for the full 46-hour program.

Financial support

The School provides up to six semesters of financial support for Ph.D. students. The generous support package includes:

- Graduate Teaching Assistantship.
- Minimum salary of $22,650 paid bi-weekly over nine months, paid through normal university payroll with customary deductions.
- Newly admitted students will receive up to $1,000 in moving expenses.
- Assistance paying for insurance. You will receive the university’s 75 percent contribution toward health insurance coverage, if you need it.
- 100 percent tuition waiver for fall and spring semesters.
- In their third year, doctoral students will receive a $1,000 research award.

Contact Assistant Dean Matt Tidwell (mtidwell@ku.edu) and Graduate Advisor Jammie Johnson (jamjohn@ku.edu) for more information or to express interest in the Ph.D. program.

Admission Deadline. For fall admission, the deadline for materials is December 1.

The William Allen White School of Journalism and Mass Communications offers the Ph.D. degree, beginning fall 2012. The school has a solid reputation based on the profession and our faculty study issues and uses of real-world media communications. We seek junior colleagues who share those interests.

Our Ph.D. program is small and, therefore, selective. We admit 4 to 6 students per year to ensure close work with the faculty. We expect our students’ scholarly and research interests to intersect with those of our faculty.

The school’s Ph.D. is a rigorous scholarly research degree requiring mastery of theory and methodology. We expect our Ph.D. program graduates to possess advanced knowledge in the following areas necessary for all scholarship in the discipline:

- Scholarly inquiry and methods of discovery;
- Current theory and research methods of the discipline;
- Statistics appropriate to the discipline;
- Media use by society, historical and current;
- Media roles in society, including issues of diversity;
- The First Amendment, legal and ethical issues of the discipline.

Additionally, we expect our Ph.D. program graduates to possess advanced knowledge in one or more of the following areas as necessary for scholarship in their chosen area of expertise and with the advice and guidance of their respective faculty advisors:

- Advanced practice of theory, methods and concepts in the student’s area of journalism expertise;
- Advanced practice of theory, methods and concepts suitable to the student’s area of concentration;
- Advanced statistics;
- Specific uses and impacts of media, such as in healthcare delivery, in education, in politics, in the military, or in traditional mass media roles;
- The business of the media, historical and current;
- Innovation and entrepreneurship.

The Ph.D. program requires a total of 46 course credit hours (7 three-hour core journalism courses and a one four-hour statistics class with a lab), a one-hour pro-seminar (JMC 901) each fall semester, a 12-hour
concentration outside the journalism school plus dissertation hours, which are variable. **40 course hours** are prescribed; the others (six credits) are journalism electives.

Students who hold a master’s in journalism may have this 46-hour requirement adjusted (a maximum of 6 credits) due to prior course work, leaving 40 hours for completion of the degree. The student completes study of appropriate research skills, designed in consultation with the faculty advisor. The student also must meet KU’s requirements for dissertation hours.

### Graduate Certificate in Data Interpretation and Communication

All journalism certificate candidates must complete a minimum of 15 graduate credit hours in Data Interpretation Communication with at least a B (3.0) average. Courses include JMC 820, JMC 861, JMC 862, JMC 863 and JMC 864.

Applicants must meet all admissions requirements for certificate-seeking graduate admission as defined by the University's policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/).

### Graduate Certificate in Social Media Strategy

All journalism certificate candidates must complete a minimum of 15 graduate credit hours in Social Media Strategy with at least a B (3.0) average. Courses include JMC 820, JMC 837, JMC 866, JMC 867 and JMC 868.

Applicants must meet all admissions requirements for certificate-seeking graduate admission as defined by the University's policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/).

Specific admissions requirements for this certificate program can be found here (https://journalism.ku.edu/online-masters-degree-digital-content-strategy-courses/).

The School of Law

The School of Law is an excellent place to pursue a professional legal education. The school’s primary mission is to prepare its students to be outstanding members of the legal profession, well educated in the law and committed to professional achievement and public service. The school educates students in both the general principles of law and the skills needed for practice in a changing legal environment. Students develop technical competence, pride in legal craftsmanship, a sound sense of ethics and professionalism, and an appreciation for the role of law and of the practice of law in society.

The law school has a venerable history and a commitment to educating for the future. Legal education at KU began in 1878, and the school was a charter member of the Association of American Law Schools (http://www.aals.org/). Since 1924, it has had a chapter of Order of the Coif, a national law school honor society with chapters at leading law schools throughout the country. The law school is fully accredited by the American Bar Association (http://www.americanbar.org/aba.html).

Outside the classroom, student organizations (https://law.ku.edu/current-students/student-organizations/) provide a focus for service as well as social activities and professional development. In a program that may be unique to KU, law students serve the university community and develop litigation skills by acting as prosecutors, defense counsel and judges in the Traffic Court (KU Court of Parking Appeals), which handles all appeals of campus parking tickets.

Two student-edited scholarly publications, the Kansas Law Review (https://law.ku.edu/academics/hands-on-learning/law-review/) and the Kansas Journal of Law and Public Policy (https://law.ku.edu/academics/hands-on-learning/law-journal/), allow students to delve deeply into areas of law that interest them, hone their writing, and expand their editing skills. KU Law students also participate in a rich array of moot court (https://law.ku.edu/academics/hands-on-learning/moot-court/), mock trial (https://law.ku.edu/academics/hands-on-learning/mock-trial/) and transactional law programs (https://law.ku.edu/academics/centers/polsinelli-transactional-law/). Some are courses, and some are extracurricular activities. All provide hands-on writing and advocacy skills that are some of the hallmarks of a KU Law education.

Prelaw

Visit prelaw.ku.edu (https://prelaw.ku.edu/) for information about prelaw study at KU.

Tuition and Fees

Current information about law school tuition (resident and nonresident) and required campus fees, which all law students pay each semester, is available online (https://financialaid.ku.edu/calculate-costs/tuition-and-fees/) or from the Office of the University Registrar (http://www.registrar.ku.edu/).

Tuition and fees (https://law.ku.edu/admissions/tuition-scholarships/tuition-fees/) entitle students to course instruction; dispensary care for ordinary illnesses and special medical care at nominal rates; the use of the Kansas Union, libraries, buses, Legal Services for Students, and the Student Recreation Fitness Center; admission at reduced prices to most campus events, such as concerts, plays, films, lectures, and athletic events; and other services.

Residency Classification

Students are classified as resident or nonresident based on information provided on the application for admission. The determination of residency status is made by the Office of the University Registrar in accordance with Kansas regulations. This classification makes a difference in the cost of attending the School of Law. If you have questions about your residency status, contact the Office of the University Registrar (http://www.registrar.ku.edu/).

Scholarships and Financial Aid

For information about scholarships (https://law.ku.edu/admissions/tuition-scholarships/scholarships/) and financial aid (https://law.ku.edu/admissions/tuition-scholarships/financial-aid/), visit the law school’s website.

Attendance

Regular class attendance is a fundamental part of legal education. Instructors may adopt individual policies to monitor attendance. No attendance policy may impose any sanction unless a student’s unexcused absences from class exceed the number of hours of credit given for the course plus one, and no sanction may be more stringent than imposition of a failing grade for the course.

Adding Classes

A student may add classes only in the first 2 weeks of the semester (fifth day in a summer session). Students contemplating adding a course after the course has begun should understand that they may be at a significant disadvantage.

Dropping Classes

A student may drop a class no later than the last day of classes in the semester or summer session. Enrollment in that class will be canceled and will not appear on the student’s record.

Special Drop Rule

Where the nature of the course requires a continuous commitment by the student, the instructor may establish special rules about dropping the course. Notice of these special rules will be provided before enrollment.
Maximum and Minimum Load

Students are expected to complete all required first-year courses during their first year of enrollment in law school. Summer starters must take all required first-year courses in the first year plus sufficient electives in both the fall and spring semesters to carry a course load of no fewer than 12 credit hours and no fewer than 4 courses in each semester. After the first year, the maximum course load is 18 credit hours per semester, and the minimum load is 12 hours. The associate dean for academic and student affairs may approve a schedule of fewer than 12 credit hours under exceptional circumstances. Any student taking fewer than 12 credits without prior approval of the associate dean for academic and student affairs will not be in good standing with the law school.

Incomplete Classes

A student must finish an incomplete course by the end of the next semester (excluding summer sessions), whether or not the student is enrolled in the law school during the next semester. If a student does not make up an incomplete grade by the end of the next semester, the incomplete will be changed to a grade of F at the end of that semester. The last day of the final examination period is the end of the semester. Waivers of this rule or extensions of the time allowed for making up incomplete grades may be granted by the academic affairs committee only in cases of extreme hardship.

Withdrawal and Readmission Following Withdrawal

Students considering withdrawing are strongly encouraged to confer with the associate dean for academic and student affairs. Any student who has completed at least 29 credit hours and is in good standing may withdraw from all law school courses in which he or she is enrolled if the student completes all required administrative steps for withdrawal no later than the last day of classes for the semester. Students who wish to withdraw after the last day of classes for the semester must obtain permission from the academic affairs committee.

Any student who withdraws before completing 29 credit hours must reapply for admission. There are no exceptions to this rule. Any student who has completed at least 29 credit hours and who is not in good standing must have the permission of the associate dean for academic affairs to withdraw if the student wishes to return to school in a subsequent semester. A student who fails to secure permission to return must petition the academic affairs committee for reinstatement.

Students must complete all requirements for the J.D. degree within 5 years of initial enrollment, except in extraordinary circumstances. Following the ABA Standard 311, such extraordinary circumstances, for example, might include an interruption of a student’s legal education because of an illness, family exigency, or military service. A student facing extraordinary circumstances and wishing to complete their degree beyond the 5-year limitation must petition the academic affairs committee promptly in light of the relevant circumstances.

Whenever a student is permitted on the basis of extraordinary circumstances to exceed the 5-year program limitation, the law school shall place in the student’s file a statement signed by the associate dean for academic affairs explaining the extraordinary circumstances leading the law school to permit an exception to the completion rule. Find J.D. Degree Requirements (https://law.ku.edu/academics/degrees jd-program/requirements/) on the KU Law website.

Examinations

Thorough examinations are given under the honor system at the close of every term. Some faculty members also give midterm examinations. These examinations test students’ reasoning abilities and their knowledge of a particular subject area.

Special examinations are given only in cases of absence from the regular examination because of sickness of the student or in the student’s immediate family or similar exceptional circumstances. Students should contact the faculty member whose examination they must miss as soon as possible, certainly before the date the examination is to be given.

Grading System

The School of Law uses a 4.0 (A-F) grading scale:

- 4.0 (A)
- 3.7 (A-)
- 3.3 (B+)
- 3.0 (B)
- 2.7 (B-)
- 2.3 (C+)
- 2.0 (C)
- 1.7 (C-)
- 1.3 (D+)
- 1.0 (D)
- 0.7 (D-)
- 0 (F)

The average of grades in first-year courses must be 2.8-3.0; the average of grades in Professional Responsibility must be 2.9-3.1; and the average of grades in all other courses must be 3.0-3.6. The recommended range in upper-level courses is 3.2-3.4.

7 percent of students in all first-year courses must receive a C- or lower in each class.

Courses in which the faculty member finds it difficult or impossible to evaluate student performance with the precision necessary to assign letter grades may be graded Credit/No Credit when approved by the academic affairs committee before the beginning of the semester in which the course is taught.

Clinic and Field Placement Rules

No student may accumulate more than 16 credit hours from clinic and field placement courses — including the Criminal Prosecution Field Placement Program, Elder Law Field Placement Program, Field Placement Program, Judicial Field Placement Program, Legal Aid Clinic, Medical-Legal Partnership Field Placement Program, Project for Innocence and Post-Conviction Remedies, and the Tribal Judicial Support Clinic — as part of the 90 hours of law school credit required for graduation. Concurrent enrollment in more than one of these clinics and field placements is permitted only with the consent of the directors of the programs in which enrollment is sought.

Students must be in good standing to enroll in a clinic or field placement. This requirement may be waived by the associate dean for academic affairs in exceptional circumstances.
For some clinics and field placements, the student must qualify as a supervised legal intern under Kansas Rule 719. To qualify, the student must have completed 59 credit hours and Professional Responsibility. The credit-hour requirements are necessary to ensure that heavy course loads in the final 2 semesters will not interfere unduly with clinic work. Under the 59 hours rule, the permit allows students to work in law school clinics, field placements, governmental agencies and law offices. The student practice permit is directly tied to the attorney supervising the intern. Additional information and guidelines about obtaining a Kansas Legal Intern Permit (https://law.ku.edu/current-students/academic-resources/rule-719/) are available on the law school’s website.

The Honor Code

Matters of law student honesty and integrity in academic performance are governed by an honor code (http://law.ku.edu/honorcode) written and administered by law students. This system of peer review has been in effect for more than half a century and addresses issues such as plagiarism, cheating, and unauthorized collaboration in work assignments. Honor code violations, found to have occurred by the student committee after notice and hearing, are referred to the dean of the school with recommended sanctions. Final disposition rests within the discretion of the dean. The honor code governs law students in the same way that the Code of Professional Responsibility governs members of the bar. The complete honor code may be found in the Academics (https://law.ku.edu/academics/) section of the law school’s website. Copies also may be obtained from the Student Bar Association.

Exclusion and Probation

A student whose cumulative grade-point average is below 2.0 at the end of any regular semester, whether fall or spring, or at the end of the two 5-week summer sessions is on probation. A student who is on probation is not in good standing for purposes of the rules on withdrawal and readmission following withdrawal and any other rules that require good standing.

All students must achieve a minimum cumulative grade-point average of 2.0 during the semester in which they complete 90 hours, or they will not be permitted to graduate or continue in school. There is no appeal within the law school from this requirement.

A student whose cumulative grade-point average is below 2.0 after the completion of two semesters of full-time enrollment or two 5-week summer sessions and two semesters of full-time enrollment will be excluded from the school. A student whose cumulative grade-point average is below 2.0 after the completion of 59 credit hours or at the end of four semesters of full-time enrollment, regardless of the number of credit hours completed, will be excluded from the school. In either case, exclusion from the school is final. There is no appeal within the law school.

Students in the Two-Year J.D. Program are subject to the same grading system that applies to other J.D. candidates, and these policies of exclusion and probation apply equally to two-year students. Therefore, a two-year J.D. student whose cumulative grade-point average is below 2.0 after the completion of two semesters of full-time enrollment at the University of Kansas School of Law will be excluded from the school. A two-year J.D. student whose cumulative grade-point average is below 2.0 after the completion of four semesters of full-time enrollment at the law school will be excluded from the school. There is no appeal within the law school.

Career Services

Through an intensive one-to-one approach, the Office of Career Services (https://law.ku.edu/careers/) works with students to design and implement a customized career strategy, beginning the first semester of law school and continuing through graduation and beyond. Staff in the office meet with all first-year students individually to discuss their backgrounds, identify interests and consider the numerous programs, clinics and employment opportunities available to them. First-year students may also participate in a mentoring program, matching them with practicing alumni in the area who offer advice on the practice of law and how students can best prepare themselves for success in school and after graduation.

The Office of Career Services is committed to the same open-door policy as the school’s professors. Students are actively encouraged to meet with the members of the office on a walk-in basis or by appointment, as they prefer. Workshops and individual advising sessions help students explore career options and develop job-seeking skills. Excellent resource materials for career planning and placement are available, and staff members are knowledgeable about online resources. KU law students are highly sought after by employers throughout the state, region, and nation. Law firms, government agencies, public interest groups, and other employers post positions and conduct interviews at the law school for summer, school-year and post-graduation employment.

Many graduates join private law firms with practices including corporate and transactional law, civil and criminal litigation, tax, bankruptcy, domestic relations, estate planning and, often, general practice, encompassing all these areas and more. Many graduates enter government service, working at the federal, state, or local level. They become prosecutors and public defenders, and they work in agencies such as the Environmental Protection Agency, the Kansas Attorney General’s office, or the U.S. Securities and Exchange Commission. Still other graduates accept judicial clerkships, working for federal and state court judges at both the trial and appellate levels. The military branches also actively recruit at the school for their JAG programs.

Public interest work is another career avenue attractive to many graduates. From providing legal services to the underrepresented to influencing public policy, KU Law and the Office of Career Services offer numerous opportunities for students to explore and pursue these careers. Graduates have succeeded in landing prestigious post-graduate fellowships and joined organizations ranging from Kansas Legal Services to Public Citizen.

Nontraditional careers are another area of focus for the law school. As the lines between industry, policy, and law blur, our students have an ever-expanding range of opportunities where their skills and talents are in high demand. The law school supports students and graduates pursuing these hybrid careers, building alliances with employers well beyond traditional legal practice, and in industries such as insurance, banking, engineering and nonprofit management.

Ultimately, the Office of Career Services is focused on individual students, engaging them in a personalized, highly intensive experience throughout their time at KU. Our singular goal is to ensure each student has the very best career options available based on their unique interests and needs.

KU graduates have been successful in passing Kansas and Missouri bar examinations and have performed well on examinations in other states, including Colorado and Texas. Law school applicants should secure information about character, fitness, and other qualifications for admission to the bar in states in which they intend to practice.
Polsinelli Transactional Law Center

The Polsinelli Transactional Law Center creates unique scholarly and training opportunities for law students by combining the resources, attorneys and client base of a national law firm with the rigor of a Tier 1 research university. The center serves as the umbrella for transactional law courses, symposia and programming related to mergers and acquisitions, joint ventures, financing, real estate and other business transactions — arming students with the practical skills necessary for successful careers.

For more information about the center, visit the Centers (https://law.ku.edu/academics/centers/) section of the law school’s website.

Shook, Hardy & Bacon Center for Excellence in Advocacy

The Shook, Hardy & Bacon Center for Excellence in Advocacy capitalizes on its namesake’s distinguished history in litigation to cultivate a new generation of trial lawyers. The center has three broad goals: 1) offer unique skills-based training to KU law students; 2) present valuable programming for KU law alumni and the regional bar; and 3) open new scholarly opportunities for KU law faculty and nonfaculty studying related issues through a fellowship program.

For more information about the center, visit the Centers (https://law.ku.edu/academics/centers/) section of the law school’s website.

Tribal Law and Government Center

The Tribal Law and Government Center prepares a new generation of advocates for careers representing the legal interests of Indigenous nations and tribes. It provides a forum for research and scholarship on indigenous legal and governance issues.

The Tribal Lawyer Certificate Program ensures that law students who plan careers representing indigenous nations have the skills necessary to appreciate and strengthen the unique nature of their legal systems. The Tribal Law and Government Conference promotes research and scholarship regarding the unique legal and governance issues of indigenous nations. The Tribal Judicial Support Clinic gives second- and third-year students the opportunity to assist tribal court systems through a variety of projects. The joint degree program in law and Indigenous studies aspires to facilitate the protection and strengthening of indigenous sovereignty, self-determination, and self-sufficiency in Indigenous nations.

For more information about the center, visit the Centers (https://law.ku.edu/academics/centers/) section of the law school’s website.

The Dru Mort Sampson Center for Diversity and Inclusion

The Dru Mort Sampson Center for Diversity and Inclusion is a programmatic, co-curricular center that helps KU Law meet its mission and the changing needs of the legal profession by fostering and promoting diversity within the law school community. The Center encourages community engagement while helping students adjust to the demands of law school.

For more information about the center, visit the Centers (https://law.ku.edu/academics/centers/) section of the law school’s website.

Law Faculty

The law faculty is composed of honor graduates from law schools throughout the country. Virtually all have substantial experience in private or public interest practice. Many served as judicial clerks — two as clerks to Supreme Court justices.

Law faculty members are committed to excellence in the classroom and to mentoring law students. Students are encouraged to consult with their professors regularly about their progress in the study of law as well as about career plans, job opportunities, and the professional responsibilities of lawyers. Law faculty offices are located throughout Green Hall, and doors are open to students.

Faculty members enrich their teaching by researching and writing about the areas of law they teach. They regularly participate in conferences and symposia, publish widely in legal journals, and enjoy national and international recognition for the quality of their work. Many have written important treatises and casebooks used at law schools around the country.

- Melanie Daily. Clinical Associate Professor of Law. A.B., Chicago, 1999; J.D., Washington (St. Louis), 2007. Advanced Legal Aid Clinic, Family Law, Legal Aid Clinic.

• **Glenn Jewell.** Director of Field Placement Program and Director of Bar Preparation. B.A., Kansas; J.D. George Washington. Criminal Prosecution Field Placement, Employment Law, Extended Bar Preparation, Field Placement Program, Sixth Semester in D.C.

• **Patrick D.N. Perkins.** Associate Professor of Law. B.A., Brigham Young, 2009; J.D., Michigan, 2013. Business Associations, Business Organizations, Corporate Finance, Entrepreneurship Law Simulation Course.

• **Najarian Peters.** Associate Professor of Law. B.A., Xavier, 2002; J.D., Notre Dame, 2006. Privacy Law, The Practice of Privacy Law, Torts, Marginalized Bodies in Literature, Medicine, and the Law.

LAW 998 Tribal Judicial Support Clinic  LAW 914 Federal Indian Law

* concurrent enrollment acceptable

**First-Year Courses**

**LAW 804. Civil Procedure. 4 Credits.**
This course will examine all phases of the litigation process in civil actions. Specific subjects covered may include: pleadings; discovery; disposition of cases without trial; the right to jury trial; post-trial motions; appeals; the bases for jurisdiction over persons and property; notice; venue; subject matter jurisdiction; choice of federal or state law in diversity cases; joinder of claims and parties; and preclusive effects of judgments. Required course.

**LAW 809. Contracts. 2-4 Credits.**
An introduction to contract law, including topics such as offer and acceptance, consideration, contracts enforceable without consideration, defenses to enforcement of contracts, terms of contracts and their interpretation, performance and breach of contracts, remedies for breach, third-party beneficiaries, and assignments. Required course.

**LAW 814. Criminal Law. 2-4 Credits.**
An introduction to substantive criminal law, including theories of punishment, basic stages of the criminal process, culpability, defenses, parties to crime, conspiracy, attempts, sentencing, homicide, and other selected offenses. Required course.

**LAW 806. Introduction to Constitutional Law. 4 Credits.**
An introduction to the law of the United States Constitution, including the historical context and evolution of constitutional principles, methods of constitutional interpretation and analysis, and basic doctrine concerning the structure of government and the protection of individual rights. Doctrinal coverage includes separation of powers, federalism, equal protection, due process, and freedom of religion. Required course.

**LAW 820. Lawyering Skills I. 2 Credits.**
This course introduces students to legal systems and the skills of lawyers. It includes instruction and discussion on legal traditions, legal institutions and legal methods. It focuses on developing students' skills in legal reasoning, writing and research. Students will complete numerous research and writing assignments, culminating in an open memorandum. Required course.

**LAW 821. Lawyering Skills II. 3 Credits.**
In this course, students build on the research and writing skills they developed in the first semester and practice additional skills such as client interviewing, negotiation and mediation. Students learn about the expectations and demands of lawyers and the legal profession through instruction on bar admission, professionalism, and ethical advocacy, and by working on assignments in a simulated lawsuit. Student work culminates in an advocacy brief and subsequent oral argument. Required course.

**LAW 826. Property. 2-4 Credits.**
An introduction to personal property law and to real property law, which includes adverse possession, estates in land, covenants, landlord-tenant law, easements, and real covenants, and which may include other private and public land use controls, eminent domain, and conveyancing. Required course.

**LAW 831. Torts I. 2-4 Credits.**
Fall semester. Development of liability based upon fault. Intentional torts, including battery, assault, false imprisonment, intentional infliction of mental distress, trespass to land and chattels, conversion, and privileges.

Upper-Level Courses

LAW 857. Computer-assisted research. Research aids in selected subject areas will look at Kansas materials, legal reference books, form books, and computer-assisted research. Students will complete an accounting course while an undergraduate or graduate student.

LAW 856. Advanced Legal Research. 2 Credits.
Spring semester. Evaluates important legal research tools and techniques not covered in the required first year Lawyering course. Provides an in-depth look at Kansas materials, legal reference books, form books, and computer-assisted research. Research aids in selected subject areas will also be examined.

LAW 857. Advanced Litigation. 3 Credits.
This professional skills course builds on the foundational trial skills taught in Trial Advocacy. Through repeated trial performance in a realistic courtroom setting, students will master trial skills such as case analysis and planning, applied legal storytelling, witness examination, and application of the rules of evidence. Special topics may include admitting contemporary forms of evidence and using technology in the courtroom. Prerequisite: Evidence and Trial Advocacy.

LAW 844. Advanced Project for Innocence and Post Conviction Remedies. 1-3 Credits.
Advanced Project for Innocence and Post Conviction Remedies: Students who have completed the Project for Innocence and Post Conviction Remedies may be enrolled as a Student Director. Student Directors are assigned to work with one of more incoming student teams to assist with case assignments. Depending upon the credit hours enrolled, Student Directors may be employed as a team member to participate in substantive client work, and if eligible, conduct hearings. In other cases the Student Director will serve in a more advisory capacity. Student Directors will conduct client intake and review. Student Directors will be required to commit to 42-44 hours of work per credit hour enrolled, and will continue to engage in reflective writing and supervision sessions with faculty. They will meet as a group with faculty for a seminar focused on intake and advanced issue spotting skills. Prerequisite: Project for Innocence and Post Conviction Remedies.

LAW 990. Advanced S.J.D. Seminar. 1 Credits.
This seminar is required of all second year S.J.D. students and may be audited by all S.J.D students beyond two years with permission of the instructor. During this seminar students will conduct research and writing of their S.J.D. dissertations. Students will be required to submit each chapter of their dissertations to a third year writing assistant and to the instructor for editing and revision as part of their seminar work. Edited and revised chapters will be presented to the seminar as a whole for critique and analysis. Second year S.J.D. students will be expected to submit at least one chapter of their dissertations during the second semester of their second year. Second year S.J.D. students who are not in residence will be excused from attending seminar meetings but will be required to engage in the editorial and revision process and to meet virtually with the instructor as needed. The seminar will meet for two hours bimonthly during the academic year.

LAW 860. Alternative Dispute Resolution. 2-3 Credits.
This course introduces the student to arbitration, mediation, negotiation, and other methods for resolving disputes. In addition to serving as alternatives to the court system, these processes also play an increasingly important role in litigation and settlement. This is a survey course, which may include exercises to develop skills such as interviewing, counseling, and negotiation.

LAW 862. American Legal History. 2-3 Credits.
An introductory survey of the history of American Law and American legal institutions.

LAW 863. Antitrust Law. 3 Credits.
Covers the Sherman Antitrust Act and related federal legislation designed to control the competitive practices and structure of American industries. Examines the law of monopolization, price fixing, group boycotts, vertical restraints such as tie-ins and distribution restrictions, and mergers. Some elementary principles of economic analysis are employed but economics is not a prerequisite.

LAW 807. Appellate Advocacy. 2-3 Credits.
This course teaches appellate writing and oral advocacy skills. Students will study leading brief-writing and oral-advocacy texts. Students will engage in numerous in-class exercises that advance their writing and
presentation abilities. Students will argue two or more moot court cases, where they will be required to draft briefs and present oral arguments.

**LAW 978. Asylum and Refugee Law. 2 Credits.**
This course will cover the fundamental doctrines of asylum and refugee law. We will discuss the foundational principles, drawn from international agreements, and then examine their application in United States domestic law. The course will examine practice in immigration courts and policy questions, both recent and long-standing.

**LAW 889. Bankruptcy. 3 Credits.**
This survey of bankruptcy and debtor-creditor law covers topics such as: Chapters 7, 11, and 13 of the Bankruptcy Code and enforcement of money judgments outside of bankruptcy. Prerequisite: Commercial Law: Secured Transactions and Business Organizations.

**LAW 870. Biolaw. 2-3 Credits.**
This course examines the law of biology and the biology of law. Topics covered will include law and evolution, law and genetics, law and neuroscience, law and ecology, climate change law, biodiversity law, law and biotechnology, reproductive law, behavioral law and economics, and law and deextinction.

**LAW 892. Business Organizations. 3-4 Credits.**
This introductory business law course covers topics including the law of agency, the formation, ownership, and management of partnerships, limited liability entities, and corporations, and the roles of federal law, state law, and contract in regulating the relationships among the various participants in a business venture, including fiduciary duties and enforcement mechanisms. Special attention will be paid to closely held business associations.

**LAW 868. Business Planning Seminar. 3 Credits.**
A problem approach to planning important business transactions, such as organization of a close corporation; organization of a public company; dividend and other corporate distributions; corporate liquidations; and corporate combinations such as merger and consolidation. Each problem is analyzed from the perspectives of tax, securities regulation, and corporate law. Prerequisite: Business Organizations, Federal Income Taxation, and Taxation of Business Enterprises.

**LAW 871. Capital Punishment. 2-3 Credits.**
This course will examine capital punishment as a system of law and will address many of the intertwining questions raised by the existence of the death penalty in America: How, as a statutory and procedural matter, is the death penalty implemented in America? What procedures are unique to the imposition of death as a punishment? Why are those procedures used, and to what extent are they either adequate or inadequate? What are the arguments for and against the death penalty and how persuasive are they? Do we, as lawyers and as individuals, accept capital punishment as a working legal system.

**LAW 886. Civil Rights Actions. 2-3 Credits.**
A survey of the law governing civil suits against government entities and officials to remedy violations of federal constitutional rights. The focus of the class is litigation under 42 U.S.C. section 1983, which creates a civil cause of action for damages and injunctive relief to remedy violations of federal constitutional rights. This area of law is sometimes referred to as "constitutional torts," because it involves civil litigation that is in many ways similar to traditional tort actions. The course covers the elements of a Section 1983 action, the constitutional immunity of states and state officers, defenses to Section 1983 liability, defendants' liability for attorneys fees under 42 U.S.C. section 1988, civil suits against federal defendants, and the relationship between Section 1983 and federal habeas corpus.

**LAW 872. Commercial Arbitration. 3 Credits.**
Addresses the law and practice of commercial arbitration, a rapidly growing form of alternative dispute resolution. Drafting arbitration agreements, the enforceability of arbitration agreements, selecting arbitrators, the arbitration hearing, and the enforceability of arbitration awards. Gives special emphasis to arbitration of international commercial disputes and the institutional rules under which such arbitrations proceed.

**LAW 873. Commercial Law: Secured Transactions. 3 Credits.**
Introduction to debtor-creditor law, particularly secured transactions under the Uniform Commercial Code and the Bankruptcy Code.

**LAW 879. Comparative Law. 3 Credits.**
A general introduction to and comparison of major legal systems of the world, with special emphasis given to how those systems reflect differing cultural values in addressing common legal questions. A major goal of the course is to deepen the students' understanding of law and practice in the United States and to broaden their perspective of law beyond the boundaries of the common law systems.

**LAW 902. Complex Litigation (Non-Writing). 3 Credits.**
Explores the many interesting facets of complex litigation in the context of mass torts. Topics include class actions, consolidation, multidistrict litigation, and complex joinder issues, as well as substantive issues that may arise in mass tort litigation.

**LAW 881. Conflict of Laws. 2-3 Credits.**
An analysis and consideration of problems respecting the law applicable in transactions or to relationships with elements in more than one state or country. The law to be applied in such situations, the theoretical bases of choice-of-law, and the issues which these matters can present under the Constitution of the United States are discussed. Far-reaching changes are occurring in basic assumptions and methods of approach in the field of choice-of-law, and special attention is given to these developments. Finally, the class considers the recognition and enforcement of foreign state judgments in terms of both standards and requirements that flow from relevant provisions of the Constitution.

**LAW 869. Contract Drafting. 3 Credits.**
An intensive skills course designed to teach the principles of contemporary commercial drafting, including how to translate a business deal into contract concepts; draft each of a contract's parts; draft with clarity and without ambiguity; add value to a deal; work through the drafting process; and review and comment on a contract. Weekly written homework is required. Prerequisite: Business Organizations recommended but not required.

**LAW 888. Copyright Law in a Digital Age. 3 Credits.**
Explores the major copyright issues that arise as Congress and the courts attempt to adapt the law to an increasingly complex technological environment. We will examine problems posed by such categories of digital works as software, databases containing factual and other public domain content, multimedia materials, computer generated or assisted works, and digital music.

**LAW 930. Corporate Finance. 2-3 Credits.**
This advanced business law course examines the legal and financial aspects of corporate finance. Topics include the time value of money, valuation of stocks and bonds, the use of debt, equity, and derivative instruments in the firm's capital structure, dividends and distributions, and finance theories, including portfolio theory, the capital asset pricing model, and the efficient capital market hypothesis. Prerequisite or Corequisite: Business Organizations.

**LAW 877. Corporate Governance. 2-3 Credits.**
This course will engage major debates and key issues in corporate governance, the challenges for designing an optimal system for governing corporations, and the increasingly important role of lawyers in these
decisions. Topics for study include the history of corporate governance; the role and responsibility of the board of directors in, among other matters, evaluating and insuring effective corporate compliance, risk monitoring, litigation and crisis management; and corporate social responsibility. Substantial comparative content will be included. Prerequisite: Business Organizations.

**LAW 838. Criminal Practice in Kansas. 2-3 Credits.**

Designed for the student who plans to practice criminal law in Kansas. Examines the Kansas criminal code and case law, explores practical and ethical issues from the perspective of the prosecutor and defense counsel, and develops practical skills in pre- and post-trial proceedings. Includes filing of the complaint, bail, preliminary hearing, pretrial proceedings, motions practice, plea negotiations, client counseling, trial proceedings, jury instructions, post-trial motions, sentencing and appeals.

**LAW 878. Criminal Procedure. 3 Credits.**

An introduction to criminal procedure, including investigation and police practices, pre-trial proceedings, trials, sentencing, and review proceedings. Particular emphasis on the application of the exclusionary rule to arrest, search and seizure, interrogation procedures, and identification procedures.

**LAW 890. Criminal Prosecution Field Placement Program. 1-6 Credits.**

Students are assigned to the office of the United States Attorney for Kansas or Kansas state district attorney offices as arranged by the instructor. Students assist prosecutors in virtually all phases of the criminal process, including criminal trials. A weekly seminar focusing on issues confronting criminal prosecutors accompanies the field work. Unless specifically authorized, students must be enrolled in both semesters of the academic year for three credit hours per semester. Prerequisite: Evidence and qualification under Kansas Rule 719. See Clinic and Externship Rules in the Academic Regulations section of this bulletin. Prerequisite or corequisite: Trial Advocacy.

**LAW 828. Deals. 2-4 Credits.**

This simulation and professional writing course will serve as an optional lab component for students who are concurrently enrolled in LAW 947 Mergers and Acquisitions, or have previously completed it. This course introduces students to the ethical, structural and technical aspects of negotiating and drafting the documents that bring a business transaction to life. By following a complex business transaction from start to finish, students will gain experience grappling with the type of tasks and issues common to a deals practice in a way that bridges the gap between law school and practice. The course will also help students prioritize their clients' business objectives and understand how deal lawyers create value, manage risk, and work toward optimal outcomes for their clients. The course will be co-taught by law school faculty and experienced transactional attorneys. Prerequisite: Contract Drafting and either Business Organizations. Corequisite: Mergers and Acquisitions.

**LAW 859. Deposition Skills Workshop. 2 Credits.**

This professional skills course will expose students to substantive and procedural law, as well as the ethical rules, pertaining to depositions. It provides students a realistic deposition setting in which they will learn to conduct and defend a series of depositions in a simulated environment under the direction of experienced attorneys who serve as the workshop faculty. This course is a four-day intensive with self-study before and after. Students should plan to complete a schedule of self-study and preparation for at least two weeks before the Workshop begins; to attend the in-person Workshop from approximately 9 a.m. to 6 p.m. Sunday through Wednesday, and to complete some reflective work after the Workshop concludes. Prerequisite: Evidence.

**LAW 835. Due Diligence in Business Transactions. 2 Credits.**

This simulation course will expose students to the due diligence process that is critical to every business transaction. It offers students a realistic due diligence setting, in which they will: learn the fundamental scope and goals of the process, including the various types of information that must be obtained and reviewed; identify the typical issues that must be analyzed; practice using a framework for systematically accumulating information; and understand how that information may affect the structure of the transaction and the content of the agreement that memorializes it. Taught by law school faculty and experienced transactional attorneys. Prerequisite: Contract Drafting and Business Organizations. Corequisite: Mergers and Acquisitions.

**LAW 901. Elder Law Field Placement Program. 2-6 Credits.**

Involves students in representation of elderly individuals primarily in consumer, housing, and public benefits litigation. Students work under the supervision of attorneys from Kansas Legal Services and faculty from the School of Law. A one-hour classroom component accompanies the field-work requirement.

**LAW 891. Elections and Campaign Finance. 3 Credits.**

This course will consider the process of elections, campaign finance, and voting at both the state and federal levels. Topics addressed will include the role of political parties, voter and candidate eligibility, design of electoral districts, the mechanics of voting and vote counting, federal and state campaign regulation, and challenges to election results.

**LAW 899. Electronic Discovery I. 2 Credits.**

This course will explore developing trends in the increasingly prevalent field of electronically stored information ("ESI") in litigation. Students will learn about the various types of ESI and gain an understanding of how the federal rules impact ESI issues. The curriculum will include discussions of recent cases, the amended federal rules of civil procedure, and the best practices in litigating recurring e-discovery issues. The course follows the natural progression of a case, providing students the opportunity navigate e-discovery matters at each step in the litigation process, including: records retention policies, litigation holds, discovery requests, search methods, production and metadata, spoliation sanctions, and ultimate admission of ESI evidence at trial. No advanced computer skills are required for this class.

**LAW 903. Employment Discrimination Law. 3 Credits.**

A study of the major federal statutes prohibiting discrimination in employment and of constitutional objections to employment discrimination.

**LAW 925. Employment Law. 2-3 Credits.**

This course will introduce students to several employment law subjects that arise in the workplace, including, among others: the essential characteristics of an employee (as compared to an independent contractor), the at will employment doctrine and exceptions to it, wage and hour protections, ownership of the work product of employees and related trade secret issues, restrictive covenants, and ethical issues raised when representing employers and employees. The course will take a practitioner's approach to learning these topics. Instruction will include writing exercises, lectures, and outside speakers. Writing exercises will include drafting employment contracts and lawsuits. Outside speakers will include a variety of practitioners, from employment attorneys and restrictive covenant litigators in Kansas City, to Silicon Valley attorneys with experience advising technology startups. This course will not cover traditional labor law or employment discrimination law (both of which are addressed by other classes at the law school).

**LAW 963. Energy Law and Policy. 3 Credits.**

This course provides an introduction to the US energy sector in its legal and regulatory context. Energy law is an interdisciplinary field linking public utility law, natural resources law, land use law, and environmental
LAW 904. Environmental Law Seminar. 2-3 Credits.
An intensive study of one or more aspects of environmental law, such as wildlife law, energy policy, marine pollution controls, and so forth. May be repeated for credit, provided there is not duplication of subject matter.

LAW 905. Environmental Law. 3 Credits.
A general survey of the legal mechanisms for protecting the environment. It considers the justifications for and economic implications of regulating activities with potential adverse effects on the environment and the various sources of legal constraints (common law, constitutional, and statutory) on those activities. The course provides an introduction to environmental litigation, to environmental assessment under the National Environmental Policy Act, to endangered species protection, and to the various forms of legislative and administrative controls on and inducements to avoid polluting activities reflected in statutes such as the Clean Air Act, the Clean Water Act, and the statutes designed to control contamination of land by hazardous substances.

LAW 907. Estate Planning: Practice. 2-3 Credits.
The course replicates the estate planning process, providing experience in gathering facts, analyzing alternatives, and implementing a plan through preparation of wills, trusts, and other documents. Extensive drafting of documents is required. Prerequisite: Estate Planning: Principles.

LAW 906. Estate Planning: Principles. 2-3 Credits.
A study of legal principles relating to transmission of property by gift or at death and the vehicles available for these purposes. Primary emphasis is on estate and gift taxation and income taxation of estates and trusts. Prerequisite: Federal Income Taxation and Trusts and Estates.

LAW 908. Evidence. 3 Credits.
Functions of the court and jury; burden of proof; presumptions; judicial notice; competency of witnesses; examination of witnesses; hearsay rule, with exceptions; opinion evidence; direct examination and circumstantial evidence; "best evidence" rule; standards of relevancy.

LAW 943. Extended Bar Exam Preparation. 2 Credits.
The course is designed to ensure students know what to expect from both the post-graduation Thermis bar review course and the bar exam itself. It will include both weekly in-class sessions and online homework assignments. The course will begin with a diagnostic exam. Next, the course will address the analytical, information-retrieval, and reading-comprehension skills necessary for success on Multistate Performance Test (MPT). The course will then cover several subtopics which are heavily tested on the Multistate Bar Exam (MBE) and the Multistate Essay Exam (MEE). Students will learn skills necessary for writing a successful MEE essay. Specifically, students will practice careful reading, outlining, time management, and drafting by completing a variety of MEE exercises. The course will also include a sampling of MBE questions, with instruction on how to analyze both correct and incorrect answers for maximum learning. Students will complete both practice and graded MEE and MPT exercises. Students will receive individualized feedback on the graded MEE and MPT exercises. The course exists to supplement, not replace, the post-graduation bar review course. Enrollment will be limited to students entering their final year of law school (and 2Ls planning to graduate in December). The course will be graded on a credit/no credit basis.

LAW 894. Field Placement Program. 1-6 Credits.
Allows students to earn academic credit for performing legal work under the supervision of a practicing attorney at approved governmental agencies, non-profit legal services organizations, and non-profit international organizations. Students will work a specified number of hours per week, complete a goals memo, maintain weekly journals of their experience, and write a reflective paper. Students may enroll for more than one semester with permission of the Director, provided that no student may count more than 6 hours of Field Placement Program credit toward the credit required for graduation. No student may enroll in the Field Placement Program in a placement in which the student was formerly an employee, is currently an employee, or has an offer of employment. No student may enroll in Field Placement Program in a field placement for which there is an existing specialized Law School clinic or externship program without the prior permission of both the director of the affected specialized Law School clinic or externship program and the director of the Field Placement Program. Graded on a credit/no credit basis.

LAW 959. First Amendment Advocacy. 3 Credits.
First Amendment Advocacy is an opportunity for students to develop and apply the kinds of skills and knowledge possessed by First Amendment advocates, particularly media lawyers. Students plan and practice how to advise and represent hypothetical clients who are concerned with expressive freedom and the free flow of news and information. In class, students perform as advocates, negotiators, and evaluators of liability risks. Students also perform in the role of lawyer as citizen by
planning and practicing how to advance general understanding of the First Amendment. Assignments include research and analysis of media-related law, regulation and public policy. Written work is completed in the form of documents commonly used in practice.

LAW 824. Global Challenges in Law, Agriculture, Development, and Ecology. 2-3 Credits.
This course aims to complement the more foundational courses in public international law, international business law, and comparative law by examining a cluster of particularly important “global challenges.” These involve (i) the rule (and role) of law in international relations, (ii) the economic, environmental, and social aspects of modern agriculture, (iii) the quest and prospects for human development, and (iv) the existential threats posed to the ecosphere through climate change, soil degradation, water conflicts, and species extinctions. The course provides also a “paper option”: students enrolling in a third credit hour through Independent Research (LAW 924) can, upon satisfactory completion of a research project related to the subject-matter of this course, satisfy the upper-class scholarly-writing requirement.

LAW 951. Global Data Protection Law. 2-3 Credits.
This highly-interactive course explores the rapidly evolving legal field of data protection and privacy. Personal data is used today in multiple ways by a variety of data collectors (from governments to marketers to cybercriminals), and global perspectives differ on what constitutes “personal data” that is worthy of legal protection. The course covers global privacy principles, concepts and models; critical information security concepts; and a wide breadth of data protection and privacy laws. The course also addresses rapidly evolving technologies driving changes in global data protection and privacy laws, and how to manage compliance with such ever-evolving laws.

LAW 920. Health Law and Policy. 2-3 Credits.
A survey of significant legal and policy issues, both historical and current, associated with the delivery of health care. Among these issues are the patient-provider relationship, medical malpractice, the right to die, hospital licensing and physician credentialing, medical staff structure, insurance coverage disputes, and current ideas for health care reform.

LAW 847. Healthcare Regulation. 2 Credits.
This course examines in depth the key areas of state and federal regulation of health care providers, practitioners, and systems in the United States. It will also explore the application of the regulatory regime to a variety of provider affiliation structures that are commonplace in today’s health sector. The students will examine applicable statutes, implementing regulations, sub-regulatory agency guidance, and case law as the bases for regulation. Students will come away with a solid foundation in health care regulatory requirements. While LAW 920 is helpful, it is not a prerequisite for this course.

LAW 922. Higher Education and the Law Seminar. 3 Credits.
A seminar focused on the unique legal issues facing colleges and universities. The over 4000 institutions of higher education in the United States require legal services, especially as law schools fight suits alleging they misrepresented job prospects to students and the Supreme Court rules on landmark affirmative action cases such as Fisher v. University of Texas (now returning to the Court after remand). The course will explore academic freedom, tenure, and student rights and discipline, issues that distinguish institutions of higher education from other corporate entities. Consideration will be given to distinctions between public and private institutions. Grades will be based on three memoranda that students will research and write, and on class participation.

LAW 923. Immigration Law. 2-3 Credits.
Topics such as standards for the admission of immigrants; nonimmigrant visas for students, workers, and tourists; the regulation and exclusion of undocumented aliens; legal procedures for admission, exclusion, and deportation; refugee law; and citizenship law.

LAW 924. Independent Research. 1-2 Credits.
Students may undertake a project which involves investigation, research, and scholarship in a particular area of the law. The research must be done under the supervision of a faculty member and must culminate in the writing of a research paper in publishable form. Students must complete and submit for faculty feedback at least two drafts or one draft and one outline in addition to the final research paper. The faculty supervisor must provide meaningful feedback to the student on the outline and draft(s). The final product of the independent research must be submitted at a date set by the faculty supervisor which is no later than the last day of classes of the semester. A student may not earn academic credit unless (1) in the case of a regular semester, that student is enrolled in at least 3 additional credit hours during the same semester, or (2) in the case of summer school, that student is enrolled in at least 2 additional credit hours in either five-week summer session. Students must successfully complete 10-15 double spaced, typed pages of work for every credit hour earned. No student may enroll for more than 2 hours of independent research in one semester, and no student may count more than 6 hours of independent research credit toward the credit required for graduation. However, a student may receive a maximum of 2 hours credit for independent research in either of the summer school sessions if that student is otherwise enrolled in 7 additional hours. Prerequisite: Forty hours of law school credit and an overall average of at least 2.0 at the time of enrolling.

LAW 968. Intellectual Property. 3-4 Credits.
An introduction to substantive patent law, copyright law, and trademark registration designed (1) to provide background knowledge for those interested primarily in the general law practice and (2) to provide a foundation for future specialization in patents, copyrights, and trademarks.

LAW 829. International Business Law Drafting. 1 Credits.
This one-credit-hour course focuses primarily on the preparation of operational documents relating to international business transactions - for example, transnational sales contracts, letters of credit, explanatory memoranda to business clients planning cross-border transactions, international joint venture agreements, etc. - rather than on the drafting of documents that are litigation-oriented or academic in character. The course is available to students who are (or have) enrolled in the International Commerce and Investment course and who wish to engage in an intense set of “companion” legal-drafting exercises. Prerequisite: LAW 945.

LAW 945. International Commerce and Investment. 3 Credits.
Examines the transactional aspects of the sale of goods and direct investment across national borders. The focus is on private international business transactions. Among the subjects covered regarding international commerce (sale of goods) are contract drafting, documentary sales, commercial terms, electronic commerce, agency and distributorship, and contract performance. Among the subjects covered regarding international investment are joint ventures, corporate codes of conduct, corrupt practices, transfer pricing, expropriation, and dispute resolution. This course complements (but is independent of) International Trade Regulation.

LAW 929. International Law Moot Court Competition. 2 Credits.
Spring semester. Open only to the team of students (usually five) selected by a competition held in the preceding fall semester. All students (including first-year students) are eligible to compete for a position on the team. Once selected, the team participates in the Jessup International Law Moot Court Competition, for which briefs are prepared over the winter
recess and oral arguments are usually held in February. Graded on a
credit/no credit basis.

**LAW 827. International Law and Literature. 3 Credits.**
This course covers both law “as” literature and law “in” literature, plus
legal rhetoric. In Part One, treaties are studied as a form of literature using
literary criticism methods, comparing and contrasting those methods with
standard legal interpretation tools. In Part Two, classic works of fiction and
poetry, such as those by William Shakespeare (England), Albert Camus
(France), E.M. Forster (England), Seamus Heaney (Ireland), Franz Kafka
(Czechoslovakia), and Rabindranath Tagore (India), are read closely
to spot enduring legal themes common across all countries, including
justice and morality, obedience and rebellion, wealth and poverty, and
fairness and prejudice. In Part Three, renowned historical speeches are
analyzed to see how they manifest Aristotle’s five principles of Rhetoric,
with illustrations from Winston Churchill (England), John F. Kennedy
(United States), and Martin Luther King (United States).

**LAW 944. International Trade Law. 3 Credits.**
Examines the legal, regulatory, and policy aspects of the sale of
goods across national borders. Key topics include: (1) interdisciplinary
foundations of international trade; (2) history and institutions of the
GATT-WTO system; (3) accession to the WTO; (4) dispute settlement
under WTO rules; (5) regulation of import duties and non-tariff barriers;
(6) transparency; (7) rules on customs classification and valuation; (8)
post-9/11 border security measures; (9) the critical link between trade
and national security (and Section 232 actions); (10) trade sanctions
and export controls (including with respect to Iran); (11) protection of
intellectual property rights against infringement; (12) trade in agriculture
(including sanitary and phytosanitary issues); (13) trade in services;
and (14) ideological and policy issues relating to trade liberalization
and globalization. This course complements (but is independent of)
International Commerce and Investment and is the basis for more
advanced study of international trade law.

**LAW 931. Introduction to Elder Law. 2 Credits.**
This course is an introduction to many of the legal issues that face a
person who is elderly or has a disability, and focuses on the practical
aspects of advising such a client. Topics covered are income (including
Social Security and SSI), asset management (including Durable Powers
of Attorney and living trusts), estate planning, special needs trusts, health
planning and decision making, Medicare, long-term care planning,
Social Security and SSI, asset management (including Durable Powers
of Attorney and living trust), estate planning, special needs planning,
health care planning and decision making, Medicare, long-term care planning,
long-term insurance, Medicaid, housing issues, guardianship, elder
abuse, and end of life issues.

**LAW 946. Introduction to the American Legal System. 1-2 Credits.**
This course introduces international students to the common law
system and to U.S. legal institutions, including federal and state courts,
and the executive and legislative branches of government. Their
constitutional position and the role of constitutional law in the U.S. system
is emphasized. The course introduces both civil and criminal procedure
and gives students practice in legal analysis using both caselaw and
statutory sources. Credit for this course cannot be applied toward the J.D.
degree.

**LAW 918. Islamic Law. 2-4 Credits.**
Examines the history, doctrine, texts, and role of Islamic law (Shari’ah)
throughout the world. This course complements (but is independent of)
LAW 879. The course focuses on the background and birth of the Arab-
Islamic Empire, the life and times of the Prophet Muhammad (PBUH),
the development of Islam, the Rashidun, Umayyad, and Abbasid Caliphas,
Moghul and Ottoman Empires, the Koran and Sunnah and other sacred
texts, the Sunni-Shi’i split, the principal schools of Islamic law, the status
of women and religious minorities, and principles of the substantive areas
of law, including criminal, family, inheritance, contract, property, business,
banking, and international law (including law of war). Also covered are
issues of economic growth, marginalization, and terrorism. (Same as
GIST 818.)

**LAW 933. Judicial Field Placement Program. 3 Credits.**
Students serve as law clerks for state and federal judges performing legal
research for the judges and observing proceedings in the courtroom and
chambers. There is a classroom component to the clinic. Students also
submit weekly journals to the clinic director and prepare either a paper
based on their experiences or make a class presentation. Students must
enroll for the academic year, for three credits per semester.

**LAW 845. Jurisdiction. 2-4 Credits.**
This course deals with issues relating to a court’s power to adjudicate
claims. Topics covered may include jurisdiction over persons or property,
subject matter jurisdiction, venue, determining the applicable law, joinder
of parties, and recognition and enforcement of judgments. Prerequisite:
Civil Procedure. Not open to students who have had the School’s two-
semester, six-hour course or its equivalent.

**LAW 934. Jurisprudence. 2-3 Credits.**
Considers issues in legal and political theory or philosophy. The focus
is on theories of adjudication, theories of law, and application of these
theories to particular cases and problems. Other topics may be added,
such as the philosophy of criminal punishment, the theory of legal
interpretation, feminist jurisprudence, law and literature, or law and
sociology. A writing project is required in place of a final examination.

**LAW 935. Juvenile Law. 2 Credits.**
A study of the juvenile justice system, juvenile courts, and the children
and youth who come under juvenile court jurisdiction. Among the subjects
covered will be: the history and philosophical basis of the juvenile court,
child abuse and neglect, termination of parental rights, status offenders,
children who commit criminal offenses, taking children and juveniles into
custody, search and seizure, interrogation, intake, informal supervision,
diversion, protective and temporary custody, pretrial detention, waiver of
adult court, and adjudicatory and dispositional hearings.

**LAW 940. Kansas Journal of Law and Public Policy I. 1 Credits.**
The Kansas Journal of Law and Public Policy publishes articles by
scholars, public officials, and others, including student staff members, on
public policy topics. The staff of the Journal is chosen on the basis of a
yearly writing competition. First year members of the Journal undertake
editorial work and write comments for possible publication. Journal
members may not enroll concurrently in the Kansas Law Review.

**LAW 937. Kansas Journal of Law and Public Policy II. 2 Credits.**
The Kansas Journal of Law and Public Policy publishes articles by
scholars, public officials, and others, including student staff members, on
public policy topics. The staff of the Journal is chosen on the basis of a
yearly writing competition. Second year members of the Journal
select articles for publication, edit the articles, and undertake the
other responsibilities of publication. Journal members may not enroll
concurrently in the Kansas Law Review.

**LAW 840. Kansas Supreme Court Research Practicum. 3 Credits.**
This practicum serves the dual goals of providing students with practical
research experience and assisting the Kansas Supreme Court by
providing needed research support. Students are assigned research
projects from the Kansas Supreme Court and the Office of Judicial
Administration as arranged by the instructors. Students employ a
variety of methodologies to conduct thorough research and concisely
convey their findings to the Kansas Supreme Court, culminating with a
presentation to the court at the end of the semester.

**LAW 939. Labor Law. 2-5 Credits.**
A study of the federal regulation of union-employer-employee relationships in the private sector. Subjects include employee organizational rights, union collective action, injunctions, federal preemption, the duty to bargain, antitrust limitations, the enforcement of the collective bargaining agreement, grievance procedures and arbitration, the union's duty of fair representation, and internal union affairs.

LAW 950. Law Review. 1-2 Credits.
The Kansas Law Review publishes scholarly commentary on the law by professors, practicing lawyers, judges, and law students. Students are selected for membership by competition, and are responsible for publishing five issues of the Review each year. Students select articles for publication, edit the articles, check citations, and write notes and comments for possible publication. Students must enroll for the academic year, for one-two credits per semester. Students enrolled in this course will not be permitted to enroll in the Kansas Journal of Law and Public Policy. Graded on a credit/no credit basis.

LAW 952. Legal Aid Clinic. 2.5-6 Credits.
Students provide legal assistance, including direct client representation, to indigent child and adult clients with active cases in Douglas County District Court and Lawrence Municipal Court. Recent areas of representation have included juvenile criminal defense, misdemeanor municipal defense, family law, protection from abuse, landlord-tenant, and other civil cases. A weekly seminar meeting accompanies the field work and allows students and instructors to study the methodologies underlying lawyering tasks in context, thereby merging theory with practice. Supervision meetings with faculty are designed to encourage creative case planning, practice management, and individual professional development through feedback and critique. Students are required to be qualified under Kansas Rule 719, which requires a minimum of 59 hours of course work or 44 hours if enrolled in an in-house faculty supervised clinic. Students must apply to the clinic and be accepted before enrolling. Applications and deadlines are available in Room 105. Prerequisite: Trial Advocacy and Professional Responsibility; Qualification under Kansas Rule 719. See Clinic and Externship Rules in the Academic Regulations section of this bulletin.

LAW 803. Legal Analytics. 2-3 Credits.
Legal analytics is the systematic computational analysis of legal data or statistics. This class teaches students how to use mathematical, statistical, and data analytical approaches to analyzing sources of law such as judicial decisions, briefs, motions, statutes, rules and regulations, legal commentary (e.g., law review articles, treatises), and the vast amounts of data generated by legal institutions (e.g., HHS, USPTO, IRS, SEC, EPA, USDA, FBI). Students will learn how to identify sources of legal data, assemble legal data into usable forms (e.g., database), clean and measure legal data, analyze legal data (e.g., using statistical tests, crowd-sourcing, artificial intelligence, network analysis), interpret results of legal data analysis, and present results of legal data analysis to different audiences (e.g., juries, judges, attorneys, regulators, investors, politicians, the public). The class will include problem sets designed to ensure student mastery of all methods covered. In addition, students will learn how to use powerful legal analytics software tools - access to which will be provided free by commercial vendors for student use - capable of discovering, analyzing, interpreting, communicating, and visualizing legal data. Upon completion of this class, students will possess experience and expertise in all major legal analytics methods.

LAW 955. Legislative Simulation and Study. 3 Credits.
This simulation class is designed to give students an in-depth working understanding of our multilayered lawmaking process that will be useful in a legislative practice or when researching legislative history in any type of law practice. In this class, students will fill the roles of legislators in a fictional senate. They will draft legislation, give speeches, form strategies, and negotiate with others. Additionally, they will gain hands-on experience working in the Kansas Legislature. By the end of this class, students will be able to guide a bill through the lawmaking process, assist clients and others in solving problems using the legislative process, and consider lawmaking a viable option for you to assist clients or to solve societal ills.

LAW 954. Legislation and Statutory Interpretation. 2-3 Credits.
This course examines the legislative process, the relationship between the common law and statutes, and statutory interpretation. It focuses primarily on the theoretical and practical aspects of statutory interpretation, including overall theories of interpretation, the canons of statutory interpretation, and the use of legislative history. Because statutory interpretation is a skill needed by all attorneys, the course is designed to be of interest to any student.

LAW 982. Lesbian, Gay, Bisexual, Transgender and Questioning (LGBTQ) Seminar. 2-3 Credits.
This course will explore the emergence of the LGBTQ civil rights movement and will cover numerous legal topics at the intersection of law and practice involving issues significant to LGBTQ clients. Among others, topics will include: marriage, divorce, employment discrimination, family creation, healthcare and tax consequences. Students will be asked to prepare legal documents and will complete a major drafting project. The course seeks to provide students with skills and knowledge to meet the needs of this unique client base.

LAW 956. Local Government Law. 2-3 Credits.
The structure, functions, and jurisdictions of local governmental units; intergovernmental arrangements and relationships, financing and staffing local government; tort liability of local governments.

LAW 953. Marginalized Bodies in Literature, Medicine and the Law. 2-3 Credits.
In this course, we will use literature from several different time periods and sociocultural groups to interrogate how and why diseases might disproportionately impact the lives of those who live on the "margins" of U.S. society: people of color, immigrants, the poor, working-class folks, members of LGBTQ+ communities. Writing by authors from a range of genres-science fiction, the history of medicine, memoir, poetry, the personal essay, and the law-will be analyzed from interdisciplinary perspectives to see how each piece speaks to themes and concerns of health and healthcare, such as varying definitions of "illness" and its treatment (best and worst) practices for physicians and other healthcare workers, possible tensions between spirituality and science, how disparities like employment opportunities, educational access, housing standards, geographical region, cultural and linguistic bias, and sexism (among others) can affect access to adequate care-both physical and mental. Historical legal principles are still at work in the present, and so all of these data points relate to how we understand the impacts of law and policy on the well-being of marginalized populations.

LAW 805. Mass Incarceration. 2-3 Credits.
Approximately 2.2 million adults are incarcerated the United States. More are on some type of penal supervision. This population is the largest penal population in the world. The National Academy of Science has concluded that "[t]he growth in incarceration rates in the United States over the past 40 years is historically unprecedented and internationally unique. This seminar will explore how the United States got here, what the consequences of mass incarceration are, and how we should respond to and remedy this "historically unprecedented" level of incarceration.

LAW 958. Media and the First Amendment. 3 Credits.
The study of the First Amendment freedoms of speech and press. The focus is on both traditional media, such as newspapers and broadcast
radio and television, and digital media, including blogs, that rely on the Internet to distribute news, opinion, entertainment, and advertising.

**LAW 800. Mediation and Negotiation Workshop. 4 Credits.**
The Mediation and Negotiation Workshop will immerse students in mediation theory, practice, techniques, and ethics while allowing the students to mediate live cases with actual clients. In addition, students may have the opportunity to work directly with ambassadors at the United Nations, foreign governmental officials, other transnational organizations, and American Indian tribal leaders on mediation practice and systems design. This workshop has several goals: 1) to give students the opportunity to improve their ability to represent clients by helping them practice skills that are important to effective problem solving and wise lawyering; 2) to give those students who may make mediation part of their professional lives a head start in terms of both skills and ethics; 3) to help students see the benefits and limitations of mediation and other dispute resolution techniques so that they can responsibly counsel clients about their choices; 4) to help students understand how feelings, background values and personal style affect performance in a professional role; and 5) to provide quality assistance to parties whose disputes the clinic mediates. Students taking the Mediation and Negotiation Workshop will receive four (4) graded credits and must be concurrently enrolled in the Mediation Skills Intensive.

**LAW 801. Mediation Skills Intensive. 2 Credits.**
The Mediation Skills is an intensive, two-week skills training experiential course. This course will introduce students to core skills in mediation practice, mediation techniques, and mediation ethics while engaging students in discrete skills exercises and simulated role plays. This course has several goals: 1) to give students the skills to be effective mediators; 2) to give students a theoretical and practical foundation to be good advocates for their clients in mediation; 3) to give students adequate practice to hone their mediation skills; 4) to help students see the benefits and limitations of mediation and other dispute resolution techniques so that they can responsibly counsel clients about their choices; and, 5) to help students understand the differences between the professional standards of practice and ethics for attorneys and mediators. Students taking the Mediation Skills Intensive will receive two (2) ungraded credits. First priority for enrollment is given to students accepted into the Mediation and Negotiation Workshop. Additional students may enroll with special permission of the professor based on availability space.

**LAW 947. Mergers and Acquisitions. 2-3 Credits.**
An examination of the substantive law of corporate mergers and acquisitions. Coverage includes structure of the transaction; the buyer’s due diligence process; hostile takeover defenses and the responsibilities of the target’s board; state takeover legislation and issues of federal preemption; friendly acquisitions and the seller board’s duties; conflicts between majority and minority shareholders; and federal regulation of tender offers via the Williams Act. Prerequisite: Business Organizations.

**LAW 949. Mock Trial Competition. 1 Credits.**
This course covers the skills necessary to compete in Mock Trial Competitions. Members of the class will learn to analyze a case file, present pre-trial motions, opening statements, and closing arguments, conduct direct and cross-examinations, and introduce evidence. Students from this class will be competitively selected to compete in national mock trial competitions. Graded on a Credit/No Credit basis.

**LAW 962. Mock Trial Council. 1-3 Credits.**
The Mock Trial Council consists of third-year students who successfully completed Mock Trial Competition in their second year. These students help administer the selection process for the mock trial competition under the supervision of a faculty member responsible for the mock trial competitions and course. The council also assists in identifying competitions and with tasks associated with participation in regional and national mock trial competitions and with preparing our competition teams to compete. Graded on a credit/no credit basis. Prerequisite: LAW 949.

**LAW 960. Moot Court Competition. 1 Credits.**
Spring semester. A traditional moot court competition based upon an appeal to the United States Supreme Court with written briefs and oral argument rounds. The competition is conducted as a tournament, with elimination rounds and seeding of teams of pairings after the preliminary rounds. Students compete as two-person teams with two teams advancing to the final round. The competition is limited to second-year students and is usually completed by Mid-April. Graded on a credit/no credit basis. Prerequisite: Second-year status.

**LAW 961. Moot Court Council. 1 Credits.**
Spring semester. The Moot Court Council consists of third-year students who represent KU in various national and international moot court competitions. All students are selected through the Shook Hardy & Bacon Advocates program or through the KU spring in-house Moot Court Competition (LAW 960). The council administers the KU spring in-house moot court competition under the supervision of the faculty member responsible for the course. The council also assists with tasks associated with participation in the various national and international competitions as assigned by the faculty member responsible for the course. Graded on a credit/no credit basis.

**LAW 964. National/International Moot Court Competitions: 1-2 Credits.**
Students compete in various national and international moot court competitions (except the Jessup International Moot Court Competition, LAW 929.) All students are selected through the Shook Hardy & Bacon Advocates program or through the KU spring in-house Moot Court Competition (LAW 960.) Teams will write a brief and participate in practice oral arguments as required by the faculty member responsible for their particular competition, including at least three arguments judged by law faculty, practicing lawyers, or judges. Students travel to regional, national, and international competitions as applicable. Competitions include: Bankruptcy Law Moot Court, Criminal Law Moot Court, Criminal Procedure Moot Court, European Law Students Association International Trade Moot Court, Environmental Law Moot Court, First Amendment Moot Court, National Moot Court, and Stetson International Environmental Moot Court and Health Law Moot Court. Students also must enroll in the Moot Court Council, LAW 961. Graded on a credit/no credit basis.

**LAW 965. Nonprofit and Tax-Exempt Organizations. 1-2 Credits.**
Focuses on the legal issues affecting nonprofit and tax-exempt organizations, with primary emphasis on state nonprofit corporation codes and the Internal Revenue Code. Issues covered include allocation of governance responsibility between members and directors, the role of states attorneys general, charitable trust law, obtaining and maintaining tax exemption, private inurement and private benefits, intermediate sanctions, reporting and disclosure requirements, and consequences of unrelated business income. Prerequisite: Business Organizations and Federal Income Taxation.

**LAW 966. Oil and Gas. 2-3 Credits.**
The oil and gas lease; expressed and implied duties under a lease; the Federal Income Taxation. unrelated business income. Prerequisite: Business Organizations and the Internal Revenue Code. Issues covered include allocation of governance responsibility between members and directors, the role of states attorneys general, charitable trust law, obtaining and maintaining tax exemption, private inurement and private benefit, intermediate sanctions, reporting and disclosure requirements, and consequences of unrelated business income. Prerequisite: Business Organizations and Federal Income Taxation.

**LAW 977. Patent Law. 3-4 Credits.**
This class explores the doctrine, policy and practice of patent law in the United States. It examines the challenges posed to patent law by new technologies, such as biotechnology, pharmaceuticals, the Internet and nanotechnology. Patent law systems in other countries and the role of
international patent treaties are also considered. Prerequisite: Intellectual Property Law.

LAW 979. Patent Practice. 3 Credits.
This course focuses on the practical application of patent law principles to the practice of patent law, including: assessing patentability, preparing and prosecuting patent applications, and analyzing infringement concepts. Students will examine patent statutes and United States Patent and Trademark rules and guidelines governing patent prosecution, as well as court decisions impacting and interpreting patents. The course will involve in-class and take-home assignments and workshops designed to expose students to situations encountered in actual patent practice, including the preparation of patent applications and substantive, and ethics that are critical to student participation in LAW 895, Project for Innocence and Post-Conviction Remedies. A corequisite with LAW 895 and enrollment is limited to students concurrently enrolled in that course.

LAW 974. Public International Law. 3 Credits.
A general survey of the legal system governing the behavior of states and public international organizations. Includes the nature and sources of international law and the role of international law and procedures in the maintenance of world peace and security, the protection of human rights, the management of the environment, and the regulation of international economic relations.

LAW 976. Public Policy Practicum. 3 Credits.
The Public Policy Practicum undertakes in-depth, balanced policy studies in response to requests from public officials. Individual students, or teams of students, supervised by the clinic director, prepare the research reports. Designed to give students practical experience in applying analytical policy methods to public policy issues.

LAW 970. Pretrial Advocacy. 3 Credits.
This skills course is designed to teach the fundamentals of pretrial practice from the client's first visit to the day before trial begins. Students will learn to interview and counsel clients, consider alternatives to litigation, draft pleadings, conduct and respond to discovery, and negotiate and draft settlement documents.

LAW 885. Privacy Law. 3 Credits.
This course tracks the origins and development of privacy in American law through the examination and analyses of constitutional law, tort law, and some statutory law. We will consider the social impact of emerging technology and social media.

LAW 971. Product Liability. 2-3 Credits.
Intensive study of legal developments and problems relating to compensation for injuries resulting from defective products.

LAW 972. Professional Responsibility. 2-3 Credits.
Fall and spring semesters. Must be completed by the time the student finishes 60 hours of law school. Considers some of the history of the profession, training for the practice, the lawyer in the office, the lawyer and the public, the lawyer as lawmaker, limitations on personal conduct, the lawyer as judge, the canons of professional ethics, and many other incidents to the practice. Required course.

LAW 895. Project for Innocence and Post-Conviction Remedies. 3 Credits.
Provide assistance to the inmates incarcerated at the federal and state facilities in Kansas. Representation includes direct appeals, post-conviction and DNA litigation. Students interview clients, conduct fact investigation, determine the scope of representation and write court briefs. Students who satisfy Kansas Supreme Court Rule 719 may participate in court hearings. Students must enroll for the academic year, for 3 credits per semester. Concurrent enrollment in LAW 896 is required. Prerequisite: Corequisite: Criminal Procedure.

LAW 896. Project for Innocence and Post-Conviction Remedies Class. 1 Credit.
Designed to acquaint students with the issues surrounding the professional skills, substance, and ethics that are critical to student participation in LAW 895, Project for Innocence and Post-Conviction Remedies. A corequisite with LAW 895 and enrollment is limited to students concurrently enrolled in that course.
credit hour for each 42.5 hours of work. Students will also be required to complete written work. This written work is comprised of a goal-setting memo, weekly journal entries, and a final reflection paper. Students are also required to participate in monthly full-day programming sessions. These programming sessions will include meetings with practitioners to learn about practice in D.C. and substantive areas of law that are commonly practiced there. There will be no co- or prerequisites for this field placement. Finally, students are expected to take advantage of a mentoring program and planned opportunities to meet KU Law alumni set up by the KU Law School.

LAW 846. Sixth Semester Capstone. 1 Credits.
This course is part of the Sixth Semester in Washington, DC Program. It contains in-depth lectures, readings, and discussions on several areas of substantive law and surrounding issues important to practice in Washington, DC, including recent developments, policy implications, and controversies.

LAW 994. Special Topics: ___. 1-4 Credits.
The content of this course varies, and will be announced prior to pre-enrollment. May be repeated if there is no duplication of subject matter.

LAW 897. State Constitutional Law. 3 Credits.
All 50 states have their own constitutions and cases interpreting those charters. State constitutions sometimes mirror or duplicate federal constitutional provisions, but state constitutions also contain provisions not found in the U.S. constitution. In our federal system, both federal and state constitution law are important and vibrant. This course explores the similarities and the differences in federal and state constitutional law. Coverage includes structural aspects of state constitutional law (dual sovereignty, interpreting state constitutions independently of the federal constitution, the organization of state government., restrictions unique to the state constitutions, and the amendment process, as well as individual rights under state constitutions (equality, due process, criminal procedure, property, religion education, "right to a remedy"/"open courts", and privacy). Prerequisite: Introduction to Constitutional Law.

LAW 996. Trusts and Estates. 3-4 Credits.
A study of the effect of the federal income tax on corporations, partnerships, and limited liability companies, as well as their owners. Includes coverage of federal income tax provisions having especially important effects on business activities in general. Prerequisite: Federal Income Taxation and Business Organizations.

LAW 908 Evidence (co-requisite)
A skills course designed to teach the fundamentals of trial practice including opening and closing statements, direct and cross examination, use of demonstrative evidence, introducing exhibits, making evidentiary objections, and courtroom procedure and decorum. Combines skills workshops, lecture/demonstrations, and a mock trial. Prerequisite: LAW 908 Evidence (co-requisite)

LAW 992. Trial Advocacy. 3 Credits.
A skills course designed to teach the fundamentals of trial practice including opening and closing statements, direct and cross examination, use of demonstrative evidence, introducing exhibits, making evidentiary objections, and courtroom procedure and decorum. Combines skills workshops, lecture/demonstrations, and a mock trial. Prerequisite: LAW 908 Evidence (co-requisite)

LAW 998. Tribal Judicial Support Clinic. 3 Credits.
Students are assigned research projects from participating tribal courts as arranged by the instructor. Students provide research assistance to tribal court personnel in an array of projects that range from tribal code development, legal research and drafting of legal memoranda and judicial orders. Prerequisite: Federal Indian Law.

LAW 995. Water Law. 2-3 Credits.
A study of water rights including the riparian and prior appropriation doctrines for surface water, and the various doctrines for groundwater. Private and public water distribution organizations, and special water districts. Water pollution control. Interstate conflicts over water resources. Federal government involvement in water distribution including federal powers and programs. Indian and reserved rights. Kansas water law.

LAW 848. Writing for Law Practice. 2 Credits.
This course provides an opportunity for upper-level students to practice legal writing skills. It focuses on writing for law practice. Students will draft and revise several documents; engage in editing, workshopping and peer critique; and receive intensive feedback from the instructor. By the end of the course, students will have the beginnings of a document portfolio to take with them into their first years of law practice. Prerequisite: Lawyering Skills I and Lawyering Skills 2.

M.S. in Homeland Security Courses

**LAW 849. Cybercrimes. 2-3 Credits.**

Cyber threats are a global problem challenging all areas of business. Attorneys must be able to advise and defend clients from these threats. Similarly, all criminal lawyers must be fluent in how new technologies work and how they impact investigations. In this course, students will learn how these new cyber threats and emerging technologies are challenging attorneys across the country, no matter what area of law they focus upon. The course will prepare students to think about these threats—whether as consumers or users of these exciting new technologies—but as lawyers confronting the impact of these new devices or services. Course topics will include computer hacking, spear phishing, Internet fraud and social engineering, cyberstalking, and the rising use of computers, mobile devices, and social media in violent crimes. This course will cover methods of investigation of computer crimes, such as the Stored Communications Act (Grand Jury subpoenas, court orders, search warrants), the Pen Register Statute and Wiretap Act (real-time collection of information), as well as current litigation topics like encryption, non-disclosure orders, and privacy. We will also cover the important new Supreme Court cases in this area, Riley v. California and Carpenter v. United States.

**LAW 861. Domestic Aspects of Homeland Security. 3 Credits.**

In this course students will read and discuss materials that provide a basic introduction to the legal, governmental, and policy issues that confront those with responsibility for ensuring the safety of the American homeland. We will be covering American statutes, case law, Presidential executive orders, and other legal sources that regulate issues such as cybersecurity, management of natural disasters, failures in utility networks and other vital domestic infrastructure, etc. Students will be required to take both a midterm and final examination. In order for a J.D. student to take this course, they need prior approval from the Assistant Dean to enroll. The grade they receive in this coursework will not count toward their cumulative GPA, though the credits will count toward their J.D. This course will count toward the 6 credits of external graduate level coursework allowable under law school policy.

**LAW 994. Special Topics: _____, 1-4 Credits.**

The content of this course varies, and will be announced prior to pre-enrollment. May be repeated if there is no duplication of subject material.

**Juris Doctor Program**

**Law Programs**

**The First-Year Curriculum**

First-year students take courses that ensure they are well grounded in the subject matter that lies at the heart of the Anglo-American legal tradition and that provide a foundation for upper-level classes and for the practice of law. Two aspects of the first-year curriculum—the lawyering course and the small-section program—contribute immeasurably to the process of learning the law at KU.

The Lawyering Skills course focuses on the skills and values of the profession. Taught by faculty members with extensive practice experience who meet with students in both a traditional classroom setting and small groups, the course introduces students to the tools all lawyers use and helps bring students to an understanding of the legal system and legal institutions, case law and statutes, legal research and writing, and advocacy.

All first-year students take one of their other required courses in a small section of approximately 20-25 students. These classes provide an informal learning atmosphere and encourage in-depth discussions and critical analysis.

**Upper-Level Courses**

A wide variety of courses are available to upper-level students, covering a broad range of practice areas from environmental law to international trade law. Many are seminars, simulation courses, or clinics. For curriculum guides to Business and Commercial Law; Civil Litigation; Constitutional Law; Criminal Law; Environmental, Energy and Natural Resources Law; General Practice; Intellectual Property Law; International and Comparative Law; Litigation; Media, Law, and Technology; Public
Law; Tax Law; and Tribal Law, visit the Areas of Study (https://law.ku.edu/academics/areas/) section of the law school’s website.

Within the context of their particular interests and career goals, the law school strongly encourages students to consider certain principles when selecting upper-class courses.

- First, students should develop core knowledge and essential skills during the second year by taking menu-required courses to lay the foundations for taking advanced courses in the third year.
- Second, given the importance of statutory law and regulatory systems to the modern legal system, students should take courses that focus on complex codes (including statutes, treaties or regulations) and familiarize them with administrative and regulatory systems, also preferably during the second year.
- Third, to provide perspective on the legal system and to be prepared to practice in the modern global environment, before graduation students should take at least one class that concerns a legal system other than the federal or state system in the United States.

To implement these principles, the law school encourages students to talk individually with their faculty advisors about particular courses.

**Clinics and Field Placements**

The KU law school was a pioneer in clinical legal education and today offers many clinics and field placements that expose students to the tasks and challenges faced by lawyers in practice. All law students have a chance to participate in at least one of the school’s experiential learning programs. Acting under faculty supervision, students learn substantive law, develop legal skills and learn professional values in actual practice settings.

- The Criminal Prosecution Field Placement Program gives students an opportunity to work with prosecutors in Kansas state district attorneys’ offices as well as the office of the U.S. Attorney. They participate in nearly all phases of the criminal process, including trial work.
- In the Elder Law Field Placement Program, students work under the supervision of attorneys from Kansas Legal Services. Students assist seniors with a variety of legal issues, including income maintenance, access to health care, housing and consumer protection.
- The Field Placement Program provides students an opportunity to perform legal work under the supervision of a practicing attorney at approved governmental agencies, as well as nonprofit legal services organizations and nonprofit public national and international organizations.
- Students in the Judicial Field Placement Program serve as interns for state and federal trial judges. Under the supervision of a judge, law clerk or staff attorney, interns perform research, draft documents and observe courtroom proceedings to expand their knowledge of how our court systems operate.
- Students in the Legal Aid Clinic represent low-income clients under the careful guidance and thoughtful teaching of supervising attorneys. The clinic’s caseload is divided into four general areas: a criminal practice for juveniles charged with crimes in Douglas County District Court; a criminal practice for adults charged with crimes and municipal violations in Lawrence Municipal Court; a civil practice to provide legal assistance for individuals seeking name and gender marker changes through the Douglas County District Court; and a civil practice that may focus on school discipline, mental health, race and educational equity, and other emerging matters.
- In the Medical-Legal Partnership Field Placement Program, the School of Law collaborates with two separate health systems — The University of Kansas Health System at KU Medical Center in Kansas City, and LMH Health in Lawrence. Cases may include health law, family law, housing law, elder law, public benefits law, disability law, and immigration law. Students enroll through the Field Placement Program.
- In the Paul E. Wilson Project for Innocence and Post-Conviction Remedies, students counsel and represent state and federal prisoners in appellate and post-conviction litigation in state and federal courts.
- In the Tribal Judicial Support Clinic, students provide research assistance in an array of projects ranging from tribal code development to drafting memoranda and orders.

**International Study**

The law school sponsors several study abroad (https://law.ku.edu/academics/global-programs/study-abroad/) programs for its students. They include:

1. A summer program in Limerick and Dublin, Ireland, in collaboration with the University of Limerick; and
2. A summer program in Istanbul, Turkey, in collaboration with Bahcesehir University.

All have been approved by the American Bar Association. In addition, KU history and law faculty members collaborate to sponsor a summer program in Cambridge, England, focusing on legal history. This program is open to undergraduates and to entering law students before they begin their studies in the fall term of their first year. KU law students also may choose from numerous other ABA-approved summer study abroad programs.

**Accelerated Program**

The School of Law offers a summer program (https://law.ku.edu/admissions/summer-start/) that is fully integrated with the curriculum of the fall and spring semesters. First-year students may begin their studies in either the summer session or the fall semester. Students beginning law studies in the summer session may, but are not required to, complete their law degrees in 27 months by being enrolled continuously in two academic years and three contiguous summer sessions. About 20-25 students in each year’s entering class begin their studies in the summer.

The summer program consists of two consecutive, five-week sessions that begin in mid-May and conclude at the end of July. Each course offered during the summer meets approximately 80 minutes a day, five days a week.

A first-year student takes two required first-year courses in each session. At the end of the second session, the student has accumulated 8 of the 90 hours required for graduation.

In addition to first-year courses, several upper-level courses usually are offered in the summer. There are opportunities to participate in Legal Aid Clinic, Project for Innocence and Post-Conviction Remedies, Field Placement Program, and Judicial Field Placement Program during both summer sessions. Almost all summer session courses (including the clinics) carry 2 to 2.5 credit hours a session. Upper-level students may
take two courses each session. Enrollment in more than 10 hours must be approved by the associate dean for academic and student affairs.

Certificates

Certificate Programs

The law school offers eight certificate programs (https://law.ku.edu/academics/certificates/):

1. Advocacy Skills
2. Business and Commercial Law
3. Environmental and Natural Resources Law
4. International Trade and Finance
5. Media, Law, and Technology
6. Social Justice
7. Tax Law
8. Tribal Lawyer

Each allows students to focus on an area of law and develop expertise in it. The requirements for each program are in the Certificates (https://law.ku.edu/academics/certificates/) section of the law school’s website. During their first year of law school, students should notify the associate dean for academic and student affairs of their intention to meet certificate requirements.

Advocacy Skills Certificate

Effective advocacy requires a solid grounding in all aspects of litigation — planning the lawsuit, pretrial practices and procedures, trial advocacy, and post-trial matters — and in alternative forms of dispute resolution. This certificate program provides the means for students to develop basic knowledge and skills in effective advocacy.

Business and Commercial Law Certificate

The certificate program in business and commercial law is a response to the longstanding demand for attorneys with expertise in the field. Completion of the certificate requirements allows a student to develop the knowledge and skills needed to begin a successful career as a business lawyer. A student who obtains the certificate receives a solid grounding in the basic principles of business and commercial law and is familiar with many of the transactions that business and commercial lawyers commonly encounter in practice.

Environment, Energy and Natural Resources Law Certificate

The Environment, Energy and Natural Resources Law Certificate exposes students to the basics of a constantly changing area of practice. At the end of the program, students can address environmental and natural resources law issues wherever they arise.

International Trade and Finance Certificate

The International Trade and Finance Certificate permits KU Law students to specialize their studies in the areas of international trade, international business and international finance, and to obtain a certificate reflecting that specialization.

Media, Law, and Technology Certificate

The Media, Law and Technology Certificate focuses on legislative challenges, judicial decision-making and administrative policy in an era increasingly shaped by information technology, global networks and the media. The certificate program gives students an opportunity to advance their knowledge and skill in the diverse legal subjects that are of concern in media law practice. Through the certificate program, students also have an opportunity to study how both traditional and new media affect the relationship between law and society. The program’s requirements include completion of the First Amendment Advocacy simulation course or an approved alternate.

Social Justice Certificate

Social justice lawyers give voice in the legal system to underrepresented clients and causes. The Social Justice Certificate is ideal for students interested in societal inequality and power differentials, particularly as these relate to class and economics, identity and rights, and the political process. The certificate program allows students to deepen their knowledge and expand expertise in areas that intersect with social justice and prepares students for a career that aligns with their values. Hands-on work is an important component of the certificate program.

Tax Law Certificate

Demand for attorneys with expertise in the tax field continues to grow. Completion of the tax law certificate requirements allows students to develop the practical and technical skills needed to build successful careers. Certification also assures employers that the student not only has a mastery of basic principles of individual and entity taxation but also is familiar with many of the intricacies of tax law and practice. One of the program's requirements is a minimum of 20 hours of participation in an Internal Revenue Service-sponsored Volunteer Income Tax Assistance program or a similar nonprofit tax assistance program.

Tribal Lawyer Certificate

Effectively representing Indian nations and tribes requires an understanding of the extremely complicated body of federal, state, and tribal law that affects every aspect of indigenous societies. The Tribal Lawyer Certificate program ensures that law students who plan careers representing indigenous nations have the skills necessary to appreciate and strengthen the unique nature of tribal legal systems and governments. Among the program’s requirements is an internship with a tribal legal department or a private or public interest law firm specializing in Indian law or participation in the Tribal Judicial Support Clinic.

Joint Degree Programs

The law school offers 11 joint degree (https://law.ku.edu/academics/degrees/joint-degrees/) programs:

1. Business
2. East Asian Languages and Cultures
3. Economics
4. Health Services Administration
5. Indigenous Studies
6. Journalism
7. Philosophy
8. Political Science
9. Public Administration
10. Social Welfare
11. Urban Planning

These programs permit a student to receive a master’s degree and a Juris Doctor degree in less time than it would take if the programs were
pursued separately. In all cases, a student must be admitted separately to the law school and the other school or department. In the case of the joint law and business program, an applicant must take the Graduate Management Admission Test as well as the Law School Admission Test.

The Juris Doctor is awarded concurrently after completion of the joint degree program requirements for each of the joint degree programs. The academic affairs committee will grant exceptions to the concurrent-graduation requirement only for exigent circumstances. Higher likelihood of bar exam success is not an exigent circumstance. All ad-hoc joint degree programs are subject to the concurrent-graduation requirement. This includes joint Ph.D. programs. Ad-hoc joint degrees are defined as any dual degree program in which the student is credited toward their J.D. for more than 6 credit hours earned in a companion graduate degree.

For more information on the joint degree programs and the requirements for each program, see the Joint Degrees (https://law.ku.edu/academics/degrees/joint-degrees/) section of the law school’s website.

J.D. Degree Requirements

The degree Juris Doctor (J.D.) is conferred on candidates who have

- Completed a minimum of 90 credit hours;
- Achieved a minimum cumulative grade-point average of 2.0 (C);
- Taken and completed all required courses;
- Satisfied the “in residence” requirement;
- Satisfied the writing-intensive course requirements;
- Satisfied the experiential course requirements; and
- Completed all requirements within 5 years of initial enrollment (see Withdrawal and Readmission Following Withdrawal (p. 718) in the Regulations section of the law school’s website).

Credit-Hour Requirement

Each student must complete a minimum of 90 credit hours. Course work in areas other than law is subject to the limitation described under Course Work Outside the School of Law, below.

Grade-Point Average Requirement

During the semester in which the student attains 90 credit hours, he or she must have achieved a minimum cumulative grade-point average of 2.0 (C) in all law school work. Grades for courses taken in areas other than law are not computed in the School of Law cumulative grade-point average.

Required Courses

To qualify for the J.D. degree, a student must have completed satisfactorily the following:

- All first-year courses listed below
- Professional Responsibility

Professional Responsibility must be completed by the time the student finishes 60 hours of law school credit.

Upper-level required courses should be taken in the second year of law school. Waiting to take these courses until the third year may cause class conflicts between these required courses and courses traditionally taken by third-year law students.

First-Year Courses

</tr>
</tbody>
</table>

“In Residence” Requirement

The 90 credit hours required for the J.D. degree must be earned during a course of study in residence at the School of Law extending over a period of not less than 24 months. For more details, see Maximum and Minimum Load in the Regulations section.

Upper-Level Writing-Intensive Course Requirements

Each student must satisfy the Professional Writing-Intensive course requirement by successfully completing at least 2 professional writing courses that require students to submit a written work product directed to the lawyer’s professional role. Such writing includes, but is not limited to, document drafting, written advocacy, correspondence, memoranda, judicial and quasi-judicial opinions, legislation, regulations, and policy analyses.

Each student must satisfy the third required writing course by either taking a third professional writing-intensive course, or by meeting the Scholarly Writing-Intensive course requirement by successfully completing a course that satisfies the Scholarly requirement.

All written work must be of at least C quality.

Experiential Skills Requirements

Each student must satisfy the experiential course requirement by successfully completing courses totaling at least 6 credit hours from a list of courses identified by the Academic Committee as experiential.

To satisfy the experiential skills requirement, the student must obtain a grade of C or better in graded courses and a grade of CR in courses graded Credit/No Credit.

The law school website includes a list of all the courses that satisfy the experiential skills requirement (http://law.ku.edu/requiredcourses/).

Course Work Outside the School of Law

A student who is not enrolled in a joint degree program may take up to 6 hours of graduate-level courses outside the School of Law for credit toward a law degree, provided the associate dean for academic affairs approves the course work in advance as relevant to the student’s education as a lawyer. A student seeking credit toward a law degree for more than 6 hours of courses outside the School of Law must petition the
academic affairs committee for approval. In such instances, the entire group of courses from outside the School of Law must be relevant to the student’s education as a lawyer. A student must receive a grade of B or better to receive J.D. credit for any such graduate-level nonlaw courses. However, grades for such courses are not computed in the School of Law cumulative grade-point average.

A student in good standing may, with the advance approval of the associate dean for academic affairs, take law courses at another law school accredited by the American Bar Association. If the student successfully completes such courses, not more than 30 credit hours will be transferred and counted toward the 90 credit hours required for the J.D. Time spent at another institution will count as study in residence for the purpose of the “in residence” requirement, but grades in courses taken at the other institution will not be computed in the KU law school cumulative grade-point average.

A student at another law school accredited by the American Bar Association may apply for admission with advanced standing. If admitted, such a student may transfer not more than 30 credit hours of law course work completed successfully at the other law school toward the 90 credit hours required for the J.D. degree. Grades for course work completed at the other law school are not computed in the KU law school cumulative grade-point average.

For purposes of the two preceding paragraphs, a grade of C (or equivalent) or better is necessary in each course for which transfer credit is sought. In no event may a student count more than 30 credit hours earned at other law schools toward the 90 hours required for the J.D. degree.

Advocacy Skills Certificate

Students who want to hone their skills in trial settings can earn the Advocacy Skills Certificate. By completing the certificate requirements, students gain a solid grounding in all aspects of litigation, while gaining hands-on experience through a related clinic or field placement.

Effective advocacy requires a solid grounding in all aspects of litigation — planning the lawsuit, pretrial practices and procedures, trial advocacy, and post-trial matters — and in alternative forms of dispute resolution. This certificate program provides the means for students to develop basic knowledge and skills in effective advocacy.

Business and Commercial Law Certificate

The Business and Commercial Law Certificate is a response to the longstanding demand for attorneys with expertise in the field. Completion of the certificate requirements allows a student to develop the knowledge and skills needed to begin a successful career as a business lawyer.

A student who obtains the certificate receives a solid grounding in the basic principles of business and commercial law and is familiar with many of the transactions that business and commercial lawyers commonly encounter in practice.

The certificate program in business and commercial law is a response to the longstanding demand for attorneys with expertise in the field. Completion of the certificate requirements allows a student to develop the knowledge and skills needed to begin a successful career as a business lawyer. A student who obtains the certificate receives a solid grounding in the basic principles of business and commercial law and is familiar with many of the transactions that business and commercial lawyers commonly encounter in practice.

Courses available to students include Business Associations, Commercial Law, Bankruptcy, Securities Regulation, Taxation of Business Enterprises, and Real Estate Finance. Required Course:

<table>

</tbody>
</table>

A student must have a cumulative grade point average of at least 3.0 in the courses that count toward the certificate.

*If Independent Research is selected, it must be for 2 credits; the topic must be certified in advance by the director of the certificate program as involving advanced study of business or commercial law; and the resulting paper must satisfy the standards of the upper-level writing requirement.

**Environment, Energy, and Natural Resources Law Certificate**

The Environment, Energy, and Natural Resources Law Certificate exposes students to the basics of a constantly changing area of practice. At the end of the program, students can address environmental and natural resources law issues wherever they arise.

Since the inception of modern environmental and natural resources law in the late 1960s and 1970s, the field has become increasingly important, both in its own right and as a result of the frequency with which environmental and natural resources law issues intrude into other, more traditional fields of practice such as real estate, insurance, and corporate law. The Environmental and Natural Resources Law Certificate introduces students to the basics of this constantly changing area of practice so that they become competent to address environmental and natural resources law issues in whatever contexts they arise.

Required Courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAW 850</td>
<td>Administrative Law</td>
<td>3</td>
</tr>
<tr>
<td>LAW 905</td>
<td>Environmental Law</td>
<td>3</td>
</tr>
</tbody>
</table>

One of the following field placement or writing experiences on an environmental, energy, or natural resources law topic approved by certificate director:

- Field Placement focused on environmental, energy, or natural resources law, such as with the U.S. EPA, Kansas Department of Health and Environment, a nonprofit organization, or other appropriate agency or organization.
- Kansas Law Review or Kansas Journal of Law & Public Policy (with a note or comment on an environmental, energy, or natural resources law topic).
- Preparation of a 2-credit Independent Research paper on an environmental, energy or natural resources law topic.
- National Environmental Moot Court Competition or other moot competition, or other moot court competition focused on environmental, energy or natural resources law approved by the certificate director.

Four electives in the subject area. Choose all four from among the following electives, or combine three from this list with one from the secondary list below:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAW 963</td>
<td>Energy Law and Policy</td>
<td>3</td>

</tr>
</tbody>
</table>

**International Trade and Finance Certificate**

The International Trade and Finance Certificate permits KU Law students to specialize their studies in the areas of international trade, international business and international finance, and to obtain a certificate reflecting that specialization.

The International Trade and Finance Certificate is designed to serve the following purposes:

1. to assist KU Law students in preparing for the increasingly global practice of law, and in particular to emphasize the business nature of that practice; and
2. to give KU Law graduates a competitive advantage in the employment market.

Legal practice is global in character. As part of its International and Comparative Law Program, the law school provides students an opportunity to undertake special preparation for such practice-and in particular to study the business nature of that practice by earning a Certificate in International Trade and Finance.

### Required Courses:

</tr>
</tbody>
</table>

### Any other course focusing on a comparative dimension of a field of law, including Comparative Constitutional Law, Tax Law or the legal system of another country, region, culture or religion with permission of the director. Courses from ABA approved summer programs can be submitted for approval.

### Media, Law, and Technology Certificate

The Media, Law and Technology Certificate focuses on legislative challenges, judicial decision-making and administrative policy in an era increasingly shaped by information technology, global networks and the media.

The certificate program gives students an opportunity to advance their knowledge and skill in the diverse legal subjects that are of concern in media law practice. Through the certificate program, students also have an opportunity to study how both traditional and new media affect the relationship between law and society.

In news, advertising, film, literature and other forms of expression, the media have illuminated or scrutinized the work of lawyers, judges and legislators. By completing certificate requirements, students gain insight into media effects on legal practice, the judicial process, legislation, public policy, governmental affairs, and business and commerce.

Private enterprise and governmental institutions increasingly depend on, and are affected by, communications media. As a result, legal representation in both the private and public sectors is enhanced by an understanding of media influence on the development and administration of law and public policy. The Media, Law, and Technology Certificate focuses on legislative challenges, judicial decision-making, and administrative policy in an era increasingly shaped by information technologies, global networks, and the media. The program’s requirements include completion of the First Amendment Advocacy simulation course or an approved alternate.

### Required Courses:

### Interest Area Courses- two of the following:
Social Justice Certificate

Social justice lawyers give voice in the legal system to underrepresented clients and causes. The Social Justice Certificate is ideal for students interested in societal inequality and power differentials, particularly as these relate to class and economics, identity and rights, and the political process.

The certificate program allows students to deepen their knowledge and expand expertise in areas that intersect with social justice and prepares students for a career that aligns with their values. Hands-on work is an important component of the certificate program.

Experiential Component: Every student in the concentration must complete one of the following experiential courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>

A second course meeting the criteria for the experiential component requirement, as approved by the certificate director.

Any additional courses as approved by the certificate director.

Tax Law Certificate

The Tax Law Certificate is a response to the growing demand for attorneys with expertise in the tax field. Completion of the certificate requirements allows students to develop the practical and technical skills needed to build successful careers.

Certification also assures employers that the student not only has a mastery of basic principles of individual and entity taxation but has been exposed to some of the finer points of tax law and practice.

Demand for attorneys with expertise in the tax field continues to grow. Completion of the tax law certificate requirements allows students to develop the practical and technical skills needed to build successful careers. Certification also assures employers that the student not only has a mastery of basic principles of individual and entity taxation but also is familiar with many of the intricacies of tax law and practice. One of the program’s requirements is a minimum of 20 hours of participation in an Internal Revenue Service-sponsored Voluntary Income Tax Assistance program or a similar nonprofit tax assistance program.

Required Courses:

A minimum of 20 hours of participation in:
An Internal Revenue Service-sponsored Voluntary Income Tax Assistance (VITA) program or a similar nonprofit tax assistance program.

Tribal Lawyer Certificate

The Tribal Lawyer Certificate program is designed to ensure that law students aspiring to a career representing Indian nations have the skills necessary to appreciate and strengthen the unique nature of Indigenous tribal legal systems.

Effectively representing Indian nations and tribes requires an understanding of the laws, history and policies that affect them. For more than 200 years, the United States has pursued conflicting policies for dealing with the Indigenous peoples located within its borders. As a result, there exists an extremely complicated body of federal, state and tribal law that affects every aspect of Indigenous life.
The complexity of "Indian law," and the lack of specific programs designed to educate graduates as to the unique legal and cultural needs of Indian people, has created a situation in which lawyers representing Indian tribes place too great an emphasis on state law and federal law when dealing with Indian nations. As a result, these lawyers may unconsciously be contributing to the weakening of unique tribal legal and governance traditions by recommending the adoption of tribal laws and policies founded upon the Anglo-American legal and political traditions rather than the unique traditions of their tribal clients.

Effectively representing Indian nations and tribes requires an understanding of the extremely complicated body of federal, state, and tribal law that affects every aspect of indigenous societies. The Tribal Lawyer Certificate program ensures that law students who plan careers representing indigenous nations have the skills necessary to appreciate and strengthen the unique nature of tribal legal systems and governments. Among the program’s requirements is an internship with a tribal legal department or a private or public interest law firm specializing in Indian law or participation in the Tribal Judicial Support Clinic.

Required Courses:

- Federal Indian Law (LAW 914)
- Tribal Judicial Support Clinic (LAW 998)

Program Structure

Your route to completing the Two-Year J.D. (https://law.ku.edu/academics/degrees/2yr-jd/) for international attorneys depends on whether you obtained a foreign law degree in a common law jurisdiction1. Common law students do not need to follow the first-year curriculum, and will spend both of their years in the Two-Year J.D. Program taking upper-level courses.

Students who did not obtain a degree in a common law jurisdiction will begin the program with the standard first-year curriculum. During the second year of study, these students are eligible for any second- or third-year course available to all other J.D. students and will need to complete the same required coursework.

While on campus, students benefit from classes taught by distinguished faculty members; enjoy life in Lawrence; and meet other highly motivated colleagues from around the country and the world. From KU Law’s perspective, students with foreign law degrees bring valuable diversity and professionalism to the classroom and expand the school’s global professional network of students and graduates.

Master of Laws in American Legal Studies

Requirements

The LL.M. in American Legal Studies (https://law.ku.edu/academics/degrees/llm-international/) provides students who already hold a law degree with an introduction to the breadth of American law. Students who complete the LL.M. program are ready for the further study of law in the United States, select bar examinations, and the practice of law internationally. Candidates must hold a basic law degree (LL.B. or
equivalent) from an accredited foreign college or university, or a J.D. from an accredited American law school.

Curriculum

The KU Law LL.M. in American Legal Studies will prepare you to take the New York Bar Examination. The curriculum, tied to the requirements set by the New York Bar Examiners, consists of the following:

Electives: Students may take 10 credit hours in any course offered by KU Law, subject to relevant prerequisites.

Students seeking a more specialized curriculum may request approval from the Associate Dean for International and Comparative Law to waive one or more course requirements.

Grading System

An LL.M. student whose cumulative GPA falls below a 2.0 at the end of any regular semester is on probation. A student on probation is not in good standing for purposes of the rules of withdrawal or any other rules that require good standing.

All LL.M. students must achieve a cumulative GPA of 2.0 during the semester in which they complete 24 credit hours, or they will not be awarded the degree nor will they be permitted to continue in school. There is no appeal within this law school from this requirement.

LL.M. students are not subject to the mandatory grading guidelines applicable to students seeking a J.D. degree.

Students must complete all requirements for the degree within three years of initial enrollment.

Doctor of Juridical Science Program

S.J.D. Program

Future academic leaders, government leaders, judges, and others with a strong interest in the interplay of legal scholarship and practice may be interested in the Doctor of Juridical Science (https://law.ku.edu/academics/degrees/sjd) Program.

Candidates for the S.J.D. conduct in-depth legal scholarship and must:

- Hold both a basic law degree (LL.B.) and a master's degree (LL.M.) or a J.D.:
- Show an accomplished academic record;
- And compose an original, thoughtful dissertation proposal that introduces the research topic the candidate intends to pursue, explains its importance and presents an initial argument that the candidate plans to develop in the S.J.D. program.

1 1st and 2nd Year must be in residence at the University of Kansas School of Law
2 The Dissertation Proposal includes a complete working outline of the dissertation; a clear thesis statement; a 1-2 page abstract; a working bibliography; and one draft chapter of the dissertation.

Dissertation & Academic Requirements

Dissertation Passage Requirements

- Successful completion of all required courses with a grade of C or better.
• Successful completion of the Interim Review after the end of the first year.
• Production of a dissertation that is between 150 - 200 single-spaced pages, including front material, footnotes, and bibliography. Paper type, font, margins, and other format and style matters must conform to KU's Graduate School Instructions to Candidates for Doctoral Degrees in order for the dissertation to be deposited in the KU Libraries.
• Evidence that the candidate has identified a legal issue of relevance; constructed an original argument about that legal issue; defended that argument in a manner that is clear, organized, well-written and well-reasoned; and produced a work that would be publishable as a book, extended law review article, or linked series of law review articles.
• Successful, public defense of the dissertation to committee.

Interim Review
By no later than July 15 of the summer semester of the SJD candidate’s first year in the program, the candidate must submit to his or her chairperson and to the SJD seminar instructor a Dissertation Proposal that satisfies the Dissertation Proposal requirements set forth below. No later than Aug. 15 prior to the start of the candidate’s second year, the chairperson and the SJD seminar instructor must certify whether the Dissertation Proposal is acceptable and the candidate is otherwise in good standing (i.e. has a GPA of 2.0 or above). If the candidate fails to obtain certification of the Dissertation Proposal, they may seek an extension of no more than one semester from the chairperson and the SJD seminar instructor to revise and resubmit the Dissertation Proposal for certification. Denial of certification will result in the candidate’s dismissal from the SJD program. The candidate may appeal the denial of certification or any denial of a request for extension to the Graduate & International Programs Committee by petition to the associate dean for international and comparative Law.

Dissertation Proposal
The Dissertation Proposal must include:
1. a complete working outline of the dissertation
2. a clear thesis statement
3. a 1-2 page abstract
4. a working bibliography
5. one draft chapter of the dissertation

Remote Defense Policy
SJD candidates are required to defend their dissertation at the law school. However, in exceptional circumstances, candidates may request an exemption from this requirement in order to defend their dissertation remotely via videoconference, upon prior approval of the Associate Dean for International & Comparative Law, in consultation with their chairperson. To request an exemption, candidates must:
1. have demonstrated the ability to complete their dissertation and schedule the defense within the timeframe approved by their chairperson.
2. be in compliance with any degree completion plan established by their chair.
3. submit a request to both their chairperson indicating (A) the reason for the requested exemption; (B) where and how they propose to set up the videoconference necessary for a remote defense; and (C) the feasibility for a remote defense in light of the needs of their external committee member, the nature of their project, the technology described in (D) and any other relevant considerations. Candidates are encouraged to submit this request as early as possible and must do so no later than two (2) weeks prior to their departure from the United States.

Candidates who have been approved to defend their dissertation remotely must provide electronic copies of any slides or handouts they intend to use to their committee members in advance and will be required to test the proposed technology thoroughly with KU staff in advance of their defense.

IMPORTANT NOTICE: If technological or other reasons not within the control of the candidate’s chair, committee or the law school prevent the remote defense from occurring, the candidate will be required to defend their dissertation at the law school within a reasonable time period established by the chair. Candidates should be aware that this may delay their graduation and require them to enroll for an additional semester if the defense cannot be rescheduled within the same semester, as candidates must be enrolled in the semester they graduate.

Doctoral Degree Time Limits
SJD candidates have a total of 5 calendar years to complete the SJD from the date of initial enrollment. Exceptions to this policy will be granted only in extraordinary circumstances. Requests for a one-year extension must be made no later than 30 days prior to the end of the 5-year period to the chairperson and the associate dean for international and comparative Law and must be accompanied by a degree completion agreement agreed upon by the candidate and the chairperson that establishes the expectations regarding the candidate’s progress, the expected degree completion date, and appropriate consequences for a student’s failure to defend by the expected completion date. Any subsequent request for extension must be accompanied by a revised degree completion agreement.

Withdrawal and Readmission Following Withdrawal
SJD candidates considering withdrawing are strongly encouraged to confer with their chairperson and with the associate dean for international and comparative law as soon as possible and to indicate whether they intend to seek readmission to the program. Failure to enroll in any semester before the degree is completed is considered a withdrawal from the program. Note that SJD students enroll the entire calendar year (spring, summer, fall semesters).

Any candidate who has completed at least 16 credit hours in the SJD program and is in good standing may withdraw from all law school courses in which he or she is enrolled if the candidate completes all required administrative steps for withdrawal no later than the last day of classes for the semester. Candidates who wish to withdraw after the last day of classes for the semester must obtain permission from the Graduate & International Programs Committee. A candidate who had completed at least 16 credit hours in the SJD program at the time of withdrawal may re-enroll in a subsequent semester without reapplying for admission upon permission from the chairperson of their doctoral committee. Evidence of progress towards the degree and documentation of the reasons for the candidate’s withdrawal will be determining factors in the decision to grant re-admission. Candidates considering a temporary withdrawal from the SJD program due to extraordinary circumstances (i.e. illness, emergency, financial hardship, or military leave), family responsibilities, or pursuit of full-time activities related to long-term professional goals are strongly encouraged to develop a degree completion plan with their
chairperson and the associate dean for international and comparative law in anticipation of a re-admission application.

Any candidate who withdraws before completing 16 credit hours must reapply for admission. There are no exceptions to this rule. Any candidate who has completed at least 16 credit hours and who is not in good standing must have the permission of the chairperson of their doctoral committee and the associate dean for international and comparative law to withdraw if the candidate wishes to be readmitted in a subsequent semester. A candidate who fails to secure such permission may petition the Graduate & International Programs Committee for readmission.

Maximum Time for Publication of the Dissertation

Upon successful completion of the dissertation defense, the SJD candidate must make any required revisions to the dissertation manuscript. Upon the approval of the chairperson of the final manuscript, the candidate must submit the signed electronic release form to the library staff to file the dissertation manuscript electronically to Proquest within 2 weeks of the date of the chairperson’s approval. The candidate must file the dissertation manuscript in order to be certified by the chairperson to graduate. The candidate should also provide a copy of the signed electronic release form to the registrar as confirmation that this has been completed.

Master of Science in Homeland Security: Law & Policy

Homeland security professionals work in an increasingly complex environment requiring high-level critical and creative thinking. Whether you’re a military officer or a government or private sector employee responsible for security operations and disaster preparedness, the M.S. in Homeland Security: Law & Policy (https://law.ku.edu/academics/degrees/ms-homeland-security/) degree will advance your technical expertise and enhance your value to your organization. Through a culminating simulation course, you will prove your readiness to manage an intensive homeland security crisis, providing front-line leadership in the following sectors:

• Defense
• Emergency Management
• Immigration
• Law Enforcement
• Public Health
• Public Works
• Transportation

Students must meet the university’s minimum criteria for graduate admission (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=).

The Homeland Security curriculum provides a basic grounding in law and policy related to homeland security and advanced knowledge of specific homeland security fields.

The degree will require 33 hours for completion which will be comprised of 12 core hours (3 courses) and 21 elective hours (7 courses). None of the courses required for the degree require prerequisites.

Core courses:

<table>

Graduate Certificate in Homeland Security: Law and Policy

Students interested in supplementing their education with an additional level of expertise in homeland security and cyber law can earn the online Graduate Certificate in Homeland Security: Law and Policy (https://law.ku.edu/academics/degrees/graduate-certificate-homeland-security/).

The 12-credit hour certificate provides a foundation in the international and domestic aspects of homeland security law, with elective options in biosecurity, cyber law and other topics. Students who complete the certificate will be able to apply what they learn to a variety of professional settings.

Students must meet the university’s minimum criteria for graduate admission (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=).

The Graduate Certificate in Homeland Security: Law & Policy (https://law.ku.edu/academics/degrees/graduate-certificate-homeland-security/) provides a foundation in the international and domestic aspects of homeland security law, with elective options in biosecurity, cyber law and other topics.

The 12-credit hour, online certificate curriculum includes courses from the law school’s M.S. in Homeland Security: Law & Policy (https://law.ku.edu/academics/degrees/ms-homeland-security/) program. Students pursuing the graduate certificate are required to complete two of the three core courses required for the M.S. degree. Those core courses, coupled with two elective courses, offer a broad approach to homeland security law and the opportunity to study an area of special interest.

The certificate will require 12 credit hours for completion: 6 required credit hours (two courses) and 6 elective credit hours (two courses).
The certificate will require 12 credit hours for completion, which will be comprised of 6 required hours (2 courses) and 6 elective hours (2 courses).

The College of Liberal Arts and Sciences

Aims

The College of Liberal Arts and Sciences (called the College) is KU’s largest academic unit with more than 50 departments and programs. The liberal arts and sciences include disciplines in the arts and humanities, social and behavioral sciences, and natural and mathematical sciences, as well as international and interdisciplinary studies options. Each department lends a unique perspective on the world. Look at each department’s overview page to begin to understand their contribution to your education.

Liberal education at the undergraduate level is typically broad rather than specialized. Its aim is to develop a citizenry that is broadly informed and capable of critical appraisal and to provide fundamental knowledge in many fields. The mission of the College, as reflected in KU’s bachelor’s degree requirements, is to provide such an education. The College takes full advantage of KU’s role as a research institution to ensure that the knowledge imparted to students is current and that they learn the skills of inquiry and critical evaluation.

Undergraduate Programs

In partnership with their advisor, it is the students’ responsibility to become thoroughly acquainted with all requirements for the degree programs in which they plan to participate. These include all university requirements, as well as the requirements of the College outlined in this section of the catalog. Students are also responsible for understanding the requirements that are unique to individual programs. By taking an active role in their undergraduate education, students maximize the value of their KU experience.

In general, the student is subject to the requirements in place at the time of admission to KU as a degree-seeking student.

CLAS Baccalaureate Degrees

The College of Liberal Arts and Sciences offers 3 degrees at the baccalaureate level:

- Bachelor of Arts (B.A.),
- Bachelor of General Studies (B.G.S.),
- Bachelor of Science (B.S.).

The majority of students in the College earn a B.A. degree. The B.A. degree may be earned with a major in all departments and programs in the College except atmospheric science. The B.A. is the traditional baccalaureate degree, structured to ensure both breadth and depth of knowledge through completion of the KU Core, degree specific requirements in writing, quantitative literacy, foreign language, and laboratory science, as well as course work in the major.

The B.G.S. degree is an option for some majors, allowing intentional breadth, consisting of the completion of the KU Core and one of two options for degree completion. For Option B, note - Students completing the B.G.S. Liberal Arts and Sciences, Option B cannot pursue a major or minor. However, undergraduate certificates may be pursued/completed.

The B.S. degree is offered by all natural science areas except human biology, as well as economics and behavioral neuroscience. In addition to the KU Core, students complete general education degree and major requirements determined by each program offering the degree and may be different for each B.S. degree in the College. With fewer required non-science general education degree requirements, the B.S. permits more depth in the major. It requires additional work in supporting science areas.

View the list of College of Liberal Arts and Sciences Departments & Programs (p. 747).

Two Degrees

Double Degrees in the College of Liberal Arts and Sciences

The following combinations of degrees are allowable within the College, subject to restrictions placed by departments or programs on the allowable course overlap:

- Two (2) or more Bachelor of Science (B.S.) degrees. These must be different B.S. degrees, not different concentrations within the same B.S. degree, and must conform to any restrictions placed by awarding departments or programs on the allowable course overlap.
- Bachelor of Arts (B.A.) and B.S. degrees as long as the degrees are in different majors. Students may not, for example, earn both a B.A. and a B.S. in mathematics. Allowable course overlap between the two degrees is determined by each department or program.
- Bachelor of General Studies (B.G.S.) and B.S. degrees as long as the degrees are in different majors. Students may not, for example, earn both a B.G.S. and a B.S. in economics. Allowable course overlap between the two degrees is determined by each department or program. Students pursuing the B.G.S. in Liberal Arts & Sciences are also permitted to pursue a B.S. degree in another area of study.
- Students may complete the requirements for more than one concentration in a major or degree program but should be aware that they are not completing a second degree or major. The following example illustrates this point: A student who completes all requirements for both the traditional English option and the creative-writing option is earning one degree, either the B.A. in English or the B.G.S. in English.
- Students may earn a B.A. or a B.G.S. with more than one major but not more than one B.A. or B.G.S. degree from the College. The B.G.S. in Liberal Arts and Sciences (option B) may not be earned in combination with another major or minor. Allowable course overlap...
between the two majors is determined by each department or program.

- Students normally may not earn a B.A. degree and a B.G.S. degree.
- Exclusions or Special Circumstances:

Requests for exceptions must be discussed with the Assistant Dean of College Advising & Student Services on behalf of College Governance, and all petitions are vetted through the Committee on Undergraduate Studies and Advising (CUSA). Exceptions to this policy must be approved by the Committee on Undergraduate Studies and Advising (CUSA).

Double Degrees in the College and a Professional School

Students who wish to work simultaneously toward earning a degree from the College and a degree from one of the professional schools may do so, with the expectation that all general education requirements are met for both degrees.

The College of Liberal Arts & Sciences Online Programs

For students who are unable to take their coursework on the Lawrence or Edwards campuses, the College Online offers the Bachelor of General Studies in Communication Studies, Liberal Arts & Sciences, and Psychology fully online. Undergraduate certificates and minors are also available online. For more information visit the College Online website (http://collegeonlineline.ku.edu/major/programs-offered/), or contact us directly at thecollegeonline@ku.edu.

KU Edwards Campus Undergraduate Programs

Students who would like to complete a bachelor’s degree in the Kansas City area may choose from CLAS undergraduate majors offered on the KU Edwards Campus (http://edwardscampus.ku.edu/) in Overland Park. Contact the appropriate program advisor at Edwards (http://edwardscampus.ku.edu/program-advisors/) for more information.

- Environmental Studies
  - B.A. and B.G.S. degrees are offered. See requirements under Environmental Studies. (https://edwardscampus.ku.edu/enviro-studies/)

- Law and Society
  - B.A. and B.G.S. degrees are offered. See requirements under Law and Society (p. 1995).

- Literature, Language, and Writing
  - B.A. and B.G.S. degrees are offered. See requirements for the major under English (p. 1359).

- Psychology
  - B.A. and B.G.S. degrees are offered. See requirements for the major under Psychology (http://catalog.ku.edu/liberal-arts-sciences/psychology/ba-bgs-psychology/).

- Public Administration
  - B.A. and B.G.S. degrees are offered. See requirements for the major under Public Administration (p. 1998).

Degree Requirements

Early and Continuous Enrollment in English and Math (All Undergraduate Degrees)

Undergraduate students enrolled in the College of Liberal Arts and Sciences are expected to make timely progress towards completing their degree requirements. In an effort to have students remain compliant with the requirements of the KU Core and the College, students should complete the Written Communication requirements of both the KU Core and their degree within the first academic year of their enrollment and to complete the Quantitative Literacy requirements of both the KU Core and the College by the end of their third full semester.

To ensure compliance with this policy, students may be administratively registered for courses if, after the first semester, the College determines that they are not on track to meet the requirement. The College also may place administrative holds on records of students not in compliance with this policy.

Students should pay close attention to the requirements specific to their degree and major. Some degrees and majors require specific Goal 1, Learning Outcome 2 courses to meet the requirements of the KU Core, their degree and their major or minor.

Written Communication

Students are expected to enroll in two courses that meet Goal 2, Learning Outcome 1 of the KU Core in their first academic year of enrollment. Students should pay close attention to their degree specific requirements (such as for the Bachelor of Arts) given that certain degrees require specific Goal 2, Learning Outcome 1 courses despite advanced standing in writing courses due to examination scores.

Quantitative Literacy

Students are expected to meet the requirement of Goal 1, Learning Outcome 2 of the KU Core and the requirements in the College by the end of their third full semester of enrollment. Students should pay close attention to their degree specific requirements (such as for the Bachelor of Arts) given that certain degrees require specific Goal 1, Learning Outcome 2 courses to meet both KU Core and degree specific requirements.

Requirements for Graduation (All Undergraduate Degrees)

Grade-Point Average Required for Graduation

To be eligible to graduate from the College of Liberal Arts and Sciences with any of the baccalaureate degrees offered, a student must earn at least a 2.0 grade-point average in courses taken at KU and at least a 2.0 in KU junior/senior courses (courses numbered 300 and above) in the major. All junior/senior level major-eligible courses attempted at KU will be included in the junior/senior major GPA calculation.

Hours Required for Graduation

To be eligible to graduate from the College of Liberal Arts and Sciences with any of the baccalaureate degrees, a student must successfully complete at least 120 credit hours, 45 of which must be junior/senior hours (courses numbered 300 and above). The required 120 hours are divided into 4 categories: the KU Core, College specific degree requirements, major, and elective requirements. The following courses do not count toward completion of requirements: MATH 2 or any developmental course numbered below 100. The following limits toward
The Bachelor of Arts degree requires:

**BA Degree Specific Requirements for Graduation**

catalog. requirements may be found on the specific departmental pages in this specific requirements of the various degrees of the College. Major requirements of the degree they are pursuing. Below are the degree completion of the 

All undergraduate degrees from the University of Kansas require 

College.

All degrees require courses that reflect the breadth of the disciplines in the 

completed in the grade-point average.

**BGS Degree Specific Requirements for Graduation**

A Bachelor of General Studies is a broad-based liberal arts and science degree that offers elements of both breadth and depth, while preserving educational rigor. This degree prepares students for the workforce with intellectual flexibility and expertise in a variety of areas. The Bachelor of General Studies degree has two distinct options for completion and requires either:

- **Option A.** Completion of the requirements of a single B.G.S. major AND a secondary field of academic study (a second degree offered by CLAS or other school, a second CLAS major or co-major, a minor offered by CLAS or another school, or two certificates offered by CLAS or another school/unit);
- **Option B.** Completion of an approved career preparation course, or a combination of approved courses (minimum 3 credit hours total). Eligible courses can include both department specific experiential courses or traditional classroom instruction. In both cases, a career preparation class will emphasize and develop students’ ability to select and secure a career, succeed in the workplace, and pursue professional development. A list of currently approved courses can be found here (https://collegeadvising.ku.edu/bgs-career-preparation-courses/).

OR

- **Option B.** Completion of the B.G.S. in Liberal Arts and Sciences. This degree program requires:

  - Liberal Arts and Sciences Breadth Requirement. Satisfied by the completion of a course (with a minimum of 2 credit hours) in 15 unique departments/programs within the College or School of the Arts (as determined by course prefix). Courses fulfilling this requirement may also contribute to the KU Core and other requirements.
  - World Language and Culture.
2 courses (each with 3 credit hours or more) in a single world language, or proof of two-semester proficiency in a language other than English.

OR

Completion of 3 courses beyond the KU Core requirements (each with 3 credit hours or more) in world, non-Western culture (W or NW designated courses), or language areas. This may include a variety of areas, languages, and cultures.

• Additional Natural Sciences and Mathematics. Satisfied by the completion of two additional courses from the natural sciences (requirement code N) and/or mathematics (MATH prefix courses) beyond the KU Core.

The Bachelor of Science degree:

• All Bachelor of Science degree requirements are listed on their respective academic department pages within this catalog.

Each degree allows a certain number of elective hours. In addition to general education degree and major requirements, students may choose elective courses to bring the total credit hours to 120. In choosing electives, students should be aware of limits in certain areas listed under Hours Required for Graduation.

Junior/Senior Hours Required for Graduation

KU requires all students pursuing bachelor’s degrees to complete a minimum of 45 credit hours at the junior/senior level (courses numbered 300 and above at KU).

Majors and Minors

Major Requirements

Students must complete a major to graduate with a degree in the College. Students pursuing the B.G.S. in Liberal Arts and Sciences, Option B may not choose a secondary field of study.

A major requires the student to study at least one discipline in depth. The average number of required credit hours in the major for the B.A. degree is 30 hours. The Board of Regents requires a major to be at least 24 credit hours. See the individual major listings for specific minimum requirements. View a current list of all CLAS majors and minors (p. 747).

Degree requirements and course descriptions are subject to change. Check with department offices or College Undergraduate Academic Services (https://collegeundergrad.ku.edu/) for current information.

Declaration of Major

The College expects that every student declare a major or be admitted to a professional school no later than the semester of completion of 60 credit hours. Students should contact College Undergraduate Academic Services to indicate major choice(s).

Departments may reserve enrollment in courses in the department for declared majors.

Changing majors late in the academic career may delay graduation. Consult an academic advisor in Jayhawk Academic Advising further information regarding a change in major and the possible impact on degree completion timeline.

Students are encouraged to explore different disciplines before choosing their majors. Help with choosing a major can be obtained through the Jayhawk Academic Advising office (https://advising.ku.edu/), and the University Career Center (https://career.ku.edu/).

Hours in the Major: Maximums and Minimums

There is no limit on hours taken in the major for the B.A., B.G.S., or B.S. degree. Departments may not require more than 40 hours in the major for the B.A. or more than 50 hours in the major for the B.S. Some skills courses and supporting science courses are not included in this maximum limit. A minimum of 12 hours in the major must be in courses numbered 300 or above. At least 15 hours in the major must be taken in residence at KU.

Major Grade-Point Average Graduation Requirement

A student must earn a grade-point average of at least 2.0 in KU junior/senior courses (numbered 300 and above) completed in the major. All junior/senior level major-eligible courses attempted at KU will be included in the GPA calculation.

The Credit/No Credit option is not available for any course that may satisfy major requirements. If a student has mistakenly requested the Credit/No Credit option for a course in the major, 1.7 grade points for any CR grade recorded and 0.0 points for any NC grade recorded are calculated into the major grade-point average for certification purposes. A department may determine that any major course taken with the CR/NC option must be repeated. Students seeking admission to a professional school, but who are currently in the College of Liberal Arts and Sciences should consult with the desired school to determine how the election of the Credit/No Credit option might impact future admission and degree completion in that school.

Double Major

A student may earn a double major if he or she satisfies the requirements of both majors in consultation with advisors in each department, as awarding departments and programs may place restrictions on the allowable course overlap.

Minors

The College offers more than 40 approved minors. These are open to all students in the College regardless of the degree they are pursuing. The schools of Architecture and Design (http://arcad.ku.edu/), Business (https://business.ku.edu/), Education and Human Sciences (http://www.soec.ku.edu/), Engineering (http://www.engr.ku.edu/), Journalism and Mass Communications (http://www.journalism.ku.edu/), Music (http://music.ku.edu/), Nursing (http://nursing.kumc.edu/); and Social Welfare (http://www.socwel.ku.edu/) permit their students to earn College minors.

Requirements for the minor vary, but all must be at least 18 hours including 12 hours at the junior/senior level (numbered 300 and above). Nine of the junior/senior-level hours must be taken in residence at KU. Students may not earn a major and a minor in the same field (ex. a major and a minor in English). Students may not earn a minor unless they have completed a major and have completed at least one course for the minor after the date the minor was approved by College Assembly. Successful completion of a minor requires a minimum KU grade-point average of 2.0 in all courses taken that are eligible to count for the minor. For requirements for each minor, see the programs listed on the Departments & Programs (p. 747) page.
The Credit/No Credit option is not available for any course that may satisfy minor requirements. If a student has mistakenly requested the CR/NC option for a course in the minor, 1.7 grade points for any CR grade recorded and 0.0 points for any NC grade recorded are calculated into the major grade-point average for certification purposes. A department may determine that any minor course taken with the CR/NC option must be repeated.

View a current list of all College majors and minors (p. 747).

CERTIFICATES
Undergraduate certificates in the College provide students with the opportunity to organize their elective courses in concentrated areas of expertise to develop depth and breadth in professional or interdisciplinary knowledge. Students may use the certificate program to add new skill sets, add depth and application to existing knowledge, explore minor options in various departments, and/or learn about various areas of interests from diverse disciplinary standpoints.

Students majoring within departments and those seeking experiences in areas outside of their departments have the opportunity to explore interdisciplinary approaches to scholarship and to increase the value of their degrees in the global marketplace by focusing on application of their skills.

Certificate proposals should meet the following criteria. Variations from these criteria will be considered by CUSA with appropriate justification. Criteria:

- Certificates must contain a thematic goal and clarification as to how that goal is completed through the curriculum. Certificates must also demonstrate how the coursework addresses a common theme through multiple disciplines or that it develops specialized expertise that will benefit students in graduate or professional studies or careers.
- Minimum of 12 hours with no more than 14 required hours. (Courses in the certificate program may have prerequisites that are not part of the certificate)
- 6 hours must be at the JR/SR level
- All certificate coursework must be completed at KU. Students who complete certificate requirements at other institutions may substitute one course only in the instance that the course is a direct transfer articulation equivalent to KU. Exceptions to this are reviewed by CUSA on a case by case basis and must contain department endorsement.
- Minimum 2.00 KU GPA in coursework which may apply to the certificate (departments may propose a higher GPA).
- One course may be taken from a Professional School.

KU Core
The KU Core curriculum, coupled with degree and major requirements in the College, ensure a balance of breadth and depth of knowledge critical in today’s world. Requirements for the KU Core can be found here (https://kucore.ku.edu/).

See the General Education Degree Requirements section above for details regarding College-specific requirements.

Bachelor of Science Degree Requirements
All general education degree, major, and supporting requirements for each B.S. program are specified by department faculty, with approval of the College Assembly. They are listed under the department or program on the Departments & Programs (p. 747) page. B.S. candidates are held to a more prescribed program with fewer electives than B.A. candidates. Students pursuing the B.S. may complete an approved minor.

Overlap Between Requirements
A course may be used to fulfill a KU Core or College degree-specific requirement and a minor or major requirement, except where expressly stated.

A student may earn more than one major/minor if they satisfy the requirements of all majors/minors. Course overlap is generally allowed between two majors, a major and a minor, or between two minors, but is subject to restrictions set by awarding departments or programs with reference to specific combinations of majors and minors. Any restrictions set by departments or programs are communicated as a part of the approved major and minor requirements.

Graduate Programs
The College of Liberal Arts and Sciences (called the College) is KU’s largest academic unit with more than 50 departments and programs. Graduate programs in the liberal arts and sciences include disciplines in the arts, humanities, social and behavioral sciences, and natural and mathematical sciences, as well as many interdisciplinary degree programs where disciplines come together to offer students a unique graduate experience. Each graduate program’s page contains program-specific information about admission, course curriculum, and advising.

The College’s participation in graduate education reflects a long and distinguished commitment to higher learning and research across the liberal arts and sciences. The College takes full advantage of KU’s role as an international research institution to ensure that the knowledge imparted to students is current and that they learn the skills of inquiry and critical evaluation. Graduate students are central to the research and teaching missions of the College. They are also the next generation of scholars, artists, and skilled professionals who will make contributions to our communities and the production of knowledge for many years to come.

Graduate Degrees in the College
The College offers Doctor of Philosophy (Ph.D.) degrees in 36 fields, including 2 fields within the School of the Arts and 1 within the School of Public Affairs and Administration. Master of Arts (M.A.) or Master of Science (M.S.) degrees can be earned in more than 40 disciplines and the Master of Fine Arts (M.F.A.) degree is offered in creative writing, visual art, and theatre design with a concentration in scenography. Professional degrees are offered at the master’s level in the Master of Public Administration (M.P.A.) program, the Master of Urban Planning (MUP), and the Professional Science Master’s (PSM) program.

The College also offers Accelerated Master's degree options in the following fields:

- Classics
- Economics
- English
- Environmental Studies/Environmental Assessment
- Environmental Studies/Urban Planning
- History of Art
- Latin American & Caribbean Studies
• Philosophy
• Speech Language Pathology
• Urban Planning

For students whose academic and professional goals can best be achieved through investigations at the interface of 2 or more disciplines, the College offers master's and doctoral degree programs in Interdisciplinary Studies. Please see the policy governing graduate degrees in Interdisciplinary Studies section of the online catalog.

The College offers more than 30 Graduate Certificates, with additional certificate programs in development.

View the College's Departments & Programs (p. 747) section of the online catalog for more information on specific fields of study.

KU Edwards Campus Graduate Programs

Students who would like to complete a graduate degree in the Kansas City area may choose from a variety of master's degrees and graduate certificates that are offered on the KU Edwards Campus (http://edwardscampus.ku.edu/) in Overland Park. Information about program requirements, facilities, tuition, and fees is available on the Edwards Campus website (http://edwardscampus.ku.edu/). Residents of Kansas City metro area counties admitted as degree-seeking students to one of these programs may qualify for the MetroKC tuition rate for Edwards Campus courses. For more information, contact the College's Graduate Advisor at the Edwards Campus at (913) 897-8400.

Ceremonies

At the end of each Spring semester, the College holds a master’s hooding ceremony for graduates in the College and the Office of Graduate Studies organizes the annual campus-wide doctoral hooding ceremony. The School of the Arts also hosts a ceremony for SOTA graduates. University Commencement information is available in the KU Commencement section of the KU website.

Attendance at these ceremonies is optional. Please consult the Graduate Studies (http://graduate.ku.edu/) and COGA website (http://coga.ku.edu/) for more information.

Undergraduate Advising

Academic advising helps undergraduate students develop educational plans, clarify career and life goals, and appreciate the values of a liberal arts education. Undergraduate students in the College are advised through Jayhawk Academic Advising (https://advising.ku.edu/). Faculty and staff in the College work closely with JAA to help undergraduate students achieve their educational and personal goals, and to maintaining the academic integrity of our degree programs. Together we welcome students, encourage them to be active participants in their educational experience, and celebrate their milestones.

The College encourages students to consult frequently with advisors, and to declare their majors as soon as possible in order to get connected with all resources in their chosen area of study. Academic advisors serve as guides, helping students explore options and make decisions. They work closely in partnership with faculty to connect students and provide a comprehensive advising experience during their academic journey.

Degree Progress Report

The Degree Progress Report (DPR) is a computerized advising and degree-audit system, used to assist students and advisors in tracking progress toward completion of general education degree and major requirements. Students should review their DPR each semester and be prepared to review and discuss information contained in the DPR at all advising appointments. The DPR can be accessed through the student’s account in the MyKU Portal. Although the DPR provides a list of courses taken and grades earned, it is not an official transcript and can be used only for internal advising. Students must obtain all official transcripts from the Office of the University Registrar (http://www.registrar.ku.edu/), KU Visitor Center.

4-Year Graduation Plans

With careful planning and commitment to a full-time course load, students can graduate in 4 years. Degree Plans for all degrees are available through the catalog "degree plan" tab. Individually tailored degree completion plans should be made by students in consultation with their academic advisor.

Graduate Advising & Mentoring

Overview

Advising of graduate students is primarily conducted within the graduate programs by program staff members and the individual faculty members who act as mentors and advisors.

A faculty member in the academic unit, typically with the title of Director of Graduate Studies (DGS), has primary responsibility for the regular assessment of students’ progress towards degree, as well as for the development and oversight of broad scale graduate initiatives. In many units, the DGS has primary oversight of department graduate committees and processes related to recruitment, admissions, new program development or program changes, graduate student annual evaluations, and graduate student petitions. Students are encouraged to work with the DGS regarding course selections and individual program requirements to ensure that all program milestones are reached as expected by the academic unit.

The majority of academic units in the College also receive advising support from a professional staff member called their graduate program coordinator. CLAS graduate program coordinators (https://coga.ku.edu/people/list?lastname=&filter=1326) are team members of the College Office of Graduate Affairs (COGA) that are assigned to a specific CLAS unit(s) to advise graduate students and faculty on policies and processes related to graduate education at KU. Students are encouraged to work closely with their graduate program coordinator to ensure that all University and College requirements are met as expected. Graduate program coordinators also work closely with faculty in their assigned academic units(s), the COGA office, and other campus partners to collaborate on key initiatives related to graduate education and to connect students to opportunities and facilities to achieve successful progression throughout their graduate career. Students in units without an assigned graduate program coordinator from COGA should contact the DGS regarding University and College policies and procedures.

Mentoring Best Practices

Graduate mentors, including a student’s graduate advisor(s), others at the university, and external professionals, provide professional and
general insights, advice, and assistance to graduate students. Good graduate mentoring makes a vital contribution to the academic and professional success of individual students, advances the disciplines represented in the College, and contributes to the mission of the College as a whole. A positive mentoring relationship depends on the cooperation of both mentor and mentee; both should therefore work together in creating appropriate expectations for their mentoring relationship and in implementing those expectations in practice. (See here for help with this.) With this in mind, here are best practices for graduate mentors and mentees in the College:

Mentors:

1. Graduate mentors should conscientiously supervise, encourage, and support students in their academic endeavors and assist them in securing research support.
2. Graduate mentors should respond effectively, respectfully, and in a timely manner to requests for guidance and support from mentees.
3. Graduate mentors should advise students concerning professional ethics, encourage the practice of research and publication consistent with ethical standards, and help students avoid ethically questionable situations.
4. Graduate mentors should strive to enhance the educational value of teaching and research assistantships of the students under their supervision. To do so they should provide discipline-specific guidance for new and experienced GTA sand GRAs.
5. Graduate mentors should be objective in the evaluation of research and academic performance and communicate that evaluation fully and honestly to their students. Graduate mentors should report accurately on the competence of students to other professionals who require such evaluations.
6. When engaged in teaching, research, or supervision, graduate mentors should recognize the power they hold and should avoid engaging in conduct that exploits or demeans students or that could be construed as an abuse of that power.
7. Graduate mentors should not permit personal animosities or intellectual differences with colleagues to impede student access to those colleagues or interfere with students' research or progress toward a degree.
8. Graduate mentors should aid and advise graduate students in seeking professional employment inside and outside of academia, taking into account the current state of the job market and the particular situation of the student. This includes directing students towards appropriate resources (see for example here) and advising students about career opportunities and implications associated with their participation in particular research projects or degree programs.
9. Graduate mentors should be sensitive to the specific challenges faced by international students and students who identify as members of one or more underrepresented group. This may include directing students toward appropriate resources, including the following: Office of Multicultural Affairs (https://oma.ku.edu/), International Support Services (https://iss.ku.edu/), Office of Diversity, Equity, Inclusion & Belonging (http://diversity.ku.edu/), Emily Taylor Center (https://emilytaylorcenter.ku.edu/), Center for Sexuality & Gender Diversity (https://sgd.ku.edu/), Support Services for Undocumented Students (https://undocumented.ku.edu/), as well as DEI resources in the College (https://college.ku.edu/dei/).

Mentees:

1. Graduate students should be open and willing to discuss their professional goals, aspirations, and areas where they need guidance with their mentor.
2. Graduate students should be open to guidance and criticism from their mentors.
3. Graduate students should respond effectively, respectfully, and in a timely manner to communication and guidance from mentors.
4. Graduate students should come to scheduled meetings prepared and on time. Templates are available here for students to prepare for meetings.
5. Graduate students are strongly encouraged to establish and maintain multiple mentoring relationships or develop a network of mentors that can provide support and guidance throughout their graduate career and beyond. Graduate students are encouraged to include, as part of this network, colleagues, faculty beyond their department, university staff, alumni, and external professionals.
6. Graduate students are strongly encouraged to take advantage of resources across campus to develop short-term and long-term academic, research, and other professional goals and be willing to discuss these with their mentor.

Change of Advisor

Graduate mentoring relationships can break down. If so, the formation of new mentoring relationships should be encouraged without prejudice. (For more information about what to do when a mentoring relationship breaks down, see Chapter 6 of the University of Michigan’s How to Get the Mentoring You Want: A Guide for Graduate Students (https://rackham.umich.edu/wp-content/uploads/2018/11/mentoring.pdf).)

All departments in the College are required to have a policy in place to govern the process of switching advisors. Please see your department's graduate student handbook or consult with the Director of Graduate Studies for more information.

Students seeking information on specific policy or procedures should review the relevant content in the KU Policy Library (http://policy.ku.edu/) as well as the College and Graduate Studies (p. 2449) sections and the relevant Department or Program section of the online catalog. The College Office of Graduate Affairs (https://coga.ku.edu/), 102 Strong Hall, coga@ku.edu, is also available for assistance.

Students who have completed all degree requirements and are preparing to graduate should refer to the graduation checklists available on the COGA website (http://coga.ku.edu/). Graduating students are also welcome to schedule a Graduation Appointment with the College Office of Graduate Affairs.

Undergraduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Integrity

The College of Liberal Arts and Sciences strictly enforces KU and College policies on academic misconduct. Academic integrity requires honest performance of academic responsibilities by students. These include preparation of assignments, reports and research papers, taking
examinations, completing administrative requirements, and a sincere
and conscientious effort by students to abide by the policies set forth by
instructors.

Academic Standing

Good Standing

Students with a KU cumulative GPA of a 2.00 or higher are in good
academic standing.

Notice

Students who fall below a 2.00 KU cumulative GPA for the first time
will be placed on notice. During the notice semester students are
required to participate in all programming. Students failing to return
to good academic standing at the end of the notice semester will be
placed on probation. Students will only receive one notice semester.

Students who have previously returned to good academic standing
will be placed on probation should their KU cumulative GPA fall
below a 2.00.

Probation

Students on probation must meet their required KU Term GPA
(see chart below) every semester until their KU cumulative GPA
reaches or exceeds a 2.00. Students are allowed to continue on
probation provided they meet their KU term GPA every fall and
spring semester until their KU cumulative GPA reaches or exceeds
a 2.00. While on probation students are required to participate in all
programming. The required KU term GPA increases to a 2.50 after
attempting 45 or more hours at KU to help students on probation return
to good academic standing before they are at risk of being
unable to raise their KU cumulative GPA in time for graduation.
Failure to meet the required KU Term GPA during a fall or spring
semester will result in academic dismissal.

Academic Dismissal

Students on probation who fail to meet their probation requirements
during a fall or spring semester will be academically dismissed and
are not allowed to continue in the College of Liberal & Sciences until
they meet their readmission after dismissal requirements. Students
are not dismissed at the end of summer.

Readmission after Dismissal

Students can be readmitted back to KU after a first and a second
dismissal but they must complete their readmission requirement.
If all requirements for the KU Core 1 – 5 goals are completed, no coursework is required. Students returning after an academic
dismissal will be readmitted on probation and must meet their
required term GPA requirements to avoid another dismissal.

Terms for Readmission after Dismissal

First Dismissal - Sit out one fall or spring semester; complete
at least one 3 credit hour course that transfers to KU to meet
KU Core 1-5 Goals; earn a 2.50 in all courses taken since
dismissal.

Second Dismissal - Sit out one academic year; complete at
least one 3 credit hour course that transfers to KU to meet
KU Core 1-5 Goals; earn a 2.50 in all courses taken since
dismissal.

Third Dismissal - a third dismissal is final.

Change of School

Students with a KU cumulative GPA of 2.00 or higher (or in their first
semester) can fill out a Change of School Form requesting to be admitted
to the College of Liberal Arts and Sciences and/or School of the Arts,
from a KU professional school, through the 20th of class for the current
semester. Requests made after that will be for admission in the upcoming
semester. This process is for active KU students. Students not admitted to
KU follow the University’s admission policy.

Students with a KU cumulative GPA of less than a 2.00 will be evaluated
according to the College’s academic standing policy and may not be
admissible based on past academic performance at KU. Students who
have been dismissed from another KU School will need to submit a
change of school request by the 20th day of the current semester; after
that date requests will be considered for the next semester.

- After the 20th day of the semester, Change of school requests will
  not be reviewed until current semester grades are posted.
- Students admitted to the College on probation will need to meet the
  College’s academic probation requirements during the semester they
  are admitted or face an academic dismissal.
- Students dismissed from another school at KU and are found to be
  inadmissible to the College can follow our readmission after dismissal
  policy to return to KU for a future semester.
- Students admitted to the College via a Change of School request
  will go by the requirement term of their original matriculation to the
  University of Kansas. A student may petition the College of Liberal
  Arts & Sciences to request to change to the term requirements based
  on the term they requested entry into the College. This should be
  considered in consultation with their academic advisor, and a petition
  should be submitted to College Undergraduate Academic Services.

To change from one school to another, a student must submit a Change
of School form in the dean’s office of the school they plan to enter
or in College Undergraduate Academic Services if they plan to enter
the College. Deadlines are included on the form. See the school’s
requirements for admission.

Students applying for admission to the College from other schools
in the university must meet the same minimum grade-point average
requirements in KU attempted course work as continuing College
students. Consult College Undergraduate Academic Services, Strong
Hall, 1450 Jayhawk Blvd., Room 109, Lawrence, KS 66045-7518,
785-864-3500.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking
undergraduates. A student may enroll in 1 course a semester under the
option, if the course is not in their major or minor. To exercise the option,
the student must fill out the online form via the Registrar’s website during
the fifth and sixth weeks of the semester (or the third week of summer
session and 8-week courses). See the Academic Calendar (http://
registrat.ku.edu/calendar/) for current dates for electing this option. After
the close of the option period, the choice cannot be changed. Under the
option, a grade of Credit is recorded for grades of A, B, or C; No Credit is
recorded for grades of D or F. Courses graded Credit or No Credit do not
count in computing the grade-point average. Courses graded Credit are included in the total hours counted toward graduation. Courses graded No Credit do not count toward graduation. For more information, visit the KU Policy Library (http://policy.ku.edu/).

**Warning:** Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages. Students in the College with preprofessional school codes are subject to the College’s CR/NC policy. To determine the impact a CR/NC selection may have on future admission or degree completion in another school, students should consult directly with that school.

The university-established timeline for exercising this option is strictly enforced.

**Enrollment**

See the Enrollment Guide (https://registrar.ku.edu/enrollment-planning/) for complete enrollment information.

**New and Readmitted Student Enrollment**

Immediately before the beginning of classes each term, an enrollment session is scheduled for new students. New students admitted for a summer or fall term have an additional option of enrolling in fall courses during one of several summer orientation sessions. Invitations to orientation are sent automatically to newly admitted students who applied for the spring, summer, or fall terms (except nondegree-seeking students). Readmitted students may attend a special abbreviated orientation session, may enroll during continuing enrollment, or may attend the enrollment sessions immediately before the start of the semester. Readmitted students whose reenrollment applications are completed by a designated date also may enroll during continuing enrollment, after meeting with an advisor. All students must preregister for orientation and enrollment sessions.

International students must complete the required check-in processes before enrollment and are encouraged to attend International Student Orientation, which includes advising and enrollment sessions.

**Continuing Enrollment**

This enrollment allows students who are currently enrolled during one term to enroll for the next term. Spring-enrolled students enroll in April for the following summer session or fall semester or both. Fall-enrolled students enroll in October or November for the following spring semester.

**Late Enrollment**

Each semester, the Academic Calendar (http://registrar.ku.edu/calendar/) announces dates for late enrollment and the last day to submit a Petition to Late Enroll. Petitions are evaluated based on past academic performance. A student may enroll in a course or change class sections after the semester has been in session for 4 weeks only if the course has met fewer than 25 percent of the class sessions. For most classes, the faculty have established earlier dates for beginning class attendance and participation. A fee is assessed for late enrollment.

**Grading**

The letters A, B, C, D, S (satisfactory), and Credit indicate passing work. The letters F and U (unsatisfactory) and No Credit indicate that the quality of work was such that, to obtain credit, the student must repeat regular course work. P represents satisfactory progress (an interim grade pending completion of a subsequent term’s course work). See the KU Policy Library (http://policy.ku.edu/) for more information.

**Graduation with Honors**

Undergraduates may earn honors upon graduation in 3 ways. The student may graduate with distinction or highest distinction, earn departmental honors in the major, or complete the University Honors Program (http://www.honors.ku.edu/). It is possible to earn honors in 1 of these areas, any combination of them, or all 3. The award of honors is noted on the student’s transcript and in the Commencement program. Distinction and highest distinction are noted on the diploma.

**Graduation with Distinction or Highest Distinction**

The top 10 percent of each year’s graduating class is designated as graduating with distinction. Of these, the top one-third is designated as graduating with highest distinction.

Students must have completed at least 60 hours graded A through F in residence at KU (including the hours in which they are enrolled during the semester of graduation). Awards of distinction and highest distinction are based solely on the grade-point average determined by KU residence credit hours unless the overall grade-point average (including transfer hours) is lower than the residence grade-point average. In this case, the award is determined by the overall grade-point average. Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those students graduate with highest distinction.

Potential candidates are determined in mid-April and invited to a recognition ceremony during Commencement weekend in May. Final designation is determined in mid-July.

**Graduation with Departmental Honors**

Most departments and programs allow qualified majors to work toward graduation with departmental honors. Graduation with departmental honors is awarded in recognition of exceptional performance in the major, completion of a program of independent research or an alternative project, and a strong overall academic record.

In addition to the requirements of individual departments and programs (which must be approved by the College Committee on Undergraduate Studies and Advising), the College requires the following for graduation with departmental honors:

1. Candidates must declare the intention to work for departmental honors with the appropriate departmental honors coordinator(s) no later than the time of enrollment for the final undergraduate semester, but sooner if required by the department(s). Copies of the intent form should be returned to College Undergraduate Academic Services.
2. At the end of the final undergraduate semester, the candidate must have achieved a grade-point average of at least 3.5 in the major, and some departments may also require an additional overall minimum GPA. This includes work completed at other institutions, as well as at KU. No minimum grade-point average is required to declare candidacy for graduation with departmental honors unless specified by the department.
3. Each candidate’s departmental honors work must include independent research or an acceptable alternative project. The results of research are presented in a form appropriate to the
requirements of the major department. Equivalents to the independent research component are established by approved departmental honors programs. In courses meeting the independent research requirement, the candidate must earn a grade of B or higher. Successful completion of all departmental honors requirements must be certified to the departmental honors coordinator(s) by a panel composed of at least three members of the College faculty who have read the report of the independent research and heard the oral presentation, where required.

Petitions
A department or program may petition to award graduation with departmental honors to deserving students who, for good reason, do not meet every College and departmental requirement. Send petitions to the Committee on Undergraduate Studies and Advising, via College Undergraduate Academic Services.

Late Completion of Honors Requirement
Requirements for graduation with honors may be completed after the date on which certifications are requested from departments, and in some cases, requirements, if not needed for graduation, may be completed after a student has graduated. However, the Incomplete policy does apply and grades would lapse at the time of graduation. When a candidate finishes all requirements, departments must notify College Undergraduate Academic Services in writing.

Honor Roll
Undergraduates with a minimum semester grade-point average of 3.5 who have completed at least 12 hours with letter grades (A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F) are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript. See University Senate Rules and Regulations 2.4 for further details about GPA calculation.

Honors Program
The University Honors Program (http://www.honors.ku.edu/) provides opportunities for outstanding and creative undergraduates in all schools at KU to develop their full potential during their undergraduate years. See Honors in this section of the online catalog for further information.

Incompletes
The letter I indicates incomplete work, such as may be completed without re-enrollment in the course. The letter I should not be used when a definite grade can be assigned for the work done. It is not given for the work of a student in any course except to indicate that some part of the work has, for reasons beyond the student’s control, not been done, while the rest has been satisfactorily completed. At the time an I is reported on the electronic roster, the character and amount of work needed, as well as the date required for completion and lapse grade if further work is not completed by this date, should be indicated.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed 1 calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule automatically converts to a grade of F or U, or the lapse grade assigned by the course instructor, and appears on the student’s record.

Extensions to the time limit may be granted by the dean’s representative upon submission of a petition from the student containing the endorsement of the course instructor who assigned the I grade, or the department chairperson if the instructor is unavailable, prior to the expiration of the Incomplete. After the I grade is converted to a grade of F or U, the grade may only be changed in accordance with USRR Article II, Section 3. (http://policy.ku.edu/governance/USRR/)

Maximum and Minimum Undergraduate Semester Enrollment
No undergraduate may enroll for more than 20 hours a semester except by permission of the Assistant Dean for College Undergraduate Academic Services. Summer enrollment is limited to 10 hours. Permission is not considered unless the student has demonstrated high levels of academic ability in previous semesters.

Prerequisites and Co-requisites
Students are advised to enroll according to prerequisites and co-requisites noted in individual course descriptions. These prerequisites are enforced in a variety of ways including blocking enrollment, administrative drops without notice, etc.

Required Undergraduate Work in Residence
Junior/Senior Hours Required for Graduation
KU requires all students pursuing bachelor’s degrees to complete a minimum of 45 credit hours at the junior/senior level (courses numbered 300 and above). The College of Liberal Arts and Sciences requires that 30 of these 45 credit hours be completed in residence.

Hours in the Major: Maximums and Minimums
There is no limit on hours taken in the major for the B.A., B.G.S., or B.S. degree. Departments are not allowed to require more than 40 hours in the major for the B.A. or more than 50 hours in the major for the B.S. Some skills courses and supporting science courses are not included in this maximum limit. A minimum of 12 hours in the major must be in courses numbered 300 or above. At least 15 hours in each major(s) must be taken in residence at KU.

Time Limits
Undergraduates are strongly encouraged to complete the bachelor’s degree within 4 academic years. Students should complete a minimum of 30 credit hours each year. If a student is unable to complete 30 hours in the fall and spring terms, summer enrollment and/or winter session enrollment should be strongly considered.

Students have a maximum of ten years to complete their undergraduate work in the College of Liberal Arts and Sciences under degree requirements in effect at the initial term of matriculation. Students experiencing a break in enrollment during these ten years will follow their curricular requirements at the point of matriculation provided that the break in enrollment does not exceed two calendar years. Students readmitted after two years are held to the curricular requirements in place at the term of readmission.

Students readmitted after a break in attendance of less than two years may petition the College of Liberal Arts & Sciences to request to change to the term requirements based on their readmission term. This should be considered in consultation with their academic advisor, and a petition should be submitted to College Undergraduate Academic Services.
Students maintaining continuous enrollment but who do not complete their degree requirements within ten years, may petition the College to complete their degree requirements under the curricular requirements in effect during the term of admission.

Transfer of Credit

CredTran (http://creditransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Only transfer grades of C or higher contribute to total hours earned for students entering KU in spring 1990 or after, and for courses taken in spring 1990 or after by all students. For questions about transfer work fulfilling College requirements, contact College Undergraduate Academic Services, 109 Strong Hall.

Graduate Regulations

It is the students’ responsibility to comply with all requirements for the degree programs in which they plan to participate. These include the university requirements for graduate study at KU outlined in the College and Graduate Studies sections of the KU Policy Library (http://www.policy.ku.edu/), the University Senate Rules and Regulations (http://catalog.ku.edu/regulations/), the Graduate Studies (p. 2449) sections of the online catalog, as well as the requirements of the College outlined in this catalog section. Additionally, students are responsible for understanding the requirements that are unique to individual graduate programs outlined in the graduate handbooks of individual academic units and the Departments & Programs (p. 747) sections of the online catalog.

In general, the student is subject to the regulations in place at the time of matriculation as a degree-seeking student. If degree requirements change, the student may opt to follow the new requirements or to continue under the regulations in place at the time of admission. Any student readmitted 10 years or more after his or her initial term as a degree-seeking student must fulfill the requirements in effect on the date of readmission to the graduate program.

Information presented on this page is limited to the most frequently consulted policies and key milestones in the graduate career. Students should also consult the academic unit’s handbook, Graduate Studies and College sections of the KU Policy Library, and the Graduate Studies and University of Kansas Regulations sections of the online catalog.

Degree Requirements

Requirements for the completion of master’s and doctoral degrees in the College are governed by department- or program-specific policy, College policies and procedures, Graduate Studies policies, and the University Senate Rules and Regulations.

Master’s Degree Requirements

Coursework

At least 50% of required coursework for a master’s program must be numbered 700 or above. Specific coursework requirements for the Master’s degree are established and tracked by the department or program. The College then verifies that completed coursework meets all College and University requirements for master’s students. Please consult with your advisor, the academic unit’s graduate handbook, and the relevant Departments & Programs section of the online catalog for further information on specific courses or course sequences required for the degree.

Thesis

Master’s students complete either a thesis or an equivalent enrollment in research, capstone/portfolio, independent investigation, or seminar. Students earning a master’s thesis degree must have completed at least 1 hour of thesis enrollment. General rules for the preparation of a thesis are available on the Graduate Studies website (https://graduate.ku.edu/electronic-thesis-and-dissertation/).

Final Examination

A final general examination or thesis defense in the major subject is required for MA and MS degrees. The examination, which may be oral, written, or both, is held during the semester of the student’s final enrollment in coursework and, in the case of thesis students, when the thesis has been substantially completed. All master’s exams must be preapproved by the College in advance of the scheduled exam date. See also Master’s Degree Requirements (https://catalog.ku.edu/graduate-studies/#programstext) and M.A. and M.S. Degrees (https://catalog.ku.edu/graduate-studies/#programstext) in the Graduate Studies section of the online catalog.

Doctor of Philosophy Degree Requirements

Coursework

Coursework requirements for the doctoral degree are established and tracked by the department or program. The College then verifies that completed coursework meets all University and College requirements for doctoral students. Please consult with your advisor, the academic unit’s graduate handbook, and the relevant Departments & Programs section of the online catalog for further information on specific courses or course sequences required for the degree.

Research Skills and Responsible Scholarship

Graduate Studies requires that all doctoral students meet the Research Skills and Responsible Scholarship requirement before proceeding to the Comprehensive Exam. Specific requirements are determined by each department or program in consultation with Graduate Studies. Information on these requirements is contained in the department or program’s approved research skills requirement plan. Consult with your advisor and the Departments & Programs section of the online catalog for further information.

Enrollment Requirement

Prior to the comprehensive oral exam, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

• Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by the Full-Time Enrollment for Graduate Students policy in the Graduate Studies section of the KU Policy Library. (http://policy.ku.edu/)
• At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Please see the Engagement and Enrollment in Doctoral Programs policy in the Graduate Studies section (https://catalog.ku.edu/graduate-studies/#programstext) of the online catalog and the KU Policy Library (https://policy.ku.edu/) for more information about this requirement.
Comprehensive Oral Examination

The comprehensive oral examination covers the major field and any additional content for which the academic unit wishes to hold the student responsible. The examination is expected to be broader than a mere defense of the dissertation proposal. Exam dates must be approved by the College in advance of the scheduled exam date.

The student must be enrolled the semester or summer session in which he or she completes the comprehensive oral examination. This enrollment may count toward the post-comprehensive enrollment requirements as described in Graduate Studies’ Doctoral Candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/) policy. If more than 5 years elapses between the completion of the comprehensive exam and degree completion, the student may be required to retake the exam.

More information about comprehensive exam requirements may be found in the Graduate Studies section (https://catalog.ku.edu/graduate-studies/#programstext) of the online catalog.

Dissertation and Final Exam

Completion of the dissertation is the culminating phase of a doctoral program, marked by the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination. The exam must be approved by the College in advance of the scheduled exam date. Refer to the Graduate Studies section (https://catalog.ku.edu/graduate-studies/) of the online catalog for further information on the regulations governing the final oral examination, including committee composition and attendance regulations.

Guidelines for preparing and submitting the final copies of the dissertation are available on the KU Libraries’ ETD website (https://guides.lib.ku.edu/etd/).

Enrollment

Full-time, Half-Time and Part-Time Enrollment

There are multiple definitions for what constitutes full-time enrollment for graduate students at KU, including variations for doctoral candidates enrolled in dissertation hours, students with GTA/GRA/GA appointments, and active duty military. Please see the Full-time Enrollment policy in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for the definitions of full-time, half-time, and part-time enrollment.

Maximum enrollment for graduate students in the College of Liberal Arts & Sciences, except in rare instances, is 16 hours in Fall or Spring semester and 9 hours in the summer session.

At a minimum, all graduate students must be continuously enrolled in the Fall and Spring semesters while completing the requirements for fulfillment of their degree. Please consult the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for other enrollment regulations.

Continuous Enrollment for Master’s Students

The College requires that all master’s students who have completed the required coursework for their degrees must be continuously enrolled in the Fall and Spring semesters until all remaining requirements for the degree, including the thesis when applicable, are completed. No enrollment is required during the summer session unless it is the semester during which the student will graduate, in which case enrollment is required. Certain academic units have additional rules governing summer enrollment.

Post-Comprehensive Enrollment for Doctoral Students

After passing the Comprehensive Oral Exam, doctoral candidates must be continuously enrolled. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester (Fall and Spring). At least one of these hours each semester must be in dissertation or approved dissertation-equivalent coursework.

Upon completion of the 18-hour requirement, a student’s level of enrollment should reflect, as accurately as possible, the faculty time he or she utilizes. This may be as little as one dissertation (or approved equivalent) hour per semester.

In addition, Graduate Studies requires a period of at least 1 month to elapse between the comprehensive oral exam and the final exam. Students that have completed all degree requirements before completing 18 hours are still required to continue enrollment until this 1-month requirement has been met.

Special enrollment requirements apply to those with GTA/GRA/GA appointments. Please consult the Graduate Studies (p. 2449) section of the online catalog and the KU Policy Library (http://policy.ku.edu/).

Lapses in Enrollment

Generally, no student is allowed to enroll in full term courses with an established meeting time after the first 4 weeks of a semester or the first 2 weeks of a summer session. Non-standard dated courses, or “short courses,” as well as research or independent study courses with a “by appointment only” meeting time have different deadlines. Students should consult the academic calendar (https://registrar.ku.edu/calendar/) and the short courses listing (https://registrar.ku.edu/short-courses/) for deadlines.

If a student does not intend to enroll, he or she must determine the appropriate course of action in consultation with the department or program. The student may elect to Voluntarily Discontinue from the program, and must inform the department or program in writing of this decision. The department will submit the necessary forms to the College. This option requires the student to seek re-admission to the program if they choose to return at a future date. They also remain eligible to seek admission to another department or program in the College.

The student may also petition for a Leave of Absence of up to one calendar year. If granted, the Leave of Absence maintains the student’s place in the program. Leave of Absence petitions must be submitted by the department or program and provide evidence of the department or program’s endorsement of the student’s petition. Students interested in this option should begin by consulting with their advisor.

The time spent on Leave of Absence does not count against the student’s time to degree, and therefore does not shorten the time available to complete their degree requirements. Similarly, if a student that has elected to Voluntarily Discontinue subsequently returns to the program, the time that has elapsed since his or her discontinuance does not count against the time to degree.

Students who fail to enroll without completing the Voluntary Discontinuance process or without being granted a Leave of Absence are reviewed by the College Office of Graduate Affairs and the students’ academic units for possible dismissal. Time that accrues during these
lapses of enrollment in which the student does not occupy any approved enrollment category (i.e., Enrolled, Voluntarily Discontinued, or Leave of Absence) is counted against the time to degree.

International students seeking a Leave of Absence must consult with the International Support Services office prior to any change in enrollment status to determine how the change may affect their legal status.

Please see the Combined Degrees information in the Graduate Studies (p. 2449) section of the online catalog and in the KU Policy Library (https://policy.ku.edu/).

**Dual Enrollments**

Students enrolled in two schools or working on two degrees at the same time must complete the work for both degrees. Courses may not be counted toward both degrees, except in the joint degree programs that have been established (e.g., M.P.A./J.D., M.A. in Economics/J.D., M.B.A./M.A. in Area Studies, etc.). Please refer to the Combined Degrees information in the Graduate Studies (p. 2449) section of the online catalog for a complete list of approved joint degree programs.

**University Regulations on Grading**

Article II of the University Senate Rules and Regulations provides detailed information on regulations governing the grading of graduate coursework. Students should also consult the Graduate Studies (p. 2449) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for more information on the Grading Policy.

The following are of particular relevance for graduate students in the College:

**Passing Grades for Graduate Coursework**

Only courses graded C or above are considered passing and may be counted for graduate credit. Courses graded C-, D or F may not be used to fulfill degree requirements.

**Incomplete (I) and Waiting Grades (WG)**

Incomplete (I) grades are used to note, temporarily, that a student’s work has been satisfactory to date, but that they have been unable to complete a portion of the required course work during that semester due to circumstances beyond their control. Incomplete work must be completed within the time period prescribed by the course instructor, at which point a permanent grade will be assigned. After one calendar year from the original grade due date, an Incomplete (I) grade will automatically convert to a grade of F or U, or the lapse-to grade assigned by the course instructor.

The I grade is not appropriate for enrollments in thesis, dissertation, or research hours or the first semester of a two-semester sequence.

Waiting Grades (WG) are placeholders and should only be used in rare instances when, for reasons beyond his or her control, an instructor is not able to assign a course grade by the deadline. WG should not be used to delay evaluation of thesis or dissertation hour enrollments. This practice often leads to difficulties with timely graduation processing. WG is also not appropriate for students who are unable to submit their completed work by the grade deadline. In these cases an Incomplete may be more appropriate. Instructors should follow their unit’s internal guidelines for use of Incomplete.

In accordance with USRR 2.2.3.4, any incomplete (I) or waiting grade (WG) on the student’s transcript must be resolved before the College will preapprove the doctoral oral comprehensive exam. Additionally, the College will not approve an application for graduation if a waiting grade (WG) or an incomplete (I) grade remains on the student’s transcript.

**Credit/No Credit (CR/NC)**

The University establishes a time period each term during which students may elect a Credit/No Credit grading option for an individual course. Graduate students may elect the CR/NC option only for those courses that do not fulfill a degree requirement. Degree requirements include those courses used to fulfill the Research Skills and Responsible Scholarship requirement. CR/NC is elected via the Registrar’s electronic form (https://registrar.ku.edu/creditno-credit/). Students should consult with their advisor prior to electing the CR/NC option.

**College-Specific Grading Policy**

**A-F Plus/Minus (+-) Grades**

Plus/minus (+/-) grades may be used in the College. The plus or minus sign describes intermediate levels of performance between a maximum of A and a minimum of F. Intermediate grades are calculated as 0.3 units above or below the corresponding letter grade.

**Participation (P) Grades**

Use of the Participation (P) grade is restricted in the College. It is only approved for a limited number of courses for which special permission has been sought. When permission is granted, P is only used to indicate participation in thesis, dissertation, or research enrollments (related to thesis or dissertation), or in the first semester enrollment of a two-semester sequence course. In any semester when evidence about performance is available, the instructor may elect to assign a letter grade of A, B, C, D, or F. A letter grade (A, B, C, D, or F) must be assigned in the last semester of enrollment to characterize the quality of the final product.

If a department or program has a course for which the P grading system may be more appropriate than the A-F or S/U grading system, it must seek special approval from the College.

**Grading of Thesis and Dissertation Hours (and Approved Equivalents)**

The SP/LP/NP grading scale is restricted to thesis and dissertation hours, as well as those research courses approved by Graduate Studies as equivalents. It is the preferred scale for the grading of these courses in the College and is applied in the following manner:

- **SP - Satisfactory Progress.** Progress is consistent with the goals for the semester as agreed upon with the advisor; supports timely completion of the degree.
- **LP - Limited Progress.** Progress is less than what was agreed upon with the advisor; may cause delays in timely degree completion. Academic probation may be warranted.
- **NP - No Progress.** The student has provided no evidence of progress on the thesis or dissertation work, or work completed was insufficient to move the thesis or dissertation project forward. Probation is strongly encouraged and dismissal may be warranted.

To be eligible for graduation, the final semester of dissertation/thesis enrollment must be graded SP.

The College strongly encourages the use of the SP/LP/NP grading scale for thesis and dissertation courses. However, programs may elect to use any A-F scale. In no case is the S/U scale to be used for thesis or
dissertation hours or their equivalents. Per Graduate Studies policy, no more than 6 credit hours graded S/U may count toward a graduate degree.

**College-specific Admission Policy**

**Program Admission Deadlines**

For all graduate programs in the College of Liberal Arts & Sciences, no deadlines for the submission of applications for graduate study may fall on a weekend or a University-observed holiday.

During calendar years when an established admission deadline falls during one of these times, CLAS graduate programs must either:

- Allow the online application to remain open and applications to be accepted through the end of the first business day following the established deadline; or,
- Adjust the department’s established deadline for those years.

**Probation and Dismissal Guidelines in the College**

To be in good standing, a student must maintain a 3.0 cumulative grade-point average and be making satisfactory progress toward the degree, as determined by Graduate Studies’ Good Academic Standing policy and the department or program’s internal guidelines. The Good Academic Standing policy may be found in the Graduate Studies (p. 2449) section of the online catalog and the KU Policy Library. (http://policy.ku.edu/)

**Probation Due to GPA**

In any semester, a student whose cumulative GPA has fallen below a 3.0 is automatically placed on academic probation for the following semester (Fall or Spring). Students are notified by the College of their probationary status. The student has one semester (not including the summer term) in which to raise the cumulative GPA to a 3.0 or the College will dismiss the student. Refer to the Graduate Studies’ Academic Probation policy for more details. Departments may petition the College for the student to be granted a one-semester extension of the probation.

If a student’s cumulative GPA falls below a 2.5 as a result of the second or a subsequent semester of enrollment, the College will dismiss the student without eligibility for probation. Students whose GPA falls below 2.5 in the first semester of enrollment are eligible for probation with department recommendation. In the absence of this recommendation, the College will dismiss the student.

**Probation Due to Unsatisfactory Progress**

Upon recommendation of the department or program, a student may be placed on probation for failing to make satisfactory progress toward the degree. This may include, but is not limited to, failed exams or failure to make adequate and timely progress on the dissertation or thesis. See the Good Academic Standing policy in the Graduate Studies (p. 2449) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for more information on what constitutes satisfactory progress.

**Dismissal**

It is the academic unit’s responsibility to ensure that students who are not demonstrating academic achievement sufficient to meet the requirements of a College graduate degree or who are failing to make timely progress to the degree are dismissed from their programs. This typically occurs when a student fails to meet the terms of the probationary period. Academic dismissal should occur immediately following a student’s failure to meet the terms of the probationary period. If dismissal occurs during the semester, the dismissal is effective immediately and the student is administratively withdrawn from coursework. The department or program will notify the student in writing of the reasons for their dismissal. This will be followed by a letter from the College confirming the student’s dismissal from graduate study at KU.

A student who has been dismissed from a graduate program at KU is not eligible for readmission to graduate study in any department or program at the University of Kansas. A student may petition for an exception. The petition must be approved by the department to which the student intends to apply, the graduate division of the College, and the Dean of Graduate Studies. Such petitions are rarely approved.

**Time Limits**

The University and the College have established time limits governing various stages of the graduate student career.

**Maximum Time to Count Required Course Work**

Courses completed at the University of Kansas, or transfer credits from another university, are valid for a period of 10 years. Courses that were completed more than 10 years before the scheduling of the final defense may not be used to fulfill graduate degree requirements in the College of Liberal Arts and Sciences.

With the endorsement of their graduate programs, students may petition the College to accept out-of-date course work to fulfill the requirements for their graduate degrees, provided they are able to justify why this course work meets the current standards of scholarship in the discipline.

**Maximum Time to Submit Thesis or Dissertation**

The College requires that students make all final revisions and complete electronic submission of the final version of the thesis or dissertation manuscript to UMI within 6 months of the date of final presentation and/or defense of the thesis or dissertation work. Until the final manuscript of a thesis or dissertation is submitted, the student must be enrolled in accordance with enrollment policy. Graduate students in the College who do not file the final manuscript within the 6-month time limit must enroll in 3 hours a semester until the thesis or dissertation is completed and submitted.

**Maximum Time to Complete the Degree**

Graduate Studies has established time limits on master’s and doctoral degree completion. Please see Graduate Studies policies on Engagement and Enrollment in Doctoral Programs and Master’s Program Time Constraints in the Graduate Studies (p. 2449) sections of the online catalog and in the KU Policy Library (http://policy.ku.edu/) for full details.

Master’s degree students have a total of seven calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, in which to complete the work for a master’s degree.

Doctoral degree students have a total of 8 calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, to complete the Ph.D. This includes students who enter with a master’s degree from an institution other than KU and bachelor’s degree holders who bypass the master’s and are admitted directly to a Ph.D. program.
Students who complete a master’s and doctoral degree within the same academic unit at KU have 10 years to complete both degrees.

A time limit extension may be granted by the College. All extension petitions require the student and department to prepare and submit a Graduate Degree Completion Agreement, which must then be approved by a designated subcommittee of the Committee on Graduate Studies.

Per Graduate Studies policy, extensions may be granted for up to 1 year. However, additional time may be requested in the Completion Agreement. If a Completion Agreement with a timeline greater than one year is approved, the department must submit a renewal petition annually after the first year until the Completion Agreement has ended. Renewal petitions must indicate the student’s progress on the Completion Agreement and will receive expedited review.

**Academic and Research Integrity**

The College of Liberal Arts and Sciences strictly enforces KU and College policies on academic and scholarly misconduct. Academic integrity requires honest performance of academic and research responsibilities by students. These include, but are not limited to, ethical preparation of assignments, reports, and research papers; completion of examinations; ethical treatment of human and animal subjects; execution of administrative requirements; and a sincere and conscientious effort by students to abide by the policies set forth by instructors and research advisors.

**Graduation**

All graduate students must be enrolled the semester they complete all degree requirements.

Graduate Studies establishes an early deadline for degree completion for each semester and summer session, usually occurring at the end of the first 2 weeks of a semester or the end of the first week of summer session. If the student was enrolled the previous semester and meets all degree requirements including the submission of all required documentation by this early deadline, they are not required to enroll for that semester. The final Graduate Application for Graduation Deadline is set by the Registrar for each semester. Please consult the official Academic Calendar for specific dates. To be eligible for graduation, an application for degree must be submitted and all degree requirements met by this deadline. This includes the submission of all required documentation to the College Office of Graduate Affairs. See the Graduation section of the COGA (https://coga.ku.edu/preparing-to-graduate/) website for more information.

**Undergraduate Awards**

**Graduation with Honors**

Undergraduates may earn honors upon graduation in 3 ways, in addition to making the honor roll each semester. Students may graduate with distinction or highest distinction, earn departmental honors in the major, or complete the University Honors Program. It is possible to earn honors in 1 of these areas, any combination of them, or all 3. The award of honors is noted on the student’s transcript and in the Commencement program. Distinction and highest distinction are noted on the diploma.

**Graduation with Distinction or Highest Distinction**

The top 10 percent of each year’s graduating class is designated as graduating with distinction. Of these, the top one-third is designated as graduating with highest distinction. To be eligible, students must have completed at least 60 credit hours, graded A through F, in residence at KU (including the hours in which they are enrolled during the semester of graduation). Awards of distinction and highest distinction are based solely on the grade-point average determined by KU residence credit hours unless the overall grade-point average (including transfer hours) is lower than the residence grade-point average. In this case, the award is determined by the overall grade-point average.

**Graduation with Departmental Honors**

Most departments and programs allow qualified majors to work toward graduation with departmental honors. Graduation with departmental honors is awarded in recognition of exceptional performance in the major and completion of a program of independent research or an alternative project.

In addition to the requirements of individual departments and programs (which must be approved by the College committee on Undergraduate Studies and Advising - CUSA), the College requires the following for graduation with departmental honors:

1. Candidates must declare the intention to work for departmental honors with the appropriate departmental honors coordinator(s) no later than the time of enrollment for the final undergraduate semester, but sooner if required by the department(s). The intent form should be submitted to College Undergraduate Academic Services.
2. At the end of the final undergraduate semester, the candidate must have achieved a grade-point average of at least 3.5 in the major, including lower-level and upper-level work, work completed at KU, as well as other institutions. No minimum grade-point average is required to declare candidacy for graduation with departmental honors unless specified by the department. If the candidate uses KU’s Grade Replacement Policy, the grade that replaced the original KU grade will automatically apply toward the departmental honors GPA calculation.
3. Each candidate’s departmental honors work must include independent research or an acceptable alternative project. The results of the research are presented in a form appropriate to the requirements of the major department. Equivalents to the independent research component are established by approved departmental honors programs. In courses meeting the independent research requirement, the candidate must earn a grade of B or higher. Successful completion of all departmental honors requirements must be certified to the departmental honors coordinator(s) by a panel composed of at least three members of the College faculty who have read the report of the independent research and heard the oral presentation, where required.

**Petitions**

A department or program may petition to award graduation with departmental honors to deserving students who, for good reason, do not meet every College requirement. Petitions for exceptions should be submitted to the Committee on Undergraduate Studies and Advising (CUSA), via College Undergraduate Academic Services.
Late Completion of Honors Requirement

Requirements for graduation with honors may be completed after the date on which certifications are requested from departments, and in some cases, requirements, if not needed for graduation, may be completed after a student has graduated. However, the Incomplete policy does apply and grades would lapse at the time of graduation. When a candidate finishes all requirements, departments must notify College Undergraduate Academic Services in writing.

Honor Roll

Undergraduates with a minimum semester grade-point average of 3.5 who have completed at least 12 hours with letter grades (A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F) are recognized on the honor roll or dean's list in fall and spring. An Honor Roll notation appears on the transcript. See University Senate Rules and Regulations 2.4 for further details about GPA calculation.

Honors Program

The University Honors Program provides opportunities for outstanding and creative undergraduates in all schools at KU to develop their full potential during their undergraduate years. See Honors in this section of the online catalog for further information.

Graduate Awards

The College of Liberal Arts and Sciences offers several awards to recruit, support, and recognize outstanding graduate students, and to recognize faculty service, teaching excellence, and exemplary advising. Below, you will find a brief description of each award. More specific information about eligibility and the call for nominations each year can be found on the College's website under Awards & Opportunities (https://coga.ku.edu/awards/).

Graduate Student Awards

Chancellor's Doctoral Fellowship

Each year selected doctoral programs in the College award a Chancellor's Doctoral Fellowship to an incoming doctoral student of exceptional promise. Fellows receive five years of fellowship support for their doctoral work, including a $25,000 stipend plus resident rate tuition and required fees.

Dean's Doctoral Fellowship

Each year selected doctoral programs in the College award a Dean's Doctoral Fellowship to an incoming doctoral student of exceptional promise. Fellows receive up to five years of fellowship support for their doctoral work, including a stipend ranging from $20,000-22,000 plus resident rate tuition and required fees. Fellows must submit an application for external funding to be eligible for a fifth year of support.

Allen S. Wilber Scholarship

Selected departments may nominate one student each year for this award, which provides one-time funding of up to $10,000 for the study of social sciences or modern languages and literatures at the graduate level. The award is limited to those who completed an undergraduate degree at KU.

Outstanding Thesis/Research Project Award

The Committee on Graduate Studies in the College has established this award for students receiving a master's degree. The bi-annual award carries a $500 stipend, and either a thesis or research project awardee is selected in each cycle. Students are nominated for the award by their advisors.

Graduate Faculty Awards

Byron A. Alexander/John C. Wright Graduate Mentor Awards

Graduate students may nominate any tenured or tenure-track faculty member in the College of Liberal Arts and Sciences who has served as an outstanding mentor. The award amounts are up to $1,000.

Career Achievement Teaching Award

This annual award recognizes a retired faculty member in the College of Liberal Arts and Sciences who has made a significant contribution to the teaching of College students at either the undergraduate or graduate level and who has distinguished him/herself through excellence in teaching. The award amount is $1,000.

African & African-American St Courses

AAAS 102. Arabic and Islamic Studies. 3 Credits. SC W
An introduction to the study of Islam and the Arabic language in relation to Islamic cultures in Africa, the Mediterranean region, and beyond. Topics covered include the historical origins of Islam in relation to the Arabic language and its cultures of origin. This course is interdisciplinary, including attention to the topic from the perspectives of historical unfolding of both the language and religion, geographic and cultural perspectives, political and economic concerns, and aesthetic perspectives, including literature and the arts.

AAAS 103. Introduction to Africa. 3 Credits. NW/SC S/W
An introduction to the interdisciplinary study of African cultures and societies focusing on contemporary life on the continent. Topics to be covered include the geography, history, politics, and economics of the continent, as well as the religion, languages and literatures, music, and the arts. The interdisciplinary perspective will provide students with a sound basis for understanding contemporary African societies.

AAAS 104. Introduction to African-American Studies. 3 Credits. SC U
Interdisciplinary introduction to the basic concepts and literature in the disciplines covered in African American Studies. Includes the social sciences, and humanities (including history, religion, and literature) as well as conceptual framework for investigation and analysis of Black history and culture and society.

AAAS 105. Introduction to African History. 3 Credits. NW H/W
An introduction to important historical developments in Africa. Topics include empires, kingdoms, the slave trade, European colonialism, liberation movements, national identities, and a return to independence. (Same as HIST 104.)

AAAS 106. The Black Experience in the Americas. 3 Credits. HT H/W
An interdisciplinary study of the history of the African peoples of the New World, relating their cultures and institutions to the African background and to their peculiar New World experiences up to and including the nineteenth century. While the main emphasis is on the U.S.A., attention is also paid to the Caribbean and Latin America. Approaches include
demography, economics, social and political developments, literature, and music. (Same as HIST 109.)

**AAAS 115. Introduction to African History, Honors. 3 Credits. NW H/W**
An intensive version of AAAS 105/HIST 104. An introduction to important historical developments in Africa, mainly south of the Sahara. Topics include early history, empires, kingdoms and city-states, the slave trade, southern Africa, partition and colonialism, the independence era, military and civilian governments, and liberation movements. Approaches include literature, the visual arts, politics, economics, and geography. Open only to students in the University Honors Program or by consent of instructor.

**AAAS 116. The Black Experience in the Americas, Honors. 3 Credits. HT H**
An intensive version of AAAS 106. Open only to students on Dean's Honor Roll or enrolled in Honors Program, or consent of instructor.

**AAAS 160. Introduction to West African History. 3 Credits. W**
This course treats West African history through the first part of the twentieth century. The student is provided with a perspective on the major historical patterns that gave rise to West Africa's development as an integral part of world history. Special attention is paid to anthropological, geographical, and technological developments that influenced West African political and socioeconomic changes. (Same as HIST 160.)

**AAAS 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in African & African-American Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**AAAS 200. Directed Studies. 3 Credits. U**
This course is designed for the study of special topics related to Africana at the freshman/sophomore level. It prepares students for continued practice in cultural reading and writing and for the academic rigor that awaits them at the upper levels. Prerequisite: Consent of department.

**AAAS 203. Culture and Health. 3 Credits. H/W**
This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as GEOG 201 and GIST 210.)

**AAAS 204. Culture and Health, Honors. 3 Credits. H/W**
Honors version of AAAS 203, GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as GEOG 202 and GIST 211.)

**AAAS 250. Introduction to Translation and Translation Theory. 3 Credits. H**
This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat (oral) interpretation in detail. (Same as GERM 240, LING 250, SLAV 250 and SPAN 202.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

**AAAS 300. African Traditional Religion and Thought. 3 Credits. NW H/W**
A study of African traditional religious beliefs, systems and practices and how these have conditioned spiritual, moral and social values, attitudes, social relationships and institutions, art, literature and music. Topics covered include the African world-view, concepts of birth, life, marriage, death and reincarnation; the concurrent practice or monotheism, polytheism and the cult of the ancestors; and the extent of relevance to Black societies in the New World. Prerequisite: AAAS 103 or AAAS 105 or AAAS 106 or consent of instructor.

**AAAS 301. Haiti: Culture and Identity. 3 Credits. NW/SC H/W**
This course examines Haiti's identity and culture through historical, social, political, economic, linguistic and religious lenses. Through the study of texts, films and articles, it analyzes Haiti's place and influence in history as the first Black Republic and the second independent nation in the Western hemisphere. It also highlights Haiti's connections to the United States as well as other Latin American countries. No knowledge of Haitian or French required. Students may not receive credit for both HAIT 200 and AAAS 301.

**AAAS 302. Contemporary Haiti. 3 Credits. NW**
Detailed analysis of recent Haitian history. The focus will include interactions between religion, social structure, politics, economics and international relations. (Same as HAIT 300.) Prerequisite: AAAS 301/HAIT 200, or consent of instructor.

**AAAS 303. Peoples and Cultures of North Africa and the Middle East. 3 Credits. NW S**
This course familiarizes students with the peoples and cultures of North Africa and the Middle East. It examines the cultural, demographic, and religious diversity of the region, as well as the development of the early Islamic community and the formation of Islamic institutions. Issues such as religion and politics, inter-religious relations, nation-building, Islamic response to colonialism, Palestinian-Israeli conflict, Islamic resurgence, secularism, democratization, and gender, are also explored. (Same as ANTH 303.)

**AAAS 305. Modern Africa. 3 Credits. NW H/W**
A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as HIST 300.)

**AAAS 306. The Black Experience in the U.S. Since Emancipation. 3 Credits. H**
An interdisciplinary study of the history and culture of Black people in America from Reconstruction to the present. Topics covered include an analysis of Reconstruction, Black leaders, organizations and movements, the Harlem Renaissance, migration, and race relations. Demographic variables covered include socio-economic class, education, political persuasion, and influence by avant-garde cultural changes. (Same as AMS 306 and HIST 359.)

**AAAS 307. Modern Africa, Honors. 3 Credits. NW H**
An intensive version of HIST 300. A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as HIST 307.) Prerequisite: Open only to students admitted to the University Honors Program, or by consent of the instructor.

**AAAS 310. Introduction to Black Education in the US. 3 Credits.**
This course examines the educational experiences of African American children from Emancipation through more contemporary periods today. The class explores topics including intersectionality, schools and inequality, hip-hop education, post-Reconstruction, and race. The course centers education studies, children and youth studies, gender, history, social sciences, Black studies, policy, and law. The class is interdisciplinary and supports different fields of study across multiple degree programs.

**AAAS 314. The Black Church in America. 3 Credits. H**
This course covers the "visible" church, the "invisible" church, and the Black church as an "invisible institution," and shows how agency is ascribed through the Black church. The course covers the history, heritage, roles, social and spiritual theology and dynamics of the Black church and situates the Black church within the Abrahamic religions of Judaism, Christianity, and Islam, with Africa as the beginning site for understanding the Black church and its transmigration from its African roots to the present. The class shows how the Black church developed through spiritual/sacred and hegemonic encounters, prompting the rhetorical question posed by a prominent Black church scholar: "What is African American religion?" Because of the dominant American hegemony encountered by the Black church, it must be understood as part of a larger freedom-seeking agenda that allowed its members to assert power over competing images to shape the meaning of theological allegiance, as well as the treatment of black bodies, through theology, rituals, rites, ceremonies and other religious practices. Topics covered in the course include identity through the Black church, the black conversion experience, worship styles, Black preaching, Black music, gender roles, sexuality, liberation theology, health practices, and the impact of COVID-19 on the Black church. (Same as REL 314.)

**AAAS 316. Ministers and Magicians: Black Religions from Slavery to the Present. 3 Credits. H**
This course examines the history and diversity of African American religious expression from slavery until the present, emphasizing both mainstream and alternative faiths. It covers the religious world views of enslaved Africans, and examines faiths inside and outside of Christianity. Topics may include: independent black churches, magical practices, the Holiness and Pentecostal movements, black Islam, religious freemasonry, and esoteric faiths. The class emphasizes the influence of gender, class, race, migration, and urbanization on black religion. (Same as AMS 316 and HIST 316.)

**AAAS 320. African Studies In: ______. 3 Credits. NW H/W**
Lecture and discussion course in African area of current interest. May be repeated for credit toward the major.

**AAAS 321. African Studies In, Honors: ______. 3 Credits. H/W**
Lecture and discussion course in African area of current interest. May be repeated for credit toward the major. Only open to students admitted to the University Honors Program or with permission of the instructor.

**AAAS 322. Legal Issues and the African American. 3 Credits. H**
This course examines civil issues in African-American communities and populations, and their legal ramifications. Topics such as the penal system, court sentencing, death penalty, cultural norms, law enforcement and civil liberties are critically examined within social and humanistic theories.

**AAAS 323. African-American Studies In: ______. 3 Credits. H**
Lecture and discussion course in African-American area of current interest. May be repeated for credit toward the major.

**AAAS 325. Popular Black Music. 3 Credits. H**
This is a comparative study of popular music produced in Africa, and the African Diaspora. The praxis, theories, histories, forms, artists and audiences are discussed.

**AAAS 326. Social Media & African Popular Culture. 3 Credits. U**
This course deals with popular creative forms and critical commentaries (re)produced or/circulated by ordinary people - as opposed to the social and political elites - in the context of social media in Africa. Social media in Africa stages an unprecedented explosion of new popular forms, and digital genres circulate the perspectives of everyday people. With the understanding that popular culture is an arena in which non-elite subjects in different African countries create aesthetic forms, we will examine in this course the implications of literary and cultural expressions from different regions of Africa that are born-digital and mediated modes of subverting power and the normative culture. Students will explore how forms of popular culture-including Nollywood films, and other expressive forms on YouTube and other social media-serve as a running commentary both on contemporary Africa as well as on historical processes and changes in the continent.

**AAAS 327. African American Culture. 3 Credits.**
This course defines African American culture and seeks to identify ways in which it is distinct, both in terms of its roots and ongoing evolution.

**AAAS 330. Black Leadership. 3 Credits. H**
The course focuses on the concept of leadership and on Black leadership in the United States. An in-depth analysis of selected case studies of Black leaders both historical and contemporary. Some attention will be given to the dispersion of Africans into the Americas and the leadership that emerged, conditioned both by environmental factors and the psychology engendered by the system of slavery. Selected successful Black leaders will be invited to visit the class from time to time. (Same as AMS 340.)

**AAAS 332. Introduction to African Literature. 3 Credits. NW H/W**
Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention is paid to historical development and to traditional literature. (Same as ENGL 326.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**AAAS 333. Introduction to Caribbean Literature. 3 Credits. H/W**
Reading, analysis, and discussion of fiction, poetry, and drama from the Caribbean, including a small selection of Spanish, French, and Dutch Antillean works in translation. (Same as ENGL 339.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**AAAS 334. Introduction to African Dance Theatre. 2 Credits. NW U**
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as DANC 334 and THR 334.)

**AAAS 336. Introduction to African Literature, Honors. 3 Credits. NW H/W**
Reading, analysis and discussion of contemporary fiction, poetry, and drama from Africa. Brief attention is paid to historical development and to traditional literature. Prerequisite: Open only to students admitted to the University Honors Program or with consent of instructor. Not open to students who have taken AAAS 332.

**AAAS 340. Women in Contemporary African Literature. 3 Credits. NW H**
A critical study of issues and questions raised about women in contemporary African literature and implications for the larger society through the analysis of theme, language, characterization, roles and functions of women in selected works. (Same as WGSS 330.)

**AAAS 344. Black Feminist Theory. 3 Credits. HL H**

This course will study the critical discourse produced by black female intellectuals, writers, and activists about their race, gender, sexual, and class identities. Students will explore black women's distinct positionality through an examination of their theory as well as their praxis from the nineteenth century to the contemporary moment. By tracing the evolution of black feminist thought, the class will explore black women's initiation of and engagement with political, social, and artistic conversations in various fields of scholarly inquiry including-but not limited to-literature, history, sociology, political science, and the law. (Same as ENGL 344 and WGSS 344.) Prerequisite: WGSS 101, AAAS 104, or prior completion of one 200-level English course.

**AAAS 349. Islam. 3 Credits. NW H/W**

Islam's Origins, the prophet Muhammed, the Holy Koran, religious symbols and moral mandates, and historical developments. (Same as REL 350.)

**AAAS 351. Africa's Human Geographies. 3 Credits. NW S/W**

An introduction to historical, cultural, social, political, and economic issues in Africa from a geographic perspective. The course begins with the historical geography of humanity in Africa, from ancient times through to the present. Other topics include cultural dynamics, demography, health, rural development, urbanization, gender issues, and political geography. Case studies from Eastern and Southern Africa will be used to illustrate major themes. (Same as GEOG 351.)

**AAAS 353. Modern and Contemporary African Art. 3 Credits. H**

In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists' engagement with modernity, globalization, and contemporary issues, as well as interpretative influences and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 569/HA 569. (Same as HA 353.)

**AAAS 355. African Theatre and Drama. 3 Credits. NW H/W**

A study of the origin and development of continental African theatre and its affinity to the Levant. Traditional, colonial, and contemporary dramatic theories and experiments will be examined in play selections. (Same as THR 326.)

**AAAS 356. African-American Theatre and Drama. 3 Credits. H**

A historical study of Black theatre in the U.S.A. from its African genesis to its contemporary Americaness. Epochs in African-American dramaturgy will be critically examined. (Same as THR 327)

**AAAS 365. Politics in Africa. 3 Credits. W**

A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. Formerly known as POLS 665. Not open to students with credit in AAAS 600 or POLS 665. (Same as POLS 365.) Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor.

**AAAS 370. Introduction to the Languages of Africa. 3 Credits. NW H/W**

A survey of the indigenous languages of Africa from a linguistic perspective, covering the main language families and their geographic distribution, and focusing on the features and structure of the more widely spoken and representative languages in each family (e.g., Fula, Hausa, Maninka, Swahili, Yoruba). (Same as LING 370.)

**AAAS 372. Religion, Power, and Sexuality in Arab Societies. 3 Credits. NW S**

This course examines theories of religion, discourse, power, gender and sexuality in their application to Arab societies. The course introduces different aspects of Arab cultures. Through canonical works, we study political domination, tribal social organization, honor, tribe, shame, social loyalty, ritual initiations and discuss how these issues speak generally to anthropological inquiry. Regionally specific works are then framed by an additional set of readings drawn from anthropological, linguistics, and social theories. (Same as ANTH 372.)

**AAAS 377. African Design. 3 Credits. H/W**

This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 677/HA 677. (Same as HA 377.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

**AAAS 380. African Art and Gender. 3 Credits. HL H**

How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 780/HA 780. (Same as HA 360 and WGSS 380.)

**AAAS 388. The Black Woman. 3 Credits. S/W**

An interdisciplinary study of the role of Black women in our society, from the African background through the plantation experience to the present. Prerequisite: One course in the social sciences and/or humanities or consent of instructor.

**AAAS 400. Readings in:_____. 3 Credits. U**

Investigation of a subject selected by a student in consultation with a departmental adviser and conducted under supervision. Individual reports and conferences. Open only to students who have completed at least six credit hours in African and African-American studies. Cannot be repeated for credit. Prerequisite: Consent of instructor.

**AAAS 415. Women and Islam. 3 Credits. H/W**

Addresses the widely-held stereotype of Muslim women as pawns in a patriarchal socio-religious context. Investigating the Muslim cultures of certain regions, the course will examine the manner in which indigenous
culture was influenced by the introduction of Islam and the historical impact of Islam on women's social roles. Focusing principally on social change in the 20th century, the course will consider how socio-political change affects religious roles where religion is integrally involved in daily life. To what extent is individualism valued, and how are the pressures of late 20th century life mediated? The course will draw on texts from history, sociology, and literature. Prerequisite: REL 107 or AAAS 349/REL 350 or consent of instructor.

AAAS 420. Intercultural Communication: The Afro-American. 3 Credits. H/W
An examination of the barriers to effective communication between black Americans and non-black Americans. (Same as COMS 447.) Prerequisite: COMS 130 or COMS 230.

AAAS 429. Postcolonial Theatre and Drama. 3 Credits. NW H/W
This course develops an understanding of the postcolonial concept and its different manifestations in theatre and drama across nations and cultures. It approaches postcolonialism as a way of reading theatre, and as a genre within theatre by exploring how the "colonial project" has reconfigured the concept, content, and context of theatre in both colonized and colonizing cultures. In addition to the study of postcolonial playwrights and their works, the course is also an introduction to postcolonial theory and its critics. (Same as THR 429.)

AAAS 432. Francophone African Literature. 3 Credits. NW H/W
This course is an introduction to 20th century African literature written in French, covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include negritude, African identity in the wake of colonialism, Islam, and women's writing. Classes will be conducted in English. Students may read the texts in French or in translation. (Same as FREN 432.) Prerequisite: ENGL 102 and a 200-level English course.

AAAS 433. Islamic Literature. 3 Credits. NW H/W
This course focuses on literature that reflects Islamic culture from its inception to contemporary times. Beginning with attention to the importance of the spoken word in the establishment of Islam, course readings and lectures follow the place of literary works in confirming Islamic perspectives. Readings include selections from the Qur'an, classical works of poetry and narrative, and contemporary autobiography. Authors are from Africa and the region of the Golden Age of Islam, including the best known: al-Ghazzali (d.1111 C.E.), Attar (d. circa 1193-1235), Ibn Arabi (d. 1240 C.E.), Rumi (d. 1273), Saadi (d.1291), Hafiz (d. 1389 C.E.), and Shah (contemporary), as well as readings by and about less well known Muslim women scholars and Sufis in all historical periods. Readings are all in English translations.

AAAS 434. African Women Writers. 3 Credits. NW H/W
This course focuses on four decades of African women's writing from all regions of the continent. Works included deal with a wide variety of issues relevant to African women, as well as universal issues of conceptions of gender roles, and the struggle to attain personal rights and freedom within traditional cultural frameworks.

AAAS 435. Muslim Women's Autobiography. 3 Credits. NW H/W
This course examines the realities of Muslim women's experiences as conveyed in their own voices. Works are drawn from all over the world, from Africa and the Middle East to Europe and the U.S. and cover the nineteenth and twentieth centuries.

AAAS 437. Global Ethnic and Racial Relations. 3 Credits. W
This course uses written and visual materials to examine race, ethnicity, and nationalism around the world. Emphasis is on ways in which social forces, gender roles, sexual practices, cultural patterns, and political organization work together to construct and reinforce ethnic, racial, and national identities, boundaries, movements, and conflicts. Historical and contemporary comparisons are made between the U.S. and countries in Africa, Asia, the Americas, the Caribbean, Europe, the Pacific Islands, and the Middle East. (Same as AMS 437 and SOC 437.)

AAAS 442. The Politics of Racial Injustice in the United States. 3 Credits.
In this course, students will examine, in detail, four historical eras in which the American people struggled over anti-Black racial injustice in the United States. While the role and efficacy of social change movements and grass-roots activism in that struggle will be analyzed, the course will emphasize political, policy, and institutional responses and remedies to the problem of American racism. In particular, discussions, readings, and assignments will evaluate the successes and failures of specific legislative, judicial, administrative, and organizational interventions. How and why these responses developed and fared as they did as well as the debates over their efficacy will be the focal point of this course. (Same as HIST 442.)

AAAS 450. Popular Culture in the Muslim World. 3 Credits. NW H/W
A study of pop songs, television, comics, and other idioms of popular culture from different parts of the Muslim world, with attention to Muslims' sense of humor, tragedy, aesthetics, and pertinent issues of the day. (Same as REL 450.)

AAAS 460. Topics and Problems in African and African-American Studies. 1-3 Credits. H/W
Individual investigation of special topics in African and African-American studies. May not be repeated for credit toward the major. Prerequisite: Six hours in African and African-American studies or consent of instructor.

AAAS 470. Language and Society in Africa. 3 Credits. NW H/W
Examines issues and problems associated with language use in sub-Saharan Africa from a sociological perspective. Topics covered include an overview of the types of languages spoken on the continent: indigenous languages, colonial languages, pidgins and creoles, and Arabic as a religious language; problems associated with the politics of literacy and language planning; writing and standardization of indigenous languages; and the cultural and ideological dilemmas of language choice. (Same as LING 470.) Prerequisite: AAAS 103, AAAS 305, or LING 106; or consent of instructor.

AAAS 496. Field Experience. 3 Credits. H/W
A supervised placement in practical situations where students actively participate in organized work within the community, to be completed with an acceptable paper. The course may be taken in the United States, Caribbean, or Africa to meet the B.A. degree requirement in African and African-American Studies. Open only to junior and senior majors or by consent of the department.

AAAS 501. Regional History: _____ 3 Credits. H/W
A survey of the major political, social, economic and intellectual trends in a region of Africa or the Americas. Prerequisite: Five hours of distribution courses in history.

AAAS 502. Directed Language Study: _____ 5 Credits. U
Study of an African language at Elementary I and Elementary II levels under individual supervision and with the aid of self-instructional material. Open to juniors and seniors in good standing and graduate students only and with permission of the department. May be repeated for up to 10 credit hours. Cannot be used to fulfill BA foreign language requirement.

AAAS 503. Directed Language Study: _____ 3 Credits. U
Study of an African language at Intermediate I and Intermediate II levels under individual supervision and with the aid of self-instructional material. Open to juniors and seniors in good standing and graduate students only.
and with permission of the department. May be repeated for up to 6 credit hours. Cannot be used to fulfill BA foreign language requirement.

**AAAS 504. Directed Language Study I:** _____ 3 Credits. U
Study of an African language at Advanced I and Advanced II levels under individual supervision and with the aid of self-instructional material. Open only to juniors and seniors in good standing, graduate students and with permission of the department. May be repeated for up to 6 credit hours. Cannot be used to fulfill BA language requirement.

**AAAS 505. Directed Language Study II:** _____ 3 Credits. U
Designed for native and near native speakers, this course involves reading of materials published in an African language intended for conversation, oral presentation, and writing by native speakers. May be repeated for up to 6 credit hours. Prerequisite: Native or near native speaker proficiency or consent of instructor.

**AAAS 511. The Civil Rights Movement.** 3 Credits. H
An examination of the Civil Rights Movement in American History. Emphasis is placed on the activities of major Civil Rights organizations, Civil Rights legislation and its impact on American life, and conflicts between integrationist and separatist forces in politics, economics, education, culture and race relations in the United States. (Same as HIST 514.)

**AAAS 518. Capitalism and the Black Experience.** 3 Credits. H
This is an upper level course designed to analyze the experiences that define the African American relationship to the American economy. The course begins with the slave trade and ends in the present. It explores and explains how African American economic development intimately intertwined with the movement for freedom. Students will learn how African Americans addressed issues around slavery, housing, banking, capitalism/socialism, underground economy, and gentrification. This course is chronological in nature with thematic elements. Lectures will provide brief histories and conceptual framework for readings. This background will help students understand and explore how black identity, culture, and politics interact with economy. However, the bulk of the course will operate as a seminar. By the end of the course, students will be able to summarize African American past experiences with capitalism and its relevance to contemporary economic issues affecting African American people today. (Same as AMS 518 and HIST 518.) Prerequisite: Any American Studies or History courses on African American History.

**AAAS 520. African Studies in: _____ 3 Credits. NW H/W**
Upper level lecture and discussion courses in African area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Prerequisite: Junior/Senior in good standing.

**AAAS 521. African Studies In, Honors: _____ 3 Credits. H/W**
Upper level lecture and discussion courses in African area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Prerequisite: Junior/Senior in good standing.

**AAAS 522. African-American Studies in: _____ 3 Credits. H**
Upper level lecture and discussion courses in African-American area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Prerequisite: Junior/Senior in good standing.

**AAAS 524. African-American Studies In, Honors: _____ 3 Credits. H**
Upper level lecture and discussion courses in African-American area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Only open to students admitted to the University Honors Program or with permission of the instructor. Prerequisite: Junior/senior in good standing.

**AAAS 532. Studies in Islam.** 3 Credits. H
Study of religious thought, practice, and institutions of Islam with an emphasis on the examination of primary documents.

**AAAS 534. The Rhetoric of Black Americans.** 3 Credits. H
A study of the rhetoric of Black Americans, from their earliest protest efforts to the contemporary scene, with the focus on the methods and themes employed to alter their status in American society. (Same as COMS 551.) Prerequisite: COMS 130. Skills in basic composition essential.

**AAAS 536. Islamic Art and Architecture in Africa.** 3 Credits. N
Study of Islamic art and architecture in various cultural and geographical settings, from the first mosques of North African and the Swahili coast to contemporary Islamized masquerades in West Africa. We consider art objects and architectural sites in terms of religious practice, trade and commerce, ritual and political power, and contemporary expression. (Same as HA 536.) Prerequisite: AAAS 102, AAAS 103, HA 100, or HA 150; or permission of instructor.

**AAAS 543. Language and Culture in Arabic-Speaking Communities.** 3 Credits. W
The course examines the links between language structure, patterns of use, language choice, and language attitudes in the diglossic and bilingual Arabic-speaking communities. It also explores language as a reflector and creator of Arab culture (e.g. linguistic encoding of politeness, the Quranic text as the spoken and written word, the role of tropes in Arabic rhetoric). The topics for discussion range from the micro-level language choice to the macro-level issues of national language policies and planning within the domain of government and education across the Arab world. (Same as LING 543.)

**AAAS 545. Unveiling the Veil.** 3 Credits. NW H
This course seeks to unveil a complex cultural practice that has been misconstrued by many scholars. It explores the versatility of the meaning of the veil. It examines the ways in which the veil has become a symbol of privacy, cultural identity, religious assertion, resistance and liberation, besides being a symbol of constraint, oppression, backwardness, and sexual mystery.

**AAAS 550. Senior Seminar in: _____ 3 Credits. H/W**
Small discussion groups, each designed to consider a specific, clearly defined topic, using an interdisciplinary approach and requiring the demonstration of a comprehensive knowledge of the fundamentals in the field as appropriate to the topic. Class discussion based on student presentations. Prerequisite: Senior majors; special departmental permission for other seniors.

**AAAS 551. Environmental Issues in Africa.** 3 Credits. S
Acquaints students with the complexities of debates on environmental problems in Sub-Saharan Africa. Topics addressed may include deforestation, desert expansion, wildlife conservation, soil erosion, climate change, coral reef destruction, water resources development, mangrove preservation, and the environmental effects of war, industrialization, and urbanization. Class presentations and projects synthesize the perspectives of both human and physical geography. (Same as GEOG 550.) Prerequisite: GEOG 104 or permission of instructor.

**AAAS 553. Geography of African Development.** 3 Credits. W
Acquaints students with the values and social parameters of African agricultural and pastoral practice. Topics include customary land rights, African perspectives on the natural world, gender issues in African agriculture, and the urbanization of African cultures. The course also contrasts African views with those of Western development practitioners.
and donor agencies. Case studies from different countries are used to highlight the continent's regional differences. (Same as GEOG 553.)

AAAS 554. Contemporary Health Issues in Africa. 3 Credits. S
The course examines health and nutrition in African communities, using the methods of biological and medical anthropology. Fundamental to the approach taken in the course is the understanding that the health of human groups depends on interactions between biological and cultural phenomena in a particular ecological context. One topic will be selected per semester to examine in detail the full array of epidemiological factors contributing to patterns of specific diseases. AIDS, childhood diseases, and reproductive health of African women are among possible topics. Course material will be selected from scholarly and medical publications, as well as coverage in the popular media. The use of a variety of sources will enhance understanding of the biological and cultural issues involved, and will help students identify possible bias and misinformation in popular coverage of events such as famine or epidemic in African settings. (Same as ANTH 545.) Prerequisite: An introductory course in either Anthropology or African Studies.

AAAS 555. African Film. 3 Credits. W
A critical study of Africa and its peoples as depicted in films. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films are examined. (Same as FMS 544.)

AAAS 560. Race, Gender and Empire. 3 Credits. NW
This course considers how colonialism has shaped race and gender, historically and today. It explores how Europeans justified colonial rule through sexist beliefs about Native peoples and how sexual exploitation was built into colonial occupation. Film, literature, and political essays help us examine the lasting legacies of these ideas and resistance against them - a field known as postcolonial studies. We use this lens to trace historical attitudes about the white man's burden into contemporary issues in international politics, asking how human rights programs and military intervention maintain global inequality and produce new kinds of empires. (Same as WGSS 560.) Prerequisite: Any WGSS or AAAS course, or permission of the instructor.

AAAS 561. Liberation in Southern Africa. 3 Credits. W
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as HIST 561 and POLS 561.)

AAAS 569. Modern and Contemporary African Art. 3 Credits. H
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists' engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 353/HA 353. (Same as HA 569.) Prerequisite: Junior/Senior standing and at least one course at the 100-level or above in AAAS or HA.

AAAS 574. Slavery in the New World. 3 Credits. H/W
Slavery, slave culture, and the slave trade in the U.S., Latin America, and the Caribbean will be examined comparatively. Attention will also be given to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. (Same as HIST 574.)

AAAS 583. Migration, Diasporas and Development. 3 Credits. S
This course introduces students to key concepts in global migration and its implications on development in migrant sending states particularly those on the African continent. It will explore the various migration patterns from Africa (e.g. migration between North Africa and Europe in the aftermath of the Arab Spring), South-South migration, the 'brain drain' of skilled professionals and its implications for development, and the role of diasporas in development. The course will also assess the integration of migrants in major migrant destination regions. Finally, the course will provide students with an opportunity to critically examine the relationship between migration and development in a particular national context of their choice. (Same as GEOG 583.) Prerequisite: GEOG 102 or consent of instructor.

AAAS 584. Black American Literature. 3 Credits. H
A study of the literature written by Black Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of Black literature as well as on a critical analysis of major autobiographical, poetic, and fictional works.

AAAS 598. Sexuality and Gender in African History. 3 Credits. W
An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project in consultation with the instructor. (Same as HIST 598 and WGSS 598.)

AAAS 600. Politics in Africa. 3 Credits. W
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in AAAS 365/POLS 365. Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor.

AAAS 611. History of the Black Power Movement. 3 Credits. H
Examines the Black Power Movement in its many manifestations, beginning with a discussion of its political and cultural background: the transition from Civil Rights to Black Power in the African American Freedom Movement of the 1960s; the impact on African Americans of African decolonization and the spread of anti-colonial and anti-imperialist movements throughout other parts of the globe. The course also examines the Black Arts Movement and its influence on the Black Power Movement and vise versa. Therefore, some attention will also be paid to the music, literature, theater, and the graphic arts of the period, and the aesthetic and political critiques of these artistic forms. Prerequisite: AAAS 511 not required but recommended.

AAAS 630. The Life and Intellectual Thought of W.E.B. Du Bois. 3 Credits. H
A critical examination of W. E. B. Du Bois, paramount black scholar and activist whose massive body of scholarly work spans the period from late 19th through the mid-20th centuries. Course covers the major works of Du Bois. Topics include Du Bois as sociologist, historian, propagandist, and creative writer. Moreover, the course deals with Du Bois as an intellectual

AAAS 657. Women and Gender in Islam. 3 Credits. W
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. (Not open to students who have taken REL 357.) (Same as REL 657.) Prerequisite: AAAS 349/REL 350, graduate standing, or permission of instructor.

AAAS 662. Gender and Politics in Africa. 3 Credits. S
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political roles during the pre-colonial and colonial society. Next, we examine the impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender and development, HIV/AIDS and women's health, gender and militarism. We also explore women's roles in political institutions, civil society organizations, trade and labor unions, and transnational movements. We also examine contemporary constructions of masculinity and femininity in African states and explore how these constructions affect social policy and national political agendas. (Same as POLS 662 and WGSS 662.) Prerequisite: Sophomore level or consent of instructor.

AAAS 677. African Design. 3 Credits. NW H/W
This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 377/HA 377. (Same as HA 677.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

AAAS 690. Investigation and Conference. 1-3 Credits. H/W
Individual and supervised readings in selected areas of African and African-American studies which will be an investigation of a subject selected by the student with the advice and direction of an instructor. Individual reports and conferences. Prerequisite: Seniors and consent of department.

AAAS 695. Honors Project In: ______. 3 Credits. H
An individual research project in African-American or African studies under the direction of a specialist in the area of the student's interest, the results of the project to be presented in written form and to be defended before a committee of three faculty members as provided for under the requirements for Honors. Majors only and permission of instructor.

AAAS 700. Africa in World Politics. 3 Credits.
A 20th-century and 21st-century study of the combined internal and external forces that precipitated the rise of Africa, the major African issues in international relations, and Africa's impact on the modern world. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 701. Politics in Africa. 3 Credits.
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 715. Seminar in African Art. 3 Credits.
A concentrated study of a special topic relating to African Art studies. Different topics are offered in different semesters. Prerequisite: Nine hours of Art History and/or consent of instructor.

AAAS 716. Women in Islam. 3 Credits.
Addresses the widely-held stereotype of Muslim women as pawns in a patriarchal socio-religious context. Investigating the Muslim cultures of certain regions, the course will examine the manner in which indigenous culture was influenced by the introduction of Islam and the historical impact of Islam on women's social roles. Focusing principally on contemporary social change, the course will consider how socio-political change affects religious roles where religion is integrally involved in daily life. To what extent is individualism valued, and how are the pressures of late 20th-century and early 21st-century life mediated? The course will draw on texts from history, sociology, and literature. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 720. Intercultural Communication: The Afro-American. 3 Credits.
An examination of the barriers to effective communication between Black Americans and non-Black Americans. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 723. Special Topics in Africana Studies: ______. 3 Credits.
Seminar in an area of current interest in African and African-American Studies. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 727. African-American Culture. 3 Credits.
This course defines African American culture and identifies ways in which it is distinct. The course identifies the roots of African American culture, as well as the transformations occurring over time. The course covers identity issues and considers the possibility of complex, multi-identity structures. The course addresses the issues of whether there is a common narrative or a common root metaphor for African American culture, how this is known epistemologically, internally and externally, and how epistemological "knowledge" is appropriated. Course pedagogy includes text readings, case studies, performance events, and media events.

AAAS 730. Black Leadership. 3 Credits.
The course focuses on the concept of leadership and on Black leadership in the United States. An in-depth analysis of selected case studies of Black leaders both historical and contemporary. Some attention will be given to the dispersion of Africans into the Americas and the leadership that emerged, conditioned both by environmental factors and the psychology engendered by the system of slavery. Selected successful Black leaders will be invited to visit the class from time to time. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 731. African Literature. 3 Credits.
Introduction to African Literature. Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention will be paid to historical development and to traditional literature. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 732. Francophone African Literature. 3 Credits.
This course is an introduction to 20th-century and modern Francophone African literature covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include negritude, African identity in the wake of colonialism, Islam, and women's writing. Classes will be conducted in English. Students may read the texts in French or in translation. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 733. Islamic Literature. 3 Credits.
Contemporary literature that is set in the context of Muslim cultures provides for an examination of Muslim identity on its own terms. This course focuses on the literary examination of works by Muslim authors from Egypt, Sudan, Senegal, Guinea, Mali, Morocco, Nigeria, and Niger. From the perspective of both male and female authors, the issue of what it means to be a Muslim is considered through fictional accounts set in contemporary contexts. Some works will be read in translation from Arabic or French; others are written originally in English. Cultures considered in this course vary widely in their origins and customs, which allows for a focus on the one pervasive element they share in common: Islam as it shapes people's lives. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 734. African Women Writers. 3 Credits.
This course focuses on African women's writing from all regions of the continent. Works included deal with a wide variety of issues relevant to African women, as well as universal issues of conceptions of gender roles, and the struggle to attain personal rights and freedom within traditional cultural frameworks. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 749. Islam. 3 Credits.
Islam's origins, the prophet Muhammed, the Holy Koran, religious symbols and moral mandates, and historical developments. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 750. Popular Culture in the Muslim World. 3 Credits.
A study of pop songs, television, comics, and other idioms of popular culture from different parts of the Muslim world, with attention to Muslims' sense of humor, tragedy, aesthetics, and pertinent issues of the day.

AAAS 760. Topics and Problems in African and African-American Studies. 3 Credits.
Individual investigation of special topics in African and African-American studies. May not be repeated for credit. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 770. Language and Society in Africa. 3 Credits.
Examines issues and problems associated with language use in sub-Saharan Africa from a sociological perspective. Topics covered include an overview of the types of languages spoken on the continent: indigenous languages, colonial languages, pidgins and creoles, and Arabic as a religious language; problems associated with the politics of literacy and language planning, writing and standardization of indigenous languages; and the cultural and ideological dilemmas of language choice. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 774. Topics in Literatures of Africa and the African Diaspora: _____ . 3 Credits.
An intensive study of the literatures of Africa and/or African diaspora (people of African descent dispersed around the world). This study will focus on the major characteristics of a particular period, genre, mode, and/or theme in literatures such as African, Caribbean, Afro-Brazilian, African American, African Canadian, Black British. Critical theories pertinent to writers and their work will be covered. Topics may include studies in drama, poetry, or the novel; migration narratives; literature of a particular era, such as the Harlem Renaissance, Negritude, or the Black Arts Movement; representations of gender, etc. As topics vary by semester, the course may be repeated for credit. (Same as ENGL 774.)

AAAS 780. African Art and Gender. 3 Credits.
How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 380/HA 360/WGSS 380. (Same as HA 780.) Prerequisite: Any previous AAAS course.

AAAS 788. The Black Woman. 3 Credits.
An interdisciplinary study of the role of Black women in our society, from the African background through the plantation experience to the present. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 801. Introduction to Africana Studies: African-American. 3 Credits.
An introduction to, and overview of, the historical, intellectual, and professional foundations of African-American Studies; a multidisciplinary examination of the key texts and issues in the field. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 802. Introduction to Africana Studies: African. 3 Credits.
An introduction to, and overview of, the historical, intellectual, and professional foundations of African Studies; a multidisciplinary examination of the key texts and issues in the field. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 803. Research Methods in Africana Studies. 3 Credits.
A multidisciplinary introduction to the range of research methods employed to examine African and African-American history, cultures, and societies. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 804. Seminar in Africana Studies. 3 Credits.
An interdisciplinary, comparative exploration of the histories, cultures, and societies of Africans and peoples of African descent. Students will be required to utilize the skills gained in AAAS 801 and AAAS 802 to design and implement a project that will be critically assessed in the seminar. Additional advanced-level coursework is required for students in this
course beyond lower-level courses of the same name and/or description. Prerequisite: AAAS 801 and AAAS 802 or consent of instructor.

AAAS 811. The Civil Rights Movement. 3 Credits.
An examination of the Civil Rights Movement in American History. Emphasis is placed on the activities of major Civil Rights organizations, Civil Rights legislation and its impact on American life, and conflicts between integrationist and separatist forces in politics, economics, education, culture and race relations in the United States. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 812. The Black Power Movement. 3 Credits.
This course will examine the Black Power Movement in its many manifestations, beginning with a discussion of its political and cultural background: the transition from Civil Rights to Black Power in the Afro-American freedom movement of 1960's; the impact on African Americans of African decolonization and the spread of anti-colonial and anti-imperialist movements throughout other parts of the globe. There will also be some examination of the Black Arts Movement and its influence on the Black Power Movement and vice versa. Therefore, some attention will also be paid to the music, literature, theater, and the graphic arts of the period, and the aesthetic and political critiques of these artistic forms. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 827. Popular Culture in Africa. 3 Credits.
This course examines multiple expressions of popular culture in contemporary Africa, focusing on the aesthetics of forms such as music, theatre, dress, street art, and popular literary genres, as well as the social themes they deal with and the societies that produce them. The approach will be based on a critical reconsideration of notions such as traditional versus modern culture, elite versus folk art, westernization, and cultural hybridity, in order to find better ways of discussing the cultural vibrancy of everyday life in contemporary Africa. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 830. The Life and Times of W.E.B. Du Bois. 3 Credits.
A critical examination of the life and thought of W. E. B. Du Bois, paramount black scholar and activist whose massive body of scholarly work spans the period from late 19th through the mid-20th centuries. Course covers the major works of Du Bois. Topics include Du Bois as sociologist, historian, propagandist, and creative writer, taking into account his often shifting views on art and culture, politics, leadership, civil rights and the color line, trade unionism, Pan-Africanism, socialism, internationalism, and, of course, double consciousness, among other issues. Moreover, the course will deal with Du Bois as an intellectual in conversation with other black thinkers, including individuals such as Booker T. Washington, Alexander Crummell, Anna Julia Cooper, Ida B. Wells-Barnett, Marcus Garvey, E. Franklin Frazier, Walter White and Thurgood Marshall. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 832. Comparative Black Literature. 3 Credits.
Reading, analysis, and discussion of contemporary fiction, poetry, and drama from Africa, the Caribbean, and the United States. Brief attention will be paid to historical development and to traditional literature. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 834. The Rhetoric of Black Americans. 3 Credits.
A study of the rhetoric of Black Americans, from their earliest protest efforts to the contemporary scene, with the focus on the methods and themes employed to alter their status in American society. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 843. Language and Culture in Arabic-Speaking Communities. 3 Credits.
The course examines the links between language structure, patterns of use, language choice, and language attitudes in the diglossic and bilingual Arabic-speaking communities. It also explores language as a reflector and creator of Arab culture (e.g. linguistic encoding of politeness, the Quranic text as the spoken and written word, the role of tropes in Arabic rhetoric). The topics for discussion range from the micro-level language choice to the macro-level issues of national language policies and planning within the domain of government and education across the Arab world. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 851. Environmental Issues in Africa. 3 Credits.
Acquaints students with the complexities of debates on environmental problems in Sub-Saharan Africa. Topics addressed may include deforestation, desert expansion, wildlife conservation, soil erosion, climate change, coral reef destruction, water resources development, mangrove preservation, and the environmental effects of war, industrialization, and urbanization. Class presentations and projects synthesize the perspectives of both human and physical geography. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 853. Geography of African Development. 3 Credits.
Acquaints students with the values and social parameters of African agricultural and pastoral practice. Topics include customary land rights, African perspectives on the natural world, gender issues in African agriculture, and the urbanization of African cultures. The course also contrasts African views with those of Western development practitioners and donor agencies. Case studies from different countries are used to highlight the continent's regional differences. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 855. African Film and Video. 3 Credits.
A critical study of Africa and its peoples as depicted in films and videos. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films and videos will be examined. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 874. Slavery in the New World. 3 Credits.
Slavery, slave culture, and the slave trade in the U.S., Latin America, and the Caribbean will be examined comparatively. Attention will also be given to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 884. Black American Literature. 3 Credits.
A study of the literature written by Black Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of Black literature as well as on a critical analysis of major autobiographical, poetic, and fictional works. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 885. Race and the American Theatre. 3 Credits.
The representation(s) of race in significant texts and performance styles in American theatre analyzed according to political ideologies, dramatic
movements and the impact of these factors on the representation of the "other" in the theatre.

AAAS 890. The Rise and Fall of Apartheid. 3 Credits.
This course will deal with the fifty years of South African history during which apartheid came to be formulated, supported, and perpetuated, and the forces that were responsible for its disintegration by 1990. Reference will also be made to the transformation process since April 1994. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 898. Sexuality and Gender in African History. 3 Credits.
An examination of the history of sexuality and gender in Africa focused on the 19th-century to the present. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 899. Thesis. 1-6 Credits.
Investigation and research of a topic for a master's thesis. A maximum of 6 thesis hours may be counted toward the 33 hours required for the degree.

African & African-American St Courses

AMHR 110. Elementary Amharic I. 5 Credits. U F1
Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of Amharic.

AMHR 120. Elementary Amharic II. 5 Credits. U F2
A continuation of AMHR 110. Readings in cultural texts. Prerequisite: AMHR 110.

AMHR 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Amharic. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

AMHR 210. Intermediate Amharic I. 3 Credits. U F3
Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Amharic texts and discussion in Amharic. Prerequisite: AMHR 120.

AMHR 220. Intermediate Amharic II. 3 Credits. U F4

African & African-American St Courses

ARAB 101. Introduction to Modern Standard Arabic. 3 Credits. NW
The goal of this course is to begin developing reading, speaking, listening, writing, and the essentials of Modern Standard Arabic grammar. This course will also provide an introduction to the culture of the Arabic speaking world. Three hours of class per week delivered face-to-face plus outside use of recorded text materials. This course does not satisfy any KU language requirement. Prerequisite: Instructor permission required.

ARAB 102. Introduction to Modern Standard Arabic II. 3 Credits. NW
Continuation of ARAB 101. Further development of basic familiarity with the Modern Standard Arabic language, focusing on speaking, listening, reading, writing, and the essentials of Arabic grammar. Continued exploration of the culture of the Arab-speaking world. Three hours of class per week delivered face-to face plus outside use of recorded text materials. This course does not satisfy any KU language requirement. Prerequisite: ARAB 101.

ARAB 110. Elementary Arabic I. 5 Credits. U F1
Five hours of class per week. Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of Arabic.

ARAB 120. Elementary Arabic II. 5 Credits. U F2
Five hours of class per week. A continuation of ARAB 110. Readings in cultural texts. Prerequisite: ARAB 110.

ARAB 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Arabic. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

ARAB 210. Intermediate Arabic I. 3 Credits. U F3
Three hours of class conducted in Arabic. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Arabic texts and discussion in Arabic. Prerequisite: ARAB 120.

ARAB 220. Intermediate Arabic II. 3 Credits. U F4
Three hours of class conducted in Arabic. Continuation of ARAB 210. Discussion in Arabic of texts studied. Prerequisite: ARAB 210.

ARAB 310. Advanced Arabic I. 3 Credits. U FP
A practical Arabic language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Arabic. Designed for students who have had two or more years of Arabic study. Open to native speakers. Prerequisite: ARAB 220 or consent of instructor.

ARAB 320. Advanced Arabic II. 3 Credits. FP
A continuation of ARAB 310. Prerequisite: Satisfactory completion of ARAB 310 or consent of instructor.

ARAB 401. Readings in Arabic I. 3 Credits. U FP
Designed for native and near-native speakers, this course involves reading newspapers and other publications in the language intended for native speakers, conversation, oral presentations, and advanced grammar. Prerequisite: Native or near-native speaker proficiency or consent of instructor.

ARAB 402. Readings in Arabic II. 3 Credits. U FP
Continuation of ARAB 401.

African & African-American St Courses

HAIT 110. Elementary Haitian I. 3 Credits. U F1
Beginning course in the vernacular language of Haiti, Martinique, Guadeloupe and other areas of the Caribbean and the Indian Ocean. Conversational approach, with essentials of grammar. Reading of basic texts. Special attention to folk culture as expressed by language. No previous knowledge of another foreign language is required.

HAIT 120. Elementary Haitian II. 3 Credits. U F2
Continuation of HAIT 110, with further readings in Haitian literature. Prerequisite: HAIT 110 or consent of instructor.

HAIT 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Haitian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

HAIT 230. Intermediate Haitian I. 3 Credits. U F3
Continued practice in conversation and composition; intensive and extensive readings from contemporary press, short story, poetry, and folk tales. Prerequisite: HAIT 120 or consent of instructor.

HAIT 240. Intermediate Haitian II. 3 Credits. U F4
Continuation of HAIT 230, with additional readings from theatre, novel, and historical texts. Prerequisite: HAIT 230 or consent of instructor.

HAIT 300. Contemporary Haiti. 3 Credits. NW H
Detailed analysis of recent Haitian history. The focus will include interactions between religion, social structure, politics, economics and international relations. (Same as AAAS 302.) Prerequisite: AAAS 301/HAIT 200, or consent of instructor.

HAIT 350. Advanced Haitian I. 3 Credits. U FP
Course objective is a sophisticated command of understanding, speaking, reading, and writing Haitian. Texts include newspapers and other Haitian publications as well as spoken material produced essentially for native speakers. Conversation and oral presentations. Keeping of personal journal in Haitian.

HAIT 360. Advanced Haitian II. 3 Credits. U FP
Continuation of HAIT 350, plus advanced readings from Haitian authors such as Carrie Paultre, Frank Etienne, Lyonel Desmarattes, and Michel-Rolgh Trouillot.

HAIT 497. Directed Studies in Haitian. 1-15 Credits. U FP
May be taken more than once, total credit not to exceed fifteen hours. Material not covered by course work, and/or in field of student’s special interest. Conferences. Course taken for one hour of credit may not be used to fulfill College’s humanities distribution requirement. Prerequisite: Six hours of Haitian Creole and consent of instructor.

HAIT 500. Directed Studies in Haitian Language and Literature. 1-15 Credits. U FP
Advanced work in either language or literature or both. May be taken more than once, total credit not to exceed fifteen hours. Conferences. As a three-credit-hour course, it may count toward a major in African and African-American studies. Prerequisite: Four semesters of Haitian Creole or equivalent and consent of instructor.

Advanced work in Haitian culture. May be taken more than once, total credit not to exceed fifteen hours. Conferences. As a three-credit-hour course, it may count toward a major in African and African-American studies. No knowledge of Haitian or French is required. Prerequisite: AAAS 301 or HAIT 200, or consent of instructor.

HAIT 700. Investigation and Conference. 1-6 Credits.
Supervised individual readings in selected areas of Haitian language, literature, and culture. Individual reports and conferences. Prerequisite: Consent of instructor.

African & African-American St Courses

KISW 110. Elementary KiSwahili I. 5 Credits. U F1
Five hours of class per week. Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of KiSwahili.

KISW 120. Elementary KiSwahili II. 5 Credits. U F2
Five hours of class per week. A continuation of KISW 110. Readings in cultural texts. Prerequisite: KISW 110.

KISW 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in KiSwahili. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

KISW 210. Intermediate KiSwahili I. 3 Credits. U F3
Three hours of class conducted in KiSwahili. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern KiSwahili texts and discussion in KiSwahili. Prerequisite: KISW 120.

KISW 220. Intermediate KiSwahili II. 3 Credits. U F4

KISW 310. Advanced KiSwahili I. 3 Credits. U FP
A practical KiSwahili language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in KiSwahili. Designed for students who have had two or more years of KiSwahili study. Open to native speakers. Prerequisite: KISW 220 or consent of instructor.

KISW 320. Advanced KiSwahili II. 3 Credits. U FP
A continuation of KISW 310. Prerequisite: Satisfactory completion of KISW 310 or consent of instructor.

KISW 401. Readings in KiSwahili I. 3 Credits. U FP
Designed for native and near-native speakers, this course involves reading newspapers and other publications in the language intended for native speakers, conversation, oral presentations, and advanced grammar. Prerequisite: Native or near-native speaker proficiency or consent of instructor.

KISW 402. Readings in KiSwahili II. 3 Credits. U FP
Continuation of KISW 401.

African & African-American St Courses

SOMI 110. Elementary Somali I. 5 Credits. U F1
Five hours of class per week. Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of Somali.

SOMI 120. Elementary Somali II. 5 Credits. U F2
Five hours of class per week. A continuation of SOMI 110. Readings in cultural texts. Prerequisite: SOMI 110.

SOMI 210. Intermediate Somali I. 3 Credits. U F3
Three hours of class conducted in Somali. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Somali texts and discussion in Somali. Prerequisite: SOMI 120.

African & African-American St Courses

WOLO 110. Elementary Wolof I. 5 Credits. H F1
Five hours of class per week. Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of Wolof.

WOLO 120. Elementary Wolof II. 5 Credits. U F2
Five hours of class per week. A continuation of WOLO 110. Readings in cultural texts. Prerequisite: WOLO 110.

WOLO 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in American Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

WLO 210. Intermediate Wolof I. 3 Credits. U F3
Three hours of class conducted in Wolof. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Wolof texts and discussion in Wolof. Prerequisite: WLO 120.

WLO 220. Intermediate Wolof II. 3 Credits. U F4
Three hours of class conducted in Wolof. Continuation of WLO 210. Discussion in Wolof of texts studied. Prerequisite: WLO 210.

WLO 310. Advanced Wolof I. 3 Credits. U FP
A practical Wolof language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Wolof. Designed for students who have had two or more years of Wolof study. Open to native speakers. Prerequisite: WLO 220 or consent of instructor.

WLO 320. Advanced Wolof II. 3 Credits. U FP
A continuation of WLO 310. Prerequisite: Satisfactory completion of WLO 310 or consent of instructor.

WLO 401. Readings in Wolof I. 3 Credits. U FP
Designed for native and near-native speakers, this course involves reading newspapers and other publications in the language intended for native speakers, conversation, oral presentations, and advanced grammar. Prerequisite: Native or near-native speaker proficiency or consent of instructor.

WLO 402. Readings in Wolof II. 3 Credits. U FP
Continuation of WLO 401.

American Studies Courses

AMS 100. Introduction to American Studies. 3 Credits. HT H
An introduction to the history and key concepts of American Studies. Students explore major changes in American culture through the critical reading and analysis of primary and secondary source material. Not open to students who have taken AMS 101.

AMS 101. Introduction to American Studies, Honors. 3 Credits. HT H
An introduction to the history and key concepts of American Studies. Students explore major changes in American culture through the critical reading and analysis of primary and secondary source material. Not open to students who have taken AMS 100. Prerequisite: Membership in the University Honors Program or approval by the American Studies Program.

AMS 110. American Identities. 3 Credits. SC S
An interdisciplinary introduction to individual and group identities over time. Students explore theories and methods relating to identity from various perspectives, such as race, class, gender, sexuality, age, religion, and region. Not open to students who have taken AMS 112.

AMS 112. American Identities, Honors. 3 Credits. SC S
An interdisciplinary introduction to individual and group identities over time. Students explore theories and methods relating to identity from various perspectives, such as race, class, gender, sexuality, age, religion, and region. Not open to students who have taken AMS 110. Prerequisite: Membership in the University Honors Program or instructor permission.

AMS 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Americana Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

AMS 260. America’s Latinos/Latinas. 3 Credits. U
An introduction to the Latino/a population (Mexican-Americans, Puerto Ricans, Cuban-Americans, Dominican-Americans, and Central and South Americans) in the US. Students discuss how US and Latin American societies have shaped Latino incorporation into the United States. We also discuss contemporary political, cultural and social issues that pertain to Latinos/as in the US.

AMS 290. Religion in American Society. 3 Credits. HR H
A broad introduction to religion in American culture. This class emphasizes the well-established religions with large followings (viz. Judaism, Catholicism, Eastern Orthodoxy, and Protestantism). Some attention is also given to other religions active in America. Other topics covered include the relationship of church and state, religion in ethnic and racial minority groups, and women and religion. (Same as REL 171.)

AMS 306. The Black Experience in the U.S. Since Emancipation. 3 Credits. H
An interdisciplinary study of the history and culture of Black people in America from Reconstruction to the present. Topics covered include an analysis of Reconstruction, Black leaders, organizations and movements, the Harlem Renaissance, migration, and race relations. Demographic variables covered include socio-economic class, education, political persuasion, and influence by avant-garde cultural changes. (Same as AAAS 306 and HIST 359.)

AMS 312. American Culture, 1877 to the Present. 3 Credits. H
An examination of the major historical shifts, trends, and conflicts that have shaped the multicultural nature of life in the United States from 1877 to the present. In addition to tracing developments in literature, architecture, drama, music, and the visual arts, this course will investigate patterns and changes in the popular, domestic, and material culture of everyday life in America. (Same as HIST 312.)

AMS 316. Ministers and Magicians: Black Religions from Slavery to the Present. 3 Credits. H
This course examines the history and diversity of African American religious expression from slavery until the present, emphasizing both mainstream and alternative faiths. It covers the religious world views of enslaved Africans, and examines faiths inside and outside of Christianity. Topics may include: independent black churches, magical practices, the Holiness and Pentecostal movements, black Islam, religious freemasonry, and esoteric faiths. The class emphasizes the influence of gender, class, race, migration, and urbanization on black religion. (Same as AAAS 316 and HIST 316.)

AMS 320. Border Patrolled States. 3 Credits. H
Examines the politics of immigrant, citizenship and space through official, intellectual and popular responses to the growth of Latino/a populations in the U.S. and to international migration to and from Mexico and Central America. Topics include consideration of how responses to immigration articulate racialized and culturally specific (including linguistic and religious) concepts of the nation, and how questions of citizenship and residency dovetail with issues of community "voice", public space, and diverse notions of "security".

AMS 321. American Gun Culture. 3 Credits. SC
This course explores the complicated role guns play in the US from sociological and cultural perspectives, using a scholarly approach. In doing so, this course will investigate the prevalence and distribution of guns, lawful possession and use of firearms, gun crime and injuries, and take a special look at women's place in gun culture. Through discussion,
oral presentations, and writing assignments, we will consider the social impact of widespread gun ownership. We will also learn more about the average law-abiding gun owner and American culture.

AMS 323. Sex in History. 3 Credits. HT H
This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, "perversions" (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as HUM 332, HIST 332 and WGSS 311.)

AMS 324. Being Deviant in America. 3 Credits. S
In this course students will study traits, conditions, actions, and behaviors that violate social norms and elicit negative societal reactions. This includes the social, cultural, and individual factors that explain deviance; motivations behind deviant behavior; and efforts by society to control deviants. In short, you will undertake a sociological examination of those on the margins of society and societal efforts to "deal with" them. (Same as SOC 324.)

AMS 325. Spanish for Heritage Learners. 3 Credits. H FP
A comprehensive review of the Spanish language for students whose personal or cultural ties to the language do not include extensive formal academic study, with an emphasis on the development of skills tied to cultural analysis and communication (written and oral) necessary for success in more advanced courses in Spanish. (Same as SPAN 325.) Prerequisite: SPAN 216, or SPAN 217, or SPAN 220, or appropriate placement test score as defined by the Department of Spanish & Portuguese, or consent of the Department of Spanish & Portuguese, or consent of instructor.

AMS 330. American Society. 3 Credits. H
The social structure and organization of American society with special reference to recent social changes. (Same as SOC 330.) Prerequisite: An introductory course in sociology or American studies.

AMS 332. The United States in Global Context. 3 Credits. S
Examines the influence abroad of US culture, policies and practices and the impact of other countries on US culture, society, and politics. Among the topics that may be examined are race, ethnicity, colonialism, imperialism, migration, technology, communications and media, popular culture, language, health, domestic and transnational organizations, as well as economic, political, religious, military and educational institutions. (Same as SOC 332).

AMS 340. Black Leadership. 3 Credits. H/W
The course focuses on the concept of leadership and on black leadership in the United States; an in-depth analysis of selected case studies on black leaders, both historical and contemporary. Some attention will be given to the dispersion of Africans into the Americas and the leadership that emerged, conditioned both by environmental factors and the psychology engendered by the system of slavery. Selected successful black leaders will be invited to visit the class from time to time. (Same as AAAS 330.)

AMS 344. Case Study in American Studies: ______. 3 Credits. H
This course examines in depth a specific American studies theme.

AMS 345. Cultural Studies. 3 Credits. H
Students gain awareness of major scholars and "schools" that have pursued critical, interdisciplinary research or cultural processes and products in the field of American Studies. Topics may include cultural materialism, semiotics, nationalism, ethnic/racial identity, gender and sexuality, cultural politics, mass media, public spheres, social space and place, commodity consumption, music, and popular culture.

AMS 360. Theory and Method. 3 Credits. H
An introduction through a topical theme to theories and methods currently used in American Studies. Prerequisite: AMS 100, AMS 110 and AMS 332 or their equivalent, or consent of instructor.

AMS 365. Angry White Male Studies. 3 Credits. H
This course charts the rise of the "angry white male" in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as HIST 364, HUM 365 and WGSS 365.)

AMS 390. Geography of the United States and Canada. 3 Credits. S
A study of the different physical, economic, and cultural settings in the United States and Canada which form the basis for the various forms of livelihood. Emphasis on the United States. (Same as GEOG 390.) Prerequisite: An introductory geography course, or background in United States or Canadian history, social science, or culture, or consent of instructor.

AMS 436. Ethnicity in the United States: ______. 3 Credits. S
An examination of the history, sociology, and culture of U.S. ethnic categories (e.g., American Indians, Latinos, Asian Americans, Jewish Americans, Irish Americans). The specific group studied varies from semester to semester. Course may be repeated for credit with different topics. (Same as SOC 436.)

AMS 437. Global Ethnic and Racial Relations. 3 Credits. W
This course uses written and visual materials to examine race, ethnicity, and nationalism around the world. Emphasis is on ways in which social forces, gender roles, sexual practices, cultural patterns, and political organization work together to construct and reinforce ethnic, racial, and national identities, boundaries, movements, and conflicts. Historical and contemporary comparisons are made between the U.S. and countries in Africa, Asia, the Americas, the Caribbean, Europe, the Pacific Islands, and the Middle East. (Same as AAAS 437 and SOC 437.)

AMS 494. Topics in: ______. 1-4 Credits. H
Interdisciplinary study of selected aspects of American society or culture or of the American experience.

AMS 496. Social Justice Perspectives and Experiences. 3 Credits. S
An experiential learning course in which students select and participate in public/civic engagement activities in a selected area undertaken in consultation with and under the direction of a faculty member. Students meet regularly to discuss and evaluate their field experiences and to collectively problem solve identified challenges to the justice work with which they are engaged. Students produce a final project on the experience that integrates the engagement experience and academic materials. Prerequisite: AMS 100 and AMS 110.

AMS 510. History of American Women--Colonial Times to 1870. 3 Credits. H
A survey of women's roles as housewives, mothers, consumers, workers, and citizens in pre-industrial, commercial, and early industrial America. (Same as HIST 530 and WGSS 510.)

AMS 511. History of American Women--1870 to Present. 3 Credits. H
A survey of women's history in the United States that will include radical and reform movements, the impact of war and depression, professionalization, immigration, women's work and the biographies of leading figures in women's history. (Same as HIST 531 and WGSS 511.)

AMS 518. Capitalism and the Black Experience. 3 Credits. H
This is an upper level course designed to analyze the experiences that define the African American relationship to the American economy. The course begins with the slave trade and ends in the present. It explores and explains how African American economic development intimately intertwined with the movement for freedom. Students will learn how African Americans addressed issues around slavery, housing, banking, capitalism/socialism, underground economy, and gentrification. This course is chronological in nature with thematic elements. Lectures will provide brief histories and conceptual framework for readings. This background will help students understand and explore how black identity, culture, and politics interact with economy. However, the bulk of the course will operate as a seminar. By the end of the course, students will be able to summarize African American past experiences with capitalism and its relevance to contemporary economic issues affecting African American people today. (Same as AAAS 518 and HIST 518.) Prerequisite: Any American Studies or History courses on American History.

AMS 550. Research Seminar in: _____ . 3 Credits. H
A seminar exploring a specific American studies theme. A research paper or equivalent project is required. Prerequisite: AMS 360 (a grade of C or better is recommended) or consent of instructor. Cannot be taken concurrently with AMS 551, AMS 552 or AMS 553.

AMS 551. Research Project in American Studies. 3 Credits. H
Independent research on a selected topic under the direction of a faculty member. Students write an original research paper or complete an equivalent project in another medium, grounded in primary as well as secondary sources. Prerequisite: AMS 550 or consent of instructor.

AMS 552. Public Service in American Studies. 3 Credits. H
Independent public service in a selected area undertaken in consultation with and under the direction of a faculty member. Students produce a final written project on the experience that integrates the public service experience and academic materials, or complete an equivalent project in another medium. Prerequisite: AMS 550 or consent of instructor.

AMS 553. Honors in American Studies. 3 Credits. H
Honors equivalent of AMS 551. May be taken twice for credit. Three hours of AMS 553 may be substituted for a course in an appropriate category in the American Studies major. Prerequisite: AMS 550, eligibility for departmental honors, or consent of instructor.

AMS 650. Jazz and American Culture. 3 Credits. H
This course considers cultural and social histories of jazz, from the 1920s through the present day, as sites for exploring ideological struggles over such fields as race, class, gender, sexuality, democracy, capitalism, freedom, community, Americaneness, and globalization in the U.S. The course will explore such questions as the following: What music was called jazz at what times and places? What did it mean to whom? Who played it? Who wrote about it? Who listened to it? Who danced to it? Who policed it? Who produced it? Who used it to rebel? Who used it to survive? What did all of these practices mean to participants? The course will examine struggles over social meanings in the U.S. through a study of jazz performance, labor, representation, marketing, consumption, censorship, and historiography. Prerequisite: A course in American studies, American history, or consent of instructor. (Same as WGSS 652.)

AMS 694. Directed Readings. 1-4 Credits. H
Consent of instructor is required.

AMS 696. Studies in: _____ . 3 Credits. H
Interdisciplinary study of different aspects of the American experience in different semesters.

AMS 700. Introduction to Museum Exhibits. 3 Credits.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as BIOL 787, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

AMS 714. Conservation Principles and Practices. 3 Credits.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as BIOL 700, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

AMS 730. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, BIOL 798, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

AMS 731. Museum Management. 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as BIOL 785, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

AMS 737. Music in America. 3 Credits.
A survey of historical developments from the Pilgrims to the present. (Same as MUSC 759.) Prerequisite: One course in the field of music history and literature or consent of instructor.

AMS 767. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs,
and policy and management issues in gerontology. (Same as ABSC 787, COMS 787, PSYC 787, and SOC 767.)

**AMS 979. Introduction to Museum Public Education. 3 Credits.** Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as BIOL 784, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**AMS 799. Museum Internship. 1-6 Credits.** Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as ANTH 799, GEOL 723, and MUSE 799.)

**AMS 801. Introduction to American Studies. 3 Credits.** An introduction to the field of American Studies through an examination of some of the classic and innovative works, issues, debates, and controversies in the history and the literature of American Studies.

**AMS 802. Theorizing America. 3 Credits.** Drawing from a broad range of perspectives (e.g., cultural theory, social theory, literary theory, etc.), this course will introduce students to current theoretical debates in American studies and the concepts that inform them.

**AMS 803. Research Methods in American Studies. 3 Credits.** An introduction to the range of interdisciplinary research methods in American studies. Emphasis will be placed on an examination of the assumptions, logics, and procedures involved in various approaches to understanding American society and culture.

**AMS 804. Research Seminar. 3 Credits.** An intensive application of theoretical and methodological issues to the development of specific substantive research problems. Students will be expected to design and implement a study that will be critically assessed in the seminar.

**AMS 805. American Pluralism: Race, Ethnicity, and Religion in American Life. 3 Credits.** Analysis of the dynamics of intercultural and intergroup relations in America with special emphasis on the examination of major conceptual perspectives that have characterized the study of race, ethnicity, and religion in American life.

**AMS 808. Studies in: _____ 3 Credits.** Interdisciplinary study of different aspects of the American experiences in different semesters.

**AMS 835. Colloquium in the History of Gender. 3 Credits.** This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as HIST 895 and WGSS 835.)

**AMS 896. Examination Preparation. 1-6 Credits.** Directed and independent study in preparation for the M.A. examination. May be repeated.

**AMS 899. Thesis. 1-6 Credits.** Investigation of a topic for master’s thesis. Total enrollment in this course may not exceed six hours of credit. Graded on a satisfactory progress/limited progress/no progress basis.

**AMS 900. Teaching Seminar. 1-6 Credits.** This seminar is designed to assist students in the preparation, presentation, and evaluation of teaching in American Studies. Graded on a satisfactory/unsatisfactory basis.

**AMS 996. Examination Preparation. 1-9 Credits.** Directed and independent study in preparation for the doctoral comprehensive examinations. May be repeated.

**AMS 997. Directed Readings. 1-4 Credits.** Directed reading in an area of American culture in which there is no appropriate course in the offerings of the American Studies program or of the cooperating departments, but in which there is a member of the graduate faculty competent and willing to direct a program of study.

**AMS 998. Seminar in: _____ 3 Credits.** Topics vary from semester to semester. Graduate students are consulted in selecting topics.

**AMS 999. Dissertation. 1-12 Credits.** Dissertation Credit. Graded on a satisfactory progress/limited progress/no progress basis.

**Anthropology Courses**

**ANTH 100. General Anthropology. 3 Credits. SC S**
This course is an introduction to the discipline of Anthropology. Our goal is to understand human diversity in the past, present, and future through the lenses of the four primary fields of Anthropology: Archaeology, Biological Anthropology, Linguistic Anthropology, and Sociocultural Anthropology. Students will be introduced to major concepts, research approaches, important findings, and critical controversies within the discipline as a whole. We will investigate such questions as: How did humans evolve? How have human cultures and languages developed? What tools, technologies, and new kinds of knowledge and expertise emerge in the face of global environmental, social, political, and economic change?

**ANTH 102. Succeeding in Anthropology. 1 Credits. S**
This course is designed to enhance students’ chances for success in anthropology major and life after college. Students will learn how to maximize their possibilities for gaining academic assistance, grants, and career building, as well as design strategies for winning jobs, entry into graduate programs, and paid internships at home and abroad. Graded on a satisfactory/unsatisfactory basis.

**ANTH 106. Introductory Linguistics. 3 Credits. SC S**
This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A key goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as LING 106.)

**ANTH 107. Introductory Linguistics, Honors. 3 Credits. SC S**
This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A core goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as LING 107.)

**ANTH 108. Introduction to Cultural Anthropology. 3-4 Credits. SC S**
An introduction to the nature of culture, language, society, and personality. Included in this survey are some of the major principles, concerns, and themes of cultural anthropology. The variety of ways in which people structure their social, economic, political, and personal lives. Emphasized are the implications of overpopulation, procreative strategies, progress and growth of cultural complexity, developments in the Third World, and cultural dynamics in Western as well as in non-Western societies.

**ANTH 109. Introduction to Cultural Anthropology, Honors. 3-4 Credits. SC S**
An honors section of ANTH 108 for students with superior academic records.

**ANTH 110. Introduction to Archaeology. 3-4 Credits. HT H**
A general introduction to the history methods, theories, and principles of the study of archaeology. Lectures, and discussions sections cover the essential archaeological approaches, methods and practice: what is the material evidence that archaeologists collect, and how they collect and analyze it in order to understand humans of the past, their social organization, economy, subsistence, diet, technology, trade, exchange, symbol systems; how geological, palaeoenvironmental, palaeontological, and genetic evidence contribute to archaeology and what was the effect of environmental and climate change on human evolution and global dispersal; what is the role of knowing the past, public archaeology, culture heritage preservation, and archaeological ethics in the modern world. Discussion sections will be used to examine material covered in lectures and in readings related to specific topics, and to explore relevant visual materials - archaeological artifacts, collections, and media sources.

**ANTH 111. Introduction to Archaeology, Honors. 3-4 Credits. HT H**
An honors section of ANTH 110 for students with superior academic records.

**ANTH 115. World Prehistory. 3 Credits.**
A general introduction to the evolution of human culture around the world from the Lower Paleolithic to the emergence of complex societies. This course covers what archaeology has revealed about the experience of humankind from the origins of stone tool use to the earliest urban settlements in the Middle East, Africa, Asia, Europe, and the Americas.

**ANTH 150. Becoming Human. 3 Credits. N**
This course examines the biological evolution and archaeological record of humanity from the earliest human origins to the origins of civilization, and asks: Where did we come from? What makes us human? Where are we going? By unraveling the fundamental connections between biological evolution and culture, our goal is to help students appreciate how knowledge of the human past is relevant to our modern lives, whether as a KU student today, or as a future parent, medical patient, consumer, or citizen. Not open to students that have taken ANTH 309.

**ANTH 151. Becoming Human, Honors. 3 Credits. N**
An honors section of ANTH 150 for students with superior academic records. Not open to students who have had ANTH 150. Prerequisite: Enrollment in the Honors Program.

**ANTH 160. The Varieties of Human Experience. 3 Credits. NW S/W**
An introduction to basic concepts and themes in cultural anthropology by means of the comparative study of selected cultures from around the world, for the purpose of appreciating cultural diversity. Emphasis is on systems of belief and meaning. Not open to students who have taken ANTH 360.

**ANTH 162. The Varieties of Human Experience, Honors. 3 Credits. NW S/W**
An honors section of ANTH 160 for students with superior academic records. Not open to students who have had ANTH 160 or ANTH 360.

**ANTH 177. First Year Seminar: _____. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Anthropology. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ANTH 201. Archaeology's Greatest Hits. 3 Credits. S/W**
This course is a broad survey of the most spectacular archaeological discoveries of our time. It tells the story of pioneers and scientist-adventurers in their quest for knowledge of human prehistory. These discoveries became historically significant because they embodied major theoretical advances and evolutionary leaps in our understanding of the past. While reviewing archaeology's greatest discoveries, this course will investigate many of the major events, such as the critical evaluation of evidence or the development of appropriate scientific techniques, that eventually established archaeology as a scientific endeavor.

**ANTH 212. Archaeological Myths and Realities. 3 Credits. S**
Archaeology is concerned with explaining mysteries of the human past ranging from the origins of human beings to the rise and fall of civilizations. This course is designed to guide students in investigations of mysteries that capture the popular imagination, but which many scientists do not wish to discuss. What is the scientific evidence for the Biblical account of Creation, the Great Flood, or the Tower of Babel? Was the Great Pyramid encoded with lost knowledge or predictions of the future? Did Chinese, Africans, Celts, or Vikings visit the Americas before Columbus? Is Stonehenge an astronomical observatory? Who built the giant statues on Easter Island? Where are the lost continents of Atlantis and Lemuria? The methods and theories of archaeology and anthropology will be used to address these and other questions. We will develop methods of evaluating information available from various published and online sources to judge when a claim represents a revolutionary new idea or a strategy for extracting money from the uninformed? Students will learn to be critical consumers of scientific and non-scientific information, and our goal will be to identify ways to be skeptical while maintaining an open mind when confronted with conflicting claims.

**ANTH 291. Study Abroad Topics in: _____. 1-5 Credits. U**
A course designed to enhance international experience in topic areas related to anthropology at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

**ANTH 293. Myth, Legend, and Folk Beliefs in East Asia. 3 Credits. NW H/W**
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the traditional world view of the peoples of East Asia. (Same as EALC 130, REL 130.)

**ANTH 301. Anthropology Through Films. 3 Credits. S**
An exploration of the human ways through films. Cross-cultural interpretations by filmed records of varieties of interpersonal relations seen through such aspects of culture as hunting, war, marriage, religion, sex, kinship, and death. Patterns of interactions are analyzed by examples from cultures around the world, primarily the non-Western world.
ANTh 303. Peoples and Cultures of North Africa and the Middle East. 3 Credits. NW S
This course familiarizes students with the peoples and cultures of North Africa and the Middle East. It examines the cultural, demographic, and religious diversity of the region, as well as the development of the early Islamic community and the formation of Islamic institutions. Issues such as religion and politics, inter-religious relations, nation-building, Islamic response to colonialism, Palestinian-Israeli conflict, Islamic resurgence, secularism, democratization, and gender, are also explored. (Same as AAAS 303.)

ANTh 304. Fundamentals of Biological Anthropology. 3 Credits. NB N
Biological anthropology is an exciting discipline concerned with humans as biological beings living in cultural and natural settings. We are interested in questions pertinent and important to the scientific, social, and political agendas of the world. Material covered in this class will encourage you to pursue questions about the relationship of humans to the rest of the animal kingdom, the origin, maintenance, patterning, and significance of human biological variation, the nature of heredity, and human evolution. We will discuss the human and primate fossil records, human variation, race, and genetics. Students can expect a strong emphasis on scientific literacy, that is, how the process of scientific inquiry works. When you finish this course, you will have the tools to distinguish between reliable and unreliable sources of scientific information and a solid grounding in the fundamentals of biological anthropology.

ANTh 308. Fundamentals of Cultural Anthropology. 3 Credits. SC S
This course covers the fundamental concepts, theories, and practices of cultural anthropology. It teaches students how to think anthropologically through a survey of classic and contemporary ethnographic texts, spanning a range of geographic and cultural areas. Applying a holistic lens, students will critically analyze inequality, globalization, and human cultural differences across time and space. Topics will include: fieldwork and ethnography; race; ethnicity and nationalism; gender, sexuality, and kinship; socioeconomic class; the global economy; politics and power; religion; health and development; and art and media. This course logically follows ANTH 160/ANTH 162/ANTH 360. Not open to students who have taken ANTH 108 or ANTH 109.

ANTh 309. Becoming Human. 3 Credits. N
A more intensive treatment of ANTH 150. This course examines the biological evolution and archaeological record of humanity from the earliest human origins to the origins of civilization, and asks: Where did we come from? What makes us human? Where are we going? By unraveling the fundamental connections between biological evolution and culture, our goal is to help students appreciate how knowledge of the human past is relevant to our modern lives, whether as a KU student today, or as a future parent, medical patient, consumer, or citizen. Not open to students who have taken ANTH 150.

ANTh 310. Fundamentals of Archaeology. 3 Credits. HT S
An introduction to the history, methods, theories, and principles of archaeology. This course covers essential archaeological approaches, methods and practices to answer such questions as: What is the material evidence that archaeologists collect and how do they analyze it in order to understand humans of the past, their social organization, economy, subsistence, diet, technology, trade, exchange, and symbol systems? How do geological, palaeoenvironmental, palaeontological, and genetic evidence contribute to archaeological understandings of human biological and social evolution? What was the effect of environmental and climate change on human evolution and global dispersal? How are knowledge of the past, public archaeology, culture heritage preservation, and archaeological ethics used in the modern world? Prerequisite: ANTH 150 or permission of instructor.

ANTh 311. Archaeology Roadshow. 3 Credits. S
This is a 15-day, interdisciplinary field-trip course in the archaeology and paleoecology of a specific region. It provides students with high-impact learning experiences in a field setting, centered on visits to national parks, archaeological sites, and ecological and paleoecological field locations. More specifically, students have daily field-lab assignments related to different components of archaeology and ecology, for example vegetation identification and analysis, geomorphological mapping and description, archaeological-site stratigraphic mapping and description, archaeological-site survey and recording, field-artifact analysis, and bison ecology and behavior “ethogram.” Students complete learning modules as they tour important archaeological and paleontological sites with course instructor and local specialists. Course may be repeated once for credit if region varies. Prerequisite: Permission of instructor.

ANTh 315. The Prehistory of Art. 3 Credits. S
A survey of prehistoric art focusing on the material record and interpretations of rock art (paintings, engravings on rock surfaces in rock-shelters, caves and in open air sites) and portable art created by prehistoric people. The emphasis is on the small-scale societies (hunter-gatherer and early food producers) around the world before the appearance of written records in respective geographic areas. Environmental, social and cultural contexts in which these art forms were created are discussed along with a review of past scholarship and current interpretive approaches to this old and enduring expression of human creativity. Course may be offered in lecture or online format. (Same as HA 315.)

ANTh 317. Prehistory of Europe and Asia. 3 Credits. S
A survey of 1.7 million years of prehistory from the peopling of the Eurasian supercontinent through the Bronze Age. The course focuses on the growth of culture, considering economy and technology, art and architecture. Topics include Neanderthals and Denisovans, emergence of modern humans during the Ice Age, transition to agriculture, and evolution of cultural complexity, comparing East and West. Prerequisite: A course in anthropology, history, geography, or permission of the instructor.

ANTh 318. Peoples of the Great Plains. 3 Credits. S
A survey of the diverse and changing lifeways of Native Americans in the Great Plains region from the time of the earliest inhabitants more than 13,000 years ago to the modern era. Collections of prehistoric and historic Native American material culture will be used to illustrate the diversity of technologies and artistry of indigenous Great Plains peoples.

ANTh 320. Language in Culture and Society. 3 Credits. SC S
Language is an integral part of culture and an essential means by which people carry out their social interactions with the members of their society. The course explores the role of language in everyday life of peoples in various parts of the world and the nature of the relationship between language and culture. Topics include world-view as reflected in language, formal vs. informal language, word taboo, and ethnography of speaking. (Same as LING 320.)

ANTh 321. Language in Culture and Society, Honors. 3 Credits. SC S
An honors section of ANTH 320 for students with superior academic records. Not open to students who have had ANTH 320 or LING 320. (Same as LING 321.) Prerequisite: Membership in the University Honors Program or consent of instructor.

ANTh 323. Environmental Dynamics in India. 3 Credits. S/W
This course introduces students to the relationships the people of India have had with their landscape from ancient times to the present. Students
will learn about diverse ecosystems and the indigenous peoples they have harbored from the high Himalayas altitudes to the coastal regions, from the desolate arid deserts to the rain forests of India. The class will discuss how the very nature of the relationship of the people with their land has changed over the long course history of South Asia with specific case studies of environmental challenges, failures and successes. Examples of possible cases include: the Chipko movement led by the women of the Himalayas to save their forests from loggers; the traditions of creating lakes and water conservation lifestyles in the arid region of Rajasthan; and nature worship and cases of leopards and tigers receiving protection by the very villages they terrorize. (Same as GIST 323.)

ANTH 325. Language, Gender, and Sexuality. 3 Credits. S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as GIST 303, JWSH 305, SLAV 305 and WGSS 325.)

ANTH 330. Forensic Anthropology. 3 Credits. S
This course focuses on the study of forensic anthropology as related to medico-legal death investigation. It includes overview of the Coroner’s System, death scene investigation techniques, DNA and Geoscience applications, statutes and laws, review of injuries and interpretations, child death investigation and its uniqueness, identification of the body, coordination with law enforcement and the legal world, how to obtain the necessary information in order to complete a case, cause vs. manner of death, types of death and how to identify, how to deal with families and the public, and social responsibilities associated with forensic science.

ANTH 340. Human Variation and Evolution. 3 Credits. N
An examination of biochemical and physical variability in contemporary human populations. Topics include: genetic basis of human diversity, evolutionary theory, population genetics, blood groups, biochemical variations, body size and shape, pigmentation, and other morphological characteristics. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 341. Human Evolution. 3 Credits. N
The evolutionary processes and events leading to the development of humans and the humanlike forms from primate ancestors; fossil hominids and the origin of modern Homo Sapiens. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 343. Food, Nutrition and Culture. 3 Credits. S
The course is a cross-cultural survey of human dietary practices (foodways). Students are introduced to the concepts of nutrition, diet and cuisine. Evolutionary and adaptive aspects of human diets and cuisines are considered. Nutritional, environmental/technological, social and ideological aspects of regional and ethnic foodways are examined. Invited lecturers from different cultural traditions offer indigenous perspectives on their foodways.

ANTH 345. Introduction to Human Evolutionary Biology. 4 Credits. N
This course takes students on the evolutionary journey of the human species: from the origin of the primate order to modern human population diversity. It examines human adaptations to extreme environments, nutrition and the role of the microbiome in human health, and human evolutionary genomics in the foundations of immunity and their intersection with public health. It evaluates our Neandertal ancestry, and tracks major human migrations and dispersals in the peopling of the world. All topics are examined through the lens of molecular evolutionary approaches to the study of human diversity. An introduction to biology or biological anthropology course is recommended.

ANTH 352. Controversies on the Living and the Dead. 3 Credits. N
A critical analysis of conflicting perspectives on scientific and anthropological research, past and present. Topics considered include the nature of science, colonialism in anthropology and biology, origin stories and human evolution, the ethics of research in ancient and contemporary populations, eugenics, biological race, and the relationship between humans and our extinct hominin relatives. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 359. Anthropology of Sex. 3 Credits. N
An evolutionary perspective on the behavior and biology of males and females in human society. Topics will include the evolution of sexual dimorphism, social and biological issues in human reproduction, primate social patterns, human sexual behavior and taboos, sex and social structure, and the sociobiology of sex.

ANTH 360. The Varieties of Human Experience. 3 Credits. NW S/W
A more intensive treatment of ANTH 160. An introduction to basic concepts and themes in cultural anthropology by means of the comparative study of selected cultures from around the world, for the purpose of appreciating cultural diversity. Emphasis is on systems of belief and meaning. Not open to students who have taken ANTH 160.

ANTH 367. Introduction to Economic Anthropology. 3 Credits. S
This course uses ethnographic case materials to explore the ways humans provision themselves under different social and environmental conditions. It introduces the basic theories, concepts, and debates of economic anthropology and provides a foundation for more advanced courses in this subdiscipline. Prerequisite: ANTH 108 or ANTH 160/ANTH 162 or ANTH 308 or ANTH 360 or permission of instructor.

ANTH 368. The Peoples of China. 3 Credits. NW S/W
An analysis of the cultural origin, diversity, and unity of the peoples of China. Emphasis on historical development, social structure, cultural continuity and change, and ethics. (Same as EALC 368.)

ANTH 372. Religion, Power, and Sexuality in Arab Societies. 3 Credits. NW S
This course examines theories of religion, discourse, power, gender and sexuality in their application to Arab societies. The course introduces different aspects of Arab cultures. Through canonical works, we study political domination, tribal social organization, honor, tribe, shame, social loyalty, ritual initiations and discuss how these issues speak generally to anthropological inquiry. Regionally specific works are then framed by an additional set of readings drawn from anthropological, linguistics, and social theories. (Same as AAAS 372.)

ANTH 379. Indigenous Traditions of Latin America. 3 Credits. NW S/W
A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken LAC 634. (Same as LAC 334.)
ANTH 380. Peoples of South America. 3 Credits. NW S/W
A survey of native peoples and cultures of South America from the time of initial Western contacts to the present day.

ANTH 382. People and the Rain Forest. 3 Credits. S
An analysis of the cultural origin, diversity, and unity of the peoples of the neotropics. Emphasizing the peoples of Amazonia, the course introduces students to topics associated with the economic, political, and cultural dimensions of social life in rain forest communities.

ANTH 389. The Anthropology of Gender: Female, Male, and Beyond. 3 Credits. NW W
This course will introduce students to cultural constructions and performances of masculinity, femininity, and alternative genders across time and space. Topics and cases will be drawn from primarily non-Western cultures, ranging from Japanese markets to Pacific Rim gardens, and from Haitian voudou to Maya royal politics. This course uses research by archeologists, linguists, biological anthropologists, and sociocultural anthropologists. (Same as WGSS 389.)

ANTH 391. Topics in Anthropology: _____ 3 Credits. S
This course offers students an opportunity to study classical and emerging topics in the four primary fields of Anthropology: Biological Anthropology, Linguistics, Sociocultural Anthropology, and Archaeology. Concepts and approaches to each field will be used to investigate past and present examples from around the world. Topics will be examined with an emphasis on the unity of the anthropological perspective.

ANTH 397. Museum Anthropology. 3 Credits. S
An introduction to the historical background, practice, and ethical issues involved in the creation, presentation, and dissemination of anthropological information in a museum setting. Students participate in the study of a collection of material culture (artifacts) from the Museum of Anthropology, culminating in development of a script for an exhibit.

ANTH 400. Topics in Anthropology, Honors: _____ 3 Credits. H
Selected issues and theories in contemporary anthropology (cultural, linguistic, biological, archaeological) for honors students. Topic for semester to be announced. May be repeated for credit if content varies. Prerequisite: Admission to University Honors Program or permission of instructor.

ANTH 401. Integrating Anthropology. 3 Credits. S
Capstone course that integrates the primary fields of anthropology. Students apply concepts and approaches from each field to a particular topic in preparation for and presentation of a cross-disciplinary and integrative final project. Prerequisite: Completion of ANTH 150/ANTH 151 or ANTH 160/ANTH 162/ANTH 360 and any two other anthropology courses.

ANTH 406. Archaeological Research Methods. 3 Credits. S LFE
A survey of basic field methods and laboratory procedures associated with specimen acquisition, preparation, analysis, classification, and measurement of archaeological materials. In this course students will apply archaeological methods to the study of stone tools, ceramics, and animal bone, learn which field and lab methods to use in a range of research scenarios, interpret human behavior on the basis of artifacts and features recovered from archaeological sites, use introductory flintknapping techniques to produce a stone tool, study the major dating and chronological methods used in archaeology, and complete labs and projects that require analysis and interpretation of archaeological materials. Prerequisite: ANTH 110/ANTH 111 or ANTH 150/ANTH 151 or ANTH 310 or permission of instructor.

ANTH 415. The Rise of Civilization. 3 Credits. S
A study of evolutionary processes leading to the birth of the early great urban civilizations of the Old World and the New World. Patterns of growth and similarities and differences in the rise of urban complexes and states in Mesopotamia, Egypt, the Indus Valley, and in Mexico/Guatemala and Peru. (Same as HIST 415.)

ANTH 418. Summer Archaeological Field Work. 1-8 Credits. S
Under the direction of a professional archaeologist, undergraduate and graduate students are taught proper procedures for the excavation and laboratory analysis of data from a prehistoric or historic archaeological site. Data gathered may be used for additional graduate research. Enrollment by application; limited to twenty students. A fee for subsistence costs will be charged.

ANTH 419. Training in Archaeological Field Work. 1-6 Credits. S
Undergraduate and graduate students are taught techniques of archaeological field work, including survey and excavation, as well as laboratory procedures, including artifact classification and curation.

ANTH 420. Archaeological Theory. 3 Credits. S
This advanced undergraduate seminar reviews the history of scientific archaeological thought, major theoretical paradigms, and current trends in archaeology. Topics include the major theoretical "movements" in the development of anthropological archaeology and how other disciplines have influenced explanations in archaeology, particularly cultural anthropology, geology, history, and evolutionary biology. Prerequisite: Completion of an introductory course in ANTH or permission of instructor.

ANTH 430. Linguistics in Anthropology. 3 Credits. S
The study of language as a symbolic system. Exploration into the interrelatedness of linguistic systems, of nonlinguistic communicative systems, and of other cultural systems. (Same as LING 430.)

ANTH 431. Constructed Languages. 3 Credits. S
Constructed languages are devised by individuals to facilitate international communication (Esperanto) or to enhance fictional or fantasy worlds (Lapine, Newseap, Klingen, Elvish, Navi'i, the Common Tongue, Valyrian). Invented or constructed languages provide a means to study both the universals of linguistic expression (grammar) and the cultural contexts from which they emerge. Students will construct languages and evaluate the cultural motivations of existing ConLangs. Prerequisite: ANTH 106 or ANTH 107 recommended.

ANTH 442. Anthropological Genetics. 3 Credits. N
Principles of human genetics involved in biological anthropology. The genetics of non-Western populations considered within an evolutionary framework. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 445. Topics in Biological Anthropology: _____ 3 Credits. N
Seminar concentrating on selected problems and issues in contemporary biological anthropology. Topic for semester to be announced. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N LFE
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not
required for full participation in the final project. (Same as BIOL 449, SPLH 449, and PSYC 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

ANTH 459. Anthropology of Sex, Honors. 3 Credits.  S
The course is an introduction to the evolutionary study of human sexual behavior. Using an explicitly Darwinian framework, it examines the biological basis for human mate selection, male and female mating strategies, child-birth and child-care practices, parental care, marriage, and family structure. The power of Darwinian theory to predict human sexual behavior is tested in anthropological field studies, designed and carried out by students in the class. Class time is allocated for discussion of students’ research as it progresses through each stage, and results are presented in the last weeks of the semester. Prerequisite: An introductory course in biology or biological anthropology. Admission to the University Honors Program or permission of instructor.

ANTH 462. Field Methods in Cultural Anthropology. 3 Credits.  S
This course introduces students to ethical considerations, methods used in ethnographic fieldwork, field notes, coding data, analysis, and write-up. Students design and carry out research projects. Prerequisite: ANTH 108 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 360 or permission of instructor.

ANTH 465. Genocide and Ethnocide. 3 Credits.  S
This course provides students with a conceptual and historical synopsis of genocide and ethnocide from an anthropological perspective. Taking its lead from a human rights orientation, the course assesses why such atrocities must be confronted. This includes grappling with ethical, legal and definitional ambiguities surrounding the concepts of genocide and ethnocide. We will explore a range of cases in the 20th and 21st centuries, while focusing on diverse conditions leading to genocide, ethnocide, population displacements, human trafficking and the modern phenomena of refugee camps. The course will analyze the role of the modern state, colonialism, political ideologies, ethnicity and nationalism as major forces underpinning ethnocide and genocidal campaigns. Based primarily on a select review of cases of ethnocide and genocide, the class examines how to spread global awareness and communal engagement by actively protecting human rights. (Same as GIST 465.)

ANTH 474. Applied Cultural Anthropology. 3 Credits.  S
Applications of anthropological theory, methods, and findings in programs of community and national development, public health, international aid, and military assistance. Examination of the role of the anthropologist, of ethics and values in intervention schemes, and of the organization of planned change in applied programs. Intensive analysis of selected case studies.

ANTH 484. Magic, Science, and Religion. 3 Credits.  NW S/W
A comparative study of religion and systems of value and belief in non-Western cultures.

ANTH 491. Study Abroad Topics in: _____ 1-5 Credits.  SC S
A course designed to enhance international experience in topic areas related to topics in anthropology at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

ANTH 496. Reading and Research. 1-6 Credits.  S
Individual investigation of special problems in anthropology. Maximum of three credit hours in any one semester. Prerequisite: Permission of instructor.

ANTH 497. Field Experience. 1-6 Credits.  S
A supervised field or laboratory-based experience in the United States or abroad. Students may receive this credit for an independent or collaborative research project or in conjunction with field school participation. Students may also acquire credit for supervised placements in organizations, agencies, museums or other settings in which they apply anthropological knowledge to real-life situations and actively participate in organized work within a community. The field experience should not duplicate any other regularly available course. A contract between mentor and student is required at the beginning of the experience, and a reflection paper is required at the end of the experience. Students are strongly recommended to have completed at least one anthropology methods course prior to enrolling in Field Experience. Prerequisite: Permission and supervision by anthropology instructor required.

ANTH 499. Senior Honors Research. 3-6 Credits.  S
Individual research under the direction of one or more instructors in the department. Minimum of three credit (maximum of six credit) hours in any one semester. Prerequisite: A grade-point average of 3.50 in anthropology and 3.25 in all courses, and permission of instructor.

ANTH 500. Topics in Archaeology: _____ 3 Credits.  S
Seminar concentrating on selected problems and issues in contemporary archaeology. Topic for semester to be announced. Course may be repeated for a maximum of nine hours of credit. Prerequisite: Successful completion of a course in archaeology at any level, or by permission of instructor.

ANTH 501. Topics in Sociocultural Anthropology: _____ 3 Credits.  S
Course concentrating on selected problems, theories, and issues in contemporary sociocultural anthropology. Topic for semester to be announced.

ANTH 502. Topics in Anthropological Linguistics: _____ 3 Credits.  S
Course concentrating on selected problems, theories, and issues in contemporary anthropological linguistics. Topic for semester to be announced.

ANTH 503. Topics in Biological Anthropology: _____ 3 Credits.  S
Course concentrating on selected problems, theories, and issues in contemporary biological anthropology. Topic for semester to be announced.

ANTH 504. North American Archaeology. 3 Credits.  S
A general survey of the archaeology of North America. Detailed coverage of selected problems.

ANTH 505. Prehistory of Eastern North America. 3 Credits.  S
A survey of the archaeological record of eastern North America from the late Pleistocene to the time of European contact. The diverse environments of eastern North America are considered in conjunction with the dynamic climatic and ecological changes which have occurred during the past 20,000 years to provide a background for study of the prehistoric groups who occupied the region. Topics will include the change in economies, technologies, and organization from the earliest hunter-gatherers through the development of pre-Colombian complex societies. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 506. Pre-Hispanic Mexico and Central America. 3 Credits.  NW S/W
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacans, Mayas, Zapotecs, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols,
metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as HIST 571 and LAC 556.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor.

ANTH 507. The Ancient Maya. 3 Credits. S/W
An intensive examination of current scholarship on the ancient Maya civilization of Mexico and Central America. The course will consider Maya culture from its roots in early villages of the Preclassic period to the warring city-states of the Postclassic period. Topics will include settlement and subsistence systems, sociopolitical evolution, art and architecture, myth and symbolism, and Maya hieroglyphic writing. An important theme of the course will be the relevance of the Precolumbian Maya for understanding complex societies and contemporary Latin American Culture. Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, or Indigenous Studies, or permission of instructor.

ANTH 508. Ancient American Civilizations: The Central Andes. 3 Credits. W
An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of "vertical" environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huari, Tiahuanaco, Chimú, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnohistoric documents. (Same as HIST 572 and LAC 558.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, History, or Indigenous Studies, or permission of instructor.

ANTH 509. Ancient Central America. 3 Credits. NW S
This course will examine the Precolumbian cultures of the region situated between Mesoamerica to the north and the Central Andes to the south, focusing principally on the countries of Honduras, Nicaragua, Costa Rica, Panama, and Colombia. Once regarded as an "Intermediate Area" on the peripheries of the ancient civilizations to the north and south, the area of southern Central America and northern South America is now recognized as a center of innovation from very remote times up until the Spanish Conquest. The archaeological remains of stone tools, pottery, jade carvings, gold and copper ornaments, and a wide variety of structures will be interpreted within the context of information on subsistence, settlement patterns, social organization and religious ideology. Issues of the relationships with populations of regions in major culture areas to the north and south will also be considered in detail. (Same as LAC 559.) Prerequisite: ANTH 110 or ANTH 115.

ANTH 510. Environmental Archaeology. 3 Credits. S
An interdisciplinary exploration of the paleoecological context in which past humans interacted with the natural environment encompassing plants, animals, and landscape, including advanced method, theory, and macro, micro, and molecular applications in paleoenvironmental reconstruction. Prerequisite: ANTH 110, ANTH 310, or permission of instructor.

ANTH 511. Archeology of Inequality. 3 Credits. S
Archaeological record of funerary rites, architecture, ceremonial objects and nutritional indicators is often the sole evidence of inequality in the past, especially in the absence of written sources or unbiased historical observations. Case studies describing past small-scale and emergent complex societies worldwide are chosen to help understand the interplay between individual status and rank (achieved or ascribed), group inequality and subordination (class, caste, gender, age, race), wealth (material, embodied, relational), and the role of power and resistance in shaping these societies. Egalitarianism as a leveling mechanism in many of the past societies is also explored. Prerequisite: Junior or Senior status, or permission of the instructor.

ANTH 516. Hunters and Gatherers. 3 Credits. S
The diversity of hunter-gatherer cultures documented in the ethnographic and archaeological records is considered on a global scale, with particular attention given to the relationships between environment, technology, and organization. The evolution of hunter-gatherers from the earliest hominids until their interaction with more complex societies is considered, with emphasis given to the variation and nature of change in these societies. Prerequisite: ANTH 108 or ANTH 150/151 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 310 or permission of instructor.

ANTH 517. Geoarchaeology. 3 Credits. N
Application of the concepts and methods of the geosciences to interpretation of the archaeological record. The course will focus primarily on the field aspects of geoarchaeology (e.g., stratigraphy, site formation processes, and landscape reconstruction), and to a lesser extent on the array of laboratory approaches available. (Same as GEOG 532.) Prerequisite: GEOG 104, ANTH 110, or ANTH 310.

ANTH 519. Lithic Technology. 3 Credits. S
An introduction to the analysis and interpretation of prehistoric stone industries. Topics discussed include origins and development of lithic technology, principles of description and typology, use and function of stone tools; interpretation of flint knapping. Prerequisite: An introductory course in archaeology.

ANTH 520. Archaeological Ceramics. 3 Credits. S
Practicum in the method and theory of pottery analysis in archaeology. Topics include manufacturing techniques, classification, and compositional analysis of pottery artifacts, as well as strategies for interpreting the role of ceramic vessels in food production, storage, and consumption; social and ritual activities; trade and exchange; and the communication of ideas. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 521. Zooarchaeology. 3 Credits. S
This course is intended to complement faunal identification with practical involvement in analyses and interpretation of archaeological faunal assemblages using a variety of modern methods. Students will participate in the study of specific archaeological faunal remains, development of comparative zooarchaeological collections, and in middle-range research to document the variety of agents that affect faunal remains. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 522. Great Plains Archaeology. 3 Credits. S
A survey is provided of the archaeological record and its interpretations for the Great Plains area of North America. The records from earliest human occupation, variation in hunter and gatherer societies, to horticultural and farming societies, and the historic period are reviewed. The history of archaeological research in the region, explanatory frameworks and models, and discussion of changes in economy, technology, mobility, social organization, and population movements are among the topics of concern. Prerequisite: ANTH 110, ANTH 310, or permission of instructor.

ANTH 523. Great Plains Archaeology. 3 Credits. S
A survey is provided of the archaeological record and its interpretations for the Great Plains area of North America. The records from earliest human occupation, variation in hunter and gatherer societies, to horticultural and farming societies, and the historic period are reviewed. The history of archaeological research in the region, explanatory frameworks and models, and discussion of changes in economy, technology, mobility, social organization, and population movements are among the topics of concern. Prerequisite: ANTH 110, ANTH 310, or permission of instructor.

ANTH 544. Origins of Native Americans. 3 Credits. N
A survey of the genetic, linguistic, historic, archaeological, and morphological evidence for the origins of indigenous populations of the Americas. Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

ANTH 545. Contemporary Health Issues in Africa. 3 Credits. S
The course examines health and nutrition in African communities, using the methods of biological and medical anthropology. Fundamental to the approach taken in the course is the understanding that the health of human groups depends on interactions between biological and cultural phenomena in a particular ecological context. One topic will be selected per semester, to examine in detail the full array of epidemiological factors contributing to patterns of specific diseases. AIDS, childhood diseases, and reproductive health of African women are among possible topics. Course material will be selected from scholarly and medical publications, as well as coverage in the popular media. The use of a variety of sources will enhance understanding of the biological and cultural issues involved and will help students identify possible bias and misinformation in popular coverage of events such as famine or epidemic in African settings. (Same as AAAS 554.) Prerequisite: An introductory course in either anthropology or African studies.

ANTH 561. Indigenous Development in Latin America. 3 Credits. S

Surveys the history of the development enterprise since WWII, examines the marginalization and impoverishment of Latin America's indigenous peoples, and provides training to carry out projects for and with them to enhance their quality of life. Development is understood as not merely technological or economic, but also social, emotional, and educational. Students work in teams to design their own mock development project. A 3-credit non-obligatory companion course, Applied Anthropological Field School among the Ch'orti' Maya, will follow in the intersession after each version of this course. (Same as LAC 561.) Prerequisite: ANTH 100, ANTH 108, ANTH 160 or LAC 100; or consent of instructor.

ANTH 562. Mexamerica. 3 Credits. SC H

This class surveys the relations between Mexico and the U.S. as nation-states, and among Mexicans, Mexican Americans, and Anglo Americans (to a lesser extent other U.S. citizens) in historical perspective. Issues of sovereignty, national and ethnic identity, immigration, migration, labor relations, popular culture, media, and transnational economics are covered. (Same as LAC 562.) Prerequisite: ANTH 108 or ANTH 308 or ANTH 160 or ANTH 360 or LAC 100.

ANTH 564. The Peoples of Africa. 3 Credits. NW S/W

“Peoples of Africa” examines the anthropology of Sub-Saharan Africa through selected case studies of particular societies and issues that have wider comparative relevance. Normally two to four societies are selected for the semester and studied through ethnographic, historical, and literary monographs. These case studies are examined in their pre-colonial, colonial, and postcolonial histories. Lectures, readings, and exercises emphasize three kinds of reasoning -- geographical, historical, and cultural context -- required to grasp events and issues in unfamiliar societies. The course also features major anthropological ideas that emerged in the study of African society, and tracks how anthropology has been adapted by African scholars, policy makers, and activists.

ANTH 569. Contemporary Central America and Mexico. 3 Credits. S

Mexico and Central America have formed a cultural interaction zone for thousands of years, and today share common challenges, particularly political, economic, and social ones related to the Spanish colonial legacy, U.S. involvement, and their place in the global economy. Some of the issues addressed include racism, civil war, migration, youth gangs, narcotrafficking, resource extraction, homeless children, the transition from local subsistence economies to low-income work, and struggles for indigenous rights. Prerequisite: ANTH 108 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 360 or LAC 100 or permission of instructor.

ANTH 570. Anthropology of Violence. 3 Credits. S

Introduces students to the comparative and cross-cultural study of violence. The course begins by surveying different anthropological approaches to the study of violence, with special attention paid to classical social theorists as well as ethnographic works. Topics may include (post) coloniality and identity politics, nationalism, race, religion, and political culture; geographic areas to be covered may include Africa, Europe, Latin America, the Middle East, and South Asia. (Same as GIST 570.) Prerequisite: Junior standing or above or permission of instructor.

ANTH 581. Food Systems and Sustainability. 3 Credits. S

How shall we feed ourselves? In the face of unprecedented world population growth, humanity must meet the challenge of providing minimum caloric needs while preserving the health of ecosystems for future generations. In this course, students will explore different food cultures and production strategies developed by people in societies around the world. These include foraging, horticulture, pastoralism, intensified horticulture, and industrial agriculture. We will compare the social, economic, and environmental sustainability of various food systems and technologies and their impact on larger social and ecological systems. Prerequisite: ANTH 150 or ANTH 160.

ANTH 582. Ethnobotany. 3 Credits. S

Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as EVRN 542 and ISP 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor.

ANTH 583. Love, Sex, and Globalization. 3 Credits. S

Escalating transnational flows of information, commodities, and people have created innumerable kinds of “intimate” contacts on a global scale, such as mail order brides, child adoption, sex tourism, commodified romance, and emotional labor. Exploring the ways that cultural artifacts of intimacy are rendered, fetishized, and reified in a free market economy, this course examines how discourses on love and sex confront, and negotiate the logics of the capitalist market, the discrepant narratives of (colonial) modernity, and the ethics of pleasure. In so doing, this course navigates the treacherous interplay among emotionally-specifically love, sex, and money, seeking the potential and limits of cultural politics of emotions. (Same as WGSS 583.) Prerequisite: Any previous course in ANTH or WGSS.

ANTH 586. Visual Anthropology. 3 Credits. U

This course takes a hands-on approach to the study of theory, ethics, and methods in visual ethnographic representation. Students also read and consider historical dimensions in this subdiscipline and complete individual and team projects in photographic and videographic media. Prerequisite: An introductory course in cultural anthropology or permission of the instructor.

ANTH 587. Multidisciplinary Field School in Partnership with the Chorti Maya. 3 Credits. S

Teams of interdisciplinary students partner with the Chorti Maya of Guatemala and Honduras to share information and experiences. One third of the course consists of readings and 4-5 orientation sessions
on campus, and two thirds entails two weeks in Central America. Examples of activities might include historical research, water testing and improvement, photography, art, music, tourism consultation, marketing of crafts, human rights advocacy, web design, computer training, and museum work, among others. There are no prerequisites, but students with a working knowledge of Spanish will receive preference for admission. (Same as LAC 587.)

**ANTH 595. The Colonial Experience. 3 Credits. NW S/W**

An anthropological and historical examination of the processes and dynamics of the colonial experience. Cross-cultural psychosocial phenomena that have profoundly affected the values and social organizations of both colonizers and colonized will be emphasized. Specific examples will be chosen from the former American, Japanese, and European colonial empires with emphasis on Asia.

**ANTH 603. Shamanism Past and Present. 3 Credits. S**

This course explores shamanism, broadly defined as the practice of gaining insight through the use of ecstatic techniques (dance, drumming, trance, vision quests, and the use of psychotropic substances) for the purpose of interpreting existence and healing illnesses, through a consideration of theories and evidence for its practice from Upper Paleolithic times to the present day. Examples from the ancient cultures of Asia, Europe, Africa, Australia, and the Americas are used to explore current theoretical approaches in order to identify shamans and shamanism in the past. Issues of identifying shamans and shamanism in art and archaeo-contexts are discussed. The course also explores the role that shamanism plays in a wide variety of cultures. The principal goal of the course is to provide a reasoned, critical interpretation of shamanism in the context of contemporary debates about its definition and active practice. Prerequisite: ANTH 108 or ANTH 110 or ANTH 150 or ANTH 151 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 310 or ANTH 360 or permission of instructor.

**ANTH 604. The First Americans. 3 Credits. S/W**

This class will review the ongoing scientific debate concerning the routes and chronologies of the earliest human migrations into the Americas. It surveys the history of the dispute over the antiquity of archaeological sites in North and South America, and investigates the paleontological, genetic, geological, and archaeological records for clues to the various peopling models and models. As a counterpoint to the scientific approach, it also explores public arguments over the issue, to assess the socio-cultural and political repercussions of archaeological discoveries. Prerequisite: ANTH 150, ANTH 310, or permission of the instructor.

**ANTH 605. Mortuary Practices in the Archaeological Record. 3 Credits. S**

Students study theories and methods of burial practices in the archaeological record. They learn about past communities; attitudes toward death and burial and how social organization, complexity, ideology, power, gender and age roles contribute to mortuary practices. The course examines a variety of Old and New World examples from different chronological periods through class presentations, debates and written assignments. The course focuses on comparisons and evaluation of traditional and current methods and approaches. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

**ANTH 619. Field Concepts and Methods in Geoarchaeology. 3 Credits. S**

A field course taught during the three week summer session. Involves all-day excursions to different regions in order to introduce students to a variety of archaeological landscapes and environments. Focuses on the application of geoscientific concepts and methods in archaeological field investigations, emphasizing natural processes such as erosion, deposition, weathering, and biological and human activity that create and modify the archaeological record, and on soil-stratigraphic and geophysical approaches to landscape and site investigations.

**ANTH 648. Human Osteology. 4 Credits. N LFE**

This course examines the structure and function of the human skeleton from an evolutionary and biomedical perspective. Students will learn to identify bones comprising the human skeleton and how osteological information aids in reconstructing sex, age, race, stature, and health status. Major transformations of the human skeleton from hominoid precursors, and some of the biomedical consequences of these transformations, will be addressed. (Same as BIOL 548.) Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

**ANTH 652. Population Dynamics. 3 Credits. N**

Examination of possible interrelationships between the demographic structure of a population and the forces of evolution. Students are exposed to field methods and techniques of population studies. Prerequisite: An introductory course in anthropology, biology, or permission of instructor.

**ANTH 671. The Culture of Consumption: (E.G. United States and Japan). 3 Credits. S**

Examines the ideologies of capitalism and consumerism as they influence social institutions and daily life. Topics for consideration grow out of instructors’ interests and may include areas such as class, religion, advertising, politics, gender, medicine, environment, childhood, and education. Prerequisite: ANTH 550 or permission of instructor.

**ANTH 699. Anthropology in Museums. 3 Credits. S**

The course reviews the history of archeological, ethnographic, physical anthropological and other types of collections. It also considers current issues facing anthropologists, such as: contested rights to collections and the stories that accompany them; representation and interpretation of cultures; art and artifact; conceptualization, design and building of exhibitions; and anthropological research and education in the museum. (Same as MUSE 699.) Prerequisite: ANTH 150 or ANTH 108 or consent of instructor.

**ANTH 701. History of Anthropology. 3 Credits.**

Development of the field of anthropology and its relations with intellectual history. Emphasis on method and theory in historical context. Prerequisite: Consent of instructor or graduate standing.

**ANTH 702. Current Archaeology. 3 Credits.**

An introduction to fundamental theoretical orientations and methodological approaches in world archaeology. Case studies illustrate data acquisition, dating methods, culture history, paleoenvironmental models, and culture processes. Prerequisite: Consent of instructor or graduate standing.

**ANTH 703. Current Biological Anthropology. 3 Credits.**

The fundamental issues, methods, and theories in contemporary biological anthropology. Prerequisite: Consent of instructor or graduate standing.

**ANTH 704. Current Cultural Anthropology. 3 Credits.**

The fundamental issues, methods, and theories in contemporary cultural anthropology and anthropological linguistics. Prerequisite: Consent of instructor or graduate standing.

**ANTH 706. Current Linguistic Anthropology. 3 Credits.**

The fundamental issues, methods, and theories in contemporary linguistic anthropology. (Same as LING 706.) Prerequisite: Graduate standing or consent of instructor.

**ANTH 707. Responsible Research and Scholarship in Anthropology. 3 Credits.**
This course examines a range of issues critical to responsible research, scholarship, and practice in anthropology. Required for all doctoral students in Anthropology. Prerequisite: Graduate standing in anthropology or consent of instructor.

ANTH 730. Linguistics in Anthropology. 3 Credits.
The study of language as it concerns anthropology. Language systems in relation to culture, language taxonomy, semantics, and linguistic analysis as an ethnographic tool. Prerequisite: Graduate standing.

ANTH 732. Discourse Analysis. 3 Credits.
This course focuses on linguistic frameworks for the analysis of discourse. Discourse is a linguistic system larger than the sentence (utterance), which connects and contextualizes speech and written text. This course focuses on current issues and theoretical frameworks in the analysis of discourse. Using oral and written data, students will examine how contexts influence and shape linguistic form. Topics covered include transcription systems, the structure and organization of different genres of language, and the performance of social actions, including stance-taking, framing, and the construction of identity. Students will also have an opportunity to perform discourse analytic research on the data of their choice. (Same as LING 732.) Prerequisite: ANTH 706 or consent of instructor.

ANTH 736. Linguistic Analysis. 3 Credits.
Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from a variety of languages of different structural types. (Same as LING 708.) Prerequisite: An introductory course in linguistics. Not open to students who have taken LING 308.

ANTH 740. Linguistic Data Processing. 3 Credits.
The tools and techniques necessary to analyze linguistic fieldwork data, including research design, recording and elicitation techniques, computational data processing and analysis, and field ethics. Techniques of research, field recording, and data analysis technology. Methods of phonetic transcription, grammatical annotation, and analysis of language context. Practice of techniques via short studies of at least one language. (Same as LING 740.) Prerequisite: LING 700 or consent of instructor.

ANTH 741. Field Methods in Linguistic Description. 3 Credits.
The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Techniques of research design, methods of phonetic transcription, grammatical annotation, and analysis of language context. (Same as LING 741.) Prerequisite: LING 705 or consent of instructor.

ANTH 748. Language Contact. 3 Credits.
Theories and case studies of languages in contact. Areal and genetic linguistics, genesis of pidgins and creoles, multilingualism, social, political, economic, and geographic factors in language change. (Same as LING 748.) Prerequisite: A course in linguistics.

ANTH 766. Topics in Biological Anthropology: ____. 3 Credits.
Topic for semester to be announced. Students may repeat the course for different topics. Prerequisite: Consent of instructor.

ANTH 770. Research Methods in Physical Anthropology. 3 Credits.
A practical course in the use of special laboratory techniques of biological anthropological research and methods of data presentation. Prerequisite: Consent of instructor.

ANTH 775. Seminar in Cultural Anthropology: ____. 3-9 Credits.
Intensive consideration of special problems in cultural anthropology. Topic for semester to be announced.

ANTH 783. Doing Ethnography. 3 Credits.
Ethnography is both process and product. The product, a representation of a culture (or selected aspects of a culture), is based on fieldwork, the common term for the ethnographic process. This course explores how ethnographers prepare for the field, do their fieldwork, then report it.

ANTH 798. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as AMS 730, BIOL 798, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

ANTH 799. Museum Internship. 1-6 Credits.
Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as ANTH 799, GEOL 723, and MUSE 799.)

ANTH 801. Proseminar I in Anthropology. 3 Credits.
This course is an introduction to graduate study in Anthropology at the University of Kansas. Students will be introduced to the history, theory, and current research in two subfields of Anthropology: archaeology and biological anthropology. Students will read foundational papers in these two fields in order to develop a framework for contextualizing more cutting-edge research by KU Anthropology faculty and other scholars. In addition, this course will provide professional development resources for graduate students with an overview of the resources available at KU to support their graduate studies, including internal and external funding sources, information about the design, ethics, and approval procedures for future research, peer review and advisor feedback on research proposals, integration into mentoring networks, and other activities focused on career and professional development. Graduate students will learn how to critically read academic papers, and begin to develop a proposal for their graduate research project.

ANTH 802. Proseminar II in Anthropology. 3 Credits.
This course continues graduate students’ survey of the history and theory of each anthropological subfield with a focus on foundational readings in sociocultural and linguistic anthropology as well as current research by KU Anthropology faculty and scholars outside of the department. Students will continue to develop their professional skills by finishing their proposals for external funding, and presenting and critiquing each others’ work. Students’ finished proposals can form the foundation of their dissertation proposals, and all are encouraged to submit them for external funding.

ANTH 849. Seminar in Archaeology: ____. 2-4 Credits.
Subject matter of seminar to be announced for semester.

ANTH 851. Data Analysis in Archaeology: ____. 1-6 Credits.
A two-semester course designed to provide graduate students with basic principles in the analysis of archaeological data. Course content will include an introduction to archaeological systematics, analytical procedures, application of multivariate statistics, and computer applications. Topic for semester to be announced.

ANTH 853. Theory and Current Problems in Archaeology. 3 Credits.
Consideration of scientific methodology, basic assumptions of anthropological archaeology, relationship of archaeology and
anthropology, and current theoretical and methodological trends in archaeology.

**ANTH 876. Advanced Medical Anthropology: _____**. 3-6 Credits.
This course provides advanced training in selected aspects of medical anthropology; the topic for a particular semester will reflect the current interests of the instructor. It is expected that the course content will alternate between theoretical and applied emphases. May be repeated for a total of six hours credit. Prerequisite: Consent of instructor.

**ANTH 889. Summer Archaeological Field Work. 1-8 Credits.**
Under the direction of a professional archaeologist, undergraduate and graduate students are taught proper procedures for the excavation and laboratory analysis of data from a prehistoric or historic archaeological site. Data gathered may be used for additional graduate research. Enrollment by application; limited to twenty students. A fee for subsistence costs will be charged.

**ANTH 895. Graduate Teaching in Anthropology. 1 Credits.**
A course covering matters relating to pedagogy in anthropology. Topics covered will include current best practices for teaching, techniques to engage learners in inclusive communities of anthropological study, and specific matters arising from graduate students' experiences in teaching every week. Does not count toward coursework requirements for a graduate degree in anthropology. Required of all graduate teaching assistants assigned to courses in anthropology. Graded on a satisfactory/unsatisfactory basis. Prerequisite: A current GTA appointment in Anthropology.

**ANTH 896. Graduate Research. 1-9 Credits.**
Individual investigation of special problems in anthropology. Limit of six hours credit for the M.A. degree.

**ANTH 897. Internship Research. 4-6 Credits.**
Experiential learning in the application of anthropology through placement in business, government, community, research, or social service organization or agency. Students design and implement an anthropological project under faculty supervision. Prerequisite: Graduate standing in Anthropology.

**ANTH 898. Internship Analysis. 1-6 Credits.**
Experiential learning in the application of anthropology through placement in business, government, community, research, or social service organization or agency. This course is a sequel to ANTH 897. Students finish up any remaining research and deliver their findings to the client. They also prepare a written report and a verbal presentation for the Department of Anthropology. Prerequisite: ANTH 897 and Graduate standing in Anthropology.

**ANTH 899. Master's Thesis. 1-12 Credits.**
Limit of six hours credit for the M.A. degree. Graded on a satisfactory progress/limited progress/no progress basis.

**ANTH 996. Graduate Research. 1-9 Credits.**
Individual investigation of special problems in anthropology.

**ANTH 999. Doctoral Dissertation. 1-12 Credits.**
Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis.

### Applied Behavioral Science Courses

**ABSC 100. Introduction to Applied Behavioral Science. 3 Credits.**
An introduction to the principles of behavioral science and their application to problems facing contemporary societies (e.g., autism, public health, education, juvenile delinquency, substance abuse). Students will learn how behavioral scientists analyze human behavior and how these analyses are used to inform interventions. Students will also learn about careers in the behavioral sciences and how to pursue them. Course may be offered in lecture or online format.

**ABSC 101. Introduction to Applied Behavioral Science, Honors. 3 Credits.**

This course introduces students to the principles of scientific inquiry in applied behavioral science: objectivity, definitions, observation, reliability, validity, correlation and its limitations, causation, experimental design and analysis, and the interpretation of data. These principles are presented in the context of solving individual and societal problems across the lifespan, for example, in early childhood education, public health, developmental disabilities (e.g., autism), delinquency, independent living for people with disabilities, educational systems, and gerontology. Open only to students in the University Honors Program.

**ABSC 110. Applied Behavior Analysis for Practitioners. 3 Credits.**

Behavior analysis is the study of human and non-human behavior from a natural science perspective. More specifically, behavior analysis takes an observation-based approach to understanding behavior. This approach has yielded several technologies of behavior that offer hope for a variety of populations including individuals with disabilities, families, organizations, and communities. The services of qualified, nationally board-certified behavior analysts are in great demand. This course is based on the Registered Behavior Technician Task List, but is offered independent of the Behavior Analyst Certification Board (BACB). This course is designed to meet the 40-hour training requirement for the RBT credential and also includes additional material.

**ABSC 150. Community Leadership. 3 Credits.**
An introduction to analysis, intervention, evaluation, and leadership in contemporary problems facing local communities. Readings, lectures, and service-learning activities enable students to understand community problems and how citizens and professionals can address them.

**ABSC 151. Community Leadership, Honors. 3 Credits.**
An introduction to analysis, intervention, evaluation, and leadership in contemporary problems facing local communities. Readings, lectures, and service-learning activities enable students to understand community problems and how citizens and professionals can address them. Open only to students in the University Honors Program.

**ABSC 160. Introduction to Child Behavior and Development. 3 Credits.**

An introduction to child behavior and development with an emphasis on the normal developmental range of growth, intelligence, cognition, emotion, language, and social skills from birth to adolescence.

**ABSC 177. First Year Seminar: __________. 3 Credits.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Applied Behavioral Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ABSC 250. Human Development. 3 Credits.**
This course examines the psychological, social, and physical development of humans across the lifespan from conception through infancy, childhood, adolescence, adulthood and death. The course will explore the broad array of factors that contribute to development including cognitive, emotional, social, neurological, physical, genetic, and environmental influences. (Same as PSYC 250.) Prerequisite: PSYC 104 or PSYC 105.

**ABSC 279. Study Abroad Topics in: __________. 1-5 Credits.**
A course designed to enhance international experience in topic areas related to applied behavioral science at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

**ABSC 302. Behavioral Assessment. 3 Credits.**
The strategies, methods, and ethics of conducting behavioral assessment are presented to support the identification and selection of socially significant behavior change goals. The types of behavioral assessment including indirect, descriptive, and functional assessment approaches are reviewed to determine the appropriate conditions and context for assessment-based interventions. The selection and use of other assessment methods common in Applied Behavior Analysis including preference assessments is introduced. The collection, review and interpretation of assessment data are discussed within the context of identifying behavior change goals and behavior-analytic services. Prerequisite: ABSC 100 or ABSC 101 with a grade of C or better.

**ABSC 304. Principles and Procedures of Behavioral Interventions. 3 Credits.**
An examination of the application of the principles and procedures of behavior analysis in interventions used to address problems in adolescent and family life, adult behavioral issues including addictions, childhood autism, community health, early childhood education, intellectual and developmental disabilities, language development, organizational behavior management, and physical disabilities. The course focuses on fundamental elements of behavior change and specific behavior-change procedures to increase and maintain appropriate behaviors and reduce inappropriate behaviors. Issues in design, implementation, measurement, and evaluation of the effects of behavioral interventions and the ethical implications of the use of these interventions are examined. Prerequisite: ABSC 100 or ABSC 101 with a grade of C or better.

**ABSC 308. Research Methods and Application. 4 Credits.**
Examines research methods used to identify, describe, understand, and intervene on socially important problems occurring across the life span (e.g., early childhood, adolescence, elders) and in varied settings (homes, classrooms, group-care facilities, and communities). Discusses research methods and concepts (e.g., prediction, experimental control, reliability, validity) within scientific, psychological, and behavior-analytic frameworks. Presents strategies and tactics regarding descriptive and experimental methods, direct and indirect measurement, graphical and statistical analysis, and single-subject and group experimental designs. Examines ethics and social responsibility in research. Provides opportunities to read primary and secondary sources, develop research questions, write and present research proposals, and assist in the conduct of research projects. Prerequisite: ABSC 100 or ABSC 101 and ABSC 304 with a grade of C or better in each course.

**ABSC 309. Child Life: Introduction to Theory and Practice. 3 Credits.**
Overview of theory and practice issues related to the Child Life Specialty, including history of the profession and its development, foundations of family centered care, scope of practice of a child life specialist, regulatory issues within the profession (e.g., ethical code, competencies, standards of practice), and historic and current perspectives on preparation of children for healthcare encounters and life-changing events.

**ABSC 310. Building Healthy Communities. 3 Credits.**
This course teaches knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation. In a service-learning component, students apply these skills to issues that matter to them and to the communities they serve. Prerequisite: ABSC 100 or ABSC 101 with a grade of C or better.

**ABSC 311. Building Healthy Communities, Honors. 3 Credits.**
This course teaches knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation. In a service-learning component, students apply these skills to issues that matter to them and to the communities they serve. Prerequisite: Open only to students in the University Honors Program.

**ABSC 342. Adult Development and Aging. 3 Credits.**
An overview of environmental, cultural, and biological influences of adult development and aging. Course material is organized in terms of topics, rather than presenting a chronological account. Prerequisite: ABSC 100 or ABSC 101, ABSC 150 or ABSC 151, or ABSC 160.

**ABSC 349. Therapeutic Benefits of Play. 3 Credits.**
Overview of therapeutic play activities for children and adolescents with a range of health issues and needs, with particular attention to classical and contemporary theories on play, play as an essential element for children’s growth, development, and learning, and the influence of the environment on children's play. Special emphasis will be placed on the design and implementation of therapeutic play activities in the healthcare setting. Prerequisite: ABSC 160 or PSYC 333.

**ABSC 350. The Behavioral Treatment of Children with Autism. 3 Credits.**
Students learn about methods of teaching children with autism and about evaluating those methods. Topics include: basic methods of teaching as applied to imitation, productive and receptive language, self-help skills, and engagement in community activities, as well as observation and measurement of behavior in community settings and evaluating consumer satisfaction. The course consists of classroom lectures, discussions, demonstrations, examinations, and completion of laboratory and observation assignments. Enrollment priority is given to majors who intend to do practicum work with children with autism. Prerequisite: ABSC 304 or instructor permission.

**ABSC 359. Family Systems. 3 Credits.**
This class is designed to provide students with an overview of the theoretical, behavioral, and psychological perspectives of family systems and family dynamics. Specific topics include the historical and contemporary theories related to family structure and functions, family relationships and the dynamics of family life, adaptations in family structure and interaction patterns during times of transition, adult-child interactions and family roles, broader societal perspectives of diversity and cultural variance, and exploration of current research and theory as it applies to family systems. Prerequisite: ABSC 160 or PSYC 333.

**ABSC 360. Drugs, Addiction, and Behavior. 3 Credits.**
This course offers an overview of the basic and applied research in behavioral pharmacology and addictions, as well as interventions. Among the topics it covers are a history of drugs, addiction, and behavior; basic principles of drug action (e.g., pharmacodynamics); behavioral pharmacology testing paradigms (e.g., self-administration); drug action and effects (e.g., alcohol, nicotine, designer drugs, anti-depressants); behavioral deficits associated with addictions (e.g., memory); addiction treatment and recovery (e.g., maturing out, contingency management); and drugs and society. Prerequisite: ABSC 100, PSYC 104 is also recommended.
ABSC 410. Behavioral Approaches in Working with Adolescents. 3 Credits. S
Addresses some of the basic behavioral techniques used with juveniles who have problems in school, at home, or in the community: readings and role-playing sessions covering assessment of problems, relationship development, observing and defining behavior, teaching and contracting techniques, and counseling. Prerequisite: ABSC 100 highly recommended.

ABSC 425. Teaching Apprenticeship in Applied Behavioral Science. 3 Credits. S
Students read new materials, become more fluent with ABSC 100 content, and acquire tutoring skills. Course may not be repeated. Prerequisite: ABSC 100 and consent of the instructor and department chair.

ABSC 437. Independent Living and People with Disabilities. 3 Credits. S
A multi-disciplinary seminar exploring theory, method, research, and practice in independent living. The course reviews personal and environmental factors as they relate to everyday problems affecting people with varying disabilities. It also contains service-learning activities in which students apply skills and knowledge gained in the classroom. Prerequisite: An introductory course in social sciences or consent of the instructor.

ABSC 441. Ethical, Legal and Professional Issues in Applied Behavioral Science. 3 Credits. S
The course covers ethical and legal issues in the responsible conduct of basic, applied, intervention and prevention research (e.g., informed consent and assent with typical and atypical populations); inclusion of underrepresented groups, participatory action research; bias, fraud, and plagiarism; conflict of interest; reporting misconduct; authorship conflict. It also covers professional issues in behavioral consultation and training, review of the Behavior Analysis Certification Board task list on basic behavior-analytic skills, client-centered responsibilities, and foundational knowledge. This course satisfies the Behavior Analysis Certification Board requirement for 15 classroom contact hours of coursework related to Ethical Considerations in Behavior Analysis needed to take the BACB examination. This course is taught at the 400 and 800 levels, with additional assignments at the 800-level. Prerequisite: ABSC 308.

ABSC 444. Curriculum Development for Young Children. 3 Credits. S
A survey of educational materials and activities appropriate for young children. Students explore several components of effective curriculum development (e.g., objectives, methods of activity presentation, teaching strategies) and learn to integrate them to construct curricula for a range of content and skill areas. By focusing on functional components of a curriculum, students learn to construct, critically evaluate, and modify curricula for typically and atypically developing children. Prerequisite: ABSC 304 or instructor permission.

ABSC 469. Special Topics in: _____. 1-3 Credits. S
A course designed for the study of special topics in applied behavioral science. Course content addresses major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

ABSC 470. Organizational Behavior Management. 3 Credits. S
This course offers detailed discussion of the organizational behavior management (OBM) literature including performance management, behavioral systems analysis, and behavior-based safety. This course also addresses empirically supported staff training procedures and research in implementation science. Prerequisite: ABSC 100.

ABSC 486. Issues in Parenting. 3 Credits. S
Theoretical approaches to the study of parenting and parent-child relationships, techniques for analyzing common parenting problems, designing appropriate interventions, fostering effective communication skills, understanding issues of diversity, and promoting parent education programs. Professional collaboration and support of families and children are emphasized throughout. Students develop analytical skills through reading, discussion, and application of theoretical and empirical concepts. Prerequisite: ABSC 160 or equivalent knowledge of child development or child psychology.

ABSC 489. Directed Readings in: _____. 1-3 Credits. S
A course designed for directed readings in applied behavioral science. Readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

ABSC 499. Directed Research in: _____. 1-3 Credits. S
Basic and applied research experience. The course provides training in research methods, measures, and designs, and the conduct of research, in the behavioral sciences. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

ABSC 509. Contemporary Behavioral Science: Historical, Conceptual, and Comparative Foundations. 3 Credits. S
This course provides a survey of modern behavioral science and its applications. It reviews the field's history; integrates its sub-disciplines; situates it within the natural sciences, social sciences, and humanities; and compares and contrasts it with other perspectives. It covers recent advances in research, their implications for understanding human behavior, and their application to solving societal problems. And, it addresses the ethical implications of applied behavioral science. Prerequisite: ABSC 100 or ABSC 101 and ABSC 304 with a grade of C or better in each course.

ABSC 519. Psychological Aspects of Death and Dying. 3 Credits.
Students will be exposed to the historical and current cultural, psychological, spiritual/religious, and practical/legal perspectives of death and dying, with particular attention to how mental health professionals interface with systems of care to address loss across multiple developmental levels. Additional topics include ambiguous loss, suicide, transitions, palliative care, self-awareness, and professional self-care. Prerequisite: Junior or Senior standing.

ABSC 529. Pediatric Health and Health Promotion. 3 Credits.
An undergraduate seminar on the application of psychological theory and practice to pediatric illness and health promotion. Students will be exposed to key issues related to the health and health care of children and adolescents (and their families), with particular attention to how applied psychology interfaces with medicine and allied health to promote children's health and health care. Prerequisite: Junior or Senior standing.

ABSC 535. Developmental Psychopathology. 3 Credits. S
A review of contemporary psychological and developmental disorders of children and youth. Course presents current models of psychopathology, classification systems, assessment methods, and treatment approaches designed for the individual, the family, and the community. Specific attention is given to age, gender, and cultural differences and similarities. Topics include: anxiety disorders, oppositional behavior disorders, physical/sexual abuse, learning disabilities, depression, chronic physical illness, and autism. (Same as PSYC 535.) Prerequisite: ABSC 160 or PSYC 333, or instructor permission.

ABSC 560. The Juvenile Justice System: A Behavioral and Legal Perspective. 3 Credits. S
An overview of the juvenile justice system, including the history, development, and current controversy over children’s rights in the legal system examined in light of relevant principles of behavioral science and behavioral systems of rehabilitation. Topics include delinquency, misconduct, status offenses, dependent-neglected children, child abuse, and juvenile court procedures and personnel (e.g., probation officers), and rehabilitative programs. Prerequisite: ABSC 100.

ABSC 562. Behavioral Community Approaches to Addressing Social Issues. 3 Credits. S
A seminar that provides an overview of the history and origin of behavioral community approaches to address social issues through the integration of applied behavior analysis with other disciplines including community psychology, prevention science, and public health. A multidisciplinary perspective is presented that provides a review of empirically-based behavioral interventions applied in community settings. The course is offered at the 500 and 800 levels with additional assignments required at the 800-level. Not open to students with credit in ABSC 662. Prerequisite: ABSC 100, or ABSC 150, or ABSC 310, or instructor permission.

ABSC 599. Honors and Thesis in Applied Behavioral Science. 1-5 Credits. S
A two-semester course combining small group discussions of selected, advanced topics in applied behavioral science with honors thesis supervision on a project of the student’s own design. Students normally enroll for one or two hours in fall semester and three to five hours in spring semester. Prerequisite: ABSC 304, ABSC 308, and instructor permission.

ABSC 606. Special Projects in the Community. 1-10 Credits. S
Structured opportunities to develop and apply knowledge and skills (e.g., analyzing problems, strategic planning, intervention, evaluation) in a project that addresses a community problem or goal. Prerequisite: Instructor permission.

ABSC 626. Adolescent Behavior and Development. 3 Credits. S
Impact of factors of social environment and physical growth upon psychological development from puberty to young adulthood. (Same as PSYC 626.) Prerequisite: PSYC 104, PSYC 333, or ABSC 160.

ABSC 632. Advanced Child Behavior and Development. 3 Credits. S
An advanced course in child development that includes a survey of the field’s principles and theoretical approaches, and current issues in research and practice. Topics will include: prenatal development, cognition and language, social-emotional development, socialization influences in childhood, developmental psychopathology, and social policies. (Same as PSYC 632.) Prerequisite: ABSC 160, PSYC 333, or instructor permission, and senior or graduate status.

ABSC 675. Practicum in Infant-Toddler Care and Early Intervention I. 3-5 Credits. S
Experience in a classroom-based early intervention and child-care program serving children younger than 3 years. Students gain practical experience with care-giving and teaching practices appropriate for typically and atypically developing children. Prerequisite: ABSC 444 (or concurrent enrollment) and instructor permission.

ABSC 676. Practicum in Infant-Toddler Care and Early Intervention II. 3-5 Credits. S
An advanced practicum providing experience in classroom-based early-intervention and child-care program serving children younger than 3 years. Students gain practical experience with care-giving and teaching practices appropriate for typically and atypically developing children. Students learn to develop and implement individualized curricula based on assessments of children's skills. Prerequisite: ABSC 444, ABSC 675, and instructor permission.

ABSC 677. Practicum in Preschool Education and Intervention I. 3-5 Credits. S
A one-semester practicum providing opportunities for students to assume responsibility for the education and guidance of young children in an early childhood program. Regularly scheduled individual and staff conferences enable students to evaluate personal growth and progress as teachers of young children. Prerequisite: ABSC 444 (or concurrent enrollment) and instructor permission. Must also meet special state requirements for child care employees and volunteers.

ABSC 678. Practicum in Preschool Education and Intervention II. 3-5 Credits. S
A one-semester advanced practicum providing opportunities for students to assume responsibility for the education and guidance of young children in an early childhood program. Regularly scheduled individual and staff conferences enable students to evaluate personal growth and progress as teachers of young children. Prerequisite: ABSC 444, ABSC 677, and instructor permission. Must also meet special state requirements for child care employees and volunteers.

ABSC 679. Practicum in Behavior Analysis Research in Early Childhood Education. 1-6 Credits. S
A two-semester practicum providing opportunities for supervised training in one of several ongoing research projects in the field of behavior analysis, either basic or applied. Students assist in conducting research and participate in individual and group meetings to discuss and evaluate research and related methodological issues. Prerequisite: ABSC 308 and instructor permission.

ABSC 680. Practicum in Advanced Laboratory in the Development of Behavioral Treatments for Children with Autism. 1-6 Credits. S
Students participate in an intensive behavioral treatment program teaching language, social skills, self-help skills, and academic skills to young children with autism. Students learn: to develop and implement treatment programs; design and use of a system of data collection and analysis; and apply the principles and philosophy of community and school mainstreaming. Prerequisite: ABSC 350 and instructor permission.

ABSC 682. Organizational Behavior Management Practicum. 1-5 Credits. S
This practicum course is designed to provide training and support practice in addressing socially significant problems and goals of community-based organizations using behavior analysis to guide assessment and intervention. Additionally, this course promotes community-university partnerships to support change and improvement in organizations through services and learning. All practicum students are required to have previously completed ABSC 100 and selected applied behavioral science as a major or minor.

ABSC 683. Practicum in Child Life Specialty. 3 Credits.
This practicum is designed to provide training and support the practice of Child Life Specialty (CLS) in a hospital/health care environment. Students will receive supervised experience under the supervision of certified Child Life Specialists, didactic instruction in professional issues related to CLS, and individual advising. Students will create a clinical portfolio to document their development of specific clinical/professional competencies over the course of the semester. Individual advising focuses on development of the students’ resume/cover letter and individualized study plans for preparing for the CLS certification exam. This course may be repeated once for credit. Prerequisite: ABSC 309 and instructor permission. Must also meet special state and/or hospital
requirements for child care employees and volunteers (e.g., criminal background check).

**ABSC 685. Practicum in Community-based Residential or Day Treatment Programs for Disabled Adults. 3-6 Credits. S**
A one or two-semester practicum in which students are provided with the opportunity to work directly with developmentally disabled adults in either community-based residential or day treatment programs. Students are required to read relevant literature, carry out treatment programs, and participate in weekly meetings to discuss treatment goals and progress. Prerequisite: ABSC 304, ABSC 410, and instructor permission.

**ABSC 690. Practicum in Community Health and Development. 1-6 Credits. U**
A two-semester practicum in which students engage in structured opportunities to practice core competencies related to the work of promoting community health and development (e.g., strategic planning, intervention, evaluation). In weekly group meetings, students prepare for their individual working field settings (e.g., health and human service agencies, research and advocacy organizations, community organizations). Prerequisite: ABSC 150, ABSC 310, and instructor permission.

**ABSC 691. Practicum in Community Health and Development, Honors. 1-6 Credits. U**
A two-semester practicum in which students engage in structured opportunities to practice core competencies related to the work of promoting community health and development (e.g., strategic planning, intervention, evaluation). In weekly group meetings, students prepare for their individual working field settings (e.g., health and human service agencies, research and advocacy organizations, community organizations). Prerequisite: Open only to students in the University Honors Program; ABSC 151, ABSC 311 and instructor permission.

**ABSC 692. Practicum in Basic Research. 3 Credits. S**
Practical supervised training in the laboratory study of human and/or animal behavior. Students assist in conducting basic research, read and discuss research articles, attend lab meetings, and acquire data analysis and presentation skills. Prerequisite: ABSC 308 (or concurrent enrollment) and permission of the instructor.

**ABSC 693. Practicum in Historical and Conceptual Foundations. 3-6 Credits. S**
Practical supervised training in the historical and conceptual foundations of applied behavioral science (e.g., behavior analysis). Students research and read primary source literatures and write papers that advances our understanding of the field's foundations (e.g., empirical, theoretical). Prerequisite: ABSC 100/101, ABSC 304, ABSC 308, and ABSC 509 (or concurrent enrollment), and permission of instructor.

**ABSC 694. Practicum in Juvenile Problems. 3-6 Credits. S**
A one-semester practicum providing opportunities for students to aid professionals in the development and implementation of behavioral treatment plans with adolescents. Regularly scheduled individual and group meetings enable the evaluation of the practicum students' progress while working in the rehabilitative process for juveniles who have problems that can bring them into contact with the juvenile justice system. Prerequisite: ABSC 410, and instructor permission.

**ABSC 695. Special Practicum in: _____. 3-6 Credits. S**
A one or two-semester practicum providing opportunities for supervised, hands-on training outside the existing specialty areas or their options. This practicum must be arranged with the prior approval of a faculty advisor and the department's Undergraduate Curriculum Committee. Students should see an advisor about this practicum early in their junior year. Prerequisite: Instructor permission.

**ABSC 696. Special Practicum in, Honors: _____. 3-6 Credits. S**
A one or two-semester practicum providing opportunities for supervised, hands-on training outside the existing specialty areas or their options. This practicum must be arranged with the prior approval of a faculty advisor and the department's Undergraduate Curriculum Committee. Students should see an advisor about this practicum early in their junior year. Prerequisite: Open only to students in the University Honors Program and instructor permission.

**ABSC 698. Special Research Practicum in: _____. 3-6 Credits. S**
A one or two-semester research practicum providing opportunities for supervised, hands-on research training outside the existing specialty areas or their options. This practicum must be arranged with the prior approval of a faculty advisor and the department's Undergraduate Curriculum Committee. Students should see an advisor about this practicum early in their junior year. Prerequisite: Instructor permission.

**ABSC 702. Curriculum Development for Young Children. 3 Credits.**
A survey of educational materials and activities that are appropriate for young children (birth to age 8). Students explore several components of effective curriculum (e.g., objectives, effective methods of activity presentation, teaching strategies) and learn to combine them to construct curriculums for a range of content and skill areas. By focusing on the functional components of curriculums, students learn to construct, critically evaluate, and modify them for both typically developing children and children with特殊 needs.

**ABSC 704. Research Practicum in Clinical Child Psychology. 3 Credits.**
This course provides students in the Clinical Child Psychology Program with the opportunity to enhance and consolidate their research activities by fulfilling one of the elective cluster course requirements. This practicum involves a contract with a research advisor and the program director. The contract includes definable products and dates for completion to prepare research for submission for publication, develop a grant proposal, or conduct additional research project independent of other requirements in the program. The course is not to be taken as an overload, but is to be part of a full-time course schedule. May be repeated. (Same as PSYC 704.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

**ABSC 705. Pediatric Psychology. 3 Credits.**
Discussion of behavior problems commonly encountered in the pediatric population, including reviews of data-based methodologies for remediation. Topics include general child rearing skills, bedtime problems, enuresis, encopresis, toilet training, self-injurious behavior, temper tantrums, behavior in community settings, child abuse, psychotropic drugs for children, adolescent behavior problems and selection of children's play materials. Prerequisite: ABSC 160 or ABSC 632.

**ABSC 706. Special Topics in Clinical Child Psychology: _____. 3 Credits.**
A course offering detailed discussion of the literature and research methods of a special topic within clinical child and pediatric psychology.
ABSC 710. Community Health and Development. 3 Credits.
This course extends knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation, and then apply these skills to issues that matter to them and to the communities they serve. (Same as ISP 871.)

ABSC 716. Experimental Problems in Community Settings. 1-5 Credits.
Research in the experimental design and analysis of community settings. No more than 10 hours total. Prerequisite: Instructor permission.

ABSC 719. Experimental Field Work in Community Settings. 1-5 Credits.
Instruction in the methods and techniques of the experimental design and analysis of community settings through supervised participation in established research programs. Emphasizes the techniques of gathering original experimental data. No more than 10 hours total. Prerequisite: Instructor permission.

ABSC 725. Research Methods and Application. 3 Credits.
Surveys research methods used to identify, describe, understand, and intervene on socially important problems occurring across the life span (e.g., early childhood, adolescence, elders) and in varied settings (homes, classrooms, group-care facilities, and communities). Discusses research methods and concepts (e.g., prediction, control, reliability, validity) within scientific, psychological, and behavior-analytic frameworks. Presents strategies and tactics regarding descriptive and experimental methods, direct and indirect measurement, graphic and statistical analysis, and single-subject and group experimental designs. Examines ethics and social responsibility in research. Provides opportunities to read secondary and primary sources, develop research questions, write and present research proposals. Prerequisite: Instructor permission.

ABSC 735. Within Subjects Research Methodology and Direct Observation. 3 Credits.
A graduate level introduction to the logic of experimentation, direct observation strategies, and research conducted using individual (e.g., single subject) and time series experimental designs. Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 746. Introduction to Behavioral Science. 3 Credits.
This introductory course promotes knowledge and skill in analyzing behavioral problems across a range of societal issues. Special consideration is given to designing interventions, implementing, managing, and supervising applied projects. Topics include the identification and selection of problems and target populations, analysis of problems and goals, designing measurement systems, developing interventions, and disseminating products from applied behavioral research. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 771. Introduction to Applied Behavioral Science. 3 Credits.
This introductory course promotes knowledge and skill in analyzing behavioral problems across a range of societal issues. Special consideration is given to designing interventions, implementing, managing, and supervising applied projects. Topics include the identification and selection of problems and target populations, analysis of problems and goals, designing measurement systems, developing interventions, and disseminating products from applied behavioral research. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 772. Conceptual Foundations of Behavior Analysis. 3 Credits.
An advanced Master's seminar on the theoretical, philosophical, and conceptual foundations of behavior analysis. It covers the field's history and purview (e.g., natural science, historical science, applied science); its philosophy of science (e.g., empiricism, pragmatism); the nature of its science (e.g., inductive, experimental, field-theoretic); the products of its science (e.g., principles, concepts, theories); its ethical systems (e.g., humanism, normalized ethics, personal responsibility); its relations with other fields (e.g., biology, psychology, anthropology); its contrasts with folk psychology and folk psychology (e.g., mentalism, free will); and its comparisons with like-minded philosophies, psychologies, and cultural practices (e.g., embodied cognition, secular humanism, communitarianism.) Prerequisite: ABSC 854 or instructor permission.

ABSC 773. Applied Behavior Analysis in Complex Organizations. 3 Credits.
An examination of the theory, principles, and methods of behavior analysis and their applications to problems of human behavior in complex organizations such as businesses, industries, human service organizations, and governments. Prerequisite: Graduate standing or instructor permission.

ABSC 787. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as AMS 767, COMS 787, PSYC 787, and SOC 767.)

ABSC 788. Designing Early Education Environments. 3 Credits.
This course reviews empirically-supported strategies for designing effective and socially valid care and education environments for young children with and without disabilities. Topics will include: early educational theory, individualized curricula and goal selection strategies, various instructional typologies (e.g., direct instruction, embedded teaching), specific teaching tactics (e.g., prompting, time delay, differential reinforcement), preventive and assessment-based behavioral management strategies, current best practice recommendations for design of the social and physical environment, and methods for assessing children's, caregivers’, and teachers’ programmatic preferences. Prerequisite: ABSC 796.

ABSC 797. Proseminar in Child Language. 2 Credits.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/
unsatisfactory basis. (Same as CLDP 799, LING 799, PSYC 799 and SPLH 799.)

**ABSC 799. Experimental Analysis of Behavior. 3 Credits.**
This course provides an in-depth description of the basic principles of operant and respondent conditioning in the context of basic non-human and human subjects research. Students will learn various theoretical approaches to understanding effects of reinforcement and punishment. Special attention will be provided to the role of verbal processes in the learning of verbally competent individuals. Students will gain substantive experience with identifying laboratory derived principles present in the literature that are relevant to application through assigned projects.

**ABSC 800. Conceptual Foundations of Applied Behavioral Science. 3 Credits.**
A master's-level graduate seminar on the field's conceptual foundations, with special emphasis on behavior analysis and its application - applied behavior analysis. The course addresses the field's history, philosophy of science, and disciplinary purview; its advanced behavioral principles and processes; its analyses of various content domains in the behavioral, social, and cognitive sciences (e.g., emotion, language, cognition, culture); and its relation to other disciplines (e.g., biology, psychology, anthropology). It also considers professional issues in, for example, the ethical conduct of research and practice. Prerequisite: ABSC 799.

**ABSC 801. Design and Analysis of Community Development Methods. 1-6 Credits.**
An examination of principles and practices of community development and evaluation of methods used to promote community improvement. May be repeated if the content differs. Prerequisite: Instructor permission.

**ABSC 802. Behavior Analysis in Developmental Disabilities. 3 Credits.**
A graduate seminar that includes an overview of the behavioral characteristics of various developmental disabilities and examination of empirically-supported behavioral approaches to the study and treatment of developmental disabilities. Topics will include classification and etiology, motivation, methods for developing appropriate skills, assessment and treatment of behavior disorders, staff training, and legal and ethical issues related to treatment. Prerequisite: Instructor permission.

**ABSC 803. Fundamentals of Psychological Assessment and Intervention with Children. 3 Credits.**
Lecture and supervised experience covering the theoretical and empirical literature on assessment and intervention methods for children, adolescents, and families. Students will learn and demonstrate evidence-based clinical interviewing skills, behavioral observation techniques, risk assessment techniques, therapeutic communication approaches, strategies for providing assessment feedback to families, and ethical principles related to the provision of assessment and psychotherapy (including client file and resource management.) The course requires interaction with clinical populations and communication with referral sources. (Same as PSYC 803.) Prerequisite: Graduate student in clinical child psychology program.

**ABSC 804. Research in Community Health Promotion. 1-6 Credits.**
Supervised, original investigations of problems relevant to community health, such as the prevention of substance abuse or promotion of child outcomes. As appropriate, the course is focused on any combination of: literature research, research planning, and preparation conducting research, analyzing data, writing research reports, or preparing oral reports of completed research. Prerequisite: Instructor permission.

**ABSC 805. Functional Behavioral Assessment. 3 Credits.**
The strategies, tactics, and ethics of functional assessment are presented in the larger context of behavioral assessment. Research articles relevant to indirect, descriptive, and experimental functional assessment approaches and assessment-based interventions are carefully reviewed to determine the appropriate conditions for each type of assessment and intervention. Prerequisite: Instructor permission.

**ABSC 806. Functional Behavioral Assessment Practicum. 1-6 Credits.**
This course provides supervised experience in the use of functional behavioral assessment in home, clinic, or educational environments with young children presenting problem behaviors. Prerequisite: ABSC 805 and instructor permission.

**ABSC 807. Design and Evaluation of Community Health Promotion Methods. 1-6 Credits.**
An examination of the methods used to develop and evaluate community health promotion programs. The course addresses topics of interest to participants, such as substance abuse, adolescent pregnancy, or child outcomes. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

**ABSC 808. Professional Issues: Clinical Child Psychology. 1 Credits.**
Consideration of special problems confronting the child and family oriented scientist-practitioner, and in the development of a professional identity. Topics include critical issues, including ethical, legal, cultural, empirical, and clinical aspects of research and practice. May be repeated. (Same as PSYC 809.) Prerequisite: Graduate standing in clinical child psychology.

**ABSC 809. Introduction to Developmental Assessment. 3 Credits.**
A course covering the general principles of developmental assessment from birth through adulthood, with special emphasis on the history and nature of assessment instruments and the criteria for acceptance, reliability, and stability of results. Selected assessment techniques for infants, preschool children, elementary school children, adolescents, and adults are reviewed and evaluated for their utility, limitations, and applications. A critical analysis of assessment in general and particular assessment tools is made.

**ABSC 811. Achievement and Intellectual Assessment in Clinical Child Psychology. 3 Credits.**
Course covers the basic theory, research, administration, and reporting of psychological assessment of development, intelligence, and achievement for children, adolescents, and adults within cultural and developmental contexts. The range of psychological instruments examined includes, for example, WIAT, K-ABC, W-J, S-B, WISC, WAIS, and WPPSI. (Same as PSYC 811.) Prerequisite: Graduate student in clinical child psychology.

**ABSC 812. Behavioral and Personality Assessment of Children. 3 Credits.**
Lecture, laboratory, field work, and supervision. Theory and applications in the psychological evaluation of children with standardized assessment techniques. The administration, scoring, interpretation, and reporting of behavioral and personality functioning in children. (Same as PSYC 812.) Prerequisite: Graduate standing in clinical child psychology.

**ABSC 813. Behavioral Science Research Proseminar. 1-3 Credits.**
A master's level professional seminar in which faculty and students present research proposals; offer formal presentations of completed empirical research, reviews of the literature, and other areas of scholarship; and engage discussion about contemporary empirical,
conceptual, and professional issues in applied behavioral science. May be repeated for a total of six credits. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 825. Social Development. 3 Credits.
A lecture and discussion course in social development. It includes such topics as theoretical approaches to the study of social development, as well as the literature on family processes, peer relations, aggression and prosocial behavior, child abuse and neglect, family violence, child care, and the media. (Same as PSYC 825.) Prerequisite: A course in child psychology or development.

ABSC 828. Research in Early Intervention with Children. 3 Credits.
A seminar on current issues in assessment and intervention for young children who are at risk for or who have special needs. Provides foundation for evaluating and understanding research in early intervention. Includes historical, conceptual and legislative underpinnings of early intervention, risk factors affecting development, methodological issues in early intervention research, best practice standards, and applications to social, language, and pre-academic domains.

ABSC 834. Directed Readings in Community Health Promotion. 1-5 Credits.
Supervised readings in topical areas of community health promotion, such as the prevention of substance abuse and promotion of child outcomes. A program of study, conferences, and reports is developed by the instructor and student.

ABSC 840. Theoretical Concepts of Human Development and Child Care Practice. 3 Credits.
Basic introduction to treatment concepts and procedures related to child development and child-care programs. The major goal is to provide a theoretical framework that is effective in dealing with various types of child deviancy. Prerequisite: Graduate standing or instructor permission.

ABSC 841. Ethical, Legal, and Professional Issues in Applied Behavioral Science. 3 Credits.
The course covers ethical and legal issues in (a) the responsible conduct of basic, applied, and intervention research (e.g., informed consent and assent with typical and atypical populations; inclusion of underrepresented groups; bias, fraud, and plagiarism in data collection and reporting; conflict of interest; reporting misconduct; authorship) and (b) professional issues in teaching, research, and service (e.g., written and presented scientific communication; grant preparation; the journal review process; cultural competence; teaching; vita preparation). The course will also include instruction in the preparation of editorial reviews for manuscripts submitted for publication to in peer-reviewed journals, in partial fulfillment of the department's doctoral requirement for preparing editorial reviews. Prerequisite: Graduate standing in applied behavioral science.

ABSC 846. Practicum in Clinical Child Psychology I. 1-3 Credits.
Introductory practicum experience for the Clinical Child Psychology Program. Orientation to psychological evaluation and treatment of children, adolescents, and their families and initial development of professional self-assessment skills. Students acquire specific clinical competencies through shadowing cases, assisting with interpretation of test of intelligence and academic achievement, conducting behavioral observations in field settings, and performing co-therapy of cases presenting to the KU Child and Family Services Clinic. May be taken in more than one semester. (Same as PYSC 846.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 847. Practicum in Clinical Child Psychology II. 1-3 Credits.
Intermediate practicum experience for the Clinical Child Psychology Program. Development of specific competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire specific clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic. Students develop ability to identify specific treatment goals and select therapeutic interventions that are conceptually congruent with clients’ presenting problems and are based on sound empirical evidence. Students also develop the ability to integrate and synthesize test results, interview material, and behavioral observations into coherent case conceptualizations. May be taken in more than one semester. (Same as PSYC 847.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 850. Principles of Behavior Analysis. 3 Credits.
An advanced graduate course on the basic principles of behavior, and related procedures for producing behavioral change, with both human and nonhuman subjects. The principles and procedures are presented as fundamental elements of behavior change. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 851. Ethical, Legal, and Professional Issues in Applied Behavioral Science. 3 Credits.
The course covers ethical and legal issues in (a) the responsible conduct of basic, applied, and intervention research (e.g., informed consent and assent with typical and atypical populations; inclusion of underrepresented groups; bias, fraud, and plagiarism in data collection and reporting; conflict of interest; reporting misconduct; authorship) and (b) professional issues in teaching, research, and service (e.g., written and presented scientific communication; grant preparation; the journal review process; cultural competence; teaching; vita preparation). The course will also include instruction in the preparation of editorial reviews for manuscripts submitted for publication to in peer-reviewed journals, in partial fulfillment of the department's doctoral requirement for preparing editorial reviews. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 852. Behavior Analysis in Developmental Disabilities. 3 Credits.
A graduate seminar that includes an overview of the basic principles of behavior, and related procedures for producing behavioral change, with both human and nonhuman subjects. The principles and procedures are presented as fundamental elements of behavior change. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 853. Behavioral Assessment. 3 Credits.
The strategies, tactics, and ethics of functional assessment are presented in the larger context of behavioral assessment (e.g., nomothetic and idiographic approaches). Research articles relevant to indirect, descriptive, and experimental functional assessment approaches and assessment-based interventions are carefully reviewed to determine the appropriate conditions for each type of assessment and intervention. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 854. Experimental Analysis of Behavior. 3 Credits.
This course provides an in-depth description of the basic principles of operant and respondent conditioning in the context of basic non-human and human subjects research. Students will learn various theoretical
approaches to understanding effects of reinforcement and punishment. Special attention will be provided to the role of verbal processes in the learning of verbally competent individuals. Students will gain substantive experience with identifying laboratory derived principles present in the literature that are relevant to application through assigned projects.

**ABSC 856. An Interdisciplinary Approach to Intervention with the Handicapped. 3 Credits.**

This course surveys knowledge from various disciplines that address developmental disabilities across the life span. Its focus is on designing strategies for individual intervention and treatment programs by an interdisciplinary team. Designed for students in social work, speech pathology, psychology, nutrition, audiology, special education, physical therapy, nursing, child development, behavior analysis, and related fields. Prerequisite: A basic course in child development or instructor permission.

**ABSC 857. Biological Bases of Behavior. 3 Credits.**

This course will examine research and theory on the biological bases of normal and abnormal behavior, including central and peripheral nervous system mechanisms of behavioral and psychological functions, and the roles of genetic and epigenetic processes in regulating behavior. The course covers biological systems that support sensory processing, motor behavior, emotion, cognition and social behavior through analysis of animal model, healthy development and patient studies. The diverse methods used to assess these biological systems also will be surveyed, including behavioral testing of animal models, neuropsychological assessment, biosample analyses, and in vivo imaging approaches. Research on altered behavioral and psychological processes will be integrated with the aim of better understanding the potential of linking knowledge of the biological mechanisms of psychiatric disorders to current clinical practice, as well as critical limitations of current methods and knowledge. Prerequisite: Instructor permission.

**ABSC 861. Principles of Behavior Analysis. 3 Credits.**

An advanced graduate course on the basic principles of behavior, and related procedures for producing behavioral change, with both human and nonhuman subjects. The principles and procedures are presented as fundamental elements of behavior change.

**ABSC 862. Behavioral Community Approaches to Addressing Social Issues. 3 Credits.**

A seminar that provides an overview of the history and origin of behavioral community approaches to address social issues through the integration of applied behavior analysis with other disciplines including community psychology, prevention science, and public health. A multidisciplinary perspective is presented that provides a review of empirically-based behavioral interventions applied in community settings. The course is offered at the 500 and 800 levels with additional assignments required at the 800-level. Not open to students with credit in ABSC 562. Prerequisite: Graduate standing or instructor permission.

**ABSC 865. Applied Behavior Analysis in Complex Organizations. 3 Credits.**

An examination of the theory, principles, and methods of behavior analysis and their applications to problems of human behavior in complex organizations such as businesses, industries, human service organizations, and governments. Prerequisite: Graduate standing or instructor permission.

**ABSC 870. Practicum I in Behavioral Psychology. 1-6 Credits.**

Instruction and supervised laboratory or field work for master's students. Practica are offered by different instructors on different topics; may be repeated for credit if the content differs. Topics and instructors are announced in the Schedule of Classes. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

**ABSC 871. Practicum I in Behavior Analysis: _____ 1-6 Credits.**

Instruction and supervised laboratory or field work for master's students. Practica are offered by different faculty members on different topics; may be repeated for credit if the content differs. Topics and instructors are announced in the Schedule of Classes. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

**ABSC 872. Practicum I in: _____ 1-6 Credits.**

Instruction and supervised laboratory or field work for master's students. Practica are offered by different faculty members on different topics; may be repeated for credit if the content is different. Topics and instructors are announced in the Schedule of Classes. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

**ABSC 873. Practicum in Educational Psychological/Rehabilitative Services: _____ 3-6 Credits.**

This course is for students who wish to complete practicum experiences in services related to persons with retardation, autism, or physical disabilities in programs in various settings, such as the Ann Sullivan Center in Lima, Peru and the Algeria School in Paraguay. The course is designed to give interested students opportunities to work with professionals in these programs on a semester or summer basis. The course consists of participation in professional activities associated with the practicum program and a report of these activities to the instructor. Prerequisite: Instructor permission.

**ABSC 875. Practicum in Community Health Promotion. 1-6 Credits.**

A practicum course designed to provide students with knowledge, background, and practical experience in the implementation of community health promotion projects and their evaluation. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

**ABSC 876. Practicum in Community Development. 1-6 Credits.**

A practicum course designed to provide students with knowledge, background, and practical experience in the implementation of community improvement projects and their evaluation. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

**ABSC 880. Early Childhood Practicum for Allied Professionals. 1-6 Credits.**

Professionals in fields such as journalism, social welfare, and psychology may have career interests that include work with or on behalf of young children. This practicum provides students with individualized opportunities to work with young children in a group setting in order to extend their professional skills. Prerequisite: Instructor permission.

**ABSC 881. Early Childhood Care and Intervention Practicum I. 1-6 Credits.**

A course covering the specification of learning goals and the implementation and evaluation of curriculum design management of groups of young children. May be repeated for no more than a total of six credit hours. Prerequisite: Instructor permission.

**ABSC 882. Early Childhood Care and Intervention Practicum II. 1-6 Credits.**

A course to assess and teach skills in diagnosis and evaluation of particular problems in the developmental process of young children (1-5 years of age), and to design and implement interventions. May be repeated for no more than a total of six credit hours. Prerequisite: ABSC 791 and instructor permission.

**ABSC 883. Early Childhood Administration Practicum. 1-6 Credits.**

Experiences in understanding and developing parent satisfaction with care arrangements for their child(ren), providing services to personnel responsible for care and development of young children, and/or
maximizing use of available services for young children on their behalf. May be repeated for no more than a total of six credit hours. Prerequisite: ABSC 791 and instructor permission.

**ABSC 884. Early Childhood Early Intervention Practicum. 1-6 Credits.**
Laboratory teaching in an early childhood classroom that includes children who are developmentally delayed, demonstrate behavioral or learning difficulties, or have other developmental disabilities. Experience includes individualized programming for children with special needs, as well as group management and group curriculum planning. May be repeated for no more than a total of six credit hours. Prerequisite: ABSC 791 and instructor permission.

**ABSC 885. Early Childhood Teacher Training Practicum. 1-6 Credits.**
Experience in supervising staff who work in programs for young children. Supervision includes orienting, monitoring, and evaluating staff performance; opportunities for interaction with other professionals; experience in facilitating staff communication; and consulting on research projects. Prerequisite: ABSC 791 and instructor permission.

**ABSC 886. Developmental Assessment Practicum: _____ 1-6 Credits.**
This course provides direct experience in the developmental assessment of a selected age group, such as infants, preschool and elementary children, adolescents, or adults. It may be repeated providing the age group specification is not repeated. Prerequisite: ABSC 810 or an equivalent course.

**ABSC 887. Clinical Practicum in Pediatric Psychology. 1-6 Credits.**
Supervised experience with pediatric patients referred for behavior problems, including, for example, temper tantrums, enuresis, encopresis, and hyperactivity. Also includes evaluation and treatment of children with commonly encountered behavior problems. In addition, students observe pediatric staff performing appropriate physical exams and observe the interaction between the medical staff and the pediatric psychologist. Prerequisite: ABSC 705 and instructor permission.

**ABSC 888. Diversity Issues in Clinical Psychology. 3 Credits.**
Review of individual differences pertaining to culture, ethnicity, race, gender, sexual orientation, age, etc., as these have an impact upon theory, research, assessment, and treatment issues in clinical psychology. (Same as PSYC 888.) Prerequisite: Graduate status in clinical psychology, or consent of instructor.

**ABSC 890. Seminar in: _____ 1-3 Credits.**
A seminar for master's level students. It examines basic and applied research literatures in specialized fields of applied behavioral science. May be repeated for credit if the content differs. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

**ABSC 891. Research in: _____ 1-6 Credits.**
Supervised research investigations in basic or applied behavioral science for master's students. The course introduces observational measurement, research methods and designs, and the conduct of research in the behavioral sciences. May be repeated for credit if the content is different. Prerequisite: Graduate standing or instructor permission.

**ABSC 892. Readings in: _____ 1-3 Credits.**
An individual, supervised study of recent research and scholarship for master's students. The course emphasizes current scholarship in selected areas of basic and applied behavioral science and its conceptual foundations. Designed for students whose needs cannot be met in other courses. May be repeated for credit if the content differs. Prerequisite: Graduate standing or instructor permission.

**ABSC 893. Special Topics in: _____ 1-3 Credits.**
A research and readings course for master's students. It allows them to concentrate their studies on selected basic and applied problems in behavioral science and carry out independent research. May be repeated for credit if the content differs. Prerequisite: Graduate standing or instructor permission.

**ABSC 894. Study Abroad Topics in: _____ 1-3 Credits.**
A course designed to enhance international experience in topic areas related to behavioral science for master's students. May be repeated for credit if the content differs. Prerequisite: Graduate standing or instructor permission.

**ABSC 897. Master's Thesis in Clinical Child Psychology. 1-10 Credits.**
Supervised research experience completing thesis leading to master's degree. (Same as PSYC 897.)

**ABSC 899. Master's Thesis in Applied Behavioral Science. 1-9 Credits.**
Supervised research experience for the thesis leading to a master's degree in applied behavioral science. May be repeated. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

**ABSC 901. Analysis of Everyday Human Behavior. 3 Credits.**
An advanced graduate seminar on the analysis of everyday human behavior, grounded in behavior-analytic principles, concepts, and theory. It covers the process and products of, for example, biological and behavioral development; sensation and perception; motivation and emotion; personality and social behavior; language, cognition, and creativity; attitudes and beliefs, consciousness and unconsciousness, and purpose, will, and values. Prerequisite: ABSC 800 or instructor permission.

**ABSC 905. Psychopathology in Children. 3 Credits.**
Diagnosis and treatment of psychological problems in childhood and adolescence. Preference given to graduate students in child clinical psychology, school psychology, and counseling psychology. (Same as PSYC 905.) Prerequisite: Fifteen hours of graduate credit in psychology or consent of instructor.

**ABSC 913. Behavioral Science Research Proseminar. 1-3 Credits.**
A doctoral level professional seminar in which faculty and students present research proposals; offer formal presentations of completed empirical research, reviews of the literature, and other areas of scholarship; and engage discussion about contemporary empirical, conceptual, and professional issues in applied behavioral science. May be repeated for a total of eight credits. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

**ABSC 931. The Analysis of Verbal Behavior. 3 Credits.**
An advanced graduate seminar on verbal behavior, grounded in behavior-analytic principles, concepts, and theory. Although focused on the verbal behavior of the proficient speaker, it also covers verbal behavior's evolutionary and biological bases, the development and structure of verbal behavior, the training and remediation of verbal behavior, and critiques and rebuttals to the analysis (e.g., Chomsky's.) Prerequisite: ABSC 800, advanced coursework in psycholinguistics or linguistics, or instructor permission.

**ABSC 934. Directed Readings in Clinical Child Psychology. 3-5 Credits.**
ABSC 940. Practicum I in Behavioral Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 941. Practicum II in Behavioral Psychology. 1-6 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 942. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 943. Advanced Practicum in Clinical Child Psychology III. 1-3 Credits.
Development of advanced competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students will demonstrate the ability to implement empirically derived behavior analysis in consideration of individual differences, cultural values, and individual preferences. Students in external practicum sites will demonstrate an understanding of evidence-based models of consultation and provision of consultation to care providers in professional contexts. May be taken in more than one semester. (Same as PSYC 943.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 944. Advanced Practicum in Clinical Child Psychology IV. 1-3 Credits.
Demonstration of advanced competencies in assessment, intervention, and consultation with children, adolescents, and their families through didactics, field experience, and supervision in the semester(s) prior to required clinical internship. Students will demonstrate advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., formal case presentation), and modeling of clinical competencies for junior students. Course requirements include the development of portfolios for demonstration of clinical competencies and application to clinical internships. May be taken in more than one semester. (Same as PSYC 944.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 945. Advanced Practicum in Clinical Child Psychology V. 1-5 Credits.

ABSC 946. Quantitative Analysis of Behavior. 3 Credits.
Advanced experimental course (doctoral-level) that demonstrates the operations of principles of behavior, and the quantitative models that describe them. Specific review of the methods to obtain the data necessary to permit a quantitative analysis of behavior, along with the quantitative analyses themselves, will be discussed. Students will learn the advantages and disadvantages of quantitative analyses in the behavioral sciences, along with a behavioral perspective on quantitative models of behavior. Students will obtain hands-on experience selecting data for a quantitative analysis, reviewing whether the data and proposed model meet the requisite assumptions of EAB research on quantitative models, and analyzing behavioral data using quantitative models. Prerequisite: ABSC 799.

ABSC 947. Advanced Practicum in Clinical Child Psychology VI. 1-3 Credits.
Specialized practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies related to supervision and consultation in clinical psychology. With faculty supervision, students will develop and demonstrate the ability to provide effective supervision to less advanced students in the program in selected cases appropriate to the service setting. Further development of advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum, and modeling of clinical competencies for junior students. May be taken in more than one semester. (Same as PSYC 947.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 948. Advanced Seminar in Applied Behavior Analysis: _____.
An advanced seminar examining the literature and research methods in specialized areas of applied behavior analysis (e.g., developmental disabilities, community health, organizational development). May be repeated for credit if the content differs.

ABSC 949. Advanced Seminar in Clinical Child Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 950. Evaluating and Disseminating Scientific Material I. 1-3 Credits.
Intensive training in the evaluation and production of scientific critiques and reviews on current issues in the analysis of behavior, as disseminated through the media. May be repeated. Prerequisite: Instructor permission.

ABSC 951. Evaluating and Disseminating Scientific Material II. 1-3 Credits.
Intensive training in the evaluation and production of scientific critiques and reviews on current issues in the analysis of behavior, as disseminated through the media. May be repeated. Prerequisite: Instructor permission.

ABSC 961. Advanced Seminar in Applied Behavior Analysis: _____.
An advanced seminar examining the literature and research methods in specialized areas of applied behavior analysis (e.g., developmental disabilities, community health, organizational development). May be repeated for credit if the content differs.

ABSC 962. Advanced Seminar in Clinical Child Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 963. Clinical Child Psychology Internship. 1 Credits.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by qualified clinical child psychology faculty and field staff clinicians. Required of all clinical child psychology program students. An intensive guided experience in application of clinical child psychology theory, methods, and practices. Integrates scientific and clinical aspects of field. (Same as PSYC 963.) Prerequisite: Completion of Ph.D. comprehensive examinations, graduate standing in clinical child psychology, and permission of clinical child psychology faculty.

ABSC 964. Advanced Seminar in Applied Behavior Analysis: _____.
An advanced seminar examining the literature and research methods in specialized areas of applied behavior analysis (e.g., developmental disabilities, community health, organizational development). May be repeated for credit if the content differs.

ABSC 965. Advanced Seminar in Clinical Child Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 966. Advanced Seminar in Clinical Child Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 967. Advanced Seminar in Clinical Child Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 968. Advanced Seminar in Clinical Child Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 969. Advanced Seminar in Clinical Child Psychology. 3 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 970. Practicum II in Behavioral Psychology. 1-6 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 971. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 972. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 973. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 974. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 975. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 976. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 977. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 978. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 979. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 980. Practicum II in Behavior Analysis: _____.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs.

ABSC 981. History of Behavior Analysis. 3 Credits.
An advanced graduate seminar on the history of behavior analysis from Greek naturalism to the 21st century. It covers the history and philosophy of science and psychology (e.g., evolution vs. revolutions, ontology, epistemology); the long past, short history, and recent origins of behavior analysis in cultural context (e.g., Social Progressivism); historical and conceptual relations between behavior analysis and other systems (e.g., behaviorism, psychoanalysis, phenomenology, cognitivism); and historiographic issues and methods (e.g., great person vs. Zeitgeist history, presentism vs. historicism.) Prerequisite: ABSC 800 or instructor permission.

ABSC 989. Methods of Obtaining External Research Funding. 1-3 Credits.
The objective of this course is to demystify this process and prepare participants to submit their first independent research grant application. Participants learn about the characteristics of different funding mechanisms and agencies, the characteristics of successful and unsuccessful application strategies, how to turn an initial research idea into a competitive application, ethical issues that influence each stage of the development and submission process, and the nuts and bolts of grant development and management. Specific activities include critiquing an actual NIH grant application, participating in a mock review panel, and developing an actual grant application.

ABSC 990. Advanced Seminar in: ____. 3 Credits.
An advanced seminar for doctoral students. It examines basic and applied research literatures in specialized fields of applied behavioral science. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 991. Advanced Research in: ____. 1-9 Credits.
Advanced, supervised research in basic or applied behavioral science for doctoral students. The course may focus on any combination of a literature review, research planning and preparation, conducting research, analyzing data, writing research reports, and preparing oral reports of completed research. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 992. Advanced Readings in: ____. 1-6 Credits.
An advanced individual, supervised study of recent research and scholarship for doctoral students. The course emphasizes current scholarship in selected areas of basic and applied behavioral science and its conceptual foundations. Designed for students whose needs cannot be met in other courses. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 993. Advanced Special Topics in: ____. 1-3 Credits.
An advanced research and readings course for doctoral students. It allows them to concentrate on their studies on selected basic and applied problems in behavioral science and carry out independent research. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 994. Advanced Study Abroad Topics in: ____. 1-6 Credits.
An advanced course designed to enhance international experience in topic areas related to behavioral science for doctoral level students. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 998. Doctoral Dissertation in Clinical Child Psychology. 1-10 Credits.
Research experience making original contribution to literature in clinical child psychology. (Same as PSYC 998.)

ABSC 999. Doctoral Dissertation in Behavioral Psychology. 1-9 Credits.
Advanced supervised research that makes an original, empirical contribution to the literature in applied behavioral science leading to a doctoral degree in behavioral psychology. May be repeated. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

Biology Courses

BIOL 100. Principles of Biology. 3 Credits. NB N
Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended.

BIOL 101. Principles of Biology, Honors. 3 Credits. NB N
Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 is recommended. BIOL 101 and BIOL 102 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor.

BIOL 102. Principles of Biology Laboratory. 1 Credits. U LFE
Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). Prerequisite: Concurrent enrollment in BIOL 100 is recommended.

BIOL 105. Biology Orientation Seminar. 1 Credits. N
Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about degree requirements, academic advising, research opportunities, and career options, as well as how to align academic and professional goals. Graded on a satisfactory/unsatisfactory basis.

BIOL 116. Introduction to Evolutionary Biology. 3 Credits. N LFE
An account of evolutionary thinking from classical to contemporary time. The emphasis is on mainstream developments (Darwinism, Mendelism, the Modern Synthesis, Cultural Ecology), but certain social issues will be examined (social Darwinism, creationism).

BIOL 120. Insects in Your World. 3 Credits. NB N
Students will learn about the global impact of insects on human concerns, both positive (pollination and decomposition) and negative (competition with humans for food, fiber, and shelter, and disease transmission) while developing an appreciation for the ways in which scientists work with real problems involving insects. The course will cover the overwhelming abundance and diversity of insects, and their life history, ecology, behavior, and physiology. This course is intended for both nonbiology and biology majors. Format: two lectures and one discussion section per week.

BIOL 150. Principles of Molecular and Cellular Biology. 3 Credits. NB N LFE
A course for biology majors and students planning to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. An honors section (BIOL 151) is offered for students with superior academic records.
Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 151. Principles of Molecular and Cellular Biology, Honors. 3 Credits. NB N LFE**

A course for students with superior academic records who are biology majors or who plan to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. Prerequisite: Membership in the University Honors Program and concurrent or prior enrollment in CHEM 130, CHEM 190 and CHEM 191, CHEM 150, or CHEM 170; or consent of instructor.

**BIOL 152. Principles of Organismal Biology. 3 Credits. NB N LFE**

A course for biology majors and students who plan to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. An honors section (BIOL 153) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 153. Principles of Organismal Biology, Honors. 3 Credits. NB N LFE**

A course for students with superior academic records who are biology majors or planning to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 154. Introductory Biology Lab for STEM Majors. 2 Credits. N LFE**

A hybrid laboratory course for majors in science, technology, engineering and math fields. This course will use online modules (~ 3 hours per week) to introduce students to key core competencies (e.g., critical thinking, quantitative reasoning, scientific communication, collaboration, etc.) that are applicable to all STEM fields. Three hours of face-to-face instruction will provide students hands-on opportunities to apply these core competencies and skills to research questions in the biological sciences. Students will apply research skills and engage in an authentic research activity during the second half of the course and will present the results to their peers in an oral format.

**BIOL 155. Principle Lab in: ______. 1-3 Credits. U LFE**

This introductory laboratory exposes the students to basic principles in biology and modern experimental techniques through an open-ended authentic research experience directed by a faculty member. Prerequisite: Consent of instructor.

**BIOL 177. First Year Seminar: ______. 3 Credits. NB**

A limited-enrollment, seminar course for first-time freshmen, organized around current issues in biology. Does not contribute to major requirements in biology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**BIOL 200. Basic Microbiology. 3 Credits. NB N**

Introduction to bacteria and viruses. Topics include historical development of microbiology, bacterial structure and growth, enzymes and energy production, disinfection, antibacterial drugs, gene transfer, viral replication, infection and immunity, with emphasis on infectious diseases. Can be substituted for BIOL 201 as a prerequisite for other microbiology courses by consent of department. Not open to those with credit in BIOL 400, or BIOL 401. Prerequisite: A course in high school biology and a course in high school chemistry. This course is not recommended for first semester freshmen.

**BIOL 203. Introductory Microbiology Laboratory. 2 Credits. U LFE**

Laboratory exercises to complement BIOL 200. Prerequisite: BIOL 200. May be taken concurrently.

**BIOL 210. Introduction to Clinical Laboratory Sciences. 1 Credits. U**

An introductory overview of the professions of Clinical Laboratory Sciences including types of analyses performed, specialties, interrelationships in the health care system and a visit to a clinical laboratory. This course will enable those considering a major in the Clinical Laboratory Sciences to have a clear definition of the professions. (Same as CLS 210.)

**BIOL 225. Evolution and the History of Life. 3 Credits. N**

This introductory course for non-majors focuses on the significance of the history of life and the fossil record for our understanding of evolution. Key events in the history of life are considered, including the origins of life, the eukaryotic cell, and humans, and also various mass extinctions. The focus is on general scientific and evolutionary principles and mechanisms that can be extracted from the study of the fossil record. It also uses the lessons of the fossil record to consider the prospects for our own species.

**BIOL 240. Fundamentals of Human Anatomy. 3 Credits. N**

Introduction to the gross anatomy of the human body. Covers the spatial arrangement and appearance of structures throughout the body, including visual identification of these structures. Musculoskeletal relationships, and the anatomy of major organ systems, are emphasized. Not intended for biology majors. Prerequisite: BIOL 100, or equivalent.

**BIOL 241. Human Anatomy Observation Laboratory. 2 Credits. U LFE**

One of the two laboratories in gross anatomy designed to complement BIOL 240. Emphasizes the three-dimensional appearance and spatial relationships of anatomical structures through supervised observations of pre-dissected human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy observation laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is required.

**BIOL 246. Principles of Human Physiology. 3 Credits. N**

An introduction to the physiological and biochemical processes and general physiological principles necessary to sustain life. Organ and organ system processes are emphasized. Intended for students majoring in allied health or sports related curricula who require a course in human physiology. Not intended for biology majors. Prerequisite: BIOL 100 or equivalent.

**BIOL 247. Principles of Human Physiology Laboratory. 2 Credits. U LFE**

Designed to complement BIOL 246. Uses experiments and simulations to demonstrate laboratory techniques and representative processes in areas of human physiology. Concurrent or prior enrollment in BIOL 246 is required.

**BIOL 350. Principles of Genetics. 4 Credits. N**

Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian genetics and mapping; control of gene expression; cytogenetics;
epigenetics and non-Mendelian genetics; and population and quantitative genetics. Examples are taken from a wide variety of organisms, including viruses, bacteria, plants, fungi, insects, and humans. Not open to students with credit in BSCI 350. Prerequisite: BIOL 150 or 151 with a grade of C- or higher and concurrent enrollment or prior completion of CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, and concurrent enrollment or prior completion of BIOL 152 or BIOL 153; or consent of instructor.

BIOL 360. Principles of Genetics, Honors. 4 Credits. N
The science of genetics aims to explain why individuals differ from one another and how these differences are inherited. Honors Genetics covers all core topics in fundamental genetics: Mendelian inheritance, meiosis and recombination, mutation, molecular genetics, population genetics, quantitative genetics and genomics. Special attention given to the practice of genetics and the complex relationship between genotype, phenotype and environment. A broader goal of Honors Genetics is to provide students a framework for understanding recent advances in medical genetics and the modern era of personal genomics. Not open to students with credit in BSCI 350. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher and membership in the University Honors Program; or consent of the instructor.

BIOL 370. Introduction to Biostatistics. 4 Credits. N
This course introduces key statistical concepts and how they are used to solve biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, and analysis of variance. Formerly known as BIOL 570. Not open to students with credit in BIOL 570. Prerequisite: MATH 101 or MATH 104 and BIOL 150 or BIOL 151 or BIOL 152 or BIOL 153.

BIOL 400. Fundamentals of Microbiology. 3 Credits. NB N
Fundamental principles of microbiology with emphasis on physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics, pathogenesis and immunity, industrially important microorganisms. Not open to students with credit in BSCI 400. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher and two semesters of college chemistry with a grade of C- or higher, or consent of the instructor.

BIOL 401. Fundamentals of Microbiology, Honors. 4 Credits. N
Honors section of BIOL 400 and BIOL 612, by application and invitation. Not open to students with credit in BSCI 400. Prerequisite: BIOL 150 or BIOL 151, two semesters of college chemistry, and membership in the University Honors Program, or consent of the instructor.

BIOL 402. Fundamentals of Microbiology Laboratory. 2 Credits. U LFE
Laboratory exercises designed to complement BIOL 400 or BIOL 700. Not open to students with credit in BSCI 401. Prerequisite: BIOL 400 or BIOL 612, or BIOL 400 or BIOL 612 concurrently.

BIOL 405. Laboratory in Genetics. 3 Credits. U LFE
A laboratory course that provides hands-on experience with classical genetics and modern molecular genetics. Experiments involve Mendelian genetics (dominance/recessivity, complementation, segregation, independent assortment) in eukaryotic organisms; recombinant DNA; basic bacterial genetics; polymerase chain reaction; DNA sequencing; computational genetics; and genome editing. Not open to students with credit in BSCI 351. Prerequisite: Concurrent or prior enrollment in BIOL 350.

BIOL 412. Evolutionary Biology. 4 Credits. N

Introduction to the patterns and processes of organic evolution. Considered are the history of evolutionary thought, molecular evolution, genetics and microevolution, selection and adaptation, and speciation and macroevolution. Emphasis will be placed on how scientists study and document change over time in natural populations, methods for testing hypotheses about events in evolutionary history, and how discovering evolutionary mechanisms at one level of organization can help to explicate general processes in the natural world. Prerequisite: BIOL 152 and BIOL 350, or consent of the instructor.

BIOL 413. The Tree of Life. 4 Credits. N
A tour of the tree of life that introduces the major groups of organisms on Earth, their important traits, phylogenetic relationships, life histories, roles in global ecosystems, and interactions with humanity. Our primary guide to this tour is the “Tree of Life,” a branching diagram (phylogenetic tree) that illustrates how life evolved over the few billion years. Learning to read and interpret phylogenetic trees is central to the course, with lessons addressing general tree literacy, as well as advanced topics like mapping traits onto trees and reconstructing their evolution, interpreting fossils and timetrees, and biogeography. Weekly in-person and virtual labs offer opportunities for students to interact directly with physical specimens while also gaining practical experience with simple algorithms and software applications that can be used to reconstruct and interpret how major groups of organisms evolved over time. Two of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 414. Principles of Ecology. 3 Credits. N
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as EVRN 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 415. Field and Laboratory Methods in Ecology. 2 Credits. N
This course complements BIOL 414 with field trips and laboratory exercises that illustrate the basic concepts of ecology. Topics covered include methodologies for quantitative sampling of terrestrial and aquatic systems, design of field studies, computer simulation and digital data analysis techniques, and scientific writing. Prerequisite: Concurrent or prior enrollment in BIOL 414. A statistics course is recommended.

BIOL 416. Cell Structure and Function. 3 Credits. N
Lecture survey of molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Not open to students with credit in BSCI 416. Prerequisite: BIOL 150 or BIOL 151; BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; or consent of the instructor.

BIOL 417. Biology of Development. 3 Credits. N
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Not open to students with credit in BSCI 417. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

BIOL 418. Laboratory in: ____. 1-3 Credits. U LFE
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts
of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor.

BIOL 419. Topics in: ____. 1-3 Credits. N LFE
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs.

BIOL 420. Seminar: ____. 1-3 Credits. N
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor.

BIOL 423. Non-laboratory Independent Study. 1-9 Credits. N
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 424. Independent Study. 1-9 Credits. N
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 425. Teaching Apprenticeship in Biology. 1-9 Credits. N
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology.

BIOL 426. Laboratory in Cell Biology. 3 Credits. U LFE
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; concurrent or prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended.

BIOL 428. Introduction to Systematics. 3 Credits. N
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systematics background.

BIOL 430. Laboratory in Molecular Biology. 3 Credits. U LFE
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology.

BIOL 435. Introduction to Neurobiology. 3 Credits. N
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Not open to students with credit in BSCI 435. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

BIOL 442. Human Anatomy Dissection Laboratory. 3 Credits. U LFE
Laboratory in gross anatomy designed to build on content from BIOL 240 and BIOL 241. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial dissecting experience. Students perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Prerequisite: BIOL 240 and BIOL 241, and consent of the instructor.

BIOL 446. Biology of Sleep. 3 Credits. N LFE
This course integrates the impact of sleep across all of biology including physiology, endocrinology, health, neurobiology, learning and memory, evolution, and behavior. Students are expected to apply concepts from previous courses to understanding the role of sleep in well-being. Prerequisite: BIOL 150 or BIOL 151, or BIOL 152 or BIOL 153, and one BIOL course 300-level or above.

BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N LFE
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

BIOL 451. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 451 and GEOG 451.)

BIOL 454. Brain Diseases and Neurological Disorders. 3 Credits. N
Major brain diseases and neurological disorders such as stroke, Alzheimer’s Disease, Parkinson’s Disease, Huntington’s Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 416 or BIOL 435 or BIOL 546, or consent of instructor.

BIOL 477. Ecology and Global Change. 3 Credits. N
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as
a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor.

**BIOL 480. Medical Parasitology. 3 Credits. N**
Introductory lecture course focused on parasites (protozoans and metazoa) causing disease in humans, including zoonotic diseases (diseases or infections that are naturally transmissible to humans from non-human vertebrates). Provides basic knowledge about the morphology, epidemiology, evolution, and ecology of parasites infecting humans globally (e.g., malaria, amoebas, hookworms, tapeworms). Emphasis is placed on life-cycles, course of infection, modes of reproduction, diagnosis, and pathology of human parasites; relevant parasites of veterinary importance are also discussed. Prerequisite: BIOL 152 or BIOL 153, or permission of instructor.

**BIOL 481. Medical Parasitology Laboratory. 1 Credits. U LFE**
Laboratory course in the study of parasites causing disease in humans, including zoonotic diseases (diseases or infections that are naturally transmissible to humans from non-human vertebrates), emphasizing their morphology and identification. One three-hour laboratory each week. Prerequisite: Concurrent or prior enrollment in BIOL 480.

**BIOL 490. Internship and Practical Applications. 1-6 Credits. N**
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor.

**BIOL 499. Introduction to Honors Research. 2 Credits. N**
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursuing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level normal sciences coursework or consent of instructor.

**BIOL 500. Biology of Insects. 3 Credits. N**
Lectures and demonstrations providing an introduction to the study of insects, including general classification, structure, phylogeny, identification, development, physiology, behavior, ecology, and relations to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

**BIOL 501. Physiological Adaptations of Plants to Extreme Environments. 3 Credits. N**
Exploration of physiological adaptations of plants to bright sunlight & deep shade, drought & flooding, excess heat & subfreezing, excess elements and too few elements. Examples of adaptations include: red leaves, blue leaves, succulence, root "knees", moving leaves, frozen leaves, heavy metal plants, carnivorous plants, parasitic plants, epiphytes. Prerequisite: BIOL 150 or BIOL 152 or consent of instructor.

**BIOL 502. Laboratory in Insect Biology and Diversity. 2 Credits. U LFE**
Laboratory and field studies of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent.

**BIOL 503. Immunology. 3 Credits. N**
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness, hypersensitivity; specific immunologic tolerance. Not open to students with credit in BSCI 503. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. BIOL 416 is recommended but not required.

**BIOL 504. Immunology Laboratory. 2 Credits. U LFE**
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently.

**BIOL 506. Bacterial Infectious Diseases. 3 Credits. N**
Explores bacterial infectious diseases from the perspective of how disease is established and the mechanisms that underlie disease, as well as how to treat and prevent infectious disease. Not open to freshmen or sophomores. Not open to students with credit in BSCI 506. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor.

**BIOL 507. Bacterial Infectious Diseases Laboratory. 3 Credits. U LFE**
Laboratory to complement BIOL 506. Cultivation of pathogenic microorganisms, diagnostic procedures, and experiments to demonstrate various aspects of microbial pathogenicity and host responses. Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or consent of instructor.

**BIOL 509. Biology of Spiders. 3 Credits. N**
An introduction to the evolution, anatomy, physiology, behavior, and ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship and mating; predation; social behavior; and the role of spiders in natural and agricultural ecosystems. Concurrent enrollment in BIOL 511 is encouraged. Prerequisite: BIOL 152, BIOL 153 or permission of instructor.

**BIOL 511. Biology of Spiders Laboratory. 1 Credits. U LFE**
Topics will include comparative biology of arachnid orders (spiders, scorpions, harvestmen, mites, and others), external and internal anatomy of spiders, identification of common spider families and genera, and spider behavior. Students will be required to make a small collection (collect, preserve, and identify specimens). Prerequisite: BIOL 509; concurrent enrollment is preferred.

**BIOL 512. General Virology. 3 Credits. N**
Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host cell-viral interactions; mode of replication of DNA and RNA viruses, tumor viruses. Not open to students with credit in BSCI 512. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor. BIOL 416 is recommended but not required.

**BIOL 513. Virology Laboratory. 2 Credits. U LFE**
Experiments involving cultivation, quantitation, and identification of animal viruses, continuous cell culture and primary chicken embryo culture techniques. Molecular biology techniques are used to demonstrate the steps in virus replication. The value of viruses as tools to understand normal cellular processes is emphasized in experiments which demonstrate the relative simplicity of viruses and the relative complexity of eukaryotic cells. Demonstrations include transformation of cells by tumor viruses and electron microscopy of virus particles. Prerequisite: BIOL 402 and BIOL 512, or consent of instructor.

**BIOL 518. Bacterial Genetics. 3 Credits. N**
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular
biology of gene expression. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher or consent of instructor.

BIOL 519. Bacterial Genetics Laboratory. 2 Credits. U LFE
A laboratory course on the genetic analysis of bacteria. Includes mutagenesis, cloning, agarose and polyacrylamide gel electrophoresis, PCR, regulation of gene expression, and computational analysis of DNA sequences and protein structures. Prerequisite: BIOL 350 or BIOL 360.

BIOL 520. Marine Biology. 3 Credits. N
This introductory course covers biological, physical, and chemical ocean sciences, with an emphasis on ecological aspects. In addition to this Lawrence campus course, students may enroll for a supplementary 1 credit field trip class to a Caribbean coral reef island offered in December or January. Prerequisite: BIOL 414 or permission of the instructor.

BIOL 524. Mammalian Paleontology. 3 Credits.
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as GEO 524.) Prerequisite: One of the following: BIOL 225, BIOL 412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor.

BIOL 527. Primate Evolution and the Fossil Record. 3 Credits. N
This course exposes students to fundamental concepts of paleontology and evolutionary biology using the mammalian order Primates as a high-profile case study. Primates are interesting partly because humans are primates. Hence, scientific understanding of human origins and human evolution must be grounded in knowledge of our nearest relatives. This course places human origins within the broader framework of how primates have evolved over the course of the Cenozoic Era, often in response to radical changes in the Earth's physical environment. Prerequisite: BIOL 412 or BIOL 413, or consent of the instructor.

BIOL 530. Biodiversity Discovery and Assessment. 2 Credits. N
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as EVRN 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Credits. U
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as EVRN 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged.

BIOL 533. Biology of Fungi. 4 Credits. N LFE
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153.

BIOL 536. Cell Structure and Function (Honors). 3 Credits. N
BIOL 536 is the honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Not open to students with credit in BSCI 416. Prerequisite: BIOL 350 or BIOL 360 or consent of instructor.

BIOL 540. General Invertebrate Zoology. 4 Credits. N LFE
This course will cover the diversity and evolution of freshwater and marine invertebrate animals. The class includes an overview of phylogenetic relationships, focusing on understanding patterns of key evolutionary innovations in the history of life. Throughout this course, students will have the opportunity to examine living and preserved specimens and identify unique and convergent features across non-terrestrial invertebrates. Students will gain an appreciation of the remarkable diversity of invertebrate morphologies, function and life cycles. Two of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153.

BIOL 541. Biology of Freshwater Invertebrates. 3 Credits. N
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 and/or BIOL 540.

BIOL 544. Comparative Animal Physiology. 3 Credits. N
An intermediate physiology course with lectures and discussions of the structures, functions, mechanisms, and interactions of vertebrate and invertebrate organ systems with a focus on the different ways in which animals adapt to their environments. Topics include digestion and nutrition, metabolism, gas exchange, circulation, excretion, neurophysiology, endocrinology, and muscle physiology. Prerequisite: BIOL 152 or BIOL 153, concurrent or prior enrollment in CHEM 330 or CHEM 380, or consent of instructor. A college physics course is recommended but not required.

BIOL 545. Evolution of Development. 4 Credits. N
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent.

BIOL 546. Mammalian Physiology. 3 Credits. N
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Not open to students with credit in BSCI 546. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and concurrent or prior enrollment in CHEM 330 or CHEM 380, or consent of instructor.

BIOL 547. Mammalian Physiology Laboratory. 2 Credits. U LFE
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 546. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 546 or BIOL 646.

BIOL 548. Human Osteology. 4 Credits. N LFE
This course examines the structure and function of the human skeleton from an evolutionary and biomedical perspective. Students will learn
to identify bones comprising the human skeleton and how osteological
information aids in reconstructing sex, age, race, stature, and health
status. Major transformations of the human skeleton from hominoid
precursors, and some of the biomedical consequences of these
transformations, will be addressed. (Same as ANTH 648.) Prerequisite:
An introductory course in physical anthropology, biology, or permission
of instructor.

**BIOL 555. General Plant Physiology. 3 Credits. N**
The principal physiological processes of higher plants including
photosynthesis, respiration, water relations, mineral nutrition, and factors
associated with morphogenesis. Prerequisite: Consent of instructor.

**BIOL 560. Histology. 3 Credits. N**
Study of detailed microscopic anatomy of cells, tissues, and organs
of mammals. Examples are drawn from normal and abnormal tissue,
histochemistry, and electron microscopy. Lecture and demonstrations.
A course in anatomy and physiology is highly recommended. Prerequisite:
BIOL 152 or BIOL 153.

**BIOL 582. Principles of Biogeography. 3 Credits. N**
An introduction to the study of the distribution of life on earth. Covers
geographical patterns of species diversity and the processes that give rise
to those patterns: speciation, extinction, dispersal, vicariance, continental
drift, ecological interactions, and phylogeny. Topics are presented within
the framework of evolutionary history and include discussion of the
biology of species on islands, terrestrial biomes, altitudinal zonation of
species, latitudinal species gradients, historical factors governing species
distributions, macroevolutionary trends in the fossil record, and application
of modern molecular techniques for testing biogeographical hypotheses.
Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in
BIOL 412, 413, 414, or 550; or permission of Instructor.

**BIOL 583. Herpetology. 4 Credits. N**
Herpetology introduces students to the global diversity of amphibians and
reptiles. Students will learn about the major groups of frogs, salamanders,
snakes, lizards, crocodiles and turtles through classroom lectures and
hands-on laboratories built around the world-class specimen collections
housed in the KU Biodiversity Institute. We will also cover a broad
range of other important topics through a herpetological lens, including
systematics, evolution, ecology, conservation, life histories, biogeography,
communication, locomotion, physiology, diet, behavior, and reproduction.
One of the four credit hours from this course will apply towards BIOL lab
elective requirements numbered 400 or higher for biology majors.

**BIOL 592. Ichthyology. 4 Credits. N LFE**
A study of fishes. Lecture topics include the structure and adaptations of
fishes to the aquatic environment and a survey of major fish groups with
emphasis on their evolution and biogeography. Laboratory topics include
a survey of fish diversity using specimens and the use of keys to identify
fishes, with emphasis on the Kansas fish fauna. The course is offered
at the 500 and 700 levels, with additional assignments at the 700 level.
Prerequisite: BIOL 152 and/or BIOL 413.

**BIOL 593. Ornithology. 3 Credits. N LFE**
A lecture and laboratory course on the biology, evolution, and diversity
of birds. One of the three credit hours from this course will apply towards
BIOL lab elective requirements numbered 400 or higher for biology
majors. Prerequisite: BIOL 152 or BIOL 153 and BIOL 154, or permission
of instructor.

**BIOL 594. Forest Ecosystems. 3 Credits.**
Students learn basic concepts of forest productivity, forest water relations,
forest hydrology, nutrient cycling, through soils and vegetation, nutrient
uptake, carbon cycling, decomposition, linkages to aquatic ecosystems,
and agents of disturbance to these cycles. The class spends a significant
part of the semester exploring forest soil profiles and the challenges they
present to different forest ecosystems. We discuss the function of forested
ecosystems in a global context and identify and understand smaller-
scale processes that drive forest function. Prerequisite: CHEM 135, or
CHEM 175, or CHEM 195 and CHEM 196; and BIOL 414.

**BIOL 595. Human Genetics. 3 Credits. N**
A lecture course providing balanced coverage of Mendelian and molecular
genetics of humans; includes discussions and presentations on current
issues in human and medical genetics. Prerequisite: BIOL 350 or
BIOL 360.

**BIOL 598. Research Methods. 3 Credits. N LFE**
An introduction to the foundational concepts that underpin scientific
inquiry and problem solving. Coursework is built around three student-
designed inquiries, and topics considered within that context include
experimental variables, basic principles of statistics, safety and ethics of
investigation, professional communication techniques, and appropriate
literature review. Enrollment priority will be given to students currently
admitted to the UKanTeach program.

**BIOL 599. Senior Seminar: _____ 1 Credits. N**
A synthesis and discussion of current trends in a discipline or disciplines
related to one of the degrees offered in the biological sciences. Emphasis
is placed on providing seniors with an appreciation of the discipline’s
state-of-the-art and on developing skills for success in the next stage of
a career in the biological sciences. Topics depend on the associated degree
program. Prerequisite: Must be taken in the final year of a degree and
students must have completed most of the course work required for one
of the degrees in the biological sciences.

**BIOL 600. Introductory Biochemistry, Lectures. 3 Credits. N**
Designed to offer the essentials of the chemistry of the constituents of
living organisms and the changes these constituents undergo (during
life processes) in the human body and other living forms. Not open to
students with credit in BSCI 600. Prerequisite: BIOL 150 or BIOL 151 and
one semester of organic chemistry.

**BIOL 601. Principles of Biochemistry Laboratory. 2 Credits.**
Theory and methods in the development of protein separation and
purification, enzyme structure/function, and enzyme kinetics derived
from primary literature searches and readings. Prerequisite: Corequisite:
BIOL 600; or consent of instructor.

**BIOL 602. Plant Ecology. 3 Credits. N**
Introduction to basic concepts, focused at community and species level.
Architectural ecomorphology of plants and their physiological responses
to physical factors: solar radiation, climate, and soils. Plant succession
as an interaction among species differing in ecomorphology and life
style. Classification and ordination of plant communities: practice and
theory. Other topics include: species diversity and lognormal distribution
as to abundance classes; species/area relations and theory of island
biogeography; allelochemical defenses; genecology; paleoecology.
Prerequisite: BIOL 414 or consent of instructor.

**BIOL 603. Systematic Botany. 3 Credits. N LFE**
A lecture/laboratory course providing hands-on experience with
plant identification, a history of plant classification, the principles of
nomenclature and character analysis, the basics of systematics theory,
and a phylogenetically-oriented introduction to vascular plant diversity.
Prerequisite: BIOL 413 or equivalent.

**BIOL 606. Ecological Plant Physiology. 3 Credits. N**
Physiological responses of higher plants to environmental factors are
discussed. Major topics are: water relations, heat transfer, resistance to
water and temperature stress, dormancy, photoperiodism, photosynthesis
and respiration under natural conditions, and effects of environmental pollution. Prerequisite: Consent of instructor.

**BIOL 612. Fundamentals of Microbiology. 3 Credits. NB N**
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Not open to students with credit in BSCI 612. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor.

**BIOL 616. Medical Entomology. 3 Credits. N**
A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor.

**BIOL 622. Paleontology. 3 Credits. N**
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as GEOL 521.) Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEOL 105, or GEOL 304.

**BIOL 623. Paleontology Laboratory. 1 Credits. U LFE**
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.)

**BIOL 625. Behavioral Ecology and Sociobiology. 3 Credits. N**
The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 152; either BIOL 350, BIOL 412 or BIOL 414 recommended; or consent of instructor.

**BIOL 630. Conservation and Wildlife Biology. 3 Credits. N**
Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended.

**BIOL 636. Biochemistry I. 4 Credits. N**
First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor.

**BIOL 637. Introductory Biochemistry Laboratory. 2 Credits. U LFE**
The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce the student to cell constituents and biochemical reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment.

**BIOL 638. Biochemistry II. 4 Credits. N**
Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: CHEM 335 with a grade of C or higher and BIOL 636 with a grade of C or higher, or consent of instructor.

**BIOL 639. Advanced Biochemistry Laboratory. 3 Credits. U LFE**
The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art methodology. Prerequisite: BIOL 637 and BIOL 638 (BIOL 638 may be taken concurrently).

**BIOL 640. The Biology and Evolution of Fossil Plants. 3 Credits. N**
A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. Prerequisite: BIOL 413, or permission of instructor.

**BIOL 642. Biochemistry III: Machines on Genes. 4 Credits. N**
This one-semester lecture course for biochemistry majors is designed to complement the topics covered in BIOL 636 and BIOL 638. Emphasis will be placed on the various molecular machines involved in the transmission and utilization of genetic information, providing a biochemical perspective of replication, transcription, and translation. Prerequisite: BIOL 636 and BIOL 638 with a grade of C or higher.

**BIOL 648. Systematics and Macroevolution. 3 Credits. N**
An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent.

**BIOL 650. Advanced Neurobiology. 3 Credits. N**
The course builds an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor.

**BIOL 652. Comparative Animal Behavior. 3 Credits. N**
A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite.

**BIOL 655. Behavioral Genetics. 3 Credits. N**
A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor.

**BIOL 660. Summer Field Ecology. 3 Credits. N**
An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as EVRN 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N).

BIOL 661. Ecology of Rivers and Lakes. 3 Credits. N
Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended.

BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Credits. N
The course focuses on the role of chemical information molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor.

BIOL 668. Evolutionary Ecology. 3 Credits. N
Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor.

BIOL 672. Gene Expression. 3 Credits. N
The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in BIOL 772. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. A course in biochemistry is recommended.

BIOL 680. Genomics. 3 Credits. N
Genomics is the study of the structure, function and evolution of the genome. High-throughput technologies have given us the ability to easily and quickly sequence genomes, and measure genomewide patterns of gene expression. These tools, and the vast amounts of genome-scale data they provide, have transformed biology and medicine. This course will cover the key technological and computational methods by which genomic DNA is sequenced, genomes are assembled, and how RNA and epigenetic patterns are measured. Subsequently, we will emphasize how these genomics tools and techniques have deepened our understanding of biology, covering questions from diverse fields to illustrate the impact of genomics on evolutionary biology, molecular and developmental genetics, human medical genetics and personalized, precision medicine. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor.

BIOL 688. The Molecular Biology of Cancer. 3 Credits. N
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor.

BIOL 699. Biology Honors Research Colloquium. 1 Credits. U
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor.

BIOL 700. Conservation Principles and Practices. 3 Credits.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 701. Topics in: ______. 1-3 Credits.
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests.

BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Credits.
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences.

BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Credits.
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry.

BIOL 706. Natural Sciences Curation and Collections Management. 3 Credits.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloging, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum's paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art's ethnographic collections. Student projects will involve one of the museum's collections with the opportunity for hands-on experience. (Same as MUSE 710.)

BIOL 712. Evolutionary Biology - Graduate. 3 Credits.
A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent or consent of instructor.

BIOL 714. Graduate Ecology. 3 Credits.
A thorough survey of the discipline of ecology. Topics include elements in physiological, population, community and ecosystem ecology. Overarching themes are 1) pattern and process, 2) ecology and evolution, 3) hierarchical nature of ecology, 4) variation in space and time, and 5)
human dimensions of ecology. Prerequisite: Graduate standing or consent of instructor.

BIOL 720. Scientific Illustration. 3 Credits.
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor.

BIOL 735. Scientific Communication. 3 Credits.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.)

BIOL 741. Biology of Freshwater Invertebrates. 3 Credits.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Graduate students will be expected to submit either an original collection of freshwater invertebrates or write a research essay on a topic mutually agreed upon with the professor. Not open to students who have taken BIOL 541. Prerequisite: Graduate standing; recommended: undergraduate invertebrate biology class.

BIOL 743. Population Genetics. 3 Credits.
Description and discussion of genetic variation in natural populations. The effects and interaction of selection, migration, mutation, mating systems, and finite population size on the maintenance of genetic variation. Discussion of the interface with evolution and population ecology. Prerequisite: BIOL 350 and BIOL 412 or equivalent.

BIOL 750. Advanced Biochemistry. 3 Credits.
The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor.

BIOL 752. Cell Biology. 3 Credits.
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor.

BIOL 754. Brain Diseases and Neurological Disorders. 3 Credits.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor.

BIOL 755. Mechanisms of Development. 3 Credits.
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor.

BIOL 757. Carcinogenesis and Cancer Biology. 3 Credits.
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor.

BIOL 759. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.)

BIOL 772. Gene Expression. 4 Credits.
The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in BIOL 672. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. A course in biochemistry is recommended.

BIOL 782. Principles of Biogeography. 3 Credits.
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended.

BIOL 784. Introduction to Museum Public Education. 3 Credits.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 785. Museum Management. 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 797, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 786. Fundamentals of Tropical Biology. 1-8 Credits.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August.

BIOL 787. Introduction to Museum Exhibits. 3 Credits.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first-hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 794. Mammalogy. 3 Credits.
A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413.

BIOL 798. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

BIOL 801. Topics in: _____ 1-3 Credits.
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests.

BIOL 805. Scientific Integrity in Ecology and Evolutionary Biology 1 Credits.
This course covers the responsible conduct of research to help students initiate research projects ethically. Topics covered include expectations of federal granting agencies and the university, best practices for data management and publishing, and professional development as a graduate student. Prerequisite: Admission to the graduate program in Ecology and Evolutionary Biology, or consent of instructor.

BIOL 807. Graduate Molecular Biosciences. 3 Credits.
An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, kinetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

BIOL 809. Graduate Molecular Biosciences for Medicinal Chemists. 4 Credits.
An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor.

BIOL 811. Advanced Molecular and Cellular Immunology. 2 Credits.
Covers recent advances in immunochemistry and immunobiology. Topics include structure and function of antibodies, hybridoma systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoimmunity, and cancer. Prerequisite: BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor.

BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Credits.
Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesions, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in biochemistry, or consent of instructor.

BIOL 814. Advanced Molecular Virology. 2 Credits.
The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics and a course in virology, or consent of instructor.

BIOL 815. Advanced Molecular Genetics. 2 Credits.
A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor.

BIOL 816. Careers in the Biomedical Sciences. 1 Credits.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor.

BIOL 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The course will include a mixture of lecture, case studies and discussion. (Same as CHEM 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student.

BIOL 841. Biometry I. 5 Credits.
The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra.

BIOL 848. Phylogenetic Methods. 4 Credits.
A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor.

BIOL 860. Principles and Practice of Chemical Biology. 3 Credits.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of
peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor.

BIOL 895. Human Genetics. 3 Credits.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics.

BIOL 899. Master’s Thesis. 1-10 Credits.
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory/unsatisfactory basis.

BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Credits.
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission.

BIOL 902. Advanced Molecular Cellular Biology Seminar. 1 Credits.
Seminar presentation and discussion opportunity for advanced Molecular, Cellular, and Developmental Biology graduate students. Graded on a satisfactory/unsatisfactory basis.

BIOL 905. Advanced Molecular Genetics. 1-3 Credits.
A review of current literature in molecular genetics.

BIOL 918. Modern Biochemical and Biophysical Methods. 4 Credits.
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 817, or permission of instructor.

BIOL 925. Research Grant Proposal Preparation. 3 Credits.
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantsmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

BIOL 943. Multivariate Data Analysis. 3 Credits.
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: Knowledge of elementary matrix algebra.

BIOL 952. Introduction to Molecular Modeling. 3 Credits.
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. Prerequisite: Graduate standing or consent of instructor.

BIOL 985. Advanced Study. 1-10 Credits.

Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis.

BIOL 999. Doctoral Dissertation. 1-12 Credits.
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory progress/limited progress/no progress basis.

Chemistry Courses

CHEM 110. Introductory Chemistry. 5 Credits. NP N LFE
This integrated lecture and laboratory course provides an introduction to basic concepts related to general, organic, and biological chemistry. Suitable for students seeking an introductory course and for students who are majoring in health and allied health fields. Students whose majors require more than one semester of chemistry should enroll in CHEM 130, CHEM 170, or CHEM 190. CHEM 110 and CHEM 150 cannot both be taken for credit.

CHEM 130. General Chemistry I. 5 Credits. NP N LFE
This course seeks to develop a working knowledge of the conceptual foundation and the quantitative chemical relationships on which subsequent chemistry courses are built. Atomic structure, chemical bonding, reaction stoichiometry, thermochemistry, and periodic trends are emphasized in this integrated lecture and laboratory course. Students pursuing or considering a major in one of the chemical sciences should strongly consider taking CHEM 170 or CHEM 190. Students with credit in CHEM 110 will have two hours added on to their total number of hours required for graduation. Prerequisite: Must be eligible for MATH 115.

CHEM 135. General Chemistry II. 5 Credits. N LFE
This course, which is a continuation of CHEM 130, focuses on chemical kinetics, chemical equilibrium, acid-base chemistry, and thermodynamics. Additional topics, such as environmental chemistry, electrochemistry, coordination chemistry, nuclear chemistry, organic chemistry, and/or polymers, may also be introduced in this integrated lecture and laboratory course. Students pursuing or considering a major in one of the chemical sciences should strongly consider taking CHEM 175 or CHEM 195. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 with a grade of C- or higher.

CHEM 149. Chemistry for Engineers Supplement. 2 Credits. N
This course is intended for students in the School of Engineering who have credit for CHEM 130 but still need selected elements of second-semester general chemistry. Students will learn to describe phases of matter and quantify changes among them, and to analyze chemical equations and equilibria in the context of acid-base and redox chemistry. Prerequisite: Student in the School of Engineering and CHEM 130 or equivalent (or have Departmental consent). Credit in CHEM 135, CHEM 150, CHEM 175, or CHEM 195 precludes enrollment in and credit for CHEM 149.

CHEM 150. Chemistry for Engineers. 5 Credits. N LFE
This one semester course is designed for students in the School of Engineering who are not required to take additional chemistry courses at the college level. In this integrated lecture and laboratory course, students will learn to predict properties of substances based on their molecular structure, to describe phases of matter and quantify changes among them, and to analyze chemical equations and equilibria in the context of acid-base and redox chemistry. Technical communication and experimental design are also emphasized. Prerequisite: Must have completed a course in high school chemistry and be eligible for MATH 115 (or have Departmental consent). Students not admitted to the School of Engineering must receive permission from instructor. CHEM 110 and CHEM 150 cannot both be taken for credit.
CHEM 170. Chemistry for the Chemical Sciences I. 5 Credits. NP N
LFE
The first course in a two-course sequence focused on the principles and
applications of modern chemistry. This integrated lecture and laboratory
course is designed for students pursuing or considering a major in one of
the chemical sciences (such as chemistry, biochemistry, chemical
engineering or petroleum engineering). The CHEM 170/CHEM 175 course
sequence covers the same general topics as CHEM 130/CHEM 135,
but with an increased emphasis on modern applications of chemistry.
Students with credit in CHEM 110 will have two hours added on to their
total number of hours required for graduation. Prerequisite: Eligibility for
MATH 115.

CHEM 175. Chemistry for the Chemical Sciences II. 5 Credits. N
LFE
An integrated lecture and laboratory course which is a continuation of
CHEM 170. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 with a
grade of C- or higher.

CHEM 177. First Year Seminar: ____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing
current issues in Chemistry. Course is designed to meet the critical
thinking learning outcome of the KU Core. First-Year Seminar topics
are coordinated and approved by the Office of First-Year Experience.
Prerequisite: First-time freshman status.

CHEM 180. Seminar I. 0.5 Credits. U
Special topics for chemistry majors such as using the chemical literature,
educational and professional perspectives, scientific ethics, and
undergraduate research opportunities. It is recommended that students
take this half-semester course in their freshman or sophomore year.
Prerequisite: A declared major in chemistry or consent of instructor.

CHEM 190. Foundations of Chemistry I, Honors. 3 Credits. NP N
LFE
CHEM 190, together with corequisite laboratory course CHEM 191,
provides an integrated treatment of theoretical and experimental aspects
of chemistry for qualified and highly motivated students. It is anticipated
that students in CHEM 190 and CHEM 191 plan to take more than one
year of chemistry at the college level. Students with credit in CHEM 110
will have two hours added on to their total number of hours required for
graduation. Prerequisite: High school chemistry and calculus; at least one
of the following: (a) acceptance into the KU Honors Program, (b) an AP
exam score in chemistry of 3 or higher, (c) a mathematics ACT score of
30 or higher; or permission of instructor. Corequisite: CHEM 191.

CHEM 191. Foundations of Chemistry I Laboratory, Honors. 2
Credits. NP N LFE
Laboratory course for students enrolled in CHEM 190. Prerequisite:
Corequisite: CHEM 190.

CHEM 195. Foundations of Chemistry II, Honors. 3 Credits. NP N
LFE
CHEM 195 and corequisite laboratory course CHEM 196 continue the
integrated theoretical and experimental exploration of chemistry topics
for qualified and highly motivated students. Prerequisite: CHEM 130,
CHEM 170, or CHEM 190 and CHEM 191 with a grade of C- or better,
and permission of the instructor. Corequisite: CHEM 196.

CHEM 196. Foundations of Chemistry II Laboratory, Honors. 2
Credits. NP N LFE
Laboratory course for students enrolled in CHEM 195. Prerequisite:
CHEM 130, CHEM 170, or CHEM 190 and CHEM 191 with a grade of C-
or better, and permission of the instructor. Corequisite: CHEM 195.

CHEM 201. Laboratory Safety in the Chemical Sciences. 1 Credits. U
A course for undergraduate students focusing on chemical safety in
modern laboratories. The course will feature practical instruction in
lab safety, an introduction to safety resources, and group discussions
centered around case studies. Required for all B.S. majors, and for
all B.A. majors participating in undergraduate research. Students with
credit in CHEM 201 may not take CHEM 701 for credit. Prerequisite:
CHEM 135, CHEM 175, or CHEM 195.

CHEM 250. Mathematical Methods for the Chemical Sciences. 3
Credits. NM
A one-semester course covering advanced mathematical methods
necessary for upper-level physical and analytical chemistry courses.
Topics include complex numbers and functions, ordinary and partial
differential equations, linear algebra and probability and statistics with
special emphasis on applications to problems in the chemical sciences.
Prerequisite: Corequisite: MATH 127.

CHEM 330. Organic Chemistry I. 3 Credits. N
A study of the structure and reactivity of selected classes of organic
compounds. CHEM 330 is the first course of a two-semester sequence.
Prerequisite: CHEM 135, CHEM 175, or CHEM 195 with a grade of C-
or higher.

CHEM 331. Organic Chemistry I Laboratory. 2 Credits. U LFE
Emphasis on basic techniques for the preparation, separation, and
purification of organic compounds. Required for a major in chemistry and
by those departments and programs specifying a complete undergraduate
organic chemistry course. Prerequisite: CHEM 330 or CHEM 380
with a grade of C- or higher or concurrent enrollment in CHEM 330 or
CHEM 380.

CHEM 335. Organic Chemistry II. 3 Credits. N
A continuation of CHEM 330, intended for students who want further
training in organic chemistry. Prerequisite: CHEM 330 or CHEM 380 with
a grade of C- or higher.

CHEM 336. Organic Chemistry II Laboratory. 2 Credits. U LFE
More advanced organic laboratory techniques with emphasis on modern
spectroscopic methods for determining the structure and purity of organic
compounds. Prerequisite: CHEM 331 and CHEM 335 or CHEM 385
with a grade of C- or higher or concurrent enrollment in CHEM 335 or
CHEM 385.

CHEM 380. Organic Chemistry I, Honors. 3 Credits. N
This is the first half of a two-semester sequence in organic chemistry
for students with strong records in previous chemistry courses.
Recommended for members of the University Honors Program and
students majoring in chemistry or related fields. Prerequisite: CHEM 135,
CHEM 175, or CHEM 195 with a grade of C- or higher and permission of
the instructor.

CHEM 385. Organic Chemistry II, Honors. 3 Credits. N
This is the second course in a two-semester sequence in organic
chemistry for students with strong records in previous chemistry courses.
Recommended for members of the University Honors Program and
students majoring in chemistry or related fields. Prerequisite: CHEM 330
or CHEM 380 with a grade of C- or higher, and permission of the
instructor.

CHEM 390. Topics in Chemistry, Honors: ____. 1-5 Credits. N
A course on special topics in chemistry, given as the need arises. Course
content applies and expands upon general chemistry concepts, such as
chemical thermodynamics, kinetics, and bonding. In this course, students
gain knowledge in a topic of contemporary interest in chemistry, are
challenged to examine the experimental and theoretical basis of this
knowledge, and consider the broader impacts of this knowledge outside
the discipline. Course may be repeated for different topics. Prerequisite:
CHEM 135, CHEM 175 or CHEM 195 and membership in the University Honors Program; or permission of instructor. Each section may have additional prerequisites to be determined by the instructor.

CHEM 400. Analytical Chemistry. 3 Credits. N
Principles of analytical chemistry with emphasis on the fundamental methods used for chemical analysis. Topics include experimental error, statistical analysis, method development, sampling, calibration methods, spectrophotometry, chromatography, mass spectrometry, and electrochemistry. Prerequisite: One semester of organic chemistry and one semester of organic chemistry laboratory, or permission of instructor. Corequisite: CHEM 401.

CHEM 401. Analytical Chemistry Laboratory. 2 Credits. U
Experiments illustrate fundamental principles of chemical analysis methods. The course serves as an introduction to advanced instrumental methods of analysis. Prerequisite: One semester of organic chemistry and one semester of organic chemistry lab, or permission of instructor. Corequisite: CHEM 400.

CHEM 450. Directed Readings/Laboratory in Chemistry. 1-3 Credits. N
Individual and supervised study or laboratory work on special topics or problems in chemistry. Prerequisite: Ten hours of chemistry and a minimum overall grade-point average of 2.0 or consent of department.

CHEM 498. Undergraduate Research. 1-2 Credits. N
A research course for Chemistry majors, consisting of experimental or theoretical work in chemistry or a closely related field. A final report must be submitted to the instructor at the end of the semester. Prerequisite: CHEM 201, or CHEM 201 concurrently, or documentation of appropriate laboratory safety training.

CHEM 510. Biological Physical Chemistry. 3 Credits. N
A one-semester course that explores the fundamentals of physical chemistry with specific application to biological systems. The basic principles of thermodynamics, chemical kinetics, quantum mechanics and spectroscopy will be introduced, and their application to aqueous solutions and biochemical systems will be emphasized. This class consists of lecture only. Students requiring laboratory experience should enroll in CHEM 520. Prerequisite: One semester of organic chemistry, two semesters of calculus, and two semesters of physics.

CHEM 520. Biological Physical Chemistry with Laboratory. 5 Credits. N
A one-semester integrated lecture and laboratory course that explores the fundamentals of physical chemistry with specific application to biological systems. The basic principles of thermodynamics, chemical kinetics, quantum mechanics and spectroscopy will be introduced, and their applications to aqueous solutions and biochemical systems will be emphasized. Students who do not wish to take the laboratory component should enroll in CHEM 510. Prerequisite: One semester of organic chemistry, two semesters of calculus and two semesters of physics.

CHEM 525. Physical Chemistry for Engineers. 4 Credits. N
An introduction to the basic principles of quantum mechanics, atomic and molecular structure, molecular rotations and vibrations, statistical mechanics, statistical thermodynamics and reaction dynamics. Prerequisite: Two semesters of general chemistry; PHSX 212; MATH 127, MATH 220 or MATH 320 and MATH 290 or consent of instructor.

CHEM 530. Physical Chemistry I. 4 Credits. N
An introduction to the basic principles of quantum mechanics, atomic and molecular structure, molecular rotations and vibrations, group theory, spectroscopy, and statistical mechanics. Prerequisite: Two semesters of general chemistry; PHSX 212; MATH 127; and CHEM 250 (or MATH 220 or MATH 320 and completion of, or concurrent enrollment in MATH 290) or consent of instructor.

CHEM 535. Physical Chemistry II. 3 Credits. N
Emphasizes the thermodynamics of molecular systems with application to the structure and properties of gases, liquids, solids, materials, statistical thermodynamics, chemical kinetics, and reaction dynamics. Prerequisite: CHEM 530 or consent of instructor.

CHEM 537. Physical Chemistry Laboratory. 3 Credits. U LFE
Experiments in physical chemistry, with emphasis on the fundamental principles of quantum mechanics, spectroscopy, thermodynamics and kinetics as applied to chemical systems. Prerequisite: CHEM 401 and CHEM 530 and concurrent enrollment in CHEM 535.

CHEM 560. Introduction to Chemical Biology. 3 Credits. N
A course for students with an interest in the application of chemical principals and methods to address problems in biology at the molecular level. The fundamentals of biomolecules (nucleic acids, proteins, lipids, and carbohydrates) and techniques of chemical biology research will be discussed. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHEM 760. Prerequisite: CHEM 335 and CHEM 336 with grades of C- or higher and completion of, or concurrent enrollment in BIOL 600 or BIOL 636, or consent of instructor.

CHEM 598. Research Methods. 3 Credits. N LFE
An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling, laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UKanTeach program. (Same as PHSX 598.) Prerequisite: At least one course at the 100 level or above in CHEM, MATH, or PHSX.

CHEM 635. Instrumental Methods of Analysis. 2 Credits. U
Theory and application of instrumental methods to modern analytical problems. Topics covered include atomic and molecular spectroscopy, electrochemistry, mass spectrometry, and separations. Prerequisite: CHEM 400 and CHEM 401 and one semester of physical chemistry laboratory, or permission of instructor.

CHEM 636. Instrumental Methods of Analysis Laboratory. 3 Credits. U LFE
Theory and application of instrumental methods to modern analysis problems. Experiments covered in this capstone laboratory course include atomic and molecular spectroscopy, electrochemistry, and separation methods. Prerequisite: CHEM 400 and CHEM 401, and one semester of physical chemistry laboratory; or permission of instructor. Prerequisite or Corequisite: CHEM 635.

CHEM 660. Systematic Inorganic Chemistry. 3 Credits. N
A systematic study of the elements and their compounds, emphasizing the relationship between properties of substances and their atomic and molecular structures and the positions of the elements in the periodic systems. Prerequisite: CHEM 510, CHEM 520, or CHEM 530.

CHEM 661. Advanced Inorganic Laboratory. 2 Credits. U LFE
Experiments concerning the synthesis and characterization of inorganic compounds. Prerequisite: CHEM 660 or concurrent enrollment in CHEM 660.

CHEM 680. Topics in Chemistry: _____ 1-5 Credits. N
Courses on special topics in chemistry, given as the need arises. Course may be repeated for different topics. Prerequisite: 20 hours of Chemistry.
Each section may have additional prerequisites to be determined by the instructor.

CHEM 695. Seminar II. 0.5 Credits. U
Special topics and presentations by students and faculty in areas of current interest such as recent advancements in chemistry, professional development, societal issues facing chemists, and reports of ongoing research. This half-semester course is recommended for seniors. Prerequisite: CHEM 180.

CHEM 698. Undergraduate Capstone Research. 1-2 Credits. N
An undergraduate capstone research experience in chemistry or a closely related field, consisting of experimental or theoretical work on a topic developed in consultation with the faculty research advisor. A total of 3 credit hours must be accumulated for the course to count toward KU Core Goal 6. Students will submit a final report to the Chemistry Department during the semester in which the third credit hour is completed, and also present their results in a public forum. Prerequisite: CHEM 201, or CHEM 201 concurrently (or documentation of appropriate laboratory safety training), CHEM 335 (or CHEM 385) and CHEM 336 with grades of C or higher, and permission of the Chemistry Department.

CHEM 699. Undergraduate Honors Research. 1-2 Credits. N
An undergraduate research experience in chemistry or a closely related field for students in the Chemistry Department Honors Program, consisting of experimental or theoretical work on a topic developed in consultation with the faculty research advisor. A minimum of 4 credit hours must be accumulated to satisfy Chemistry Department Honors requirements, and 3 of those credit hours will satisfy KU Core Goal 6. At the completion of the research, a written thesis, and an oral defense of the thesis, will be required. Prerequisite: Acceptance to the Chemistry Department Honors Program; CHEM 201, or CHEM 201 concurrently, or documentation of appropriate laboratory safety training.

CHEM 700. Responsible Scholarship in the Chemical Sciences. 1 Credits.
A course for beginning graduate students with particular emphasis on scholarship issues relevant to the chemical sciences. Topics will include scientific ethics, codes of conduct, record keeping, authorship, and the responsibilities of a scientist. Group discussions, particularly centered around case studies, will be a significant component of the course.

CHEM 701. Laboratory Safety in the Chemical Sciences. 1 Credits.
A course for beginning graduate students focusing on chemical safety in modern laboratories. The course will feature practical instruction in lab safety, an introduction to safety resources, and group discussions centered around case studies.

CHEM 718. Mathematical Methods in Physical Sciences. 3 Credits.
Review of all complex variable theory; introduction to the partial differential equations of physics; Fourier analysis; and special functions of mathematical physics. (Same as PHSX 718.) Prerequisite: Two semesters of junior-senior mathematics.

CHEM 720. Fundamentals and Methods of Analytical Chemistry. 3 Credits.
An introductory graduate level course in analytical chemistry, in which the principles of electrochemistry, spectroscopy, and separation science are utilized to solve analytical problems in inorganic, organic and biochemistry. Prerequisite: An undergraduate course in analytical chemistry, a year of organic chemistry, and a year of physical chemistry.

CHEM 730. Coordination and Organometallic Chemistry. 3 Credits.
An examination of the basic foundations of coordination chemistry and organometallic chemistry including symmetry methods, bonding, magnetism, and reaction mechanisms. Prerequisite: Two semesters of organic chemistry and one semester of physical chemistry in which quantum chemistry is introduced. The latter course may be taken concurrently with CHEM 730.

CHEM 740. Principles of Organic Reactions. 3 Credits.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include acid and base properties of functional groups; qualitative aspects of strain, steric, inductive, resonance, and solvent effects on reactivity; stereo-chemistry and conformations; an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of some important classes of mechanisms. Prerequisite: Two semesters of undergraduate organic and one semester of physical chemistry or concurrent enrollment.

CHEM 742. Spectroscopic Identification of Organic Compounds. 3 Credits.
The use of techniques such as infrared, nuclear magnetic resonance, and ultraviolet spectroscopy, and mass spectrometry for elucidating the structure of organic molecules. A lecture and workshop course. Prerequisite: CHEM 626 and CHEM 627.

CHEM 750. Introduction to Quantum Mechanics. 3 Credits.
An introduction to the basic principles of quantum theory relevant to atomic and molecular systems. Topics include operators and operator algebra, matrix theory, eigenvalue problems, postulates of quantum mechanics, the Schrodinger equation, angular momentum, electronic structure, molecular vibrations, approximation methods, group theory, and the foundations of spectroscopy. Prerequisite: Two semesters of physical chemistry.

CHEM 760. Introduction to Chemistry in Biology. 3 Credits.
A comprehensive introduction to the application of chemistry to address problems in biology at the molecular level. The fundamentals of biomolecules (nucleic acids, proteins, lipids and carbohydrates) and techniques of chemical biology research will be discussed. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHEM 560.

CHEM 800. Research. 1-10 Credits.
Original investigation on the graduate level.

CHEM 810. Colloquium: _____. 1 Credits.
Colloquia on various topics of current interest are presented by students, faculty, and visiting scientists.

CHEM 816. Careers in the Biomedical Sciences. 1 Credits.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as BIOL 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor.

CHEM 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion.
CHEM 820. Analytical Separations. 3 Credits.
An advanced treatment of analytical separations techniques. The theory of separation science will be augmented with discussion of practical aspects of instrumentation and experiment design. Prerequisite: CHEM 720.

CHEM 822. Electrochemical Analysis. 3 Credits.
An advanced treatment of selected electroanalytical techniques and methodology. Prerequisite: CHEM 720.

CHEM 824. Spectrochemical Methods of Analysis. 3 Credits.
General concepts of encoding chemical information as electromagnetic radiation; major instrumental systems for decoding, interpretation, and presentation of the radiation signals; atomic emission, absorption, and fluorescence; ultraviolet, visible, infrared, and microwave absorption; molecular luminescence; scattering methods; mass spectrometry; magnetic resonance; automated spectrometric systems. Prerequisite: CHEM 720.

CHEM 826. Mass Spectrometry. 3 Credits.
An introduction to mass spectrometry. The various ionization techniques and mass analyzers will be discussed, and many examples of different mass spectrometric applications will be introduced. Prerequisite: CHEM 720.

CHEM 828. Bioanalysis. 3 Credits.
A course covering important aspects in modern chemical measurement with particular emphasis placed on bioanalysis. This course will survey the modern analytical challenges associated with the ongoing efforts in genomics and proteomics and discuss future trends in methods in instrumentation. Prerequisite: CHEM 720.

CHEM 830. Structure, Bonding and Spectroscopic Methods in Inorganic Chemistry. 3 Credits.
An introduction of quantum and group theories in relation to bonding and physicochemical properties of inorganic substances. Topics include vibrational and electronic spectroscopies, magnetism, and inorganic photochemistry. Prerequisite: CHEM 730.

CHEM 832. Inorganic Reaction Mechanisms and Catalysis. 3 Credits.
Mechanistic aspects of transition metal chemistry including substitution reactions, electron transfer reactions, rearrangement reactions, ligand reactions and inorganic photochemistry. Principles and applications of heterogeneous and homogeneous catalytic processes emphasizing catalysis at transition metal centers. Prerequisite: CHEM 730.

CHEM 840. Physical Organic Chemistry. 3 Credits.
An examination of the methods used to probe the mechanisms of organic reactions and of the chemistry of some important reactive intermediates. Topics will include isotope effects, kinetics, linear free energy relationships, solvent effects, a continuing discussion of orbital symmetry, rearrangements, carbocations, carbanions, carbenes, radicals, excited states, and strained molecules. Prerequisite: CHEM 740.

CHEM 842. Organic Synthesis I. 3 Credits.
A discussion of fundamental reactions for the formation of carbon-carbon bonds, oxidation, reduction, and functional group interchange. Prerequisite: CHEM 740.

CHEM 844. Problem Solving in Organic Chemistry. 1 Credit.
A course designed to develop a student's ability to apply fundamental concepts of mechanistic organic and organometallic chemistry, physical organic chemistry, bioorganic chemistry, synthetic organic reactions and techniques for structure elucidation. Students will propose solutions to practice problems mimicking challenges that arise in contemporary research in organic chemistry. The format includes interactive problem-solving discussions led by faculty and peers and monthly written examinations. May be repeated up to three times until the student has passed at least four of the written exams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: CHEM 740 or permission of instructor.

CHEM 850. Advanced Quantum Mechanics. 3 Credits.
The advanced mathematical and physical principles of quantum mechanics relevant to atomic and molecular systems. Topics may include abstract vector spaces and representations, time-dependent quantum dynamics, electronic structure theory, density matrices, second-quantization, advanced group theory, path integrals, and scattering theory. Prerequisite: CHEM 750 or its equivalent.

CHEM 852. Statistical Thermodynamics. 3 Credits.
Thermodynamics and introduction to equilibrium statistical mechanics with emphasis on problems of chemical interest. The course consists of two roughly equal parts: 1) An advanced overview of the laws and concepts of thermodynamics with application to specific problems in phase and chemical equilibria and 2) An introduction to equilibrium statistical mechanics for both classical and quantum systems. Prerequisite: CHEM 750 or its equivalent.

CHEM 854. Chemical Kinetics and Dynamics. 3 Credits.
A study of the rates, mechanisms, and dynamics of chemical reactions in gases and liquids. Topics include an advanced overview of classical kinetics, reaction rate theories (classical collision theory, transition-state theory and introductory scattering theory), potential energy surfaces, molecular beam reactions, photochemistry, Marcus electron transfer theory and other areas of current interest. Prerequisite: CHEM 750 or its equivalent.

CHEM 856. Molecular Spectroscopy. 3 Credits.
Quantitative molecular spectroscopy and its chemical applications. The basic principles of the molecular energy levels, selection rules and spectral transition intensities will be discussed and applied to rotational, vibrational, electronic, and nuclear magnetic spectroscopy. Linear and nonlinear spectroscopies will be addressed. Prerequisite: CHEM 750 or its equivalent.

CHEM 860. Principles and Practice of Chemical Biology. 3 Credits.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor.

CHEM 899. Master's Thesis. 1-10 Credits.
Research work (either experimental or theoretical) in chemistry for students working toward the M.S. degree. Graded on a satisfactory/limited progress/no progress basis.

CHEM 900. Advanced Research. 1-10 Credits.
Original investigation in chemistry at the graduate level. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Advancement to doctoral candidacy.

CHEM 914. Computational Methods in Physical Sciences. 3 Credits.
Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document
computer programs to solve physical problems. (Same as ASTR 815 and PHSX 815.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above.

**CHEM 930. Bioinorganic Chemistry. 3 Credits.**
A survey of metalloproteins and metalloenzymes, their structures and functions, including recent advances in biomimetic modeling, small molecule activation in biological systems, and related physical methods. Prerequisite: CHEM 832.

**CHEM 942. Organic Synthesis II. 3 Credits.**
A survey of important techniques in organic chemistry with respect to scope, limitations, mechanism, and stereochemistry. Emphasis will be placed on new synthetic methods and application of such methods to the synthesis of structurally interesting compounds, particularly natural products. Prerequisite: CHEM 842.

**CHEM 950. Advanced Statistical Mechanics. 3 Credits.**
Advanced equilibrium statistical mechanics and introduction to nonequilibrium statistical mechanics. Topics include: the theory of liquids, critical phenomena linear response theory and time correlation functions, Langevin dynamics, and molecular hydrodynamics. (Same as PHSX 971.) Prerequisite: CHEM 909 or equivalent.

**CHEM 980. Advanced Topics in Chemistry: ______. 2-3 Credits.**
A course covering special advanced topics in chemistry not included in other graduate courses. One or more topics will be covered in a given semester and an announcement of the course content and prerequisites will be made at the end of the previous semester. This course may be taken more than once when the topic varies.

**CHEM 999. Doctoral Dissertation. 1-10 Credits.**
Research work (either experimental or theoretical) in chemistry for students working toward the Ph.D. degree. Graded on a satisfactory progress/limited progress/no progress basis.

**Child Language Doctoral Program Courses**

**CLDP 709. First Language Acquisition I. 3 Credits.**
An introductory course in the acquisition of child language. The course will examine the fundamental claims of modern first language acquisition theories and evaluate these theories by discussing core findings in domains of children's acquisition of speech sounds, words, syntax, semantics, and pragmatics. The course will also cover relevant issues including bilingual first language acquisition, cross-linguistic research, child language processing, language and cognition in child development, methods in child language research, and atypical language development. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students who have taken LING 425. (Same as LING 709.) Prerequisite: Graduate standing or consent of instructor.

**CLDP 739. First Language Acquisition II. 3 Credits.**
A second semester course in child language which explores the acquisition of morphology, syntax and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. (Same as LING 739.) Prerequisite: LING 709 or consent of instructor.

**CLDP 782. Research Methods in Child Language. 3 Credits.**
A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as LING 782 and PSYC 782.)

**CLDP 799. Proseminar in Child Language. 2 Credits.**
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, LING 799, PSYC 799 and SPLH 799.)

**CLDP 822. Seminar in First Language Acquisition. 3 Credits.**
Critical examination of recent theoretical issues and empirical findings in the study of first language acquisition. (Same as LING 822.) Prerequisite: LING 709 or consent of instructor.

**CLDP 852. Concepts in Human Molecular Genetics. 3 Credits.**
This is a lecture course providing concepts in human genetics, fundamentals of gene pathways, Mendelian and non-Mendelian transmission of genetic diseases, gene regulation and expression, genotype/phenotype correlation, characteristics of human genome, Microarray and DNA cloning. The major goal is to introduce a breadth of genetic concepts to students and at the same time provide recent developments in human genetic research. Students are expected to actively participate in discussion of readings from text books, review articles and research papers. There will be at least 3 lab days to demonstrate methodologies like DNA purification from saliva, polymerase chain reaction and DNA electrophoresis. Prerequisite: Consent of instructor.

**CLDP 854. Principles for the Study of Genetic Disorders. 3 Credits.**
This course explores the fundamentals of disease gene identification methods and tools that are effective to explore the genetic components of inherited disorders. Fundamentals of pedigree based genetic analyses will be covered, along with Mendelian and non-Mendelian inheritance patterns, gene mapping methods, population allele frequencies, heterogeneity, microarray expression, DNA sequencing, recent development in disease gene identification, online human genomic databases, genetic variations, pathogenicity and bioinformatic tools. Recent topics like gene editing, personalized medicine, and pharmacogenetics will be discussed. There will be at least 3 lab days to demonstrate DNA quantification, polymorphism, Sanger sequencing and bioinformatic tools like oligo design, prediction of pathogenicity of protein coding SNPs, and browsing human genome databases. Prerequisite: Consent of instructor.

**CLDP 856. Epigenetics of Behavioral and Developmental Disorders. 3 Credits.**
This course will include discussion of the epigenetic mechanisms involved in behavioral and developmental disorders. The topics reviewed will be DNA methylation, histone modification, genomic imprinting, neurogenesis, epigenetic control of gene expression, non-coding RNAs, prions, microbiota and epigenetics, influence of environment, lifestyle, diet and exercise on gene regulation and cellular pathways. The topics of pharmacoeigenetics, personalized epigenetics and future perspectives of epigenetics in human health will be covered. Recent development in epigenetic research will be discussed. Prerequisite: Consent of instructor.

**CLDP 874. Research Practicum. 1-3 Credits.**
Master's level. Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting an experimental investigation on topics related to child language acquisition and disorders, including quantitative methods. May be repeated for up to a maximum of 3 credits. Prerequisite: SPLH 660 or equivalent research methods course.

**CLDP 876. Independent Study in Problems of Child Language. 1-6 Credits.**
Investigation of special topics by individual master's level students. Paper required. Prerequisite: Consent of instructor.

CLDP 880. Seminar in Child Language: Research Methods. 1-3 Credits.
A seminar devoted to factors affecting children's language acquisition and language impairments, with some attention to theoretical formulations, causal pathways and mechanisms of change. Topics may vary. Prerequisite: Consent of instructor.

CLDP 898. Investigation and Conference (Masters). 1-8 Credits.
Directed research and experimentation for M.A. students in some phase of child language acquisition/disorders. Prerequisite: Consent of instructor.

CLDP 899. Master's Thesis. 1-6 Credits.
Development of Master's Thesis in the area of child language acquisition and/or disorders. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor.

CLDP 944. Multilevel Models for Longitudinal and Repeated Measures Data. 3 Credits.
Applications of the multilevel model (hierarchical linear model, general linear mixed model) for analyzing longitudinal and repeated measures data, including analysis of growth curves, within-person fluctuation, repeated measures research designs with crossed random effects, and simultaneous prediction of multiple sources of variation. Prerequisite: Instructor permission.

CLDP 945. Advanced Multilevel Models. 3 Credits.
Advanced applications of the multilevel model (hierarchical linear model, general linear mixed model) for examining multiple sources of variation, models for crossed sources of nesting, three levels of nesting, heterogeneous variances, multivariate outcomes, and non-linear outcomes. Prerequisite: Instructor permission.

CLDP 948. Latent Trait Measurement and Structural Equation Models. 3 Credits.
Contemporary measurement theory and latent variable models for scale construction and evaluation, including confirmatory factor analysis, item response modeling, diagnostic classification models, and structural equation modeling. (Same as EPSY 906.) Prerequisite: EPSY 905 and instructor permission.

CLDP 964. Seminar in Child Language. 1-3 Credits.
A seminar that considers advanced research problems in investigations of child language and language impairment, diagnosis, longitudinal development, change over time, and causal factors. Paper is required. Prerequisite: Consent of instructor.

CLDP 974. Research Practicum. 3 Credits.
Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting a study related to child language acquisition or impairments, and analyzing outcomes. Prerequisite: Consent of instructor.

CLDP 975. Directed Teaching: Child Language. 1-3 Credits.
Provides experiences in classroom and laboratory instruction under supervision of graduate faculty. Variable credit to reflect amount of instructional responsibility assumed. Prerequisite: Consent of instructor.

CLDP 982. Issues in Scientific Conduct. 3 Credits.
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as PSYC 982 and SPLH 982.)

CLDP 998. Investigation and Conference. 1-8 Credits.
Directed research, experimentation, and/or quantitative analysis for Ph.D. students in topics related to child language acquisition, language impairment, diagnosis, causation, or treatment. Prerequisite: Consent of instructor.

CLDP 999. Doctoral Dissertation. 1-12 Credits.
Doctoral Dissertation in topics related to child language acquisition, language impairment, diagnosis, causation, or treatment. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor.

Classic Courses

CLSX 105. Introduction to Ancient Near Eastern and Greek History. 3 Credits. NW H/W
A general survey of the political, social, and economic developments of Mesopotamia, Egypt, Asia Minor, and Greece from Paleolithic times to 323 B.C. (Same as HIST 105.)

CLSX 106. Introduction to Roman History. 3 Credits. HW
A general survey of the political, social, and economic developments of ancient Rome from 753 B.C. to 475 A.D. (Same as HIST 106.)

CLSX 148. Greek and Roman Mythology. 3 Credits. HL H/W
A systematic examination of the traditional cycles of Greek myth and their survival and metamorphosis in Latin literature. Some attention is given to the problems of comparative mythology and the related areas of archaeology and history. Slides and other illustrated materials. No knowledge of Latin or Greek is required.

CLSX 149. Greek and Roman Mythology Honors. 3 Credits. HL H/W
The study of Greek and Roman mythology through extensive readings in primary classical texts and secondary authors. Prerequisite: Admission to the Honors Program or consent of instructor.

CLSX 151. Introduction to Greek and Roman Archaeology. 3 Credits. HT H/W
An introduction to the history, methods, and excavation techniques of archaeology, with special emphasis on ancient Greece and Rome. Topics include stratigraphy, chronology, artifact analysis, the role of archaeology in our understanding of Greek and Roman society, and the treatment of archaeology in popular culture. Illustrated throughout with presentations of important archaeological sites of the ancient Mediterranean such as Athens and Pompeii, from the earliest times through late antiquity.

CLSX 168. Ancient Epic Tales. 3 Credits. HL H
This course provides a survey of ancient epic poetry, focusing on language from the Greek, Roman, and Mediterranean world. All readings will be in English; no knowledge of any ancient languages is required. The works selected will be ancient epic tales primarily from Greece, Rome and the Mediterranean world (e.g. Epic of Gilgamesh, Homer, Apollonios, Vergil, Ovid, Staurus) though some ancient epics from other cultures may be used for comparative purposes (e.g. Beowulf, Popol Vuh, Mahabharata). Class discussion and assignments focus on understanding the ancient cultures and their relations to our own, evaluating the arguments of scholars, and creating well-reasoned written and oral arguments about ancient epics.

CLSX 171. Ancient Ethical Problems. 3 Credits. H/W
This course introduces some of the fundamental ethical questions raised by Greek and Roman philosophers and considers how their answers to these questions can help us solve the social, political, and environmental
problems we face today. We will cover questions like “what makes a good friend?”, “would I be happier if I had more money?”, “do I have a responsibility to protect the natural world?”, and “how can I make myself a better person?”. We will explore a number of ancient ethical theories that emerged in response to these problems, such as the Hedonism of Epicurus, the Intellectualism of the Socrates and the Stoics, and the Primitivism of the Cynics, and we will consider how these theories can be applied in the contemporary world. All readings will be in English; no knowledge of any ancient languages is required.

**CLSX 177. First Year Seminar: _____** 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Classics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**CLSX 178. Writing About Greek and Roman Culture. 3 Credits. H**
This course uses focused content from Greek and Roman mythology as a vehicle for learning, applying, and practicing essential skills of writing. The content varies from term to term but is always circumscribed, such as Helen of Sparta, nature myths, the wandering hero, or children in Greek tragedy. Students complete a variety of writing exercises that build upon each other and include revision. The course will be taught in English.

**CLSX 230. Greek Culture and Civilization. 3 Credits. HL H**
This course introduces the world of the ancient Greeks, with a focus on Greek cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; athletics and competition; oral performance; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including major literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. No knowledge of Greek is required; all readings will be in English.

**CLSX 240. Roman Culture and Civilization. 3 Credits. HL H**
This course introduces the world of ancient Rome, with a focus on Roman cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; politics and empire; games and gladiators; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including major literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. All readings will be in English; no knowledge of any ancient languages is required.

**CLSX 305. Greek and Roman Art. 3 Credits. H/W**
An introduction to the history, methods of study, and forms of evidence for Greek and Roman art from Archaic Greece to Late Antiquity (600 B.C.E.-400 C.E.), mainly sculpture, painting, and crafted objects. Emphasized topics include: the diversity of approaches towards the study of ancient artifacts, cross-cultural exchange between the cultures of Greece and Rome, ancient vs. modern definitions of art and artists, patrons and audiences, and current debates about ancient art. Illustrated throughout with presentations of significant works and case studies. Use of the study collection in the Wilcox Classical Museum.

**CLSX 310. Greek Rhetoric in Theory and Practice. 3 Credits. H**
This course explores the theory and practice of ancient Greek rhetoric, with the aim of developing student's own rhetorical skills and habits. All readings are in translation; no knowledge of ancient Greek is required. Students study rhetoric in such authors as Homer, Demosthenes, Plato, and Lysias and discuss such topics as the role of public speaking in maintaining Greek democracy, the difference between rhetorical skill as a means and an end, the relationship between rhetorical style and civic identity, and the adaptability of rhetoric to various circumstances and audiences. Students practice delivery with ancient speeches; write and deliver speeches tailored to a variety of situations; and listen to and critique the speeches of their peers and others.

**CLSX 316. Ancient Magic and Witches. 3 Credits. H**
This course provides a survey of magic and witchcraft in ancient Greece and Rome and interprets these practices through anthropological theories of magic and witchcraft. Emphasized topics may include magicians, witches, ghosts, spirits, demons, divination, and spells. This course considers issues such as how magic works, how people engage with the divine, the marginalization of magical practitioners, and the difference between magic, witchcraft and religion. All readings will be in English; no knowledge of any ancient languages is required. (Same as REL 316.)

**CLSX 320. Roman Oratory in Theory and Practice. 3 Credits. H**
This course explores the theory and practice of ancient Roman rhetoric, with the aim of developing student's own rhetorical skills and habits. All readings are in translation; no knowledge of Latin is required. Students will study rhetoric in such authors as Cicero, Quintilian, Caesar, and Seneca and discuss such topics as the role of rhetorical theory in Roman education; oratory as a hallmark of public service during the Republic, and its transition to a pastime in the Imperial age; the ways the Romans connected oratorical style with humor, the body, and gender identity; and the leeway given to speakers in constructing an argument. Students practice delivery with ancient speeches; write and deliver speeches tailored to a variety of situations; and listen to and critique the speeches of their peers and others.

**CLSX 322. Alexander the Great: Man and Myth. 3 Credits. HT H**
This course explores the life, times, and legacy of Alexander the Great (356-323 BCE). It covers the historical context of ancient Greece and Macedon from which Alexander emerged; his engagement with ancient Greek, Egyptian, and Persian cultures; his military campaigns; his aims in creating an empire; and the immediate aftermath of his conquests. In addition, the course considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Alexander has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the use of the memory of Alexander by later Greeks and Romans; the medieval Alexander tradition; responses to Alexander in Middle Eastern and Indian thought and literature; the legacy of Alexander’s conquests in the age of empires; his transformation in Hollywood; and his contested place in the modern political dispute between Greece and North Macedonia. (Same as HIST 387.)

**CLSX 323. Julius Caesar: Man and Myth. 3 Credits. HT H**
This course explores the life, times, and legacy of Julius Caesar (c. 100-44 B.C.E). It covers Caesar’s early political career, his military campaigns, and his rise to power through civil war, with special attention paid to his aims, political reforms, and the institutions that enabled his rise to power. In addition, it considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Caesar has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the impact of Julius Caesar in Rome with the creation of an empire ruled by “Caesars”; Medieval responses to Caesar as tyrant, king, and emperor; Caesar as a paradigm of populist tyranny from the Renaissance to the present; the legacy of his literary output and the Romantic image of Caesar as a genius; his impact on the modern age of empires; and re-imaginings of Caesar in film, TV, and video games. (Same as HIST 388.)

**CLSX 325. Aegean Archaeology and Art. 3 Credits. H/W**
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaean, Minoans, and Cycladic islanders,
including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 525 or HA 525. No knowledge of Greek or Latin is required. (Same as HA 325.)

**CLSX 326. Greek Archaeology and Art. 3 Credits. H/W**
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 526 or HA 526. No knowledge of Greek or Latin is required. (Same as HA 326.)

**CLSX 327. Roman Archaeology and Art. 3 Credits. H/W**
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 527 or HA 527. No knowledge of Greek or Latin is required. (Same as HA 327.)

**CLSX 330. Greek Culture and Civilization, Honors. 3 Credits. H/W**
Honors version of CLSX 230. This course introduces the world of the ancient Greeks, with a focus on Greek cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; athletics and competition; oral performance; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including major literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. No knowledge of Greek is required; all readings will be in English. Prerequisite: Membership in the University Honors Program or consent of instructor.

**CLSX 332. Medical Terminology: Greek and Latin Roots. 3 Credits. HL H**
A comprehensive study of the Greek and Latin elements in medical terminology. Students will learn word roots and how to combine them, as well as become acquainted with their relationship to mythology and the influence of ancient ideas about health and the body on modern healthcare. This class is useful for anyone going into the health field including management, clinical areas, insurance, and technical fields. No knowledge of Greek or Latin is required.

**CLSX 340. Roman Culture and Civilization, Honors. 3 Credits. HL H**
Honors version of CLSX 240. This course introduces the world of ancient Rome, with a focus on Roman cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; politics and empire; games and gladiators; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. All readings will be in English; no knowledge of any ancient languages is required. Prerequisite: Membership in the University Honors Program or consent of instructor.

**CLSX 350. Modern Themes, Ancient Models: 3 Credits. H**
The study of the evolution of a cultural or literary tradition from the Graeco-Roman world into modern times. The theme of the course will normally vary from semester to semester; topics such as these may be examined: the analysis of a literary genre (e.g. drama, satire, lyric), the transformation of the ancient mythical heritage, the reception of ancient astronomy. Students should consult the Schedule of Classes for the theme of the course in a given semester. With departmental permission, may be repeated for credit as topic varies. (Same as HUM 380.)

**CLSX 351. Introduction to Greek and Roman Archaeology, Honors. 3 Credits. HT H/W**
Honors version of CLSX 151, with the focus towards critical approaches and research. Special attention is paid to recent methodological, theoretical, and ethical debates within the profession of Classical archaeology. Assignments and activities may include position papers on contentious issues of the day, research assignments, and/or field trips to museums and related institutions. Prerequisite: Admission to the Honors Program or consent of instructor.

**CLSX 355. Ancient Greece and Rome in Film. 3 Credits. H**
This course explores the reception of the cultures of ancient Greece and Rome in film. Students in this course learn about the cultures of ancient Greece and Rome through primary sources, and analyze several films from the 20th and 21st centuries for which these sources are relevant. The course considers the relationship between historical accuracy and artistic license in the films selected for the course, how each film reflects the concerns of the modern cultural context in which it was made, the common visual and thematic elements that link films set in ancient Greece or Rome, and the reuse of elements from Greek and Roman mythology and history in films set in the modern world. No knowledge of Latin or Greek required.

**CLSX 356. Ancient Roots of Modern Politics. 3 Credits. S**
This course examines the political thought and practice of Ancient Greece and Rome, and the enduring impact of these cultures upon contemporary political institutions. Students will consider topics such as origins of democracy in Ancient Athens; the Roman Republic as a model for the constitution of the United States; and the causes and results of Rome's transition from Republic to monarchy. The course will also introduce students to key perspectives in the analysis of ancient and modern politics, for example constitutional theory, political psychology, and source criticism. All readings will be in English; no knowledge of any ancient languages is required. (Same as POLS 360.)

**CLSX 356. Ancient Rome, Monuments, and Memory. 3 Credits. H**
This course explores the monuments and historical topography of the city of Rome, Italy across the Ancient, Medieval, Renaissance, Baroque, and Modern periods. Focusing on a series of case studies, monuments, and urban spaces such as the Pantheon, the Colosseum, and the imperial forums, this course explores how public spaces change in their usage and meaning over time. The course emphasizes Rome's illustrious architects and artists, such as Michelangelo and Bernini, who attempted to modernize the “eternal city” by drawing on its ancient origins with such endeavors as New St. Peter's Basilica. Throughout the course, students are challenged to compare the city of Rome to modern urban environments, and even to Lawrence, Kansas. All readings are in English; no prerequisites required.

**CLSX 371. Archaeology of Ancient Israel. 3 Credits. H**
Archaeology and art, sites and monuments of ancient Israel from the Neolithic period to Late Roman. Special topics will include the peoples of the region, nomadism and urbanization, the kingdoms of Israel, Second Temple Period, Qumran, Roman Jerusalem, and the creation and development of the synagogue. (Same as JWSH 371.)

**CLSX 375. Studies in:  1-3 Credits. H/W**
Selected readings in Greek and Roman antiquity and the classical tradition for students who desire special work on a flexible basis. No
knowledge of Greek or Latin is required. May be repeated for credit, the
maximum being twelve hours. Prerequisite: Consent of instructor.

CLSX 378. Food and Drink in the Ancient Mediterranean. 3 Credits.  H
This course examines the means of production and preparation, as well as the social role, of food and drink in Greek and Roman antiquity. The course will introduce students to different methodologies from anthropology and sociology of food for studying patterns of production and consumption, and class discussions and assignments will ask students to consider how the attitudes to and experience of food and drink in the ancient world differed from our own. All readings will be in English; no knowledge of any ancient languages is required.

CLSX 380. Ancient Greek Athletics and the Olympic Games. 3 Credits.  H/W
This course studies ancient Greek athletics and the Olympic games. Students use historical, literary, and archaeological approaches to study how the Greeks celebrated and memorialized their athletes; how athletic prowess was connected to moral and civic virtue; the technologies by which the Greeks measured athletic performance; and the ways fans and spectators responded to competitions. Special emphasis will be given to the development of the Olympic games and their social, political, and religious function in Greek society and in their modern instantiation. All readings are in English; no knowledge of Greek is required.

CLSX 381. Ancient Roman Gladiators and Spectacle. 3 Credits.  W
This course studies ancient Roman gladiators and spectacle-the public entertainment that included staged beast hunts, mock naval battles, chariot races, and the punishment of criminals. Students use historical, literary, and archaeological approaches to study the development of gladiatorial combat and its reception in later periods. Emphasized topics may include: slavery in ancient Rome, the relationship between politics and spectacle, the architecture and engineering of the Colosseum, the representation of gladiators in modern film and video games, and the intersection of violence and entertainment in ancient Roman and modern American culture. All readings are in English; no knowledge of Latin is required.

CLSX 382. Jerusalem Through the Ages. 3 Credits.  H
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world’s most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as HIST 382, JWSH 382 and REL 382.)

CLSX 384. Ethics in Greek Tragedy. 3 Credits.  HL  H
This course provides an introductory survey of theories of morality and uses Greek tragedy as case studies for understanding ethical problems. Students will read passages from ethical theorists alongside plays by Aeschylus, Sophocles, and Euripides, giving particular attention to identifying the ethical dilemmas the characters face, the criteria by which these characters make their decisions, ethical assessment of their decisions by their own standards and by those of ethical theories, and the role of cultural context in understanding the ethical dimensions of the plays. No knowledge of Greek is required.

CLSX 402. War and Society in Greece and Rome. 3 Credits.  H/W
This course explores the military history of the ancient world, with a focus on the connections between warfare and political, social, and cultural developments. Through extensive reading, analysis, and discussion of a wide variety of ancient sources (literary, epigraphic, archaeological) and contemporary scholarship, this class will survey both the major developments in warfare in Greece and Rome, while at the same time investigating the relationship of military institutions, technologies, tactics, and strategies to the key political and economic changes, social structures, and value systems of antiquity. Beyond exploring famous and influential campaigns and battles (Persian Wars; Peloponnesian War; rise of Macedonia; Punic Wars; Roman civil wars; barbarian invasions), topics will include: hoplite warfare and the emergence of Sparta and Athens; sea-power, democracy, and imperialism; citizen militia and professionalization in Rome; trauma, triumph, and memorialization; gender roles and ethnic identity. (Same as HIST 402.)

CLSX 480. Classical Museum in Context. 3 Credits.  H
This seminar is about the Wilcox Classical Museum, KU’s first and oldest museum collection, founded in 1888. It introduces collecting and curation practices of universities during the nineteenth and early twentieth centuries, explores the culture of the reception of classical antiquity in KU’s early history from the period of 1880-1910, and provides hands-on experience with objects in the Wilcox Collection. Emphasized topics include: the diversity of approaches in the study and interpretation of ancient artifacts, the controversial history of the usage of plaster casts of Greek and Roman sculptures in museum displays, and the future of the Wilcox Classical Museum. Students learn visual literacy skills, conduct original research on objects in the museum’s collection, and become familiar with digital methods in the documentation, cataloguing, and display of museum objects. Prepares students for upper-level classes and graduate work in Greek and Roman Archaeology, Art History, and Museum Studies.

CLSX 496. Honors Essay in Classical Antiquity. 3 Credits.  H/W
Individual directed research and preparation of an essay on a topic in Classical literature, culture, or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor.

CLSX 502. The Age of Heroes: Early Greece. 3 Credits.  H/W
This course explores the Greek Bronze and Dark Ages and in particular the relationship of the Iliad and the Odyssey to early Greek history. The course is organized around current methods, problems, and debates in the fields of Greek history, archaeology, and Classics. Topics include the rise and fall of the Minoan and Mycenaean worlds, the historicity of the Trojan War, and social, religious, and political institutions of the Dark Ages. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 502.) Prerequisite: Any CLSX or HIST course.

CLSX 504. Rise of Athens and Sparta. 3 Credits.  H/W
This course explores the history of Archaic and Classical Greece, focusing on the rise and fall of the rival states of Sparta and Athens. The course is organized around current methods, problems, and debates in the fields of Greek history and Classics. Topics include the emergence of the Greek polis; Greek colonization; developments in political, religious, and social institutions, including the Spartan constitution and the rise of Athenian democracy; the changing definitions of personal, cultural, and national identities; cultural, political, and economic tensions between rival Greek city-states and neighbouring cultures, especially Persia and Macedonia. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 504.) Prerequisite: Any CLSX or HIST course.

CLSX 505. Roman Republic. 3 Credits.  H
This course investigates the origins, development, and eventual crisis of the Roman Republic, from its foundation in the eighth century BC to Civil War in the first century BC. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include the creation of the imperial system; developments in the role of the emperor and the Roman government; continuity and transformation in society, culture, religion, economy, and identity; and the conflict between Romans and the "barbarians"; political decline and daily life across the empire. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 507.) Prerequisite: Any CLSX or HIST course.

CLSX 508. Late Roman Empire (284-527). 3 Credits. H/W
This course investigates the history of the later Roman Empire, from the height of its power in the second century AD to the fall of the Western Roman Empire in the fifth century AD. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include continuity and change in Roman culture, identity, and institutions; the Christianization of the empire; contact and conflict between Romans and the "barbarians"; political decline and daily life across the empire. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 508.) Prerequisite: Any CLSX or HIST course.

CLSX 510. Love, Lust, and Laughter in Ancient Literature. 3 Credits. H
This course moves beyond ancient epic and tragedy to introduce students to less familiar genres from Greek and Roman literature. Texts studied may include the romantic novels of Heliodorus and Apuleius; the erotic poetry of Sappho and Catullus; the comedies of Aristophanes and Plautus; the proto-science fiction of Lucian; or the satires of Horace and Persius. Attention will be given to theories, approaches, and questions in contemporary criticism of ancient literature, and assessment will include a final paper or creative project that integrates these perspectives. All readings will be in English; no knowledge of any ancient languages is required. Prerequisite: Any CLSX course.

CLSX 515. Gender and Sexuality in Greek Culture. 3 Credits. H
This course explores various approaches to the study of gender and sexuality in Greek antiquity. Contents will vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as WGSS 515.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

CLSX 516. Gender and Sexuality in Roman Culture. 3 Credits. H/L H/W
This course explores various approaches to the study of gender and sexuality in Roman antiquity. Contents will vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as WGSS 516.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

CLSX 525. Aegean Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaeans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lectures with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 325 or HA 325. No knowledge of Greek or Latin is required. (Same as HA 525.)

CLSX 526. Greek Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 326 or HA 326. No knowledge of Greek or Latin is required. (Same as HA 526.)

CLSX 527. Roman Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities; and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 327 or HA 327. No knowledge of Greek or Latin is required. (Same as HA 537.)

CLSX 529. Archaeology and Art of the Ancient Near East. 3 Credits. H
A cross-cultural survey of the material remains of the major civilizations of the ancient Near East, including Anatolia, Mesopotamia, the Levant, and Egypt from Neolithic period to the rise of the Roman empire (ca. 6000 B.C.E. - 30 B.C.E.). Includes lectures with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as HA 529.)

CLSX 538. Pompeii and Herculaneum. 3 Credits. H
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial and religious life from...
the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as HA 538, HUM 538.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor.

CLSX 550. Capstone in Classics. 1-3 Credits. H
This capstone seminar synthesizes various aspects in the discipline of Classics by focusing on recent award-winning scholarship or creative work in the field. Specific assignments and additional readings vary from one semester to another and will be stated on the instructor's syllabus. Introductory knowledge of Greek or Latin is required. Prerequisite: 15 hours in CLSX/LAT/GRK at the 200 level or above, or status as a senior major in the department, or permission of the instructor.

CLSX 570. Study Abroad Topics in Greek and Roman Culture: _____. 1-3 Credits. H
This course is designed for the study of special topics in Classics at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

CLSX 575. Readings in: _____. 1-3 Credits.
Selected readings in Greek and Roman antiquity and the classical tradition for students who desire special work on a flexible basis. No knowledge of Greek or Latin is required. May be repeated for credit if topic varies. Only six hours may count toward the major. Prerequisite: Consent of instructor.

CLSX 577. Topics in the Archaeology and Art of the Ancient Mediterranean: _____. 3 Credits. H
Lecture and discussion course focusing on a theme, medium, region, or period in the archaeology and art of the ancient Near Eastern and classical world. May be repeated for credit if topic varies. Only 6 hours may count toward the major.

CLSX 675. Studies in: _____. 1-3 Credits. H/W
Selected readings in Greek and Roman antiquity and the classical tradition for students who desire special work on a flexible basis. No knowledge of Greek or Latin is required. May be repeated for credit, the maximum being twelve hours. Prerequisite: Consent of instructor.

CLSX 790. Practicum in the Teaching of Classics. 0.5 Credits.
Required of all assistant instructors and teaching assistants in the teaching of Classics courses. May be repeated up to three semester hours credit in total.

CLSX 899. Thesis. 1-6 Credits.
Thesis hours. Graded on a satisfactory progress/limited progress/no progress basis.

Classics Courses

GRK 104. Elementary Ancient Greek. 5 Credits. U F1
The essentials of ancient Greek grammar, with readings.

GRK 105. Elementary Ancient Greek, Honors. 5 Credits. U F1
The essentials of ancient Greek grammar, with readings. Prerequisite: Membership in the University Honors Program or permission of instructor.

GRK 108. Ancient Greek Readings and Grammar. 5 Credits. U F2
A continuation of Greek 104, with extensive readings from one or more classical authors. Prerequisite: GRK 104 or GRK 105.

GRK 109. Ancient Greek Readings and Grammar, Honors. 5 Credits. U F2
A continuation of GRK 105, with extensive readings from one or more classical authors. Prerequisite: GRK 104 or 105; and membership in the University Honors Program or permission of instructor.

GRK 177. First Year Seminar: _____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Greek. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

GRK 301. Philosophy and Oratory. 3 Credits. H/W F3
Systematic grammar review in conjunction with readings selected from Plato, Aristotle and the Attic orators, with attention to issues of interpretation and social and cultural history. Prerequisite: GRK 108 or GRK 109.

GRK 302. Drama and Lyric Poetry. 3 Credits. H/W F3
Systematic grammar review in conjunction with readings selected from Aeschylus, Sophocles, Euripides, and the lyric poets, with attention to issues of literary interpretation and cultural history. Prerequisite: GRK 108 or GRK 109.

GRK 303. Greek Narrative Prose. 3 Credits. H/W F3
Systematic grammar review in conjunction with readings selected from the historians Herodotus, Thucydides, and Xenophon, as well as from the Greek novels and the New Testament. Attention will be given to issues of interpretation and cultural history. Prerequisite: GRK 108 or GRK 109.

GRK 310. Homer's Odyssey. 3 Credits. H/W F4
Selections from Homer's Odyssey, with attention to issues of literary translation and interpretation, performance, and social and cultural history. Prerequisite: GRK 301, or GRK 302, or GRK 303.

GRK 312. Homer's Iliad. 3 Credits. H/W F4
Selections from Homer's Iliad, with attention to issues of literary translation and interpretation, performance, and social and cultural history. Prerequisite: GRK 301, or GRK 302, or GRK 303.

GRK 315. Biblical and Imperial Greek. 3 Credits. W
This course surveys the post-classical development of Greek in the Hellenistic and Roman periods, with special attention given to the languages of the Bible. The course will focus on extending linguistic knowledge and developing an understanding of the historical development of Greek through close readings of selections from the Septuagint, New Testament, and Greek authors of the Roman Empire, such as Lucian. We will examine how and why koiné (“common”) Greek differs from Classical Greek, and we will interpret these texts in light of the contact and conflict between different political, linguistic, ethnic, and religious communities that characterized the Hellenistic and Roman worlds. This course will be indispensable both for those interested in the history and culture of Greece and Rome beyond the fifth century B.C., and for those interested in reading the Bible and early Christian writers. Prerequisite: GRK 108 or GRK 109.

GRK 375. Readings in: _____. 1-3 Credits. H/W F3
Readings in classical Greek texts. May be repeated for up to twelve hours. Prerequisite: GRK 108 or the equivalent.

GRK 496. Honors Essay in Greek. 3 Credits. H/W FP
Individual directed research and preparation of an essay on a topic in Greek literature or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor.

GRK 508. Early Greek Philosophy. 3 Credits. H/W FP
A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers with some attention paid to the Sophists and the Hippocratic Corpus. (Same as PHIL 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor.

GRK 701. Archaic Poetry. 3 Credits.
Close reading of texts from Homer, Hesiod, Pindar, the lyric poets.

**GRK 702. Drama. 3 Credits.**
Close reading of texts from Aeschylus, Sophocles, Euripides, Aristophanes.

**GRK 703. History and Oratory. 3 Credits.**
Close reading of texts from Herodotus, Thucydides, Xenophon, Attic orators.

**GRK 704. Philosophy. 3 Credits.**
Close reading of texts from Plato, Aristotle, the Pre-Socratics.

**GRK 705. Readings in Classical Greek. 3 Credits.**
Extensive reading in a variety of Greek authors.

**GRK 790. Practicum in the Teaching of Greek. 0.5 Credits.**
Required of all assistant instructors and teaching assistants in the teaching of Greek. May be repeated up to three semester hours credit in total.

**GRK 798. Studies in:____. 1-3 Credits.**
Selected readings for qualified students who desire special work on a flexible basis. May be repeated for credit, the maximum being twelve hours. Prerequisite: Undergraduate proficiency in Greek or equivalent.

**GRK 899. Thesis. 1-6 Credits.**
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis.

### Classics Courses

**LAT 104. Elementary Latin I. 5 Credits.** U F1
An introduction to the Latin language.

**LAT 105. Elementary Latin I, Honors. 5 Credits.** U F1
Integrates study of elementary Latin with study of Roman culture. Prerequisite: Admission to Honors Program or permission of department.

**LAT 108. Elementary Latin II. 5 Credits.** U F2
Latin grammar concluded with selected readings. Prerequisite: LAT 104 or LAT 105, or permission of department.

**LAT 109. Elementary Latin II, Honors. 5 Credits.** U F2
Latin grammar concluded with selected readings, integrated with study of Roman culture. Prerequisite: LAT 105 or permission of department.

**LAT 112. Readings in Latin Literature. 3 Credits.** U F3
Systematic grammar review in conjunction with selected prose authors, such as Cicero or Caesar, with additional readings in Roman poetry. Attention to literary history and historical context. Prerequisite: LAT 108 or LAT 109, or permission of department.

**LAT 113. Readings in Latin Literature, Honors. 3 Credits.** U F3
Systematic grammar review in conjunction with selected prose authors, such as Cicero or Caesar, with additional readings in Roman poetry. Exercises in literary analysis and/or prose composition. Prerequisite: LAT 109 or permission of department.

**LAT 177. First Year Seminar:____. 3 Credits.** U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Latin. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**LAT 300. Intermediate Latin Composition. 3 Credits.** H/W FP
Composition in Latin prose, stressing the basic principles of Latin syntax and style. Recommended for majors and minors. Prerequisite: LAT 112 or LAT 113 or permission of the department.

**LAT 301. Prose Fiction and Epistolography. 3 Credits.** H/W FP
Selected readings from such authors as Cicero, Seneca, Petronius, Pliny, and Apuleius, with attention to literary interpretation and historical context. Prerequisite: LAT 112 or LAT 113, or permission of department.

**LAT 302. Hexameter Poetry. 3 Credits.** H/W FP
Selected readings from such authors as Lucretius, Vergil, Ovid, and the satirists, with attention to literary interpretation and historical context. Prerequisite: LAT 112 or LAT 113, or permission of department.

**LAT 303. Roman Historians. 3 Credits.** H/W FP
Selected readings from such authors as Caesar, Livy, and Tacitus, with attention to issues in Roman history and historiography. Prerequisite: LAT 112 or LAT 113, or permission of department.

**LAT 304. Lyric and Elegiac Poetry. 3 Credits.** H/W FP
Selected readings from such authors as Catullus, Horace, Tibullus, Propertius, Sulpicia, Ovid, and Martial, with attention to literary interpretation and historical context. Prerequisite: LAT 112 or LAT 113, or permission of department.

**LAT 305. Roman Drama. 3 Credits.** H/W FP
Selected readings from such authors as Plautus, Terence, and Seneca, with attention to literary interpretation, theater history, and performance. Prerequisite: LAT 112 or LAT 113, or permission of department.

**LAT 310. Vergil's Aeneid. 3 Credits.** H/W FP
In this course students read selections from Vergil’s Aeneid through various interpretive lenses such as literary history (including its relationship to epic and tragedy), socio-cultural and political context, and reception. Attention will be paid throughout to Vergil’s poetic style, syntax, and lexicon. Prerequisite: LAT 112 or LAT 113 or permission of department.

**LAT 375. Readings in:____. 1-3 Credits.** H/W FP
Readings in Latin literature, selected in consultation with the instructor. May be repeated for up to twelve hours. Prerequisite: LAT 112 or LAT 113, or consent of instructor.

**LAT 496. Honors Essay in Latin. 3 Credits.** H/W FP
Individual directed research and preparation of an essay on a topic in Latin literature or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor.

**LAT 701. Hexameter Poetry. 3 Credits.**
Close reading of texts from authors such as Lucretius, Vergil, Ovid, Statius. Prerequisite: Consent of instructor.

**LAT 702. Lyric and Elegy Poetry. 3 Credits.**
Close reading of texts from authors such as Catullus, Horace, Propertius, Tibullus, Sulpicia, Ovid, Martial. Prerequisite: Consent of instructor.

**LAT 703. History, Oratory, Philosophy. 3 Credits.**
Close reading of texts from authors such as Cicero, Livy, Seneca, Tacitus, Augustine. Prerequisite: Consent of instructor.

**LAT 704. Drama, Satire, and Novel. 3 Credits.**
Close reading of texts from Plautus, Terence, Horace, Petronius, Seneca, Juvenal, Apuleius.

**LAT 705. Readings in Classical Latin. 3 Credits.**
Extensive reading in a variety of Latin authors.

**LAT 790. Practicum in the Teaching of Latin. 0.5 Credits.**
Required of all assistant instructors and teaching assistants in the teaching of Latin. May be repeated up to three semester hours credit in total.

**LAT 798. Studies in:____. 1-3 Credits.**
Communication Studies Courses

COMS 104. Introduction to Communication Studies. 3 Credits. H
Survey of the major areas of the Communication Studies field. Provides an overview of communication theory and research methods, and introduces key topics, approaches, and applications in core areas such as rhetoric, organizational communication, interpersonal communication, intercultural communication, and communication technology.

COMS 130. Speaker-Audience Communication. 3 Credits. U
Study of rhetorical theory and its application to the preparation, presentation, and criticism of oral discourse in audience situations. Special consideration of listening behavior and of the ethical conduct of speech in a free society. This course fulfills the College argument and reason requirement.

COMS 131. Speaker-Audience Communication, Honors. 3 Credits. U
The study of rhetorical theory and its application to the preparation, presentation, and criticism of oral discourse in audience situations. Special consideration of listening behavior and of the ethical conduct of speech in a free society. This course fulfills the College argument and reason requirement. This is an honors section of COMS 130 open only to students in the Honors Program.

COMS 132. Speaker-Audience Communication for the Professional Schools. 3 Credits. H
This course focuses on the study of oral communication: the application, preparation, presentation and criticism of messages appropriate in the business or organizational setting. Special consideration is given to speaker confidence, working in teams, listening behaviors and application of communication theories to the audience and rhetorical situation. Prerequisite: Open only to students in the professional schools.

COMS 133. Speaker-Audience Communication for the Professional Schools, Honors. 3 Credits. H
This course focuses on the study of oral communication the application, preparation, presentation and criticism of messages appropriate in the business or organizational setting. Special consideration is given to speaker confidence, working in teams, listening behaviors and application of communication theories to the audience and rhetorical situation. Prerequisite: Open only to students who are members of the University Honors Program.

COMS 177. First Year Seminar: _____ . 3 Credits. U
A limited-enrollment, seminar course for freshmen, addressing current issues in Communication Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

COMS 207. Introduction to Political Communication. 3 Credits. S
This class addresses the different ways in which the three main players in political communication processes (leaders, the media and citizens) affect the political behavior, attitudes or cognitions of individuals; or have outcomes that influence public policy at different levels. The contents of the course are organized into three areas: Foundations of political communication, central questions and theories in political communication, and political campaigning and advertising. Prerequisite: Concurrent or prior enrollment in COMS 130.

COMS 210. Introduction to Organizational and Professional Communication. 3 Credits. S
Introduces foundational concepts in organizational communication, focusing on topics such as superior-subordinate relationships, information- and feedback-seeking, relationships with stakeholders, and dealing with organizational change. The course emphasizes individual communication practices and responsibilities that contribute to organizational outcomes and personal success in organizations. Prerequisite: Concurrent or prior enrollment in COMS 130.

COMS 230. Fundamentals of Debate. 3 Credits. U
Introduction to the principles of debating. Emphasis on debating techniques, analysis of the question, methods of using evidence, refutation, and brief making. This course fulfills the College argument and reason requirement.

COMS 231. Practicum in Forensics. 1 Credits. U
For students selected by faculty supervisor for work on university debate squad. Students to enroll at time of their selection. Recurring enrollments permitted.

COMS 232. Introduction to Rhetoric. 3 Credits. HR H
Historical survey of theories of communication and persuasion, the people who produced them, and the philosophical assumptions upon which they rest. Beginning with the Greeks, especially Plato and Aristotle, and ending with selections from Kenneth Burke and other contemporary figures, the course focuses on changing concepts of rhetoric throughout a time span of some 2000 years. Prerequisite: Concurrent or prior enrollment in COMS 130.

COMS 238. Cases in Persuasion. 3 Credits. H
An exploration of basic principles that explain the effect and effectiveness of the arts of persuasion currently practiced in American society. Class discussions of incidents leading to the discovery of principles and theories that explain them. Continuing emphasis on issues concerning the ethical character of persuasion in contemporary life. Prerequisite: COMS 130 or COMS 230.

COMS 244. Introduction to Interpersonal Communication Theory. 3 Credits. SI S
Examines basic theoretical perspectives and research on verbal and nonverbal communication elements affecting communication between individuals in a variety of contexts. Topics include communication competence, developmental aspects of interpersonal communication, and interpersonal influence. Prerequisite: Concurrent or prior enrollment in COMS 130.

COMS 246. Introduction to Intercultural Communication. 3 Credits. S
This course attempts to provide an understanding of communication as it affects culture and as it is affected by culture. Special emphasis will be placed on the principle of similarity and differences as it relates to the roles of verbal and non-verbal symbols, codes, and cues, stereotypes, prejudices and value and thought patterning systems between and among cultures. Prerequisite: Concurrent or prior enrollment in COMS 130.

COMS 310. Advanced Organizational and Professional Communication. 3 Credits. SC S
This course provides a foundation for the study of communication in organizational contexts. It introduces students to various organization theories including classical, human relations, systems, and cultural approaches and examines the role of communication in each. Information flow, communication climate, communication networks, work relationships and managerial communication are discussed as well as organizational
symbolism, conflict resolution, rituals and ethics. The course is designed to
heighten students’ awareness of the role of communication in the
organizing process and to develop their abilities to diagnose and prevent
communication-related problems. Prerequisite: COMS 130.

COMS 320. Communication on the Internet. 3 Credits. S
This course introduces social and communication issues in the context of
online interaction. Surveys a range of social internet technologies (e.g.,
newsgroups, chat, MUDs, etc.). Focus is on the interpersonal topics,
including the establishment and maintenance of individual and cultural
identities, personal relationships, the emergence of online communities,
power and conflict in online groups, language use in online contexts, and
how online groups are used to enhance or alter civic and global cultures.

COMS 322. Audience Centered Public Speaking in the Workplace. 3
Credits. S
In this course, students develop and present their ideas by applying
communication theories to organizational audiences in various
presentation situations. Specifically, this course focuses on presentation
development, preparation, presentation and critique of messages
appropriate in the business or organization setting. Special attention is
given to speaking with confidence, presenting and working effectively in
teams, reflecting and improving on presentations skills, and listening and
speaking ethically in an increasingly diverse work world. Prerequisite:
Not intended for Communication Studies Majors. Does not count toward
Communication Studies Major or Minor requirements. Must have
completed at least 15 credit hours at KU to enroll.

COMS 330. Effective Business Communication. 3 Credits. S
The purpose of this course is to develop the student’s written, spoken
and electronically mediated business communication skills to prepare
to enter a career field. Focus is placed on job search preparation
including the development of cover letters, resumes, online applications,
and interviewing skills. Students are also engaged with business
communication by expanding their current writing skills to meet the
needs of a business, exposure to common business writing situations,
and developing professional presentations. Prerequisite: COMS 130 or
COMS 230.

COMS 331. Persuasive Speaking. 3 Credits. H
Guided experiences in the preparation and presentation of discourse
intended to influence outcomes of human interactions in various speaker-
audience situations, including television. Special emphasis on speech
styles in influencing thought, attitudes, and behavior. Prerequisite:
COMS 130 or COMS 230.

COMS 335. Mass Media and Politics. 3 Credits. H
The primary goal of this course is to critically examine the role of mass
media in U.S. politics. Students learn how information makes it into news
coverage, as well as how media content affects individuals, political
campaigns, and governing decisions. The course covers media effects
theories, news bias and polarization, political entertainment, and other
topics. Although the primary focus of the course is politics, students
interested in public relations and strategic communication also benefit
from learning about U.S. journalism. By the end of the semester, students
will be able to critically evaluate political and media systems in the U.S.
(Same as POLS 521.) Prerequisite: COMS 130.

COMS 342. Problem-Solving in Teams and Groups. 3 Credits. S
This course introduces basic concepts important to leading and/or
participating in problem-solving work teams. Problem identification and
analysis and leadership are emphasized and practiced. Teamwork
variables are discussed and promoted. Lecture, demonstrations,
exercises in class are structure for students to analyze groups outside of
class. Prerequisite: COMS 130 or COMS 230.

COMS 345. Propaganda and Persuasion. 3 Credits.
This course is an examination of the history and theory of propaganda
and mass persuasion. In this course students will develop a more precise
understanding of the term “propaganda” and of the techniques of mass
persuasion. Emphasis is placed on developing the critical skills necessary
to analyze and evaluate propaganda artifacts and campaigns in varied
historical and contemporary contexts, including; politics, war, social
movements, advertising, entertainment, commemoration, and popular
culture. Prerequisite: COMS 130 or COMS 230.

COMS 350. Communication in a Diverse World. 3 Credits. S
In a diverse world, communication plays a central role in both creating and
sustaining cultural norms, values, and beliefs. However, diversity is not
universally valued, and difference leads to unequal institutions, systems,
and policies, including discrimination, oppression, and ethnocentrism. In
this course, students will reflect on current cultural diversity topics and
critically interrogate communication’s role in structuring identities and
difference across socio-cultural contexts.

COMS 355. Introduction to Rhetoric and Social Influence. 3 Credits.
HL H
This course examines in detail the texts of speeches and essays on
controversial issues in order to illustrate the varied forms of rhetorical
action and the diverse modes of analysis and evaluation that can be
applied to them. Examples are drawn from the rhetorical literature of
contemporary U.S. speakers and prose writers. Formerly known as
COMS 235. Not open to students with credit in COMS 235. Prerequisite:
COMS 130 or COMS 230.

COMS 356. Introduction to Behavioral Research Methods in
Communication. 3 Credits. S
An introduction to the nature of theory and theory building in the study
of human communication. Research methods include experimentation,
survey, content analysis, and field description. An introduction to statistics
and statistical tests is included as well. Prerequisite: MATH 101 and
admission to the Communication Studies major or consent of instructor.

COMS 357. Introduction to Rhetoric and Social Influence, Honors. 3
Credits. H
This course examines in detail the texts of speeches and essays on
controversial issues in order to illustrate the varied forms of rhetorical
action and the diverse modes of analysis and evaluation that can be
applied to them. Examples are drawn from the rhetorical literature of
contemporary U.S. speakers and prose writers. Prerequisite: COMS 130
or COMS 230. Open only to students admitted to the University Honors
Program, or by consent of the instructor.

COMS 405. Speech Writing. 3 Credits. H
Emphasis is on actual practice in preparing speech manuscripts for
oneself and others. Model speeches are examined to better understand
language, evidence, and stylistic choices available to speech writers. The
ethical dimensions of writing for others in corporate and political positions
are stressed. Students are required to prepare a variety of speeches and
analyses of others’ speeches. Prerequisite: COMS 130, COMS 150, or
COMS 230.

COMS 410. Micro-Level Organizational Communication. 3 Credits.
S
An examination of dyadic level communication in organizations, with
emphasis on contexts of superior-subordinate and peer communication.
The course also addresses contexts of organizational entry and
exit, perception and judgment, information seeking, feedback, and
organizational attachment. This course also explores social identities
(gender, race, social class, sexuality, ability, and age) and the way they
are relevant to communication in contemporary workplaces. Prerequisite: COMS 310.

COMS 415. Communication, Leadership, and Conflict Management. 3 Credits. S
This course introduces students to theories of conflict management from a variety of academic perspectives and the role leadership plays in managing conflict across multiple contexts. Students will learn how to successfully assess and command situations and effectively resolve interpersonal, organizational, and systemic conflict while doing the work of leadership. (Same as LDST 420.)

COMS 420. Communication, Technology and Globalization. 3 Credits. H
Examines the social, cultural, and economic challenges and opportunities advanced communication technologies and globalization pose to processes such as democratic deliberation, urban governance, and environmental sustainability. Prerequisite: COMS 130.

COMS 425. Communication and the American Presidency. 3 Credits. H
Examination of the ways in which American presidents communicate with the American people and how such communication influences the public. Emphasis is on a number of approaches to better understanding presidential communication, including rhetorical, historical, and content analysis. Prerequisite: COMS 130 or COMS 230.

COMS 440. Communication and Gender. 3 Credits. S
Focuses attention on the relationship between communication and gender, including both physical and psychological dimensions. Topics include: sex role orientations and stereotypes; perceived and actual differences in verbal and nonverbal communication behaviors; the influence of gender on communication in a variety of contexts. (Same as WGSS 440.) Prerequisite: COMS 130, or COMS 230.

COMS 441. Health Communication. 3 Credits. H
This course is a survey of the many disciplines found in the field of health communication, including persuasion that targets health-related behavior, negotiation of treatment with health care providers, emotional support of patients, news media coverage of medical research, and health campaign principles. Prerequisite: COMS 130.

COMS 447. Intercultural Communication: The Afro-American. 3 Credits. H/W
An examination of the barriers to effective communication between black Americans and non-black Americans. (Same as AAAS 420.) Prerequisite: COMS 130 or COMS 230.

COMS 450. Ethical Issues in Political Communication. 3 Credits. H
Application of ethical standards to the evaluation of political communication. Examination of value questions related to advocacy in modern society (propaganda, demagoguery, credibility). Analysis of First Amendment rights and other issues pertaining to censorship and freedom of speech (defamation, dissent, incitement, public morals, privacy). Prerequisite: COMS 130 or COMS 230.

COMS 454. Rhetoric of Popular Culture. 3 Credits. H
A study of the social and cultural importance of popular culture. Emphasis is on using rhetorical analysis and a number of important theoretical perspectives to help examine popular culture’s often unnoticed influence. Prerequisite: COMS 130 or COMS 230.

COMS 460. Undergraduate Seminar in: ______. 1-3 Credits. S
Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (Distribution credit given for two or three hour enrollments only.)

COMS 496. Capstone in: ______. 3 Credits. S
In the capstone course students synthesize and apply knowledge and skills gained through the major. Capstone coursework requires students to integrate practices and theories learned in their areas of concentration. Topics within each concentration change as needs and resources develop. Prerequisite: Senior standing, COMS 130 or COMS 131, and completion of COMS 355 and COMS 356.

COMS 498. Directed Study in Communication Studies. 1-3 Credits. H
(A maximum of six hours of credit may be counted, with not more than four in a single area of study.) Investigation of a special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading, or special research, individual reports and conferences. (Distribution credit given for two-three hours only.) Prerequisite: At least seven hours of credit in the department and consent of instructor.

COMS 503. Post-Soviet Communication. 3 Credits. H
This course is designed to acquaint students with the shifting manner of public discourse in Post-Soviet Russia and help them to explore in some depth cross-cultural communication between America and Russia. In addition to contemporary and historical background on Russian communicative practices, students examine discourse in business development, mass media, marketing, and advertising. All readings in English. (Same as SLAV 503)

COMS 530. Internship in Communication Studies. 1-3 Credits. S
Students do communication-centered fieldwork in an organization related to their career goals. Criteria for the organizations and work assignments suitable for internship credit are in an information brochure available at the COMS Department office and website. The internship plan is developed with field supervisor and internship faculty adviser. Reports and meetings are required. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission of instructor, admission to COMS major.

COMS 535. American Public Address, Puritans to 1900. 3 Credits. H
A history of American public address from the Puritans to about 1900. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 355.

COMS 536. American Public Address, 1900-Present. 3 Credits. H
A history of American public address from 1900 to the present. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 355.

COMS 537. Communication in Conflict Resolution. 3 Credits. S
An examination of conflict situations and the manner in which communication can serve as a vehicle for their intensification or resolution. The focus is on the theory of games as it applies to conflict within interpersonal situations; implications will be drawn for larger social systems. Prerequisite: COMS 130 or COMS 230.

COMS 538. Persuasion Theory and Research. 3 Credits. S
This course focuses on the social scientific study of persuasion. Traditional theories of attitude change and persuasion research are studied along with techniques of measuring attitudes. Attention is also given to the attitude-behavior relationship and the production of compliance-gaining messages. Prerequisite: COMS 130 or COMS 230.

**COMS 539. Argumentation. 3 Credits. S**
Analysis of the theory and techniques of argumentation in historical and contemporary writings, with special emphasis on the works of Aristotle, John Stuart Mill, Richard Whately, and Stephen Toulmin. Application of argumentation theory to political and legal discourse. Opportunity for student performances in the preparation and criticism of argument. Prerequisite: Four hours in the department.

**COMS 543. Rhetoric of Sports in America. 3 Credits.**
An examination of the way in which communication about sport in America functions to influence social relations in society. Students apply the tools of rhetorical criticism to study communication about sport in public address, mass media, and social media. The intent is to develop an understanding of communication theories and apply them to the world of sports. The course examines the relationship between sport and race, gender, class, violence, and community. It explores the ways that we talk about sports and the rhetorical and sociological implications of those conversations. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 130, COMS 230, COMS 355, or by instructor permission.

**COMS 544. Advanced Interpersonal Communication: Theories and Research. 3 Credits. S**
Intensive exploration of contemporary theories and research in the field of interpersonal communication; emphasis on an array of theoretical models and research exemplars; comparative analysis of major theoretical and research paradigms. Prerequisite: COMS 244 or instructor consent.

**COMS 545. Rhetoric of War in America. 3 Credits.**
An examination of the rhetoric of war throughout American history including in depth analysis of public address surrounding America’s involvement in wars from the War of 1812 through the War on Terror. We will apply the tools of Rhetorical Criticism to an analysis of public communication about war with a focus on justifications for war, war movies, the rhetoric of war protest movements, media coverage of warfare and public debates about issues of war and peace. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 130, COMS 230, COMS 355, or by instructor permission.

**COMS 547. Communication and Culture. 3 Credits. S**
A study of the systematic relationship between communication and culture. Emphasis is on culture as a variable in communicative situations: cultural aspects of attitude and cognition, language interchange, cultural differences in extra-verbal behavior, interaction between oral traditions and mass media. Prerequisite: COMS 130, COMS 230, or an introduction course in anthropology.

**COMS 548. Advanced Interviewing Skills and Strategies. 3 Credits. S**
Comprehensive study of communication processes in dyadic, face-to-face situations commonly encountered in organizations and professional environments. Intensive analysis of simulated and real-life interviews. Prerequisite: COMS 130 and COMS 330.

**COMS 551. The Rhetoric of Black Americans. 3 Credits. H**
A study of the rhetoric of Black Americans, from their earliest protest efforts to the contemporary scene, with the focus on the methods and themes employed to alter their status in American society. (Same as AAAS 534.) Prerequisite: COMS 130. Skills in basic composition essential.

**COMS 552. The Rhetoric of Women’s Rights. 3 Credits. H**
An analysis of the themes and rhetorical strategies of the women’s rights movement in America. The course will view the struggle for women’s rights from a historical perspective and will conclude with contemporary issues concerning the role of women in society. (Same as WGSS 552.) Prerequisite: COMS 130 or COMS 230.

**COMS 555. Family Communication. 3 Credits. S**
An examination of trends and theory related to the scientific study of the family, with a focus on issues related to family interaction, functioning, relationships, and communication. Research and theories from communication, sociological, and psychological perspectives are employed to examine topics such as family violence, mental health problems, marital satisfaction, divorce, courtship, and the impact of the family on its children (and vice versa). Prerequisite: COMS 130 or COMS 230.

**COMS 557. East Asian Communication. 3 Credits. S**
Explores the major communication theories and research in the East Asian cultural contexts by focusing on the Chinese, Japanese, and Korean cultures. Examines, from a broader perspective, certain cultural values (e.g., harmony, hierarchy, conservatism, and modernism) upheld in East Asian cultures and their influences on people’s communicative behaviors in an age of globalization. Students explore issues of history, identity, verbal and non-verbal symbols, stereotypes, prejudice, values and thought patterning systems in the East Asian cultural context from a communicative perspective. This course is designed as a bridge course and meets with a graduate level section of the same title. Prerequisite: COMS 130.

**COMS 560. Seminar in: _____ 3 Credits. S**
Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (May be repeated for credit if content varies)

**COMS 590. Nonverbal Communication. 3 Credits. S**
Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems. (Same as PSYC 590.) Prerequisite: COMS 230 or PSYC 211.

**COMS 607. Political Campaigns. 3 Credits. H**
This course will examine the communication involved in political campaigns. Students will be exposed to theories and ideas related to campaigns and will apply this knowledge to current political activity. Although the primary focus of the course is politics, students interested in public relations and strategic communication also benefit from learning and practicing media relations strategies. The mediated nature of modern political communication, as well as the communication strategies of campaigns and journalists, will be examined in a semester-long simulated campaign. By the end of the semester, students will become more informed users and consumers of political campaign messages. (Same as POLS 520.) Prerequisite: COMS 130.

**COMS 620. Communication and New Technology. 3 Credits. S**
This course explores the impact of new communication technology on individuals and groups in various contexts. Topics include: The development of computer-mediated communication, social and psychological impacts of new communication technology, the evolution of telework and advances in interactive telecommunications.

**COMS 639. Legal Communication. 3 Credits. S**
An analysis of how communication principles and theories operate within the context of the legal system. Topics covered will include the lawyer/client interview, depositions and pre-trial discovery, settlement negotiation, jury selection, opening and closing statements, and witness testimony. Prerequisite: COMS 130.

COMS 656. Mass Media: Social Science Applications. 3 Credits.

This course introduces students to the major theories of and prominent research in mass communication. The aim is to stimulate critical thinking about the content and effects of mass communication, develop critical consumption skills, and enhance awareness of public policy issues relating to the media. Students are required to read a variety of chapters and articles on mass communication, promoting independent investigation into specific areas of interest. This course is a bridge course and meets with a graduate level section of the same title. Prerequisite: COMS 356.

COMS 667. Interpersonal Communication in Multinational Organizations. 3 Credits.

A study of interpersonal communication in management and professional development in intercultural situations. Focus on preparation of the global manager or professional in the organizational environment. Special attention to the problems and challenges of intercultural interactions in the context of multinational organizations.

COMS 741. Special Topics in Communication Studies: ______. 2-3 Credits.

Examination of special topics in Communication Studies. Prerequisite: Instructor consent.

COMS 787. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.

A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, PSYC 787, and SOC 767.)

COMS 810. Organizational Communication: Theory and Research. 3 Credits.

This course examines the theoretical and philosophical underpinnings of organizational communication research. Course topics cover variable analytic traditions and systems theory, as well as cultural, critical, and various interpretive approaches to understanding communication in organizational contexts.

COMS 835. Impression Formation and Interpersonal Behavior. 3 Credits.

Intensive investigation of the processes involved in impression formation and of the effects of established impressions upon interpersonal communication. (Same as PSYC 845.) Prerequisite: COMS 535 or PSYC 670.

COMS 844. Seminar in Interpersonal Communication. 3 Credits.

This class will address current theory and research in interpersonal communication. Issues addressed may include verbal or nonverbal communication in families, close relationships, initial interactions, and the like.

COMS 851. Communication Research: Historical and Descriptive. 3 Credits.

An introduction to types of historical and descriptive research in human communication. Library resources and methods of research will be covered. Emphasis will be placed upon preparing a research prospectus and upon writing the research report.

COMS 852. Communication Research: Behavioral and Social Science. 3 Credits.

An introduction to the process of research in communication studies, including consideration of basic principles in research design, methods of observation and measurement, and the application of appropriate statistical techniques.

COMS 855. Qualitative Research Methods in Communication Studies. 3 Credits.

Study of strategies for describing communication behavior in particular contexts, emphasizing ethnography and specific observational and interview data gathering and analysis methods. Prerequisite: COMS 755 or equivalent.

COMS 856. Communication Research: Quantitative Analysis. 3 Credits.

An intermediate overview of statistical techniques commonly used in communication research. Content will include a review of univariate statistical tests such as t-test, correlation, chi-square, and other nonparametric techniques of data analysis. Additionally, factorial analysis of variance, multiple regression, and factor analysis will be covered, along with the application of appropriate statistical techniques. Prerequisite: An introductory course in statistics.

COMS 859. Proseminar in Communication Studies. 3 Credits.

An overview and integration of communication studies based upon an examination of selected basic writings in the discipline.

COMS 898. Investigation and Conference (For Master’s Candidates). 1-8 Credits.

(Limited to eight hours credit toward the M.A. degree.) Directed research and experimentation for M.A. students in some phase of speech science or the teaching of speech and drama.

COMS 899. Master’s Thesis. 1-6 Credits.

Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis.

COMS 907. Seminar in Political Communication. 3 Credits.

This course will focus on contemporary political communication theory and illustrate how such theories are exemplified in modern political contexts: political arguments and developing consensus, communication strategies in Congressional and bureaucratic decision-making, the rhetorical presidency, the dissemination of political information, political narrative, and political campaigns.

COMS 910. Organizing Identity, Identification, and Stigma. 3 Credits.

Students who take this course will: 1) deepen their knowledge about communicating with diverse populations, 2) enhance their understanding of gender, race, social class, sexuality, ability, and age, and 3) apply and advance their critical thinking, research, analysis, and writing skills. This course explores ideas and implications about identity, identification, and stigma within organized contexts like school, work, and nonprofit organizations. This seminar will focus on theoretical and practical issues relevant to identity and communication in contemporary organizations. Whether we realize it or not, we spend the majority of our lives in organizations like educational institutions and the workforce where we are continually interacting with diverse groups of people. Yet, many identities are stigmatized in organizational settings and those individuals often experience ostracism, stereotyping, and marginalization. The purpose of this course is to explore the power of communication to construct,
reproduce, and transform social identities for ourselves and for others, within organizational contexts and acts of organizing.

COMS 920. Introduction to Teaching Oral Communication. 3 Credits.
This seminar prepares new graduate teaching assistants for their first teaching experience. Students will develop course materials including lectures, discussion prompts, assignments, exams based on pedagogical best practices. Students will apply theoretical concepts related to teaching, learning and assessment, and apply those theories to their own classrooms.

COMS 930. Seminar in Speech: _____. 1-4 Credits.
Special problems in speech.

COMS 933. Theories of Rhetoric: Neo-Classical. 2-3 Credits.
A study of the development of rhetorical theory from 325 A.D. to the twentieth century. Notable departures from the classical tradition will be examined. Special concentration on the writings of Augustine and the tradition of medieval preaching. Alcuin, Ramus, Bacon, Campbell, Whately, Blair, John Quincy Adams, and the elocutionary movement.

COMS 936. Seminar in Language and Discourse. 3 Credits.
This seminar uses interdisciplinary readings to examine central theoretical questions regarding language and communication. The course moves from considering major theoretical positions to current research in communication on discourse. Methodological issues in the study of language and discourse are also addressed.

COMS 939. Seminar in Argumentation. 2-3 Credits.
Examination of special problems in argumentation, with emphasis on the relationship of systems of argumentation to their philosophic presuppositions. Discussion of the writings of Toulmin, Natason, Johnstone, Perelman, Dewey. Prerequisite: COMS 539 or equivalent.

COMS 945. Seminar in Social Support. 3 Credits.
This course is a survey of the many disciplines of the fundamental form of communication known as social or emotional support or comforting. Emphases include message-, receiver-, and interactionally-oriented approaches, as well as support contexts, dilemmas, structures, features, and positive effects on physical and mental health.

COMS 946. Seminar in Communication and Intergroup Relations. 3 Credits.
Conceptual and theoretical frameworks for exploring and understanding relations between individuals from different societal groups (e.g., cultural/ethnic, gender, age). Focus on issues of identity, power relations as manifested in interpersonal, mass media, and organizational contexts. The course will include methodological and applied implications for studying different groups, both within the USA and around the world.

COMS 948. Seminar in Organizational Communication. 2-3 Credits.
Analysis of speech communication functions in the organizational structures of business, industry, labor, military, education, government, and professional agencies. Development of conceptual schemes for conducting research and training programs on speech systems which characterize the operation of organized groups.

COMS 951. Seminar in Movement Theory and Genre Criticism. 3 Credits.
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on social movements and rhetorical genres. It will review existing theory on these topics, develop a methodological approach to both forms of critical analysis, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor.

COMS 952. Seminar in Mythic and Narrative Approaches to Rhetorical Criticism. 3 Credits.
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on narrative rhetoric, with a special emphasis on myth as a type of narrative. It will review existing theory on these topics, consider a number of alternative methodological approaches, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor.

COMS 955. Seminar in Rhetorical Criticism. 3 Credits.
A study of contemporary and historical writings on rhetorical criticism. Emphasis is placed upon the development of critical methodology for future research and writing. Prerequisite: COMS 755.

COMS 958. Comparative Theories of Speech Communication. 3 Credits.
A descriptive and comparative analysis of theories of communication applicable to speech behavior. Prerequisite: COMS 859 or equivalent.

COMS 959. Theories of Rhetoric: Contemporary. 3 Credits.
A study of the writings on rhetorical theory in the twentieth century. Principal emphasis will be on the psychological treatment of rhetoric. I.A. Richards and Kenneth Burke, and the relationship in the twentieth century between rhetoric and dialectic, rhetoric and poetic. Prerequisite: COMS 859 or equivalent.

COMS 997. Research in: _____. 1-6 Credits.
Supervised research under the direction of a faculty member on a topic of mutual interest to the faculty and graduate student.

COMS 998. Investigation and Conference (For Doctoral Candidates). 1-8 Credits.
(Limited to eight hours credit towards the Ph.D. degree.) Directed research and experimentation for Ph.D. students in some phase of speech science or the teaching of speech and drama.

COMS 999. Doctoral Dissertation. 1-12 Credits.
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis.

Computational Biology Courses
BINF 701. Computational Biology I. 5 Credits.
First semester of a two-semester course in bioinformatics and computational biology. Topics include basic concepts of bioinformatics and molecular modeling, bioinformatics databases, computational tools and modeling methods, protein sequence and structure alignment, conformational analysis, secondary structure determination, tertiary structure modeling (homology, threading, ab initio, protein folding and dynamics), networks, data mining and machine learning, as well as student presentations of material from current papers in the field of study and their own on-going research for discussion and critique. Students will also learn responsible scholarship, including allocation of credit, treatment of data, scientific misconduct, collaborative research, and mentor/trainee responsibilities. Prerequisite: College introductory biochemistry (no requirement for specific courses), math, and computer courses or concurrent enrollment in such courses and consent of instructor.

BINF 702. Computational Biology II. 5 Credits.
Second semester of a two-semester course in bioinformatics and computational biology. Topics include protein quaternary structure modeling (protein-protein/DNA/small ligand docking, binding, computer-aided drug design), protein structure-function relationships, modeling of genome-wide protein interaction networks based on structure, systems biology, mathematical and computational modeling of complex systems, synthetic biology and dynamics of chemical reaction networks as well as student presentations of material from current papers in the field of study
and their own on-going research for discussion and critique. Students will also learn responsible scholarship, including allocation of credit, treatment of data, scientific misconduct, collaborative research, and mentor/trainee responsibilities. Prerequisite: BINF 701.

**BINF 703. Advanced Computational Biology I. 5 Credits.**
This is the first semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 701 and BINF 702, or consent of instructor.

**BINF 704. Advanced Computational Biology II. 5 Credits.**
This is the second semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 703.

**BINF 709. Topics in:. 1-3 Credits.**
Advanced courses on special topics in Bioinformatics, given as need arises, including lectures, discussions, readings, or laboratory. Students may select sections according to their special interests.

**BINF 999. Doctoral Dissertation. 1-12 Credits.**
Original research that is to be incorporated into a PhD dissertation.

**East Asian Languages& Cultures Courses**

**CHIN 100. Elementary Conversational Chinese I. 3 Credits. U**
Three hours of class per week plus outside use of recorded text materials. Basic spoken language instruction intended primarily for beginners planning travel or work in China and Taiwan. Introduction to basic written characters. Does not fulfill College of Liberal Arts and Sciences foreign language distribution requirements or department major and minor requirements.

**CHIN 101. Elementary Conversational Chinese II. 3 Credits. U**
Continuation of CHIN 100. Prerequisite: CHIN 100 or equivalent.

**CHIN 102. Beginning Chinese I. 4 Credits. U**
Taught mainly in the summer, this course covers about 75% of the material in CHIN 104, upon which this course is modeled.

**CHIN 104. Elementary Chinese I. 5 Credits. U F1**
Three hours of lecture and three hours of spoken drill each week. An introduction to spoken and written modern standard Chinese (Mandarin). Not open to students with native ability in Mandarin or Chinese dialect. Students who have any previous knowledge of Chinese must take a placement exam before enrolling in Chinese classes at K.U. Consult Department of East Asian Languages and Cultures for details.

**CHIN 106. Elementary Chinese for Advanced Beginners. 3 Credits. U**
This course is designed for students who have already acquired some elementary Chinese language abilities (in high school or from family), but cannot be placed in CHIN 108, Elementary Chinese II. The course focuses on perfecting listening, speaking, reading and writing skills, and prepares students for CHIN 108. For admission to the class, students must take the EALC Chinese placement exam, be interviewed by designated instructors, and approved.

**CHIN 108. Elementary Chinese II. 5 Credits. U F2**
Continuation of CHIN 104. Prerequisite: CHIN 101, CHIN 104, or equivalent.

**CHIN 177. First Year Seminar: ____. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Chinese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**CHIN 204. Intermediate Chinese I. 5 Credits. U F3**
Continuation of CHIN 108. Three hours of lecture and three hours of spoken drill. Prerequisite: CHIN 108 or equivalent.

**CHIN 206. Intermediate Chinese Conversation. 2 Credits. U**
Practice in speaking, presentation of prepared talks, and guided discussions. This course is primarily used to award transfer credit and does not fulfill any portion of the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: CHIN 204 or equivalent.

**CHIN 208. Intermediate Chinese II. 5 Credits. U F4**
Continuation of CHIN 204. Prerequisite: CHIN 204.

**CHIN 251. Reading and Writing Chinese I. 3 Credits. H**
Designed for students, Chinese heritage speakers as well as second-language Chinese learners, who wish to learn or improve their abilities in reading and writing Chinese characters. Focuses on the 500 most commonly used Chinese characters and the major concepts essential for reading and writing Chinese characters. Chinese culture, customs and history that are reflected in Chinese characters will also be introduced.

**CHIN 252. Reading and Writing Chinese II. 3 Credits. H**
Continuation of CHIN 251. Focuses on another 500 most commonly used Chinese characters and the major concepts essential for learning to read and write Chinese characters, preparing students for possible entry into advanced courses in Chinese, e.g. CHIN 504 (Advanced Modern Chinese I), or, after appropriate testing, for possible exemption from the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: CHIN 251 or permission of the instructor.

**CHIN 290. Accelerated Chinese. 3 Credits. U**
Instruction in reading and writing Chinese for students who already possess a degree of oral/aural proficiency. This course will prepare students for enrollment in CHIN 504, Advanced Modern Chinese I. No prerequisites. Consent of instructor required.

**CHIN 342. Introduction to Classical Chinese. 3 Credits. H/W FP**
An introduction to Classical Chinese through detailed analysis of short original passages from a variety of early Chinese texts. Students gain a foundation in the grammar and vocabulary of Classical Chinese, preparing them for CHIN 544. The course is offered at the 300 and 500 levels, with additional requirements for students taking the 500 level. Prerequisite: A basic knowledge of Chinese characters (e.g. from CHIN 108 or JPN 108) and consent of the instructor, or CHIN 208 or JPN 208. Not open to students who have completed CHIN 542.

**CHIN 386. Advanced Chinese Conversation. 2 Credits. U FP**
Guided discussions designed to increase fluency and further improve pronunciation. Prerequisite: CHIN 504 or equivalent.

**CHIN 498. Directed Readings in Chinese. 1-4 Credits. H/W FP**
Readings in Chinese on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor.

**CHIN 504. Advanced Modern Chinese I. 5 Credits. H/W FP**
Five hours of class and two of drill. Readings in selected modern Chinese literary texts and discussion in Chinese of recordings of stories and dramas. Prerequisite: CHIN 208 or equivalent.

**CHIN 508. Advanced Modern Chinese II.** 5 Credits. H/W FP
Continuation of CHIN 504. Prerequisite: CHIN 504 or equivalent.

**CHIN 512. Advanced Chinese I.** 2 Credits. H/W FP
Readings in modern Chinese texts on a variety of subjects and discussion in Chinese. Prerequisite: CHIN 218 or equivalent.

**CHIN 513. Advanced Chinese II.** 2 Credits. H/W FP
Continuation of CHIN 512. Prerequisite: CHIN 512 or equivalent.

**CHIN 542. Introduction to Classical Chinese.** 3 Credits. H/W FP
An introduction to Classical Chinese through detailed analysis of short original passages from a variety of early Chinese texts. Students gain a foundation in the grammar and vocabulary of Classical Chinese, preparing them for CHIN 544. The course is offered at the 300 and 500 levels, with additional requirements for students taking CHIN 542. Prerequisite: A basic knowledge of Chinese characters (e.g. from CHIN 108 or JPN 108) and consent of instructor, or CHIN 208 or JPN 208. Not open to students who have completed CHIN 342.

**CHIN 544. Readings in Classical Chinese: _____**. 3 Credits. H/W FP
Classical Chinese is the language of the most famous works of Chinese philosophy, and most Chinese literature before the twentieth century. This topics course introduces readings on a specific theme or genre, for example: Early Chinese Philosophy, Poetry, Religion, Confucian Philosophical Texts, Daoist Philosophical Texts, etc. Primary-text readings are in original Classical Chinese while secondary readings are in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 744. Prerequisite: CHIN 342 or CHIN 542 or consent of the instructor. May be repeated for credit if content varies.

**CHIN 562. Modern Chinese Texts I.** 3 Credits. NW H/W FP
Readings and interpretation of varied modern Chinese texts. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 564. Prerequisite: CHIN 508 or equivalent.

**CHIN 564. Modern Chinese Texts II.** 3 Credits. H/W FP
A continuation of CHIN 562 with materials of increasing difficulty. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 764. Prerequisite: CHIN 508 or equivalent.

**CHIN 598. Readings in: _____**. 1-3 Credits. H/W FP
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: CHIN 564 or permission of instructor.

**CHIN 744. Readings in Classical Chinese: _____**. 3 Credits.
Classical Chinese is the language of the most famous works of Chinese philosophy, and most Chinese literature before the twentieth century. This topics course introduces readings on a specific theme or genre, for example: Early Chinese Philosophy, Poetry, Religion, Confucian Philosophical Texts, Daoist Philosophical Texts, etc. Primary-text readings are in original Classical Chinese while secondary readings are in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 544. May be repeated for credit if topic varies. Prerequisite: CHIN 342 or CHIN 542 or consent of the instructor.

**CHIN 762. Modern Chinese Texts I.** 3 Credits.
Readings and interpretation of varied modern Chinese texts. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 562. Prerequisite: CHIN 504 or equivalent.

**CHIN 764. Modern Chinese Texts II.** 3 Credits.
A continuation of CHIN 762 with materials of increasing difficulty. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 564. Prerequisite: CHIN 762.

**CHIN 801. Directed Readings and Research in Chinese.** 1-4 Credits. FP
Advanced language training for the study of Chinese sources in the humanities or social science field of the student. Prerequisite: Consent of instructor.

### East Asian Languages & Cultures Courses

**EALC 105. Asian Religions.** 3 Credits. HR/NW H/W
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. (Same as REL 106.)

**EALC 121. Introduction to Contemporary China.** 3 Credits. NW H
An overview of contemporary Chinese culture and society since the economic reforms and opening up launched in 1978, through the study of changes in politics, the economy, society, culture and everyday life in China. The course is taught in English. No prior knowledge of Chinese language is required.

**EALC 130. Myth, Legend, and Folk Beliefs in East Asia.** 3 Credits. NW H/W
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the traditional world view of the peoples of East Asia. (Same as ANTH 293, REL 130.)

**EALC 142. Ethics in Chinese Philosophy.** 3 Credits. H
How can ethical codes help us lead a better life? What principles of government will ensure an ordered and harmonious society? What responsibilities do we have to others and to the natural world? Thinkers in early China asked these questions and came to a variety of different conclusions, ranging from a goal of spontaneous harmony, to a rigid law-and-order ethic. Their ideas are still relevant today and in this course we will both survey these different ethical perspectives and also apply them to contemporary social, political, and environmental issues.

**EALC 177. First Year Seminar: _____**. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in East Asian Languages and Cultures. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**EALC 198. Studies in: _____**. 1-5 Credits. H
Special purpose subject in East Asia and contiguous regions.

**EALC 231. Introduction to: _____**. 1-5 Credits. NW H/W
Topics are various aspects of Chinese and Japanese cultures.

**EALC 298. Studies in: _____**. 1-5 Credits. H
Special purpose subject in East Asia and contiguous regions.

**EALC 303. Happiness in East Asia.** 3 Credits. S
This course explores culture-specific methods that people in East Asia employ to enhance their wellbeing and happiness and the creative ways in which they weave together different perspectives and practices (old
and new, native and foreign, lay and expert) to deal with emotional and psychological distress. This course draws upon a multi-disciplinary approach to happiness, utilizing the subfields of social sciences (e.g., anthropology, sociology, and psychology) and humanities (e.g., philosophy and religion). Knowledge of Korean, Japanese, or Chinese language is not required.

EALC 312. Japan's Literary Legacy. 3 Credits. H/W
A survey of the major works of Japan's long literary heritage. Readings from such classics as the Tale of Genji, the world's first novel. No drama, and poetry will acquaint the student with one of the world's great literary traditions.

EALC 315. Survey of Japanese Film. 3 Credits. NW H
This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, the course introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this institution shapes gender, race, class, ethnic and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and film style over the last century. Through secondary readings, lectures, and discussions students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 315.)

EALC 316. Modern Japanese Fiction and Film. 3 Credits. H/W
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others are covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 716.

EALC 317. Contemporary Japanese Fiction and Film. 3 Credits. HL H/W
A survey of major literary and cinematic works of Japan's post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. Novels by Dazai Osamu, Mishima Yukio, Oe Kenzaburo, Murakami Haruki and Yoshimoto Banana and films by Imamura Shohei, Ozu Yasujirou, Teshigahara Hiroshi and others will be covered. Course format is a combination of lecture and discussion. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 717.

EALC 318. Modern Chinese Fiction and Film. 2-3 Credits. H/W
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 518. This course is taught at the 300 and 500 levels with additional assignments at the 500-level.

EALC 319. Contemporary Chinese Fiction and Film. 3 Credits. H
A general survey of important Chinese fiction and film from the late 20th century to the present. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 519.)

EALC 320. Modern East Asia: Multiple Perspectives. 3 Credits. NW H
A survey of the major political changes in China, Japan, Korea and Tibet in the 20th century. Students will learn about the changes that swept through East Asia as it rapidly modernized via documentary films and lectures and will study the impact of these changes on individuals by reading autobiographies.

EALC 325. Minorities in Japan. 3 Credits. S
This course offers a sociological and historical exploration of Japan's minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan's minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels with additional assignments required at the 600-level.

EALC 330. China's Cultural Legacy. 3 Credits. H/W
An examination of Chinese literature, history, philosophy, and religion from ancient times to the end of the last dynasty in 1911. Focus on key values, ideas, customs, and ways of living through Chinese history. Lectures, readings, and discussions in English. Knowledge of Chinese not required. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Not open to students who have taken EALC 530.

EALC 331. Studies In: _____, 1-3 Credits. H/W
Topics in the Chinese and Japanese cultures.

EALC 332. Asian Literature in Translation: _____, 3 Credits. NW H/W
Introduction to Asian culture and society through close reading and analysis of important works of Asian literature. Themes and issues to be focused upon will vary (e.g., traditional or modern literature of China, Japan, or Korea, and special topics of interest). Lecture and discussion format. Knowledge of Asian languages is not required.

EALC 333. Asian Literature in Translation, Honors: _____, 3 Credits. NW H/W
An honors course that may be cross-listed with an existing EALC literature course. Students are required to do additional work. Open only to students in the University Honors Program or by permission of instructor.

EALC 344. Manga: Histories and Theories. 3 Credits. H
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 544. (Same as HA 344.)

EALC 353. Language and Society in East Asia. 3 Credits. NW/SC S
This course examines the cultures of East Asian countries through the lens of language. We will discuss the interactions of language and ideology, government policies, gender and education in East Asia. The course will be relevant for students interested in East Asian anthropology, politics, religion, philosophy, linguistics and language learning. The class
has no prerequisites and requires no prior knowledge of East Asian languages or cultures. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students who have earned credit in EALC 553.

EALC 354. Japanese Prints. 3 Credits. NW H/W
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500-level. (Same as HA 354.)

EALC 356. Politics of East Asia. 3 Credits. NW S/W
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. Formerly known as EALC/POLS 656. Not open to students with credit in EALC 656 or POLS 656. (Same as POLS 356.)

EALC 360. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 561 or REL 511. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as HA 361.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

EALC 361. Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of Korea from the end of Choson dynasty through the Colonial period (1910-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. Not open to students with credit in EALC 561.

EALC 362. Post-Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of South Korea from the time of its liberation from Japan in 1945 to the present in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in EALC 562.

EALC 366. Political Economy of East Asia. 3 Credits. S
This course provides basic understanding of fiscal, monetarist, and trade politics; how governments in East Asia use them to pursue growth; the extent to which these governments follow or controvert economics to pursue growth; and how the performances of economies in East Asia relate to the U.S. and global economies. Formerly known as POLS/EALC 666. Not open to students with credit in POLS/EALC 666. (Same as POLS 366.)

EALC 367. Art and Culture of Japan. 3 Credits. NW H/W
The history of Japanese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions between different countries, and the roots of modernism in Japanese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as HA 367.)

EALC 368. The Peoples of China. 3 Credits. NW S/W
An analysis of the cultural origin, diversity, and unity of the peoples of China. Emphasis on historical development, social structure, cultural continuity and change, and ethics. (Same as ANTH 368.)

EALC 369. Art and Culture of Korea. 3 Credits. NW H/W
The history of Korean art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Korean art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art.

EALC 372. Ceramics of Korea. 3 Credits. H
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 562. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as HA 362.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

EALC 373. Modern Korean Art and Culture. 3 Credits. H
This course is a thematic introduction to Korean art and culture with an emphasis on modern and contemporary Korea. Pre-modern works are contextualized with respect to contemporary issues. Students learn how to conduct a comprehensive analysis of an artwork by considering the political, historical and social conditions of its time within a broader East Asian cultural framework. (Same as HA 363.) Prerequisite: An introductory course in art history at the college level, or consent of instructor.

EALC 375. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL H
An examination of Japanese attitudes toward love, sexuality and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students who have taken EALC 575/ WGSS 576. (Same as WGSS 375.)

EALC 378. Art and Culture of China. 3 Credits. NW H/W
The history of Chinese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions between different ethnic groups, and the roots of modernism in Chinese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as HA 368.)

EALC 380. Popular Cultures of East Asia. 3 Credits. NW H
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. Not open to students who have taken EALC 580.

EALC 385. The Art of Buddhism. 3 Credits. H/W
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range
of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 585. (Same as HA 385.)

**EALC 386. Japanese Painting. 3 Credits. NW H/W**
A survey covering the development of Japanese painting from the seventh century to the early twentieth century. Topics include Buddhist and other religious paintings, narrative scrolls, ink painting, decorative folding screens, ukiyo-e prints, and western-style paintings from the late eighteenth through early twentieth centuries. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 586. (Same as HA 386.) Prerequisite: An introductory course in Asian art or consent of instructor.

**EALC 388. Modern and Contemporary Visual Arts of Japan. 3 Credits. H**
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 588. (Same as HA 388.)

**EALC 408. Music in East Asia. 3 Credits.**
Survey of selected East Asian forms of musical theater and classical, popular, and traditional musics, with emphasis on historical, stylistic, and cultural considerations. Open to all KU students. (Same as MUSC 408.)

**EALC 418. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Credits. NW H**
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. Recommended: A course in East Asian studies. Not open to students who have taken EALC 618. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. (Same as WGSS 418.) Prerequisite: One course in EALC or WGSS.

**EALC 420. Daily Life in China From the Opium War to 1911. 3 Credits. NW H/W**
This course examines everyday life in China from the mid-19th century to the end of the last dynasty in 1911. The focus is on living conditions, social customs, and gender relations of people of all social levels, from emperors and empresses to servants, prostitutes, and concubines. Other topics include: the culture of drugs in the form of opium smoking, including how opium served as a key point of contact between China and the Euro-west; sexual culture, especially in the form of the history of prostitution and gender roles and values in China on the verge of modernity; interactions in daily life between Chinese and Westerners in China; and the experience of China's last imperial rulers. These topics are weighed against the backdrop of the decline of China's last dynasty and the concurrent impact of modernity in the form of social, political and technological change, especially as effected by the intrusion of the Euro-west. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EALC 720.

**EALC 431. Studies in: _____ 1-3 Credits. H/W**
Topics in the Chinese and Japanese traditions.

**EALC 476. International Relations of Asia. 3 Credits. S/W**
An intensive study of the problems of ideological conflict, diplomatic relations, strategic arrangements, economic cooperation, and cultural exchange in East and Southeast Asia with special emphasis upon the roles of major world powers. Formerly known as POLS/EALC 676. Not open to students with credit in POLS/EALC 676. (Same as POLS 476.) Prerequisite: POLS 170 or consent of the instructor.

**EALC 498. Directed Readings in East Asian Languages and Cultures. 1-4 Credits. H/W**
Readings in English on an East Asian subject, selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: ECIV 104 or ECIV 304 and consent of instructor.

**EALC 499. Honors Thesis. 3 Credits. H/W**
Required of all students working for a degree with honors. May be repeated for a total of nine semester hours.

**EALC 509. Religion in Japan. 3 Credits. NW H/W**
Survey of religious thought and practice in Japan from the Jomon period to the present. (Same as REL 509.)

**EALC 518. Modern Chinese Fiction & Film. 3 Credits. H**
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 318. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor.

**EALC 519. Contemporary Chinese Fiction and Film. 3 Credits. H**
A general survey of important Chinese fiction and film from the late 20th century to the present. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor. (Not open to students with credit in EALC 319.)

**EALC 530. China’s Cultural Legacy. 3 Credits. NW H/W**
An examination of Chinese literature and culture from earliest times to the modern period. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course, such as ECIV 104 or ECIV 304 or EALC 105; or consent of the instructor. Not open to students with credit in EALC 330.

**EALC 543. Contemporary Japanese Film. 3 Credits. NW H**
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as FMS 543.) Prerequisite: Junior status.

**EALC 544. Manga: Histories and Theories. 3 Credits. H**
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination
of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 344. (Same as HA 544.) Prerequisite: A college level introduction to Asian art history or Asian studies, or consent of instructor.

EALC 553. Language and Society in East Asia. 3 Credits. S
This course examines the cultures of East Asian countries through the lens of language. We will discuss the interactions of language and ideology, government policies, gender and education in East Asia. The course will be relevant for students interested in East Asian anthropology, politics, religion, philosophy, linguistics and language learning. The class requires no prior knowledge of East Asian languages or cultures. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students who have earned credit in EALC 353. Prerequisite: Any EALC course, or any CHIN, JPN, KOR language course, or any Linguistics course.

EALC 561. Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of Korea from the end of the Choson dynasty through the colonial period (1920-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature and film. Prerequisite: An introductory East Asian studies course, such as ECIV 104 or ECIV 304, or EALC 105; or consent of instructor. There are additional readings and more extensive writing assignments than in EALC 361. Not open to students with credit in EALC 361.

EALC 562. Post-Colonial Korea. 3 Credits. H
This course examines the history, society, and culture of South Korea from the time of its liberation from Japan in 1945 to the present in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in EALC 362. Prerequisite: One course on Korea or East Asia.

EALC 563. Cultural History of Korea. 3 Credits. H
This course examines the cultural history of Korea in periods prior to the 19th Century. Special attention is given to varying constructions of cultural value, heritage, and identity, together with the historically specific factors that engendered them.

EALC 570. The Structure of Japanese. 3 Credits. H
This course will explore Japanese, discovering the phonetic, phonological, morphological, syntactic and semantic features of the language, and discussing the actual use of Japanese in social/cultural contexts. The course will also discuss the acquisition of Japanese, both in children and adult learners. This course will be primarily for students who want to learn about the linguistic aspects of Japanese, rather than to gain a practical command of it. (Same as LING 570.) Prerequisite: A previous LING, JPN, or EALC course.

EALC 572. The Structure of Chinese. 3 Credits. H
A detailed study of the phonological and grammatical structure of Chinese and the interactions between language and culture. Depending on student interests, a unit on the pedagogy of teaching Chinese as a foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as LING 572.)

EALC 575. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL H
An examination of Japanese attitudes toward love, sexuality, and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students with credit in EALC 375/ WGSS 376. (Same as WGSS 576.) Prerequisite: One course in EALC or WGSS.

EALC 580. Popular Cultures of East Asia. 3 Credits. NW H/W
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. More extensive writing requirements than 380. Not open to students who have taken EALC 380.

EALC 584. Modern China. 3 Credits. NW H/W
An intensive survey of China's history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as HIST 584.)

EALC 585. Politics and Society in China. 3 Credits. NW H/W
Examines the epochal changes that have occurred in China from Deng Xiaoping's rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 "pro-democracy" movement and the events at Tiananmen Square. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and economic decentralization, and leadership succession. A previous course on China is helpful, but not mandatory. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 468. (Same as POLS 688.)

EALC 587. Age of Shoguns: Early Modern Japan. 3 Credits. NW H/W
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as HIST 587.) Prerequisite: An earlier course in history or east Asian languages and cultures, or permission of the instructor.

EALC 588. Japan, 1853-1945. 3 Credits. NW H/W
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as HIST 588.)

EALC 589. Japan Since 1945. 3 Credits. NW H/W
This course provides an overview of Japanese history from the end of World War II to the present day. Among the topics covered will be the Allied Occupation, postwar politics and social change, the economic "miracle," popular culture, women and the family, crime and punishment, the educational system, and Japan's place in the world.

EALC 590. Topics in East Asian Languages and Cultures: 1-9 Credits. H/W
Specific topical courses will be offered every year covering a number of disciplines. Credit, description, and prerequisites will vary. Note: May be repeated for credit up to the stated limit.

EALC 591. Topics in East Asian Languages and Cultures: 1-9 Credits. S/W
Specific topical courses will be offered every year covering a number of disciplines. Credit, descriptions, and prerequisites will vary. Note: May be repeated for credit up to the stated limit.

EALC 610. Minorities in Japan. 3 Credits. S
This course offers a sociological and historical exploration of Japan’s minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan’s minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels, with additional assignments required at the 600-level. (Same as CEAS 610.) Prerequisite: An introductory East Asian Studies course or consent of the instructor.

EALC 618. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Credits. NW H
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women’s literature, and erotic literature. Not open to students who have taken EALC 418. This course is taught at the 400 and 600 level with additional assignments at the 600 level. Prerequisite: A course in East Asian studies.

EALC 642. Chinese Thought. 3 Credits. NW H/W
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as HUM 524 and PHIL 506.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy.

EALC 678. Chinese Foreign Policy. 3 Credits. S/W
An in-depth examination of China’s changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 378. (Same as GIST 678 and POLS 678.) Prerequisite: Sophomore level or consent of the instructor.

EALC 701. Practicum in Teaching Chinese. 1 Credits.
This course is required every semester for graduate teaching assistants in the Chinese language program in EALC. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Japanese language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department.

EALC 702. Practicum in Teaching Japanese. 1 Credits.
This course is required every semester for graduate teaching assistants in the Japanese language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Korean language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department.

EALC 703. Practicum in Teaching Korean. 1 Credits.
This course is required every semester for graduate teaching assistants in the Korean language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Korean language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department.

EALC 704. Contemporary East Asia. 3 Credits.
This graduate seminar explores rapidly changing societies in contemporary East Asia, particularly China, Japan, and Korea. The course provides a critical overview of East Asia and its diversity and complexity using cross-cultural perspectives and interdisciplinary social science approaches, and situates East Asian societies in the context of globalization. (Same as CEAS 704.)

EALC 715. Survey of Japanese Film. 3 Credits.
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth century Japanese film. Through secondary readings, lectures, and discussions students will examine how Japanese cinema as an institution responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 715.)

EALC 716. Fiction and Film in Japan. 3 Credits.
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others will be covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 316.

EALC 717. Contemporary Japanese Literature in Translation: 1945-Present. 3 Credits.
A survey of major literary works of Japan’s post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. An individual research project in an area of the student’s special interest will be required. Not open to students who have completed EALC 317.

EALC 718. Readings in Modern Chinese Literature. 2-3 Credits.
A general survey of the important writers of the 20th century and their works. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 318.)

EALC 720. Daily Life in China from the Opium War to 1911. 3 Credits.
This course examines everyday life in China from the mid-19th century to the end of the last dynasty in 1911. The focus is on living conditions, social customs, and gender relations of people of all social levels, from emperors and empresses to servants, prostitutes, and concubines. Other topics include: the culture of drugs in the form of opium smoking, including how opium served as a key point of contact between China and the Euro-west; sexual culture, especially in the form of the history of prostitution and gender roles and values in China on the verge of modernity; interactions in daily life between Chinese and Westerners in
China; and the experience of China's last imperial rulers. These topics are weighed against the backdrop of the decline of China's last dynasty and the concurrent impact of Modernity in the form of social, political, and technological change, especially as effected by the intrusion of the Euro-west. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EALC 420. Prerequisite: An upper-level course on China or East Asia or consent of instructor.

EALC 725. Ancient China. 3 Credits.
A survey of ancient Chinese culture to the Qin period. Major archaeological discoveries and the literary tradition will be taken as the primary evidence through which a number of topics are introduced (for example: environment, food, writing, art, thought, ritual). A knowledge of Chinese is not required.

EALC 743. Contemporary Japanese Film. 3 Credits.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as FMS 743.)

EALC 790. Topics in East Asian Languages and Cultures: _____ 1-3 Credits.
Special topical courses covering a number of disciplines. Credit descriptions and prerequisites will vary. NOTE: May be repeated for up to 12 total credits.

EALC 801. Directed Readings. 1-5 Credits.
Designed to meet the needs of advanced students whose study in East Asian studies cannot be met with regular courses. Prerequisite: Consent of instructor.

EALC 899. Thesis. 1-6 Credits.
An inquiry into the source material upon a specific subject.

East Asian Languages&Cultures Courses

ECIV 104. Eastern Civilizations. 3 Credits. HL/NW H/W
This course acquaints the student with the broad outlines of the traditional cultures and literatures of East Asia, and explores the interaction between these regions and cultures as well as their continuities and disparities. Course materials include translations and discussions of original sources. The course is most appropriate for students with no background in Asian culture. Does not complete major requirement. Not open to students with credit in ECIV 104, see major advisor about completing the ECIV 304 major requirement.

ECIV 305. Eastern Civilizations Honors. 3 Credits. HL/NW H/W
An introductory course designed to acquaint the student with the broad outlines of the traditional cultures and literatures of East Asia. By reading translations of original source materials, the student is able to see the interaction among the various cultures as well as their essential continuity. The course is most appropriate for students without any background in Asian culture. Similar to ECIV 304, but reading and writing assignments reflect the fact that this is an honors course. Open only to students in the University Honors Program or by permission of instructor.

East Asian Languages&Cultures Courses

HNDI 110. Beginning Hindi I. 5 Credits. U F1
An introduction to modern standard Hindi that emphasizes acquisition of basic language skills (speaking, comprehension, reading and writing) through a combination of lecture, drill, and work with the Devanagari script.

HNDI 120. Beginning Hindi II. 5 Credits. U F2
A continuation of Beginning Hindi I that builds on basic skills of speaking and comprehension, and the writing and reading of the Devanagari script developed in Beginning Hindi I. Prerequisite: HNDI 110 or placement exam that establishes a level of proficiency in Hindi suited to Beginning Hindi II.

HNDI 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hungarian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

HNDI 210. Intermediate Hindi I. 3 Credits. U F3
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 120 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi I.

HNDI 220. Intermediate Hindi II. 3 Credits. U F4
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 210 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi II.

HNDI 301. Topics in Hindi Culture, Language and Literature: _____ 3 Credits. H
Investigation of special topics on Hindi culture, language and literature at the undergraduate level. May be repeated for credit when topic varies.

HNDI 310. Advanced Hindi I. 3 Credits. U FP
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 220 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi I.

HNDI 320. Advanced Hindi II. 3 Credits. U FP
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 310 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi II.

HNDI 593. Directed Study in Hindi Culture and Literature: _____ 1-3 Credits. H
This course is designed for students seeking proficiency in Hindi beyond HNDI 320. Instructor will direct the student through readings and materials in Hindi that will add to the students substantive knowledge of India and culture in the Hindi language. May be taken multiple semesters for credit with varying content. Prerequisite: HNDI 320, and consent of instructor.

East Asian Languages & Cultures Courses

JPN 100. Beginning Japanese I. 3 Credits. U
An introduction to Japanese. Familiarity with the basic structural patterns of the language through conversation is stressed. The hiragana and katakana syllabaries are introduced and a few characters are learned. Usually offered as part of a Summer Study Abroad Program.
JPN 101. Beginning Japanese II. 3 Credits. U
Continuation of JPN 100. Available to students who took JPN 100 as part of the Summer Study Abroad Program. Not available for credit for students who have previously completed JPN 104. Prerequisite: JPN 100 or equivalent.
JPN 104. Elementary Japanese I. 5 Credits. U F1
Three hours of lecture, three hours of drill per week. Acquisition of basic language skills (listening, speaking, reading, writing). Not available for credit for students who have previously completed JPN 101.
JPN 108. Elementary Japanese II. 5 Credits. U F2
Continuation of JPN 104. Prerequisite: JPN 101, JPN 104, or equivalent.
JPN 177. First Year Seminar: ____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Japanese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.
JPN 204. Intermediate Japanese I. 5 Credits. U F3
Three hours of lecture, three hours of drill. Prerequisite: JPN 108 or equivalent.
JPN 206. Intermediate Japanese Conversation. 2-4 Credits. U
Enhancement of conversational ability at the intermediate level. Used primarily to accommodate transfer credits. Prerequisite: JPN 204 or equivalent.
JPN 208. Intermediate Japanese II. 5 Credits. U F4
Continuation of JPN 204. Prerequisite: JPN 204.
JPN 226. Japanese in Context - Intermediate. 3 Credits. U
Supervised and individualized study and practice of language skills through direct experience in interviews and guided practical applications in various public settings in Japan. Some conventional classroom instruction in grammar included. Offered only during the Summer Institute in Hiratsuka, Japan. Prerequisite: Two semesters or the equivalent of Japanese language study.
JPN 233. Special Skills in Japanese: ____. 1-4 Credits. U
Instruction in special skills in Japanese, such as pronunciation, recognition of Chinese characters, comprehension of broadcast media, etc. at the freshman/sophomore level. Course work must be arranged through the office of KU Study Abroad and approved by the Department of East Asian Languages and Cultures. May be repeated for credit if content varies.
JPN 333. Special Skills in Japanese: ____. 1-4 Credits. U
Instruction in special skills in Japanese, such as recognition and writing of Chinese characters, comprehension of broadcast media, etc. at the junior/senior level. If part of a Study Abroad program, approval by the Department of East Asian Languages and Cultures is required. May be repeated for credit if content varies.

JPN 386. Advanced Japanese Conversation III. 1-3 Credits. U FP
Instruction in discussion in formal contexts and speech making. Prerequisite: JPN 504 or equivalent.
JPN 498. Directed Readings in Japanese. 1-4 Credits. H/W FP
Readings in Japanese on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor.
JPN 504. Advanced Modern Japanese I. 5 Credits. H/W FP
Readings in selected modern Japanese texts on various topics: history, education, society, and business. Includes oral discussion and written short essays. Meets five hours per week. Prerequisite: JPN 208 or equivalent.
JPN 508. Advanced Modern Japanese II. 5 Credits. H/W FP
Continuation of JPN 504. Prerequisite: JPN 504 or equivalent.
JPN 562. Modern Japanese Texts I. 3 Credits. H/W FP
Readings and interpretation of modern Japanese texts from various fields. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 762. Prerequisite: JPN 508.
JPN 564. Modern Japanese Texts II. 3 Credits. H/W FP
A continuation of JPN 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 764. Prerequisite: JPN 562 or equivalent.
JPN 598. Readings in: ____. 1-3 Credits. H/W FP
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: JPN 564 or permission of instructor.
JPN 690. Seminar in: ____. 1-3 Credits. H/W FP
Varying topics with varying prerequisites.
JPN 762. Modern Japanese Texts I. 3 Credits.
Readings and interpretation of modern Japanese texts from various fields. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 562. Prerequisite: JPN 508.
JPN 764. Modern Japanese Texts II. 3 Credits.
A continuation of JPN 762. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 564. Prerequisite: JPN 762 or equivalent.
JPN 801. Directed Readings and Research in Japanese. 1-4 Credits. FP
Advanced language training for the study of Japanese sources in the humanities or social science field of the student. Prerequisite: JPN 564 or consent of instructor.

East Asian Languages & Cultures Courses

KOR 100. Beginning Korean I. 3 Credits. U
Introduction to basic communication skills in Korean and Korean culture; Korean alphabet, survival Korean expressions, cultural etiquette and norms; speaking, listening, reading, and writing in basic Korean. Does not
fulfill College of Liberal Arts and Sciences foreign language requirements or department major and minor requirements.

KOR 101. Beginning Korean II. 3 Credits. U
Continuation of KOR 100. Basic communicative skills in Korean. Speaking, listening, reading, writing, and culture are equally emphasized throughout the course. Does not fulfill College of Liberal Arts and Sciences foreign language requirements or department major and minor requirements. Prerequisite: KOR 100 or equivalent.

KOR 104. Elementary Korean I. 5 Credits. U F1
Five hours of class and two hours of drill in the spoken language each week. Grammar and readings in selected texts.

KOR 108. Elementary Korean II. 5 Credits. U F2
Continuation of KOR 104. Prerequisite: KOR 104.

KOR 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Korean. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

KOR 204. Intermediate Korean I. 5 Credits. U F3
Five hours of class and two hours of spoken drill. Readings in selected texts in modern Korean. Prerequisite: KOR 108 or equivalent.

KOR 208. Intermediate Korean II. 5 Credits. U F4
Continuation of KOR 204. Prerequisite: KOR 204.

KOR 498. Directed Readings in Korean. 1-4 Credits. H/W FP
Readings in Korean on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor.

KOR 504. Advanced Modern Korean I. 5 Credits. H/W FP
Readings in discussion of selected modern Korean texts on various topics: history, literature, society, and language. Prerequisite: KOR 208 or equivalent.

KOR 508. Advanced Modern Korean II. 5 Credits. H/W FP
Readings in discussion of selected modern Korean texts from various fields. Includes oral discussion and written essays. Prerequisite: KOR 504 or equivalent.

KOR 562. Modern Korean Texts I. 3 Credits. H FP
Readings in discussion of selected texts in modern Korean. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in KOR 762. Prerequisite: KOR 508 or equivalent.

KOR 564. Modern Korean Texts II. 3 Credits. H FP
Continuation of KOR 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in KOR 564. Prerequisite: KOR 562 or equivalent.

KOR 798. Readings in: ______. 1-3 Credits.
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: KOR 564 or permission of instructor.

East Asian Languages & Cultures Courses

MONG 177. First Year Seminar: _____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Mongolian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

TIB 101. Elementary Tibetan I. 3 Credits. U F1
An introduction to the Tibetan language in both its literary and colloquial forms according to the Central Tibetan dialects. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 102. Elementary Tibetan II. 3 Credits. U F2
A continuation of TIB 101. Prerequisite: TIB 101 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 177. First Year Seminar: _____. 3 Credits. U
A limited enrollment, seminar course for first-time freshmen, addressing current issues in Tibetan. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

TIB 201. Intermediate Tibetan I. 3 Credits. U F3
Continuation of TIB 102. Prerequisite: TIB 102 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 202. Intermediate Tibetan II. 3 Credits. U F4
Continuation of TIB 201. Prerequisite: TIB 201 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement.

TIB 301. Advanced Tibetan I. 1-3 Credits. H
This course focuses on developing reading fluency in classical and modern Tibetan with continued practice in the spoken language as well. Prerequisite: Tibetan 202 or permission of the instructor.

TIB 302. Advanced Tibetan II. 1-3 Credits. H
This course focuses on more advanced reading fluency in classical and modern Tibetan with continued practice in the spoken language as well. Prerequisite: TIB 301 or permission of the instructor.

East Asian Languages & Cultures Courses

UYGR 101. Elementary Uyghur I. 3 Credits. U F1
Uyghur is an important Central Asian Turkic language spoken by nine million people in China. The first semester is designed to give the
student basic communicative competency, including pronunciation and intonation, structure, and syntax. Effective oral and written communication is stressed.

**UYGR 102.** Elementary Uyghur II. 3 Credits. U F2
Continuation of UYGR 101. Prerequisite: UYGR 101 or the equivalent.

**UYGR 177.** First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Uyghur. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**UYGR 201.** Intermediate Uyghur I. 3 Credits. U F3
Continuation of UYGR 102. Prerequisite: UYGR 102 or equivalent.

**UYGR 202.** Intermediate Uyghur II. 3 Credits. U F4
Continuation of UYGR 201. Prerequisite: UYGR 201 or equivalent.

**Economics Courses**

**ECON 104.** Introductory Economics. 4 Credits. SF S
An introduction to modern economics designed primarily for students who do not plan to major in economics. Topics include economic history, the operation of economic institutions, and the formation and execution of economics policies to meet the current problems of the domestic and international economy. Course may be offered in lecture or online format. Prerequisite: MATH 101 or MATH 104, or LAS 108, or eligibility for MATH 115 or MATH 116 or MATH 125.

**ECON 105.** Introductory Economics, Honors. 4 Credits. SF S
An introduction to modern economics designed primarily for students who do not plan to major in economics. Topics include economic history, the operation of economic institutions, and the formation and execution of economics policies to meet the current problems of the domestic and international economy. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 104, or eligibility for MATH 115 or MATH 116 or MATH 125. Open only to students who have been admitted to the University Honors Program, or by consent of instructor.

**ECON 110.** The Economics of Globalization. 3 Credits. SF S
The course emphasizes the application of economic methods of analysis to the public policy issues that globalization creates. Topics covered may include the following: winners and losers from trade; links between trade and labor markets; links between trade and foreign investment; the international financial system and exchange rates; outsourcing and multinational corporations; international institutions and regional trade agreements.

**ECON 142.** Principles of Microeconomics. 3 Credits. SF S
An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126.

**ECON 143.** Principles of Microeconomics, Honors. 3 Credits. SF S
An honors section of ECON 142. An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. Open only to students who have been admitted to the University Honors Program, or by consent of instructor.

**ECON 144.** Principles of Macroeconomics. 3 Credits. SF S
An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126.

**ECON 145.** Principles of Macroeconomics, Honors. 3 Credits. SF S
An honors section of ECON 144. An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. Open only to students who have been admitted to the University Honors Program, or by consent of instructor.

**ECON 177.** First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Economics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ECON 199.** Data I: Dealing with Data. 3 Credits. S
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as POLS 199, PSYC 199 and SOC 199.)

**ECON 250.** Study Abroad Topics in: _____ 1-5 Credits. S
This course is designed for the study of special topics in economics at the freshman/sophomore level. Coursework must be arranged by the office of KU Study Abroad and approved by the Economics Department. This course may be repeated for credit if content varies.

**ECON 310.** Topics in Applied Economics: _____ 3 Credits. S
(Topic, instructor, and specific prerequisites to be announced in the Schedule of Classes.) This course will focus on an area of applied economics of current interest. This course cannot be used to fulfill the elective course requirements for the Economics major or the Economics minor.

**ECON 315.** Income Distribution and Inequality. 3 Credits. S
An analysis of the distribution of income and wealth in the United States and a few other developed countries. The concepts of economic inequality, economic justice, statistical measures of inequality and their applications will be discussed. Various theories of income distribution (e.g., Ricardian, Marxian, neoclassical, and neo-Keynesian) will be covered. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 399.** Data 2: Foundations of Data Science. 3 Credits. S
Data science empowers its users to provide data-drive solutions to problems and questions in the world. This course provides foundational skill and knowledge behind this power. This knowledge and skill includes learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. (Same as POLS 399 and PSYC 399.) Prerequisite: PSYC 199/POLS 199/ECON 199 or EECS 138; and
PSYC 210 or MATH 365 or ECON 426 or POLS 306 or SOC 380 or MATH 101 or MATH 104 or MATH 115 or MATH 121.

**ECON 426. Statistics and Data Analysis for Economics. 3 Credits. S**
An introduction to probability and statistical methods for empirical work in economics. Probability, random variables, sampling, descriptive statistics, probability distributions, estimation hypothesis testing, introduction to the regression model. Prerequisite: MATH 115 or MATH 125.

**ECON 450. Study Abroad Topics in: _____. 1-5 Credits. S**
This course is designed for the study of special topics in economics at the junior/senior level. Coursework must be arranged by the office of KU Study Abroad, approved by the Economics Department, and may count as an economics elective for economics majors. This course may be repeated for credit if content varies.

**ECON 505. History of Economic Analysis. 3 Credits. S**
The history of intellectual efforts to understand economic phenomena and the impact of these efforts on the social and economic development of the modern world. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 510. Energy Economics. 3 Credits. S**
The application of basic economic concepts and methods to the analysis of energy markets, regulation, and policies. Topics covered include energy trends and projections, economic growth and resource exhaustion, the organization and regulation of fossil fuel industries, nuclear power and non-conventional energy technologies, the world oil market, energy conservation, environmental pollution, and national energy policies in the U.S. and other developed as well as developing countries. Prerequisite: ECON 142 or ECON 143.

**ECON 513. Behavioral Economics. 3 Credits. S**
Decisions link our thoughts to our actions and as a result define who we are and who people think we are. This makes decision making a fundamental life skill. But, can we make better decisions? This course will introduce you to the science of decision making that has developed as scholars including biologists, economists, mathematicians, philosophers, psychologists, and others have sought to answer this very question. Over the course of the semester we will examine what we have learned so far such as how people predict and mispredict events, how people make decisions and how their decisions can be quite irrational from one perspective but simultaneously appear quite reasonable, how people bargain and why they sometimes choose to cooperate and other times not, and why negotiating can be so difficult. (Same as PSYC 513.) Prerequisite: PSYC 104 or ECON 142; MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126.

**ECON 520. Microeconomics. 3 Credits. S**
The theory of consumption, production, pricing, and resource allocation. Not open for credit to students with credit in ECON 524. Prerequisite: ECON 142 or ECON 143; and MATH 115 or MATH 125.

**ECON 522. Macroeconomics. 3 Credits. S**
The theory of national income and employment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 144 or ECON 145; and MATH 115 or MATH 125.

**ECON 523. Macroeconomics Honors. 3 Credits. S**
The theory of national income and unemployment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 144 or ECON 145; and MATH 115 or MATH 125.

Open only to students who have been admitted to the University Honors Program, or by consent of instructor.

**ECON 526. Introduction to Econometrics. 3 Credits. S**
An introduction to the statistical analysis of economic data and its application to economic inquiry. Includes extensive use of statistical software. Prerequisite: MATH 115 or MATH 125; ECON 426, MATH 526, or EECS 461.

**ECON 535. Economic History of Europe. 3 Credits. S/W**
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as HIST 528.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 536. Economic Issues of the European Union. 3 Credits. S**
A survey of the economies of the European Union, with a focus on the economic development of the member states since World War II, and an examination of the various economic issues confronting them today. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 550. Environmental Economics. 3 Credits. U**
This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as EVRN 550.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 551. Philosophy of Economics. 3 Credits. HR**
This course surveys the central concepts, issues and debates surrounding the philosophy of economics. The course is divided into three parts. The first is focused on the nature of economic science, whether it can be separated from value judgments, along with the foundational and methodological issues that arise in economics. The second part of the course provides a survey of several central topics in the philosophy of economics including rational choice theory, game theory, social choice theory, behavioral and neuroeconomics. The third part concerns welfare economics (broadly understood), including the aims of welfare economics, the nature of well-being, the possibility of interpersonal utility comparisons, and the aims of economic institutional design. At the end of this course, students should have knowledge and understanding of central methodological and substantive debates regarding the nature of economic theories. This course should also enhance students’ ability to think critically and analytically about the nature of economic theories and the key concepts in the philosophy of economics, write clearly and cogently about philosophical issues that arise in economic, incorporate the ideas, theories and techniques that arise in both philosophy and economics to understand social and economic issues. (Same as PHIL 551.) Prerequisite: An introductory course in philosophy or economics, or permission of instructor.

**ECON 560. Economic Systems. 3 Credits. S**
Critical analysis of economic theories underlying such economic systems as capitalism, different types of socialism, communism, and fascism. Comparative study of economic planning, production, distribution, price formation, economic institutions, and forms of government in countries
under different economic systems. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 562. The Russian Economy. 3 Credits. S/W**
An analytical survey of Russian economic development, with emphasis on the structure and operation of the Russian economy and transition issues. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 563. Current Economic Issues of East Europe. 3 Credits. S**
An institutional and theoretical analysis of the issues arising from the transition from a command economy to a free market-oriented economy. With emphasis on the former Soviet Union, topics will include: assessment of the central planning experience; changes in property rights and their effect on resource allocation; market mechanisms and how they work when market institutions are at the formative stage; and public interest under privatization. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 564. Topics in Applied Economics: ______. 3 Credits. S**
This course will focus on an area of applied economics of current interest. This course can be used to fulfill the elective course requirement for the Economics major. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143 or ECON 144 or ECON 145 or ECON 426.

**ECON 582. Economic Development. 3 Credits. S**
An introduction to economic growth and development in high and low income countries, problems of development, and development policy. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143.

**ECON 584. Economic Development of Latin America. 3 Credits. S**
This course explores development strategies followed in the countries of Latin America and the Caribbean, and analyzes current debates over development strategy. Topics covered include: debt, structural adjustment, and multilateral lending agencies; trade policy, and regional or hemispheric integration; state intervention in the economy; the role of elites; environmental degradation and sustainable development; land reform and agricultural policy; transnational enterprises and foreign investment; women in work and the household; migration (rural-urban, and international); and grassroots development projects. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 586. Economic Issues in China. 3 Credits. S**
This course studies the Chinese economy, especially during the post-1979 reform period, and its relationship to the development of the Greater China Circle (China, Hong Kong, and Taiwan). Topics to be covered include economic development during the pre-1979 reform period, economic reform, and its impacts on China, Hong Kong, Taiwan, and lessons from the Chinese economic reforms. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 587. Economic Development of Africa. 3 Credits. S**
This course studies current economic issues facing African countries. It studies the general characteristics of several African economies and examines the impact of economic development policies, including those of international organizations, on the economies of Africa. Topics include poverty, income inequality, debt, foreign investment policies, trade policies, and government regimes. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

**ECON 590. Game Theory. 3 Credits. S**
Analysis of strategic choice problems. Firms, voters, bargainers, animals, sports competitors, and persons in everyday life choose alternative options with the outcomes depending on the choices of one or more other similar decision makers. Strategies of rational choices will be derived and analyzed in economic and other environments. Prerequisite: ECON 142 or ECON 143.

**ECON 597. Research in Economics. 1-3 Credits. S**
A directed reading and research course for economics majors. The course involves the preparation of a research paper under the supervision of a faculty member whose area of interest and specialization corresponds with the area of study selected by the student. Note that a maximum of 3 credits total of ECON 597 and ECON 697 can count for the elective requirements of any economics degree. Prerequisite: Completion of ECON 520 or ECON 522 or ECON 526, along with approval of the Director of Undergraduate Studies and selected faculty member.

**ECON 600. Money and Banking. 3 Credits. S**
The basic principles of money, credit, and banking and their relation to prices and business fluctuations; a study of commercial and central banking and the problems of credit control. Prerequisite: ECON 522 or ECON 523, and MATH 115 or MATH 125.

**ECON 604. International Trade. 3 Credits. S**
An introduction to the nonmonetary theory of international trade, the cause and pattern of trade, the gains from trade, and the contemporary issues in international economic policy. Prerequisite: ECON 520, and MATH 115 or MATH 125.

**ECON 605. International Finance. 3 Credits. S**
This course surveys theories of exchange rate and balance of payments determination. Included are the elasticity approach, Keynesian models, and the monetary approach. The mechanics of foreign exchange trading, balance of payments accounting, and the working of the international monetary system are also discussed. Prerequisite: ECON 522 or ECON 523, and MATH 115 or MATH 125.

**ECON 609. Sports Economics. 3 Credits. S**
The course covers the microeconomics of the sports industry. Topics include analysis of teams, leagues, players, incomes, strategies, history, and government policy. Prerequisite: ECON 520, and MATH 115 or MATH 125 or permission of instructor.

**ECON 610. Resource Economics and Environmental Policy. 3 Credits. S**
Survey of the economics of natural resources, designed to introduce the student to the economic models and analytical methods commonly used in natural resource problems and policy issues. Topics covered include environmental pollution and regulation, environmental case studies and applications of cost-benefit analysis, theoretical models, policy issues in the utilization of renewable and nonrenewable resources, sustainable development, and global environmental problems. Prerequisite: ECON 520, and MATH 115 or MATH 125 or permission of instructor.

**ECON 620. Elements of Mathematical Economics. 3 Credits. S**
Selected aspects of economic theory with emphasis on those parts where the spirit of mathematical analysis, rather than dexterity, is utilized. The simplification of the subject matter is accomplished by stressing complete treatment of special cases such as a two commodity-two individual world. Prerequisite: ECON 520; MATH 116 or MATH 126.

**ECON 622. Public Finance. 3 Credits. S**
A general introduction to the science of public finance. Topics covered include public expenditures, public revenues and public credit, and the shifting and incidence of taxation. Prerequisite: ECON 520, and MATH 115 or MATH 125.

**ECON 630. Industrial Organization and Antitrust Policy. 3 Credits. S**
An examination of the structure, conduct and performance of American industry applying the concepts and techniques of economic analysis.
popular statistical analysis package in the financial sector. Prerequisite: ECON 715 or ECON 716 or consent of instructor.

ECON 719. Digital Economics. 3 Credits.
The digitization of the economy is one of the most critical issues of our time. Digital technologies have transformed businesses and people's lives and will continue to do so in the future. This course studies digital economics and how the digital economy influences markets and society. Students will learn how the internet, mobile communications, the sharing economy, social media, blockchains, and cryptocurrencies impact global businesses. The course has two main parts: 1) Basic theory in digital economics, including network effects, value creation models, digital business models and market modeling; 2) How the digital economy influences privacy, regulations, and strategy. Through a combination of theoretical modeling and empirical evidence, the course will analyze key features of digital markets, including network effects, two-sided markets, search and matching, reputation systems, and the use of data. Attention will also be given to individual markets, such as search engines, e-commerce platforms, and the gig economy. Prerequisite: ECON 526 and ECON 700 or consent of instructor.

ECON 730. Topics in Industrial Organization. 3 Credits.
Advanced study of recent research in applied microeconomics and business behavior. Topics include vertical integration, collusion, multi-plant and multi-product operations, regulated industries, tying arrangements, and the empirical links between monopoly power and profitability. Prerequisite: ECON 630.

ECON 740. Theory of Economic Growth and Development. 3 Credits.
Advanced study of the theory of economic growth and development. Recent growth models, theory of underdevelopment, programming, policies and plans for development. Prerequisite: ECON 520 and ECON 522.

ECON 769. Financial Economics. 3 Credits.
An introduction to the economic analysis of choice under uncertainty and asset pricing theory. Topics include the general equilibrium Arrow-Debreu model of complete markets; capital asset pricing model; stochastic dominance; portfolio frontiers; mutual fund separation theorems; arbitrage pricing theory; valuation of derivative securities. Both single-period models and multi-period models will be discussed. Students should have some background in elementary linear algebra, calculus, and probability theory. Prerequisite: MATH 127; ECON 526 or MATH 526; MATH 290 recommended.

ECON 770. Economics of the Labor Market. 3 Credits.
A theoretical and empirical analysis of labor supply and demand, human capital, information and labor mobility, unemployment, discrimination, and union behavior and influence. Prerequisite: ECON 520; MATH 116 or MATH 126.

ECON 780. Topics in Economics: _____ . 1-3 Credits.
Selected topics in economics. Prerequisite: Consent of instructor.

ECON 790. Game Theory and Applications. 3 Credits.
This course covers basic game theory and applications. Topics covered include strategic games with complete information, Bayesian games (with incomplete information), extensive games with perfect information, and extensive games with imperfect information. Equilibrium concepts covered include Nash equilibrium, mixed-strategy Nash equilibrium, rationalizability, Bayesian Nash equilibrium, sub-game perfect Nash equilibrium, and sequential equilibrium. Depending on availability of time, additional topics may include strictly competitive games and repeated games. The course may include diverse applications such as in business strategy, auctions, voting, international trade, military conflicts, contracts, regulation, and industrial organization. Prerequisite: MATH 127; ECON 526 or MATH 526; MATH 290 recommended.

ECON 791. Game Theory and Applications II. 3 Credits.
This course is a continuation of game theory and applications (ECON 790). Topics may include rationality and common knowledge, multi-stage games and repeated games, coalitional games and the core, and sequential rationality, including possible applications such as signaling, reputation, and information transmission. Additional topics may include, among others, strictly competitive games, auctions, and evolutionary game theory. The course may include diverse applications within and outside economics. Prerequisite: ECON 790.

ECON 800. Optimization Techniques I. 3 Credits.
Economic models involving the maximization of a scalar (vector) function subject to equality and inequality constraint where the variables are in a finite dimensional Euclidean space. Characterization of optimal points by way of first and second order derivatives and by way of saddle points. Duality theorems of mathematical programming. Prerequisite: Consent of instructor.

ECON 801. Microeconomics I. 3 Credits.
An advanced course in price and distribution theory. Prerequisite: ECON 800 or consent of instructor.

ECON 802. Microeconomics II. 3 Credits.
The study of the operation of the economic system taking into account the diversity of goods and services. Primary attention is centered upon the competitive economy. A study is made of the existence, uniqueness, stability, and comparative statics of equilibrium positions. In addition, a study is made of ways of evaluating alternative states of the economy in terms of systems of value judgments. This includes a discussion of the Arrow Impossibility Theorem; the notion of a Pareto-satisfactory process is introduced and the relationship between Pareto-optimal states and competitive equilibrium positions is studied. Prerequisite: ECON 800 and ECON 801.

ECON 805. Teaching Methods in Economics. 3 Credits.
The goal of the course is to enhance undergraduate student learning by refining and expanding the teaching techniques in the teaching assistant's arsenal. The course starts by discussing and illustrating the importance of setting the tone on the first day of class. Then the course turns to ways of creating intellectually exciting lectures and discussion sections. Active learning comes next as the course presents techniques to involve actively the students in their learning experience. Then the course examines ways for recognizing and broadening our teaching styles to include different learning styles. The course also discusses the evaluation of students by emphasizing the importance of matching the assessment of students with course objectives. This course will not assume any prior teaching experience. Prerequisite: Consent of instructor.

ECON 806. Optimization Techniques II. 3 Credits.
Economic models involving the maximization of an integral (vector) function subject to differential equality (inequality), integral equality (inequality), and finite equality (inequality) constraints. Characterization of optimal paths by way of first and second derivatives. Existence of optimal paths. Prerequisite: Consent of instructor.

ECON 811. Macroeconomics II. 3 Credits.
A survey of basic macroeconomic models, including Classical and Keynesian as well as more recent ones. Topics also cover monetary and fiscal stabilization policies, the role of rational expectations, and basic behavioral equations. Tradeoffs of inflation and unemployment are examined both theoretically and empirically. Prerequisite: ECON 809 or consent of instructor.
Structure of dynamic models and intertemporal optimization. Monetary and real business cycle theories and long-run economic growth. Microeconomic foundations of macroeconomics, theories of explicit and implicit contracts, and implications of overlapping generations models. Prerequisite: ECON 810.

**ECON 816. Probability and Statistics. 3 Credits.**
Basic tools in probability theory, mathematical statistics, and stochastic optimization designed to provide Ph.D. students training in stochastic models useful for all fields in economics. Prerequisite: Ph.D. standing in economics or consent of instructor.

**ECON 817. Econometrics I. 3 Credits.**
An intensive study of the general linear model and distribution theory associated with the multivariate normal; stochastic difference equation; autocorrelation, errors in variables. Prerequisite: MATH 628.

**ECON 818. Econometrics II. 3 Credits.**
The study of estimation and hypothesis testing within the context of the stochastic simultaneous equations model. Prerequisite: ECON 817.

**ECON 825. Tutorial. 0 Credits.**
This course is designed to provide extra assistance for graduate students in economics.

**ECON 830. Game Theory and Industrial Organization. 3 Credits.**
A comprehensive introduction to game theory and the theory of industrial organization. Basic game theoretic equilibrium concepts will be discussed in the context of static games, games of incomplete information, and dynamic games. These concepts will be applied to the theory of industrial organization. Topics may include mechanism design, market failure, monopoly, imperfect competition and oligopoly, limit pricing, predatory pricing, innovation and technical change, advertising and signaling theory, collusion and coordination, regulation under incomplete information, agency and auditing problems, incentives in hierarchies, job market signaling, insurance markets, nonlinear pricing and monopoly, and bargaining and long term relations. Prerequisite: ECON 801 and 802.

**ECON 840. Microeconomic Issues in Development Economics. 3 Credits.**
This course will examine the process and policies of economic development from a microeconomic perspective. Selected topics may include: the use of input-output matrices in development planning; price controls and corrections for their allocative distortions; international trade policies; transformations from planned to market economies; labor markets and labor mobility; and capital markets and capital mobility.

**ECON 844. Macroeconomic Issues in Development Economics. 3 Credits.**
This course will examine the process and policies of economic development from a macroeconomic perspective. Topics will include the theory of growth in the dual economy, the role of foreign trade in economic development, inflation and stabilization in developing economies, the problem of foreign debt, the relationship between financial and real development, and various development policies. Prerequisite: ECON 810 or consent of instructor.

**ECON 851. The Theory of International Trade. 3 Credits.**
The study of the pure theory of international trade; factor-price equalization, trade and welfare, general equilibrium in the international economy, comparative statics, and stability conditions. Prerequisite: ECON 700 and ECON 701.

**ECON 854. Advanced Environmental Economic Theory. 3 Credits.**
This course covers advanced theoretical models used in the economic analysis of environmental issues. Students learn to apply the criteria of cost-effectiveness, efficiency, and social welfare to the evaluation of environmental policies. Topics explored in the course include market failures stemming from environmental externalities, emission standards, market-based policy instruments (e.g., taxes, subsidies, cap and trade), voluntary approaches, legal liability, and enforcement. Prerequisite: ECON 801 or consent of instructor.

**ECON 855. Natural Resources. 3 Credits.**
Advanced analysis of the economic relationships between natural resources, population, and environment. Emphasis is on the analytical techniques useful for solving the economic problems of natural resource allocation over time. Prerequisite: ECON 700.

**ECON 869. Advanced Financial Economics. 3 Credits.**
This course presents an analysis of financial markets and instruments, together with the quantitative tools essential for research in the field. The material will be presented in a discrete time setting and will stress the link between financial economics and equilibrium theory. Topics will include securities pricing in the absence of arbitrage, the theory of risk and utility in the basic portfolio problem, mean variance analysis and the CAPM, the Martingale properties of security prices, restricted participation, asymmetric information, and recent research results. Prerequisite: ECON 802 or consent of instructor.

**ECON 870. Applied Microeconomics. 3 Credits.**
This course introduces students to the data and empirical methods used in the fields of applied economics such as labor economics, public finance, and industrial organization. The course will focus on how to adjust for self-selection and identify causal relationships in applied microeconomic fields. Topics covered include economic data and statistical programming, instrumental variables, difference-in-differences, regression discontinuity, count data, sample selection, treatment effects, and duration models. Attention will be given to the suitability of the methods to the research question under consideration. Each topic will emphasize the proper application of the methods using the standard textbook treatment as well as assigned papers that examine the basic economic issues, the econometric techniques, and the applications to data. Prerequisite: ECON 817 and ECON 818, or consent of instructor. ECON 915 is recommended.

**ECON 880. Advanced Topics in Economic Theory: ____. 1-3 Credits.**
Selected topics in economics covered at an advanced level. Prerequisite: Consent of instructor.

**ECON 899. Master’s Thesis. 1-10 Credits.**

**ECON 901. Advanced Economic Theory I. 3 Credits.**
Advanced study of current general equilibrium analysis, the mathematical tools involved in such analysis, and some applications to other branches of economic theory. Prerequisite: ECON 802 and ECON 810.

**ECON 910. Economic Theory Seminar-Workshop. 1-3 Credits.**
This seminar-workshop is designed to study advanced research topics in the areas of microeconomic and macroeconomic theory, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in these areas of specialization.

**ECON 911. Applied Macroeconomics. 3 Credits.**
This course studies tools for applied macroeconomic research. It uses modern analytical methods to investigate economic theories. Econometric techniques to identify structure from time series data are emphasized. The goal is for each student to be able to use this toolkit to answer important macroeconomic questions. Prerequisite: ECON 810.

**ECON 912. Advanced Macroeconomics. 3 Credits.**
An analysis of economic policy in dynamic economic models. The effects of various policies on the equilibrium, stability, and adjustment paths of the models will be considered. Both open and closed economies will be analyzed. Prerequisite: ECON 810. MATH 320 is recommended.

ECON 913. Monetary Economics. 3 Credits.
This course examines how money, monetary policy, and monetary institutions influence the macroeconomy. Modern theories of money demand are presented and critiqued. The function of commercial banks, non-bank financial intermediaries, and central banks in the money supply process is addressed. Interrelationships between the tools, the instruments, the operating procedures, the intermediate targets, and the goals of policy are examined. Additional topics may include the monetary transmission mechanism, the effect of uncertainty on optimal policy decisions, the rules versus discretion debate, the monetary implications of fiscal policy, the term structure of interest rates, the causes and consequences of bank runs and financial panics, and the optimal method of constructing weighted monetary aggregates. Prerequisite: ECON 811 or consent of instructor.

ECON 914. Computational Methods for Economics. 3 Credits.
This is a course in the basic tools of numerical analysis that can be used to derive theoretical results from economic models without analytical solutions, to assess the quantitative implications of economic theory and to estimate statistical models. While most examples will come from macroeconomics and some from econometrics, the generality with which the techniques will be presented in this course will make them applicable to a wide range of fields like financial economics, marketing, and microeconomics. To enable the efficient application of numerical tools, this course endeavors to explain not only when and how to use various numerical algorithms but also how and why they work; in other words, the intention of the course is to open up some “black boxes” and provide the students with a versatile toolset. The course will cover numerical algorithms for large systems of equations, complicated optimization problems, functional approximation, numerical integration and simulation. The course will then focus on solving numerically differential equations and dynamic programming problems that do not have analytical solutions through iterative methods. Subsequent advanced topics will include efficient algorithms for diverse high-dimensional heterogeneous agent DSGE models, Bayesian estimation and inference, non-parametric estimation and network studies. Prerequisite: ECON 810, ECON 811, ECON 817, and ECON 818 or consent of instructor.

ECON 915. Advanced Econometrics I. 3 Credits.
The study of selected topics in applied cross-section econometrics for uses mainly in applied microeconomics, public finance, and labor economics. Topics include traditional econometrics of production and demand, latent variable models, panel data studies, probabilistic choice models, censored and truncated models, sample selection, disequilibrium models, duration studies, and semi- and non-parametric models. Prerequisite: ECON 818, or consent of instructor.

ECON 916. Advanced Econometrics II. 3 Credits.
A study of selected topics in applied time-series econometrics for use mainly in applied macroeconomics, international finance, and development economics. Topics include empirical applications of ARCH models, VAR models (study of impulse response function and variance decomposition), unit-root cointegration and long memory models. Bayesian unit root analysis, estimation and inference of dynamic general equilibrium models, model calibration and simulation are also possible topics of this course. Prerequisite: ECON 818, or consent of instructor.

ECON 917. Advanced Econometrics III. 3 Credits.
A study of structural and nonlinear time series approaches to econometric modeling and inference. The course emphasizes techniques needed to use economic theory in system-wide econometrics. Emphasis is placed on selection of functional form for approximation to theoretical functions and the use of duality theorems for derivation of the resulting econometric systems of equation. Inference with those models will be by nonlinear parametric, semi-parametric, and nonparametric methods. Prerequisite: ECON 818.

ECON 918. Financial Econometrics. 3 Credits.
This course is designed to provide a variety of new econometric tools useful to investigate financial data. It discusses how to measure and forecast financial volatility using models such as Stochastic Volatility, multivariate GARCH, and Dynamic Conditional Correlation models. It also covers Dynamic Factor models and State Space models, which can be used in many financial data analyses. The course will be particularly helpful for the students preparing dissertations in the field of finance, macro-finance, monetary economics, international finance, and development economics. It will also benefit the students interested in more practical use of tools in the field such as financial risk management, insurance, and commercial banking. Prerequisite: ECON 802 and ECON 818. ECON 916 is recommended.

ECON 919. Health Economics. 3 Credits.
An advanced course in the mathematical and graphical representations and classic and current literature in health economics. Students will be asked to read multiple academic papers per lecture. Topics will include measurement of health (height, infant mortality, life expectancy), health insurance, selection, Medicare, Medicaid, geographic variation, household finances, the Affordable Care Act, productivity of spending, international comparisons, health over the business cycle, hospitals, competition, physicians, nurses, health behaviors (alcohol, smoking, obesity, wellness), HIV/AIDS, pollution, malpractice, reproductive health, children, pharma, opioids, and machine learning. Prerequisite: ECON 802 and ECON 818. ECON 870 recommended.

ECON 940. Economic Seminar-Workshop in: ______. 1-3 Credits.
This seminar-workshop is designed to study advanced research topics in the specified area of applied economics (public finance, monetary analysis, environment-energy, economic growth and development, urban economics, health care economics, natural resources, labor-manpower, international trade and finance, comparative economic systems, Soviet economics), and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates with dissertations in a specific area of applied economics.

ECON 950. Special Problems in Economics. 1-3 Credits.
ECON 999. Doctoral Dissertation. 1-10 Credits.

English Courses
ENGL 100. Introduction to Literature. 3 Credits. H
An introduction to critical thinking skills through the study of works of literature drawn from a variety of genres and methods of critical inquiry. This course does not fulfill any KU writing requirement.

ENGL 101. Composition. 3 Credits. U
Instruction and practice in writing in a variety of rhetorical contexts, including academic ones.

ENGL 102. Critical Reading and Writing. 3 Credits. U
Builds upon the instruction in writing of ENGL 101, emphasizing critical thinking through careful, thoughtful reading and writing. Also instructs in the evaluation and use of secondary sources. Prerequisite: Completion of ENGL 101 or its equivalent, or an ACT score of 27-31, or an SAT score of 600-649, or an AP exam score of 3 on either the Literature and
Composition exam or the Language and Composition exam, or an IB score of 5.

**ENGL 105. Honors Introduction to English. 3 Credits. U**
Study of significant works of world literature. The primary aims are to develop reading and writing skills and to introduce the students to works of literature drawn from a variety of genres and historical periods. Prerequisite: An ACT score of 31-36, or an SAT score of 650 or higher, or an AP exam score of 3 on either the Literature and Composition exam or the Language and Composition exam, or membership in the University Honors Program, or by consent of the instructor.

**ENGL 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in English. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ENGL 199. Orientation to English Studies. 1 Credits. H**
Provides an overview of English Studies at the University of Kansas. Students learn about degree requirements and specializations; research, extracurricular, and study abroad opportunities; and career and internship options. Graded on a satisfactory/unsatisfactory basis.

**ENGL 200. Study Abroad Topics in: _____ 1-6 Credits. H**
This course is designed for the study of special topics in English. Coursework is completed through a KU study abroad program. Available only to KU study abroad participants. May be repeated for credit if content varies. Does NOT fulfill any part of the Freshman-Sophomore requirement.

**ENGL 203. Topics in Reading and Writing: _____ 3 Credits. H**
In-depth reading and writing on a significant topic, theme, or genre. Includes a variety of textual types or a range of historical periods. Continued practice in critical reading and writing. May include but will not be limited to writing in literary genres. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 205. Freshman-Sophomore Honors Proseminar: _____ 3 Credits. H**
Study of a major movement, topic, or theme in literature and culture. The primary aims are to further develop reading and writing skills and to consider significant cultural and artistic issues. Prerequisite: ENGL 105 or an AP exam score of 4 on either the Literature and Composition exam or the Language and Composition exam, or membership in the University Honors Program, or permission of instructor.

**ENGL 209. Introduction to Fiction. 3 Credits. H**
In-depth reading of and writing about prose fiction with emphasis on critical analysis of a variety of narrative types from different historical periods. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 210. Introduction to Poetry. 3 Credits. H**
In-depth reading of and writing about poetry with emphasis on critical analysis of a variety of forms and techniques used in poems from different historical periods. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 211. Introduction to the Drama. 3 Credits. H**
Study of plays selected to familiarize the student with dramatic masterpieces and with the drama as a literary type. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent.

**ENGL 220. Introduction to Creative Writing. 3 Credits. H**
In-depth reading and writing in multiple genres (e.g. poetry, fiction, creative nonfiction, playwriting). Creative assignments combine with critical analysis to help students identify, analyze, and employ forms and techniques across various genres, audiences, and contexts. Written assignments include creative works in multiple genres and critical responses to reading. Prerequisite: ENGL 101 and ENGL 102, or their equivalents.

**ENGL 300. Introduction to English Studies. 3 Credits. H**
An introduction to English Studies and its methods and areas, including literary studies, cultural studies, creative writing, rhetoric and composition, and language studies. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 301. Topics in British Literature to 1800: _____ 3 Credits. H**
Study of British literary works before 1800. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 302. Topics in British Literature Since 1800: _____ 3 Credits. H**
Study of British literary works since 1800. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 305. World Indigenous Literatures. 3 Credits. NW H**
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as EVRN 306 and GIST 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 306. Global Environmental Literature. 3 Credits. H**
An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as EVRN 306 and GIST 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 308. Introduction to Literary Criticism and Theory. 3 Credits. H**
Study of significant problems in literary interpretation and methodology, in which basic critical principles and approaches are systematically examined and applied. These approaches might include, but are not limited to, feminism, Marxism, deconstruction, psychoanalysis, and cultural studies. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 309. The British Novel. 3 Credits. HL H**
Study of five or more significant novels representative of developments in the British novel of the eighteenth, nineteenth, and twentieth centuries. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 310. Literary History I. 3 Credits. H**
A study of literature in English, including major forms and movements, from the medieval period to Romanticism. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 312. Major British Writers to 1800. 3 Credits. H Outstanding works of British literature, from the earliest times to the close of the eighteenth century, studied in chronological sequence and with some attention to the characteristics of the various periods of English literary history embraced. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 314. Major British Writers after 1800. 3 Credits. H Outstanding works of British literature, from 1800 to the present, studied in chronological sequence and with some attention to the characteristics of the various periods of English literary history embraced. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 315. Studies in British Literature. 3 Credits. HL H For students enrolled in the annual summer Study Abroad program, an interdisciplinary program conducted with other humanities departments. British literature is studied in the context of visits to relevant sites such as London, the Lake District, and Edinburgh. Prerequisite: Prior completion of the KU Core Written Communication requirement. Approval for enrollment in the Summer Institute through the Study Abroad office is required. Recommended: Prior completion of one 200-level English course.

ENGL 317. Topics in American Literature to 1865: . 3 Credits. H Study of American literary works before 1865. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 318. Topics in American Literature Since 1865: . 3 Credits. H Study of American literary works since 1865. Topics may focus on a particular genre, theme, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 320. American Literature I. 3 Credits. H From the beginnings to 1865, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 322. American Literature II. 3 Credits. H From 1865 to the present, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 323. Twentieth Century Literature and Culture. 3 Credits. H The study of British and American literature, emphasizing important figures and movements since World War I. On occasion, the study of literature will be enriched with an investigation of other arts, such as music, film, and painting. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 324. Contemporary Authors: . 3 Credits. H Study of one or more recent British and/or American authors. (Different authors in different semesters.) May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 325. Recent Popular Literature. 3 Credits. HL H Study of recent best sellers or other works of popular interest. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 326. Introduction to African Literature. 3 Credits. NW H/W Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention is paid to historical development and to traditional literature. (Same as AAAS 332.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 327. Studies in Twentieth-Century Drama: . 3 Credits. H A survey of major twentieth-century playwrights and theatre groups, to be selected by the instructor. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 328. Literature and Film: . 3 Credits. H The comparative study of the literary and film treatments of a particular topic or theme, with special attention to the generic qualities of literature and film. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 329. Topics in Forms and Genres: . 3 Credits. H An introductory study of a selected topic focused on a literary or rhetorical form or genre (e.g., Lyric Poetry, Captivity Narratives, Genre Theory). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 330. Literary History II. 3 Credits. H A study of literature in English, including major forms and movements, from the Romantics to the present. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 331. Chaucer. 3 Credits. H Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 332. Shakespeare. 3 Credits. H A study of ten to fourteen of Shakespeare's plays. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 334. Major Authors: . 3 Credits. H Study of one or two major British and/or American authors. Different authors in different semesters. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 336. Jewish American Literature and Culture. 3 Credits. H An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of
literary genres as well as folklore, music, film, and visual art. (Same as JWSH 336.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 337. Introduction to U.S. Latino/a Literature. 3 Credits. 
An introduction to the prominent works of African-American literature from the 18th century to the present as well as to the basic approaches to study and principles of this body of work, including its connection with African American, Puerto Rican, Cuban, Dominican, and Central/South American descent. Various genres, including oral forms such as corridos as well as novels, poetry, essays, and autobiographical writing, will be considered. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 338. Introduction to African-American Literature. 3 Credits. 
An introduction to prominent works of African-American literature from the 18th century to the present as well as to the basic approaches to study and principles of this body of work, including its connection with African American, Puerto Rican, Cuban, Dominican, and Central/South American descent. Various genres, including oral forms such as corridos as well as novels, poetry, essays, and autobiographical writing, will be considered. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 339. Introduction to Caribbean Literature. 3 Credits. 
Reading, analysis, and discussion of fiction, poetry, and drama from the Caribbean, including a small selection of Spanish, French, and Dutch Antillean works in translation. (Same as AAAS 333.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 340. Topics in U.S. Ethnic Literature: ____. 3 Credits. 
A study of literature by authors from one or more ethnic groups within the U.S., including but not limited to Asian American, African American, American Indian, Jewish American, Italian American, U.S. Latina/o. Different topics in different semesters. May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 341. American Literature of Social Justice. 3 Credits. 
An examination of U.S. literature that addresses situations of political and economic oppression or repression with the potential function of enlisting readers' sympathies in a project of social justice. The course focuses on U.S. literary texts dealing with social injustice and the curtailment of human and civil rights and addresses debates surrounding cultural authority and authenticity, identity politics, attempts to represent the voice of the "oppressed," revision of strategies used in slave narrative or in testimonio, and ethical and rhetorical appeals to an assumed readership. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 342. Topics in Transcultural Literature, Language, or Rhetoric: ____. 3 Credits. 
An introduction to a topic in the literatures, languages, or rhetorics of diverse cultural groups in the US or the world. A supermajority of the works considered were originally written in English. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 343. Black Feminist Theory. 3 Credits. 
This course will study the critical discourse produced by black female intellectuals, writers, and activists about their race, gender, sexual, and class identities. Students will explore black women's distinct positionality through an examination of their theory as well as their praxis from the nineteenth century to the contemporary moment. By tracing the evolution of black feminist thought, the class will explore black women's initiation of and engagement with political, social, and artistic conversations in various fields of scholarly inquiry including-but not limited to-literature, history, sociology, political science, and the law. (Same as AAAS 344 and WGSS 344.) Prerequisite: WGSS 101, AAAS 104, or prior completion of one 200-level English course.

ENGL 351. Fiction Writing I. 3 Credits. 
A study of narrative techniques and practice in the writing of fiction. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 352. Poetry Writing I. 3 Credits. 
A study of prosody and practice in the writing of verse. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 353. Screenwriting I. 3 Credits. 
An introduction to the practice of writing and evaluating scripts for film. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 354. Playwriting I. 3 Credits. 
An introduction to the practice of writing and evaluating scripts for stage. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 355. Nonfiction Writing I. 3 Credits. 
An introduction to the literary techniques of nonfiction and practice in the writing of one or more of the genre's subtypes, such as the personal essay, the familiar essay, the lyric essay, the memoir, nature writing, or travel writing. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 356. Topics in Writing: ____. 3 Credits. 
A writing course that helps students continue their writing practices at an advanced level, with a focus on particular varieties, purposes, audiences, media, or other issues in rhetorical writing. Topics vary (e.g., Writing for Social Action, Writing with Confidence, Writing Online, Writing for Style). May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 360. English Grammar. 3 Credits. 
A course in traditional English grammar for students who wish to understand and be able to analyze English sentence structure. Students might apply the course to studies of style (their own or other authors'), rhetorical analysis, literary interpretation, or teaching. This course may be offered in either lecture or online format. Prerequisite: Prior completion of one 200-level English course.

ENGL 362. Foundations of Technical Writing. 3 Credits. 
Introduces students to the principles of technical communication. Students learn to organize, develop, write, and revise various technical documents (e.g., letters, manuals, presentations, proposals, reports, resumes, websites) often needed in business, engineering and scientific settings. Includes an introduction to technical-writing software. This course fulfills the prerequisite for English 502 and English 564. Prerequisite: Prior completion of the KU Core Written Communication requirement.
ENGL 380. Introduction to Rhetoric and Composition. 3 Credits. 
Introduces students to rhetoric and composition, a field that investigates questions about the nature, processes, teaching and historical, social and cultural contexts of writing. Students survey the themes, debates, and trends that inform the work of scholars in this field. Students also become acquainted with the historical traditions of discourse instruction, and the relevance of those traditions to our current understandings of writing. Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 381. Topics in Rhetoric and Composition: ______. 3 Credits. 
An introductory study of a selected topic in rhetoric or writing studies (e.g., Multimodal Rhetoric, Rhetoric of Social Action, Teaching Writing). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 382. Composing Cultures. 3 Credits. 
In this course, we will explore how texts are culturally situated and will carry out our own investigations of a subculture. Through analysis of the rhetorical and social situations that motivate writing and ethnographic investigation of a culture's discursive interactions, we will explore how a group's purposes and actions are shaped by cultural contexts for writing. We will complete a range of related writing projects (an observation of a place/setting for a culture's interactions; an analysis of a culture's language or cultural artifacts; interviews with participants in a culture or oral histories), culminating in a longer field study or ethnography—a descriptive and analytical account of a culture or subculture. We will also critically read and respond to multiple interdisciplinary texts and genres, including ethnographies and overviews of ethnographic research methods. As we explore the cultural embeddedness of writing, we will focus, in particular, on the positioning of the researcher and the ethics of conducting cultural research. Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 383. Cultural Rhetorics. 3 Credits. 
In this course, we will engage in the interdisciplinary study of cultural rhetorics, which is an approach to rhetorical study that considers the role of cultural forces in shaping the rhetorical practices of individuals, communities, and politics. Emphasizing feminist, queer, critical race, and/or disability studies work in rhetorical studies, this course will focus on the following questions: How does rhetoric enable the functioning of power, oppression, and resistance? How are cultural, political, economic, and ideological notions of identity, of the body, and even of the human rhetorically constructed? What counts as rhetoric, and who gets to decide what is worthy of rhetorical study? How do rhetorics of space, place, home, diversity/identity, and the nation influence culture, politics, and institutions? Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 385. The Development of Modern English. 3 Credits. 
An introduction to the history of the English language, with special attention to general structural changes throughout its history, especially changes in vocabulary and meaning, and past influences of other languages upon present usage. Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 386. Language and Social Justice in the US. 3 Credits. 
In this course, we consider the social implications of using different varieties and dialects of the English language in the US. Questions covered may include (but are not limited to): different social characteristics attributed to different varieties (dialects, ethnolects, genderlects) and their users; features of language that carry stigma and how such stigma is socially and historically constructed; and the role of media (news outlets, movies, "the internet") in conveying what is seen as acceptable or unacceptable in language. We also explore how these language attitudes and evaluations impact different groups of people in their daily lives, and what possible recourses we have to address language injustice. As we discuss these issues, you will not only gain an understanding of the social nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 387. Introduction to the English Language. 3 Credits. 
A survey of the English language, its historical development, and its grammatical structure. Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 388. Topics in English Language Studies. 3 Credits. 
An introductory study of a selected topic in English language studies (e.g., World Englishes, Language and Literary Style, The Secret Life of English Words.) Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 389. Postcolonial and World Englishes. 3 Credits. 
In this course, we explore the complex landscape of varieties of English or Englishes around the world. We chart the history of English and its spread through colonization and through the cultural and economic influence of especially the US and the UK. We get a sense of the diversity of Englishes by focusing on a selection of countries from various continents (including Africa and Asia), looking at the linguistic characteristics of these Englishes as well as the attitudes towards the Englishes within and outside the countries. This survey of Englishes leads us to consider broader questions such as how people evaluate different Englishes, who "owns" English, and similar issues. As we discuss these topics, you will not only gain an understanding of the variable and changeable nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of the KU Core Written Communication requirement.

ENGL 390. Studies in: ______. 3 Credits. 
A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 400. Teaching and Tutoring Writing. 3 Credits. 
Students explore theories and strategies of teaching and tutoring writing across academic disciplines. They learn more about themselves as writers as they build a repertoire of writing techniques useful in their studies, in the workplace, and in their personal lives. By observing and consulting in the writing center, they understand how reflection leads to responsive, ethical, and engaged practice. (Same as LA&S 400.) Prerequisite: ENGL 102 or equivalent.

ENGL 466. Literature for Children. 3 Credits. 
Wide reading in the great literature of the past and present suitable for children: folktales and epics, mythology, modern fantasy, fiction, poetry. Emphasis on extending the student's background and developing critical judgment. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ENGL 479. The Literature of: ______. 3 Credits. 
A study of the literary treatment of a particular aspect of British and/or American society. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication
requirement. Recommended: Prior completion of one 200-level English course.

**ENGL 492. The London Review. 3 Credits.**
This class meets one day a week throughout the semester and includes a nine-day visit to London over the spring break period. Students spend the early part of the semester selecting special interests, researching places to visit and study, and exchanging information. After the trip, students compile and publish a journal entitled "The London Review", which is comprised of essays, photos, art work, and other reflections about their experience in London. Prerequisite: Admission to University Honors Program or permission of instructor.

**ENGL 494. Research Internship. 1-3 Credits.**
Practical research experience in English studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. May be used as a component of the Research Experience Program (REP). Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level English course, declaration of English major, and permission of instructor.

**ENGL 495. Directed Study: _____ 1-3 Credits.**
Work for advanced majors in fields or on topics not covered in course work. May be repeated for a total of up to six hours. Does not satisfy specific course requirements for the English major. May be counted as part of the total junior-senior credit hours required. Prerequisite: Completion of three junior-senior courses in English and consent of instructor.

**ENGL 496. Internship. 1-3 Credits.**
Practical experience in the use of English skills in supervised academic or professional settings. Credit hours are graded according to the written evaluation provided by the supervisor to the director. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level English course, declaration of English major, and permission of Undergraduate Director.

**ENGL 497. Service Learning Internship. 1-3 Credits.**
Practical experience in the use of English skills in a non-profit or advocacy context. Credit hours are graded according to the written evaluation provided by the on-site supervisor and on the student's written reflective component assigned and evaluated by the supervising faculty member. May be used as a component of the Service Learning certification program. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level English course, declaration of English major, and permission of instructor.

**ENGL 506. Science Fiction. 3 Credits.**
The development of science fiction as a literary genre, and as a literature of ideas for a future-oriented society. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 507. Science, Technology, and Society: Examining the Future through a Science-Fiction Lens. 3 Credits.**
Science and technology offer many benefits to individuals and to societies, yet they also present many challenges. This course explores the past, present, and possible future effects of science and technology on society through readings and discussions of nonfiction articles in conjunction with science-fiction stories and novels. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 508. Contemporary Literary Theory. 3 Credits.**
Study of selected works of literary theory and of current issues in literary studies. The course is designed for advanced undergraduates who intend to continue their study of literature in graduate school and for new graduate students who require a grounding in literary theory. According to each instructor's interest, the course may survey contemporary literary theory or may focus on a particular topic (e.g., authorship, canon formation, creativity, metaphor, narrative, rhetoric) or on a theoretical position (e.g., cultural studies, deconstruction, feminism, historicism, Marxism, psychoanalysis). A student may repeat the course with the permission of the appropriate director. Prerequisite: Completion of three junior-senior courses in English (or their equivalent) or graduate standing.

**ENGL 520. History of the Book. 3 Credits.**
Brief history of writing materials and handwritten books; history of printed books from the fifteenth century as part of cultural history; technical progress and aesthetic change. (Same as HIST 500.)

**ENGL 521. Advanced Topics in British Literature 1800: _____ 3 Credits.**
A Study of texts written before 1800. May be organized around a particular genre, historical period, a group of writers, or a theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 522. Advanced Topics in British Literature After 1800: _____ 3 Credits.**
A study of texts written after 1800. May be organized around a particular genre, historical period, group of writers, or a theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 525. Shakespeare: _____ 3 Credits.**
Intensive study of selected works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 530. Irish Literature and Culture: _____ 3 Credits.**
Study of topics in Irish literature and culture. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 534. Major Authors (Capstone): _____ 3 Credits.**
Study of one or two major authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

**ENGL 545. Methodologies in Digital Humanities, Honors. 3 Credits.**
This course addresses research possibilities and ongoing debates in the field of Digital Humanities. Students will examine how digital technologies and methodologies can enhance or suggest new modes of Humanities research. The course focuses on core topics in the field, including text analysis, data visualization, digital mapping, archiving and (digital) cultural studies. We will take a hands-on and critical approach to investigating the benefits and limitation of different digital methods. Course assignments will consist of blog posts and mini projects conducted throughout the semester. At the end of the semester, students will develop a proposal for a project that brings digital methodologies to bear on a research inquiry related to the student's discipline. No prior experience in digital work or technical skills required. Prerequisite: Instructor permission.

**ENGL 551. Fiction Writing II. 3 Credits.**
Continuation of ENGL 351. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 351 or equivalent.

**ENGL 552. Poetry Writing II. 3 Credits.**
Continuation of ENGL 352. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 352 or its equivalent.

**ENGL 553. Screenwriting II. 3 Credits.**
A continuation of ENGL 353. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 353 or its equivalent.

ENGL 554. Playwriting II. 3 Credits. H
A continuation of ENGL 354. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 354 or its equivalent.

ENGL 555. Nonfiction Writing II. 3 Credits. H
Continuation of ENGL 355. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 355 or its equivalent.

ENGL 560. British Literature of the 20th Century: ____. 3 Credits. H
Study of twentieth-century literary works. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 565. The Gothic Tradition. 3 Credits. H
This course explores and defines the Gothic tradition in British and American literature from its beginnings in the late eighteenth century to more recent twentieth-century texts in literature and film. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 567. Modern Drama: ____. 3 Credits. H
A study of American, British, or comparative drama from the late nineteenth century to the present. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 569. Modernism. 3 Credits. H
This course will explore some of the definitions, texts, and aesthetics associated with literary modernism, especially transatlantic modernism, as well as some of the writers and artists in dialogue with modernist approaches. Prerequisite: Prior completion of the freshman-sophomore English requirement or its equivalent.

ENGL 570. Topics in American Literature: ____. 3 Credits. H
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 572. Women and Literature: ____. 3 Credits. H
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 574. African American Literature: ____. 3 Credits. H
A study of the literature written by African Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of African American literature as well as on a critical analysis of major autobiographical, poetic, and fictional works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 576. Advanced Topics in American Literature to 1865: ____. 3 Credits. H
Study of American literary works before 1865. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 577. Advanced Topics in American Literature Since 1865: ____. 3 Credits. H
Study of American literary works after 1865. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 578. Poetry, 1900-1945. 3 Credits. H
A Study of English-language poetry of the early twentieth century. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 579. Poetry since 1945. 3 Credits. H
A study of English-language poetry from the mid-twentieth century to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 580. Rhetoric and Writing: ____. 3 Credits. H
A study of selected broad topics in rhetoric and writing, including such topics as the rhetoric of law, the rhetoric of education, persuasion in literature, literacy, and rhetorical genres. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 581. English Language Studies: ____. 3 Credits. H
A study of selected topics in English language studies (e.g. World Englishes, Language and Literary Style, and The Secret Life of English Words). May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 582. Multimedia/Multimodal Rhetorics. 3 Credits. H
Digital culture and new media have transformed reading, writing, and research practices, revealing the multidimensionality of texts, blurring the roles of writer and audience, and creating new spaces for dialogue, collaboration, and participation in rhetorical acts. In this course, we will apply rhetorical principles across a variety of media genres-from blogs, to YouTube videos, to podcasts, to Tweets, to Instagram and Facebook posts-and will address the complex realities and challenges of composing ethical, persuasive, and effective arguments in the 21st century. The course will explore how traditional processes of writing and reading texts are challenged by communication across a range of diverse new media genres that employ multiple modes of communication (linguistic, visual, spatial, gestural, and aural ways of making meaning). We will examine the impact of multimedia/multimodal discourse on ourselves and our culture, and through our analysis and production of multimodal texts, we will explore how medium and mode shape the message, work to persuade multiple audiences, and alter the way that we understand, structure, and process knowledge. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 586. Language and Style. 3 Credits. H
When we talk about a writer's style, or the style of a text or genre, what exactly do we mean? How do we identify, define, and analyze the elements that make up a style? What is it that makes us think that one style is "better" than another style? This is what we will explore in this course. We draw on a number of frameworks and theories from English language studies that can be used to discuss and analyze linguistic choices and strategies in texts; in other words, we will take apart the language of a text or writer (including your own!) in order to understand how it has been put together. As we approach language, text, and style from this perspective, you will not only gain an understanding of the flexible, yet structured nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of a 300- or 400-level English course.

ENGL 587. American English. 3 Credits. H
A study of the structure, history, and varieties of the English language in the United States from the period of colonization to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 590. Studies in: ____. 1-3 Credits. H
A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of the first-and-second-year English requirement or its equivalent, and at least one 300- or 400-level ENGL course; or permission of instructor.

ENGL 598. Honors Proseminar: _____ 3 Credits. H Directed reading and participation in small discussion groups, each formed to consider a specific and limited subject during the semester. Written work will be required, and will be judged on both content and form. The course is part of a departmental program leading to Honors in English. Prerequisite: Admission must be approved by the departmental director of undergraduate studies.

ENGL 599. Honors Essay. 3 Credits. H Independent study, culminating in a substantial essay prepared under the direction of a member of the Department of English who is a specialist in the area of the student's interest. Prerequisite: Admission must be approved by the departmental director of undergraduate studies.

ENGL 610. The Literature of England to 1500. 3 Credits. H A survey of the literature of medieval England (in translation). Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 620. Renaissance English Literature: _____ 3 Credits. H A broad view of literary works written between 1485 and 1660. Surveys may be offered with focus on a particular genre (poetry, drama, or prose), historical period (16th- or 17th-century literature), or group of authors (women writers). May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 633. Milton. 3 Credits. H A close reading of Paradise Lost, Paradise Regained, Samson Agonistes, and the minor poems, with illustrative selections of prose. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 640. British Literature, 1600-1800: _____ 3 Credits. H Study of literary works from the Restoration and eighteenth century. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 650. Romantic Literature: _____ 3 Credits. H Study of literary works from the British Romantic period. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 655. Victorian Literature: _____ 3 Credits. H Study of literary works from the Victorian period. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 674. African Literature: _____ 3 Credits. NW H An advanced study of a topic, genre, or area of written and/or oral African literature. Emphasis is placed on the critical analysis of major works, as well as their cultural and historical contexts. The course also addresses central critical and theoretical debates in the field. May be repeated for credit as the topic changes. Prerequisite: At least one 300- or 400-level English course, or permission of instructor.

ENGL 690. Studies in: _____ 3 Credits. H A study of a major topic of concern to English literature. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 709. Critical Theory: Problems and Principles: _____ 3 Credits. Study of a topic (such as mimesis, influence, deconstruction) that is important in critical theory. May be repeated for credit as topic varies.

ENGL 714. Middle English Literature. 3 Credits. Reading of selected works in Middle English (exclusive of the works of Chaucer).

ENGL 725. Shakespeare: _____ 3 Credits. Intensive study of selected plays. May be repeated for credit as the topic changes.

ENGL 730. Topics in Early Modern Literature: _____ 3 Credits. Intensive study of texts written between 1485 and 1800. The course may be organized around a particular genre (poetry, prose, drama), historical period (e.g. Elizabethan literature), a major author (e.g. Milton), group of authors (e.g. women writers), or theme (e.g. literature and politics 1660-1800). Students will be expected to read and apply relevant criticism and theory as well as study primary texts. May be repeated for credit as topic varies.

ENGL 750. British Literature of the19th Century: _____ 3 Credits. Intensive study of British literary works of the 1800s. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

ENGL 751. Fiction Writing III. 3 Credits. Practice in the writing of fiction under the direction of a member of the department working in conjunction with one or more writers in residence. Membership is limited to students who submit, well in advance enrollment, manuscripts showing unusual ability. May be repeated for credit.

ENGL 752. Poetry Writing III. 3 Credits. Practice in the writing of poetry under the direction of a member of the department working in conjunction with one or more writers in residence. Membership is limited to students who submit, well in advance enrollment, manuscripts showing unusual ability. May be repeated for credit.

ENGL 753. Writers Workshop. 3 Credits. An intensive course in writing prose fiction and/or verse. Criticism (NEW) of manuscripts through group meetings and individual conferences with the instructor. Membership limited to students who submit manuscripts showing special ability in at least one of the creative writing forms. May be repeated for credit.

ENGL 756. Forms: _____ 3 Credits. A study of literary works belonging to a particular genre or to multiple genres (fiction, nonfiction, poetry, drama etc), either in a particular form (short story, essay, sonnet, etc.), concerned with a particular topic, or illustrative of a particular element of craft (voice, point of view, character development, etc.). Intended primarily for creative-writing students with an interest in developing their skills at reading as writers. May be repeated for credit as the topic varies.

ENGL 757. Speculative Fiction Writing Workshop. 3 Credits. An intensive, 2-week course in writing speculative fiction, including genres such as slipstream, magical realism, fantasy, horror, and science fiction. The course is part of the Center for the Study of Science Fiction Summer Institute. Application period: January 1 - April 15. Application includes note to instructor expressing interest and one story. May be repeated for credit with instructor's permission.
ENGL 760. British Literature of the 20th Century: _____ 3 Credits.

Intensive study of British literary works written during the 20th century. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

ENGL 767. Studies in Modern Drama: _____ 3 Credits.

Reading of selected works in modern and contemporary drama. May be repeated for credit as the topic changes.

ENGL 770. Studies in Life Writing: _____ 3 Credits.

This course focuses on or surveys individual writers in the tradition of life writing; or intensively examines topics such as "Autobiography," "Memoir and Diary," "Biography," "Slave Narrative," "Letters," "Personal Essays," or "Autobiographical Fictions." Special emphasis within a topic, such as period, genre, or ethnicity, are possible. May be repeated for credit up to a maximum of six hours.

ENGL 774. Topics in Literatures of Africa and the African Diaspora: _____ 3 Credits.

An intensive study of the literatures of Africa and/or African diaspora (people of African descent dispersed around the world). This study will focus on the major characteristics of a particular period, genre, mode, and/or theme in literatures such as African, Caribbean, Afro-Brazilian, African American, African Canadian, Black British. Critical theories pertinent to writers and their work will be covered. Topics may include studies in drama, poetry, or the novel; migration narratives; literature of a particular era, such as the Harlem Renaissance, Negritude, or the Black Arts Movement; representations of gender, etc. As topics vary by semester, the course may be repeated for credit. (Same as AAS 774.)

ENGL 776. American Literature to 1900: _____ 3 Credits.

Intensive study of North American literary works before 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

ENGL 777. American Literature after 1900: _____ 3 Credits.

Intensive study of North American literary works after 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes.

ENGL 779. U.S. Poetries Since 1900: 3 Credits.

A colloquium for graduate students, sampling the range of poetries and poetics produced in the United States in the twentieth and twenty-first centuries.

ENGL 780. Composition Studies: 3 Credits.

This course surveys the field of composition studies, examining major issues and theories in the study of writing. The course may include theories from classical to contemporary rhetoric, composition theory from the twentieth century, and the most current debates in the study of writing.

ENGL 785. History of the English Language: 3 Credits.

Historical study of the phonology, morphology, syntax, vocabulary, and semantics of English; the relation between linguistic and cultural change.

ENGL 787. Modern English Grammar: 3 Credits.

A study of contemporary English: phonology, morphology, syntax, and usage. The emphasis is structural, but "traditional" grammar is referred to for contrast, example, and clarification.

ENGL 790. Studies in: _____ 3 Credits.

Examination of a significant topic in literature or the English language. May be repeated for credit as the topic varies.

ENGL 800. Methods, Theory, and Professionalism: 1-3 Credits.

Acquaintance with resources and practice in techniques that are essential to other graduate courses. Major concerns include the writing and documentation of scholarly papers; basic reference and bibliographical aids; critical approaches to literature and literary historiography; and the place of language and rhetoric in English studies today.

ENGL 801. Study and Teaching of Writing: 1-3 Credits.

A survey of major concepts and issues in the study of writing, especially as applied to teaching composition. Practices in writing pedagogy are also discussed, and students' teaching of composition is observed and explored. Required of and enrollment limited to new teachers of English 101. May not be repeated for credit toward graduate degree.

ENGL 802. Practicum in the Teaching of College English: 1 Credits.

A course concerned primarily with the pedagogy and practice of teaching English 102. Includes weekly group meetings, individual conferences, and class visitations. Required of and enrollment limited to new teachers of English 102. May not be repeated for credit toward graduate degree. Course graded on a satisfactory/unsatisfactory basis.

ENGL 880. Topics in Composition Studies and Rhetoric: _____ 3 Credits.

Examination of selected topics in composition and rhetoric, such as literary studies, genre theory, dialogism, or writing across the curriculum. May be repeated for credit as the topic changes. Prerequisite: ENGL 780 or equivalent.

ENGL 896. Internship: 1-3 Credits.

Practical experience under professional supervision with the Writing Center, in editing, in theatrical production, or other activities relevant to the completion of an advanced degree in English. Prerequisite: Permission of Director of Graduate Studies.

ENGL 897. Preparation for the M.A. Examination: 1-6 Credits.

An independent reading course for students preparing to take the M.A. examination. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of the Director of Graduate Studies.

ENGL 898. M.A. Portfolio: 1-6 Credits.

An independent reading and writing course for students preparing the M.A. portfolio. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of the Director of Graduate Studies.

An independent reading and writing course for students researching and writing the M.A./M.F.A. thesis. Graded on a satisfactory progress/limited progress/no progress basis.

ENGL 904. Seminar in Composition Theory: _____ 3 Credits.

Intensive study of one or more theoretical aspects of composition in English (e.g., rhetoric, text grammar, stylistics). Prerequisite: ENGL 800.

ENGL 905. Seminar in the English Language: _____ 3 Credits.

Close study of the English language in a particular period. Prerequisite: ENGL 800.

ENGL 908. Seminar in Literary Criticism: _____ 3 Credits.

Close study of one or more major critics, of a major critical school, or of a topic important in literary criticism. Prerequisite: ENGL 800.

ENGL 915. Seminar in Medieval English Literature: _____ 3 Credits.

Study may center on either Old or Middle English language and literature. Prerequisite: ENGL 800.

ENGL 920. Seminar in Renaissance English Literature: _____ 3 Credits.

Close study of one or two major authors or of a group of related works. Prerequisite: ENGL 800.
Concentrated study of one or two major figures, or a group of significant writers, or an aspect of the literary scene. Prerequisite: ENGL 800.

**ENGL 970. Seminar in American Literature:** ______. 3 Credits. Concentrated study of one or two authors or of historical periods or important movements. Prerequisite: ENGL 800.

**ENGL 974. Seminar in Literatures of Africa and the African Diaspora:** ______. 3 Credits. Advanced study in a topic related to literature, language, and cultures of Africa and the African Diaspora, such as a concentrated study of one or two authors, a group of significant writers, an historical period or important movement, or an aspect of the literary or cultural scene of Black writing. May be repeated for credit as the topic varies.

**ENGL 980. Seminar In:** ______. 3 Credits. Advanced study in a topic related to literature, language, theory, or a special skill such as analytical bibliography or editing. Prerequisite: ENGL 800.

**ENGL 997. Preparation for the Doctoral Examination.** 1-12 Credits. An independent reading course for students preparing to take the Ph.D. comprehensive examination. May normally be taken in the semester or summer session immediately preceding the semester in which the comprehensive examination is taken. Does not count toward the residence requirement. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of the Director of Graduate Studies.

**ENGL 998. Investigation and Conference:** ______. 1-6 Credits. Individual work in (a) language, (b) literature, (c) composition, or (d) the teaching of English, by properly qualified graduate students under the direction of appropriate members of the Graduate Faculty as assigned by the Graduate Director. Limited to 6 hours of credit toward the M.A. or Ph.D. degree; only on three-hour enrollment may substitute for a formal course in satisfying a field distribution requirement. Normally offered for only up to three credit hours in any one enrollment. Permission of the supervising faculty member and of the Graduate Director required for enrollment.

**ENGL 999. Doctoral Dissertation.** 1-12 Credits. Graded on a satisfactory progress/limited progress/no progress basis.

**Environmental Studies Courses**

**EVRN 103. Environment and History.** 3 Credits. H Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as HIST 103.)

**EVRN 142. Global Environment II: The Ecology of Human Civilization.** 3 Credits. U This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as GEOG 142 and HIST 142.)

**EVRN 144. Global Environment I: Discovery of Environmental Change.** Honors. 3 Credits. U LFE This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as GEOG 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor.

**EVRN 145. Global Environment II: The Ecology of Human Civilization, Honors.** 3 Credits. U LFE This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as GEOG 145 and HIST 145.) Open only to students admitted to the University Honors Program or by permission of instructor.

**EVRN 148. Scientific Principles of Environmental Studies.** 3 Credits. NB N This course provides the scientific knowledge necessary to understand the changing relationships between humans and the natural environment, with an emphasis on the assessment of current environmental problems and critical evaluation of potential solutions. Major topics include fundamental scientific concepts and principles, interactions among the biological and physical components of the environment, implications of a growing human population, water resources, the atmosphere, climate, and energy sources. (Same as GEOG 148.)

**EVRN 150. Environment, Culture and Society.** 3 Credits. SC S An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere, and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as GEOG 150.)

**EVRN 160. Environmental Solutions.** 1 Credits. N LFE
These labs are designed to explore the physical, social, and cultural dimensions of environmental systems. Students will engage in hands-on activities and field experiences about a range of current and historical environmental issues affecting both the United States and other parts of the world. This course will broaden your understanding of important foundational concepts and skills including basic scientific principles and processes that govern the functioning of environmental systems, ways to apply this understanding to case studies and field experiences, and how to use these perspectives to eventually make informed, just decisions about climate change, the future flourishing of humans and non-humans. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students with credit in EVRN 360/361. (Same as GEOG 160.) Prerequisite: This course requires previous or concurrent enrollment in EVRN 140/144 (or cross-listed and transfer equivalents).

EVRN 170. Introduction to Kansas Landscapes. 1 Credits. N
A course focused on the land and environment of Kansas. Field trips provide students with direct experience of the diverse landscapes in our area. Coursework also emphasizes the dynamic nature of the current landscape and the natural and cultural processes that have shaped it.

EVRN 171. Understanding Kansas Landscapes. 1 Credits. N
An introduction to the research methods used by scholars in diverse fields, applied to environmental issues introduced in EVRN 170. Prerequisite: EVRN 170.

EVRN 172. Kansas Landscape Projects. 1 Credits. N
Students participate in the design and execution of a simple research project focused on a local environmental topic. Prerequisite: EVRN 170, and EVRN 171.

EVRN 177. First Year Seminar: _____ . 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Environmental Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

EVRN 200. Study Abroad Topics In: _______. 1-5 Credits. U
This course is designed for the study of special topics in Environmental Studies. Coursework must be arranged through the Office of Study Abroad. May be repeated for credit if content varies.

EVRN 300. Geographic Adventures in Climate Change. 3 Credits. N
This course considers how climate change is altering particular things such as coffee and chocolate production, the electricity grid and nuclear energy, wild salmon and sharks, rare earth minerals and ice shelves, and many other aspects of life on earth. This course looks at how environmental processes and human systems interact at different spatial scales. This geographic framework is applied to a range of topics to assess climate change impacts as well as approaches to longstanding and emerging problems. Students will identify human systems (cultural, political, economic, justice, technology, etc.) and physical systems (biosphere, atmosphere, lithosphere, cryosphere, ecosystems, etc.). They will assess how human and environmental systems interact and the various spatial scales of these interactions. Students will analyze how climate change is interacting with these systems, their interactions, and spatial implications. Students will demonstrate critical thinking to create possible responses to specific contexts where human-environment interactions are altered by climate change and evaluate the impact of those responses. Student learning outcomes emphasize the demonstration of geographic systems thinking and critical analysis towards solution options. (Same as GEOG 300.)

EVRN 304. Environmental Conservation. 3 Credits. NE N
A survey of current methods of describing and modeling the function, structure, and productivity of natural and anthropogenically modified earth resource systems, along with a discussion of contemporary views of what constitutes a natural landscape. Fundamental natural science principles about the interplay among lithospheric, atmospheric, hydrosppheric, and biospheric components of earth systems are emphasized. Uses of natural resources, including fossil fuels, minerals, and water, are described with attention to the earth’s total energy budget. Human activities that affect preservation, conservation, and multiple uses of earth regions receive attention. Systems under stress through population and other contemporary forces serve as examples. (Same as GEOG 304.)

EVRN 306. Global Environmental Literature. 3 Credits. H
An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as ENGL 306 and GIST 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

EVRN 320. Environmental Policy Analysis. 3 Credits. N
An historical and analytical study of the formulation, implementation, and consequences of environmental policy in the United States. Attention will be directed at relevant interest groups, issues specific to both rural and urban populations, relationships between national policies and international organizations concerned with environmental problems. Prerequisite: EVRN 140/GEOG 140/HIST 140 or EVRN 142/GEOG 142/HIST 142; or EVRN 144/GEOG 144/HIST 144 or EVRN 145/GEOG 145/HIST 145; or EVRN 148/GEOG 148; or concurrent enrollment.

EVRN 330. Sculpture Intercepting the Waste Stream. 3 Credits. N
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art.) Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as SCUL 330.) Prerequisite: Visual Art major or minor, or instructor permission.

EVRN 332. Environmental Law. 3 Credits. U
An introduction to how the American legal process improves, transforms, and damages the natural environment. Emphasizes and compares shifting responsibilities of legal forces and institutions: judges and litigants, legislators and statutes, agencies and administrations, and citizens and regulated entities. Prerequisite: EVRN 140/GEOG 140/HIST 140 or EVRN 142/GEOG 142/HIST 142; or EVRN 144/GEOG 144/HIST 144 or EVRN 145/GEOG 145/HIST 145; or EVRN 148/GEOG 148; or concurrent enrollment.

EVRN 335. Introduction to Soil Geography. 4 Credits. N LFE
This course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body: genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between solid, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken EVRN 535 or GEOG 535. (Same as GEOG 335.)
Prerequisite: GEOG 104 or GEOL 101 or consent of instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended.

EVRN 336. Ethics, Ideas and Nature. 3 Credits. H
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics
include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state in managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and rights ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent to human-centered environmental ethics and nature-centered environmental ethics. (Same as HIST 336.)

**EVRN 338. Permaculture Design. 6 Credits. N**

Students learn how a local, sustainable design system known as permaculture design creates an ecologically sound and economically viable way of living. The course consists of lecture, field, and practicum sessions. Lecture topics include food security, permaculture ethics, ecological principles, system design, sustainable soils, food production, food forests, earth works, and construction of human habitats.

**EVRN 347. Environmental History of North America. 3 Credits. H**

A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialism, urbanization, and such technologies as the automobile and the origins of conservation. (Same as HIST 347.)

**EVRN 350. Global Environmental Justice. 3 Credits.**

Drawing on interdisciplinary fields of study, this course surveys a wide range of situated environmental injustices and environmental justice movements associated with toxic dumping, oil extraction and mining, climate change, deforestation, agri-business, and tourism. As students gain an understanding of the connections and differences among specific situations, and between environmental justice and other forms of environmentalism, they engage with salient theoretical and practical questions. The content of the course will also be shaped by the interests of students. For example, each student will present on an environmental justice movement of her/his own choosing, on the connections between it and other movements we have been studying, and on the ways this movement can help us understand some of the key practical and theoretical questions raised by environmental justice struggles. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in EVRN 650. Prerequisite: EVRN 140 or EVRN 142 or EVRN 144 or EVRN 145 or EVRN 336; or permission of instructor.

**EVRN 360. Environmental Solutions. 1 Credits. NE N LFE**

These labs are designed to explore the physical, social, and cultural dimensions of environmental systems. Students will engage in hands-on activities and field experiences about a range of current and historical environmental issues affecting both the United States and other parts of the world. This course will broaden your understanding of important foundational concepts and skills including basic scientific principles and processes that govern the functioning of environmental systems, ways to apply this understanding to case studies and field experiences, and how to use these perspectives to eventually make informed, just decisions about climate change, the future flourishing of humans and non-humans. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students with credit in EVRN 160. Prerequisite: This course requires previous or concurrent enrollment in EVRN 140/144 (or cross-listed and transfer equivalents).

**EVRN 361. Environmental Solutions, Honors. 1 Credits. NE N LFE**

These labs are designed to explore the physical, social, and cultural dimensions of environmental systems. Students will engage in hands-on activities and field experiences about a range of current and historical environmental issues affecting both the United States and other parts of the world. This course will broaden your understanding of important foundational concepts and skills including basic scientific principles and processes that govern the functioning of environmental systems, ways to apply this understanding to case studies and field experiences, and how to use these perspectives to eventually make informed, just decisions about climate change, the future flourishing of humans and non-humans. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students with credit in EVRN 160. Prerequisite: This course requires previous or concurrent enrollment in EVRN 140/144 (or cross-listed and transfer equivalents).

**EVRN 362. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N**

An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as SCUL 362.) Prerequisite: Visual Art major or minor, or instructor permission.

**EVRN 363. Introduction to Environmental Hydrology and Water Resources. 3 Credits. N**

Water is vital to life on earth. In this course we cover components of the water or "hydrologic" cycle, how management has altered them, and how they are predicted to change with the changing climate. We discuss the evolution of water policy, its implications for managements and the economic impact of human perturbation on water. We study the physical processes that govern the water cycle, learn how they are measured, and estimate hydrologic fluxes. (Same as GEOG 336.) Prerequisite: GEOG 104 or GEOL 101.

**EVRN 365. Invention of the Tropics. 3 Credits. H**

This course surveys the history of the tropical environment and its diverse peoples from early European encounters until the current boom in extractivism and ecotourism. It focuses on portrayals of the tropics in historical travel accounts and films. Through these sources, we will seek to understand cross-cultural interactions, and the ways in which science, technology, and tourism have reconstructed these environments over time. Case studies are drawn from Latin America, Africa, Oceania, and/or Asia. (Same as HIST 365.)

**EVRN 371. Environmental Geopolitics. 3 Credits. S**

This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as GEOG 371 and GIST 371.)

**EVRN 372. Religion and the Environment in the United States. 3 Credits. HR H**

This class examines the variety of ways religious and environmental attitudes intersect in US culture, and how religious traditions can be (and have been) used both to alienate people from the environment and to foster an ethic of environmental responsibility. The course will focus on appreciating the diversity within and across religious traditions when it comes to attitudes on the environment, and understanding the different contexts and assumptions that lead to such diversity. Amidst all this diversity, similarities will also be noted in how people from all different backgrounds are drawing on the resources of their religious traditions to promote more sustainable ways of being. (Same as REL 372.)

**EVRN 374. Vulnerability and Adaptation. 3 Credits. S**
The course objective is to understand and analyze human adaptation to environmental change by focusing on disasters and climate change. Each semester, the course rotates topics ranging from oil spills, hurricanes, sea-level rise to infectious disease. It provides undergraduate students with research experience and service learning, and offers opportunities for certificates through the Center for Undergraduate Research and the Center for Civic and Service Responsibility at KU. Students learn theories relevant to the case study, work in groups to generate research themes, conduct literature search and review, learn research methods, and write and present their work.

EVRN 375. Radical Environmentalism in the United States. 3 Credits. H
This course will focus on the historical context of radical environmentalism in late-twentieth-century America, including an examination of organizations such as Earth First!, but it will also focus more broadly on American ideas in the 1900s that contributed to the rise of a dissident environmental consciousness. It will focus primarily, though not solely, on the period after World War II, and it will examine time periods such as the Cold War, the countercultural 1960s, and so-called "environmental decade of the 1970s," and the Reagan 80s and beyond. It will touch upon many themes, such as the relationship between science, technology, and ethics; the controversies over population growth and economic growth; the morality or immorality of economically and politically destructive environmental actions; the philosophical underpinnings of radical animal rights organizations; and the place of people of color and the poor within the radical environmentalist tradition.

EVRN 377. Resilient and Resistant Futures: Global Perspectives in Climate Change Literature. 3 Credits. H
Climate change presents a contemporary crisis that literature, broadly defined, increasingly grapples with, and so much so, that scholars now refer to "cli-fi," or literature that examines the impacts of human-caused climate change during the Anthropocene. These impacts will be experienced disproportionately, and the social inequalities that will continue to ensue raise questions about justice and responsibility. In this class, we will examine novels, films, short stories, and non-fiction essays that offer global perspectives on the climate crisis. The texts use narrative techniques to shape our conceptions of global warming and just or unjust futures. We will address debates surrounding ethical human-non-human interactions and will reflect on the social and geopolitical conflicts that are heightened by climate change.

EVRN 384. Environment, Power, and Justice. 3 Credits.
This course is focused on the relationships between human beings and the planet (the environment, resources, places). We explore the major insights of sociology (primarily how to understand power and inequity) and apply them to our relationship with climate change, environmental justice, water, land, soil, food, viruses, animals, each other, and the future. Using the concept of the sociological imagination that connected one’s biography with one’s historical and class context as a starting point, this course expands C. Wright Mills’ foundational insight to incorporate both the background knowledge of environmental relationships between society and the planet. This course also builds a research skillset to understand, debate, and develop them at the same time. Skill-building assignments develop research skills related to library searching, research question formation, assessing and using valid sources, sociological observation, interviewing, and data analysis. Combined with a diverse set of readings, we explore the social, cultural, political, legal, and ethical debates that shape the contemporary and unfolding environmental issues. Topics may include environmental justice, environmental social movements, science communication, sustainability, biodiversity, environmental ethics, policy, land use change, and greenwashing. (Same as SOC 384.)

EVRN 385. Environmental Social Problems. 3 Credits. S
This course introduces key concepts in environmental sociology. The core goal of environmental sociology is to understand the relationship between society and the planet. Environmental sociology explores the relationships between social systems and the ecosphere, including interdisciplinary work that explores interactions within and between institutions, social groups, and natural and built environments. Environmental Sociology also includes study of the origins and impacts of technology, the social causes of environmental change, the environmental causes of social change, and the consequences of social inequalities and power relationships for socio-environmental dynamics. As human beings we live in the natural world and use its resources including the air, soil and water, yet we often separate ourselves from nature. Environmental sociology opens a dialogue between people and nature that will be explored through readings, discussion and assignments related to important environmental issues in Kansas and beyond, including climate change, energy production and consumption, material inequality, environmental justice, transportation, food and agriculture, and ethical frameworks. In particular this course uses sociological theory and sociological environmental research to illuminate the identification, evolution, and potential solution pathways to environmental social problems. (Same as SOC 385.)

EVRN 386. Sociology of Global Food. 3 Credits. U
The Sociology of Global Food offers a critical examination of the global food system since the Industrial Revolution. Topics include the industrialization of agriculture, sustainable agriculture, and the role of food and agriculture in organizing society. This course discusses the emergence of current debates around food and agriculture including food activism, technological developments, human/environment relationships, and labor issues. There is a lab component to this course. (Same as SOC 386.) Prerequisite: Junior standing.

EVRN 390. Disaster and Culture. 3 Credits.
This class explores representations of environmental disasters within various forms of cultural expression. Cultural beliefs and practices not only influence the ways environmental disasters are understood and responded to, but also shape the social dynamics that determine a population's vulnerability and resilience to hazards. Thus, while an earthquake may trigger a disaster, its impact largely will be influenced by social factors that pre-date the actual seismic event. The course will apply cultural materials (e.g., film, science writing, literature, policy statements, etc.) that emerge from specific case studies to analyze the social causes and effects of disaster, while drawing on an interdisciplinary set of tools and perspectives (from sociology, literary studies, science, economics, etc.) that animates inquiry.

EVRN 400. Study Abroad Topics in: ____. 1-5 Credits. U
This course is designed for the study of special topics in Environmental Studies. Coursework must be arranged through the Office of Study Abroad. May be repeated for credit if content varies.

EVRN 405. Kansas Power. 3 Credits.
Where does our energy come from? How can we optimize our use of renewable and nonrenewable sources of energy? What are the drivers moving us to more renewable sources of energy? What are the impediments? In this course we will explore the use of fossil fuels, nuclear, wind, geothermal and solar energy in Kansas. We will visit nearby power plants, and alternative energy companies. Students will be expected to design an energy plan for a local entity, and present their ideas. Prerequisite: EVRN 140 and EVRN 142.
EVRN 410. Environmental Applications of Geographic Information Systems. 3 Credits. N
An introduction to the use, display, and analysis of spatial data. Students will acquire a foundational skill-set in geographic information systems and remote sensing using industry-standard GIS software and will apply these skills using environmental data and case studies. Prerequisite: EVRN 148 or GEOG 148; EVRN 103 or HIST 103, EVRN 150 or GEOG 150 or EVRN 347 or HIST 347.

EVRN 412. Ecology: Fundamentals and Applications. 3 Credits.
An introduction to the principles of ecology, with an emphasis on environmental applications. Major topics include physiological and functional ecology, population and community dynamics, biogeography, and ecosystems ecology. Intended for students seeking B.A. or B.G.S. degrees. Prerequisite: EVRN 140 or EVRN 144 or EVRN 148 or consent of the instructor.

EVRN 414. Principles of Ecology. 3 Credits. N
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as BIOL 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

EVRN 420. Topics in Environmental Studies: ______. 1-6 Credits. N LFE
Courses on special topics in Environmental Science and/or Policy. These courses may be lecture, discussions, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once.

EVRN 440. Soil Science for Environmental Assessment. 3 Credits. NE N
This course provides students with a solid understanding of soils in the environment, particularly as it relates to environmental assessment. Topics include soil geomorphology, soil physics/chemistry/biology, management of soils, and soil contaminants. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 740. Prerequisite: CHEM 130 or CHEM 170 or CHEM 190 recommended or consent of the instructor.

EVRN 445. Introduction to Environmental Health. 3 Credits.
This course is designed to provide a foundation for understanding how the natural and built environment affect human health in industrialized and developing countries by examining the impact of physical, chemical, and biological factors external to humans. Students will gain an understanding of the interaction of individuals and communities with the environment, the potential impact on health of environmental agents, and specific applications of concepts of environmental health. (Same as HSCI 445.)

EVRN 450. Epidemics, Pandemics, and Pestilence. 3 Credits.
This course examines origins, responses, and consequences of major epidemics and pandemics that have affected humanity over time. Spanning from antiquity to present day, this global survey investigates environmental and biological origins of disease, the role of commerce, urbanization, and transportation in the spread of disease, and responses to controlling disease and pandemics. Key diseases and epidemics covered include plague, smallpox, malaria, cholera, influenza, typhus, typhoid, leprosy, and tuberculosis. (Same as HSCI 450.)

EVRN 451. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 451 and GEOG 451.)

EVRN 453. Community Resilience. 3 Credits.
This applied research course approaches resilience from a community and regional perspective. Defined broadly and proactively, resilience integrates and mutually-strengthens natural and human systems to capitalize on nature’s regenerative potential. Resilient communities can stand against nature in times of crisis, adapt to changing conditions, and are more efficient, livable, prosperous, and sustainable. Students will identify resilience approaches through directed readings, case study research, and presentations by subject matter experts. Teams will then survey and prioritize the challenges and opportunities facing real-world communities, apply and expand a resilience framework to grade the communities, and develop a screening-level resilience plan for community use. In doing so, students will: 1) Understand and apply resilience concepts and theories; 2) Identify and prioritize natural and human-made threats and challenges facing Great Plains and Midwestern U.S. communities over short- and long-term horizons; 3) Assess community capital stocks and resilience properties; 4) Compile research on resilient communities and develop tools and strategies; 5) Engage key community stakeholders; and 6) Develop and apply a vulnerability assessment and resilience framework for real-world application. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to freshmen or sophomores, or students with credit in EVRN 753.

EVRN 460. Field Ecology. 3 Credits. N LFE
An introduction to research methods for environmental science. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). It emphasizes the development of skills in data analysis and interpretation that are essential to a full understanding of environmental issues. Enrollment limited to environmental studies majors, or by instructor permission. Prerequisite: Junior or Senior standing, completion of the natural sciences requirement of the KU Core (GE3N), and either EVRN 320 or EVRN 332.

EVRN 490. Environmental Studies Internship. 1-4 Credits. N
Supervised practical experience in a specific environmental area of interest. The instructor will schedule regular meetings to evaluate progress and provide assistance. A written summary of the internship experience and an evaluation will be prepared by the student and internship supervisor. The summary and evaluation will be based on an initial description of the scope, expectations, and educational goals of the internship, as agreed upon by the student, supervisor and instructor. At least 45 hours of internship work during the semester is required for each credit hour enrolled. Prerequisite: Sophomore standing and consent of the instructor. Restricted to declared Environmental Studies majors.

EVRN 491. Capstone Internship. 3 Credits. N
Supervised practical experience in an environmental area relevant to the student’s career goals. The internship must include opportunity to apply knowledge and skills from diverse disciplines, and require a minimum of 150 hours of work during the semester. At the start of the semester the student will work with the internship supervisor and instructor to prepare a written description of the expectations and educational goals of the internship. Course assignments will be individualized, designed to be relevant to the internship and the student’s learning goals. The instructor will schedule regular meetings to evaluate progress. At the end, the student will prepare a written reflection on their experience and the supervisor will be asked to provide an evaluation of the student’s
internship performance. Prerequisite: Junior standing and consent of program director. Restricted to declared Environmental Studies majors.

**EVRN 498. Kansas Road Trip. 1 Credits.**
Kansas Road Trip (Part 1 of the Kansas Abroad Program) will allow students to explore the state as an environmental studies “living laboratory.” This course provides an immersive and hands-on look at the state’s reliance on environmental resources, creative and entrepreneurial solutions, and space for students to develop research skills related to Kansas’ environmental future. The trip will include visit with key decision makers and innovators and explore unique environmental features. With an emphasis on urban and rural relationships and the story of how soil and water lead to wealth in Kansas, the Kansas Abroad program offers students a chance to explore and encounter differences within the state and leverage those experiences into knowledge. Students will build skills in interviewing, listening and developing research questions on the future of Kansas, and the role people in shaping it. Prerequisite: EVRN 140 and 142 or equivalents and a full academic year as an EVRN major.

**EVRN 499. Kansas Environmental Futures. 2 Credits.**
Kansas Environmental Futures (Part 2 of the Kansas Abroad Program) asks: What will the future of Kansas’ environment look like? To that end, this course (following the completion of the two-week road trip) offers a research-based experience where students select a specific environmental theme to research for the semester. The project concludes with a written document and public presentation. Students will develop research and interviewing skills, expertise in an interdisciplinary environmental topic, public presentation skills, and demonstrate capstone-level integration of diverse kinds of evidence into a coherent argument related to their topic. With an emphasis on urban and rural relationships and the story of how soil and water lead to wealth in Kansas, the Kansas Abroad program offers students a chance to explore and encounter differences within the state and leverage those experiences into knowledge. Students will build skills in interviewing, listening and developing research questions on the future of Kansas, and the role of people in shaping it. Prerequisite: EVRN 498.

**EVRN 510. Advanced Environmental Applications in Geospatial Techniques. 3 Credits. H/N**
This course focuses on applying advanced geospatial mapping and analysis techniques to “real-world” environmental issues. Course content may include lecture/lab time on advanced geospatial topics: a major class project, small-group projects, or individual projects; or half-semester internships with state agencies or campus entities that will culminate in an individual project. The specific nature of projects will be driven largely by student interest and ability, as well as agency/center needs. Prerequisite: EVRN 410 or equivalent course; or permission of the instructor.

**EVRN 528. Environmental Justice and Public Policy. 3 Credits. S**
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several different public policy areas that have been impacted by the environmental justice movement; hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as POLS 528.) Prerequisite: POLS 306, or a statistics class, or consent of instructor.

**EVRN 530. Biodiversity Discovery and Assessment. 2 Credits. N**
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as BIOL 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

**EVRN 531. Tropical Fieldwork in Biodiversity Discovery. 1 Credits. U**
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as BIOL 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged.

**EVRN 535. Soil Geography. 4 Credits. N LFE**
A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as GEOG 535.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended.

**EVRN 536. Environmental Remote Sensing. 3 Credits. NE**
Covers fundamentals of remote sensing, including electromagnetic radiation principles and data collection and processing, followed by an introduction to the various remote sensing techniques and their application in understanding and managing environmental systems. Exercises are provided for students to be actively involved in evaluating, critically analyzing and interpreting images and data to determine implications for practice. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 736. Prerequisite: Junior or Senior standing.

**EVRN 537. Water Resource Sustainability. 3 Credits. NE**
Provides a framework for learning about our water future and ways we might define and achieve sustainability in water use and management. Concerns of ethics, culture, economics, politics, and environmental health will be discussed within the contexts of issues such as the global water crisis, water footprints, water pollution, human water systems, water security, and sustainable water technologies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 737. Prerequisite: Junior/senior standing.

**EVRN 540. Echydology. 3 Credits. N**
Echydology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key concepts, methodological approaches and analytical techniques utilized in echydology to understand and quantify: plant water use, evolution of hydrologic properties, groundwater-surface water interactions, controls on landscape patterns, spatial and temporal patterns of soil moisture and nutrient concentrations, and vegetation competition. Students should leave the class having developed critical skills in: 1) reviewing scientific literature, 2) collecting environmental samples, 3) analyzing echydological data, 4) writing a scientific research paper, 5) working collaboratively and independently. (Same as GEOG 540.) Prerequisite: GEOG 104 or GEOL 101 or EVRN 363 or GEOG 336 or permission of instructor.
EVRN 542. Ethnobotany. 3 Credits. S
Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as ANTH 582 and ISP 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor.

EVRN 543. Natural Hazards and Environmental Risks. 3 Credits. NE
This course investigates the geophysical processes of the earth-atmospheric system that can create disastrous impacts on human life, society, and economics. Hazards, including earthquakes, tsunamis, floods, hurricanes, mass movements, wildfires, and many others, are examined by analyzing spatial and temporal dynamics as well as any precursory indicators that may be present. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 743. Prerequisite: Junior/senior standing.

EVRN 545. Advanced Environmental Health. 3 Credits.
This course will build upon principles acquired in the introductory course by presenting advanced concepts on environmental health as novel factors that may constitute a risk to humans. The course provides an advanced understanding of concepts and issues of environmental health, including environmental toxicology and risk assessment, and an in-depth study of urban and rural environmental health issues and agents of environmental health impairment. Students will develop a research project or investigation of an environmental health topic. (Same as HSCI 545.) Prerequisite: EVRN 445 or EVRN 445 or consent of instructor.

EVRN 550. Environmental Economics. 3 Credits. U
This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as ECON 550.) Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143.

EVRN 555. Energy and Environment. 3 Credits. NE
This interdisciplinary course provides students with a broad understanding of the current energy system, including its challenges, with focus on changing global energy needs, current energy sources, developing and emerging renewable energy sources, and their economic, environmental, and societal implications. Analysis of energy fundamentals, fossil fuel exploration and use, nuclear energy, renewable energy sources, and subsequent environmental impacts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 755. Prerequisite: Junior/senior standing.

EVRN 553. U.S. Environmental Thought in the 20th Century. 3 Credits. H
Explores both leading and dissident ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as HIST 563.) Prerequisite: EVRN 148 or HIST 129, or by permission of instructor.

EVRN 577. The Andean World. 3 Credits. H
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as HIST 577, ISP 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

EVRN 611. Water Quality, Land Use, and Watershed Ecosystems. 3 Credits. N
Water quality issues are integrated with land use planning and the development of watershed management strategies. Interrelationships among the hydrologic cycle, atmospheric deposition, nutrient transformations and pesticide use are examined in regards to stream, lake, and groundwater quality. Prerequisite: CHEM 110 or CHEM 130 and BIOL 414, or consent of instructor.

EVRN 615. Capstone Project. 3 Credits. N
The capstone project provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their environmental studies major. It rejoins the cohort that has separately pursued the BA/BGS and BS tracks and places them in situations in which they address real world environmental issues with a team approach and produce professionally meaningful analytical reports. Prerequisite: Junior standing; EVRN 320, EVRN 332, and EVRN 460. Restricted to declared Environmental Studies majors.

EVRN 616. Environmental Impact Assessment. 3 Credits. N
This course provides an overview of environmental laws and regulations. Additional focus is given to the process described in the National Environmental Policy Act (NEPA). Students will learn when NEPA is triggered, the difference between Environmental Impact Statements (EIS) and Environmental Assessments (EIA), and how to write an EIS/EIA. Prerequisite: EVRN 616. Prerequisite: An introductory course in environmental law, or consent of instructor.

EVRN 620. Environmental Politics and Policy. 3 Credits. S
Analysis of environmental politics and the formulation and implementation of environmental policy. Examines the history and development of environmental policies as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as POLS 624.)

EVRN 624. Independent Study. 1-9 Credits. N
A research course, in any of the fields of environmental studies, consisting of either experimental research, original policy analysis, or the preparation of an extensive paper based on library investigation. Project topic to be
agreed upon in advance with supervising faculty member. Prerequisite: Consent of instructor.

EVRN 625. Honors Research in Environmental Studies. 3 Credits. N
A course giving eligible majors the opportunity to earn Departmental Honors by engaging in an intensive program of study leading to an original piece of research. Prerequisite: Senior standing, approval of the Environmental Studies Program, the Honors Project Director, and an overall 3.25 cumulative grade point average during the semester of enrollment. Restricted to declared Environmental Studies majors.

EVRN 628. The Politics of Public Health. 3 Credits. S
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation’s public health, explore the role of government in reducing risk and promoting wellbeing, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as POLS 628.) Prerequisite: POLS 110 and POLS 306 are recommended.

EVRN 630. Sculpture Intercepting the Waste Stream. 3 Credits. N
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art.) Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as SCUL 630.) Prerequisite: Graduate standing or permission of instructor.

EVRN 640. Natural Resource Management from an Indigenous Perspective. 3 Credits.
The purpose of this course is to provide students with a solid understanding of how crucial the management of natural resources is, with emphasis on Indigenous communities. Indigenous communities are often ignored in such courses even though these peoples have distinctive views of how resources should be managed. This course allows students to focus on case studies and philosophical principles that compare management techniques derived from European based science with those derived from the cultural traditions and beliefs of Indigenous peoples and communities. Prerequisite: EVRN 140 and EVRN 142; or EVRN 144 and EVRN 145.

EVRN 645. Native and Western Views of Nature. 3 Credits.
This course emphasizes comparison of the attitudes and perspectives towards the natural world that have been developed by different cultural traditions. The primary example with which most of us are familiar is the contemporary Western attitude which emerges from traditions derived from Western European philosophy, i.e. the assumption that humans are autonomous from, and in control of, the natural world. A different approach is presented by Traditional Ecological Knowledge (TEK) of Indigenous peoples of the world, which are based on close observation of nature and natural phenomena; combined with a concept of community membership, which differs from that of Western political and social thought. Prerequisite: EVRN 140 and EVRN 142; or EVRN 144 and EVRN 145.

EVRN 650. Global Environmental Justice. 3 Credits.
Drawing on interdisciplinary fields of study, this course surveys a wide range of situated environmental injustices and environmental justice movements associated with toxic dumping, oil extraction and mining, climate change, deforestation, agri-business, and tourism. As students gain an understanding of the connections and differences among specific situations, and between environmental justice and other forms of environmentalism, they engage with salient theoretical and practical questions. The content of the course will also be shaped by the interests of students. For example, each student will present on an environmental justice movement of her/his own choosing, on the connections between it and other movements we have been studying, and on the ways this movement can help us understand some of the key practical and theoretical questions raised by environmental justice struggle. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in EVRN 350. Prerequisite: EVRN 140 or EVRN 142 or EVRN 144 or EVRN 145 or EVRN 336; or permission of instructor.

EVRN 660. Summer Field Ecology. 3 Credits. N
An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as BIOL 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N).

EVRN 662. Art and Ecology: Inhabiting the Ecosphere. 3 Credits. N
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as SCUL 662.) Prerequisite: Graduate standing or permission of instructor.

EVRN 673. Environmental Justice. 3 Credits. NW U
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping, and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. (Same as ISP 673.) Prerequisite: Permission of instructor.

EVRN 700. The Anthropocene: Interdisciplinary Perspectives on Environmental Change. 3 Credits.
Have human activities become so pervasive that we have initiated a unique human epoch of earth history? This introductory, interdisciplinary graduate seminar will explore this question while examining the ways that different disciplines approach the understanding of environmental change, its impact on natural and human systems, and how these understandings have changed over time.

EVRN 701. Climate Change, Ecological Change and Social Change. 3 Credits.
This interdisciplinary graduate seminar examines the history of climate change from natural and physical science, social science, and humanities perspectives. The class explores the ways that different disciplines approach understanding climate change and its impact on natural and human systems and how these understandings have changed over time. The course is team-taught. Students will write a research paper on a climate change topic of their choice that reflects the historical and interdisciplinary approaches of the seminar. Prerequisite: Consent of instructor.

EVRN 720. Topics in Environmental Studies. 1-6 Credits.
Courses on special topics in Environmental Studies. These courses may be lecture, seminars, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once.

EVRN 721. Environmental Regulation and Policy. 3 Credits.
This course provides a survey of the environmental regulations, environmental problems, and environmental solutions that must be dealt with by environmental scientists in agencies and industry. Considers both theoretical and practical/applied aspects of environmental practices.

EVRN 725. Environmental Security. 3 Credits.
This course examines environmental issues, concerns, and policy as they relate to security through the framework of geopolitics. National security and conflict are increasingly discussed in relation to the environment, such as concerns regarding environmental change as well as stresses and demands on natural resources, e.g., water, energy, deforestation, desertification. The course will examine key contributions to the environmental security, resource conflicts, climate security and related literatures.

EVRN 730. Environmental Toxicology. 3 Credits.
Examines the effects of toxic chemicals on individuals, populations, communities and ecosystems. Topics include major classes of pollutants, movement, distribution and fate of pollutants in the environment, mechanisms of action, toxicity testing, and environmental assessment.

EVRN 735. Scientific Communication. 3 Credits.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as BIOL 735.)

EVRN 736. Environmental Remote Sensing. 3 Credits.
Covers fundamentals of remote sensing, including electromagnetic radiation principles and data collection and processing, followed by an introduction to the various remote sensing techniques and their application in understanding and managing environmental systems. Exercises are provided for students to be actively involved in evaluating, critically analyzing and interpreting images and data to determine implications for practice. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 536. Prerequisite: Graduate standing.

EVRN 737. Water Resource Sustainability. 3 Credits.
Provides a framework for learning about our water future and ways we might define and achieve sustainability in water use and management. Concerns of ethics, culture, economics, politics, and environmental health will be discussed within the contexts of issues such as the global water crisis, water footprints, water pollution, human water systems, water security, and sustainable water technologies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 537. Prerequisite: Graduate standing.

EVRN 740. Soil Science for Environmental Assessment. 3 Credits.
Provides students with a solid understanding of soils in the environment, particularly as it relates to environmental assessment. Topics include soil geomorphology, soil physics/chemistry/biology, management of soils, and soil contaminants. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 440. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor.

EVRN 743. Natural Hazards and Environmental Risks. 3 Credits.
This course investigates the geophysical processes of the earth-atmospheric system that can create disastrous impacts on human life, society, and economics. Hazards, including earthquakes, tsunamis, floods, hurricanes, mass movements, wildfires, and many others, are examined by analyzing spatial and temporal dynamics as well as any precursory indicators that may be present. Attention is also given to management and mitigation strategies. Case studies are utilized to examine interaction between society and natural hazards. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 543. Prerequisite: Graduate standing.

EVRN 745. Environmental Data Analysis and Statistics. 3 Credits.
Survey of common statistical methods for analyzing environmental data. Includes techniques for environmental monitoring, impact assessment, and site reclamation, as well as methods for handling censored data, time series, and spatial analysis. Sampling design, data interpretation, and presentation of statistical results will be emphasized. Prior coursework or practical experience in statistics is expected. Prerequisite: Permission of instructor.

EVRN 747. Fluvial Geomorphology. 3 Credits.
This course develops an understanding of the research processes as applied to river systems by means of qualitative and quantitative research methods and approaches to solve problems. Applications of fluvial principles to river management and stream restoration are examined, as well as interactions between land use and geomorphic processes. Prerequisite: Graduate standing.

EVRN 748. Wetland Delineation. 3 Credits.
This course provides training in the technical guidelines for the wetland delineation process as specified by the United States Army Corp of Engineers (USACE). This process includes a site investigation to determine field indicators of hydrophytic vegetation, wetland hydrology, and hydric soils for wetland determination and delineation, and the compilation of data and site mapping to create a wetland delineation technical report. Students must find an accessible wetland area near their location for the site visits that are required for this course. Prerequisite: Graduate standing or consent of the instructor.

EVRN 750. Environmental Air Quality Assessment. 3 Credits.
Addresses scientific, regulatory, and technical aspects of air quality monitoring, including pollutant formation and dispersion, pollution control, national emissions standards, and methods for monitoring pollutants and air quality. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor.

EVRN 751. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 759 and GEOG 759.)

EVRN 753. Community Resilience. 3 Credits.
This applied research course approaches resilience from a community and regional perspective. Defined broadly and proactively, resilience integrates and mutually strengthens natural and human systems to capitalize on nature’s regenerative potential. Resilient communities can stand against nature in times of crisis, adapt to changing conditions, and are more efficient, livable, prosperous, and sustainable. Students will identify resilience approaches through directed readings, case study research, and presentations by subject matter experts. Teams will then
survey and prioritize the challenges and opportunities facing real-world communities, apply and expand a resilience framework to grade the communities, and develop a screening-level resilience plan for community use. In doing so, students will: 1) Understand and apply resilience concepts and theories; 2) Identify and prioritize natural and human-made threats and challenges affecting Great Plains and Midwestern U.S. communities over short- and long-term horizons; 3) Assess community capital stocks and resilience properties; 4) Compile research on resilient communities and develop tools and strategies; 5) Engage key community stakeholders; and 6) Develop and apply a vulnerability assessment and resilience framework for real-world application. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to freshmen or sophomores, or students with credit in EVRN 453.

EVRN 755. Energy and Environment. 3 Credits.
This interdisciplinary course provides students with a broad understanding of the current energy system, including its challenges, with focus on changing global energy needs, current energy sources, developing and emerging renewable energy sources, and their economic, environmental, and societal implications. Analysis of energy fundamentals, fossil fuel exploration and use, nuclear energy, renewable energy sources, and subsequent environmental impacts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 555.

EVRN 760. Soil Ecology & Restoration. 3 Credits.
This course reviews the scientific principles of environmental restoration, focusing on soil biological processes. It introduces concepts of soil ecosystem structure and functions, including soil biodiversity, nutrient cycling, plant-soil interactions, and soil ecosystem response to disturbance and degradation. The understanding of processes in the soil system will be used to inform our review of practices that can be used to restore naturally and anthropogenically disturbed sites in a wide range of environments. Prerequisite: Graduate standing or consent of the instructor.

EVRN 814. Professional Science Masters Environmental Assessment Capstone I. 1 Credits.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, or an internship or similar individual project for full-time students or students who are not employed in the area of study. This course will initiate the process of project development and will be taken prior to a student's final semester. This project is to be continued in EVRN 815 in the last semester of the student's graduate career. Prerequisite: Minimum 20 credit hours completed in program.

EVRN 815. Professional Science Masters Environmental Assessment Capstone II. 2 Credits.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, an internship or similar individual project for full-time students or students who are not employed in the area of study. The students will compile their project results in a formal written report and will give an oral presentation to the Environmental Studies faculty (2 minimum) and the student's employer or mentor. Prerequisite: EVRN 814.

EVRN 915. Capstone. 3 Credits.
The goal of this research seminar is to discuss individual students' research, culminating in the completion of a paper in Environmental Studies for presentation at a professional meeting and/or publication in a professional journal.

Film and Media Studies Courses
FMS 100. Introduction to Film and Media. 3 Credits. HL H
An introduction to analyzing and thinking critically about film and other media. Students will learn to read and interpret the basic signs, syntaxes, and structures of cinematic language. Through direct analysis of selected films, television, and new media, students will evaluate and construct evidentiary arguments about the aesthetic strategies creators use to make meaning for audiences. In addition, this course will familiarize students with the historical and industrial dimensions of film and media, as well as the influence technology has on their development into the twenty-first century.

FMS 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Film and Media Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

FMS 200. Film and Media Aesthetics. 3 Credits. HL H
An introduction to film and media aesthetics, including basic film/media theories and their practical applications. Students will be introduced to the concepts of time, space, composition, movement, editing, light, color, and sound. A key feature of the course will be a practical emphasis on learning how to see creatively by applying elements of design, camera lens and sound recording principles. Examples of these aspects of film and associated media will be examined and discussed in depth. Should be taken before or concurrently with FMS 275.

FMS 204. Study Abroad Topics in: ______. 1-6 Credits. H
This course is designed for the study of special topics in Film at the freshman/sophomore level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

FMS 273. Basic Screenwriting. 3 Credits. H
An introduction to the craft and principles of screenwriting, from inspiration to writing a complete first act. Emphasis on factors relevant to the creation of a treatment and a screenplay. Prerequisite: Consent of instructor.

FMS 275. Basic Video Production. 4 Credits. H
Theory and practice of video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. Lecture-laboratory. Prerequisite: FMS 100, completion of or concurrent enrollment in FMS 200.

FMS 302. Undergraduate Studies Seminar in: ______. 1-3 Credits. H
Course organized any given semester to examine a particular studies topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

FMS 303. Undergraduate Production Seminar in: ______. 1-3 Credits. H
Course organized any given semester to study a particular production topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

FMS 304. Study Abroad Topics in: ______. 1-6 Credits. H
This course is designed for the study of special topics in Film at the junior/senior level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**FMS 307. Undergraduate Film/Media Internship. 1-6 Credits. H**

Supervised study with an approved film/media company or project. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Prerequisite: Consent of instructor and at least seven hours credit in the department.

**FMS 310. History of the Silent Film. 3 Credits. H**

A survey of the artistic, economic, and sociological development of the narrative cinema with emphasis on the American studio system, German Expressionism, and Soviet Expressive Realism. Analysis of selected films.

**FMS 311. History of the American Sound Film. 3 Credits. HL H**

A study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television. Analysis of selected films.

**FMS 312. History of the International Sound Film to 1950. 3 Credits. H**

**FMS 313. History of the International Sound Film Post 1950. 3 Credits. H**

A survey of the artistic, economic, and sociological development of the international sound film from 1950 to the present. Emphasis on Free Cinema, New Wave, and other emerging post-war cinemas.

**FMS 314. History of African-American Images in Film. 3 Credits. HL H**

A history and critical assessment of the diverse images of African-Americans in American cinema and the impact of those images on American society. Screenings of feature and independent films, including those by African-Americans.

**FMS 315. Survey of Japanese Film. 3 Credits. NW H**

This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, Survey of Japanese Film introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this institution shapes gender, class, ethnic, and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and film style over the last century. Through secondary readings, lectures, and discussions students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 315.)

**FMS 316. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Credits. H**

This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression during dictatorship, globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity, immigration and identity in contemporary cinema. Other themes in common are financing issues, such as co-production agreements, film production under the regional trade pact Mercosur and issues of circulation, distribution and marketing of national films. Most films will be feature length narrative, but a few documentaries will be shown. May be taken as FMS 716, but with additional requirements.

**FMS 318. Anti-war Film. 3 Credits. H**

An overview and exploration of the history of anti-war film and media themes to show how attitudes regarding war and political policy can be affected by positive and negative depictions of conflict. Course includes analysis of selected films.

**FMS 322. Soviet and Post-Soviet Russian Cinema. 3 Credits. H**

A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. (Same as SLAV 322.)

**FMS 323. War and Memory in Asian Film. 3 Credits. H**

This course explores how the film industries of key East Asian nations have constructed, reimagined, debated, and commemorated their experiences of the major wars fought during the 20th century (i.e. The Greater East Asian War, the Chinese Civil War, the Korean War, and the Vietnam War). We will examine the intersection of various historical, political, cultural, and economic factors with the production of mainstream commercial film to consider how individual and collective memories of wars in Asia have transformed over time in different contexts. Films are particularly useful for examining how the cultural memory of wars survives and is conveyed from one era to another with each new generation reinventing and superimposing new layers of memory on the original phenomenon from a range of multiple perspectives. A central goal of this course is to provide students with various historical perspectives, cultural contexts, and analytical methods to develop your ability to apply visual literacy and critical thinking skills to contemporary Asian films about the major wars of the last century.

**FMS 330. Cinematic Rome. 3 Credits. H**

A study of cinematic representations of daily life, diversity, urban landscape, and social and political issues in modern and contemporary Rome as presented in different genres. Taught in English. (Same as ITAL 330.)

**FMS 331. Mafia Movies. 3 Credits. H**

This course investigates representations of the Italian mafia in Italian and American cinema since the 1960s, placing emphasis on conventions of the gangster genre and its evolution. We will examine films in relation to their socio-historical contexts and special attention will be dedicated to Italian films that deglamorize the Italian mafia and champion the anti-mafia struggle. Taught in English. (Same as ITAL 331.)

**FMS 345. New Media and Society. 3 Credits. H**

Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in research-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key research skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level.
FMS 350. Indigenous Film and Media. 3 Credits. H
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum—including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 750 or ISP 755. (Same as ISP 355.)

FMS 355. Storytelling with Digital Media. 3 Credits. HL H
In this course, students will utilize digital tools and platforms to create online and mobile stories based on the theories and histories of interactive storytelling discussed in class. Through a survey of digital storytelling examples and concepts, students will create interactive projects to add to their portfolio and learn how to think critically and write analytically about digital media.

FMS 373. Intermediate Screenwriting. 3 Credits. H
Emphasis on writing a full-length screenplay. Explores genre, character, dialogue, and the development of a personal writing style. Prerequisite: FMS 273 (students will be selected based on writing samples).

FMS 374. Animation. 3 Credits. H
A survey that combines animation history, theory, and production by examining animated works of all kinds and exploring various styles utilizing both hands-on techniques and digital animation programs. Lecture-laboratory.

FMS 375. Intermediate Video Production. 3 Credits. H
Theory and practice of longer-form video production with emphasis on scripting, talent coordination and editing in preproduction, production and postproduction. Lecture-laboratory. Prerequisite: FMS 275.

FMS 376. Cinematography. 3 Credits. H
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. Prerequisite: FMS 275.

FMS 377. Post-Production. 3 Credits. H
Students become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: FMS 275.

FMS 380. American Popular Culture of: ____. 3 Credits. HL H
An interdisciplinary examination of popular cultural forms and their relationships with the social, political and economic dynamics of America, with emphasis on film, media, music, literature (including magazines and newspapers) and the graphic arts. The decade or other specific topic to be studied changes as needs and resources develop. May be repeated for credit for different decades or topics.

FMS 410. US Diversity in Visual Culture. 3 Credits. H
This course examines the way in which diversity in the United States, including race, class, gender, and sexuality, are represented through visual culture, historically and in the present. The study of visual culture analyzes the way in which visual images communicate systems of beliefs, contribute to identity formation, and have an influence on our thinking about diversity. Course looks at United States visual objects (i.e., film, television, photography, art, advertisements, and theatre as well as visual practices, i.e., in public and private spaces.

FMS 425. Ethics in Storytelling. 3 Credits. H
This course considers the ethics of telling stories with film and media. Using a framework of rhetorical criticism and postmodern ethics, the students will evaluate the ethical and social responsibility challenges of fiction and non-fiction writing, films, television and online projects from a variety of fields: anthropology, sociology, journalism, political rhetoric and documentary filmmaking. Through readings, case studies and application, students will explore the fundamentals of rhetorical ethics, and the questions raised my new and emerging forms of storytelling.

FMS 474. Videogame Theory and Design. 3 Credits. H
This course surveys the history and aesthetics of videogames and then provides a deep dive into the theory, design principles and techniques of game development on the Unity platform. Through assignments geared toward critical design, students gain the skills necessary for game-building in the areas of visual, narrative, game, level and sound design that comprise a typical development team. Although no prior coding experience is necessary, students may benefit from prior knowledge of C#, 3D modeling, or animation.

FMS 475. Advanced Video Production. 3 Credits. H
Special projects in video production, using both studio and remote locations. Prerequisite: FMS 375.

FMS 477. Sound Design. 3 Credits. H
Students will study and produce film and video work with an emphasis on sound design theory and practice. Course projects consist of several short works in response to readings and screenings, which include a survey of sound in cinema, internet and radio. Students will also become conversant with related equipment, software and techniques. Prerequisite: FMS 275.

FMS 478. Experimental Production. 3 Credits. H
Students will produce experimental film and video projects, including installation art and performance art pieces, in both collaborative and a collaborative production modes. Practical production aspects of historical experimental works will be studied, with emphasis on creation of works inspired by these earlier artists and their work. Unorthodox video and film production concepts and modes will also be studied and used in the creation of original works. The incorporation of experimental elements in the creation of mainstream works, and the creation of such projects, will also be a key area of study and experimentation. By pushing their individual creative limits, students will gain an appreciation for the experimental film and video genre, as well as an expansion of their production skills. Prerequisite: FMS 275.

FMS 479. Documentary Production. 3 Credits. H
This is a hands-on production course in which students will research, plan and produce short-form non-fiction documentaries. The class is dedicated to training young professionals in the principles, skills, techniques, habits and practices of documentary production. We will focus also on the aesthetics of our craft and the documentary form. The objective is to ground students in the fundamental skills of good non-fiction storytelling-conceptualization, research, story structure, theme development, writing, producing and directing. The goal is the production of several short-form compositions (videos) where storytelling is employed to communicate a concept or idea effectively. Students will form into teams to research, develop and produce a course-long short-form documentary. Prerequisite: FMS 275.

FMS 480. Music Video Production. 3 Credits. H
This course will cover elements of the history, aesthetics, and business of music video and music video production. Students will view and discuss
many different types of music videos, and will learn how to classify and critique these videos in a professional manner. Students will gain familiarity with the genres, themes, forms, and iconography of music video; an understanding of the place of music video in media culture; an exploration of the ideological, cultural, and historical contexts of music video; and an ability to create or assist in the creation of professional-quality music videos. Prerequisite: FMS 275.

**FMS 498. Honors Seminar. 2-6 Credits. H**
Study may be directed toward either (a) reading for integration of knowledge and insight in film and media, or (b) original research (i.e., investigation of a specific problem in film and media). Six hours maximum credit. Prerequisite: Consent of Departmental Honors Coordinator.

**FMS 499. Directed Study in Film. 1-6 Credits. H**
Investigation of a special topic or project selected by the student with advice, approval, and supervision by an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. A maximum of six hours credit may be counted toward a degree. Prerequisite: At least seven hours credit in the department and consent of instructor.

**FMS 530. Film and Media Theory. 3 Credits. H**
Comprehensive examination of most significant theories and theorists of film. Organized around specific questions, e.g., what qualities make film art unique, and how is film related to other visual and literary arts? Class discussion, individual projects. Prerequisite: FMS 100 or equivalent (determined by instructor).

**FMS 543. Contemporary Japanese Film. 3 Credits. NW H**
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 543.) Prerequisite: Junior status.

**FMS 544. African Film. 3 Credits. W**
A critical study of Africa and its peoples as depicted in films. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films are examined. (Same as AAAS 545.)

**FMS 585. Capstone in Film and Media Studies. 4 Credits. H**
This course integrates the knowledge and skills acquired across the curriculum of Film & Media Studies including academic studies, but also production and other related disciplines to enable the student to demonstrate achievement through the production of a major creative research project. Prerequisite: Must be admitted to the Film and Media Studies B.A. or B.G.S. degree. Must have completed one FMS production course.

**FMS 592. Documentary Film and Video. 3 Credits. H**
An historical and theoretical survey of that major genre of film and video typically termed “documentary.” The course will trace the main historical developments from documentary’s beginnings through contemporary innovations. Prerequisite: FMS 100 and FMS 310, FMS 311, or consent of instructor.

**FMS 593. Experimental Film and Video. 3 Credits. H**
A history of experimental film and video through an examination of major artists, movements, theories, and films/tapes. Prerequisite: FMS 100 and FMS 310, or consent of instructor.

**FMS 620. International Women Filmmakers. 3 Credits. H**
This course examines films made by women around the world. Mainstream and independent fiction, documentary, and experimental works will be screened and discussed. The objectives of the course are: 1) to learn the variety of films made by women and the conditions of their production, distribution reception. 2) to interrogate the idea of women’s cinema as ‘counter-cinema’. We will acquire tools for analyzing films in terms of economic, aesthetic, cultural, and political circumstance by women of different countries, classes, races, ethnicities, genders, and sexual preferences.

**FMS 673. Problems in Basic Screenwriting. 3 Credits. U**
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structure of a full-length, three-act screenplay. In addition to the class sessions taught with FMS 273 Basic Screenwriting, separate consultations and specific research assignments for graduate students in FMS 673 are also required.

**FMS 675. Problems in Basic Video Production. 3 Credits. U**
Theory and practice of single-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. In addition to the class sessions taught with FMS 275 Basic Video Production, separate consultations and specific research assignments for graduate students in FMS 675 are also required. Lecture-laboratory.

**FMS 702. Graduate Seminar in: _______. 1-3 Credits.**
Course organized any given semester to study particular subject matter or to take advantage of special competency by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects.

**FMS 707. Film/Media Internship. 3-12 Credits.**
Study with an approved film or media company. Emphasis may be in one or all of the following areas: acting, directing, or promotion management. No more than six hours may be applied to an M.A. degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

**FMS 715. Survey of Japanese Film. 3 Credits.**
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth century Japanese film. Through secondary readings, lectures, and discussions students will examine how Japanese cinema, as an institution, responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 715.)

**FMS 716. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Credits.**
This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression during dictatorship, globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity, immigration and identity in contemporary cinema. In addition to the lecture sessions taught in tandem with FMS 316, additional research component, lecture presentation, and class meeting are also required.

**FMS 718. Anti-war Films. 3 Credits.**
An overview and exploration of the history of the portrayal of anti-war film and media themes to show how anti-war attitudes and political policy can be affected by positive and negative depictions of conflict. Analysis of selected films. FMS 318 and FMS 718 will meet concurrently, though separate consultations and specific research assignments for FMS 718 are also required.

**FMS 722. Soviet and Post-Soviet Russian Cinema. 3 Credits.**
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. Not open to students with credit in SLAV 322/FMS 322. (Same as SLAV 723.) Prerequisite: Graduate standing or instructor permission.

FMS 743. Contemporary Japanese Film. 3 Credits.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 743.)

FMS 745. New Media and Society. 3 Credits.
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in production-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key digital skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level.

FMS 750. Indigenous Film and Media. 3 Credits.
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum-including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 350 or ISP 355. (Same as ISP 755.)

FMS 773. Problems in Intermediate Screenwriting. 3 Credits.
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structuring of a full-length, three act screenplay. In addition to the class sessions taught with FMS 373 Intermediate Screenwriting, separate consultations and specific research assignments for graduate students in FMS 773 are also required.

FMS 775. Problems in Intermediate Video Production. 3 Credits.
Theory and practice of multiple-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation, and audio. In addition to the class sessions taught with FMS 375 Intermediate Video Production, separate consultations and specific research assignments for graduate students in FMS 775 are also required. Lecture-laboratory.

FMS 776. Problems in Cinematography. 3 Credits.
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. FMS 776 meets concurrently with FMS 376; students enrolled in the graduate-level course will have separate consultations and specific research assignments. Lecture-laboratory. Prerequisite: Consent of instructor and FMS 675.

FMS 777. Post-Production. 3 Credits.
Students will become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: Consent of instructor.

FMS 800. Introduction to Graduate Study in Film/Media. 3 Credits.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in film and television. The course should be taken at the beginning of the graduate student's program.

FMS 811. Development of the American Sound Film. 3 Credits.
Intensive study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television.

FMS 813. Development of the International Sound Film. 3 Credits.
Intensive study of the artistic, economic, and sociological development of the international sound film with emphasis on the cinemas of England, France, Italy, Germany, Sweden, and Eastern Europe.

FMS 814. Development of African-American Images in Film. 3 Credits.
A history and critical assessment of the development of diverse images of African-Americans in American cinema and the impact of those images of American society. Screenings of feature and independent films, including those by African-Americans. In addition to the lecture/screening sessions taught in tandem with FMS 314, a separate discussion section and specific research assignments for graduate students enrolled in FMS 814 are also required.

FMS 862. Survey of Film and Media History. 3 Credits.
This seminar will be primarily international in scope and will concentrate on the following: technological and production issues relating to the transition in 1927-1931 of silent to sound film; the constructions of national identity, including those of recently emerging cultures; a comparison and contrast of the censorial agencies in America and abroad; and current revisionist perspectives on received film and media history.

FMS 863. Survey of Documentary and Experimental Film and Media. 3 Credits.
Surveys the important historical and theoretical issues pertinent to both the documentary and experimental approaches as expressed in film, video and new technologies. Includes major documentary and experimental genres, directors, national schools, artistic movements, and landmark works. Screenings reflect a chronology from origins to present-day.

FMS 865. Film and Media Theory. 3 Credits.
This seminar is a comprehensive survey of the major classical and contemporary film and media theories and theorists, such as Munsterberg, Eisenstein, Bazin, and Adorno. The course includes film
and media theory since the 1970s, moving through structuralism and into the posts: -structuralism, -modernism, -colonialism, and beyond. Within these broad paradigms some of the theories examined in depth are cinecinematography, Marxism, cinematic apparatus, feminist film theory, reception theory, new media and virtual reality.

FMS 875. Problems in Advanced Video Production. 3 Credits.
Special projects in video production, using both studio and remote locations. In addition to the class sessions taught with FMS 475. Advanced Video Production, separate consultations and specific research assignments for graduate students in FMS 875 are also required. Prerequisite: FMS 775 or consent of instructor.

FMS 880. Development of American Popular Culture in the: _____ 3 Credits.
Intensive interdisciplinary examination of popular culture forms and their relationships with the social, political, and economic dynamics of America in a specific decade, with emphasis on film, broadcasting, theatre, music literature (including magazines and newspapers), and the graphic arts. Decade to be studied changes as resources and needs develop.

FMS 888. Special Problems in Film History and Criticism. 1-4 Credits.

FMS 895. Intensive Film Project Seminar. 1-4 Credits.
The student plans and executes an intensive special project which requires the professional skills of investigation and performance appropriate to radio, television and/or film. May be repeated for credit up to a maximum of six credit hours. (This seminar is to the special project program what "thesis" is to the traditional program.)

FMS 897. Practicum in Film. 1-3 Credits.
Various approaches to the illustration of principles of production in film and/or video through the supervision of laboratory exercises and subsequent evaluation by the Theatre and Film graduate faculty.

FMS 898. Investigation and Conference (for Master's Students). 1-8 Credits.
Directed research and experimentation in film or media. Limited to eight hours credit toward the Master's degree.

FMS 899. Master's Thesis. 1-6 Credits.

FMS 902. Film Seminar in: _____ 3 Credits.
A graduate seminar devoted to selected historical, theoretical, or critical issues. Prerequisite: Consent of instructor.

FMS 998. Investigation and Conference (for Doctoral Students). 1-8 Credits.

FMS 999. Doctoral Dissertation. 1-12 Credits.

French, Francophone, and Italian Studies Courses

FREN 104. Elementary French, Overseas. 1-5 Credits. U
Basic language instruction in French for beginners participating in study abroad programs in France or a French-speaking country. Graded on a satisfactory/unsatisfactory basis.

FREN 107. Elementary French I for the Professional Schools. 3 Credits.
Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement.

FREN 110. Elementary French I. 5 Credits. U F1
Introduction to the basics of French language and Francophone cultures. A balanced approach that focuses on all skills: listening, speaking, reading, writing and intercultural competence. Conducted in French; no previous French required. Not open to native speakers of French or those scoring over 300 on the KU French language placement test.

FREN 111. Introduction to French I. 3 Credits. U
Introduction to French for special purposes; no previous French required. Provides basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Introduction to the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: Instructor permission required.

FREN 120. Elementary French II. 5 Credits. U F2
Continuation of FREN 110. Further development of basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Continued exploration of the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: FREN 111 or permission of instructor.

FREN 125. Elementary French I. 3 Credits.
Elementary French for special purposes; no previous French required.

FREN 150. Zombies, Aliens, Monsters. 3 Credits.
A comprehensive, interdisciplinary survey of the treatment of the Other in Western culture, predominantly the USA, UK, France, and Australia, that may include vampires, zombies, fairy tales, villains and anti-heroes, the macabre, alien encounters, dystopias and utopias, and deviancy, with particular attention to literature, film and TV, and thought. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 152. France and the French. 3 Credits. HL H
A comprehensive, interdisciplinary survey of French culture that may include topics ranging from the earliest times to the present, with particular attention to literature, the arts, thought, politics, society, food, and customs. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 153. Global Cultures: The French Connection. 3 Credits. H/W
A comprehensive, interdisciplinary and critical survey of the French-speaking cultures outside France in North America, the Caribbean, Africa, the Middle East, and Southeast Asia. Will include a variety of cultural topics, with particular attention to, and critique of, French colonization, the effects of empire on indigenous cultures, and postcolonial interactions today between France and its former colonies and protectorates. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in French. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**FREN 205. French Literature in Translation:** 3 Credits. HL H

Readings and discussions of representative great masterpieces of French and/or francophone literature from the medieval Arthurian romances and chansons de geste to the present, with particular emphasis on the question of the interrelations of form and content. Includes such authors as Rabelais, Montaigne, Racine, Moliere, Voltaire, Balzac, Flaubert, Baudelaire, Proust, Gide, Camus, and Beckett. Conducted in English. A reading knowledge of French is extremely useful but not a requirement.

**FREN 230. Intermediate French I.** 3 Credits. U F3

First intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 400 on the KU French language placement test. Prerequisite: FREN 120 or placement by examination.

**FREN 231. Intermediate French I, Honors.** 3 Credits. U F3

Honors version of FREN 230. First intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 400 on the KU French language placement test. Prerequisite: Grade of B or A in FREN 120 or departmental permission.

**FREN 234. Intermediate French I and II.** 6 Credits. U F4

Intensive intermediate-level course meeting five times a week for six hours credit. Covers the material in FREN 230 and FREN 240 in one semester. (FREN 234, FREN 240, FREN 241--each completes the CLAS foreign language requirement.) Not open to native speakers of French or those scoring over 400 on the KU French language placement test. Prerequisite: FREN 120 or placement by examination.

**FREN 240. Intermediate French II.** 3 Credits. U F4

Continuation of FREN 230; intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 500 on the KU French language placement test. Prerequisite: FREN 230 or 231 or placement by examination.

**FREN 241. Intermediate French II, Honors.** 3 Credits. U F4

Honors version of FREN 240. Intermediate-level French language and Francophone cultures course that reviews and builds upon concepts introduced in elementary-level courses. An integrated, content-based approach, with the aim of strengthening skills in listening, speaking, reading, writing, and intercultural competence. Conducted in French. Not open to native speakers of French or those scoring over 500 on the KU French language placement test. Prerequisite: Grade of B or A in FREN 230 or FREN 231 or departmental permission

**FREN 285. Headless Men: Conquest and Cultural Exchange Before the Age of Exploration.** 3 Credits. HL H

In fourteen hundred and ninety-two, Columbus sailed the ocean blue. But what happened before Columbus' great journey? And, more to the point, why did he and his contemporaries feel entitled to simply claim whatever land they found? This course proposes to explore the medieval experiences of cultural and racial Otherness in order to better understand the roots of some of the assumptions about difference (interpersonal, intercultural, and international) that continue to play out in American society today. Taught in English. (Same as HIST 285.)

**FREN 301. French Written and Oral Communication 1.** 3 Credits. H/W FP

Designed to prepare students for oral and written work in advanced-level French. Prerequisite: FREN 234, or FREN 240, or FREN 241, or by departmental permission.

**FREN 302. French Written and Oral Communication 2.** 3 Credits. H/W FP

Designed to further students' proficiency in oral and written expression for work in advanced-level French. Prerequisite: FREN 301, or by departmental permission.

**FREN 310. French Phonetics.** 3 Credits. H/W FP

A course in practical phonetics with exercises stressing rhythm, intonation, and individual sounds. Prerequisite: FREN 240, FREN 241, or by departmental permission.

**FREN 315. Le Francais Pratique.** 1-6 Credits. H/W FP

Supplementary non-major language course that can be a sequel to the first four semesters of French. Primarily for students studying abroad. Covers vocabulary study, oral exercises, discussion of texts, writing, and free conversation. Prerequisite: FREN 230/231 or FREN 240, FREN 240/241.

**FREN 326. Introduction to French Literature.** 3 Credits. HL H FP

Analysis of selected texts from various genres; special emphasis on explication de texte. Prerequisite: FREN 301.

**FREN 330. French Language and Civilization I.** 3 Credits. H FP

A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad programs.

**FREN 340. French Language and Civilization II.** 3 Credits. H FP

A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad Programs.

**FREN 350. Applied French Grammar and Composition I.** 3 Credits. H/W FP

Systematic grammar review with extensive practice in writing French. Prerequisite: FREN 301 or FREN 326.

**FREN 352. Business French/Le Francais Professionnel.** 3 Credits. H/W FP

This course helps students develop a set of linguistic and cultural competencies specific to business in the Francophone world. Students practice oral and written professional communication and complete a variety of specific tasks connected to professional careers in French. Students explore the primary industries in the Francophone world, with a particular focus on marketing, global health, diplomacy, and sustainability. Students prepare a complete job portfolio and participate in job interviews, all in French. Prerequisite: FREN 301.

**FREN 375. Intermediate French Conversation.** 3 Credits. H/W FP

Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and acquire vocabulary. Sections limited to twelve students. Prerequisite: FREN 301 or concurrent enrollment in FREN 301.
FREN 376. Advanced French Conversation. 3 Credits. H/W FP
Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and knowledge of French culture and language. Classes have centered around topics such as the French Revolution, the Arts, Renaissance Festivals, and French cinema. Sections limited to twelve students. May be designated a KULAC class at the discretion of the instructor. Prerequisite: FREN 375.

FREN 380. The Middle Ages in the Modern Imagination. 3 Credits. H
Presents authentic French and non-French medieval literary and cultural content in the context of reflection on its role in modern popular culture. Themes may include Joan of Arc, Arthurian legend, the Chronicles of Narnia, Game of Thrones, and troubadour lyric. Taught in English.

FREN 401. Paris, City of Lights and Legends. 3 Credits. HL H
An exploration of the French capital from its origins to present as emblem and icon of the social, literary, cultural, and political development of the French nation and of French ideals. Topics include great persons, events, works, symbols, and myths since the founding of the city to the present. Taught in English. Does not fulfill any requirement in the French major or minor.

FREN 410. Survey of French Culture I. 3 Credits. H/W FP
A survey of the historical, philosophical, literary, and artistic development of France, from the beginning through the 17th century. Prerequisite: FREN 301 and FREN 326.

FREN 420. Survey of French Culture II. 3 Credits. H/W FP
Continuation of FREN 410, from the 18th century to the present. Prerequisite: FREN 301 and FREN 326.

FREN 430. La France d’Aujourd’hui. 3 Credits. H/W FP
Social, political, and economic trends from 1939 to present, with emphasis on period since 1968. Prerequisite: FREN 301 and FREN 326.

FREN 431. French-Speaking World (Outside France). 3 Credits. H/W FP
Cultures of the some 235 million persons in the five world areas whose everyday and/or official language is French: Canada; Caribbean (e.g., Haiti, Guadeloupe, Martinique); Europe (e.g., Belgium, Switzerland); Africa and Indian Ocean (23 former French or Belgian colonies); Pacific (e.g., Tahiti, New Caledonia). Also French-speaking settlers in the United States (Louisiana, South Carolina, New England, Kansas). French presence in Indo-China and the Near East. Prerequisite: FREN 301 and FREN 326. (May be taken concurrently with FREN 301 and/or FREN 326.)

FREN 432. Francophone African Literature. 3 Credits. NW H/W
This course is an introduction of 20th Century African literature written in French, covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include negritude, African identity in the wake of colonialism, Islam, and women’s writing. Classes will be conducted in English. Students may read the texts in French or in translation. (Same as AAAS 432.) Prerequisite: ENGL 102 and a 200-level English course.

FREN 433. French Global Culture Through Film. 3 Credits. H/W
Discussion of great masterpieces of modern postcolonial Francophone and French global film, with a particular emphasis on how film portrays and conveys important aspects of the cultures of former French colonies and peoples in Quebec, the Caribbean, Africa, and Southeast Asia during and since independence, including immigrant populations in mainland France itself today. The works of a variety of French and indigenous film-makers and cultures will be covered. Prerequisite: FREN 301, FREN 302, and FREN 326.

FREN 435. Introduction to Translation Studies. 3 Credits. H
This course delves deeply into the theory and practice of French-to-English and English-to-French translation from both analytical and applied perspectives. Students will work to perfect both English and French stylistics while also gaining a theoretical grounding in the growing field of translation studies. Each week, students will work alternately on an English > French translation or a French > English translation while contextualizing practical work within a broad theoretical context of critical, literary, and philosophical readings. This class is bilingual; as we alternate between working languages, our dialogue will alternate from French to English. Prerequisite: FREN 326 or departmental permission.

FREN 440. Studies in French Culture: ______. 3 Credits. H/W FP
Representative topics are: History of Paris, Role of Women in French Literature and Culture, Interrelationships of the Arts, French-speaking African Culture, Culture of French Canada. May be repeated for credit with departmental permission; may also be repeated as part of major in French language and culture. Prerequisite: FREN 301 and FREN 326.

FREN 441. The Story of France. 3 Credits. H/W
This course provides an overview of the historical development of the French language and an introduction to different varieties of French, as well as some current language-related issues in the French-speaking world. The history of the French language is considered both from an external perspective, by examining important historical events in the language’s history, and from an internal perspective, by looking at specific ways the language has changed over time. Variation is examined: how French differs geographically (e.g., dialects and regional varieties in France and in the French-speaking world), socially (i.e. how social groups such as socioeconomic class or sex are reflected in language use), and situationally (i.e. language modification depending on formality, context, etc.). Will include comparisons of spoken versus written French, slang, and le français populaire, as well as current issues, e.g., les néologismes (word creation), les anglicismes (English influence) and feminization of language. Taught in French. Prerequisite: FREN 301.

FREN 443. French Inside Out. 3 Credits. H/W
This course provides an introduction to the structure of modern French and the various subfields of French linguistics. Topics will include major aspects of phonetics/phonology (the sounds/sound system), morphology (word formation), syntax (sentence structure), semantics, pragmatics (language use) and sociolinguistic variation (social, stylistic, geographical), as well as language attitudes and policies in France and other Francophone regions. Students will be introduced to different theoretical approaches to the study of French linguistics and will work on linguistic analyses of first- and second-language data. Taught in French and no prior study of linguistics is necessary to take this course. Prerequisite: FREN 301.

FREN 450. French Literature of the Middle Ages. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 455. French Literature of the Renaissance. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326.

FREN 460. Identity, Absolutism, and Power in France, 1589-1715. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and 326.
FREN 462. French Literature of the Eighteenth Century. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and 326.

FREN 465. French Literature of the Nineteenth Century. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and 326.

FREN 470. French Literature of the Twentieth Century. 3 Credits. H/W FP
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and 326.

FREN 471. Transcending Borders: Migrations, Identities, Voices, Narrative. 3 Credits. H/W
Study the themes of borders, migrations, and search for individual and collective identity and voice which define modern French and French-speaking cultures in continental France and around the globe. Authors, cultural movements and themes of the period, with an emphasis on twentieth- and twenty-first centuries. Introduce the student to the principal elements of the cultural, intellectual and artistic climate of the time, including literature, film, and other cultural documents and artefacts, print and electronic, visual and aural. May be taught in French or English. Prerequisite: FREN 301, FREN 302, and FREN 326.

FREN 480. Studies in French Literature: ______. 3 Credits. H/W FP
A study of a period, theme, group of authors, or movement. Subject matter will vary; may be taken more than once if subject differs. Prerequisite: FREN 301 and FREN 326.

FREN 481. Science-Fiction and Fantasy in French. 3 Credits. H
Study of the key works in different media in French dealing with the theme and traces the development of science-fiction and fantasy from its beginnings to the present day. Prerequisite: FREN 301 and FREN 326.

FREN 494. Research Internship. 1-3 Credits. H
Practical research experience in French and Francophone studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. May be used as a component of the Research Experience Program (REP). Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level French course and permission of instructor.

FREN 495. Directed Readings in French. 1-15 Credits. U FP
May be taken more than once, total credit not to exceed fifteen hours. Fields not covered by course work, and/or field of student's special interest. Conferences. Counts as humanities when taken for two or three hours. Prerequisite: Twenty-five hours of French and consent of instructor.

FREN 496. Internship. 1-3 Credits. H
Practical experience in the use of French skills in supervised academic, professional, or study-abroad setting. Credit hours are graded according to the written evaluation provided by the supervisor to the director. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level French course and permission of instructor.

FREN 499. Honors in French. 3 Credits. H/W FP
Various topics in French or Francophone literature, language, culture, or film. May be repeated for credit, total credit not to exceed six hours. Six hours of FREN 499 required for B.A. with Honors in French. Before enrolling, the student must obtain the approval of the faculty member who will direct the Honors project.

FREN 500. Advanced French Phonetics. 3 Credits. H/W FP
Advanced theory and practice of French pronunciation. Not open to students who have taken FREN 310, except by departmental permission. Prerequisite: FREN 301 or FREN 326 or graduate standing.

FREN 530. Studies in Film: ______. 3 Credits. H/W FP
Studies in an aspect of film, a director or group of directors. Emphasis on French film. Given in French or English.

FREN 550. Capstone Seminar in French and Francophone Language, Literature, and Culture. 3 Credits. H/W
Small discussion groups, each designed to consider a specific, clearly defined topic, using an interdisciplinary approach and requiring the demonstration of a comprehensive knowledge of the fundamentals in the field as appropriate to the topic. Class discussion based on student presentation. A final comprehensive project required. All discussion and coursework will be in French. Prerequisite: Senior majors; special department permission for other students.

FREN 601. French for Reading Knowledge. 3 Credits.
Special course for candidates for advanced degrees in other departments. Fundamentals of grammar and reading of material of medium difficulty. Intended primarily for graduate students, but open also to seniors planning graduate study. Does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of French. Conducted in English. Prerequisite: Graduate status or instructor permission.

FREN 610. Theme et Version. 3 Credits. H/W FP
Exercises in English-French and French-English translation, designed to enable the student to write with greater clarity and precision in both languages.

FREN 700. Old French. 3 Credits.
Introduction to grammar and structure through the reading of representative works.

FREN 703. Structure of Modern French. 3 Credits.
Linguistic analysis of the phonological, morphological, and syntactic structure of modern French. Description in terms of current theories and models. Application of linguistic analyses to the teaching of French.

FREN 704. Methods in Foreign Language Instruction. 3 Credits.
This course provides an overview of current and historical approaches to foreign language teaching. Past and current trends and methodologies of language instruction are examined in order to acquaint students with various classroom approaches. Research findings in second language acquisition are explored and their implications discussed so as to show how these findings lead to more effective classroom practices.

FREN 705. Colloquium in Methods of Teaching French Language. 1-3 Credits.
Discussion of theoretical teaching concepts and their application in the development of pedagogical materials and assessments for the French language classroom. Does not count toward completion of the 30-hour minimum for the M.A. or Ph.D. Prerequisite: FREN 704 and department permission.

FREN 720. Introduction to Graduate Studies in French. 3 Credits.
This course is an introduction to the skills required of students doing graduate degrees in French; areas covered include 1) introduction to literary theory and criticism, 2) bibliography and research methods, including database management software, 3) preparation and presentations of a research/conference paper, 4) technology training, including web design, on-line portfolio, and digital humanities, and 5) professional ethics and awareness of the academic market and alternative careers.

FREN 732. Francophone Studies. 3 Credits.
Selected movements, themes, genres, topics in the cultures and/or literatures of the French-speaking world outside France. May be repeated for credit.

ITAL 795. French Romantic Movement. 3 Credits.
Major Romantic writers viewed in context of intellectual, artistic, and social milieu of period 1800-1850.

ITAL 795. Investigation and Conference. 1-3 Credits.
Readings and research projects in French language, literature, and culture for students at the MA level. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Maximum credit for M.A.: Three hours. By special departmental permission only.

ITAL 799. Masters Seminar. 1 Credits.
To meet Masters degree requirement for continual enrollment. Graded on a satisfactory/unsatisfactory basis.

ITAL 800. Studies in: _____ 3 Credits.
Study of topics not limited to one century. May be repeated for credit.

Selected topics to be specified. Study of form, movements, or themes in the French Novel, not limited to one century. May be repeated for credit.

ITAL 848. Studies in Medieval French Literature: _____ 3 Credits.
Various movements, themes, or genres. May be repeated for credit. Prerequisite: FREN 700.

ITAL 858. Studies in Sixteenth Century French Literature: _____ 3 Credits.
Various movements, themes, or genres. May be repeated for credit.

ITAL 878. Studies in Eighteenth Century French Literature: _____ 3 Credits.
Various movements, themes, or genres. May be repeated for credit.

ITAL 898. Studies in Twentieth Century French Literature: _____ 3 Credits.
Various movements, themes, or genres. May be repeated for credit.

ITAL 899. M.A. Thesis. 1-6 Credits.

ITAL 900. Seminar in French: _____ 3 Credits.
Topics in literary, linguistic, and cultural research. May be repeated for credit.

ITAL 995. Investigation and Conference. 1-3 Credits.
Readings and research projects in French language, literature, and culture for PhD students. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Prerequisite: By Special Departmental Permission only.

ITAL 999. Ph.D. Dissertation. 1-12 Credits.

French, Francophone, and Italian Studies Courses

ITAL 101. Studying Abroad: Italy at a Glance. 1 Credits. W
Online one-credit course which aims to prepare students for the study abroad experience in Italy. The course is taught in English and has no prerequisites. Students will improve their knowledge of Italy and gain a better understanding of the environment that they will find abroad. The course includes an overview of Italian habits and practices, a cross-cultural analysis of differences between Italy and the U.S., and an introduction to essential Italian vocabulary for daily usage while studying abroad. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Instructor permission.

ITAL 103. Elementary Italian Language and Civilization. 3 Credits. H
A systematic review of the fundamentals of Italian grammar through practice in conversation and writing, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. No prerequisite.

ITAL 107. Elementary Italian Conversation I. 3 Credits. U
First part of a two-course sequence (with 108) for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120.

ITAL 108. Elementary Italian Conversation II. 3 Credits. U
A continuation of ITAL 107, second part of a two-course sequence for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120. Prerequisite: ITAL 107 or Italian Coordinator’s approval.

ITAL 110. Elementary Italian I. 5 Credits. U F1
Introduction to Italian language and culture. Essentials of grammar and practice in speaking, understanding, reading, and writing. Active participation required. Five hours of class per week.

ITAL 111. Accelerated Elementary Italian I. 3 Credits. U F1
This accelerated course covers the same content as ITAL 110 in three hours rather than five and prepares students to move on to ITAL 120 or ITAL 121. Students engage in activities and assignments that help them develop listening, speaking, reading and writing skills. Designed for students who have previous experience studying another foreign language or for those who desire to work at a faster pace. Active participation required.

ITAL 120. Elementary Italian II. 5 Credits. U F2
Five hours of class. Reading of simple texts; diction; speaking; elementary composition. Prerequisite: ITAL 110.

ITAL 121. Accelerated Elementary Italian II. 3 Credits. U F2
This accelerated course covers the same content as ITAL 120 in three hours rather than five and prepares students to move on to ITAL 230. Students engage in activities and assignments that help them develop and reinforce listening, speaking, reading and writing skills. Designed for students who completed ITAL 111 or who excelled in ITAL 110. Active participation required.

ITAL 152. Studies in Italian Heritage. 3 Credits. H
A comprehensive, interdisciplinary survey of the ways in which the historical culture of Italy can be found in Lawrence, KS. Emphasis is on politics, sciences, philosophy, media, and immigration. Uses materials from various KU collections. Taught in English. Does not fulfill any requirement in the Italian major or minor.

ITAL 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Italian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are
ITAL 203. Intermediate Italian Language and Civilization. 3 Credits. H
A systematic review of Italian grammar through practice in conversation and composition, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: ITAL 120.

ITAL 230. Intermediate Italian I. 3 Credits. U F3
Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 120 or ITAL 156.

ITAL 240. Intermediate Italian II. 3 Credits. U F4
Continuation of ITAL 230. (ITAL 240 completes foreign language requirement.) Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 230.

ITAL 300. Composition and Conversation. 3 Credits. H/W FP
Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 240 or permission of instructor.

ITAL 301. Introduction to Italian Literature and Textual Analysis. 3 Credits. H/W FP
Readings, textual analysis, and writing on a broad selection of Italian texts from different genres and periods, ranging from the medieval origins to contemporary literary culture. This course develops cultural and critical literacy as well as oral and written proficiency, and is a gateway to upper-division courses in the major and minor. Emphasis on study of Italian literature in its cultural context, history, politics, and society. Prerequisite: ITAL 240 or reading knowledge of Italian.

ITAL 303. Italian Language and Civilization I. 3 Credits. U FP
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 240.

ITAL 304. Italian Language and Civilization II. 3 Credits. U FP
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 303.

ITAL 315. Advanced Composition and Conversation. 3 Credits. H/W FP
Continuation of ITAL 300. Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 300 or permission of instructor.

ITAL 330. Cinematic Rome. 3 Credits. H
A study of cinematic representations of daily life, diversity, urban landscape, and social and political issues in modern and contemporary Rome as presented in different genres. Taught in English. (Same as FMS 330.)

ITAL 331. Mafia Movies. 3 Credits. H

This course investigates representations of the Italian mafia in Italian and American cinema since the 1960s, placing emphasis on conventions of the gangster genre and its evolution. We will examine films in relation to their socio-historical contexts and special attention will be dedicated to Italian films that de glamorize the Italian mafia and champion the anti-mafia struggle. Taught in English. (Same as FMS 331.)

ITAL 333. Italian Food Culture. 3 Credits. W
An interdisciplinary course on Italian cultural studies with a focus on Italian cuisine, its history and its representation in literature and movies. The history of Italian cuisine, its consumption and production are investigated from multiple disciplinary perspectives with the goal of studying what Roland Barthes called the “polysemy of food” as a feature of modernity. Taught in English.

ITAL 336. Italy and the Italians. 3 Credits. H
Survey of Italian culture with study of art and architecture, literary masterpieces in translation, science, culinary arts, and cinema. Taught in English.

ITAL 340. Studies in Italian Culture: . 3 Credits. H
A study of particular aspects of and/or periods in Italian culture. May be repeated for credit with departmental permission. Prerequisite: ITAL 240 or permission of instructor.

ITAL 405. Italian Literature in Translation: . 3 Credits. H/W
Major works representing various movements, themes, or genres. May be repeated with departmental permission. All work done in English.

ITAL 410. 19th and 20th Century Short Stories. 3 Credits. H/W FP
A survey of representative short stories of the 19th and 20th Centuries, including Verga, Panzini, Pirandello, Guaresci, Moravia, Calvino, Landolfi, and Bigiaretti. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor.

ITAL 420. 19th and 20th Century Poetry. 3 Credits. H/W FP
A survey of 19th and 20th century poets and their works, including Leopardi, Pascoli, d’Annunzio, Govoni, Palazzeschi, Gozzano, Marinetti, Boccioni, Ungaretti, Montale, Quasimodo, and Pasolini. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor.

ITAL 450. Studies in Italian Cinema. 3 Credits. H/W
A study of significant moments in Italian film history, including analysis of themes, genres, stylistics, directors, and film culture. May be repeated for credit with departmental permission. Prerequisite: ITAL 336 or ITAL 340 or permission of instructor.

ITAL 466. 19th and 20th Century Novels. 3 Credits. H/W FP
This course is a survey of representative 19th and 20th century novels including those of Manzoni, Pirandello, Svevo, Deledda, Vittorini, Moravia, Pavese, Pratolini, Buzzati, Ginzburg, and Calvino. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor.

ITAL 480. Studies in Italian Literature: . 3 Credits. FP
A study of a period, theme, group of authors, or cultural movement. Subject matter will vary: may be taken more than once if subject differs. Prerequisite: ITAL 300 or demonstrated knowledge of Italian.

ITAL 495. Directed Readings in Italian. 1-3 Credits. U FP
May be taken more than once, total credit not to exceed nine hours. Various fields of Italian literature. Prerequisite: Consent of instructor, given only to those having demonstrated ease in reading Italian.

ITAL 499. Honors in Italian. 3 Credits. H FP
Various topics in Italian literature or culture. Minimum of three hours of Italian 499 required for a B.A. with Honors in the Italian option of the French degree. Students must discuss Honors eligibility and their topic
with a faculty member before enrolling. Honors paper must be written in Italian.

ITAL 601. Italian for Reading Knowledge. 3 Credits.
Special course for candidates for advanced degrees. Fundamentals of grammar and reading of material of medium difficulty. Open to graduate students and to seniors planning graduate study. Does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of Italian. Conducted in English. Prerequisite: Graduate status or instructor permission.

ITAL 695. Graduate Directed Readings in Italian. 1-3 Credits. U FP
May be taken more than once, total credit not to exceed nine hours. Directed readings, conferences with instructor. Prerequisite: ITAL 495 or consent of instructor.

Geography & Atmospheric Sci Courses

ATMO 105. Introductory Meteorology. 5 Credits. NE N LFE
A lecture and laboratory course introducing students to the atmosphere, weather and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting.

ATMO 106. Introductory Meteorology, Honors. 5 Credits. NE N LFE
Honors version of ATMO 105. A lecture and laboratory course introducing students to the atmosphere, weather and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting. Prerequisite: Membership in University Honors Program or by permission of instructor.

ATMO 177. First Year Seminar: _____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Atmospheric Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

ATMO 220. Unusual Weather. 3 Credits. NE N
An introductory lecture course which surveys the general principles and techniques of atmospheric science and illustrates their application through discussions of natural but unusual weather phenomena such as blizzards, hurricanes, tornados, and chinooks, of the effects of air pollution on weather, and of intentional human alteration of the atmosphere.

ATMO 321. Climate and Climate Change. 3 Credits. N
This course is designed to introduce students to the nature of the Earth's physical climate. It introduces the basic scientific concepts underlying our understanding of our climate system. Particular emphasis is placed on energy and water balances and their roles in evaluating climate change. The course also evaluates the impact of climate on living organisms and the human environment. Finally, past climates are discussed and potential future climate change and its impact on humans is evaluated. (Same as GEOG 321.) Prerequisite: ATMO 105 or GEOG 104.

ATMO 499. Honors Course in Atmospheric Science. 2-3 Credits. N
Open to students with nine hours of upper level credit in Atmospheric Science, an average of at least 3.5 in all Atmospheric Science courses, and an overall average of at least 3.25. Includes the preparation of an honors paper and its defense before a committee of at least two regular faculty members.

ATMO 505. Weather Forecasting. 3 Credits. N
A first course in synoptic meteorology designed to introduce students to weather analysis and forecasting through the application of hydrodynamic and thermodynamic principles to operational analysis and forecasting. Topics include analysis and interpretation of surface and upper-air observations and data from satellites, radars, and wind profilers; chart and sounding analysis; and three-dimensional, conceptual models of weather systems. The course includes student-led weather briefings and analysis exercises. Prerequisite: ATMO 105 and MATH 125 or MATH 115.

ATMO 521. Microclimatology. 3 Credits. N
A study of climatic environment near the earth-atmosphere interface. Consideration of rural climates in relation to agriculture and urban climates as influenced by air pollution and other factors. Emphasis is on physical processes in the lower atmosphere, distribution of atmospheric variables, the surface energy budget and water balance. (Same as GEOG 521.) Prerequisite: ATMO 105 and MATH 125.

ATMO 525. Air Pollution Meteorology. 3 Credits. N
A study of background levels and concentrated sources of atmospheric pollution together with considerations of pollution buildup in urban areas as related to particular weather conditions. Inadvertent weather modifications and effects of atmospheric pollution on particular weather events and general climate will be discussed. Prerequisite: ATMO 105, MATH 125, EECS 138 and CHEM 130.

ATMO 531. Topics in Atmospheric Science: _____. 1-3 Credits. N
An investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs.

ATMO 605. Operational Forecasting. 2 Credits. N
Students enhance their forecasting expertise by preparing forecasts for presentation to the public through a variety of media. Classroom activities include weekly map discussions and analysis of current weather situations. Forecasting topics such as forecast verification, aviation forecast products, severe weather, flash floods and watches and warnings are examined. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: ATMO 505 and ATMO 640.

ATMO 606. Forecasting Practicum - Private Industry. 2 Credits. N
Practical experience in private industry working with current and/or archived meteorological data. Possibilities include the preparation of forecasts for TV stations and meteorological consulting firms, and working with environmental consulting firms to assess air pollution hazards. May be repeated two times for credit. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: Instructor permission.

ATMO 607. Forecasting Intern - National Weather Service. 2 Credits. N
Practical experience working in a National Weather Service forecasting center in analyzing weather data and preparing weather forecasts. May be repeated two times for credit. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: Instructor permission.

ATMO 615. Tropical Meteorology. 3 Credits. N
This course presents an undergraduate survey of tropical meteorology with an emphasis on clouds and convection ranging from fair-weather cumulus to hurricanes. Specific topics include the general circulation (climatology, air-sea interactions, Hadley and Walker circulation), convective processes in the topics (diurnal cycles, mesoscale convective systems, convectively coupled waves), and tropical variability (El Nino, Madden-Julian oscillation, monsoons, climate change). The genesis, thermodynamics, dynamics, and other topics related to tropical cyclones and hurricanes are also discussed. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in ATMO 715. Prerequisite: ATMO 640 and/or instructor permission.

ATMO 630. Synoptic Meteorology. 3 Credits. N
Interpretation, development, and analysis of synoptic charts. Prerequisite: ATMO 505 and ATMO 640.

ATMO 634. Physical Climatology. 3 Credits. N
Atmospheric processes are described and discussed in relation to the climate of the earth's surface. Such topics as the greenhouse effect, ozone depletion, and the effect of solar irradiance on climatic change will be included. The physical processes and relationships between various climatic features will be studied. Prerequisite: ATMO 505 and DSCI 301 or MATH 526.

ATMO 640. Dynamic Meteorology. 3 Credits. N
This course introduces the student to the fundamentals of fluid dynamics necessary for understanding large scale atmospheric motions. Fundamental physical laws of conservation of mass, momentum and energy are examined and applied to atmospheric flows. Rotation in the atmosphere is examined quantitatively in terms of both circulation and vorticity. Prerequisite: MATH 127 and PHSX 214 or PHSX 212 and PHSX 236.

ATMO 642. Remote Sensing. 3 Credits.
This course is designed to prepare students to effectively use remotely sensed data in operational or research settings for further work in this field. Topics include radiation and radiation transfer applied to active and remote sensing; radiative properties of space, sun, earth and atmosphere; instrument design considerations and operational characteristics; inversion methods for temperature or concentration profiling; surface temperature measurement; cloud top height determination; rain rate and wind velocity measurement; severe weather detection; satellite photograph interpretation. Prerequisite: ATMO 680, MATH 581.

ATMO 650. Advanced Synoptic Meteorology. 3 Credits. N
Analysis and interpretation of synoptic weather charts including treatment of numerical weather forecasting. Prerequisite: ATMO 630 and ATMO 660.

ATMO 660. Advanced Dynamic Meteorology. 3 Credits. N
Advanced study of the atmosphere including treatment of the vorticity equation. Prerequisite: ATMO 640 and MATH 220 or MATH 320.

ATMO 680. Physical Meteorology. 3 Credits. N
This course is designed to enhance the student's understanding of atmospheric processes through the study of these processes at molecular through micro scales. Topics include the properties and behavior of gases; transfer processes; phase change; solar and earth radiation; cloud drop, ice crystal and precipitation formation; atmospheric electricity; stratospheric chemistry. Prerequisite: MATH 127; PHSX 214, or PHSX 212 and PHSX 236.

ATMO 690. Special Problems in Meteorology. 1-3 Credits. N
Prerequisite: Nine hours in meteorology.

ATMO 697. Seminar for Seniors. 1 Credits. N

Current research in atmospheric science will be discussed. May be repeated for a total of two credit hours. Prerequisite: Senior level in atmospheric science.

ATMO 699. Undergraduate Research. 2 Credits. U
Work on a research project under the supervision of a faculty member. Prerequisite: Nine credit hours in atmospheric science. May be taken up to three times for credit.

ATMO 710. Atmospheric Dynamics. 3 Credits.
Presentation of contemporary approaches to the study of atmospheric dynamics. May include methodologies that provide insight into global, synoptic, mesoscale or microscale motions. Prerequisite: ATMO 660 or equivalent.

ATMO 715. Tropical Meteorology. 3 Credits.
This course presents a survey of tropical meteorology at the graduate level with an emphasis on clouds and convection ranging from fair-weather cumulus to hurricanes. Specific topics include the general circulation (climatology, air-sea interactions, Hadley and Walker circulation), convective processes in the topics (diurnal cycles, mesoscale convective systems, convectively coupled waves), and tropical variability (El Nino, Madden-Julian oscillation, monsoons, climate change). The genesis, thermodynamics, dynamics, and other topics related to tropical cyclones and hurricanes are also discussed. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in ATMO 615. Prerequisite: Instructor consent.

ATMO 720. Atmospheric Modeling. 3 Credits.
Illustration and application of contemporary approaches to mathematical and statistical description of atmospheric phenomena. Prerequisite: Consent of instructor.

ATMO 725. Clouds, Climate and Precipitation. 3 Credits.
This course includes seminar-style lectures and discussions bridging cloud physics, physical climatology, and climate dynamics with a central theme regarding how clouds and precipitation interact with the Earth's climate system. Specific topics include aerosol-cloud interactions, large-scale convective organization in the tropics, mid-latitudes, and polar regions, diabatic feedbacks on the general circulation, natural climate variability, and cloud effects in global climate models. How cloud systems have changed in recent decades, in addition to future model scenarios, are also discussed.

ATMO 731. Advanced Topics in Atmospheric Science: _____ 1-3 Credits.
Advanced investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs.

ATMO 898. Readings in Atmospheric Science. 1-4 Credits.
Independent readings of special problems in Atmospheric Science.

ATMO 899. Master's Thesis. 1-10 Credits.
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis.

ATMO 998. Research in Atmospheric Science. 1-5 Credits.
Individual investigation of special problems in Atmospheric Science.

ATMO 999. Doctoral Dissertation. 1-10 Credits.
Enrollment course for writing doctoral dissertation in Atmospheric Science. Graded on a satisfactory progress/limited progress/no progress basis.

Geography & Atmospheric Sci Courses

GEOG 100. World Regional Geography. 3 Credits. SC S
An introductory survey of the environmental setting, historically formative periods, and present-day issues that distinguish the major culture areas of the world.

GEOG 102. People, Place, and Society. 3 Credits. SC S
An examination of the relationships between humans and their environments. The course introduces students to basic concepts in human geography relating to economic activities, landscapes, languages, migrations, nations, regions, and religions. Serves as the basis for further course work in cultural, economic, political, population, and urban geography.

GEOG 103. People, Place, and Society, Honors. 3 Credits. SC S
An introduction to how human societies organize space and modify the world about them. Resultant patterns on the landscape are interpreted through principles of space perception, cultural ecology, diffusion, land use, and location theory. Comparisons are made between urban and rural areas and between subsistence and commercial societies. Open to students who have been accepted into the College Honors Program.

GEOG 104. Introduction to Physical Geography. 3 Credits. NE N
The components of the physical environment are discussed in order to familiarize the student with their distributions and dynamic nature. Major topics include the atmosphere, landforms, soils, and vegetation together with their interrelationships and their relevance to human activity. This course and GEOG 105 together satisfy the laboratory science requirement. Both courses are required for geography majors.

GEOG 105. Introductory Laboratory in Physical Geography. 2 Credits. U LFE
A laboratory course designed to complement GEOG 104 in satisfying the laboratory science requirement. It is required for geography majors. Laboratory exercises include a wide variety of analyses using data on the atmosphere, hydrosphere, biosphere, and lithosphere. Prerequisite: GEOG 104, which may be taken concurrently.

GEOG 111. Mapping Our Changing World. 4 Credits. N LFE
This course is an introduction to geospatial technologies. It focuses on the conceptual and technical aspects of mapping technologies that transform information about locations, people, objects, environments, events, and phenomena to digital representations of the world and as end-products of geospatial analysis. Topics covered include surveying, aerial photography and photogrammetry, satellite remote sensing, global positioning systems (GPS), geographic information systems (GIS), and thematic mapping. Students will learn how to acquire and develop geospatial data as the sources for mapping, the skills of analyzing and interpreting spatial information, and how geovisualization can be used in addressing real-world problems. (Same as GIST 111.)

GEOG 140. Global Environment I: The Discovery of Environmental Change. 3 Credits. U LFE
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gather, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 142 and HIST 142.)

GEOG 144. Global Environment I: Discovery of Environmental Change, Honors. 3 Credits. U LFE
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor.

GEOG 145. Global Environment II: The Ecology of Human Civilization, Honors. 3 Credits. U
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 145 and HIST 145.) Open only to students admitted to the University Honors Program or by permission of instructor.

GEOG 148. Scientific Principles of Environmental Studies. 3 Credits. NB N
This course provides the scientific knowledge necessary to understand the changing relationships between humans and the natural environment, with an emphasis on the assessment of current environmental problems and critical evaluation of potential solutions. Major topics include fundamental scientific concepts and principles, interactions among the biological and physical components of the environment, implications of a growing human population, water resources, the atmosphere, climate, and energy sources. (Same as EVRN 148.)

GEOG 150. Environment, Culture and Society. 3 Credits. SC S
An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere, and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as EVRN 150.)

GEOG 160. Environmental Solutions. 1 Credit. N LFE
These labs are designed to explore the physical, social, and cultural dimensions of environmental systems. Students will engage in hands-on activities and field experiences about a range of current and historical environmental issues affecting both the United States and other parts of the world. This course will broaden your understanding of important
foundational concepts and skills including basic scientific principles and processes that govern the functioning of environmental systems, ways to apply this understanding to case studies and field experiences, and how to use these perspectives to eventually make informed, just decisions about climate change, the future flourishing of humans and non-humans. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students with credit in EVRN 360/361. (Same as EVRN 160.) Prerequisite: This course requires previous or concurrent enrollment in EVRN 140/144 (or cross-listed and transfer equivalents).

GEOG 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Geography. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

GEOG 201. Culture and Health. 3 Credits. H/W
This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 203 and GIST 210.)

GEOG 202. Culture and Health, Honors. 3 Credits. H/W
Honors version of AAAS 203, GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 204 and GIST 211.)

GEOG 205. Disaster, Disease, and Mapping. 3 Credits.
Disaster, Disease, and Mapping investigates the intricate interactions between both the physical and human causalities of infectious disease transmission by examining multiple pathogens, their reservoirs, and their transmission modes. Maps are used to critically ascertain the spatial distribution of disasters and how human and physical actions, promote or reduce, disease transmission. We will study actions affecting transmission including physical factors such as environmental degradation, natural hazards, and climate change as well as social/human factors of globalization, inequity of access to healthcare, and regional and global responses.

GEOG 300. Geographic Adventures in Climate Change. 3 Credits. N
This course considers how climate change is altering particular things such as coffee and chocolate production, the electricity grid and nuclear energy, wild salmon and sharks, rare earth minerals and ice shelves, and many other aspects of life on earth. This course looks at how environmental processes and human systems interact at different spatial scales. This geographic framework is applied to a range of topics to assess climate change impacts as well as approaches to longstanding and emerging problems. Students will identify human systems (cultural, political, economic, justice, technology, etc.) and physical systems (biosphere, atmosphere, lithosphere, cryosphere, ecosystems, etc.). They will assess how human and environmental systems interact and the various spatial scales of these interactions. Students will analyze how climate change is interacting with these systems, their interactions, and spatial implications. Students will demonstrate critical thinking to create possible responses to specific contexts where human-environment interactions are altered by climate change and evaluate the impact of those responses. Student learning outcomes emphasize the demonstration of geographic systems thinking and critical analysis towards solution options. (Same as EVRN 300.)

GEOG 304. Environmental Conservation. 3 Credits. NE N
A survey of current methods of describing and modeling the function, structure, and productivity of natural and anthropogenically modified earth resource systems, along with a discussion of contemporary views of what constitutes a natural landscape. Fundamental natural science principles about the interplay among lithospheric, atmospheric, hydroospheric, and biospheric components of earth systems are emphasized. Uses of natural resources, including fossil fuels, minerals, and water are described with attention to the earth's total energy budget. Human activities that affect preservation, conservation, and multiple uses of earth regions receive attention. Systems under stress through population and other contemporary forces serve as examples. (Same as EVRN 304.)

GEOG 311. Introductory Cartography and Geovisualization. 4 Credits. N LFE
This course is an introduction to cartography and focuses on computer-based map making skills. It begins with the history of cartography, cognitive maps, and the use of maps in the past and modern times. Topics covered in this course emphasize spatial data handling, principles of cartography and symbolization, map elements and design, and mapping techniques such as choropleth, proportional symbol and dot maps. Students will learn to adopt appropriate spatial data and mapping techniques to create accurate and creative digital maps reflecting given phenomena.

GEOG 316. Methods of Analyzing Geographical Data. 4 Credits. N LFE
Introduces the benefits and limitations of using quantitative methods to analyze geographical problems. Covers traditional descriptive (e.g., measures of central tendency) and inferential statistics (e.g., hypothesis testing) but also inherently geographical approaches such as shape and point pattern analysis, and spatial autocorrelation. Laboratory emphasizes using the computer to explore and analyze geographical problems.

GEOG 321. Climate and Climate Change. 3 Credits. N
This course is designed to introduce students to the nature of the Earth's physical climate. It introduces the basic scientific concepts underlying our understanding of our climate system. Particular emphasis is placed on energy and water balances and their roles in evaluating climate change. The course also evaluates the impact of climate on living organisms and the human environment. Finally, past climates are discussed and potential future climate change and its impact on humans is evaluated. (Same as ATMO 321.) Prerequisite: ATMO 105 or GEOG 104.

GEOG 332. Glaciers and Landscape. 3 Credits. N
Elements from glaciology, geology, and climatology are merged to examine the interactions between glaciers and their natural environments, including the processes involved in glacier formation, the relationship between glaciers and climate, the mechanisms of glacier flow, and interpretation of the Earth's glacial record. Emphasis is placed on an interdisciplinary approach to study environmental change and paleoclimate reconstruction. Prerequisite: GEOG 104 or GEOL 101, or consent of instructor.

GEOG 335. Introduction to Soil Geography. 4 Credits. N LFE
This course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body; genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between solid, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken GEOG 335.
who have taken EVRN 535 or GEOG 535. (Same as EVRN 335.)
Prerequisite: GEOG 104 or GEOL 101 or consent of instructor; BIOL 100 and
CHEM 130 or CHEM 190 and CHEM 191 recommended.

GEOG 336. Introduction to Environmental Hydrology and Water
Resources. 3 Credits. N
Water is vital to life on earth. In this course we cover components of the
water or “hydrologic” cycle, how management has altered them, and
how they are predicted to change with the changing climate. We discuss
the evolution of water policy, its implications for managements and the
economic impact of human perturbation on water. We study the physical
processes that govern the water cycle, learn how they are measured,
and estimate hydrologic fluxes. (Same as EVRN 363.) Prerequisite:
GEOG 104 or GEOL 101.

GEOG 339. Topics in Physical Geography: ____. 1-3 Credits. N
An investigation of special topics in Physical Geography. May
include coursework under headings of soils, vegetation, climate, or
geomorphology. May be repeated if topic differs.

GEOG 351. Africa's Human Geographies. 3 Credits. NW S/W
An introduction to historical, cultural, social, political, and economic issues in
Africa from a geographic perspective. The course begins with the
historical geography of humanity in Africa, from ancient times through to
the present. Other topics include cultural dynamics, demography, health,
rural development, urbanization, gender issues, and political geography.
Case studies from Eastern and Southern Africa will be used to illustrate
major themes. (Same as AAAS 351.)

GEOG 352. Economic Geography. 3 Credits. S
This course offers an overview of contemporary economic geography
with an underlying theme of uneven regional development. Topics
examined include: the historical context in which capitalism emerged;
the major theoretical approaches used to understand the temporal and
spatial dynamics of capitalist society; a series of case studies of different
economic sectors; and the global economy, including its development
with respect to colonialism, neocolonialism, international trade, third world
development, and population growth.

GEOG 354. Globalization: A Geographic Approach. 3 Credits. S
This course is designed to provide a broad overview of some major facets of
the historical, economic, political, cultural, and geographical dimensions of
contemporary globalization, the process by which individual regions and
nations have become progressively linked to, and structured by,
the world-system of states and markets, and the cultural contradictions
associated with this process. (Same as GIST 354.)

GEOG 355. Introduction to Geographic Information Systems. 4
Credits. N LFE
An introduction to computer-based analysis of spatial data. Covers basic
principles of collecting, storing, analyzing, and displaying spatial data.
Emphasis is on problem-solving activities using common spatial analytical
techniques (e.g., map overlay). The student will gain extensive hands-on
experience with state-of-the-art GIS software.

GEOG 360. Computer Programming for Mapping and Spatial
Analysis. 3 Credits. N
This course teaches basic computer programming concepts and skills
for mapping and spatial analysis using various scripting languages. The
goal is to enable students to write computer programs, develop mapping
applications, and perform spatial data analysis. This course will lay the
foundation for computerized problem solving skills that can be applied in
later courses. This course assumes no previous programming experience.

GEOG 370. Introduction to Cultural Geography. 3 Credits. H
Charts some of the major lines of research in cultural geography,
including critical theory, political economy, poststructuralist thought,
feminism, and global consumption. Through fieldwork, diverse research
methods are applied to issues such as community development, cultural
patterns on the landscape and global impacts on local economies.
Prerequisite: GEOG 100, GEOG 102 or GEOG 103; or consent of
instructor.

GEOG 371. Environmental Geopolitics. 3 Credits. S
This course examines how human relationships with the biophysical
world are politicized. Examines key contributions to debates surrounding
environmental security, resource conflicts, and related issues, as well
as geopolitical assumptions on which these debates build. (Same as
EVRN 371 and GIST 371.)

GEOG 372. Environmental Policy. 3 Credits. N
An historical and analytical study of the formulation, implementation, and
consequences of environmental policy in the United States. Attention is
directed at relevant interest groups, issues specific to both rural and urban
populations, relationships between national policies and international
organizations concerned with environmental problems. Prerequisite:
GEOG 148 or EVRN 148; and either EVRN 103 or HIST 103, EVRN 347
or HIST 347, or GEO 150 or EVRN 150.

GEOG 373. Borders, Politics, and Territory. 3 Credits. S
This course considers how humans wield power in the geographical
form of borders and territories. At the international level this is called
geopolitics, while at the national, provincial, and local levels it is political
graphy. Rare is a day when headlines fail to portray ongoing
negotiations for influence over the places and spaces through which
people live and the very lines that divide them. This course traces the
historical evolution of borders and territory before exploring contemporary
practices of bordering and border crossing in relation to trade, migration,
maritime, outer space, air space, environment, cyberspace, governance,
and human rights. Prerequisite: GEOG 100 or GEOG 102 or equivalent or
consent of instructor.

GEOG 374. Vulnerability and Adaptation. 3 Credits. S
The course objective is to understand and analyze human adaptation to
environmental change by focusing on disasters and climate change. Each
semester, the course rotates topics ranging from oil spills, hurricanes,
sea-level rise to infectious disease. It provides undergraduate students
with research experience and service learning, and offers opportunities
for certificates through the Center for Undergraduate Research and the
Center for Civic and Service Responsibility at KU. Students learn theories
relevant to the case study, work in groups to generate research themes,
conduct literature search and review, learn research methods, and write
and present their work.

GEOG 377. Urban Geography. 3 Credits. S
This course explores the city from the multiple perspectives of its
inhabitants. The cultural viewpoints of place, gender, age, and ethnicity
are stressed. Traditional topics such as urban hierarchy, functions of
the city, suburbanization, and ongoing changes in core and peripheral
areas also receive attention. The distinctive landscapes of individual
North American cities are emphasized, but examples also are drawn from
throughout the world.

GEOG 390. Geography of the United States and Canada. 3 Credits. S
A study of the different physical, economic, and cultural settings in the
United States and Canada which form the basis for the various forms
of livelihood. Emphasis on the United States. (Same as AMS 390.)
Prerequisite: An introductory geography course or background in the
United States or Canadian history, social science, or culture or consent of
instructor.

GEOG 395. Environmental Issues of: ____. 3 Credits. S
This regional geography course examines contemporary environmental issues of a particular region of the world based on the expertise of the professor. Course emphasis is on the interaction of natural, socio-economic, and cultural factors of development that give rise to environmental problems. Students learn how local, national, and international government and non-governmental stakeholders address environmental problems. Course may be repeated with different professors.

**GEOG 396. East Asia. 3 Credits. NW S/W**
This course is an introduction to the contemporary politics, economy, and culture of Korea, China, and Japan in the context of globalization. In addition to the discussion of individual countries, the course examines the cross-cutting themes such as international relations, cultural exchange, and economic development in the region of East Asia.

**GEOG 397. Geography of Kansas and the Plains. 3 Credits. S**
A study of the different physical, economic, and cultural settings in Kansas and the Plains that form the basis for various kinds of livelihood.

**GEOG 399. Topics in Regional Studies: _____ 1-3 Credits. S**
An investigation of special topics in Regional Studies. May include coursework related to a specific country or region. May be repeated if topic differs.

**GEOG 451. Ecosystems Stewardship. 3 Credits.**
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 451 and EVRN 451.)

**GEOG 458. Geographical Information Systems: _____ 1-6 Credits. N**
An introduction to the organization and components of geographic information systems and their software. Fundamental concepts and their implementation with applications to physical and human systems.

**GEOG 490. Geographic Internship. 1-6 Credits. N**
Supervised practical experience. The student submits a proposal describing the internship prior to enrollment. Upon acceptance, regularly scheduled meetings with the advisor provide assistance, guidance and evaluation of progress in the professional experience. A written summary of the experience or outcomes of the research project are prepared independently by the student, a representative of the host agency, and the advisor. Total credit not to exceed six hours. Prerequisite: Fifteen hours of geography and permission of instructor.

**GEOG 498. Special Topics in Geography: _____ 1-5 Credits. U**
Prerequisite: Fifteen hours of geography.

**GEOG 499. Honors Course in Geography. 2-3 Credits. U**
Open to students with nine hours of upper level credit in geography, an average of at least 3.5 in all geography courses, and an overall average of at least 3.25. Includes the preparation of an honors paper and its defense before a committee of at least two regular faculty members.

**GEOG 500. Senior Capstone in Geography. 3 Credits. N**
The capstone project provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their studies. The major goals of this course are to help students synthesize an integrated view of geography, advance steps toward career preparation, and develop networking and professional skills. The course will provide an overview of geography as a unified, coherent discipline with multiple perspectives, emphasize writing and analytical skills, introduce students to a major research project that integrates elements of physical and human geography, cultivate knowledge for future professional development, and introduce students to professional organizations. Students will gain experience applying and/or interviewing for professional positions and be introduced to multiple professional development and career services on campus. Graduate students may take this course by permission only. Prerequisite: Nine hours in Geography and status as a senior major in the department; or permission of instructor.

**GEOG 512. Advanced Cartography and Geovisualization. 4 Credits. N**
This is an advanced computer-based scientific cartography course. It covers mapping techniques such as dasymetric mapping, multivariate mapping, cartogram and flow map, map animation, geovisual analytics, web and interactive mapping, and mapping from remotely sensed imagery. This course focuses on practical and hands-on experience. Students will learn theoretical concepts, principles, and design examples, and produce a cartographic portfolio of well-designed and professional maps. Prerequisite: GEOG 311 or equivalent; or consent of instructor.

**GEOG 518. Geoinformatics Internship. 1-3 Credits.**
Real world experience with geospatial technologies is not only essential for understanding and using geospatial knowledge but also beneficial for students to start a career path in geospatial technologies. Approved internships are supervised development and applications of geospatial technologies in business, government, non-profit, educational or other related fields. They can involve field work, data collection, processing, and analysis. Internship supervisors must agree to mentor the student and to complete necessary evaluations within a timely manner. Prerequisite: GEOG 358 or consent of instructor.

**GEOG 521. Microclimatology. 3 Credits. N**
A study of climatic environments near the earth-atmosphere interface. Consideration of rural climates in relation to agriculture and urban climates as influenced by air pollution and other factors. Emphasis is on physical processes in the lower atmosphere, distribution of atmospheric variables, the surface energy budget, and water balance. (Same as ATMO 521.) Prerequisite: ATMO 105 and MATH 125.

**GEOG 525. Remote Sensing of Environment I. 4 Credits. N LFE**
Introduction to study of the environment through air photos and satellite imagery, including principles of remote sensing, interactions of electromagnetic energy with the atmosphere and earth's surface, aerial photography, satellite systems, and sensors (electro-optical, thermal, and radar). Emphasis in the latter part of the course is on such applications as global monitoring, land cover mapping, forestry, agriculture, and oceanography. Laboratory emphasizes visual interpretation of aerial photography and satellite imagery and an introduction to digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. Prerequisite: MATH 101 or equivalent. GEOG 358 recommended.

**GEOG 528. Spatial Databases. 3 Credits. N**
This course covers concepts in spatial databases and their relevance in geographic information systems (GIS) and spatial analysis. It introduces the fundamental theories of data management behind Geographic Information Systems and imparts hands-on experience with mainstream spatial database management systems (DBMS), standard query languages and necessary tools to query/transform geospatial data, and perform spatial and network analysis. The course provides more in-depth
coverage on database-oriented approaches for GIS geospatial analysis. Prerequisite: GEOG 358; or instructor permission.

GEOG 531. Topics in Physical Geography: ______. 1-3 Credits. N
An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated, if topic differs.

GEOG 532. Geocarchaeology. 3 Credits. N
Application of the concepts and methods of the geosciences to interpretation of the archeological record. The course will focus primarily on the field aspects of geocarchaeology (e.g., stratigraphy, site formation processes, and landscape reconstruction), and to a lesser extent on the array of laboratory approaches available. (Same as ANTH 517.) Prerequisite: GEOG 104, ANTH 110, or ANTH 310.

GEOG 533. Soil Geography. 4 Credits. N LFE
A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as EVRN 335.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 1911 recommended.

GEOG 540. Ecohydrology. 3 Credits. N
Ecohydrology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key concepts, methodological approaches and analytical techniques utilized in ecohydrology to understand and quantify: plant water use, evolution of hydrologic properties, groundwater-surface water interactions, controls on landscape patterns, spatial and temporal patterns of soil moisture and nutrient concentrations, and vegetation competition. Students should leave the class having developed critical skills in: 1) reviewing scientific literature, 2) collecting environmental samples, 3) analyzing ecohydrologic data, 4) writing a scientific research paper, 5) working collaboratively and independently. (Same as EVRN 540.) Prerequisite: GEOG 104 or GEOL 101 or EVRN 363 or GEOG 336 or permission of instructor.

GEOG 541. Geomorphology. 4 Credits. N LFE
A critical study of land forms in relation to tectonics, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEOG 541.) Prerequisite: GEOG 101 and GEOG 103, GEOG 104 and GEOG 105, or GEOG 103 and GEOG 304.

GEOG 550. Environmental Issues in Africa. 3 Credits. S
Acquaints students with the complexities of debates on environmental problems in Sub-Saharan Africa. Topics addressed may include deforestation, desert expansion, wildlife conservation, soil erosion, climate change, coral reef destruction, water resources development, mangrove preservation, the environmental effects of war, industrialization, and urbanization. Class presentations and projects synthesize the perspectives of both human and physical geography. (Same as AAAS 551.) Prerequisite: GEOG 104 or permission of instructor.

GEOG 552. Topics in Urban/Economic Geography: ______. 1-3 Credits. S
An investigation of special topics in urban/economic geography. May include specific course work under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated.

GEOG 553. Geography of African Development. 3 Credits. W
Acquaints students with the values and social parameters of African agricultural and pastoral practice. Topics include customary land rights, African perspectives on the natural world, gender issues in African agriculture, and the urbanization of African cultures. The course also contrasts African views with those of Western development practitioners and donor agencies. Case studies from different countries are used to highlight the continent's regional differences. (Same as AAAS 553.)

GEOG 556. Geography of the Energy Crisis. 3 Credits. S
A discussion and analysis of the basic facts and causes of energy problems on a national and world scale. Examines current production, consumption, efficiency, reserves, conservation, and other energy policy options, including adjustments that will affect consumer use, national politics, and strategic issues. Prerequisite: GEOG 102.

GEOG 558. Intermediate Geographical Information Systems. 4 Credits. N LFE
An intermediate level course in geographic information science designed for advanced undergraduate and graduate level students who already have an introductory understanding of GIS. Emphasis will be placed on the application of spatial analytical techniques to geographical problem-solving. Topics include spatial data structures, interpolation techniques, terrain analysis, cost surfaces, and database management technique. Students will apply knowledge gained in lecture and reading to natural resource, urban, and scientific applications using state-of-the-art GIS software. Prerequisite: GEOG 358 or consent of instructor.

GEOG 560. GIS Application Programming. 3 Credits. N
This course teaches programming within Geographic Information Systems. Students learn how to customize GIS applications to automate data processing and spatial analysis through programming languages. GIS programming concepts and methods are introduced from the aspects of spatial data management and analysis covering both the vector and raster data models. Prerequisite: GEOG 558 and a course in programming languages.

GEOG 570. Geography of American Indians. 3 Credits. NW S
A survey of the culture and history of selected indigenous peoples of the Americas. Emphasis is placed on the environmental setting, the settlement and subsistence patterns, and the impact of European colonization. Discussion includes present-day ethnic and resource issues.

GEOG 571. Topics in Cultural Geography: ______. 1-3 Credits. S
An investigation of special topics in cultural geography. May include specific course work under the headings of cultural theory and methodology, material culture, foodways, religion, and similar topics. May be repeated, if topic differs.

GEOG 577. Human Dimensions of Global Change. 3 Credits. S
This class introduces concepts such as coupled human and natural systems, social-ecological resilience, and sustainability science, examines people’s responses to major climate, land, water, and coastal change, and discusses case studies. One hour of each seminar will be devoted to individual needs that address topical or methodological issues. Class requirements include presentations, biweekly papers, and a term paper. (Same as GIST 577.) Prerequisite: One of the following: GEOG 100, GEOG 104, GEOG 374, or an Environmental Studies introductory course.

GEOG 582. Geopolitics and Genocide. 2-3 Credits. S
Explores the inherently geographical and geopolitical nature of genocide and related mass violence and introduces an overarching concept, territorial cleansing, that foregrounds the spatial and territorial nature of these events. Detailed studies of cases at a range of scales and locales provide the major context for critical examination and comparison of territorial cleansing concepts. Students enrolling for 3 credits will
prepare and present a substantial independent research paper. (Same as GIST 582.) Prerequisite: GEOG 102 or GEOG 103; or ANTH 108 or ANTH 109; or permission of instructor.

GEOG 583. Migration, Diasporas and Development. 3 Credits. S
This course introduces students to key concepts in global migration and its implications on development in migrant sending states particularly those on the African continent. It will explore the various migration patterns from Africa (e.g., migration between North Africa and Europe in the aftermath of the Arab Spring), South-South migration, the ‘brain drain’ of skilled professionals and its implications for development, and the role of diasporas in development. The course will also assess the integration of migrants in major migrant destination regions. Finally, the course will provide students with an opportunity to critically examine the relationship between migration and development in a particular national context of their choice. (Same as AAAS 583.) Prerequisite: GEOG 102 or consent of instructor.

GEOG 586. Sustainable Food Systems and Food Security in the Global South. 3 Credits. S
The course adopts an interdisciplinary approach to study food systems and food security in the Global South. It incorporates multiple perspectives ranging from the local to the global level to explore the cultural, ecological/environmental, economic, sociopolitical, and ethical dimensions connected to the global food system. It also examines several dimensions of food insecurity. Students will also examine the impact of food insecurity on health as well as racial and economic disparities in access to food. The course will also examine the research and conceptualization of food systems and analyze concepts such as “food deserts,” “food oases,” “food swamps,” and “food grasslands.” We will examine food production and food acquisition strategies in low-income areas. Case studies will be drawn on experiences from diverse regions particularly Southern Africa even though other regions such as Latin America and Southeast Asia will be considered. Prerequisite: GEOG 102 or consent of instructor.

GEOG 590. Understanding Central Asia. 3 Credits. NW S/W
An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics—Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan—with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in REES 710. (Same as REES 510.) Prerequisite: One previous interdisciplinary area studies course or the instructor's permission.

GEOG 591. Geography of Latin America. 3 Credits. SC S/W
A study of the different physical, economic, and cultural settings in Latin America which form the basis for the various forms of livelihood.

GEOG 597. Geography of Brazil. 3 Credits. S
Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary and cultural geography of Brazil. Course also includes a survey of Brazil's South American neighbors.

GEOG 601. Indigenous Peoples of the World. 3 Credits. S
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women’s rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GIST 601 and ISP 601.) Prerequisite: Permission of instructor.

GEOG 648. Location Modeling. 3 Credits. N
This course provides an overview of advanced location analysis and modeling in the context of GIS. Introduces students to principles of location analysis, methods for making strategic location decisions as well as existing classic location problems. Demonstrates analytical approaches by which location problems can be solved using mathematical programming, GIS and other optimization software. This course is a specialized course with an emphasis on the spatial analysis function of Geographic Information Systems, which covers many concrete applications of GIS geospatial analysis in urban planning, transportation, and service systems planning, ranging from firefighting stations to forestry management to transportation facilities. Prerequisite: GEOG 358; or instructor permission.

GEOG 658. Topics in Geospatial Technologies: _____ 1-6 Credits. LFE
An investigation of special topics in geoinformatics. May include specific coursework under the headings of methodology, basic research, thematic or regional applications, geographic information systems (GIS), Global Positioning System (GPS), and geostatistics. May be repeated if topic differs. Prerequisite: GEOG 111 or GEOG 358 or consent of instructor.

GEOG 716. Advanced Geostatistics. 3 Credits.
An introduction to the practical application of advanced geostatistical statistical techniques. Potential topics include: spatial regression, interpolation, clustering, and advanced nonparametric statistics. Knowledge of a statistical package and GIS is assumed. Prerequisite: GEOG 358 or equivalent.

GEOG 719. Development of Geographic Thought. 2-3 Credits.
Critical analysis of the growth of geographic thought from antiquity to the present: emphasis on structure of modern geography. Prerequisite: Twenty hours of geography or consent of instructor.

GEOG 726. Remote Sensing of Environment II. 4 Credits.
An overview of techniques for computer analysis of digital data from earth orbiting satellites for environmental applications. Topics covered include: data formats, image enhancements and analysis, classification, thematic mapping, and environmental change detection. The laboratory exercises provide hands-on experience in computer digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. Prerequisite: Introductory statistics and GEOG 526 or equivalent.

GEOG 731. Topics in Physical Geography: ____. 1-3 Credits.
An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated.

GEOG 752. Topics in Urban/Economic Geography: ____. 1-3 Credits.
An investigation of special topics in urban/economic geography. May include specific coursework under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated.

GEOG 759. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans
as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 759 and EVRN 751.)

GEOG 771. Topics in Cultural Geography: ______. 1-3 Credits.
An investigation of special topics in cultural geography. May include specific course methodology, material culture, foodways, religion, and similar topics. May be repeated.

GEOG 781. Environmental Geopolitics. 3 Credits.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. This course is a more advanced and rigorous version of the undergraduate version of this course. It is not open to students who have taken or are enrolled in GEOG 371 or EVRN 371. Environmental Geopolitics.

GEOG 805. Perspectives in Geography. 2 Credits.
This course provides background on the discipline of geography and how it is practiced by the faculty in the department. It provides a foundation of knowledge of geography's role within the human and physical sciences as well as the humanities. Students will gain a critical perspective into the breadth of geography, including the ways in which geographers view the world through the lenses of place, space, and scale and the debates and approaches within the changing landscape of geographic inquiry.

GEOG 806. Proposal Writing and Research Design. 2 Credits.
The course is designed to assist graduate students in developing their research project, including refining research questions, creating a literature review, and defining appropriate methods to aid in successfully answering their questions. Learning outcomes include the production of an individual draft research proposal based upon the student’s research design.

GEOG 875. Qualitative Research Methods. 3 Credits.
This course provides background on relevant qualitative methods used in human geography. Students will gain a critical perspective into relevant issues of qualitative methods with specific regard to ethical concerns related to human subjects research within the social sciences and humanities and the debates and approaches within the changing landscapes of qualitative methods. Students will have the opportunity to practice these techniques and strategies in a group research project. Prerequisite: GEOG 805 or consent of instructor.

GEOG 890. Geographic Internship. 1-6 Credits.
Supervised professional experience. The student submits to the program committee a proposal describing the internship prior to enrollment. Upon acceptance, regularly scheduled meetings with the advisor provide assistance, guidance and evaluation of progress in the professional experience. A written summary of the experience or outcomes of the research project are prepared independently by the student, a representative of the host agency, and the advisor. Total credit not to exceed six hours. Prerequisite: Twelve hours of graduate level geography courses and consent of program committee.

GEOG 896. Readings in Geography. 1-4 Credits.

GEOG 899. Master’s Thesis. 1-10 Credits.
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis.

GEOG 980. Seminar in Geography: ______. 1-3 Credits.

GEOG 998. Research in Geography. 1-5 Credits.

GEOG 999. Doctoral Dissertation. 1-10 Credits.
Dissertation credit. Graded on a satisfactory progress/limited progress/no progress basis.

Geology Courses

GEOL 101. The Way The Earth Works. 3 Credits. NE N
Introduction to the principles of earth science. Study of the formation, occurrence, and structure of minerals and rocks; action of streams, oceans, glaciers, and other agents in the formation and modification of the landscape; volcanism, earthquakes, and plate tectonics. Discussion of earth processes in the context of sustainable energy, environmental concerns, climate and other topical issues. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Course may be offered in lecture or online format.

GEOL 103. Geology Fundamentals Laboratory. 2 Credits. U LFE
A course in geologic laboratory studies. This course plus GEOL 101, GEOL 105, GEOL 106, or GEOL 121 satisfies the College laboratory science requirement. Gives students practical, hands-on experience with identifying earth materials (rocks, minerals, fossils), understanding their relationships to earth processes, understanding topographic and geologic maps, interpreting results of surficial processes, and learning about deep-earth processes such as earthquakes. Includes short field trips to see geologic structures and results of local geologic processes. This lab course may be offered in on-campus lab or online format. Prerequisite: Previous or concurrent enrollment in GEOL 101, GEOL 105, GEOL 106 or GEOL 121.

GEOL 105. History of the Earth. 3 Credits. NE N
An introduction to the physical and biological history of the earth, the methods used to decipher earth history, and the development of the geological sciences. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Not open to students who have taken GEOL 106 or GEOL 304.

GEOL 108. Troubled Waters: Water Resource Issues and Principles. 3 Credits. N
Worldwide, water security is necessary for life, and food, industry, and energy production, and is increasingly the source of conflict. This course explores water in the environment and the fundamental interactions between humans and water. Key topics and issues addressed include fundaments of water and the water cycle; water in geologic processes; water availability, development and sustainability; climate effects including flooding and drought; economics; pollution, disease, sanitation, and health; culture, policy and law, and other challenging issues. Case studies explore examples from Kansas and around the world.

GEOL 121. Life Through Time: DNA to Dinosaurs. 3 Credits. NB N
This course leads students on a journey through time to explore the interconnection between life and the geology of Earth, including our own complex relationship with the world around us. If taken with GEOL 122, this course satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 122 is required for students taking both.

GEOL 122. Life Through Time: DNA to Dinosaurs Laboratory. 1 Credits. N LFE
This online companion to GEOL 121 allows students a hands-on exploration of the principles and practices of paleontology research. Students will be guided through an individual term-length research project—from shaping a research question to collecting and analyzing data to drawing conclusions to presenting in front of an audience. This lab will not only allow students to explore the fossil record but it will bring them...
into the scientific conversation. Prerequisite: Corequisite: Students must be concurrently enrolled in GEOL 121.

GEOL 171. Earthquakes and Natural Disasters. 3 Credits. NE N
Addresses the subject of natural disasters with concentration on earthquake effects and their mitigation. Briefly treats volcanic eruptions, tidal waves, floods, global warming, severe weather, and catastrophic meteorite impacts from the perspective of geological and human significance. Provides a basic background into earth-sciences processes.

GEOL 172. Earthquakes and Natural Disasters Laboratory. 1 Credit. N
This online companion to GEOL 171 allows students a hands-on exploration of the principles and practices of geologic and geophysical research. Students will be guided through an individual term-length research project—form shaping a research question to collecting and analyzing data to drawing conclusions to presenting in front of an audience. This lab will not only allow students to explore details of natural disasters, but it will bring them into the scientific conversation. Prerequisite: Corequisite: GEOL 171.

GEOL 177. First Year Seminar: ______. 3 Credits. NE
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in geology. May not contribute to major requirements in geology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

GEOL 190. Introduction to Quantitative Geoscience. 3 Credits. N
This applied, introductory-level program will explore topics in geology, hydrogeology, physics, chemistry, and biology from a mathematical perspective. The course is designed for students with a desire to expand their mathematical skills, building on practical applications in the natural sciences. The study of land and field sciences and mathematical problem-solving through rigorous, quantitative, and interdisciplinary investigations will be emphasized. The course will take students from a review of arithmetic and algebraic manipulations, to the use of logarithms, and functions, through series, trigonometry and graphing, and finish with an introduction to the elements of calculus and statistics. The course will utilize Excel as platform for calculating and graphing numerical examples of the problems presented. We expect students in this course to emerge with confidence in the basic use of mathematics commonly applied to investigate and model the natural world. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

GEOL 301. Introduction to Oceanography. 3 Credits. N
The online course is an introduction to the earth and its oceans, including a discussion of the history of ocean exploration using the approach of the scientific method. The course will explore theories that describe the origin of the solar system, the earth, the atmosphere, and the oceans, in addition to a discussion of the origin of life on the earth. The course will cover the essential physics, chemistry, geology, biology, and the concepts of plate tectonics, as applied to understanding the oceans and seas. This course cannot be taken if a student has completed GEOL 302.

GEOL 302. Oceanography. 4 Credits. NE N LFE
An introduction to the origin, nature, and dynamics of the world's oceans, including aspects of geology, chemistry, biology, physics, and meteorology that are involved in ocean processes. The relations between the oceans and humans in the past, present, and future, and instruction in scientific reasoning as it applies to oceanography. Laboratory exercises in critical thinking about oceanography. This course cannot be taken if a student has completed GEOL 301. Prerequisite: An introductory science course.

GEOL 304. Historical Geology. 3 Credits. N
An introduction to the physical and biological history of the Earth, the methods used to decipher earth history, and the development of the geological sciences. Concepts of lithostratigraphy, chronostratigraphy and biostratigraphy, and methods of analysis of stratigraphic data focus on the interpretation of Earth history. Prerequisite: GEOL 101 and GEOL 103.

GEOL 311. Mineralogy and Structure of the Earth. 3 Credits. N LFE
Basic identification and properties of rocks and minerals in the context of whole-earth structure and evolution. Includes basic chemical equilibria for rock and mineral systems and their bearing on processes involved with formation and evolution of Earth's crust, mantle, and core. Two lectures and one lab per week. Prerequisite: GEOL 101, CHEM 130, and eligibility for MATH 125 or MATH 115.

GEOL 312. Mineral Structures and Equilibria Laboratory. 1 Credit. U LFE
A laboratory to accompany GEOL 311. Presents more rigorous analysis of the structures, compositions, and chemical equilibria governing the formation and stability of common rock-forming mineral systems. Prerequisite: GEOL 311 (may be taken concurrently), CHEM 130, and eligibility for MATH 125 or MATH 115.

GEOL 315. Gemstones. 3 Credits. NE N
The properties, occurrence, description, determination, mineral affinities, and legend and lore of gems, ornamental stones, and gem materials.

GEOL 316. Geochemistry. 3 Credits. N
The course is intended to be an introduction to all types of geochemistry. It focuses on the chemistry of the natural world and the chemical evolution of the Earth over geological time. The course is composed of three modules: (a) geochemical fundamentals; (b) natural and anthropogenically perturbed aspects of the Earth's hydrosphere and its interaction with surficial rocks, sediments, soils, the biosphere and the atmosphere and (c) the origin and evolution of Earth (crust-mantle-core) and the solar system through nuclear and high temperature chemical processes. Prerequisite: GEOL 101, CHEM 130 or 190; and eligibility for MATH 115.

GEOL 331. Sedimentology and Stratigraphy. 4 Credits. N LFE
Basic principles used in the study of sedimentology and stratigraphy. Physical, chemical, and biological processes in sedimentary environments applied to the recognition of the depositional environment, preservation, and alteration of sedimentary rocks. Field and laboratory study of sedimentary rocks with emphasis on interpretation of original depositional environments and preservation in the stratigraphic record. Prerequisite: GEOL 101 and GEOL 103; and GEOL 304 or taken concurrently.

GEOL 332. Sedimentology for Petroleum Engineers. 4 Credits. N
This course is designed for Petroleum Engineering majors. It covers basic principles used in the study of sedimentary environments. Topics include classification of sedimentary rocks, diagenesis and the alteration of sedimentary rocks. Surface processes and recognition of depositional environments in the rock record is emphasized. Basic concepts of stratigraphy are introduced. Emphasis is placed on practical examples relating to petroleum reservoirs. Lecture, lab and field trips. Prerequisite: GEOL 101 and GEOL 103 and Petroleum Engineering Major.

GEOL 351. Environmental Geology. 3 Credits. NE N
An introductory course dealing with the implications of geologic processes and materials for civilization. Topics to be considered include: geologic hazards such as floods, landslides, earthquakes, and volcanism; the availability of water, mineral, and energy resources; and the environmental impact of resource utilization. The importance of
recognizing geologic constraints in land use planning and engineering projects is emphasized and illustrated by examples.

**GEOL 360. Field Investigation. 2 Credits. N**
Summer session. A field-geology course that provides beginning geology students with an initial understanding of the nature of geological evidence in the field, the breadth of geological phenomena, and the importance of the interplay of information from many geological disciplines in solving problems. Given at various geologically diverse locations. Fee. Prerequisite: GEOL 101.

**GEOL 370. Study Abroad in Greece: Natural Environment and Civilizations. 3 Credits. N**
This course examines the profound influence of the natural environment on the development of civilizations and the course of history. Geologic processes responsible for natural resources, water, landscapes, natural hazards and climate are presented in the context of their impact on ancient Greek society. The class visits sites of geologic and historic interest such as Athens, Delphi, Mycenae and the Aegean Sea islands including Santorini volcano. Examples from other eras and regions of the world are discussed along with present-day analogues. Prerequisite: An introductory geology course or permission of the instructor.

**GEOL 391. Special Studies in Geology. 1-6 Credits. N**
Special reports upon subjects in which students have a particular interest. Prerequisite: Fifteen hours of geology.

**GEOL 399. Senior Honors Research. 2-5 Credits. N**
Normally two to five hours in any one semester with a maximum of eight hours. An undergraduate research course, in any of the fields of geology, open by permission of the department to seniors in the College who have an average grade of B or higher in geology courses. Prerequisite: Thirty hours of geology, five of which may be taken concurrently with this course.

**GEOL 501. Simple Error Analysis with Matlab. 2 Credits. NE N**
This course covers basic error analysis as it applies to geology. The course will emphasize the description and propagation of errors in data collection and reduction. Subjects include: how to report data and associated errors, error propagation in simple and complex equations, the Normal, Gaussian, and Poisson distributions, linear and higher order regression, and X-squared test. Prerequisite: MATH 125.

**GEOL 502. Linear Algebra for Earth Scientists. 2 Credits. N**
This course covers basic linear algebra as it applies to geology and emphasizes the description and use of linear algebra to solve geologic problems. Subjects include: how to solve systems of equations, determinants, inversion, vector spaces, matrix manipulation, eigenvectors and values, least squares solutions, and orthogonality. Prerequisite: MATH 125.

**GEOL 503. Numerical Methods in the Earth Sciences. 2-3 Credits. N**
The class will provide an introduction to writing and testing code in the numerical computing environment MATLAB, using examples from Earth Science disciplines to introduce basic concepts and develop progressively more complex code. Prerequisite: MATH 125 and prior completion or co-enrollment in GEOL 502.

**GEOL 504. Inverse Problems for Geoscientists. 3 Credits. N**
This course will cover a variety of mathematical methods for fitting models of underlying physical processes to data. This course is aimed specifically at geoscientists, with examples taken from geophysical problems such as seismic tomography. The specific topics to be covered will vary a bit based on the interests of those in the class. We are sure to cover Linear Regression and Least Squares, Tikhonov Regularization, and bounded constraints. Other topics include Kalman Filters for time-dependent inversion of time series data, Markov-Chain Monte Carlo Methods from non-linear problems, and other non-linear optimization methods. Problem sets will be assigned in MATLAB, previous MATLAB experience highly recommended. Prerequisite: GEOL 501 OR MATH 526; GEOL 502 OR MATH 290 or MATH 291; MATH 220 or MATH 320 equivalent; GEOL 503 or equivalent MATLAB experience.

**GEOL 511. Raman Spectroscopy of Crystalline Solids. 3 Credits. N**
This course introduces students to Raman scattering in crystalline solids. This class with cover light and polarization of light, phonons and magnons, Raman scattering, Raman Tensor, wave vectors and k space, reciprocal space and Brillouin zones (and zone edge), group theory and character tables, polarized Raman scattering (symmetry of zone center phonons), Frohlich intraband electro-optical coupling and other multi-phonon Resonance Raman mechanisms in crystalline solids, and phonon confinement in nanomaterials. Prerequisite: GEOL 311 or PHSX 212.

**GEOL 512. Igneous and Metamorphic Petrology. 3 Credits. N**
The study of minerals, rocks and fluids within the earth's crust and mantle to elucidate their mechanisms of formation and the pressure-temperature-composition conditions within the earth. The course emphasizes equilibrium thermodynamics, phase equilibria, fractionation mechanisms, tectonic control of petrogenesis, and quantitative analysis of mineral parageneses. Prerequisite: GEOL 311 and first semester calculus, or permission of instructor.

**GEOL 513. Petrology Laboratory. 1 Credits. U LFE**
A laboratory course to accompany GEOL 512. Material covered will include the use of the polarizing microscope in study of rocks in thin sections; identification of rock-forming minerals in thin section; study of textures as guides to the crystallization process; calculations of chemical changes during fractional crystallization and partial melting. Students will also make extensive study of igneous and metamorphic rocks in hand specimens, accompanied by thin section study, with emphasis on composition, texture, and structure. Students must co-enroll in GEOL 512. Prerequisite: GEOL 312. Concurrent enrollment in GEOL 512 required.

**GEOL 521. Paleontology. 3 Credits. N**
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as BIOL 622.) Prerequisite: BIOL 100 or BIOL 152 or GEOL 105 or GEOL 304.

**GEOL 523. Paleontology Laboratory. 1 Credits. U LFE**
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as BIOL 623.)

**GEOL 524. Mammalian Paleontology. 3 Credits.**
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as BIOL 524.) Prerequisite: One of the following: BIOL 225, BIOL 412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor.

**GEOL 525. Geobiology: The Coevolution of Life and Rocks. 3 Credits. N**
This course is an exploration of the parallel evolution of life and the Earth. In the almost 4 billion years since life first appeared, biological processes have been influencing and been influenced by physical and chemical processes in the atmosphere, cryosphere, hydrosphere, and inside the Earth. Microbial processes helped form fossils, reefs, and the oxygen we all breathe; the traces microbes leave behind in the rock record inform
opportunities and impacts of energy systems that exist within and socioeconomic and environmental impacts. You will analyze different technologies and policies to evaluate options for energy usage and its impacts.

GEOL 533. Shales and Other Mudstones. 3 Credits. N
This course defines mudstones and shales. Deposition and constituents of fine-grained sediment: geochemistry, diagenesis and lithification of such deposits. Organic constituents of mudstone and their function as sources of crude oil and natural gas. Petrophysics and mechanical properties of mudstones and their potential as reservoirs of hydrocarbons. Not open to students with credit in GEOL 733. Prerequisite: GEOL 331.

GEOL 535. Petroleum and Subsurface Geology. 4 Credits. N LFE
A general study of the occurrence, properties, origin, and migration of petroleum. Studies of various oil fields and oil-bearing basins. Laboratory studies include well logs, subsurface mapping, and cross-sections. Prerequisite: GEOL 331 and either GEOL 562 or C&PE 327, or permission of instructor.

GEOL 536. Geological Log Analysis. 1 Credits. U
Application of well logging measurements to interpretation subsurface. Not open to students who have completed or are taking C&PE 528. Prerequisite: GEOL 101.

GEOL 537. Petroleum Reservoir Characterization. 3 Credits. N
Geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve oil recovery. Students who have completed GEOL 837 may not take GEOL 537 for credit. Prerequisite: GEOL 535 and permission of instructor.

GEOL 538. Basin Analysis. 3 Credits. N
Overview of sedimentary basins, mechanisms of basin formation, and basin evolution through time. Topics include lithospheric stretching and flexure to form sedimentary basins, geohistory analysis and backstripping, and thermal history and controls on basin fill. This course consists of lectures, exercises, and a field trip. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 738. Prerequisite: GEOL 331 and GEOL 562.

GEOL 539. Sequence Stratigraphy. 3 Credits. N
Principles and practical applications of sequence stratigraphy, the process of studying and correlating depositionally linked stratal successions in a chronostratigraphic framework. The concepts of depositional sequences, parasequences, bounding surfaces, systems tracts and incised valleys are studied through class exercises and a regional field trip. Seismic stratigraphic techniques and concepts are covered in the latter part of the course. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 739. Prerequisite: GEOL 331 or GEOL 332.

GEOL 541. Geomorphology. 4 Credits. N LFE
A critical study of landforms in relation to tectonics, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEOL 541.) Prerequisite: GEOL 101 and GEOL 103, GEOG 104 and GEOG 105, or GEOL 304 and GEOL 103.

GEOL 542. Energy and Society. 3 Credits. N
In this course, you will gain the necessary understanding of energy technologies and policies to evaluate options for energy usage and its socioeconomic and environmental impacts. You will analyze different opportunities and impacts of energy systems that exist within and between groups defined by national, regional, household, ethnic, and gender distinctions. Analysis of the range of current and future energy choices will be stressed, as well as the role of energy in determining local environmental conditions and global climate. Prerequisite: A course in Biology, Chemistry, Physics, or Geology.

GEOL 543. Environmental Ethics: A View from the National Parks. 3 Credits.
To what extent are our National Parks protected from pollution, invasive species, mining, climate change and tourism? In this course you will learn about the geologic processes that form our National Parks as well as the competing interests that stakeholders have on the land. Prerequisite: A course in Biology, Chemistry, Physics, or Geology.

GEOL 548. Geology and Culture of Polynesia. 3 Credits. N
Polynesia, encompassing over 1,000 islands in the southern and central Pacific Ocean, was the last region of the Earth to be settled by humans. Around 3000-1000 BCE, people from northwest Melanesia first reached one of these islands, and over the next few centuries spread to colonize all of the islands. However, despite the fact that all of the Polynesian islands were settled by colonists who stemmed from a single population with a shared culture, language, technology, and agriculture, the cultures of these islands are incredibly rich and varied. In this course we will examine some of the cultural mores and practices of the Polynesian islands, including how these were shaped by the climate, geology, soil, hydrology, and marine resources of each individual island. In this course we will examine these factors and assess their potential impact on the cultures present in the region. Prerequisite: A course in Biology, Chemistry, Physics, or Geology.

GEOL 552. Introduction to Hydrogeology. 3 Credits. N

GEOL 554. Contaminants in Groundwater. 3 Credits. N
This course introduces the basics of groundwater flow, water quality, and contaminant transport from a qualitative perspective. The course also surveys common groundwater pollutants, such as heavy metals, organic compounds, radionuclides, salts, non-aqueous phase liquids, risk analysis, and forensic hydrogeology. Students are expected to work together to complete weekly reading assignments. A course field trip forms the basis for a term report that is expected to incorporate concepts and tools covered during the lectures and readings. This course requires no calculations, but mathematical and chemical terms are presented. Prerequisite: One semester of general chemistry, and at least one 100 level course or higher in Geology or physical geography (GEOG 104 or GEOG 105), or permission of the instructor.

GEOL 555. Climate Science. 3 Credits. N
This course explores the science of climate change. Students will learn how the climate system works; what factors cause climate to change across different time scales and how those factors interact; how scientists use models, observations and theory to make predictions about future climate; and the possible consequences of climate change for our planet. Students will learn how climate change today is different from past climate cycles and how satellites and other technologies are revealing the global signals of a changing climate. Finally, the course looks at the connection between human activity and the current warming trend and considers
some of the potential social, economic and environmental consequences of climate change. Prerequisite: A course in Biology, Chemistry, Physics, Environmental Studies, Geography, or Geology.

GEOL 556. Field Methods in Hydrology. 3 Credits. N
The course offers an overview on basic field methods for characterization of hydrologic systems. Topics to be covered include physical and chemical characterization techniques, such as: how to measure water levels; perform single well and aquifer tests; unsaturated zone parameterization; inorganic, organic, isotopic, and dissolved gas characterization; groundwater-surface water characterization techniques, and geophysical techniques for hydrogeology. Additionally, the class will visit a variety of sites of hydrogeologic interest. Prerequisite: GEOL 552 or permission from instructor.

GEOL 557. Environmental Site Operations, Management, and Safety: HAZWOPER Health and Safety Standards. 3 Credits.
On-site investigation of contaminated soil and water requires training in site operations and responses to emergencies involving releases of hazardous substances for scientists, workers, and employers. This course will introduce contaminant toxicology, hazard identification, site operations and management, and provide an overview of related regulations. Monitoring equipment, drum and container sampling, decontamination, and confined space designations will be taught. General safety hazards, personal protective equipment and levels of protection, drill rig safety, hazard communication and medical surveillance, and development of health & safety plans, will also be addressed. The course satisfies the Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response (HAZWOPER) 40-Hour requirement, following General Industry (29 CFR 1910.120) and Construction Industry (29 CFR 1926.65) regulations. A required "hands on" training exercise is conducted at Edwards campus on the first Saturday in March. Prerequisite: CHEM 130 and GEOL 101, GEOG 104, BIOL 100 or an introductory engineering course.

GEOL 558. Applied Groundwater Modeling. 3 Credits. N
This course focuses on how to construct simple to complex computer models of groundwater systems and systems in which water flows between groundwater and surface water bodies such as springs, streams and lakes. We consider water flow, transport of solutes, density effects (from saltwater or brines), and the use of groundwater and surface water (demand-driven, supply-limited problems), and managed aquifer recharge (MAR). We consider three aspects of model development: (1) how to compare the computer models we construct to the systems modelers intend them to represent, (2) how accurate the models are likely to be and how uncertainty can be quantified, and (3) how useful the models are in practice. Prerequisite: GEOL 101 or permission from instructor.

GEOL 560. Introductory Field Geology. 3 Credits. N
Summer session. The study of the principles of field geology and the application of field methods to solve geological problems. Includes use of topographic maps and aerial photographs for geological mapping, the study of stratigraphic methods by measuring sections, and working field trips to areas of regional geological interest. Given at the University of Kansas Geology Field Camp near Canon City, Colorado. Fee. Prerequisite: GEOL 331, GEOL 360, and GEOL 562, or consent of instructor.

GEOL 561. Field Geology. 3 Credits. N
Summer session. The application of the principles of field geology to solve complex geological problems in the field. Given at the University of Kansas Geology Field Camp near Canon City, Colorado, or at other sites as appropriate. Fee. Prerequisite: GEOL 560.

GEOL 562. Structural Geology. 4 Credits. N LFE
A study of primary and secondary rock-structures and their genesis. Includes techniques of structural analysis and introduces mechanics of rock deformations. Lectures, laboratory, and required field trip. Prerequisite: GEOL 311; PHSX 111, PHSX 114, or PHSX 211 and PHSX 216; and MATH 115 or MATH 126.

GEOL 563. Tectonics and Regional Geology. 3 Credits. NE N
Topics vary with demand and include fundamental features of plate tectonics, interpretation and distribution of regional geology of mountain belts with emphasis on tectonic setting and processes, regional geology, and tectonics of selected mountain belts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GEOL 763. Prerequisite: GEOL 562, GEOL 512, or GEOL 331, and GEOL 572.

GEOL 572. Geophysics. 3 Credits. N
Introductory study of gravitational, magnetic, seismic, electrical, and thermal properties of the earth. Measurements, interpretation, and applications to exploration, earth structure, and global tectonics. Prerequisite: An introductory course in geology; MATH 116 or MATH 126; and PHSX 115 or PHSX 212 and PHSX 236. PHSX 115 or PHSX 212 may be taken concurrently.

GEOL 575. Seismic Exploration. 3 Credits. N
Application of seismic reflection and refraction techniques to the description of near-surface geology and the exploration for energy and mineral resources. Theory of seismic information, data collection, data processing using computers, and geologic interpretation. Prerequisite: A course in computer programming, either FORTRAN or C, which may be taken concurrently. An introductory geophysics course, such as GEOL 572.

GEOL 578. Seismic Data Analysis and Interpretation. 3 Credits. N
Interpretation methods applied to seismic exploration and reservoir characterization. Topics include: rock physics, the convolutional model, synthetic seismograms, seismic response of hydrocarbon reservoirs, resolution, seismic velocity, depth conversion, seismic attributes, AVO, inversion, seismic anisotropy, 3-D & 4-D interpretation, S-wave and converted wave interpretation, laboratory use of commercial seismic interpretation software. Prerequisite: GEOL 572 or consent of the instructor.

GEOL 579. Hydrogeophysics. 3 Credits. N
This course is designed to introduce students to current hydrogeophysics research. Students will learn about determining, predicting, and studying the physical properties and hydrologic processes associated with groundwater flow, contaminant transport, and microbimineral interactions using geophysical measurements at different scales. This course combines lectures, literature review and discussion, and student presentations. Not open to students with credit in GEOL 779. Prerequisite: GEOL 101 or GEOL 121.

GEOL 591. Topics in Geology: ____. 1-5 Credits. N
May include lectures, discussions, readings, laboratory, and field work in geology. Will be given as needed. May be taken more than once.

GEOL 701. Graduate Students Professional Skills & Ethics. 2 Credits.
Graduate students develop a set of skills that promote their success in subsequent professional endeavors during their time in degree. Acquiring these skills early in their graduate training can facilitate progress through their degree as well as enrich preparation for their professional activities. The course will cover best teaching practices in the classroom and field, scientific ethics, diversity and inclusion in the workplace, and work-life balance as well as an introduction to basic KU Geology administrative
structure. In the second half of the semester, students will develop, peer review, and complete a draft of the student's research proposal.

GEOL 715. Geochemistry. 3 Credits.
Application of chemical equilibria and kinetics to geological environments and processes, with emphasis on processes involving solution equilibria. Includes introduction to thermodynamic aspects of equilibria.

GEOL 717. Geochronology. 3 Credits.
Principles and applications of natural radioactive systems for geochronology and cosmochronology, including use of radiogenic isotopes as geochemical tracers. Prerequisite: GEOL 512 or consent of instructor.

GEOL 718. Stable Isotope Geochemistry. 1-3 Credits.
Principles and applications of equilibria among stable isotopes in the geological environment, with emphasis on the isotopic systems of hydrogen, carbon, and oxygen. Prerequisite: GEOL 715 or consent of instructor.

GEOL 723. Museum Internship. 1-6 Credits.
Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, ANTH 799, and MUSE 799.)

GEOL 728. Paleopedology. 3 Credits.
Paleopedology is the study of ancient soils preserved in the geologic record. The course covers concepts of paleopedology and its applications to the interpretation of paleoenvironmental, paleoecologic, and paleohydrogeologic settings and its use in sequence stratigraphy and paleoclimatology. Prerequisite: GEOG 535 or GEOL 331; or consent of the instructor.

GEOL 729. Ichnology. 3 Credits.
Ichnology is the study of organism-substrate interactions. The class will cover concepts and applications of ichnology in the marine and continental realms, including the behavior of such organisms as microbes, plants, invertebrates, and vertebrates preserved in the geologic record as trace fossils. Ichnology is applied in geology and in the petroleum industry to interpret ancient environments, hydrogeology, ecology, and climate. Prerequisite: GEOL 331 or GEOL 521; or consent of the instructor.

GEOL 731. Terrigenous Depositional Systems. 4 Credits.
Processes that operate in recent sedimentary environments, responses of sediment to those processes, and criteria for determining depositional environments of ancient sedimentary rocks. Lectures, practical exercises, and field trips. Prerequisite: GEOL 331.

GEOL 732. Carbonate Depositional Systems. 3 Credits.
Patterns and processes of contemporaneous carbonate deposition and diagenesis, depositional models; applications to interpretation of carbonate rocks. Lecture, discussion, laboratory and field trips.

GEOL 733. Shales and Other Mudstones. 3 Credits.
This course defines mudstones and shales. Deposition and constituents of fine-grained sediment; geochemistry, diagenesis and lithification such of deposits. Organic constituents of mudstone and their function as sources of crude oil and natural gas. Petrophysics and mechanical properties of mudstones and their potential as reservoirs of hydrocarbons. Not open to students with credit in GEOL 533. Prerequisite: GEOL 331.

GEOL 738. Basin Analysis. 3 Credits.
Overview of sedimentary basins, mechanisms of basin formation, and basin evolution through time. Topics include lithospheric stretching and flexure to form sedimentary basins, geohistory analysis and backstripping, and thermal history and controls on basin fill. This course consists of lectures, exercises, and a field trip. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 538. Prerequisite: GEOL 331 and GEOL 562.

GEOL 739. Sequence Stratigraphy. 3 Credits.
Principles and practical applications of sequence stratigraphy, the process of studying and correlating depositionally linked stratal successions in a chronostratigraphic framework. The concepts of depositional sequences, parasequences, bounding surfaces, systems tracts and incised valleys are studied through class exercises and a regional field trip. Seismic stratigraphic techniques and concepts are covered in the latter part of the course. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 538. Prerequisite: GEOL 331 or GEOL 332.

GEOL 751. Physical Hydrogeology. 3 Credits.
Study of fluid flow in subsurface hydrologic systems. Investigation of the ground water environment including porosity, and hydraulic conductivity and their relationship to typical geologic materials. Examination of Darcy's law and the continuity equation leading to the general flow equations. Discussion of typical hydraulic testing methods to estimate aquifer parameters in various situations and apply these to water resource problems. Study of the basic mechanisms that determine the behavior of typical regional flow systems. (Same as CE 752.)

GEOL 753. Chemical and Microbial Hydrogeology. 3 Credits.
Lecture and discussion of chemical and microbiological controls on groundwater chemistry. Topics include thermodynamic and microbiological controls on water-rock reactions; kinetics; and microbiological, chemical and isotopic tools for interpreting water chemistry with respect to chemical weathering and shallow diagenesis. Origins of water chemistry, changes along groundwater flow paths, and an introduction to contaminant biogeochemistry will be discussed through the processes of speciation, solubility, sorption, ion exchange, oxidation-reduction, elemental and isotopic partitioning, microbial metabolic processes and microbial ecology. An overview of the basics of environmental microbiology, including cell structure and function, microbial metabolism and respiration, microbial genetics and kinetics of microbial growth will be covered. (Same as CE 753.) Prerequisite: One year of chemistry, one year of calculus, one year of biology, an introductory course in hydrogeology, or consent of the instructor.

GEOL 754. Contaminant Transport. 3 Credits.
A study of the transport of conservative and non-conservative pollutants in subsurface waters. Case studies are used to illustrate and develop a conceptual understanding of such processes as diffusion, advection, dispersion, retardation, chemical reactions, and biodegradation. Computer models are developed and used to quantify these processes. (Same as CE 754.) Prerequisite: Introductory Hydrogeology or consent of instructor.

GEOL 755. Site Assessment. 3 Credits.
Site Assessment encompasses both the academic and applied aspects of environmental geology. The student is presented with the historical, regulatory and risk characteristics of environmental issues as well as specific geologic principles such as GIS and remote sensing, geophysics, geomorphology and surface and groundwater practices. Site assessment concepts include surface and subsurface sampling, analyses and interpretations, conceptual site models, environmental geologic forensics, and environmental Phase I site assessments (USEPA and ASTM). Environmental geology project management principles and practices are examined in detail. These core aspects of the course form the basic structure in understanding and applying environmental remediation and state-of-the-art/state-of-the-practice processes. Case studies are researched and analyzed for the assessment phase of the program.

GEOL 758. Applied Groundwater Modeling. 3 Credits.
This course focuses on how to construct simple to complex computer models of groundwater systems and systems in which water flows between groundwater and surface water bodies such as springs, streams and lakes. We consider water flow, transport of solutes, and density effects (from saltwater or brines). We consider the conjunctive use of groundwater and surface water (demand-driven, supply-limited problems), and managed aquifer recharge (MAR). We consider three aspects of model development: (1) how to compare the computer models we construct to the systems models we intend them to represent, (2) how accurate the models are likely to be and how uncertainty can be quantified, and (3) how useful the models are in practice. (Same as CE 731.) Prerequisite: GEOL 751 or CE 752, or approved by the professor.

**GEOL 761. Topics in Regional Field Geology: _____, 1-5 Credits.**
A detailed field study of a carefully selected area that includes features of several phases of geology. Field trip fee. Prerequisite: GEOL 561 or equivalent and departmental approval.

**GEOL 763. Tectonics and Regional Geology. 3 Credits.**
Topics vary with demand and include fundamental features of plate tectonics, interpretation and distribution of regional geology of mountain belts with emphasis on tectonic setting and processes, regional geology, and tectonics of selected mountain belts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GEOL 563. Prerequisite: GEOL 562, GEOL 512, or GEOL 331, and GEOL 572.

**GEOL 771. Advanced Geophysics: _____, 1-3 Credits.**
Topics vary with demand and include heat flow, wave propagation, synthetic seismograms, groundwater exploration, geothermal exploration, electrical methods in exploration, rock mechanics-geotechnophysics, rock magnetism, geomagnetism, paleomagnetism, geophysical inverse theory, and others upon sufficient demand. May be repeated for different topics. (Same as PHSX 727.) Prerequisite: GEOL 572 or consent of instructor.

**GEOL 772. Geophysical Data Analysis. 3 Credits.**
Fourier analysis, sampling theory, prediction and interpolation of geophysical data, filtering theory, correlation techniques, deconvolution. Examples will be chosen from various fields of geophysics. Prerequisite: MATH 250/AE 250/ARCE 250/CE 250/C&PE 250/ECECS 250/EPHX 250/ME 250 and GEOL 572.

**GEOL 773. Seismology. 3 Credits.**

**GEOL 779. Hydrogeophysics. 3 Credits.**
This course is designed to introduce students to current hydrogeophysics research. Students will learn about determining, predicting, and studying the physical properties and hydrologic processes associated with groundwater flow, contaminant transport, and microbeminal interactions using geophysical measurements at different scales. This course combines lectures, literature review and discussion, and student presentations. Not open to students with credit in GEOL 579.

**GEOL 780. Conservation Principles and Practices. 3 Credits.**
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**GEOL 781. Introduction to Museum Exhibits. 3 Credits.**
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, BIOL 787, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**GEOL 783. Museum Management. 3 Credits.**
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**GEOL 784. Introduction to Museum Public Education. 3 Credits.**
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**GEOL 785. Introduction to Collections Management and Utilization. 3 Credits.**
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, BIOL 798, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**GEOL 791. Advanced Topics in Geology: _____, 1-5 Credits.**
Selected offerings in geology. Intended primarily for graduate students and qualified seniors. May include lectures, discussions, reading, laboratory and field work. May be taken more than once.

**GEOL 814. Professional Science Masters Environmental Geology Capstone I. 1 Credits.**
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student’s place of employment for full-time employees, or an internship or similar individual project for full-time students or students who are not employed in the area of study. This course will initiate the process of project development and will be taken prior to a student’s final semester. This project is to be continued in GEOL 815 in the last semester of the student’s graduate career. Prerequisite: Minimum 20 credit hours completed in program.

**GEOL 815. Professional Science Masters Environmental Geology Capstone II. 2 Credits.**
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, an internship or similar individual project for full-time students or students who are not employed in the area of study. The students will compile their project results in a formal written report and will give an oral presentation to the Environmental Studies faculty (2 minimum) and the student's employer or mentor. Prerequisite: GEOL 814.

GEOL 837. Geoscience and Petroleum Engineering. 3 Credits. Advanced geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve recovery. Students who have completed GEOL 537 may not take GEOL 837 for credit.

GEOL 851. Field and Laboratory Methods: Physical Hydrogeology. 1 Credits. Introduction to field and laboratory methods commonly used in physical hydrogeology. Practical experience with common water level measurement techniques, various well pumping techniques, well installation and geologic core sampling, and hydraulic testing. Prerequisite: Introductory course in hydrogeology and familiarity with computer use for data processing, or consent of instructor.

GEOL 852. Field and Laboratory Methods: Contaminant Transport. 1 Credits. Introduction to laboratory methods for evaluating reactive transport parameters, followed by development and implementation of computer models. Students will gain experience building models starting from basic transport equations using a spreadsheet platform and, where appropriate, commercial software packages. Prerequisite: GEOL 751 (may be taken concurrently) or equivalent, or consent of the instructor.

GEOL 853. Field and Laboratory Methods: Chemical Hydrogeology. 1 Credits. Practical experience in measuring unstable chemical parameters in groundwater, including pH, Eh, dissolved oxygen, temperature, alkalinity, specific conductance, and turbidity. Practical experience in collecting water samples for chemical analysis, choosing appropriate sample containers and preservation methods, and special techniques for collecting samples for determination of parameters sensitive to environmental changes such as oxygen level or temperature. Prerequisite: GEOL 753 (may be taken concurrently) or equivalent, or consent of the instructor.

GEOL 855. Field and Laboratory Methods: Environmental Geophysics. 1 Credits. Introduction to the application of geophysical methods to environmental investigations. Practical experience in designing, conducting, and interpreting information obtained using downhole and shallow surface geophysical methods will be addressed. Prerequisite: Introductory course in hydrogeology or consent of instructor.

GEOL 856. Field and Laboratory Methods Special Topics: ____. 1 Credits. Practical experience in a special topic in Environmental Geology. Course may be repeated if topic varies.

GEOL 891. Special Studies in Geology. 1-5 Credits. May be repeated.

GEOL 899. Master’s Thesis. 1-12 Credits. Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing.

GEOL 999. Doctoral Dissertation. 1-12 Credits. Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing.

Global & International Studies Courses

CEAS 200. Topics in East Asian Studies: ____. 1-3 Credits. U An introductory interdisciplinary topics course addressing contemporary issues related to one or more East Asian countries. Format and content will vary. Does not count toward the EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes.

CEAS 500. Seminar in East Asian Studies: ____. 1-3 Credits. U An interdisciplinary seminar addressing contemporary issues related to one or more East Asian countries. Prerequisites to be determined by instructor(s) on the basis of course content. Does not count toward the EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes.

CEAS 610. Minorities in Japan. 3 Credits. S This course offers a sociological and historical exploration of Japan's minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan's minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels, with additional assignments required at the 600-level. (Same as EALC 610.) Prerequisite: An introductory East Asian Studies course or consent of the instructor.

CEAS 701. Professionalization Seminar in East Asian Studies. 3 Credits. This graduate seminar's main objective is to prepare students to be professional scholars and educators in East Asian Studies and in global contexts. The course focuses on development of professional networks, co-development of ideas, and opportunities for collaboration with other professionals. Students will develop and refine a wide range of skills crucial to students' success in graduate school and their careers. Students will organize workshops to present their work and to generate materials for conferences, peer reviews, grant writing, CV preparation, job interviews, and much more. Graduate students with nonacademic as well as academic career goals are welcome in the seminar.

CEAS 704. Contemporary East Asia. 3 Credits. This graduate seminar explores rapidly changing societies in contemporary East Asia, particularly China, Japan, and Korea. The course provides a critical overview of East Asia and its diversity and complexity using cross-cultural perspectives and interdisciplinary social science approaches, and situates East Asian societies in the context of globalization. (Same as EALC 704.)

CEAS 710. Research Design for International Area Studies. 3 Credits. This graduate course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During
the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as GISt 710 and LAC 710.) Prerequisite: Consent of instructor.

CEAS 788. Topics in East Asian Studies: ______. 3 Credits.
An interdisciplinary graduate seminar addressing contemporary issues related to one or more East Asian countries. Course may be taken more than once if topic varies. This course may be cross-listed or meet with a 500 level seminar. Enrollment in this course will require additional assignments beyond those required of a 500 level seminar. Prerequisite: Graduate standing or consent of instructor.

CEAS 802. Research Seminar. 3 Credits.
Students will work with the instructor and, when appropriate, an additional faculty advisor to design, research and write up a research paper on an East Asian topic of their choosing. Students enrolling in this course are expected to have taken a social science research methods class prior to taking this course and to apply those methods to the research process. A core course for the MA in Contemporary East Asian Studies. Prerequisite: Permission of the instructor.

CEAS 898. Thesis and Research Project Writing. 3 Credits.
This course is primarily designed to guide MA students through the writing development of their concluding graduate research, whether a final graduate research project or a thesis. Students will learn and apply the practices of effective communication and writing of research while completing the various components of their final projects. The intention of the class is to help students complete a high quality draft of their research, though deadlines and assignment may relate to practice in graduate level research writing in general. Within an interdisciplinary framework and an understanding of rhetorical distinctions across various epistemologies, students will practice relevant modeling of academic literature reviews, transparency in communicating research practices, analyzing/interpreting texts, data, or other information, and introducing and concluding their work. (Same as GIst 898,) Prerequisite: GISt 710.

Global & International Studies Courses

EURS 150. Study Abroad Topics in European Studies: ______. 1-5 Credits. U
This course is designed for the study of special topics in European Studies at the 100-level (Freshman/Sophomore level). Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in European Studies. May be repeated for credit if content varies.

EURS 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in European Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

EURS 302. European Culture and Society 1945 to Present. 3 Credits. HT H
The course provides historical, cultural, and political overviews of Europe since 1945 with particular emphasis on the contribution of French and Italian culture and society. The course emphasizes Europe's contribution to Western intellectual thought, social movements, arts and literature, and global society.

EURS 315. Magic, Murder, Monsters: German Literature and the Modern Era. 3 Credits. H
Introduction in English to German writers 1750-present featuring texts about the supernatural and monstrous. Students examine how encounters with magic and construction of monsters reflect particular cultural anxieties, fears, and ideals as relating to historical developments, industrialization, and scientific advancement. Discussion of themes such as gender, sexuality, class, race, empire, war, politics, and technology in German-speaking Europe. Readings include works in translation by influential German writers. Open to first-year students and non-majors. GERM 315 is required for admission to all courses beyond GERM 402 except GERM 462. (Same as GERM 315.)

EURS 348. Politics of Western Europe. 3 Credits. W
This course is an introduction to European politics, pursuing three goals. First, the class is designed to introduce you to a variety of different aspects of European political systems, their main political actors, and basic historical traditions. Our second objective focuses on discussing contemporary dynamics and transformations in the nature of political participation and representation across European political systems. Third, you will become acquainted in some detail with the institutions and operating procedures of four political systems that we focus on: France, Germany, Great Britain, and the European Union. These systems represent the range of traditions we encounter in Western and Central Eastern Europe so they serve as an example of how European political work. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS 648. (Same as POLS 348.) Prerequisite: POLS 150.

EURS 350. Study Abroad Topics in: ______. 1-5 Credits. H
This course is designed for the study of special topics in European Studies at the Junior/Senior level. Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in European Studies. May be repeated for credit if content varies.

EURS 396. Hitler and Nazi Germany, Honors. 3 Credits. H
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as HIST 396 and JWSh 396.) Prerequisite: Membership in University Honors or consent of instructor.

EURS 430. European Civilization in World Context: ______. 3 Credits. HL H
An introduction to the literature of encounters between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as Hum 430.) Prerequisite: Hum 114 or Hum 204 and Hum 115 or Hum 205.

EURS 500. Seminar in European Studies. 3 Credits. H
Provides an interdisciplinary approach to the study of modern European civilization. By discussing both classic and contemporary, controversial readings each week and writing several papers during the semester, students acquire an understanding of the development of modern European culture and society and Europe's contemporary problems. Topics for discussions and papers are drawn from the following subjects: the economic and political integration of European states; modernism and anti-modernism in European culture; imperialism, migration, and ethnic and racial division in European society; democracy versus dictatorship; American-European relations; mass culture, urban development, and the welfare state; and contrasts and comparisons between European Cultures--East and West, North and South. Seminar discussions are led
by invited European Studies faculty as well as the instructor or instructors. Required of all European Studies majors. Prerequisite: Junior standing or consent of instructor.

**EPRS 501. Research for Honors in European Studies. 3 Credits.** W

Research for a European Studies honors project, on a topic chosen in conjunction with the faculty advisor. Emphasis on independent study and writing. Open to students with previous coursework that counts toward the European Studies co-major at the 400 level, an overall 3.25 GPA, and at least a B+ average in advanced work in European Studies. Prerequisite: At least one course for the EPRS co-major at the 400 level and permission of the Academic Director.

**EPRS 502. European Studies Honors Project. 3 Credits. H/W**

Continuation of EPRS 501. Student must defend completed honors project in an oral examination before a thesis committee of three faculty members. The committee determines whether the student earns Honors. See Departmental Honors section of catalog for more information. Prerequisite: EPRS 501.

**EPRS 504. Europe Today. 3 Credits. H**

An exploration of major social, political and economic developments post World War II including the rise of the European Union, the integration of Eastern and Western Europe, the growing role of Islam, attitudes towards the United States, and Europe's role in the world economy. Topics may vary based on current events. (Same as HUM 505.) Prerequisite: Junior or senior standing or consent of instructor.

**EPRS 507. Research in European Collections. 1-3 Credits. H**

This course allows students in the European Studies Co-Major and related disciplines to receive credit for research related to European Collections in one or more of the following institutions: Watson and Spencer Research Libraries, the Dole Institute, the Eisenhower and Truman Presidential Libraries, the U.S. Army Combined Arms Research and Foreign Military Studies Office at Fort Leavenworth, the Linda Hall Library in Kansas City, and the Winston Churchill Collection at the Westminster College Library in Fulton, Missouri. May be taken in place of EPRS 501 by European Studies Honors Students if taken for three credit hours. Permission of instructor necessary.

**EPRS 511. Topics in European Studies: ____. 3 Credits. H**

A study of significant themes, movements, or problems in European history, literature, politics, society, or culture. May also relate European issues to issues in other world areas (Africa, North America, Asia, etc.) May be repeated for credit when topic varies.

**EPRS 550. Classics of Peace Literature. 3 Credits. HL H**

A study of influential proposals for world peace from Erasmus' The Complaint of Peace (1515) to the 1995 Hague Appeal for World Peace. Selected writings by such authors as Erasmus, Hugo Grotius, Jean-Jacques Rousseau, Immanuel Kant, Henry Thoreau, Henri Dunant, Berthe von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin Luther King, Jr., are considered. (Same as HIST 550.) Prerequisite: HUM 204 or HUM 205.

**EPRS 565. The Literature of Human Rights. 3 Credits. H**

Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as GIST 560 and PCS 565.) Prerequisite: Junior/Senior standing or consent of instructor.

**EPRS 580. Directed Study. 1-3 Credits. H**

Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work is required.

**EPRS 604. The European Union. 3 Credits. S**

This course will introduce students to the politics of the European Union. The course will cover three closely connected topics. First, it will discuss the institutional make-up of the EU, such as the European commission, the European parliament, the European Council, and the European court of justice. It will assess how well these institutions deal with the growing importance of transnational issues, such as migration and economic policy issues. Second, the course will examine how national governments pursue national interests at the level of the European Union. Third, the class will study how well the EU represents the citizens of European countries. Finally, the course will assess the extent to which the EU has successfully developed into a supra-national federation. (Same as POLS 643.) Prerequisite: Sophomore standing or consent of instructor.

**Global & International Studies Courses**

**GIST 111. Mapping Our Changing World. 4 Credits. N LFE**

This course is an introduction to geospatial technologies. It focuses on the conceptual and technical aspects of mapping technologies that transform information about locations, people, objects, environments, events, and phenomena to digital representations of the world and as end-products of geospatial analysis. Topics covered include surveying, aerial photography and photogrammetry, satellite remote sensing, global positioning systems (GPS), geographic information systems (GIS), and thematic mapping. Students will learn how to acquire and develop geospatial data as the sources for mapping, the skills of analyzing and interpreting spatial information, and how geovisualization can be used in addressing real-world problems. (Same as GEOG 111.)

**GIST 139. The Global Cold War. 3 Credits. H**

This course provides an immersive introduction to the global Cold War and its legacies. It explores how the contest between capitalism and communism unfolded not only in the United States and the Soviet Union, but also in Asia, Africa, Europe, Latin America, and the Middle East. Through interactive lectures, discussions, and role-playing games, students will learn to "think globally," gain an understanding of imperialism, nationalism, and decolonization, and discover how the Cold War shaped culture, economics, politics, the environment, and the international system in ways that remain relevant today. (Same as HIST 139.)

**GIST 177. First Year Seminar: ____. 3 Credits. U**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Global & International Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**GIST 201. Topics in: ____. 1-3 Credits. U**

An interdisciplinary study of international topics. Designed especially for freshmen and sophomores. May be repeated for credit if content varies.

**GIST 203. Topics in Middle Eastern Studies: ____. 1-3 Credits. U**

An interdisciplinary study of topics related to the Middle East. Designed especially for freshmen and sophomores. May be repeated for credit if content varies.

**GIST 205. Muslim Lives: Politics, Culture, and Society. 3 Credits. S**

The course provides a general introduction to Muslim communities and societies by surveying some of the major aspects of Muslims' lived experiences from the early Islamic period to the modern globalized world. It will challenge the essentialized notion of a "Muslim world."
which is usually presented as a monolithic society. Through the course, students will develop a basic understanding of the rich diversity of Muslim communities in terms of cultural mores, religious practices, and sociopolitical conditions. Religious and sociopolitical practices will be analyzed in their ethical and moral perspectives. (Same as SLAV 205.)

GIST 210. Culture and Health. 3 Credits. H/W
This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 203 and GEOG 201.)

GIST 211. Culture and Health, Honors. 3 Credits. H/W
Honors version of AAAS 203, GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 204 and GEOG 202.)

GIST 220. Introduction to Global and International Studies. 3 Credits. S
This course provides an overview to the major approaches and themes involved in the study of world cultures, politics, and societies from a multi-disciplinary perspective. Topics of global importance, such as the construction and maintenance of cultures, comparative political systems, global and regional economies, popular culture, gender and the environment will be covered through their manifestations in particular regional and global contexts. Students will be challenged to address their own views and existing approaches to global dynamics from a critical and reflective perspective.

GIST 303. Language, Gender, and Sexuality. 3 Credits. S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, JWSH 305, SLAV 305 and WGSS 325.)

GIST 304. Globalization and Afro-Brazilian Culture. 3 Credits. W
During this study abroad experience, students will explore how Afro-Brazilian cultural elements, such as the music of Afro groups, the art form/martial art/dance capoeira, and the candomblé religion became realities around the world. Guest lecturers will present on topics such as Brazilian history, music, religion, dance, education, Carnival, and tourism. Planned site visits include temples of Afro-Brazilian religions such as candomblé and syncretic Catholic churches such as the Church of Our Lady of the Black Rosary. The program is based in Salvador, one of the Brazilian cities where African influence is the most visible and celebrated. This course and study abroad program is open to all majors.

GIST 305. World Indigenous Literatures. 3 Credits. NW H
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305 and ISP 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

GIST 306. Global Environmental Literature. 3 Credits. H
An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as ENGL 306 and EVRN 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

GIST 308. Key Themes in Modern Global History. 3 Credits. H
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as HIST 308.)

GIST 310. Modern Turkey: Culture and Society. 3 Credits. H/W
As a country that is geographically in the middle of a strategic global region, a key NATO ally, a candidate for EU membership, and representing a mix of democratic traditions, military coups, and authoritarian leaders combined with periods of rapid and drastic socioeconomic transformation, for one reason or another, Turkey seems to always be a country under the spotlight. This course is designed to give an overview of Modern Turkey and familiarize the student with its history, society and culture. Topics to be covered include the early republican period, ethnic and religious minorities, religion and secularism, music, cuisine, women, gender and sexuality, religious and national holidays, cinema and TV, among others. The primary purpose of this course is to help students develop necessary analytical and interpretive skills to identify, compare, and analyze Turkish cultural practices, products and perspectives as they relate to basic social, political, and historical contexts. No background knowledge of Turkey or the Turkish language is required. (Same as SLAV 310 and TURK 310.)

GIST 314. Globalization: History and Theory. 3 Credits. H
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as HIST 314.)

GIST 320. Love, Sex and Marriage in India. 3 Credits. H
This course addresses diverse aspects of the philosophies and expressions of intimacy and pleasure as found in India. Using old and new literature, including from the Kamasutra, as well as media, we examine the following: how and why in ancient times sensual pleasure was another path for ultimate bliss; how perspectives and traditions of intimacy have changed over time; diverse types of marriages; the culture and practice of arranged marriages; same-sex intimacy; and universal concepts of love.

GIST 321. Graphic Novels as Memory. 3 Credits. H
This course examines the interaction between literature and memory, in particular how authors respond to major historical events and contribute to shaping the collective memory of those events. Students will read
graphic novels inspired by memories of the Holocaust and Communism. Through the visual and textual mix of the graphic novel, we will consider the impact of historical upheavals on the lives of ordinary individuals, drawing connections to contemporary national and global socio-political problems. Students will write on these topics in a variety of academic and non-academic genres, including: journal, article summary, synthetic essay, analytical essay, and reflection essay/creative writing. (Same as SLAV 320.)

GIST 323. Environmental Dynamics in India. 3 Credits. S/W This course introduces students to the relationships the people of India have had with their landscape from ancient times to the present. Students will learn about diverse ecosystems and the indigenous peoples they have harbored from the high Himalayas altitudes to the coastal regions, from the desolate arid deserts to the rain forests of India. The class will discuss how the very nature of the relationship of the people with their land has changed over the long course history of South Asia with specific case studies of environmental challenges, failures and successes. Examples of possible cases include: the Chipko movement led by the women of the Himalayas to save their forests from loggers; the traditions of creating lakes and water conservation lifestyles in the arid region of Rajasthan; and nature worship and cases of leopards and tigers receiving protection by the very villages they terrorize. (Same as ANTH 323.)

GIST 325. Peoples and Cultures of South Asia. 3 Credits. S This course provides an introduction to the diversity of peoples in South Asia, including India, Pakistan, Nepal, Bangladesh and Bhutan. The particular cultures and language of the indigenous peoples in the region are highlighted through academic sources and the direct study of reproductions of these cultures in literature and film.

GIST 329. Israeli-Palestinian Conflict: An Introduction. 3 Credits. S This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. (Same as HIST 482, JWSH 329, and POLS 369.)

GIST 335. Iran Through Literature and Film. 3 Credits. W This course examines aspects of Iranian society through literature and film. Students will analyze selected Iranian texts in their historical, social, and political contexts to examine and gain a comprehensive understanding of the complex and pressing issues facing the modern Iranian society. The course will utilize nationalist, Marxist, feminist, and Islamist paradigms to provide a theoretical framework for discussions and to better understand the crosscurrent of ideas in contemporary Iran. No knowledge of Persian language required because all the texts will be available in English translation and subtitles.

GIST 350. Study Abroad Topics in: _______. 1-5 Credits. U This course is designed for the study of special topics in global and international studies at the junior/senior level. Course work must be arranged through the KU Office of Study Abroad and approved by a faculty adviser in Global and International Studies. May be repeated for credit if content varies.

GIST 354. Globalization: A Geographic Approach. 3 Credits. S This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as GEOG 354.)

GIST 355. International Women's Rights. 3 Credits. SC Women face discrimination and abuse around the world: at home, in the workplace, and in the public sphere. How are these systems of oppression connected? How are women working together for change, and what can you do to support their efforts? This course will investigate what feminist solidarity looks like around the world, with an emphasis on connections across different cultural and political contexts. (Same as WGSS 355.)

GIST 371. Environmental Geopolitics. 3 Credits. S This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GEOG 371.)

GIST 376. Immigrants, Refugees, and Diasporas. 3 Credits. H This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as HIST 376.)

GIST 420. Analyzing Contemporary Global Issues. 3 Credits. S/W This course enhances students’ ability to critically analyze the intricacies of current international issues through three core goals. First, the content of the course is unique each semester as it targets major international issues in the moment, so students gain an in-depth understanding about things happening in the world around them. Second, the course refines students’ critical writing skills by combining the critical thinking skills needed for issue analysis with the writing skills required to disseminate their thoughts in a variety of forms. Finally, for GIST majors specifically, the course offers an ideal preparation for the senior capstone experience.

GIST 433. Iran, Turkey, and the Kurds. 3 Credits. S This course examines the contemporary political and social dynamics within these three communities residing along the northern stretch of what is commonly referred to as the Middle East. Using social and political theory as a starting point, students will comparatively study critical elements and issues facing the members of these societies. Issues and themes for comparison will include the structure and institutions of politics, nation-building and nationalism, Islam and politics, women and politics, and regional and global engagement. Formerly known as GIST/POLS 633. Not open to students with credit in GIST/POLS 633. (Same as POLS 433.) Prerequisite: GIST 220, POLS 150, or consent of instructor.

GIST 465. Genocide and Ethnocide. 3 Credits. S This course provides students with a conceptual and historical synopsis of genocide and ethnocide from an anthropological perspective. Taking its lead from a human rights orientation, the course assesses why such atrocities must be confronted. This includes grappling with ethical, legal and definitional ambiguities surrounding the concepts of genocide and ethnocide. We will explore a range of cases in the 20th and 21st centuries, while focusing on diverse conditions leading to genocide, ethnocide, population displacements, human trafficking and the modern phenomena of refugee camps. The course will analyze the role of the modern state, colonialism, political ideologies, ethnicity and nationalism as major forces underpinning ethnocide and genocidal campaigns. Based primarily on a select review of cases of ethnocide and genocide, the class
examines how to spread global awareness and communal engagement by actively protecting human rights. (Same as ANTH 465.)

GIST 467. Islam and Politics. 3 Credits. W
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as the intersections of political Islam and democratic politics, state regulation of Islam, religion and Islamism’s role in nation-building, formal state institutions and opposition movements in authoritarian contexts. We also look at the complex ways in which religion intersects with gender dynamics and identity politics in Muslim-majority countries. This course is offered at the 400 level and 600 level with additional assignments at the 600 level. Not open to students with credit in GIST/POLS 667 or SOC 640. (Same as POLS 467.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

GIST 471. Politics of Human Trafficking. 3 Credits. S
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 714, POLS 714, or GIST 714. (Same as POLS 471 and WGSS 514.) Prerequisite: Sophomore standing or consent of instructor.

GIST 482. Transnational Terrorism. 3 Credits. S
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: Are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism. Formerly known as POLS 582/GIST 585. Not open to students with credit in POLS 582/GIST 585. (Same as POLS 482.) Prerequisite: Sophomore level or consent of instructor.

GIST 486. International Human Rights. 3 Credits. S
The course introduces students to historical and philosophical bases of contemporary human rights, theoretical approaches and methodological challenges to studying human rights questions, and acquaints them with the main topics, controversies, and tensions in the scholarship, practice and politics of human rights. Formerly known as GIST/POLS 686. Not open to students with credit in GIST/POLS 686. (Same as POLS 486.) Prerequisite: POLS 170 or consent of instructor is required.

GIST 493. Directed Readings. 3 Credits. U
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director.

GIST 495. Global Internship. 3 Credits. U
Semester-long internship with a business or organization located abroad or that provides a global or international working context for the interning student. The assessment component normally requires the submission of a reflective internship journal documenting work experiences within this unique context, and a final paper on a relevant theme that is determined by instructor and student based on context. This course is available to GIST majors and minors only. Prerequisite: Consent of instructor.

GIST 501. Topics in:_____ 1-3 Credits. U
An interdisciplinary study of international topics. Designed especially for juniors and seniors. May be repeated for credit if content varies.

GIST 502. Advanced Topics in South Asian Studies:_____ 1-3 Credits. U
An interdisciplinary study of topics related to South Asia. May be repeated for credit if content varies. Prerequisite depends on specific topic offered.

GIST 503. Advanced Topics in Middle East Studies:_____ 3 Credits. U
An interdisciplinary study of topics related to the Middle East. May be repeated for credit if content e depends on specific topic offered.

GIST 529. Globalization. 3 Credits. S
Addresses sociological aspects of the growth of transnational economic, cultural, institutional, and political interconnections, the freer and faster movement of goods, images, ideas, people, and institutional forms across national borders, and the consequences and problems of these processes. The focus is on recent (later 20th century to the present) global restructuring in the context of historical shifts in capitalist development. (Same as SOC 529.) Prerequisite: SOC 104 or GIST 220.

GIST 535. Literature and Society in the Contemporary Middle East. 3 Credits. NW H/W
This course offers a general introduction to the modern Middle Eastern literatures in English translation. Through analyses of selected short stories and novels from Arabic, Turkish and Persian literature, the students develop an understanding of the issues that shape everyday life in the Contemporary Middle East. The course investigates issues of nation and national identity, war, ethnicity, class, religion, and gender and sexuality. We use a variety of paradigms, namely nationalist, Marxist, feminist, and Islamist, to provide a theoretical framework for discussion of the selected works. No prior knowledge of Arabic, Turkish or Persian language is needed. Prerequisite: Junior or Senior standing or consent of instructor.

GIST 550. Issues in Global Studies:_____. 3 Credits. U
An interdisciplinary study of topics with particular emphasis on issues of global importance–i.e. transnational and trans-regional. May be repeated for credit if content varies. Prerequisite: GIST 220.

GIST 560. The Literature of Human Rights. 3 Credits. H
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as EURS 565 and PCS 565.) Prerequisite: Junior/Senior standing or consent of instructor.

GIST 570. Anthropology of Violence. 3 Credits. S
Introduces students to the comparative and cross-cultural study of violence. The course begins by surveying different anthropological approaches to the study of violence, with special attention paid to classical social theorists as well as ethnographic works. Topics may include (post) coloniality and identity politics, nationalism, race, religion, and political culture; geographic areas to be covered may include Africa,
Europe, Latin America, the Middle East, and South Asia. (Same as ANTH 570.) Prerequisite: Junior standing or above or permission of instructor.

GIST 577. Human Dimensions of Global Change. 3 Credits. S
This class introduces concepts such as coupled human and natural systems, social-ecological resilience, and sustainability science, examines people's responses to major climate, land, water, and coastal change, and discusses case studies. One hour of each seminar will be devoted to individual needs that address topical or methodological issues. Class requirements include presentations, biweekly papers, and a term paper. (Same as GEGO 577.) Prerequisite: One of the following: GEGO 100, GEGO 104, GEGO 374, or an Environmental Studies introductory course.

GIST 582. Geopolitics and Genocide. 2-3 Credits. S
Explores the inherently geographical and geopolitical nature of genocide and related mass violence and introduces an overarching concept, territorial cleansing, that foregrounds the spatial and territorial nature of these events. Detailed studies of cases at a range of scales and locales provide the major context for critical examination and comparison of territorial cleansing concepts. Students enrolling for 3 credits will prepare and present a substantial independent research paper. (Same as GEGO 306.) Prerequisite: GEGO 102 or GEGO 103; or ANTH 108 or ANTH 109; or permission of instructor.

GIST 601. Indigenous Peoples of the World. 3 Credits. S
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEGO 601 and ISP 601.) Prerequisite: Permission of instructor.

GIST 610. Interdisciplinary Methods for Global Contexts. 3 Credits. S
An introduction to a variety of widely-employed quantitative and qualitative research methods in the social sciences and humanities, including methods such as statistical analysis, ethnography, and content analysis. Prerequisite: GIST 220 or consent of the instructor.

GIST 624. Social Movements in the Middle East. 3 Credits. S
Using the major theories and approaches comparatively applied to social movements around the world, this course critically analyzes historical and existing cases of social movements and "nonmovements" in the Middle East. We cover examples of Islamist (and post-Islamist), women's, nationalist, democratic, youth and labor movements and their impact on the region. Contextual factors like technology and social networking, regime type, institutions, and socioeconomic structures are also considered for their role in supporting or inhibiting collective action. Prerequisite: GIST 220 or POLS 150.

GIST 667. Islam and Politics. 3 Credits. W
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as the intersections of political Islam and democratic politics, state regulation of Islam, religion and Islamism's role in nation-building, formal state institutions and opposition movements in authoritarian contexts. We also look at the complex ways in which religion intersects with gender dynamics and identity politics in Muslim-majority countries. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses and includes a presentation of the findings of the research. Not open to students with credit in GIST/POLS 467. (Same as POLS 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

GIST 678. Chinese Foreign Policy. 3 Credits. S/W
An in-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 378. (Same as EALC 678 and POLS 678.) Prerequisite: Sophomore level or consent of the instructor.

GIST 698. Capstone Seminar. 3 Credits. H
A seminar designed to introduce students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: GIST 610 or consent of the instructor.

GIST 699. Capstone Seminar, Honors. 3 Credits. H
A seminar designed to introduce honors students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: 12 hours of junior/ senior level and above courses that satisfy requirements for the major.

GIST 701. Approaches to International Studies. 3 Credits.
This course examines various approaches to the study of cultures, politics, and societies in their global and international contexts through the exploration of a series of exemplary works of global/international research from a variety of disciplines (eg. anthropology, sociology, political science, economics, geography, history, etc.). The course will cover the major contributions of these disciplines in their approaches to global questions and themes and will provide a multi-disciplinary framework within which students can begin exploring their own global and international research questions. The course also provides an introduction to the major regions and many of the themes that students will be able to specialize in during the course of the MA program.

GIST 702. Globalization. 3 Credits.
A central issue in international studies is globalization, the increasing interconnectedness of societies and economies. This course examines globalization from an historical and contemporary perspective. Major topics include (but are not necessarily limited to) the historical expansion of the West since 1500, the growth of international economic institutions, conflict among global cultures, the future of state sovereignty, and the challenges of economic integration.

GIST 705. Globalization in History. 3 Credits.
A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include western expansion since 1500, the spread of state sovereignty, the formation of a world economy, and spread of international institutions. The current world problems investigated will vary, but may include issues such as environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as HIST 705.)

GIST 707. Studying Modern Islam. 3 Credits.
An in-depth introduction to the issues involved in the academic study of modern Islam. In this class students will investigate the ideas, assumptions and historical circumstances that gave rise to and continue to influence scholarly approaches to Islam. Topics may include the Orientalism, gender studies, colonialism, secularism, Islamism and the concept of modernity. Students will apply what they learn to the study of Islam in contemporary Egypt.

GIST 709. Research Design. 1-3 Credits.
This course guides new graduate students through the process of designing and developing an original research project. The fundamentals of interdisciplinary research will be the instructional framework within which students will design their own original research project. Instruction regarding the review of literature, methodology, and how to structure and scale the project will be given. Students taking this course will be required to take the companion course, GIST 810.

GIST 710. Research Design for International Area Studies. 3 Credits.
This course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as CEAS 710 and LAC 710.) Prerequisite: Consent of instructor.

GIST 714. Politics of Human Trafficking. 3 Credits.
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GIST 471, POLS 471, or WGSS 514. (Same as POLS 714 and WGSS 714.) Prerequisite: Graduate standing.

GIST 750. Topics in International Studies: ______. 3 Credits.
A study of one or more selected topics in international studies. Course may be taken more than once.

GIST 751. Human Rights and U.S. National Security. 3 Credits.
This course explores the history, debates, and contemporary issues related to human rights and U.S. national security policy. Through lecture, practical exercises, and class-led discussions, the course will cover relevant and timely issues such as human rights and counter-terrorism, security assistance and cooperation, peacekeeping and protection of civilians, and global criminal accountability. Prerequisite: Graduate standing or consent of instructor.

GIST 752. International Conflict Prevention and Resolution. 1 Credit.
This course examines three connected fields of study related to armed conflict and acute violence from the perspective of US policymakers: the nature of contemporary conflict and its causes; mediation, and peacebuilding; and the policy options for preventing or managing conflict. Throughout the short course, students will explore the major analytical frameworks and theories used to examine conflict, and the major approaches applied to address it, including contemporary approach to stabilization and reducing state fragility.

GIST 774. The U.S. in Latin America. 3 Credits.
This interdisciplinary course will cover significant moments in world history in which the United States played a prominent role in Latin America’s politics and economy. Class materials and discussions will focus on historical events such as the Cold War, the Good Neighbor Policy, and the Military Regimes. By engaging with an array of readings from disciplines such as history, political science, economics, and cultural studies, along with the discussions films and novels that portray the human and historical moments that they are studying, students will learn about and analyze the dynamics of the United States in Latin America through a variety of representations and critical perspectives.

GIST 783. Theories of Conflict, Security and Peace. 3 Credits.
Armed conflicts can be caused by a myriad of factors; thus, conflict studies in international relations provide useful theories and methods through which inter- and intra-state conflict may be analyzed. The goal of this course is an analytical understanding of the conditions, processes, and events that lead to the outbreak and escalation of war. This course focuses predominantly on the causes of interstate conflict, global security, and conflict resolution but also includes a brief examination of the causes of civil war. The course highlights the complexity of the subject matter, scrutinizing war through the many lenses of peace and conflict theory, including but not limited to realism and the balance of power, levels of analysis, misperception, rivalries, grievances, bargaining, and insecurity.

GIST 793. Directed Readings. 1-5 Credits.
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director.

GIST 810. Graduate Writing Experience. 1-3 Credits.
This course guides students through the process of effectively communicating the findings of original research through formal writing. The purpose of the course is to provide writing guidance and instruction to students conducting ongoing research, so that they are familiar with successful ways of communicating research to academic and professional audiences. Depending on the career objectives of the student, the writing project will be tailored to address the relevant audience—academic or professional. The fundamental components of the research writing process will be individualized to correspond with student’s research goals. Prerequisite: GIST 709.

GIST 818. Islamic Law. 2-4 Credits.
Examines the history, doctrine, texts, and role of Islamic law (Shari‘a) throughout the world. This course complements (but is independent of) LAW 879. The course focuses on the background and birth of the Arab-Islamic Empire, the life and times of the Prophet Muhammad (PBUH), the development of Islam, the Rashidun, Umayyad, and Abbasid Caliphates, Moghol and Ottoman Empires, the Koran and Sunnah and other sacred texts, the Sunni-Shi’i split, the principal schools of Islamic law, the status of women and religious minorities, and principles of the substantive areas of law, including criminal, family, inheritance, contract, property, business, banking, and international law (including law of war). Also covered are issues of economic growth, marginalization, and terrorism. (Same as LAW 918.)

GIST 897. Examination Preparation. 1 Credit.
Independent study in preparation for the Comprehensive M.A. examination. May be repeated. Graded on a satisfactory/unsatisfactory basis.

GIST 898. Thesis and Research Project Writing. 3 Credits.
This course is primarily designed to guide MA students through the writing development of their concluding graduate research, whether a
final graduate research project or a thesis. Students will learn and apply the practices of effective communication and writing of research while completing the various components of their final projects. The intention of the class is to help students complete a high quality draft of their research, though deadlines and assignments may relate to practice in graduate level research writing in general. Within an interdisciplinary framework and an understanding of rhetorical distinctions across various epistemologies, students will practice relevant modeling of academic literature reviews, transparency in communicating research practices, analyzing/interpreting texts, data, or other information, and introducing and concluding their work. (Same as CEAS 898.) Prerequisite: GIST 710.

GIST 899. Thesis. 1-6 Credits. Enrollment for writing thesis for master's degree. Graded on a satisfactory progress/limited progress/no progress basis.

Global & International Studies Courses

**KQKL 110. Elementary Kaqchikel Maya I. 3 Credits. U F1**
An orientation to Kaqchikel Maya language and culture for beginning students. Includes elements of grammar, conversation, and composition. Kaqchikel is the first language of approximately 500,000 people of highland Guatemala and one of roughly 30 Mayan languages. This course is offered at the 100 and 600 level with additional assignments at the 600 level. Not open to students with credit in KQKL 600.

**KQKL 114. Elementary Kaqchikel Maya II. 3 Credits. U F2**
Continuation of KQKL 110. Prerequisite: Completion of KQKL 110 or equivalent.

**KQKL 230. Intermediate Kaqchikel Maya I. 3 Credits. U F3**
Continuation of KQKL 114. Prerequisite: Completion of KQKL 114 or equivalent.

**KQKL 234. Intermediate Kaqchikel Maya II. 3 Credits. U F4**
Continuation of KQKL 230. Prerequisite: Completion of KQKL 230 or equivalent.

**KQKL 350. Advanced Kaqchikel Maya I. 3 Credits. FP**
Advanced study of Kaqchikel Maya, continuation of KQKL 234. Prerequisite: KQKL 234 or equivalent.

**KQKL 360. Advanced Kaqchikel Maya II. 3 Credits.**
Advanced study of Kaqchikel Maya, continuation of KQKL 350. Prerequisite: Completion of KQKL 350 or equivalent.

**KQKL 500. Directed Studies in Kaqchikel Maya. 3 Credits.**
Advanced work in Kaqchikel language and culture. May be taken more than once. Prerequisite: KQKL 360 or equivalent.

**KQKL 600. Elementary Kaqchikel Maya I. 3 Credits. U**
An orientation to Kaqchikel Maya language and culture for beginning students. Includes elements of grammar, conversation, and composition. Kaqchikel is the first language of approximately 500,000 people of highland Guatemala and one of roughly 30 Mayan languages. This course is offered at the 100 and 600 level with additional assignments at the 600 level. Not open to students with credit in KQKL 110. Prerequisite: Instructor permission.

Global & International Studies Courses

**LAC 100. Latin American Culture and Society. 3 Credits. SC S**
An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with a basic knowledge base for understanding Latin America today. (Same as HIST 124.)

**LAC 177. First Year Seminar: _____, 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Latin Area and Caribbean Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**LAC 300. Interdisciplinary Themes in Latin American Studies. 3 Credits. U**
This course offers an in-depth examination of several key themes in Latin American Studies. Emphasis is placed on exploring the utility of interdisciplinary methods and on becoming familiar with the theoretical framework that underpins the field. Prior completion of LAC 100 recommended.

**LAC 302. Topics in Latin American Area Studies: _____, 1-3 Credits. U**
Investigation of special topics on Latin America at the undergraduate level.

**LAC 310. Topics in LAC - Anthropology: _____, 3 Credits. W**
A Latin American and Caribbean topics course with content related to the Anthropology disciplinary group of the Latin American studies major. May be repeated for credit.

**LAC 311. Topics in LAC - History: _____, 3 Credits. U**
A Latin American and Caribbean topics course with content related to the History disciplinary group of the Latin American studies major. May be repeated for credit.

**LAC 312. Topics in LAC - Spanish American Literature and Culture: _____, 3 Credits.**
A Latin American and Caribbean topics course with content related to the Spanish American Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit.

**LAC 313. Topics in LAC - Brazilian Literature and Culture: _____, 3 Credits. U**
A Latin American and Caribbean topics course with content related to the Brazilian Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit.

**LAC 314. Topics in LAC - Latino and Caribbean Literature: _____, 3 Credits. U**
A Latin American and Caribbean topics course with content related to the Latino/a and Caribbean Literature disciplinary group of the Latin American studies major. May be repeated for credit.

**LAC 315. Topics in LAC - Film Music Arts: _____, 3 Credits. U**
A Latin American and Caribbean topics course with content related to the Film, Music, Arts disciplinary group of the Latin American studies major. May be repeated for credit.

**LAC 316. Topics in LAC - Geography and Environment: _____, 3 Credits. U**
A Latin American and Caribbean topics course with content related to the Geography and Environment disciplinary group of the Latin American studies major. May be repeated for credit.

**LAC 317. Topics in LAC - Politics, Society, Business and Economy: _____, 3 Credits. U**
A Latin American and Caribbean topics course with content related to the Politics, Society, Business and Economy disciplinary group of the Latin American studies major. May be repeated for credit.
LAC 316. Topics in LAC - Transatlantic and Transnational: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Transatlantic and Transnational disciplinary group of the Latin American studies major. May be repeated for credit.

LAC 319. Topics in LAC - Methodology and Theory: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Methodology and Theory disciplinary group of the Latin American studies major. May be repeated for credit.

LAC 320. Modern Latin America. 3 Credits. H
A survey of Latin America since the 1800s. Students will examine the emergence of national identities and the processes of modernization and globalization in the region. The course also examines how race, social structures, and politics evolved after independence in the region, giving particular attention to the legacies of colonialism. Course readings and lectures highlighting unique national experiences and continuities across the region. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students who have taken HIST 121. (Same as HIST 315.)

LAC 332. Language and Society in Latin America. 3 Credits. W
This course examines the diversity of languages and cultures that make up Latin America and the Caribbean, including the influence of colonial Spanish and Portuguese as well as the many Indigenous, Afro-Caribbean, and Creole languages and cultures that can be found in Latin America. Attention is paid to the multifaceted relations between language and ethnic group, as well as to dynamics of gender and social class within Latin American cultures. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in LAC 632.

LAC 334. Indigenous Traditions of Latin America. 3 Credits. NW S/ W
A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken LAC 634. (Same as ANTH 379.)

LAC 499. Honors Course in Latin American Studies. 3 Credits. H
Intensive study and research under faculty direction. Open to students wishing to graduate with honors in Latin American Studies and having a grade point average of at least 3.5 in Latin American Studies and at least 3.25 overall. Requires an interdisciplinary project concerning a specific topic involving at least two disciplines. Must be directed by a faculty member in Latin American Studies, approved by the Center Associate Director, and defended before a committee of at least three faculty members. To earn departmental honors, a student must take the course for two semesters (with a minimum grade of B the first semester, and an A the second).

LAC 500. Directed Study in Latin American Area Studies. 1-3 Credits. U
Independent study and directed reading on special topics.

LAC 501. Multilingualism and Multiculturalism in Latin America. 3 Credits. H
Examines the sociolinguistic issues of multilingual countries in Latin America from an interdisciplinary perspective. Topics include but are not limited to linguistic inequality, the language of politics, language and education, urban and rural linguistic interaction, and indigenous and creole languages. Prerequisite: A liberal arts course with Latin American content.

LAC 505. U.S. Latino and Latin American Film and Literature. 3 Credits. H
This course follows the development of U.S. Latino and Latin American cinema from its origins to the present and its relationship with literary discourse. U.S. Latino/Latin American cinema can be seen as a specific practice that cannot be reduced in all its manifestations to the institutional mode of production of the dominant Hollywood model. The course examines the creation of a national cinema that seems to be more dependent on a literary canon. Knowledge of Spanish is not required.

LAC 510. Topics in LAC - Anthropology: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Anthropology disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 511. Topics in LAC - History: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the History disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 512. Topics in LAC - Spanish American Literature and Culture: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Spanish American Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 513. Topics in LAC - Brazilian Literature: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Brazilian Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 514. Topics in LAC - Latino and Caribbean Literature: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Latino/a and Caribbean Literature disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 515. Topics in LAC - Film Music Arts: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Film, Music, Arts disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 516. Topics in LAC - Geography and Environment: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Geography and Environment disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 517. Topics in LAC - Politics, Society, Business and Economy: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Politics, Society, Business and Economy disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 518. Topics in LAC - Transatlantic and Transnational: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Transatlantic and Transnational disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 519. Topics in LAC - Methodology and Theory: ______. 3 Credits. U
A Latin American and Caribbean topics course with content related to the Methodology and Theory disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level.

LAC 550. Capstone in Latin American and Caribbean Studies. 3 Credits. U
The capstone course in the major offers interdisciplinary approaches to a thematic topic or focus related to Latin America/ the Caribbean and contains substantial writing and independent research requirements. By the end of the class and culminating their study of the field at KU, students will be able to discuss the course topic from a variety of theoretical, methodological, and disciplinary perspectives. Prerequisite: Completion of at least 18 credits toward the LAA major, or permission of instructor.

LAC 552. Foodways: Latin America. 3 Credits. H
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, HUM 552, and ISP 552.) Prerequisite: Upper division course on Latin America or permission of the instructor.

LAC 556. Pre-Hispanic Mexico and Central America. 3 Credits. NW S/W
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotes, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as ANTH 506 and HIST 571.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor.

LAC 558. Ancient American Civilizations: The Central Andes. 3 Credits. W
An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of “vertical” environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huari, Tiahuanaco, Chimor, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnohistoric documents. (Same as ANTH 506 and HIST 572.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, History, or Indigenous Studies, or permission of instructor.

LAC 559. Ancient Central America. 3 Credits. NW S
This course will examine the Precolumbian cultures of the region situated between Mesoamerica to the north and the Central Andes to the south, focusing principally on the countries of Honduras, Nicaragua, Costa Rica, Panama, and Colombia. Once regarded as an “Intermediate Area” on the peripheries of the ancient civilizations to the north and south, the area of southern Central America and northern South America is now recognized as a center of innovation from very remote times up until the Spanish Conquest. The archaeological remains of stone tools, pottery, jade carvings, gold and copper ornaments, and a wide variety of structures will be interpreted within the context of information on subsistence, settlement patterns, social organization and religious ideology. Issues of the relationships with populations of regions in major culture areas to the north and south will also be considered in detail. (Same as ANTH 509.) Prerequisite: ANTH 110 or ANTH 115.

LAC 561. Indigenous Development in Latin America. 3 Credits. S
Surveys the history of the development enterprise since WWII, examines the marginalization and impoverishment of Latin America's indigenous peoples, and provides training to carry out projects for and with them to enhance their quality of life. Development is understood as not merely technological or economic, but also social, emotional, and educational. Students work in teams to design their own mock development project. A 3-credit non-obligatory companion course, Applied Anthropological Field School among the Ch'orti’ Maya, will follow in the intersession after each version of this course. (Same as ANTH 561.) Prerequisite: ANTH 100, ANTH 108, ANTH 160 or LAC 100; or consent of instructor.

LAC 562. Mexamerica. 3 Credits. SC H
This course surveys the relations between Mexico and the U.S. as nation-states, and among Mexicans, Mexican Americans, and Anglo Americans (to a lesser extent other U.S. citizens) in historical perspective. Issues of sovereignty, national and ethnic identity, immigration, labor relations, popular culture, media, and transnational economics are covered. (Same as ANTH 562.) Prerequisite: ANTH 108 or ANTH 308 or ANTH 160 or ANTH 360 or LAC 100.

LAC 577. The Andean World. 3 Credits. H
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, HIST 577 and ISP 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

LAC 587. Multidisciplinary Field School in Partnership with the Chorti Maya. 3 Credits. S
Teams of interdisciplinary students partner with the Chorti Maya of Guatemala and Honduras to share information and experiences. One third of the course consists of readings and 4-5 orientation sessions on campus, and two thirds entails two weeks in Central America. Examples of activities might include historical research, water testing and improvement, photography, art, music, tourism consultation, marketing of crafts, human rights advocacy, web design, computer training, and museum work, among others. There are no prerequisites, but students with a working knowledge of Spanish will receive preference for admission. (Same as ANTH 587.)

LAC 602. Topics in Latin American Studies: ______. 1-3 Credits. U
Investigation of special topics on Latin America.

LAC 632. Language and Society in Latin America. 3 Credits.
This course examines the diversity of languages and cultures that make up Latin America and the Caribbean, including the influence of colonial Spanish and Portuguese as well as the many Indigenous, Afro-Caribbean, and Creole languages and cultures that can be found in Latin America. Attention is paid to the multifaceted relations between language and ethnic group, as well as to dynamics of gender and social class within Latin American cultures. Students will conduct independent research on non-dominant languages and cultures in Latin America. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in LAC 332. Prerequisite: Any previous LAC course.

LAC 634. Indigenous Traditions of Latin America. 3 Credits. NW S/W
A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken ANTH 379 or LAC 334.

LAC 701. Interdisciplinary Seminar in Latin American Culture and Problems. 3 Credits.
An interdisciplinary seminar incorporating significant and pertinent materials from the fields of anthropology, economics, geography, history, political science, sociology, and Spanish and Portuguese literature. Required of all graduate students enrolled in the Master of Arts program in Latin American Area Studies. Prerequisite: LAC 710 (may be taken simultaneously with LAC 701 if both courses offered during same semester.)

LAC 702. Topics in Latin American Studies: ____. 3 Credits.
Investigation of special topics on Latin America. Topics are drawn from many disciplines within Latin American and Caribbean Studies. Course can be repeated for credit as the topic changes.

LAC 710. Research Design for International Area Studies. 3 Credits.
This course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as CEAS 710 and GiST 710.) Prerequisite: Consent of instructor.

LAC 800. Investigation and Conference. 1-2 Credits.
Investigation and research of interdisciplinary topics in Latin American Studies.

LAC 899. Thesis/Non-Thesis. 1-6 Credits.
Prerequisite: Consent of instructor.

Global & International Studies Courses

QUEC 110. Elementary Quechua I. 3 Credits. U F1
An orientation to Ecuadorian Quechua language and culture for beginning students. Includes elements of grammar, conversation, and composition.

QUEC 114. Elementary Quechua II. 3 Credits. U F2
Continuation of QUEC 110. Prerequisite: QUEC 110 or equivalent.

QUEC 230. Intermediate Quechua I. 3 Credits. U F3
Continuation of QUEC 114. Prerequisite: QUEC 114 or equivalent.

QUEC 234. Intermediate Quechua II. 3 Credits. U F4
Continuation of QUEC 230. Prerequisite: QUEC 230 or equivalent.

QUEC 610. Directed Study in Quechua Language and Culture. 3 Credits. H
This course is intended for students seeking proficiency in Quechua beyond QUEC 234. Instructor will direct the student through readings and materials in Quechua that will add to the student's substantive knowledge of Quechua speakers and their cultures. May be taken multiple semesters for credit with varying content. Prerequisite: QUEC 234 or consent of instructor.

History Courses

HIST 101. Introduction to Western History: ____. 3 Credits. HT H
An introduction to the study of history focusing on a topic in Western History. The course will expose the student to the major issues and methods of historical study through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. This course grants HIST Category I credit.

HIST 102. Introduction to History, Honors: ____. 3 Credits. HT H
An introduction to the study of history. The course will expose the student to the major issues and methods of historical study. This will be done through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. Prerequisite: Membership in the College Honors Program or consent of department.

HIST 103. Environment and History. 3 Credits. H
Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as EVRN 103.)

HIST 104. Introduction to African History. 3 Credits. NW H/W
An introduction to important historical developments in Africa. Topics include empires, kingdoms, the slave trade, European colonialism, liberation movements, national identities, and a return to independence. (Same as AAAS 105.)

HIST 105. Introduction to Ancient Near Eastern and Greek History. 3 Credits. NW H/W
A general survey of the political, social, and economic developments of Mesopotamia, Egypt, Asia Minor, and Greece from Paleolithic times to 323 B.C. (Same as CLSX 105.)

HIST 106. Introduction to Roman History. 3 Credits. H/W
A general survey of the political, social, and economic developments of ancient Rome from 753 B.C. to 475 A.D. (Same as CLSX 106.)

HIST 107. Introduction to the Ancient World. 3 Credits. H
This course covers the history of the ancient Near East, Greece and Rome with emphasis on the origins of agriculture, writing, cities, empires, and democracy. Students will be introduced to schemes of interpretation, critical readings, and analysis, primary sources, and evaluation of evidence.

**HIST 108. Medieval History. 3 Credits. HT H/W**
The history of Europe from the Barbarian Invasions to the beginning of the 16th century.

**HIST 109. The Black Experience in the Americas. 3 Credits. HT H/W**
An interdisciplinary study of the history of the African peoples of the New World, relating their cultures and institutions to the African background and to their peculiar New World experiences up to and including the nineteenth century. While the main emphasis is on the U.S.A., attention is also paid to the Caribbean and Latin America. Approaches include demography, economics, social and political developments, literature, and music. (Same as AAAS 106.)

**HIST 110. Introduction to Non-Western History: _____. 1-3 Credits. H**
An introduction to the study of history focusing on a topic in non-Western History. The course will expose the student to the major issues and methods of historical study through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. This course grants HIST Category II credit.

**HIST 111. Introduction to British History. 3 Credits. H**
This course will introduce students to the concepts, issues, and methods of historical study, at the same time as it explores the major processes and events which shaped the history of Britain and its imperial dependencies. Students will be introduced to the nature and validity of different historical interpretations, and to the purpose and merit of historical writings.

**HIST 114. Renaissance to Revolution: Europe 1500-1789. 3 Credits. HT H/W**
An introduction to early modern European history, with emphasis on the cultural, political, economic, and cultural forces which have helped to shape the modern world. The Renaissance, the rise of nation states, the Reformation, absolutism and constitutionalism, the Enlightenment, and the coming of the French Revolution.

**HIST 115. French Revolution to the Present: Europe 1789-Present. 3 Credits. HT H/W**
An introduction to recent European history, with emphasis on the social, political, economic, and cultural forces which have helped to create the Europe of today: the French Revolution, the romantic movement, the revolutions of 1848, nationalism, imperialism, Communism, and two World Wars, the cold war, and its aftermath.

**HIST 117. Russia, An Introduction. 3 Credits. HT H/W**
This course introduces students to the history of Russia from its beginnings to the present. It explores Russia’s ethnic and religious diversity, the relationship between the state and its peoples, the geopolitics of its place between Europe and Asia, and the revolutionary movements that shook Russia and shaped the world around it.

**HIST 118. Premodern East Asia. 3 Credits. NW H/W**
A survey of the premodern history of China, Japan, Korea, and other cultures in East Asia. Students are introduced to the major currents of East Asian history and historical methods used to study them. Not open to students with credit in upper division East Asian history.

**HIST 119. Modern East Asia. 3 Credits. NW H/W**
A survey of the modern history of China, Japan, Korea, and other cultures in East Asia. Students are introduced to the major currents of East Asian history and historical methods used to study them. Not open to students with credit in upper division East Asian history.

**HIST 120. Colonial Latin America. 3 Credits. NW H/W**
The principal focus is on the evolution and analysis of societies, economies, and religions of native American peoples, the impact of Spanish and Portuguese conquests and settlement, government, trade and culture upon native civilizations, the influence of African population and culture, and the creole nature of the resulting society in the colonial period. Changes in the society and economy which prefigured the movements for independence are also discussed.

**HIST 121. Modern Latin America. 3 Credits. HT W**
A survey of Latin America since the 1800s. Students will examine the emergence of national identities and the processes of modernization and globalization in the region. The course also examines how race, social structures, and politics evolved after independence in the region, giving particular attention to the legacies of colonialism. Course readings and lectures highlight unique national experiences and continuities across the region. This course is offered at the 100 and 300 level with additional assignments at the 300 level. Not open to students who have taken HIST 315.

**HIST 124. Latin American Culture and Society. 3 Credits. SC S**
An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with a basic knowledge base for understanding Latin America today. (Same as LAC 100.)

**HIST 125. The History of Global Capitalism. 3 Credits.**
What is capitalism? Where did it come from? Where is it going? How has it shaped people’s lives over the last six centuries? This course explores the spread and development of global capitalism from its origins in the expansion of European seaborne empires to Africa, Asia and the Americas in the fifteenth century to the global economic crisis of 2008. We will examine the many forms of capitalism that have emerged over five centuries, including merchant capitalism, industrial capitalism, slave-based capitalism, war capitalism, financial capitalism, casino capitalism, and state-run capitalism. We will learn about the revolutionary economic and social changes, the technological inventions, and the intellectual frameworks that helped drive the expansion of this relentlessly adaptive economic system. We will pay close attention to the impact that capitalism had on the material realities of everyday life and on the lived experiences of the forced and free workers in capitalist economies. We will explore how capitalism—a constructed reality—has shaped and reshaped politics, the natural world and people’s core beliefs about human nature, human rights, and the meaning of life.

**HIST 128. History of the United States Through the Civil War. 3 Credits. HT H**
A historical survey of the United States from the peopling of the continent through the Civil War. This survey is designed to reflect the diversity of the American experience, to offer the student a chronological perspective on the history of the United States, and to explore the main themes, issues, ideas, and events which shaped that history.

**HIST 129. History of the United States After the Civil War. 3 Credits. HT H**
A historical survey of the American people from Reconstruction to the present. This survey is designed to reflect the diversity of the American
experience, to offer the student a chronological perspective on the history of the United States, and to explore the main themes, issues, ideas, and events that shaped American history.

HIST 139. The Global Cold War. 3 Credits. H
This course provides an immersive introduction to the global Cold War and its legacies. It explores how the contest between capitalism and communism unfolded not only in the United States and the Soviet Union, but also in Asia, Africa, Europe, Latin America, and the Middle East. Through interactive lectures, discussions, and role-playing games, students will learn to "think globally," gain an understanding of imperialism, nationalism, and decolonization, and discover how the Cold War shaped culture, economics, politics, the environment, and the international system in ways that remain relevant today. (Same as GIST 139.)

HIST 140. Global Environment I: The Discovery of Environmental Change. 3 Credits. U LFE
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 140 and GEOG 140.)

HIST 142. Global Environment II: The Ecology of Human Civilization. 3 Credits. U
This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as EVRN 142 and GEOG 142)

HIST 144. Global Environment I: Discovery of Environmental Change, Honors. 3 Credits. U LFE
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 144 and GEOG 144.) Open only to students admitted to the University Honors Program or by permission of instructor.

HIST 145. Global Environment II: The Ecology of Human Civilization, Honors. 3 Credits. U
This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics will include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as EVRN 145 and GEOG 145.) Open only to students admitted to the University Honors Program or by permission of instructor.

HIST 150. Introduction to Food History: Around the World in Eight Dishes. 3 Credits. H
Foods and drinks such as chocolate, coffee, curry, and olive oil have changed the world in ways that transcend national boundaries: this course follows their stories tracing routes of imperialism and globalization while attentive to the impact of these foods on indigenous peoples. Each week offers new foods and new discoveries drawing from cases globally to ask why people choose certain foods, what that says about their culture, and how foods and drinks have changed historically. Besides learning how food can be a window to history and gaining an introduction to the interdisciplinary methodology of food studies, this course will help you understand the consequences of what you eat in terms of your own body, the environment, and communities a world away.

HIST 160. Introduction to West African History. 3 Credits. W
This course treats West African history through the first part of the twentieth century. The student is provided with a perspective on the major historical patterns that gave rise to West Africa's development as an integral part of world history. Special attention is paid to anthropological, geographical, and technological developments that influenced West African political and socioeconomic changes. (Same as AAAS 160.)

HIST 177. First Year Seminar: _____ 3 Credits. HT
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in history. May not contribute to major requirements in history. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

HIST 201. Writing the Past-Category I/Western Topics: _____ 3 Credits. H
Many of the words that human beings have written down in one form or another have been stories of events, people, and places from the past. History is a story of countless people-some famous, many anonymous-who have made up the human past. This course will introduce students to the basic skills of analytical, descriptive, and narrative writing and reading through the lens of history. Students will learn how to develop a voice of their own as writers and build a toolkit of skills that will help them effectively communicate in writing, in their course work and careers. This course will cover topics that will fulfill the Category I/Western requirement of the History major.

HIST 202. Writing the Past-Category II/Non-Western Topics: _____ 3 Credits. H
Many of the words that human beings have written down in one form or another have been stories of events, people, and places from the past. History is a story of countless people-some famous, many anonymous-who have made up the human past. This course will introduce students to the basic skills of analytical, descriptive, and narrative writing and reading through the lens of history. Students will learn how to develop a voice of their own as writers and build a toolkit of skills that will help them effectively communicate in writing, in their course work and careers. This course will cover topics that will fulfill the Category II/Non-Western requirement of the History major.

HIST 203. Speaking the Past-Category I/Western Topics: _____ 3 Credits. H
This seminar offers students the opportunity to learn about a specific theme or topic in history through the development of their verbal communication skills. A variety of scaffolded assignments will introduce students to the essential elements of interpersonal and public speaking, provide opportunities to practice their performances and receive constructive feedback, and hone their organizational and critical-thinking skills. In doing so, they will achieve a deeper understanding of an important aspect of the past. Specific historical topics will be determined by individual instructors. This course will cover topics that will fulfill the Category I/II Western requirement of the History major.

HIST 204. Speaking the Past-Category II/Non-Western Topics: _____ 3 Credits. H
This seminar offers students the opportunity to learn about a specific theme or topic in history through the development of their verbal communication skills. A variety of scaffolded assignments will introduce students to the essential elements of interpersonal and public speaking, provide opportunities to practice their performances and receive constructive feedback, and hone their organizational and critical-thinking skills. In doing so, they will achieve a deeper understanding of an important aspect of the past. Specific historical topics will be determined by individual instructors. This course will cover topics that will fulfill the Category I/II Non-Western requirement of the History major.

HIST 230. Sex, Gender, Film, and History. 3 Credits. H
In the second half of the 20th century, Americans struggled over sex and gender—and both their behaviors and beliefs changed dramatically, though not without controversy. In this class, we use mainstream, popular American films produced during this volatile era to analyze historical understandings of gender identity and appropriate sexual behaviors in post-WWII American society. This course is also an introduction to the study of history: students will work extensively with film and other primary documents, and will analyze different scholarly interpretations of the same set of events.

HIST 231. War and 20th Century U.S. Culture. 3 Credits. H
This course analyzes the "cultural construction" of war in 20th century America by focusing primarily on World War II and the Vietnam War. How have Americans attempted to come to terms with the wars they have fought? How have Americans' cultural understandings shaped the wars they have waged? How have Americans used various cultural forms (film, music, photography, etc.) to support a war effort or to protest against it? We pay special attention to the place of the military in American society, to notions of patriotism and citizenship, to constructions of gender, race, and sexuality, and to the roles of government, media, technology, and public opinion.

HIST 250. Study Abroad Topics in: _____ 1-5 Credits. H
This course is designed for the study of special topics in History at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

HIST 285. Headless Men: Conquest and Cultural Exchange Before the Age of Exploration. 3 Credits. HL H
In fourteen hundred and ninety-two, Columbus sailed the ocean blue. But what happened before Columbus' great journey? And, more to the point, why did he and his contemporaries feel entitled to simply claim whatever land they found? This course proposes to explore the medieval experiences of cultural and racial Otherness in order to better understand the roots of some of the assumptions about difference (interpersonal, intercultural, and international) that continue to play out in American society today. Taught in English. (Same as FREN 285.)

HIST 300. Modern Africa. 3 Credits. NW H/W
A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 305.)

HIST 301. The Historian’s Craft. 3 Credits. H
This course introduces students to the practice of history and serves as the foundation to the major. HIST 301 focuses on the development of the core concepts and skills of our discipline: the construction of compelling historical questions and the practice of gathering evidence in support of answers and convincing arguments. The course trains students to think like historians, equipping them with skills in research, critical analysis, argument construction, and written expression. Students learn the value and function of primary and secondary sources and to recognize the variety of modes of historical production in our daily lives. Students will also gain practice with "historical thinking" and examine how to apply the same techniques of critical analysis to contemporary issues and debates. This course is required of all history majors. Prerequisite: Completion of KU Core 2.1 and recommended completion of KU Core 2.2. Open only to declared History majors or by consent of instructor.

HIST 303. Sin Cities. 3 Credits. H
This course offers a comparative global introduction to the history of the modern city by looking at the ways in which certain metropolis developed an attractive underbelly of decadence at the same time as they sought to be centers of refined and orderly cosmopolitan life. The course examines topics such as popular culture, gambling, prostitution, crime, violence, nightlife, tourism, and corruption in the context of the increased social mobility that characterized the beginning of the industrial age and that has extended into the 21st century. Students investigate the changing relation between work and leisure, spectacle and consumerism, and urban space and the struggle for order.

HIST 304. 1642, 1688, 1776: Three British Revolutions. 3 Credits. H
Explains and analyzes the three revolutions in the English-speaking world which, more than any others, are held to have laid the foundations of modernity. Themes discussed include social, intellectual, and political developments, structures, and conflicts. 1642 and 1688 are treated in the setting of England's relations with Scotland and Ireland, and against the background of European wars of religion. 1776 is analyzed in a transatlantic context as a civil war within the wider British polity.

HIST 305. Technological Revolutions and Global Transformations. 3 Credits. H
This course focuses on the social, political, and technological changes that contributed to and arose out of the Industrial Revolution of the eighteenth and nineteenth centuries, the Technological Revolution of the nineteenth and twentieth centuries, and the Information Revolution of the late twentieth and twenty-first centuries. By contextualizing these historical events as global phenomena within the history of technology, we will analyze how the invention of labor saving devices arose out of and shaped growing transnational networks, how new industrial devices and processes became tools of imperial exploitation, and how post-colonial states grappled with the legacy and challenges of these various “revolutions.”

HIST 307. Modern Africa, Honors. 3 Credits. NW H
An intensive version of HIST 300. A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 307.) Prerequisite: Open only to students admitted to the University Honors Program, or by consent of the instructor.

HIST 308. Key Themes in Modern Global History. 3 Credits. H
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be
explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as GIST 308.)

**HIST 312. American Culture, 1877 to the Present. 3 Credits. H**
The theme of conspiracy is a recurring motif in American history. This course uses a case-study method to revisit episodes such as the Salem witch trials, the movement against freemasonry, the Slave Power conspiracy, and more recent obsessions such as UFOs and the assassination of John F. Kennedy to explain why so many Americans have embraced conspiracy theories to explain mysterious events and dramatic social change. The course will rely on primary accounts, fiction, and film, as well as secondary historical literature, to examine both "real" and "imaginary" conspiracies and their effects on the politics, culture, and society of the United States.

**HIST 313. Conspiracies and Paranoia in American History. 3 Credits. H**
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as AMS 312.)

**HIST 314. Globalization: History and Theory. 3 Credits. H**
This survey course explores the history and diversity of African American religious expression from slavery to the present, emphasizing both mainstream and alternative faiths. It covers the religious world views of enslaved Africans, and examines faiths inside and outside of Christianity. Topics may include: independent black churches, magical practices, the Holiness and Pentecostal movements, black Islam, religious freemasonry, and esoteric faiths. The class emphasizes the influence of gender, class, race, migration, and urbanization on black religion. (Same as AAAS 316 and AMS 316.)

**HIST 318. Indian Territory. 3 Credits. H**
This survey of Latin America since the 1800s. Students will examine the emergence of national identities and the processes of modernization and globalization in the region. The course also examines how race, social structures, and politics evolved after independence in the region, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as AMS 312.)

**HIST 319. History, Women, and Divinity in the U.S.. 3 Credits. H**
This course examines the changing understanding of non-normative sex, love, and desire; the political tactics, framings, and networks around sexual identities and rights; and the intersection of structural inequalities including, but not limited to, race, class, ability, and gender with LGBTQ histories. Please note that WGSS 322 or HIST 323 is not a
HIST 324. History of Women and the Body. 3 Credits. H
This course examines different notions about women and their bodies from a historical perspective. It discusses the arguments and circumstances that have shaped women's lives in relation to their bodies, and women's responses to those arguments and circumstances. This course covers a wide geographical and chronological spectrum, from Ancient societies to the present, from Latin America and the Middle East, to North America and Western Europe. (Same as WGSS 323.)

HIST 325. The Spanish Inquisition. 3 Credits. H
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as JWSH 315 and SPAN 302.)

HIST 326. Native Americans Confront European Empires. 3 Credits. NW H/W
Since 1492, Native American societies have struggled against European conquest and colonization. This course examines the history of Native American encounters with Europeans and their empires from 1492 through 1800 in North and South America. Native American cultures varied widely as did their interactions with Europeans of diverse nations. Using a comparative framework this course will examine the continuities and differences in indigenous reactions to European imperialism in the Americas. Themes of the course include: conquest, colonialism, religion, and resistance and accommodation.

HIST 327. The Premodern Middle East. 3 Credits. NW H
A survey of the history of the Middle East from the origins of Islam in the seventh century to the rise and consolidation of the Ottoman Empire in the eighteenth century. Lectures and discussions focus on diversity within the Middle East at the height of the Islamic empires. Topics include the life of Muhammad and early Islamic communities, expansion of Islam into Asia, Africa and Europe, intellectual strength in the medieval period, and the everyday lives of women, Christians, Jews and other minority groups.

HIST 328. The Modern Middle East. 3 Credits. W
A survey of the history of the Middle East from 1800 to the present. Lectures and discussions focus on diversity within the Middle East over two centuries of major political and cultural change. Topics include causes for the decline of the Ottoman Empire, debates over modernization, European imperialism and the formation of nation-states, twentieth century cultural revolutions and women's activism, the Arab-Israeli conflict, and the revival of Islamic social movements.

HIST 331. Age of Empires-The Atlantic 1400-1800. 3 Credits. H
This course examines the history of empires in the Atlantic World. During this period African, European and Native American empires encountered each other vying for power and territory. These encounters vastly transformed the people and societies of this broad geographic region. Not only did these empires challenge each other, anti-imperial groups including pirates and African maroons actively undermined imperial systems. This course will examine themes of empire in the Atlantic including conquest, enslavement and slave trades, indigenous and African resistance, and independence.

HIST 332. Sex in History. 3 Credits. HT H
This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, "perversions" (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as AMS 323, HUM 332 and WGSS 311.)

HIST 333. Eurometro: Visions of the European Metropolis, 1849-1939. 3 Credits. H
This course investigates the interrelated symbols of the European metropolis during the "Age of Great Cities," from the filth of the sewers to the "filthiness" of prostitution. Students investigate gender and class in the metropolis by exploring a few stereotypes: the juvenile delinquent, the woman on the street, and the flaneur. The course format stresses discussion of common texts, including short readings of literature from the period and historical scholarship. Students also analyze contemporary photographs, art, architecture, and advertising.

HIST 334. The Great War: The History of World War I. 3 Credits. H
A historical survey of the causes, course, and consequences of the conflict, 1878-1919, stressing its socio-economic dimensions as well as its political ramifications and military aspects. Considerable use will be made of visual aids. No prerequisites.

HIST 335. History of Jewish Women. 3 Credits. H
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realties of women's lives in both Jewish and non-Jewish society. (Same as JWSH 335, WGSS 335.)

HIST 336. Ethics, Ideas, and Nature. 3 Credits. H
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state of managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and right ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent in human-centered environmental ethics and nature-centered environmental ethics. (Same as EVRN 336.)

HIST 337. History, Ethics, Modernity. 3 Credits. H
This course will examine how human dignity is preserved and violated in the modern age. Cast in a global framework, themes may include the history of human rights; the moral universe of health and wellbeing; narratives of genocide and collective resistance; the shifting status and treatment of the poor and the colonized; and the impact of changing technology on ethics in medicine, science, and the environment.

HIST 340. The History of the Second World War. 3 Credits. H
A survey of the origins, course, and consequences of the war; 1930-1945. Political, economic, military, and social aspects will be dealt with in the context of their global effects. Extensive use will be made of motion pictures and other media.

HIST 341. Hitler and Nazi Germany. 3 Credits. H/W
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing...
through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as GERM 341 and JWSH 341.)

HIST 343. The Holocaust in History. 3 Credits. H
The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as JWSH 343.)

HIST 344. Modern Jewish History. 3 Credits. H
This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of antisemitism and the Holocaust. (Same as JWSH 344.)

HIST 345. Hard Times: The Depression Years in America, 1929-1941. 3 Credits. H
An analysis of the experiences of the American people during the Great Depression. Attention will also be given to the global dimensions of the crisis, socioeconomic dislocation, cultural and institutional change, and the impact of the Asian and European wars.

HIST 347. Environmental History of North America. 3 Credits. H
A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialism, urbanization, and such technologies as the automobile, and the origins of conservation. (Same as EVRN 347.)

HIST 348. History of the Peoples of Kansas. 3 Credits. H
A survey of culture and society in Kansas from prehistory to the present. Topics include Native American life, Euro-American resettlement, Bleeding Kansas and the Civil War, agricultural settlement, urbanization and industrialization, depression and recovery, and modern Kansas in transition. Emphasis in the course will be on social and economic conditions, the experience of ethnic and racial groups, inter-racial relations, and the role of women.

HIST 349. Antisemitism: A Long History. 3 Credits. H/W
This course surveys the genesis, evolution and persistence of antipathy towards Jews and Judaism from late antiquity through the twentieth century, exploring its connections to religious and secular ideologies and its changing nature over time, place, and culture. Using primary source documents, religious and secular art and literature, the mass media and popular expression, the course examines how antisemitism was articulated and implemented, how Jews and Judaism were perceived and represented, and how Jews and Judaism responded to antisemitism. (Same as JWSH 349.)

HIST 350. The Korean War, 1950-1953. 3 Credits. H
An examination of the origins, pattern of development, and legacy of this still unsettled conflict, which in many ways set the tone for the entire post-1945 era of the Cold War. Points of emphasis will include the motives and policies of the major participants (Koreans, Americans, Chinese, and Soviets), as well as the effects of the war on their domestic politics and foreign policy positions.

HIST 351. American Indian and White Relations to 1865. 3 Credits. H
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HUM 348, ISP 348.)

HIST 352. American Indians Since 1865. 3 Credits. H
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, internmarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HUM 350 and ISP 350.)

HIST 353. Indigenous Peoples of North America. 3 Credits. NW H/W
This course surveys the history of the first peoples to inhabit North America from prehistory to the present. Commonly and collectively referred to as American Indians, indigenous peoples include a diverse array of nations, chiefdoms, confederacies, tribes, and bands, each of which has its own unique cultures, economies, and experiences in dealing with colonial and neocolonial powers. This class seeks to demonstrate this diversity while at the same time providing an understanding of the common struggle for political and cultural sovereignty that all indigenous nations face. Indigenous nations that have developed a relationship with the United States will receive primary focus, but comparative reference will be made to First Nations of Canada.

HIST 356. At the Movies: U.S. History on the Silver Screen. 3 Credits. H
The motion picture was invented right here in the United States more than a century ago, and Americans have been going to the movies ever since. Movies have expressed their dreams and nightmares, aspirations and fears, hopes and dreams. Through a wide-ranging study of Hollywood films from the 1920s to the present, including the industry that created them and the people who watched them, this course explores what Americans have seen and felt at the movies.

HIST 357. History of the American West. 3 Credits. H
This course examines major themes in the history of the American West from Columbus to the present. The course includes topics familiar to the American West such as the California Gold Rush and the Battle of Little Bighorn. More importantly, it also offers a way of understanding North American history that is different from that of most U.S. history courses: through the lens of imperial settlement. The course focuses on: 1) cultural encounters between settlers and indigenous peoples as well as among Anglo settlers, the Spanish-speaking populations of the Mexican borderlands, and Asian immigrants to the Pacific Coast; 2) the impact of hunting, logging, ranching, and mining on the environment and the influence of the arid Western environment on human societies; and 3) the cultural symbolism of the American West in literature and film as
an enduring national icon and ideology that has shaped settlement and regional history.

HIST 358. The Vietnam War. 3 Credits. H
This course is a survey of the Vietnam War. It covers the early days of Cold War, 1945-54, and all phases of the Vietnam War: the advisory phase (1955-64); the Americanization phase (1965-68); the Vietnamization Phase (1969-73); and the final phase, the Vietnam Civil War, 1972-75. This course covers the causes, course, conduct, and consequences of the war and in so doing provides a political, military, and social history of the war.

HIST 359. The Black Experience in the U.S. Since Emancipation. 3 Credits. H
An interdisciplinary study of the history and culture of Black people in America from Reconstruction to the present. Topics covered include an analysis of Reconstruction, Black leaders, organizations and movements, the Harlem Renaissance, migration, and race relations. Demographic variables covered include socio-economic class, education, political persuasion, and influence by avant-garde cultural changes. (Same as AAAS 306 and AMS 306.)

HIST 361. Youth, Sex, and Romance in Post-WWII United States. 3 Credits. H
Most people don’t think of sex and romance as having a history. And youth seems just a natural stage of life. But the nature of “courtship,” the definitions of sex, and the meaning of “youth” have changed dramatically over time, and people struggle over those definitions right up to the current day. In this class we try to make historical sense of those struggles by focusing on a volatile and complicated period in U.S. history: the years from World War II through the recent past.

HIST 362. The American Way of War Since World War II. 3 Credits. H
This course is a survey of American Military History from World War II to current military operations. It covers the Cold War, the Korean War, the Vietnam War, both Persian Gulf wars, the global war on terrorism, and the war in Afghanistan. The course examines the causes, course, conduct, and consequences of the wars and covers advances in technology and doctrine, civil-military relations, foreign policy, and inter-service rivalry, providing a political, military, and cultural history of the wars.

HIST 363. Perspectives on Science, Engineering and Mathematics. 3 Credits. H
This course places the historical creation of scientific and technological knowledge within a broader social, cultural, and political context. Students will learn that the STEM disciplines are not merely a static body of facts, theories, and techniques but involve diverse, evolving processes which are continually generated and reformulated. By examining the role of failure in knowledge creation, the religious motivations behind space exploration, the continued legacy of racist practices in medicine, the construction and ramifications of “Big Science,” and other topics, students will go beyond the “genius inventor” narrative to question the presumed neutrality and progressive inevitability of scientific and technological advancements. Through a mixture of online activities, readings, videos, and synchronous online discussions, we will also examine the formulation and codification of “expertise;” investigate the process of professionalization within the STEM fields, and interrogate how science and technology have supported systems of oppression throughout history.

HIST 364. Angry White Male Studies. 3 Credits. H
This course charts the rise of the “angry white male” in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HUM 365 and WGSS 365.)

HIST 365. Invention of the Tropics. 3 Credits. H
This course surveys the history of the tropical environment and its diverse peoples from early European encounters until the current boom in extractivism and ecotourism. It focuses on portrayals of the tropics in historical travel accounts and films. Through these sources, we will seek to understand cross-cultural interactions, and the ways in which science, technology, and tourism have reconstructed these environments over time. Case studies are drawn from Latin America, Africa, Oceania, and/or Asia. (Same as EVRN 365.)

HIST 367. Magic and Superstition in European History. 3 Credits. H
This course traces the changing role and understanding of magic in European culture, religion, politics and science from the late Middle Ages through the early 20th century. Topics may include alchemy, miracles, magical healing, witchcraft, monsters and demonic possession.

HIST 368. A History of Afro-Latin America. 3 Credits. H
This course examines the history of Africans and their descendants in Latin America. In this region, Africans could be found serving as militia commanders, laboring as skilled tradesmen, running their own businesses, working as household servants, and toiling on plantations. Students will study the varied experiences of these men and women across colonial and national boundaries. Topics include: acculturation/Creolization, manumission, family formation, social networks, economic roles, political mobilization, and interaction with indigenous peoples.

HIST 371. Tequila, Tango, Carnival, City. 3 Credits. H
This course explores the history of modern urban Latin America through the lens of popular culture. Elements of culture that will be examined include music, food, soccer, cinema, photography, and art of the 19th and 20th centuries. Some of the themes likely to be explored are collective identity, exile, travel, cultural resistance to state violence, public rituals, and the evolution of the city and its cultural spaces.

HIST 373. The Supreme Court and Religious Issues in the United States. 3 Credits. H
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Not open to freshmen. (Same as REL 373.)

HIST 374. The History of Modern American Conservatism. 3 Credits. H
In this course students will gain an in-depth knowledge of modern American conservatism, primarily through the lens of political history. We will focus on the development of the conservative political movement from the 1930s through contemporary times. We will ponder several interrelated questions: how did conservatives build a movement capable of exercising political power; what do conservatives mean when they discuss equality, liberty, and freedom; how have conservatives conceptualized the role of the United States in the world; what role have ideas played in the conservative movement; how have different factions of conservatives fought for control of their movement while struggling to maintain political unity; and how have conservatives governed? Finally, we will contextualize modern American conservatism in the broader, dynamic political culture of the United States.

HIST 376. Immigrants, Refugees, and Diasporas. 3 Credits. H
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as GIST 376.)

**HIST 377. Everyday Communism in Eastern Europe. 3 Credits. H**
This course investigates through film, literature, memoirs, photography, architecture, and scholarship the experience of ordinary citizens under Soviet-style communism in Eastern Europe. We study the ways people supported, resisted, opposed, and merely got by under state socialism from the late 1940s to the collapse of Communism in 1989.

**HIST 378. Beyond the Iron Curtain: Soviet Perspectives on the Cold War. 3 Credits. H**
This course reimagines the Cold War through Soviet eyes, challenging assumptions and offering less familiar perspectives on a global conflict. Analyzing Soviet and American mass media, popular culture, declassified documents, and personal stories, students investigate the following: Who started the Cold War, and who won it? Was it a time of relative peace or paranoia? How did the two sides view each other and did espionage help them know each other better? How did people and culture sometimes cross the iron curtain? What were the Soviets doing in places like Latin America and the Middle East? And why were both sides so concerned with Olympic athletes, ballet defectors, and cosmonauts?

**HIST 379. Europe in Crisis: Empire, Extremism, and War, 1890-1945. 3 Credits. H**
This course examines the sense of crisis that defined European life in the first half of the twentieth century, an era defined by economic spasms, cultural revolts, extreme political ideologies, and two massively destructive world wars. We will examine the period between 1890 and 1945 as a violent, at times apocalyptic, clash between three competing ideologies - communism, fascism, and liberal democracy - demonstrating how extremism both fed upon and created a sense of crisis.

**HIST 381. Enemies of Ancient Israel. 3 Credits. H**
An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called “Bad Guys of the Bible” using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as JWSH 387 and REL 387.)

**HIST 382. Jerusalem Through the Ages. 3 Credits. H**
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world’s most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, JWSH 382 and REL 382.)

**HIST 383. United States in the 1960s. 3 Credits. H**
In the Sixties, millions of Americans rejected socially-sanctioned established wisdom, long-standing cultural precepts and conventional political policies and practices. In this gateway course we will examine how and why they did so, why so many other Americans rejected their challenges to the status quo, and what difference these rebellions made in Americans’ lives. By placing their struggles in historical context, we will think about how and why people make and resist social change and how historical circumstances restrain and enable people’s individual and collective ability to act and to make their own futures. Through readings, lectures, discussion, and various assignments students will have opportunities to debate the great questions of that era and ponder the relevance of historical events and understandings to their own lives and to the life of the nation, as they sharpen their analytic abilities and their capacity to communicate those analyses effectively. Formerly known as HIST 229. Not open to students with credit in HIST 229.

**HIST 387. Alexander the Great: Man and Myth. 3 Credits. HT H**
This course explores the life, times, and legacy of Alexander the Great (356-323 BCE). It covers the historical context of ancient Greece and Macedon from which Alexander emerged; his engagement with ancient Greek, Egyptian, and Persian cultures; his military campaigns; his aims in creating an empire; and the immediate aftermath of his conquests. In addition, the course considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Alexander has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the use of the memory of Alexander by later Greeks and Romans; the medieval Alexander tradition; responses to Alexander in Middle Eastern and Indian thought and literature; the legacy of Alexander’s conquests in the age of empires; his transformation in Hollywood; and his contested place in the modern political dispute between Greece and North Macedonia. (Same as CLSX 322.)

**HIST 388. Julius Caesar: Man and Myth. 3 Credits. HT H**
This course explores the life, times, and legacy of Julius Caesar (c. 100-44 BCE). It covers Caesar’s early political career, his military campaigns, and his rise to power through civil war, with special attention paid to his aims, political reforms, and the institutions that enabled his rise to power. In addition, it considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Caesar has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the impact of Julius Caesar in Rome with the creation of an empire ruled by “Caesars”; Medieval responses to Caesar as tyrant, king, and emperor; Caesar as a paradigm of populist tyranny from the Renaissance to the present; the legacy of his literary output and the Romantic image of Caesar as a genius; his impact on the modern age of empires; and re-imaginings of Caesar in film, TV, and video games. (Same as CLSX 323.)

**HIST 389. Topics in Western History: ______. 3 Credits. H**
A study of a specialized theme or topic in Western History. Students will examine major issues and methods of historical study through the study of a specific historical period or topical area. This course grants HIST Category I credit. May be repeated for credit when topic varies.

**HIST 390. Topics in Non-Western History: ______. 3 Credits. H**
A study of a specialized theme or topic in non-Western History. Students will examine major issues and methods of historical study through the study of a specific historical period or topical area. This course grants HIST Category II credit. May be repeated for credit when topic varies.

**HIST 391. Topics in (Honors): ______. 3 Credits. H**
A study of a specialized theme or topic in History. May be repeated for credit when topic varies. Open only to students admitted to the University Honors Program. Prerequisite: Permission of instructor.

**HIST 394. Made in China: Chinese Business History. 3 Credits. H**
This course examines the development of business culture in China since 1900. Looking particularly at how it has transformed and adapted in response to China’s own changing political environment as well as China’s changing engagement with the West and Japan. We examine cases of western businesses in China and Chinese businesses in
both China and the West. Topics include the rise of industrialism, the role of foreign investment, China’s role in the global market place, the relationship between business and the state, state-run enterprises, factory life, entrepreneurialism, advertising, consumerism, and economic nationalism.

HIST 395. History of Sushi. 3 Credits. H

Sushi, now served at Midwestern supermarkets and university cafeterias, reveals the transformation of an ancient Japanese dish into a global phenomenon. This course takes familiar Japanese dishes like sushi and ramen as starting points to ask how food accrues or sheds national characteristics in an age of globalization. To learn the origin of sushi and ramen, the class traces the evolution of the diet in the context of the development of Japanese civilization. Using the methodology of food history, course assignments include short research papers on Japanese foodstuffs; analyses of primary sources from statistics to comic books to movies; and short essays drawing from participant observation of Japanese foods now available locally.

HIST 396. Hitler and Nazi Germany, Honors. 3 Credits. H

An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as EURS 396 and JWSH 396.) Prerequisite: Membership in University Honors or consent of instructor.

HIST 397. From Mao to Now: China’s Red Revolution. 3 Credits. W

This course on China’s Communist revolution considers the evolution of Maoism, or Chinese Communism, from its ideological origins through its implementation during and after the Chinese Communist revolution. It examines major Maoist movements such as Land Reform, the Great Leap Forward, the Cultural Revolution, and the cult of Mao. It further considers the globalization of Maoism by examining examples of other Maoist revolutions and revolutionaries in places like Cambodia, Peru, and Nepal.

HIST 398. Introduction to History of Japan: Anime to Zen. 3 Credits. NW H/W

This course provides a foundation for study of Japanese history. It combines lectures on the scope of Japanese history over the past 2,000 years with discussions of topics key to the development of Japanese civilization such as religion and literature. We analyze how different media, such as film, Japanese animation (anime), and art can be used as historical sources, and how these shape our understanding of Japan. Students hone their ability to analyze both thematic and historical questions through writing assignments and discussions.

HIST 399. The Samurai. 3 Credits. NW H/W

Japan’s warrior class, the samurai, dominated politics and society for more than half of Japan’s recorded history. This course traces the history of the samurai from their origins to the dissolution of their class in 1877, examining their military role, philosophy, and cultural contributions. It also considers continued references to the “spirit of the samurai” in the twentieth century.

HIST 400. Indigenous People of the Great Plains. 3 Credits. H

This course examines the emergence of horse-mounted indigenous societies in the Great Plains; the nature of the indigenous societies of the Great Plains in the nineteenth century; conflicts with the United States; the beginning of the reservation period; and indigenous people of the Great Plains in the modern era. Readings combine primary documents and novels with selections from anthropology, social history, and environmental history. (Same as ISP 400.)

HIST 401. Case Studies in: ______. 2-3 Credits. H

Examination of a limited aspect of a general subject; other aspects of the same subject may be offered other semesters.

HIST 402. War and Society in Greece and Rome. 3 Credits. H/W

This course explores the military history of the ancient world, with a focus on the connections between warfare and political, social, and cultural developments. Through extensive reading, analysis, and discussion of a wide variety of ancient sources (literary, epigraphic, archaeological) and contemporary scholarship, this class will survey both the major developments in warfare in Greece and Rome, while at the same time investigating the relationship of military institutions, technologies, tactics, and strategies to the key political and economic changes, social structures, and value systems of antiquity. Beyond exploring famous and influential campaigns and battles (Persian Wars; Peloponnesian War; rise of Macedonia; Punic Wars; Roman civil wars; barbarian invasions), topics will include: hoplite warfare and the emergence of Sparta and Athens; sea-power, democracy, and imperialism; citizen militia and professionalization in Rome; trauma, triumph, and memorialization; gender roles and ethnic identity. (Same as CLSX 402.)

HIST 403. Playing with the Past: History in Games and Gaming. 3 Credits. H

Humans have played games since prehistoric times. Frequently games are more than just entertainment; they often convey political, cultural, social, economic concepts. Games are more than just leisure; they are historical texts that do work to shape our understanding of the past. This class examines the relationship between history and games. How do games portray history? How do they shape our understanding of the past? How can games help us understand the way that the past has influenced the present? How do games tackle historically constructed issues such as race and gender? Can games be used to challenge power systems, stereotypes, and social inequities? Students will be asked to play and analyze a variety of board games and videogames to better understand these questions.

HIST 404. Technology and the Modern World. 3 Credits. H

We live in a technological world. From the moment we wake up until the moment we fall asleep, our lives as modern human beings are defined by the existence of and our interactions with various technologies. Far from neutral, technologies embody the values, priorities, and power disparities of a society. As a result, their creation, use, and proliferation raise profound ethical questions such as their environmental impact, equitable access, and potential unintended consequences or “spillover effects”. In this class, we will apply ethical codes to key case studies within the history of technology to understand how moral issues inherent within contemporary discussions of emerging technologies have developed and changed over time.

HIST 405. Women, Gender, and Sexuality in the North American West. 3 Credits. H

This course will provide students with an overview of how the history of women have profoundly shaped and given meaning to the development of the North American West (which includes present-day states and provinces in the U.S., Canada, and Mexico). The class will examine the lives of women who represent diverse backgrounds, lands, and time periods in this western region. In addition to women, lectures, readings, and discussion will focus on the themes of gender, masculinity, class, race, ethnicity, sexuality, labor, and environment. Broad in chronological scope that spans pre-contact into the twenty-first century, this course is not a comprehensive survey. Rather, the class will examine how women and groups of women across the region defended, survived, explored,
cultivated, and imagined the West as a place that defined their homes, migrations, settlement patterns, as well as sites of captivity, displacement, war, and development. (Same as WGSS 305.)

HIST 407. Technology in American History. 3 Credits. H
In this course, students examine the role that technological development and proliferation have played in American history from the nation’s founding to the present. Drawing on key areas of study within the history of technology, we will analyze the historical debate over the place of technologies in American society, how cultural values and political movements have shaped the creation and adoption of new technologies, and the ways that technologies have become tools for equality and oppression. Topics may include the railroad, electrification, mass production, the automobile, radio, air conditioning, television, computers, and the internet.

HIST 408. History of the Great Plains. 3 Credits. H
This course is an overview of the history of the North American Great Plains up to 1900. Today’s plains region comprises ten American states and three Canadian provinces, but it also connects dozens of Indigenous nations that (historically and presently) overlapped through seasonal migrations, trade, resources, and sacred lands. The Great Plains is a unique geographical area that is united by several environmental traits: flatness, aridity, unusual elevations, and an abundance of grasslands. It is also a region of North America characterized by significant cultural diversity, contested spaces, and national myths of empire and settlement. Lectures, readings, and discussion will cover these topics chronologically while emphasizing major themes of ethnicity, race, gender, class, environment, politics, and economic development.

HIST 410. The American Revolution. 3 Credits. H
This course will focus on the meaning the American Revolution had for different groups of Americans. Particular emphasis will be on the relationship between ideology and experience, and the impact of the Revolution on such groups as women, slaves, Indians, African-Americans, the poor, merchants, and loyalists.

HIST 412. The Civil War in America, 1828-1877. 3 Credits. H
This course analyzes the history of the American Civil War from the growing sectional tensions of the late 1820s to the collapse of Reconstruction in 1877. Students will explore the political, social, and economic issues that led to the war, including African American enslavement, the Constitutional crises, and westward expansion. This course will also examine how wartime leadership, diplomacy, strategy, and the home front affected the outcome of the war and how plans for post-war Reconstruction were frustrated by the politics of reunification, gender, and race.

HIST 415. The Rise of Civilization. 3 Credits. S
A study of evolutionary processes leading to the birth of the early great urban civilizations of the Old World and the New World. Patterns of growth and similarities and differences in the rise of urban complexes and states in Mesopotamia, Egypt, the Indus Valley, and in Mexico/Guatemala and Peru. (Same as ANTH 415.)

HIST 441. Aviation in American Culture. 3 Credits. H
This course examines the complex relationship between powered flight and American society from the invention of the airplane to the rise of drone warfare. Through a mixture of scholarly works, personal accounts, and primary sources, we will investigate how use of and access to the airplane became a focal point for the construction and deconstruction of race, gender, and class distinctions and an important site in the struggle for equality and social justice. Using the airplane as a lens, we will recognize and challenge key assumptions within American technoculture such as technological messianism, technological neutrality, and the role of government in technological development. (Same as HUM 373.)

HIST 442. The Politics of Racial Injustice in the United States. 3 Credits.
In this course, students will examine, in detail, four historical eras in which the American people struggled over anti-Black racial injustice in the United States. While the role and efficacy of social change movements and grass-roots activism in that struggle will be analyzed, the course will emphasize political, policy, and institutional responses and remedies to the problem of American racism. In particular, discussions, readings, and assignments will evaluate the successes and failures of specific legislative, judicial, administrative, and organizational interventions. How and why these responses developed and fared as they did as well as the debates over their efficacy will be the focal point of this course. (Same as AAAS 442.)

HIST 450. Study Abroad Topics in: _____ 1-5 Credits. H
This course is designed for the study of special topics in History at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

HIST 461. The Asia-Pacific War, 1937-1945. 3 Credits. H
This course introduces students to the Asia-Pacific War, which began with the outbreak of fighting between Japan and China in July 1937 and ended with the unconditional surrender of the Japanese Empire to Allied forces in August 1945. The course revolves around three themes, which are explored through lecture, discussion, and extensive use of film and visual materials: the geopolitical and colonial origins of the conflict; the concept of total war and the political and social transformations it unleashed on all belligerent nations; and the ideologies on the home front justifying the mass slaughter of soldiers and civilians. There is also discussion about how people in Japan, the United States, China, Korea, and other countries remember the war in the postwar period.

HIST 475. Professional Skills in History. 3 Credits. H
This course will introduce students to the fundamentals of planning and organizing job search strategies. Students will identify their professional interests, research specific careers, and prepare applications to positions or internships based on the skills, experience, and knowledge acquired in their History courses. The final project assignment will consist of preparing a digital portfolio that will include a cover letter, c.v., or resume, lists of specific positions or internships they could apply for, and a video of a mock professional interview.

HIST 480. Travelers’ Tales of the Middle East. 3 Credits. H
This reading-intense seminar examines the multiple visions of “the Orient” that appeared in the letters, memoirs, and novels of Western travelers to the Middle East in the nineteenth and twentieth centuries. We examine the rise of tourism and travel-writing within the Middle East and their links to European imperialism. Working closely with primary source documents, we question what these highly personal and often misinformed types of writing can tell us about the politics and culture of everyday life in the Middle East.

HIST 481. From Harem to the Streets: Gender in the Middle East, 1900-Present. 3 Credits. H
This reading-intensive seminar examines shifts in gender roles and expectations in the Middle East during the twentieth and twenty-first centuries. The course begins with the importance of harem within Middle Eastern society, and traces Middle Eastern women’s increasingly public presence in national movements, feminist activism, and peace protests as well as the impact of Western standards of marriage, child-rearing, beauty, and sexuality on gender roles. The course uses primary and
secondary sources to analyze how gender identity is informed by religion and culture and grounded in specific historical moments.

**HIST 482. Israeli-Palestinian Conflict: An Introduction.** 3 Credits. S

This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. (Same as GIST 329, JWSH 329, and POLS 369.)

**HIST 492. Readings in History.** 1-4 Credits. H/W

Investigation of a subject selected by the student with the advice and direction of an instructor. Individual reports and conferences. Two (2) Readings in History courses may be applied to the major and no more than one (1) may be applied to the minor. Prerequisite: Ten hours of college history including at least two upper-class courses and a "B" average in history. Consent of instructor.

**HIST 493. History Research Internship.** 1-3 Credits. H

The course allows students to work with a faculty mentor and learn firsthand the tasks that historians undertake to research and present their findings. Potential student assignments include database entry and retrieval, translation, fact checking, and compiling sources. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level history course; declared major in history; and permission of the instructor.

**HIST 494. Service Learning in History.** 1-3 Credits. H

This course is designed to give students the opportunity to apply historical knowledge and ideas gained through course work to real-life situations in volunteer service agencies and community centers. Open to History majors and others with significant History backgrounds. Permission of instructor is required.

**HIST 500. History of the Book.** 3 Credits. H

Brief history of writing materials and handwritten books; history of printed books from the 15th century as part of cultural history; technical progress and aesthetic change. Offered every second year. (Same as ENGL 520.)

**HIST 501. Topics in Western History:** _____ 3 Credits. H

A study of a specialized theme or topic in western History. Students will examine major issues and methods of historical research through the study of a specific historical period or topical area. This course grants HIST Category I credit. May be repeated for credit when topic varies. Prerequisite: Successful completion of a history course numbered below 500, or permission of instructor.

**HIST 502. The Age of Heroes: Early Greece.** 3 Credits. H/W

This course explores the Greek Bronze and Dark Ages and in particular the relationship of the Iliaid and the Odyssey to early Greek history. The course is organized around current methods, problems, and debates in the fields of Greek history, archaeology, and Classics. Topics include the rise and fall of the Minoan and Mycenaean worlds, the historiity of the Trojan War, and social, religious, and political institutions of the Dark Ages. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 502.) Prerequisite: Any CLSX or HIST course.

**HIST 503. The Ancient History of the Near East.** 3 Credits. H

History of the rise of civilizations in the ancient Near East from the earliest time to the Muslim conquest of the early seventh century, including the areas of Mesopotamia, Egypt, Syria, Palestine and Asia Minor. An archaeological approach is used in focusing attention on the cultural phenomena and achievements of the peoples of these areas, including the Babylonians, Assyrians, Persians, ancient Israelites, Greeks and Romans.

**HIST 504. Rise of Athens and Sparta.** 3 Credits. H/W

This course explores the history of Archaic and Classical Greece, focusing on the rise and fall of the rival states of Sparta and Athens. The course is organized around current methods, problems, and debates in the fields of Greek history and Classics. Topics include the emergence of the Greek polis; Greek colonization; developments in political, religious, and social institutions, including the Spartan constitution and the rise of Athenian democracy; the changing definitions of personal, cultural, and national identities; cultural, political, and economic tensions between rival Greek city-states and neighbouring cultures, especially Persia and Macedonia. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 504.) Prerequisite: Any CLSX or HIST course.

**HIST 506. Roman Republic.** 3 Credits. H

This course investigates the origins, development, and eventual crisis of the Roman Republic, from its foundation in the eighth century BC to Civil War in the first century BC. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include the contexts and causes for the rise of Rome, the growth, development, and eventual collapse of the Roman republican constitution, and the impact of empire on Roman society, culture, religion, economy, and identity. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 505.) Prerequisite: Any CLSX or HIST course.

**HIST 507. Early Roman Empire.** 3 Credits. H

This course investigates the establishment and development of the Roman Empire, from the rise of Augustus to the peak of Roman power and prosperity in the second century AD. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include the creation of the imperial system; developments in the role of the emperor and the Roman government; continuity and transformation in society, culture, religion, economy, and identity with the shift from republic to empire; daily life across the empire and in the army. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 507.) Prerequisite: Any CLSX or HIST course.

**HIST 508. Late Roman Empire (284-527).** 3 Credits. H

This course investigates the history of the later Roman Empire, from the height of its power in the second century AD to the fall of the Western Roman Empire in the fifth century AD. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include continuity and change in Roman culture, identity, and institutions; the Christianization of the empire; contact and conflict between Romans and the "barbarians"; political decline and daily life across the empire. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as CLSX 508.) Prerequisite: Any CLSX or HIST course.

**HIST 510. Topics in Non-Western History:** __________ 3 Credits. H
A study of a specialized theme or topic in non-Western History. Students will examine major issues and methods of historical research through the study of a specific historical period or topical area. This course grants HIST Category II credit. May be repeated for credit when topic varies. Prerequisite: Successful completion of a history course numbered below 500, or permission of instructor.

HIST 511. Foodways: Native North America. 3 Credits. H
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HUM 551 and ISP 551.) Prerequisite: Upper division course on indigenous/ American Indian history, or permission of the instructor.

HIST 512. Foodways: Latin America. 3 Credits. H
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HUM 552, ISP 552, and LAC 552.) Prerequisite: Upper division course on Latin America or permission of the instructor.

HIST 514. The Civil Rights Movement. 3 Credits. H
An examination of the Civil Rights Movement in American History. Emphasis is placed on the activities of major Civil Rights organizations, Civil Rights legislation and its impact on American life, and conflicts between integrationist and separatist forces in politics, economics, education, culture and race relations in the United States. (Same as AAAS 511.)

HIST 517. The Seventies: An American History. 3 Credits.
Americans who lived through the 1970s witnessed more than their fair share of historically significant events. The President resigned in disgrace, America ran out of gas and got run out of Vietnam. New York City went bankrupt, blacked out, and caught on fire. Racial integration died and Black Power went mainstream. The Beatles broke up, Muhammad Ali ruled the world (again), Lucas and Spielberg birthed the blockbuster, and disco, rap and punk put the smack down on Rock 'n' Roll. Everywhere you look in the 1970s, you can find evidence of the end of one period of American history—the postwar period—and the beginning of a new historical epoch—the Age of Reagan, the Neoliberal Age, or, perhaps, Postmodern America. Students will explore this pivotal decade in American history through weekly readings, watchings, and listenings; twice-weekly class discussions of prepared material; and an independent research project. Prerequisite: Prior course in HIST or a related field or permission of the instructor.

HIST 518. Capitalism and the Black Experience. 3 Credits. H
This is an upper level course designed to analyze the experiences that define the African American relationship to the American economy. The course begins with the slave trade and ends in the present. It explores and explains how African American economic development intimately intertwined with the movement for freedom. Students will learn how African Americans addressed issues around slavery, housing, banking, capitalism/socialism, underground economy, and gentrification. This course is chronological in nature with thematic elements. Lectures will provide brief histories and conceptual framework for readings. This background will help students understand and explore how black identity, culture, and politics interact with economy. However, the bulk of the course will operate as a seminar. By the end of the course, students will be able to summarize African American past experiences with capitalism and its relevance to contemporary economic issues affecting African American people today. (Same as AAAS 518 and AMS 518.) Prerequisite: Any American Studies or History courses on American History.

HIST 520. The Age of the Renaissance. 3 Credits. H/W
A survey of economic, political, social, and cultural developments in Italy in the 14th and 15th centuries, with special attention to those elements in the life of the age which look forward to the modern world.

HIST 521. The Age of the Reformation. 3 Credits. H/W
The Protestant revolt of the 16th century.

HIST 522. The Age of Religious Wars, 1540-1648. 3 Credits. H/W
The Catholic or Counter-Reformation and the wars of religion, including the Thirty Years War.

HIST 525. France and Its Empire: From Acadia to Zidane. 3 Credits. H/W
A study of modern France through the lens of its overseas empire and the relations between French colonies and the metropolitan "Hexagon." This course studies the establishment of New France in the early modern period, the relationship between the French Revolution and colonies like Haiti, the French obsession with North Africa in the nineteenth century, the "Second Empire" at home and abroad, the French role in the Scramble for Africa and the global age of imperialism, the participation of colonial troops in the world wars, the post-World War II age of colonial wars and decolonization, and the contemporary role of imperial memory and immigrants to France from its former colonies. Prerequisite: Requires a prior history course or permission of the instructor.

HIST 527. Recent European History, 1870 to the Present. 3 Credits. H/W
A study of the issues and themes that have shaped the contemporary European world, exploring European politics, economy, and society from the zenith of Europe's power and influence at the turn of the century through two world wars and into the contemporary era. This survey begins with the period of consolidation of a system of major national states in western Europe and ends with the search for alternatives to that system in the break-up of empires and movements for European unity in the post-World War II era. The course also considers the emergence of the states of central and eastern Europe and examines the impact of the Russian Revolution and the Soviet state on European affairs. Not open to those who have credit in either HIST 435 or HIST 436.

HIST 528. Economic History of Europe. 3 Credits. S/W
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as ECON 535.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)].

HIST 530. History of American Women--Colonial Times to 1870. 3 Credits. H
A survey of women's history in the United States that will consider women's roles as housewives, mothers, consumers, workers, and citizens
in preindustrial, commercial, and early industrial America. (Same as AMS 510 and WGSS 510.)

**HIST 531. History of American Women—1870 to Present. 3 Credits. H**
A survey of women's history in the United States that will include radical and reform movements, the impact of war and depression, professionalization, immigration, women's work, and the biographies of leading figures in women's history. (Same as AMS 511 and WGSS 511.)

**HIST 541. British History, Tudors and Stuarts. 3 Credits. H**
An introduction to the impact on the British Isles of the Reformation and Renaissance; the development of the Tudor state; Parliament; the Stuart monarchy; the Anglican counter-reformation; civil war; the Cromwellian experiment. Prerequisite: A prior history course, or permission of the instructor.

**HIST 548. Rise of Modern Britain. 3 Credits. H**
A study of the rise of modern Britain from the 1832 Reform Act, a major step on the path from aristocratic government to mass democratic politics. It covers the politics and society of the Victorian era, the extension of British influence overseas, the origins and social impact of two world wars, the creation of the Welfare State, the loss of Empire, and Britain's entry into Europe.

**HIST 561. Liberation in Southern Africa. 3 Credits. W**
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and POLS 561.)

**HIST 563. U.S. Environmental Thought in the 20th Century. 3 Credits. H**
Explores both leading and dissident ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as EVRN 563.) Prerequisite: EVRN 148 or HIST 12B, or permission of instructor.

**HIST 564. Medieval Russia. 3 Credits. H**
Political, economic, social, cultural, and religious developments of Russia from the beginnings of the Russian state in the 9th Century through the 17th Century.

**HIST 565. Imperial Russia. 3 Credits. H/W**
The history of Imperial Russia from Peter the Great's reinvention of the empire in the eighteenth century to its demise in the revolutions of 1917. Placing Russia in a global context, the course examines change and continuity in politics, society, economy, and culture and looks at Russia as a diverse empire between Europe and Asia. Readings include historical scholarship and some of the classics of Russian literature.

**HIST 566. Rise and Fall of the Soviet Union. 3 Credits. H/W**
An exploration of the Soviet Union's creation, evolution, collapse, and legacy in contemporary Russia and Eurasia. Drawing on historical scholarship, literature, music, and film, the course examines the major trends and developments in Soviet politics, ideology, society, economy, and culture. Special attention is paid to how the multiethnic Soviet state's rise and fall reflected broader changes in the world during the "Soviet century."

**HIST 570. The Middle East After World War II. 3 Credits. NW H/W**
An intensive study of developments and changes in the Middle East since World War II. Topics and themes will vary, but may include the long-lasting effects of European imperialism, Big Oil and the energy crisis, the Arab-Israeli conflict and peace process, American intervention in the Middle East, minority communities, and the revival of Islamic and popular protest movements.

**HIST 571. Pre-Hispanic Mexico and Central America. 3 Credits. NW S/W**
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotecs, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as ANTH 506 and LAC 556.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor.

**HIST 572. Ancient American Civilizations: The Central Andes. 3 Credits. W**
An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of "vertical" environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huari, Tiahuanaco, Chimú, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnohistoric documents. (Same as ANTH 508 and LAC 558.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, History, or Indigenous Studies, or permission of instructor.

**HIST 574. Slavery in the New World. 3 Credits. H/W**
Slavery, slave culture, and the slave trade in the U.S., Latin America, and the Caribbean will be examined comparatively. Attention will also be given to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. (Same as AAAS 574.)

**HIST 577. The Andean World. 3 Credits. H**
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relationships between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, ISP 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

**HIST 578. Global Indigenous History. 3 Credits.**
In this course, students are introduced to a global comparative history of Indigenous peoples and nations, offering a unique opportunity to study how Indigenous nations have made a significant impact from ancient to contemporary times. Global Indigenous history provides invaluable
insights into key historical debates about the processes/systems of colonization, international law, treaty rights, citizenship, nationalism, democratization, war, sovereignty, community & nation building, and cultural revitalization. This lecture class explores histories of the Ancient Mayan and Incan empires; Red Power to Idle No More; Mi'Kmaq and Aboriginal rights movements; Tibetan independence and Gandhi's Satyagraha; Irish and Scottish revolution; and contemporary conflict(s) in the Middle East, just to name a few. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in ISP 878. (Same as ISP 578.) Prerequisite: Requires a prior history course or one in a related field or permission of the instructor.

HIST 579. The History of Brazil. 3 Credits. H/W
The history of Brazil from European discovery to the present with emphasis on social and economic change. Topics discussed will include the Indian, African, and European backgrounds, slave society, the frontier in Brazilian development, cycles of economic growth and regionalism, the role of foreign capital, industrial development, labor, urban problems, the military in government, and human rights.

HIST 580. Economic History of Latin America. 3 Credits. H/W
A study of the changing economic conditions in Latin America from Colonial times through the Twentieth Century and the effect of these conditions on Latin American society. Emphasis will be on the major theoretical issues of development economics, patterns of growth, and suggested strategies for economic development. Analysis will center on changes in agriculture, industry, labor, finance, transportation and technology, urbanization, immigration, role of women, export and commerce, and foreign involvement.

HIST 584. Modern China. 3 Credits. NW H/W
An intensive survey of China's history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as EALC 584.)

HIST 585. Beer, Sake, Tea-Beverages in Japan History. 3 Credits. H
Sake and tea are synonymous with Japan today, but the history of beverages from water to whiskey illuminates key developments in Japanese civilization. This course makes a thematic survey of Japanese beverages introducing the place of drinks in global history before examining their distinct context in Japan. Topics include the ritual consumption of beverages as in the tea ceremony; the place of alcohol in Japanese culture; locales for consuming beverages such as bars, teahouses and coffee shops; and the Westernization of taste preferences as characterized by the introduction of beer and wine. By taking this course, students gain insight into ways that beverages contribute to Japanese culture and help shape personal and national identity. Prerequisite: Successful completion of an East Asian history or culture course number below 500 or permission of the instructor.

HIST 587. Age of Shoguns: Early Modern Japan. 3 Credits. NW H/W
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as EALC 587.) Prerequisite: An earlier course in history or east Asian languages and cultures, or permission of the instructor.

HIST 588. Japan, 1853-1945. 3 Credits. NW H/W
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as EALC 588.)

HIST 591. Food in History: West and East. 3 Credits. H/W
A survey of scholarship on food in the West and in East Asia, choosing works primarily by historians, but also by sociologists, geographers, and anthropologists. We consider how scholars have approached issues concerning food productions and consumption, what habits of eating reveal about daily life, and how and when food is embedded with historiography related to these topics, keeping in mind the famous maxim of the noted French gastronome Brillat-Savarin (d. 1826): "Tell me what you eat: I will tell you what you are."

HIST 598. Sexuality and Gender in African History. 3 Credits. W
An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project in consultation with the instructor. (Same as AAAS 598 and WGSS 598.)

HIST 603. History of Tibet. 3 Credits. NW H
This course surveys the cultural and political history of Tibet from the eighth to the twentieth century. Through readings, lectures, and discussions, students gain familiarity with the dominant features of Tibetan civilization. Topics include the relationship between Tibet and the civilizations of India and China, Tibetan Buddhism, and the tensions between the struggle for Tibetan independence versus claims of Chinese sovereignty. The course also considers the Tibetan diaspora and the reception of knowledge about Tibetan civilization in the West.

HIST 604. Contemporary Greater China. 3 Credits. W
This course considers contemporary China, Taiwan, and Hong Kong in comparative perspective. It begins in the early twentieth century so as to set up a comparison between Nationalist, Communist and Colonial China. It focuses on the evolution from the 1940s to the present studying the political, economic and social systems of the three regions that constitute what we now call 'Greater China' and considers, in particular, important points of difference and similarity between them.

HIST 605. Medieval Japan. 3 Credits. NW H
Course examines the history of Japan from the end of the ancient period (c. 1200 AD) through the medieval era (approximately 1573). Issues covered include the formation and destruction of the Kamakura and Muromachi warrior governments, medieval religious life and culture. Writing assignments provide students with opportunities to gain familiarity with historical methods for analysis and to strengthen their written expression. Not open to students who have taken HIST/EALC 586.

HIST 610. American Colonial History. 3 Credits. H
Examines colonial American history from the age of Columbus to the mid-1760s. The course seeks to place colonial American history into the larger historical context, particularly the expansion of the British Empire in the early modern period. Emphasis in the course will be on migration, social and economic conditions, and inter-racial relations.

HIST 615. Rise of Modern America: Politics, Culture, and Society, 1900-1950. 3 Credits. H
The history of the United States in the First Half of the Twentieth Century.

HIST 616. Contemporary America, 1941-Present. 3 Credits. H
A history of the United States from its entry into World War II to the present. A study of such selected topics as women's history and feminism, race relations and the Afro-American civil rights movement,
power, poverty, the military-industrial complex, McCarthyism, and presidential administrations.

HIST 618. History of the American West to 1900. 3 Credits. H
A survey of Western history with emphasis on such topics as Native Americans and Indian-white relations, environment and resource use, exploration and discovery, expansionism and Manifest Destiny, economic development, urban, rural, and alternative communities, ethnic and racial experience, women and violence. Consideration will also be given to topics such as fur trade, mining, the cattle business, and agriculture.

HIST 619. History of the American Indian. 3 Credits. NW H/W
A study of Indians in the United States from colonial times to the present. Consideration will be given to the political, social, and cultural history of selected Indian tribes and to Indian-white relations with particular attention to the Indian point of view. Other topics will include a comparative study of Indian policy of nations colonizing in America, cultural intermingling and cultural conflict, and current Indian problems. Slides, films, and guest speakers (including American Indians) will be used in the course.

HIST 621. The American West in the 20th Century. 3 Credits.
A study of the post-frontier era and the struggle to create a regional identity, drawn from legends of the heroic past, varieties of racial and ethnic experience, political culture, and the possibilities of the land.

HIST 625. The Body, Self and Society. 3 Credits. H
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HUM 575, WGSS 575.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor.

HIST 630. The United States and the World, 1890-2003. 3 Credits. H
An examination of the history of United States foreign relations over the course of the twentieth century. Treats America's emergence as a world power before World War I, imperialism and interventionism, involvement in World War I and World War II, internationalism, the Cold War and America's anti-communist crusade, third world nationalism, responses to a global economy, and the obligations of a military superpower in a chaotic world.

HIST 649. History of Feminist Theory. 3 Credits. H
This discussion course will cover the development of feminist theories from the late Middle Ages to the 1970s. Reading will include Pisan, Wollstonecraft, Mill, Freud, Woolf, Beauvoir, Friedan, Daly, Kristeva, and others. (Same as WGSS 549.) Prerequisite: Any previous course in WGSS or HIST or permission of instructor.

HIST 690. Honors Course in History. 3 Credits. H
This course is the first part of a two-part course that provides a group setting for writing the Senior Honors Thesis, which is a substantial work of historical research based above all on the analysis of primary sources. During this first semester students must produce a serious working draft of the thesis. Assignments and discussions will help students to prepare this draft, which will establish a solid foundation for the Honors Thesis. In addition, this course will provide a close experience of advanced, professional, historical work. Presentations, weekly comments on the work of others, and active participation in seminar discussions with constructive observations and questions will complete that professional experience. A History faculty advisor will provide essential guidance throughout the process of writing the thesis. Prerequisite: HIST 301 and permission of instructor.

HIST 691. Undergraduate History Honors Seminar. 3 Credits. H
Required for students in the History major honors program, normally in the second semester of their History honors projects. Another seminar experience may be substituted, with the approval of the Honors Coordinator. Prerequisite: Approval of the Honors Coordinator of the Department of History.

HIST 692. Independent Capstone. 3 Credits. H
This independent study is designated for students who did not, or are unable to, complete one of the department's other capstone offerings (HIST 696 or HIST 691). The course will introduce students to the theory and practice of historical inquiry and require a substantial research project. May not be repeated for credit. Prerequisite: Completion of 75 credit hours of undergraduate study, including HIST 301, and consent of the instructor.

HIST 696. Seminar in: _____ . 3 Credits. H
A seminar designed to introduce students to the theory and practice of historical inquiry. A research paper will be required. May not be repeated for credit. Prerequisite: Completion of 75 credit hours of undergraduate study and completion of HIST 301, and recommended completion of one 500 level history course, or consent of the instructor.

HIST 705. Globalization in History. 3 Credits.
A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include western expansion since 1500, the spread of state sovereignty, the formation of a world economy, and spread of international institutions. The current world problems investigated will vary, but may include issues such as environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as GIST 705.)

HIST 720. The Nature of Museums. 3 Credits.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as MUSE 801.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

HIST 721. Introduction to Museum Public Education. 3 Credits.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, GEOL 784, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

HIST 722. Conservation Principles and Practices. 3 Credits.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, GEOL 780, and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

HIST 723. Introduction to Museum Exhibits. 3 Credits.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing
museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, BIOL 787, GEOL 781, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

HIST 725. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, BIOL 798, GEOL 785, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

HIST 727. Practical Archival Principles. 3 Credits.
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as MUSE 707.)

HIST 728. Museum Management. 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, GEOL 783, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

HIST 747. East Asian History and Culture for Teachers. 2 Credits.
An advanced survey of the history, culture, and contemporary affairs of China, Japan and Korea, specifically designed for K-12 educators who wish to incorporate East Asian topics into their classroom teaching. Pedagogical methods and resources for the study of East Asia will be emphasized. Topics covered will address relevant benchmarks in the state curricular standards in social studies, themes from the Advanced Placement world history examination, and the national standards in world history. Prerequisite: Approval of the instructor.

HIST 748. East Asian Historical Materials: _____ 3 Credits.
The aim of the course is to provide students with the linguistic tools needed for archival research in East Asian history by assisting them in gaining experience reading primary and secondary language materials in Japanese and/or Chinese including texts in classical forms of these languages. After studying the rules of classical grammar and the particulars of historical materials as needed, students will read primary documents in conjunction with secondary readings in Japanese and/or Chinese. Fundamental aspects of paleography may also be introduced in this course depending on student need. Prerequisite: Capability of reading Japanese or Chinese and permission of the instructor.

HIST 800. Readings in: ____, 1-8 Credits.
Prerequisite: Consent of instructor.

HIST 801. Colloquium in: _____, 1-6 Credits.
Reading and discussion of selected topics.

HIST 802. Seminar in: _____, 3 Credits.
Research Seminar on selected topics.

HIST 804. Professionalization Seminar in Women, Gender, and Sexuality Studies. 1.5 Credits.
The goal of this course is to train students in the skills essential to becoming effective scholars and educators, and successful members of the profession. The material to be covered by these three iterations includes 1) the ethics and practice of feminist research (e.g., protection of human subjects, conflicts of interest, confidentiality, legal strictures); 2) the practical aspects of producing knowledge (e.g., writing research papers, proper citation methods, conference presenting, responding to peer reviews); and 3) acquiring and securing a place in the work force (e.g., CV preparation, job interviews, grant writing, getting promotion [and, in the academy, tenure]). (Same as WGS 804.) Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students.

HIST 805. The Nature of History. 3 Credits.
The introductory course to graduate study, this colloquium introduces students to the practice and epistemology of history, familiarizing them with various methodological schools, theoretical touchstones, and historiographical subfields. Required of all incoming M.A. and Ph.D. students.

HIST 806. Studies in: _____, 3 Credits.
The core course for each thematic major field in the graduate program in History. The course, offered in a colloquium style format, will serve as an introduction to the principal standard literature in the field, and will consider the full range of methodologies or approaches appropriate to the field.

HIST 807. Professional Development Colloquium in Pedagogy. 3 Credits.
This course will help train future professional historians to teach. It will focus on a variety of pedagogical topics for future college history faculty, including: developing students’ critical and analytical thinking; teaching research skills; promoting student involvement/participation; determining course goals; use of multi-media technology. In addition to attending class meetings of History 807, students will attend as observers throughout the semester one 500/600-level course in an area relevant to their future teaching and complete the readings assigned to the class. They will produce a course portfolio for an undergraduate course, including: a syllabus designed by the student; a set of assignments that will be part of that course, such as examinations and papers; sample lesson plans; an annotated bibliography of materials relevant to the subject-matter of the course.

HIST 808. Colloquium in Comparative History: _____, 3 Credits.
A readings-oriented course which explores themes in two or more geographic and/or chronological fields of history. The benefits and disadvantages of comparative methodologies will be analyzed. Topics will vary each term but may include the examination of such subjects as the history of urbanization, labor, colonialism, immigration, the family, political thought, or industrialization. Prerequisite: Varies with area of subtopic.

HIST 810. Colloquium in Nationalism Studies. 3 Credits.
Exploration of the major contemporary scholarly theories of nationalism and other forms of group identification, supplemented with case studies.

HIST 811. Colloquium in Comparative Empires. 3 Credits.
This colloquium explores the evolution of empires across space and time by surveying the rather contentious scholarly literature on the subject, offering a methodological introduction to comparative and transnational history in the process.

HIST 862. Indigenous Archives and Tribal Historic Preservation. 3 Credits.
In this methods class, students will gain foundational knowledge in the archival and preservation of Indigenous source materials: oral histories, printed materials, Tribal documents, letters/journals/diaries, artwork, and a host of other sources. Students will also utilize digital history technology
to create online exhibits and an original research paper. Beyond the archives this course introduces students to the important work of Tribal Historical Preservation examining the laws, ethics, cultures, policies, histories, ethics, recovery/restoration, Indigenous GIS, consultation, management, and career paths in Tribal Historical Preservation. Finally, students will gain invaluable experiences by writing grants and developing final projects that can lead to real-world applications of their research. (Same as ISP 862.)

HIST 878. Colloquium in Global Environmental History. 3 Credits.
This graduate colloquium examines the intersection between environmental history, world history, and global history as interdisciplinary fields of inquiry, as well as regional approaches to environmental history from around the globe.

HIST 879. Colloquium in North American Environmental History. 3 Credits.
Intensive survey of significant works in the field from colonial times to the present, with attention to bibliography, research methods and needs, and leading issues in interpretation.

HIST 881. Slavery in the Atlantic World. 3 Credits.
A graduate colloquium examining the historical roots, processes, experiences, and legacies of human slavery from local, regional, comparative, and global perspectives.

HIST 883. Ethnohistory of the Americas. 3 Credits.
A graduate colloquium that develops methodologies and examines historical case studies for the study of ethnicity, interethnic relations, and cultural hybridity from a hemispheric perspective, not only for indigenous peoples, but also for African-, Asian-, European-, or Pacific-derived groups, as well as new ethnic groupings and identities that emerged from their interaction.

HIST 890. Colloquium in American History 1492-1800. 3 Credits.
Study of the leading interpretations of major issues in the history of Colonial and Revolutionary America, including appropriate attention to new approaches and techniques in research. The first course in the sequence of colloquia in United States history.

HIST 891. Colloquium in 19th Century U.S. History. 3 Credits.
Study of the leading interpretations of major issues in the history of the United States in the 19th century. The second course in the sequence of colloquia in United States history.

HIST 892. Colloquium in 20th Century U.S. History. 3 Credits.
Study of the leading interpretations of major issues in the history of the United States in the 20th century. The third course in the sequence of colloquia in United States history.

HIST 893. Colloquium in Military, War, and Society. 3 Credits.
Analysis of key historiographical conversations and major trends in US-focused Military, War, and Society scholarship, including their relation to the broader fields of military and US history.

HIST 895. Colloquium in the History of Gender. 3 Credits.
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as AMS 835 and WGSS 835.)

HIST 899. Masters Preparation. 1-3 Credits.
A course for students preparing to complete their Master's degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

HIST 982. Colloquium in the History of the American West. 3 Credits.
Study of issues and interpretations in the history of the American West from prehistory to the present, including attention to new approaches and techniques in research.

HIST 993. Applied History Experience. 1-3 Credits.
This course allows students to receive credit for participating in an internship, practicum, or other non-academic context in which they take part in the preservation, dissemination, interpretation, or presentation of History. Students taking this course will meet regularly with the instructor, ideally their advisor, to discuss and reflect upon the experience and its relationship to the student's research and professional development. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of Instructor.

HIST 997. Dissertation Seminar. 1-12 Credits.
In this course, students who have successfully completed their doctoral oral comprehensive exam will research, write, and workshop dissertation chapters, while engaging in other professionalization exercises and discussions. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Must pass oral comprehensive exam before enrolling.

HIST 998. Portfolio Preparation. 1-3 Credits.
This course will guide students through the process of preparing and submitting their written portfolio and preparing for the oral defense. In this course, students will complete field readings and prepare the cover letter, professional essay, grant application, and sample syllabus they are required to submit to their Advisory Committee in advance of the oral defense. Working closely with their Advisory Committee members, students in HIST 998 will generate these documents and workshop them with the course instructor and their fellow students. The instructor will mentor students through the process of scheduling their exams and preparing the final written document for submission. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be a second year Ph.D. student and obtain permission of the instructor.

HIST 999. Doctoral Dissertation. 1-12 Credits.
An inquiry into the source material upon a specific subject. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor.

History of Art Courses

HA 100. Introduction to Western Art History. 3 Credits. HT H
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 150, HA 151, HA 160, HA 161, or HA 300.

HA 105. Special Study: ______. 1-6 Credits. H
This course is designed for the study of special topics in art history at the introductory level, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies.

HA 150. History of Western Art: Ancient Through Medieval. 3 Credits. HT H
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the
relationship between artistic developments and cultural changes. Not open to students with credit in HA 160.

HA 151. History of Western Art: Renaissance to Contemporary. 3 Credits. H
A survey of art in the West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 161.

HA 160. History of Western Art : Ancient Through Medieval, Honors. 3 Credits. HT H
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 150. Prerequisite: Membership in the University Honors Program or consent of instructor.

HA 161. History of Western Art: Renaissance to Contemporary, Honors. 3 Credits. H
A survey of the art in West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 151. Prerequisite: Membership in the University Honors Program or consent of instructor.

HA 166. The Visual Arts of East Asia. 3 Credits. W
This course examines major forms of artistic expression in China, Korea, and Japan. Discussions introduce basic art concepts, the themes and purposes of art, and different art styles in East Asia from ancient times to the present. Students develop critical skills through analyzing, writing about, and talking about art and East Asian cultures. Students also learn about important museums in North America and Asia. No prior knowledge of art history or East Asia expected.

HA 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in History of Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

HA 261. Introduction to Modern Art. 3 Credits. HT H
This course considers the efforts of artists to explore and represent their place in the modern world. The political, industrial, and scientific revolutions of the late 18th and 19th centuries in the West overturned the certainties of traditional authority and liberated artists to raise new questions. Innovations ranged from Impressionism's light-filled landscapes to Surrealism's dream imagery, Abstract Expressionism's paint-splattered canvases, and Pop Art's celebration of consumer culture. This course addresses these and other modern art movements, emphasizing developments in Europe and the United States through the late 20th century and concluding with international contemporary art in an age of globalization. Intended for non-majors.

HA 300. Introduction to Western Art History. 3 Credits. HT H
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 100, HA 150, HA 151, HA 160, or HA 161.

HA 305. Special Study: ____. 1-6 Credits. H
This course is designed for the study of special topics in art history, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies.

HA 311. The Art and Architecture of the British Isles. 3 Credits. H
Taught in the British Summer Institute in the Humanities Study Abroad program, this course offers an introductory survey of British art and architecture. Through classroom lectures, readings, and visits to museums, churches, and other historic sites, selected works of art and architecture are analyzed in terms of their formal qualities, iconography, and cultural context. Prerequisite: Approval for enrollment in the British Summer Institute in the Humanities Study Abroad program through the KU Office of Study Abroad.

HA 315. The Prehistory of Art. 3 Credits. S
A survey of prehistoric art focusing on the material record and interpretations of rock art (paintings, engravings on rock surfaces in rock-shelters, caves and in open air sites) and portable art created by prehistoric people. The emphasis is on the small-scale societies (hunter-gatherer and early food producers) around the world before the appearance of written records in respective geographic areas. Environmental, social and cultural contexts in which these art forms were created are discussed along with a review of past scholarship and current interpretive approaches to this old and enduring expression of human creativity. Course may be offered in lecture or online format. (Same as ANTH 315.)

HA 322. European Architecture 300-1300. 3 Credits. H
This course surveys the architecture of Western Europe from the 4th through the 14th centuries, concentrating on 750-1300. The medieval millennium was an era of constant conflict: military, diplomatic, intellectual, ideological, theological, and stylistic. Within a chronological framework, this course will examine selected works of architecture and urban design, paying special attention to the tension between architectural innovation and traditional practices. Its mission is to explore why and how these buildings and sites were produced, to understand how they communicate their patrons and makers' ideas, and to discover their audiences' responses to them. Students will consider the reinterpretation and transformation of the classical orders, the adaptation and transformation of several ancient building types, the establishment and development of architecture to serve newly emerging nation-states and religions, the evolution of vaulting, the changing conception of the wall, and the representational qualities of medieval architecture. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 325. Aegean Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Minoans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 525 or HA 525. No knowledge of Greek or Latin is required. (Same as CLSX 325.)

HA 326. Greek Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture,
sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 526 or HA 526. No knowledge of Greek or Latin is required. (Same as CLSX 326.)

HA 327. Roman Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome’s influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 527 or HA 527. No knowledge of Greek or Latin is required. (Same as CLSX 327.)

HA 330. Italian Renaissance Art. 3 Credits. H/W
A survey of the art and architecture of Italy from c. 1300 to 1550. Special emphasis is placed on regional styles and the private, political, and devotional contexts in which works of art and architecture functioned. Some of the artists whose works are considered are Giotto, Duccio, Donatello, Botticelli, Leonardo, and Michelangelo.

HA 331. Northern European Art from Van Eyck to Brueghel. 3 Credits. H
This course examines Bohemian, French, Netherlands, and German art in the 14th-16th centuries in settings ranging from religious foundations to noble courts and cities. Participants in the course will consider painting, prints, sculpture, and manuscripts from the era of Jan van Eyck to that of Hieronymus Bosch and Pieter Brueghel the Elder. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor.

HA 333. Rococo to Realism: Painting in Europe c. 1750-1848. 3 Credits. H
This course considers European painting c. 1750 to 1848 within the context of dramatic political and industrial revolutions. Exploring the power of the visual to engage with broader circumstances and to effect change, we will examine the ways in which shifting constructions of gender, empire, colonialism, race, slavery, and class were addressed by such artists as Watteau, David, Vigée-Lebrun, Delacroix, Géricault, Goya, Turner, Constable, Ingres, Daumier, Bonheur, and Courbet. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 533/WGSS 533. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 334. Impressionism and Post-Impressionism: 1848-1900. 3 Credits. H
This course considers French painting 1848 to 1900, a period marked by unprecedented technological advancements, the restructuring of Paris, and the rise of consumer culture. As large sections of the city were leveled to make way for broad boulevards, cafés, and department stores, some artists strove to represent the ever-changing spectacle of urban life; others found their inspiration away from the city. Focusing on Manet, Degas, Caillebotte, Morisot, Cassatt, Monet, Renoir, Seurat, Gauguin, Van Gogh, and Cézanne, we will explore how artists engaged with shifting constructions of modernity, gender, fashion, public and private, empire, race, class, and consumer and leisure cultures. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 534/WGSS 534. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 335. Renaissance Architecture in Italy. 3 Credits. H
This course examines the history of Italian Renaissance architecture from its origins in the 15th century to its transformation in the 16th, featuring (but not limited to) the work of three of its most celebrated exponents: Filippo Brunelleschi, Michelangelo Buonarroti, and Andrea Palladio. Students will explore how and why 15th and 16th-century architects and patrons appropriated and interpreted both ancient and medieval forms to create the architectural culture of the Renaissance. We will investigate the revival and transformation of the classical architectural language, the emerging notion of architectural authorship, the ability of architectural forms and materials to convey particular meanings to particular audiences, the deployment of architecture as an instrument of power, and the birth of architectural history and theory. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 535. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 337. Contemporary Art. 3 Credits. H
This course surveys the dynamic developments in art practice worldwide since the 1980s, highlighting innovations in such mediums as painting, photography, sculpture, installation, performance, video, and social practice. The course explores contemporary artists’ engagement with such themes as the body, identity, politics, spirituality, ecology, technology, time, globalization, and social justice. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 567. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 340. Special Study in Asian Art Before 1900: ______. 1-6 Credits. H
This course is designed for the study of special topics in Asian art before 1900, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Same topic may not be taken at both the 300 and 500 levels.

HA 342. Special Study in 18th/19th-Century European or American Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in European or American art of the 18th and/or 19th centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Same topic may not be taken at both the 300 and 500 levels.

HA 343. Special Study in 20th/21st-Century Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in art of the 20th and/or 21st centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Same topic may not be taken at both the 300 and 500 levels.

HA 344. Manga: Histories and Theories. 3 Credits. H
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 544. (Same as EALC 344.)

HA 347. Ceramics of East Asia. 3 Credits. NW H
This course explores the history of East Asian ceramics from the 10th to the late 20th century. Using critical approaches from art history, anthropology, sociology, literature, and materials science, students discuss the historiography and connoisseurship as well as the production, design, and consumption of ceramics such as Yaozhou celadon, Temmoku and Rakku tea bowls, stamped and slip-brushed Punch'ong ware, and Ming blue-and-white porcelain. This is a hybrid course, which means that most of the material and assignments of the course are online. However, students are required to participate in 6-7 field trips, including trips to the Spencer Museum of Art, the kilns located on campus, and a demonstration of the Japanese tea ceremony. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 547.

HA 353. Modern and Contemporary African Art. 3 Credits. H
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists' engagement with modernity, globalization, and contemporary issues, as well as interrogerst influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 569/HA 569. (Same as AAAS 353.)

HA 354. Japanese Prints. 3 Credits. NW H/W
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500-level. (Same as EALC 354.)

HA 360. African Art and Gender. 3 Credits. HL H
How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 780/HA 780. (Same as AAAS 380 and WGSS 380.)

HA 361. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 561 or REL 511. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as EALC 360.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 362. Ceramics of Korea. 3 Credits. H
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 562. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as EALC 372.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 363. Modern Korean Art and Culture. 3 Credits. H
This course is a thematic introduction to Korean art and culture with an emphasis on modern and contemporary Korea. Pre-modern works are contextualized with respect to contemporary issues. Students learn how to conduct a comprehensive analysis of an artwork by considering the political, historical and social conditions of its time within a broader East Asian cultural framework. (Same as EALC 373.) Prerequisite: An introductory course in art history at the college level, or consent of instructor.

HA 367. Art and Culture of Japan. 3 Credits. NW H/W
The history of Japanese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Japanese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as EALC 367.)

HA 368. Art and Culture of China. 3 Credits. NW H/W
The history of Chinese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions between different ethnic groups, and the roots of modernism in Chinese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as EALC 378.)

HA 370. Art of the United States. 3 Credits. H
This course examines the history of art in the United States from the late-colonial period of the 1700s through to the mid-twentieth century. With a focus on the central role that artistic production and consumption played in constructing American social identities and culture, this course pays particular attention to the contributions of minority and marginalized groups as active agents in the development of a national culture. Other topics include transnational perspectives on American art, the influence of European traditions, ideas of modernity and the modern artist in American culture, and relationships between art and material culture in American life. This course is offered at the 300 and 500 level with additional work required at the 500 level. Not open to students with credit in HA 570. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 371. Modern Sculpture. 3 Credits. H
Since the 1870s, modern sculptors have dramatically transformed their medium, pioneering new forms of figuration and abstraction, investigating new materials and processes, and developing installation and site-specific art. With a focus on Europe and the U.S. through the 1980s, expanding to global trends of recent decades, this course examines how this happened, considering the work of major artists from Rodin, Matisse, Picasso, and Brancusi to Donald Judd, Eva Hesse, Anish Kapoor, Jeff Koons, and David Hammons. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 571. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 372. Baroque Art in Europe. 3 Credits. H
This course surveys significant 17th-century paintings, sculpture and architecture that were produced in Italy, Spain, France and the Southern and Northern Netherlands. Artists whose works are discussed include Caravaggio, Bernini, Velazquez, Rubens, Rembrandt and Vermeer.
Artistic elements of individual works, major changes in patronage, and the religious, political, economic and cultural contexts in which the art was produced are examined. Assigned readings present a range of methodological perspectives.

HA 376. Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque. 3 Credits. H
This course surveys significant 17th-century paintings, prints and drawings produced in the Northern and Southern Netherlands (modern-day Netherlands and Belgium). Artists whose works will be discussed include Peter Paul Rubens, Rembrandt van Rijn, Johannes Vermeer, and other painters of scenes of daily life, landscapes, cityscapes, portraits and still-lives. Artistic elements of individual works and their relationship to major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 576. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 377. African Design. 3 Credits. H/W
This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 677/HA 677. (Same as AAAS 377.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

HA 380. History of Photography. 3 Credits. H
An introduction to the history of photography. We will consider strategies used over its history to make photography an art, a witness to truth, a record of fact, a purveyor of falsehoods, a mass medium, a hawker of goods and ideologies, an agent of political change, a means of remembrance, and more. Not open to students with credit in HA 580. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 385. The Art of Buddhism. 3 Credits. H/W
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 585. (Same as EALC 385.)

HA 386. Japanese Painting. 3 Credits. NW H/W
A survey covering the development of Japanese painting from the seventh century to the early twentieth century. Topics include Buddhist and other religious paintings, narrative handscrolls, ink painting, decorative folding screens, ukiyo-e prints, and western-style paintings from the late eighteenth through early twentieth centuries. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 586. (Same as EALC 386.) Prerequisite: An introductory course in Asian art or consent of instructor.

HA 388. Modern and Contemporary Visual Arts of Japan. 3 Credits. H
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 588. (Same as EALC 388.)

HA 390. Special Study in African Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 391. Special Study in Asian Art: _____. 1-6 Credits. H
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 392. Special Study in Ancient Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 393. Special Study in Medieval Art: _____. 1-6 Credits. H
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 394. Special Study in Renaissance Art: _____. 1-6 Credits. H
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 395. Special Study in Baroque Art: _____. 1-6 Credits. H
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 396. Special Study in American Art: _____. 1-6 Credits. H
This course is designed for the study of special topics in American art. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 397. Special Study in Modern Art: ____. 1-6 Credits. H
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels.

HA 468. Art and Culture of China, Honors. 3 Credits. NW H/W
An introduction to the arts of China using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 368.
with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 268 or HA 368.

HA 488. Chinese Painting, Honors. 3 Credits. NW H/W
A survey of the development of painting in China, beginning with the earliest forms of figural and landscape depiction. Emphasis will be is placed on the major painting traditions of the Song, Yuan, Ming, and Qing Dynasties. Prerequisite: An introductory course in art history or Eastern Civilizations and membership in the University Honors Program or consent of instructor.

HA 505. Special Study: ____. 1-6 Credits. H
This course is designed for the study of special topics in art history on a trial basis, open to both undergraduate and graduate students. Prerequisite: An introductory-level course in art history, appropriate to the specific special study topic; or consent of instructor.

HA 506. Early Medieval and Romanesque Art. 3 Credits. H
This course examines the art of Europe from the Early Christian era through the Romanesque period, up to 1200. Architecture, sculpture, manuscript illumination, metalwork and painting are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of the instructor.

HA 507. Gothic Art. 3 Credits. H
This course examines the art of Europe during the Gothic period, from 1140-1500. Architecture, sculpture, manuscript illumination, metalwork and painting are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of the instructor.

HA 510. Medieval Manuscripts and Early Printed Books. 3 Credits. H
Students study the history of the book from 300 to 1500 A.D., concentrating on the role of visual imagery in books and the place of books in medieval and renaissance culture. In addition to discussing the relation between text and image, and studying the stylistic contexts for ancient, medieval, and Renaissance illumination and early woodcut illustration, participants in this course consider such additional topics as methods of book production, the development of cycles of illustration for religious and secular books, and the relationship between manuscripts and early printed books. Lectures and discussion are supplemented by visits to the fine collection of manuscripts, printed books, and facsimiles in the Kenneth Spencer Research Library. Prerequisite: An introductory course in Western art history at the college level, or consent of the instructor.

HA 511. From Court to City: Northern Art. 3 Credits. H
This course will examine painting, manuscripts, metalwork, tapestry, ivories, prints, and ephemeral arts such as the material culture of feasts or the entry processions of rulers into cities in order to gain insight into the place of the arts in late medieval and Renaissance culture in the fourteenth and fifteenth centuries. In addition to discussion of noble, clerical and civic patronage and of artistic style, participants in this course will consider such additional topics as artistic production and the development of art markets in cities. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor.

HA 512. Humanism and Reform: 16th Century Northern European Art. 3 Credits. H
This course explores the history of Northern European painting, manuscripts, printed books, sculpture, prints, and architecture paying particular attention to the artists and patrons that produced and consumed art, the function of artistic objects in settings ranging from church to palace, and the impact of humanism and the Reformation on the arts. Bosch, Bruegelh, Cranach, Dürer, and Holbein will be considered among other artists. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 517. Directed Readings. 1-6 Credits. U
Supervised study and research into specialized areas of art history.

HA 525. Aegean Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaeans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 325 or HA 325. No knowledge of Greek or Latin is required. (Same as CLSX 525.)

HA 526. Greek Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 326 or HA 326. No knowledge of Greek or Latin is required. (Same as CLSX 526.)

HA 527. Late Medieval Art in Italy. 3 Credits. H
This course examines the history of paintings, sculptures and buildings produced in Italy from c. 1250 to 1400. Important individual works, artists, and decorative complexes, such as Giotto's Scrovegni (Arena) Chapel, are analyzed in terms of their stylistic, geographical, social, historical, devotional, and literary contexts. Current theories and controversies pertinent to the history and study of 13th- and 14th-century Italian art are also addressed. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 528. The Spatial Arts of Urban Italy. 3 Credits.
This course examines the central role played by the arts of urbanism, architecture, and monumental sculpture in shaping the distinctive civic cultures of Italy at the threshold of the Renaissance, 1200-1550. It will pay particular attention to the republics of Florence and Venice, but also consider papal Rome and Pienza, and a changing selection of Italy's magnificent court cities (including Milan, Padua, Parma, and Verona). Prerequisite: HA 100, HA 150, or the equivalent, and an upper-level (300-level or above) course in art history or Western European culture, or consent of instructor.

HA 529. Archaeology and Art of the Ancient Near East. 3 Credits. H
A cross-cultural survey of the material remains of the major civilizations of the ancient Near East, including Anatolia, Mesopotamia, the Levant, and Egypt from Neolithic period to the rise of the Roman empire (ca. 6000 B.C.E. - 30 B.C.E.). Includes lectures with slides and discussion. For advanced undergraduates with backgrounds in the humanities and
HA 533. Rococo to Realism: Painting in Europe c. 1750-1848. 3 Credits. H
This course considers European painting c. 1750 to 1848 within the context of dramatic political and industrial revolutions. Exploring the power of the visual to engage with broader circumstances and to effect change, we will examine the ways in which shifting constructions of gender, empire, colonialism, race, slavery, and class were addressed by such artists as Watteau, David, Vigée-Lebrun, Delacroix, Géricault, Goya, Turner, Constable, Ingres, Daumier, Bonheur, and Courbet. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 333. (Same as WGGS 533.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 534. Impressionism and Post-Impressionism: 1848-1900. 3 Credits. H
This course considers French painting 1848 to 1900, a period marked by unprecedented technological advancements, the restructuring of Paris, and the rise of consumer culture. As large sections of the city were leveled to make way for broad boulevards, cafés, and department stores, some artists strove to represent the ever-changing spectacle of urban life; others found their inspiration away from the city. Focusing on Manet, Degas, Caillebotte, Morisot, Cassatt, Monet, Renoir, Seurat, Gauguin, Van Gogh, and Cézanne, we will explore how artists engaged with shifting constructions of modernity, gender, fashion, public and private, empire, race, class, and consumer and leisure cultures. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 334. (Same as WGGS 534.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 535. Renaissance Architecture in Italy. 3 Credits.
This course examines the history of Italian Renaissance architecture from its origins in the 15th century to its transformation in the 16th, featuring (but not limited to) the work of three of its most celebrated exponents: Filippo Brunelleschi, Michelangelo Buonarroti, and Andrea Palladio. Students will explore how and why 15th and 16th-century architects and patrons appropriated and interpreted both ancient and medieval forms to create the architectural culture of the Renaissance. We will investigate the revival and transformation of the classical architectural language, the emerging notion of architectural authorship, the ability of architectural forms and materials to convey particular meanings to particular audiences, the deployment of architecture as an instrument of power, and the birth of architectural history and theory. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 335. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor.

HA 536. Islamic Art and Architecture in Africa. 3 Credits. H
Study of Islamic art and architecture in various cultural and geographical settings, from the first mosques of North African and the Swahili coast to contemporary Islamicized masquerades in West Africa. We consider art objects and architectural sites in terms of religious practice, trade and commerce, ritual and political power, and contemporary expression. (AAAS 536.) Prerequisite: AAAS 102, AAAS 103, HA 100, or HA 150; or permission of instructor.

HA 537. Roman Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities; and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as CLSX 529.)

HA 538. Pompeii and Herculaneum. 3 Credits. H
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as CLSX 538, HUM 538.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor.

HA 540. Special Study in Asian Art Before 1900: _____ 1-6 Credits. H
This course is designed for the study of special topics in Asian art before 1900, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in Asian art history, or consent of the instructor.

HA 543. Special Study in 20th/21st-Century Art: _____ 1-6 Credits. H
This course is designed for the study of special topics in art of the 20th and/or 21st centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 544. Manga: Histories and Theories. 3 Credits. H
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 344. (Same as EALC 544.) Prerequisite: A college level introduction to Asian art history or Asian studies, or consent of instructor.

HA 545. Early Chinese Art. 3 Credits. NW H
A survey of Chinese art from Neolithic times through the Han Dynasty (ca. 200 C.E.). Emphasis will be placed on recent archaeological excavations and also on the development of bronze vessels of the Shang and Zhou Dynasties. Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 546. Chinese Sculpture. 3 Credits. H
A survey of Chinese sculpture from the Shang dynasty through the Song dynasty (1600 BCE-1279 CE), focused on sculptural programs in native funerary art and Buddhist temples and cave-shrines.

HA 547. Ceramics of East Asia. 3 Credits. NW H
This course explores the history of East Asian ceramics from the 10th to the late 20th century. Using critical approaches from art history, anthropology, sociology, literature, and materials science, students discuss the historiography and connoisseurship as well as the production, design, and consumption of ceramics such as Yaozhou celadon, Temmoku and Raku tea bowls, stamped and slip-brushed Punch'ong ware, and Ming blue-and-white porcelain. This is a hybrid course, which means that most of the material and assignments of the course are online. However, students are required to participate in 6-7 field trips, including trips to the Spencer Museum of Art, the kilns located on campus, and a demonstration of the Japanese tea ceremony. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 347. Prerequisite: A college level introduction to Asian art history or Asian studies, or consent of instructor.

HA 549. Chinese Painting. 3 Credits. H
An introductory survey of painting in China from the 7th through the 19th centuries. Prerequisite: One course in art history, or in East Asian languages & cultures; or consent of instructor.

HA 550. Capstone in Art History: ______. 3 Credits. H
An advanced course dedicated to the in-depth study of special topics in art history. Students conduct research on a question within the parameters of the course topic and produce a research product that integrates knowledge from within the discipline of art history or in combination with other disciplines to generate new ideas. May be repeated for credit if content varies. Prerequisite: Junior or senior standing and twelve hours of art history, or consent of the instructor.

HA 554. Japanese Prints. 3 Credits. NW H/W
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500 levels with additional work required at the 500-level. Prerequisite: An introductory course in art history or consent of instructor.

HA 561. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 361. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as REL 511.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 562. Ceramics of Korea. 3 Credits. H
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 362. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. Prerequisite: A college level introduction to Asian art history, or consent of instructor.

HA 564. European Art, 1900-1945. 3 Credits. H
A detailed survey of modern European art from the turn of the century through World War II. Movements to be considered may include post-impressionism, cubism, constructivism, dada, and surrealism. Graduate students may be expected to do additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 566. Art From 1945 to the 1980s: Modernism to Post-Modernism. 3 Credits. H
An international survey of modern and post-modern art from World War II to the 1980s. Topics may include abstract expressionism, pop art, minimalism, happenings and performance art, earth works, conceptual art, feminist art, photo-realism, the craft revival, and new media. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151 or the equivalent, or consent of instructor.

HA 567. Contemporary Art. 3 Credits. H
This course surveys the dynamic developments in art practice worldwide since the 1980s, highlighting innovations in such mediums as painting, photography, sculpture, installation, performance, video, and social practice. The course explores contemporary artists’ engagement with such themes as the body, identity, politics, spirituality, ecology, technology, time, globalization, and social justice. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 337. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 569. Modern and Contemporary African Art. 3 Credits. H
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists’ engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 353/HA 353. (Same as AAAS 569.) Prerequisite: Junior/Senior standing and at least one course at the 100-level or above in AAAS or HA.

HA 570. Art of the United States. 3 Credits. H
This course examines the history of art in the United States from the late-colonial period of the 1700s through to the mid-twentieth century. With a focus on the central role that artistic production and consumption played in constructing American social identities and culture, this course pays particular attention to the contributions of minority and marginalized groups as active agents in the development of a national culture. Other topics include transnational perspectives on American art, the influence of European traditions, ideas of modernity and the modern artist in American culture, and relationships between art and material culture in American life. This course is offered at the 300 and 500 level with additional work required at the 500 level. Not open to students with credit in HA 370. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 571. Modern Sculpture. 3 Credits. H
Since the 1870s, modern sculptors have dramatically transformed their medium, pioneering new forms of figuration and abstraction, investigating new materials and processes, and developing installation and site-specific art. With a focus on Europe and the U.S. through the 1980s, expanding to global trends of recent decades, this course examines how this happened, considering the work of major artists from Rodin, Matisse, Picasso, and Brancusi to Donald Judd, Eva Hesse, Anish Kapoor, Jeff Koons, and David Hammons. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 371. Intended for graduate students. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.
HA 576. Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque. 3 Credits. H
This course surveys significant 17th-century paintings, prints and drawings produced in the Northern and Southern Netherlands (modern-day Netherlands and Belgium). Artists whose works will be discussed include Peter Paul Rubens, Rembrandt van Rijn, Johannes Vermeer, and other painters of scenes of daily life, landscapes, cityscapes, portraits and still-lifes. Artistic elements of individual works and their relationship to major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 376. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 580. History of Photography. 3 Credits. H
An introduction to the history of photography. We will consider strategies used over its history to make photography an art, a witness to truth, a record of fact, a purveyor of falsehoods, a mass medium, a hawkers of goods and ideologies, an agent of political change, a means of remembrance, and more. Intended for graduate students. Not open to students with credit in HA 380. Prerequisite: HA 100, HA 151, or the equivalent, and consent of instructor.

HA 582. American Art 1860-1900: Gilded Age. 3 Credits.
A survey of major artists and movements in painting, sculpture, and allied arts in the later 19th century. Consideration will be given to developments in landscape painting and images of the American West, the impact of impressionism and other European movements, and the decorative programs of the Gilded Age. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 583. American Art 1900-1945: Rise of Modernism. 3 Credits. H
A survey of major artists and movements in painting, sculpture, and allied arts, from the early urban realists to the emergent avant-garde at mid century. Consideration will be given to the cosmopolitan tendencies of the 1910s and the 1920s, to regionalist impulses of the 1930s, and the assimilation of European modernism. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

HA 585. The Art of Buddhism. 3 Credits. NW H/W
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 385. Prerequisite: Consent of instructor.

HA 586. Japanese Painting. 3 Credits. NW H/W
A survey covering the development of Japanese painting from the seventh century to the early twentieth century. Topics include Buddhist and other religious paintings, narrative handscrolls, ink painting, decorative folding screens, ukiyo-e prints, and western-style paintings from the late eighteenth through early twentieth centuries. This course is offered at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in EALC/HA 386. Prerequisite: An introductory course in Asian art or consent of instructor.

HA 587. Japanese Sculpture. 3 Credits. NW H
A survey of Japanese sculpture from the Kofun period (300-700 C.E.) to the present day. Emphasis is placed on works of Buddhist sculpture from the 7th through the 13th centuries. Prerequisite: An introductory course in Asian art history or consent of instructor.

HA 588. Modern and Contemporary Visual Arts of Japan. 3 Credits. H
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan’s modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 388/EALC 388. Prerequisite: An introductory course in art history or consent of instructor.

HA 590. Special Study in African Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history or African Studies, or consent of the instructor.

HA 591. Special Study in Asian Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history or Asian Studies, or consent of the instructor.

HA 592. Special Study in Ancient Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history or Classics, or consent of the instructor.

HA 593. Special Study in Medieval Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 594. Special Study in Renaissance Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 595. Special Study in Baroque Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500 levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor.

HA 597. Special Study in Modern Art: ______. 1-6 Credits. H
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit
This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 377/HA 377. (Same as AAAS 677.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

HA 677. African Design. 3 Credits. NW H/W

A concentrated study of a specific topic in art history. May be repeated for credit if content varies. Prerequisite: Consent of instructor.

HA 698. Honors Essay in Art History. 3 Credits. H

Required for departmental honors. A course of directed research and the preparation of a paper on an art history topic, supervised by a professor. Prerequisite: A grade-point average of 3.5 in art history and 3.25 in all courses, and consent of a major advisor and supervising professor.

HA 706. Seminar: ______. 3 Credits.

A concentrated study of one or two artists, monuments or movements. May be repeated for credit up to a maximum of 12 credit hours. Prerequisite: Consent of instructor.

HA 707. Directed Readings. 1-6 Credits.

Supervised study and research into specialized areas of art history.

HA 719. Art Histories: Theory and Methodology. 3 Credits.

This course examines the major methodologies and theories that have shaped and continue to shape the field of art history. Through critical reading of primary, secondary, and interpretive texts, the course will analyze closely the history and current state of the discipline. Prerequisite: Nine hours of History of Art or consent of instructor.

HA 720. Asian Art: Theory and Method. 3 Credits.

This course examines important methodologies and theories of the past and present employed in the field of Asian art history. Through critical reading of primary documents and secondary scholarship, students will gain historical perspective on and practical tools for research in the history of Asian art and visual culture. Prerequisite: Nine hours of History of Art or consent of instructor.

HA 760. Proseminar in Korean Art. 3 Credits.

Intensive study of a selected topic in the visual arts of Korea; topics may focus on a particular genre, theme, historical period or group of artists, for example Buddhist painting and sculpture, Choson period landscape and genre painting, ceramics and lacquerware or modern and contemporary art in North and South Korea. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor.

HA 780. African Art and Gender. 3 Credits.

How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft.". This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 380/HA 380/WGSS 380. (Same as AAAS 780.) Prerequisite: Any previous AAAS course.

HA 788. Proseminar in Japanese Art. 3 Credits.

Critical analysis of readings on selected topics in Japanese art. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor.

HA 789. Proseminar in Chinese Art. 3 Credits.

Critical analysis of readings on selected topics in Chinese art. May be repeated for credit up to a maximum of 12 credit hours. Prerequisite: Consent of instructor.

HA 898. Franklin Murphy Seminar in Art History: ______. 3 Credits.

This seminar is given each spring by the Murphy Lecturer of the year and includes two weeks of intensive study with a nationally known expert in a special field of art history. The other weeks of seminar meetings for the semester are conducted by the faculty member most closely specialized in this field. Prerequisite: Consent of supervising faculty member.

HA 899. Thesis. 1-6 Credits.

Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis.

HA 906. Seminar: ______. 3 Credits.

A concentrated study of a specific topic in art history. May be repeated for credit if content varies. Prerequisite: Consent of instructor.

HA 907. Directed Readings. 1-6 Credits.

Supervised study and research into specialized areas of art history. Prerequisite: Nine hours of art history and a reading knowledge of a pertinent foreign language.

HA 925. Seminar in Late Medieval Art: ______. 3 Credits.

A study of selected problems dealing with the art of the later Middle Ages. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 935. Seminar in Northern Renaissance Art: ______. 3 Credits.

A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 940. Seminar in 17th Century Art: ______. 3 Credits.

A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 955. Seminar in 19th Century Art: ______. 3 Credits.

A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 965. Seminar in American Art: ______. 3 Credits.

A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.

HA 990. Seminar in Japanese Art: ______. 3 Credits.

A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours.
HA 995. Seminar in Korean Art: ____. 3 Credits.
Concentrated study of one particular genre, theme, historical period or
group of artists. Readings will include primary and secondary language
material in Korean, Japanese and/or Chinese including texts in classical
forms of these languages. May be repeated for credit up to maximum of
twelve hours. Prerequisite: Reading knowledge of Korean, Japanese or
Chinese and consent of instructor.

HA 999. Doctoral Dissertation. 1-12 Credits.
This course may be taken more than once, but not for more than twelve
hours of credit in any one semester. Graded on a satisfactory progress/
limited progress/no progress basis.

Honors Program Courses

HNRS 177. First Year Seminar: ____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing
current issues in Honors. Course is designed to meet the critical
thinking learning outcome of the KU Core. First-Year Seminar topics
are coordinated and approved by the Office of First-Year Experience.
Prerequisite: First-time freshman status.

HNRS 190. First Year Honors Seminar: ____. 1 Credits. U
This seminar serves as an introduction to the University Honors Program,
to research opportunities and other academic resources available at
the University of Kansas, and to specific disciplinary perspectives on
an overarching theme. While closely examining the designated topic,
students develop skills in research, reading, writing, and in-depth
discussion. Required of all first-year Honors students; open only to first-
year students in the University Honors Program.

HNRS 195. Transfer Honors Seminar: ____. 1 Credits. U
This seminar serves as an introduction to the Honors Program, and to
the research opportunities and other academic resources available at
the University of Kansas. This seminar fosters the transfer students’ oral
and written communication and the critical assessment of their academic
and pre-professional goals. The instructor of the student’s seminar also
serves as the student’s honors mentor. Open only to transfer students in
the University Honors Program.

HNRS 250. Citizen Philanthropy: An Introduction to the Nonprofit
World. 3 Credits. U
This interdisciplinary course explores the historical and economic roots
of citizen generosity and the role of the nonprofit/philanthropic sector.
This service learning course combines volunteer experiences and public
service internships with research and exploration of the missions and
ethical orientations of nonprofit organizations. The course is designed
to explore the social and the ethical contexts of the nonprofit sector with
opportunities to demonstrate social and civic responsibility.

HNRS 310. University Scholars Seminar. 3 Credits. U
An interdisciplinary survey to acquaint students with some of the
main ideas, methods, and outstanding problems in various areas of
scholarship. The organization of human knowledge inside and outside the
university, as well as the implications of this organization for scholarship
and society, are emphasized. Ideas and methods in various disciplines
are contrasted and compared. Required of and open only to newly
admitted students in the University Scholars Program.

HNRS 320. Global Scholars Seminar. 3 Credits. H
The Global Scholars Seminar is designed to foster academically talented
and motivated undergraduate students’ interest in global studies. Through
interdisciplinary coursework, mentorship and research experience in
global studies, the seminar provides cohorts of students with opportunities
to develop their intellectual capabilities and interests to the fullest and
better prepares them for careers, further study, and leadership roles in
today's complex international arena. Required of and open only to newly
admitted students in the Global Scholars Program.

HNRS 370. Personal Writing Seminar. 1 Credits. U
This seminar helps students develop their personal writing abilities.
Students analyze language and rhetorical choices in the genre of the
personal essay. Students demonstrate rhetorical flexibility within the
genre, considering audience, purpose, and application of the material.
This course is intended for candidates for national fellowships, regardless
of University Honors Program membership. (Same as LA&S 370.)
Prerequisite: Permission of the Office of Fellowships.

HNRS 380. Critical Thinking and Advocacy Seminar. 1 Credits. U
The focus of this class is on honing the two basic skills of critical thinking
and advocacy. In this seminar, students develop a basic system for critical
analysis that can be applied generally; test that critical analysis system
in a series of practicums to develop the skills necessary to apply it; and
develop a basic system for designing effective and ethical persuasive
messages. (Same as LA&S 380.) Prerequisite: Permission of the Office of
Fellowships.

HNRS 395. Edwards Campus Honors Seminar. 1 Credits.
This seminar serves as an introduction to the KU Edwards Campus
Honors Program, and to the research opportunities and other academic
resources available at the University of Kansas Edwards Campus. The seminar focuses on an overarching theme or current societal problem,
and explores specific disciplinary perspectives of that theme. While
closely examining the designated topic, students develop skills in research, reading, writing, and in-depth discussion. This seminar fosters
the KU Edwards Campus students’ oral and written communication and the critical assessment of their academic and pre-professional goals.
Required of all KU Edwards Campus Honors students. Prerequisite: KU
Edwards Campus Honors Student.

HNRS 410. Professional Responsibility, Honors: ____. 1-3 Credits.
This course focuses on the challenges facing practitioners in a specific
professional field. Students will learn about the ethics, conduct, and other
responsibilities associated with that profession, and will explore career
choices within the field. Prerequisite: Membership in the University Honors
Program, sophomore standing or above, and prior completion of an
Honors Seminar (HNRS 190 or HNRS 195.) Concurrent enrollment with
HNRS 195 is possible with special permission from the Honors Program.

HNRS 492. Topics and Problems on: ____. 1-6 Credits. U
An interdisciplinary study of different topics. Designed especially for
juniors and seniors.

HNRS 495. Honors Directed Study. 1-3 Credits. U
Individual and supervised study of an interdisciplinary topic or topics. May
be repeated for a total of up to 6 hours. Up to one 3-hour enrollment will
count as one course toward completion of the University Honors Program.
Prerequisite: Membership in the University Honors Program and consent of the instructor.

HNRS 496. Honors Internship. 1-3 Credits. U
Students participate in an internship in an organization related to their
professional/career goals. An internship plan is developed by the student
in conjunction with the student’s academic adviser and an authorized
agent of the internship site. Prerequisite: Instructor permission required.

HNRS 497. Honors Seminar Assistantship. 0 Credits.
Open to all Honors students selected to be Honors Seminar Assistants,
regardless of major field. These students assist Seminar instructors in the
teaching of an Honors seminar in various ways, including but not limited
to: leading group discussions, engaging students in the learning process,
developing classroom material, encouraging and guiding students to solve
problems themselves and helping students prepare for their advising appointments. May be repeated. Prerequisite: HNRS 190 or HNRS 195 and membership in the University Honors Program.

HNRS 595. Edwards Campus Honors Capstone. 3 Credits.
This seminar serves as an interdisciplinary capstone experience for students KU Edwards Campus Honors Program, and as an introduction to the research opportunities and other academic resources available at the University of Kansas Edwards Campus. The seminar focuses on an overarching theme or current societal problem that students explore from the perspectives of several disciplines, incorporating experiential learning opportunities. While closely examining the designated topic, students develop skills in research, reading, writing, and in-depth discussion. This seminar fosters the KU Edwards Campus students' oral and written communication and the critical assessment of their academic and pre-professional goals. Required of all KU Edwards Campus Honors students.

Indigenous Studies Courses

ISP 101. Introduction to Indigenous Nations Studies. 3 Credits. NW S
An introduction to the study of Indigenous peoples. It surveys the concepts, methods, and content relevant to Applied Indigenous Studies, using case studies drawn from diverse cultures. The course illustrates that the social, political, religious, and economic aspects of American Indian life are interconnected and that tribal histories cannot be understood without an awareness of these fields. Students are introduced to controversies over how to research, write, and interpret American Indians, and will address the foundations of Indigenous Studies, and that Indigenous concepts of decolonization, empowerment and Nation-building. The course explores how the lives of Indigenous people have been affected by colonization, while exploring the varying definitions of "colonialism", "colonizer" and the "colonized."

ISP 204. Special Topics: ______. 1-6 Credits.
This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs. Some sections may be offered at Haskell Indian Nations University through the Haskell-KU Exchange, which requires permission from the Haskell-KU liaison.

ISP 304. Special Topics: ______. 3 Credits. H
This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs.

ISP 305. World Indigenous Literatures. 3 Credits. NW H
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305/GIST 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

ISP 345. Indian Territory. 3 Credits. H
This course examines the cultural, social, economic, environmental, and political background of Indian territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HIST 318 and HUM 345.)

ISP 348. American Indian and White Relations to 1865. 3 Credits. H
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HIST 351, HWC 348.)

ISP 350. American Indians Since 1865. 3 Credits. H
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HIST 352 and HUM 350.)

ISP 355. Indigenous Film and Media. 3 Credits. H
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum-including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 750 or ISP 755. (Same as FMS 350.)

ISP 400. Indigenous People of the Great Plains. 3 Credits. H
This course examines the emergence of horse-mounted indigenous societies in the Great Plains; the nature of the indigenous societies of the Great Plains in the nineteenth century; conflicts with the United States; the beginning of the reservation period; and indigenous people of the Great Plains in the modern era. Readings combine primary documents and novels with selections from anthropology, social history, and environmental history. (Same as HIST 400.)

ISP 495. Directed Readings. 1-3 Credits.
Work for advanced majors in fields or on topics not covered in course work. May be repeated for a total of up to six hours. May be counted as part of the total junior-senior credit hours required. Prerequisite: Consent of instructor.

ISP 504. Topics in Indigenous Studies: ______. 3 Credits. W
This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines in order to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs. Recommended for juniors or seniors, or for students who have completed ISP 101/GINS 101/INS 101.
ISP 530. Indigenous Food and Health. 3 Credits. NW U
This course investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. The class traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems and offers traditional cultural strategies for health recovery.

ISP 542. Ethnobotany. 3 Credits. S
Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnobotany; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as ANTH 582 and EVRN 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor.

ISP 551. Foodways: Native North America. 3 Credits. H
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and HWC 551.) Prerequisite: Upper division course on indigenous/ American Indian history, or permission of the instructor.

ISP 552. Foodways: Latin America. 3 Credits. H
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, HUM 552 and LAC 552.) Prerequisite: Upper division course on Latin America or permission of the instructor.

ISP 567. Native Feminisms. 3 Credits. SC H/W
This course examines the foundation of Native feminist scholarship and the history of Native feminist activism. The class will begin by considering whether feminist theory can support contemporary Native women Native Two-Spirit (LGBTQ+) in their struggles against settler colonialism and heteropatriarchy. While the course begins by examining the North American experience, the course will also cover a range of international indigenous contexts, with a focus on the Global South and the Indigenous Pacific. Topics explored include the history of settler-colonialism, cultural revitalization and gender roles, change and continuity under cycles of settler-colonialism, the connection between colonialism and sexual violence in Native communities, debates over citizenship and sovereignty, and contemporary Native gender roles and identities. During the conclusion of the course, students will learn to identify how Native feminism informs activism and practice. (Same as WGSS 567.) Prerequisite: Any previous course in WGSS or ISP, or by permission of instructor.

ISP 577. The Andean World. 3 Credits. H
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical forest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, HIST 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor.

ISP 578. Global Indigenous History. 3 Credits.
In this course, students are introduced to a global comparative history of Indigenous peoples and nations, offering a unique opportunity to study how Indigenous nations have made a significant impact from ancient to contemporary times. Global Indigenous history provides invaluable insights into key historical debates about the processes/systems of colonization, international law, treaty rights, citizenship, nationalism, democratization, war, sovereignty, community & nation building, and cultural revitalization. This lecture class explores histories of the Ancient Mayan and Incan empires; Red Power to Idle No More; Māori and Aboriginal rights movements; Tibetan independence and Gandhi's Satyagraha; Irish and Scottish devotion; and contemporary conflict(s) in the Middle East, just to name a few. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in ISP 878. (Same as HIST 578.) Prerequisite: Requires a prior history course or one in a related field or permission of the instructor.

ISP 601. Indigenous Peoples of the World. 3 Credits. S
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEOG 601 and GIST 601.) Prerequisite: Permission of instructor.

ISP 673. Environmental Justice. 3 Credits. NW U
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping, and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. (Same as EVRN 673.) Prerequisite: Permission of instructor.

ISP 755. Indigenous Film and Media. 3 Credits.
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum-including music videos and social media platforms, podcasting.
and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 350 or ISP 355. (Same as FMS 750.)

ISP 800. Indigenous Issues in the United States. 3 Credits.
This course will focus on contemporary issues relating to Indigenous peoples and nations within the United States, with particular emphasis on such issues as sovereignty, indigeneity, colonialism and decolonization. The course will address varied disciplinary approaches to this range of issues and will consider how this discourse bears upon scholarly conversations regarding broader themes in other selected fields of study.

ISP 804. Special Topics: ______. 1-3 Credits.
Designed to fulfill program needs of the Indigenous Studies master's program, this course may meet with appropriate professional or graduate courses. Can be repeated for credit when topic differs.

ISP 806. Directed Readings. 1-3 Credits.
An individual readings course with a qualified instructor on a topic in Indigenous Studies.

ISP 807. Internship in Indigenous Studies. 1-6 Credits.
Internships provide students the opportunity to obtain training and perform professional duties for academic credit at pre-approved indigenous-related agencies, organizations, and communities. Students are required to demonstrate a minimum of 60 contact hours for each one credit hour. To enroll, students must obtain the consent of their ISP faculty advisor or the Program's Director if a student is outside ISP. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission from instructor.

ISP 824. Federal Indian Law. 3 Credits.
Addresses the law and policy of the United States regarding Indian nations and their members. Issues include the origins and contours of federal plenary power over Indian affairs, the scope of inherent tribal sovereignty, the limits of state power in Indian country, civil and criminal jurisdiction, and gaming. (Same as LAW 914.)

ISP 830. Indigenous Food and Health. 3 Credits.
Investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. Traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems. Will offer traditional cultural strategies for health recovery.

ISP 862. Indigenous Archives and Tribal Historic Preservation. 3 Credits.
In this methods class, students will gain foundational knowledge in the archival and preservation of Indigenous source materials: oral histories, printed materials, Tribal documents, letters/journals/diaries, artwork, and a host of other sources. Students will also utilize digital history technology to create online exhibits and an original research paper. Beyond the archives this course introduces students to the important work of Tribal Historical Preservation examining the laws, ethics, cultures, policies, histories, ethics, recovery/restoration, Indigenous GIS, consultation, management, and career paths in Tribal Historical Preservation. Finally, students will gain invaluable experiences by writing grants and developing final projects that can lead to real-world applications of their research. (Same as HIST 862.)

ISP 871. Community Health and Development. 3 Credits.
This course extends knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation, and then apply these skills to issues that matter to them and to the communities they serve. (Same as ABSC 710.)

ISP 878. Global Indigenous History. 3 Credits.
In this course, students are introduced to a global comparative history of Indigenous peoples and nations, offering a unique opportunity to study how Indigenous nations have made a significant impact from ancient to contemporary times. Global Indigenous history provides invaluable insights into key historical debates about the processes/systems of colonization, international law, treaty rights, citizenship, nationalism, democratization, war, sovereignty, community & nation building, and cultural revitalization. This lecture class explores histories of the Ancient Mayan and Incan empires; Red Power to Idle No More; Māori and Aboriginal rights movements; Tibetan independence and Gandhi’s Satyagraha; Irish and Scottish devolution; and contemporary conflict(s) in the Middle East, just to name a few. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in HIST/ISP 578. Prerequisite: Requires a prior history course or one in a related field or permission of the instructor.

ISP 898. Master's Non-Thesis. 1-6 Credits.
Course for Indigenous Studies students completing a portfolio Master's exam. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission from instructor.

ISP 899. Master's Thesis. 1-6 Credits.
Course for Indigenous Studies Program students completing Master's thesis projects. Prerequisite: Permission from instructor.

Institute for Leadership Stds Courses

LDST 200. Introduction to Leadership Studies and Applications. 3 Credits. SC S
This course combines an introduction to a theoretical, research-based approach to the study of leadership with hands-on application, analysis and experimentation with the process of leadership. Students will explore core leadership competencies and apply leadership tools and processes across a variety of groups and systems, addressing issues of concern within those communities. This course satisfies the LDST 201/LDST 202 requirement for the Leadership Studies Minor. This course is not available to students with credit in LDST 201/LDST 202. Prerequisite: Instructor permission.

LDST 201. Introduction to Leadership. 2 Credits. S
This course introduces students to the study of the leadership process. The course covers theories and research on core themes of leadership, focusing on how course materials relate to students' own leadership experiences. Concurrent enrollment in LDST 202 is recommended. Students considering the Leadership Studies Minor must complete LDST 202. This course is not available to students with credit in LDST 200. Not open to seniors.

LDST 202. Introduction to Leadership Applications. 1 Credits. S
This course focuses on the application of information learned in LDST 201. Activities and discussions emphasize application, analysis, and engagement with the process of leadership. Concurrent enrollment in LDST 201 is recommended. Students considering the Leadership Studies Minor must complete LDST 201 and LDST 202. This course is
not available to students with credit in LDST 200. Not open to seniors. Prerequisite: Corequisite: LDST 201.

LDST 203. Introduction to Leadership, Honors. 3 Credits. S
This course combines an introduction to a theoretical, research-based approach to the study of leadership with hands-on application, analysis, and engagement with the process of leadership. Within a small group setting, students explore core leadership competencies and experiment with the process of leadership by engaging classmates and members of the university and local communities and addressing issues of concern within those communities. This course satisfies the LDST 201/LDST 202 requirement for the Leadership Studies Minor. This course is not available to students with credit in LDST 200 or LDST 201/LDST 202. Prerequisite: Admission to the University Honors Program, Instructor Permission.

LDST 260. Study Abroad Topics in Leadership Studies. 1-6 Credits. S
This course is designed to enhance international experience in topic areas related to Leadership Studies at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

LDST 290. Foundations of Leadership in Society. 3 Credits. S
This course will expose students to a variety of concepts, theories, and skills relevant to contemporary leadership thought. Students will be challenged to consider their personal conceptions and philosophy of leadership. Students will examine leadership within particular contexts such as creating change, ethical leadership, leadership and management, and historical leadership thought and leaders.

LDST 301. It’s On Us: Gender Based Violence Prevention. 0-1 Credits. S
This class is the first in a series of four addressing Gender Based Violence Prevention. This class examines the foundational concepts of Gender Based Violence Prevention at the individual level. Topics covered include; but are not limited to, Consent, Drug and Alcohol Facilitated Rape, Gender Based Violence as Oppression, and Bystander Intervention. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course students will be able to 1) Assess behaviors that put others at risk for violence, victimization, or perpetration (2) Identify the four main characteristics of consent and describe what is necessary for consent to be present (3) Identify and apply strategies for safely intervening as an active bystander on the individual level (4) Identify multiple ways that power and oppression is impacted by individual identity (5) Contribute to gender based violence prevention on the community level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. Prerequisite: LDST 302.

LDST 304. ACTivist: Gender Based Violence Prevention. 0-1 Credits. S
This is the final class in a series of four addressing Gender Based Violence Prevention. This class examines Gender Based Violence prevention through a Social Justice Frame Work and the Socioecological Model on the community and societal level. Topics cover include; but are not limited to, Social Justice Frame Work, Socioecological Model, Evidence Based Primary Prevention, and Accountability. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course student will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Assess the intersection between the socioecological model and the social justice frames work (3) Identify and apply strategies for safely intervening as an active bystander on the relationship and community level (4) Identify multiple ways that power and oppression is impacted by individual identity (5) Contribute to gender based violence prevention on the community or societal level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. Prerequisite: LDST 303.

LDST 320. How to Plan (Almost) Anything: Event Development and Management. 3 Credits. S
This course is designed to provide an introduction to the principles of special event planning and management. Students will gain foundational concepts and professional skills through researching, planning, coordinating, marketing, management and evaluation of special events. This course will develop student skills necessary to lead and manage in an ethically, environmentally, economically, and socially sustainable way. By utilizing the adaptive leadership model, students will analyze core objectives of event planning, while experimenting with smart risks and disciplined assessment. Essential topics will include event planning and coordination, sponsorship, negotiations, marketing, communications, customer service, vendor management, volunteer management, crisis management, and event evaluation.

LDST 420. Communication, Leadership, and Conflict Management. 3 Credits. S
This course introduces students to theories of conflict management from a variety of academic perspectives and the role leadership plays in managing conflict across multiple contexts. Students will learn how to successfully assess and command situations and effectively resolve
interpersonal, organizational, and systemic conflict while doing the work of leadership. (Same as COMS 415.)

**LDST 431. Communication and Leadership. 3 Credits. S**
This course provides an overview of the role of communication in leadership in a variety of contexts, including: interpersonal, small group, intercultural, organizational, and public sphere. It will include theoretical and experiential approaches to effective leadership communication. Prerequisite: LDST 200, LDST 201, or LDST 203.

**LDST 460. Study Abroad Topics in Leadership Studies. 1-6 Credits. S**
This course is designed to enhance international experience in topic areas related to Leadership studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**LDST 470. Independent Study in Leadership Studies. 1-6 Credits. S**
This course engages students in an investigation of a special topic or project selected by the student with advice, approval, and supervision of a Leadership Studies instructor. Such study may take the form of special research, individual reports and/or conferences. Prerequisite: Permission of Instructor, LDST 201, LDST 202.

**LDST 480. Internship in Leadership Studies. 1-6 Credits. S**
Students complete leadership-centered fieldwork in an organization related to their career goals. Criteria for the organizations and work assignments suitable for internship credit are available through the Institute for Leadership Studies. An internship plan is developed with the field supervisor and internship faculty adviser. Reports and meetings are required. Prerequisite: Permission of Instructor.

**LDST 490. Special Topics in Leadership Studies: ____. 3 Credits. S**
This course is designed for the study of special topics in leadership studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor.

**LDST 500. Directed Readings in Leadership Studies. 1-6 Credits. S**
This course is designed for directed readings in selected areas of Leadership Studies. Individual and supervised readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor.

**LDST 520. Leadership Ethics. 3 Credits. S**
Through collaboration, discussion, case study, and course readings, Leadership Ethics familiarizes students with various theoretical perspectives of ethical decision making and the ethics-guided behavior essential for competent leadership. Upon completion, students will understand a variety of ethical perspectives for the prescription of action in a leadership context, apply a variety of ethical perspectives to the choice and evaluation of action in leadership work, and recognize the significance of considering multiple ethical perspectives in both leadership and broader contexts. Prerequisite: LDST 202.

**LDST 532. Leadership Studies Practicum. 3 Credits. S**
Students simultaneously complete a 1-hour seminar in equity-centered leadership and a 2-hour supervised, direct, community involvement project in which they apply leadership knowledge, tools, and skills to a real world environment. Written assignments, journal reflections, and group discussions are used to record and assess learning. Prerequisite: LDST 201 and admission to the Leadership Studies minor.

**LDST 535. Seminar in Leadership Strategies and Applications. 3 Credits. S**
This seminar serves as the capstone course for the Leadership Studies minor. It includes advanced readings on leadership theory and practice, as well as major written and applied projects in which students integrate and demonstrate what they have learned in the program. Prerequisite: LDST 201, or LDST 431, and admission to the Leadership Studies minor.

**LDST 690. Special Topics in Leadership Studies: ____. 3 Credits. S**
This course is designed for the study of special topics in Leadership Studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit of the content differs. Prerequisite: Permission of instructor.

**LDST 695. Advanced Special Topics in Leadership Studies: ____. 3 Credits. S**
This course is designed to take advantage of special competence by an individual faculty member in Leadership Studies. Course content addresses timely topics and relevant issues in the field and topics change as needs and resources develop. May be repeated for credit of the content varies. Prerequisite: Permission of instructor.

**LDST 700. Introduction to Graduate Studies. 3 Credits.**
This course is designed to prepare students accepted into the Master of Arts in Leadership in Diversity and Inclusion program for further graduate studies through a series of workshops, experiential learning opportunities, lecture, discussion, research assignments, and peer collaboration. Upon completion, students will have a better understanding of the expectations of graduate education as well as campus resources, and networking opportunities designed to support degree work. Students will develop their academic skill set by focusing on scholarly writing, oral communication/ presentation, research and information literacy, critical thinking, and argumentation. Prerequisite: Permission of Instructor.

**LDST 705. Professionalization Seminar in Leadership Studies. 3 Credits.**
This course is designed to cultivate professional habits, perspectives, and identities for graduate students primarily in the humanities and social science fields, but is open to students from all fields. The course focuses on preparation for career paths outside of higher education and based in work around Leadership in Diversity and Inclusion in the United States. Prerequisite: Graduate standing.

**LDST 710. History and Theory of Leadership Studies. 3 Credits.**
Theoretical foundations in leadership, organizational decision making, and communication will enhance students' development of expertise in assessing organizational and systems issues, and facilitating unit-, organization-, and system-wide improvements. Traditional approaches to leadership, organizing and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures, systems, and populations. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to effectively assess, design and lead high performing organizations in a dynamic world. Contexts discussed will include for-profit, not-for-profit, healthcare, community, and military organizations. Prerequisite: Graduate standing.

**LDST 715. Leadership, Equity, and Inclusion. 3 Credits.**
This course introduces students to the Adaptive Leadership framework as a tool for evaluating, navigating, and addressing difficult challenges at both a personal and systemic level. Using a case-based approach, students will identify and diagnose challenges, design equitable interventions, and mobilize diverse stakeholders to implement change
on issues of concern. Prerequisite: Admission to a graduate program or certificate or consent of instructor.

**LDST 720. Leadership Ethics. 3 Credits.**
This course establishes a theoretical groundwork with readings and discussions that will familiarize students with five perspectives on ethical decision making and behavior as well as the essential competencies of leadership. For each of those perspectives, students will engage in reflections, collaborative case studies, and debates based on a case in point approach as well as a single-authored analysis of a selected leadership case. Prerequisite: Graduate Standing.

**LDST 730. Managing the Work of Leadership. 3 Credits.**
Through webinars and case in point pedagogy, this course prepares students to manage the day to day communicative and executive functions necessary for doing the work of leadership. Topics will include crisis management, stakeholder engagement, speech writing, fundraising, image management, and professionalization. Prerequisite: Graduate standing.

**LDST 740. Leadership and Power. 3 Credits.**
Leadership and power often are confused and this misunderstanding can lead to members of oppressed groups dismissing their own leadership potential. Through reading, reflective writing, and engaged discussion, this course will help students understand power and leadership as distinct concepts that occasionally intersect. Within their various systems, people continuously perceive, encounter, and work within different power dynamics. Thus students will learn about historical and culturally diverse understandings of power, the ethical responsibilities of power, the dangers of misuse of power, and doing the work of leadership with (and without) power. Prerequisite: Graduate standing.

**LDST 760. Leadership and Communication. 3 Credits.**
This course focuses on intra- and inter-personal communication, supporting students to: develop listening and empathy skills; make clear and specific requests; and express feelings and needs in a way that does not imply judgment, criticism, blame, or punishment. Learning this process involves working collaboratively through small group practice, pair shares, and teamwork to master the skills. A collaborative education approach is employed throughout the course, reinforcing learning, and providing students with confidence and competence to resolve conflict and handle challenging communication. Students critique one another’s work, present feedback and suggestions, and collectively develop aptitude for successful work environments and personal relationships. Prerequisite: Admission to a graduate program or graduate certificate or instructor permission.

**LDST 769. Special Topics in Leadership Skills and Methods: ____. 3 Credits.**
This course is designed for the study of graduate level skills and methods in leadership in diversity, equity, and inclusion. Course content addresses specialized leadership skills or leadership research methodologies in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Admission to a graduate program or graduate certificate or instructor permission.

**LDST 770. Independent Study in Leadership Studies. 1-3 Credits.**
This course engages students in a graduate-level investigation of a special topic or project selected by the student with advice, approval, and supervision of a Leadership Studies instructor. Such study may take the form of special research, individual reports and/or conferences. Prerequisite: Permission of instructor.

**LDST 799. Special Topics in Leadership Contexts: ____. 3 Credits.**
This course offers students the opportunity to explore or extend existing investigation of populations, identities, contexts, movements, and issues common to the work of leadership in diversity, equity, inclusion, and belonging spaces. Topics will change as issues, needs, and resources develop. May be repeated for credit if the content differs. Prerequisite: Admission to a graduate program or graduate certificate or instructor permission.

**LDST 800. Directed Readings in Leadership Studies. 1-3 Credits.**
This course is designed for graduate level directed readings in selected areas of Leadership Studies. Individual and supervised readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Permission of instructor.

**LDST 850. Leadership in Diversity and Inclusion Capstone. 1-3 Credits.**
Students will integrate and synthesize the interdisciplinary knowledge they have gained in their graduate learning, making relevant connections across disciplines represented within the degree program while applying theory, skills, and methods to new contexts or complex problems. Prerequisite: Graduate standing and instructor consent.

### Jewish Studies Courses

**HEBR 110. Elementary Modern Hebrew I. 5 Credits. U F1**
A beginning course in modern Hebrew. Essentials of grammar, syntax and conversational practice; elementary reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam.

**HEBR 120. Elementary Modern Hebrew II. 5 Credits. U F2**
A continuation of HEBR 110. Note Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 110.

**HEBR 177. First Year Seminar: ____. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hebrew. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**HEBR 200. Elementary Studies in Modern Hebrew. 3 Credits. H**
This course is designed to help prepare students for the intermediate level of Modern Hebrew. Not open to native speakers of Hebrew. Does not count toward the JWSH minor or major. Prerequisite: HEBR 110 or equivalent. Consent of instructor.

**HEBR 210. Intermediate Modern Hebrew I. 3 Credits. U F3**
Further development of language skills: listening comprehension, oral efficiency, intermediate grammar and syntax, reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 120.

**HEBR 220. Intermediate Modern Hebrew II. 3 Credits. U F4**
A continuation of HEBR 210. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 210.

**HEBR 340. Advanced Modern Hebrew I. 3 Credits. U FP**
Advanced study of Modern Hebrew. This course is designed to strengthen linguistic skills, enrich vocabulary, and further the study of grammar and syntax. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or permission of the instructor.

**HEBR 350. Advanced Modern Hebrew II. 3 Credits. U FP**
Continued advanced study of modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 340 or permission of the instructor.

HEBR 395. Study Abroad Topics in Hebrew: ______. 3-6 Credits. H
This course is designed for the study abroad of special topics in Hebrew at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

HEBR 410. Studies in Modern Hebrew Literature. 3 Credits. H FP
An introduction to Hebrew literature from the nineteenth century to the present day. The course emphasizes the development of basic interpretive skills and the understanding of basic literary movements, genres, and concepts. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent.

HEBR 420. Studies in Modern Hebrew. 3 Credits. U FP
This course is designed to help students achieve fluency in speaking, listening, and writing Modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent.

HEBR 490. Independent Study. 3 Credits. U
Intensive reading or research under faculty supervision. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent.

Jewish Studies Courses

JWSH 107. Jews, Christians, Muslims. 3 Credits. HR H
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. (Same as REL 107.)

JWSH 120. Exploring the Jewish Experience. 1 Credits. H
This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, and culture. Not open to students who have completed JWSH 400 or JWSH 610.

JWSH 124. Understanding the Bible. 3 Credits. HR H
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as REL 124.)

JWSH 125. Understanding the Bible, Honors. 3 Credits. HR H
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as REL 125.)

JWSH 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Jewish Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

JWSH 300. Topics in Jewish Studies: ______. 3 Credits. H
Examination of special topics in Jewish Studies. May be repeated if topic varies.

JWSH 305. Language, Gender, and Sexuality. 3 Credits. S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, GIST 303, SLAV 305 and WGS 325.)

JWSH 315. The Spanish Inquisition. 3 Credits. H
