Psychological, sociological, and physiological issues of health and human functioning of the female client systems across the life span are explored. Theory and research-based therapeutic management of acute, episodic, and chronic conditions that occur in community based women and their families will be planned. Professional values including standards of practice, certification, cultural, legal and ethical issues, and professional roles will be addressed. The health care delivery system will be analyzed for cost effectiveness and sensitivity to women. Prerequisite: Corequisite: RN-BSN student or consent of instructor.

**NURS 411. Population-Based Nursing. 3 Credits.**
Concepts and theories related to providing health care to complex systems and aggregates in the community, state, nation and world are explored. Emphasis is placed on the promotion, maintenance and restoration of health and wellness, and the prevention of disease. Environmental components including historical, political, social, cultural, and economic factors are presented. The role of the health care provider in identifying, prioritizing and meeting the health and life participation needs of populations is discussed. Prerequisite: Admission to the School of Nursing.

**NURS 412. Nursing in Healthcare Microsystems. 3 Credits.**
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet. This environment is where the nurse participates in a broad mixture of direct and indirect care patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the School of Nursing or consent of instructor.

**NURS 413. Ethics, Advocacy, and Collaboration in Nursing Practice. 3 Credits.**
Ethical principles of patient care are applied. Team building and group process skills are explored to facilitate working within the interprofessional healthcare team. The role of the nurse as a member of the healthcare team is examined using concepts and theories of communication, group process, team building, and advocacy. Skills to continue professional growth and support excellence in nursing practice are investigated. Prerequisite: Admission to the School of Nursing or consent of instructor.

**NURS 414. Organizational Influences on Nursing Practice. 3 Credits.**
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and political environmental factors is examined. Prerequisite: Admission to the School of Nursing or consent of instructor.

**NURS 415. Improving Healthcare Quality. 3 Credits.**
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the School of Nursing or consent of instructor.

**NURS 416. Evidence-Based Nursing Practice. 3 Credits.**
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse’s clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the School of Nursing or consent of instructor, Satisfactory completion of a statistics course.

**NURS 417. Influences of the Healthcare Macro-System on Nursing Practice. 3 Credits.**
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association's interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the School of Nursing.

**NURS 418. Clinical Leadership Practicum. 3 Credits.**
Students engage in a clinical learning experience whereby they integrate new knowledge and demonstrate attainment of BSN program outcomes. The clinical practice experiences facilitate students in directly engaging with patients through a collaboration with clinical site nursing staff. Clinical
practice experiences include but are not limited to, planned learning activities in nursing practice that allow students to synthesize knowledge and understand, perform, and refine professional competencies as a clinical nurse leader at the BSN level. Prerequisite: Admission to the RN to BSN program.

NURS 441. Evidence Based Practice in Nursing. 3 Credits.
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse's clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the RN to BSN program, course in statistics, or consent of instructor.

NURS 443. Developing the Baccalaureate Nurse Role. 3 Credits.
Contemporary issues confronting the nursing profession are discussed and methods to advocate for patients and the profession are investigated. Communication, clinical leadership, and evidence-based practice skills that enhance the student's ability to perform in a complex organizational system are emphasized. Personal accountability, professional boundaries, team building, and group process skills are explored to facilitate students working within interprofessional health care teams. Students will examine their own beliefs and values and develop their personal philosophy of nursing. Prerequisite: Admission to the RN to BSN program.

NURS 444. Using Technology to Enhance Client Safety. 3 Credits.
Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Admission to the RN to BSN program.

This course is designed to enlighten students to new cultures, provide the opportunity to see how these cultures deal with health care, and assess the clients' internal and external environment that impact health care. Various roles and responsibilities of nurses participating in international health are examined. A short term immersion experience provides an opportunity to incorporate the nursing process in clinic and community settings and to function as members of a health care team. Prerequisite: NURS 333, NURS 339, or consent of instructor.

NURS 446. Population Based Health Care for the Practicing Nurse. 3 Credits.
Concepts and theories important to providing health care to aggregates, communities, and populations are explored. Health promotion and prevention of disease and injury as essential elements of baccalaureate nursing practice are emphasized. Determinants of health are identified to allow students to construct methodologies that address health care disparities. The role of individuals within the interprofessional healthcare team is examined to determine the contributions of each to the achievement of healthy populations. Prerequisite: Admission to the RN to BSN program.

NURS 447. Nursing Practice within the Clinical Health Care Micro System. 3 Credits.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet (2008 AACN Essentials, p. 38). This environment is where the nurse participates in a broad mixture of direct and indirect care patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the RN to BSN program.

NURS 448. Scholarly Inquiry for Quality Improvement. 3 Credits.
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the RN to BSN program.

NURS 449. Nursing Practice within the Healthcare Organization. 3 Credits.
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and political environmental factors is examined. Prerequisite: Admission to the RN to BSN program.

NURS 451. Navigating the Influences of the Health Care Macro-Environment. 3 Credits.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the RN to BSN program.

NURS 466. Laboratory Data and Diagnostic Procedures: Clinical Applications. 2 Credits.
Understanding and interpreting common laboratory tests and diagnostic procedures to identify potential or actual needs of individuals is the primary purpose of this course. Alterations in laboratory data and diagnostic testing procedures due to common pathological states of individuals across the life span will be explored. The focus will be on using this knowledge to identify nursing concepts, diagnoses, and appropriate interventions.

NURS 469. Independent Study in Nursing. 1-5 Credits.
Intensive study in an area of interest with experiences selected according to the student's written purposes, conceptual framework, objectives and evaluation. Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed.

NURS 471. Development of a Microsystem Leader. 3 Credits.
Development of a microsystem leader supports the student's understanding of nursing leadership opportunities at all levels of nursing practice. Emphasis will be placed on building and growing teams, modeling a culture of safety and resource utilization, allocation and financial management. Students will be given the opportunity
to demonstrate effective decision making and clinical judgement while exploring their role in the healthcare microsystem. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 or consent of instructor. Corequisite: NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor.

NURS 472. Evidence-Based Practice: Translating Research to Practice. 2 Credits.

Concepts of evidence-based practice (EBP) and healthcare research are explored. Methods to critically appraise healthcare research will be applied. Critical appraisal of evidence will be employed to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor.

NURS 473. Professional Development III: Transition to Practice. 2 Credits.

Contemporary issues confronting the nursing profession are discussed and methods to advocate for the profession are investigated. Professional skills, such as job interviewing, portfolio development, and examination of advanced roles in nursing will be emphasized. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or Consent of Instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or Consent of Instructor.

NURS 474. Health and Illness: Nursing with Diverse Populations. 4 Credits.

Comprehensive and focused evidence-based care of patients in diverse populations with complex health conditions will be examined. The nurse’s role in assuring coordination, integration, and continuity of care is investigated. Integration of the physical, behavioral, psychological, spiritual, socioeconomic, and environmental factors that influence patient centered care is explored. Collaboration with other health care team members to provide safe and quality care for diverse patients in a variety of complex settings is analyzed. Information management tools to monitor outcomes of care are evaluated. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or Consent of Instructor. Corequisite: NURS 471, NURS 472, NURS 474, NURS 475, or Consent of Instructor.

NURS 475. Practicum III: Nursing within Dynamic Microsystems. 3 Credits.

Coordination, integration, and continuity of care for diverse patients will be applied in dynamic micro-systems such as: maternity, pediatrics, mental health, and critical care. Patients/designees are engaged in active partnerships that promote health, safety, well-being, and self-care management. Analysis of patient care interventions in a patient or population relative to evidenced based practice are used to evaluate safe and quality care for patients. Informatics processes that support clinical judgment, error prevention, and care coordination are used along with teamwork and collaboration. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or Consent of Instructor. Corequisite: NURS 471, NURS 472, NURS 473, NURS 474, or Consent of Instructor.

NURS 476. Nursing in an Evolving Healthcare System. 4 Credits.

Nursing practice in an evolving healthcare system is addressed with emphasis on the unique challenges presented to the nurse. The role of the nurse as provider of direct and indirect patient care is expanded to include the external influences of the health care organization, the regulatory environment, and the professional association. The development of the nurse as a member of a profession is expected. Inherent is a developing knowledge and appreciation for the diversity of opinions and organizations that exist to provide assistance in the delivery of direct patient care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or Consent of Instructor. Corequisite: NURS 477, NURS 478, NURS 479, NURS 480, or Consent of Instructor.

NURS 477. Practicum V: Capstone. 3 Credits.

A preceptor model of learning professional nursing practice provides opportunities to synthesize and integrate previous learning experiences. Emphasis is placed on the roles of the nurse as provider of indirect and direct care; designer, manager and coordinator of care; and member of the profession. The focus is on individual transition to the professional nursing role, recognizing the organizational, social, political, economic, ethical, and legal context in which interdisciplinary health care is delivered in a selected clinical setting. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 472, NURS 474, NURS 475, or Consent of Instructor. Corequisite: NURS 476, NURS 478, NURS 479, NURS 480, or Consent of Instructor.

NURS 478. Integration of Concepts and Clinical Competencies. 1 Credit.

Students integrate concepts discussed in the classroom with competencies learned in the clinical setting. Using small group guided discussion, students begin building a skill set that shows knowledge of and appreciation for the roles of direct care provider, designer, manager and coordinator of care; and member of profession. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or Consent of Instructor. Corequisite: NURS 476, NURS 477, NURS 480, NURS 486, or Consent of Instructor.

NURS 480. Practicum IV: Leadership in a Population Health Setting. 2 Credits.

Concepts and theories from leadership and population health are applied to the health care of: individuals, groups, communities and populations. There is a concentrated focus on leadership in health promotion that provides safe, effective, and efficient care. Leadership concepts such as systems theory, quality improvement, economics, and evidence are applied. Students are provided opportunities for inter-professional collaboration in the planning of health care and promotion of quality outcomes for diverse populations. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 472, NURS 474, NURS 475, or Consent of Instructor. Corequisite: NURS 476, NURS 478, NURS 485, or Consent of Instructor.

NURS 481. Honors Evidence-Based Practice: Translating Research to Practice. 2 Credits.

Concepts of evidence-based practice (EBP) and health care research are explored to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or Consent of Instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or Consent of Instructor. This course is for Honors students only.

NURS 482. Honors Practicum I. 2 Credits.
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conduction research.

**NURS 483. Honors Practicum II. 2 Credits.**
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conduction research.

**NURS 485. Population Health, From Local to Global I. 2 Credits.**
Population based health and multi-sectoral systems influencing health, locally and globally, are explored. Students build upon clinical judgment skills from an individual level of care to a global context of care. Focus is on risk reduction, protective and predictive factors, and the systems influencing the health of individuals, families, and communities. Multiple determinants of health and basic data patterns are applied to assess the health and illness beliefs, assets and barriers to health and to explore historical, social, political and economic forces impacting the health of communities. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 Corequisites: NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor.

**NURS 486. Population Health, Local to Global II. 2 Credits.**
Community theories, models and frameworks are explored to guide a community health improvement project. Community engagement and collaboration, health coaching and behavior change, and chronic disease management are used to create a community health improvement plan. Quality indicators and sustainable health outcomes are explored to address local, state, and global health issues impacting communities. Prerequisite: Prerequisites: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 Corequisites: NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, NURS 485.

**NURS 492. Clinical Leadership Practicum for the Practicing Nurse. 2-3 Credits.**
Students engage in a clinical learning experience whereby they integrate new knowledge and demonstrate attainment of BSN program outcomes. The clinical practice experiences facilitate students directly engaging with patients through a collaboration with clinical site nursing staff. Clinical practice experiences include, but are not limited to, planned learning activities in nursing practice that allow students to synthesize knowledge and understand, perform, and refine professional competencies as a clinical nurse leader at the BSN level. Prerequisite: Must be taken in final semester of the RN-BSN program.

**Bachelor of Science in Nursing**

The School of Nursing offers three undergraduate nursing programs: Pre-Licensure BSN, RN to BSN (p. 2282), and Community College Nursing Partnership (CCNP) (p. 2282).

With a **Bachelor of Science in Nursing (BSN)** from the University of Kansas School of Nursing, graduates are prepared for success in any health care setting. KU BSN graduates are ready to work in hospitals, community health agencies, industrial or long-term care facilities, as travel nurses, flight nurses, and many other diverse clinical settings.

Graduates of the KU School of Nursing baccalaureate program, begun in 1929, go on to become charge nurses and move into other leadership positions in Kansas and across the country. They are also well-prepared for continuing their education through master’s and doctoral programs in nursing.

School of Nursing alumni are hired by hospitals of great renown, including Johns Hopkins and Mayo Clinic and excellent hospital systems closer to home at The University of Kansas Health System and Children’s Mercy Hospitals and Clinics.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/) (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate program, APRN certificates, and DNP APRN specialties also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (ACME) (https://www.midwife.org/acme/) of the American College of Nurse-Midwives (http://www.midwife.org/), 8403 Colesville Rd., Suite 1550, Silver Spring, MD 20910, (240) 485-1800.

**Undergraduate Admission to the School of Nursing**

- **Pre-Licensure BSN Program (p. 2282)**
- **RN to BSN Program (p. 2283)**
- **Community College Nursing Partnership Program (CCNP) (p. 2284)**

**Pre-Licensure BSN Program**

Students enter the Pre-Licensure BSN program after taking 58 semester credit hours of prerequisite work in an accredited college or university. Admission to the school is competitive. A minimum grade-point average of 2.5 is required to apply.

**Pre-Nursing Advising**

A pre-nursing advisor is available by appointment during the fall and spring semesters in the Undergraduate Advising Center (http://advising.ku.edu/), Summerfield Hall, on the Lawrence campus and year-round on the Kansas University Medical Center campus in Kansas City. The advisor provides students with information about the nursing profession, help with course selection in preparation for nursing application, and guidance in the admission process. For an appointment, current Lawrence campus students can call (785) 864-2834. All other students can call (913) 588-1619 for an appointment in Kansas City.

**Admission Procedure**

Applications for the pre-licensure BSN program are accepted from July 1st to October 1st for admission the following fall semester. Applications are accepted through the KU Medical Center online application (https://gograd.ku.edu/apply/?sr=ca7d45b3-1f3c-471c-89d2-5abe042c93bb) site.

**Admission Criteria**

The School of Nursing is meeting the changing needs of society by selecting applicants who, in the judgment of the Student Admission and Progression Committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry.
Students are selected based on college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university’s programs and activities.

Locations
The School of Nursing has two campuses: one on the University of Kansas Medical Center campus in Kansas City, KS, about one hour east of the Lawrence Campus, and one on the University of Kansas Medical Center campus in Salina, KS, about two hours west of the Lawrence campus.

Course Requirements
Within the 58 hours required for admission to the basic BSN program, the following must be included:

Humanities and Social Sciences
Courses in English composition and literature, public speech, general sociology, general psychology, theories of child or human development, global awareness, and humanities are required. Students who complete these general education requirements through the Lawrence Campus meet these requirements by taking the following courses:

<table>
<thead>
<tr>

Natural Sciences and Mathematics
Courses in general chemistry, microbiology, biology, and human anatomy are required. These courses must include laboratory experience. Courses in college algebra, statistics, physiology, and nutrition are required, but do not require a laboratory experience. Students who complete these general education requirements through the Lawrence Campus meet these requirements by taking the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 100</td>
<td>Principles of Biology</td>
<td>4</td>

</tbody>
</table>

Electives
Electives can be chosen according to the student’s interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 4 performance-based credit hours can be accepted in the 58 credit hours required for admission. These 4 credit hours may be in physical education courses and technique courses in art, music, and dance.

RN to BSN Program
Through the RN to BSN program, licensed registered nurses (RN) with associate degrees in nursing can complete the Bachelor of Science (BSN) degree online.

Admission Procedure
The application for the RN to BSN program always is open, with the following deadline dates: January 1st for mid-spring semester, April 1st for summer semester, July 1st for fall semester, August 1st for mid-fall semester, and November 1st for spring semester. Applications are accepted through the KU Medical Center online application (https://gograd.ku.edu/apply/?sr=ca7d45b3-f13c-471c-89d2-5abe042c93bb) site.

Admission Criteria
Eligible applicants must have current United States RN licensure, an associate degree in nursing from an ACEN-accredited college, and completion of 60 prerequisite credit hours with a cumulative GPA of at least 2.50.

The School of Nursing is meeting the changing needs of society by selecting applicants who, in the judgment of the student admission and progression committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected based on college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental
status, gender identity, gender expression, and genetic information in the university's programs and activities.

**Course Requirements**

Within the 60 prerequisite credit hours required for admission to the RN to BSN program, the following must be included:

**Humanities and Social Sciences**

Courses in English composition and literature, speech or interpersonal communication, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

**Global Awareness class**

1 course designated Advanced Education 4.2 in this catalog 3

**Natural Sciences and Mathematics**

Courses in general chemistry, microbiology, and human anatomy are required. These courses must include a laboratory experience. Courses in college algebra, statistics, physiology, and nutrition are required but do not require a laboratory experience. Students who complete these general education requirements through the Lawrence Campus meet these requirements by taking the following courses:

<table>
<thead>
<tr>

<td>Elementary Statistics</td>
<td></td>
</tr>
</tbody>
</table>

**Electives**

Electives can be chosen according to the student’s interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, oral communication, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 8 performance-based credit hours can be accepted in the 60 credit hours required for admission. These 8 credit hours may be in physical education courses, and technique courses in art, music, and dance.

**Community College Nursing Partnership Program (CCNP)**

Students first complete 59-62 credit hours of prerequisite liberal arts and science courses, and then simultaneously complete the Associate Degree in Nursing (A.D.N./A.S.N.) at a partner community college and 30 credit hours of BSN courses online through KU School of Nursing.

**Admission Procedure**

Students should apply for admission to the CCNP immediately upon notification of admission to their selected A.D.N./A.S.N. program, but no later than the following dates: July 1st for fall semester and December 1st for spring semester. Applications are accepted through the KU Medical Center online application (https://gograd.ku.edu/apply/?sr=ca7d45b3-113c-471c-89d2-5abe042c93bb) site.

**Admission Criteria**

Eligible applicants must be admitted to a participating community college's Associate Degree in Nursing (A.D.N./A.S.N.) program and complete 59-62 credit hours of community college specific prerequisite credit hours with a cumulative GPA of at least 2.50. The School of Nursing is meeting the changing needs of society by selecting applicants who, in the judgment of the student admission and progression committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected on the basis of college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university's programs and activities.

**Course Requirements**

Within the 59-62 hours required for admission to the CCNP program, the following must be included:

**Humanities and Social Sciences**

Courses in English composition and literature, speech or interpersonal communication, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

<table>

</tr>
</tbody>
</table>
of at least 2.0. Only courses in which a grade of C or higher is earned are required for the RN to BSN degree, with a cumulative grade-point average of 3.0 for the Pre-Licensure BSN degree, and a total of 120 credit hours is required. A total of 120 credit hours is required of Nursing as having successfully fulfilled all prescribed requirements. The BSN degree is granted to candidates recommended by the School of Nursing as meeting these requirements by taking the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>

</tbody>
</table>

Electives can be chosen according to the student's interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, oral communication, physics, mathematics, political science, western civilization, biological sciences, economics, etc.

Additional Requirements

Students from certain community colleges will be required to take Nursing Assessment, Pathophysiology and/or Pharmacology as prerequisite courses. See the KU School of Nursing website for detailed requirements for each specific partnership school.

The BSN degree is granted to candidates recommended by the School of Nursing as having successfully fulfilled all prescribed requirements, including the courses listed below. A total of 120 credit hours is required for the Pre-Licensure BSN degree, and a total of 120 credit hours is required for the RN to BSN degree, with a cumulative grade-point average of at least 2.0. Only courses in which a grade of C or higher is earned count toward graduation. The last 30 hours completed for the degree must have been taken in residence at KU. A portion of total hours applied toward graduation may be earned through credit by examination. An applicant who receives a failing grade of D or F in the semester prior to the admission decision (e.g., Fall 2023 for Fall 2024 entry) will be removed from consideration. The professional portion of the BSN program can be completed in 2 academic years of full-time study.

Pre-Licensure BSN Program

The professional portion of the BSN program can be completed in 2 academic years of full-time study. In addition to the required courses listed below, each student must take a 2-credit hour elective.

RN to BSN Program

The RN to BSN program provides registered nurses a way to complete the baccalaureate degree in a flexible online format. The program can be
completed in as little as one calendar year of full-time study or up to five years of part-time study. A total of 120 semester credit hours is required for the degree, comprised of 60 credit hours of liberal arts prerequisite courses and 60 credit hours of nursing courses and evidence of RN licensure. NURS 326 and NURS 352 are eligible for credit by portfolio or transfer from approved associate degree programs. The last 30 hours completed for the degree must be taken at KU.

Total Hours 120

For more details on the Arts and Humanities and Global Awareness courses visit the KU Core website (http://kucore.ku.edu/). Sample schedules for the RN to BSN and Community College Nursing Partnership programs are available online on the School of Nursing website (https://www.kumc.edu/school-of-nursing.html).

University Honors Program

The School of Nursing encourages all qualified on-campus BSN undergraduates to participate in the University Honors Program (http://www.honors.ku.edu/).

Departmental Honors Program

The School of Nursing’s Departmental Honors Program offers enhanced educational opportunities for the most academically talented, promising, and motivated baccalaureate students while providing a foundation for leadership development and articulation into graduate education.

Students in the School of Nursing Honors Program develop and complete a research or scholarly inquiry project under the guidance of a faculty research mentor. Students must make formal application and be admitted to the Honors Program to take honors courses. Once admitted to the program, students may use departmental honors courses to help meet the requirements of the University Honors Program.

Selection criteria for the Nursing Honors Program are as follows:

- Enrollment in the Pre-Licensure BSN program
- Full-time status
- Completion of Nursing Honors Program application - available during the first semester of nursing school
- Overall grade-point average of 3.25 or higher and contingent upon earning a nursing grade-point average of 3.5 or higher at the end of the fall semester (exceptions are considered on an individual basis)

The honors curriculum comprises the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>NURS 382</td>
<td>Honors Seminar (spring of junior year)</td>
<td>1</td>

<td>2</td>
</tr>
<tr>
<td>NURS 483</td>
<td>Honors Practicum II (spring of senior year)</td>
<td>2</td>
</tr>
</tbody>
</table>

Students who successfully complete the Nursing Honors Program are recognized in the following ways:

- The notation of Departmental Honors on the official university transcript
- An official certificate indicating graduation with BSN Honors
- Listing in the School of Nursing Recognition Ceremony program
- Formal recognition at the School of Nursing Recognition Ceremony
- Listing in the University of Kansas Commencement Program
- Formal recognition at the Cordling Ceremony on the Lawrence campus for students also completing the University Honors Program

For more information, contact the School of Nursing Office of Student Affairs and Enrollment Management (https://nursing.kumc.edu/about-the-school/contact-us.html).

TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with
patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families.

Applicants must be able to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes.

The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Nursing and Interprofessional Master of Science Degrees

The Nursing Master of Science degree program enlarges the focus of nursing, using as its foundation the basic baccalaureate nursing program. The master's program curriculum includes the following components: Common Core, Leadership Core, Research Core, and Specialty Core. Leadership specializations include nursing education, organizational leadership, and public health nursing.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE). The master's program curriculum includes the following components: Common Core, Leadership Core, Research Core, and Specialty Core. Leadership specializations include nursing education, organizational leadership, and public health nursing.

The Health Informatics Master of Science program is administered by the Center for Health Informatics, which is sponsored by the School of Nursing. This program is interprofessional and open to baccalaureate-prepared students of all backgrounds. Healthcare experience is preferred, but not required.

Applications to the Nursing Master of Science and Interprofessional Health Informatics Master of Science degree programs are accepted twice a year. Applications are due by April 1st and September 1st. These respective deadlines for fall and spring semesters.

eligibility requirements, NURSING MASTER OF SCIENCE:

1. Bachelor of Science in Nursing (BSN) from a nationally accredited (NLNAC or CCNE) program
2. Current registered nurse licensure in at least one state in the United States
3. Minimum of one year of clinical work experience as a registered nurse is recommended
4. Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
5. Potential for leadership and application of scholarship in nursing
6. Potential to provide expert service and leadership in functional area
7. Completion of a graduate-level statistics course either prior to admission or during first semester of graduate study
8. Satisfactory criminal background check, which is completed once an offer of admission has been extended to applicant

**eligibility requirements, INTERPROFESSIONAL HEALTH informatics:**

Requirements for the Master of Science in Health Informatics (MSHI) are located in the program's Admissions requirements (https://catalog.ku.edu/nursing/ms-health-informatics/#admissiontext).

**English Language Requirements**

All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

**Nursing Master of Science Degree**

**Nursing Education (NE) Specialty** (minimum 39 credit hours) - prepares nurses for the educator role in academic and clinical settings to deliver didactic and clinical instruction through a variety of teaching, learning and evaluative methods.

**Interprofessional Health Informatics Master of Science**

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health informatics, special skills will be acquired in organizational change, project management and impact evaluation.

**DUAL DEGREES**

**NURSING DUAL DEGREE PROGRAM**

Students who wish to earn master's degrees in both Nursing (organizational leadership [OL] specialty) and Health Services Administration may elect the dual degree option. By combining some course work, the two degrees may be completed in a shorter time frame. Students in the MS, OL/MHSA dual degree program must complete a total of 62 graduate credit hours: 29 credit hours in the School of Nursing and 33 credit hours in Health Policy & Management. If completed separately, the MS in nursing requires 37 credit hours, and the MHSA degree requires 52-54 credit hours.

**HEALTH INFORMATICS DUAL DEGREE PROGRAM**

PharmD students currently enrolled in the KU Pharmacy degree program who wish to earn a master's degree in health informatics while completing their pharmacy degree may apply for the MSHI-PharmD dual degree program (https://catalog.ku.edu/nursing/ms-health-informatics/#dualprogramstext).

**TECHNICAL STANDARDS FOR ADMISSION**

University of Kansas School of Nursing (MSHI technical standards are located the MSHI degree webpage [https://catalog.ku.edu/nursing/ms-health-informatics/#technicalstandardstext])

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, all students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require
D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client's history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University's Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Doctor of Philosophy in Nursing

The Doctor of Philosophy in Nursing (PhD) Program prepares graduates to function in faculty positions in college and university settings; conduct independent research as nurse scientists, perform scholarly endeavors in nursing; generate and expand the theoretical, empirical, and philosophical bases for nursing practice; provide leadership to the profession; and interpret nursing to society. Students have opportunities to expand their theoretical knowledge and research skills in one of three emphasis areas (Health Systems, Symptom Science, or Education); develop expertise in nursing theory development; expand research skills; and gain a historical and philosophical perspective that broadens their professional orientation and provides a basis for understanding changing social expectations, cultural perspectives, and economic and political trends. The PhD Program prepares nurse scientists for the future with coursework in Precision Health, Data Science, and Grant Writing.

Nurses engaged in doctoral study are adult learners with unique perspectives gained from personal, professional, and educational experiences. These individuals tend to be self-directed, goal-oriented, highly motivated and capable of abstract, original thinking. Individual interests are explored through study in the selected emphasis area. Learning is achieved through independent study and research, as well as instructed courses.

Admission Criteria

New students are accepted to the PhD degree program once a year, for instruction that begins in June during the summer semester. The application deadline is January 1st for admission the following summer. Prospective students can apply using the KU Medical Center online application (https://gograd.ku.edu/apply/?sr=ca7d45b3-113c-471c-89d2-5abe042c93bb).

1. Completion of a Bachelor of Science in Nursing (BSN), Master of Science (MS) in nursing, or Doctor of Nursing Practice (DNP) degree from a nationally accredited (NLNAC or CCNE) program.
2. Current registered nurse licensure in at least one state in the United States. This requirement may be waived for international students who will not engage in patient care while in the program.
3. Preference is given to applicants with a 3.5 GPA in a BSN program or 3.25 GPA in a Master's or DNP program.
4. Potential for leadership and scholarship in nursing.
5. Prerequisite preparation must include a graduate-level statistical methods course and an Analysis of Variance (ANOVA) course.
6. Satisfactory criminal background check (completed once an offer of admission has been extended to applicant), which may affect the student's eligibility to enter the program.

English Language Requirements

All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.
See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

**Program Options**

Students may apply to the research doctoral (PhD) program after completing a doctor of nursing (DNP), master's degree in nursing or a baccalaureate degree with a major in nursing. The post-baccalaureate entry option is for exceptionally well-qualified BSN graduates whose career goals are research-oriented and who wish to progress as rapidly as possible toward the research doctorate in nursing.

**Course Requirements**

The PhD degree requires 67 credit hours; 52 coursework credit hours and at least 15 dissertation credit hours for Post-MS students. Post-BSN students complete an additional 6 credit hours from the graduate nursing core. DNP-to-PhD students complete 27 credit hours of coursework and 15 dissertation credit hours.

The PhD program is offered through a combination of formats, including:

- Three required on-campus, one-week summer intensives at the University of Kansas Medical Center in Kansas City, Kansas
- Online coursework throughout the year, including synchronous and asynchronous web-based conferencing on a regular basis
- On-campus and videoconference mentoring by faculty for research and career advisement and scholar development

Coursework includes curriculum components: core (41 credit hours for Post-MS), an Emphasis Area (11 credit hours), and Dissertation (at least 15 credit hours). DNP-to-PhD students complete 27 credit hours of coursework and 15 dissertation credit hours.

Dissertation

NRSG 999 | Dissertation (up to 6 credit hours in one semester) | 15

*Courses will be selected in consultation with advisor.*

**Emphasis Area**

The emphasis area includes 11 coursework credit hours in the student's area of choice from among three options: Health Systems, Symptom Science, or Education. Emphasis area courses must support the student's research interest area. Two of the 11 emphasis area credit hours are taken through enrollment in NRS 970: Synthesis of Emphasis Area of Study, which is taken after completion of the emphasis area coursework. That course requires completion of a scholarly paper synthesizing content taken throughout the emphasis area course sequence.

**Dissertation**

Each PhD student must complete a study that shows the planning, conduct, and results of original research. See Doctoral Degree Requirements, Ph.D., in the Graduate Studies section of the online catalog. The minimum number of post-comprehensive dissertation credit hours is 15. The program also requires satisfactory completion of the University’s research skills and responsible scholarship requirement, two qualifying examinations at the completion of NRS 945: Synthesis Workshop I and NRS 949: Synthesis Workshop II, a comprehensive oral exam, (i.e., the dissertation proposal defense), and a final oral examination, (i.e., the final dissertation defense).

**TECHNICAL STANDARDS FOR ADMISSION**

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/ evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to
observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology, which may be an essential part of the selected research topic.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Doctor of Nursing Practice (DNP) to Doctor of Philosophy in Nursing (PhD) Program

The University of Kansas School of Nursing PhD program prepares graduates to function in faculty positions in college and university settings; conduct independent research and scholarly endeavors in nursing; generate and expand the theoretical, empirical, and philosophical bases for nursing practice; provide leadership to the profession; and interpret nursing to society. The DNP-to-PhD program prepares graduates for these purposes for those who previously earned a DNP degree. The advanced practice or leadership cognate area from the DNP program serves as the “emphasis area” for the DNP-to-PhD program. Additional content provided in the PhD program is focused on statistics, theory, data science, or precision health, research methods, grant writing, and conduct of research, (i.e., skills essential to the research doctorate). The DNP-to-PhD program focuses on preparing the graduate for conducting independent and collaborative research for nursing science. DNP-PhD students complete 27 credit hours of coursework and 15 dissertation credit hours.

Eligibility and Requirements

1. Completion of a Doctor of Nursing Practice degree from a nationally accredited (NLNAC or CCNE) program.

2. Current registered nurse licensure in at least one state in the U.S.

3. Minimum cumulative graduate grade point average (GPA) of 3.0 on a 4.0 scale. Preference is given to applicants with a 3.25 GPA in the DNP program.

4. Potential for leadership and scholarship in nursing.
Program is fully accredited by the CCNE and DNP APRN specialties also are approved by the body for collegiate nursing programs. The baccalaureate program, APRN (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing education. Nursing practice (DNP) programs are accredited by the Commission for Collegiate Nursing Education. All DNP graduates must have completed at least 1,000 hours of supervised, post-baccalaureate, practice experiences. Graduates of the DNP program provide patient-centered care that is evidence-based, contribute to the development of evidence-based practice, and pursue leadership roles in a variety of health care and educational settings. All DNP graduates must have completed at least 1,000 hours of supervised, post-baccalaureate, practice experiences.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree prepares graduates for nursing practice at the highest level. The DNP offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic and demanding health care field. Skills in collaboration, innovation, and evaluation — complemented by advanced nursing practice skills — prepare nurses to shape the future of health care. Graduates of the DNP program provide patient-centered care that is evidence-based, contribute to the development of evidence-based practice, and pursue leadership roles in a variety of health care and educational settings. All DNP graduates must have completed at least 1,000 hours of supervised, post-baccalaureate, practice experiences.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/) (CCNE), 655 K Street NW, Suite 750, Washington, DC, 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate program, APRN certificates, and DNP APRN specialties also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (http://www.midwife.org/Program-Accreditation/) (ACME), 8403 Colesville Rd., Suite 1550, Silver Spring, MD, 20910, (240) 485-1800.

DNP Admission

New students are accepted to the DNP degree program once a year, for study that begins during the summer semester. The application deadline is January 1st for admission the following summer (June). Prospective students can apply using the KU Medical Center online application (https://gograd.ku.edu/apply/?sr=ca7d45b3-1f3c-471c-89d2-5abe042c93bb).

DNP Program Admission Criteria

1. Completion of a Bachelor of Science in Nursing (BSN) degree (for BSN to DNP), or completion of a nursing Master of Science (MS) degree (for post-master's DNP) from a nationally accredited (NLNAC or CCNE) program
2. Minimum cumulative undergraduate GPA of 3.0 for BSN-DNP application; for post-master's DNP, preference is given to applicants with a 3.25 graduate GPA in the master's program
3. Potential for leadership and application of scholarship in nursing
4. Potential to provide expert advanced clinical care or expert service in functional areas
5. New BSN graduates must obtain RN licensure prior to the first fall semester of enrollment
6. Minimum of one year of clinical work experience as a registered nurse is recommended
7. National certification in specialty area, where applicable (e.g., post-master's Advanced Practice DNP)
8. A graduate-level statistics course (may be completed prior to admission or during first semester of enrollment)
9. A background check and drug screen are required during the admission process and may affect the student's eligibility to enter the program

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the IELTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

Post-Baccalaureate DNP Degree Requirements

The post-baccalaureate DNP curriculum is designed for registered nurses who have completed a Bachelor of Science in Nursing (BSN) degree. The program for these students is divided into two components. The first consists of courses focusing on initial preparation for advanced nursing practice in clinically-focused or leadership-focused roles. The second component includes courses for doctoral level preparation for advanced nursing practice in clinically-focused or leadership-focused roles.

Advanced-Practice Major

The advanced-practice nursing major prepares nurses for nurse practitioner or nurse-midwifery specialty areas.
• **The nurse practitioner specialization** prepares nurses to provide primary or acute (depending on specialization) health care to clients and families across the life span. Adult/gerontology acute care nurse practitioner, Adult/gerontology primary care nurse practitioner, Family nurse practitioner, and Psychiatric/mental health nurse practitioner options are available. The nurse practitioner is prepared to provide health care in a variety of settings. (75-79 credit hours)
• **The nurse-midwife specialization** focuses on the support and management of well-women's primary and reproductive health care needs through the life span. (76 credit hours)

### Leadership Major
The leadership major prepares nurses for leadership roles in **health informatics** (73 credit hours), **organizational leadership** (74 credit hours), or **public health nursing** (75 credit hours).

### Curriculum
The post-baccalaureate (BSN) DNP program requires the following:

- 30 credit hours of post-baccalaureate Common Core and DNP core courses, which includes 1 credit hour DNP Synthesis Workshop course
- A minimum of 6 credit hours of doctoral practice project
- 12-17 credit hours of Advanced-Practice or Leadership core
- 12-24 credit hours of specialization courses
- 2-8 credit hours of specialty area support and practicum courses
- Satisfactory completion of the DNP oral comprehensive exam
- Satisfactory completion of the University's research skills and responsible scholarship requirement

Total required DNP program credit hours vary from 73 to 79, depending on the specialization. Although curricular changes occur, examples of core courses include:

### Common Core (Post-BSN)

### Nurse-Midwife Specialty Core
Post-Master's DNP Degree Requirements

The post-master's DNP curriculum is designed for nurses who have already earned a nursing Master of Science degree. The DNP degree allows nurses to serve at a higher level as an advanced practice nurse or leader in their specialty. Two majors are offered in the post-master's DNP program: 1) Advanced-Practice and 2) Leadership. A minimum of 32 credit hours is required for the post-master's DNP. Depending on curricular background, some specialty specific courses are required. For example, IPHI 957 and IPHI 958 are required for students with a specialty background in informatics.

- 19 credit hours of post-master’s DNP core courses. Although curricular changes may occur, examples of core courses include:

  • Advanced-Practice

nurses are cardiopulmonary resuscitation, administration of intravenous to patients. Examples of emergency treatment reasonably required of reasonably required to provide general care and emergency treatment and other diagnostic maneuvers. Applicants should be physically able to elicit information from patients by palpation, auscultation, percussion, C. Psychomotor: perceive nonverbal communications. elicit information, describe changes in mood, activity and posture, and staff, faculty and staff, peers, and the community in general in order to Applicants must be able to communicate accurately and effectively with reading, writing, and computer usage, including handheld digital access. B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings. B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications. C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individual may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

For further information, visit the Doctor of Nursing Practice section of the School of Nursing’s website (https://www.kumc.edu/school-of-nursing/academics/degree-programs/doctor-of-nursing-practice.html).
**Nursing and Interprofessional Certificate Programs**

The School of Nursing offers several post-graduate Nursing Certificate programs in Advanced Practice. In addition, two post-baccalaureate Interprofessional certificates are offered: Health Informatics and Health Professions Educator. Select the program link below for detailed information on admission and certificate requirements for each certificate option.

**Advanced Practice Post-Graduate Certificate Programs**

The advanced practice clinical certificates programs require that applicants have completed an advanced practice registered nurse (APRN) educational program from a nationally accredited school of nursing. Applicants must also have completed the following advanced practice prerequisite courses (either as part of their previous graduate degree or as post-graduate study through an accredited university): advanced health assessment, advanced pathophysiology, advanced pharmacology, and health promotion.

The **Adult/Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate** (19 credit hours) is designed to provide APRNs who have a baseline preparation in primary care with an opportunity for additional training in acute care, as part of an interprofessional healthcare team. The curriculum includes core concepts of the advanced practice nursing role in acute care settings, expanded models of acute care, care transitions, and age-related considerations of the adult/gerontology patient in acute care. The role of the AGACNP may include episodic management of a patient in a clinical specialty unit, following a caseload of patients during a hospitalization, or caring for patients across the acute care continuum.

Required didactic courses are offered online. Practicum courses NRSG 975, NRSG 976, and NRSG 977 use on-campus, face-to-face clinical learning experiences, with clinical placement opportunities in diverse acute care environments, which may include the University of Kansas Health System. Simulation spaces on the KU Medical Center campus are used for skills training. Application deadline is April 1 for Summer semester. The AGACNP Certificate is not offered for the 2023-2024 admission cycle.

The **Adult/Gerontology Primary Care Nurse Practitioner (AGPCNP) Certificate** (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary care to a diverse population of adults. The Adult/Gerontology Primary Care Nurse Practitioner focuses on assessment and management of common acute and chronic health care problems of adult and older adult patients in a primary care setting. A variety of practice settings are used: primary care or internal medicine clinics; occupational health clinics; home based care; long-term, assisted living or post-acute care; rural health clinics; and other sites serving adults and older adults.

Required didactic courses are offered online. Practicum courses NRSG 903, NRSG 904, and NRSG 905 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. The AGPCNP Certificate is not offered for the 2023-2024 admission cycle.

The **Family Nurse Practitioner (FNP) Certificate** (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary health care to clients and families across the lifespan. Family Nurse Practitioners provide comprehensive health promotion services to ambulatory clients; evaluate presenting problems at the client’s initial contact with the primary care system; and continuing care to clients with acute and stable chronic illnesses.

Required didactic courses are offered online. Practicum courses NRSG 916, NRSG 917 and NRSG 918 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. Application deadline is June 1 for Fall semester.

The **Health Systems Leadership Certificate** (14 credit hours) program prepares health professionals with skills in financial management, human resource management, performance improvement, systems thinking, strategic management, relational leadership, and personal and professional accountability. Students may complete the Health Systems Leadership Certificate as a licensed professional with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All courses are online.

The **Population Health Nursing Certificate** (13 credit hours) is a program that prepares nurses with skills in health promotion of a target population, clinical and translational applications of epidemiology, global perspectives of healthcare, change leadership, and policy analysis. Students may complete the Population Health Nursing Certificate as a licensed professional with a nursing degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All courses are online.

The **Psychiatric/Mental Health Nurse Practitioner (PMHNP) Certificate** (24 credit hours) prepares advanced practice nurses to diagnose and treat common mental health conditions in general medical settings and to deliver effective psychiatric care in mental health settings. Students are prepared to apply knowledge and skills in interpersonal, psychotherapeutic, and psychopharmacologic interventions for individuals, groups, and families with psychiatric disorders. All courses are online and offered in sequence every other year. Spring 2024 starts the next available course sequence. Application deadline is November 1 for Spring semester.

The **Nurse-Midwife Certificate** (23 credit hours) prepares advanced practice nurses to focus on the care and management of well women’s primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus. Required didactic courses are offered online. Practicum courses NRSG 925, NRSG 926, NRSG 927, and NRSG 928 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops, simulation experiences, and Standardized Patient exams. The next available sequence begins Fall 2024. The application deadline is June 1.

**Interprofessional Certificate Programs**

The **Health Informatics Certificate** (17 credit hours) is an interprofessional program designed to prepare clinicians and health care professionals with skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. The graduate will be prepared for entry and mid-level positions within informatics departments, and as consultants and/or staff in organizations specializing in electronic health systems and
knowledge management. A baccalaureate degree in any area is required and previous health care experience is preferred, but not required. All classes are offered online.

The Health Professions Educator Certificate (12 credit hours) is an interprofessional program that affords broad opportunities and necessary skills to develop healthcare education expertise in various roles within academic and clinical settings. Students complete applied teaching projects in each educator course, including a final student teaching capstone. Students may complete the Health Professions Educator Certificate as a post-baccalaureate student with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All required didactic courses are online. Practicum courses typically require in-person attendance at the practicum sites.

**Adult/Gerontology Acute Care Nurse Practitioner Certificate**

The Adult/Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate (19 credit hours) is designed to provide APRNs who have a baseline preparation in primary care with an opportunity for additional training in acute care, as part of an interprofessional healthcare team. The curriculum includes core concepts of the advanced practice nursing role in acute care settings, expanded models of acute care, care transitions, and age-related considerations of the adult-gerontology patient in acute care. The role of the AGACNP may include episodic management of a patient in a clinical specialty unit, following a caseload of patients during a hospitalization, or caring for patients across the acute care continuum.

Required didactic courses are offered online. Practicum courses NRSG 975, NRSG 976, and NRSG 977 use on-campus, face-to-face clinical learning experiences, with clinical placement opportunities within the University of Kansas Health System. Simulation spaces on the KU Medical Center campus are used for skills training. Application deadline is April 1 for Summer semester. The AGACNP Certificate is not offered for the 2023-2024 admission cycle.

Application for the Adult/Gerontology Acute Care Nurse Practitioner Graduate Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). The courses are offered in sequence beginning with the Summer semester. Application deadline: April 1 for Summer semester.

**Admission requirements:**

- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Official transcripts from all course work taken at any institution are required
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

**English Language Requirements:** All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

The Adult/Gerontology Acute Care Nurse Practitioner Certificate requires completion of at least 19 credit hours of required coursework, earning at least a 3.0 (i.e., B equivalent) on a 4.0 GPA scale.

**Certificate requirements:**

- Certificate requirements are normally completed within two years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively
- Successful completion of the following courses:

**Code** | **Title** | **Hours**
--- | --- | ---
NRSG 971 | Special Considerations for the Acute Care Nurse Practitioner | 1
NRSG 972 | Advanced Pharmacology for the Acute Care Setting | 2
NRSG 973 | Acute Care I: Adult-Gero NP | 3
NRSG 974 | Acute Care II: Adult-Gero NP | 3

NRSG 976 | Acute Care Practicum II: Adult-Gero NP | 2-4
NRSG 977 | Acute Care Practicum III: Adult-Gero NP | 2-4

**TECHNICAL STANDARDS FOR ADMISSION**

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards
A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the rigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Admission requirements:

• Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
• Official transcripts from all course work taken at any institution are required
• Current registered nurse licensure in at least one state in the United States
• Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale
• Potential to provide expert service and leadership in functional area
• Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

**English Language Requirements:** All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

**Certificate requirements:**

• Certificate requirements are normally completed within two years of admission to the program although a maximum of four years is allowed
• Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
• Enrollment in a minimum of one credit hour the semester program is completed
• Graduate certificates may not be granted retroactively
• Successful completion of the following courses:

**TECHNICAL STANDARDS FOR ADMISSION**

**University of Kansas School of Nursing**

**I. Introduction**

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

**II. Standards**

**A. Observation/Sensory-motor:** Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

**B. Communication:** Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

**C. Psychomotor:** Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

**D. Intellectual-Conceptual, Integrative, and Quantitative:** Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

**E. Behavioral and Social Attributes:** Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes.
The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Family Nurse Practitioner Certificate

The program prepares advanced practice nurses to add expertise in the role of Family Nurse Practitioner (FNP), a clinician who provides primary care in collaboration with other professionals to support health care for individuals, families, and communities. Students acquire knowledge, skills, and competencies for FNP practice, to manage primary health care needs of clients and families throughout the life span. The certificate courses include primary care theory courses, practice-focused clinical courses, and an intensive preceptorship experience. Courses are offered online and on the KU Medical Center campus, with precepted experiences in various community-based settings.

Required didactic courses are offered online. Practicum courses NRSG 916, NRSG 917, and NRSG 918 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams.

The Family Nurse Practitioner Certificate program requires that students have completed an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited school of nursing. Three separate, comprehensive graduate-level courses in advanced pathophysiology, advanced assessment, and advanced pharmacology are required.

The annual application deadline is June 1 for the Fall semester.

Admission requirements:

- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Official transcripts from all course work taken at any institution are required
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

Certificate requirements:

- Certificate requirements are normally completed within two years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively
- Successful completion of the following courses:

TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/
evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Health Informatics Certificate

Emerging technologies are fundamentally changing the way we manage and apply knowledge. In addition, healthcare organizations must meet the challenges of the HITECH Act and HIPAA, as well as regulatory influences. As a result, the need for trained healthcare informaticians has increased dramatically over the last few years. In order to appropriately select and use technology to improve healthcare and to meet the requirements of regulating bodies, health informatics professionals need training in the use of informatics concepts and methodologies.

The advantage of this certificate program is that it offers an interprofessional learning experience and is open to graduates in all fields. This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html), which is sponsored by the School of Nursing.

Approved as a Stackable Program: To encourage career and academic progression, students who have completed the Health Informatics Certificate may apply the courses towards the degree requirements for the Master of Science in Health Informatics.

The application process for the Health Informatics Certificate program is an online process. Detailed instructions on how to apply are posted on the Center for Health Informatics (https://www.kumc.edu/health-informatics.html) website. Students are admitted for the fall and spring
semesters only. Applications for the fall semester must be received by April 1st and by September 1st for the spring semester.

**Admission Requirements:**
- A bachelor's or master's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended are required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants, who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement ([https://catalog.ku.edu/graduate-studies/kumc/#EnglishProficiencyRequirement](https://catalog.ku.edu/graduate-studies/kumc/#EnglishProficiencyRequirement)).
- A background check ([https://catalog.ku.edu/graduate-studies/kumc/#BackgroundCheck](https://catalog.ku.edu/graduate-studies/kumc/#BackgroundCheck)) is required during the admission process; it may affect the student's eligibility to enter the program.
- Three letters of recommendation from individuals who can assess your academic and professional background and potential for success in a graduate-level certificate program.
- A personal statement regarding applicant's career objectives and purpose.
- A current resume or curriculum vitae.
- A satisfactory phone or in-person interview.

Applicants will be assessed on the above criteria and selected applicants will be in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application. Admission requirements are subject to change. In most cases, use the catalog ([http://catalog.ku.edu/archives/](http://catalog.ku.edu/archives/)) of the year student entered the program.

**Certificate Program Information:** (p. 2466)
Certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a certificate program.

The certificate program is not a means of entry into a graduate degree program. If students admitted to a certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Graduate credit from another institution may not be transferred to a certificate program.

The graduate certificate program focuses on the theory and application of informatics, computer technology, knowledge management, and evidence-based practice that supports healthcare informatics and clinical decision-making. The program culminates with a mentored practicum experience and project.

**Health Informatics Certificate**

**Certificate requirements:**
- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the program is completed. Graduate certificates may not be granted retroactively.
- Successful completion of a minimum of 17-18 credit hours.
- Successful completion of the following courses:

<table>

**Total Hours**: 17-18

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog ([http://catalog.ku.edu/archives/](http://catalog.ku.edu/archives/)) of the year student entered the program.
Healthcare Informatics Certificate

Effective Fall 2019, the Healthcare Informatics Certificate will no longer be accepting applications. Please apply to the Health Informatics Certificate program listed above.

Certificate requirements:

- Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework.
- Students must be enrolled in a minimum of 1 credit during their graduation semester. Certificates may not be granted retroactively.
- Successful completion of the following online courses:

<table>

Typical Plan of Study

The Health Informatics Certificate program consists of 19 credit hours. The 3-credit hour practicum (IPHI 856) requires a total of 200 clock hours and may be taken only after the majority of coursework is complete. This practicum may be taken over 1-3 consecutive semesters and must include the last semester in the program.

PharmD students who are concurrently completing the Health Informatics Certificate program will take IPHI 858: Health Informatics Practicum for Pharmacy instead of IPHI 856.

TECHNICAL STANDARDS FOR ADMISSION

The Master of Science in Health Informatics degree and the graduate Health Informatics Certificate signify that the holder is prepared for entry into the practice of applied health informatics. Therefore, it follows that graduates must have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students with or without accommodations admitted to the program.

1. **Observation:** Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication:** Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.

3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include field work in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem-solving abilities:** An applicant must be able to understand and learn factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

**NOTE:** Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.
Health Professions Educator Certificate

The Health Professions Educator Graduate Certificate (12 credit hours) is an interprofessional program that affords broad opportunities and necessary skills to develop healthcare education expertise in various roles within academic and clinical settings. Students complete applied teaching projects in each educator course, including a final student teaching capstone.

Students may complete the Health Professions Educator Certificate as a post-baccalaureate student with a health-related degree, as a postgraduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All required didactic courses are online.

Approved as a Stackable Program: To encourage career and academic progression, students who have completed the Health Professions Educator Certificate may apply the four certificate courses (NRSG 870, NRSG 871, NRSG 873, NRSG 874) towards degree requirements for the Master of Science in Nursing, Nursing Education specialty area.

Application for the Health Professions Educator Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). Application deadlines: June 1 for Fall semester; April 1 for Summer semester; November 1 for Spring semester.

Admission requirements:

- Baccalaureate degree or higher in nursing or other health related discipline.
- Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Application will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which the applicant must submit a new application.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

Certificate requirements:

- Certificate requirements are normally completed within one to two years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed

- Graduate certificates may not be granted retroactively
- Successful completion of the following online courses:

TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.
D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified as long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Health Systems Leadership Certificate

The Health Systems Leadership Certificate (14 credit hours) program prepares health professionals with skills in financial management, human resource management, performance improvement, systems thinking, strategic management, relational leadership, and personal and professional accountability.

Students may complete the Health Systems Leadership Certificate as a licensed professional with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All courses are online.

Approved as a Stackable Program: To encourage career and academic progression, students who have completed the Health Systems Leadership Certificate may apply the five certificate courses (NRSG 860, NRSG 861, NRSG 883, NRSG 885, NRSG 891) towards degree requirements for the Master of Science in Nursing or Doctor of Nursing Practice, Organizational Leadership specialty area.

Application for the Health Systems Leadership Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). Application deadlines: June 1 for Fall semester; April 1 for Summer semester; November 1 for Spring semester.

ADMISSION REQUIREMENTS:

• Baccalaureate degree or higher in nursing or other health related discipline.
• Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
• Potential to provide expert service and leadership in functional area
• Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

CERTIFICATE REQUIREMENTS:

• Certificate requirements are typically completed within one to two years of admission to the program although a maximum of four years is allowed
• Cumulative grade-point average (GPA) of at least 3.0 for all graduate certificate coursework
• Enrollment in a minimum of one credit hour during the semester program is completed
• Graduate certificates may not be granted retroactively
• Successful completion of the following courses:

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.
Nurse-Midwifery Certificate

The Nurse-Midwifery Graduate Certificate program (23 credit hours) prepares advanced practice nurses to focus on the care and management of well women's primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus.

The next available sequence begins Fall 2024. The application deadline is June 1.

The application for the Nurse-Midwifery Graduate Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). The courses are offered online in sequence beginning with the Fall semester. Application deadline: June 1 for Fall semester.

Admission requirements:

- Completion of an advanced practice registered nurse educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
- Official transcripts from all course work taken at any institution are required
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2454) in the Graduate Studies section of the online catalog.

Certificate requirements:

- Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed

- Graduate certificates may not be granted retroactively
- Successful completion of the following courses:

In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion,
III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Population Health Nursing Certificate

The Population Health Nursing Certificate (13 credit hours) is a program that prepares nurses with skills in health promotion of a target population, clinical and translational applications of epidemiology, global perspectives of healthcare, change leadership, and policy analysis.

Students may complete the Population Health Nursing Certificate as a licensed professional with a nursing degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All courses are online.

Approved as a Stackable Program: To encourage career and academic progression, students who have completed the Population Health Nursing Certificate may apply the five certificate courses (NRSG 808, NRSG 809, NRSG 811, NRSG 826, NRSG 880) towards degree requirements for the Master of Science or Doctor of Nursing Practice, Public Health Nursing specialty area. Those admitted without a baccalaureate degree in nursing are not eligible for the stackable option.

Application for the Population Health Nursing Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). Application deadlines: June 1 for Fall semester; April 1 for Summer semester; November 1 for Spring semester.

ADMISSION REQUIREMENTS:

• Baccalaureate degree or higher in nursing or other health related discipline
• Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
• Potential to provide expert service and leadership in functional area
• Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility
staff, faculty and staff, peers, and the community in general in order to
elicit information, describe changes in mood, activity and posture, and
perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to
elicit information from patients by palpation, auscultation, percussion,
and other diagnostic maneuvers. Applicants should be physically able to
collect specimens and perform basic tests (such as glucose finger stick,
urine dipstick). Applicants should be able to execute motor movements
reasonably required to provide general care and emergency treatment
to patients. Examples of emergency treatment reasonably required of
nurses are cardiopulmonary resuscitation, administration of intravenous
medication, application of pressure to stop bleeding, and assist in moving
and lifting patients using proper body mechanics. Such actions require
coordination of both gross and fine muscular movements, equilibrium and
using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants
must be able to comprehend and interpret documents written in English.
Applicants should have cognitive abilities including measurements,
calculation, reasoning, analysis, and synthesis. Critical thinking is the
ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies.
Problem solving, the critical skill demanded of nurses, requires all of
these intellectual abilities. In addition, the applicant should be able to
comprehend three dimensional relationships and to understand the spatial
relationships of structures in order to understand normal and abnormal
anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the
emotional health required to utilize their intellectual abilities fully, exercise
good judgment, complete all responsibilities attendant to the nursing
diagnosis and care of patients promptly, and the development of mature,
sensitive and effective relationships with patients and their families.
Applicants must be able to tolerate physically taxing workloads and to
function effectively under stress. They must be able to adapt to changing
environments, to display flexibility, and to learn to function in the face
of uncertainties inherent in the clinical problems of many patients.
Compassion, integrity, concern for others, interpersonal communication
skills, interest and motivation are all personal qualities that should be
assessed during the admissions and education process. As a component
of nursing education, a student must demonstrate ethical behavior
including adherence to the professional nursing and student honor codes.
The honor code at the KU School of Nursing is the Professional Integrity
System (PROFITS). KU PROFITS is a peer-oriented integrity system
to promote an environment where academic honesty is valued and
expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they
are otherwise qualified so long as such accommodation does not
significantly alter the essential requirements of the curriculum and the
educational program, or significantly affect the safety of patient care or
others. When applicants or students disclose a disability, the provision
of reasonable accommodations will be considered in an attempt to
assist these individuals in meeting these required technical standards.
Applicants whose response indicates that they cannot meet one or more
of the expectations will be reviewed further by the University’s Office for
Academic Accommodations, with applicant and faculty input, to determine
if any reasonable accommodations are possible to facilitate successful
completion of the nursing curriculum and preparation for the national
registry examination.

It is important to give persons interested in enrolling in nursing a realistic
view of the vigorous demands of the School of Nursing’s theoretical and
practicum curriculum while at the same time investigating reasonable
accommodations. Whether or not a requested accommodation is
reasonable will be determined on a case by case basis. Interested
individuals may schedule an orientation visit to the nursing skills
laboratory and actual sites of the University of Kansas Hospital and/or
University of Kansas Medical Center. These orientation visits enable
persons to assess their interest and ability to function in the actual clinical
areas and in learning and demonstrating manual skills.

Master of Science in Health Informatics

Professionals in applied Health Informatics have skills in analysis,
design, implementation, and evaluation of information systems that
support a full range of clinical and patient care functions. Graduates
will be prepared for entry and mid-level positions with hospital or clinic
informatics departments, electronic health record (EHR) vendors, public
health organizations, and as consultants and/or staff in organizations
that specialize in knowledge management. Graduates also have the
skills to enter the growing field of health information exchange, which
includes regional health information organizations and the emerging
personal health records. In addition to a foundation in applied health
informatics, special skills will be acquired in organizational change, project
management and impact evaluation.

This is an interprofessional program administered by the Center for
Health Informatics (http://www.kumc.edu/health-informatics.html), which is
sponsored by the School of Nursing.

The application process is an online process. Detailed instructions on
how to apply and the application deadlines are posted on the Master
of Science in Health Informatics (https://www.kumc.edu/research/
center-for-health-informatics/academic-requirements.html) website.

Admission requirements:

- A bachelor’s degree from a regionally accredited institution
documented by submission of official transcript indicating the
degree has been conferred before entering the program. Official
transcripts from institutions attended post-baccalaureate are
also required. Students with degrees from outside the U.S.
may be subject to transcript evaluation indicating the degree is
equivalent to a U.S. degree and meets the minimum cumulative
GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a
4.0 scale.
- Applicants who are not native speakers of English, whether
domestic or international, must demonstrate they meet
the Minimum English Proficiency Requirement (https://
www.kumc.edu/academic-and-student-affairs/departments/
office-of-international-programs/inbound-programs/information-
for-students/academic-english-requirements.html).
- A current resume or curriculum vitae.
- A personal essay outlining the applicant’s reasons for wanting
to pursue graduate education in health informatics, career...
objectives, and any other information that would help the admissions committee get to know the applicant.

- Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant's academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A background check (https://www.kumc.edu/academic-and-student-affairs/student-resources/criminal-background-checks-for-students.html) is required during the admission process; it may affect the student's eligibility to enter the program.
- A graduate level statistics course (may be completed prior to admission or during the first semester of enrollment.)

After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

**International Students**

Due to the number of required online courses for this degree, the Health Informatics Program at KUMC does not meet the U.S. student visa requirements at this time. Therefore, we are unable to accept individuals who are on student visas. If you are in the U.S. on another type of visa, please contact SONinfo@kumc.edu for additional application requirements.

Admission requirements are subject to change. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

Master of Science in Health Informatics (MSHI) students complete courses in health informatics, leadership, and in one of the following focus areas: clinical leadership, health policy and management, public health, project management, or telehealth. The student and advisor will work closely together to develop a plan of study that meets the career goals of the student.

**Degree requirements:**

- Degree requirements can be completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 3 years of admission to the program.
- Completion of a minimum of 35 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a general examination (https://catalog.ku.edu/graduate-studies/kumc/#ThesisDefense) the semester the student will graduate.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.
- Successful completion of the Health Informatics courses (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.

Total Hours 35

**Dual Degree: Doctor of Pharmacy & Master of Science in Health Informatics**

This dual degree program combines the Master of Science in Health Informatics (MSHI) with the Doctor of Pharmacy (PharmD) and is designed particularly for those students intending to pursue opportunities in pharmacy informatics. Students accepted into the dual MSHI/PharmD program concurrently enroll in both programs and can start MSHI courses as early as the spring of the P2 year. Providing that prerequisites are met, the HI practicum will satisfy 1 of 9 required advanced pharmacy practice experiences (APPEs). A Health Informatics comprehensive oral examination occurs during the last semester of enrollment in the MSHI program. Admission to this program is restricted to students currently in the KU PharmD program.

**TECHNICAL STANDARDS FOR ADMISSION**

Center for Health Informatics

The Master of Science in Health Informatics degree and Graduate Certificate signify that the holder is prepared for entry into the practice of applied health informatics. Therefore, it follows that graduates must have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students with or without accommodations admitted to the program.

1. **Observation:** Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication:** Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.

3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include field work in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem-solving abilities:** An applicant must be able to understand and learn
factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University's Office for Academic Accommodations.
Pharmacy

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details). Other years' catalogs (http://catalog.ku.edu/archives/)»

The School of Pharmacy

Since its founding in 1885, the University of Kansas School of Pharmacy (http://pharmacy.ku.edu/) has been a leader in pharmacy education. Since 1996, the school has only offered the Doctor of Pharmacy degree as the entry-level practice degree. The curriculum gives the student the knowledge, skills, and ability required of the pharmacy practitioner; it is comprehensive and produces a highly competent general practitioner.

Approximately 65 full-time faculty members teach in the undergraduate professional Doctor of Pharmacy and graduate programs. Three departments (Pharmacology and Toxicology, Medicinal Chemistry, and Pharmaceutical Chemistry) offer Master of Science and Doctor of Philosophy degrees. The Department of Pharmacy Practice offers the master’s degree.

Both the undergraduate and graduate divisions have outstanding national and international reputations based on the excellence and productivity of the faculty. KU is consistently ranked in the top 5 among colleges/schools of pharmacy that receive National Institutes of Health research funding. KU’s School of Pharmacy was awarded more than $11 million in research grants and contracts from the NIH in fiscal year 2017.

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (https://www.acpe-accredit.org/), 190 S. LaSalle St, Suite 2850, Chicago, IL 60603-4810, (312) 664-3575, info@acpe-accredit.org, the official accrediting body for American schools of pharmacy.

Professional Program

The School of Pharmacy offers a 6-year Doctor of Pharmacy (p. 2336) program. The 2-year pre-pharmacy portion of the program may be taken at any accredited 2- or 4-year college.

After acceptance into the School of Pharmacy students complete the first 2 years of the Doctor of Pharmacy professional degree program (3rd and 4th year of college) are then awarded a Bachelor of Science in Pharmaceutical Studies (BSPS). Students must then go on to complete the remaining 5th and 6th professional years to be awarded the Doctor of Pharmacy (Pharm.D.) degree, which makes them eligible to sit for licensure examinations (NAPLEX and MPJE). These degree programs are available to students on both the Lawrence and Wichita campuses.

University Honors Program

The school encourages qualified students entering KU as freshman to participate in the University Honors Program (http://www.honors.ku.edu/).

Graduate Programs

The School of Pharmacy offers graduate programs through the departments of

- Medicinal Chemistry (p. 2339),
- Pharmaceutical Chemistry (p. 2345),
- Pharmacology and Toxicology (p. 2352), and
- Pharmacy Practice (p. 2357).

The Department of Pharmacy Practice offers the Master of Science degree. The other 3 departments offer both the M.S. and the Ph.D. with majors in their respective disciplines. Programs in Neurosciences (p. 2343) are offered in cooperation with KU Medical Center.

Requirements for admission and baccalaureate preparation vary with each department and are discussed separately. Address inquiries and correspondence about graduate studies to the program or department of interest.

Undergraduate Scholarships and Financial Aid

Financial Aid and Scholarships (https://financialaid.ku.edu), located at the KU Visitor Center at 1502 Iowa St, Lawrence, KS 66045-7518, 785-864-4700, financialaid@ku.edu, administers grants, loans, and other need-based financial aid. In recent years, about $29 million has been processed annually through the office, including about $2 million annually in short-term loans. Prospective students should contact Financial Aid and Scholarships. Some financial aid programs have application deadlines as early as January 15. The earlier an application is received and the student’s file is completed, the better the chance of obtaining financial aid.

For information about scholarships from KU and various outside agencies based on academic merit, diversity, major, and residence, visit Scholarship Information for KU Students (https://financialaid.ku.edu/ understand-aid/scholarships/).
School of Pharmacy Financial Aid
The School of Pharmacy, in cooperation with Financial Aid and Scholarships (https://financialaid.ku.edu), offers financial assistance to pharmacy students. Applications are received in the dean’s office according to an announced schedule each year. Awards are based on merit and need. Assistance is available for both entering and continuing students.

Graduate Fellowships and Assistantships
For information about graduate assistantships, contact the School of Pharmacy (http://pharmacy.ku.edu/). Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU. Financial Aid and Scholarships (https://financialaid.ku.edu) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations
For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Misconduct
Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct/) and Faculty Senate Rules and Regulations (http://policy.ku.edu/governance/USRIR/).

Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor’s department, or if necessary, an associate dean. The chair or dean brings the matter to the instructor’s attention, preserving the student’s anonymity, if so requested.

Credit/No Credit
A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one pre-pharmacy course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (http://www.policy.ku.edu/). All professional coursework is graded. Warning: Undesirable consequences regarding admission may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Exemptions and Petitions
A student may gain an exemption or academic credit from introductory pre-pharmacy courses by successfully completing the Advanced Placement or College Level Examination Program examinations or by other recognized means. A total of 208 credit hours of college-level course work is still required for the PharmD degree. In meritorious cases, the department offering a specific course may waive course prerequisites. Students whose educational goals would be better served by courses other than those prescribed in the normal curriculum may petition the admissions and/or curriculum committee(s) for permission to make appropriate course substitutions.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.

Health Insurance and Immunizations
The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

Honor Roll
Students with grade-point averages of 3.5 who have completed at least 12 professional hours are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Maximum Community College Credit Allowed
The School of Pharmacy allows a maximum of 68 credit hours from any accredited college or university toward completion of the PharmD degree prerequisites. All professional coursework must be completed at a college or school of pharmacy that is accredited by ACPE. To graduate from KU School of Pharmacy, all P3 and P4 coursework and rotations (APPEs) must be completed at KU.

Prerequisites and Corequisites
In meritorious cases, course prerequisites may be waived by the department offering the course. Waiver is not granted if the prerequisite course was taken and failed.

Probation

Probation
A student will be placed on academic probation if they:
1. fail to attain a 2.5 grade point average of professional coursework in any semester, or whose overall professional course grade-point average falls below 2.5.
   a. A student falling below the minimum grade point average of 2.5 will be required to develop and submit an individualized remediation plan to their Academic Faculty Advisor and the Chair of the Academic Standings committee.
2. fail an introductory or advanced pharmacy practice experience.
   a. A student failing either an IPPE or APPE will be required to develop an individualized remediation plan with the Assistant Dean for Experiential Education and the Associate Deans for Administration and Academic Affairs.
3. fails two or more milestone exams within the six-semester pharmacy skills laboratory curriculum.
4. fails to comply with programmatic requirements in a timely manner (see the pharmacy student handbook (http://policy.ku.edu/pharmacy/student-handbook/)).
Suspension
A student who fails or does not make timely progress in a course or courses while a student in the School of Pharmacy may be placed on suspension. Additionally, a student who fails to comply with the School conduct policy, or academic and/or programmatic requirements may be placed on suspension.

Dismissal
Students will be dismissed from school if they:
1. fail to attain a 2.5 grade-point-average in all courses or in professional courses for any semester while on probation.
2. receive a grade of “F” in 40 percent or more of the credit hours taken during any semester (including semesters in which they are enrolled in only one course).
3. fail an individual course twice.
4. fail two advanced pharmacy practice experiences (APPEs).
5. they fail a milestone exam within the six-semester pharmacy skills laboratory curriculum while on probation as a result of prior milestone failure or academic poor performance (i.e. professional GPA <2.5)
6. are placed on probation or suspended for a second academic semester for failure to comply with programmatic requirements.

Petitions
Students dismissed for poor scholarship may file a written petition with the academic standing committee for reinstatement. The committee’s decision is final. The committee normally takes one of the following actions:
1. The student is allowed to enroll, often with specific recommendations regarding strategies for restoring good academic standing.
2. The committee may deny the petition.

Courses Taken Outside the School
Students on probation or in nondegree-student status may take courses outside the School of Pharmacy, or at other institutions, to improve the grade-point average. Prior approval is required, and in general, only courses that count toward graduation are honored. All professional coursework must be completed at a college or school of pharmacy that is accredited by ACPE.

Return to Good Standing
Students will return to good standing when the overall pharmacy grade point average reaches 2.5. Students are required to be in good standing (i.e. GPA of 2.5 or higher) to be eligible to enroll and participate in advanced pharmacy practice experiences. If a student who was placed on academic probation due to milestone exam failure passes all the milestone exams during the subsequent semester they will be removed from probation (only if their professional GPA is also at or above 2.5).
1. Students with professional GPAs at or above 2.5 who are on academic probation due to milestone failure(s) at the end of their P3 spring will be required to complete a remediation rotation with a faculty member, preferably in a practice setting similar to the milestone failure. These students will need to pass the remediation rotation in order to start in their required 9 APPE rotations.
2. Courses taken outside the School: Only courses completed within an ACPE accredited institution may be used to increase a student’s professional GPA. Authorization to complete or use non-KU School of Pharmacy professional coursework requires prior Curriculum Committee approval. Credit for coursework completed as part of a dual degree (e.g. MBA, MSCR, etc), academic minors (e.g. business, etc), or other coursework outside the School of Pharmacy are not included in GPA calculations to determine a student’s academic standing or eligibility for progression to the P4 year.

Required Work in Residence
To be eligible for the Doctor of Pharmacy degree, all P3 and P4 coursework and rotations (APPEs) must be completed in residence at the KU School of Pharmacy

Terminal-Year Courses
A student cannot enroll in the principal terminal-year pharmacy practice experiential rotations unless he or she has a grade-point average in professional courses of at least 2.5 and has completed all didactic course work required for the degree and expected programmatic requirements as outlined in the student handbook.

Graduate University Regulations
For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Forgiveness
The school does not participate in academic forgiveness.

Academic Misconduct
Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor’s department, or if necessary, the dean. The chair or dean brings the matter to the instructor’s attention, preserving the student’s anonymity, if so requested.

Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct/) and Faculty Senate Rules and Regulations (http://www政策.ku.edu/).

Credit/No Credit
The Credit/No Credit option is not authorized for graduate students’ enrollments, including, but not limited to, courses taken to fulfill the research skills requirements, undergraduate deficiencies, etc.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.
Health Insurance and Immunizations
The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

Requirements to Practice Pharmacy in Kansas
A license is required to practice pharmacy. State boards of pharmacy grant licenses to students who successfully pass board examinations. In all states, eligibility to take board examinations requires graduation from an accredited school of pharmacy and completion of required experiential training. The Kansas State Board of Pharmacy (http://www.kansas.gov/pharmacy/) requires graduates of schools of pharmacy to indicate any current, pending, or previous convictions, fines, violations, or disciplinary action that may affect their eligibility to take the licensing examination. Pharmacists generally may transfer their licenses from a state in which they completed the entire examination to another state, provided the 2 states had similar practical experience requirements at the time the pharmacist was licensed by examination. Most pharmacists find it useful to maintain a license in the state where they were licensed by examination. By doing so, they can preserve their eligibility to transfer to another state.

Pharmacists in Kansas must renew their licenses biennially by paying the required fee and providing proof that they have completed the required 30 clock hours of continuing education.

The Kansas Board of Pharmacy requires completion of an appropriate degree from an accredited school of pharmacy plus 1,500 hours of practical experience in pharmacy. At the conclusion of the program, students are certified to the Kansas State Board of Pharmacy as having completed the entire externship requirement (1,500 hours) and are therefore eligible to take the Kansas licensure examination. Students must register as interns with the board at matriculation in the School of Pharmacy. Students desiring to compile an official record of pharmacy experience obtained on their own initiative may do so by submitting this information to the Kansas State Board of Pharmacy. Practical experience above and beyond the 1,500 required hours may be gained by working as a licensed pharmacy student intern in Kansas, then transferring the hours to another state.

Medicinal Chemistry Courses
MDCM 601. Medicinal Biochemistry I. 3 Credits.
A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance.

MDCM 603. Medicinal Biochemistry II. 3 Credits.
A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601.

MDCM 606. Phytomedicinal Agents. 1 Credit.
This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytomedicines and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 601 to enroll in this course.

MDCM 607. Clinical Pharmacognosy. 1 Credit.
The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601.

MDCM 625. Medicinal Chemistry I: Neuroeffector and Cardiovascular Agents. 4 Credits.
A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the cardiovascular and central nervous systems. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 603 to enroll in this course.

MDCM 626. Medicinal Chemistry II: Homeostatic Agents. 4 Credits.
A continuation of MDCM 625 with special emphasis on anticancer, antiviral, antibacterial, antifungal, antidiabetic, anticholesterol, and steroidal drugs. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 625.

MDCM 690. Undergraduate Research. 1-5 Credits.
Research in medicinal chemistry. Students will be assigned to a laboratory research problem. Prerequisite: Consent of instructor.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Credits.
This course encompasses original work on a laboratory problem of limited scope, honors reading assignments from medicinal chemistry literature, or in-depth discussions of assigned topics. Prerequisite: Consent of instructor.

MDCM 701. Advanced Medicinal Biochemistry I. 3 Credits.
A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor.

MDCM 703. Advanced Medicinal Biochemistry II. 3 Credits.
A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor.

MDCM 710. Chemistry of Drug Action I. 4 Credits.
This course provides an overview of topics central to the understanding and practice of contemporary medicinal chemistry. It illustrates the interplay of anatomy and physiology with the organic-, bio- and analytical chemistry of drugs in the body. Topics covered include physiological mechanisms and disease processes; cell structure and function; basic intermediary metabolism; basic principles underlying drug action including the physicochemical properties of drugs and how these affect the interaction of drugs with living systems; chemical and biological manipulation of the absorption, distribution, metabolism and excretion of drugs and prodrugs; kinetics and inhibition of enzymes and transporters; quantitation and molecular modeling of drug binding to
peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor.

MDCM 895. Research in Medicinal Chemistry. 1-12 Credits.
Hours and credit to be arranged.

MDCM 899. Master's Thesis. 1-12 Credits.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Consent of instructor.

MDCM 950. Advanced Topics in Medicinal Chemistry. 1-3 Credits.
An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor.

MDCM 980. Proposal Preparation. 2 Credits.
Presentation of a literature seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor.

MDCM 999. Doctoral Dissertation. 1-12 Credits.
Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities.

Neuroscience Courses

NURO 775. Chemistry of the Nervous System. 3 Credits.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as NURO 775, P&TX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent.

NURO 799. Neuroscience Seminar Series. 2 Credits.
Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. (Same as NEUS 799.) Prerequisite: Graduate standing in the Neuroscience program.

NURO 800. Neuroscience Teaching Principles. 2 Credits.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in Neuroscience. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with faculty whom he or she is assisting in preparation of presentation materials and tests. Each student will be evaluated by the faculty mentor and by the students in the class taught. Prerequisite: Graduate standing in Neuroscience.

NURO 801. Issues in Scientific Integrity. 1 Credits.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. This course is open only to distance education students. Graded on a satisfactory/unsatisfactory basis. (Same as NURO 801, P&TX 801, PHCH 801 and PHCH 802.)

NURO 860. Principles and Practice of Chemical Biology. 3 Credits.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of
NURO 803. Neuroscience Literature Review I. 1 Credits.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in Neuroscience. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in the Neuroscience Program.

NURO 805. Neuroscience Literature Review II. 1 Credits.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in Neuroscience. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in the Neuroscience Program.

NURO 825. Research in Neuroscience. 1-10 Credits.
Original investigations at an advanced level in the areas of neuroscience. The research by each student will be performed in the laboratory of one of the faculty mentors of the graduate program in Neuroscience. Prerequisite: Graduate standing in the Neuroscience program.

NURO 844. Neurophysiology. 3 Credits.
Somatic sensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NEUS 844 and PHSL 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor.

NURO 846. Advanced Neuroscience. 5 Credits.
Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, PHSL 846 and NEUS 846.) Prerequisite: Permission of the course director.

NURO 847. Developmental Neurobiology. 2 Credits.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847, PHSL 847, and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor.

NURO 848. Molecular Mechanisms of Neurological Disorders. 3 Credits.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor.

NURO 899. Neuroscience Master's Thesis. 1-11 Credits.
Hours and credit for this course to be arranged with the mentor. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor.

Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor.

Pharmaceutical Chemistry Courses

PHCH 510. Emerging Trends in Pharmaceutical Chemistry I. 1 Credits.
This elective class will explore emerging areas of research currently impacting the pharmaceutical industry. Potential topics include: biologicals as therapeutics, drug targeting, prodrugs, nanotechnology, biological barriers, gene therapy, transporters, vaccines, intracellular drug trafficking, controlled release drug delivery, cancer therapy, analytical biotechnology and many others. The class will be taught by PHCH faculty and guest speakers. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be accepted to the Pharmacy Program.

PHCH 512. Road Map to the Development and Regulatory Approval of a New Drug. 1 Credits.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: 1st, 2nd or 3rd professional year standing in the School of Pharmacy.

PHCH 514. Scientific Writing for the Health Professional. 2 Credits.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will be provided by the instructor. Graded on a satisfactory/fail basis. Prerequisite: 3rd professional (P3) year students who plan to complete post-doctoral residency training.

PHCH 515. Oral Presentations for the Health Professional. 1 Credits.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: PHCH 514.

PHCH 517. Pharmacy Calculations. 2 Credits.
An introduction to the mathematics involved in filing prescriptions and in manufacturing pharmaceuticals. Includes an introduction to standard prescription notation and familiarization with pharmaceutical weights and measures.

PHCH 518. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits.
PHCH 605. Vaccines. 1 Credits.
Vaccines are currently the most powerful therapeutic approach available for infectious disease and promise to become of increasing importance for a wide variety of other pathologies including cancer. This course discusses the immunological basis of vaccinology, types of vaccines currently available and in development and the process by which vaccines are made from the basic research stage through their pharmaceutical development and marketing. Ethical aspects of vaccine use will also be considered. Prerequisite: Students must have first year professional standing in the School of Pharmacy.

PHCH 625. Pharmacokinetics. 3 Credits.
A discussion of the basic concepts, and some clinical applications, of pharmacokinetics, clearance concepts, extravascular dosing, and the use of pharmacokinetics in dosage regimen design and adjustment. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this course. Students must have successfully completed PHCH 517 and PHCH 518.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Credits.
A study of biological barriers to drug delivery, conventional dosage forms, and new and future drug delivery strategies. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed PHCH 517, PHCH 518, and PHCH 625.

PHCH 667. Introduction to Clinical Chemistry. 2 Credits.
A lecture-discussion course concerned with identification of the contents of physiological fluids, changes in physiological fluid content induced by disease and drugs, and therapeutic drug monitoring: case studies are presented. Prerequisite: Must be accepted to the Pharmacy Program.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry. 1-5 Credits.
Student will be assigned a suitable research project in the area of pharmaceutical analysis or pharmaceutics. Prerequisite: Consent of instructor.

PHCH 693. Clinical Pharmacokinetics. 2 Credits.
This course presents discussions on physiological and disease state variables in pharmacokinetics for selected drugs and drug classes, and instructs students in the use of physiological and disease state pharmacokinetic information to develop individualized therapeutic regimens. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PHCH 625 and PHCH 626.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Credits.
A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Credits.
Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Credits.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Credits.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant.

PHCH 715. Drug Delivery. 3 Credits.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry, Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed).

PHCH 716. Drug Delivery. 3 Credits.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: This course is only open to distance education students.

PHCH 717. Drug Delivery. 3 Credits.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course is only open to distance education students. Prerequisite: PHCH 732.

PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Graduate standing.

PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing.

PHCH 721. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to external non-degree seeking students. Offered in spring semesters.

PHCH 725. Cellular and Molecular Pharmaceutics. 3 Credits.
The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and ultimately of either adverse or therapeutic benefit. (Same as C&PE 725.) Prerequisite: Graduate standing or consent of instructor.

PHCH 726. Cellular and Molecular Pharmaceutics. 3 Credits.
The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and ultimately of either adverse or therapeutic benefit. Prerequisite: Graduate standing or consent of instructor.

PHCH 730. Biopharmaceutics and Pharmacokinetics. 3 Credits.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems.

PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Credits.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to distance education students.

PHCH 732. Biopharmaceutics and Pharmacokinetics. 3 Credits.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course is only open to external non-degree seeking students. Offered in fall semesters.

PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Credits.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Prerequisite: CHEM 624 and CHEM 626.

PHCH 775. Chemistry of the Nervous System. 3 Credits.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as MDCM 775, NURO 775 and PTX 755.) Prerequisite: BIOL 600 or equivalent.

PHCH 801. Issues in Scientific Integrity. 1 Credits.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. This course is open only to distance education students. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, P&TX 801 and PHCH 802.)

PHCH 802. Issues in Scientific Integrity. 1 Credits.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. This course is open only to distance education students. Graded on a satisfactory/unsatisfactory basis. (Same as PHCH 801, MDCM 801, NURO 801, and PTX 801.)

PHCH 816. Careers in the Biomedical Sciences. 1 Credits.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor.

PHCH 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion.
(Same as BIOL 817/CHEM 817/MDCM 817.) Prerequisite: Graduate student.

PHCH 850. Formulation Design: Solid Dosage Forms. 1 Credits.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Graded on a satisfactory/fail basis. Prerequisite: Graduate standing in PHCH or consent of the instructor.

PHCH 851. Solid State Stability and Formulation. 2 Credits.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in Pharmaceutical Chemistry or consent of the instructor.

PHCH 860. Principles and Practice of Chemical Biology. 3 Credits.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor.

PHCH 862. Physical Chemistry of Solutions, Solids and Surfaces. 3 Credits.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented.

PHCH 863. Physical Chemistry of Solutions, Solids and Surfaces. 3 Credits.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students.

PHCH 864. Pharmaceutical Analysis. 4 Credits.
This course is intended to be a comprehensive treatment of contemporary techniques used to validate analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684.

PHCH 865. Pharmaceutical Analysis. 4 Credits.
Advanced course on pharmaceutical analysis. This course is only open to distance education students.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Credits.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Credits.
This course is designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Credits.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master's or a doctoral degree.

PHCH 898. Master's Thesis. 1-10 Credits.
Master's Thesis. This course is open only to distance education students.

PHCH 899. Master's Thesis. 1-11 Credits.
Graded on a satisfactory/fail basis.

PHCH 920. Chemical Kinetics. 2 Credits.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions.

PHCH 921. Chemical Kinetics. 2 Credits.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students.

PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Credits.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization.

PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Credits.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students.

PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Credits.
Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactory/unsatisfactory basis.

PHCH 978. Pharmaceutical Chemistry Seminar. 1 Credits.
A seminar on the chemistry of pharmaceutical systems.

PHCH 998. Doctoral Dissertation in Pharmaceutical Chemistry. 1-11 Credits.
This course is open only to distance education students.

PHCH 999. Doctoral Dissertation in Pharmaceutical Chemistry. 1-11 Credits.

Pharmacology and Toxicology Courses
P&TX 630. Pharmacology I. 4 Credits.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in P&TX 630 include, general principles of pharmacokinetics and pharmacodynamics, pharmacology of the nervous system, biotechnology drugs, pharmacogenomics, and vitamins. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed BIOL 646.

P&TX 631. Pharmacology II. 3 Credits.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed P&TX 630.

P&TX 632. Pharmacology III. 3 Credits.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed P&TX 630 and P&TX 631.

P&TX 633. Pharmacology IV. 3 Credits.
The pharmacology series covers the basic principles of the immunology, inflammation, and targeted drugs used to regulate the immune response. In addition, basic concepts of infectious diseases and their therapeutics are discussed. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed P&TX 630, P&TX 631 and P&TX 632.

P&TX 640. Toxicology. 2 Credits.
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed P&TX 630, P&TX 631, P&TX 632 and P&TX 633.

P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Credits.
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of obesity and diabetes, and deliver it to the class for discussion. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed P&TX 630 to enroll in this course.

P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Credits.
Neurodegenerative diseases, such as Alzheimer's and Parkinson's diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed P&TX 630 to enroll in this course.

P&TX 644. Adverse Drug Events. 1 Credits.
The objective of this course is to alerts students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy.

P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmacological & Treatment Concepts. 1 Credits.
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments for these addictions will be reviewed. The role of pharmacoepidemiology will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of P&TX 632 or special permission from faculty.

P&TX 646. Current Concepts of Psychotropic Medication. 1 Credits.
This course provides information regarding commonly used psychotropic medications, or any drug that affects brain activities associated with mental processes and behavior. This includes, but are not limited to, the categories of antipsychotics, mood stabilizers, anti-anxiety (anxiolytics), antidepressants, and stimulants. The range of topics from basic biology to drug-drug interactions will be explored in the course. Groups of three students will identify a topic of interest to them in the field of psychotropic drugs and affect, mood, or behavior, prepare a 30 min presentation, and deliver it to the class for discussion. Prerequisite: P&TX 630.

P&TX 694. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Credits.
Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor.

P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Credits.
Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: P&TX 635 and consent of instructor.

P&TX 700. Professional Issues in the Biomedical Sciences. 2 Credits.
A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vitae/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 705. Current Concepts in Biochemical Pharmacology and Toxicology. 3 Credits.
A detailed study of the foundational concepts and leading-edge discoveries in biochemistry and molecular biology that underlie the actions and effects of drugs and toxicants with particular relevance to human disease and new therapeutic strategies. The interconnectedness and
integration of seemingly disparate pathways and regulatory mechanisms will be emphasized. The technologies and experimental approaches used in biochemical pharmacology and toxicology will be illustrated. Topics may vary from year to year depending on recent advances in the field. The course will involve a combination of lectures and discussions with an emphasis on critically reading and analyzing primary research papers. Students will be evaluated on the basis of oral presentations and take-home problem sets. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. Two semesters of undergraduate biochemistry with molecular biology.

P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Credits.
A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Credits.
A detailed study of the fundamentals of cardiovascular system, renal system and their pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Credits.
A detailed study of the fundamentals of inflammation, treatment for infectious disease and gastrointestinal pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Credits.
A detailed study of the fundamentals of endocrinology and associated pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 740. Advanced Biotechnology. 3 Credits.
An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Students will attend lectures in P&TX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 741. Biomedical Statistics. 3 Credits.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: P&TX graduate student status in good academic standing.

P&TX 742. Experimental Pharmacology. 3 Credits.
Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. The focus is on the different types of receptor systems and signaling pathways. Topics will include: pharmacokinetics, pharmacodynamics, G-protein linked receptors, ion channels, nuclear receptors and kinase signaling cascades. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 747. Molecular Toxicology. 2 Credits.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 750. Pharmacology I - Introduction to Pharmacology and Biotechnology. 3 Credits.
An introduction to the basic principles of biochemistry and molecular biology as well as pharmacokinetics and pharmacodynamics of drug action. Additional lectures will introduce students to principles of genomics, transgenic technologies and microscopy. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology.

P&TX 751. Pharmacology II - Endocrine Pharmacology. 2 Credits.
A detailed study of the fundamental concepts of endocrinology with an emphasis on the pathophysiologic details of diabetes and the pharmacology of treatment. Brief discussions on hypothalamic/pituitary, reproductive, thyroid and adrenal endocrinology and pharmacology will be presented. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 752. Pharmacology III - Central Nervous System and Autonomic Nervous System. 4 Credits.
A detailed study of the fundamental concepts of the autonomic nervous system, central nervous system, and select diseases of the CNS and their pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 753. Pharmacology IV - Cardiovascular and Renal System. 2 Credits.
A detailed study of the fundamental principles of the cardiovascular system, renal system and their associated pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 754. Pharmacology V - Immunopharmacology, Infectious Diseases and Gastrointestinal Pharmacology. 2 Credits.
This course is a detailed study of the fundamental concepts of immunology, inflammatory-related diseases and immunopharmacology, infectious diseases and gastrointestinal pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 755. Molecular Toxicology. 2 Credits.
A detailed study of the fundamentals of the toxicology, drug transformations and the mode of toxicity of various drug classes. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 757. Biomedical Statistics. 3 Credits.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology.

P&TX 758. Pharmacogenomics. 2 Credits.
A detailed study of fundamental concepts of pharmacogenomics - how genes and genetic variation determine interindividual differences in drug response - experimental approaches, select gene-drug examples, translation from research to clinical use, and ethical, legal and social
implications. Prerequisites: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology.

P&TX 759. Communication in Biomedical Sciences. 2 Credits.
Lectures and practical experience in written and oral communication skills, featuring various types of scientific writing. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 4 courses from the P&TX 750 – P&TX 755 series.

P&TX 760. Optogenetic, Two Photon Imaging and Microscopy and Image Analysis Techniques in Neuropathopharmacology. 2 Credits.
An in-depth presentation of the use of optogenetics and two photon imaging in exploring synaptic plasticity in the CNS. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 4 courses from the P&TX 750 – P&TX 755 series.

P&TX 761. Journal Club. 1 Credits.
Students will participate in student-lead journal club discussions and lead one journal club discussion under the mentorship of a faculty member. This is a synchronous course that online students join via video conferencing so students must be available during the regularly scheduled departmental journal club class. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 4 courses from the P&TX 750 – P&TX 755 series.

P&TX 775. Chemistry of the Nervous System. 3 Credits.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent.

P&TX 785. Research Proposal. 2 Credits.
To satisfy the research requirement for the Distance M.S. program in Pharmacology and Toxicology, the aspiring student must define a research project and prepare a written proposal describing the nature and goals of the project. It is suggested that the student in conjunction with their distance research mentor collaborate in the selection of and the definition of the proposed research. The proposal should be 4 pages (0.5 in margins, 11-12 point Arial, Times Roman or Calibri font) that states the overall goal of the project, the hypothesis to be tested, 2-3 specific aims, a statement of significance and impact of the research and research approach. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 4 courses from the P&TX 750 – P&TX 755 series.

P&TX 799. Pharmacology and Toxicology Seminar. 1-2 Credits.
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in P&TX.

P&TX 800. Pharmacology and Toxicology Teaching Principles. 2 Credits.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with the faculty whom he or she is assisting. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 801. Issues in Scientific Integrity. 1 Credits.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. This course is open only to distance education students. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PHCH 801 and PHCH 802.)

P&TX 803. Pharmacology Literature Review I. 1 Credits.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 805. Pharmacology Literature Review II. 1 Credits.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 806. Literature MS Thesis. 4 Credits.
This course is intended to be the final course in the program and will be used to complete the literature-based research proposal. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 26 credit hours.

P&TX 825. Research in Pharmacology and Toxicology. 1-10 Credits.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor.

P&TX 826. Online Research in Pharmacology and Toxicology. 8 Credits.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and consent of KU Pharmacology and Toxicology Faculty Mentor.

P&TX 885. Distance Master’s Research in Pharmacology and Toxicology. 1-12 Credits.
Original investigations at an advanced level in areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of 12 credits in P&TX 785.

P&TX 889. Distance Master’s Thesis. 2 Credits.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master’s Degree thesis. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of 12 credits in P&TX 885.

P&TX 890. Distance M.S. Thesis. 2 Credits.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master’s Degree thesis. Prerequisite: Graduate standing in the On-line M.S. Program in Pharmacology and Toxicology.

P&TX 898. Online Master’s Thesis. 1-2 Credits.
Independent investigation of a research problem of limited scope leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology.

PHPR 506. Precision Medicine. 1 Credits.
This course will address the role of precision medicine in pharmacy practice and is designed to extend the students' understanding of the basis for interindividual variation in drug response and the evolving role of the pharmacist. The course will include required readings, lectures, cases, and in-class discussions that focus on the evidence and practicality of precision medicine in pharmacy practice. Using selected examples, students will learn about patient factors that drive variability in drug response and how these factors drive drug selection and dosing. With the current focus on the use of genomic data to drive individualized therapy, students will learn about current pharmagenomic-based practice guidelines and clinical practice references. Students will prepare a 2-page writing assignment and an in-class presentation on the impact of precision medicine on pharmacy practice. Prerequisite: Must be admitted to the School of Pharmacy.

PHPR 507. Advanced Community Practice. 1 Credits.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice. Prerequisite: 3rd professional year standing in the School of Pharmacy.

PHPR 508. Hematology/Oncology Pharmacy. 1 Credits.
This course explores many cancer-related topics, including non-pharmacologic treatment modalities, complications of cancer and its treatment, supportive care issues, and precision medicine. It also reviews current cancer screening and prevention guidelines and cancer research. Various cancers are discussed, such as myeloma, pediatric cancers, and cancers of the bladder, kidneys, ovaries, and testes. Prerequisite: Students must have third year professional standing in the School of Pharmacy and have successfully completed MDCM 626.

PHPR 509. Medicare Part D. 1 Credits.
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this course. Must be a 2nd or 3rd professional year standing in the School of Pharmacy.

PHPR 510. Medical Terminology Elective. 1 Credits.
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define, and utilize medical terminology and abbreviations used in patient care.

PHPR 514. Communication and Counseling. 1 Credits.
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500.

PHPR 515. The Aging Patient. 1 Credits.
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring perceptions of the older adult patient, learning how the aging process can impact patient care, and identifying the role of the pharmacist in enhancing this care through the 5Ms of geriatric care. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy.

PHPR 516. Pharmacy in Public Health. 1 Credits.
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program.

PHPR 517. Medication Safety and Error Prevention. 1 Credits.
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy.

PHPR 519. Business Planning for Pharmacy. 1 Credits.
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal business plan. When finished students will be expected to have created a written business plan and present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the school of Pharmacy.

PHPR 520. Specialty Pharmacy. 1 Credits.
This course will review a variety of diseases including: multiple sclerosis, hepatitis C and autoimmune conditions (psoriasis, ulcerative colitis, etc) and the specialty medications used to treat these conditions. Specialty pharmacy accreditation standards as well as topic discussions reviewing many issues facing the specialty pharmacy industry will be discussed.
Guest speakers from different specialty pharmacies in the greater Kansas City area will also present information on their career experiences. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy.

PHPR 521. Practical Pediatrics. 1 Credits.
This course will expose students to conditions frequently encountered in pediatric care. Students will further develop knowledge and skills necessary to provide appropriate pediatric care in institutional, ambulatory, and community practice settings. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year.

PHPR 522. Pharmacy-Based Travel Health Services. 1 Credits.
This course reviews pertinent problems traveling entails and services pharmacists can provide for traveling patients. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Following the completion of this course, students should be able to recognize the need to establish travel health services, the role of pharmacists in these services, identify the commonly encountered disease states and problems for travelers, and what components comprise travel health by utilizing comprehensive knowledge, skills and resources necessary to establish and deliver successful travel health service. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 2nd or 3rd professional year. Students must have successfully completed the APHA Pharmacy-Based Immunization Delivery program.

PHPR 523. Critical Care Problem-Based Learning. 1 Credits.
This is an elective course focusing on advanced clinical decision making within the field of critical care. Using clinical critical care cases, student will work as a team to assess and make therapeutic recommendations through problem-based learning exercises. These activities aim to prepare students for advanced pharmacy practice and residency experiences in acute care settings by providing instruction in application of primary literature to patient cases, following patient progress through emergency department and intensive care settings, and oral presentation of evidence-based patients cases. Additionally, students will participate in an acute care interprofessional simulation. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year.

PHPR 525. Ambulatory Care. 1 Credits.
This elective course will explore many of the clinical and practical considerations employed when caring for patients in the ambulatory care setting. The course will expose the learner to a variety of topics that impact the pharmacist’s role in this practice setting, including collaborative practice agreements, patient case evaluations, communication skill development, and practice evaluation. The course will be facilitated by the ambulatory care practice group at The University of Kansas Health System and will prepare the student for advanced pharmacy practice and residency experiences in the ambulatory care setting. Prerequisite: P2 or P3 standing in the School of Pharmacy.

PHPR 526. Introduction to Pharmacy Residencies. 1 Credits.
This course is team-taught by KU clinical faculty with the support of pharmacy residency program directors, residency preceptors, and pharmacy residents. This course is designed to increase knowledge, interest, and confidence amongst students about residency training; identify and develop the skills necessary to apply to residency programs; and increase the number of students obtaining residency positions upon graduation. Prerequisite: Third year professional standing in the School of Pharmacy and instructor consent.

PHPR 527. Advanced Psychiatric Pharmacy. 1 Credits.
This elective course is designed to provide learners with the opportunity to gain further clinical and practical considerations when caring for patients with psychiatric disorders and substance use disorders. The course will expose the learner to a variety of topics that impact the pharmacist’s role in treating patients with psychiatric disorders. This course will help prepare students who are interested in the field of psychiatry. Prerequisite: Successful completion of PHPR 662.

PHPR 528. Infectious Diseases Therapeutic Drug Monitoring. 1 Credits.
This advanced elective course will focus on clinical application of vancomycin, aminoglycoside, and anti-fungal therapeutic drug monitoring utilizing multiple-day real patient cases. The course format will consist of alternating week(s) of online learning via calculation assignments and in-person class debriefing discussions. Prerequisite: P3 Standing in School of Pharmacy.

PHPR 529. Introduction to the Pharmaceutical Industry. 1 Credits.
This course introduces the foundations of the pharmaceutical industry, by first introducing the drug development process from investigational molecules to FDA approval and beyond. A variety of departments within the pharmaceutical industry will be explored, including but not limited to: Clinical development and operations, regulatory affairs, medical affairs and information, market access, sales and commercial operations, and pharmacovigilance. Additionally, pharmaceutical industry fellowships will be introduced, and projects will aid in the development of materials to assist in applications, interviews, and success in PhRMA. Prerequisite: P2 and P3 students enrolled at the KU School of Pharmacy are eligible to enroll in this course.

PHPR 531. Managed Care Pharmacy Practice. 1 Credits.
This survey course is motivated, designed and taught by current experts and practicing pharmacists in managed care. The instructors have real-world experience and subject matter expertise. The course is designed to provide students with current information in managed care and expose students to unique, non-traditional pharmacist opportunities. Students will be exposed to the current practice of each pharmacist and explore the spectrum of managed care pharmacy. Clinical and pharmacy management, regulatory and practice topics will be covered in the course. The US health care system is complex. A solid understanding of how managed care pharmacy practice works benefits all stakeholders and especially students. Having completed the course students will be better equipped to practice pharmacy in any professional setting. Prerequisite: P2 standing in the School of Pharmacy or above to take this elective course. Students need to have completed PHPR 619.

PHPR 541. Foundations of Interprofessional Collaboration I. 0 Credits.
This TeamSTEPPS Level 1 experience will introduce interprofessional students to the basic concepts of interprofessional collaboration including values and ethics, roles and responsibilities of healthcare team members, and interprofessional communication tools using the evidence-based national curriculum of TeamSTEPPS. Upon completion of this training experience students will be able to 1) demonstrate a work ethic with individuals of other professions to maintain a climate of mutual respect and shared values; 2) define the role of health professions (including your own) within the healthcare system; 3) identify opportunities to seek expertise of health professionals to improve communication and healthcare; and 4) acquire basic TeamSTEPPS communication tools to effectively use with healthcare teams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have P1 standing in the School of Pharmacy.
PHPR 542. Foundations of Interprofessional Collaboration II. 0 Credits.
This TeamSTEPPS Level 2 experience will provide interprofessional students opportunities to apply key knowledge and skills gained in FIPC I, through role-play and case-based learning. Students will apply their knowledge of roles and responsibilities of healthcare team members and interprofessional communication tools and continue learning with, from, and about students from other professions. Upon completion of this training experience students will be able to: 1) engage diverse healthcare professionals who complement one’s own professional expertise, as well as associated resources, to develop strategies to meet specific patient care needs; 2) choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance team function; and 3) engage other health professionals appropriate to the specific care situation—in shared patient-centered problem-solving. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have P2 standing in the School of Pharmacy and successfully completed PHPR 661.

PHPR 543. Foundations of Interprofessional Collaboration III. 0 Credits.
This TeamSTEPPS Level 3 experience will provide interprofessional students opportunities to demonstrate key knowledge and skills gained in FIPC I and II, through simulation. Students will demonstrate their interprofessional communication skills, including specific opportunities to utilize TeamSTEPPS tools. Students will also demonstrate their teamwork abilities by working with interprofessional students during the simulation. Upon completion of this training experience students will be able to: 1) demonstrate communicating effectively with other health professionals about a patient case; 2) exhibit teamwork skills with an interprofessional healthcare team; and 3) utilize key TeamSTEPPS tools with an interprofessional healthcare team. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHPR 663.

PHPR 601. Advanced Pharmacy Practice Experience 1. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis.

PHPR 602. Advanced Pharmacy Practice Experience 2. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis.

PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically
structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 607. Advanced Pharmacy Practice Experience 7. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 608. Advanced Pharmacy Practice Experience 8. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 609. Advanced Pharmacy Practice Experience 9. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 610. Advanced Pharmacy Practice Experience 10. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 613. Pharmacoeconomics and Health Outcomes. 2 Credits.
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals, managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmacoeconomic evaluations, critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must have third year professional standing in the School of Pharmacy.

PHPR 614. Pharmacy Management. 3 Credits.
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoeconomics, and human resource management.

PHPR 618. Hospital and Health-System Pharmacy. 1 Credits.
Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program.

PHPR 619. Health Care Systems and Informatics. 3 Credits.
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of their practice sites. Enrollment limited to pharmacy majors. Prerequisite: Students must have first year professional standing in the School of Pharmacy.

PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care. 2 Credits.
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing.

PHPR 621. Pharmacy Law. 2 Credits.
A course developed to increase students’ knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course.

PHPR 624. Pharmacoepidemiology and Public Health. 2 Credits.
Pharmacy profession has a unique and critical opportunity and responsibility to contribute to the improvement of population health. Public health is a broader discipline that encompasses population health with a variety of other areas, including but not limited to epidemiology, cultural competence, health promotion, disease prevention, and drug safety. Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects. Considerations are centered on providing beneficial or adverse effects of medication use in large populations and making relevant inferences from essential analytical research designs used in public health. Using population-based-care approach, students will adopt and fulfill public health roles and activities. This course provides a broad introduction to the principles of pharmacoepidemiology and public health with a focus on applications in the field of pharmacy. Prerequisite: Students must be admitted to the school of Pharmacy. Student must have second year professional standing in the School of Pharmacy to enroll in this course. Students must have successfully completed PHPR 662 and PHAR 520 to enroll in this course. Students must be admitted to the School of Pharmacy and successfully completed PHPR 662 and PHAR 520 to enroll in this course.

PHPR 664. Pharmacotherapy IV. 4 Credits.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 663 and PHAR 525 to enroll in this course.

PHPR 665. Pharmacotherapy V. 4 Credits.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664.

PHPR 666. Economic Evaluation of Health Care Programs and Services. 3 Credits.
The course will provide students with an overview and appraisal of the “state-of-the-art” in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have first year professional standing in the School of Pharmacy.

PHAR 512. Pharmacy Skills I-B. 1 Credits.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have first year professional standing in the School of Pharmacy.

PHPR 867. Seminar in Pharmacy Practice. 1 Credits.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor.

PHPR 865. Advanced Institutional Pharmacy Services I. 1.5 Credits.
Advanced Institutional Pharmacy Services (I) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: business management, pharmacy financial management and operations management. Prerequisite: Consent of instructor.

PHPR 866. Advanced Institutional Pharmacy Services II. 1.5 Credits.
Advanced Institutional Pharmacy Services (II) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: human resource management, clinical services management, specialty pharmacy services and technology management. Prerequisite: Consent of Instructor.

PHPR 899. Research in Pharmacy Practice. 1-6 Credits.
Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor.

Pharmacy Courses

PHAR 500. Introduction to Pharmacy. 1 Credits.
This course is designed to introduce pharmacy students to the profession of pharmacy, potential career pathways, and available academic and post-doctoral educational opportunities. Additionally, topics such as professionalism, leadership, professional advocacy, empathy, cultural competency, self-directed learning, interprofessional education, and professional communication will be discussed. Students will receive instruction and fulfill the prerequisites for their Introductory Pharmacy Practice Experiences (IPPE) occurring in the summer semesters of the PharmD program.

PHAR 509. History of Pharmacy Elective. 1 Credits.
This course is comprised of a survey of historical highlights of the development of Pharmacy as a discipline. The course will cover early antecedents of pharmacy, development of the discipline in Europe and the United States, the development of professional organizations, standards, education, and literature, economic development, and the pharmacists' contributions to community service, science, and the industry. There will be a mix of some lectures, discussion, assigned readings, and short papers. Prerequisite: Students must have first, second or third year professional standing in the School of Pharmacy.

PHAR 510. Pharmacy Skills I-A. 1 Credits.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including
but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 510 and PHAR 512; and current enrollment or successful completion of PHAR 517 and PHPR 661.

PHAR 516. Oral Presentations for the Health Professional. 1 Credits.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 514 or consent of instructor.

PHAR 517. Pharmacy Skills II-B. 1 Credits.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 510 and PHAR 512; and current enrollment or successful completion of PHAR 515 and PHPR 661.

PHAR 520. Pharmacy Skills III. 1 Credits.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 663 and PHAR 525 and have successfully completed or be concurrently enrolled in PHPR 664 to enroll in this course.

PHAR 525. Pharmacy Skills IV. 1 Credits.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must have second year professional standing in the School of Pharmacy and successfully completed PHPR 662, PHAR 520 and current enrollment or successful completion of PHPR 663.

PHAR 530. Pharmacy Skills V. 1 Credits.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 663 and PHAR 525 and have successfully completed or be concurrently enrolled in PHPR 664 to enroll in this course.

PHAR 535. Pharmacy Skills VI. 1 Credits.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664; and current enrollment or successful completion of PHAR 537.

PHAR 537. Pharmacy Skills VI-B. 1 Credits.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmacotherapy knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet between 1:00 to 5:00PM on either Monday, Tuesday, or Wednesdays. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664; and current enrollment or successful completion of PHAR 535.

PHAR 550. Introductory Pharmacy Practice Experience - Community. 4 Credits.
A required four credit hour experiential course involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in either an independent community or chain pharmacy in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PHAR 500.

PHAR 560. Introductory Pharmacy Practice Experience - Institutional. 4 Credits.
A required four credit hour experiential course involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in an institutional health-system (hospital) environment in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy.

PHAR 599. Advanced Infectious Disease - Translational Case Studies. 2 Credits.
This course is an interdepartmental elective focusing on advanced clinical decision-making within the field of infectious diseases. Utilizing clinical infectious disease cases based off of real-life patients, students will assess and make therapeutic recommendations via team-based active-learning exercises. These activities aim prepare students for advanced pharmacy practice and residency experiences in acute care settings with complicated and challenging patients, by providing students hands-on instruction in reading and assessing patient data including laboratory values and radiology reports, following patient progress over multiple days and adjusting patient care plans based on new unforeseen data, writing infectious diseases-specific SOAP notes, orally presenting patients using presentation styles expected for 4th year APPE rotations and
residency rotations, and using basic scientific principles when determining appropriate courses of patient care. Additional professional preparation in "soft skills" will be provided. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must be in their third professional year (P3).

PHAR 600. Hospital and Health-System Pharmacy. 1 Credits.
Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program.

Doctor of Pharmacy

The School of Pharmacy

Since its founding in 1885, the University of Kansas School of Pharmacy (http://pharmacy.ku.edu/) has been a leader in pharmacy education. Since 1996, the school has offered only the Doctor of Pharmacy degree as the entry-level practice degree. The curriculum gives the student the knowledge, skills, and ability required of the pharmacy practitioner; it is comprehensive and produces a highly competent general practitioner.

About 60 full-time faculty members teach in the professional Doctor of Pharmacy program and in the graduate programs. 3 departments (Pharmacology and Toxicology, Medicinal Chemistry, and Pharmaceutical Chemistry) offer Master of Science and Doctor of Philosophy degrees.

Pharmacy Practice offers the master's degree.

Both the undergraduate and graduate divisions have outstanding national and international reputations based on the excellence and productivity of the faculty. KU is consistently ranked in the top 5 among colleges/schools of pharmacy that receive National Institutes of Health research funding.

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (https://www.acpe-accredit.org/), 190 S. LaSalle St, Suite 2850, Chicago, IL 60603-4810, (312) 664-3575, info@acpe-accredit.org, the official accrediting body for American schools of pharmacy.

Advising

On admission to the school, students are assigned faculty members as advisors. The advisor serves continuously during the student's tenure in the school. Students are expected to meet with their advisors at least once each semester and are encouraged to meet more often to discuss academic issues and career and professional development.

Pre-pharmacy students are advised by the Undergraduate Advising Center, and/or by faculty members from the College of Liberal Arts and Sciences, while they complete pre-pharmacy coursework. All pre-pharmacy students are strongly encouraged to make appointments in the Deans office of the School of Pharmacy, 2010 Becker Drive, Room 2050, for co-advising services and when they have questions concerning pharmacy course requirements or appropriate electives or any other concerns about their preparation for pharmacy admission. Pre-pharmacy students are also encouraged to participate in the pre-pharmacy club. Email pharmacy@ku.edu to request to be added to the club's e-mail distribution list.

Undergraduate Admission to KU

Prospective students must be eligible for admission to the University of Kansas as an undergraduate student. See the Office of Admissions (http://admissions.ku.edu/), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911, adm@ku.edu for information regarding requirements. Prospective pharmacy students should declare prepharmacy as the major field of study. Visit the Office of International Support Services (http://iss.ku.edu/) for information about international admissions.

Undergraduate Admission to the School of Pharmacy

Students should apply via PharmCAS to the School of Pharmacy during the application period (late July through February 1). When they apply, they should have completed or be on pace to complete the 68 credit hours of required pre-pharmacy courses by August of the following fall. The required pre-pharmacy curriculum may be completed at accredited schools other than KU. Students not yet at KU should submit an undergraduate application for transfer admission. International students should apply for undergraduate admission via International Admissions.

Requirements

Applying students should meet the following requirements:

- Complete the required pre-pharmacy courses (http://pharmacy.ku.edu/academics/) and document the credit with official transcript(s) sent to KU Admissions.
- Maintain a grade-point average (GPA) of 2.50 or higher, overall and in the sciences. This is the minimum GPA acceptable for admission; the average GPA is generally much higher: approximately 3.50.
- Complete the PharmCAS application at www.PharmCAS.org (http://www.pharmcas.org/). To complete the PharmCAS application, one will need:
  - Official transcripts sent directly to PharmCAS from each postsecondary institution attended.
  - Contact information for individuals who will provide letters of recommendation (evaluations) directly to PharmCAS.
  - Submit application payment directly to PharmCAS.
  - PCAT scores are not required; only considered supplemental.
  - Supplemental application: transfer students and international students not already attending KU must also submit the corresponding KU undergraduate admission application.
- An interview is scheduled with select applicants.

Procedures

The School of Pharmacy admissions committee, consisting of at least 2 faculty members from each department and representation from the Deans office, determines admissions. A record documenting the required materials is created by each applicant through PharmCAS. Consideration is given to a student's overall GPA, science GPA, and GPA within the pre-pharmacy curriculum. The average GPA of past admits is approximately 3.50. Good scholarship is considered a predictor of success in the pharmacy curriculum. However, good communication skills, emotional maturity, leadership ability, professional attitude, an understanding of the pharmacy profession, work experience in a pharmacy, and interest in service to the community are also important. These additional skills may outweigh very high grades or choice of pre-pharmacy courses. Admission is competitive and depends on the number of applications received and the qualifications of the applicants.
Applications are considered and admissions are determined on a rolling basis during the PharmCAS application period. Our preferred application deadline is February 1; however, the school may consider later applications. Most admission decisions are made by March. As a condition of matriculation into the KU School of Pharmacy, all admitted students must successfully clear an investigative criminal background check and successfully obtain pharmacy intern status with the Kansas Board of Pharmacy. Successful clearance of the background check and attainment of pharmacy intern status with the Board of Pharmacy is required to enroll in the School of Pharmacy and to participate in curricular and extracurricular curricular activities including interacting with patients. Instructions for completing the background check are provided with the letter of acceptance.

Doctor of Pharmacy Degree Requirements

Prepharmacy Requirements

The Doctor of Pharmacy degree requires completion of all of the required pre-pharmacy and professional courses and a total of 207 credit hours with an overall and professional grade-point average of at least 2.5.

The pre-pharmacy requirements of 67 credit hours include a year each of English, general chemistry, and organic chemistry. Other required courses include calculus, interpersonal communication, molecular and cellular biology, microbiology, human anatomy, physiology, statistics, physics; and 12 credit hours of general studies that satisfy the following KU Core Curriculum requirements: goal 3 humanities; goal 3 social science; goal 4 outcome 1; and goal 4 outcome 2. The KU Core Curriculum goals 1 through 4 must be satisfied during the completion of the pre-pharmacy curriculum requirements. KU Core goals 5 and 6 are satisfied during the professional curriculum.

Students are expected to have or to develop basic competence with personal computers, including word processing and spreadsheet software. All students are required to personally own electronic devices that are capable of running software to complete some class assignments, assessments, as well as for professional work assignments. Information regarding this technology requirement will be provided to matriculating students.

Courses in other professional schools (e.g., engineering, education) may not be counted toward the degree unless the student can show that such courses are directly relevant to pharmacy. For example, a course in business law taken in the business school may count (consult with the office of the dean in the school of pharmacy).

1 Select a course that satisfies KU Core Curriculum requirements: goal 3 humanities; goal 3 social science; goal 4 outcome 1; or goal 4 outcome 2. All of the above need completed.

Professional Requirements

The Doctor of Pharmacy degree requires completion of all of the required prepharmacy and professional courses and a total of 207 credit hours with an overall and professional grade-point averages of 2.5.

The curriculum includes instruction in the 3 basic sciences: medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology. It also includes courses in the various aspects of pharmacy practice, including the health care system, law, and emerging roles for pharmacy practitioners. The curriculum integrates course material among departments. Assignments within the curriculum foster development of independent learning, communication skills, problem solving, and professional motivation. The professional curriculum includes a requirement that each student must complete a minimum of 4 elective credit hours within School of Pharmacy. One credit hour must be completed from the pharmacy practice department, 1 credit hour must be completed from a basic science department (either medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology) and the remaining two credit hours are left to the students discretion.

Students enroll in introductory pharmacy practice experiences during the summer following the first and second years. These experiences are located throughout the state of Kansas and vary in the type of professional setting.

The final year of the curriculum consists of nine 4-week advanced pharmacy practice experiences with preceptors at pharmacy practice sites throughout Kansas. Students must have their own transportation to reach their assigned sites. Housing at these sites is also the student’s responsibility.
**Professional Program**

*The following curriculum is applicable to the graduating class of 2019 (matriculating in the fall of 2015) and later. See [http://pharmacy.ku.edu/academics](http://pharmacy.ku.edu/academics) for the curriculum for the graduating classes of 2016, 2017, and 2018.*

*Total Hours 140*

*Bachelors of Science in Pharmaceutical Studies (BSPS) awarded to students who complete all required coursework (at a GPA of 2.0 or higher) through the spring of professional year 2.*

### Fourth Year

The fourth year is composed of 36 credit hours of advanced pharmacy practice experiences (nine 4-week long rotations). The required experiential rotations include advanced hospital, advanced community, ambulatory care, and acute care/inpatient general medicine. The remaining 5 required rotations are flexible regarding their location/practice site. Assignments are made on the basis of the student’s preference, and site availability. The five 4-week rotations of the fall semester begin in July and conclude at the end of November. The four 4-week spring semester rotations begin in January and conclude in April.

### Dual MBA and Pharm.D.

This dual degree program allows students to earn an MBA from the School of Business ([http://business.ku.edu/](http://business.ku.edu/)) and a Doctor of Pharmacy ([https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/mba-pharmd/](https://business.ku.edu/graduate-programs/full-time-mba/joint-degree-programs/mba-pharmd/)) from the School of Pharmacy ([http://pharmacy.ku.edu/](http://pharmacy.ku.edu/)) by extending their professional graduate study. The MBA/Pharm.D. program is combined with the Full-Time MBA Program on the Lawrence Campus. Students will take 34 hours to complete the MBA portion of this dual degree. Students gain competence and expertise in the complementary fields of business management and pharmacy.

Prospective students must submit an application and be accepted by the School of Pharmacy first. Students must meet the prerequisites of and be accepted by both schools. Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

### Dual PharmD and MS in Health Informatics or Health Informatics Certificate

These dual degree programs allow students to earn a Doctor of Pharmacy degree from the School of Pharmacy and a MS Health Informatics (p. 2027) (MSHI) degree or Health Informatics (HI) Certificate (p. 2029) from the KUMC School of Nursing. Students will take 30 additional credit hours to complete the PharmD/MSHI or an additional 17-18 credit hours to complete the PharmD/HI Certificate. Students gain competence and experience in the complementary fields of HI and pharmacy.

Prospective students must be currently enrolled and in good academic and professional standing with the School of Pharmacy. Students meet the prerequisites of and be accepted by both schools. Diplomas are awarded by each school separately.

### PharmD Research Certificate Program

#### PharmD Research Certificate Program

The Pharm.D. Research Certificate Program (PRCP) is designed for Pharm.D. students who excel in their Pharm.D. courses and have
a strong desire and commitment to gain extensive experience and training in research. In the past, students and faculty found each other for research projects through informal methods. The PRCP aims to facilitate this interaction by pairing interested students with interested faculty in a more formal arrangement. Students accepted into the PRCP will receive intensive research training in a laboratory or clinical setting, and will complete research-related curricular requirements. Upon satisfactory completion of the program requirements, students will receive a KU Undergraduate Research Experience Program Certificate on their BSPS transcript and a Pharm.D. Research Certificate on their Pharm.D. transcript, and these certificates are expected to enhance their applications to post-graduate programs.

Admissions

The Pharm.D. Research Certificate Program (PRCP) will be introduced to all P1 students in the fall during one of the student seminars. To apply for the PRCP, students are required to have a minimal GPA of 3.0 (School of Pharmacy GPA). Students interested in the program should prepare their application package that includes cover letter, CV, description of research interests, list of 3 potential research mentors and brief description of their research. Application package should be sent to Dr. Judy Wu (judywu@ku.edu) before December 31.

At the start of the P1 spring semester, students selected to participate in the program will be matched to a faculty research mentor. The mentor and student will draft and sign a program contract that outlines the academic and research plans and workload expectations. This contract will be provided to the program coordinator. During the remaining time in the PharmD program student will complete 7 credit hours of research credit (MDCM 690 or 692, P&TX 694 or 698, PHCH 690 or 694, or PHPR 635 or 690 which represents ~ 420 clock hours of effort that may be spread across seven semesters). Four of the 15 research credit hours will be used to satisfy the PharmD elective coursework. Students will complete the following courses and activities:

P1 Spring:
- Conduct research as outlined in their program contract for academic credit.
- Attend KU’s Undergraduate Research Symposium

P1 Summer:
- Conduct research as outlined in their program contract. If a student is paid a summer stipend, academic credit may not be awarded.

P2 Fall:
- Conduct research as outlined in their program contract for academic credit.

P2 Spring:
- Conduct research as outlined in their program contract for academic credit.
- Present research at KU’s Undergraduate Research Symposium

P2 Summer:
- Conduct research as outlined in their program contract. If a student is paid a summer stipend, academic credit may not be awarded.

P3 Fall:
- PHAR 514 Scientific Writing for the Healthcare Professional (2 credits)
- Conduct research as outlined in their program contract for academic credit.

P3 Spring:
- PHAR 516 Scientific Presentations for the Healthcare Professional (1 credit)
- Attend Mossberg Honors Research Symposium
- Conduct research as outlined in their program contract for academic credit.

P4 Year:
- Enroll in one Advanced Pharmacy Practice Experiences (PHPR 601-609) involving research (4 credits in total)
- Present (poster or oral) at the Mossberg Honors Research Symposium
- PharmD Research Certificate awarded

Department of Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 8 full-time faculty members, 15 - 20 graduate students on an average, about 10-15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and generally, our graduates pursue successful careers in the pharmaceutical industry and in academia.

Facilities

The department is well equipped for both chemical and biochemical research and has research facilities for about 50 graduate students, postdoctoral associates, and research technicians. Laboratory space in the department provides research laboratories for chemical synthesis and biochemical research. Faculty are housed in modern research buildings on west campus (Shankel Structural Biology Center) and main campus (Integrated Science Building). The department has an excellent complement of modern spectroscopic, biochemical, and chromatographic instrumentation, and other specialized research instrumentation is available through cooperative arrangements with other departments and core laboratories.

Advanced instrumentation and facilities are available through KU’s Molecular Structures Group (https://msg.ku.edu) (MSG). MSG laboratories include the Biochemical Research Service Laboratory (BRSL), the Mass Spectrometry Laboratory, the Nuclear Magnetic
Resonance Laboratory, the Molecular Graphics and Modeling Laboratory, the X-ray Crystallography Laboratory, and the Protein Structure Laboratory (dedicated to macromolecular X-ray crystallography) with more than $10 million in instrumentation.

The Shankel Structural Biology Center (SBC) offers new research opportunities for medicinal chemists interested in protein and nucleic acid structure and combinatorial synthesis; it also houses a 800-MHz NMR. The Analytical Proteomics Laboratory, which combines activities of the Mass Spectrometry Lab and BRSL to create a collaborative environment for protein handling, protein mass spectrometry, and bioinformatics, is in SBC. In the same building, the High Throughput Screening Laboratory (http://www.hts.ku.edu/) has integrated and automated robotics equipment for carrying out biochemical and cell-based assays and a chemical library of more than 100,000 compounds with diverse structures and drug-like properties for biological screening. The service laboratories have professional staff that provides training in specialized research techniques in addition to their service functions.

Courses

MDCM 601. Medicinal Biochemistry I. 3 Credits.
A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance.

MDCM 603. Medicinal Biochemistry II. 3 Credits.
A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601.

MDCM 606. Phytomedicinal Agents. 1 Credits.
This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytomedicines and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 601 to enroll in this course.

MDCM 607. Clinical Pharmacognosy. 1 Credits.
The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601.

MDCM 625. Medicinal Chemistry I: Neuroeffector and Cardiovascular Agents. 4 Credits.
A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the cardiovascular and central nervous systems. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 603 to enroll in this course.

MDCM 626. Medicinal Chemistry II: Homeostatic Agents. 4 Credits.
A continuation of MDCM 625 with special emphasis on anticancer, antiviral, antibacterial, antifungal, antidiabetic, anticholesterol, and steroidal drugs. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 625.

MDCM 690. Undergraduate Research. 1-5 Credits.
Research in medicinal chemistry. Students will be assigned to a laboratory research problem. Prerequisite: Consent of instructor.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Credits.
This course encompasses original work on a laboratory problem of limited scope, honors reading assignments from medicinal chemistry literature, or in-depth discussions of assigned topics. Prerequisite: Consent of instructor.

MDCM 701. Advanced Medicinal Biochemistry I. 3 Credits.
A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor.

MDCM 703. Advanced Medicinal Biochemistry II. 3 Credits.
A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor.

MDCM 710. Chemistry of Drug Action I. 4 Credits.
This course provides an overview of topics central to the understanding and practice of contemporary medicinal chemistry. It illustrates the interplay of anatomy and physiology with the organic-, bio- and analytical chemistry of drugs in the body. Topics covered include physiological mechanisms and disease processes; cell structure and function; basic intermediary metabolism; basic principles underlying drug action including the physicochemical properties of drugs and how these affect the interaction of drugs with living systems; chemical and biological manipulation of the absorption, distribution, metabolism and excretion of drugs and prodrugs; kinetics and inhibition of enzymes and transporters; quantitation and molecular modeling of drug binding to targets. Prerequisite: One year of organic chemistry, one semester of biochemistry, and one college-level course in biology.

MDCM 775. Chemistry of the Nervous System. 3 Credits.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same
as NURO 775, P&TX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent.

MDCM 790. Chemistry of Drug Action II. 3 Credits.
A discussion of the principles of contemporary drug design with specific examples chosen from the original literature. This course covers the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action. Prerequisite: Graduate standing or completion of MDCM 625 and MDCM 626.

MDCM 798. Master’s Literature Seminar in Medicinal Chemistry. 1 Credits.
Literature seminar for graduate students in Spring of their 2nd year. Prerequisite: Graduate students in 2nd year of program.

MDCM 799. Research Seminar in Medicinal Chemistry. 1 Credits.
Reports by research students and discussions of developments in the field not covered in formal courses.

MDCM 801. Issues in Scientific Integrity. 1 Credits.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level and research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. This course is open only to distance education students. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, P&TX 801, PHCH 801 and PHCH 802.)

MDCM 816. Careers in the Biomedical Sciences. 1 Credits.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as BIOL 816, CHEM 816, and PHCH 816.) Prerequisite: Permission of instructor.

MDCM 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/CHEM 817/PHCH 817.) Prerequisite: Graduate student.

MDCM 860. Principles and Practice of Chemical Biology. 3 Credits.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor.

MDCM 895. Research in Medicinal Chemistry. 1-12 Credits.
Hours and credit to be arranged.

MDCM 899. Master’s Thesis. 1-12 Credits.

MDCM 950. Advanced Topics in Medicinal Chemistry: ______. 1-3 Credits.
An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor.

MDCM 980. Proposal Preparation. 2 Credits.
Presentation of a literature seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor.

MDCM 999. Doctoral Dissertation. 1-12 Credits.
Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities.

Master of Science in Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 8 full-time faculty members, about 15-20 graduate students on an average, about 10-15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and generally, our graduates pursue successful careers in the pharmaceutical industry and in academia.

Graduate Admission

Graduate students are primarily admitted to the department to pursue the Ph.D. degree. The M.S. degree and postdoctoral training are also available. An applicant wishing to enter the graduate program must have earned a bachelor’s or master’s degree in pharmacy, medicinal chemistry, chemistry, biochemistry, or a closely related field, and must have completed 1 year of organic chemistry with laboratory (equivalent to CHEM 330, CHEM 331, CHEM 335, and CHEM 336). In all cases, general admission requirements must be met.

Applications are evaluated by the graduate selection committee. Applications must be supported by 1 copy of official transcripts of all previous college and university work, both undergraduate and graduate. In addition, a resume, a statement of purpose, and 3 letters of recommendation from current or former teachers, advisors, or employers must be submitted. Students from non-English-speaking countries also must furnish proof of proficiency in English. Graduate Record Examination (GRE) general test scores are required, and applicants are strongly encouraged to take the subject test in chemistry as well.
The graduate selection committee makes admission decisions based on grade-point averages for previous college work (particularly in the relevant science areas), letters of recommendation, previous research or employment experience relevant to the graduate training being sought, GRE scores, etc. The number of applicants who can be admitted at any time varies, depending on the availability of laboratory space, research facilities, and financial support for research activities, but generally averages between 5-10 a year.

Graduate applications (http://www.graduate.ku.edu/) and all other requested application materials (transcripts, résumé, statement of purpose, recommendation letters, etc.) must be submitted online:

The University of Kansas
Department of Medicinal Chemistry
Del Shankel Structural Biology Center (SBC)
2034 Becker Drive, Room 1089
Lawrence, KS 66047

M.S. Degree Requirements

Candidates for this degree must satisfy general requirements as well as those of 1 of the following options:

- Students who are proceeding toward the Ph.D. degree at KU receive the master’s degree after satisfactorily completing the course work requirement for the Ph.D. and passing a comprehensive oral examination.
- Students who wish to earn only the M.S. degree must complete a prescribed subset of the course work requirements for the Ph.D. degree and a thesis representing at least 10 credit hours of research and pass a thesis defense.

Doctor of Philosophy in Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. 2034 Becker Drive, Room 1089
Lawrence, KS 66047

Ph.D. Degree Requirements

If credit has not already been obtained in the courses below or their equivalents, students must complete the following courses as early as is practical in the graduate program: 1 semester of Physical Chemistry, and Biochemistry. Satisfactory completion of qualifying American Chemical Society (ACS) examinations in organic chemistry and biochemistry also is required.

A comprehensive written examination is used to assess students’ knowledge of medicinal chemistry, organic chemistry, and biochemistry. This examination is administered immediately at the end of year 1 in the summer. After completing the comprehensive examination, the major part of the course work, and other requirements, the student takes an oral comprehensive examination. After completing this examination, the student prepares an original research proposal for presentation to the faculty. The final requirement for the Ph.D. is the preparation and defense of a dissertation based on original laboratory research conducted by the candidate.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

General requirements, such as those related to the comprehensive oral examination, the dissertation, and the dissertation defense, are listed in the Graduate Studies (p. 2449) section of the online catalog.
Neurosciences Programs

Neurosciences Graduate Programs

The graduate program in neurosciences at the University of Kansas is a degree-granting program. Students are admitted directly into the program. The program is coordinated by the Lawrence campus of the university - with strengths in the behavioral, biological, chemical, and pharmaceutical sciences - and the Medical Center campus in Kansas City - with strengths in all the biomedical and clinical sciences. Each student is asked to indicate the campus on which he or she would like to be considered for admission. Students in this program should expect to be admitted to and receive a Ph.D. degree in neurosciences.

The program appeals to students who want to teach and/or do research in a university or do research in a pharmaceutical/biotechnology company or government laboratory. Students who are interested in this field wish to work out individual programs spanning a great breadth from molecular and cellular neurobiology to organism-based neurophysiology, behavioral neurobiology, and cognitive neuroscience. Students take advantage of the many research and training opportunities available at two campuses of a major research university. Our students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. If this type of program fits your professional training expectations, we invite you to join us.

If this type of program fits your professional training expectations, we invite you to join us.

M.S. Degree Requirements

The M.S. is offered in rare cases where attainment of the Ph.D. is inappropriate. A student may earn the M.S. by completing these minimum requirements:

- The courses in the curriculum of the first year of the Ph.D. training program.
- The course in advanced neuroscience.
- A thesis based on either original research or library research.
- The total credit hours of graduate-level courses required for the M.S. degree.

Doctor of Philosophy in Neurosciences

Neurosciences Graduate Programs

The graduate program in neurosciences at the University of Kansas is a degree-granting program. Students are admitted directly into the program. The program is coordinated by the Lawrence campus of the university - with strengths in the behavioral, biological, chemical, and pharmaceutical sciences - and the Medical Center campus in Kansas City - with strengths in all the biomedical and clinical sciences. Applications and Program Administration

The administrative offices for the interdisciplinary neuroscience program are in School of Pharmacy in Lawrence and at the Hemenway Life Sciences Innovation Center in Kansas City.

All application materials are reviewed by faculty committees on the Lawrence and Kansas City campuses. Students should have B.A. or B.S. degrees in one of the following fields: anthropology, behavioral sciences (psychology, human development), biology, chemistry, engineering, neuroscience, or pharmacology. Preference is given to students who have completed courses in introductory biology and at least one course in...
advanced biology topics such as biochemistry, physiology, microbiology, molecular biology, and courses in introductory and organic chemistry or in calculus and physics. The graduate curriculum requires background knowledge in these fields. Students who do not have sufficient training will be asked to complete the appropriate courses before being admitted. The program requires submission of the standard GRE scores with all applications, three letters of recommendation, and an essay by the applicant about his or her career goals, i.e. why he or she wishes to become a neuroscientist. Selection of graduate students is based on grade-point average, Graduate Record Examination scores, letters of recommendation, and evidence of previous experience in research. The minimum standard acceptable for admission to the graduate program is a grade-point average of 3.0. Inquiries and applications are welcome at any time. Most students enter the program in August. Full consideration for August admission can be assured for all applications received by the 2nd Friday of January.

The University of Kansas accepts only on-line applications. The fees are:
Domestic student on-line application fee: $65
International student on-line application fee: $85

The deadline for receipt of application materials to the Neuroscience Graduate Program is the 2nd Friday of January in consideration for admission to the Fall semester. Institution Code: 6871 / Neuroscience Program Code: 0213

Ph.D. Degree Requirements

The neuroscience curriculum is subdivided into core courses that all students must complete and electives representing the 2 major specializations,

- Cell and Molecular Neuroscience and
- Cognitive and Systems Neuroscience.

There is considerable flexibility in the curriculum to accommodate specific interests of the students and course availability. Course choices should be done by consulting your mentor and the Director of the Neuroscience Program prior to establishing a graduate committee. A 5-member faculty advisory committee including at least 3 members of the neuroscience program should be in place at the beginning of the second year of study to help the student choose electives if needed but more so to provide guidance on the research progress. Students should meet with the committee in the Fall of their second year of study and present their research progress to the committee and an outline of their thoughts for preparing a 6 page proposal for their oral defense in the spring/summer of the second year.

Continued enrollment in the neuroscience seminar is required and students are expected to present a yearly seminar. This can constitute a literature review for first year students and subsequent presentations are typically on research progress.

Students also receive training in the responsible conduct of research and teaching in the neurosciences. For the Ph.D., the student completes the core curriculum as well as research skills training, comprehensive oral examination, preparation of a dissertation, and final oral examination and defense of the dissertation.

All students must complete a research skill. Commonly used areas are radiation biology and radiation safety, cell culture methodology, techniques of electron and confocal microscopy, molecular biology laboratory training, computer science training, statistics, and training in electronics and instrumentation.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

An example of a standard progression through the curriculum is provided below.

Department of Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Students in the program will become familiar with aspects of physical, organic and analytical chemistry, chemical kinetics, biopharmaceutics and pharmacokinetics, and biotechnology including vaccines. To address these needs, the department offers a series of eight (8) core courses designed to hone the student’s skills in these topical areas, which are considered essential in understanding problems of biological, biophysical and chemical processes at the molecular level. Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the links Coursework Research Overview and Department Graduate Student Handbook for details. Every student entering the program is expected to complete the core courses during the first three semesters of graduate study. Students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests. The department places emphasis on excellence in research making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion.

Currently, the department has 16 faculty members, about 35 graduate students, and a similar number of postdoctoral fellows and research scientists. The department is recognized nationally and internationally, with most graduates and researchers going on to successful careers in the pharmaceutical industry, government positions and academia. The department serves as the home department for the long-standing NIH training grant in pharmaceutical biotechnology.

Facilities

The department is located on KU’s west campus in the Simons Biosciences Research Laboratories and the Multidisciplinary Research Building (MRB). Recently renovated and expanded, Simons is a modern, well-equipped research facility. MRB houses researchers from the pharmaceutical chemistry and a variety of other disciplines, thus encouraging interdisciplinary interaction and collaboration. The department is well equipped for biochemical, biological and chemical research, having state-of-the-art spectrophotometric, physical characterization, chromatographic and mass spectrometry instrumentation. Within the department there are facilities for cell culture, several advanced fluorescence microscopes, and numerous components and software for proteomic analysis. Furthermore, the faculty has established the Macromolecule and Vaccine Stabilization Center (MVSC) and Kansas Vaccine Institute (KVI), which contain an extensive array of instrumentation for the characterization of both small and macromolecules. Examples of analytical instrumentation include circular dichroism spectrophotometers, FTIR, capillary LCQ-Tof mass
spectrum, and particulate analysis. Additionally the university offers state of the art equipment and service facilities to assist with many aspects of research. For example, the Molecular Structures Group (MSG) is a campus-wide facility encompassing NMR, MS, X-ray Crystallography, Protein Production, Fragment-based Drug Discovery, and Molecular Graphics and Modeling Laboratories available to all campus members for a nominal fee. Near the Simons building, the structural biology wing of the MSG houses an 800-mHz NMR along with many other instruments and services.

Courses

PHCH 510. Emerging Trends in Pharmaceutical Chemistry I. 1 Credits.
This elective class will explore emerging areas of research currently impacting the pharmaceutical industry. Potential topics include: biologicals as therapeutics, drug targeting, prodrugs, nanotechnology, biological barriers, gene therapy, transporters, vaccines, intracellular drug trafficking, controlled release drug delivery, cancer therapy, analytical biotechnology and many others. The class will be team taught by PHCH faculty and guest speakers. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be accepted to the Pharmacy Program.

PHCH 512. Road Map to the Development and Regulatory Approval of a New Drug. 1 Credits.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: 1st, 2nd or 3rd professional year standing in the School of Pharmacy.

PHCH 514. Scientific Writing for the Health Professional. 2 Credits.

Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will be provided by the instructor. Graded on a satisfactory/fail basis. Prerequisite: 3rd professional (P3) year students who plan to complete post-doctoral residency training.

PHCH 515. Oral Presentations for the Health Professional. 1 Credits.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: PHCH 514.

PHCH 517. Pharmacy Calculations. 2 Credits.
An introduction to the mathematics involved in filling prescriptions and in manufacturing pharmaceuticals. Includes an introduction to standard prescription notation and familiarization with pharmaceutical weights and measures.

PHCH 518. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed PHCH 517.

PHCH 605. Vaccines. 1 Credits.
Vaccines are currently the most powerful therapeutic approach available for infectious disease and promise to become of increasing importance for a wide variety of other pathologies including cancer. This course discusses the immunological basis of vaccinology, types of vaccines currently available and in development and the process by which vaccines are made from the basic research stage through their pharmaceutical development and marketing. Ethical aspects of vaccine use will also be considered. Prerequisite: Students must have first, second or third year professional standing in the School of Pharmacy.

PHCH 625. Pharmacokinetics. 3 Credits.
A discussion of the basic concepts, and some clinical applications, of pharmacokinetics, clearance concepts, extravascular dosing, and the use of pharmacokinetics in dosage regimen design and adjustment. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PHCH 517 and PHCH 518.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Credits.
A study of biological barriers to drug delivery, conventional dosage forms, and new and future drug delivery strategies. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed PHCH 517, PHCH 518, and PHCH 625.

PHCH 667. Introduction to Clinical Chemistry. 2 Credits.
A lecture-discussion course concerned with identification of the contents of physiological fluids, changes in physiological fluid content induced by disease and drugs, and therapeutic drug monitoring: case studies are presented. Prerequisite: Must be accepted to the Pharmacy Program.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry. 1-5 Credits.
Student will be assigned a suitable research project in the area of pharmaceutical analysis or pharmaceutics. Prerequisite: Consent of instructor.

PHCH 693. Clinical Pharmacokinetics. 2 Credits. This course presents discussions on physiological and disease state variables in pharmacokinetics for selected drugs and drug classes, and instructs students in the use of physiological and disease state pharmacokinetic information to develop individualized therapeutic regimens. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PHCH 625 and PHCH 626.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Credits. A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Credits. Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Credits. Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor.

PHCH 706. Writing and Communicating Science for Graduate Students. 3 Credits. Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: This course is only open to distance education students.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Credits. This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant.

PHCH 715. Drug Delivery. 3 Credits. The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in the area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry, Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed).

PHCH 716. Drug Delivery. 3 Credits. The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in the area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: This course is only open to distance education students.

PHCH 717. Drug Delivery. 3 Credits. The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. This course is only open to external non-degree seeking students. Offered in spring semesters. Prerequisite: PHCH 732.

PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits. Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Graduate standing.

PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits. Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing.

PHCH 721. Physical-Chemical Principles of Solution Dosage Forms. 3 Credits. Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to external non-degree seeking students. Offered in spring semesters.

PHCH 725. Cellular and Molecular Pharmaceutics. 3 Credits. The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and
ultimately of either adverse or therapeutic benefit. (Same as C&PE 725.) Prerequisite: Graduate standing or consent of instructor.

PHCH 726. Cellular and Molecular Pharmacology. 3 Credits. The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and ultimately of either adverse or therapeutic benefit. Prerequisite: Graduate standing or consent of instructor.

PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Credits. A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. (Same as MDCM 775, NURO 775 and P&TX 755.) Prerequisite: BIOL 600 or equivalent.

PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Credits. A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control: basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Offered in fall semesters.

PHCH 775. Chemistry of the Nervous System. 3 Credits. A detailed study of the molecular aspects of nerve transmission. Prerequisite: CHEM 264 and CHEM 266.

PHCH 801. Issues in Scientific Integrity. 1 Credits. Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. This course is open only to distance education students. Graded on a satisfactory/unsatisfactory basis. (Same as PHCH 801, MDCM 801, NURO 801, and P TX 801.)

PHCH 816. Careers in the Biomedical Sciences. 1 Credits. Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor.

PHCH 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits. This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/CHEM 817/MDCM 817.) Prerequisite: Graduate student.

PHCH 850. Formulation Design: Solid Dosage Forms. 1 Credits. This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Graded on a satisfactory/fail basis. Prerequisite: Graduate standing in PHCH or consent of the instructor.

PHCH 851. Solid State Stability and Formulation. 2 Credits. This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in Pharmaceutical Chemistry or consent of the instructor.

PHCH 860. Principles and Practice of Chemical Biology. 3 Credits. A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor.

PHCH 862. Physical Chemistry of Solutions, Solids and Surfaces. 3 Credits. A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students.

PHCH 864. Pharmaceutical Analysis. 4 Credits.
This course is intended to be a comprehensive treatment of contemporary techniques used to validate analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684.

PHCH 865. Pharmaceutical Analysis. 4 Credits.
Advanced course on pharmaceutical analysis. This course is only open to distance education students.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Credits.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Credits.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Credits.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master's or a doctoral degree.

PHCH 898. Master's Thesis. 1-10 Credits.
Master's Thesis. This course is open only to distance education students.

PHCH 899. Master's Thesis. 1-11 Credits.
Graded on a satisfactory/unsatisfactory basis.

PHCH 920. Chemical Kinetics. 2 Credits.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students.

PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Credits.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization.

PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Credits.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students.

PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Credits.
Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactory/unsatisfactory basis.

PHCH 978. Pharmaceutical Chemistry Seminar. 1 Credits.
A seminar on the chemistry of pharmaceutical systems.

PHCH 998. Doctoral Dissertation in Pharmaceutical Chemistry. 1-11 Credits.
This course is open only to distance education students.

PHCH 999. Doctoral Dissertation in Pharmaceutical Chemistry. 1-11 Credits.

Master of Science in Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Students in the program will become familiar with aspects of physical, organic and analytical chemistry, chemical kinetics, biopharmaceutics and pharmacokinetics, and biotechnology including vaccines. To address these needs, the department offers a series of eight (8) core courses designed to hone the student's skills in these topical areas, which are considered essential in understanding problems of biological, biophysical and chemical processes at the molecular level. Every student entering the program is expected to complete the core courses during the first three semesters of graduate study. Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the links Coursework Research Overview and Department Graduate Student Handbook for details. Students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests. The department places emphasis on excellence in research making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion.

Students are primarily admitted to the department to pursue the Ph.D. degree; however students may opt to terminate graduate studies with the M.S. degree. For external students seeking an advanced degree, the department offers the distance M.S. and Ph.D. degrees. To be eligible for the distance programs, the students must be employed in the private or government sectors, meeting the same requirements as on-site students, have access to laboratory facilities and the availability of an appropriately trained scientific advisor at the remote site. The distance Ph.D. program is
only available to students who have completed the distance M.S. degree with a highly meritorious performance.

**Graduate Admission**

Students with a bachelor level degree or a master’s degree in chemistry, pharmacy, the biological sciences, material sciences, chemical engineering or related disciplines are encouraged to seek admission to our program. Except under unusual circumstances, we review and accept candidates for admission into the fall semester only. All information must be delivered to us before we can begin to consider your application. Entering students are expected to be competent in basic principles of organic chemistry, physical chemistry and two semesters of calculus equivalent to KU MATH 121/122.

Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the link Admissions and Requirements, then the sub-link Admissions Requirements for details. Although the department does not have a formal application deadline, the faculty begins evaluations of applications around January 15 each year. To ensure full consideration, it is highly recommended that complete applications be in the department far in advance of January 15.

Admitted students receive a competitive stipend, tuition, and basic health insurance. Students also can be selected to participate in the Takeru Higuchi and Nigel Manning Ph.D. Intersearch Program, allowing them to conduct a portion of their research at the Victorian College of Pharmacy (http://www.vcp.monash.edu.au (https://www.monash.edu/pharm/)) at Monash University in Melbourne, Australia. In addition, students are encouraged to participate in other industrial and/or academic internship programs the department offers.

A number of fellowship awards are offered to recognize academic superiority and to assist meritorious students in the timely completion of their degree programs. The number of fellowships awarded each year depends upon available funds. For a description of funding opportunities for KU graduate students, visit the Graduate Studies website (https://graduate.ku.edu/funding (https://graduate.ku.edu/funding/)). Students with particularly outstanding undergraduate records may be eligible for special awards. The Department of Pharmaceutical Chemistry is a Madison and Lila Self Graduate Fellowship Program (http://selfgraduate.ku.edu (http://selfgraduate.ku.edu/)) partner at KU. The program provides a generous stipend and tuition to outstanding students for 4 years of graduate study. At the department level, the Higuchi, Lindenbaum, Ryting, Stella, and Waugh Fellowships are awarded each year to incoming graduate students with high promise.

Any materials sent directly to the department should be directed to:

The University of Kansas  
Department of Pharmaceutical Chemistry  
Attn: Michelle Huslig  
Simons Labs  
2095 Constant Ave., Room 182  
Lawrence, KS 66047  
Telephone: 785-864-4822, fax: 785-864-5736, mhuslig@ku.edu

**M.S. Degree Requirements**

Except under unusual circumstances, the Department of Pharmaceutical Chemistry does not recruit students seeking the M.S. degree; however after admission to the Ph.D. program, the student may select to terminate with the M.S. degree. For this option, the student must have satisfactorily completed most of the core courses and sufficient research to support an M.S. thesis and oral defense. Alternatively, provision may be made for the preparation of an extensive research report based on laboratory investigations, which is presented in an oral examination.

**Distance Master’s Degree Program**

The department also offers a distance master’s program. See the website (http://pharmchem.ku.edu/admissions-requirements-ms (http://pharmchem.ku.edu/admissions-requirements-ms/)) for details. To be eligible for the M.S. distance program, the student must be employed in the private or government sectors, meeting the same requirements as on-site students, have access to laboratory facilities and the availability of an appropriately trained scientific advisor at the remote site. This program features the same high-quality lectures and courses offered in the on-campus M.S./Ph.D. program but allow students to complete the degree while working at a remote location. Students typically take 1 course a semester. All courses offered by the department can be taken this way. For questions, contact the director of the distance master’s program, John Stobaugh, 785-864-3996, stobaugh@ku.edu.

**Doctor of Philosophy in Pharmaceutical Chemistry**

**Pharmaceutical Chemistry Graduate Programs**

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Ph.D. Degree Requirements

Entering Background

Students entering the program are expected to be competent in basic principles of physical/organic chemistry and mathematics. These requirements are typically satisfied by most degrees in the basic or pharmaceutical sciences. One year of organic chemistry for majors, a physical chemistry course that includes classical thermodynamics, and two semesters of calculus equivalent to KU MATH 121/122.

Core Courses and Foundation Exam

All students participating in the Pharmaceutical Chemistry Ph.D. program are required to take eight (8) core courses, which are designed to ensure that graduates maintain the department’s long-standing reputation for strength in the physical-chemical sciences as they relate to modern research in Pharmaceutical Chemistry (Pharmaceutics). After satisfactory completion of the eight (8) core courses the student is eligible to take the Foundation Exam.

Research Skills (RS2) and Elective Requirements

Graduate students must take one elective course in addition to core courses. This may be from the courses offered by the Department of Pharmaceutical Chemistry or from other science and engineering departments on campus with prior approval from the graduate director. This requirement must be completed prior to undertaking the comprehensive examination at the end of year 2.

Comprehensive Examination for Ph.D. Students

The student will be eligible for the comprehensive examination subsequent a satisfactory performance on the Foundation Exam and the completion of RS2 requirements. The exam will be based on a series of oral questions based upon an oral presentation of a research proposal focused on their research. For addition details refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the link Department Graduate Student Handbook. Upon passing the comprehensive examination, students continuing on to the Ph.D. degree will receive a non-thesis M.S. degree.

Dissertation

Each Ph.D. candidate must submit and defend a dissertation resulting from research of sufficient originality and quality for publication in peer-reviewed scientific journals. The research is conducted under the supervision and guidance of the student’s advisor, with input from the dissertation committee as needed. The median time for students to complete the Ph.D. degree is 5.3 years.

Distance Ph.D. Degree Program

The department also offers a distance Ph.D. program. Admittance is offered to a limited number of highly qualified students who excelled while completing the Distance M.S. degree program. Interested students should inquire with their M.S. advisor, onsite advisor and the graduate director for details. This program features the same didactic coursework and research requirements as in the onsite Ph.D. program but allows students to complete the degree while working at a remote location. For questions, contact the graduate director, John Stobaugh, 785-864-3996, stobaugh@ku.edu.
Department of Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, psychiatric disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on strong Ph.D. and M.S. graduate programs.

Doctoral students are prepared to teach and do research in a university, pharmaceutical, biotechnology, or government laboratory setting. New Ph.D. students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. The department recruits 4 to 5 Ph.D. students each year and offers stipends and tuition coverage.

The major aim of the MS degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuro-pharmacology and toxicology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience.

The Distance Master of Science degree in Pharmacology and Toxicology is a program designed to train individuals in molecular, cellular and organ systems pharmacology and toxicology. The program provides advanced scientific knowledge in pharmacology and toxicology and is designed for individuals who are seeking additional academic qualifications that will facilitate their advancement at their place of employment, or will increase their competitiveness for admission to other graduate or professional degree programs.

The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

Facilities

Research facilities offer a range of modern instrumentation and many research support services. Major instruments include tissue culture rooms, ultracentrifuges, scintillation counters, high-pressure liquid chromatography systems, a patch-clamp electrophysiology system with Nikon fluorescent microscope, microprocessor-controlled spectrophotometers and fluorometers including a dual excitation wavelength instrument for intracellular measurements and a time-resolved luminescence and fluorescence microplate reader with dual dispensing capabilities, a Seahorse Extracellular Flux Analyzer for measuring cell metabolism and major energy-producing pathways of the cell, a dark room with a film processor, and real-time PCR equipment.

University research support facilities also contribute to the high quality of research and training for graduate students. These facilities are fully staffed by professionals and include the Electron Microscopy Lab with transmission and scanning scopes; the Biochemical Research Services Lab for Illumina RNAseq, protein and DNA sequencing, amino acid analysis, and oligonucleotide and peptide syntheses; a High Throughput Laboratory for screening compounds as potential tools and drug development, and the Molecular Graphics and Modeling Lab with VAX computers, extensive databases for protein structures, and multiple molecular modeling programs an NMR facility; an X-ray Crystallography Laboratory; a Mass Spectrometry Laboratory; and an Instrumentation Design Laboratory. All labs have current computer technology, including hardware and extensive software for imaging, data analysis, data reduction, protein and gene analysis, and statistical tests.

Courses

P&TX 630. Pharmacology I. 4 Credits.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in P&TX 630 include, general principles of pharmacokinetics and pharmacodynamics, pharmacology of the nervous system, biotechnology drugs, pharmacogenomics, and vitamins. Prerequisite: Students must be admitted to the school of Pharacy to enroll in this course. Students must have successfully completed BIOL 646.

P&TX 631. Pharmacology II. 3 Credits.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed P&TX 630.

P&TX 632. Pharmacology III. 3 Credits.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed P&TX 630 and P&TX 631.

P&TX 633. Pharmacology IV. 3 Credits.
The pharmacology series covers the basic principles of the immunology, inflammation, and targeted drugs used to regulate the immune response. In addition, basic concepts of infectious diseases and their therapeutics are discussed. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed P&TX 630, P&TX 631 and P&TX 632.

P&TX 640. Toxicology. 2 Credits.
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: Students must have third year professional standing in the School of Pharmacy.
Students must have successfully completed P&TX 630, P&TX 631, P&TX 632 and P&TX 633.

**P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Credits.**
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of diabetes and obesity, prepare a 30 min presentation and deliver it to the class for discussion. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed P&TX 630 to enroll in this course.

**P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Credits.**
Neurodegenerative diseases, such as Alzheimer’s and Parkinson’s diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed P&TX 630 to enroll in this course.

**P&TX 644. Adverse Drug Events. 1 Credits.**
The objective of this course is to alerts students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy.

**P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmacological & Treatment Concepts. 1 Credits.**
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments for these addictions will be reviewed. The role of pharmacotherapies will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of P&TX 632 or special permission from faculty.

**P&TX 646. Current Concepts of Psychotropic Medication. 1 Credits.**
This course provides information regarding commonly used psychotropic medications, or any drug that affects brain activities associated with mental processes and behavior. This includes, but are not limited to, the categories of antipsychotics, mood stabilizers, anti-anxiety (anxiolytics), antidepressants, and stimulants. The range of topics from basic biology to drug-drug interactions will be explored in the course. Groups of three students will identify a topic of interest to them in the field of psychotropic drugs and affect, mood, or behavior, prepare a 30 min presentation, and deliver it to the class for discussion. Prerequisite: P&TX 630.

**P&TX 694. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Credits.**
Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor.

**P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Credits.**
Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: P&TX 635 and consent of instructor.

**P&TX 700. Professional Issues in the Biomedical Sciences. 2 Credits.**
A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vitae/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

**P&TX 705. Current Concepts in Biochemical Pharmacology and Toxicology. 3 Credits.**
A detailed study of the foundational concepts and leading-edge discoveries in biochemistry and molecular biology that underlie the actions and effects of drugs and toxicants with particular relevance to human disease and new therapeutic strategies. The interconnectedness and integration of seemingly disparate pathways and regulatory mechanisms will be emphasized. The technologies and experimental approaches used in biochemical pharmacology and toxicology will be illustrated. Topics may vary from year to year depending on recent advances in the field. The course will involve a combination of lectures and discussions with an emphasis on critically reading and analyzing primary research papers. Students will be evaluated on the basis of oral presentations and take-home problem sets. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. Two semesters of undergraduate biochemistry with molecular biology.

**P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Credits.**
A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

**P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Credits.**
A study of the fundamentals of cardiovascular system, renal system and their pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

**P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Credits.**
A detailed study of the fundamentals of inflammation, treatment for infectious disease and gastrointestinal pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

**P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Credits.**
A detailed study of the fundamentals of endocrinology and associated pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

**P&TX 740. Advanced Biotechnology. 3 Credits.**
An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by
the expanding biotechnology industry. Students will attend lectures in P&TX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology.

P&TX 741. Biomedical Statistics. 3 Credits.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: P&TX graduate student status in good academic standing.

P&TX 742. Experimental Pharmacology. 3 Credits.
Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. The focus is on the different types of receptor systems and signaling pathways. Topics will include: pharmacokinetics, pharmacodynamics, G-protein linked receptors, ion channels, nuclear receptors and kinase signaling cascades. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 747. Molecular Toxicology. 2 Credits.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 750. Pharmacology I- Introduction to Pharmacology and Biotechnology. 3 Credits.
An introduction to the basic principles of biochemistry and molecular biology as well as pharmacokinetics and pharmacodynamics of drug action. Additional lectures will introduce students to principles of genomics, transgenic technologies and microscopy. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology.

P&TX 751. Pharmacology II - Endocrine Pharmacology. 2 Credits.
A detailed study of the fundamental concepts of endocrinology with an emphasis on the pathophysiologic details of diabetes and the pharmacology of treatment. Brief discussions on hypothalamic/pituitary, reproductive, thyroid, adrenal endocrinology and pharmacology will be presented. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 752. Pharmacology III- Central Nervous System and Autonomic Nervous System. 4 Credits.
A detailed study of the fundamental concepts of the autonomic nervous system, central nervous system, and select diseases of the CNS and their pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 753. Pharmacology IV- Cardiovascular and Renal System. 2 Credits.
A detailed study of the fundamental principles of the cardiovascular system, renal system and their associated pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 754. Pharmacology V - Immunopharmacology, Infectious Diseases and Gastrointestinal Pharmacology. 2 Credits.
This course is a detailed study of the fundamental concepts of immunology, inflammatory-related diseases and immunopharmacology, infectious diseases and gastrointestinal pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 755. Molecular Toxicology. 2 Credits.
A detailed study of the fundamentals of the toxicology, drug transformations and the mode of toxicity of various drug classes. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of P&TX 750.

P&TX 757. Biomedical Statistics. 3 Credits.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology.

P&TX 758. Pharmacogenomics. 2 Credits.
A detailed study of fundamental concepts of pharmacogenomics - how genes and genetic variation determine interindividual differences in drug response - experimental approaches, select gene-drug examples, translation from research to clinical use, and ethical, legal and social implications. Prerequisites: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology.

P&TX 759. Communication in Biomedical Sciences. 2 Credits.
Lectures and practical experience in written and oral communication skills, featuring various types of scientific writing. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 4 courses from the P&TX 750 – P&TX 755 series.

P&TX 760. Optogenetic, Two Photon Imaging and Microscopy and Image Analysis Techniques in Neuropharmacology. 2 Credits.
An in-depth presentation of the use of optogenetics and two photon imaging in exploring synaptic plasticity in the CNS. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 4 courses from the P&TX 750 – P&TX 755 series.

P&TX 761. Journal Club. 1 Credits.
Students will participate in student-lead journal club discussions and lead one journal club discussion under the mentorship of a faculty member. This is a synchronous course that online students join via video conferencing so students must be available during the regularly scheduled departmental journal club class. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 4 courses from the P&TX 750 – P&TX 755 series.

P&TX 775. Chemistry of the Nervous System. 3 Credits.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent.

P&TX 785. Research Proposal. 2 Credits.
To satisfy the research requirement for the Distance M.S. program in Pharmacology and Toxicology, the aspiring student must define a research project and prepare a written proposal describing the nature and goals of the project. It is suggested that the student in conjunction with their distance research mentor collaborate in the selection of and
the definition of the proposed research. The proposal should be 4 pages (0.5 in margins, 11-12 point Arial, Times Roman or Calibri font) that states the overall goal of the project, the hypothesis to be tested, 2-3 specific aims, a statement of significance and impact of the research and research approach. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of P&TX 750.

P&TX 799. Pharmacology and Toxicology Seminar. 1-2 Credits.
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in P&TX.

P&TX 800. Pharmacology and Toxicology Teaching Principles. 2 Credits.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with the faculty with whom he or she is assisting. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 801. Issues in Scientific Integrity. 1 Credits.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. This course is open only to distance education students. Graded on a satisfactory/unsatisfactory basis. (Same as MDMC 801, NURO 801, PHCH 801 and PHCH 802.)

P&TX 803. Pharmacology Literature Review I. 1 Credits.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 805. Pharmacology Literature Review II. 1 Credits.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 806. Literature MS Thesis. 4 Credits.
This course is intended to be the final course in the program and will be used to complete the literature-based research proposal. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of at least 26 credit hours.

P&TX 825. Research in Pharmacology and Toxicology. 1-10 Credits.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor.

P&TX 826. Online Research in Pharmacology and Toxicology. 8 Credits.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and consent of KU Pharmacology and Toxicology Faculty Mentor.

P&TX 885. Distance Master's Research in Pharmacology and Toxicology. 1-12 Credits.
Original investigations at an advanced level in areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of 12 credits in P&TX 785.

P&TX 889. Distance Master's Thesis. 2 Credits.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology and completion of 12 credits in P&TX 885.

P&TX 890. Distance M.S. Thesis. 2 Credits.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the On-line M.S. Program in Pharmacology and Toxicology.

P&TX 898. Online Master's Thesis. 1-2 Credits.
Independent investigation of a research problem of limited scope leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in Pharmacology and Toxicology Program and consent of instructor.

P&TX 899. Master's Thesis. 1-11 Credits.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Graduate standing in Pharmacology and Toxicology Program.

P&TX 900. Postdoctoral Research. 1-11 Credits.
Advanced level research in collaboration with a faculty member in the department. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Doctoral degree or equivalent in an appropriate related area, and consent of instructor.

P&TX 999. Doctoral Dissertation. 1-11 Credits.
Hours and credit to be arranged. Original investigation in pharmacology and toxicology. Prerequisite: Consent of instructor.

Master of Science in Pharmacology and Toxicology
Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, mood disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on a strong graduate program. The major aim of this Master of Science (MS) degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuropharmacology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience. The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.
Distance Master’s Degree Program

The department also offers a distance master’s program. Please see the website (https://pharmtox.ku.edu/distance-masters/) for details. The program features the same high-quality lectures and courses offered in the Ph.D. program. The program allows the industrial scientist or student to remain at their respective institutions and earn the M.S. degree under a collaborative academic environment. Students will typically take 1 course a semester and the program is designed for individuals who are seeking additional academic qualifications that will facilitate their professional advancement or increase their competitiveness for admission to other advanced degree programs. For questions, contact our Administrative Assistant Ms. Sarah Hoadley, 785-864-4001, pharmtox@ku.edu or the Director of the Distance Master’s Program, Rick T. Dobrowsky, Ph.D., 785-864-3531, dobrowsky@ku.edu

Graduate Admission

Admission is based on the student’s undergraduate record in a relevant field, Graduate Record Examination scores, and 3 letters of recommendation. A minimum grade-point average of 3.0 on a 4.0 scale is required. Applications from non-English-speaking countries must include a copy of the Test of English as a Foreign Language score. Acceptance depends on the availability of space and faculty commitment.

Students are expected to have bachelor’s degrees in pharmacy, chemistry, biology, pharmacology, toxicology, or other physical science related disciplines. Submit your graduate application online (http://www.graduate.ku.edu/). Send transcripts of all completed college and university course work and all other requested application materials to the department:

The University of Kansas
Department of Pharmacology and Toxicology
Malott Hall
1251 Wescoe Hall Drive, Room 5064
Lawrence, KS 66045

M.S. Degree Requirements

Course Work

Students must earn 18 credit hours in the following courses or their equivalents:

<table>

P&TX 899 Master’s Thesis (Combination of P&TX 825 and P&TX 899 must equal 12 hours)

Research Skills Requirement

Each MS degree student is required to take credit hours of Research in Pharmacology and Toxicology (P&TX 825) and Masters Thesis (P&TX 899). Enrollment in either course must continue until a total of 12 credit hours are earned, such that when taken together with didactic coursework, research, and thesis, totals 30 hours of graduate coursework.

Students need to maintain continuous enrollment in the program until completion. It is expected that students usually will complete the requirements and graduate in two years.

Each MS degree student is required to submit and defend a thesis resulting from research of sufficient originality and quality for publication in peer reviewed scientific journals. The research is conducted under the supervision and guidance from the student’s advisor, with input from the thesis committee as needed.

Top graduates, if interested, may transfer into a Ph.D. program in Pharmacology and Toxicology offered in the department.

Doctor of Philosophy in Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, mood disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on a strong Ph.D. graduate program. Doctoral students are prepared to teach and do research in a university, pharmaceutical, biotechnology, or government laboratory setting.

New Ph.D. students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. The department recruits about 4 Ph.D. students each year and offers stipends and tuition coverage. The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

Graduate Admission

Admission is based on the student’s undergraduate record in a relevant field, Graduate Record Examination scores, and 3 letters of recommendation. A minimum grade-point average of 3.0 on a 4.0 scale is required. Applications from non-English-speaking countries must include a copy of the Test of English as a Foreign Language score. Ph.D. Degree Requirements

Course Work

Incoming students should have completed 4 semesters of Chemistry and 4 semesters of Biology, including a course in Cell Biology and one in Biochemistry. Prerequisites can be completed during the first year. The core courses in Pharmacology and Toxicology that all students are required to take are listed below. Prerequisite for all courses is graduate standing in the Pharmacology and Toxicology Program.

Research Advisory Committee members for Ph. D degree aspirants should be identified by the end of the second year in the program. The committee is composed of at least three members, and the research director serves as chairman. The final Dissertation Defense Committee should consist of the original Advisory Committee (3 members) plus two (2) other members of the Graduate Faculty. At least one member of the final Dissertation Committee must be from outside the Department.

Comprehensive Exam Requirements for Ph. D. Students

The comprehensive examination is composed of 3 parts:

1. Written Comprehensive Examination: Each student must complete two written examinations to complete P&TX 803 and P&TX 805.

2. Preparation of an NIH-style research proposal: After successful completion of the second written comprehensive exam, the student should begin working on their NIH grant proposal. These serve as the basis for the Oral Comprehensive Exam.

3. Oral Comprehensive Examination: After approval of the research proposal by the student’s advisory committee, each student, in consultation with the advisor, takes an oral examination covering the student’s major field.

Dissertation Research

The student, with the advisor’s assistance, develops a dissertation project. After the oral comprehensive examination, the student presents the dissertation research project to the advisory committee and receives periodic advice from this committee throughout the project. Upon acceptance of the dissertation by the advisory committee, the candidate must pass a final oral examination, including a defense of the dissertation before the dissertation committee and any other interested members of the Graduate Faculty.

Department of Pharmacy Practice

Pharmacy Practice Graduate Program

The Department of Pharmacy practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

Department of Pharmacy Practice - Lawrence Campus

The Department of Pharmacy practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

Courses

PHPR 506. Precision Medicine. 1 Credits.
This course will address the role of precision medicine in pharmacy practice and is designed to extend the students' understanding of the basis for interindividual variation in drug response and the evolving role of the pharmacist. The course will include required readings, lectures, cases and in-class discussions that focus on the evidence and practicality of precision medicine in pharmacy practice. Using selected examples, students will learn about patient factors that drive variability in drug response and how these factors drive drug selection and dosing. With the current focus on the use of genomic data to drive individualized therapy, students will learn about current pharmagenomic-based practice guidelines and clinical practice references. Students will prepare a 2-page writing assignment and an in-class presentation on the impact of precision medicine on pharmacy practice. Prerequisite: Must be admitted to the School of Pharmacy.

PHPR 507. Advanced Community Practice. 1 Credits.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice. Prerequisite: 3rd professional year standing in the School of Pharmacy.

PHPR 508. Hematology/Oncology Pharmacy. 1 Credits.
This course explores many cancer-related topics, including non-pharmacologic treatment modalities, complications of cancer and its treatment, supportive care issues, and precision medicine. It also reviews current cancer screening and prevention guidelines and cancer research. Various cancers are discussed, such as myeloma, pediatric cancers, and cancers of the bladder, kidneys, ovaries, and testes. Prerequisite: Students must have third year professional standing in the School of Pharmacy and have successfully completed MDCM 626.

PHPR 509. Medicare Part D. 1 Credits.
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Must be a 2nd or 3rd professional year standing in the School of Pharmacy.

PHPR 510. Medical Terminology Elective. 1 Credits.
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define and utilize medical terminology and abbreviations used in patient care.

PHPR 513. Chemical Dependency Elective. 1 Credits.
This elective course will enhance the pharmacy student's knowledge and understanding of the current theories behind the addiction process, frequently abused drugs and/or chemicals and the treatment and recovery process. Prerequisite: Must be accepted to the Pharmacy Program.

PHPR 514. Communication and Counseling. 1 Credits.
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500.

PHPR 515. The Aging Patient. 1 Credits.
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring perceptions of the older adult patient, learning how the aging process can impact patient care, and identifying the role of the pharmacist in enhancing this care through the 5M's of geriatric care. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy.

PHPR 516. Pharmacy in Public Health. 1 Credits.
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program.

PHPR 517. Medication Safety and Error Prevention. 1 Credits.
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy.

PHPR 519. Business Planning for Pharmacy. 1 Credits.
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal a business plan. When finished students will be expected to have created a written business plan and will present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the school of Pharmacy.

PHPR 520. Specialty Pharmacy. 1 Credits.
This course will review a variety of diseases including: multiple sclerosis, hepatitis C and autoimmune conditions (psoriasis, ulcerative colitis, etc) and the specialty medications used to treat these conditions. Specialty pharmacy accreditation standards as well as topic discussions reviewing many issues facing the specialty pharmacy industry will be discussed. Guest speakers from different specialty pharmacies in the greater Kansas City area will also present information on their career experiences. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy.

PHPR 521. Practical Pediatrics. 1 Credits.
This course will expose students to conditions frequently encountered in pediatric care. Students will further develop knowledge and skills necessary to provide appropriate pediatric care in institutional, ambulatory, and community practice settings. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year.

**PHPR 522. Pharmacy-Based Travel Health Services. 1 Credits.**
This course reviews pertinent problems traveling entails and services pharmacists can provide for traveling patients. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Following the completion of this course, students should be able to recognize the need to establish travel health services, the role of pharmacists in these services, identify the commonly encountered disease states and problems for travelers, and what components comprise travel health by utilizing comprehensive knowledge, skills and resources necessary to establish and deliver successful travel health service. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 2nd or 3rd professional year. Students must have successfully completed the APhA Pharmacy-Based Immunization Delivery program.

**PHPR 523. Critical Care Problem-Based Learning. 1 Credits.**
This is an elective course focusing on advanced clinical decision making within the field of critical care. Using clinical critical care cases, student will work as a team to assess and make therapeutic recommendations through problem-based learning exercises. These activities aim to prepare students for advanced pharmacy practice and residency experiences in acute care settings by providing instruction in application of primary literature to patient cases, following patient progress through emergency department and intensive care settings, and oral presentation of evidence-based patients cases. Additionally, students will participate in an acute care interprofessional simulation. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year.

**PHPR 525. Ambulatory Care. 1 Credits.**
This elective course will explore many of the clinical and practical considerations employed when caring for patients in the ambulatory care setting. The course will expose the learner to a variety of topics that impact the pharmacist's role in this practice setting, including collaborative practice agreements, patient case evaluations, communication skill development, and practice evaluation. The course will be facilitated by the ambulatory care practice group at The University of Kansas Health System and will prepare the student for advanced pharmacy practice and residency experiences in the ambulatory care setting. Prerequisite: P2 or P3 standing in the School of Pharmacy.

**PHPR 526. Introduction to Pharmacy Residencies. 1 Credits.**
This course is team-taught by KU clinical faculty with the support of pharmacy residency program directors, residency preceptors, and pharmacy residents. This course is designed to increase knowledge, interest, and confidence amongst students about residency training; identify and develop the skills necessary to apply to residency programs; and increase the number of students obtaining residency positions upon graduation. Prerequisite: Third year professional standing in the School of Pharmacy and instructor consent.

**PHPR 527. Advanced Psychiatric Pharmacy. 1 Credits.**
This elective course is designed to provide learners with the opportunity to gain further clinical and practical considerations when caring for patients with psychiatric disorders and substance use disorders. The course will expose the learner to a variety of topics that impact the pharmacist's role in treating patients with psychiatric disorders. This course will help prepare students who are interested in the field of psychiatry. Prerequisite: Successful completion of PHPR 662.

**PHPR 528. Infectious Diseases Therapeutic Drug Monitoring. 1 Credits.**
This advanced elective course will focus on clinical application of vancomycin, aminoglycoside, and anti-fungal therapeutic drug monitoring utilizing multiple-day real patient cases. The course format will consist of alternating week(s) of online learning via calculation assignments and in-person class debriefing discussions. Prerequisite: P3 Standing in School of Pharmacy.

**PHPR 529. Introduction to the Pharmaceutical Industry. 1 Credits.**
This course introduces the foundations of the pharmaceutical industry, by first introducing the drug development process from investigational molecules to FDA approval and beyond. A variety of departments within the pharmaceutical industry will be explored, including but not limited to: Clinical development and operations, regulatory affairs, medical affairs and information, market access, sales and commercial operations, and pharmacovigilance. Additionally, pharmaceutical industry fellowships will be introduced, and projects will aid in the development of materials to assist in applications, interviews, and success in PhRMA. Prerequisite: P2 and P3 students enrolled at the KU School of Pharmacy are eligible to enroll in this course.

**PHPR 531. Managed Care Pharmacy Practice. 1 Credits.**
This survey course is motivated, designed and taught by current experts and practicing pharmacists in managed care. The instructors have real-world experience and subject matter expertise. The course is designed to provide students with current information in managed care and expose students to unique, non-traditional pharmacist opportunities. Students will be exposed to the current practice of each pharmacist and explore the spectrum of managed care pharmacy. Clinical and pharmacy management, regulatory and practice topics will be covered in the course. The US health care system is complex. A solid understanding of how managed care pharmacy practice works benefits all stakeholders and especially students. Having completed the course students will be better equipped to practice pharmacy in any professional setting. Prerequisite: P2 standing in the School of Pharmacy or above to take this elective course. Students need to have completed PHPR 619.

**PHPR 541. Foundations of Interprofessional Collaboration I. 0 Credits.**
This TeamSTEPPS Level 1 experience will introduce interprofessional students to the basic concepts of interprofessional collaboration including values and ethics, roles and responsibilities of healthcare team members, and interprofessional communication tools using the evidence-based national curriculum of TeamSTEPPS. Upon completion of this training experience students will be able to 1) demonstrate a work ethic with individuals of other professions to maintain a climate of mutual respect and shared values; 2) define the role of health professions (including your own) within the healthcare system; 3) identify opportunities to seek expertise of health professionals to improve communication and healthcare; and 4) acquire basic TeamSTEPPS communication tools to effectively use with healthcare teams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have P1 standing in the School of Pharmacy.

**PHPR 542. Foundations of Interprofessional Collaboration II. 0 Credits.**
This TeamSTEPPS Level 2 experience will provide interprofessional students opportunities to apply key knowledge and skills gained in FIPC I, through role-play and case-based learning. Students will apply their
knowledge of roles and responsibilities of healthcare team members and interprofessional communication tools and continue learning with, from, and about students from other professions. Upon completion of this training experience students will be able to: 1) engage diverse healthcare professionals who complement one's own professional expertise, as well as associated resources, to develop strategies to meet specific patient care needs; 2) choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance team function; and 3) engage other health professionals appropriate to the specific care situation—in shared patient-centered problem-solving. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHPR 663.

PHPR 543. Foundations of Interprofessional Collaboration III. 0 Credits.
This TeamSTEPPS Level 3 experience will provide interprofessional students opportunities to demonstrate key knowledge and skills gained in FIPC 1 and II, through simulation. Students will demonstrate their interprofessional communication skills, including specific opportunities to utilize TeamSTEPPS tools. Students will also demonstrate their teamwork abilities by working with interprofessional students during the simulation. Upon completion of this training experience students will be able to: 1) demonstrate communicating effectively with other healthcare professionals about a patient case; 2) exhibit teamwork skills with an interprofessional healthcare team; and 3) utilize key TeamSTEPPS tools with an interprofessional healthcare team. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHPR 663.

PHPR 601. Advanced Pharmacy Practice Experience 1. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis.

PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis.

PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis.
model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

**PHPR 607. Advanced Pharmacy Practice Experience 7.** 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

**PHPR 608. Advanced Pharmacy Practice Experience 8.** 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

**PHPR 609. Advanced Pharmacy Practice Experience 9.** 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

**PHPR 610. Advanced Pharmacy Practice Experience 10.** 4 Credits.
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy.

**PHPR 613. Pharmacoeconomics and Health Outcomes.** 2 Credits.
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals, managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmacoeconomic evaluations, critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must have third year professional standing in the School of Pharmacy.

**PHPR 614. Pharmacy Management.** 3 Credits.
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoeconomics, and human resource management.

**PHPR 618. Hospital and Health-System Pharmacy.** 1 Credits.
Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program.

**PHPR 619. Health Care Systems and Informatics.** 3 Credits.
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of their practice sites. Enrollment limited to pharmacy majors. Prerequisite: Students must have first year professional standing in the School of Pharmacy.

**PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care.** 2 Credits.
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing.

**PHPR 621. Pharmacy Law.** 2 Credits.
A course developed to increase students’ knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must be in their third professional year standing in the School of Pharmacy and eligible for APPE rotations at the conclusion of the semester.

**PHPR 624. Pharmacoepidemiology and Public Health.** 2 Credits.
Pharmacy profession has a unique and critical opportunity and responsibility to contribute to the improvement of population health. Public health is a broader discipline that encompasses population health
with a variety of other areas, including but not limited to epidemiology, cultural competence, health promotion, disease prevention, and drug safety. Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects. Considerations are centered on providing beneficial or adverse effects of medication use in large populations and making relevant inferences from essential analytical research designs used in public health. Using population-based care approach, students will adopt and fulfill public health roles and activities. This course provides a broad introduction to the principles of pharmacoepidemiology and public health with a focus on applications in the field of pharmacy. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have P3 standing in the School of Pharmacy.

PHPR 629. Research Design and Biostatistics. 2 Credits.
This course reviews study designs and statistical methods commonly used in primary medical literature. In collaboration with other courses in the curriculum, this course prepares students to interpret and apply primary literature during patient care, collect and analyze data, and maintain clinical competency throughout their professional career in pharmacy. Following completion of this course, students should be able to identify or select appropriate research methods and study designs; collect, summarize and interpret research data; understand basic statistical concepts; identify or select appropriate statistical tests for hypothesis testing; conduct and interpret the results of statistical tests; and evaluate the validity and reliability of published research studies.

PHPR 630. Drug Information and Literature Evaluation. 1 Credits.
This course will review the fundamental tools used to identify drug information in primary, secondary and tertiary resources. In addition, students will learn to assess published literature, utilize electronic resources, and learn to formulate a response to drug information questions. Following completion of this course, students will be able to understand the strengths and weaknesses of the drug information resources and to apply drug information skills to clinical practice relevant to patient care. Prerequisite: Successful completion of PHPR 629 and Fifth year standing (P3 student).

PHPR 635. Problems in Pharmacy Practice. 1-5 Credits.
A course designed for the study of special topics in pharmacy practice. A research paper will be required. Prerequisite: Consent of instructor.

PHPR 661. Pharmacotherapy I. 4 Credits.
A course dealing with the clinical applications of drug knowledge to patient care. Drug interactions and patient counseling techniques will be covered. Over-the-counter medications and herbas will also be a significant portion of the course. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have first year professional standing in the School of Pharmacy and successfully completed PHAR 510, PHAR 512 and concurrent enrollment or successfully completed PHAR 515 and PHAR 517.

PHPR 662. Pharmacotherapy II. 4 Credits.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 661 and PHAR 515 and PHAR 517 to enroll in this course.

PHPR 663. Pharmacotherapy III. 4 Credits.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have second year professional standing in the School of Pharmacy and successfully completed PHPR 662 and PHAR 520.

PHPR 664. Pharmacotherapy IV. 4 Credits.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 663 and PHAR 525 to enroll in this course.

PHPR 665. Pharmacotherapy V. 4 Credits.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664.

PHPR 670. Clinical Assessment. 2 Credits.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmacotherapy knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet between 1:00 to 5:00 PM on either Monday, Tuesday, or Wednesdays. In addition, there is a required Thursday discussion section. A detailed schedule of lab meeting dates and times will be provided in the syllabus. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. Students must pass PHPR 664 to be eligible to complete PHPR 670.

PHPR 690. Research in Pharmacy Practice. 1-5 Credits.
Students will conduct original research in a laboratory, educational, or clinical research setting under the supervision of department faculty. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class.

PHPR 845. Professional Communications and Leadership. 2 Credits.
A course designed to give the graduate student a practical experience in areas of professional communications such as administrative proposals, grants, letters, memos, poster presentations, and written papers. The course focuses on the different kinds of communications required to relate to other health care professionals. Prerequisite: Consent of instructor.

PHPR 855. Economic Evaluation of Health Care Programs and Services. 3 Credits.
The course will provide students with an overview and appraisal of the "state-of-the-art" in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses.

PHPR 860. Seminar in Pharmacy Practice. 1 Credits.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor.
**PHPR 865.** Advanced Institutional Pharmacy Services I. 1.5 Credits.

Advanced Institutional Pharmacy Services (I) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: business management, pharmacy financial management and operations management. Prerequisite: Consent of instructor.

**PHPR 866.** Advanced Institutional Pharmacy Services II. 1.5 Credits.

Advanced Institutional Pharmacy Services (II) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: human resource management, clinical services management, specialty pharmacy services and technology management. Prerequisite: Consent of Instructor.

**PHPR 899.** Research in Pharmacy Practice. 1-6 Credits.

Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor.

---

**Master of Science in Pharmacy Practice**

**Pharmacy Practice Graduate Program**

The Department of Pharmacy Practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

**Graduate Admission**

In addition to meeting the general requirements for admission to graduate studies (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=), applicants are considered for admission if they are graduates of a school of pharmacy accredited by the Accreditation Council for Pharmaceutical Education (ACPE) (https://www.acpe-accredit.org/) and are eligible for licensure as registered pharmacists by the Kansas State Board of Pharmacy (http://pharmacy.ks.gov/). A Bachelor of Science degree or a Doctor of Pharmacy (Pharm.D.) degree with a major in pharmacy is required.

Submit your graduate application online (http://www.graduate.ku.edu/).
Send transcripts of all completed college and university course work and all other requested application materials to the department:

The University of Kansas

Professional Studies

KU Edwards Campus School of Professional Studies

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your academic success coach (https://edwardscampus.ku.edu/program-advisors/) for details). Other years’ catalogs are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

Introduction

The KUEC School of Professional Studies provides high-quality academic programs, research activities, and engaged learning initiatives that meet workforce, economic, and student needs. Our work is guided by our shared commitment to the values of collaboration, innovation, and social equity as we serve our students and the community.

Undergraduate Programs in the School of Professional Studies

The School of Professional Studies is a University of Kansas academic unit designed and charged with serving the needs of non-traditional and transfer students in the Kansas City metro area and nationally. The undergraduate programs in the School of Professional Studies are interdisciplinary degree completion programs aimed at preparing students for high demand workforce needs.

In partnership with their academic success coach, it is the students’ responsibility to become thoroughly acquainted with all requirements for the degree programs in which they plan to participate. These include all university requirements, as well as the requirements of the School of Professional Studies outlined in this section of the catalog. Students are also responsible for understanding the requirements that are unique to individual programs. By taking an active role in their undergraduate education, students maximize the value of their KU experience.

The school offers undergraduate programs in:
• American Sign Language and Deaf Studies
• Applied Biological Sciences
• Biotechnology
• Health Sciences
• Information Technology
• Nutrition
• Project Management
• Public and Population Health

View additional undergraduate programs offered at the KU Edwards Campus (https://edwardscampus.ku.edu/academic-programs/#undergraduate).

Admission

Information on undergraduate admission standards and requirements, as well as application procedures and deadlines, is found on the School of Professional Studies Programs pages. Visit the Office of Admissions (http://admissions.ku.edu/) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions. Students interested in pursuing a degree in the School of Professional Studies should meet with an academic success coach to learn more.

Advising

To ensure student success, all students in the School of Professional Studies will work with an academic success coach (https://edwardscampus.ku.edu/student-services/program-info/#coach) through their time at KU. Coaches work with students from the admissions process through graduation. For advising information, contact 913-897-8539 or visit https://edwardscampus.ku.edu/student-services/program-info/#coach).

Transfer Communities

Transfer Communities (https://edwardscampus.ku.edu/student-services/communities/) at the KU Edwards Campus are an integrated program designed to help you transition seamlessly to KUEC while you’re achieving your Associate’s Degree from your community college. These program-specific experiences will connect you to events, career conversations, faculty, staff and peers with similar goals and interests to create a true community while you pursue your degree.

University Honors Program

The School encourages qualified students to participate in the Edwards Honors Program (https://edwardscampus.ku.edu/honors/). The KU Edwards Campus Honors Program is here to help you get the most out of your college experience, whether you’re transferring from a community college honors program, or just getting started on your honors journey.

Graduate Programs in the School of Professional Studies

The School of Professional Studies is a University of Kansas academic unit that serves the needs of professionals in the Kansas City metro area and nationally. The graduate programs in the School of Professional Studies are interdisciplinary terminal degree programs aimed at preparing students for high demand workforce needs.

The school offers graduate programs in:

• Advanced American Sign Language
• ASL/English Interpreting
• Cybersecurity
• Deaf Studies and Social Justice
• Engineering Management
• Information Technology
• Organizational Communication
• Project Management
• Software Engineering and Management

View additional graduate programs offered at the KU Edwards Campus (https://edwardscampus.ku.edu/academic-programs/#graduate).

Degree Requirements

Requirements for the completion of master’s degrees in the School of Professional Studies are governed by department- or program-specific policy, School policies and procedures, Graduate Studies policies, and the University Senate Rules and Regulations.

Information on degree requirements presented in this section is limited to the most frequently consulted policies and key milestones in the graduate career. Students will find additional information under the KU Policy Library (http://policy.ku.edu/), the Graduate Studies (https://catalog.ku.edu/graduate-studies/) and College’s graduate regulations sections of the online catalog, the academic unit’s handbook, and the University of Kansas Rules and Regulations (https://catalog.ku.edu/regulations/).

Admission

Information on graduate admission standards and requirements, as well as application procedures and deadlines, is found on the School of Professional Studies Programs pages. Visit Graduate Studies Admission (https://graduate.ku.edu/prospective-students/) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions. Students interested in pursuing a degree in the School of Professional Studies should meet with an academic success coach to learn more.

Advising

To ensure student success, all students in the School of Professional Studies will work with an academic success coach (https://edwardscampus.ku.edu/student-services/program-info/#coach) through their time at KU. Coaches work with students from the admissions process through graduation. For advising information, contact 913-897-8539 or visit https://edwardscampus.ku.edu/student-services/program-info/#coach).

Advising

To ensure student success, all students in the School of Professional Studies will work with an academic success coach (https://edwardscampus.ku.edu/student-services/program-info/#coach) through their time at KU. Coaches work with students from the admissions process through graduation. For advising information, contact 913-897-8539 or visit https://edwardscampus.ku.edu/student-services/program-info/#coach).
Undergraduate & Graduate Scholarships and Financial Aid

The School of Professional Studies seeks to make the KU experience affordable to all students and encourages all students to explore the affordability (https://edwards campus.ku.edu/edwards-campus-tuition-fees/) options available through KU Edwards. Additional scholarship resources can be found through the KU Edwards Financial Aid and Scholarship (https://edwards campus.ku.edu/financial-aid-scholarships/) and Financial Aid and Scholarships (https://financialaid.ku.edu/).

Metro KC Tuition Rate

The KU Edwards Campus Metro KC Rate (https://edwards campus.ku.edu/metrokc-tuition-rate/) offers tuition equivalent to in-state rates for Missouri residents who meet the qualifications below. No credit hour limit applies. To receive this special rate, please fill out the Metro KC Rate (http://edwards campus.ku.edu/edwards-campus-metrokc-application/).

To receive a need-based scholarships, the student must have submitted the FAFSA form (https://studentaid.gov/h/apply-for-aid/ffas/) (https://studentaid.gov/h/apply-for-aid/ffas) and been determined to be eligible. Merit-based scholarships also are offered.

Additional funds may be available from the University of Kansas Financial Aid & Scholarships (http://affordability.ku.edu/).

Graduate Fellowships and Assistantships

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

For information about University regulations, see Regulations (https://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Undergraduate Regulations

Absences

A student with excessive absences may be withdrawn from the course by the Dean. Instructors may require a certain level of attendance for passing a course and may drop a student for lack of attendance without the student’s consent.

Change of School

Students with a KU cumulative GPA of 2.00 or higher (or in their first semester) can fill out a Change of School form requesting to be admitted to the School of Professional Studies, from a different KU school, through the last day of class for the current semester. Requests made after that will be for admission in the upcoming semester. This process is for active KU students. Students not admitted to KU follow the University’s admission policy.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. Students may enroll in one course a semester under the option if the course is not in your major or minor. For more information, visit the KU Policy Library (http://policy.ku.edu/).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages. Always check with your advisor before electing C/NC as policies vary from program to program.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent (KU cumulative GPA) of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

Honor Roll (Dean’s List)

Students who earn a 3.75 grade point average or above in at least 6 credit hours for the semester are recognized on the honor roll or dean’s list in fall and spring. Credit/No Credit grades are not accepted. S grades are accepted. An honor roll notation appears on the transcript.

Maximum and Minimum Semester Enrollment

No student may enroll in more than 20 hours a semester, or more than 9 hours in a summer session without permission from an undergraduate advisor.

Nonresidence Study Before the Last 30 Hours

Before the last 30 hours required for the degree, students may, under certain conditions, take courses at other institutions and transfer the credit to KU. Before enrolling in a nonresidence course, check on how your courses will transfer to KU (https://admissions.ku.edu/transfer-requirements-deadlines/transfer-college-credits/) or complete KU’s standard form, Request for Tentative Evaluation of Transfer Credit, in your dean’s office or student services office. After completing the coursework, you must request that an official transcript be sent to the Office of Admissions (https://admissions.ku.edu/), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911. For transcripts to be official, they must be mailed from the college or university directly to KU. Faxed transcripts are not accepted for posting of transfer credit. Nonresidence credit includes all credits from another college or university taken after initial enrollment at KU, military service courses, and other undergraduate course work not formally offered in the Schedule of Classes (https://classes.ku.edu/). Majors must submit the Request for Tentative Evaluation of Transfer Credit form before they enroll.

Prerequisites and Corequisites

Students are advised to enroll according to prerequisites and corequisites noted in individual course descriptions. Prerequisite waivers are used at the discretion of the Associate Dean of the School of Professional Studies and the appropriate academic program director.

Good Standing

Students with a KU cumulative GPA of 2.0 or higher are in good academic standing.
Placed on Probation
A student whose KU cumulative grade-point average falls below a 2.0 is placed on probation for the following semester.

Continued on Probation
A student on probation is continued on probation for one more semester if the KU semester grade-point average is not yet a 2.0 but progress is being made as determined by a faculty committee.

Returned to Good Standing
A student on probation is returned to good standing if the KU cumulative grade-point-average is at least 2.0.

Dismissal
A student on probation is dismissed for failure to earn a KU cumulative grade-point average of at least 2.0 in the next semester of enrollment after two consecutive semesters on probation. Students who are dismissed are dropped from any courses enrolled in for future semesters. Students who are dismissed may appeal the dismissal through the School of Professional Studies faculty committee. A student reinstated is continued on probation and has one semester to return to good standing. Students dismissed by the School may apply to another KU school or the College by completing a Change of School form.

Reinstatement after Dismissal
Students who have been dismissed may apply for readmission through the regular admissions process. Students applying for readmission after dismissal must have successfully completed any requirements set by the School of Professional Studies for readmission, if any.

Repetition of Courses
The School of Professional Studies follows the University’s course repeat and grade replacement policy.

Required Work in Residence
To earn a bachelor’s degree from KU, you must complete the last 30 hours of credit for the degree by resident study. Students may petition the dean for a waiver. Up to 6 hours of work completed at another institution may be accepted as part of the last 30 hours, if the hours are not in required courses in the major. If a student completes more than 6 of the last 30 hours at another college, they must complete additional KU course work to graduate. Transfer courses must be completed with a C or higher. Always check with your advisor concerning enrollment as part of the last 30 hours of your degree.

Transfer of Credit
CredTran (http://credittransfer.ku.edu/) is an undergraduate transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If a student’s school or course is not listed, the evaluation will be completed when the student is admitted to KU.

Courses completed at other institutions are accepted to fulfill graduation requirements (e.g., in place of specifically prescribed courses) only if they are substantially equivalent as indicated by course description, hours of credit, and prerequisites. For courses not listed on CredTran (http://credittransfer.ku.edu/), the student must submit a petition along with a course syllabus to the School of Professional Studies. Petition forms are available by contacting a School of Professional Studies academic success coach (https://edwardscampus.ku.edu/program-advisors/).

Only transfer grades of C- or higher apply toward graduation from the School of Professional Studies.

Graduate Regulations
It is the students’ responsibility to comply with all requirements for the degree programs in which they plan to participate. These include the University requirements for graduate study at KU outlined in the Graduate Studies sections of the KU Policy Library (http://www.policy.ku.edu/), the University Senate Rules and Regulations (https://catalog.ku.edu/regulations/), the Graduate Studies (https://catalog.ku.edu/graduate-studies/) sections of the online catalog, as well as the requirements of the School of Professional Studies outlined in this catalog section. Additionally, students are responsible for understanding the requirements that are unique to individual graduate programs listed herein.

To ensure student support navigating these processes, all students in the School of Professional Studies will work with an academic success coach (https://edwardscampus.ku.edu/student-services/program-info/) through their time at KU. Coaches work with students from the admissions process through graduation. To connect with your coach, contact 913-897-8539 or visit https://edwardscampus.ku.edu/student-services/program-info#coach (https://edwardscampus.ku.edu/student-services/program-info/#coach).

Admission
Graduate Studies defines the eligibility and admission criteria (https://catalog.ku.edu/graduate-studies/#admissiontext) for different categories of admission to graduate study at the University of Kansas. Further details of program specific admission, provisional admission, and readmission information can be found at https://edwardscampus.ku.edu/school-professional-studies/.

Enrollment
Full-time, Half-Time and Part-Time Enrollment
Please see the Full-time Enrollment policy in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for the definitions of full-time, half-time, and part-time enrollment.

Maximum enrollment for graduate students in the School of Professional Studies is 16 hours in Fall or Spring semester and 9 hours in the Summer session. Students may appeal to their program for exceptions.

At a minimum, all graduate students must be continuously enrolled in the Fall and Spring semesters while completing the requirements for fulfillment of their degree. Please consult the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for other enrollment regulations.

Probation and Dismissal Guidelines
To be in good standing, a student must maintain a 3.0 cumulative grade-point average and be making satisfactory progress toward the degree, as determined by Graduate Studies’ Good Academic Standing policy and the department or program’s internal guidelines. The Good Academic Standing policy may be found in the Graduate Studies (https://
Probation Due to GPA

In any semester, a student whose cumulative GPA has fallen below a 3.0 is automatically placed on academic probation for the following semester (Fall or Spring). Students are notified by the School of Professional Studies of their probationary status. Students are removed from probation once the 3.0 CUM GPA is regained. Once a student is on probation they must maintain at least a 3.0 semester (Fall, Spring, Summer) GPA to maintain progress towards removal from probation. Failure to do so will result in a review that could result in dismissal.

Dismissal

It is the academic unit’s responsibility to ensure that students who are not demonstrating academic achievement sufficient to meet the requirements of a School of Professional Studies graduate degree are dismissed from their programs. This typically occurs when a student fails to meet the terms of the probationary period. Academic dismissal should occur immediately following a student’s failure to meet the terms of the probationary period. The School will notify the student in writing of the reasons for their dismissal.

A student who has been dismissed from a graduate program at KU is not eligible for readmission to graduate study in any department or program at the University of Kansas. A student may petition for an exception. The petition must be approved by the department to which the student intends to apply, the graduate division of the College, and the Dean of Graduate Studies. Such petitions are rarely approved.

University Regulations on Grading

Article II of the University Senate Rules and Regulations provides detailed information on regulations governing the grading of graduate coursework. Students should also consult the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for more information on the Grading Policy.

Time Limits

The University has established time limits governing various stages of the graduate student career.

Maximum Time to Count Required Course Work

Courses completed at the University of Kansas, or transfer credits from another university, are valid for a period of 10 years. With the endorsement of their graduate programs, students may petition the School to accept out-of-date course work to fulfill the requirements for their graduate degrees, provided they are able to justify why this course work meets the current standards of scholarship in the discipline.

Maximum Time to Complete the Degree

Graduate Studies has established time limits on master’s and doctoral degree completion. Please see Graduate Studies policies on Doctoral Program Time Constraints and Master's Program Time Constraints in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) sections of the online catalog and in the KU Policy Library (http://policy.ku.edu/) for full details. Master's degree students have a total of seven calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, in which to complete the work for a master’s degree.

A time limit extension may be granted by the School. All extension petitions require the department to prepare and submit a Graduate Degree Completion Agreement, which must then be approved by the School of Professional Studies Academic Council. Per Graduate Studies policy, extensions may be granted for up to 1 year. However, additional time may be requested in the Completion Agreement. If a Completion Agreement with a timeline greater than one year is approved, the department must submit a renewal petition annually after the first year until the Completion Agreement has ended. Renewal petitions must indicate the student’s progress on the Completion Agreement and will receive expedited review.

Academic units may set their own, more rigorous time limits. Consult with your advisor and review your academic unit’s handbook and the relevant Departments and Programs section of the online catalog for program-specific information, requirements, and restrictions.

Academic and Research Integrity

The School of Professional Studies strictly enforces KU and School policies on academic and scholarly misconduct. Academic integrity requires honest performance of academic and research responsibilities by students. These include, but are not limited to, ethical preparation of assignments, reports, and research papers; completion of examinations; ethical treatment of human and animal subjects; execution of administrative requirements; and a sincere and conscientious effort by students to abide by the policies set forth by instructors and research advisors. See the School of Professional Studies website (https://edwards-campus.ku.edu/school-professional-studies/) for procedures for misconduct and grievances.

Graduation

All graduate students must be enrolled the semester they complete all degree requirements.

Graduate Studies establishes an early deadline for degree completion for each semester and summer session, usually occurring at the end of the first 2 weeks of a semester or the end of the first week of summer session. If the student was enrolled the previous semester and meets all degree requirements including the submission of all required documentation by the early deadline, they are not required to enroll for that semester.

The final Graduate Application for Graduation deadline is set by the Registrar for each semester. Please consult the official Academic Calendar (https://registrar.ku.edu/calendar/) for specific dates. To be eligible for graduation, an application for degree must be submitted and all degree requirements met by this deadline. This includes the submission of all required documentation to the School of Professional Studies.

Career

The School of Professional Studies and KU Edwards Campus (https://edwards-campus.ku.edu/student-services/career-skills/) is committed to helping you accomplish your career goals, and offers resources to help you find career solutions on how to navigate the career change process, career mobility, and/or develop strategies for that first career conversation.
University Career Center

The University Career Center (https://career.ku.edu/), Summerfield Hall, Room 206, (785-864-3624), provides career counseling and services for all KU students, including students in the School of Professional Studies, both in person as well as online through Jayhawk Ready (https://edwards campus.ku.edu/student-services/career-skills/).

Courses

ASLD 311. Introduction to Deaf Studies. 3 Credits.
Students in the course will learn about the world of the deaf in America, deaf culture, the education of deaf children, useful technology, and the integration of deaf people into the American society. This introductory course is for students interested in fields, such as audiology; speech-language pathology; medicine; education; school, rehabilitation and mental health counseling; psychology; interpreting; ASL and deaf studies; and for anyone with a deaf person in his or her life. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 611.

ASLD 312. Intersectionality and Deaf Communities. 3 Credits.
This course brings students to the next level of understanding of the impact and role of various identities within the Deaf communities on the international and national levels, following the framework of intersectionality. Intersectionality conceptualizes the various identities, ethnicities, linguistic uses and experiences of persons, groups of people, or social problems in the world of deaf. Intersectionality looks at deaf people's overlapping identities and experiences in order to understand the complexity of prejudices they face due to their deaf, race, class, gender, sexual orientation, religion, and other identity markers. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 612.

ASLD 313. Social Justice and Allyship with Deaf Communities. 3 Credits.
Students are introduced to the concept of allyship as one of the tenets of social justice and the process of allyship and social justice in the Deaf communities. Allyship involves support and empowerment of individuals or people experiencing oppression. Within the Deaf communities, there are varieties of Deaf individuals or peoples, such as Deaf Blacks, Deaf Native Americans, and LGBTQI. Students will learn what it means to be an ally, a process of social justice. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 613. Prerequisite: ASLD 311 or instructor permission.

ASLD 414. Historical Foundations of Deaf Education. 3 Credits.
This course engages in the study of the development of deaf educational policy, practice, and theory in relation to changes in social institutions and thought regarding language, education and cultural and medical models in the education of and for the deaf. It focuses on the analysis of contemporary deaf educational problems in the light of historical perspectives. This course is offered at the 400 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 614.

ASLD 428. Special Topics in Deaf Studies: _______. 3 Credits.
Students will gain an in depth understanding of the social life of deaf people by choosing an area of focus. Since this is a special topics course, students interested in gaining knowledge through research about deaf social life, will choose a timely area of study in a field, such as anthropology, economics, geography, history, political science, psychology, and sociology. An example of a timely area of study in Deaf Studies is Deaf gain. Through an individualized course design, students may choose the approach of immersion in Deaf community, defined literature review, or other activity to gain an in depth understanding. This course is offered at the 400 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 628 if topic is the same.

ASLD 450. Independent Study. 1-3 Credits.
Investigation of a special research problem or directed reading in an area not covered in regular courses. No more than 6 hours of ASLD 450 may be counted toward the minimum hours required for the major. Prerequisite: Instructor consent.

ASLD 451. Directed Readings. 1-3 Credits.
This course is designed for the study of special topics related to American Sign Language and Deaf Studies at the Junior/Senior level. Prerequisite: Instructor consent.

ASLD 501. Introduction to the ASL/English Interpreting Profession. 3 Credits.
This course provides an introduction to interpreting as an occupation. Students will come to understand the history of interpreting along with the importance of interpersonal communication skills, professional ethics, parameters of responsibilities, community resources and legal ramifications as they relate to the interpreter. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 701.

ASLD 502. Theories of Interpreting: Co-Constructions of Meaning. 3 Credits.
This course provides an introduction to current theories in the processes of translation and interpreting through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply several theoretical constructs as they perform intra- and inter-lingual exercises. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 702. Prerequisite: ASLD 501 or ASLD 701 and ASLD 521 or 721 with a minimum of a C; B recommended or Instructor Approval.

ASLD 505. American Sign Language V (ASL V). 3 Credits.
This course is the expanded study of ASL IV with emphasis on increased conversation skills, vocabulary, storytelling, knowledge of Deaf culture and the Deaf community. Vocabulary is enhanced through the introduction of various content areas dealing with current events, world affairs, literature, the arts and abstract ideas. Students participate in group discussions, speculate, make analogies, give instructions, and express feelings and intentions. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 705. Prerequisite: ASL IV with minimum grade of C or instructor approval.

ASLD 506. American Sign Language VI (ASL VI). 3 Credits.
This course is continuing from ASLD 505 ASL V. Students focus on discourse, variation in sign language use, and understanding how the Deaf community is part of a linguistic and cultural minority. Topics that will be covered include perspectives on Deafhood, attitudes toward Deaf people and signed languages, technology and communication. Students will expand on vocabulary by working on areas of advanced subject matter, application of non-manual markers, use of classifiers, and proper pronominalization. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 706. Prerequisite: ASLD 505 or ASLD 705 with minimum grade of C or instructor approval.

ASLD 520. American Sign Language Linguistics. 3 Credits.
In this course, students take an analytical approach to language and the field of linguistics as it applies to American Sign Language. ASL
phonology, morphology, syntax, semantics, bilingualism, language use and usage will be examined and discussed. Language samples will be viewed and analyzed for evidence of different language structures and forms. Students will also read and critique research articles pertaining to ASL and other signed languages. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 720. Prerequisite: ASL IV or instructor approval.

ASLD 521. Discourse Analysis of ASL. 3 Credits.
This course focuses on analysis of ASL Discourse structure and features, such as use of space for cohesion, depiction, discourse markers, and use of classifiers. The course also focuses on the use of ASL discourse in formal and informal settings. Students study the genres of dialogues, public speaking, artistic expression, debate, persuasive and narrative styles in ASL. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 721. Prerequisite: ASL V with a minimum grade of C; B recommended or instructor approval.

ASLD 523. ASL Pragmatics and Syntax. 3 Credits.
This course will focus on the study of syntactic structure and its interaction with meaning. Word order, lexical categories, sentence types, clause structure, topicalization and sentences with transitive, intransitive and agreement verbs are studied. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 723. Prerequisite: ASLD 520 or ASLD 720.

ASLD 524. Visual-Gestural Communication. 3 Credits.
Students will develop capabilities in non-verbal communication and visual gestural communication utilizing the study of gestures as a form of communication and basis for visual language. Emphasis is on learning to think visually in pictures and building production and comprehension communication skills. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 724. Prerequisite: ASLD 520 or ASLD 720.

ASLD 530. American Sign Language Literature. 3 Credits.
This course will provide basic introduction, discussion, and demonstration of literature in American Sign Language (ASL). Such literature involves ASL Poetry, ASL Storytelling/ Narratives, Deaf Humor, Deaf Folklore and other genres that have been passed on from one generation to another by culturally Deaf people. Students will receive, analyze and retell a variety of ASL literature. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 730. Prerequisite: ASL IV or instructor approval.

ASLD 588. Internship in American Sign Language and Deaf Studies. 1-3 Credits.
This course provides opportunities for students to have direct interaction with Deaf, Hard of Hearing, DeafBlind community members in order to apply cultural, linguistic and power/privilege concepts learned in the classroom. Students must complete 50 hours per credit hour. Schedule will be determined by student and instructor. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 788. Prerequisite: Instructor approval.

ASLD 589. Research Experience in American Sign Language and Deaf Studies. 3 Credits.
This course guides the students in reading, understanding and evaluating current research in ASL, Deaf Studies, ASL/English interpreting and related fields. Students will learn how to publish a paper and present a poster on a chosen topic of their interest. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 789. Prerequisite: Instructor approval.

ASLD 603. Interpreting: Mediated Interactions in Communications. 3 Credits.
This course provides an introduction to real-time interpreting in mediated interaction contexts through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories, decision-making and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 803. Prerequisite: ASLD 501 or ASLD 701, ASLD 502 or ASLD 702 with a minimum grade of B or instructor approval.

ASLD 604. Interpreting: ASL to English. 3 Credits.
This course provides an introduction to real-time interpreting with an emphasis on ASL source materials through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 804. Prerequisite: ASLD 502 or ASLD 702 with minimum grade of B or instructor approval.

ASLD 605. Interpreting: English to ASL. 3 Credits.
This course provides an introduction to real-time interpreting with an emphasis on English source materials through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 805. Prerequisite: ASLD 502 or ASLD 702 with minimum grade of B or instructor approval.

ASLD 606. Interpreting: Diverse Communities. 3 Credits.
This course examines language, culture and identity and the implications when interpreting among diverse populations. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 806. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval.

ASLD 607. Ethics and Professionalization for Interpreters. 3 Credits.
This course examines ethics as it relates to the work of interpreting through study of ethical codes of conduct, models of decision-making and elements of becoming an ethical professional. Students will come to understand the complexities of ethical decision-making and the importance of self-awareness, reflective practice and responsibility as they consider implications on micro and macro levels. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 607. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval.

ASLD 608. ASL/English Interpreting Observation Practicum. 1-6 Credits.
This practicum requires a minimum of 50 hours of observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and in-service training) in authentic settings where interpreters are employed. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Prerequisite: ASLD 502 or ASLD 702 with a minimum grade of B or instructor approval.

ASLD 609. Practicum in American Sign Language Interpreting. 1-6 Credits.
This practicum requires 250 hours of field experience which may include observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and
in-service training) in authentic settings where interpreters are employed. A minimum of 90 hours will be direct provision of interpreting under the supervision of a certified interpreter. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Students will consult with their advisor prior to enrolling in the course. Students are required to complete a minimum of 3 credit hours to complete the ASLD 609 requirements. This 250 hour practicum may be completed in one semester by enrolling in 3 credit hours, or can be completed over multiple semesters. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 809. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805, ASLD 608 or ASLD 808 with a minimum grade of a B, and completion of an interpreting proficiency exam or instructor approval.

**ASLD 610. Psychological Effects of Interpreting. 3 Credits.**
This course examines both affective and cognitive psychological effects on interpreting practitioners. The importance of self-care, reflective practice, case-conferencing; as well as vicarious trauma, compassion fatigue, role-space, power and privilege are among topics discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 810. Prerequisite: ASLD 502 or ASLD 702 or instructor approval.

**ASLD 611. Introduction to Deaf Studies. 3 Credits.**
Students in the course will learn about the world of the deaf in America, deaf culture, the education of deaf children, useful technology, and the integration of deaf people into the American society. This introductory course is for students interested in fields, such as audiology; speech-language pathology; medicine; education; school, rehabilitation and mental health counseling; psychology; interpreting; ASL and deaf studies; and for anyone with a deaf person in his or her life. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 311. Prerequisite: Graduate standing or Instructor permission.

**ASLD 612. Intersectionality and Deaf Communities. 3 Credits.**
This course brings students to the next level of understanding of the impact and role of various identities within the Deaf communities on the international and national levels, following the framework of intersectionality. Intersectionality conceptualizes the various identities, ethnicities, linguistic uses and experiences of persons, groups of people, or social problems in the world of deaf. Intersectionality looks at deaf people's overlapping identities and experiences in order to understand the complexity of prejudices they face due to their deaf, race, class, gender, sexual orientation, religion, and other identity markers. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 312. Prerequisite: Graduate standing or Instructor permission.

**ASLD 613. Social Justice and Allyship with Deaf Communities. 3 Credits.**
Students are introduced to the concept of allyship as one of the tenets of social justice and the process of allyship and social justice in the Deaf communities. Allyship involves support and empowerment of individuals or people experiencing oppression. Within the Deaf communities, there are varieties of Deaf individuals or peoples, such as Deaf Blacks, Deaf Native Americans, and LGBTQI. Students will learn what it means to be an ally, a process of social justice. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 313. Prerequisite: ASLD 311, ASLD 611 or Instructor permission.

**ASLD 614. Historical Foundations of Deaf Education. 3 Credits.**
This course engages in the study of the development of deaf educational policy, practice, and theory in relation to changes in social institutions and thought regarding language, education and cultural and medical models in the education of and for the deaf. It focuses on the analysis of contemporary deaf educational problems in the light of historical perspectives. This course is offered at the 400 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 414. Prerequisite: Graduate standing or Instructor permission.

**ASLD 615. Business Practices for Interpreters. 3 Credits.**
This course will provide students an introduction to business practices for interpreters. Concepts explored will include resume development, interview skills, invoicing, record keeping for tax purposes, certification maintenance and licensure renewal, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 815. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or Instructor approval.

**ASLD 616. Interpreting: Dynamic Paralinguistic Demands. 3 Credits.**
This course examines a variety of paralinguistic demands in the context of interpreting. Types of demands will include emotional communication, accents, regional dialects, physical and mental factors (Cerebral Palsy, injuries, etc.), fast paced communication, etc. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 816. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or Instructor approval.

**ASLD 626. Topics in ASL Vocabulary and Discourse: _____ 3 Credits.**
This course will expand the interpreter training students' vocabulary related to specialized fields and technical contexts. Students will enhance terminology in medical, mental health, education, religion, sex, drugs/ alcohol and strong language/culturally rich ASL. Students' development of comprehension and production skills in common formal and informal settings will be emphasized. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 826 if topic is the same. Prerequisite: ASL IV or Instructor approval.

**ASLD 628. Special Topics in Deaf Studies: _____ 3 Credits.**
Students will gain an in-depth understanding of the social life of deaf people by choosing an area of focus. Since this is a special topics course, students, interested in gaining knowledge through research about deaf social life, will choose a timely area of study in a field, such as anthropology, economics, geography, history, political science, psychology, and sociology. Through an individualized course design, students may choose the approach of immersion in Deaf community, defined literature review, or other activity to gain an in depth understanding. This course is offered at the 400 and 800 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 428 if topic is the same. Prerequisite: Graduate standing or Instructor permission.

**ASLD 631. Advanced American Sign Language Literature. 3 Credits.**
This course analyzes and compares the various genres of American Sign Language literature. ASL poetry, narrative, humor, as well as written work by Deaf individuals and other language devices will be examined and discussed. Students will create and evaluate original work illustrating the similarities and uniqueness of ASL. Students will become familiar with well-known contributors such as: Clayton Valli, Patrick Graybill, Ella Mae
Lentz, and the like. Research articles pertaining to ASL or Deaf Literature will be critiqued and discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 831. Prerequisite: ASLD 530 or ASLD 730.

ASLD 638. Topics in Interpreting: ______. 3 Credits.
This course provides the opportunity for experimentation with innovative course content and learning strategies in accordance with guidelines established by faculty. Topics include interpreting in specialized settings, current trends, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 838 if topic is the same. Prerequisite: ASL 603 or ASL 803, ASL 604 or ASL 804, ASL 605 or ASL 805 or instructor approval.

ASLD 701. Introduction to the ASL/English Interpreting Profession. 3 Credits.
This course provides an introduction to interpreting as an occupation. Students will come to understand the history of interpreting along with the importance of interpersonal communication skills, professional ethics, parameters of responsibilities, community resources and legal ramifications as they relate to the interpreter. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 501.

ASLD 702. Theories of Interpreting: Co-Constructions of Meaning. 3 Credits.
This course provides an introduction to current theories in the processes of translation and interpreting through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply several theoretical constructs as they perform intra- and interlingual exercises. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 502. Prerequisite: ASLD 501 or ASL 701 and ASL 521 or 721 with a minimum of a C; B recommended or Instructor Approval.

ASLD 705. American Sign Language V (ASL V). 3 Credits.
This course is the expanded study of ASL IV with emphasis on increased conversation skills, vocabulary, storytelling, knowledge of Deaf culture and the Deaf community. Vocabulary is enhanced through the introduction of various content areas dealing with current events, world affairs, literature, the arts and abstract ideas. Students participate in group discussions, speculate, make analogies, give instructions, and express feelings and intentions. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 505. Prerequisite: ASL IV with minimum grade of C or instructor approval.

ASLD 706. American Sign Language VI (ASL VI). 3 Credits.
This course is continuing from ASLD 705 ASL V. Students focus on discourse, variation in sign language use, and understanding how the Deaf community is part of a linguistic and cultural minority. Topics that will be covered include perspectives on Deafhood, attitudes toward Deaf people and signed languages, technology and communication. Students will expand on vocabulary by working on areas of advanced subject matter, application of non-manual markers, use of classifiers, and proper pronominalization. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 506. Prerequisite: ASL 505 or ASL 705 with minimum grade of C or instructor approval.

ASLD 720. American Sign Language Linguistics. 3 Credits.
In this course, students take an analytical approach to language and the field of linguistics as it applies to American Sign Language. ASL phonology, morphology, syntax, semantics, bilingualism, language use and usage will be examined and discussed. Language samples will be viewed and analyzed for evidence of different language structures and forms. Students will also read and critique research articles pertaining to ASL and other signed languages. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 520. Prerequisite: ASLV IV or instructor approval.

ASLD 721. Discourse Analysis of ASL. 3 Credits.
This course focuses on analysis of ASL discourse structure and features, such as use of space for cohesion, depiction, discourse markers, and use of classifiers. The course also focuses on the use of ASL discourse in formal and informal settings. Students study the genres of dialogues, public speaking, artistic expression, debate, persuasive and narrative styles in ASL. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 521. Prerequisite: ASLV V with a minimum grade of B or instructor approval.

ASLD 723. ASL Pragmatics and Syntax. 3 Credits.
This course will focus on the study of syntactic structure and its interaction with meaning. Word order, lexical categories, sentence types, clause structure, topicalization and sentences with transitive, intransitive and agreement verbs are studied. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 523. Prerequisite: ASLD 520 or ASL 720.

ASLD 724. Visual-Gestural Communication. 3 Credits.
Students will develop capabilities in non-verbal communication and visual gestural communication utilizing the study of gestures as a form of communication and basis for visual language. Emphasis is on learning to think visually in pictures and building production and comprehension communication skills. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 524. Prerequisite: Graduate standing or Instructor permission.

ASLD 730. American Sign Language Literature. 3 Credits.
This course will provide basic introduction, discussion, and demonstration of literature in American Sign Language (ASL). Such literature involves ASL Poetry, ASL Storytelling/ Narratives, Deaf Humor, Deaf Folklore and other genres that have been passed on from one generation to another by culturally Deaf people. Students will receive, analyze and retell a variety of ASL literature. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 530. Prerequisite: Graduate standing or Instructor permission.

ASLD 788. Internship in American Sign Language and Deaf Studies. 1-3 Credits.
This course provides opportunities for students to have direct interaction with Deaf, Hard of Hearing, Deaf Blind community members in order to apply cultural, linguistic and power/privilege concepts learned in the classroom. Students must complete a minimum of 50 hours per credit hour. Schedule will be determined by student and instructor. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 588. Prerequisite: Instructor approval.

ASLD 789. Research Experience in American Sign Language and Deaf Studies. 3 Credits.
This course guides the students in reading, understanding and evaluating current research in ASL, Deaf Studies, ASL/English interpreting and related fields. Students will learn how to publish a paper and present a poster on a chosen topic of their interest. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 589. Prerequisite: Instructor approval.

ASLD 803. Interpreting: Mediated Interactions in Communications. 3 Credits.
This course provides an introduction to real-time interpreting in mediated interaction contexts through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories, decision-making and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 603. Prerequisite: ASLD 501 or ASLD 701, ASLD 502 or ASLD 702 with a minimum grade of B or instructor approval.

ASLD 804. Interpreting: ASL to English. 3 Credits.
This course provides an introduction to real-time interpreting with an emphasis on ASL source materials through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 604. Prerequisite: ASLD 502 or ASLD 702 with minimum grade of B or instructor approval.

ASLD 805. Interpreting: English to ASL. 3 Credits.
This course provides an introduction to real-time interpreting with an emphasis on English source materials through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 605. Prerequisite: ASLD 502 or ASLD 702 with minimum grade of B or instructor approval.

ASLD 806. Interpreting: Diverse Communities. 3 Credits.
This course examines language, culture and identity and the implications when interpreting among diverse populations. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 606. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval.

ASLD 807. Ethics and Professionalization for Interpreters. 3 Credits.
This course examines ethics as it relates to the work of interpreting through study of ethical codes of conduct, models of decision-making and elements of becoming an ethical professional. Students will come to understand the complexities of ethical decision-making and the importance of self-awareness, reflective practice and responsibility as they consider implications on micro and macro levels. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 607. Prerequisite: ASLD 603 or ASLD 803 or instructor approval.

ASLD 808. ASL/English Interpreting Observation Practicum. 1-6 Credits.
This practicum requires a minimum of 50 hours of observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and in-service training) in authentic settings where interpreters are employed. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Students will consult with their advisor prior to enrolling in the course. Each credit hour requires at least 50 hours of field experience. Prerequisite: ASLD 502 or ASLD 702 with a minimum grade of a B or instructor approval.

ASLD 809. Practicum in American Sign Language Interpreting. 1-6 Credits.
This practicum requires 250 hours of field experience which may include observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and in-service training) in authentic settings where interpreters are employed. A minimum of 90 hours will be direct provision of interpreting under the supervision of a certified interpreter. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Students will consult with their advisor prior to enrolling in the course. Students are required to complete a minimum of 3 credit hours to complete the ASLD 809 requirements. This 250 hour practicum may be completed in one semester by enrolling in 3 credit hours, or can be completed over multiple semesters. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 609. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805, ASLD 608 or ASLD 808 with a minimum grade of a B, and completion of an interpreting proficiency exam or instructor approval.

ASLD 810. Psychological Effects of Interpreting. 3 Credits.
This course examines both affective and cognitive psychological effects on interpreting practitioners. The importance of self-care, reflective practice, case-conferencing; as well as vicarious trauma, compassion fatigue, role-space, power and privilege are among topics discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 610. Prerequisite: ASLD 502 or ASLD 702 or instructor approval.

ASLD 815. Business Practices for Interpreters. 3 Credits.
This course will provide students an introduction to business practices for interpreters. Concepts explored will include resume development, interview skills, invoicing, record keeping for tax purposes, certification maintenance and licensure renewal, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 615. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval.

ASLD 816. Interpreting: Dynamic Paralinguistic Demands. 3 Credits.
This course examines a variety of paralinguistic demands in the context of interpreting. Types of demands will include emotional communication, accents, regional dialects, physical and mental factors (Cerebral Palsy, injuries, etc.), fast paced communication, etc. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 616. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval.

ASLD 826. Topics in ASL Vocabulary and Discourse: _____.
This course will expand the interpreter training students’ vocabulary related to specialized fields and technical contexts. Students will enhance terminology in medical, mental health, education, religion, sex, drugs/ alcohol and strong language/culturally rich ASL. Students’ development of comprehension and production skills in common formal and informal settings will be emphasized. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 626 if topic is the same. Prerequisite: ASL IV or instructor approval.

ASLD 831. Advanced American Sign Language Literature. 3 Credits.
This course analyzes and compares the various genres of American Sign Language literature. ASL poetry, narrative, humor, as well as written work by Deaf individuals and other language devices will be examined and discussed. Students will create and evaluate original work illustrating the similarities and uniqueness of ASL. Students will become familiar with
well-known contributors such as: Clayton Valli, Patrick Graybill, Ella Mae Lentz, and the like. Research articles pertaining to ASL or Deaf Literature will be critiqued and discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 631. Prerequisite: ASLD 530 or ASLD 730.

**ASLD 383. Topics in Interpreting:** ______. 3 Credits.
This course provides the opportunity for experimentation with innovative course content and learning strategies in accordance with guidelines established by faculty. Topics include interpreting in specialized settings, current trends, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 638 if topic is the same. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval.

**Courses**

**BSCI 350. Genetics. 4 Credits. N**
Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian genetics and mapping; control of gene expression; cytotgenetics; epigenetics and non-Mendelian genetics; and population and quantitative genetics. Examples are taken from a wide variety of organisms, including viruses, bacteria, plants, fungi, insects, and humans. Not open to students with credit in BIOL 350. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher; or consent of instructor.

**BSCI 351. Genetics Laboratory. 3 Credits. U**
A laboratory course that provides hands-on experience with classical genetics and modern molecular genetics. Experiments involve Mendelian genetics (dominance/recessivity, complementation, segregation, independent assortment) in eukaryotic organisms; recombinant DNA; basic bacterial genetics; polymerase chain reaction; DNA sequencing; and computational genetics. Not open to students with credit in BIOL 405. Prerequisite: Concurrent or prior enrollment in BSCI 350 or BIOL 350.

**BSCI 400. Microbiology. 3 Credits. N**
The course focuses on the structure and function of prokaryotic cells and viruses, cultivation, growth and death of bacteria, microbial metabolism, basic immunology, microbial ecology, and the diversity and classification of organisms that the field encompasses. Not open to students with credit in BIOL 400 or BIOL 401. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher and two semesters of college chemistry with a grade of C- or higher, or consent of the instructor.

**BSCI 401. Microbiology Laboratory. 3 Credits. U**
The BSL-2 laboratory focuses on developing techniques and skills to grow, manipulate, and handle microscopic organisms (specifically bacteria) using aseptic techniques and various types of growth media to grow, manipulate, and handle microscopic organisms. In addition, students will learn how to use a microscope and perform several immunological tests (such as agglutination and ELISA) to identify microbes. During the course, students will become familiar with many human health and environmentally related bacterial groups and species, some of which are disease-causing. Not open to students with credit in BIOL 402. Prerequisite: Previous or concurrent enrollment in BSCI 400 or BIOL 400.

**BSCI 416. Cell Structure and Function. 3 Credits. N**
The course focuses on molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Not open to students with credit in BIOL 416. Prerequisite: BIOL 150 or BIOL 151; BSCI 350 or BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; or consent of the instructor.

**BSCI 417. Developmental Biology. 3 Credits. N**
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Not open to students with credit in BIOL 417. Prerequisite: BSCI 350 or BIOL 350 and BSCI 416 or BIOL 416 or consent of the instructor.

**BSCI 421. Topics in Applied Biological Sciences: _____. 3 Credits. N**
Lecture instruction and the preparation and presentation of oral and written reports on selected topics from the recent research literature in molecular biosciences. Students may enroll in a given topic only once. Prerequisite: Course work varying with the topic of the seminar; or consent of instructor.

**BSCI 430. Molecular Biology Laboratory. 3 Credits. U**
Practical experience in recombinant DNA technology and molecular cloning. Not open to students with credit in BIOL 430. Prerequisite: BSCI 416 or BIOL 416 or a course in biochemistry or microbiology.

**BSCI 435. Neurobiology. 3 Credits. N**
The focus for this course will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Not open to students with credit in BIOL 435. Prerequisite: BSCI 350 or BIOL 350 and BSCI 416 or BIOL 416 or consent of the instructor.

**BSCI 490. Internship and Practical Applications. 1-6 Credits. N**
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of instructor.

**BSCI 503. Immunology. 3 Credits. N**
A molecular and cellular based approach to understanding the immune system by characterizing both the innate and adaptive immune systems and their functions. Emphasis is placed on the adaptive immune response, including humoral immunity and cell-mediated immunity, antigens and antigen recognition, immunoglobulins, B cell and T cell development, activation, and differentiation, and the effector functions of these different cells and branches of the immune system to create a comprehensive response to defend the body against pathogens. Other topics include immune system dysfunction (hypersensitivities, autoimmunity, and immunodeficiencies) as well as vaccine mechanisms. Not open to students with credit in BIOL 503. Prerequisite: BSCI 400, BIOL 400 or BIOL 401, or consent of instructor.

**BSCI 506. Bacterial Infectious Diseases. 3 Credits. N**
Explores bacterial infectious diseases from the perspective of how disease is established and the mechanisms that underlie disease, as well as how to treat and prevent infectious disease. Not open to students with
credit in BIOL 506. Prerequisite: BSCI 400, BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor.

BSCI 512. Virology. 3 Credits. N
Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host cell-viral interactions; mode of replication of DNA and RNA viruses, tumor viruses. Not open to students with credit in BSCI 512. Prerequisite: BSCI 400, BIOL 400, or BIOL 401 with a grade of C- or higher, or consent of instructor.

BSCI 546. Mammalian Physiology. 3 Credits. N
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Not open to students with credit in BSCI 546. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and CHEM 330 or consent of instructor.

BSCI 599. Senior Seminar: ______. 1 Credits. N
A synthesis and discussion of current trends in the biological sciences as it relates to student interests and career paths. Emphasis is placed on providing seniors with an appreciation of the discipline's state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences by using peer-reviewed research papers to work on communication and presentation of scientific topics to different audiences. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences.

BSCI 600. Biochemistry. 3 Credits. N
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Not open to students with credit in BIOL 600. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry.

BSCI 601. Biochemistry Laboratory. 2 Credits.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Not open to students with credit in BIOL 601. Prerequisite: Corequisite: BIOL 600 or BSCI 600; or consent of instructor.

BSCI 612. Microbiology. 3 Credits. N
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BSCI 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Not open to students with credit in BSCI 612. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor.

Courses

BTEC 300. Research Methods in Biotechnology. 3 Credits. N
An integrated lecture and laboratory course exploring the science and basic laboratory skills used in food science, agricultural science, pharmaceutical science, clinical medicine, animal health, and environmental science. Survey of career opportunities in biotechnology. Guest lectures from field-experts in biotechnology. Prerequisite: BIOL 152; concurrent or prior enrollment in CHEM 330; or consent of instructor.

BTEC 305. Molecular and Microbiological Techniques. 4 Credits. N
An integrated lecture and laboratory course exploring the fundamentals of current trends in the biological sciences as it relates to student interests and career paths. Emphasis is placed on providing seniors with an appreciation of the discipline's state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences by using peer-reviewed research papers to work on communication and presentation of scientific topics to different audiences. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences.

BTEC 400. Applied Immunology. 3 Credits. N
An integrated lecture and laboratory course exploring the fundamentals of immunology. The course focuses on developing a conceptual knowledge of the constituents and processes of the immune system. Students will develop a functional understanding of how to operate and apply current immunology-based techniques. Laboratory activities will explore the use of immunological tools for research, discovery, and analysis of processes and experimental compounds. Prerequisite: BTEC 300; BTEC 305; or consent of instructor.

BTEC 424. Independent Study in Biotechnology. 3 Credits. N
Independent project at a related bioscience industry partner or faculty in selected topics of current translational research interest. May be undertaken only with the consent of the major advisor who will guide the research after determining objectives with the interested industry partner or faculty. Prerequisite: Consent of instructor.

BTEC 441. Principles of Bioprocessing Laboratory II. 1 Credits. N
Mammalian cell culture techniques, principles of bioreactor operations and purification techniques, and calibration. The primary goal of this course is to provide students with an advanced background in mammalian upstream and downstream biotechnology. Prerequisite: BTEC 341; BTEC 440 or concurrent enrollment in BTEC 440.

BTEC 475. Applied Separation Science and Quantitative Analysis. 6 Credits. N
An integrated lecture and laboratory course exploring the fundamentals of separation science and quantitative analysis of small molecules, peptides, and proteins. Students will be challenged to develop a functional understanding of the theory and application of sample preparation, separation technologies, and methods for quantification. Prerequisite: BTEC 300; or consent of instructor.
BTEC 494. Selected Topics in Biotechnology. 1 Credit. N

A synthesis and discussion of current trends related to biotechnology. Emphasis is placed on providing students with an awareness of advances on the leading edge of discovery, critically analyzing data, and developing skills for success in the next stage of a career in biotechnology. This course can be repeated for up to 2 credit hours. Prerequisite: Concurrent or prior enrollment in BTEC 300; or consent of instructor. Students must be in their junior or senior year of a biology-related degree.

BTEC 501. Biotechnology Ethics and Responsible Conduct of Research. 3 Credits. N

Student investigations and discussions of current controversial issues in biotechnology. This course emphasizes thinking about new technologies in a rational and thoughtful way. Prerequisite: BTEC 300.

BTEC 540. Biotechnology Capstone I. 3 Credits. N

A project-based course that challenges students to develop, plan, execute, and communicate the results of a biotech-related project. Students will be guided through the initial stages of project design, project management, logistics, and technical training necessary to complete their project. This course is the first of a two semester series (BTEC 540 & BTEC 640). Prerequisite: BTEC 305; BTEC 475; concurrent or prior enrollment in BIOL 600; or consent of instructor.

BTEC 547. Bioanalytical Lab. 2 Credits. N

Analytical methods used for testing biotherapeutics are examined. Emphasis is placed on assessing protein concentration, purity, identity and activity. The importance of sample processing, throughput and level of validation are explored as samples from upstream processing, downstream processing and final bulk are interrogated. Students also learn key concepts used to validate the performance of analytical methods. Prerequisite: BTEC 300.

BTEC 550. Applied Bioinformatics. 2 Credits. N

Overview of the fields of bioinformatics and genomics. Topics, tools, issues and current trends in these and related fields are discussed. Principles and practical application of bioinformatics tools in molecular biology, genetics, and electronic medical records are evaluated. The haploid human genome occupies a total of just over 3 billion DNA base pairs. The medical records of a population contain clues concerning better identification and treatment of disease. This information is not contained in books, but stored in electronic databases. This course is designed for life scientists from all fields to introduce them to the power of bioinformatics and enable them to access and utilize biological information in databases for their own research. Prerequisite: BTEC 300; BIOL 570 or MATH 365 (preferred); consent of instructor.

BTEC 599. Biotechnology Internship. 1-6 Credits. N

Supervised internship at a biotech company; or an independent thesis; or honors thesis with Honors Program. This course can be repeated for up to a total of 6 credit hours. Prerequisite: BTEC 305; BTEC 475; and consent of instructor.

BTEC 630. Biotechnology, Regulation, Quality Control, and Quality Assurance. 3 Credits. N

An integrated lecture and laboratory course exploring quality control, quality assurance, and regulatory considerations. Hands-on experimentation will develop a functional understanding of protocol design and a practical knowledge of GXP-guided processes. This course will focus on issues relevant to manufacturing, packaging, labeling, testing, and control of pharmaceutical products. Guest lectures from field-experts in the biotechnology industry. Prerequisite: Concurrent or prior enrollment in BTEC 599; or consent of instructor.

BTEC 640. Biotechnology Capstone II. 3 Credits. N

A project-based course that challenges students to develop, plan, execute, and communicate the results of a biotech-related project. Students will be guided through the execution of their proposed plan with particular emphasis placed on managing scientists, gathering and analyzing data, and instituting quality controls/quality assurance protocols. Students will communicate the results of their project through a combination of an oral presentation and poster. This course is the second of a two semester series (BTEC 540 & BTEC 640). Prerequisite: BTEC 540; or consent of instructor.

Courses

CRIM 300. Introduction to Criminal Justice. 3 Credits.

This course is an introductory survey of the American criminal justice system. The course provides a background in criminal justice institutions, including law enforcement, courts, and corrections. The course focuses on the process of the criminal justice system and various viewpoints within the process (employees, crime victims, offenders, and the general public).

CRIM 310. Theoretical and Historical Foundations of Criminology. 3 Credits.

This course explores the history and theoretical foundations of criminal justice and criminology. Students will examine the philosophical assumptions and socio-cultural context that make up the field.

CRIM 320. Research Methods and Data Driven Decision Making in Criminal Justice. 3 Credits.

This course provides an introduction to research methods used within criminal justice scholarship. Students will develop an understanding of how data is collected, analyzed, and used as part of the decision making process within organizations and as part of policy development.

CRIM 330. Policing. 3 Credits.

The course explores policing in America, covering the history of policing and law enforcement, contemporary police work, and current issues in police reform. The course will cover police discretion, professionalism, and police-community interactions. Prerequisite: CRIM 300.

CRIM 340. Courts and Sentencing. 3 Credits.

This course explores the history, development, and current processes of dispute resolution and courts in the American system. The course emphasizes activities of lawyers, judges, and related professionals. Current issues of court policy and sentencing practices are also explored. Prerequisite: CRIM 300.

CRIM 400. Law Enforcement Leadership. 3 Credits.

The course covers leadership and management concepts in the context of law enforcement agencies. The course provides an introduction to leadership and management functions including fiscal management, human resources, and strategic planning as well as the organization of decision making and training functions. Students will learn research verified concepts of leadership and management within the context of the United States law enforcement environment. (Same as SPA 400.)

CRIM 410. Racial Justice and the Criminal Justice System. 3 Credits.

This course explores the intersection of race and the criminal justice system in the United States. Students will explore how race as historically been understood and incorporated into the system and contemporary race related reforms. The course will examine how the criminal justice has influenced racialized communities in the United States as well as how race shapes the experiences of workers within the criminal justice system. Prerequisite: CRIM 300.

CRIM 498. Internship in Law Enforcement. 3 Credits.

Designed to provide criminal justice students an applied learning experience with a relevant law enforcement agency, policy related
organization, or non-profit. Students will critically reflect on their experience through academic assignments throughout their internship experience. Prerequisite: CRIM 300.

CRIM 499. Capstone in Criminal Justice. 3 Credits.
Students will engage in an applied, original project that integrates learning across the criminal justice curriculum. Project topics rotate based faculty professional background and current policy and practice foci. Students will analyze data related to an applied policy question and present their final work to a variety of practitioner audiences. Prerequisite: CRIM 300, CRIM 310, CRIM 320, CRIM 330, CRIM 340, CRIM 350.

Courses

EMGT 608. Principles of Engineering Management. 3 Credits.
Principles used by the engineer in managing technology-based organizations, focusing on core management functions. Prerequisite: Senior or graduate standing in an engineering curriculum or consent of the instructor.

EMGT 800. Special Topics in Engineering Management. 1-4 Credits.
Advanced study of a specialized nature representing unique or changing engineering management knowledge.

EMGT 801. Management Theory and Practice for Engineering Managers. 3 Credits.
Foundation for managing in technology-based organizations. Topics include essential management functions, schools of management thought, motivation, and management style.

EMGT 802. Statistical Analysis and Prediction of Engineering Systems. 3 Credits.
Production of required statistical analyses and predictions for engineering and management systems. Content from probability through regression and analysis of variance. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 803. Technological Forecasting and Assessment. 3 Credits.
Methods of technology assessment and forecasting. Topics include scenario analysis, cross-impact analysis, judgmental mental forecasting methods such as Delphi, and foundational time series forecasting methods such as trend projection and auto-aggressive moving averages. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 804. Business Development and Marketing of Professional Services. 3 Credits.
A broad review of the major components of marketing and integration of these components, culminating in students developing marketing plans for services. Theories, principles, and practices of business development and marketing applied to consulting oriented professional engineering and architectural firms.

EMGT 805. Management of Innovation. 3 Credits.
Preparation for managing technological change involving innovation. Topics include essential management functions, innovation types, impact of organizational structure and climate, and change management.

EMGT 806. Finance for Engineers. 3 Credits.
An introduction to finance in technology-based organizations. Topics include financial statements analysis, valuation of future cash flows, capital budgeting, risk and return, capital structure, and working capital management.

EMGT 807. Labor and Employee Relations for the Engineering Manager. 3 Credits.
Foundation for negotiation and administration of labor agreements. Topics include labor relations; human resources management; employment practices in unionized and non-union organizations; and historical, legal, and structural environments influencing collective bargaining processes.

EMGT 808. Quality Management. 3 Credits.
Practical application of total quality management (TQM) concepts from planning through customer acceptance in technology-based organizations, focusing on understanding the concepts of the total supply chain, managerial aspects of quality, and improvement methodologies throughout.

EMGT 809. Personal Development for the Engineering Manager. 4 Credits.
Objectives, theories, and tests of engineering and management ethics and the relationship to personal values, and communications strategies. Development of career and life plans, and personal brand. Strong emphasis on the creation of both written papers and oral presentations.

EMGT 810. Applications of Quantitative Analysis in Decision Making. 3 Credits.
Practitioner-oriented presentation of managing and implementing optimization methods for improving design and decision making. Focus on methods of mathematical programming (linear, integer, and non-linear), queuing analysis, and decision analysis. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 811. Engineering Systems Simulation. 3 Credits.
Practitioner-oriented presentation of developing and using discrete-event simulation to improve engineering analysis and design, and management decision making processes, including instruction in a chosen simulation language. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 812. Law and the Design Professional. 3 Credits.
Legal doctrines relating to owners, design professionals, and contractors; contracts, including formation, rights and duties, interpretation, performance problems, disputes, and claims, standards of care and the management of construction claims, duties and obligation of the design professional, the owner, and the contractor; surety bonds and insurance; and sources of law, forms of association, and agency. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 813. Design Project Management in Professional Practice. 3 Credits.
Managing design projects, integrating perspectives of profitability and cost control, client satisfaction, and project team relations. Topics include explanation of a project manager's job via an augmented model of the Blake-Mouton grid. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 814. Leadership Techniques and Methods for the Engineering Manager. 3 Credits.
Formulating and communicating a compelling vision, convincing others to pursue that vision, and marshaling resources and talents. Coaching and public speaking. Improving decision making and communications, earning trust and building momentum, and inspiring and enabling others to excel.

EMGT 815. Business Relationships and Selling Skills. 3 Credits.
Fundamentals of business relationships and professional selling for any technical professional who would like to be more effective in "getting their message across" to external or internal customers. Relationship management, including ethical issues in business relationships. Experimental exercises on conducting and evaluating dialogues/presentations with customers, internal audiences, and upper management.
EMGT 817. Mathematics for the Engineering Manager. 3 Credits.
Comprehensive math course addressing engineering managers’ need for a greater understanding of mathematical concepts.

EMGT 818. Advanced Mathematics for the Engineering Manager. 2 Credits.
Supplements Engineering Management students’ mathematical skills and knowledge as relevant to career needs.

EMGT 820. Developing the Engineering Manager. 3 Credits.
Integrating essential concepts and effective practices in communication, management, and leadership with the application of key organizational resources for enhanced management performance. Emphasizes on working with and through others, on useful human resources-oriented knowledge and skills, and on working with human resources professionals.

EMGT 821. Strategic Analysis of Technology Projects. 3 Credits.
Strategic assessment of developmental projects, focusing on the proposed product or service, the organization, project details, and the environment. Topics include application of financial figures of merit, feasibility of competing decisions, decisions under uncertainty, risk vs. return, and forecasting. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 823. Management of Internal Engineering Projects. 3 Credits.
Managing organizations’ technology-oriented projects, both as inside staff and outside consultant. Covers the entire project life cycle as reflected in the Project Management Book of Knowledge. Practical considerations addressed include material procurement, work with contractors and consultants, selecting software, and managing the project team.

EMGT 824. Product Marketing for Engineering Managers. 3 Credits.
A broad review of the major components of marketing and integration of these components, culminating in students developing marketing plans for new or existing products. Theories, principles, and practices of marketing applied to engineering managers in production or manufacturing. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 826. Management of New Product Development Projects. 3 Credits.
This course discusses how to properly manage new product development processes using project management tools and techniques. New products are not projects until they are analyzed, planned, scheduled, budgeted, managed, and controlled by managers. It is not typically technical process issues that result in failed new product introductions, but rather a failure in their management and marketing. Prerequisite: Admission to the EMGT program or instructor consent.

EMGT 830. Case Studies in Engineering Management. 2-3 Credits.
A capstone course for the program, integrating the material presented in other courses through analysis of several engineering management case studies. Note: Research paper and presentation are part of the 3 credit hours option. Prerequisite: Must have completed 21 credit hours in the Engineering Management program.

EMGT 835. Field Project (M.S.). 1-3 Credits.
Research on a problem in engineering management, the satisfactory completion of which satisfies the project requirement for the degree of Master of Science in Engineering Management. Prerequisite: Must have completed 21 credit hours in the Engineering Management program, including EMGT 810 and EMGT 821.

EMGT 840. Systems Approach to Engineering. 3 Credits.
Formal methods and processes in bringing complex systems into being, and improving existing systems. Topics include formal specification methods, definition of customer needs, systems life cycles, value-to-value analysis, and management of the systems engineering process.

EMGT 845. Service Management for the Engineering Manager. 3 Credits.
Managing service-oriented organizations. Covers a wide array of industries, addressing service management from four primary perspectives: the basics of service science, the customer encounter, managing service operations, and the exceptional customer experience.

EMGT 850. Environmental Issues for Engineering Managers. 3 Credits.
Survey of environmental problems and their solution, and environmental regulations. Topics include the quantity and quality of various types of pollutants emitted to various media, and the risks posed by these pollutants; the regulatory process; and historical perspective, including pollution generation (sources), transportation, fate and effects.

EMGT 860. Special Problems in Engineering Management. 1-4 Credits.
Original independent research on engineering management problems or subjects of immediate interest. May be repeated for credit to a maximum of four hours. Prerequisite: Approval of instructor.

EMGT 862. Manufacturing Systems Integration. 3 Credits.
Engineering and management-specific aspects of manufacturing and information systems integration. Engineering topics include agile, flexible, intelligent, and advanced manufacturing sub-systems; material handling and identification; vendor-specific automation; communication linkage between sub-systems; network and protocol alternatives; and hardware platform alternatives. Management topics include implementation approaches, quality management systems, long-range planning, support systems, and integration project management.

EMGT 867. Advanced Operations Management. 3 Credits.
Strategic issues and practical application of modern and advanced methods for designing and analyzing manufacturing processes and systems. Topics include: forecasting, product and service design, capacity planning, quality management, inventory management, scheduling, supply chain management, project management and simulation of manufacturing processes, and just-in-time, lean, synchronous, and agile systems.

Courses

HMGT 300. Introduction to Healthcare Management. 3 Credits.
Participants will learn key principles, practices, and personalities of health care management. The content is broadly applicable to healthcare enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc. The course will provide an overview of how health care institutions are organized and governed, the role of the employees in these organizations, and the systems designed for their efficient and effective operation.

HMGT 305. Health Policy and Healthcare Systems. 3 Credits.
This introductory course is designed to familiarize students with basic concepts and ideas concerning the distribution of health and illness in society, the organization of the health care system, and the relationship of one to the other. The course will address health disparities, the U.S. health care system and health policy and comparisons to other countries, and the roles of government in health systems and policy.

HMGT 310. Health Communication. 3 Credits.
This course introduces diverse approaches to health communication. Students will learn health communication in a variety of health contexts, ranging from interpersonal communication to public health campaigns. We examine theoretical and conceptual backgrounds in health communication and evaluate examples of health communication practices. Issues include provider-patient interaction, the role of the patient, health organizations, the media and health, and end-of-life concerns.

**HMGT 320. Applied Healthcare Law and Ethics. 3 Credits.**
This course addresses fundamental and applied concepts in health sciences and healthcare. Current and past issues in health law and ethics will be addressed, including historical origins and development of health law, cultural concerns, conflict of interest, health information confidentiality issues, human subjects research, and the application of law and ethics in health systems and workplaces.

**HMGT 440. Applied Ethics in Clinical Trials and Healthcare. 3 Credits.**
This course addresses current and past issues in health ethics for the healthcare manager and clinical trials coordinator, including historical origins and development of health ethics and relevant laws, informed consent and human subjects research, cultural perspectives, conflict of interest issues, health information confidentiality, institutional review boards, individual and organizational ethics, and ethical and legal issues in clinical research and clinical trials. The course will include a discussion of case studies from the public, private, and nonprofit sectors of the industry.

**HMGT 450. Economics and Finance of Healthcare. 3 Credits.**
This course covers economic and financial concepts relevant to health care management and demonstrates how they are applied to actual situations in the healthcare industry in the public, private, and nonprofit sectors. It examines general issues of healthcare consumption, supply and demand, and healthcare resource allocation as well as specific concepts of financial management and decision making, budgeting, and revenue management and their application to the healthcare system. In addition, the course will cover healthcare payment systems and reimbursement methods of various payers in the health services industries.

**HMGT 460. Healthcare Law and Regulation. 3 Credits.**
The course provides an overview of the primary healthcare laws and regulations for the healthcare manager who needs an understanding of healthcare-related legal issues. It covers the legal framework that governs modern healthcare systems and surveys the laws, statutes, and regulations that govern and direct the provision of healthcare services, including fundamentals of American health law and regulation, privacy law, delivery and quality of medical services, and transactions and liability within the healthcare industry.

**HMGT 500. Introduction to Clinical Trials Management. 3 Credits.**
This course provides foundational knowledge for clinical trials coordination and management, including an overview of the clinical and pre-clinical processes involved in setting up clinical trials and the roles and responsibilities of those conducting and administering trials; the processes involved in conducting safe, thorough, and reliable trials; and the steps necessary for completion and evaluation of clinical trials processes. Topics to be addressed include development processes for biologic, pharmaceutical, and medical devices products and related regulations, the rationale for design features of Phase I, II, and III trials, participant recruitment, retention, safety, and adherence, techniques for randomization, data collection and endpoints, interim monitoring, validity of a clinical trial, and results reporting. Students will demonstrate an understanding of the mechanics and key regulatory requirements of conducting a clinical trial.

**Courses**

**HSCI 315. Exploring Careers in Health Science. 1 Credits.**
Through self-assessment, aligning individual strengths with career pathways, and connecting with industry professionals, students will explore a wide variety of health and science-related careers. This course will outline how to gain formative experiences and utilize networking opportunities to help gain opportunities in the future.

**HSCI 320. Principles of Nutrition. 3 Credits.**
Applied study of the relationship of normal food and nutrition principles to health promotion in select stages of the lifecycle. Not open to those with credit in HSES 330.

**HSCI 340. Introduction to Public Health. 3 Credits.**
This course is an introductory course that examines public health issues in the United States and is designed to provide an overview of major public health issues that impact the public’s health. The course emphasizes the essential services of public health, challenges and strategies for working with communities, and provides an overview of the United States public health system.

**HSCI 415. Career Readiness in Health Sciences. 1 Credits.**
Through creating a career development plan, students will identify specific, achievable career goals and then design and implement strategies to reach them. This course will help students identify and articulate marketable skills through written and verbal communication and demonstrate how to convey transferable skills to employers through resumes, cover letters, and interviews in preparation for the capstone experience/internship in Health Science.

**HSCI 420. Nutrition Through the Life Cycle. 3 Credits.**
The influence of normal physiological changes on nutritional needs throughout the life span. Prerequisite: HSCI 320 or HSES 330 or instructor consent.

**HSCI 421. Public Health Nutrition. 3 Credits.**
The public health and nutrition concerns and services to maintain and improve the health of people living in the U.S.

**HSCI 422. Nutrition Assessment. 3 Credits.**
Methods and tools to screen and assess the nutritional status of individuals. Prerequisite: HSCI 320 or HSES 330 or instructor consent.

**HSCI 425. Nutrition Education. 3 Credits.**
Principles and practices used for teaching and reaching individuals and groups about nutrition to promote healthy living. Prerequisite: HSCI 320 or HSES 330 or instructor consent.

**HSCI 440. Introduction to Epidemiology. 3 Credits.**
This course will present the fundamentals of epidemiology including study designs, measures of morbidity and risk, types of research biases and specific epidemiology disciplines. These concepts will be illustrated with various examples of epidemiologic research and through lab exercises.

**HSCI 441. Population Health. 3 Credits.**
This is an introductory course that provides a population perspective on social determinants of health as well as the distribution of risk factors and disease across populations. It explores population-based approaches to explore how behavioral, social, and environmental factors influence health and methods to reduce these health disparities.

**HSCI 445. Introduction to Environmental Health. 3 Credits.**
This course is designed to provide a foundation for understanding how the natural and built environment affect human health in industrialized and developing countries by examining the impact of physical, chemical, and
biological factors external to humans. Students will gain an understanding of the interaction of individuals and communities with the environment, the potential impact on health of environmental agents, and specific applications of concepts of environmental health. (Same as EVRN 445.)

HSCI 450. Epidemics, Pandemics, and Pestilence. 3 Credits.
This course examines origins, responses, and consequences of major epidemics and pandemics that have affected humanity over time. Spanning from antiquity to present day, this global survey investigates environmental and biological origins of disease, the role of commerce, urbanization, and transportation in the spread of disease, and responses to controlling disease and pandemics. Key diseases and epidemics covered include plague, smallpox, malaria, cholera, influenza, typhus, typhoid, leprosy, and tuberculosis. (Same as EVRN 450.)

HSCI 490. Independent Study. 1-6 Credits.
Directed readings or research project on a topic under the supervision of the instructor. Topic or project to be agreed upon in advance with supervising faculty member. Final report required. Prerequisite: Instructor consent.

HSCI 495. MCAT Preparation Course. 4 Credits.
The MCAT Preparation course is a 4-credit hour elective designed to help students prepare for the Medical College Admission Test. In collaboration with testing services, this course assists students in creating a customized study plan through a robust curriculum, strategies for testing, and in-depth content reviews. Graded on a satisfactory/unsatisfactory basis.

HSCI 498. Pathways in Health Science Careers. 1 Credit.
This course provides an integrated approach through individual pre-health coaching and peer group reflection. Students will explore exercises that identify their individual strengths and align them with career goals. Through creating actionable plans, students will focus on broadening professional experiences and improving underdeveloped aspects of their application for professional programs in the health sciences. By the end of the course, students will have detailed an inventory of their professional experiences and a resume that clearly reflects them. Students will practice articulating their strengths through written materials and designing an entrance exam study plan. Through informational interviews, students will gain a clearer understanding of interprofessional teams and opportunities for alternative pathways in health careers.

HSCI 499. Topics in Health Sciences: ______. 1-3 Credits.
Courses on special topics in Health Sciences. These courses may be lecture, discussions, or readings. Students may select sections according to their special needs. Repeatable for credit if credit varies.

HSCI 521. Advanced Nutrition and Metabolism. 3 Credits.
Building upon the basic principles of nutrition, this course delves more deeply into the biological functions of nutrient and their interaction in the human body. Students will be introduced to the role of nutrition in disease. Prerequisite: HSCI 320 or HSES 330 and HSCI 422, or instructor consent.

HSCI 522. Advanced Sports Nutrition. 3 Credits.
The study of nutrient needs to support optimal performance in sports and exercise throughout the lifespan. Prerequisite: HSCI 320 or HSES 330 and HSCI 422 or instructor consent.

HSCI 545. Advanced Environmental Health. 3 Credits.
This course will build upon principles acquired in the introductory course by presenting advanced concepts on environmental health as novel factors that may constitute a risk to humans. The course provides an advanced understanding of concepts and issues of environmental health, including environmental toxicology and risk assessment, and an in-depth study of urban and rural environmental health issues and agents of environmental health impairment. Students will develop a research project or investigation of an environmental health topic. (Same as EVRN 545.) Prerequisite: HSCI 445 or EVRN 445 or consent of instructor.

HSCI 599. Health Science Capstone. 3 Credits.
The capstone provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their health sciences curriculum. Students gather and analyze data throughout the class, and present their final work to a variety of audiences. Prerequisite: Students must be in their final year of coursework required for one of the degrees in the biological sciences. Restricted to declared Health Sciences majors only.

Courses

ITEC 310. Computer Organization and Platform Technologies. 3 Credits.
Machine-level representation of data, digital logic and digital systems, computer architecture and organization, computing infrastructure, introduction to multiprocessing systems, firmware and software integration, introduction to intersystem communications, enterprise deployment management introduction to virtual machine emulation, platform technologies. Prerequisite: EECS 210, EECS 268 and PHSX 114 or consent of instructor.

ITEC 312. Emerging Technologies in Cybersecurity. 3 Credits.
Principles and practical hands-on applications of evolving technologies and techniques for rising cyber-attack detection and prevention are examined in this course. Topics include firewalls, virtual private networks, authentication technologies, and access control intrusion. Detection and prevention systems as well as data loss prevention devices and mechanisms will be explored. Students will also learn about evolving security incident and management tools. Prerequisite: EECS 210, EECS 268, and PHSX 114 or consent of instructor.

ITEC 314. Fundamentals of Applied Data Analytics. 3 Credits.
In this course you will develop your data science skills while solving real-world problems. Students will work through the data science process and use unsupervised learning to explore data, engineer and select meaningful features, and solve complex supervised learning problems using tree-based models. Students will also learn to apply hyperparameter tuning and cross-validation strategies to improve model performance.

ITEC 316. Database Applications. 3 Credits.
The purpose of this course is to provide students with fundamental concepts of designing and maintaining database projects from a manager or team lead's perspective. Students will gain the foundational knowledge needed to work with database applications utilizing current development strategies. Students will examine various types of databases with an emphasis on relational design. Students will explore file organization techniques, data tables, and data structures. Consideration of the management of data as a resource will be introduced. Students will analyze business applications for databases, selecting one to complete as a final project. Assignments will investigate such topics as; database terminology, completing field definitions and table specifications, interviewing end users, selecting primary keys, and creating data views. The course will conclude with a look at the future of databases.

ITEC 320. System and Network Administration. 3 Credits.
This course introduces operating systems and network administration and presents topics related to selection, installation, configuration, and maintenance of operating systems and computer networks. Topics to be covered include: Unix and Windows operating systems installation, configuration, and maintenance, server administration and management, client and server services, user and group management and support, software systems installation and configuration, content management and deployment, security management, network administration, backup
Students learn to survey a variety of data mining techniques used in the information technology field. Data mining is the ability to process a data set and make meaning out of its contents. Students will use a statistical programming language to perform data mining techniques using a number of different data sets.

ITEC 410. Software Engineering and Management. 3 Credits.
This course introduces the software development life cycle and key concepts related to software engineering. Topics include software process models, software project management, software requirements engineering, formal and informal modeling, software architecture, software design, coding and implementation, software testing and quality assurance, software deployment, and software evolution. Additional topics such as software metrics and measures, application domains, software engineering standards, and software configuration management will also be presented. This is a project-driven course. Prerequisite: ITEC 380.

ITEC 412. Predictive Analytics and Forecasting. 3 Credits.
This course focuses on the predictive analytics that organizations need to be able to make decisions about current and future events. Students learn about the analytical tools necessary to analyze and develop forecasts for real-world situations. The course prepares learners to help organizations make more effective decisions based on the gathering and analysis of data as well as the use of modern forecasting techniques applied to make intelligent decisions.

ITEC 414. Database Design. 3 Credits.
The objective of this course is to present key concepts related to database design and implementation. Topics to be discussed include: database architecture, relational data model, SQL, database design life cycle, conceptual data modeling, relational database normalization, query processing, transaction processing, database security, and database administration. This is a project-driven course. Prerequisite: ITEC 330.

ITEC 416. System Integration and Architecture. 3 Credits.
This course introduces system integration and architecture. Key concepts to be presented include: system architecture, system requirements, organizational context, acquisition and sourcing, system and component integration, middleware platforms, design patterns, integrative coding, scripting coding, testing and quality assurance, system deployment. Prerequisite: ITEC 410.

ITEC 420. Operating Systems. 3 Credits.
This course introduces operating systems principles and associated key concepts. Topics to be discussed include: processes and threads, concurrency, scheduling and dispatch, memory management, processor management, device management, security and protection, file system, disk scheduling, real-time and embedded systems, fault tolerance, scripting, and an introduction to virtualization.

ITEC 422. Computer Networks. 3 Credits.
Foundations of computer networking with practical applications and network administration, with emphasis on the Internet and wireless public switched telephone network. Topics to be covered include routing and switching, routing algorithms, physical layer, data link layer, network layer, network security, network management, and application areas.

ITEC 424. Network Security. 3 Credits.
This course covers the fundamental concepts, principles, and mechanisms in network and distributed system security. The topics that will be covered include: network security primitives, distributed authentication, key management, secure communication protocols, firewalls, intrusion detection, traffic monitoring and analysis, email and Web security, etc. Prerequisite: ITEC 340 and ITEC 422.

ITEC 426. Cyber Defense and Countermeasures. 3 Credits.
This course explores recent software and hardware tools and technologies for cyber defense. Examination of network-based countermeasures for Encrypting IP data, IPsec, TCP set above the IP, securing web page access with SSL/TLS will be introduced to students. Teams of students will be engaged in practical hands-on applications of recent behavioral analytics and artificial intelligence tools to gain insights into behavioral patterns of users and hackers in cyber-attacks and defense. Prerequisite: ITEC 340 and ITEC 422 or consent of instructor.

ITEC 428. Testing and Vulnerability Analysis. 3 Credits.
This course explores the fundamentals and tools for penetration testing. Students will utilize tools and methodologies for collecting information; recognize faults and vulnerabilities in documentation, software, and computer systems; and exploit and fix defects. Students will participate in teams on practical hands-on analysis of vulnerabilities in web servers and web and mobile applications. Prerequisite: ITEC 340 and ITEC 422 or consent of instructor.

ITEC 429. Digital Forensics. 3 Credits.
In-depth data analysis and reviews of data such as log, system, history and email files on computer systems will be explored. Students will also explore the principles of chain of evidence, electronic document discovery, eavesdropping and entrapment. Hands-on experience with forensic tools for exploring digital evidence and computer crimes will also be provided. Prerequisite: ITEC 340 and ITEC 422 or consent of instructor.

ITEC 430. Human-Computer Interaction. 3 Credits.
This course introduces principles of human-computer interaction. Important topics to be presented include: human factors, human-centered design and evaluation, graphical user interfaces, multimedia system integration, interactive systems development, computer-supported cooperative work, human cognitive skills, accessibility, alternative input/output media, and emerging technologies. Prerequisite: Completion of nine credits of ITEC 300-level coursework or consent of the instructor.

ITEC 440. Cloud Computing. 3 Credits.
This course introduces principles of cloud computing and the business and computing technology trends that enable and necessitate its uses. Cloud computing and its engineering and delivery models, Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS), will be covered. Cloud-based and RESTful web services for developing new applications and offering new services will be discussed. Topics related to cloud computing security, identity, auditing, and authorization management will be presented. The course will be project-based and an existing cloud computing platform (e.g., Amazon AWS) will be used for projects.

ITEC 450. Social and Professional Issues. 3 Credits.
This course will provide an overview of the history of computing and presents key concepts related to the social and professional aspects of IT. Topics to be covered include: pervasive themes in IT, social context of computing, intellectual property, legal issues in computing, professional and ethical issues and responsibilities, privacy and civil liberties. Prerequisite: Completion of nine credits of ITEC 300-level coursework or consent of the instructor.

ITEC 452. Special Topics in ITEC: _____. 3 Credits.
This course introduces a special topic of current interest in information technology, offered as the need arises. May be repeated for additional credit. Prerequisite: Junior or Senior-level standing or consent of instructor.

ITEC 454. Information Security Law and Policy. 3 Credits.
Students will be introduced to policies for providing identity, privacy, access, and account management security. Students will also learn about policies for incident response, disaster recovery, and governance of information systems. Government security laws and compliance for protecting intellectual property and information systems will be included. Students will participate in teams on practical hands-on activities with security auditing and compliance tools. Examination of computer crime laws and recent security breaches will also be included. Prerequisite: ITEC 340 and ITEC 422 or consent of instructor.

ITEC 490. ITEC Capstone I. 3 Credits.
Capstone is a senior level course designed to allow a student to review, analyze, integrate, and apply technical knowledge in a meaningful and practical manner. The student will be expected to complete an approved academic project in IT that may be in collaboration with an industrial partner. Prerequisite: Corequisite: ITEC 410.

ITEC 492. ITEC Capstone II. 3 Credits.
ITEC Capstone II is a continuation of ITEC Capstone, is a senior level course designed to allow a student to review, analyze, integrate, and apply technical knowledge in a meaningful and practical manner. The student will be expected to complete an approved academic project in IT that may be in collaboration with an industrial partner. Prerequisite: ITEC 490.

ITEC 494. Cybersecurity Capstone. 3 Credits.
Capstone is a senior level course designed to allow a student to review, analyze, integrate, and apply technical knowledge in a meaningful and practical manner. The student will be expected to complete an approved academic project in IT related to cybersecurity. Prerequisite: ITEC 340 and ITEC 422 or consent of instructor.

ITEC 710. Information Security and Assurance. 3 Credits.
This introductory security course covers a wide range of topics in the area of information and network security, privacy, and risk: the basic concepts: confidentiality, integrity and availability; introduction to cryptography; authentication; security models; information and database security; computer systems security; network security; Internet and web security; risk analysis; social engineering; computer forensics. Prerequisite: Graduate standing in EECS, or permission of the instructor.

ITEC 711. Security Management and Audit. 3 Credits.
Administration and management of security of information systems and networks, intrusion detection systems, vulnerability analysis, anomaly detection, computer forensics, auditing and data management, risk management, contingency planning and incident handling, security planning, e-business and commerce security, privacy, traceability and cyber-evidence, human factors and usability issues, policy, legal issues in computer security.

ITEC 712. Network Security and its Application. 3 Credits.
This course focuses on network-based information and communication systems, and examines network technologies and service applications to provide the students with a comprehensive introduction to the field of network security and its application. The course covers key concepts and critical network security services including authentication and access control, integrity and confidentiality of data, routing, firewalls, virtual private networks, web security, virus protection, and network security architecture and policy development. The students are expected to understand the technical vulnerabilities of networked systems and to develop methods to eliminate or mitigate those vulnerabilities. Prerequisite: IT 710 and one of the following: IT 422, EECS 563, or EECS 780.

ITEC 714. Information Security and Cyber Law. 3 Credits.
The objectives of this course is to present an introduction to the legal and ethical issues and challenges in the information age, to provide a survey of legal and ethical issues introduced by information security, and
to discuss individual rights vs. national interests. A coverage of key cyber laws that impact information security and IT professionals and topics related to intellectual property, copyrights, digital forensics, e-surveillance, and e-discovery for legal evidence and lawsuits will be provided. A review of preventative legal management practices in the context of information security (including employee awareness training) will be presented. Prerequisite: IT 710 or instructor permission.

ITEC 746. Database Systems. 3 Credits.
Introduction to the concept of databases and their operations. Basic database concepts, architectures, and data storage structures and indexing. Though other architectures are discussed, focus is on relational databases and the SQL retrieval language. Normalization, functional dependencies, and multivalued dependencies also covered. Culminates in the design and implementation of a simple database with a web interface. Prerequisite: EECS 647 and ITEC 746.

ITEC 780. Communication Networks. 3 Credits.
Comprehensive in-depth coverage to communication networks with emphasis on the Internet and the PSTN (wired and wireless, and IoT-Internet of Things). Extensive coverage of protocols and algorithms will be presented at all levels, including: social networking, overlay networks, client/server and peer-to-peer applications; session control; transport protocols, the end-to-end arguments and end-to-end congestion control; network architecture, forwarding, routing, signaling, addressing, and traffic management, programmable and software-defined networks (SDN); quality of service, queuing and multimedia applications; LAN architecture, link protocols, access networks and MAC algorithms; physical media characteristics and coding; network security and information assurance; network management.

ITEC 810. Software Engineering and Management. 3 Credits.
Principal concepts in software engineering with a focus on formalism as well as managerial issues; software development models; software process models; software configuration management; software development life cycle activities; project management; planning and estimation; requirements engineering, software architecture, software modular design; software reusability; implementation strategies; testing techniques; software quality assurance; software evolution; metrics and measurements, ethics and professionalism. Prerequisite: Programming experience, preferably in Java or C++.

ITEC 811. IT Project Management. 3 Credits.
Management issues in the creation, development, and maintenance of IT systems; effort and cost estimation techniques; project planning and scheduling; resource allocation; risk analysis and mitigation techniques; quality assurance; project administration; configuration management; organizational issues; software process modeling; process improvement; frameworks for quality software.

ITEC 814. Software Quality Assurance. 3 Credits.
Software quality engineering as an integral facet of development from requirements through delivery and maintenance; verification and validation techniques; manual and automated static analysis techniques; fundamental concepts in software testing; test case selection strategies such as black-box testing, white-box testing; formal verification; unit, integration, system, and acceptance testing; regression testing; designing for testability; models for quality assurance; reviews, inspection, documentation, and standards; industry and government standards for quality. Prerequisite: IT 810.

ITEC 818. Software Architecture. 3 Credits.
Designing architectures; software architectural styles and patterns; architectural components and connectors; architectural modeling and analysis, architectural deployment, designing for nonfunctional properties such as efficiency, scaleability, adaptability, and security; domain specific software architectures; architecture product lines; architecture description languages (ADLs); standards. Prerequisite: IT 810.

Courses

OMGT 300. Operations Management. 3 Credits.
This course will provide a foundational understanding of operations strategy, process design, capacity planning, facilities location and design, forecasting, production scheduling, inventory control, quality assurance, and project management. Students will learn a framework for systematically examining and understanding operation management issues as well as exploring tools, systems and practices for practical application. Students will discover analytical techniques, processes, and approaches used to solve, prevent and anticipate problems within an organization.

OMGT 310. Enterprise Strategy and Innovation. 3 Credits.
This course will explore enterprise strategic plan development and implementation by addressing concepts of open innovation, strategic plan development, resource considerations, organizational strengths and weaknesses, environmental opportunities and threats, and management considerations. Students will explore theoretical and practical approaches to address a variety of real-world case studies.

OMGT 320. Enterprise Planning and Implementation. 3 Credits.
This course explores planning and implementation of changes, policies, and procedures at an organizational level and learn practical approaches to implementation at a large scale. Students will investigate and test tools and techniques for effective design and management of enterprise projects and programs.

OMGT 330. Innovation Management. 3 Credits.
The course focuses on execution challenges that innovation initiatives face, including resourcing, organization, and planning. Students will explore the processes of innovation management for various sizes of companies utilizing smaller scale, local processes to large scale, globally dispersed innovation processes and teams. Prerequisite: OMGT 310.

OMGT 420. Process Management. 3 Credits.
This course explores concepts, methods, and techniques that support the design, improvement, management, configuration, enactment, and analysis of business processes that deliver lean and customer focused business processes. Students will learn how to organize process improvement initiatives and how to make improvements to work processes. Students will be introduced to techniques for setting organizational priorities for process improvement initiatives and for selecting projects that align with such priorities. Students will be able to understand business process from a management and process analyst perspective, analytical frameworks and general principles for managing business processes. Prerequisite: OMGT 300.

OMGT 440. Ethical Issues in Operations Management. 3 Credits.
This course is designed to provide students with a psychological and philosophical foundations of business ethics, which includes the ability to recognize ethical problems, exposure to many of the ethically sensitive issues facing corporations and managers in business and examining how to reach closure on ethical problems. Students will examine the role of ethics in the relation of business to employees, consumers, and society. Students will explore ethical positions in case study analyses, investigate ethical issues in their own professional lives, and develop and present their solutions for typical ethical problems faced by managers in organizations. Prerequisite: OMGT 300, OMGT 310, OMGT 320.

OMGT 499. Operations Management Capstone. 3 Credits.
The project-based capstone course serves as a culminating experience for this degree. Students will develop an applied workforce project that represents that competencies developed throughout the program. The students will document their project in a written report and present their project during the final oral examination to the Operations Management facility. This course should be taken in the final semester of their BAS in OMGT program. Prerequisite: OMGT 300, OMGT 310, OMGT 320, OMGT 330.

Courses

PFS 300. Introduction to Professional Performance. 3 Credits.
This course provides an introduction to professional performance, including entrepreneurship, media and marketing, brand creation, “influencing,” web design, life skills, personal and business finance, communication, exposure to laws related to Title IX, networking, ethics, and career management. Class sessions will feature speakers from varying areas of specialty to provide students an in depth look into their specialty while understanding how each of these components are integrated in professional performance.

PFS 301. Communication in the Workplace. 3 Credits.
This course presents an overview of communication dynamics in the modern increasingly complex, diverse and dispersed modern workplace. Course content and activities will explore the various task, relational and identity dynamics that generate effective communication across a variety of different workplace relationships and situations. Special consideration will be given to understanding the influence of workplace power dynamics/hierarchies, communication technologies, identities, and cultural differences in delivering effective interpersonal, small group, written and presentation messages. Course activities will help emerging professionals recognize how to leverage their daily communication at work to earn trust, build productive working relationships, and organize collaborative work processes to achieve workplace goals.

PFS 302. Leadership in Practice. 3 Credits.
This course will introduce students to the principal theories of effective leadership, ranging from the “individual star” model to contemporary frameworks of distributive and collaborative leadership. The course draws important distinctions between leadership and management and assists learners in understanding their natural preferences. Through exercises, assignments, lectures, videos, case studies, and discussion, we transform theory into applicable, real-world practice. Students will experience a dynamic, applied, and realistic view of what leadership is like in contemporary organizational life. Topics include strategic thinking, operational excellence, emotional intelligence, navigating change, conflict management, and team communication.

PFS 303. Professionalism and the Workplace. 3 Credits.
This course presents an overview of the importance and challenges associated with professionalism and the workplace expectations regarding demonstrating respect for coworkers, colleagues, and customers, business etiquette and attire, appropriate use of communication tools, and acting in the best interest of the organization, community, and the environment. The basic skills necessary for achieving success in today's challenging work environment are enhanced through this course.

PFS 400. Professional Performance Ethics. 3 Credits.
This course is designed to provide students with a psychological and philosophical foundation of ethics, which includes the ability to recognize ethical problems, exposure to many of the ethically sensitive issues they may encounter in their career, and how to reach closure on ethical problems. Students will explore ethical problems in case study analyses, investigate ethical issues in their own professional lives, and develop and present their solutions.

PFS 410. Personal Finance and Professional Career Management. 3 Credits.
This course will provide the tools to help you better understand and improve the financial and career decisions you make throughout your life and how they impact one another. Students will learn how to analyze the financial effects of spending, investing, and saving at each stage of your career. Students will choose focused learning activities that meet their specific career goals and needs.

PFS 420. Starting and Managing your Performance Career. 3 Credits.
In this course, students will learn about the professional world of professional performance and how to create a career surrounding their athletic, artistic or personal talents. Specifically, those enrolled will be exposed to the multitude of career paths and how to start and manage your career.

PFS 450. Special Topics in Professional Performance: ______. 3 Credits.
This is a variable-topic course allowing students to examine timely professional performance topics. Its purpose is to allow the occasional offering of topics not covered by established courses. These courses may be lecture, seminars, or readings. Students may enroll in more than one topics course, but may enroll in that topic only once.

PFS 490. Internship Exploration. 1-6 Credits.
PFS 490 Internship Exploration -- This course provides credit for supervised practical experiences in an area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of instructor.

PFS 499. Professional Performance Capstone. 3 Credits.
The project-based capstone course serves as a culminating experience for this degree. Students will develop an applied workforce project that represents that competencies developed throughout the program. The students will document their project in a written report and present their project during the final oral examination to the Professional Performance facility. This course should be taken in the final semester of their program. Prerequisite: Consent of instructor.

PFS 730. Writing and Speaking for Decision Makers. 3 Credits.
This course is an advanced level communication skills course focused on developing and refining managerial-level business writing and presentation skills. Course assignments and activities provide practice and expert feedback on these core professional skills. Course content offers research-based insights to develop one’s ability to assess various stakeholders’ needs, motivations and values, while also addressing critical situational needs and relational concerns in a variety of workplace communication scenarios. Participants learn to craft communication that is thoughtful, strategic, research-backed, and designed to signal their readiness for additional career development opportunities.

PFS 741. Intercultural Communication in Organizations. 3 Credits.
This course explores the intercultural communication dynamics that influence individual work satisfaction, workplace relationships, team effectiveness and project outcomes across an increasingly global workforce. Course content and activities will focus on understanding how national and regional cultural differences influence group and team dynamics. Special focus will be on de-centering one’s own cultural norms and personal preferences and adapting to engage in communication that signals respect for cultural difference at work. Topics will include
developing personal awareness, appreciation and skills required to respectfully and effectively engage difference related (but not limited) to language, time, gender, family status, religion, and the role of organizational hierarchies in shaping colleagues’ communication at work. Course will focus on how to adapt to these areas of difference and using strategies for integrating flexibility while collaborating with diverse colleagues to achieve shared organizational goals.

PFS 801. Interpersonal and Persuasive Communication Skills for Managers. 3 Credits.
This course examines how communication practices and patterns influence employee engagement, team productivity, organizational cultures, and individual career development. In short, this course centers communication as the primary way people organize, build relationships and get things done in organizations. Factors influencing what makes communication “effective” in various contexts and relationships will be identified, providing you a toolkit for enhancing team effectiveness and business outcomes, as well as facilitating your individual career advancement. Course activities and assignments are designed to build self-awareness and global workplace communication competencies, with a focus on situational awareness and personal adaptability. The course is designed to differentiate KU graduates by providing a powerful set of research-based communication concepts and frameworks for use in diagnosing and meaningfully addressing the most common work and career-related challenges facing mid-career professionals in today’s increasingly complex, diverse and ever-changing organizations.

PFS 802. Managing Teams and Leading People. 3 Credits.
This course examines the foundational body of knowledge relating to effective organizational management and leadership. Beginning with an exploration of the essential differences between management and leadership, the course then addresses such topics as leading with emotional intelligence, change management, organizational culture, individual and team performance coaching and management, innovation theories, stakeholder analysis, and personal brand development.

PFS 803. Financial Management for Professional Success. 3 Credits.
This course introduces the concepts and applications of financial planning and management for professional managers working in diverse professional environments. Topics include time value of money, asset valuation, capital structures and budgeting, financial analysis and cash flow, and project and operations decision-making. This “finance for non-financial managers” course equips managers with the fundamental knowledge and skills to operate a unit in collaboration with their organization’s financial professionals.

PFS 804. Project Management for Professionals. 3 Credits.
This course introduces the project management body of knowledge with a focus on developing project management plans for use in diverse professional environments. The project life cycle is covered from inception to closeout with an emphasis on project scope, budget, schedule, and risk; and practical application of stakeholder, procurement, resource, quality, and communication management. The course will be valuable to managers of units, teams and organizations either to directly manage projects of various types or have a strong understanding of what to expect from formal project managers.

PFS 810. Organizational Communication Strategies. 3 Credits.
This course addresses key communication processes in organizations, including developing effective workplace relationships and nurturing organizational cultures and team work in increasingly complex, global organizations. Topics include change management communication strategies, how organizational hierarchies and other structures influence communication flows, the role of different social group identities in shaping individual’s experiences within organizations, and managing virtual teams. Students will be able to identify the influence of organizational culture, power dynamics, and communication ethics on workplace communication patterns and outcomes, and will craft communication strategies to enhance workplace cultures, project outcomes and personal leadership communication skills.

PFS 821. Employee Onboarding and Role Development. 3 Credits.
This course explores the communication dynamics that facilitate employee onboarding and integration for new hires and newly promoted supervisors, managers and leaders. Content and activities will explore the challenges and opportunities embedded in the socialization process for individuals and organizations, including the hidden communication complexities of role transitions, including navigating expectations of colleagues, understanding the dynamics of the personal identity shift one must navigate during transition, and balancing the desire to affect change with the pressure to assimilate into organizational expectations. Participants will design an onboarding and communication plan for a workplace socialization need of their choice.

PFS 823. Organizational Change and Communication. 3 Credits.
This course explores communication processes embedded in organizational change, with a specific focus on identifying the needs, expectations and values of various stakeholders who will be participating in and/or affected by an organizational change. Course focuses on understanding change as an inherently communicative process (rather than only a business strategy). Participants will learn to identify a full range of internal and external stakeholders, recognize the root causes of stakeholder concerns, and understand common sources of “resistance” to change at every level of an organization. Participants will develop a comprehensive communication plan and sample communication documents to engage the full range of stakeholders in change planning, implementation and long-term integration into organizational culture and structures related to a change of their choice.

PFS 825. Communication Practices for Inclusive Organizations. 3 Credits.
This course examines the challenges and opportunities facing individuals in organizations. Weekly discussion and assignments will examine the challenges and opportunities employees/members face based on navigating organizational structures, workplace cultures and leadership actions. Participants will develop strategies to build inclusive workplace around race, gender, age, sexuality, (dis)ability, socioeconomic status, and other social identities. Challenges and opportunities related to intersectional identities will be explored as well. The class has an applied, practical focus featuring weekly guest speakers and focus on becoming more aware of forms of personal privilege and becoming advocates for meaningful change within organizations.

PFS 827. Communication Ethics for Managers and Leaders. 3 Credits.
This course examines current leadership communication and workplace culture issues through a lens of communication ethics. The course uses several frameworks for identifying ethical issues in the communication used to organize people and ideas within organizations and communities. Communication ethics and related power dynamics shaping communication processes and outcomes will be explored related to employee engagement campaigns, corporate communication tactics, leadership and management communication practices, conflict resolution practices within organizations, and communicating organizational change. Participants will gain skills and confidence to recognize and actively engage with the communication ethics concerns embedded in today’s daily workplace interactions, leadership and management communication,
decision-making processes, organizational policy creation, and corporate communication initiatives.

**PFS 829. Communicating Across Workplace Generations. 3 Credits.**
This course explores the dimensions of the popular "generations" framing of age-related diversity in the modern workplace. This course will unpack and challenge the concept of "generations" and its implications for workplace cultures, policies, leadership and career development practices. Course will explore different types of generations that emerge within organizations related to factors like workplace cohort, team dynamics and individual lifestyle. Organizational communication assumptions, patterns and practices will be centered as a factor in shaping the individual experiences of these generational members, with the goal of identifying new strategies for stimulating meaningful, productive cross-generational working relationships, mentoring and collaboration across organizations.

**PFS 831. Case Studies in Organizational Communication. 3 Credits.**
This course explores the ways we organize ourselves through communication, both within and beyond traditionally-structured organizations. We'll examine traditional, new and emerging messages, practices and structures used to organize people across traditional boundaries. The course will explore "hidden" forms of organization that shape our personal experiences and public discourse, ranging our informal professional networks to a variety of online "dark web" groups organizing followers around non-traditional belief systems. Discussion will explore the role of loss of trust in formal institutions, technology and social media, and groups seeking to intentionally disrupt and dismantle traditional forms of organization. Participants will recognize the full range of ways communication can be used to (dis)organize groups, create new organizations and social movements, and influence public discourse and organizations.

**PFS 833. Communication and Team Development. 3 Credits.**
This course will explore team development through the lens of communication, exploring requisite individual teaming skills, team-level processes and organizational-level norms and structures. The course will provide research-based insights to help team managers and leaders facilitate more effective team onboarding, decision-making and conflict management processes across organizational structures, while recognizing individual difference and utilizing inclusive communication practices that fuel rewarding teamwork, positive project outcomes and career development for all. Course content will discuss necessary forms of organizational-level sponsorship, structures, technology access, and training necessary to support team communication and development. This course will be especially helpful for those serving in (or seeking to advance into) team management and leadership roles.

**PFS 835. Interpersonal Communication Skills at Work. 3 Credits.**
This course provides research-based interpersonal communication insights for developing personal effectiveness across increasingly global, complex and resource-constrained organizations. Course content and activities will help professionals work on personal skill development related to building effective working relationships, initiating difficult conversations, navigating conflict, building internal and external networks, effectively advocating for self and others, and demonstrating a commitment to personal communication ethics. Insights and skill practice will focus on developing a personal communication skillset for working effectively across various situations, cultural contexts and stakeholder groups. Content will be helpful for both individuals and managers/leaders recognizing the need to further develop their interpersonal skills in various workplace settings.

**PFS 837. Communication Strategies for Remote and Hybrid Teams. 3 Credits.**
This course explores the communication challenges and opportunities presented by remote work in geographically dispersed organizations. Course content and activities will explore how leaders, managers and front-line staff can utilize communication-based relationship-building skills, as well as project planning, meeting facilitation and technological tools to build productive working relationships, stronger teams and optimal productivity across multiple workplace structures, cultures, project teams, time zones and geographies. Participants will gain valuable insights about the human needs embedded in virtual work as well as gain practical skills needed for leading successfully in a virtual work environment.

**PFS 839. Conflict Dynamics in Organizations. 3 Credits.**
This course explores the multiple sources and levels of conflict in organizations. Course content will help participants recognize and address the historical and cultural roots of conflict in organizations. Course activities will help develop the individual insights and communication skills necessary to initiate meaningful change to conflict management processes within teams and organizations, with the goal of facilitating more equitable, fair and trusting work relationships, communication flows, and positive outcomes for all. This course will be especially helpful for those looking to advance into management and leadership positions.

**PFS 850. Interview-Based Research in Organizations. 3 Credits.**
The course provides hands-on practice designing an interview or focus-group based research project. Activities build skills related to project design, managing sponsor and stakeholder pressures, interview questions crafting, managing interview dynamics, ensuring confidentiality and research ethics, conducting data analysis, crafting findings, report writing, delivering a final presentation to stakeholders. Major course activity involves working with sample data and crafting a future research proposal for an organization selected by the participant.

**PFS 860. Exploring Communication Theory. 3 Credits.**
This course involves exploring the theories that provide deeper insight into underlying individual, group, organizational and societal level factors influencing communication patterns, practices and policies in organizations. This course provides a solid understanding of the unique value of the communication studies lens for examining common workplace communication issues at the individual, team and organizational levels. Participants will leave the course with a toolkit of organizational communication concepts and theories for better understanding "what’s really going on here," providing a powerful set of insights for identifying, unpacking and addressing common issues related to coworker relationships in conflict, managerial and leadership communication, diversity and inclusion, and workplace culture, to name just a few.

**PFS 875. Special Topics in Organizational Communication. 3 Credits.**
The specific topic of this course may vary from semester to semester; course will explore a variety of current issues related to organizational culture and communication, with a focus on translating research into practice within organizational roles.

**PFS 895. Independent Study in Organizational Communication. 1-3 Credits.**
This course is reserved for students working independently with faculty supervision to study a topic of interest. The specific topic and related readings, assignments and meeting schedule will be worked out between the faculty member and individual student(s) and pre-approved by the faculty member leading the independent study. A permission code is required to register for PFS 895 course hours.
Courses

PMGT 305. Foundations of Project Management. 3 Credits.
This course offers students an opportunity to learn how to approach project management (PM) and understand PM essential concepts from both a theoretical and applied perspective. Students will learn to identify the elements of the PM life cycle, understand PM processes, comprehend and become familiar with basic PM tools and techniques, utilize techniques for optimizing project results, manage stakeholder communications, understand the principles of team leadership, and identify the career paths in the PM profession. Prerequisite: Junior/Senior standing or department permission.

PMGT 310. Project Communications. 3 Credits.
This course offers students the opportunity to develop comprehensive technical communications and stakeholder-engagement knowledge and skills. Students will master theoretical and applied skills for properly communicating with project stakeholders and team members. Prerequisite: Junior/Senior standing or department permission.

PMGT 315. Project Scheduling and Control. 3 Credits.
This course explores project scheduling, monitoring, and controlling techniques used by successful project managers. Concepts covered in this course include arrow, PERT, precedence, and linear scheduling methods; resource leveling; time-cost analysis; and time-scaled diagrams. Prerequisite: PMGT 305.

PMGT 320. Introduction to Microsoft Project. 3 Credits.
A schedule helps a project manager plan and execute project activities. Microsoft Project is a powerful tool that can help with the planning of project schedules. This course will provide students with practice creating and managing schedules in Microsoft Project. Students will utilize Microsoft Project to create project plans, explore task dependencies, and generate reports. Prerequisite: Junior/Senior standing or department permission.

PMGT 325. Effective Project Team Leadership. 3 Credits.
This course will introduce students to the fundamental relationship management, communications, and leadership skills necessary to effectively lead project teams. Students will be given a dynamic, applied, and comprehensive view of what project leadership is like in contemporary organizational life. Readings, case studies, and videos integrate best current knowledge with established scholarly research in a way that makes the topic of leadership come alive. The course examines such topics as: Personal vs. Positional Power; Influence vs. Authority; Delegation; Motivating, Prioritizing, and Coaching Teams; Stakeholder Communication; and Conflict Resolution.

PMGT 330. Organizational Strategy and Project Initiation. 3 Credits.
This course will explore the linkages between the implementation of projects and overall organizational success. Students will learn to utilize organizational strategy to guide project selection and initiation to achieve value for the organization. In addition, various tools for evaluating and selecting projects will be explored. Students will also evaluate the steps needed to properly initiate a project. Prerequisite: PMGT 305.

PMGT 335. Project Stakeholder Engagement. 3 Credits.
This course introduces the rationales, processes, and general principles of stakeholder engagement for success in projects. Students will examine and analyze the wide range of methods and tools available to engage with the stakeholders on a project. In addition, the key skills and competencies needed to effectively engage with stakeholders will be explored. Prerequisite: PMGT 305.

PMGT 405. Organizational and Project Risk Management. 3 Credits.
This is an introductory course to teach students how to identify, analyze, plan, and manage project-related risks. Students will gain an understanding of the importance and benefit of risk management for projects. Qualitative and quantitative risk management techniques will be presented to students in this course. Prerequisite: PMGT 305.

PMGT 410. Managing Project Success. 3 Credits.
Students in this course will learn the importance and process of identifying the root cause of the problem to be addressed by a project. Projects frequently fail because the project team failed to properly identify the root cause of the problem. Students will also explore the various types and components of project success with a focus on managing project tradeoffs that must be made. Lastly, students will analyze the many situations where project success is achieved through early termination the project. Prerequisite: PMGT 305 and completion of at least 24 credit hours of PMGT courses.

PMGT 415. Project Procurement and Supply Chain Management. 3 Credits.
This course provides students with an overview of procurement, outsourcing, and supply chain management. The history of procurement and supply chain management will be discussed. The most recent methodologies will then be examined, along with the tools and techniques that are needed to manage procurement and the supply chain in an effective way. Prerequisite: PMGT 305.

PMGT 420. Emerging Trends in Project Management. 3 Credits.
This course explores emerging trends in project management expected to impact project management methodologies and tools over the next one to two decades. The challenges associated with implementing these trends in organizations will be examined. In addition, the skills project managers will need to develop to successfully implement these emerging trends will also be explored. Prerequisite: PMGT 305.

PMGT 425. Global Project Management. 3 Credits.
This course introduces students to the management challenges in conducting projects across borders and cultures. The critical success factors for managing projects across national boundaries are discussed. In addition, consideration of vendor and outsourcing management, remote stakeholder management, and effectively addressing cross-cultural, social, and political issues are examined. Prerequisite: PMGT 305.

PMGT 430. Managing Virtual Project Teams. 3 Credits.
This course is designed to provide an overview of key individual, group, and organizational issues involved in managing virtual project teams. Concepts discussed include setting team members up for virtual success, the additional challenges of effective virtual teams, conducting
virtual team meetings, and leading teams across cultures. Prerequisite: PMGT 305 and PMGT 325.

**PMGT 510. Advanced Agile Approaches to Project Management. 3 Credits.**

Students will move beyond a basic understanding of agile project management by exploring various agile development philosophies and methodologies and how they can be applied to manage current projects. Students will learn how to utilize Scrum and several additional agile frameworks. They will also develop an understanding of when to use agile methodologies (and when not to) and how to tailor agile practices for maximum project success. Prerequisite: PMGT 305.

**PMGT 520. Advanced Microsoft Project. 3 Credits.**

Students will learn how they can utilize Microsoft Project beyond basic project scheduling. Students will utilize Microsoft Project to level project resources and capture both cost and schedule progress. Students will also learn to set up a project with a calendar, manage baselines, create custom fields and columns, create custom reports, and understand manual vs. automatic scheduling. Prerequisite: PMGT 315 and PMGT 320.

**PMGT 599. Project Management Capstone. 3 Credits.**

The capstone serves as a culminating experience for the project management courses in this curriculum. Students will demonstrate what they have learned throughout the project management program by applying leadership, critical thinking, problem solving, and creativity skills to real-world project situations. Subjects covered include project selection and initiation, scheduling and work breakdown structures, cost control and earned value management (EVM), risk management, monitoring and controlling, and project closure. Prerequisite: Completion of at least 33 credit hours of PMGT courses.

**PMGT 800. Special Topics: ___. 3 Credits.**

Advanced or experimental work of specialized nature representing unique or changing needs and resources in project management. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

**PMGT 802. Innovation and Change Management Process. 3 Credits.**

This course will examine innovation models and change management process utilized by successful organizations. The course will emphasize how these concepts relate to project management within an organization and the management of technical operations. The course will address the following topics: -Key models for innovation and how they impact planned change processes -Key organizational factors that impact planning for change -Strategies for change within project work -Resistance to change within planned change process -Ethical considerations relating to change management

**PMGT 806. Finance for Project Manager. 3 Credits.**

A study of finance including financial planning and management in technological based organizations. Topics covered include financial statement analysis, present value of financial markets, capital budgeting, taxes, investment decisions, replacement decisions, cash flow budgets and sources of capital.

**PMGT 808. Lean Six Sigma. 3 Credits.**

This course is an introduction to the principles of implementing the Lean Six Sigma philosophy and methodology. Lean Six Sigma is a total enterprise philosophy. Topics follow the DMAIC process and include tools and methods such as process flow diagrams, cause and effect diagrams, failure mode and effects analysis, capability studies, and design of experiments. The use of various concepts to reduce waste and improve system performance such as process flow, standardized work, value streams, workplace organization, and visual controls are covered. Course Objectives: -Understand and apply the Six Sigma DMAIC model for improvement activities. -Utilize Six Sigma knowledge and skills to lead successful improvement projects that deliver meaningful results. -Facilitate the use of improvement tools and techniques in improvement projects.

**PMGT 809. Personal Development for Project Managers. 4 Credits.**

Concepts and skills development in the primary areas of communication methods, ethical behavior, conflict resolution, workforce diversity, and continuous learning, and secondary areas of basic project and project team contexts and related interpersonal relations. Career development is emphasized.

**PMGT 810. Financial Management. 3 Credits.**

A study of the concepts and applications of financial planning and management for project and operational managers. Topics include time value of money, asset valuation, capital structures and budgeting, financial analysis and cash flow, and project and operational investment decision-making. Course Objectives: -Knowledge and understanding the principles of financial planning and management. -Knowledge and skills with corporate structures, financial institutions, and investments. -Knowledge and skills with financial reports including balance sheets, income statements and financial ratios. -Ability to apply time valuations, cash flows, and taxation in project and operational environments. -Ability to apply capital structures and budgeting in project and operational decisions.

**PMGT 811. Project Contracts and Procurement. 3 Credits.**

An advanced study of the project procurement and contract administration bodies of knowledge and their applications. The project procurement's place in a supply chain life cycle is covered from needs identification to contract closeout with emphasis on requirements definition, vendor selection, contract negotiation and award, service delivery, and performance monitoring. Course Objectives: -Knowledge and understanding of the theories, principles, and benefits of the project procurement life cycle. -Knowledge and application of procurement planning and contract administration best practices, processes, and tools. -Practical application of the project management body of knowledge specific to project procurement management. -Practical application of the supply chain and commercial business body of knowledge specific to contract award, execution, and closeout.

**PMGT 816. Project Management Fundamentals I. 3 Credits.**

Managerial concepts and skills development in relation to the project-oriented business environment, project lifecycle, integrated project management, project selection, and project initiation. Focus is on management of a single project.

**PMGT 817. Project Management Fundamentals II. 3 Credits.**

Planning concepts and skills development in relation to developing needed information on project scope, time, cost, and risk, and making direct use of such information to develop key documentation such as the project schedule and budget. Examples of specific topics considered include project work content and change, documentation, and resource requirements. Planning content is complementary to that of PMGT 818. Prerequisite: PMGT 816.

**PMGT 818. Project Management Fundamentals III. 3 Credits.**

Concepts and skills development in relation to planning for management of communications, human resource aspects of project team formation and development, procurement, and quality. Examples of specific topics considered include information handling, reporting, and stakeholder
relationships. Planning content is complementary to that of PMGT 817. Prerequisite: PMGT 816.

PMGT 819. Project Management Fundamentals IV. 3 Credits. Concepts and skills development in relation to project execution, including processes monitoring and controlling, and project closure. Examples of specific topics considered include handling change requests, procurement, teamwork and team development, and cost management. Course content represents systematic treatment of all aspects of project management beyond planning—but is, in project execution and closing phrases. Prerequisite: PMGT 816.

PMGT 820. Management of New Product Development Projects. 3 Credits. This course discusses how to properly manage new product development processes using project management tools and techniques. New products are not projects until they are analyzed, planned, scheduled, budgeted, managed, and controlled by managers. It is not typically technical process issues that result in failed new product introductions, but rather a failure in their management and marketing. Prerequisite: PMGT 816 or PFS 804.

PMGT 821. Management of Consulting Projects. 3 Credits. Application area course exposing students to specialized knowledge, standard, and regulations involved in managing consulting projects. Attention is directed to unique characteristics of consulting project environments, major project phases—from selection to closing-related management processes. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 822. Management of Governmental Projects. 3 Credits. Application area course exposing students to specialized knowledge, standards, and regulations involved in managing projects for governmental entities. Attention is directed to unique characteristics of the governmental project environments, major project phases—from selection to closing-related management processes. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 823. Risk Management for Project Managers. 3 Credits. Advanced study of risk management theory and practice as applied in managing projects. Basic concepts and methods of risk management are reviewed—such as qualitative and quantitative risk assessment and details then examined. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 824. Project Cost Estimation, Analysis, and Control. 3 Credits. Advanced study of cost estimation methodology, cost engineering, and cost control applicable in project management. Includes review of commonly used supportive software. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 825. Portfolio Analysis and Program Management. 3 Credits. Review practices and processes to achieve organizational objectives by utilizing portfolio analysis and program management. Project evaluation and selection, funding, and performance tracking processes will be examined as well as the facilitation of these efforts across multi-tiered organizations. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 827. Project Team Management and Development. 3 Credits. Concepts and methods of team and team member development, achieving higher-performance teams while satisfying organizational expectations. Specific topics include management concepts and practices, team dynamics, and interpersonal skills in negotiation and conflict resolution. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 828. Management of Global Projects. 3 Credits. Survey of management challenges in conducting international projects, emphasizing cross-cultural issues. Differences across world regions and selected key countries in relation to communication and interpersonal norms, business conventions, and legal systems will receive particular attention. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 829. Management of Distributed Project Teams. 3 Credits. Concepts and methods of conducting high-performance, multi-site team operations, focusing on intra-team communication, coordination, and control. Incorporates review of practical technologies with emphasis on web-enabled approaches. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified.

PMGT 830. Case Studies in Project Management. 1-3 Credits. Reinforcement and demonstration of developing project management skills through case analysis and discussion. Goal is integration of learning across all core courses, and also drawing on content from general management, applications area, and advanced project management elective courses taken. Emphasis is on integrated project management. The students will document their project in a written report and present their project during the final oral examination to the Project Management faculty and student's employer or representative if practical. Prerequisite: Must have completed 21 PMGT credit hours and have completed PMGT 816, PMGT 817, and PMGT 818.

PMGT 833. Management of Internal Projects for Scientists and Technical Professionals. 3 Credits. The purpose of this course is to introduce the student to all aspects of managing a project within a company or organization. The entire project life cycle will be covered from inception to close-out, and many practical considerations will be discussed including material procurement, working with contractors and consultants, selecting software, and managing the project team. The course will focus on how to manage project scope, schedule budget, and resources using personal computer software. A semester project is required presenting an example of project management or investigating some aspect of project management in detail.

PMGT 835. Project Management Capstone. 1-3 Credits. The capstone serves as a culminating experience for this degree. Students will develop an applied workforce project or benefit to in the student's place of employment for full time students. The students will document their project in a written report and present their project during the final oral examination to the Project Management faculty and student's employer or representative if practical. This course can be taken up to three times for a maximum of three credits. Prerequisite: Must have completed 21 PMGT credit hours and have completed PMGT 816, PMGT 817, and PMGT 818.

PMGT 840. Developing as a Project Leader. 3 Credits. Leadership is a critically important, yet elusive concept. There are more than 200 definitions of leadership in the scholarly literature today, reflecting a growing interest in understanding the topic. This course is designed to provide a comprehensive examination of the key attributes of effective leadership in a project management context. The drivers of effective leadership— including emotional intelligence, change adaptability, conflict management, communication, trust, and resilience—will be studied. Students will explore their own natural leadership attributes and learn to develop a compelling, authentic style that aligns with their personalities, experiences, and beliefs. This course examines several theories of leadership, from the original conception of “trait” theory to
The Bachelor of Applied Science in Applied Cybersecurity is designed to meet the growing employment demands for an information security-related workforce. This program is for undergraduate students with a strong interest in practical and applied training in information technology and cybersecurity pathways and who have already earned an associate’s degree or equivalent hours and are looking to complete the last two years necessary for a bachelor’s degree. The program is completed online. Applicants to this program will work with the program’s academic success coach on the KU Edwards Campus for advising.

The Kansas City area is home to numerous tech-sector growth initiatives, such as the National Security Crossroads, an effort led by Kansas and Missouri focused on raising government awareness of security-related operations. These initiatives encompass seven major military bases as well as 11 national-security installations. In 2020, more than 20,000 tech-job openings were posted in Kansas City, the third-highest percentage growth in tech jobs in the U.S., trailing only San Francisco and Austin. In the next 10 years, the region’s tech-workforce demand is expected to increase. More specifically related to information security workforce needs, in 2019 the Mid-America Regional Council identified a need to strengthen educational offerings in cybersecurity to meet area employers’ growing demand for talent. Nationally, according to the Bureau of Labor Statistics, employment of information security analysts is projected to grow 33 percent from 2020 to 2030, much faster than the average for all occupations. About 16,300 openings for information security analysts are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Applications to the BAS in Cybersecurity program will generally be considered under the guidelines of the Transfer Admission Standards. Students must apply and be admitted by the School of Professional Studies. Transfer applicants are required to have a minimum 2.0 GPA. In addition, to be considered for admission, students will need to have completed the prerequisite course work.

The Bachelor of Applied Science is a 120 credit hour applied degree program that allows students to transfer in credit from community college and create a baccalaureate degree pathway with an applied cybersecurity concentration that aligns with their professional goals. The BAS in applied cybersecurity program will utilize the new KBOR policy that allows students to transfer in more than 60 credit hours from community colleges towards their bachelor’s degree.

Degree Learning Outcomes:

- Demonstrate the ability to effectively work as both a team member and leader in workplace environments.
- Effectively communicate to a wide-ranging audience with varying levels of technical ability.
- Recognize the need and importance of continued learning and professional development.
- Analyze systems, programs, and processes (for security risks in Cyber; data problems in Applied Data) and provide appropriate analysis and solutions.
- Apply current practices and procedures.

Degree Requirements

BAS Cybersecurity 4-Year Graduation Plan

The undergraduate program in Cybersecurity is offered online through the KU Edwards Campus in Overland Park, 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate’s degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor’s degree.

Students considering this degree option should contact the Information Technology academic success coach on the Edwards Campus (913-897-8539) for advising on the first two years of study. An academic success coach will help develop a personalized program plan of study for degree completion.

Total Hours 120-122

¹ Means of satisfying KU Core Goals are chosen from a variety of options (see kucore.ku.edu). Hours listed are assuming the goals are satisfied with course work.

Bachelor of Applied Science in Biotechnology

Biotechnology Program

Grounded in biological sciences, chemistry and advanced technology, biotechnology employs biological systems to solve scientific challenges that impact society. Through this program, you will be equipped for diverse career options in fields such as:

- Medical education or professions
- Food science
- Environmental and agricultural sciences
- Animal health
- Pharmaceuticals

In this unique program, you will not be assessed based on your ability to memorize an array of facts but by your ability to reference facts, formulate an approach and integrate data to solve problems.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.
Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Biotechnology**

**KU Edwards Campus**

The undergraduate program in biotechnology is offered in its entirety only at the KU Edwards Campus (http://edwardscampus.ku.edu/), 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate’s degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor’s degree.

**B.A.S. in Biotechnology**

Biotechnology is grounded in biological sciences, chemistry and advanced technology. Biotech scientists employ biological systems to solve scientific challenges and positively impact our society. The medical, food, environmental and agricultural sciences, as well as the animal health and pharmaceutical industry, are all considered part of the biotechnology field. Contact the your academic success coach (https://edwardscampus.ku.edu/program-advisors/) for more information.

**Requirements for the Bachelor of Applied Science Degree in Biotechnology**

**General Education Requirements**

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 47 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 45 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BAS in Biotechnology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to the freshman year, fall semester.

**Total Hours 119-121**

1. Concurrent or prior enrollment in CHEM 130 is required.
2. CHEM 135 is offered at the Lawrence campus in Fall, Spring and Summer semesters. BIOL 350 is a Fall only course offered at the Edwards campus. BIOL 600 is a Spring and Summer course offered at the Edwards campus.
3. Most medical schools require the full CHEM 330, CHEM 331, CHEM 353, and CHEM 336 sequence.
4. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

**Please note:**

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Bachelor of Applied Science in Project Management**

KU’s online Bachelor of Applied Science in Project Management is a degree-completion program that provides those hoping to enter project management professions the opportunity to strengthen their background in content related to their anticipated profession. In these programs, you will learn how theory and practice work together to solve real-world problems in a variety of fields.

According to the Project Management Institute (PMI), organizations and companies across sectors and geographic borders steadily embrace project management. As a growing profession, project management is on track to gain nearly 2.2 million new jobs globally each year through 2027.

Driven by globalization, evolving technology and rapid automation of work processes, all types of organizations are placing growing emphasis on project-based planning, development and even operations, to gain a competitive advantage.

As you pursue your project management bachelor’s degree online with KU, you will be able to partner the project management foundation with additional areas of interest to tailor your education to your desired career path such as:

- Information technology management
- Construction management
- Healthcare management
- Advertising and marketing
- Public administration

**Undergraduate Admission**

**Admission to KU**

Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.
Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

The BAS in Project Management program is unique because it allows students to gain a thorough understanding of project management principles, while also focusing coursework in a variety of specializations such as health Informatics/healthcare, hospitality management, information technology, construction management, etc. from community college partners, specializations such as biotechnology or public and population health within SPS, or appropriate specializations from the Lawrence campus The flexible curriculum of this program allows students to create an academic experience consistent with their career goals.

The Bachelor of Applied Science in Project Management is comprised of five parts:

- KU Core Requirements: 33 credit hours
  - Core 1.1: Critical Thinking Course
  - Core 1.2: Quantitative Literacy Course: MATH 101 College Algebra
  - Core 2.1: Communication Course: ENGL 101 Composition
  - Core 2.1: Communication Course: ENGL 102 Critical Reading and Writing or BUS 305 Business Writing
  - Core 2.2: Communication Course: COMS 130 Speaker-Audience Communication
  - Core 3H: Arts and Humanities Course
  - Core 3N: Natural Science Course
  - Core 3S: Social Sciences Course
  - Core 4.1: Human Diversity Course
  - Core 4.2: Global Culture/Awareness Course
  - Core 5.1: Social Responsibility and Ethics Course
  - Core 6: Integration and Creativity Course: Fulfilled by Major
- BAS Project Management Sequence Courses: 36 credit hours
  - MATH 365 Elementary Statistics
  - PMGT 305 Foundations of Project Management
  - PMGT 310 Project Communications
  - PMGT 315 Project Scheduling and Control
  - PMGT 320 Introduction to Microsoft Project
  - PMGT 325 Effective Project Team Leadership
  - PMGT 405 Organizational and Project Risk Management
  - PMGT 330 Organizational Strategy and Project Initiation
  - PMGT 410 Managing Project Success
  - PMGT 415 Project Procurement and Supply Chain Management
  - PMGT 335 Project Stakeholder Engagement
  - PMGT 420 Emerging Trends in Project Management
- PMGT Elective Courses: 9 credit hours of the courses below
  - PMGT 425 Global Project Management
  - PMGT 510 Advanced Agile Approaches to Project Management
  - PMGT 430 Managing Virtual Project Teams
  - PMGT 520 Advanced Microsoft Project
- Upper-Division General Electives or Minor: 39 credit hours
  - Thirty-nine (39) credit hours of upper-division courses (300+ level or above) are allocated for electives. Students are encouraged to obtain one or two minors in other disciplines in fulfilling their elective credit hours.

  - Capstone: 3 credit hours
  - PMGT 599 Project Management Capstone

Example Plan of Study: Please consult with an academic success coach for a personalized plan.

Bachelor of Arts and Bachelor of General Studies in American Sign Language and Deaf Studies

Culture and language intertwine in the Bachelor of Arts (BA) and Bachelor of General Studies (BGS) in American Sign Language (ASL) and Deaf Studies. Gain an understanding of Deaf studies and social justice, advanced ASL and interpreting. This degree consists of tracks designed for those who have completed a minimum of ASL I-IV, Deaf and heritage language users, working interpreters and graduates of Interpreter Education Programs.

Coursework and skill development provides a strong foundation in language and cultural education for those interested in fields such as social work, education, legal, medical, ASL/English interpretation and more. In addition, Deaf or hearing, heritage ASL users gain a deeper understanding of their home language and culture while earning a valuable professional credential.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credit.transfer.ku.edu/) website.

The major requires as total of at least 30 credit hours (completed through 10 courses at three credit hours each). Students are recommended to consult with their academic success coach prior to enrolling in course work to ensure that all pre-requisites are met.

Courses:

---

1. The major requires a total of 30 credit hours (completed through 10 courses at three credit hours each).
2. Elective courses can be ASL courses or topics from other disciplines. Students are encouraged to utilize elective options to pursue a minor or certificate program.
3. The University of Kansas Edwards Campus only teaches classes at the Junior and Senior level. Students are recommended to meet with their Academic Success Coach/Advisor each semester to ensure that the degree requirements are met. This is a suggested semester-by-semester degree completion plan based on the transfer pathway from JCCC's Associates of Arts program with the ASL Certificate. Students may follow the course sequencing above, but are not required to complete the course work in this order.

Please note:

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

The Bachelor of Health Science (BHS) degree will be a J.CERT funded 100% online completion degree for students transferring from community colleges or KU Lawrence. Elective courses will afford students the ability to concentrate in the following areas focus: Nutrition, Public and Population Health, and Health Management and Policy. BHS degrees will prepare students to directly enter the workforce or continue on to pursue graduate education in Public Health, Hospital Administration, Nutrition and Dietetics, among other Health related management graduate degrees.

The proposed Bachelor of Health Sciences program is unique because it draws upon coursework from multiple programs and disciplines. The flexible curriculum of this science program allows students to create an academic experience consistent with their health care career goals.

The proposed Bachelor of Health Sciences degree is comprised of six parts:

### Bachelor of Professional Studies

The Bachelor of Professional Studies (BPS) program is designed for undergraduate students with a strong interest in practical training in professional management career pathways. The BPS degree is a professional track baccalaureate completion degree for students transferring to KU with an associate degree or equivalent hours and who are looking to complete the last two years necessary for a bachelor’s degree. The BPS program is unique because it draws upon coursework from multiple programs and disciplines.

The flexible curriculum of this degree program allows students to transfer in credit from a community college or other accredited institution and create a baccalaureate degree pathway to demonstrate their ability to succeed in courses with content relevant to their anticipated profession. Students in the BPS program choose a concentration that aligns with their professional goals in the areas of Applied Data Analytics, Health Policy and Management, or Project Management.

### Objectives
- Please note:
  - The same course cannot be used to fulfill more than one KU Core Goal.
  - However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### General Electives or Minor
- Eighteen (18) credit hours of electives or for a minor

### Capstone
- HSCI 599: Health Science Capstone

Below is a sample 4-year plan for students pursuing the Bachelor in Health Science. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Please note:

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Concentration Option #1: Applied Data Analytics

The concentration in Applied Data Analytics is designed for undergraduate students with a strong interest in information technology to build entry-level practical and applied training in data analytics, operational analytics, research analysis, big data, and data management-related career pathways. The concentration provides students interested in information technology seeking to specialize in applied data and visual management systems and applications with program curriculum content relevant to technology applications of applied data science.

Concentration Option #2: Health Policy and Management

The Health Policy and Management concentration is ideal for students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings, working in the legal, management, or policy making aspects of the health care sector. The concentration will provide the student with a understanding of the organizational, management, economic, and financial structures of health care organizations, as well as the legal, ethical, and governmental policies of the health care industry. Students will learn about the societal context of various healthcare delivery systems and the major issues and challenges affecting the healthcare industry.

Concentration Option #3: Project Management

The concentration in Project Management provides undergraduate students seeking to enter project management professions the opportunity to learn how theory and practice work together to solve real-world problems in a variety of fields. The flexibility built into the BPS degree allows students to pair the project management foundation provided through the Project Management concentration with additional areas of interest to tailor your education to your desired career path such as:

- Information technology management
- Construction management
- Healthcare management
- Advertising and marketing
- Public administration

Undergraduate Admission

Admission to KU

Consult the Office of Admissions (https://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (https://iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (https://admissions.ku.edu/apply/credit-transfer/) website.

Degree Requirements

The Bachelor of Professional Studies (BPS) program is unique because it draws upon coursework from multiple programs and disciplines. The flexible curriculum of this degree program allows students to transfer in credit from community college and create a baccalaureate degree pathway with emphasis areas that align with their professional goals. Students choose a concentration in Applied Data Analytics, Health Policy and Management, or Project Management.

**Total Hours 120-122**

**Bachelor of Science in Applied Biological Sciences**

**Applied Biological Sciences**

A bachelor’s degree in applied biological sciences offers students a strong background in genetics, microbiology, cell biology and biochemistry, as well as hands-on lab experience. Many students in this program continue on to pursue medical, dental or pharmacy school, or graduate work in the health sciences with high success rates.

The KU Edwards Applied Biological Sciences program is designed for undergraduate students who have already earned an associate’s degree or equivalent hours and are looking to complete the last two years necessary for a bachelor’s degree.

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult
the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Applied Biological Sciences**

**KU Edwards Campus**

The undergraduate program in applied biological sciences is offered in its entirety only at the KU Edwards Campus (http://edwardscampus.ku.edu/), 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate’s degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor’s degree.

**Requirements for the B.S. Degree in Applied Biological Sciences**

The program offers students a strong background in genetics, microbiology, cell biology, and biochemistry, as well as laboratory skills in genetics and microbiology. Graduates have entered medical school, dental school, and graduate school with high success rates. Contact the Applied Biological Science academic success coach on the Edwards Campus for more information.

**General Education Requirements**

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

### General Science Requirements

**Code** | **Title** | **Hours**
--- | --- | ---
**General Science Requirements**

Majors must complete the following general science requirements that serve as foundational courses for this major.

**Chemistry I. Satisfied by one of the following:**

- CHEM 130 | General Chemistry I | 5
- CHEM 190 & CHEM 191 | Foundations of Chemistry I, Honors and Foundations of Chemistry I Laboratory, Honors | 5

**Chemistry II. Satisfied by one of the following:**

- CHEM 135 | General Chemistry II | 5
- CHEM 195 & CHEM 196 | Foundations of Chemistry II, Honors and Foundations of Chemistry II Laboratory, Honors | 5

**Organic Chemistry I. Satisfied by one of the following:**

- CHEM 330 | Organic Chemistry I | 3
- CHEM 380 | Organic Chemistry I, Honors | 3

Organic Chemistry I Laboratory. Satisfied by:

- CHEM 331 | Organic Chemistry I Laboratory | 2

**Organic Chemistry II. Satisfied by one of the following:**

- CHEM 335 | Organic Chemistry II | 3
- CHEM 385 | Organic Chemistry II, Honors | 3

Calculus. Satisfied by one of the following:

- MATH 115 | Calculus I | 4-6
- MATH 116 | and Calculus II | 4-6

MATH 125 | Calculus I (Calculus I) | 8-9

Physics. Satisfied by one of the following:

**Option 1: College Physics**

- PHSX 114 | College Physics I
- & PHSX 115 | and College Physics II

**Option 2: General Physics**

- PHSX 211 | General Physics I
- & PHSX 216 | and General Physics I Laboratory
- PHSX 212 | General Physics II
- & PHSX 236 | and General Physics II Laboratory

Statistics. Satisfied by one of the following:

- BIOL 370 | Introduction to Biostatistics
- MATH 365 | Elementary Statistics
- PSYC 210 | Statistics in Psychological Research

**Applied Biological Sciences Course Requirements**

Molecular & Cellular Biology. Satisfied by:

- BIOL 150 | Principles of Molecular and Cellular Biology | 3
- or BIOL 151 | Principles of Molecular and Cellular Biology, Honors | 3

Principles of Organismal Biology. Satisfied by:

- BIOL 152 | Principles of Organismal Biology | 3
- or BIOL 153 | Principles of Organismal Biology, Honors | 3

BIOL 154 | Introductory Biology Lab for STEM Majors | 2

Principles of Genetics. Satisfied by:

- BSCI 350 | Genetics | 4

Fundamentals of Microbiology. Satisfied by:

- BSCI 400 | Microbiology | 3

Fundamentals of Microbiology Laboratory. Satisfied by:

- BSCI 401 | Microbiology Laboratory | 3

Laboratory in Genetics. Satisfied by:

- BSCI 351 | Genetics Laboratory | 3

Cell Structure & Function. Satisfied by:

- BSCI 416 | Cell Structure and Function | 3

Molecular Biology Laboratory. Satisfied by:

- BSCI 430 | Molecular Biology Laboratory | 3

Introductory Biochemistry. Satisfied by:

- BSCI 400 | Biochemistry | 3

Principles of Biochemistry Laboratory. Satisfied by:

- BSCI 600 | Biochemistry | 3

Senior Seminar in Applied Biological Sciences

Satisfied by:

- BSCI 599 | Senior Seminar: _______ | 1

**Applied Biological Sciences Required Electives**

Satisfied by completing 12 hours of BSCI courses numbered 400 or higher or BTEC 300, 310, 400, 475, 494, or 550, including at least 2 hours of a seminar/topics course. No more than 3 hours of BSCI 423 Non-Lab Independent Study and/or BSCI 424 Independent Study (combined) can be applied towards the elective requirement.

Seminar. Satisfied by completing at least 2 hours of the following seminar or topics courses:

- BSCI 421 | Topics in Applied Biological Sciences: _______ | 4-6
**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 43-44 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of 120 total hours of which 45 hours are KU resident credit in the major.

**Goals, please visit the KU Core website**
(http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Applied Biological Sciences. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

The Applied Biological Sciences major is only available at the Edwards campus in Overland Park, KS. The Edwards Campus only offers Junior/Senior level courses (300+). Lower level courses (100-299) may need to be taken at the KU Lawrence campus or transferred in from another institution. Please consult an academic advisor for more assistance.

### Total Hours 122-124

1. Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 and MATH 116 to fulfill the B.S. Molecular Biosciences math requirement.

2. Concurrent or prior enrollment in CHEM 130 is required.

3. CHEM 335 is offered only in the spring and summer (Lawrence campus). BIOL 370 is offered only in the fall (Lawrence campus).

4. BSCI 350, BSCI 351, and BSCI 601 are offered only on the Edwards campus in the fall.

5. BSCI 400, BSCI 401, and BSCI 600 are offered on the Edwards campus in both spring and summer semesters.

6. BSCI 416, BSCI 430, and BSCI 599 are offered on the Edwards campus only in the spring.

7. Twelve hours of BSCI/BIOL 400+ level elective and seminar courses, including at least 2 hours of seminar/topics course. No more than 3 hours of independent study can be applied towards the elective requirements.

**Please note:**
All students are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Science in Information Technology

Bachelor of Science in Information Technology Program

Information technology covers a variety of professional disciplines, including software development, systems administration and analysis, network support, web development, cybersecurity, and computer and information research science. A professional with an information technology degree might design and build data communication networks, write and test code for applications and software programs, provide support to users and organizations, or implement security measures to protect computer networks and systems.

The undergraduate program in Information Technology is offered online through the KU Edwards Campus, 12600 Quivira Rd., Overland Park, KS 66213. Students considering this degree option should contact the Information Technology academic success coach on the Edwards Campus (913-897-8539) for advising. An academic success coach will help develop a personalized program plan of study for degree completion.

This program is funded by the Education and Research Triangle (http://edwardscampus.ku.edu/johnson-county-education-research-triangle/) initiative.

Careers

Professional Opportunities

The U.S. Bureau of Labor Statistics predicts job openings in information technology to grow much more than the average for all occupations, as much as 12 percent by 2028, much faster than the average for all other careers. As IT solutions continue to expand, professionals are needed in nearly every business sector. They may find careers in information security, software development, platform technologies, network and system administration, Web system development, and IT project management.

Undergraduate Admission to the B.S. in Information Technology Program

Applications to the B.S. in Information Technology program will generally be considered under the guidelines of the Transfer Admission Standards. In addition, to be considered for admission, students will need to complete the B.S. in Information Technology prerequisite course work listed below. The deadline for admission consideration is Dec. 15 for the spring semester.

B.S. in Information Technology Prerequisite Course Work

The successful completion of the following requirements is needed for admission into the B.S. in Information Technology program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GE 1.1</td>
<td>College Algebra: _____ (Satisfies KU Core Goal GE 1.2)</td>

<td>4</td>
</tr>
</tbody>
</table>

1 Means of satisfying KU Core Goals are chosen from a variety of options (see kucore.ku.edu (http://kucore.ku.edu)). Hours listed are assuming the goals are satisfied with course work.
2 This specific course is not offered at KU, however an equivalent course from KU may be substituted. Consult your advisor.
3 No equivalent course is offered at KU; it must be transferred from a different college or university. Consult your advisor.

Bachelor of Science in Information Technology Degree Requirements

The KU Core

This is the university-wide curriculum that all incoming undergraduate students will complete as part of their degree requirements. It comprises three general education goals and three advanced education goals. Associated with each goal is one or more learning outcomes:

- GE 1.1, Goal 1/Outcome 1, Critical Thinking;
- GE 1.2, Goal 1/Outcome 2, Quantitative Literacy;
- GE 2.1, Goal 2/Outcome 1, Written Communication;
- GE 2.2, Goal 2/Outcome 2, Oral Communication;
- GE 3H, Goal 3/Outcome 1, Arts & Humanities;
• GE 3N Goal 3/Outcome 2, Natural Sciences;
• GE 3S Goal 3/Outcome 3, Social Sciences;
• AE 4.1, Goal 4/Outcome 1, Diversity;
• AE 4.2 Goal 4/Outcome 2 Culture;
• AE 5.1, Goal 5/Outcome 1, Social Responsibility & Ethics (course);  (Satisfied by ITEC 450)
• AE 6.1, Goal 6/Outcome 1/2, Integration & Creativity. (Satisfied by ITEC 490)

Details of the KU Core can be found at kucore.ku.edu (http://kucore.ku.edu). Some required courses in the IT curricula satisfy a KU Core goal and/or outcome. For these courses, the goal/outcome code is given in parentheses after the course on the pages below. Where required courses do NOT specifically satisfy KU Core goals (Goals 2, 3, and 4) students must choose from a list of several means to satisfy the required goals.

A minimum of 120 credit hours is required for the B.S. in Information Technology, as follows:

</tr>
</tbody>
</table>

**Electives** 12-14 credit hours of elective coursework is typically needed to meet the 120 credit hour requirement.

¹ Means of satisfying KU Core Goals are chosen from a variety of options (see kucore.ku.edu (http://kucore.ku.edu)). Hours listed are assuming the goals are satisfied with course work.

² This specific course is not offered at KU, however an equivalent course from KU may be substituted. Consult your advisor.

³ No equivalent course is offered at KU; it must be transferred from a different college or university. Consult your advisor.

**Information Technology 4-Year Graduation Plan**

The undergraduate program in Information Technology is offered online through the KU Edwards Campus in Overland Park, 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate’s degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor’s degree. Students planning to attain the degree will need to transfer key credits from other academic institutions as not all required courses are available through KU.

Students considering this degree option should contact the Information Technology academic success coach on the Edwards Campus (913-897-8539) for advising on the first two years of study. An academic
success coach will help develop a personalized program plan of study for degree completion.

Bachelor of Science in Project Management

KU’s online Bachelor of Science in Project Management is a degree-completion program that provides those hoping to enter project management professions the opportunity to strengthen their background in content related to their anticipated profession. In these programs, you will learn how theory and practice work together to solve real-world problems in a variety of fields.

According to the Project Management Institute (PMI), organizations and companies across sectors and geographic borders steadily embrace project management. As a growing profession, project management is on track to gain nearly 2.2 million new jobs globally each year through 2027.

Driven by globalization, evolving technology and rapid automation of work processes, all types of organizations are placing growing emphasis on project-based planning, development and even operations, to gain a competitive advantage.

As you pursue your project management bachelor’s degree online with KU, you will be able to partner the project management foundation with additional areas of interest to tailor your education to your desired career path such as:

- Information technology management
- Construction management
- Healthcare management
- Advertising and marketing
- Public administration

Undergraduate Admission

Admission to KU

Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

The BS in Project Management program is unique because it allows students to gain a thorough understanding of project management principles, while also focusing coursework in a variety of specializations such as health Informatics/healthcare, hospitality management, information technology, construction management, etc. from community college partners, specializations such as biotechnology or public and population health within the School of Professional Studies, or appropriate specializations from the Lawrence campus. The flexible curriculum of this program allows students to create an academic experience consistent with their career goals.

The Bachelor of Science in Project Management is comprised of six parts:

1. Information technology management
2. Construction management
3. Healthcare management
4. Advertising and marketing
5. Public administration

No equivalent course is offered at KU; it must be transferred from a different college or university. Consult your advisor.

3. No equivalent course is offered at KU; it must be transferred from a different college or university. Consult your advisor.

Means of satisfying KU Core Goals are chosen from a variety of options (see kucore.ku.edu (http://kucore.ku.edu)). Hours listed are assuming the goals are satisfied with course work.

This specific course is not offered at KU, however an equivalent course from KU may be substituted. Consult your advisor.

No equivalent course is offered at KU; it must be transferred from a different college or university. Consult your advisor.
Bachelor of Science in Project Management

- KU Core Requirements: 24 credit hours
  - Core 1.1: Critical Thinking Course
  - Core 1.2: Quantitative Literacy Course: Fulfilled by BS Core
  - Core 2.1: Communication Course: ENGL 101 Composition
  - Core 2.1: Communication Course: ENGL 102 Critical Reading and Writing or BUS 305 Business Writing
  - Core 2.2: Communication Course: COMS 130 Speaker-Audience Communication
  - Core 3H: Arts and Humanities Course
  - Core 3N: Natural Sciences Course: Fulfilled by BS Core
  - Core 3S: Social Sciences Courses: Fulfilled by BS Core
  - Core 4.1: Human Diversity Course
  - Core 4.2: Global Culture/Awareness Course
  - Core 5.1: Social Responsibility and Ethics Course
  - Core 6: Integration and Creativity Course: Fulfilled by Major

- Bachelor of Science Core Courses: 24 credit hours
  - MATH 101 College Algebra: _____
  - MATH 115 Calculus I
  - MATH 365 Elementary Statistics
  - CHEM 130 General Chemistry I (or a physical science course with lab)
  - ACCT 200 Fundamentals of Financial Accounting
  - IST 205 Survey of Information Systems
  - ECON 142 Principles of Microeconomics or ECON 144 Principles of Macroeconomics

- Project Management Sequence Courses: 33 credit hours
  - PMGT 305 Foundations of Project Management
  - PMGT 310 Project Communications
  - PMGT 315 Project Scheduling and Control
  - PMGT 320 Introduction to Microsoft Project
  - PMGT 325 Effective Project Team Leadership
  - PMGT 405 Organizational and Project Risk Management
  - PMGT 330 Organizational Strategy and Project Initiation
  - PMGT 410 Managing Project Success
  - PMGT 415 Project Procurement and Supply Chain Management

- PMGT 335 Project Stakeholder Engagement
- PMGT 420 Emerging Trends in Project Management
- PMGT Elective Courses: 9 credit hours of the courses below
- PMGT 425 Global Project Management
- PMGT 510 Advanced Agile Approaches to Project Management
- PMGT 430 Managing Virtual Project Teams
- PMGT 520 Advanced Microsoft Project

- Electives or Minor Courses: 27 credit hours
  - Twenty-seven (27) credit hours of upper-division courses (300+ level or above) are allocated for electives. Students are encouraged to obtain a minor in another discipline in fulfilling their elective credit hours.

- Capstone: 3 credit hours
  - PMGT 599 Project Management Capstone

Example Degree Plan: Please consult with an academic success coach for a personalized plan.

Minor in Biotechnology

Minor in Biotechnology

Grounded in biological sciences, chemistry and advanced technology, biotechnology employs biological systems to solve scientific challenges that impact society. Through this minor, you will diversify your education and become better equipped for careers in:

- Human and animal health
- Environmental and agricultural sciences
- Pharmaceuticals

In this unique minor, you will be challenged to apply your scientific knowledge and solve problems. You will routinely formulate and execute experimental approaches, analyze data, and communicate results.

Requirements for the Minor

Students selecting this minor must complete each of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BTEC 300</td>
<td>Research Methods in Biotechnology</td>

</tr>
</tbody>
</table>

Biotechnology Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Hours in Residence

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Minor in Clinical Trials Management

KU’s minor in Clinical Trials Management provides students with an understanding of the principles and techniques that are used to design, implement and manage clinical trials, a rapidly growing field of clinical research which is involved with conducting studies to ensure the safety and effectiveness of new drugs, devices, diagnostics and treatment regimens. The minor provides a comprehensive overview of the regulations, ethical principles, and scientific methods that are used to monitor and control clinical trials, including the development process of clinical trials from protocol development to data collection, analysis, and reporting. Overall, the minor in clinical trials management prepares students to work in the clinical trial field in industry, research, and government settings.

Minor Requirements

Coursework required for the minor is designed to provide a broad exposure to the key concepts of clinical trials management, including trial design, management, and operations, as well as legal, ethical, and regulatory issues specific to clinical trials.

Minor in Environmental Health

KU’s minor in Environmental Health addresses all human-health-related aspects of the natural environment and the built environment. Environmental health deals with zoonotic and vector-borne disease, environmental contamination, toxic metal and chemical contamination of air, water, and soil, rural and urban issues, post-disaster contamination issues that affect human, animal, and the environment, and health disparities/inequities and environmental justice issues resulting from past and ongoing environmental contamination and disruption. This minor will appeal not only to students in the health sciences, but also applied biological sciences, environmental studies, geography, geology, sociology, public administration/urban planning, and civil/environmental engineering.

Minor in Health Policy and Management

The minor in Health Policy and Management provides the student with a basic understanding of the organizational, management, economic, and financial structures, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings, working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, psychology, public administration, social welfare, or business undergraduate degrees.

Students will learn about the societal context of various healthcare delivery systems and the major issues and challenges affecting the healthcare industry. They will study the skills required to be a competent, ethically aware healthcare manager who is focused on the needs of patients, clients, caregivers, and healthcare providers.

Minor in Project Management

KU’s online Minor in Project Management provides KU undergraduate students with the opportunity to gain valuable knowledge to properly manage projects, from the very small to those spread out over multiple years. The Minor requires completion of 18 credit hours from the undergraduate Project Management curriculum, where you will learn how theory and practice work together to solve real-world problems in a variety of fields. According to the Project Management Institute (PMI), organizations and companies across sectors and geographic borders steadily embrace project management. As a growing profession, project management is on track to gain nearly 2.2 million new jobs globally annually through 2027. The Minor in Project Management provides KU students with the opportunity to learn the project management skills needed to manage projects in their chosen discipline.

Requirements for the Minor

Minor in Nutrition

With a curriculum focused on the role of nutrition in a wide range of areas, KU’s minor in nutrition provides a useful area of focus for your degree or professional background, helping you become more marketable in a growing career field. Pursue a minor to earn a valuable credential and help start or refocus your work in a nutrition-related field. Alternately, a minor in nutrition can supplement your undergraduate studies to prepare you for a successful career in health, nutrition, wellness, fitness and beyond. The courses and credential from the nutrition program may make you more successful in continuing your education in graduate school.

Minor in Public and Population Health

KU’s minor in public and population health provide a broad exposure to the key concepts of public and population health, as well as an understanding of the connections between public health and the community. KU’s programs focus on understanding the network of behavioral and social factors of health and how they’re intertwined with the community. Students gain knowledge in understanding core concepts in epidemiology and biostatistics, disease prevention, population health and health disparities.

Minor Requirements

Coursework required for the minor is designed to provide a broad exposure to the key concepts of public health as well as an understanding of the connections between public health and other disciplines.

Undergraduate Certificate in Advanced American Sign Language

The Advanced American Sign Language certificate is designed for students who are looking to enter ASL and/or ASL interpreting fields. Alternatively, this certificate could serve students who are sufficiently proficient and fluent in both American Sign Language and English to pass a language proficiency entrance exam. These individuals in this latter category may be Deaf or hearing heritage ASL users. This certificate may also benefit working interpreters or educators working with the Deaf community, who have basic knowledge of ASL, but would like to improve their skills.

Certificate Requirements

The Advanced ASL Undergraduate Certificate is a 15 credit hour certificate that requires the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASLD 505</td>
<td>American Sign Language V (ASL V)</td>
<td>3</td>
</tr>
<tr>
<td>ASLD 506</td>
<td>American Sign Language VI (ASL VI)</td>
<td>3</td>
</tr>
</tbody>
</table>

Select three of the following electives or other departmentally approved courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASLD 520</td>
<td>American Sign Language Linguistics</td>

</table>

Undergraduate Certificate in ASL/English Interpreting

The ASL/English Interpreting certificate is designed for students wishing to pursue ASL/English interpreting at either the introductory or professional level. This certificate could serve students who are sufficiently proficient and fluent in both American Sign Language and English to pass a language proficiency entrance exam. These individuals in this latter category may be Deaf or hearing heritage ASL users.

This certificate is designed for students who have completed course work toward a BA with ASL proficiency IV. It is also open to students who are heritage language signers, or have completed ASL I-IV. It is highly recommended that students complete the Advanced ASL certificate before the ASL/English Interpreting track due to the level of proficiency required. Students that enter the program with proficiency beyond ASL VI are eligible to pursue the ASL/English interpreting certificate without completion of the Advanced ASL certificate, with instructor permission. There is an ASL proficiency test required to begin the ASL/English Interpreting certificate.

The Undergraduate and Graduate Certificates in ASL/English Interpreting aim to prepare students to sit for the NIC and BEI national certification exams so they are eligible for state credentialing in KS and MO. Students in KS who pass the performance certification exam are eligible to register in KS as an interpreter. The website https://kcdhh.ks.gov/communication-services/interpreting-services provides information about KS interpreter registration. Students in MO who pass the MO certification exam are eligible to register in MO as an interpreter.
eligible to seek licensure in MO as an interpreter. The website https://mcdhh.mo.gov/interpreters/ provides information about MO interpreter certification and licensing. If you plan to obtain a license or certification in a state other than Kansas or a US territory after completion of your program, it is highly recommended you first seek guidance from the appropriate licensing agency BEFORE beginning the academic program to ensure you can obtain a license or certification in your home state or territory. The website https://rid.org/advocacy-overview/state-information-and-advocacy/ provides resources for licensure and certification boards outside of Kansas. The Undergraduate and Graduate Certificates in ASL/English Interpreting does not guarantee that students will pass the certification exams, but covers the necessary materials to prepare students to sit for the exam.

Certificate Requirements

The ASL/English Interpreting Undergraduate Certificate is a 15 credit hour certificate that allows students to select one of the two tracks:

**Introduction to ASL/English Interpreting Track**

Undergraduate Certificate in Biotechnology

**Certificate in Biotechnology**

Grounded in biological sciences, chemistry and advanced technology, biotechnology employs biological systems to solve scientific challenges and impact society. Through this certificate, you will diversify your knowledge and be equipped for careers in:

- Research and Development
- Human Health
- Animal Health
- Pharmaceuticals

In this unique certificate, you will be challenged to apply your scientific knowledge and solve problems. You will routinely formulate and execute experimental approaches, analyze data, and communicate results. Through this experience you will work to master:

- Spectroscopy (Abs, Fluorescence, Luminescence)
- Quantitative Analysis
- Separation Science (HPLC)
- DNA Manipulation (Primer Design, PCR, DNA Gels)
- Expression of proteins in microbial systems
- Cell-based Analysis (Flow cytometry)
- Tools used in Bioinformatics

Undergraduate Certificate in Deaf Studies and Social Justice

The Deaf Studies and Social Justice certificate is designed for students interested in learning more about the world of the deaf in America, deaf culture, the education of deaf children, useful technology, and the integration of deaf people into the American society. Students from other disciplines are welcome pursue this certificate program. ASL proficiency is not required, but some course may be taught in ASL with an English interpreter.

Undergraduate Certificate in Nutrition
With a curriculum focused on the role of nutrition in a wide range of areas, KU’s undergraduate certificate provides a useful area of focus for your degree or professional background, helping you become more marketable in a growing career field. Pursue an undergraduate certificate to earn a valuable credential and help start or refocus your work in a nutrition-related field. Alternately, a certificate in nutrition can supplement your undergraduate studies to prepare you for a successful career in health, nutrition, wellness, fitness and beyond. The courses and credential from the nutrition program may make you more successful in continuing your education in graduate school.

Certificate Requirements
The Undergraduate Certificate in Nutrition requires 12 credits hours:

<table>
<thead>

</tbody>
</table>

Undergraduate Certificate in Public and Population Health
KU’s undergraduate programs in public and population health provide a broad exposure to the key concepts of public and population health, as well as an understanding of the connections between public health and the community. KU’s programs focus on understanding the network of behavioral and social factors of health and how they’re intertwined with the community. Students gain knowledge in understanding core concepts in epidemiology and biostatistics, disease prevention, population health and health disparities.

Certificate Requirements
Coursework required for the certificate is designed to provide a broad exposure to the key concepts of public and population health as well as an understanding of the connections between public health and other disciplines.

Post-Baccalaureate Certificate in Health Sciences
KU’s Post-Baccalaureate Certificate in Health Sciences helps traditional and non-traditional students complete upper-level undergraduate biology and biotechnology courses. The curriculum allows students who hold a bachelor’s degree to grow in areas where academic strengthening is needed, develop clinical reasoning skills, and acquire additional training to begin or advance a career in health sciences or biotechnology.

The Post-Baccalaureate Certificate in Health Sciences focuses on developing health science, biotechnology and research science knowledge and skills, which apply toward admission to medical school, as well as a wide variety of health or biotechnology-related careers, depending on the academic track chosen.

Admission to KU
Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admissions criteria:
The Post-Baccalaureate Certificate in Health Sciences is available to students who already hold a bachelor’s degree and passed the following prerequisite courses with a 2.7 GPA or better: General Biology I with a lab and General Chemistry I and II with a lab (Physics I with a lab and General Biology II are recommended).

Admissions Requirements:
The Post-Baccalaureate Certificate in Health Sciences is available to students who already hold a bachelor’s degree with a 2.7 GPA or better and passed the following prerequisite courses: General Biology I with a lab and General Chemistry I and II with a lab (Physics I with a lab and General Biology II are recommended).
that focuses on helping mid-career professionals refine an advanced set
of communication competencies related to understanding and managing
organizational culture, team productivity and their personal career growth.
The degree is applicable to a wide range of professions, including human
resources, communications, or engineering – especially as one advances
into management and leadership positions.

Professionals in every field today must be skilled at communicating
across boundaries and uniting people around big new ideas and business
imperatives. The MA in Organizational Communication provides students
research-based insights helpful in clarifying, connecting, and inspiring
diverse groups of employees and customers through communication.
This differentiating communication skillset will help graduates become a
trusted advisor for peers, company leaders and clients. Whether planning
for a role change, looking to transition back into the workforce after taking
care of family, or simply looking to effectively share expertise with others,
advanced communication knowledge helps professionals transition within
and across multiple industries and professions over the long term.

The program focuses on key facets of communication within organizations
such as,

- Effectively building trust, prevent conflict across diverse teams and
departments
- Identifying the management communication issues driving low
employee engagement
- Leading a global team on a complex organizational change project
- Increasing retention of a diverse workforce with inclusive team
communication practices
- Building effective onboarding programs for new hires and promotions
- Distilling survey findings into a presentation or report to address the
concerns of multiple stakeholders or audiences, from marketing to
finance and manufacturing
- Leveraging the power of social networks to successfully launch new
internal initiatives, products

Admissions

To apply for admission, the applicant must supply the following materials:

1. Complete an online application (https://gradapply.ku.edu/apply/). An
application fee will be charged at the time of applying online.
Applicants must pay the application fee with a credit card.

2. Submit one copy of official transcripts of all previous college work,
both undergraduate and graduate. Transcripts will be submitted online
by the student, and the applicant must send an official sealed copy to
the department at the address listed below.

3. Submit two letters of recommendation from individuals in a position to
comment meaningfully on the applicant's potential for graduate work.
Individuals writing letters will be sent an e-mail from College Net with
instructions to fill out an evaluation form and attach a copy of their
letter to that. These items will be uploaded to the student's account
when complete.

4. Submit online a two to three page statement of purpose letter
indicating the importance of your goals and academic interests
and how these goals and interests could be satisfied by studying
Organizational Communication.

5. Submit a resume or curriculum vita

6. Submit a research or professional writing sample
Applicants are evaluated on the overall strength of their materials based on a balance of the following criteria: academic record as reflected in overall GPA; the strength of recommendation letters; and the strength of the research sample submitted by the student. The final decision is based on the overall strength of the application as reflected in all of the criteria listed.

*The master’s degree concludes with a demonstration of content mastery. Students can choose to complete either a comprehensive exam or a capstone project. Selection from these two options should be based on your learning goals and chosen in consultation with program faculty and your academic success coach. An additional three credit hours of electives will be required for the exam option. Please consult with your advisor to discuss which option will work best for your needs and goals.

**Project Management (M.E. & M.S.)**

**Project Management Graduate Program**

**Master of Engineering (M.E.) or Master of Science (M.S.)**

**KU Edwards Campus**

Project Management (http://www.pmgt.ku.edu/) is driven by globalization, the internet, and the rapid advancement for work processes. Organizations must implement projects faster than ever before. These organizations are looking for technically oriented and highly skilled project managers. Our Project Management degree addresses workforce needs by providing individuals from multiple disciplines with the skills, confidence, and competence to manage a variety of projects, as well as bridge the fields of engineering, technology, people, and business. Individuals may opt for a Master of Engineering (http://www.pmgt.ku.edu/me-pm/) (M.E.) in Project Management or a Master of Science (http://www.pmgt.ku.edu/ms-pm/) (M.S.) in Project Management depending on their undergraduate discipline.

The Project Management (PMGT) fundamental courses will strengthen knowledge and ability to apply the theories and concepts of Project Management in the real world. Electives will be offered on a rotational basis and will remain current with Project Management trends, demands, and the interests of our students.

Courses are offered in various formats including in-person in Overland Park on the KU Edwards Campus (https://edwardscampus.ku.edu/) and online. In-person courses are also recorded and live-streamed. Classes are taught by Graduate Faculty members of the School of Professional Studies and members of the professional community.

**Graduate Admission Requirements**

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

**For admission to KU’s Master of Engineering in Project Management, applicants must have:**

1. An undergraduate degree in engineering or related science from an accredited institution.
2. A 2.5 or higher undergraduate grade point average (on a 4.0 scale). Applicants may be admitted with a grade point average between 2.0-2.5 upon program review of their overall credentials.
3. Two years full-time, post-undergraduate work experience in a technological environment.
4. International students must also meet the English requirement by taking either the Test of English as a Foreign Language (TOEFL),
the International English Language Testing System (IELTS) or have a degree from an English speaking institution. Financial support requirements must also be met.

All applications are completed online. A complete application includes the application fee, application form, résumé, 1 original transcript showing degree conferral, and a statement of purpose. Course schedules, faculty biographical information, and other program information may be requested from the PMGT office or downloaded from the Project Management website.

Graduate applications should be submitted online (http://www.graduate.ku.edu/).

For admission to KU's Master of Science in Project Management, applicants must have:

1. Bachelor of Science degree from an accredited institution.
2. A 2.5 or higher undergraduate grade point average (on a 4.0 scale). Applicants may be admitted with a grade point average between 2.0 and 2.5 upon program review of their overall credentials.
3. GRE score, sent directly to the Project Management Program Coordinator. The GRE may be waived, upon departmental review, if the applicant has 2+ years of qualified professional experience.
4. International students must also meet the English requirement by taking either the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or have a degree from an English speaking institution. Financial support requirements must also be met.

All applications are completed online. A complete application includes the application fee, application form, résumé, 1 original transcript showing degree conferral, and a statement of purpose. Course schedules, faculty biographical information, and other program information may be requested from the PMGT office or downloaded from the Project Management website.

International students and students who indicated English as a second language, are required to show proof of English proficiency for admission purposes and must check-in at the Applied English Center (https://aec.ku.edu/) (AEC) upon arrival on campus for orientation. This process serves to confirm each student's level of English proficiency and determine whether English courses will be included as a requirement of the student’s academic program. Note: Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed in the policy (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/) are not required to check in at the AEC (see eligibility requirements on the Graduate Studies website (https://graduate.ku.edu/english-proficiency-requirements/)).

The University of Kansas Edwards Campus

Overland Park, KS 66213

Degree Requirements

The Masters in Project Management requires a total of 33 semester hours of graduate work. A total of 12 hours will be completed in Project Management (PMGT) fundamentals for both the Master of Engineering and Master of Science, while the remaining 21 hours will be completed in varying required course work and electives depending on the degree program. Please refer to the Plan of Study below for the corresponding degree program. Students will work with their academic success coach and/or program director to finalize course selections to meet department and university requirements for degree completion and complete their Plan of Study.

Master of Science in Engineering Management

Engineering Management Graduate Program

KU Edwards Campus

The Engineering Management M.S. program provides superior graduate education for technical managers from engineering, science, mathematics, and computer science. EMGT graduates are more effective managers in technology-based organizations and are better able to promote entrepreneurial activities for new businesses.

The EMGT program integrates management with technology by focusing on 3 dimensions:

1. Technical: an understanding of and proficiency in engineering and science.
2. Human: the ability to build a collaborative effort within a group.
3. Conceptual: the ability to apply analytical thought to the management process and to the enterprise as a total system.

The EMGT program offers these emphasis areas: consulting engineering services, manufacturing/process engineering and systems and information technology.

Courses are offered in various formats including in person in Overland Park on the KU Edwards Campus (http://edwardscampus.ku.edu/) and online. In-person courses are also recorded and live-streamed. Classes are taught by Graduate Faculty members of the School of Professional Studies and members of the professional community.

Graduate Admission Requirements

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

For admission to KU’s Master of Science in Engineering Management program, applicants must have:

1. Bachelor of Science undergraduate degree in engineering or related science from an accredited institution. Non-Bachelor of Science degrees or Technology degrees are considered only with a very high (e.g. 3.8) GPA and substantial experience (8-10 years) and with the applicant having completed the necessary math and science requirements.
2. A 2.5 or higher undergraduate grade point average (on a 4.0 scale). Applicants may be admitted with a grade point average between 2.0 and 2.5 upon program review of their overall credentials.
3. Two years full-time, post-undergraduate work experience in a technological environment.

4. International students must also meet the English requirement by taking either the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or have a degree from an English speaking institution. Financial support requirements must also be met.

Engineering Management (EMGT) does not require the GRE or GMAT.

A completed application includes the application fee, application form, résumé, 1 original transcript, and a statement of purpose. International students must also meet English and financial requirements. Course schedules, faculty biographical information, and other program information may be requested from the EMGT office or downloaded from the program’s website.

International students and students who indicated English as a second language, are required to show proof of English proficiency for admission purposes and must check-in at the Applied English Center (https://aec.ku.edu/) (AEC) upon arrival on campus for orientation. This process serves to confirm each student’s level of English proficiency and determine whether English courses will be included as a requirement of the student’s academic program. Note: Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed in the policy (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/) are not required to check in at the AEC (see eligibility requirements on the Graduate Studies website (https://graduate.ku.edu/english-proficiency-requirements/)).

Master of Science in Information Technology

The master's of information technology degree focuses on the applied aspects of technologies and practices used to provide digital services to customers within industry. These focus areas range from telecommunications, software development, cyber security, systems management, policy construction, and legal/regulatory concerns around tech use in an evolving world. Graduate students are expected to learn and demonstrate competency in solving real world problems with real world technologies. Additionally, courses in this program require students to organize into work groups, complete collective assignments, and practice peer leadership to accomplish goals. Graduates of this program should be capable of analyzing and solving complex technological issues and feel comfortable assuming managerial or executive roles in industry.

Admission

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).

The master of science degree in information technology (M.S.I.T.) is designed for information technology (IT) professionals in the Kansas City area. Courses are offered in the evening on the Edwards Campus, which is conveniently located in Johnson County. The M.S.I.T. program is intended for students with a bachelor's degree in information technology, computer science, computer information systems, computer engineering, or a related field for their advanced studies, or for those who seek additional academic studies for professional growth or career advancement. A student with good preparation in other fields of engineering, mathematics, business, or science may qualify by taking appropriate additional undergraduate courses. Such courses normally do not count toward the graduate degree. All applications are subject to department review prior to acceptance.

Admissions Requirements:

1. Online application: gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/)
2. Application fee
3. An official copy of transcripts
4. Three letters of recommendation
5. Current professional résumé
6. Statement of purpose
7. An undergraduate degree in a computing or related discipline with a GPA of 2.75 or better
8. For applicants with at least two years of practical work experience in IT, no GRE scores will be required. For those who would like to take the GRE exam, the requirements are as follows: 146+ verbal, 155+ quantitative (mean GRE: 152 verbal, 163 quantitative).
9. International applicants must meet KU's English proficiency, visa and financial support document requirement

M.S. Degree Requirements

Please refer to the Plan of Study below for the corresponding degree program. Students will work with their academic success coach and/or program director to finalize course selections to meet department and university requirements for degree completion and complete their Plan of Study. You may tailor your degree by selecting an area of focus: IT Project Management, Cybersecurity, or Software Engineering.

Graduate Certificate in Cybersecurity

The Graduate Certificate in Information Security and Assurance (ISA) is a 12-credit graduate-level certificate designed to provide advanced knowledge of information security concepts, governance, fundamental and emerging technologies in network security and computer systems security, as well as proficiency in security policies, procedures, risk management and audit. The purpose of this graduate certificate is to offer a practitioner-oriented credential in the information security area to students who are seeking an opportunity for more focused study.

Admission to Graduate Studies

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Admission Requirements:

1. Online application: gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/)
2. Application fee
3. An official copy of transcripts
4. Three letters of recommendation
5. Current professional résumé
6. Statement of purpose
7. An undergraduate degree in a computing or related discipline with a GPA of 2.75 or better
8. For applicants with at least two years of practical work experience in IT, no GRE scores will be required. For those who would like to take the GRE, exam requirements are as follows: 146+ verbal, 155+ quantitative (mean GRE: 152 verbal, 163 quantitative). If GRE scores are submitted, they will be considered as part of admission process.
9. International applicants must meet KU’s English proficiency, visa and financial support document requirement

**Certificate Requirements**

To complete the program and obtain the certificate degree, the following three courses must be completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITEC 710</td>
<td>Information Security and Assurance</td>
<td>3</td>
</tr>
<tr>
<td>ITEC 711</td>
<td>Security Management and Audit</td>
<td>3</td>
</tr>
<tr>
<td>ITEC 712</td>
<td>Network Security and its Application</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITEC 714</td>
<td>Information Security and Cyber Law</td>
</tr>
<tr>
<td>ITEC 780</td>
<td>Communication Networks</td>
</tr>
<tr>
<td>ITEC 811</td>
<td>IT Project Management</td>
</tr>
</tbody>
</table>

The completion requirements of the graduate certificate in Cybersecurity include: (a) students must have a GPA of 3.0 or better on the required courses; (b) the minimum grade for any course to be applied toward the certificate is a grade of C; and (c) no credits may be transferred from another institution for this certificate.

Note: The completion of the graduate certificate program does not lead to automatic admission to the MSIT program, particularly if the student lacks the BS degree in computing or related discipline. However, for students who are able to gain admission to the MSIT program within three years of earning the certificate, all certificate course work completed with a grade B or higher will be recognized through a combination of the following methods.

For students admitted to the MSIT program before completion of the certificate, all certificate course work may also be applied to the degree-granting program. For students admitted to the MSIT program after completing the certificate, departments will use a combination of transfer credit and degree requirement waivers to recognize the 12 hours earned through the certificate program. At the discretion of the degree-granting program and the Graduate Division, up to nine (9) credit hours may be transferred to the degree program. For the purposes of the MSIT program, completion of the graduate certificate in Cybersecurity within three years, with a grade of B or better, shall also be recognized as exceptional preparation which warrants the waiver of course work completed during the certificate program and not transferred. Please see the M.A. & M.S. Degrees (http://policy.ku.edu/graduate-studies/ma-ms-degrees/) and Graduate Credit (http://policy.ku.edu/graduate-studies/graduate-credit/) policies for more information.

**Graduate Certificate in Deaf Studies and Social Justice**

The Deaf Studies and Social Justice certificate is designed for students interested in learning more about the world of the deaf in America, deaf culture, the education of deaf children, useful technology, and the integration of deaf people into the American society. Students from other disciplines are welcome pursue this certificate program. ASL proficiency is not required, but some course may be taught in ASL with an English interpreter.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

The Deaf Studies and Social Justice Graduate Certificate is a 15 credit hour certificate program that requires the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITEC 710</td>
<td>Information Security and Assurance</td>
<td>3</td>
</tr>

</tr>
</thead>
<tbody>
<tr>
<td>ITEC 714</td>
<td>Information Security and Cyber Law</td>
</tr>
<tr>
<td>ITEC 780</td>
<td>Communication Networks</td>
</tr>
<tr>
<td>ITEC 811</td>
<td>IT Project Management</td>
</tr>
</tbody>
</table>

The completion requirements of the graduate certificate in Deaf Studies and Social Justice include: (a) students must have a GPA of 3.0 or better on the required courses; (b) the minimum grade for any course to be applied toward the certificate is a grade of C; and (c) no credits may be transferred from another institution for this certificate.

Note: The completion of the graduate certificate program does not lead to automatic admission to the MSIT program, particularly if the student lacks the BS degree in computing or related discipline. However, for students who are able to gain admission to the MSIT program within three years of earning the certificate, all certificate course work completed with a grade B or higher will be recognized through a combination of the following methods.

For students admitted to the MSIT program before completion of the certificate, all certificate course work may also be applied to the degree-granting program. For students admitted to the MSIT program after completing the certificate, departments will use a combination of transfer credit and degree requirement waivers to recognize the 12 hours earned through the certificate program. At the discretion of the degree-granting program and the Graduate Division, up to nine (9) credit hours may be transferred to the degree program. For the purposes of the MSIT program, completion of the graduate certificate in Deaf Studies and Social Justice within three years, with a grade of B or better, shall also be recognized as exceptional preparation which warrants the waiver of course work completed during the certificate program and not transferred. Please see the M.A. & M.S. Degrees (http://policy.ku.edu/graduate-studies/ma-ms-degrees/) and Graduate Credit (http://policy.ku.edu/graduate-studies/graduate-credit/) policies for more information.

**Graduate Certificate in Foundations of Engineering Management**

The Graduate Certificate in Engineering Management is a 12 credit graduate-level certificate designed to provide content and skills for the professionally minded student. This graduate certificate serves as an introduction to the Engineering Management degree by offering a curriculum in management and technical systems with an emphasis on organizing and managing resources to successfully lead engineering or technical personnel and projects. This program is for individuals who have a minimum of 2 years professional engineering management experience.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

The Graduate Certificate in Engineering Management requires the completion of three core courses and one elective for a total of 12 credit hours.

Graduate Certificate in Professional Management

The 4-course, 12 credit hour Graduate Certificate in Professional Management (https://edwardscampus.ku.edu/profmgmt/?utm_source=pr) provides graduate students in variety of fields with the professional skills necessary to advance their careers. For a multi-disciplined working world, mastering business and communication skills as well as practical knowledge is key for success, and will provide you with a competitive hiring advantage that can carry you up the corporate ladder. The KU Professional Management Graduate Certificate can open that door.

The Graduate Certificate in Professional Management focuses on four key areas: Project Management; Organizational Management/Team Management; Financial Management; and Organizational/Interpersonal Communication.

Admission to Graduate Studies

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

For additional questions regarding the program requirements or application process, please visit our website (https://edwardscampus.ku.edu/profmgmt/?utm_source=pr) or contact your academic success coach (https://edwardscampus.ku.edu/program-advisors/).
Certificate Requirements

The certificate requires the completion of the following 12 credit hours:

Graduate Certificate in Professional Workplace Communication

Professional Workplace Communication Certificate

The 4-course, 12 credit hour Professional Workplace Communication Certificate (https://edwardscampus.ku.edu/certificates-masters-communication-studies/) takes you beyond the numbers to understand what really makes organizations tick – the everyday communication practices we too often take for granted. Beyond emails, meetings and those informal hallway discussions, workplace communication is the hidden element within every organization that brings people and ideas together. It’s the dimension of any workplace that explores the human side of organizations – and helps facilitate your career success. You’ll learn how to craft messages, share information and build relationships in ways that create greater understanding—both internally and externally. Skills taught apply to communicating with internal peers, teams, managers, and leaders – as well as external stakeholders such as customers, vendors, partners, regulators, and media.

These workplace communication competencies are at the core of effective decision-making, team-building, problem-solving, and crisis-resolution practices. The certificate program teaches how and when to ask the bigger-picture questions that improve communication within your organization – and help advance your career.

All courses for KU’s Professional Workplace Communication Certificate are offered online through the KU Edwards Campus in Overland Park, Kansas. Visit the program web page (https://edwardscampus.ku.edu/communication/) to learn more.

Application process

Current KU graduate students and other non-KU students may apply for the graduate certificate. Please check the departmental website for the most updated certificate application requirements (https://edwardscampus.ku.edu/admissions-masters-communication-studies/).

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

For additional questions regarding the program requirements or application process, please visit our website (https://edwardscampus.ku.edu/communication/) or contact your academic success coach (https://edwardscampus.ku.edu/program-advisors/).

Certificate Requirements

The Professional Workplace Communication graduate certificate requires completion of 12 credit hours, including 2 required courses and 2 elective options.

<table>

Graduate Certificate in Software Engineering and Management

The Software Engineering and Management certificate program is designed primarily for industry practitioners who are involved in software engineering activities and who would like to enhance their formal education in software engineering and acquire the most modern development practices without completing a full Masters’ degree. The program is also for individuals who have formal education in computing and who would like to acquire software engineering education to apply for software engineering positions.

Admission to Graduate Studies

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures
of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog.

**Admission Requirements:**
1. Online application: gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/)
2. Application fee
3. An official copy of transcripts
4. Three letters of recommendation
5. Current professional résumé
6. Statement of purpose
7. An undergraduate degree in a computing or related discipline with a GPA of 2.75 or better
8. For applicants with at least two years of practical work experience in IT, no GRE scores will be required. For those who would like to take the GRE exam, requirements are as follows: 146+ verbal, 155+ quantitative (mean GRE: 152 verbal, 163 quantitative). If GRE scores are submitted, they will be considered as part of admission process.

To complete the program and obtain the certificate, four (4) of the following courses should be completed:

The completion requirements of the graduate certificate in Software Engineering and Management include: (a) students must have a GPA of 3.0 or better on the required courses; (b) the minimum grade for any course to be applied toward the certificate is a grade of C; and (c) no credits may be transferred from another institution for this certificate.

Note: The completion of the graduate certificate program does not lead to automatic admission to the MSIT program, particularly if the student lacks the BS degree in computing or related discipline. However, for students who are able to gain admission to the MSIT program within three years of earning the certificate, all certificate course work completed with a grade B or higher will be recognized through a combination of the following methods.

For students admitted to the MSIT program before completion of the certificate, all certificate course work may also be applied to the degree-granting program. For students admitted to the MSIT program after completing the certificate, departments will use a combination of transfer credit and degree requirement waivers to recognize the 12 hours earned through the certificate program. At the discretion of the degree-granting program and the Graduate Division, up to nine (9) credit hours may be transferred to the degree program. For the purposes of the MSIT program, completion of the graduate certificate in Software Engineering and Management within three years, with a grade of B or better, shall also be recognized as exceptional preparation which warrants the waiver of course work completed during the certificate program and not transferred.

Please see the M.A. & M.S. Degrees and Graduate Credit policies for more information.
Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details). Other years’ catalogs (http://catalog.ku.edu/archives/)«

Bachelor of Social Work (p. 2438)
Undergraduate Certificate in Child Welfare (p. 2441)
Master of Social Work (p. 2441)
Doctor of Philosophy in Social Work (p. 2445)
Doctor of Social Work (p. 2447)

The School of Social Welfare

The University of Kansas School of Social Welfare is the oldest school of social welfare in the state and the only one to offer degree preparation from undergraduate through doctoral degrees.

• Bachelor of Social Work (p. 2438)
• Master of Social Work (p. 2441)
• Doctor of Philosophy in Social Work (p. 2445)
• Doctor of Social Work (p. 2447)

Social work education began at KU in 1937. The Master of Social Work program, established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1948. The Bachelor of Social Work degree has been awarded since 1971. In 1974, the B.S.W. program became one of the first in the nation to receive accredited status. The Council on Social Work Education (http://www.cswe.org/), the accrediting body for social work education, most recently reaccredited the B.S.W. and M.S.W. programs in 2018. The school is housed on KU’s Lawrence campus in Twente Hall, named for nationally renowned social work educator Esther Twente, who chaired the social work department from 1946 to 1957.

Vision, Mission, and Guiding Principles & Values

Vision Statement

All individuals, families, & communities utilize their power to achieve justice, equity, & well-being.

Mission

The University of Kansas School of Social Welfare, rooted in the Strengths Perspective, aims to transform lives and social contexts and promote social, economic, and environmental justice in Kansas, the nation and the world. We do so by educating students to practice with integrity and competence; advancing the science and knowledge base of social work through scholarship and research; and participating in community-engaged service.

Guiding Principles and Values

The work of the KU School of Social Welfare is guided and driven by a set of principles and values that inform our teaching, research endeavors, and service to community at various levels. These include:

Relationship Building: We engage in relationship building that fosters creativity, collaboration, and mutual learning. Relationship building is essential across practice, scholarship, education and service. We take a strengths approach as we serve our local, state, national, and global communities.

Diversity, Equity and Inclusion: We embrace the inherent worth of all people. By taking the position of cultural humility and applying the lens of intersectionality, we seek to develop and promote modes of anti-oppressive social work and dismantle structures of exclusion.

Practice with Integrity: We demonstrate our integrity and trustworthiness as scholars, educators, practitioners, and community members by promoting social work values, ethical practice, and the process of critical reflection.

Multisystem Competency: We recognize that social, economic, and environmental injustices are the root causes of inequities and multiple strategies are necessary to address these. Our work integrates micro/macro social work and builds collaboration across systems and disciplines to create multi-level change.

Critical Perspective: We engage in deliberate and continuing examination of social conditions and solutions. We use critical inquiry to analyze and challenge existing structures and systems in order to advance the field and promote social, economic, and environmental justice.

Empirically Informed Social Work: We rigorously advance empirical research that impacts the social work knowledge base. By translating and applying evidence, we continually transform practice and policy across multiple systems.

Our Promise

With each relationship, we vow to be a true partner by providing a diverse, equitable and safe environment that encourages forward thinking and creates inclusive experiences that drive social change.

As a School within a comprehensive, premier research university we strive to:

• Offer innovative programming that recruits, graduates and supports uniquely qualified and compassionate social workers,
• Drive discoveries that transform lives, and
• Embrace our responsibility to promote social, economic, and environmental justice in Kansas, the nation and the world.

Goals

1. To prepare B.S.W., M.S.W., D.S.W., and Ph.D. students to practice with integrity and attain multi-level competency while working to promote well-being and build community.
2. To conduct, disseminate, and translate theoretical and empirically informed scholarship and research that impacts the social work knowledge base and transforms practice and policy.
3. To promote social, economic, and environmental justice through service at local, state, national, and international levels.
The Programs

Students have the opportunity to prepare for professional careers in social work at the bachelor’s, master’s, and doctoral levels. Curriculums are carefully designed to bring students from the introductory level through advanced study in clinical social work practice or social work macro practice. Doctoral programs prepare students to become leaders in social work practice and policy through research, teaching, and scholarship. All programs are structured to support the guiding principles and values of the School.

The B.S.W. Program prepares students for generalist practice with individuals, families, groups, organizations, and communities at the entry-level and prepares students for advanced graduate work in social work, as well as for degree programs in other disciplines. Our M.S.W. degree prepares graduates for clinical or macro social work practice. At the B.S.W and M.S.W. levels, classroom work is one half of professional preparation; field placements are the other half. Placements in social service agencies offer students the opportunity to apply skills learned in the classroom. Students spend time in practicum settings throughout the region.

The online Doctor of Social Work (D.S.W.) Program gives current social workers the opportunity to further advance their skills with coursework of practice at the leadership or management level. Through a rigorous curriculum, real-world research experience, and individualized mentoring by world-renowned scholars, our KU School of Social Welfare Doctoral Program (Ph.D.) graduates develop the knowledge and skills to drive discovery and advance the field of social work.

The Profession

The mission of the social work profession is rooted in a set of core values. These core values, embraced by social workers throughout the profession’s history, are the foundation of social work’s unique purpose and perspective:

• Service
• Social justice
• Dignity and worth of the person
• Importance of human relationships
• Integrity
• Competence

NASW Code of Ethics

As a guide to professional conduct, the Code of Ethics of the National Association of Social Workers (http://www.socialworkers.org/) represents the fundamental values of the profession and offers a set of values, principles and standards to guide decision-making and everyday professional conduct of social workers. It is relevant to all social workers and social work students regardless of their specific functions or settings.

View the entire Code of Ethics (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/) or request a copy.

Resources

Student Handbook

The student handbook contains full descriptions of policies and other details for degree programs and field practicum.

Faculty

The School’s mission is supported through a variety of faculty members, including tenure-track faculty, professors of the practice, research faculty, and part-time lecturers and field practicum instructors. Tenure track faculty teach and conduct research. The faculty’s scholarly interests, as reflected in teaching, research, and publications, span a wide range of social justices issues, including health, mental health, child welfare, criminal justice, gerontology, LGBTQ+ populations, gender equity, poverty reduction and asset building, and macro social work including community practice and social work administration.

School of Social Welfare faculty members hold doctoral degrees in social work, social welfare, and other fields. Professors of the Practice are faculty who possess expertise in the field of social work and provide students with progressive professional instruction based on extensive experience in the profession. In addition, outstanding social work practitioners serve as part-time classroom lecturers, and 300 social work practitioners serve as practicum instructors.

Faculty members serve the public interest and the profession of social work as consultants and board members in professional and citizens’ organizations.

Research Office

The School supports research and scholarship designed to impact social service delivery and policy at the local, national and international levels. Grounded in the Strengths Perspective and with strong ties to the Grand Challenges for Social Work, we design and conduct applied research and scholarship that advances the science and knowledge base of social work through collaboration, curriculum, scholarship and research. Learn more at https://socwel.ku.edu/research-home (https://socwel.ku.edu/research/).

Undergraduate Programs

The undergraduate program (https://socwel.ku.edu/bsw/) prepares graduates for generalist social work practice. The program defines generalist practice as maintaining focus on practice and advocacy based on ethical principles, scientific inquiry, and best practices at the interface between and among systems (i.e., individual, family, groups, organizations, and communities). The program is offered on both the Lawrence and Edwards campuses.

University Honors Program

The school encourages qualified undergraduates to participate in the University Honors Program (https://honors.ku.edu/).

Graduate Programs

The Master of Social Work program (https://socwel.ku.edu/MSW-catalog/), established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1947. KU’s MSW program is consistently ranked among U.S. national public universities..
The Ph.D. Program (https://socwel.ku.edu/phd/) admitted its first students in 1981. It prepares students to be leaders of the profession through advanced research, scholarship, and teaching.

The online D.S.W. Program (https://socwel.ku.edu/dsw/) is a practice doctorate that is focused on preparing strong social work leaders, excellent instructors and teachers, and experts in Implementation Science. The first cohort will begin in Fall, 2023.

Financial Aid

To be eligible for financial aid, applicants should complete the Free Application for Federal Student Aid (FAFSA) by March 1, even before receiving information about acceptance. FAFSA materials can be obtained from all college or university financial aid offices or submitted online (https://studentaid.gov/h/apply-for-aid/fafsa/). The School of Social Welfare uses the FAFSA need determination level in making awards. For more information regarding financial aid visit the KU Office of Financial Aid & Scholarship (http://affordability.ku.edu/). (http://affordability.ku.edu/)

For Ph.D. students (https://socwel.ku.edu/phd-funding/), financial assistance, including tuition and significant salary, is available from the school through teaching and research assistantships in research and training areas such as adult and children’s mental health, aging, child welfare, corrections, social policy, LGBTQ populations, gender-based violence, or other areas of faculty grants and interests.

Scholarships and Awards

The School of Social Welfare has several sources of financial assistance available to students who meet the various criteria. Awards are made on an annual basis and are applied directly towards tuition and fees in most instances. All students interested in applying are required to submit a Free Application for Federal Student Aid by March 1. All recipients are expected to maintain a minimum grade point average of 3.0. Students must renew their applications each year they wish to be considered.

University Regulations

For information about university regulations for undergraduate and graduate programs, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/) for University Senate Rules and Regulations.

For information about school regulations refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).

Graduation with Distinction and Honor Roll (Dean’s List)

Undergraduate

The top 10 percent of the graduates of the B.S.W. program each year receive degrees with distinction.

Graduate

The M.S.W. program neither awards degrees with distinction nor honor roll designations. Aligning with our professional values, the School views each of our professional graduate students as bringing unique strengths that are based on a combination of skills that cannot be captured by any one individual metric.

Advising

Once a student is admitted to the School of Social Welfare, an academic adviser called a Success Coach will be assigned to assist students in the enrollment process and with other academic program requirements. Students at the undergraduate level consult with their Success Coach before enrollment each semester and have the advising held removed. Graduate students should consult with their Success Coach for any questions regarding enrollment, plans of study, or degree requirements.

A member of the School’s faculty is also assigned to students as a professional/career adviser. Current students can view their advisers in Jayhawk GPS (https://jayhawkgps.ku.edu/) (undergraduate) or the myKU P (https://my.ku.edu/uPortal/f/welcome/normal/render.uPortal).

Transfer of Credit/Credit Waiver

BSW Program

The CredTran tool is a transfer course equivalency system from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Transfer of credit allows specific course work from other accredited colleges or universities to count toward the B.S.W. degree. Decisions to accept prior credits are made by KU during the admission process. Exceptions must be petitioned through the B.S.W. Director. Petitions must be accompanied by a catalog description and a syllabus of the course and submitted at the time of application. Community college equivalents to KU courses are available from the school or through community college counselors. A maximum of 64 credit hours from a community college may be transferred toward the B.S.W. degree.

MSW Program

Students who request transfer from other programs accredited by the Council of Social Work Education and are not covered by an existing partnership agreement, must first go through the admission process and provide transcripts, a syllabus for each course for which credit is being requested, descriptions of field practicum content, written evaluations of field practicum performance, and the number of practicum clock hours. Course syllabi must include readings, assignments, and weekly topics covered in that class. Students requesting credit waivers must include these materials by the application deadline. Waiver credit will not be offered for courses taken prior to admission for students accepted in the Advanced Standing Program. Courses submitted for waiver credit won’t be considered if a student earned a grade of less than a B.

Credits for continuing education institutes and workshops or programs conducted by nonaccredited or nondegree-granting organizations are not accepted. Additionally, courses taken in an M.S.W. program as a non-degree seeking student will not receive waiver credit. Students may not receive waiver credit for advanced level coursework taken prior to completion of foundation level coursework in another M.S.W. program.

Students may request to enroll as non-degree seeking students. However, enrollment is contingent upon admission as a non-degree seeking student and classroom availability after all current degree seeking students are enrolled. Up to nine hours of credit as a non-degree seeking student can be applied toward the M.S.W. degree should a non-degree seeking student later apply to admission into the M.S.W. program (within a 5-year time window). Any such credit will be given only for coursework in which the student earned a B or greater. Students interested in enrolling as non-degree should
Prior Work Experience
In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements for undergraduate or graduate programs.

Leave of Absence and Withdrawal
Refer to the student handbook (https://socwel.ku.edu/current-students/) for specific information

Guidelines for Conduct
Refer to the student handbook (https://socwel.ku.edu/current-students/) for specific information

Employment Opportunities
Some employment opportunities (https://socwel.ku.edu/after-graduation/) for social workers include:

- Practice in health care systems and settings.
- Child protection, foster care, and adoption services.
- Service in community centers, juvenile courts, and residential treatment centers.
- Women's counseling and shelter facilities.
- Family services, substance abuse, illness, and unemployment services.
- Community services for people with mental illness.
- Services for the elderly in home care, nursing homes, and senior centers.
- Community practice and social change.
- Services for offenders and their families in community corrections programs.
- Leadership in human service organizations and policy settings.

University Career Center
The University Career Center (https://career.ku.edu/), Summerfield Hall, provides career counseling and services for all KU students, including students in the School of Social Welfare.

Courses
SW 210. Contemporary Social Topics: ____. 1-3 Credits.
This course provides the opportunity for experimentation with innovative course content and unique learning strategies in accordance with guidelines established by faculty. Subjects offered as topics include training for diversity, organizing in underserved communities, etc.

SW 220. Intro to Social Work, Social Welfare and U.S. Society. 3 Credits. SF S
This course serves as an introduction to the profession of social work and the institution within which it operates: the social welfare system. This course is not a skills-based course; rather, its purpose is to make clear the influences and constraints that shape the profession—historical, social, cultural, political, and legal—and give it its uniqueness. Specifically, the course introduces students to how social workers apply generalist knowledge, values, and skills in a variety of settings and with a variety of client populations. Emphasis will be placed on a social worker’s use of the strengths perspective, commitment to the empowerment, respect for individual difference across a range of intersecting social identities; and, relatedly, our obligation to work for a more socially, economically, and environmentally just, humane society.

SW 303. Human Sexuality. 3 Credits.
This introductory course approaches human sexuality from a social work perspective to provide students with an in-depth understanding of their own and others sexuality and gender through a social justice-informed lens. Students will explore topics such as sexuality and sexual development across the life course; privilege and oppression and it relates to sexuality and gender; attitudes, beliefs, and values pertaining to human sexuality; gender-based violence; sexual health practices; and LGBTQIA+ identities. The course utilizes a range of learning methods including lecture, discussion, group discussion, audio-visual materials, and critical self-reflection.

SW 310. Dealing with Stress and Supporting Wellbeing. 3 Credits.
This course is designed to assist students with developing skills for managing the transition to a university setting, and its associated social and emotional challenges. Students will learn techniques designed to enhance mindfulness, distress tolerance, emotion regulation, and interpersonal effectiveness skills. This course is designed to empower students by providing a range of experiences and techniques that will give students new insights and choices about their own behaviors, as well as skills that will help them in their interactions with others. Skills will be practiced through hands-on experience in the classroom, as well as weekly goal-setting to investigate the impact of developing these skills on our personal wellbeing. Prerequisite: Corequisite: MATH 2, MATH 101 or LA&S 108.

SW 410. Professional Writing Skills in Social Work. 3 Credits.
Students learn the principles of organizing, developing, writing and revising documentation for different professional social work settings. Student will master basic writing skills and become proficient in several types of social work writing styles.

SW 420. Social Work in Urban Settings. 3 Credits.
Students gain knowledge about the historical and current relationships between the definition of social problems, the development of social welfare policies, and the delivery of social services in urban settings. Students will learn to access current policies and practices as they impact local communities in the Kansas City area.

SW 455. Topics in Social Welfare: ____. 1-3 Credits.
This course covers a variety of topics on a rotating basis and provides the opportunity for experimentation with innovated course content in accordance with guidelines established by faculty. These topics may include, but are not limited to, globalization and poverty, special topics in child welfare, mental health, juvenile justice, etc.

SW 490. Directed Readings. 1-3 Credits.
Individual and supervised readings in selected areas of social welfare. Prerequisite: Consent of instructor and approval by dean’s office.

SW 510. Introduction to Social Work Practice: Interviewing Skills. 1.5 Credits.
This skills-focused course is designed to assist students with developing and practicing concrete interviewing strategies in preparation for field placements. These strategies will be revisited in the context of engagement and assessment during senior year fall semester courses. Students will learn interviewing strategies used in common social work practice approaches, such as motivational interviewing, solution-focused interviewing, and non-directive listening skills. This course is designed to provide students with baseline interviewing skills and provide them with practice before working with clients in their practicums. We will practice cultivating these skills through hands-on experience in the classroom.
Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108; Grade of B or better in SW 220; SW 530; SW 540; SW 555.

SW 512. Skills-Based Policy Advocacy. 1.5 Credits.

In this course, students learn policy-informed practice skills for effective advocacy in policy change strategies, grounded in core social work topics. These policy-informed practice skills include grassroots policy advocacy, such as developing policy agendas, social media campaigns, community organizing with constituents, and direct policy advocacy including giving testimony in legislative contexts, using policy briefs and other communication aids, and drafting new legislation. Emphasis on using social work values and ethics to work collaboratively with individuals and organizations will be central to the course. The course underscores social welfare policy as the foundation for social work practice and prepares students for policy advocacy as part of their effective and ethical social work practice. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108; Grade of B or better in SW 220; SW 530; SW 540; SW 555.

SW 530. Introduction to Theory for Multi-level Social Work. 3 Credits.

A study of human behavior theories and their application to social work practice. Theories discussed include, but are not limited to empowerment, systems, psychodynamic, critical, life span and life course, cognitive and moral development, and psychodynamic theories, which are applied to individuals, families, groups, communities, societies, and in international contexts. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108, Grade of B or better in SW 220.

SW 534. Introduction to Social Policy and Advocacy. 3 Credits.

This generalist policy analysis and advocacy course provides students with essential policy knowledge and policy practice skills. The course examines existing social policies through the lens of social work values—particularly our profession’s commitment to social, economic, racial, and environmental justice—and equips students to engage in policy change in pursuit of societal equity and human well-being. In this course, students learn policy analysis knowledge and skills, with an emphasis on understanding how social welfare policy design, funding, and implementation affect people’s lives and influence the delivery of social work services. Policies designed to reduce poverty, address racial inequalities, improve health, and increase social justice serve as exemplars for developing conceptual abilities in this course. Through critical examination of policies in the major domains of social work practice (physical and mental health, children and families, aging, housing, economic security), students prepare for policy-informed practice and for effective engagement in policy change strategies. Continuing students’ preparation for professional practice, the course emphasizes social welfare policy as the foundation for social work practice and positions policy analysis and intervention as integral to effective and ethical social work. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108; Grade of B or better in SW 220; SW 530; SW 540; SW 555.

SW 540. Introduction to Social Work Research. 3 Credits.

This course provides students with the basic concepts of research processes and methods utilized in addressing social work problems. It will cover quantitative, qualitative, and mixed methods research but emphasize quantitative methods. Students will learn various aspects of research including reviewing the literature, formulating a research problem and research question, conceptualizing the research, constructing measurement instruments, understanding measurement reliability and validity, sampling, and various research designs such as survey and experimental (pre-, pure-, and quasi-) designs. Students will become familiar with social work research ethics and will recognize the importance of sensitivity to diversity, oppression, and marginalization through each of the research processes. After understanding the basic concepts and processes of research, students will be able to read and critically analyze empirical research articles with an eye towards evidence-based social work practice. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108; Grade of B or better in SW 220.

SW 555. Diversity, Equity and Inclusion in Social Work Practice. 3 Credits.

This course provides students with a foundational knowledge of diversity, equity, and inclusion within multi-level social work practice. Students will examine theoretical, conceptual, and policy-based knowledge of systems of oppression, both historical and contemporary, and the ways in which power and privilege are manifested within them. Through ongoing and critical self-reflection, students will examine their own social identities (e.g. race/ethnicity, gender, sexual identity, age, social class, ability status, religion, national origin, etc.), as well as their beliefs, values, and ethics through a justice and equity framework. Critical self-reflection is an essential skill to develop toward ethical and effective social work practice. This course will help prepare social work students to understand and resist systematic and interpersonal dynamics related to oppression and advocate for justice within a myriad contexts and across a range of policies and practices that inform social work practice. As a social work diversity course, this course takes an explicitly anti-racist, anti-sexist, anti-colonialist, and anti-oppressive stance. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108; Grade of B or better in SW 220.

SW 560. Study Abroad Topics: _____. 3 Credits.

This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica and Italy.

SW 570. Centering on Decolonization in Social Work. 1.5 Credits.

This course introduces theories and concepts of colonization and decolonization, centering on Indigenous people in America. Emphasis will be on students’ examination of the frameworks, policies, and concept-based knowledge in which colonization and decolonization develops, expands, and impacts these populations. Social work values and ethics will be used to unpack colonization historically and contemporarily particularly with social work practice. In addition, students will analyze efforts to examine decolonization in the field of social work and apply that to their development of multi-level practice skills. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108; Grade of B or better in SW 220; SW 530; SW 540; SW 555.

SW 572. Substance Use. 1.5 Credits.

This course introduces students to the issues and challenges that face people affected by psychoactive substances in addition to the range of services developed to address these challenges. Substance-related harms are commonly observed across all social work settings, and substance misuse often directly or indirectly affect clients and their communities served by generalist practitioners. BSW students will gain essential knowledge that will assist them in working with these clients, such as substance-specific effects on individual functioning; why we think people misuse psychoactive substances; relationship to other existing health and mental health conditions; impact of substance misuse on an individual’s family and community; and the system of care developed to prevent, address, and sustain recovery from addictive behaviors. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 or LA&S 108; Grade of B or better in SW 220; SW 530; SW 540; SW 555.

SW 573. Intergenerational and Historical Trauma. 1.5 Credits.

This course introduces students to the impact of historic and intergenerational trauma. The foundational context for the course is the impact of historic and intergenerational trauma on Native American
and Black Americans, within the context of colonization and slavery dating to the 1600s at the founding of the United States. The course will examine the literature related to the history of multiple traumas endured by communities, which can result in cumulative emotional and mental health wounds that carry across generations. Students will understand and be aware of the many factors surrounding intergenerational trauma and a look into inherited behaviors and epigenetics. Prerequisite: Must be admitted to the School of Social Welfare. MATH 101 and LA&S 108; Grade of B or better in SW 220; SW 530; SW 540; SW 555.

SW 574. Social Work Across and Among Borders: International SW and SW with Immigrant Populations. 1.5 Credits.

Social work encompasses practice across and among geographic/nation-state borders. This course’s purpose is twofold. First, it will provide students with a review of social work from a global context, including the topics of social and economic development, the capability approach based on the writing of Sen and Nussbaum, and the values of the International Federation of Social Work. Second, it will seek to understand the trends of immigration along with the unique experiences of people who migrate across borders to the US. Students will learn about social workers’ past and present opportunities to engage in social work globally and with immigrant populations, including examining the pitfall of “saviorism” and acting as agents of social control, as well as the possibility of supporting community and individual directed change, advocacy, and support. Prerequisite: MATH 101 or LA&S 108; Grade of B or better in SW 220; SW 530; SW 540; SW 555.

SW 600. Field Education Seminar. 1 Credits.

Field Education Seminar is a bi-weekly, two-semester course designed to bridge social work scholarship and the field education experience by engaging in discussion and critical examination of theory, practice, and practicum. Students explore the role of field practicum in their learning and how to maximize the experience through group processing facilitated by the Seminar Instructor/Field Liaison. Concurrent enrollment is required in SW 601. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 601. Field Practicum. 5 Credits.

Students complete 416 clock hours of field practicum during the fall and spring semesters. They are in one continuous field placement for 16 hours per week for 26 weeks. The practicum is a generalist experience covering direct practice and community practice as well as research and policy practice. Typical agency settings for BSW students include community mental health centers, child welfare offices, long term care facilities, and juvenile justice and/or corrections settings. This course is taken for two semesters (fall-spring), with credit given only after completion of the second semester. Concurrent enrollment in SW 600 and SW 610 (fall), SW 612 (spring). Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 610. Multilevel Engagement and Assessment in Social Work Practice. 3 Credits.

This course prepares students for generalist social work practice with individuals, families, groups, organizations, and communities. Focusing on the beginning phases of the helping process, students will develop knowledge and skills to build rapport with individuals and families, connect with and leverage group dynamics, navigate and influence organizational cultures, and assess the strengths and needs of communities. In addition, students will learn how generalist skills can help to address population needs across levels of practice. This course will ask students to apply evidence- and theory-driven approaches for engagement and assessment, and students will critically consider how to support goal development, intervention planning, and collaborative assessment in diverse contexts. Concurrent enrollment in SW 601. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 612. Multilevel Intervention and Evaluation in Social Work Practice. 3 Credits.

In the second course of the multilevel generalist practice sequence, students will gain competencies for the middle and ending phases of the helping process. They will build skills to intervene and critically evaluate interventions to improve outcomes with individuals, families, groups, organizations, and communities. Students will also examine cross-system and cross-level intervention strategies and the knowledge and skills needed to work effectively across practice domains. In addition to exposure to a range of generalist practice intervention approaches, students will develop competencies for client-centered evaluation and termination, empowering group interventions, organizational transformation, and base building for community change. Concurrent enrollment in SW 601. Prerequisite: Must be admitted to the School of Social Welfare. SW 610.

SW 622. Human Rights, Social, Economic and Environmental Justice. 3 Credits.

This course lays a human rights-centered foundation for students’ social work education, elevating the pursuit of social, economic, and environmental justice as a core dimension of social work practice. The course familiarizes students with the global human rights framework, exposes them to key human rights challenges in the current landscape, and engages them in counteracting these challenges and promoting opportunities for human rights. Students critically examine the state of human rights in the United States and also expand their lens to consider social work as a global enterprise, where lessons are to be learned and contributions made in diverse transnational contexts. While emphasizing human well-being as a core aim of the profession, the course emphasizes the importance of restoring and protecting the natural world, as an end in itself and an essential precondition for human thriving. Students develop human rights literacy, learning the history of human rights governance, the mechanisms for protecting individual and group rights—and the limitations of these tools. They demonstrate empathy with those experiencing threats to their human rights, drawing on their commitment to diversity, equity, and inclusion. They take responsibility to act as global community members committed to the dignity and worth of every person. Equipped with this complement of knowledge, skills, and values, students are prepared for generalist practice from a human rights-based perspective. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 623. Capstone: Social Work Professional Issues. 3 Credits.

This course focuses on the values and ethical dimensions of contemporary professional social welfare policy and practice while integrating insights from theory and research. Students fully digest and relevantly apply the professional social work Code of Ethics. In addition, they clarify and solidify their professional identities as beginning social workers. SW 623 represents the culmination of the School’s professional socialization process. Because this class focuses on the process of developing and clarifying a strong sense of the social work profession and the professional self, it relies heavily on student participation, interaction, reflection, and discussion. This course is offered in the final semester of the BSW program culminating the field of social work study. Concurrent enrollment in SW 600/601 and SW 612. Prerequisite: Must be admitted to the School of Social Welfare. SW 610.

SW 634. Child Welfare - Protecting Children, Strengthening Families. 1.5 Credits.
This course will introduce undergraduate students to the child welfare service system that aims to promote safety, permanency and well-being of children and their families. Students will learn about the history of the U.S. child welfare system, seminal policies that have shaped this system during the 20th and 21st centuries, and historical and current day tensions that influence child welfare services. The course examines the full continuum of services within the child welfare system, including prevention, in-home family supports and family preservation, foster care, kinship care, independent living, adoption, and post-adoption. Students will also learn about personal, familial, and environmental factors that place families at risk for involvement with the child welfare system, including critical analysis of racial inequities that characterize child welfare services and outcomes. The course emphasizes the need for multi-level and multi-system perspectives as necessary for working collaboratively and confidently with the many different individuals, organizations, and systems that intersect with child welfare. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 635. Gender and Sexual Diversity. 1.5 Credits.
This course is designed to meet the needs of undergraduate-level social work students. The focus is on generalist social work practice pertaining to sexuality and gender with a primary focus on working with people with marginalized sexualities and genders (e.g., lesbian, gay, bisexual, transgender, queer, questioning, intersex, asexual, pansexual, etc.). Utilizing a social justice and equity framework, students examine their own identities, experiences, and larger systems of oppression to engage in effective and ethical generalist practice with people who have marginalized sexualities and genders. As a mini-course, this class integrates history, policy, and practice and is centered within social work tenets, ethics, and values. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 637. Criminal Justice System: Abolish or Reform. 1.5 Credits.
The course will seek to understand historical and contemporary abolition movements. A major focus being on prison industrial complex abolition drawing on the writing of Mariame Kaba, Ruth Wilson Gilmore, and Angela Davis. Topics will include the history of policing, surveillance, and prisons in the United States, transformational justice, and restorative practices. Students will be invited to interrogate the framing of the criminal justice system, ask questions about future of abolition, and investigate what abolition offers as a political organizing strategy. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 638. Responding to Suicide and Self-Harm. 1.5 Credits.
This course is designed to assist students with developing assessment and intervention skills for responding to suicide and self-harm across the life course. We will examine the etiology, function, and presentation of self-injurious thoughts and behaviors, with particular emphasis on the development of these behaviors in childhood and adolescence and their progression into adulthood. Students will learn techniques for responding to suicide and self-harm, including the use of generalist social work practice skills (e.g., crisis intervention, advocacy, brokering, behavior management), developing effective treatment plans, and providing psychoeducation to individuals impacted by suicide and self-harm. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 640. Grant Writing and Program Development. 1.5 Credits.
This course will introduce undergraduate students to grant writing and program development for human service programs in private not-for-profit agencies. The course focuses on community-engaged techniques for developing programs and grant proposals that are responsive to the needs and strengths of communities. Students will learn the basics of identifying funding opportunities that are well-matched to their program and not-for-profit agency. The course also covers strategies for developing and writing funding proposals. Students will learn the key components of a proposal, including letter of inquiry, project abstracts, problem statements, program descriptions, evaluation, project timeline, dissemination plans, budget, and budget narrative. Beyond program development and grant writing techniques, students will examine how the social work values of social, economic, racial, and environmental justice can be integrated into programs and proposals. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 641. Dismantling White Supremacy. 1.5 Credits.
This course examines the work of dismantling white supremacy, predicated on the professional social work value of social justice with the accompanying ethical principle “social workers will challenge injustice” to which all social workers should aspire. White supremacy, defined here as an ideology of white superiority and entitlement that is embedded in political, economic, and cultural systems across a broad array of institutions and social settings. The study of the systemic and institutional forms of white supremacy will be the major focus of the course. Topics will include the history of the concept of white supremacy, what it is and isn’t, manifestations such as disproportionality and disparities in child welfare, incarceration, poverty, and other social work focused social problems. Additionally, students will examine the conceptualization of white supremacy at the organizational level and seek to identify the role social workers have in dismantling it within their multi-system practice. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 642. Financial Capability and Social Work Practice. 1.5 Credits.
This course introduces BSW students to the field of financial capability in social work practice. Utilizing a social justice framework, it includes content about poverty, personal household finance, and financial access within the context of social work practice. Discussion focuses on economic and financial concepts as related to individuals and families across the life cycle, and communities, particularly vulnerable and oppressed populations and communities experiencing poverty and near-poverty. Research, practice, social policy, and policy change efforts related to these areas are also examined. Prerequisite: Must be admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 643. Gender-based Violence: What It Is and What Social Workers Can Do To Prevent and Respond To It. 1.5 Credits.
Gender-based violence (GBV), which includes domestic and sexual violence, human trafficking, and child marriage, is recognized by the United Nations and the World Health Organization as a global social and health problem with pervasive costs. Using an intersectional approach, this mini-course will provide an overview of the significance and impact of GBV as relevant to social work professional code to address social injustice. Additional topics will include the socioecological framework applied to GBV prevention, the relationship between GBV and gender and social norms, protective and risk factors based on the Center for Disease Control and Prevention, efforts to engage men in prevention, trauma informed responses to survivors, and the role of policy. Students will also gain clarity about the conceptual and practical implications of the difference between prevention of and response to GBV, and the different ways social workers can engage in change work. Prerequisite: Must be
admitted to the School of Social Welfare. Successful completion of SW 500 level coursework.

SW 690. Professional Education Topics in Social Welfare: ____. 0.5-3 Credits.
Current topics supplementing general social work knowledge of professionals in the field. Prerequisite: Must be admitted to the School of Social Welfare.

SW 700. Field Education Seminar. 1 Credits.
Field Education Seminar is a bi-weekly, two-semester course designed to bridge social work scholarship and the field education experience by engaging in discussion and critical examination of theory, practice, and practicum. Students explore the role of field practicum in their learning and how to maximize the experience through group processing facilitated by the Seminar Instructor/Field Liaison. Prerequisite: Must be admitted to the School of Social Welfare. Concurrent enrollment with SW 701 is required.

SW 701. Basic Field Practicum. 6 Credits.
Students complete 416 clock hours of practicum during the fall and spring semesters. Practicum placements require 16 hours of field education per week for 26 continuous weeks in one setting. The practicum is a generalist experience covering direct practice and community practice as well as research and policy practice. Typical agency settings for generalist students include community mental health centers, child welfare offices, long-term care facilities, and juvenile justice and/or corrections. Students take this course for two semesters (fall-spring), with credit given only after completion of the second semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be admitted to the School of Social Welfare. Open only to generalist level MSW students. Concurrent enrollment is required in SW 700 and encouraged in SW 710 and SW 711.

SW 708. Human Rights and Social, Economic, and Environmental Justice. 3 Credits.
This generalist course lays a human rights foundation for graduate social work education, elevating the pursuit of social, racial, economic, environmental, and ecological justice as core dimensions of social work practice. The course familiarizes students with a global human rights framework and related critical, systems, empowerment, and strengths perspectives, exposes them to current human rights challenges, and engages them in counteracting these challenges. This course helps students critically examine the state of human rights across a range of diverse and intersectional populations and issues in the United States and expands their lens to consider social work as a global enterprise where lessons are to be learned and contributions made in transnational contexts. This course is offered to students in their first semester of the generalist MSW curriculum.

SW 710. Multi-Level Engagement and Assessment. 3 Credits.
This course is the first in a two-course sequence that prepares students for generalist social work with individuals, families, groups, organizations, and communities. Focusing on the beginning phases of the helping process, students will develop knowledge and skills to build rapport with individuals and families, understand group dynamics, build basic group facilitation skills, navigate and influence organizational cultures, and assess the strengths and needs of communities. In addition, students will learn how generalist skills can help to address population needs across levels of practice. This course will ask students to apply evidence- and theory-driven approaches for engagement and assessment. Students are required to take both courses in this sequence (SW 710 and SW 711) with the same instructor. When not possible, students must contact their academic advisor for guidance. Concurrent enrollment in SW 701 (Field Practicum) is encouraged. Prerequisite: Must be admitted to the School of Social Welfare.

SW 711. Multi-Level Intervention & Evaluation of Intervention. 3 Credits.
In the second course of the generalist social work sequence, students will gain competencies for the middle and ending phases of the helping process. They will build skills to intervene and critically evaluate interventions to improve outcomes with individuals, families, groups, organizations, and communities. Students will also examine cross-system and cross-level intervention strategies and the knowledge and skills needed to work effectively across practice domains. In addition to exposure to a range of generalist social work intervention approaches, students develop competencies for client- and community-centered evaluation and termination, empowering group interventions, organizational transformation, and facilitation of community change. Students are required to take SW 710 before SW 711 with the same instructor. If this is not possible, students must contact their academic advisor for guidance. Concurrent enrollment in SW 701 (Field Practicum) is encouraged. Prerequisite: Must be admitted to the School of Social Welfare.

SW 712. Social Work Advanced Standing Seminar. 3 Credits.
This course is designed to prepare advanced standing students for successful entry into the specialization year of the MSW program. The seminar provides the link between students’ undergraduate degree from an accredited BSW program and the MSW specialization curricula in clinical or macro social work. Based on the School’s mission, vision, and guiding principles, the Advanced Standing Seminar takes a practice-centered approach to preparing students for advanced graduate study in social work. The primary emphasis during this summer seminar is to advance and deepen students’ understanding of the School’s approach to generalist social work and to review the most salient concepts covered in the generalist curricula of the MSW program. This allows students to learn a common language and understanding of generalist social work thereby supporting their transition into the advanced level specializations. Students are provided with intensive classroom experiences (readings, discussions, exercises, assignments, and other learning activities) to help them adjust to the rigor of graduate education. They also have opportunities to develop working relationships with a cadre of student colleagues who will support their academic growth as they transition into their advanced level studies. Prerequisite: Open only to students admitted to the MSW Advanced Standing Plan of Study.

SW 720. Social Policy Analysis and Advocacy in Social Work. 3 Credits.
This generalist course in policy analysis and advocacy provides students with essential social policy knowledge and helps them develop policy practice skills. The course examines existing social policies through the lens of social work values, particularly the profession’s commitment to social, racial, economic, and environmental justice. The course focuses on understanding how social policies are designed, funded, and implemented, and how these processes affect people’s lives and influence the delivery of social work services. Through critical examination of policies in the major domains of social work practice (physical and mental health, children and families, aging, housing, economic security) students prepare for policy-informed practice and for effective engagement in policy change strategies. Social welfare policy and program analysis skills are central in our work to value diversity, engage in multi-systemic change, end oppression and discrimination, and promote social, racial, economic, and environmental justice. The advocacy dimensions of the course will help students develop competencies (e.g., strategic communication, collaboration and alliance building, information-gathering, self-reflection) that prepare them for advanced specialization courses and practice in
clinical and/or macro social work. Prerequisite: Must be admitted to the School of Social Welfare.

SW 740. Applied Research in Multi-Level Social Work. 3 Credits.
This generalist research course introduces MSW students to fundamental concepts in social work research to support empirically-informed practice. In keeping with the mission of the School, this course emphasizes research knowledge and skills necessary for effective social work practice that advances personal and collective strengths and resources, honors human diversity, promotes empowerment and justice, and reflects critical and creative thinking. By translating and applying evidence, we continually transform practice and policy across multiple systems. This course contributes to the overall generalist preparation of the student for advanced professional practice by providing skills necessary for critical thinking and continual improvement of practice and policy approaches. This course also focuses on strengthening students' capacity for evaluating practice-informed research and research-informed-practice. Understanding how knowledge is generated, what standards apply, and how translation occurs is critical to professional practice. Thus, students come to appreciate not only the accumulation of and integration of knowledge for use in practice, but also the need to critically examine what they are being taught and the gaps that exist in the current knowledge base and demand future knowledge development. Prerequisite: Must be admitted to the School of Social Welfare.

SW 755. Diversity, Equity and Inclusion in Social Work. 3 Credits.
This course provides students with a foundational knowledge of diversity, equity, and inclusion within multi-level social work. Students will examine theoretical, conceptual, and policy-based knowledge of systems of oppression, both historical and contemporary, and the ways in which power and privilege are embedded in them. Through ongoing and critical self-reflection, students will examine their own social identities (e.g. race/ethnicity, gender, sexual identity, age, social class, ability status, religion, national origin, etc.), as well as their beliefs, values, and ethics through a justice and equity framework. Critical self-reflection is an essential skill to develop for ethical and effective social work. This course will help prepare social work students to: (1) understand and resist systematic and interpersonal dynamics leading to oppression and (2) advocate for justice within myriad contexts and across a range of institutions and policies that contextualize social work in the contemporary US. In keeping with social work values, this course takes an explicitly anti-racist, anti-sexist, anti-colonialist, and anti-oppressive stance. Prerequisite: Student must be admitted to MSW Program.

SW 801. Advanced Field Practicum-Clinical Practice. 7 Credits.
Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses. This course contributes to the overall generalist preparation of the student for advanced professional practice by providing skills necessary for critical thinking and continual improvement of practice and policy approaches. This course also focuses on strengthening students' capacity for evaluating practice-informed research and research-informed-practice. Understanding how knowledge is generated, what standards apply, and how translation occurs is critical to professional practice. Thus, students come to appreciate not only the accumulation of and integration of knowledge for use in practice, but also the need to critically examine what they are being taught and the gaps that exist in the current knowledge base and demand future knowledge development. Prerequisite: Must be admitted to the School of Social Welfare. Completion of all foundation requirements.

SW 806. Advanced Field Practicum-Macro Practice. 2-6 Credits.
Students are assigned to social service agencies that provide practice opportunities in community practice, advocacy and/or social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in macro social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be admitted to the School of Social Welfare. Completion of all foundation requirements.

SW 810. Clinical Practice Strategies I. 3 Credits.
This course is the first of a two-part advanced clinical reasoning and application sequence focusing on the use of effective helping methods in clinical social work. SW 810 provides students with in-depth, integrative training in conducting and applying comprehensive biopsychosocial assessments to inform intervention selection while incorporating understanding of client readiness and the multi-dimensional impacts of social, systemic, and cultural diversity influences on client experiences. Students will learn how overarchling frameworks and theoretical perspectives and principles inform and influence engagement, assessment, and practice approaches, thus strengthening their foundation for clinical reasoning. This advanced methods course will assist in the preparation of students for advanced practice by offering in-depth training in the selection and application of three (3) specific interventions for use in treatment settings: motivational interviewing, contingency management, and trauma-focused cognitive behavioral therapy. Students will be expected to engage in self-reflection and peer interaction to develop awareness of clinical processes and decision making at various points in the clinical relationship. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 811. Clinical Practice Strategies II. 3 Credits.
This course is the second of a two-part advanced clinical reasoning and application sequence focusing on the use of effective helping methods in clinical social work. SW 811 extends the curricula by providing students with in-depth, integrative training in specific, emerging clinical strategies, including transdiagnostic approaches to clinical interventions. Students will learn how overarchling frameworks and theoretical perspectives and principles inform and influence engagement, assessment, and practice approaches, thus strengthening their foundation for clinical reasoning. Students will be expected to engage in self-reflection and peer interaction to develop awareness of clinical processes and decision making at various points in the clinical relationship. Students are required to take SW 810 before SW 811. If this is not possible, students should contact their academic advisors for guidance. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.
SW 833. Interdisciplinary Aging Practice. 3 Credits.
Interdisciplinary Aging Practice is designed to meet the needs of social work students and those from related disciplines such as psychology, sociology, speech and hearing, nursing, medicine, and public health who have an interest in practice and research with older adults. The course is informed by a social justice-oriented perspective and seeks to foster integrated critical thinking across aging- and life course-related theory, practice, policy, and research with an emphasis on issues of diversity and equity. As interdisciplinary collaboration is necessary to gerontological practice and scholarship, this course applies a cross-discipline learning model to foster in students a critical awareness of their own disciplinary identities and contributions. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 834. Social Work in Schools. 3 Credits.
An in-depth examination of social work in school settings. Students demonstrate the capacity to integrate research, policy, direct practice, and human behavior in considering the issues central to this area of practice. Students will also be able to explain how diversity issues manifest themselves at both the policy and direct practice levels. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 840. Multi-System Community-Engaged Program Design. 3 Credits.
In this macro specialization course, advanced social work students learn to design social justice, human service and community development programs and write grant proposals to fund those programs. Topics include program design, grant writing, fundraising, and public/private sector resource development for programs to advance social, racial, economic, and environmental justice; meet basic human and social service needs and enhance community well-being. Students will learn how to design programs from a multi-system perspective for individuals, families, groups, organizations, and communities. In addition, advanced social work students will develop skills in engaging communities to guide program design. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 841. Advanced Policy Analysis. 3 Credits.
This advanced course builds on students' generalist social policy knowledge, as well as their understanding of policy practice as a key dimension of social workers' professional responsibility. Designed to meet the specific needs and goals of students whose career aspirations center macro approaches to catalyzing large-scale social change, this course equips students for leadership in policy intervention-as administrators, substantive policy experts, and/or advocates. Through advanced readings, applied policy analyses, class discussions, and critical reflections, this course equips students with policy analysis frameworks which facilitate sophisticated examination of policymaking and policy evaluation in different institutional domains: legislative, agency, regulatory, budgetary, and judicial. Students will complete this course prepared to examine the policy levers through which to address identified problems, compare alternative proposals for policy reform, and reframe issues from a lens that elevates social work values of social, economic, racial, and environmental justice. Prerequisite: Must be admitted to the School of Social Welfare. Completion of all social welfare generalist requirements.

SW 842. Agency-Based Evaluation. 3 Credits.
How do social work administrators know if their agencies and organizations are making a positive difference in the lives of clients and communities? This course focuses student learning on how to gather and use information to improve social service agencies, social justice organizations and, by extension, client and community outcomes.

Using an agency-based perspective, students learn how to do holistic evaluations to improve well-being at all levels of social work. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 843. Leadership and Supervision in Program Management. 3 Credits.
This course focuses on the tasks, roles, and functions of managers including effective employee supervision and human resource management for the development and retention of a diverse workforce, as well as broader functions required to effectively manage programs. Evidence-based mentoring practices and anti-oppressive supervision relationships will be covered in this course. Students will build skills in tracking timely resource development, budgeting, overseeing up-to-date measures of financial health as well as over-time financial trends, and analyzing budget variances by program area. Within the context of the macro specialization curriculum, students will learn how local, state, and federal policies provide either enabling or constraining resources. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 846. Advanced Justice-Centered Community and Advocacy Practice. 3 Credits.
This course builds on the content of generalist practice courses and on students' advanced policy analysis and critical thinking. Through examination and application of theories of community and policy change, design of macro interventions, and ethical demonstration of advanced advocacy and community transformation skills, students will equip themselves for advanced macro practice in the domains of policy advocacy, community organizing, coalition-building, and strategic social administration. The course helps students build the advanced analytical, empirical, and relational competencies needed to effectively advocate with different human service constituencies and to envision and pursue community transformation for social, racial, economic, and environmental justice. Specific competencies assessed include power analyses, effective multi-channel communication, grassroots engagement, collaboration with diverse constituencies, multi-level system reform, and harnessing organizational resources for social transformation. Prerequisite: Completion of all social welfare generalist requirements.

SW 855. Study Abroad Topics: ______. 3 Credits.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy and South Korea.

SW 860. Loss and Grief Across the Life Course. 3 Credits.
This course examines the wide scope of loss and grief processes that occur over the life span and includes impactful but infrequently discussed losses such as trauma losses, abuse and neglect, as well as losses of social roles, identities, and relationships. We cover major life transitions and more commonly identified losses such as those that occur with divorce or death. The course frames grief and loss in terms of various theoretical, definitional, and process-oriented understandings. We will identify unique experiences of loss and grief at specific life stages. Students will learn varied cultural interpretations of loss, issues of differential diagnosis, and interventions relevant to each stage of life. This course addresses the importance of resiliency and "meaning making" for clients and community members, as well as the role of self-care among service providers attending to grief processes. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 861. Global Gender-Based Violence Prevention and Intervention. 3 Credits.
This interdisciplinary course examines efforts to stop gender violence around the world, with an emphasis on comparing African and US contexts. It will address topics such as domestic violence, human trafficking, sex workers' rights, rape and consent, war-time violence, and sexual health. We explore how culture shapes gendered patterns of violence and resistance against violence. Students will learn how to use postcolonial theory to interrogate traditions of Western feminism that blames cultural practices for forms of violence found around the world. We will examine alternative transnational movements grounded in legal, medical, and social movements, including human rights, public health, and anti-carceral feminist activism. Readings will combine critical on-the-ground accounts with current social work best-practices for prevention and intervention, including clinical approaches. Assignments will include projects integrating these perspectives into concrete, cultural-sensitive, and intersectional solutions for some of the most pressing problems facing women and girls throughout the world today. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

**SW 863. Mental Health and Psychopathology. 3 Credits.**

This course emphasizes mental health diagnoses commonly encountered in social work practice. The relationship between social work assessment and the diagnostic process will be covered in detail. Information will be presented from the perspective of social work as a professional discipline, emphasizing the continuing and complex interactions between the person and environment (biological, psychological, social, spiritual, and ecological) and multiple influences on mental health, including the incorporation of social justice and critical perspectives. The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5) is used as an organizing framework for this course; however, alternative taxonomies, as well the adequacy and appropriateness of the DSM-5 in social work practice will be addressed throughout the course. Influential considerations such as social work's ethical directives, the impact of poverty, race, class, heteronormativity, stress, social support, and forms of bias will be highlighted in the course. Full time clinical specialization students should take this course no later than fall of their specialized year. Part-time clinical specialization students are encouraged to consult with their academic advisors for enrollment guidance. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

**SW 866. Children’s Mental Health. 3 Credits.**

This course focuses on enhancing clinical knowledge and skills for social work related to children's mental health. The course will provide an overview of prevalence, definitions, and policies that frame the issue of children's mental health and will explore how child development, trauma, and other social and environmental contexts can impact mental health concerns and treatment for children and adolescents. The course will also cover assessment, common mental health diagnoses for children, and evidence informed services and treatment. Recognizing the role of family and multiple systems in children's lives, the course will emphasize the continuing and complex interactions between the person and environment and the resulting multiple influences on mental health, including the incorporation of social justice and critical perspectives. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

**SW 867. Trauma-Related Care Across the Life Course. 3 Credits.**

This course provides a theoretical and practice-centered integration of the current understanding of trauma and trauma treatment approaches across a wide variety of contexts, incorporating ecological, biological, psychological, and systemic influences. Using the developmental life course as a framework for understanding, this course will assist and orient emerging practitioners in work with survivors of trauma across multiple social work settings. The course material will cover trauma symptomatology from a strengths-oriented biopsychosocial perspective, including acute stress disorder, post-traumatic stress disorder and other disorders that manifest secondary to trauma and/or toxic stress. Comorbidity of trauma related conditions with other conditions such as substance abuse and self-harming behaviors will also be covered. With a focus on the critical perspective and commitment to social justice, students will contextualize individual's experiences of trauma within the lens of historical and contemporary oppression and intergenerational trauma. In terms of interventions, the course covers specific evidence informed advanced clinical practices, as well as principles of trauma-informed care, building on people's strength, resilience, hope and resistance. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

**SW 868. Assessing and Treating Suicide and Self-Harm. 3 Credits.**

This course helps students develop engagement, assessment, intervention, and evaluation skills for responding to suicide and self-harm across the life course. We will examine the etiology, function, and presentation of self-injurious thoughts and behaviors, with particular emphasis on the development of these behaviors in childhood and adolescence and their progression into adulthood. Students will learn techniques for assessing and treating suicide and self-harm, including employing functional and transdiagnostic assessment methods, and utilizing empirically supported transdiagnostic treatment approaches with an emphasis on cognitive-behavioral interventions. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

**SW 869. Assessing and Treating Substance Misuse. 3 Credits.**

Alcohol and other drug (AOD) related problems are endemic throughout the global population, and social workers encounter them in a wide variety of contexts and human service settings. Substance use disorders (SUDs) are a clinical and service system challenge requiring knowledge, skill, creativity, and coordination with multi-disciplinary professionals across the treatment continuum. This course enhances professional social work readiness by providing targeted information regarding a wide range of substances, as well as their differential impact on individuals (behavioral, psychological, physical, social, and spiritual) and communities (social, racial, economic, political, and cultural). Based on a fundamental understanding of addiction theories and etiology as well as personalized approaches to recovery, this course explores specific assessment techniques, prevention approaches, and intervention strategies. SUDs most commonly co-occur with health and mental health problems, so knowledge of such conditions is vital and also covered in this course. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

**SW 871. Indigenous Families. 3 Credits.**

This course is designed to prepare graduate students with clinical social work skills within the context of diverse views and experiences of Indigenous people in the United States. Students completing this course will be able to apply a variety of social work frameworks of knowledge, policies, and practice methodologies needed to serve Indigenous individuals, families, and communities. Topics will address Indigenous lifeways prior to contact, historical and cultural forces, such as policies that have impacted Indigenous people. Students will learn evidence-based forms of helping as well as Indigenous ways of helping. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

**SW 873. Sexuality and Gender Diversity. 3 Credits.**
This course is designed to meet the needs of graduate social work students, as well as those from related disciplines such as psychology; applied behavioral science; public health; and women, gender, and sexuality studies. The focus is on enhancing clinical skills (e.g., diagnostic assessment; individual, group, and family therapy approaches) for practice pertaining to sexuality and gender with a primary focus on working with people with marginalized sexualities and genders (e.g., lesbian, gay, bisexual, transgender, queer, questioning, intersex, asexual, pansexual, etc.). Utilizing a social justice and equity framework, students examine their own identities, experiences, and larger systems of oppression to engage in effective and ethical practice with people who have marginalized sexualities and genders. The course integrates history, theory, research, policy, and practice and is centered within social work tenets, ethics, and values while also creating space for students to engage across multiple disciplines and enhance transdisciplinary practice skills. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 874. Social Work with Womxn and Femmes. 3 Credits.
This course expands knowledge and skills in working with womxn and femmes across multi-level social work practice settings. This course is delivered through an intentional intersectional lens, which will provide historical and conceptual critiques of dominant and mainstream feminist approaches, while informing students of other possible frameworks toward practice with womxn and femmes, including critical, liberatory, and womxn and femme of Color lenses. Will include examination of practice approaches to problems that womxn and femmes frequently experience. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 875. Readings and Investigations: ______. 1-3 Credits.
Opportunity for scholarly investigation in an area of special interest. Students pursue independent study in an area of social work practice through the guidance of a selected faculty member.

SW 878. Social Work with African American Families. 3 Credits.
The purpose of this course is to introduce students to the basic knowledge, values, and skills needed to work effectively with African American clients and their families. Critical examination of issues such as racism, oppression, and the historical context and their impact on African American families. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 885. Professional Development Seminar. 3 Credits.
This capstone course provides a transitional space to help both clinical and macro specialization students reflect upon their learning throughout their MSW experience and build professional skills that prepare them to begin their post-graduate social work careers. Students will clarify and solidify their professional identities as MSW-level social workers, helping them practice and commit to life-long learning strategies that support intentional professional growth and development. Students will incorporate diverse skills and perspectives with attention to navigating complex multi-level systems, engaging ethical ambiguity, and critically analyzing implications for theory, research, policy, and practice. This course makes an explicit ethical commitment to support the pursuit of socially just, anti-oppressive, and empowering multi-level practice through professional development. Students take this course in their final semester of the MSW program. Prerequisite: Admission to MSW Advanced Standing plan of study or completion of social welfare generalist courses.

SW 890. Current Issues in Professional Social Work Education: ______. 0.5-3 Credits.
Course provides opportunity for innovative course content designed for the social work professional. Subjects offered include: Psychopathology; A Biopsychosocial Approach, Ethics and the Social Worker, Mediation, Solution Focused Practice, Strengths-based Management, Outcome-based Measurement of Practice.

SW 911. PhD Seminar I. 1 Credits.
This course aims to socialize students to academia by assisting them with understanding and navigating the processes of academic institutions and doctoral education and building the skills and strategies for successful completion of their doctorate. It recognizes that becoming and being a social work scholar is a developmental, lifelong learning process. The seminar is focused on supporting students so that they may maximize their doctoral program experience and, ultimately, define, develop, and grow in their role as a social work scholar/researcher. Different doctoral career pathways will be discussed in relation to students’ own goals, identifying opportunities and strategies within doctoral education that may reinforce and strengthen their abilities for achieving individualized goals. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the School of Social Welfare PhD program.

SW 912. PhD Seminar II. 1 Credits.
Building on the first year of the doctoral program and SW 911 - PhD Seminar I, students will continue to discuss the development of their professional identity. The class explores critical topics related to both substantive and professional issues of doctoral education, the education of social workers, research and methodological approaches, transitioning from student to scholar, and social work ethics. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the School of Social Welfare PhD program. Successful completion of SW 911.

SW 920. Introduction to Advanced Social Work Practice. 3 Credits.
This course is focused on preparing the entering DSW student to understand what is meant by Advanced Social Work Practice, and the social, political, and economic contexts in which social work leadership, translational research and social work education and instruction are embedded. Topics include the structure of higher education in the US, contemporary policy and administrative challenges, issues of diversity, equity and inclusion in higher education, and the infrastructure that guides research, including accountability to funders and university standards of the ethics and rigor of knowledge development. An introduction to common theoretical and conceptual ideas is presented, along with the development of shared definitions of terms used in the arenas of both higher education and organizational leadership. Prerequisite: Students must be admitted to the DSW Program.

SW 921. Evidence Informed Leadership and Management. 3 Credits.
This course will cover various theories of leadership and management. Students will learn to engage in leadership practices across the social ecology, including leadership of agencies that serve individuals and organizations focused on structural change. Students will develop a style of leadership that is strengths-based, and trauma-informed and which promotes diversity, equity, and inclusion. Topics would include theories of leadership & team building (best practices), multi-system competency (macro-micro) community engagement, the use of public discourse & technology (communications), strengths-based practice and trauma informed care (trauma awareness). Prerequisite: Students must be admitted to the DSW Program.

SW 922. Fundamentals of Applied Research. 3 Credits.
This course is an in-depth introduction to the process of conducting research. A comprehensive approach is taken to covering the full research design process, considering quantitative, qualitative, and mixed methods approaches, and the evaluation of program outcomes. The course also integrates topics related to structural bias, systemic
oppression, and strategies for anti-oppressive research, and addresses ethical issues in the conduct and dissemination of research. Prerequisite: Students must be admitted to the DSW Program.

SW 923. Funding Human Services and Social Change: Financial Management and Budgeting. 3 Credits.
This course will introduce students to the fundamentals of managing the financial aspects of an organization. Students will develop the skills necessary to understand and develop balance sheets and program budgets that promote equity and inclusion. Students will also develop necessary skills for identifying funding sources and writing grant proposals appropriate for human service provision and anti-oppressive social change efforts. Prerequisite: Students must be admitted to the DSW Program.

SW 924. Assessing and Using Evidence to Design and Improve Multi-level Interventions in Social Work. 3 Credits.
This course develops students’ knowledge and skills for identifying, assessing, and critiquing the empirical evidence on current interventions and practices in social work. The focus is on conducting multi-dimensional, value-critical inquiry about “best practices” relevant to social work and applying the results of that inquiry toward designing and improving interventions or practices that are multi-level. The course introduces the foundations of evidence-based practice, systematic review of the literature, critical evaluation of empirical studies, and structured data synthesis to assess the quality of evidence. In addition to covering approaches for rigorous methodological critique, the course emphasizes value-critical frameworks for assessing research in relation to anti-oppressive principles. Prerequisite: Students must be admitted to the DSW Program.

SW 925. Integrative and Critical Approaches within Educational Theory and Pedagogy. 3 Credits.
This course is focused on providing DSW students with a strong theoretical foundation for effectively teaching adult learners in social work courses at all levels of higher education. Topics will include theories of pedagogy/andragogy; educational psychology; classroom and teaching strategies; understanding, assessing, and supporting a diverse array of learning styles; pacing; effective use of classroom time; ethics in teaching and learning; creating positive classroom dynamics; critical pedagogy and anti-oppressive and indigenous teaching models; and tools for evaluating teaching. Specific emphasis will be placed on attending to diversity, equity, and inclusion within classroom settings, and developing skills to facilitate conversations on issues of oppression and privilege. Prerequisite: Students must be admitted to the DSW Program.

SW 926. Capstone Seminar 1. 1.5 Credits.
This seminar provides students with an emphasis on understanding basic expectations and requirements of a Capstone Project, along with potential ethical and pragmatic issues they may face as they conduct a study in a specified area of social work practice. Students are encouraged to begin outlining how their work might be conceptualized and begin laying the foundation for a final project of inquiry for their DSW Program. A passing grade in Capstone Seminar 1 is required for students to advance to the next class. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the DSW Program. Successful completion of SW 920, SW 921, SW 922, SW 923, SW 924 and SW 925.

SW 927. Human Service Program Development and Design. 3 Credits.
This course will cover the life course of a program, beginning with employing existing evidence for the development of the program its design. Students will develop the necessary skills to design and develop programs to address particular needs of culturally diverse individuals and communities. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 926 Capstone 1.

SW 928. Diversity and Accessibility in Curriculum Design and Development. 3 Credits.
This course is focused on reviewing and designing course curricula and materials, as well as understanding the delivery of social work education in the context of the Council on Social Work Education’s (CSWE) Education Policy and Accreditation Standards (EPAS). Particular attention will be given to issues of diversity and accessibility when designing course curricula. Topics will include developing curricula that incorporate social work knowledge, skills, and values; methods for assessing curricular outcomes; syllabus and assignment construction; topic selection; lesson planning; alignment of individual courses to the overall curriculum; ensuring range of topics in alignment with curriculum; mapping individual goals of courses to overall learning objectives; assurance of well-articulated, high quality course goals mapped to curricular goals; assuring the sequencing of courses so that learning is conceptually built over time; establishment of standards for evaluating curricular achievement; ability to assess classroom climate; continuous quality improvement so that program can be responsive to needed changes; and relationship of the curriculum to the overall institutional mission. Special attention will be paid to promoting the advancement of underrepresented students, the impact of stereotype threat, gender gaps in the academy, structural inclusion issues and their impact on accessibility, and the role course structure can play on student persistence and advancement. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 926 Capstone 1.

SW 929. Understanding Translational and Implementation Science. 3 Credits.
This course provides students with the foundation for understanding and applying implementation science principles and practice. Using a critical perspective with a focus on identifying and using effective strategies for translating research into practice, the course introduces key concepts of implementation science and a variety of theories and frameworks for guiding implementation efforts. Students gain knowledge and skills in identifying implementation facilitators and barriers and developing and supporting key implementation strategies. Implementation is examined from an equity lens to consider how implementation processes can promote racial equity and social, economic, and environmental justice. The course also covers evaluation of implementation, including measures designed to examine implementation processes and outcomes. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 926 Capstone 1.

SW 930. Capstone Seminar 2 & Comprehensive Oral Exam. 3 Credits.
This seminar provides students with the experience of designing and launching a research study that will be presented as their Capstone project. Drawing on their theoretical, practice and inquiry course work, students will work intensively on their proposal during this seminar, which is conducted over a two-week period and culminates in the Comprehensive Oral Exam. The purpose of the Comprehensive Oral Exam is to evaluate the student’s development of expertise in an area of practice as reflected in the proposal for their Capstone project. The emphasis will be on working with the instructor and their student colleagues as they prepare a proposal to submit to their Capstone Chair and Committee. The Comprehensive Oral Exam will be conducted in adherence with University and Graduate Studies policy including, but not limited to: Doctoral Degree Comprehensive Oral Exams, Doctoral Student Oral Exam Committee Composition, Graduate Student Oral Exam Attendance. A passing grade on the comprehensive oral exam is required to advance to the next level of classes. Graded on a satisfactory/
unsatisfactory basis. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 926 Capstone 1 and SW 927 and SW 928.

**SW 931. Community Engagement and Advocacy. 3 Credits.**
This course will cover various aspects of engaging with the community, with a focus of ensuring that organization activities serve the diverse interests and needs of their constituents. The course will cover models of engaging in advocacy that centers the needs and strengths of diverse, equitable and inclusive communities, such as community organizing. Policy practice will be considered as a form of advocacy. The course will also cover approaches to identifying community strengths and needs. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 930 Capstone 2.

**SW 932. Grantwriting. 1.5 Credits.**
This course will discuss the fundamentals of grantwriting, including identifying appropriate funding sources, capturing the strengths and needs of the constituents served by the program in ways that meet funders’ requirements, and leveraging existing evidence to write a compelling proposal. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 930 Capstone 2.

**SW 933. Creating Social Momentum Through Public Communication. 1.5 Credits.**
This course will cover utilizing the multitude of modern media tools to gain public support for social welfare initiative that promote diversity, equity, and inclusion. Topics will include describing community strengths and needs in ways that compel constructive action and making relevant research and evidence accessible to a popular audience. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 930 Capstone 2.

**SW 934. Advising, Mentoring, and Supervision. 3 Credits.**
This course is focused on preparing DSW students with the knowledge, skills, and values needed to advise, mentor, and supervise individuals in higher education or as advanced practitioners. Course content will be framed in the context of reflexivity and anti-oppressive social work practice. Topics will include professional/academic vs. holistic advising; the mentor/mentee relationship and its role in student success; strategic mentoring and established best practices in mentoring; formal vs. informal mentoring processes; conflict resolution in mentoring; learning communities; establishing supervisory plans; goal-setting; peer observations; performance-based mentoring; research behind mentoring; career readiness; engagement; the lifespan of the mentoring relationship; mentor selection; evaluating supervisory relationships; and conflicts of interest in mentoring and supervision. The course will include theoretical models for the mentoring relationship, including a review of mentoring approaches specific to underrepresented minority students, including organizational strategies, faculty strategies, and a review of mentee strategies. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 930 Capstone 2.

**SW 935. Capstone Seminar 3. 1.5 Credits.**
This seminar provides students with the experience of submitting and defending their Capstone project. This final campus will bring students to campus to make final edits on their capstone projects and prepare intellectually for their project defense. Emphasis will be on helping students make any final changes and to anticipate and respond to questions that their Capstone Committee members might raise about their work. The final projects will be presented, and students will receive feedback to help them to prepare their project for submission and dissemination in scholarly publications such as books, journals, or as manueialized interventions. A passing grade in Capstone Seminar 3 is required in order to be awarded the DSW and this class serves as the equivalent of the Final Dissertation Defense. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the DSW Program. Successful Completion of SW 930 Capstone 2 and SW 931, SW 932, SW 933 and SW 934.

**SW 955. Study Abroad Topics: ____. 3 Credits.**
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy, and South Korea.

**SW 970. Community Based Participatory Research for Social Justice. 3 Credits.**
This course explores the use of community-based participatory research (CBPR), and similar approaches such as youth participatory action research, within social justice-oriented research. Students will examine key theories, principles, and strategies of CBPR; explore advantages and limitations to CBPR and related approaches; and develop skills necessary for implementing and effectively carrying out CBPR projects. Additionally, students will incorporate the knowledge and skills pertaining to CBPR within a social justice-oriented research area of their choosing. The course format reflects the principles and values inherent in CBPR by engaging in an iterative process of co-teaching and co-learning, critical self-reflection and group discussion, and anti-racist and anti-oppressive pedagogy.

**SW 975. Racial Equity and Social Justice in Research and Practice. 3 Credits.**
This course explores racial equity and social, economic, and environmental justice as it relates to research for practice. These two major components are explored and integrated throughout the semester. First, through a historical equity lens, students will identify the ways in which research has contributed toward oppression and marginalization. They will situate their own research or research ideas in an anti-oppressive framework and critical lens to understand and identify research methods that promote equity and justice both in the research process and potential impacts. Second, students develop an understanding and application of research for practice, including clinical, macro, policy, and other research impacts. They will also learn about and utilize principles and frameworks specific to implementation science—the study of methods of utilizing evidence-based practices and research by those engaged in practice. Students gain knowledge and skills for identifying and using implementation science strategies that support the translation of research into real world practice. Implementation and translating research to practice is examined from an equity lens to consider how to promote racial equity and social, economic, and environmental justice in research for practice.

**SW 976. Practice and Politics of Writing. 3 Credits.**
This course is designed for students who are in the second year of the full-time PhD program and who are preparing to write the Qualifying Paper and begin developing the dissertation proposal in the following academic year. Students will explore key aspects of developing one’s own writing practice, develop and refine strategies and organizational tools for conducting literature reviews, and generate ideas for research proposals, including the dissertation proposal. Students will discuss and critically examine the politics of writing within and beyond the academy. Conversations will focus on the tension between learning how to write for success in academia while interrogating the privileging of scientific writing and peer-reviewed publications. Towards advancing the goals of racial equity and social justice, students will explore anti-oppressive and community-based dissemination strategies and gain knowledge and skills for dissemination in multiple settings, a variety of formats, and creative approaches. Each student will explore the course content around their own area of scholarly interest and develop a writing product that fits their
current writing objectives. The course will provide a supportive space for writing and receiving feedback on writing, emphasizing the development of collegial relationships as sources of writing support while developing peer review skills.

SW 978. Research Design and Methods. 3 Credits.
The purpose of this course is to provide students with an introduction to the process of conducting research. Specifically, the course provides students with the requisite background on research methods and designs to provide essential context for other research courses in the program, including quantitative, qualitative, and mixed method courses. The course focuses on the process of developing, conducting, and evaluating research designs and research methods. Centered in a commitment to anti-oppressive and anti-racist research, course topics include an introduction to research design; ethics and power in research; developing a research question and hypotheses; conducting a literature review; types of quantitative methods; types of qualitative methods; sampling; measurement; validity, reliability, and rigor; critiquing and evaluating research; and community-based and artistic research methods.

SW 979. Methods of Qualitative Inquiry I. 3 Credits.
This course is the first in a sequence of two courses on qualitative inquiry required for students in the social work Ph.D. program. It provides an overview of knowledge and skills for designing qualitative inquiry. It examines issues in the philosophy of science, paradigms for qualitative inquiry in social work, and a diverse range of methods that flow from these paradigms. It emphasizes principles and procedures for research design, including an introduction to data collection, ethics in qualitative design, and criteria for establishing methodological rigor (i.e., trustworthiness).

SW 980. History and Philosophy of Social Work. 3 Credits.
This course is designed to provide students with opportunities to examine the underlying conceptual frameworks of social work practice including their history and present manifestations. Students will gain an understanding of metatheoretical concepts (e.g., paradigms, epistemology, ontology, etc.) and will learn to identify and describe theory at multiple levels of abstraction and application. The course will offer a critical perspective on the historical foundations of social work practice and theory, including the ways in which the discipline has resisted or maintained systems of oppression over time. This conceptual grounding is intended to offer students a solid foundational understanding of social work as a distinctive discipline while also offering opportunities for students to examine their own position within the discipline by examining the history and conceptual framing of their own substantive area of focus.

SW 981. Advanced Quantitative Research Methods I. 3 Credits.
This course, which includes hands on practice using statistical software focuses on quantitative research methodology and related statistics, emphasizing mastery of specific methodological and statistical knowledge and skills that prepare students for multivariate quantitative analyses. The course will address the following topics: the framing of quantitative research questions; the selection of appropriate quantitative research methods and designs; database management; the selection of appropriate univariate and bivariate statistics for data analysis; the principles of analysis; interpretation of findings; and the presentation of results. This course asks students to critically think about the choices researchers make when working with quantitative data that can help to frame concepts from a strengths and anti-oppressive lens.

SW 982. Social Welfare Policy. 3 Credits.
The purpose of this seminar is to develop doctoral students’ advanced skills in analyzing and critiquing social welfare policies and programs, making recommendations for change, and effectively communicating the results of their work. The seminar’s primary focus is on federal and state social welfare policies and programs in the US, with a secondary focus on the examination of other nation’s social welfare policies. Students in this course learn to analyze and shape policies and programs with the goals of ending oppression and discrimination, and promoting racial, social, gender, and economic justice.

SW 983. Advanced Quantitative Research Methods II. 3 Credits.
The purpose of this advanced research methods course is to equip professionals to design and carry out research with implications for social work practice and social welfare policy. Building on the experience in SW 978 and SW 981, this course will focus on more advanced topics in experimental (e.g. multivariate analysis of variance, analysis of covariance) and correlational (e.g. linear regression, logistic regression) statistical analyses. The course will provide students with an opportunity to apply knowledge of these techniques in computer analyses of various datasets and in the critical review of the published work of others. Students apply an anti-oppressive lens to actively critique quantitative research approaches, including responsible model selection, analytic choices, and reporting. Prerequisite: Successful completion of SW 981.

SW 984. Social Work Practice: Identifying and Improving “Best Practices”. 3 Credits.
The main focus of this seminar is on developing skills for conducting multi-dimensional, value critical inquiry about “best practices” relevant to social work practice, and applying the results of that inquiry toward extending and improving current “best practices”.

SW 985. Theory for Social Work Research. 3 Credits.
The purpose of this course is to provide foundational knowledge and skills to evaluate, apply, and develop theory in social research. Students will (1) gain an understanding of how the roles and uses of theory are informed by epistemological and ontological traditions, (2) evaluate and critique applications of theory in empirical scholarship (3) apply theoretical frameworks to inform research design and methods, and (4) engage in theory- and/or model-building to advance theoretical innovations.

SW 987. Teaching Social Work: Philosophy and Methods. 3 Credits.
The purpose of this course is to prepare doctoral students for effective teaching of Social Work courses at all levels of higher education. The course covers three key topic areas: 1) the social, political, economic, and ethical context of teaching in social work and higher education among diverse students, 2) teaching theory and methods, including understanding how adults learn, course design, teaching strategies, classroom management, and evaluation of student outcomes, and 3) reflexivity in teaching, including developing one’s identity and philosophy as an instructor and evaluating one’s own growth as an instructor.

SW 988. Mixed Methods in Social Science Research. 3 Credits.
The purpose of this course is to provide an overview of mixed methods research, consisting of the history and philosophy of mixed methods research, the emerging literature on it, purposes and characteristics of mixed methods research, types of research problems addressed, the specification of mixed methods purpose statements and research questions, types of major mixed methods designs, data collection and analysis strategies, and reporting and evaluating results.

SW 989. Methods of Qualitative Inquiry II. 3 Credits.
This course is the second in a sequence of two courses on qualitative inquiry required for students in the social work Ph.D. program. It provides in-depth methodological knowledge and skills for implementing qualitative inquiry and writing research reports. It examines implementation issues related to a diverse range of methods that flow from the paradigms addressed in SW 979. It provides guidance for implementation of research designs for projects developed in SW 979, including application of methods for data collection, analysis, supporting criteria for
methodological rigor (i.e., trustworthiness), and writing up findings and implications. Prerequisite: Successful completion of SW 979.

**SW 990. Graduate Research. 1-9 Credits.**
Individual research preparatory to defense of dissertation prospectus. (By arrangement with doctoral chair.) Graded on a satisfactory progress/limited progress/no progress basis.

**SW 998. Doctoral Applied Research and Education Studies. 1 Credits.**
This course provides the opportunity for doctoral students to learn about research or teaching through direct application of research or teaching skills under the mentorship of faculty.

**SW 999. Dissertation. 1-9 Credits.**
Graded on a satisfactory progress/limited progress/no progress basis.

### Courses

**SWWD 101. Home Visiting I. 1 Credits.**
This course provides the foundational knowledge for Family Support professionals on home visiting and developing relationships with families that are informed by the multiple, intersectional issues that families face. Topics will include: Prenatal Basics, Child Development, and Child Abuse and Neglect. Prerequisite: Must be admitted as undergraduate Social Welfare non-degree seeking (SOCWN) students.

**SWWD 102. Home Visiting II. 1 Credits.**
Building on foundational skills, this course will provide extended knowledge in the areas of Breastfeeding, risks of substance use, and confidentiality. Family Support Professionals will gain the knowledge necessary to support families beyond basic needs to essential life skills. Prerequisite: Must be admitted as undergraduate Social Welfare non-degree seeking (SOCWN) students.

**SWWD 110. Supervision for Family Support Professionals. 1 Credits.**
This course focuses on skills for supporting Family Support Professionals in the practice of early intervention services. Supervisors will gain knowledge in the areas of cultural diversity, ethics, and professional development. Prerequisite: Must be admitted as undergraduate Social Welfare non-degree seeking (SOCWN) students.

### Bachelor of Social Work

#### Bachelor of Social Work Program

The School of Social Welfare provides the education and experience necessary for a career in social work. By helping shape students’ capacity for anti-racist, anti-oppressive, and socially-just practice, the School prepares social workers to carry out the unique purposes of the profession — to develop human potential, to promote individual well-being, and to bring about a more just society.

Social work is a major professional discipline in the Social Sciences. The term social welfare denotes organized public or private social services pertaining to human needs: adequate nutrition and safe housing, health and mental health, education, economic security, social participation, dignity, and civil and political rights for disadvantaged people.

The undergraduate program prepares graduates for generalist social work practice. The program defines generalist practice as maintaining focus on practice and advocacy, based on ethical principles, scientific inquiry, and best practices at the interface between systems (i.e., individual, family, groups, organizations, and communities), with particular emphasis on:

- The strengths inherent in these systems.
- The need to understand the role of gender, age, race/ethnicity, class, religious beliefs, sexual orientation, disability, and culture in all phases of the social work process.
- The promotion of human rights and social, racial, economic, and environmental justice for those disenfranchised based on some of the attributes listed above.
- The assumption of an anti-racist, anti-oppressive, socially just, and critical perspective regarding social work practice, policy, and research.

Beginning generalist practice uses multilevel prevention and intervention methods, depending on the needs of the client system, and incorporates knowledge, values, skills, and cognitive and affective processes that are transferable between and among diverse contexts and locations.

The BSW program is offered on the Lawrence and Edwards campuses.

#### Advising

Once a student is admitted to the School of Social Welfare, an academic adviser called a Success Coach will be assigned to assist students in the enrollment process and with other academic program requirements. Students consult with their Success Coach before enrollment each semester and have their advising hold removed. In addition, a member of the School’s faculty is assigned as a professional/career adviser. Current students can view their advisers on Jayhawk GPS (https://jayhawkgps.ku.edu/).

For more information on BSW advising, review the student handbook (https://socwel.ku.edu/current-students/) (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).

#### Transfer Students

For undergraduates who plan to transfer to KU but currently attend another college, advising is available by appointment. The school works closely with counselors from all Kansas colleges.

#### Degree Progress Report

The Degree Progress Report (DPR) is a computerized advising and degree-audit system, used to assist students and advisers in tracking progress toward completion of general education degree and major requirements. Students should review their DPR each semester and be prepared to review and discuss information contained in the DPR at all advising appointments. The DPR can be accessed through the student's account in the myKU portal (https://my.ku.edu/uPortal/). Under the Advising tab. Although the DPR provides a list of courses taken and grades earned, it is not an official transcript and can be used only for internal advising.

#### Certificate Programs

### Certificate in Child Welfare

The School of Social Welfare’s Certificate in Child Welfare (https://socwel.ku.edu/child-welfare-certificate/) provides seniors in the BSW program with specialized knowledge and skills to prepare them for a career in the field of child welfare. The certificate offers specialized training in social work practice with children and families who are involved with the child welfare system and provides a child welfare practicum as part of the experience.
Undergraduate Experiential Learning Certificate Programs

The university offers several experiential learning certificate programs that work well with the undergraduate social work major. Students who complete an engaged learning certificate program receive a notation of it on their transcripts. Learn more about KU certificate programs (https://experience.ku.edu/experiential-learning-certificates/). (https://experience.ku.edu/)

Undergraduate Admission to KU

Students are directly admitted to the School of Social Welfare as new freshmen and transfer students. Visit the Office of Admissions (http://admissions.ku.edu/) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Current KU students changing from another major to Social Welfare should complete a Change of School form and must meet the advancement requirements.

Undergraduate Advancement Review for the School of Social Welfare

Advancement Requirements

For students to advance into 500 and 600 level Social Welfare coursework, they must complete the BSW Advancement Review (https://socwel.ku.edu/bsw/apply/) prior to beginning 500 level classes. The Advancement Review includes the following:

- 54 hours of General Education requirements or elective hours including:
  - Math 101 (College Algebra) or LA&S 108 (Personal Numeracy)
  - English 101 (Composition)
  - English 102 (Critical Reading and Writing)
- Minimum cumulative GPA of 2.50.
- Earned grade of B or higher in SW 220.
- One reference form from a professor, work supervisor, volunteer supervisor or other professional colleague who are familiar with your work and/or know your potential as a social worker. Reference information will be emailed to the individual for completion.

If all the above criteria are met, students are successfully advanced into 500 level coursework.

Note: Students must complete all general education requirements including electives prior to the start of 600 level course work and practicum.

Grade-Point Average

A student must maintain a minimum cumulative grade-point average of 2.5 and a 2.5 in social work required courses. Evaluation of transcripts submitted as part of the application for admission includes computation of grade-point average for all work completed. This admission grade-point average is adjusted to include only courses that transfer to KU. Both transferable credits and all work taken at KU count in the grade-point average when advancement requirements are reviewed.

Bachelor of Social Work Degree Requirements

Primary responsibility for meeting graduation requirements rests with the student.

- A minimum of 120 credit hours of course work, including 12 credit hours of field practicum and field preparation & seminar.
  - 51 Social Welfare hours including SW 220.
  - 37 hours of general education requirements.
  - 32 hours of electives.
- A 2.5 minimum grade-point average for all classroom work.
- A 2.5 minimum grade-point average in required social work courses.
- Successful completion of field practicum.
- Recommendation by the faculty of the school to the chancellor and the Kansas Board of Regents that the degree be granted.

Bachelor of Social Work

Field Practicum (SW 600 & SW 601)
The field education office works with community agencies to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (https://socwel.ku.edu/field-education/).

Required Hours for Field Practicum
Students with 9 or more remaining elective or general education requirement credit hours in the fall of the senior year may be required to complete these hours before beginning field placement. Students who are completing these hours may take SW 622 and the mini-courses, but they cannot enroll in SW 610, SW 612, or SW 623.

Liberal Arts Requirements for a broad base of understanding
Learn more about the BSW curriculum (https://socwel.ku.edu/bsw-curriculum/) and liberal arts prerequisites.

Undergraduate Certificate in Child Welfare

Certificate Description

The KU School of Social Welfare’s Certificate in Child Welfare provides seniors in the B.S.W. Program with specialized knowledge and skills to prepare them for a career in the field of child welfare. The Certificate in Child Welfare offers specialized training in social work practice with children and families who are involved with the child welfare system and provides a child welfare practicum as part of the experience.

Requirements for the Certificate in Child Welfare are as follows:

<table>

Master of Social Work

Master of Social Work

Social workers help individuals, families, groups, organizations, and communities survive and thrive. With a focus on enhancing the social, racial, economic, and environmental wellbeing of disadvantaged, disenfranchised, and marginalized people, social workers can help children and adults resolve problems in living, increase emotional and behavioral health, enhance psychological and social wellbeing, and change policies and programs to better serve communities.

Built upon a commitment to helping identify and enhance the strengths of individuals, families and communities, the Master of Social Work program (https://socwel.ku.edu/MSW-catalog/) offers professional education with learning opportunities in the classroom and in the field for students who want to work to increase the quality of life for all people.

Some students have earned a BSW degree before beginning the MSW program, while other students come with different educational backgrounds and undergraduate degrees. We encourage people with all undergraduate degrees to apply to the MSW program if they are passionate about helping others by providing social services and working to achieve social justice.

Full-time students who have already earned a BSW from a CSWE-accredited program are able to complete the MSW in as little as one year (summer, fall, and spring terms) with an advanced standing plan of study. Students with an advanced standing plan of study can also earn their MSW degree on a part-time basis.

Students with undergraduate degrees in fields other than social work can complete the MSW program with a traditional plan of study in as little as two years full-time. We also allow students with traditional plans of study the opportunity to earn their MSW degree part-time in three or four years.

The first year of the traditional plan of study in the MSW program prepares students for generalist social work practice with individuals, families,
groups, organizations, and communities. Generalist courses include content on human rights; social, racial, economic, and environmental justice; policy and advocacy; applied research; professional ethics; theory for practice; and diversity, equity, and inclusion. In addition, students learn how to engage, assess, intervene, and evaluate their interventions at all levels of practice in generalist MSW courses and in their first practicum placements.

Following generalist courses and field education, MSW students advance to one of two areas of social work specialization: (1) clinical practice or (2) macro practice. The clinical practice specialization prepares students for social work with individuals, families, and groups in diverse therapeutic settings. The macro specialization prepares students for leadership positions in organizations and communities. Macro specialization courses include advanced content in the administration of programs and agencies, as well as community practice and advocacy.

The MSW program is offered in Lawrence, at the Edwards Campus in Overland Park, in other Kansas communities including Pittsburg and Salina, and online through Jayhawk Global.

**Master of Social Work**

**Traditional MSW Plan of Study - Full-Time or Part-Time**

Applicants must have undergraduate degrees from accredited universities before beginning the M.S.W. program. Most students with a traditional plan of study do not have B.S.W. degrees. However, some students with a B.S.W. degree want a traditional plan of study in order to get up to speed after a number of years away from social work education and/or two different practicum placements to bolster their M.S.W. field education.

**Advanced Standing Plan of Study - Full-Time or Part-Time**

Advanced standing requires a bachelor’s degree from a CSWE-accredited social work program with a recommended grade-point average of at least 3.0. We are interested in references from instructors who can speak to your academic abilities and readiness for graduate education. In addition, applicants with volunteer and/or work experience in human services and/or social justice are encouraged to submit letters of recommendation from supervisors who can address your competencies in the field. Current seniors who are applying for advanced standing should submit their fall semester transcript and documentation of their successful undergraduate field education experience.

For both the traditional and advanced standing plans of study, we have a holistic approach to admission decisions. We admit students based on a review of several factors including successful completion of undergraduate liberal arts courses, measures of academic achievement including undergraduate GPA, prior work experience in human services or social justice, and strong references from instructors and supervisors. All applications to the MSW program become the property of the University of Kansas.

Learn more about the MSW programs. (https://socwel.ku.edu/MSW-catalog/)

**Admission to the MSW Program**

**MSW Admission Requirements**

- Bachelor's degree from an accredited university (Traditional MSW). Bachelor's of social work degree from a CSWE-accredited social work program (Advanced Standing).
- Undergraduate grade-point average of 3.0 or above preferred. The admissions committee takes into account special circumstances such as improvement of grades in upper-division or graduate courses. We look for evidence of an applicant's commitment to the well-being of people and communities; a well-developed sense of self; emotional maturity and the ability to think clearly, creatively, and independently.
- Online application including three electronic reference forms and student-issued transcripts from all previously attended schools regardless of degree status.
- All applicants who have been employed in a social work setting should submit an electronic M.S.W. reference form from at least one supervisor who can address the applicant's knowledge, skill and readiness for graduate social work education as one of the three references.
- Non-refundable application fees for domestic and international students.
- Graduate Record Examination scores are not required. Applicants are evaluated on undergraduate grade-point average, graduate course work (if any), volunteer and/or work experience especially related to social work, and evidence of potential for a social work career in the application narrative and references.

**Deadlines**

Posted application deadlines for the Advanced Standing and Traditional MSW Plans of Study may be found on the program website (https://socwel.ku.edu/master-social-work-msw/).

**Admission Process**

MSW degree program students are admitted for summer semester for Advanced Standing and fall semester for Traditional plans of study. Applications may be submitted anytime between Oct. 1 and the appropriate application deadline. All fully completed applications are reviewed upon receipt. Admission decisions are made in the spring of each year. MSW students admitted for the Advanced Standing plan of study begin in June; MSW students admitted for the Traditional plan of study (full time and part time) begin in August. A summer term start may be available for MSW students admitted to the Traditional plan of study.

Contact the Coordinator for Graduate Admissions & Advising for more information.

Learn more about the application process (https://socwel.ku.edu/msw-apply/).

**International Students**

International students from all regions of the world are encouraged to apply. For more information about international student applications and resources and regulations contact International Support Services (https://iss.ku.edu/) and the Applied English Center (https://aec.ku.edu/).

All graduate applicants who are non-native speakers of English must demonstrate English proficiency to be considered for MSW admission. This includes both International Students who reside in the U.S. and outside the U.S. at the time of application. Please consult
the English proficiency requirements (https://gradapply.ku.edu/english-requirements/) from KU Graduate Admissions.

In order to begin practicum for the MSW Program, Full Proficiency must be met. If Full Proficiency requirements are not met at the time of admission, and additional language requirements are required from the KU Applied English Center, MSW classes and/or practicum may be delayed. Any English language proficiency coursework required by the KU Applied English Center may increase time to complete the full-time Traditional MSW plan of study from two years to three years.

If admitted to the MSW program, your admission to the School of Social Welfare is provisional. The International Conference on Social Welfare recommends that before seeking professional education for social work in the United States, a student should complete comparable study available in his or her own country and acquire a minimum of 2 years of social work experience there.

**MSW Traditional Plan of Study Degree Requirements**

The School of Social Welfare requires a total of 64 credit hours for the MSW degree, consisting of

- 38 credit hours of classroom work maintaining a grade-point average of 3.0 (B).
- 26 credit hours of field practicum with an (S) grade for satisfactory performance.
- Recommendation of the faculty of the School of Social Welfare to the University Registrar that the master's degree be granted.

**MSW Generalist Curriculum**

The following courses are required (32 credit hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

**MSW Specialization Curriculum**

Following generalist courses and field education, students advance to one of two areas of specialization: (1) clinical practice or (2) macro practice. This selection is based on their goals of working clinically with individuals, families, and groups or at the macro-level of practice with organizations and communities. With the exception of study abroad courses offered by the School of Social Welfare and SW 863, students may not enroll in specialization classes before completing generalist requirements without approval from the M.S.W. Program Director. Students should consult their academic advisor for enrollment guidance.

All students completing the MSW degree are eligible to apply for non-clinical licensure in the State of Kansas as Licensed Master Social Workers (LMSW). Students who anticipate working towards meeting the requirements for the Kansas Licensed Specialist Clinical Social Worker (LSCSW) examination should enroll in the clinical social work practice specialization.

**Clinical Social Work Specialization**

This 32-credit-hour specialization prepares MSW students for clinical social work with individuals, families, and groups. Students specializing in clinical social work develop the knowledge and skills to help people resolve chronic and/or acute problems in living, increase emotional and behavioral health, and enhance psychological and social wellbeing. Clinical social work students learn advanced engagement and assessment practice skills, as well as a wide variety of interventions and how to evaluate the efficacy of those interventions. From a social work perspective, the clinical specialization prepares students to work in diverse counseling and mental health settings with clients who have personal, interpersonal, and social needs requiring theoretically grounded and evidence-based therapeutic services. Students also have the opportunity to practice their clinical skills in field education settings as part of their graduate studies in social work. Students who anticipate taking the Licensed Specialist Clinical Social Work (LSCSW) examination in Kansas when they become eligible to do so should specialize in this specialization. These requirements may not apply to other states. Please refer to specific state licensure boards for educational and supervision requirements for clinical level licensure.

The following courses must be taken in the clinical specialization (32 credit hours):

<table>
<thead>

</tr>
</tbody>
</table>

Note: Earning an MSW in the clinical social work specialization requires 15 credit hours of course work which has clinical content covering issues of diagnosis and treatment. These courses include SW 810, SW 811, SW 863, diversity-focused electives, and clinical electives. Study Abroad classes may be used toward the diversity-focused elective for clinical specializations students and towards pre-approved coursework for macro specialization students; please contact your advisor for specific
details. Those seeking clinical licensure should note that this course may not contain sufficient clinical content that can be applied to education requirements for future clinical licensure. If a student enrolls in Study Abroad for the diversity-focused elective requirement, we highly suggest students complete an additional clinical elective course.

**Macro Social Work Specialization**

The 32-credit-hour macro practice curriculum prepares MSW students for leadership in social work agencies and social justice organizations. Students specializing in macro practice learn advanced administrative and advocacy skills and abilities for work in both the public and private sectors. The macro specialization helps students achieve competence in designing and implementing human services, community practice, and policy practice from a social work perspective. Knowledge and skills developed in this specialization include program design, managing information and resource, human resource management, community organizing, advanced advocacy, and program evaluation. This specialization prepares MSW students to be program and agency administrators, supervisors, advocates, and evaluators in public agencies and departments (local, state, and federal) and private human services and social justice organizations. Students in the macro practice specialization are eligible to take the non-clinical LMSW license examination in Kansas immediately upon graduation from the MSW program. Outside of Kansas, requirements for clinical level licensure varies for students engaging in macro coursework. Please refer to specific state licensure boards for educational and supervision requirements for clinical level licensure.

The following courses must be taken in the Macro specialization (32 credit hours):

<table>
<thead>
<tr>

**MSW Advanced Standing Plan of Study**

The Advanced Standing (https://socwel.ku.edu/msw-curriculum/) plan of study requires an enrollment of 38 credit hours, as follows:

- A summer enrollment in 2 classes:
  - SW 712, a social work practice class organized around the school’s major curriculum themes. Students must earn a minimum grade of B in SW 712 to continue matriculating.
  - An elective course selected by the student to broaden the base of knowledge.
- The specialization level of the MSW program (32 credit hours):
  - 18 credit hours of classroom work maintaining a grade-point average of 3.0 (B)
  - 14 credit hours of field practicum with an S grade for satisfactory performance

**Field Practicum**

The field education office works with community agencies to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (https://socwel.ku.edu/field-education/).

**Prior Work Experience**

In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements.

**Advanced Standing Plan of Study Degree Plan**

Students should work with an academic advisor for enrollment guidance and for part-time plans of study.

Doctor of Philosophy in Social Work

**Doctor of Philosophy in Social Work**

The goal of the University of Kansas School of Social Welfare doctoral program is to prepare students to become leaders nationally and internationally in advancing social work practice and policy through research, teaching, and scholarship. Our students graduate from the program with the critical knowledge and skills they need to become innovative stewards of the discipline who generate and disseminate knowledge as researchers, scholars and educators. The school is known nationally and internationally as a prime innovator in the Strengths Perspective for social work practice. Doctoral students have played a key role in advancing this work to its 21st century applications.

**Program Highlights**

- Creative, critical thinking about social work practice, social policy, and guiding theoretical frames
- Advanced quantitative and qualitative research skills
- Opportunities for innovative scholarship and for the development of teaching skills
- Student-centered educational approach
- Financial support and mentoring for students
- Appreciation for human diversity and the development of a global perspective
- Racial, social, economic, and environmental justice focus
- Study Abroad opportunities

Doctoral students are immersed in the excitement and creativity in the profession — how professionals come to know what they know, how they put that knowledge into practice and how it affects social justice.

**Consider Our Program**

The Ph.D. program ([https://socwel.ku.edu/phd/](https://socwel.ku.edu/phd/)) offers effective options for building knowledge by initiating systematic inquiry into methods, forms, and outcomes of social work practice and social welfare policy. We are dedicated to educating scholars who desire to build knowledge for the profession through qualitative, quantitative, theoretical, or conceptual analyses, and historiographic investigations. Demand for our Ph.D. graduates is high. Our alumni are engaged in teaching, research, and administrative endeavors and are found in faculty positions at premier research universities and at smaller colleges and universities throughout the United States and abroad.

**Curriculum**

Doctoral courses prepare students as scholars with conceptual and methodological sophistication.

- The history and philosophy course focuses on the intellectual history, current status, and innovation of social work ideas, ideologies, and theories.
- In the research sequence, students learn both qualitative and quantitative methodologies, designs, advanced modes of analysis, theory for research, and appropriate applications.
- The policy/practice courses provide the opportunity to analyze policies of interest to the student and discover “best” practices as they affect specific populations. Students develop and apply a critical perspective when considering human problems, strengths, and strategies for change and transformation.
- Qualifying papers and electives help students develop deep understanding in areas of special interest.
- A required course as well as teaching seminars for GTAs prepare students to be effective educators.
- The dissertation involves advanced and focused research into a topic selected by the student, based on quantitative, qualitative, historical, or other methods of inquiry.

**GTA & GRA - Teaching and Research Opportunities**

Our Ph.D. program contributes significantly to the model of strengths and community-based research, service, and education developed by the School. Under the direction of faculty members, many Ph.D. students...
work on research projects and serve as teaching assistants. For example, doctoral research assistants work in such areas as aging, asset-building, child welfare, criminal justice, diversity issues, domestic violence, health and disability, child and adult mental health, poverty, social policy, and spirituality.

It is part of the School’s mission to focus on teaching, inquiry, and practice that benefit populations who have been oppressed by our systems and institutions. The School is committed to diversity, inclusion, and multicultural perspectives. Many of the faculty are involved in research and service projects which aim to achieve direct and positive impacts on Black, Indigenous and people of color as well as other oppressed groups. Doctoral students work with faculty to bring these projects to life.

**Admission Criteria & Requirements**

Criteria used in judging applications include the applicant’s potential for excellence in academic performance, professional practice experience, and potential for contributions to knowledge-building for social work.

**Required**

- Master's degree in social work or related field.
- Graduate grade-point average of 3.5 or higher.
- Personal statement of scholarly and research interests in social work practice.
- Three letters of reference.
- Completion of a basic statistics course within the past two years with a grade of B or higher. The applicant must include a written statement showing how this requirement has been met or how it will be met before entering the program, or indicate they plan to apply for a waiver of this requirement based on extensive research experience.
- Completion of the online graduate application (https://graduate.ku.edu/application-process/).
- Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/?num1.5)

**Preferred**

- Undergraduate grade-point average of 3.0 or higher preferred.
- MSW degree preferred. Applicants with master's degrees related to social work and affiliation with social work activities and values are considered.
- Two years of social work or related practice; two years of post-master's professional social work experience preferred.

**Application Timeline and Procedure**

Ph.D. admissions are considered every other year. Application information and deadlines may be found on the program website (https://socwel.ku.edu/phd-apply/). Applications are not reviewed until all materials are received. Late applications are considered only on a space-available basis.

Learn more about the admission process (https://socwel.ku.edu/phd-apply/).

**International Students**

International students from all regions of the world are encouraged to apply. For more information about international student applications and resources and regulations contact International Support Services (http://www.iss.ku.edu/) and the Applied English Center (https://aec.ku.edu/).

**Ph.D. Degree Requirements**

The program requires a minimum of 64 credit hours, as follows:

- 37 credit hours of required coursework.
- 9 credit hours of electives.
- A qualifying paper.
- A comprehensive examination process.
- Completion of a dissertation.

In fulfilling the elective hours, students may take graduate-level courses in any substantive area or research skills necessary for successful completion of their goals. Students can take electives in social science or other relevant graduate disciplines. They may also complete Independent Study under faculty direction and/or choose from one of the study abroad courses offered by the School.

Beyond course work, students complete one qualifying paper under the guidance of a faculty committee. This demonstrates their ability to integrate knowledge and skills across the curriculum areas in relation to a theme of inquiry developed by the student in their chosen specialization. After the qualifying paper is completed, students complete an oral comprehensive exam (dissertation proposal defense) and then undertake and complete an approved research project, and write and defend the doctoral dissertation.

Required course work (https://socwel.ku.edu/phd-curriculum/) can be completed in 2 years. Additional time is needed to complete the qualifying papers and dissertation. The program can be completed in 4 years of focused work. Students may start on a part-time basis but eventually must spend 1 year in residence, which entails 2 semesters of full-time course work (9 hours) and may include one summer session (6 hours); or a combination of 6 hours of course work and half-time appointment as a teaching or research assistant for 2 semesters.

**Doctor of Social Work (D.S.W.)**

The Doctor of Social Work Program aims to create a collaborative learning community that fosters scholars who are 1) leaders in anti-oppressive social work in both agency and community contexts, 2) experts in translational and implementation science, and 3) world-class teachers and mentors. An emphasis on Diversity, Equity and Inclusion provides context for the classes and serves as a central component of course content. The program is centered on developing leadership and administrative skills, while simultaneously preparing graduates capable of engaging with communities and translating the research base of the profession in order to help agencies to understand and implement the best practices found in the social work and social science literature. Finally, recognizing that many students pursuing a DSW wish to teach, a significant percentage of our courses are devoted to the theory and practice of teaching, enabling graduates to enter clinical faculty roles prepared to conduct their own classes, contribute to curricular development, and serve as skilled mentors and advisors to students.

**Program Highlights**

- A focus on leadership, teaching, and implementation science.
- An advanced social work degree that builds skills designed to create more diverse, equitable and inclusive programs and communities.
- The development of a sophisticated understanding of best practices in social work and how to apply them in real world contexts.
- Courses that build an understanding of advanced social work practice in agency and community settings.
- Collaborative learning environments in a fully online setting.
- The development of relationships with student colleagues from diverse geographic areas of the US and beyond.
- Advising and mentorship from admission to program completion.
- Creative and applied Capstone Projects which serve as final projects for the doctorate.

**Consider Our Program**

The online D.S.W. program ([https://socwel.ku.edu/dsw/](https://socwel.ku.edu/dsw/)) gives current social workers the opportunity to further advance their skills with coursework of practice at the leadership or management level. While earning your D.S.W. at KU, you will build a framework of leadership best practices, develop a deep understanding of research implementation, and takeaway critical learning theories to the social work classroom.

The program offers an affordable doctorate in social work that will allow working professionals the opportunity to become leaders in their field and is designed to allow students the capacity to maintain their employment throughout. Job prospects for D.S.W. applicants in higher education and in agency and government leadership are strong and predicted to grow.

**Curriculum**

Doctoral courses prepare students as practitioner-scholars leadership and pedagogy skills, and the ability to translate scientific research into practice at various levels.

- The Advanced Practice course grounds students in an understanding of the D.S.W., their own identity as an advanced leader, and the practice contexts D.S.W. level practitioners encounter in their work lives.
- The Leadership courses build skills and knowledge in program development and design, program budgeting and finance, leadership and management, and community engaged macro social work practice.
- The pedagogy courses teach students about adult centered learning, the development of syllabi, classes, assignments, and courses as well as an understanding of how to teach, mentor and advise students from diverse backgrounds and with diverse learning styles.
- The Research and Inquiry classes teach students about the basics of applied social research design, how to understand and utilize the best practice literature to solve problems and design programs and how to translate and implement scientific practices and knowledge in real world settings.

**Admissions Criteria and Requirements**

Criteria used in judging applications include the applicant’s potential for excellence in academic performance, professional practice experience, and potential for contributions to social work teaching, leadership, and the translation of knowledge into practice.

**Required**

- A master’s degree in social work from a CSWE-accredited program.
- Minimum of three (3) years of clinical or macro practice experience beyond the master’s degree in social work.
- International candidates would need to provide evidence of English language proficiency through the TOEFL exam or the Applied English Center.
Preferred

- Undergraduate GPA of 3.2 or above on a 4.0 scale.
- Master of Social Work GPA of 3.5 or above on a 4.0 scale.
- A social work licensure is a preferred qualification but not required.
- The program would seek candidates who evidence strong oral and written communication skills, a commitment to diversity, equity and inclusion, leadership potential, and an interest in expanding their knowledge of leadership, pedagogy, and the implementation of evidence-based approaches in practice settings.

Application Timeline and Procedures

D.S.W. Program admissions occur on a yearly basis. Applications open in October of the year prior to the commencement of classes and close on February 1 of that year. Applications are not reviewed until all materials are received and late application are not accepted.

Learn more about the admission process at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/)

International Students

International students from all regions of the world are encouraged to apply. For more information about international student applications and resources and regulations contact International Support Services (http://www.iss.ku.edu/) and the Applied English Center (https://aec.ku.edu/).

The program (https://socwel.ku.edu/dsw/) consists of 42 credit hours including the development of a final Capstone Project.

Courses fall into five domains:

- Ethical & Historical Frameworks (3 hours)
- Leadership & Administrative Practice Knowledge, Theories, and Skills (15 hours)
- Research & Inquiry (9 hours)
- Pedagogy & Instruction (9 hours)
- Capstone Portfolio Seminars (6 hours)

Students must complete all of these courses successfully with a GPA of at least 3.0. All courses are required and there are no electives.

To meet the requirements of doctoral education in this practice degree, the D.S.W. program requires the successful completion of a Capstone Project under the supervision of a Capstone Chair. Because the D.S.W. is not a research degree, the emphasis is not on conducting original empirical research and demonstrating proficiency in research design and analytical methodologies. Rather, in the practice-centered D.S.W. degree, the emphasis is on understanding of evidence-based academic literature in a particular area of social work practice and policy and the demonstration of knowledge, skills, and values in the implementation of those practices in existing community or agency practice settings. The Capstone project can take any number of forms, including but not limited to the following: A community change initiative, a pilot study, intervention development and evaluation, measurement development for outcomes evaluation, program evaluation, evaluation of a clinical practice model, or quality improvement related to practice, organizations, or community services.

Successful defense of the Capstone Project Proposal serves as the Oral Exam and the successful defense of the final Capstone Projects is required to meet Graduate School requirements. The Capstone is evaluated by a Capstone Committee made up of members of the School of Social Welfare faculty. Course may be taken on a 2-, 3-, or 4-year basis, but all classes, including the defense, must be completed in 4 years.

Total Hours 42
Office of Graduate Studies, Lawrence and Edwards Campus Students

Graduate Studies

Graduate Studies (http://www.graduate.ku.edu/) at the University of Kansas is the administrative unit responsible for graduate education for the Lawrence and Edwards Campuses.

Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies.html) on the KU Medical Center campus (a unit of the Office of Academic Affairs) is responsible for graduate programs in the Schools of Health Professions, Medicine, and Nursing. Please see the online catalog section for the KU Medical Center (KUMC) - Office of Graduate Studies (http://catalog.ku.edu/graduate-studies/kumc/) for more information.

Graduate degrees are conferred by the professional schools and the College of Liberal Arts and Sciences with the exception of the Health Informatics master's degree, which is conferred by the KUMC Office of Graduate Studies upon recommendation by the Health Informatics Advisory Board. Appointments to the Graduate Faculty are authorized by the schools and the College, or by the individual academic units on the Medical Center campus, and administered by the appropriate Graduate Studies office.

KU offers the Master of Arts degree, the Master of Science degree, specific professional master's degrees, the professional degree of Specialist in Education, and the Doctor of Philosophy degree, as well as professional doctorates of Audiology, Education, Engineering, Musical Arts, and Speech-Language Pathology. KU also offers graduate certificate programs and currently enrolls more than 5,000 graduate students on the Lawrence campus.

Goals of Graduate Study

The traditional goals of graduate study are independent scholarship, competence in research or other creative work, and the cultivation of skill and commitment in teaching. Having acquired a broad education as an undergraduate, the student is expected to master a specific field, to learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees seek careers in higher education, the acquisition of skill in teaching and in directing research are also essential parts of graduate education.

Emerging societal interests and changing market demands continue to underscore the importance of the traditional goals of graduate study. At the same time, they emphasize the need for flexibility in programs and accommodation in career objectives. Graduates in many fields continue to pursue increasingly diverse careers and, as they do, they demonstrate the value of graduate study and research to society, government, business, industry, the diverse professions, and the arts.

Graduate Military Programs

The Office of Graduate Military Programs (GMP) (http://gmp.ku.edu/) facilitates collaboration between the university and the US Armed Forces for the development of academic programs and research initiatives that support the needs of the Department of Defense (DOD). GMP develops and maintains programs for select officers attending the Command and General Staff College at nearby Fort Leavenworth, instructors at the United States military academies, foreign area officers, logisticians, and other DOD personnel requiring the advanced degrees necessary to teach and conduct research at the highest level. The office assists principal investigators throughout the university to find well-matched research grant opportunities, prepare proposals, and coordinate with the appropriate DOD entities. GMP also collaborates with the Student Veteran Center and serves as a voice for all educational issues related to student veterans. GMP is committed to creating and maintaining a positive learning environment for military veterans attending our university.

Research

Research is an integral part of the university’s educational mission and approach to graduate study. The National Science Foundation classifies KU as a major university receiving substantial research support. The Carnegie Classification of Institutions of Higher Education classifies KU as a doctorate-granting R1 Research University with the Highest Research Activity, and KU has been a member of the Association of American Universities since 1909. The university has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. KU is home to university research centers and institutes, affiliated centers, core service labs, the Kansas Geological Survey, and the Kansas Biological Survey. In addition, a number of research centers exist in individual departments and academic units throughout the university. For more information about research on the Lawrence campus, visit the Research (http://www.ku.edu/research/) page or the Office of Research (http://www.research.ku.edu/).

Fellowships and Scholarships

Visit the Graduate Studies website (http://graduate.ku.edu/) for information about funding opportunities for KU graduate students.

Admission to Graduate Study

Persons whose records indicate their ability to succeed in advanced work may be admitted to the University of Kansas for graduate study in one of the professional schools or in the College of Liberal Arts and Sciences. The key university requirements for admission are outlined in the following two policies: Admission to Graduate Study (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/) and English Proficiency Requirements for Admission to Graduate Study (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/). Departments and programs may have more stringent requirements. View the English proficiency requirements on the Graduate Admissions website (https://gradapply.ku.edu/english-requirements/) for specific English proficiency testing requirements.

Transcripts and Test Scores

Applications must be accompanied by one copy of official transcripts from the institution where the applicant earned the bachelor’s degree (or equivalent)*. This document will be used to verify the completion (or intended completion) of a baccalaureate degree (or equivalent).

For application review and admissions purposes, applicants may attach scanned versions of official transcripts to their application. If applicants are admitted to a program and accept the admission offer, they will be required to submit an official, final transcript that shows their degree has been awarded.
been conferred. If the applicant has completed any graduate work, official transcripts from the graduate institution(s) must be included as well.

Any applicable GRE or TOEFL test scores must be sent by ETS to KU's institution code 6871. Applicants using other services for test scores should follow the electronic process to send scores.

In order to be considered official, transcripts and test scores must be sent through secure means (i.e., a sealed envelope or electronic transmission for transcripts and electronic transmission for test scores) directly from the degree-granting institution or testing service to the University of Kansas. Transcripts and test scores provided through unofficial means will not be considered to be official documents for the purpose of admission.

A second semester transcript hold is added to student records when additional transcript materials are needed.

*Applicants with KU degrees are not required to provide official KU transcripts or copies of KU transcripts to apply for admission.

**Additional Application Requirements**

Letters of recommendation, test scores, personal statements, and other materials may also be required at the discretion of the academic program. Applicants should check with the program(s) to which they are applying for more information.

**Application Fees**

Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some departments and programs require deposits from admitted students to be fully credited against required fees upon enrollment.

| Degree-seeking domestic application | $65 |
| Degree-seeking international application | $85 |
| Certificate seeking application* | $30 |
| Non-degree-seeking application (domestic and international) | $30 |

*Does not apply to current degree-seeking graduate students.

View the current Lawrence and Edwards Campus application fees (https://registrar.ku.edu/comprehensive-fee-schedule/) within the Comprehensive Fee Schedule on the University Registrar’s website.

**Degrees**

Degrees are awarded three times each year, in August, December, and May. Degrees for each academic year are conferred formally at the annual commencement ceremony in May. Degree candidates are not eligible to graduate if the graduate grade-point average (GPA) is lower than 3.0 in all courses acceptable for graduate credit. Doctoral candidates who have fulfilled all of their degree requirements or anticipate doing so by the summer graduation deadline may participate in the Doctoral Hooding Ceremony. (https://doctoral-hooding.ku.edu/)

Students who are working toward two degrees must complete the requirements for each degree. Course work may not count toward fulfilling degree requirements for more than one degree, except in the case of established dual degree programs.

Graduate students may not be awarded an additional KU degree with the same name and degree code as a previously awarded degree from KU. This applies to the completion of different degree tracks, concentrations, and sub-specialties within a given degree. This does not prohibit students from earning additional master’s or doctoral degrees in another discipline.

View the current Lawrence and Edwards Campus policy on graduate degrees (http://policy.ku.edu/graduate-studies/degrees/).

**Master's Degree Programs**

KU grants traditional Master of Arts and Master of Science degrees, as well as professional master’s degrees that have developed out of these traditional arts and science degrees. View the current Lawrence and Edwards Campus policies on master's degrees (https://ogs.ku.edu/policies/).

Historically, most of the master’s degrees granted at KU have been the Master of Arts and Master of Science degrees. This fact conforms to the traditional liberal arts background out of which most U.S. graduate schools developed. KU grants a number of professional master’s degrees, most of which are offered through the professional schools. Students should consult the appropriate college or school section of the online catalog for detailed descriptions of professional master’s programs.

The degree of Specialist in Education (p. 280) is offered through the School of Education and Human Sciences and may be earned as a concentration on the basis of two years of graduate work (which can include an appropriate master’s degree or equivalent). Information on this degree, including the concentration in which it may be earned, can be found in the School of Education section of the online catalog.

**Jointly Administered Degrees**

In a few cases, a degree is offered through two schools and administered by a joint committee from the two faculties. The master of arts degree in Speech-Language Pathology and the master of arts degree in Audiology are administered by an intercampus committee drawn from the Department of Speech-Language-Hearing: Sciences and Disorders in Lawrence and from the Department of Hearing and Speech of the School of Health Professions in Kansas City.

**Master's Degree Requirements**

The Executive Council of Graduate Faculty determines the common requirements for master's degrees at the University of Kansas. Specific requirements for each individual degree program are outlined in the catalog section maintained by the school or college offering that degree.

More detailed information on common degree requirements can be found in the Policy Library. Key policies include:

- Master's Degree Requirements (https://policy.ku.edu/graduate-studies/ma-requirements/)
- Master's Program Time Restraints (http://policy.ku.edu/graduate-studies/ma-program-time-constraints/)
- Master's Final Examinations (http://policy.ku.edu/graduate-studies/masters-final-exams/)
- Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance/)
- Master’s Student Oral Exam Committee Composition (https://policy.ku.edu/graduate-studies/masters-oral-exam-committee-composition/)
The programs offering these degrees are administered by the schools and colleges through their departments and graduate divisions, from admission through final recommendation for awarding the degree.

This section of the catalog provides succinct, general descriptions of each of the five doctoral degrees in order to facilitate convenient comparison of the degrees. Detailed information about requirements for each degree, as it is offered in a specific discipline, should be obtained from the appropriate college, school, or department listing in the online catalog.

The School of Law (p. 718) offers the Juris Doctor (J.D.) and Doctor of Juridical Science (S.J.D.) degrees.

The School of Medicine (p. 2144) offers the Doctor of Medicine (M.D.) degree. The KU Medical Center campus (p. 2457) offers additional doctoral degrees, such as the Clinical Doctorate in Speech-Language Pathology (S.L.P.D.), the Doctor of Nursing Practice (D.N.P.), the Doctor of Occupational Therapy (O.T.D.), and the Doctor of Physical Therapy (D.P.T.).

Doctor of Philosophy

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education:

- putting order into human experience;
- fostering a love of learning for its own sake;
- instilling respect for human values;
- integrating various human powers into a process of creation; and
- making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of extra-departmental courses. Because of the diversity of the fields in which the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

Doctor of Audiology

The Doctor of Audiology (Au.D.) degree program prepares the student to enter clinical practice as an audiologist. Offered by the KU School of Health Professions, the program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. Degree requirements are listed under Communicative Disorders: Intercampus Program (p. 577) in the online catalog.

Doctor of Education

The degree of Doctor of Education (Ed.D.) is a professional degree designed primarily for practitioners in the field of education. While many of the requirements for the degree closely parallel those for the Ph.D., the degree program—particularly the dissertation—focuses on research concerned with application of existing knowledge rather than on basic research. Specific degree requirements are listed in the School of Education and Human Sciences (p. 155) section of the online catalog.

Doctor of Engineering

The degree of Doctor of Engineering (D.E.) is directed toward the practice of engineering and includes the entire process of technology from planning to product. Candidates for the degree are intimately associated throughout their tenure with technology project teams, generally composed of master’s degree candidates and undergraduates. Specific degree requirements are listed in the School of Engineering (p. 341) section of the online catalog.

Doctor of Musical Arts

The degree of Doctor of Musical Arts (D.M.A.) is intended as recognition of high professional attainment. Since only exceptionally well-qualified candidates are admitted to the program, students are expected to devote their doctoral studies primarily to developing professional qualifications for teaching at the college level. The degree of Doctor of Musical Arts is offered in the specific fields of bassoon; church music (organ or choral conducting emphasis); clarinet; composition; conducting (band, choral, or orchestral); flute; French horn; oboe; organ; percussion; piano performance, literature, and pedagogy; saxophone; strings; trombone; trumpet; tuba; and voice. Degree requirements are listed under the School of Music (p. 2155) section of the online catalog.

Doctoral Degree Requirements

The Executive Council of Graduate Faculty determines the common requirements for doctoral degrees at the University of Kansas. Specific requirements for each individual degree program are outlined in the catalog section maintained by the school or college offering that degree.

More detailed information on common degree requirements can be found in the Policy Library. Key policies include:

- Engagement and Enrollment in Doctoral Programs (https://policy.ku.edu/graduate-studies/engagement-enrollment-doctoral-programs/)
- Research Skills and Responsible Scholarship Requirements (https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/)
Graduate certificates are not recognized by a diploma or any campus-wide recognition ceremony. Though not serving as official proof of the certificate completion, students may also request a printed certificate of recognition from the Office of the Registrar to mark the achievement.

View the current policy on Graduate Certificate Programs (http://policy.ku.edu/graduate-studies/certificate-programs-policies-procedures/) and Graduate Credit (https://policy.ku.edu/graduate-studies/graduate-credit/).

The Graduate Faculty

The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated and appointed. Only members of the Graduate Faculty may participate on graduate exam committees. Graduate degree programs are responsible for nominating faculty to hold Graduate Faculty appointments and for ensuring compliance with all policies.

The Graduate Faculty Appointments (http://policy.ku.edu/graduate-studies/graduate-faculty-appointments/) policy provides detailed guidelines on eligibility, the nomination process, chairing privileges, emeritus/emerita status, and graduate faculty as students.

Joint Degrees, Dual Degrees, and Dual Degrees-Accelerated

KU offers joint, dual and dual-accelerated degrees. An explanation of these program types can be found in the Academic Programs Definitions policy (https://policy.ku.edu/provost/academic-program-definitions/). For more information about specific degree programs, students should contact their academic department of study.

Distance Education, Online, or Hybrid Graduate Programs

The University of Kansas offers online and hybrid courses and certificate and degree programs. For more information about specific online course and degree program options, students should contact their academic department of study. Similar to regular courses, the availability of online courses varies by semester and year. View KU’s current online or hybrid programs (https://online.ku.edu/graduate-programs/).

Independent Study

Independent study is a research experience or directed readings independently pursued through an academic department. Students should contact their academic department to discuss independent study opportunities to investigate a special research problem or directed readings in an area not covered by regular courses.

Graduate Certificates

The graduate certificate is a focused collection of courses that, once completed, affords the student a record of coherent academic accomplishment in a given discipline or set of related disciplines. Eligibility and admission criteria for graduate certificates are governed by the policy on Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/admission-to-graduate-study?num1_1=)

The completion of a graduate certificate is noted on the official transcript. The transcript serves as the official proof of certificate completion. Graduate certificates are not recognized by a diploma or any campus-wide recognition ceremony. Though not serving as official proof of the
Graduate Assistant (GA) appointments at the University of Kansas, Lawrence:

**PRINCIPLES:**

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University’s responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.

2. When departments and schools offer GRA, GTA, or GA appointments, the assistantships must contribute to the training experience of the graduate student.

3. GRA, GTA, and GA responsibilities should be in balance with the student’s responsibilities to the graduate program. For salaried appointments of 50% (0.50 FTE), the expectation is that the assigned duties will average no more than twenty (20) hours per week during the semester. For hourly appointments at 50% (0.50 FTE), assigned duties should require 20 hours per week during the semester. For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.

More detailed information on GTA, GRA, and GA policies and exceptions can be found in the Policy Library. The most referenced policies include:

- Appointment Limits (http://policy.ku.edu/graduate-studies/GRA-GTA-GA-guidelines-eligibility/)
- GTA, GRA, and GA Eligibility Requirements (http://policy.ku.edu/graduate-studies/GRA-GTA-GA-guidelines-eligibility/)
- Term Limits for GTA Appointments (http://policy.ku.edu/graduate-studies/appointment-limit-GTA/)
- GTA Out-Of-Field Appointments (http://policy.ku.edu/graduate-studies/out-of-field-gta-appointments-policy/)
- Benefits Available to GTAs, GRAs, and GAs (http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs/)
- Improving Doctoral Experiences on External Awards (https://policy.ku.edu/graduate-studies/improving-doctoral-experiences-external-awards/)
- Spoken English Language Competency of Faculty and GTAs (KBOR) (http://policy.ku.edu/KBOR/spoken-english-competency-BOR-policy/)

**Graduate Policy**

The Executive Council of Graduate Faculty establishes all graduate-specific policy at the University of Kansas, subject to stakeholder review and Provost approval. The Policy Library is the official repository for this policy. Graduate policy is subject to revision. Graduate education is also governed by the policies established in the University Senate Rules and Regulations (https://policy.ku.edu/governance/USRR/).

A comprehensive list all graduate policy with links to the Policy Library is available on the Office of Graduate Studies website (https://ogs.ku.edu/policies/). These policy links include but are not limited to graduate specific policies on enrollment, grading, good academic standing, academic probation, and grievance procedures.

**Student Responsibilities**

All graduate students are responsible for informing themselves of Graduate Studies' requirements and policies. Students should visit the Graduate Studies website (https://graduate.ku.edu/) for the most up-to-date requirements and policies. Graduate students are also expected to be familiar with the regulations and requirements of their Graduate Divisions and of their home academic departments and programs. Members of the Graduate Faculty and staff members in the Graduate Divisions are expected to be ready to answer questions and offer counsel.

It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

**Course Numbering System**

Generally, graduate courses are numbered according to the following scheme:

- Courses numbered 500-699 are designed for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
- Courses numbered 700-799 are designed for graduate students who have fewer than 30 hours of graduate credit, but they are also taken by some undergraduates.
- Courses numbered 800-899 are designed for graduate students who have fewer than 30 hours of graduate credit.
- Courses numbered 900-999 are designed for graduate students who have 30 or more hours of graduate credit.

Courses that contain a mixture of undergraduate and graduate students must set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Division and is taught by a person approved to teach at the graduate level. Please see the Graduate Credit policy (https://policy.ku.edu/graduate-studies/graduate-credit/) for more information.

**Graduation Calendar**

The Office of Graduate Studies publishes a graduation calendar (https://ogs.ku.edu/graduation-calendars-key-dates/) for each academic year.
Office of Graduate Studies, Medical Center Campus Students

The Office of Graduate Studies (a unit of the Office of Academic and Student Affairs (http://www.kumc.edu/academic-affairs.html)) on the KU Medical Center campus (http://www.kumc.edu/) is the administrative unit responsible for graduate education on that campus. A variety of graduate programs are offered through the Medical Center's Schools of Health Professions (p. 536), Medicine (p. 2031), and Nursing (p. 2262).

Graduate degrees on the Medical Center campus are conferred by the Schools of Health Professions, Medicine, and Nursing. Appointments to the Graduate Faculty are recommended by the individual academic units offering graduate programs. The appointment process is administered by the Graduate Studies office with approval for graduate appointments granted by the Dean of Graduate Studies.

Goals of Graduate Study

Independent scholarship, competence in research or other creative work, and the cultivation of teaching commitment and skill are the traditional goals of graduate study. Having acquired a broad education as an undergraduate, the student is expected to master a special field, to learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees find careers in higher education, the acquisition of skill in teaching and in directing research is also an essential part of graduate education.

These traditional goals gain renewed significance in changing times, while newly emerging societal interests and needs and new demands of the marketplace both underscore their importance and emphasize the necessity for flexibility in programs and accommodation in career objectives.

Research

Research is an integral part of the university’s educational mission. The National Science Foundation classifies KU as a major university receiving substantial research support. KU is also a Carnegie Doctoral/Research Extensive University and has been a member of the Association of American Universities since 1909. The university has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. For more information about research on the Medical Center campus, visit the University of Kansas Medical Center Research Institute (http://www.kumc.edu/kumcri.html) website page.

This catalog is not itself a source of policy and does not create a contract between the University of Kansas and its students. University policy is the binding agent in the event an inconsistency is noted between the catalog and official University policy. Whenever possible the catalog provides information from the latest policies at the time of publication.

- Admission Notification (p. 2456)
- Admission Procedure (p. 2456)
- Application Fees (p. 2456)
- Background Check (p. 2456)
- Degree Seeking Admission (p. 2454)
- Graduate Certificate Admission (p. 2455)
- Minimum English Proficiency Requirement (p. 2455)
- Non-degree Seeking Admission (p. 2455)
- Reactivation (p. 2457)

Admission to Graduate Studies

Persons whose records indicate their ability to succeed with advanced work may be admitted for graduate study. Applicants may apply as degree seeking, non-degree seeking, or to a Graduate Certificate program. Applicants seeking an identifiable degree program are degree seeking, while those applicants who do not have an identified degree program should be admitted under the non-degree seeking category. No student may work toward a graduate degree without being accepted as a degree seeking student in a specific graduate program.

Degree Seeking Admission

Students who wish to work toward a specific graduate degree should be considered for admission under the degree seeking category.

Regular Admission

Regular admission status requires a bachelor’s degree and a cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale, from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. The bachelor’s degree is not acceptable if it contains credit awarded for work experience that was not directly supervised by faculty members of an accredited university (life experience), or not evaluated in units that identify the academic content (e.g., P/F, S/U). Applicants who are not native speakers of English must demonstrate they meet the Minimum English Proficiency Requirements as described below.

Applicants must meet these minimum admission requirements to qualify for regular admission. Individual academic programs may have additional admission requirements that the applicant must also meet to be eligible for regular admission status to that program.

In exceptional cases, persons not holding bachelor’s degrees may be admitted if they are academically well prepared. In these cases, the Dean of Graduate Studies reviews the student’s academic background and a letter of petition from the program director and determines if the student will be admitted for graduate study.

Regular Admission, Special B

The Special B Admission category is available only to degree seeking graduate students applying to the Interdisciplinary Graduate Program in Biomedical Sciences (p. 2131) (IGPBS)
offered by the School of Medicine. A student meeting the minimum admissions requirements described under Regular Admission and the academic standards of the basic science departments is admitted to graduate study in IGPBS.

After completion of the IGPBS program, the student seeks entrance directly into a specific graduate discipline in one of the basic science departments. When the department accepts an IGPBS student, the department submits a Progress to Degree form to formally change the individual student’s academic program from IGPBS to the specific basic science doctoral program.

Non-degree Seeking Admission

A non-degree seeking applicant applies to the university for admission as a non-degree seeking student and may be processed by a specific department or program. Admission requires a bachelor’s degree from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. Applicants who are not native speakers of English must demonstrate they meet the Minimum English Proficiency Requirements as described below. The applicant is not required to meet the other admission standards of regular admission.

Non-degree seeking admission is not intended to bypass regular admission into a graduate degree program. However, if a non-degree seeking student later applies for admission as a regular degree seeking student, and is accepted by an academic program, the total transfer credits toward a graduate degree may not exceed six hours, or eight hours if the student holds a baccalaureate degree from KU (this total includes credit from other accredited graduate programs as well as non-degree credit earned at KU).

Graduate Certificate Admission

An application is required to pursue a graduate certificate. A graduate certificate program must adhere to the same minimum admission standards required for degree seeking admission as described in the section above.

No student may work toward a graduate certificate without being accepted in a specific graduate certificate program. Graduate certificates are not granted retroactively. Graduate credit from another institution may not be transferred to a KU graduate certificate program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral of the certificate.

Applicants apply directly to a graduate certificate program for admission unless the applicant is a current graduate degree seeking student. To admit a current degree seeking graduate student to a certificate program, the student must be in good standing (3.0 or higher grade-point average) with their degree program. If pursuing a graduate certificate offered by another department, the student must inform the graduate director, advisor, or coordinator in the home degree program of intent to seek the certificate. If approved by the home department, the student must then make application directly to the graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the program to the Office of Graduate Studies and within general guidelines, be approved by the Dean of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

Minimum English Proficiency Requirement for Admission to a Graduate Program

Academic programs must verify that all applicants, whether domestic or international, who are not native speakers of English, meet the minimum English proficiency requirement to be admitted for graduate study as degree seeking, non-degree seeking, or certificate program students. Verification may come in any one of the following forms:

- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) earned in residence from an accredited U.S. institution of higher education.
- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) from an institution whose medium of instruction is English. This does not apply to degrees earned online. The verification may be from a catalog or program description brochure or an official letter from a department chair, dean, or other university official stipulating English as the language of instruction. Verification of English instruction from the institution must be included unless the degree is from one of the countries on the “TOEFL/IELTS Exemption List” posted on the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements.html) website. The program considering admission should also conduct a phone interview with the prospective student.
- Receipt of an official copy (not student’s copy) of applicant's TOEFL or IELTS scores achieved not more than two years before the semester of admission. Below are the minimum scores required on the TOEFL or IELTS to satisfy the minimum English proficiency requirement for admission. Individual programs may opt for a more restrictive policy regarding English proficiency for the students they recommend to Graduate Studies for admission.

**TOEFL scores (paper)**
- 57 overall minimum
- 5.0 minimum on essay

**TOEFL scores (iBT)**
- 23 minimum Reading and Listening
- 19 minimum on Writing

**IELTS scores**
- The overall band score should be at least 6.5 with no component band score below 6

**E3PT scores**
- 68 overall minimum
If a student does not meet the minimum requirement for admission, the academic program may petition the Dean of Graduate Studies for an exception. The petition will include a justification for admitting the specific student, including a description of the interview process, and a plan for the student to achieve academic success. The petition should also describe the metrics that the program proposes for evaluating the academic success of the student and the timeline that will be followed for the plan.

Additional Spoken English Proficiency Requirements for Graduate Teaching Assistant, Medical Center Campus
The Kansas Board of Regents (http://www.kansasregents.org/) requires that in order to be appointed as a Graduate Teaching Assistant (GTA), students must first attain a minimum score of 50 on the TSE or SPOK tests, a minimum IELTS speaking score of 24, or a minimum IELTS speaking score of 8. The SPOK test is administered free of charge by appointment in the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements/speak-test-faq.html). SPOK scores from other institutions will not be accepted.

Admission Procedure — Medical Center Campus
The Office of Admissions (http://www.kumc.edu/student-services/office-of-admissions.html) facilitates the application process for all graduate programs through the KUMC online application (https://gograd.ku.edu/apply/?sr=ca7d45b3-113c-471c-b9d2-5abe0426933b). To ensure adequate time for review, the applicant should check with each individual degree program for its application deadline date.

Graduate Studies requires official transcripts from the baccalaureate granting institution that show a bachelor's degree was conferred, plus any transcripts from institutions attended post-baccalaureate. International applicants must provide English proficiency test scores as described in the Minimum English Proficiency Requirement above. Programs may request transcripts for all college courses taken and other application materials. Applicants should check with the program to which they are applying for information on required, program-specific application materials.

Background Check
A background check is required during the admission process; it may affect the student's eligibility to enter the program. In the case of students involved in direct patient contact, additional checks of Employment Disqualified Listings maintained by various health care disciplines may be required. Prospective students should check with their individual academic programs regarding these requirements.

All domestic students, as well as any international students who have been in the United States for more than 30 days prior to admission*, must submit to at least a standard background check through Validity Screening Solutions. In the case of students involved in direct patient contact, additional checks of Employment Disqualified Listings maintained by various health care disciplines may be required by specific programs. Prospective students should check with their individual department or program to determine the process and appropriate institutional or program code number to be provided to Validity Screening Solutions for the transmittal of the background check results.

Background check results will be considered on a case-by-case basis, but in general, the following may be considered as disqualifying findings and therefore prevent admission or matriculation. Future licensing requirements can determine admission.

- Felony convictions
- Misdemeanor convictions or felony deferred adjudications involving crimes against persons (physical or sexual assault or abuse)
- Misdemeanor convictions related to moral turpitude (e.g., prostitution, public lewdness, etc.)
- Felony deferred adjudications for the sale, possession, distribution or transfer of narcotic drugs or other controlled substances
- Registered sex offender status
- Medicare, Medicaid or other healthcare fraud or misuse

Should you have any questions concerning this requirement for admission to Medical Center campus programs, please contact your specific program or department.

*International students admitted on valid visas and who have not resided in the United States for more than 30 days may be excused from this requirement due to the background checks conducted as part of their visa screening process.

Application Fees
Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some programs within each school may assess a different amount than is listed below; check with the program you wish to apply to for the specific fee. Additionally, some departments and programs require deposits from admitted students to be fully credited against tuition upon enrollment.

</table>

Admission Notification
Each applicant is notified of the admission decision by email. The admission decision letter from the Dean of Graduate Studies includes the admission classification (degree-seeking, Special B, non-degree seeking or certificate-seeking). For all admission categories, enrollment in specific courses may be subject to fulfillment of program course prerequisites and/or consent of the instructor.

After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission to graduate studies does not imply admission to candidacy for a higher degree. Requirements for an advanced degree must be regarded as minimum requirements. Additional requirements depend
on the student’s undergraduate preparation and the particular field of graduate work chosen.

Reactivation
Students who are not continuously enrolled should check with their academic program to see if they will be required to re-apply for admission or if they may be reactivated without re-applying. If permission is granted by the program to reactivate, the student completes the Reactivation Form (http://www.kumc.edu/activationform/) posted on the Registrar’s website. Individual programs make the determination about when a student is required to re-apply. However, after an absence of 5 years, Graduate Studies requires the student to re-apply for admission to their graduate program.

Limitations on Admission
Because of limitations of space, faculty, or general resources for research and instruction, some programs must restrict the number of applicants they admit. Questions should be directed to the program to which the prospective student wishes to apply.

- Awarding of Degrees (p. 2457)
- Combined Degrees (p. 2466)
- Dissertation Committee for Ph.D. (p. 2464)
- Dissertation Submission and Publication for Ph.D. (p. 2464)
- Doctoral Degree Programs (p. 2459)
- Doctoral Degree Requirements Clinical Doctorate (p. 2460)
- Doctoral Degree Requirements Ph.D. (p. 2463)
- Final Oral Exam (dissertation defense for Ph.D.) (p. 2463)
- Interdisciplinary Studies (p. 2465)
- Master’s Degree Programs (p. 2457)
- Master’s Degree Requirements (p. 2457)
- Master’s General Examination, Thesis Defense or Project Defense (p. 2458)
- Oral Comprehensive Exam for Ph.D. (p. 2462)
- Post-Comprehensive Enrollment for Ph.D. (p. 2463)
- Research Skills and Responsible Scholarship for doctoral students (p. 2460)
- Thesis Submission and Publication for master’s students (p. 2458)

Awarding of Degrees
Degrees are awarded three times each year, in August, December, and May. Degrees are conferred formally at the annual commencement held in May each year. Degree candidates are not eligible to graduate if the graduate cumulative grade-point average is lower than 3.0 in all courses taken for graduate credit.

Students who are working toward two degrees must complete requirements for each degree. Coursework may not count toward fulfilling degree requirements for more than one degree.

Graduate students may not earn an additional KU degree with the same name and degree code as a previously awarded degree from KU. This applies to the completion of different degree tracks, concentrations, and subspecialties within a given degree. This does not prohibit students from earning additional master’s or doctoral degrees in another discipline.

Master’s Degree Programs

Master of Arts (M.A.) and Master of Science (M.S.)
Historically, most of the master’s degrees granted have been the Master of Arts (M.A.) and Master of Science (M.S.). This fact conforms with the traditional liberal arts background out of which most U.S. graduate schools developed. The degree requirements for the M.A. and M.S. are generally concentrated in one area or major discipline. The KU Medical Center campus, with oversight from the Office of Graduate Studies, offers Master of Science degrees in several disciplines through the Schools of Health Professions (p. 536), Medicine (p. 2031), and Nursing (p. 2262).

Professional Master’s Degrees
In more recent years, professional master’s degree programs have been developed for entry level or advancement in specific professions. On the Medical Center campus, this includes health services administration (M.H.S.A.) (p. 2117) and public health (M.P.H.) (p. 2121)

Master’s Degree Requirements
This section gives the general and common requirements for all master’s degree programs offered. The program sections of the online catalog give specific requirements for the degrees they offer.

Master’s Program Time Constraints
Normal expectations are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study. However, master’s degree students are allowed 7 years for completion of all degree requirements. In cases in which compelling reasons or circumstances recommend a 1-year extension, the Office of Graduate Studies, on recommendation of the academic program, has authority to grant the extension. In cases where more than 8 years are requested, the Office of Graduate Studies considers petitions for further extensions. These may be granted provided evidence of continuous progress, currency of knowledge, and other reasons are compelling. Some academic programs may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the academic program in which they plan to study.

Master’s Enrollment Requirement
All graduate students enrolled in master’s graduate programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/about/calendar-and-events.html) for deadlines for specific semesters.
M.A. and M.S. Specific Degree Requirements

A Master of Arts (M.A.) or a Master of Science (M.S.) degree requires at least 1 year of graduate work or its equivalent. Stated in terms of hours of credit, the standard master’s program requires 30 hours. With permission of the academic program (or in the case of interdepartmental programs, permission of the joint program committee) and of the Office of Graduate Studies, it is sometimes possible to complete a 30-hour master’s degree with as few as 24 hours if the student enters the program especially well prepared and maintains a superior grade-point average. Work for a master’s degree is concentrated in the major area, with only a minimal amount of work (usually no more than 6 hours) that is completed at KU permitted outside the major department. Each master’s program must contain a research component, represented either by a thesis (usually for 6 hours of credit) or by an equivalent enrollment in research, independent investigation, or seminars. Within these requirements, departmental master’s programs may be flexible enough to meet the particular needs of individual students.

In a few cases, the degree is offered through two schools and administered by joint committees with faculty representation from both schools. The Master of Arts degree in speech-language pathology and the Master of Arts degree in audiology are administered by an intercampus committee drawn from the Department of Speech-Language-Hearing: Sciences and Disorders in Lawrence and from the Department of Hearing and Speech in the School of Health Professions in Kansas City.

M.A. and M.S. Final General Examination, Thesis Defense or Project Defense

Completion of a final general examination, defense of a thesis, or defense of a project in the major subject, is the culminating academic phase of the M.A. and M.S. degree programs and is required of all candidates for these two degrees. At the option of the academic program, the final general examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged. For students defending a master’s thesis, the student must be enrolled in a minimum of one hour of master thesis the semester the thesis is defended.

The committee for the administration of the general exam or the defense of a thesis or project, must consist of at least 3 members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2467) section of this catalog. The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate’s department/program of study.

The examination is held during the semester of the student’s final enrollment in coursework. The thesis defense should be held when the thesis has been substantially completed and is held normally during the student’s final semester of enrollment. If defending a thesis, the student must be enrolled in a minimum of one hour of thesis the semester the student defends the thesis.

When a M.A. or M.S. student is in their final semester, the degree program requests the Office of Graduate Studies approve the scheduling of the final general exam, thesis, or project defense via the Progress to Degree system. The degree program should ascertain that the student is in good academic standing (3.0 or higher cumulative grade-point average) before scheduling the examination or defense. The Progress to Degree request must be submitted at least two weeks prior to the examination date. The Office of Graduate Studies verifies that criteria described in the preceding paragraphs have been met upon receiving a Progress to Degree form requesting the scheduling of the general exam, thesis defense, or project defense. If the criteria have been met, Graduate Studies approves the request to proceed.

For every scheduled examination, thesis defense or project defense, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program’s discretion. If the aspirant receives a result of Unsatisfactory, it may be repeated upon the recommendation from the program/department.

A student’s general exam, thesis defense, or project defense can be held in person, virtually, or in a hybrid format. In cases where the student prefers an examination in which all committee members are physically present, the student’s preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

M.A. and M.S. Thesis Submission

Formatting requirements and instructions for the proper format of the thesis are included on the Graduate Studies website. The student must be the author of the thesis, and every publication from it must indicate that authorship. Practices vary among disciplines, and even among scholars in a given field, as to whether the mentor’s name may appear as a co-author and whether as senior or junior, on subsequent publication of the thesis (usually revised), or on articles prepared from it. Clear understandings in individual cases are expected to be established during the apprenticeship period, when the ethical practices in publication are addressed within the program’s professional development training.

When the thesis defense has been passed and all requested changes have been made to the thesis, the student arranges for the thesis committee chair (or co-chairs) to review changes and approve the final thesis on behalf of the thesis committee, the committee chair then sends the thesis to the program’s Graduate Director for review and approval. When the Graduate Director has determined the thesis meets program requirements and is formatted correctly for publishing by ProQuest, they send approval on behalf
of the program via email to the Office of Graduate Studies. At that time, the date of the Graduate Director’s approval is entered by the student on the student’s acceptance page in their thesis prior to uploading to ProQuest.

The student is then required to arrange publication of the thesis through ProQuest (https://www.proquest.com/products-services/dissertations/) and payment of all associated fees (including copyright fees if applicable), through the electronic submission process (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/for-students/electronic-thesis-and-dissertation.html) detailed on the Graduate Studies website.

A form regarding publication permissions and embargo preferences is one of the required documents that is submitted to the Office of Graduate Studies following successful defense of the thesis. Theses will be made available through ProQuest (http://www.proquest.com/products-services/dissertations/) and KU ScholarWorks (https://kuscholarworks.ku.edu/) unless there is an embargo in place or special circumstances pertain as outlined in the Embargo of Theses and Dissertations (https://catalog.ku.edu/graduate-studies/kumc/#regulationstext) policy in the Regulations section of this catalog.

**Doctoral Degree Programs**

KU Medical Center campus with oversight from the Office of Graduate Studies offers the Doctor of Philosophy (Ph.D.) in several specific disciplines and offers eight clinical doctorate degree programs. General descriptions for each of the doctoral degrees offered are given here in succinct form to provide convenient comparison of the degrees. Detailed information about requirements for each degree as it is offered in specific disciplines should be obtained from the appropriate academic program pages in this catalog. Note: The School of Medicine also offers the Doctor of Medicine (p. 2144) (M.D.) (p. 2144) degree which is administered by the School of Medicine.

**Doctor of Philosophy (Ph.D.)**

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education: putting order into human experience; fostering a love of learning for its own sake; instilling respect for human values; integrating various human powers into a process of creation; and making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of courses. Because of the diversity of the fields in which the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

Doctor of Philosophy (Ph.D.) is offered by programs in specific disciplines by the Schools of Health Professions (p. 536), Medicine (p. 2031), and Nursing (p. 2262). Admission and degree requirements are listed under the individual programs in each school of this online catalog.

**CLINICAL DOCTORATES:**

**Clinical Doctorate in Speech-Language Pathology (S.L.P.D.)**

The Clinical Doctorate in Speech-Language Pathology (S.L.P.D.) program is intended for individuals who have completed a Master of Speech-Language Pathology degree and have entered clinical practice. The program prepares the student at the doctoral level to meet the demands of complex clinical practice. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed under Communicative Disorders: Intercampus Program (p. 577) of this online catalog.

**DOCTORATE IN CLINICAL LABORATORY SCIENCES (D.C.L.S.)**

The Doctorate in Clinical Laboratory Science is an advanced-practice degree for actively practicing, currently ASCP-certified, medical laboratory scientists. It is designed for those interested in increasing practical and theoretical knowledge of clinical laboratory science, advancing in the profession, and positively impacting the current health care system.

This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctorate in Clinical Laboratory Sciences (p. 605) section of this online catalog.

**Doctor of Audiology (Au.D.)**

The Doctor of Audiology (Au.D.) program prepares the student to enter clinical practice as an audiologist. The program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed under Communicative Disorders: Intercampus Program (p. 577) of this online catalog.

**Doctor of Clinical Nutrition (D.C.N.)**

The Doctor of Clinical Nutrition (DCN) program is designed for students who are registered dietitians with a Master’s degree and currently working in the field of nutrition and dietetics. The program produces advanced practice nutrition professionals who are prepared for leadership roles in clinical nutrition or higher education settings. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctor of Clinical Nutrition (https://catalog.ku.edu/health-professions/dietetics-nutrition/clinical-nutrition-doctorate/) section of this online catalog.
Doctor of Nurse Anesthesia Practice (D.N.A.P.)
The Doctor of Nurse Anesthesia Practice (D.N.A.P.) degree program prepares the registered nurse to become a nurse anesthesia practitioner with the capability to deliver competent nurse anesthesia services, engage in research, and assume leadership roles in the profession. Students receive extensive education in both the academic and clinical components of nurse anesthesia. Students learn to administer anesthesia to all patient populations in a variety of clinical settings using all current anesthesia techniques. Graduates are prepared to take the national certification examination required to become Certified Registered Nurse Anesthetists. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctor of Nurse Anesthesia Practice (p. 651) section of this online catalog.

Doctor of Nursing Practice (D.N.P.)
The Doctor of Nursing Practice (D.N.P.) prepares advanced practice nurses at the highest level of nursing practice. The D.N.P. offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic, and demanding health care field. Skills in collaboration, innovation, and evaluation, complemented by advanced practice skills, prepare nurses to share the future of health care. Students preparing for advanced practice roles learn to provide patient-centered care that is evidence-based, and contribute to the development of the highest level of evidence-based practice. Students preparing for indirect care roles learn to provide the highest level of leadership in a variety of care and educational settings. This degree program is offered by the KU School of Nursing. Admission and degree requirements are listed in the Doctor of Nursing Practice (p. 2294) section of this online catalog.

Doctor of Occupational Therapy (O.T.D.)
The Doctor of Occupational Therapy (O.T.D.) program of study is intended for occupational therapists who have either a bachelor’s degree or a Master of Occupational Therapy degree and wish to upgrade their knowledge and skills to the doctoral level to meet the increasing demands of complex practice issues. There are two tracks of the O.T.D., which are entry-level and post-professional. This degree program is offered by the KU School of Health Professions. Admission and degree requirements for the two tracks are listed in the Occupational Therapy (p. 655) section of this online catalog.

Doctor of Physical Therapy (D.P.T.)
The Doctor of Physical Therapy (D.P.T.) degree program is designed for individuals pursuing careers in physical therapy. The program prepares a physical therapy practitioner with the skills for lifelong professional development. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctor of Physical Therapy (p. 678) section of this online catalog.

Clinical Doctorate Degree Requirements
The following sections list the general and common requirements for doctoral degrees. Specific degree requirements, including requirements for the clinical doctoral degrees, set by specific departments, programs, and schools appear in the sections of the catalog devoted to those units.

Maximum Tenure for Doctoral Programs
After being admitted to doctoral programs at KU, students complete all degree requirements in 8 years. The Office of Graduate Studies has authority to grant a 1-year extension based on a program’s written recommendation, which should include compelling circumstances for the extension. Students who complete the master’s degree at KU and subsequently begin doctoral studies have a maximum total time of 10 years from the first semester of enrollment to complete both degrees. Normal expectations, however, are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master’s and doctorate in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.

Doctoral Enrollment Requirement
All graduate students enrolled in doctoral graduate programs must be enrolled the semester they complete doctoral degree requirements. Doctoral students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/about/calendar-and-events.html) for deadlines for specific semesters.

Research Skills and Responsible Scholarship
All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.
2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

Procedure
All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Office of Graduate Studies. Students meet this requirement as determined by the approved plan for their program. It is the responsibility of the program to report when the student completed the requirement and how the requirement was met.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

It is the purview of the department or program to determine the necessary topics in training doctoral students in the areas of responsible scholarship. Such topics may include:

- Protection of human subjects
- Welfare of laboratory animals
Doctor of Philosophy (Ph.D.) Degree Requirements

This section lists KU regulations common to the administration of all doctoral Ph.D. programs. The particular application, interpretation, or method of implementation of such a common element for individual degree programs and departments is, in certain cases, left to the faculty of the department or the degree program (e.g., Research Skills and Responsible Scholarship requirement). Additional requirements specific to each degree, along with variations permitting each student to achieve particular academic goals, are listed in the section of this catalog for the school through which the degree program is offered.

1. Admission

Upon admission to a Ph.D. program, the student is known as an aspirant for the degree and remains so designated until successful completion of the comprehensive oral examination. After passing that examination, the student is designated a candidate for the degree until successful defense and submission of the finished dissertation.

2. Program Time Constraints

Minimum Tenure

The student must spend 3 full academic years, or the bona fide equivalent thereof, in resident study at this or some other approved university, including the time spent in attaining the master’s degree. Resident study at less than full time requires a correspondingly longer period, but the requirement is not measured merely in hours of enrollment. Because a minimum number of hours for the degree is not prescribed, no transfer of credit is appropriate. However, graduate degree programs take relevant prior graduate work into consideration in setting up programs of study leading to the doctorate.

Residence Requirement

Two semesters, which may include one summer session, must be spent in resident study at KU. For the two specific semesters counted towards meeting this requirement, the student must be involved full time in academic or professional pursuits, such as a GTA or GRA appointment for teaching or research if it is directed specifically toward degree objectives. Enrollment in approved distance-learning courses offered through KU cannot be used to meet the doctoral residence requirement.

Full-time enrollment for a graduate student is 9 hours for fall or spring semesters and 6 hours for the summer semester. For semesters in which a student holds a GTA or GRA appointment, full-time enrollment is 6 hours for fall or spring semesters and 3 hours for the summer semester. The residence requirement must be met prior to the semester the Comprehensive Oral Examination is scheduled. It is the responsibility of the academic program to report the two semesters that will satisfy the residency requirement via the Progress to Degree form requesting approval to schedule the Comprehensive Oral Examination.

Note: Those noted above are minimum residence requirements. Please check with the individual program for any additional requirements.

Maximum Tenure

After being admitted to doctoral programs at KU, students must complete all degree requirements in 8 years. In cases in which compelling circumstances recommend a 1-year extension, Graduate Studies has authority to grant the extension on the written advice of the department and dissertation committee. Students who complete the master’s degree at KU and subsequently begin doctoral studies have a maximum total time of 10 years from the first semester of enrollment to complete both degrees. Normal expectations, however, are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master’s and doctorate in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy that is in effect in the department in which they plan to study.

A student in any of the above categories may petition the Dean of Graduate Studies through the program for a leave of absence during either the pre- or post-comprehensive period to pursue full-time professional activities related to the doctoral program and long-range professional goals. Leaves of absence also may be granted because of illness or other emergency. Ordinarily a leave of absence is granted for 1 year, with the possibility of extension upon request. After an absence of 5 years, however, a doctoral aspirant or candidate loses status as such and must apply for readmission to the program.
3. Research Skills and Responsible Scholarship

All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.

2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

Procedure

All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Graduate Studies Office. Students meet this requirement as determined by the approved plan for their program. The approved plan for meeting this requirement is included in the Degree Requirements section of this catalog for each Ph.D. program offered. It is the responsibility of the program to report when the student completed the requirement and how the requirement was met via the Progress to Degree form requesting approval to schedule the Comprehensive Oral Examination.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

It is the purview of the department or program to determine the necessary topics in training doctoral students in the areas of responsible scholarship. Such topics may include:

- Protection of human subjects
- Welfare of laboratory animals
- Conflicts of interest
- Data management
- Mentor/student responsibilities
- Collaborative research
- Authorship, publication, plagiarism, copyright
- Peer review
- Professional practices
- Maintenance of confidentiality
- Appropriate research conduct and research misconduct

It is also the purview of the department or program to determine the research skills necessary to perform doctoral level research. Research skills may include:

- Knowledge of language(s) significant to the field
- Research methodology
- Methods of qualitative and quantitative data analysis

Note: These lists serve only as guides; additional appropriate topics may exist.

4. Comprehensive Oral Examination

The comprehensive oral examination covers the major field and any extra departmental work for which the program wishes to hold the aspirant responsible. When a doctoral aspirant has completed the major portion of the coursework at a level satisfactory to the graduate degree program and met all other program and general requirements prerequisite to the comprehensive oral examination, including the residence requirement and the research skills and responsible research requirement as appropriately applied and established for the student’s particular program, the degree program requests the Office of Graduate Studies approve the scheduling of the comprehensive oral examination via the Progress to Degree system. The degree program should ascertain that the student is in good academic standing (3.0 or higher grade-point average) before scheduling the examination. The examination may be scheduled provided that at least 5 months have elapsed from the time of the aspirant’s first enrollment at KU and at least 90 days have elapsed since any unsuccessful attempt. The examination request must be submitted at least two weeks prior to the examination date.

The committee for the comprehensive oral examination must consist of at least five members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2467) section of this catalog. The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate’s department/program of study. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status. At least one member of the committee must be from a program other than the aspirant’s major program. This outside committee member represents the Office of Graduate Studies and must hold either regular or dissertation graduate faculty status to be eligible to serve in this capacity. Before the examination, Graduate Studies provides the outside committee member a list of responsibilities as the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee, has full right to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination to the Office of Graduate Studies and its Dean.

The Office of Graduate Studies verifies that all criteria described in the preceding paragraphs have been met upon receiving a Progress to Degree form requesting the scheduling of the oral comprehensive exam. If the criteria have been met, Graduate Studies approves the request to proceed with the exam.

For every scheduled examination, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program's discretion. If the aspirant receives a result of Unsatisfactory on the comprehensive oral examination, it may be repeated on the recommendation of the program, but under no circumstances may it be taken more than 3 times. In any case,
the examination may not be repeated until at least 90 days have elapsed since the last unsuccessful attempt.

A student may be examined in person, virtually, or in a hybrid format. In cases where the student prefers an examination in which all committee members are physically present, the student's preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted as a petition to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

5. Candidacy

Upon passing the comprehensive oral examination, the aspirant becomes a candidate for the doctorate. If it has not begun before, the traditional, close student-mentor apprenticeship relationship comes into being. The student is expected to learn by both precept and example of the mentor, and often in collaboration. The chosen field of scholarship is explored using acquired research tools. The principles and customs of academic inquiry and the codes of ethics traditional to the various disciplines and professional fields become part of the student’s thinking and working.

6. Post-Comprehensive Enrollment

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours that both moves the student towards degree completion and reflects, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session.

Post-comprehensive enrollment may include enrollment during the semester in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester until all degree requirements have been met. The number of hours at this stage may be as little as one hour a semester. The number of hours of enrollment is determined by the candidate’s advisor and must reflect as accurately as possible the candidate’s demands on faculty time and university facilities.

7. Dissertation

The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities as well as to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on a useful area of interest a variety of research skills and scholarly or creative processes. It must show some original accomplishment, but it should also demonstrate without doubt the candidate’s potential to make future contributions to knowledge and understanding.

The dissertation is to be a coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still accommodate several subtopics by demonstrating their relationships and interactions. If previously published material by other authors is included in the dissertation, it must be quoted and documented appropriately. It should be noted that prior publication does not guarantee acceptance of the dissertation by the dissertation committee. Final acceptance of the dissertation is subject to the approval of the dissertation committee. The dissertation—or one or more substantial portions of it, often rewritten—is expected to be publishable and subsequently published (see the Dissertation Submission and Publication section).

Both the dissertation research and the dissertation itself are to be completed under the guidance and direction of the dissertation committee. Formatting requirements and instructions (http://graduate.ku.edu/etd-formatting-and-working-multimedia-files/) for the proper format of the dissertation are available on the Graduate Studies website. Candidates and faculty members are reminded that the dissertation is to be a coherent, logically organized scholarly document. Because the demands and practices of different disciplines are varied, the format is somewhat flexibly described, and moderate departures from the norm are allowed when justified by the nature of the work or the circumstances of presentation. Any substantial divergences must be approved in advance as prescribed by the instructions, and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

8. Final Oral Examination (dissertation defense)

Completion of the dissertation is the culminating academic phase of a doctoral program. This phase is comprised of the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination (dissertation defense). When the completed dissertation has been accepted by the committee in final draft form, and all other degree requirements have been satisfied as outlined in the program’s degree requirements section of this catalog, the candidate’s program requests that Graduate Studies approve the scheduling of the final oral examination via the Progress to Degree form. This request must be made at least 3 weeks prior to the desired examination to allow sufficient time to publicize the examination so that interested members of the university community may attend.
At least 5 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination. Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation defense, a re-evaluation of the student’s candidacy status is necessary. Re-evaluation of the student’s candidacy status could include retaking the comprehensive oral examination.

The committee for the final oral examination must consist of at least five members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2467) section of this catalog. In most cases, the majority of committee members serving on a graduate student oral examination committee are in the candidate’s department/program of study. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status. At least one member of the committee must be from a program other than the aspirant’s major program. This outside committee member represents the Office of Graduate Studies and must hold either regular or dissertation graduate faculty status to be eligible to serve in this capacity. Before the examination, Graduate Studies provides the outside committee member a list of responsibilities as the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee, has full right to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination to the Dean of Graduate Studies.

The dissertation defense should be held when the dissertation has been substantially completed and is held normally during the student’s final semester of enrollment. The student must be enrolled in a minimum of 1 hour of dissertation the semester the student defends the dissertation. Doctoral students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/about/calendar-and-events.html) for deadlines for specific semesters.

The Office of Graduate Studies verifies that all criteria described in the preceding paragraphs have been met upon receiving a Progress to Degree form requesting the scheduling of the final oral examination. If the criteria have been met, Graduate Studies approves the request to proceed with the exam.

For every scheduled examination, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program’s discretion. If an Unsatisfactory result is reported, the candidate may be allowed to repeat the examination on the recommendation of the program/department.

Ideally, all members of the committee are physically present for the examination. A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations the requirement is 3 of the 5 members.

In addition, it is required that the student being examined, the chair (or co-chairs) of the committee, and the outside committee member all be physically present at the examination or defense. Mediated attendance by the student or chair (or co-chairs) is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair (or co-chairs). In cases where the student prefers an examination in which all committee members are physically present, the student’s preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

9. Dissertation Submission and Publication

Formatting requirements and instructions for the proper format of the dissertation are included on the Graduate Studies website. The student must be the author of the dissertation, and every publication from it must indicate that authorship. Practices vary among disciplines, and even among scholars in a given field, as to whether the mentor’s name may appear as a co-author and whether as senior or junior, on subsequent publication of the dissertation (usually revised), or on articles prepared from it. Clear understandings in individual cases are expected to be established during the apprenticeship period, when the ethical practices in publication are addressed within the program’s professional development training.

When the student has passed the final oral examination and all requested changes have been made to the dissertation, the student arranges for the dissertation committee chair (or co-chairs) to review changes and approve the final dissertation on behalf of the dissertation committee. The committee chair then sends the dissertation to the program’s Graduate Director for review and approval. When the Graduate Director has determined the dissertation meets program requirements and is formatted correctly for publishing by ProQuest, they send approval on behalf of the program via email to the Office of Graduate Studies. At that time, the date of the Graduate Director’s approval is entered by the student on the student’s acceptance page in their dissertation prior to uploading to ProQuest.

The student is then required to arrange publication with ProQuest (https://www.proquest.com/products-services/dissertations/) of
the dissertation and payment of all associated fees (including copyright fee, if applicable), through the electronic submission process (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/for-students/electronic-thesis-and-dissertation.html) detailed on the Graduate Studies website.

A form regarding publication permissions and embargo preferences is one of the required documents that is submitted to the Office of Graduate Studies following successful defense of the dissertation. Dissertations will be made available through ProQuest (http://www.proquest.com/products-services/dissertations/) and KU ScholarWorks (https://kuscholarworks.ku.edu/) unless there is an embargo in place or special circumstances pertain as outlined in the Embargo of Theses and Dissertations (https://catalog.ku.edu/graduate-studies/kumc/#regulationstext) policy in the Regulations section of this catalog.

Interdisciplinary Studies

M.A., M.S., and Ph.D. with a Major in Interdisciplinary Studies

Only superior students admitted and enrolled in a graduate program at KU whose proposed studies require direction not available in any single department are considered for admission to an Interdisciplinary Studies program. Before seeking acceptance, an applicant must assemble a graduate faculty advisory committee headed by a faculty member authorized to direct master’s research (for M.A. or M.S. in Interdisciplinary Studies), doctoral research and dissertations (for Ph.D. in Interdisciplinary Studies). The applicant, in conjunction with the committee, must prepare a proposal for the course of study. The proposal must provide a rationale for the particular mix of disciplines, demonstrating how each contributes to a central theme or focus. It must also show that the proposed program cannot be achieved through an established master’s or doctoral program at KU.

The student seeking to enter the Interdisciplinary Studies program must have an outstanding academic record (a grade-point average of 3.75 or higher on a 4.0 scale for graduate courses or a grade-point average of 3.5 or higher on a 4.0 scale for undergraduate courses if no graduate courses have been taken) and must be admitted to and enrolled in a graduate program at KU at the time of application. A graduate student who has failed to maintain the required grade-point average is not eligible for the Interdisciplinary Studies program. A student is not eligible for this program if he or she has tried and failed to achieve candidacy in a regular graduate department or program at KU.

The student is expected to assume the initiative in determining his or her potential eligibility through consultation with graduate advisors, and if deemed eligible, in forming an advisory committee and preparing documentation to support the application.

Preadmission Procedures

To enter the program, a student should

1. Determine that KU offers courses and research in the areas appropriate to their interest(s).

2. Prepare a tentative study plan based on those offerings to serve as a basis for initial discussion.

3. Approach a professor whose interests are comparable to those of the student and request that he or she acts as advisor. Normally this professor is a faculty member of the program of principal interest to the student. To grant an M.A. or M.S. in Interdisciplinary Studies, it is essential that the school has the authority to grant master’s degrees. To grant a Ph.D. in Interdisciplinary Studies, it is essential that the school has the authority to grant doctoral degrees. The selected professor must be a full member of the graduate faculty and authorized to chair doctoral dissertation committees for Ph.D. in Interdisciplinary Studies.

4. After a professor agrees to serve as an advisor, the student should assemble an advisory committee of at least 3 additional professors representing the disciplines covered in the Interdisciplinary program. At least 2 disciplines or departments must be represented.

5. In conjunction with the advisor and the committee, the student prepares a proposal for study, including

   • A statement, with supporting documentation, that the proposed Interdisciplinary Studies program cannot be accomplished through established programs.

   • A statement of the interdisciplinary or transdisciplinary nature of the proposed area of study.

   • A definition of the field of study incorporating, including consistent descriptions of the contribution each discipline makes to the broader field.

   • An outline of the course of study, indicating substantive work in the fields represented. Readings courses and independent study do not substitute for regular courses.

   • A description of the method for satisfying research skills and responsible scholarship requirements.

   • A description of the comprehensive examination procedures for the Ph.D. (nature of the examinations and possible examining committee) or final examination for the M.A./M.S.

   • A description, to the extent possible, of the nature of the field in which a dissertation or master’s thesis might be written, indicating the respective contributions of the selected disciplines to the final product.

   • The following attachments:

     i. complete transcripts of all previous work.

     ii. a cover sheet, signed by committee members, indicating their support of the proposal.

     iii. letters of recommendation and other appropriate supporting documents.

Note: The diploma indicates the degree awarded as “M.A. in Interdisciplinary Studies,” “M.S. in Interdisciplinary Studies,” or “Ph.D. in Interdisciplinary Studies,” and does not specify the area of specialization. The transcript notes the area of specialization as determined by the admissions committee.

Admission and Review Procedure

Upon completion of the above, the student must submit the application for admission into the Interdisciplinary Studies program to the Dean of Graduate Studies. The Dean of Graduate Studies appoints an admission committee consisting of (a) the associate dean’s designee for the school most involved in the interdisciplinary
undertaking (the school in which the major advisor resides), (b) 2 or more doctoral chairing faculty members from unrelated fields, including at least 1 member of the Graduate Council, and (c) the chair or the graduate director of the department in which the student resides at the time of application. The Dean of Graduate Studies serves as ex-officio chair of the Interdisciplinary Studies admissions committee. The committee reviews the documents and may, if necessary, interview the student and the advisor for clarification and additional information or to discuss suggested revisions to the proposal.

Approved Program Implementation

Upon acceptance of the proposal and admission to the Interdisciplinary Studies program, the student is admitted to the school of the major advisor to facilitate record keeping and to provide a central administrative office. The associate dean or director of graduate studies of that school must enroll the student and monitor the program, and along with the major advisor, must make annual reports to Graduate Studies on the student’s progress. These reports are distributed to the directors of other involved programs along with a request to supply any additional information regarding the student’s performance. Proposals for major deviations from the approved course of study must be submitted for review by Graduate Studies and by the school in which the student resides. It is understood that no additional requirements unique to traditional graduate programs of the school(s) or departments may be imposed unless stated explicitly in the approved study plan.

Once approved, changes to the program plan must be approved by a Graduate Studies committee, appointed by the Dean of Graduate Studies. Significant curricular changes may require a new proposal and admissions process.

All basic rules and requirements for the Master of Arts, Master of Science, and Doctor of Philosophy degrees apply to Interdisciplinary Studies programs. These include program time constraints, residence requirement, post-comprehensive enrollment, final examinations, research skills and responsible scholarship requirements, thesis or dissertation submission and publication, grade-point average, etc. (See Master’s Degree Requirements and Doctoral Degree Requirements in this section of the online catalog.)

Combined Degrees

Combined degrees are granted in programs meeting the requirements of the graduate master’s or doctoral degree and the professional post-baccalaureate degree.

Combined Medical and Master’s Degrees

Graduate students in the basic medical science departments in the School of Medicine are primarily enrolled in graduate programs. Outstanding medical students, however, are allowed to participate in work leading jointly to the M.D. degree and a graduate degree. A student admitted to both academic programs may enroll concurrently in courses in the respective programs, provided the regular medical course load is reduced to compensate for the added graduate work. The student should discuss concurrent enrollment with the department chair or graduate advisor of the master’s degree program; departmental policies vary. All requirements for the degrees must be met, but within these limitations, superior students may be able to complete the joint degree program in less time than the total required for the 2 degrees to be earned separately. For the master’s degree, a student must complete graduate work equivalent to at least 1 academic year in addition to the time spent on the medical curriculum.

Combined Medical and Doctoral Degrees

Outstanding students who are accepted into the M.D.-Ph.D. Physician Scientist Training Program will work toward the completion of the M.D. and the Ph.D. degrees. All the requirements for the respective degrees must be met. The joint degree requirements and application information for the joint M.D.-Ph.D. Physician Scientist Training Program (https://catalog.ku.edu/medicine/combined-md-phd/) are described in that program’s section of this catalog.

Policies and Processes for Graduate Certificate Programs

The graduate certificate is a focused collection of courses that when completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines. Students may be awarded these certificates upon completion of a well-defined program of course work. The didactic material comprised within a graduate certificate program may represent a more practice-oriented subset of an existing graduate discipline.

The KU Medical Center campus with oversight from the Office of Graduate Studies offers graduate certificate programs in several disciplines through the Schools of Health Professions, Medicine, and Nursing. Specific information about the certificate programs offered can be found in the the Schools of Health Professions (p. 536), Medicine (p. 2031), and Nursing (p. 2262) sections of this catalog.

Eligibility and Admission Criteria

See Graduate Certificate Admission (p. 2454) section of this catalog for admission criteria on the Medical Center campus.

Number of Credits

A graduate certificate program will comprise no less than 9 and generally no more than 18 credit hours of course work in a particular discipline or related disciplines of study.

Expiration of Program

All proposals for graduate certificate programs will be adopted for a 7-year time period. The certificate program will expire at the end of that period. The program may request renewal of the certificate program by sending an updated program proposal, endorsed by the department and School to the Graduate Council on the Medical Center campus. The proposal will be evaluated for an additional 7-year period. The Office of Graduate Studies will remind the graduate certificate program about its renewal one year before the graduate certificate program is scheduled to expire. If a program expires or is discontinued, no new students may be enrolled in the program and those students currently in the program will continue until completion.

Student Records Criteria

- It is the responsibility of the degree program that houses the graduate certificate program to maintain all student records of the graduate certificate program. These records should include, but are not limited to, the number of students that apply to the program, the number accepted and denied into the program, the number of students enrolled in the program by semester, and the number of students who complete the program by semester.
• The courses taken in the graduate certificate program will be listed on the student’s transcript and recognition of the earned certificate will also be posted on the transcript.

• The awarding of graduate certificates will coincide with the August, December, and May graduations at the University of Kansas. The certificate awarding program will instruct students to submit an “Application for Degree” (AFD) the semester the student will complete certificate requirements. The same degree granting deadlines for filing the AFD will apply to the awarding of graduate certificates.

• The Registrar’s Office will provide Graduate Certificates for students who successfully complete all certificate program requirements each semester using the same timeline as the one established for diplomas.

• Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

Process of Approval for New Graduate Certificate Programs

Approval Process
Proposals for new graduate certificate programs may be created and submitted by graduate faculty in the same manner as proposals for new graduate degree programs, with the exception that all approvals are made internally at the University of Kansas. The proposal must be approved by the Vice Chancellor for Academic and Student Affairs and accompanied by endorsement from the department chairperson, the dean of the school in which the contributing course work is administered, and the Dean of Graduate Studies.

After a proposal has been endorsed by the sponsoring department and school, the proposal must go to the Graduate Council, and if approved, will be forwarded by the Dean of Graduate Studies to the Vice Chancellor for Academic and Student Affairs.

Curriculum Criteria

• All certificate programs must be linked to a specific KU degree program(s), such that they provide a specific set of skills or knowledge base within a defined body of knowledge of the particular discipline. Certificate programs are encouraged where they might provide value-added benefits to students in existing graduate degree programs or provide a needed educational initiative for post-baccalaureate students in an area not currently addressed by a graduate degree program. These programs are not encouraged where they might detract from existing graduate programs.

• The proposed sequence of course work must offer a clear and appropriate educational objective at the post-baccalaureate level.

• The proposed certificate program must achieve its educational objective in an efficient and well-defined manner.

• A statement of the proposed course sequence associated with the certificate, including titles, number of graduate credit hours, and course descriptions both for existing courses and any new courses that may be developed.

• A statement identifying the important academic objectives of the proposed certificate program, including the range of skills and knowledge future graduates will possess. Proposals should show how the graduate certificate program complements existing courses and does not detract from existing programs.

• A statement of how the proposed course sequence associated with the certificate will meet the stated educational objectives.

• A statement of the need for the proposed program and the basis for such need, supported by either external or internal derived data.

• A list of the names of the faculty associated with or contributing to the certificate program, either by teaching the courses or advising the students within the program. An up-to-date curriculum vitae for each faculty member listed needs to be included.

• The name and curriculum vitae of the faculty member who will be designated as the coordinator of the program.

• A planned date of implementation.

Materials Required for New Certificate Proposal
Proposals for a graduate certificate program at KU must include the following materials:

• A statement of the educational objectives of the program.

• A statement of the proposed course sequence associated with the certificate, including course titles, number of graduate credit hours, and course descriptions both for existing courses and any new graduate courses that may be developed.

• A statement identifying the important academic objectives of the proposed certificate program, including the range of skills and knowledge future graduates will possess. Proposals should show how the graduate certificate program complements existing courses and does not detract from existing programs.

• A statement of how the proposed course sequence associated with the certificate will meet the stated educational objectives.

• A statement of the need for the proposed program and the basis for such need, supported by either external or internal derived data.

• A list of the names of the faculty associated with or contributing to the certificate program, either by teaching the courses or advising the students within the program. An up-to-date curriculum vitae for each faculty member listed needs to be included.

• The name and curriculum vitae of the faculty member who will be designated as the coordinator of the program.

• A planned date of implementation.

The Graduate Faculty
The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated by a graduate department or program and appointed by the Office of Graduate Studies. Only members of the Graduate Faculty may teach courses for graduate credit, supervise master’s programs, serve on master’s examination and defense committees, or serve on doctoral examination committees.

There are three types of appointment to the Graduate Faculty:

• Regular Status

• Dissertation Status (Dissertation Chair Status)

• Special Member Status

The following sections describe each type of status.

Regular Graduate Faculty Status
Any faculty member who is appointed to a tenure-track position in a graduate degree granting department or program on the Medical Center campus is eligible for regular graduate status. Present or newly appointed faculty members in tenure-track appointments with the rank of
assistant professor or above in departments or programs with approved graduate programs are granted regular membership in the Graduate Faculty, provided they have received the terminal degree in their field of specialization or have acquired equivalent training and/or professional experience as determined by the Office of Graduate Studies.

Members of the Graduate Faculty with Regular status may:

- teach courses for graduate credit;
- supervise the master's programs and thesis students;
- serve on master's and doctoral examination and defense committees;
- chair master's committees; and/or
- co-chair dissertation committees.

When appropriate, a qualified member of the Regular Graduate Faculty may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with Dissertation status serves as co-chair of the committee and agrees to ensure that all requirements are met. However, if the regular member of the Graduate Faculty has lost dissertation status, this does not apply.

In special cases where faculty members who hold regular membership in the graduate faculty enroll in a KU graduate program as part of their professional development, they may be permitted to retain their Graduate Faculty status. They may not supervise or serve as the instructor of record for students who are peers in the graduate program in which they are enrolled.

To hold regular membership in the Graduate Faculty, a faculty member must continue to show evidence of a pattern of productive professional activity demonstrating the ability to contribute to high-quality graduate education. The form that productive professional activity may take varies across disciplines. Conventional evidence of such activity includes such things as effective teaching, scholarly publication, participation in professional societies, and other scholarly activity. Graduate degree programs are responsible for monitoring faculty with regular membership in the Graduate Faculty.

Dissertation Graduate Faculty Status

To qualify for the privilege of chairing doctoral dissertation committees, a regular member of the Graduate Faculty must demonstrate continuing activity commensurate with being an established scholar in his or her field and involvement in the graduate education program as evidenced by:

- teaching graduate courses;
- advising and mentoring graduate students and serving on thesis and dissertation committees; and/or
- maintaining an ongoing program of scholarly activity including a record of scholarship, publication and other contributions to the field.

It is the graduate program’s responsibility to nominate members of the Graduate Faculty for authorization to chair doctoral committees and to provide evidence of scholarship and involvement in the graduate education program. Authorization to chair dissertation committees is reviewed as part of each graduate program review.

Special Graduate Faculty Status

Special membership may be granted to any university employee or non-employee who is uniquely qualified by training or experience for membership in the Graduate Faculty for the purposes of:

- teaching a course or courses;
- having courses cross-listed as KU courses if they are part of a cooperative graduate program between KU and the appointee’s home institution;
- serving on the thesis, dissertation, or examination committee of a particular student or students;
- chairing master’s thesis committees of a particular student or students; and/or
- co-chairing dissertation committees of a particular student or students.

When appropriate, a qualified member with Special status may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with Dissertation status serves as co-chair of the committee and agrees to ensure that all requirements are met.

Special status memberships are limited to a maximum period of 5 calendar years for teaching purposes or for the duration of the specified committee assignment. Special memberships are renewable.

All nominations for special membership must state clearly the specific purposes for which the nomination is being sought, and when it can be known in advance, the length of time for which it is being requested. Special appointments are reviewed by the appointing graduate department or program when the term ends and recommended to the Dean of Graduate Studies for renewal as appropriate. The request to renew includes the purpose to be fulfilled by the renewal of the appointment.

Graduate Faculty Appointment Chart

This chart summarizes the organization and privileges of the various types of Graduate Faculty appointments.

<table>

1 The term “doctoral committee” refers to both oral comprehensive and dissertation defense committees.
2 A faculty member with the appropriate status may chair a degree committee alone or co-chair a degree committee with another faculty
member (i.e., both co-chairs have equal status). Degree committees cannot have both a chair and a co-chair.

A current list of Graduate Faculty on the Medical Center campus is posted on the Graduate Studies website (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/for-faculty-and-staff/graduate-faculty.html).

Appointment Process
To appoint a faculty member to the Graduate Faculty or to renew a Special status, the graduate director for the department/program submits a “Graduate Faculty Status Application” through the SharePoint link on the Graduate Studies website (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/for-faculty-and-staff/graduate-faculty.html). A current curriculum vitae is attached to the application that includes a list of graduate courses the appointee has taught and a list of graduate student committees on which the appointee has served. The Dean of Graduate Studies reviews the applications and determines if appointment is approved or not. Approved appointments are then entered in Workday and are approved by the respective school academic affairs office and by the Vice Chancellor for Academic and Student Affairs before the appointment becomes official.

Notice of Non-reappointment and Graduate Faculty Eligibility
Faculty members given a notice of non-reappointment are not eligible to hold Graduate faculty status. The Office of Faculty Affairs (https://www.kumc.edu/academic-and-student-affairs.html) (http://www.kumc.edu/kuac-graduate-faculty-affairs-and-interprofessional-development.html) on the Medical Center campus will provide the Office of Graduate Studies with a written list of faculty who receive a notice of non-reappointment. The Office of Graduate Studies will remove graduate faculty status for these non-reappointed faculty for the appointment period for which the terminal notice is effective.

Upon non-reappointment, the faculty member is no longer eligible for Graduate Faculty status. The named faculty member will no longer be allowed to teach future courses for graduate credit or to serve on graduate students’ committees.

The appropriate department chairperson for the faculty member receiving the terminal notice may request, in writing, an exception to the policy from the Dean of Graduate Studies. Permission may be given to the faculty member to serve on a graduate student's committee if the graduate student will meet all degree requirements within the semester. The faculty member will be given a copy of the letter defining an exception approved by the Dean.

Outside Graduate Faculty Member for Ph.D. Examination Committees
The outside member of a Ph.D. committee must be a member of the Graduate Faculty with Regular or Dissertation status granted by a department or program other than the aspirant's major department/program. The outside member serves as the Graduate Studies representative on the committee.

The presence of the Graduate Studies representative is designed to ensure the appropriate standards of fairness, professionalism, judgment, and skill are applied throughout the examination process for the benefit of the institution and in the best interest of the student.

The Graduate Studies representative is a voting member of the committee and has full rights to participate in the examination. In the case of any unsatisfactory or irregular aspects of the examination or violation of Graduate Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

Before the examination, Graduate Studies provides a list of responsibilities to the Graduate Studies representative. By accepting the role, the outside faculty member attests there is not conflict/duality of interest that would preclude service as an objective participant observer on behalf of Graduate Studies. Following are the specific Graduate Studies guidelines the Graduate Studies representative is verifying:

1. The examination or defense was conducted in compliance with Graduate Studies policies regarding committee composition and attendance at the examination as stated in the Doctoral Degree Requirements (p. 2457) section of this catalog.
2. The examination or defense was held in a manner that was free and open to the public.
3. They were accorded full participatory rights in the examination or defense.
4. They were accorded full voting rights as a member of the committee.
5. The examination or defense was free from irregularities, unfairness, or perceived conflicts of interest to the student.
6. The examination or defense was free from irregularities, unfairness, or perceived conflict of interest among faculty members.

ASSISTANTSHIP Appointment Types
The Medical Center Campus through their academic departments offers a limited number of Graduate Teaching Assistantships, Graduate Research Assistantships and Graduate Assistantships. Only degree-seeking graduate students are eligible for these appointments. Graduate students interested in an assistantship should inquire directly to their academic program/department about GTA and GRA appointment opportunities. GA appointments are managed by the Office of Graduate Studies. The assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

Principles Guiding Assistantships
The following principles govern all graduate teaching assistant (GTA), graduate research assistant (GRA) and graduate assistant (GA) appointments on the Medical Center campus:

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University’s responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.
2. When academic programs/departments offer GTA, GRA or GA appointments, the assistantships must contribute to the training experience of the graduate student.
3. The responsibilities required of the GTA, GRA or GA should be in balance with their responsibilities as a student in the graduate program. For appointments of .50 FTE, the expectation is that the assigned duties will average no more than 20 hours per week during the semester. For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.
ASSISTANT Appointment Limits

Appointments shall not normally exceed .50 FTE. Appointments in excess of .50 FTE but not exceeding .75 FTE for all University employment combined must be approved by the academic program and the Dean of Graduate Studies in advance of an appointment offer and will be approved only in special circumstances. Programs are expected to monitor appointments in excess of .50 FTE to ensure that the graduate students' assistantship assignments enhance their academic preparation and do not interfere with progress towards degree.

Graduate Teaching Assistantships (GTA)

Graduate Teaching Assistants are paid as salaried student employees whose job duties consist primarily of direct involvement in classroom or laboratory instruction. The duties are performed under the supervision of faculty. The University also requires that a GTA's teaching assignment be in his/her own field of study or one that is closely related.

A limited number of Graduate Teaching Assistantships are available. Graduate students should inquire directly to their academic program/department about GTA appointment opportunities. Graduate Teaching Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies. [Note: Graduate Teaching Assistantships on the Lawrence campus differ in that they are governed by the Office of Graduate Studies.  

A limited number of Graduate Teaching Assistantships are available. Graduate students should inquire directly to their academic program/department about GTA appointment opportunities. Graduate Teaching Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies. [Note: Graduate Teaching Assistantships on the Lawrence campus differ in that they are governed by a memorandum of agreement between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants' Coalition, American Federation of Teachers - Kansas (GTAC), which represents KU GTAs in Lawrence only.]

GTA Eligibility

The following eligibility requirements govern all Graduate Teaching Assistant (GTA) appointments at the Medical Center campus:

1. During the semester of appointment, the GTA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus.
2. During the semester of appointment, the GTA is enrolled in no fewer than 6 graduate credit hours per fall and spring semester and 3 graduate credit hours summer semester See "Enrollment Exceptions" in section following this list.
3. During the semester of appointment, the GTA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GTA appointment.]
4. The GTA must satisfy the English proficiency criteria established by the Board of Regents for GTAs - see Minimum English Requirement for GTAs in section immediately following this list.
5. A student completing their graduate degree may not continue in a GTA appointment after the graduation date unless the student has just completed a master's degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

GTA Minimum English Requirement

All applicants for graduate teaching assistantships whose first language is not English, including international students and U.S. residents or citizens, must meet one of the following criteria:

1. Score a minimum of 22 on the spoken English portion of the TOEFL iBT.
2. Score a minimum of 8 on the spoken English portion of the IELTS.
3. Score a minimum of 50 on the SPEAK administered by the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements/speak-test-faq.html) on the Medical Center campus.

GTA Enrollment Exception

A Ph.D. student appointed as a GTA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies.

A clinical doctoral (Au.D., D.C.L.S., D.N.A.P., D.N.P., D.P.T., O.T.D., S.L.P.D.) student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

A master's student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student's final semester after all.

GTA Tuition Benefit

The Medical Center campus pays the tuition of graduate students who receive appointments as Graduate Teaching Assistants as defined below for the semester of appointment:

<table>
<thead>
<tr>
<th>FTE</th>
<th>Tuition Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>.40 or more</td>
<td>100% of tuition</td>
</tr>
<tr>
<td>.30 FTE but less than .40 FTE</td>
<td>75% of tuition</td>
</tr>
<tr>
<td>.20 FTE but less than .30 FTE</td>
<td>50% of tuition</td>
</tr>
<tr>
<td>.10 FTE but less than .20 FTE</td>
<td>25% of tuition</td>
</tr>
</tbody>
</table>

A graduate student who has a GTA appointment or a combination of a GTA and GRA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment,
to be applied before any eligible waivers of tuition. The tuition payment program covers only tuition and is not applicable to fees (e.g., campus fees, course fees, e-learning fees, etc).

**GTA Health Insurance Benefit**

A graduate student who has a GTA appointment or combination GTA and GRA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA selects the GTA-GRA plan. Health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.

**GTA Resignation or Termination**

If a GTA resigns or abandons the position or the appointment is terminated before working a minimum of 8 pay-periods during the semester, the student must pay full tuition for that semester and will lose eligibility for in-state (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

**Graduate Research Assistantships (GRA)**

Graduate Research Assistants are salaried student employees who perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic). The duties performed are under the direct supervision of faculty or research professionals. A limited number of Graduate Research Assistantships (GRA) are available. Graduate students should inquire directly to their academic program/department about GRA appointment opportunities. Graduate Research Assistantshhip policy is administered on the Medical Center campus by the Office of Graduate Studies.

**GRA ELIGIBILITY**

The following eligibility requirements govern all Graduate Research Assistant (GRA) appointments at the Medical Center campus:

1. During the semester of appointment, the GRA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus. Graduate students enrolled in a graduate degree program offered by the Lawrence or Edwards campuses may be approved by petition to the Dean of Graduate Studies to be appointed as a GRA on the Medical Center campus if they will perform research that is in their fields (or a closely related field) of study and is integral to the student's education (e.g., dissertation topic).
2. During the semester of appointment, the GRA is enrolled in no fewer than 6 graduate credit hours per fall and spring semester and 3 graduate credit hours summer semester. See “Enrollment Exceptions” in section following this list.
3. During the semester of appointment, the GRA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GRA appointment.]
4. A student completing their graduate degree may not continue in a GRA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

**GRA Enrollment Exception**

A Ph.D. student appointed as a GRA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies.

A clinical doctoral (Au.D., D.C.L.S., D.N.A.P., D.N.P., D.P.T., O.T.D., S.L.P.D.) student appointed as a GRA, who is in his or her final semester, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student's final semester after all.

A master's student who is an appointed GRA and in his or her final semester may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

**GRA Tuition Benefit**

A graduate student who has a GRA appointment or a combination of a GRA and GTA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment. If the student is otherwise assessed nonresident tuition rates, the difference between nonresident and resident rates will be waived.

**GRA Health Insurance Benefit**

A graduate student who has a GRA appointment or combination GRA and GTA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester, for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA selects the GTA-GRA plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.
Gra Resignation or Termination

If a GRA resigns or abandons the position or the appointment is terminated before working a minimum of 6 pay-periods during the semester, the student will lose eligibility for in-state (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

Graduate Assistantships (GA)

Graduate Assistants are salaried student employees who hold a position that furthers the professional and/or academic development of the graduate student. The duties performed are professional in nature and under the direct supervision of faculty, academic professionals, or administrators. Responsibilities may include, but are not limited to, administrative and professional internships. The Dean of Graduate Studies must approve GA appointments. [Note: Graduate Assistant positions are a distinct category of graduate student support. This category does not include Graduate Research Assistants, Graduate Teaching Assistants, or student-hourly positions held by graduate students.] A limited number of Graduate Assistantships (GA) are available. Graduate Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

GA Eligibility

The following eligibility requirements govern all Graduate Assistant (GA) appointments at the Medical Center campus:

1. During the semester of appointment, the GA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus.
2. During the semester of appointment, the GA is enrolled in no fewer than 6 credit hours per fall and spring semester. See “Enrollment Exceptions” in section following this list.
3. During the semester of appointment, the GA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GA appointment.]
4. A student completing their graduate degree may not continue in a GA appointment after the graduation date.

GA Enrollment Exception

A Ph.D. student appointed as a GA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

A master’s student appointed as a GA, who is in his or her final semester, may request approval to reduce enrollment below the GA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student's final semester after all.

GA Tuition Benefit

A graduate student who has a GRA appointment or a combination of a GRA and GTA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment. If the student is otherwise assessed nonresident tuition rates, the difference between nonresident and resident rates will be waived.

GA Health Insurance Benefit

A graduate student who has a GA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester, for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA/GA selects the GTA,GRA,GA plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.

GA Resignation or Termination

If a GA resigns or abandons the position or the appointment is terminated before working a minimum of 6 pay-periods during the semester, the student will lose eligibility for in-state (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

### Academic Calendar

The Academic Calendar (https://www.kumc.edu/academic-and-student-affairs/departments/registrars-office/academic-calendar.html) with the official university calendar dates is maintained by the Office of the Registrar and is available online. Many of the Medical Center campus programs have different starting and ending dates, so check with your academic program for more detailed information.

The Graduate Studies Calendar (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/about/calendar-and-events.html) indicates graduation deadlines related to master's and doctoral examination dates and the submission of theses and dissertations. The calendar is maintained by Graduate Studies and is available online.

### Academic Misconduct

Academic misconduct by a student shall include but not be limited to: cheating on examinations whether by a student on his/her own behalf or by giving to another student or receiving from another student unauthorized aid on examinations; giving or receiving of unauthorized aid in the preparation of notebooks, themes, reports, or other types of assignments, or in the preparation of master's theses and/or doctoral dissertations; or knowingly misrepresenting the source of any academic work, falsification of research results, plagiarizing of another's work, violation of regulations, ethical or professional codes for the treatment of humans and animals, or otherwise acting dishonestly.

### Guidelines for Alleged Misconduct

The following information shall serve as guidelines for dealing with situations where inappropriate deviations from these accepted standards of conduct by a graduate student are alleged to have occurred. All questions concerning these guidelines should be directed to the Dean of Graduate Studies or his/her designee.

#### I. Expectations for Conduct by a Graduate Student

One goal shared by the graduate programs at the University of Kansas Medical Center is to provide a seminal educational environment in which a student can master a special field of knowledge and strive to develop competence in independent scholarship and research to make original contributions to knowledge. In achieving that goal, there is an expectation by the University of Kansas Medical Center that the graduate faculty and their students will conduct themselves with high integrity and professional ethics. Such conduct by a graduate student must include adherence to the written and observed or taught guidelines for ethical standards of the profession for which the student is seeking to enter. A graduate student is responsible for informing himself/herself about these requirements and expectations of conduct as well as seeking answers to his/her own questions about what constitutes misconduct. Potential sources for this information include the:

A. Director of the Graduate Program and the faculty members of the department in which the graduate student has entered;

B. Student Handbook or a similar document prepared by the student's academic program, department, and/or school;

C. the University of Kansas Medical Center “Behavioral Standards in Patient Care.”

#### II. Decisions by a Faculty Member Relative to Academic Misconduct

A. **Not to Make a Recommendation for an Investigative Hearing:** A faculty member (acting as an instructor or assistant in a course, or a graduate student's advisor or mentor for his/her research and/or academic program, etc.) may decide not to recommend an investigative hearing, as outlined in these guidelines, for what he/she believes is academic misconduct by a student. The faculty member thus may treat as unsatisfactory any student work which he/she believes is a product of academic misconduct and impose a sanction(s) appropriate to the traditionally accepted realm of authority or jurisdiction of the faculty member. Any action
by the faculty member shall be with due written notice to the student.

**B. Make a Recommendation for an Investigative Hearing:**
The Faculty Member may decide to recommend to his/her Chairperson:

1. that an investigative hearing be held for the alleged occurrence of academic misconduct, and/or
2. imposing a sanction that is outside of the traditionally accepted realm of authority or jurisdiction of the Faculty Member. Hence, the Faculty Member initiates the procedures in Section III.

**III. Procedural Information for and Investigative Hearing Process**

**A. Definitions of Terms Hereafter Applied in these Guidelines**

1. "The Faculty Member" is the faculty member initiating an allegation of academic misconduct by a student.
2. "The Student" is the graduate student identified by the Faculty Member as the subject of the alleged act(s) of academic misconduct.
3. The "Involved Department" is the department, center, or functional unit in which the act(s) of academic misconduct allegedly occurred by the student.
4. The "Chairperson" is the Chairperson of the involved department in which the act(s) of academic misconduct allegedly occurred by the student and is the next higher administrative officer to whom the Faculty Member sends the initial report about an allegation of academic misconduct.
   a. "Dean of the School of Nursing" replaces the designation of "Chairperson" hereafter throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student as the appropriate administrative officer to whom faculty members in the School of Nursing shall forward any report or recommendation, if the alleged act occurred in this School.
   b. **Possible Conflicts of Interest:**
      i. If the Faculty Member perceives that there may be a conflict of interest involved in this issue between the Student and the Chairperson, or if the Chairperson is the Faculty Member initiating the allegation of misconduct, then the Faculty Member's inquiry report of the alleged incident(s) shall be forwarded to the Dean of the Faculty Member's or Chairperson's, respectively, School or the next higher administrative officer, as appropriate, who thereafter will assume the responsibilities of "the Chairperson" identified throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student.
      ii. For Other Situations when questions arise about conflict of interest, the questions shall be directed to the Dean of Graduate Studies.

5. **The Official Record of the Hearing Process:** The Dean of Graduate Studies shall initiate and maintain in the Office of Graduate Studies an Official Record (i.e., file) of the entire hearing process. All subsequent original written communications, documents, audio tape recordings, and recommendations that relate to the alleged misconduct and the hearing shall be sent on a timely basis by the Chairperson and/or the Hearing Officer to the Dean of Graduate Studies for inclusion in the official record. If the final conclusion of the hearing process is that academic misconduct has not occurred, then only the Dean's official record of the entire hearing process shall be saved as the permanent record; all other faculty, Departmental, and School copies of a "record/ file" for the hearing process must be destroyed.

6. **The Time Periods for the Hearing Process:** Throughout these guidelines, MAXIMUM LIMITS are specified for the length of time allowed for certain stages of the overall hearing process to take place. Unless specified otherwise, all lengths of time shall be in terms of the traditionally considered "working days" of any given week (recognized holidays that occur on otherwise traditional working days are not to be counted in these time frames). Any request for an extension of a time limit shall be made expeditiously, and before the expiration of the limit, to either the Chairperson or the Hearing Officer or the Dean of Graduate Studies, as appropriate, (or, in their absence, their designates), who shall decide and notify within three (3) days if there is good cause for the extension, and if so, for what period of time. Notification shall be to all involved parties of the hearing process and may be done first by telephone if deemed appropriate, and then shall be followed by written notification.

**B. Inquiry Report by the Faculty Member is Sent to the Chairperson:** Following the decision by the Faculty Member in Section III. B., above, and with due notice to the Student, the Faculty Member shall submit a detailed written report about the allegation (hereafter called the Inquiry Report) to the Chairperson. The Inquiry Report shall be submitted within twenty (20) days of the discovery of the alleged occurrence of misconduct. The Chairperson shall, within fifteen (15) days of receiving the Inquiry Report, review the report and attempt to resolve the allegation through consultation and mediation with the involved persons. If the Chairperson determines that the allegation should be resolved through the investigative hearing process, then the Chairperson shall continue the procedure outlined hereafter in these guidelines. Written notice shall be sent to the Student and to the Faculty Member (including a request for the Faculty Member to respond, within ten (10) days of receipt of the notice, with his/her selection of a faculty member to serve on the Hearing Panel).

C. **Notification of the Dean of Graduate Studies:** The Chairperson shall send a written notification to the Dean
of Graduate Studies that an investigative hearing process for alleged academic misconduct by the Student is going to be initiated. The Chairperson's notification shall include copies of the Faculty Member's Inquiry Report of the alleged misconduct and all written communications up to this time with the Student.

D. Notification About the Allegation to the Student:
A written notification of the specific allegation shall be sent (certified or registered letter with return receipt requested indicating the date of receipt) to the Student by the Chairperson within fifteen (15) days after the time the Chairperson receives the Faculty Member's Inquiry Report. A copy of this notification shall be sent to the Dean of Graduate Studies. The notice shall include:

1. a statement of the specific allegation(s) with sufficient explanatory information to enable the Student to understand the nature and extent of the allegation(s);
2. an invitation for the student to provide, to the Chairperson, within ten (10) days after receiving the notification letter: a. a written response to the allegation(s); and b. the name of a faculty member whom the Student selects to serve on the Hearing Panel, and a statement indicating that this faculty member told the Student that he/she agreed to serve;
3. a statement indicating that the Student has the right to continue attending class as scheduled until such time as the Dean of Graduate Studies has reached his/her final decision UNLESS there is a question of unsafe and/or disruptive behavior and/or offense against other persons (including patients of or visitors to) and/or property of the University of Kansas;
4. a copy of these “Guidelines for Dealing With Alleged Academic Misconduct by a Graduate Student,” so that the student is aware of the procedural process and possible actions.

E. Selection of Members for the Hearing Panel: The Hearing Panel shall be composed of four (4) members of the graduate faculty (voting members of the Panel), excluding the Faculty Member initiating the allegation of misconduct and excluding the chairperson of the department in which the Student named in the allegation is a graduate student member, and one (1) graduate student (voting member of the Panel), excluding the Student who is the subject of the allegation. One of the graduate faculty members of the Panel will be designated by the Chairperson as the "Hearing Officer" in charge of the Hearing Panel. Any member of the Hearing Panel who perceives that there is any irregularity in the proceedings of the Hearing process has the responsibility of PROMPTLY reporting this to the Dean of Graduate Studies. Selection of the Hearing Panel shall include at least one but no more than two faculty members from the Involved Department in the allegation and shall be done as follows:

1. the graduate student member:
   -shall be selected by the officers of the Graduate Student Council at an on-need basis;
   -shall not be a graduate student member of the same department as the Student named in the allegation; and
   -must be currently classified as a regular graduate student in the category of degree seeking students and in good academic standing (not on probation);
2. one faculty member from inside or outside the Involved department may be selected by the student named in the allegation;
3. one faculty member from inside or outside the Involved department may be selected by the Faculty Member initiating the allegation; and
4. two faculty members selected by the Chairperson. The Chairperson's selections shall assure that the composition of the Panel includes at least one but no more than two members from the Involved Department in the event that the student and/or the Faculty Member do not select such a member. Additionally, if the Student and/or the Faculty Member decline(s) to select a Panel member or fail to respond to the Chairperson within ten (10) days of the request, then the Chairperson will also select that member or members, likewise with due consideration for the basic composition of the Panel as defined above.

F. Scheduling the Hearing: The Hearing Officer shall, within five (5) days of the selection of members of the Hearing Panel, (1) schedule the day, time, and place for the Hearing to occur (which shall be sometime between twenty [20] and thirty [30] days after the selection of the Hearing Panel), and (2) provide written notice of this schedule to the Faculty Member, the Student, the Chairperson, and the Dean of Graduate Studies. Both the Student and the Faculty Member shall be informed with this scheduling notification that during the Hearing each:

1. will be given the opportunity to present his/her own viewpoint of the situation(s) that directly led to the allegation(s); and/or
2. may have witnesses speak or have witnesses' affidavits read on his/her behalf.

G. Documents, Representatives, and Witnesses for the Hearing: All information cited below shall be promptly sent to (see time deadlines indicated in this Section) or collected by the Hearing Officer, who shall promptly distribute copies of the information to the Student, the Faculty Member, and the rest of the Hearing Panel members.

1. The Faculty Member's Inquiry Report sent to The Chairperson;
2. The Chairperson's Notification of Allegation letter sent to the Student;
3. The Hearing Officer's letter to the Student and the Faculty Member stating the day, time, and place for the hearing;
4. The Student's written Response to the allegation(s), if such was sent to the Chairperson;
5. Any documents provided by the Student and/or the Faculty Member for presentation as evidence to the Hearing Panel (sent at least by five (5) days before the Hearing);

6. Names of Representatives:
   Each party to the Hearing should be present for the Hearing unless the Chairperson agrees that another person may appear as a substitute representative. A Hearing may be held even if the Student and/or the Faculty Member fail to appear for the Hearing. Neither the Student nor the Faculty Member is compelled to appear or testify at the Hearing, and no inference may be drawn by the Hearing Panel against the Student or the Faculty Member due to his/her failure or refusal to testify or appear.

   The use of legal counsel is discouraged;

7. Names of Witnesses: The Student and the Faculty Member shall provide a list of intended witnesses, if any, to the Hearing Officer at least ten (10) days before the Hearing is to occur. The Hearing Officer shall provide these names, reciprocally, to the Faculty Member and the Student at least five (5) days before the Hearing; and

8. All materials (including the audio recording tapes identified in Section III. H. 3., below) concerning the alleged violation of misconduct should be treated as CONFIDENTIAL documents. The Hearing Panel members will return all materials received for the Hearing to the Hearing Officer at the end of the scheduled Hearing. The Hearing Officer will forward ALL ORIGINAL AND PHOTOCOPIED AND AUDIO TAPE RECORDED MATERIALS to the Dean of Graduate Studies.

H. Conducting the Hearing: The Hearing Officer of the Hearing Panel may establish procedures in addition to those listed, however, the basic requirements of the Hearing procedure as listed here may not be altered by the Hearing Officer. The Hearing shall be conducted in a closed session and witnesses shall be excluded from the Hearing except when actually testifying.

1. The Hearing Officer shall have the authority to keep order, rule on questions of relevance and evidence, and shall possess other powers normal and necessary for a fair and orderly Hearing. Rules of Evidence that govern courtroom proceedings shall not apply.

2. There shall be only a single audio tape recording made of the proceedings to provide an accurate record of the Hearing for possible review by the Hearing Panel (Section IV. I. 1) and/or Dean of Graduate Studies.

3. The Hearing Officer shall introduce the Hearing Panel members, the Faculty Member, the Student, and their representatives, if any.

4. The Hearing Officer shall explain the Hearing Procedures as outlined herein.

5. The Hearing Officer shall announce that the Faculty Member initiating the allegation has the responsibility to persuade the Hearing Panel by a preponderance of evidence that academic misconduct has occurred.

6. The Hearing Officer shall orally review the allegation(s) of misconduct which led to the Hearing, and the possible sanction(s).

7. The Hearing Officer shall allow the Faculty Member to state the allegation and explain the incident. The Faculty Member may choose to remain silent.

8. The Hearing Officer shall allow the Student to reply and explain the incident. The Student, if present, may choose to remain silent.

9. Hearing Panel members may direct questions to the Faculty Member (if present), the Student (if present), and any witnesses and/or representatives.

10. Through the procedural process of the Hearing, the Student and the Faculty Member may question one another and any witnesses appearing. One witness at a time may be called by either the Faculty Member or the Student. No witness will be permitted to participate in the Hearing if his/her name was not previously given to the Hearing Officer in accord with Section, III. G. 7., above. IN EXCEPTIONAL CIRCUMSTANCES, this provision may be modified by decision of the Hearing Officer, and if it is, the Student and the Faculty Member will be given sufficient opportunity to collect information to respond to whatever the witness presents.

11. The Hearing Officer shall state that the Hearing Panel will make a recommendation to the Dean of Graduate Studies within seven (7) days after the Hearing.

I. Findings of the Hearing Panel and Recommendation Carried Forward:

1. At the conclusion of the Hearing, the Panel members, alone and in closed session, shall deliberate and decide by a majority vote (anonymous written ballot counted by the Hearing Officer and verified by the graduate student member) if "academic misconduct," as alleged by the Faculty Member and only based upon all evidence presented to and heard by the Hearing Panel, "has occurred" or "has not occurred."

2. If the Panel's decision is that "academic misconduct has occurred," then the Panel members shall deliberate and determine (by majority vote) their recommendation(s) for specific disciplinary action and/or sanction(s), if any.

3. The Hearing Officer shall compile comments, rationale, findings, voting results, and recommendations in writing and forward them within seven (7) days after the Hearing to the Dean of Graduate Studies. The Hearing Panel recommendation(s) shall not be binding upon the Dean of Graduate Studies.
4. The Dean of Graduate Studies shall consider the recommendation(s) and report of the Hearing Officer and any relevant information and take action.

J. Notifications Consequent to the Hearing Process:

1. The Dean of Graduate Studies shall, within seven (7) days of receipt of the summary final report of the Hearing Officer, send written notification of his/her action(s) to the Faculty Member, the Student (notification by certified or registered mail with return receipt requesting delivery date), and the Hearing Officer.

2. If this final action of the Hearing process concludes that academic misconduct by the Student has NOT occurred, then the Dean of Graduate Studies also shall, in writing, instruct the chairperson(s) of the involved department(s) that: a. all materials appended to any and all departmental files, including a possible so-called permanent file on the Student, that would not have been in these files if an allegation of misconduct had not been made shall be removed b. conscientious efforts are to be made by the involved department(s) not to subject the student to unwarranted bias or action by the department(s) consequent to the hearing process.

IV. Sanctions that may be Imposed for Academic Misconduct:

A. Censure: A written reprimand for actions which constitute academic misconduct. Censure may include a written warning that subsequent actions of academic misconduct may be the cause for a more severe disciplinary sanction.

B. Unsatisfactory Work: Treating as unsatisfactory any work which is a product of academic misconduct. This may include reduction of a pending or existing grade (including the awarding of a Failing grade) for the work and/or a grade in the course.

C. Suspension: Exclusion from classes and other specified privileges or activities for a definite period not in excess of two years.

D. Expulsion: Termination of graduate student status for an indefinite period. The conditions of readmission, if any, shall be stated in the order of expulsion. Approved by Graduate Studies Committee. University of Kansas Medical Center, April 4, 1991.

Academic Probation

The cumulative grade point average is computed at the end of each semester with the inclusion of grades earned at KU for all courses taken for graduate credit. If the cumulative graduate grade point average falls below 3.0 (B average), the student is placed on probation by Graduate Studies and the student and program are both notified in writing by the Dean of Graduate Studies.

The grades of P, S, U, CR, NC, and I for which no numerical equivalents are defined, are excluded from the cumulative grade point average computation. If the student’s overall graduate average has been raised to a 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to good academic standing. If not, the student may not be permitted to enroll and will be dismissed unless the Dean of Graduate Studies acts favorably on a program recommendation for the student to continue study.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate program that will accept the student. The petition must be approved by the Dean of Graduate Studies on the appropriate campus (Medical Center or Lawrence).

Academic Standing

Evaluation of graduate student academic standing includes, but is not limited to, consideration of performance in and progress through a graduate program according to program expectations. Graduate students must maintain an expected level of performance throughout their program. The evaluation of satisfactory performance is based, but not limited to, the following factors:

1. A minimum cumulative grade-point average (GPA) of 3.0 or higher.
2. Academic and scholarly integrity;
3. Compliance with academic policies at the university, school, and departmental level; and
4. Satisfactory progress toward completion of the degree or certificate as determined by the program. Graduate programs are responsible for evaluating students at least annually to assess progress toward a degree. Progress may be determined by factors including:

   a. Completion of coursework, milestones, exams, or other program components on a specified timeframe;
   b. Official time to degree; and
   c. Total time in program.

Graduate programs may have additional measures of progress. Failure to maintain an expected level of performance and progress will result in a student not being in good academic standing. Lack of good academic standing will result in the graduate program placing the student on academic probation or recommending to the Dean of Graduate Studies dismissal from the program.

It is expected that graduate programs will evaluate students pursuing more than one degree program based on their progress in each program individually.

Childbirth Accommodation

This policy is intended to describe the process for providing students reasonable accommodations for pregnancy-related limitations or the impending birth or adoption of a child, so the student may continue to make progress toward the completion of their degree.

University of Kansas Medical Center's Title IX Policy prohibits discrimination on the basis of sex, including on the basis of pregnancy, against any individual participating in the University’s education programs or activities. KU Medical Center will neither require nor prohibit leaves of absence for reasons of pregnancy or childbirth-related concerns.

The University will make good-faith efforts to reasonably accommodate students who request accommodations due to pregnancy, childbirth, adoption or the foster care of a child. The University will grant students up to a six-week accommodation period, or longer if medically necessary, for pregnancy-related illnesses or complications, the birth of a child, the adoption of a child, or the placement of a child for adoption or foster care. The accommodation period can be granted as leave, a revised academic,
research, or clinical schedule, or a combination of leave and a revised schedule.

This policy applies to all enrolled students regardless of gender or marital status. Other situations related to family life continue to be covered by general leave of absence. Depending on their academic program, timing of birth/adoption, and level of support they will receive in caring for a newborn, a student may find it more advantageous both academically and personally to take a leave of absence rather than utilizing the childbirth accommodation policy.

DEFINITIONS

Students: any person enrolled or otherwise participating, including students from other institutions, in any graduate or undergraduate education at KU Medical Center.

Title IX: Title IX of the Education Amendments of 1972 is a federal statute that prohibits sex discrimination or harassment, including harassment or discrimination based on pregnancy, in any academic program or activity.

APPLYING FOR THE ACCOMMODATION PERIOD

Students requesting a reasonable accommodation under this policy can seek to remain enrolled and continue meeting their academic requirements through a revised schedule or they can request a leave of absence. An accommodation to remain enrolled may include a rescheduling of course assignments, examinations, and other academic requirements and/or an extension of academic milestones, if necessary

Academic Accommodations

To request an accommodation under this policy, a student should contact Academic Accommodation Services, at (913) 945-7035, to initiate the process as soon as possible, but no later than four months prior to the anticipated delivery date, or as soon as a pregnancy-related illness or complication arises. If a child is being welcomed through adoption or foster care, please contact Academic Accommodation Services as soon as possible depending on the situation. The Academic Accommodations Coordinator will review the student's request and, along with the student and other necessary parties (i.e. advisors, instructors), determine if the requested accommodation, or a sufficient alternative, can be provided. These discussions should also detail the type of academic engagement and progress expected from the student while on leave or on a revised academic schedule. Upon approval of a student's request, a plan will be submitted to the Associate Dean for Student Affairs of the student's School. The plan will outline the specific accommodations being provided for a student, as well as any expectations from the academic program.

If a program administrator believes that, due to the student's particular circumstances and their academic requirements, a leave of absence would be more appropriate, the program administrator must consult with the University's Title IX Coordinator before denying an accommodation request. Any denial of an accommodation request must be made to the student in writing with adequate justification and must provide a plan for the student to be able to return to the same academic status following a leave of absence. Students may appeal decisions regarding accommodations. The appeal of the decision must be made in writing and submitted to the Dean of the student's School. The Dean of the student's School will have final decision-making authority.

All academic programs and departments are expected to work with their students and make a good-faith effort to provide reasonable accommodations so that their students can remain in good academic standing and continue progress towards their degree while also balancing the demands of caring for a new child. It is also encouraged that advisors, academic staff, and departmental leaders work with sensitivity and imagination to provide more than these minimum standards put forth by KU Medical Center when circumstances allow for further accommodations. Students should be proactive in speaking with advisors, instructors, and academic deans when they are planning a family or expecting a child to devise the best personal and academic plan.

Student Status

Students will retain their full time student status if approved for an academic accommodation period. Additionally, for students who decide to take a leave of absence, they will have the option to pay student fees if they wish to have continued access to campus resources.

Financial Support (applicable to those funded by GTAs, GRAs, GAS, or Fellowships)

For students who currently receive stipends through a graduate teaching assistantship (GTA), graduate research assistantship (GRA), or graduate assistantship (GA), they will remain fully funded for a six-week period. Students who do not receive stipends at the time of application are not eligible for financial support. Any continuation of support past six weeks will be determined on an individual basis. Students will remain funded by their current stipend source for the first two weeks and then will be funded by a Childbirth Accommodation Fund through the Office of Graduate Studies for up to four additional weeks. If a student is on a grant or fellowship that allows them to receive stipends during maternity/paternity leaves, then they will continue to be paid by their current funding source for the entire six-week period. If funding is not allowed by the outside grant or fellowship, then the student will receive six weeks of support from the Childbirth Accommodation Fund.

If a student believes they are experiencing discrimination due to pregnancy or related conditions, the student should contact KUMC's Office of Equal Opportunity and Academic Compliance, which can review potential violations of the University's Title IX Policy. If a student believes they are being disparately treated due to status as a parent, the EOAC Office can also review claims of parental status discrimination.

The official policy resides in KUMC PolicyStat (https://kumc.policystat.com/policy/7283651/latest/) which is an internal KUMC only website.

Course Numbering System

Courses that may give graduate credit are numbered according to the following scheme:

- Courses numbered 500-699 are designed primarily for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
Courses that contain a mixture of undergraduate and graduate students should set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Studies Office (Medical Center or Lawrence) and is taught by a person holding a current appointment to the Graduate Faculty. See the graduate credit section below for more information.

Co-enrollment for Seniors in Graduate Level Courses
Seniors at KU who will complete the requirements for a baccalaureate degree in a given semester, and who have very strong academic records (grade-point average higher than 3.0 on a 4.0 scale), may be allowed to enroll in graduate course work during their final undergraduate semester. Seniors requesting the privilege of co-enrollment must make formal application through the online graduate application process and be admitted as degree-seeking before the student may proceed with enrollment in a graduate course.

Procedure
To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least one class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If after the co-enrollment semester the baccalaureate degree is not completed, the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been conferred.

Students who are eligible to co-enroll receive an email from the Registrar’s Office before enrollment with instructions on how to enroll in more than one career (ex. LAW, GRDL-Graduate, GRDK-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during each appointment time. When enrollment is complete for each career, students must check the grading option for each course to ensure the class will be counted correctly.

Discontinuance
A student may voluntarily resign from their program of study by submitting an online “Official Severance Form” located on the Registrar’s website (https://www.kumc.edu/academic-and-student-affairs/departments/registrars-office.html).

Dismissal
Graduate programs are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If the graduate program finds that a student is not meeting performance standards and/or not making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be dismissed from the program. Dismissal is requested by the graduate program through submission of the dismissal form in the Progress to Degree system.

A dismissal recommendation may be based, but not limited to, the following:

- Continuation on academic probation (cumulative grade-point average continues below 3.0);
- Failure to maintain good academic standing as defined under Academic Standing heading in this same section of the catalog;
- Running out of allowable time to degree as defined in degree requirements in the Degree Programs (https://catalog.ku.edu/graduate-studies/kumc/#programtext) section of this catalog;
- Neither enrolling nor receiving approval for a leave of absence for two consecutive semesters;
- Committing Academic Misconduct as defined in this same section of the catalog;

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate program that will accept the student. The petition must be approved by the Dean of Graduate Studies.

Embargo of Theses and Dissertations
When an exception to the immediate release of a thesis or dissertation is necessary, an embargo provides a temporary, delayed public release of the work. Embargo periods of six months, one year, or two years are available. While embargoes are not intended to be permanent, renewals of the original embargo period are permissible. Considerations that may be deemed reasonable for granting permission for an embargo include, but are not limited to:

- Patentable rights or other issues are contained in the work the disclosure of which may be detrimental to the rights or interests of the author.
- There is a need to prevent disclosure of government information about persons, institutions, technologies, etc. that is contained in the work.
- An academic or commercial press has expressed interest in acquiring the rights to publish the work as a book that may require an embargo.
- The work contains content that has already been submitted to a peer-reviewed journal that may require an embargo.
- Approval for delay has been granted by the KU Restricted Research Committee.

Requests for an extension of the embargo should be directed to the Office of Graduate Studies on the appropriate campus (Medical Center or Lawrence) and must be received at least one month prior to the expiration of the current embargo to ensure sufficient time to process the request. A request for an embargo submitted to the University of Kansas affects only the publication of the thesis or dissertation in KU ScholarWorks. It is the graduate student’s responsibility to additionally request an extension through ProQuest for the copy published by them.

While there is no limit to the number of times a student can request an embargo extension, embargoes that have been allowed to expire without a request for an extension will result in the thesis or dissertation being made publicly available.
The embargo period will be calculated beginning at the end of the semester in which the student graduates with the specific dates being: December 31st, May 31st, and August 31st.

**Steps necessary for embargoing a thesis or dissertation:**

Theses and dissertations at the University of Kansas are made available in two electronic databases: KU ScholarWorks and ProQuest Dissertations and Theses. Items in KU ScholarWorks are publicly accessible on the world-wide web and can be indexed by search engines.

Students who do not wish to have their theses or dissertation made public in these two venues must receive permission from their committee chair, department graduate director or department chair to embargo their theses or dissertations. The student must document this permission with the Electronic Thesis and Dissertation (ETD) Release Form. Once the student has obtained the requisite signatures on this form, the student must take two additional steps before graduation to ensure that their work is properly embargoed.

- First, the student must submit the Electronic Thesis and Dissertation (ETD) Release Form to the Office of Graduate Studies on the appropriate campus (Medical Center or Lawrence). If an embargo has been approved, this form will ensure that the work is temporarily restricted in KU ScholarWorks.
- Second, during the electronic submission process to ProQuest, the student must select the embargo option under the publishing restrictions section. If an embargo has been approved, this step will ensure that public view of the work is temporarily restricted in the ProQuest Dissertations and Theses database.

**Note:** If a student does not receive permission for an embargo and/or does not submit the required documentation requesting such an embargo to the Office of Graduate Studies prior to graduation, the work will be made publicly available through KU ScholarWorks, and search engines will find and index the work. For this reason, once a work is released publicly, it is impossible to deploy an embargo in its entirety, because copies of a released work are likely to be stored on the web even if the KU ScholarWorks and ProQuest copies are retracted. Therefore it is crucial for students who desire the embargo option to request it prior to graduation and to request extensions, if needed, prior to the work being exposed to public search engines.

Dissertation defenses are open to the public. In the event that an embargo is deemed necessary for a dissertation, the committee should consider holding an additional question period for the defense that is closed to the public. Any sensitive data may be discussed in the closed session.

**Enrollment Definitions (Full-Time, 3/4-Time, Half-Time, and Part-Time)**

**Full-time enrollment for fall and spring semester**

- Enrollment in 9 credit hours;
- Enrollment in 6 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 6 credit hours for graduate students using the Montgomery GI Bill® – Active Duty (MGIB-AD) and Post-9/11 GI Bill® – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

**Full-time enrollment for summer semesters**

- Enrollment in 6 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill® – Active Duty (MGIB-AD) and Post-9/11 GI Bill® – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

**3/4-time Enrollment for Fall and Spring Semesters**

- Enrollment in 7 credit hours;
- Enrollment in 4.5 credit hours plus a GRA appointment, regardless of percentage of appointment.

**3/4-time Enrollment for Summer Semesters**

- Enrollment in 4.5 credit hours;
- Enrollment in 2 credit hours plus a GRA appointment, regardless of percentage of appointment.

**Half-time enrollment for fall and spring semesters**

- Enrollment in 5 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill® – Active Duty (MGIB-AD) and Post-9/11 GI Bill® – Active Duty.

**Half-time enrollment for summer semesters**

- Enrollment in 3 credit hours;
- Enrollment in 1 credit hour plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 1 credit hour for graduate students using the Montgomery GI Bill® – Active Duty (MGIB-AD) and Post-9/11 GI Bill® – Active Duty.

**Part-time enrollment**

- Students enrolled in fewer hours than defined by half-time enrollment are considered part-time.

*A doctoral candidate is defined as a doctoral student who has successfully passed the Comprehensive Oral Examination for the Ph.D. and is enrolled in post-comprehensive hours. See the Post-Comprehensive Enrollment policy in the degree requirements section of this catalog.

All students should check with their graduate degree programs and Office of Graduate Studies’ policies to determine if additional enrollment requirements or summer enrollment requirements exist.
Note: A few internship programs have been approved by Graduate Studies to count as full-time enrollment. Students enrolled in these internship programs will be counted as full-time students. Students should contact their programs to verify that an internship program qualifies.

International Student Enrollment
International students in F-1 and J-1 status must also comply with Federal immigration requirements of pursuing a full course of study each semester to maintain their legal status. All international students must conform to residence requirements, even though immigration regulatory requirements may be lower.

Enrollment Policy
All graduate students are expected either to be enrolled or to be on approved Leave of Absence at all times while completing the credit hours required for the fulfillment of their degrees unless they have been dismissed from the program or discontinued (voluntarily resigned) from the program.

Graduate students are not normally permitted to enroll for more than 16 hours a semester or more than 8 hours in summer session. Under some circumstances, undergraduate students may enroll in graduate courses. See these policies in this section of the catalog:

- Undergraduate Student Enrollment in Graduate Level Course for Undergraduate Credit
- Co-enrollment for Seniors in Graduate Level Courses

Grading

General Guidelines
Grading scales are assigned on a course-by-course basis. The grading scale selected for a course must be appropriate to the course type and to the students and programs that the course serves. It is expected that designated thesis, dissertation, capstone courses, and their approved equivalent courses will be graded using the A, B, C, D, F, P scale. The I grade is not appropriate for enrollment in thesis, dissertation, capstone projects, or research courses and is not allowed.

Once a grading scale for a particular course has been recommended by the department/program and approved by Graduate Studies, it must be applied to the entire student enrollment in the course or section. This applies to all graduate-level courses.

The individual schools have the option of using or not using the +/-, according to the policy adopted by the particular school. The I grade indicates course work that has been of passing quality but which is partially unfinished for good reason. Use of the I grade is optional in some grading scales but is not permitted by other scales (see below). Generally, the I grade is an appropriate option for enrollments other than thesis, dissertation, research, capstone, or the first semester of a two-semester sequence course.

As stated in the University Senate Rules and Regulations, Article II, Section 2.2.3.2 (http://policy.ku.edu/governance/USRR/#art2sect2): "A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student's record."

Grading Scale for Regular Courses (two options)

Grading Scale: A, B, C, D, F
The basic system is an A, B, C, D, F scale, where:

- A designates above-average graduate work;
- B designates average graduate work;
- C designates passing but not average graduate work;
- C-, D and F designate failing graduate work.

Grading Scale: A, B, C, D, F, I
The basic system is an A, B, C, D, F, I scale, where:

- A designates above-average graduate work;
- B designates average graduate work;
- C designates passing but not average graduate work;
- C-, D and F designate failing graduate work;
- I designates incomplete work per definition earlier in this section.

Grading Scale for Research Courses including thesis and dissertation

Grading Scale: A, B, C, D, F, P
Departments/programs use this scale to grade their thesis, dissertation, capstone project, and approved thesis- or dissertation-equivalent courses. Other research courses are also graded using the A, B, C, D, F, P scale. The I grade is not appropriate for enrollment in thesis, dissertation, capstone project, or research courses and is not allowed by this grading scale.

In this grading scale the letter P indicates participation in coursework where evidence of performance may not be
available. This grading scale is appropriate in two types of situations:

- In designated thesis, dissertation, approved thesis-or dissertation-equivalent, capstone, or research courses;
- In the first semester of two-semester sequence courses.

In any semester, an instructor has the option to assign a letter grade of A, B, C, D, or F, instead of P, when evidence about performance is available. Upon completion of thesis, dissertation, or research hours leading to a master’s or doctoral degree, the P remains on the final transcript in all semesters for which it was recorded.

For departments/programs that use this scale, a letter grade (A, B, C, D, or F) must be assigned for a student’s final semester of enrollment in thesis, dissertation, capstone, or research course work. The letter grade assigned characterizes the quality of the final product.

**Result Choices for Milestone Examinations**

**Honors, Satisfactory, Unsatisfactory**

Performance on milestone examinations may be graded Honors, Satisfactory, or Unsatisfactory.

These outcome grades are appropriate to the following milestone examinations:

- the general examination for the master’s degree;
- the project defense for the master’s degree;
- the thesis defense for the master’s degree;
- the comprehensive oral examination for the Doctor of Nursing Practice (D.N.P.);
- the comprehensive oral examination for the Ph.D.; and
- the final examination for the Ph.D.

Use of the Honors designation is at the department’s discretion.

**Other Grading Scales**

**Grading Scale: S, U, I**

The grades of S and U designate satisfactory (S) and unsatisfactory (U) performance. This grading scale is appropriate to three types of course: continuing education courses; workshop courses; and institute courses.

No more than 6 hours total of graduate course work graded S may count toward a degree. The S, U grading scale may be adopted at the department/program’s discretion per the incomplete grade definition earlier in this section.

In courses numbered 800 or above, and for which specific authorization has been given, an instructor may report a grade of S for students who have satisfactorily attended the course but for whom it has not been possible to evaluate the quality of performance.

The S and U grades are not used in computing the grade-point average.

**Grading Scale: CR, NC**

The Credit (CR) or No Credit (NC) option is authorized for graduate students: a grade of CR will reflect work earning a C or better and the grade of NC will reflect work earning a C- or below. However, as outlined in USRR 2.2.8.6 (http://policy.ku.edu/governance/USRR/#art2sect2), no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement. Please refer to the policy governing Research Skills and Responsible Scholarship (p. 2457) for more information.

**Graduate Credit**

**Criteria for Offering Graduate Credit**

The following three conditions must be met for a student to receive graduate credit for work satisfactorily completed at KU:

1. The student must have gained graduate admission.
2. The course must be numbered 500 level or above and have been approved for graduate credit by the appropriate school and the Graduate Council on the Medical Center campus.
3. The instructor must hold a current appointment to the Graduate Faculty.

**Minimum Grade for Graduate Credit**

A minimum grade of C is required for a course completed at KU to count for graduate credit. Grades of C- and below do not count toward fulfilling requirements and the course cannot be counted toward a degree or certificate.

**Credit by Examination**

Credit by examination is not accepted toward graduate degree or certificate programs.

**Graduate Course Work Expiration Dates**

Courses completed at KU, or transfer credits from another university, cannot be used to fulfill graduate degree requirements if these courses were completed more than ten (10) years prior to the final defense for doctoral candidates or graduation for master’s students. A request to make an exception to this policy must be approved by the program and the Dean of Graduate Studies.

**Transfer Credit**

Up to six hours of graduate credit taken at a regionally accredited graduate school may be transferred and applied to a master’s degree at KU if the credits were taken before the final semester of enrollment at KU and have the approval of the program. Eight hours may be approved for transfer if the student holds a baccalaureate degree from KU. Graduate credit will not transfer for courses that were previously counted toward the requirements for an undergraduate or graduate degree, whether completed at KU or another institution.
Graduate Student Oral Exams Attendance

Attendance
All voting members of the committee should attend graduate student oral examinations. For M.S. students this includes the final general exam, project defense, capstone, or thesis defense. For Ph.D. students, this includes the comprehensive oral examination, and the final oral examination (dissertation defense).

A majority of committee members must be in attendance for an examination to commence; for doctoral oral examinations, this requirement is 3 of the 5 members, for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined, the chair (or co-chairs) of the committee, and the outside committee member (Ph.D. examinations) all attend the examination or defense. Attendance via mediated means (tele/videoconferencing) is acceptable at the discretion of the committee chair (or co-chairs). In cases where the student prefers an examination in which all committee members are physically present, the student's preference shall be considered.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee in attendance must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered canceled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) attend the examination.

Graduate Student Oral Exams Committee Composition

The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate's department/program of study.

Ph.D. Committees
Ph.D. doctoral committees are composed of at least five voting members all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2467) section of this catalog. The committee structure must adhere to the following requirements:

1. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status.
2. One member must meet the requirements for serving as an outside member: i.e., be a KU faculty member holding regular or dissertation graduate faculty status and is not a faculty member holding graduate status in the candidate’s department/program. The outside member represents Graduate Studies and is a voting member of the committee, has full rights to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination.

Master's Committees
Master’s committees are composed of at least three voting members all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2467) section of this catalog.

Grievance Policy and Procedures for Graduate Students
A graduate student who believes herself or himself unfairly or unlawfully treated in an academic matter may present a grievance to the academic department or appropriate program chairperson. Each academic unit has established grievance policies and procedures. Concerns regarding illegal discrimination or harassment should be reported to the Equal Opportunity Office. For academic misconduct issues, see the Academic Misconduct policy in this section of the catalog.

The grievance procedure may not be used as an appeal for a grade. Grades should be appealed at the department or program level. Committees established at the department, program or school level to hear grievances proceed in accordance with their own specific procedures and make recommendations to the appropriate administrative officers as provided in those procedures. Appeals from the decision of a department or program or school must be made to the Dean of Graduate Studies.

The appellate process is designed to ensure that due process has been afforded an individual in the initial hearing. The Dean of Graduate Studies will appoint the committee chair from the membership of the KUMC Graduate Council. Two other members will be selected by the chair from the Graduate Council and one other graduate faculty member selected by the student complainant and a second graduate faculty member selected by the accused. The selection of these faculty members shall be acceptable to both parties. A student member will be selected by the President of the Graduate Student Council. Care should be taken to ensure that none of the members has a conflict of interest in this case. This committee will examine all pertinent documents including student records and interview the parties directly involved in the complaint as well as other parties deemed necessary. Minutes of testimony will be
made available to both the complainant and accused parties after the hearing is completed. It is essential that all parties retain confidentiality of information gained through the hearing process. Both parties will be provided an opportunity to respond to the minutes in writing before the committee’s final recommendation is forwarded to the Dean of Graduate Studies who will make the final determination. The documents provided to the grievance committee will be retained in the Office of Graduate Studies for a period of three years, after which time they will be destroyed. There is no further appeal.

**Intellectual Property Policy**

All enrolled students are subject to the Board of Regents and KU Intellectual Property Policies. The ownership of student works submitted in fulfillment of academic requirements is retained by the creator(s). By enrolling, the student gives the institution a nonexclusive royalty-free license to mark on, modify, retain the work in the process of instruction, or otherwise handle the work, as set out in the institution’s Intellectual Property Policy or in the course syllabus. The institution does not have the right to use the work in any other manner without the written consent of the creator(s).

**Leave of Absence**

The Office of Graduate Studies may grant a leave of absence (LOA) from an academic program for up to one academic year, with the possibility of extension. The student must complete the official Leave of Absence Checklist. A leave of absence may be granted in extraordinary circumstances (e.g., cases of illness, emergency, financial hardship, military leave, pregnancy/childbirth), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. The LOA request must be submitted at the beginning of the semester. Evidence of progress toward degree will also be a determining factor in the decision to grant a leave. If the leave of absence is approved at the program level, the program forwards the student’s request along with the program’s recommendation to the Dean of Graduate Studies for approval. If approved by the Dean of Graduate Studies, the time on leave from the academic program will not be counted toward the maximum time granted to complete a degree (doctoral, 8 years; master’s, 7 years).

All steps to complete a leave request are outlined on the Leave of Absence Checklist. First, students discuss the leave with their mentor/advisor and/or their Program Director. If those administrators believe that the leave is the best path forward for the student, the student completes the official Leave of Absence Checklist. Second, students meet with individuals in the Registrar’s Office and Financial Aid to verify understanding of how the leave could impact their enrollment, access to campus resources, health insurance, and/or loans. Third, the student completes the section of the form asking for details about their leave and how they can be contacted. Fourth, the student returns the form to their Program Director for a second signature that acknowledges the student completed all steps. The form is then forwarded to the Dean of Graduate Studies for a final approval. After the Dean of Graduate Studies approves the Leave of Absence form, the form is forwarded to the Office of the Registrar to be recorded in the student’s academic record.

When a student is ready to return from an LOA, the student must complete the Request for Return from Leave of Absence Checklist. The form requires the student to complete information about when they will return as well as a signature from the Program Director. After the Program Director approves the Return LOA Checklist, the Program Director will send the form to the Office of Graduate Studies. The Office of Graduate Studies will review and respond with an approval via email. Then, the Office of Graduate Studies will send the form to the Office of the Registrar to reactivate the student in Enroll and Pay.

The Requests for Leave of Absence Checklist and for Return from Leave of Absence checklists are on the Graduate Studies Policies and Regulations page (https://www.kumc.edu/academic-and-student-affairs/departments/graduate-studies/policies-and-regulations.html) of their department website.

**Post-Comprehensive Enrollment for Doctoral Candidates**

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours of dissertation that both moves the student towards degree completion and reflect, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester and each summer session until all degree requirements have been met. The number of hours of each enrollment are determined by the candidate’s advisor and must reflect as accurately as possible the candidate’s demands on faculty time and university facilities.

**Posthumous Degrees**

In order to recognize the achievement of students who have died, the University of Kansas may grant undergraduate, graduate and professional degrees posthumously. This policy applies to deceased students who were in good academic standing at the time of death and enrolled for their final semester at the University of Kansas, as determined by the dean of the school. Requests for posthumous degrees must be initiated by the student’s academic department and approved by the dean of the school conferring the degree. Each case will be determined on its own merits.

The dean of the school posthumously conferring the degree should contact the Office of the University Registrar to confirm the correct information for the degree to be conferred, notify the Vice Provost for Academic Affairs, and coordinate with the Office of the Chancellor for notification to the family. Posthumous degrees are conferred during the semester in which the student was expected to graduate. The Chancellor informs the student’s family in writing of the posthumous award of the degree.

**Progress to Degree Policy**

The Progress to Degree system is used by Graduate Studies to track and monitor graduate student progress. The forms should be used to report items such as change in degree plan within the same department, transfer credit towards a master’s degree, dismissal from the program, master’s general exam, master’s thesis, capstone defense, project defense, or oral comprehensive, and final exam (dissertation defense) for PhD students. This system is used by designated faculty or staff to request Graduate Studies approval for the various functions indicated. The Registrar’s Office receives notification when forms approved and enters relevant information in the student record system.
Research Compliance

There are certain types of research or activities that may not be pursued unless specific prior approval and/or training has been obtained. Students should refer to KUMC Office of Compliance (https://www.kumc.edu/office-of-compliance.html) policies.

Student Responsibilities

All graduate students are responsible for informing themselves of requirements and policies of the Office of Graduate Studies. They are also expected to be familiar with the regulations and requirements of their departments and of their graduate programs. Program Graduate Directors and the Office of Graduate Studies staff are ready to answer questions and offer counsel. It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

Undergraduate Student Enrollment in Graduate Level Courses for Undergraduate Credit

Well-qualified undergraduate students may be permitted to enroll in 800- or 900-level courses for undergraduate credit with the approval of the instructor and the student’s advisor. For graduate courses offered by the KUMC campus, the student must bring a Count Towards Degree form signed by the instructor, a letter of explanation and recommendation from the advisor, and current academic record to the Office of Graduate Studies for approval. If approved, the Office of Graduate Studies signs the Count Towards Degree form, which the student must then present to the staff in the KUMC Registrar’s Office if currently enrolled as a KUMC undergraduate or to the Student Records Center in Lawrence if currently enrolled as Lawrence undergraduate. The appropriate office staff (KUMC Registrar’s Office or Student Records Center) will enroll the student in the course(s). Courses taken for undergraduate credit may not be transferred to graduate credit.
Office of Academic Success

Academic Success supports the intellectual engagement and pursuit of learning by KU students throughout their academic career, from orientation to graduation and beyond. Courses offered teach students to navigate the university, explore intellectual interests, maximize experiential learning opportunities, and prepare students for a meaningful career after graduation.

- Undergraduate Certificate in Arts Engagement (p. 2486)
- Undergraduate Certificate in Service Learning (p. 2487)

Courses

UNIV 1. Math Skill Development I. 2 Credits.
Offered to provide opportunities for deeper understanding of MATH 2 content through interactive learning. The course will support students preparing to take Kansas Algebra (KAP) course (MATH 2). The content of the course uses the MATH 2 foundations and emphasizes helping students generate a mathematical mindset, understanding how learning occurs in mathematics, and strategies to be successful in future mathematics coursework. Students will engage in discussions surrounding their roles in mathematical learning and practice using mathematical thinking strategies to improve understanding. Prerequisite: Open only to students withdrawing from MATH 2 during the semester.

UNIV 101. Orientation Seminar. 2 Credits.
Students create academic, personal, career, and wellness goals; connect with available academic, student services, and wellbeing resources available to help students transition to KU and reach their goals; build a support network of faculty, staff, and peers; explore experiential learning and co-curricular activities; and create a realistic budget. Prerequisite: Eligible students must have fewer than thirty credit hours from the University of Kansas.

UNIV 105. Jayhawk Success Seminar. 1 Credits.
The Jayhawk Success Seminar is a 10-week course designed to help you become a more self-aware and effective student, and develop strategies to be successful at KU. You will reflect on your study, time management, and coping skills; implement new habits; establish realistic goals and create a plan to achieve them; and utilize academic, student, and well-being resources.

UNIV 120. Introduction to Engaged Learning. 2 Credits.
Explore your interests through hands-on mini experiences in service learning, study abroad, undergraduate research, and internships. With individualized support from your instructor in this small course, you’ll test out various experiences both on and off campus, connect to relevant KU departments, and prepare materials needed to apply to these experiences after completing the course.

UNIV 299. Service Learning Project. 0-1 Credits.
Service Learning Project. Graded on a satisfactory/unsatisfactory basis.

UNIV 402. Culture & Diversity Sponsored Educational Experiences. 0 Credits.
Goal 4 can be met through courses, pre-approved experiences, or approved individual experiences. This course is reserved for students who - with a sponsor - propose a unique experience to fulfill Goal 4. Experiences must meet the following set of principles that define a sponsored educational experience: 1) Intention, Preparedness and Planning; 2) Reflection; 3) Monitor Progress; 4) Assessment and Evaluation. Each educational experience considered for the KU Core should have at least 120 contact hours (in and out of the classroom) over the semester to qualify to earn 3 credit hours. These contact hours must be inclusive of the four principles above to be eligible for this course. Students will be required to complete modules and reflection assignments throughout the duration of the experience. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Approval by the KU Core Curriculum Committee before experience commences.

UNIV 492. Special Projects in the Community. 2 Credits.
This course begins with the premise that community service is a valuable response to the social problems that we face in today’s society and that understanding of self, knowledge of social issues, and commitment to service are essential for effective engagement in communities. Students will be introduced to existing responses to social problems and will work to formulate their own individual and collective responses. The course is offered with two options. Students may find a community organization/partner to volunteer with or participate through KU Alternative Breaks program. Completing the course through the KU Alternative Breaks Program requires acceptance into that program. Alternative Breaks works to motivate college students to become active and present members of their own communities, to recognize the different needs of local, national, rural, and urban communities, and to engender an understanding of how to be involved in the betterment of society.

UNIV 502. Social Responsibility & Ethics Sponsored Educational Experience. 0 Credits.
Goal 5 can be met through courses, pre-approved experiences, or approved individual experiences. This course is reserved for students who - with a sponsor - propose a unique experience to fulfill Goal 5. Experiences must meet the following set of principles that define a sponsored educational experience: 1) Intention, Preparedness and Planning; 2) Reflection; 3) Monitor Progress; 4) Assessment and Evaluation. Each educational experience considered for the KU Core should have at least 120 contact hours (in and out of the classroom) over the semester to qualify to earn 3 credit hours. These contact hours must be inclusive of the four principles above to be eligible for this course. Students will be required to complete modules and reflection assignments throughout the duration of the experience. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Approval by the KU Core Curriculum Committee before experience commences.

UNIV 602. Sponsored Educational Experiences. 0 Credits.
Goal 6 can be met through an approved experience designed by student and faculty member. Students with a faculty sponsor may propose a unique experience to fulfill Goal 6. Experiences must meet the following set of principles that define a sponsored educational experience:
1) Intention, Preparedness and Planning; 2) Reflection; 3) Monitor Progress; 4) Assessment and Evaluation. In addition, each educational experience considered for the KU Core should have a specific number of contact hours equal to at least 3 credit hours or 120 hours in and out of the classroom over the semester; and an outcome should include a product representative of the student’s effort. Graded on a satisfactory/unsatisfactory basis.

Undergraduate Certificate in Arts Engagement

The Arts Engagement Certificate requires three different components: classes, experiences, and written reflections. Classes and experiences can happen in any order. Most students will attend events during the same semesters that they are taking qualifying courses. The final written
reflection should be completed after the coursework and event attendance is completed.

To register for the Arts Engagement Certificate, log in to MyKU (http://my.ku.edu) and select Academics > Undergraduate Certificates. From there, you will be able to register for the certificate.

The Arts Engagement Certificate requires three different components: classes, experiences, and written reflections. Classes and experiences can happen in any order. Most students will attend events during the same semesters that they are taking qualifying courses. The final written reflection should be completed after the coursework and event attendance is completed.

Classes

Complete at least 2 arts classes, totaling a minimum of 6 credit hours, with a grade of C or better. These 2 classes should each be from a different school/department.

All classes offered by the following schools and departments qualify:

<table>
<thead>
<tr>
<th>Column One</th>
<th>Column Two</th>
</tr>
</thead>
<tbody>
<tr>
<td>Architecture (<a href="https://architecture.ku.edu/">https://architecture.ku.edu/</a>)</td>
<td>Dance (<a href="https://dance.ku.edu/">https://dance.ku.edu/</a>)</td>
</tr>
<tr>
<td>Design (<a href="https://design.ku.edu/">https://design.ku.edu/</a>)</td>
<td>Creative Writing (<a href="https://english.ku.edu/courses/">https://english.ku.edu/courses/</a>)</td>
</tr>
<tr>
<td>Film &amp; Media Studies (<a href="https://film.ku.edu/">https://film.ku.edu/</a>)</td>
<td>History of Art (<a href="https://arthistory.ku.edu/">https://arthistory.ku.edu/</a>)</td>
</tr>
<tr>
<td>Music (<a href="https://music.ku.edu/">https://music.ku.edu/</a>)</td>
<td>Theatre (<a href="https://theatredance.ku.edu/">https://theatredance.ku.edu/</a>)</td>
</tr>
<tr>
<td>Visual Art (<a href="https://art.ku.edu/">https://art.ku.edu/</a>)</td>
<td>Honors classes taught by arts faculty (<a href="https://honors.ku.edu/">https://honors.ku.edu/</a>)</td>
</tr>
</tbody>
</table>

Experiences

There are two options to choose from in completing this certificate requirement:

Option A

- Attend 6 art events from 3 different arts areas. (These can be any events offered on campus). Example: 2 dance performances, 2 design lectures, and 2 visual art exhibitions. Write a reflection over each event and submit it on the Experiential Learning Certificates portal within 2 weeks event attendance.

Option B

- Attend 3 art events from 3 different arts areas. Write a reflection over each event and submit it on the Experiential Learning Certificates portal within 2 weeks event attendance.
- Complete a semester long, hands-on arts experience (e.g., an additional class - in a different school/department than the courses used to fulfill the coursework requirement - producing creative work; an arts-related internship; or participating in campus music, theatre, or dance productions). Then, submit a written reflection (at least 600 words) and some kind of artifact from your experience on the Experiential Learning Certificates portal. This can be photo documentation of a project with descriptions, video, content that you produced during an internship, a final reflection that was required to complete a class, etc.

You must complete either Option A or Option B to satisfy this component of the certificate.

Most arts events offered at the University of Kansas will count toward the Arts Engagement Certificate. Here is a general list of arts venues and types of arts events that can be count toward your certificate:

- All KU theatre (http://kutheatre.com/performances/) performances
- All performances and art-related talks at the Lied Center (http://lied.ku.edu/calendar/) & master classes
- All exhibitions, performances, and art related talks at Spencer Museum of Art (https://spencerart.ku.edu/calendar/)
- All exhibitions, performances, and art related talks at Nelson Atkins (https://www.nelson-atkins.org/)
- All School of Music (https://music.ku.edu/school-music-calendar/) events
- Senior recitals, thesis exhibitions, and student showcases
- Visiting artists and art-related lectures on campus (e.g. at The Commons, Kansas Union, Hall Center, departmental guest artists, etc.)
- Optional, hands-on workshops offered by participating Arts Engagement Departments
- Film screenings with discussions
- Artist talks, exhibitions, and theatre, music, and dance performances at the Lawrence Arts Center (https://lawrenceartscenter.org/calendar/)
- Art Lectures at the Lawrence Public Library (https://lawrence.bibliocommons.com/events/search/index/)
- Artist talks and exhibitions at the Student Union Gallery in the Kansas Union
- All exhibitions at the Art and Design Building Gallery
- Final Fridays (https://www.explorelawrence.com/events/annual-events/final-fridays/) (Lawrence) or First Fridays (http://kccrossroads.org/first-fridays/) (Kansas City) are fine to attend for visual art; however, you need to write about a specific work of art or exhibition.

If you have questions about whether or not an event can count, please e-mail artsengagement@ku.edu (artsengagement@ku.edu)

Final Reflection

Answer 6 written reflection essay questions and take a short exit questionnaire on the Experiential Learning Certificates portal.

Undergraduate Certificate in Service Learning

The Certificate in Service Learning (CSL) recognizes your experiences in utilizing your classroom skills to meet community-identified needs.

Earning the certificate involves taking classes, engaging in volunteer work, and reflecting on your service learning experiences. Once you have earned the certificate, it is acknowledged on your official academic transcript.
Completion of this certificate fulfills KU Core Goal 5: Social Responsibility and Ethics.

- **Introduction to Service Learning**
  - The Service Learning Orientation is an online and self-paced introduction to service pathways and ethical service work.
  - This is not a class. Modules and resources to complete this component will be available on the Center for Service Learning’s website. After reviewing the online modules, you will respond to reflection questions.
  - All Service Learning Orientation components must be completed during the same semester in which you register for the certificate.

- **1 service learning course and 1 social awarenss course**
  - Take 1 designated service-learning (SL) class and 1 social awareness (SA) class. View eligible classes: [https://csl.ku.edu/students/certificate/eligiblecourses/](https://csl.ku.edu/students/certificate/eligiblecourses/)
  - Service learning classes must be taken for a minimum of 3 credit hours. Classes that qualify toward the certificate vary by semester.
  - Some approved courses offer optional service or multiple projects that serve for-profit and non-profit organizations. In order for your service to be approved for the certificate, you must have participated in the service learning component of the course, and the service must be completed in the non-profit sector. You may have taken a SL or SA service-learning class that is not included on the list of courses on the Center for Service Learning website ([https://csl.ku.edu/students/certificate/eligiblecourses/](https://csl.ku.edu/students/certificate/eligiblecourses/)) or with approval from the Center for Service Learning. In order to seek approval or recommend a course be designed as a service-learning or social awareness course, submit the form on the Center for Service Learning’s website.

- **60 hours of service**
  - Complete a minimum of 60 hours of service. Service hours from your service learning class count toward the cumulative 60 hours needed to complete the certificate. If the service hours from your courses fall below 60 hours, you may complete additional service in one of the following ways:
    - participate in an alternative break trip
    - volunteer at a non-profit agency
    - complete another service learning course
  - If you continue service at an agency beyond what is required for your service learning class, you may use those hours to complete this component. Contact the Center for Service Learning with questions or to discuss other options for completing the additional service.
  - If you complete service hours that are not part of a class, you will need to fill out an additional service verification form ([https://kusurvey.ca1.qualtrics.com/jfe/form/SV_6YEHrR5dORCMkJg/](https://kusurvey.ca1.qualtrics.com/jfe/form/SV_6YEHrR5dORCMkJg/)) that includes completion of reflection questions and upload it to your submission.
  - All service learning activities completed as part of a designated service learning course will be accepted, no matter when completed.
  - Up to 30 hours of service learning and volunteer activities may be accepted toward certificate requirements prior to completion of the Service Learning Orientation requirement, if service adheres to the established criteria on the Center for Service Learning’s website. However, students must complete a structured reflection with CSL staff to satisfy the reflection requirement for these hours by participating in a session offered by the CSL. Staff will not approve additional service hours beyond 30 unless the student has registered for the certificate and completed the Service Learning Orientation module.

- **Final Reflection**
  - Write a reflection summary including all your service experiences. Because you will be including all of your service experiences in the reflection, you may not submit the reflection prior to completing 1 your service experiences. Visit csl.ku.edu ([http://csl.ku.edu](http://csl.ku.edu)) for more specific details on reflection requirements. To access the final reflection, you must have registered for the certificate, completed Service Learning Orientation, and finished your coursework and service hours.
Office of International Affairs

International Affairs (https://international.ku.edu/) is the central administrative office for the international division, empowering Jayhawks from all 50 states and over 105 nations to achieve their full potential by mobilizing discovery, research, and service across geopolitical borders. Academic programs include English language instruction provided through the Applied English Center (http://aec.ku.edu/), and a Global Awareness certificate administered by Study Abroad and Global Engagement (https://studyabroad.ku.edu/).

Courses

AEC 1. Level 1 Support Course. 2 Credits.
In this class, learners will look at vocabulary in authentic contexts. Students examine vocabulary for depth, considering the types of word knowledge needed to know, understand, and to use words correctly. Examples of this data include collocations, synonyms, antonyms, and word parts (prefixes, roots, and suffixes). This course also focuses on increasing the breadth of learner vocabulary. Prerequisite: Placement by the Applied English Center.

AEC 2. Level 2 Support Course. 2 Credits.
Verbs enable language users to convey multi-dimensional messages, allowing them to travel precisely back and forth in time and indicate what is possible, permissible and polite. Yet many students see and use verbs in a one-dimensional way, focusing on the definition of the verb but disregarding the time message of tense and the nuance of modals. This class will address that discrepancy. Although students will practice verb forms, the class concentration will be on the recognition and accurate use of the functional message of verb tenses and modals. Specifically, students will analyze the forms and functions of targeted verb tenses, select appropriate verb tenses in written and oral activities and expand control of sentence-level grammar. Prerequisite: Placement by the Applied English Center.

AEC 3. Level 3 Support Course. 2 Credits.
This course supports the Level 3 core courses by emphasizing and targeting reading skills in an effort to further improve their reading comprehension, increase their reading fluency and develop their vocabulary as demonstrated in their writing and speaking. Reading selections target comprehension and critical thinking skills while timed word and reading selections are used to promote reading speed and fluency. Vocabulary development is targeted through morphemic analysis of roots and affixes and study of context clues. Prerequisite: Placement in this course by Applied English Center.

AEC 5. Short Term Program with Applied English Center Course Enrollment: ____. 0-16 Credits. U
Skill-based special topics at appropriate level(s) for short term program students attending core AEC courses for a partial term. Prerequisite: Placement in this course by the Applied English Center.

AEC 6. Anticipated Future Applied English Center Credit Hours. 1-16 Credits. U
This course is a placeholder for future anticipated Applied English Center credit hour enrollment. Prerequisite: Placement in this course by the Applied English Center.

AEC 7. Short Term Programs Self-Contained Enrollment: ____. 0-16 Credits. U

Specialized English language courses for short term program students. Courses focus on the use of English in particular fields of study or employment based on program objectives. Prerequisite: Placement in this course by the Applied English Center.

AEC 90. English Proficiency Test. 0 Credits. U
Final proficiency test. Required of all students enrolled in one or more Applied English Center courses, except AEC 82. Graded on a satisfactory/unsatisfactory basis.

Courses

AECB 10. Basic English. 1-15 Credits.
Basic English is a fully-integrated English as a Second Language course designed for students at the lowest level of English proficiency. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, speaking, listening, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at a beginning to middle A1 CEFR proficiency level. Specifically, students will be able to understand and use familiar everyday expressions and very basic phrases in both speech and writing. Students will also be able to interact in a simple way provided the other person talks slowly and clearly.

Courses

AECL 10. Listening, Speaking and Grammar for Academic Purposes 1. 3-8 Credits. U
Students in Level 1 Listening/Speaking/Grammar are at the beginning of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the A2 CEFR proficiency level. Specifically, students will be able to communicate and understand simple, foundational English relevant to academic study. Prerequisite: Placement in this course by the Applied English Center.

AECL 20. Listening, Speaking and Grammar for Academic Purposes 2. 3-8 Credits. U
Students in Level 2 Listening/Speaking/Grammar are at a high-beginning/low-intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B1 CEFR proficiency level. Specifically, students will be able to understand the main points of clear standard input regularly encountered in academic study and can produce simple connected speech on relevant topics. Prerequisite: Placement in this course by the Applied English Center.

AECL 30. Listening, Speaking and Grammar for Academic Purposes 3. 3-8 Credits. U
Students in Level 3 Listening/Speaking/Grammar are at an intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2 CEFR proficiency level. Specifically, students will be able to understand the main ideas of lectures on both concrete and abstract topics and will be able to interact with a degree of fluency and spontaneity that makes regular interaction with native speakers possible. Prerequisite: Placement in this course by the Applied English Center.
Students in Level 4 Listening/Speaking/Grammar are at a low-advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas and begin to recognize implicit meaning in lectures on both concrete and abstract topics, and will be able to begin to express him/herself fluently and spontaneously for academic purposes. Prerequisite: Placement in this course by the Applied English Center.

Students in Level 5 Listening/Speaking/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students strengthen and refine their English skills in listening, speaking, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer speech and recognize implicit meaning in lectures on both concrete and abstract topics. Students will also be able to express themselves fluently and spontaneously and use language flexibly and effectively for academic purposes. Prerequisite: Placement in this course by the Applied English Center.

This is the first course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this first course, students will learn about the U.S. university system, be introduced to campus culture in the U.S., discover what resources and support are available for students at U.S. universities, and explore different aspects of student life. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas.

This is the second course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this second course, students will become familiar with U.S. academic culture and expectations, discover and utilize learning strategies that will be particularly helpful in U.S. classrooms, understand what technology skills are needed to succeed and learn about how to apply to U.S. universities. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas.

This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Low B1 to Mid B1 CEFR range, and is the first level of an eight-level, fully online program.

This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. This course targets students at the Mid B2+ to High B2+ CEFR range, and is the last level of an eight-level, fully online program.

**AECO 81. Staying Current: Professional Development for EFL Teachers. 2 Credits.**
This practical and project-oriented course is for current EFL teachers who want to enhance their professional knowledge and skills. The course has two foundational modules: Enhancing Planning and Engaging the EFL learner. Enhancing Planning builds on foundations of lesson planning through analyzing strong lesson planning features, addressing areas of weakness in plan development, applying new strategies in lesson sequence, and aligning courses with intended outcomes. Engaging the EFL learner is a multifaceted approach to creating a dynamic classroom through cultivating classroom management, using technology and authentic materials, and adapting materials and lessons. Course participants will also participate in two specialized modules: pedagogical grammar and pronunciation. Pedagogical grammar and pronunciation will focus on considerations and best practices in various teaching contexts. Participants will apply what they have learned by developing activities and strategies ready to be used in a classroom setting.

**Courses**

**AECR 10. Reading, Writing and Grammar for Academic Purposes 1. 3-8 Credits. U**
Students in Level 1 Reading/Writing/Grammar are at the beginning of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce written language at the A2 CEFR proficiency level. Specifically, students will be able to communicate and understand simple, foundational English relevant to academic study. Prerequisite: Placement in this course by the Applied English Center.

**AECR 20. Reading, Writing and Grammar for Academic Purposes 2. 3-8 Credits. U**
Students in Level 2 Reading/Writing/Grammar are at a high-beginning/low-intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B1 CEFR proficiency level. Specifically, students will be able to understand the main points of clear standard input regularly encountered in academic study and produce simple connected text on relevant topics. Prerequisite: Placement in this course by the Applied English Center.

**AECR 30. Reading, Writing and Grammar for Academic Purposes 3. 3-8 Credits. U**
Students in Level 3 Reading/Writing/Grammar are at an intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2 CEFR proficiency level. Specifically, students will be able to understand the main ideas of complex text on both concrete and abstract topics and will be able to produce clear, detailed text on a wide range of subjects. Prerequisite: Placement in this course by the Applied English Center.

**AECR 140. Reading, Writing and Grammar for Academic Purposes 4. 3-8 Credits. U**
Students in Level 4 Reading/Writing/Grammar are at a low advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas of complex text on both concrete and abstract topics and begin to recognize implicit meaning. Students will also be able to produce clear, detailed text on a wide range of subjects and begin to demonstrate control of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center.

**AECR 151. Reading, Writing and Grammar for Academic Purposes 5. 3-7 Credits. U**
Students in Level 5 Reading/Writing/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students strengthen and refine their English skills in reading, writing, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer texts, and recognize implicit meaning and will be able to use language flexibly and effectively for academic purposes. Students will also be able to produce clear, well-structured detailed texts showing controlled use of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center.

**Courses**

**AESP 160. Applied English Center Special Topics: ____. 0-3 Credits.**
This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics.

### Applied English Center

The Applied English Center (AEC) helps prepare students linguistically, academically, and culturally for their program of study. Founded in 1964, our nationally accredited program has a long and illustrious history of serving international students in their goals of English language learning.

### Courses and Programs

The AEC offers several courses and programs to serve a wide range of constituents.

- Intensive English Program (https://aec.ku.edu/iep/)
- Advanced Courses for KU International Students (https://aec.ku.edu/aesp-courses-ku-international-students/)
- Programs for KU Schools and Departments (https://aec.ku.edu/programs-ku-schools-and-departments/)
- Short Programs (https://aec.ku.edu/international-short-programs/)
- TEFL Certificate Program (https://aec.ku.edu/aec-tefl-certificate-program/) (noncredit)
Resources and Services

Additionally, the AEC offers students a variety of resources and support services.

- Conversation Groups and Activities (https://aec.ku.edu/conversation-groups-and-activities/)
- Cross-Cultural Advising (https://aec.ku.edu/cross-cultural-advising/)
- Access to the Learning English Online (LEO) Computer Lab (https://aec.ku.edu/leo/)
- SPEAK Test (https://aec.ku.edu/speak-test/)
- Tutoring Services at The Point (https://aec.ku.edu/tutoring/)

Please visit the Applied English Center (https://aec.ku.edu/) website for more information about our programs and services.

Courses

AEC 1. Level 1 Support Course. 2 Credits.
In this class, learners will look at vocabulary in authentic contexts. Students examine vocabulary for depth, considering the types of word knowledge needed to know, to understand, and to use words correctly. Examples of this data include collocations, synonyms, antonyms, and word parts (prefixes, roots, and suffixes). This course also focuses on increasing the breadth of learner vocabulary. Prerequisite: Placement by the Applied English Center.

AEC 2. Level 2 Support Course. 2 Credits.
Verbs enable language users to convey multi-dimensional messages, allowing them to travel precisely back and forth in time and indicate what is possible, permissible and polite. Yet many students see and use verbs in a one-dimensional way, focusing on the definition of the verb but disregarding the time message of tense and the nuance of modals. This class will address that discrepancy. Although students will practice verb forms, the class concentration will be on the recognition and accurate use of the functional message of verb tenses and modals. Specifically, students will analyze the forms and functions of targeted verb tenses, select appropriate verb tenses in written and oral activities and expand control of sentence-level grammar. Prerequisite: Placement by the Applied English Center.

AEC 3. Level 3 Support Course. 2 Credits.
This course supports the Level 3 core courses by emphasizing and targeting reading skills in an effort to further improve their reading comprehension, increase their reading fluency and develop their vocabulary as demonstrated in their writing and speaking. Reading selections target comprehension and critical thinking skills while timed word and reading selections are used to promote reading speed and fluency. Vocabulary development is targeted through morphemic analysis of roots and affixes and study of context clues. Prerequisite: Placement by the Applied English Center.

AEC 5. Short Term Program with Applied English Center Course Enrollment: _____. 0-16 Credits. U
Skill-based special topics at appropriate level(s) for short term program students attending core AEC courses for a partial term. Prerequisite: Placement in this course by the Applied English Center.

AEC 6. Anticipated Future Applied English Center Credit Hours. 1-16 Credits. U
This course is a placeholder for future anticipated Applied English Center credit hour enrollment. Prerequisite: Placement in this course by the Applied English Center.

AEC 7. Short Term Programs Self-Contained Enrollment: _____. 0-16 Credits. U
Specialized English language courses for short term program students. Courses focus on the use of English in particular fields of study or employment based on program objectives. Prerequisite: Placement in this course by the Applied English Center.

AEC 90. English Proficiency Test. 0 Credits. U
Final proficiency test. Required of all students enrolled in one or more Applied English Center courses, except AEC 82. Graded on a satisfactory/unsatisfactory basis.

Courses

AECB 10. Basic English. 1-15 Credits.
Basic English is a fully-integrated English as a Second Language course designed for students at the lowest level of English proficiency. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, speaking, listening, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at a beginning to middle A1 CEFR proficiency level. Specifically, students will be able to understand and use familiar everyday expressions and very basic phrases in both speech and writing. Students will also be able to interact in a simple way provided the other person talks slowly and clearly.

AEC 10. Listening, Speaking and Grammar for Academic Purposes 1. 3-8 Credits. U
Students in Level 1 Listening/Speaking/Grammar are at the beginning of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the A2 CEFR proficiency level. Specifically, students will be able to communicate and understand simple, foundational English relevant to academic study. Prerequisite: Placement in this course by the Applied English Center.

AEC 20. Listening, Speaking and Grammar for Academic Purposes 2. 3-8 Credits. U
Students in Level 2 Listening/Speaking/Grammar are at a high-beginning/low-intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B1 CEFR proficiency level. Specifically, students will be able to understand the main points of clear standard input regularly encountered in academic study and can produce simple connected speech on relevant topics. Prerequisite: Placement in this course by the Applied English Center.

AEC 30. Listening, Speaking and Grammar for Academic Purposes 3. 3-8 Credits. U
Students in Level 3 Listening/Speaking/Grammar are at an intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2 CEFR proficiency level. Specifically, students will be able to understand the main ideas of lectures on both concrete and abstract topics and will be able to interact with a degree of fluency and spontaneity that makes regular interaction with
native speakers possible. Prerequisite: Placement in this course by the Applied English Center.

AECO 140. Listening, Speaking and Grammar for Academic Purposes 4. 3-8 Credits. U
Students in Level 4 Listening/Speaking/Grammar are at a low-advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas and begin to recognize implicit meaning in lectures on both concrete and abstract topics, and will be able to begin to express him/herself fluently and spontaneously for academic purposes. Prerequisite: Placement in this course by the Applied English Center.

AECO 151. Listening, Speaking and Grammar for Academic Purposes 5. 3-7 Credits. U
Students in Level 5 Listening/Speaking/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students strengthen and refine their English skills in listening, speaking, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer speech and recognize implicit meaning in lectures on both concrete and abstract topics. Students will also be able to express themselves fluently and spontaneously and use language flexibly and effectively for academic purposes. Prerequisite: Placement in this course by the Applied English Center.

Courses

AECO 21. University Life in the U.S. 1. 1 Credits.
This is the first course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this first course, students will learn about the U.S. university system, be introduced to campus culture in the U.S., discover what resources and support are available for students at U.S. universities, and explore different aspects of student life. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas.

AECO 22. University Life in the U.S. 2. 1 Credits.
This is the second course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this second course, students will become familiar with U.S. academic culture and expectations, discover and utilize learning strategies that will be particularly helpful in U.S. classrooms, understand what technology skills are needed to succeed and learn about how to apply to U.S. universities. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas.

AECO 51. Intensive English Online 1. 6.5 Credits.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students' accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Low B1 to Mid B1 CEFR range, and is the first level of an eight-level, fully online program.

AECO 52. Intensive English Online 2. 6.5 Credits.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students' accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B1 to High B1 CEFR range, and is the second level of an eight-level, fully online program.

AECO 53. Intensive English Online 3. 6.5 Credits.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students' accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B1+ to High B1+ CEFR range, and is the third level of an eight-level, fully online program.

AECO 54. Intensive English Online 4. 6.5 Credits.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students' accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B1+ to High B1+ CEFR range, and is the fourth level of an eight-level, fully online program.

AECO 55. Intensive English Online 5. 6.5 Credits.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students' accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Low B2-Mid B2 CEFR range, and is the fifth level of an eight-level, fully online program.

AECO 56. Intensive English Online 6. 6.5 Credits.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students' accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B2 to High B2 CEFR range, and is the sixth level of an eight-level, fully online program.

AECO 57. Intensive English Online 7. 6.5 Credits.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students' accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the High B2 to Mid B2+ CEFR range, and is the seventh level of an eight-level, fully online program.
Specifically, students will be able to understand the main ideas of complex English learning at higher levels. By the end of this course, students will be able to produce clear, well-structured detailed texts showing main points of a wide range of subjects. Prerequisite: Placement in this course by the Applied English Center.

AECR 140. Reading, Writing and Grammar for Academic Purposes 4. 3-8 Credits. U
Students in Level 4 Reading/Writing/Grammar are at a low advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas of complex text on both concrete and abstract topics and begin to recognize implicit meaning. Students will also be able to produce clear, detailed text on a wide range of subjects and begin to demonstrate control of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center.

AECR 151. Reading, Writing and Grammar for Academic Purposes 5. 3-7 Credits. U
Students in Level 5 Reading/Writing/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students develop and refine their English skills in reading, writing, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer texts, and recognize implicit meaning and will be able to use language flexibly and effectively for academic purposes. Students will also be able to produce clear, well-structured detailed texts showing controlled use of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center.

Courses

AECR 10. Reading, Writing and Grammar for Academic Purposes 1. 3-8 Credits. U
Students in Level 1 Reading/Writing/Grammar are at the beginning of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce written language at the A2 CEFR proficiency level. Prerequisite: Placement in this course by the Applied English Center.

AESP 160. Applied English Center Special Topics: ____. 0-3 Credits.
This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics.

Undergraduate Certificate in Global Studies

The Global Awareness Program Certificate (GAP) allows students to explore the world at KU and beyond through a combination of coursework, on-campus events, and international experiences. Open to all majors, GAP highlights students’ knowledge of and experience with the broader world. Greater understanding of political, social, and economic landscapes outside the United States will better prepare our students for the demands of the 21st century. GAP is noted on the official transcript.

By completing GAP, you will:

• View the world from various perspectives through courses and hands-on experiences.
• Engage with people from the 100+ countries represented at KU. Meet friends from around the world, experience new cultures and create a global network.
• Communicate your broad cultural knowledge and skills to future employers.
GAP combines courses, on-campus cultural activities, and study abroad. Complete 2 components to earn the certificate and all 3 for GAP with Distinction.

Undergraduate Certificate in Global Awareness

Global Awareness Program (GAP)

• Open to all undergraduates
• Complete 2 components to earn GAP OR Complete all 3 to earn GAP with Distinction
• Noted on official transcript
• Offers a competitive advantage and a unique way to highlight your international experience

Academics

Domestic Students

• A minimum of 2 semesters of college-level study in the same modern foreign language
• AND 3 courses (https://gap.ku.edu/courses/) with a modern, international focus from 3 different departments (2 different departments for STEM students)

International Students

• Pass the English Proficiency Exam through the Applied English Center (AEC), or receive an English requirement waiver
  • Native English-speakers need to pass two semesters of a foreign language
  • AND 2 courses with a modern international focus and 1 course (https://gap.ku.edu/courses/) with a U.S. focus.

On-Campus Cultural Activities

• Participate in 20 hours of on-campus activities that have an international and/or cultural focus outside of your nationality and/or religion.
• Answer reflection questions on your activities

International Experience

Domestic students

• Participate in a KU-approved study/research/internship abroad program for credit.
• Once you return, answer short-answer reflection questions or participate in a discussion group

International students

• Your time at KU counts as your international experience. Answer short-answer reflection questions or participate in a discussion group
ROTC

Graduation requirements and regulations for every academic program are provided in this catalog; however, this catalog is for informational purposes only and does not constitute a contract. Degree and program requirements and course descriptions are subject to change.

In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details). Other years’ catalogs»

Reserve Officers Training Corps

The University of Kansas is one of only 37 U.S. universities with a full offering of Army, Air Force, and Naval ROTC programs. These programs are integrated into the mainstream of campus activities. All ROTC programs offer scholarships that pay tuition and fees, furnish books and uniforms, and provide a monthly living allowance.

Students in ROTC pursue regular courses toward a degree and augment their studies with courses from the Departments of Military Science, Aerospace Studies, or Naval Science. These courses may be cross-listed with a professional school or reviewed on an individual basis by the Assembly of the College of Liberal Arts and Sciences (http://clas.ku.edu/) for accreditation toward degree requirements.

On successful completion of requirements and graduation from KU, Army and Air Force ROTC cadets are commissioned into their respective service as Second Lieutenants. Naval ROTC midshipmen commission as Ensigns in the Navy, or Marine Corps Second Lieutenants.

Programs

Army - Army: Department of Military Science
Air Force - Air Force: Department of Aerospace Studies
Navy - Navy: Department of Naval Science

Army: Department of Military Science

The Program

The Department of Military Science administers the Army Reserve Officers Training Corps program at KU. The military science curriculum provides a student with unique leadership and management training, along with practical experience. It develops qualities basic to success in the Army and in the civilian sector. It also offers the student the opportunity to earn an officer’s commission in the Army.

Eligible students enrolled at KU may register for a 100- or 200-level military science course or for ARMY 303 or ARMY 450. These students receive credit if the course they are enrolled in has been approved for degree credit in the College of Liberal Arts and Sciences (http://clas.ku.edu/). The credit does not count toward the required 100 hours in the College for students earning a baccalaureate degree in the College of Liberal Arts and Sciences.

Students who want to receive a commission in the Army through the ROTC program must meet the eligibility requirements of Section 2103, Title 10, U.S. Code, and current Department of Defense and Department of the Army guidelines.

4-Year Program

The 4-year Army ROTC program is made up of a basic course and an advanced course.

Basic Course

The basic course is taken during the first 2 years of college. It covers subjects such as organizational behavior, leadership, management, ethics, writing, public speaking, military affairs, and tactics. All necessary textbooks, classroom materials, uniforms, and other equipment are furnished at no cost. Students who have completed the basic course; have met academic, physical, and medical standards; and have the potential to serve as officers may enter the advanced course.

The basic course is composed of a total of 4 courses. A student may enter the basic course at one of 3 points (if eligible).

1. Entering First-Semester First-Year Students

Advanced Course

The advanced course normally is taken during the final 2 years of college. It offers instruction in military organization, tactics, military law, Army administration, and leadership. All necessary books, classroom supplies, uniforms, and other equipment are issued to students at no cost. During the summer between the junior and senior years of college, students must attend the Leadership Development and Assessment Camp, a fully paid, five-week training and evaluation course. LDAC gives each student the chance to practice for an extended period of time what they have learned
in the classroom. All students contracted in the advanced course receive stipends from the government of up to $5,000 a year.

The advanced course is composed of a total of 4 courses.

**2-Year Program**

Students can receive credit for the basic course in 3 ways other than taking the 4 courses associated with the basic course. Students who complete the basic course by 1 of these alternate means can enroll in basic course classes but cannot enroll in the advanced course until they are academic juniors. Any upper-level student, junior through graduate, may earn a commission through the 2-year program. The 3 alternate ways to receive basic course credit are

1. Successfully completing the basic enlisted training offered by any of the armed services.
2. Successfully completing the ROTC Leadership Training Course held each summer (prerequisite to ARMY 301).
3. Successfully completing at least 4 years of high school Junior ROTC.

---

**Professional Military Education Course**

The following course is required for commissioning:

Military History. Gain an understanding of the evolution of warfare, military theory, the military profession, and the place of military institutions in American society. The requirement can be met by successfully completing a history course focusing on either a major war or on military history in general. ROTC courses also meet this requirement.

---

**Scholarships and Financial Assistance**

Army ROTC offers 2-, 3-, and 4-year scholarships to qualified students. Scholarships are awarded on a competitive basis to students with outstanding academic and leadership abilities. These scholarships pay for all tuition, required fees, $1,200 a year for books and other supplies, and a stipend of up to $5,000 a year. Special consideration is given to students who major in nursing, engineering, or the sciences. The Kansas Army National Guard offers numerous educational benefits such as the Board of Regents Scholarship.

---

**Army National Guard and Army Reserve Students**

Students who are members of the Army National Guard or the Army Reserve may enroll in Army ROTC classes and be members of their units at the same time. Once students enter a contractual agreement as early as their sophomore year, they can remain members of their units under the Simultaneous Membership Program. These students are still eligible for all military benefits they have earned under enlisted contract such as Tuition Assistance, GI Bill®, and drill pay; additionally, they may compete for guaranteed reserve forces designated ROTC scholarships if they commit to commissioning to the Army Reserve or Army National Guard.

---

**Courses**

**ARMY 10. Leadership Laboratory. 0 Credits.** U
Required of all Army Cadets. A study of Army customs and courtesies, drill and ceremony, career opportunities in the Army, and the life and work of a junior Army officer. Cadets develop leadership potential through practical supervised training. Course must be taken in conjunction with ARMY 101, 102, 201, 202, 301, 302, 401, and 402. Course not approved for credit in the College of Liberal Arts and Sciences.

**ARMY 101. Introduction to Military Science I. 1 Credits.** U
Required introductory course for the Army military science program. Course is comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. Introduces the military science program as an element of the reserve forces and includes an examination of major legislation, the Army organization structure, and military leadership techniques. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions.

**ARMY 102. Introduction to Military Science II. 1 Credits.** U
Course comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. A general study and appreciation of the American military system from colonial times to the present. The course identifies factors present in the American society and national policy in each particular historical period which influenced the development of American military systems. The relationship between the military establishment and the larger American society is examined in each historical period. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 101 or department approval.

**ARMY 201. Basic Military Science I. 1 Credits.** U
Course comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. Analyzes the principles of war and military leadership at small unit level, and introduces principles of military writing. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 102 or department approval.

**ARMY 202. Basic Military Science II. 1 Credits.** U
Course is comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. Curriculum consists of the fundamentals of topographic map reading and their application in a field environment. Includes instruction in various types of maps, marginal information, topographic symbols and colors, scale, distance, direction and use of the magnetic compass. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit
of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 201 or department approval.

**ARMY 301. Theory and Dynamics of Tactical Operations I. 3 Credits. U**
Course is comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. A comprehensive study of conventional tactical operations. Emphasizes the fundamentals of land warfare and the qualities necessary to conduct fluid, non-linear operations. Introduces the student to the tenets of Air-Land Battle, the underlying structure of modern warfare, the dynamics of combat power, and the application of classical principles of war to a contemporary battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 202 or department approval.

**ARMY 302. Theory and Dynamics of Tactical Operations II. 3 Credits. U**
Course is comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. Expands on the application of conventional tactical operations in the low, medium, and high intensity conflict spectrum. Examines the three-dimensional nature of modern warfare and the unified battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 301 or department approval.

**ARMY 303. Military Conditioning. 1 Credits. U**
Introduction to the theoretical and practical aspects of developing physical fitness programs for all Army personnel from the commander or supervisor's perspective. Provides an overview of total fitness, defines physical fitness, outlines the phases of fitness, discusses various types of fitness programs, and presents evaluation criteria. Approved for degree credit in the College of Liberal Arts and Sciences, to count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 301 or department approval.

**ARMY 401. Concepts of Military Management. 3 Credits. U**
Course is comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. An introduction to the military management system with special attention to the functions, organizations, and operations of military training, logistics, and administration. The use of standardized staff formats in the development of plans and orders is emphasized from the standpoint of the leader with limited resources. Extensive use of standard staff procedures is emphasized in problem solving scenarios. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 302 or department approval.

**ARMY 402. The Military Profession. 3 Credits. U**
Course is comprised of lecture, laboratory, and physical fitness weekly, as well as other field training exercises. A seminar on the military profession as an object of social inquiry. Focus is on the internal structure of the profession, current problems, and interaction with the larger American society. Seminar topics include but are not limited to the following: a historical perspective on the military profession; civil-military relations; social and political impact of military activities; military justice; professionalism versus careerism. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 401 or department approval.

**ARMY 450. Military Analysis. 1 Credits. U**
A study of present and future military operations; emphasis placed on analysis of problem. The student will defend his/her analysis through written and oral presentations. Prerequisite: Permission of department chairperson.

**Reserve Officers Training Corps - Air Force**

**The Program**

The Air Force Reserve Officer Training Corps (AFROTC) program provides education and training to prepare men and women to become Air Force officers while completing their college degree. To accomplish this, the Air Force, with the approval of the University of Kansas, has established a curriculum that allows a student to commission as an officer in either 3- or 4-year programs. Students with previous college credit require a 2.0 GPA to enroll.

**General Military Course (GMC)**

The GMC is offered during the first two years of college and constitutes an introduction to the present day Air Force. The emphasis is on the role of military forces in world affairs, customs and courtesies, being an officer, professionalism, the mission and organization of the Air Force, and the history of air power. All necessary textbooks, classroom material, uniforms, and other equipment are furnished at no cost. Students who have completed the GMC, have met academic, physical and medical standards, and have successfully completed 4 weeks of Field Training may enter the Professional Officer Course (POC).

The GMC is composed of a total of 4 courses. A student may enter the GMC at one of three points (if eligible).

1. **Entering First Semester – First Year Students (Freshmen Year)**
   - First Semester:
     - AIR 100 - Leadership Laboratory - 0 credits
     - AIR 144 - Foundations of the USAF - 1 credit
   - Second Semester:
     - AIR 100 - Leadership Laboratory - 0 credits
     - AIR 148 - Foundations of the USAF - 1 credit
   - Third Semester:
     - AIR 100 - Leadership Laboratory - 0 credits
     - AIR 284 - Airpower History - 1 credit
   - Fourth Semester:
     - AIR 100 - Leadership Laboratory - 0 credits
     - AIR 288 - Airpower History - 1 credit

2. **Entering Second Semester – First Year Students (Freshmen Year)**
   - First Semester:
     - AIR 100 - Leadership Laboratory - 0 credits
     - AIR 148 - Foundations of the USAF - 1 credit
   - Second Semester:
     - AIR 100 - Leadership Laboratory - 0 credits
are regularly approved for five-year scholarship support. Students should apply no later than December 1 of the senior year of high school. Online applications are available beginning 1 June of the junior year.

Qualified college students can compete for 2- and 3-year scholarship opportunities. These are awarded competitively and students automatically qualify to compete if they meet designated standards.

Scholarships generally cover tuition, laboratory and incidental fees, $600 a year for books, and the non-taxable subsistence allowance. Visit the afrotc.com for more information and to apply online for a high school scholarship.

**Courses**

**AIR 100. Leadership Laboratory. 0 Credits. U**

The AS 100 and AS 200 Leadership Laboratory courses (LLABs) include a study of Air Force customs and courtesies, drill and ceremonies, and military commands. The LLAB also includes studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. The AS 300 and AS 400 LLABs consist of activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadre corps and the preparation and presentation of briefings and other oral and written communications. LLABs also include interviews, guidance, and information which will increase the understanding, motivation, and performance of other cadets. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Cumulative 2.0 GPA required to enroll.

**AIR 144. Heritage and Values of the United States Air Force I. 1 Credits. U**

Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps (ROTC). Featured topics include: Air Force Leadership, opportunities and benefits in the Air Force, our heritage and values, Air Force operations, principles of war, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

**AIR 148. Heritage and Values of the United States Air Force II. 1 Credits. U**

Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps (ROTC). Featured topics include: Air Force Leadership, opportunities and benefits in the Air Force, our heritage and values, Air Force operations, principles of war, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

**AIR 284. Team and Leadership Fundamentals I. 1 Credits. U**

A course designed to provide a fundamental understanding of both leadership and team building. It examines many layers to leadership, including aspects that don’t always jump to mind such as listening, understanding, being a good follower and problem solving efficiently. The students will apply these leadership perspectives when completing team building activities and discussing things like conflict management, motivation, standards and accountability, and stress management. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

**AIR 288. Team and Leadership Fundamentals II. 1 Credits. U**

A course designed to provide a fundamental understanding of both leadership and team building. It examines many layers to leadership, including aspects that don’t always jump to mind such as listening, understanding, being a good follower and problem solving efficiently. The students will apply these leadership perspectives when completing team building activities and discussing things like conflict management, motivation, standards and accountability, and stress management. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

**Professional Officer Course (POC)**

The POC normally is taken during the final 2 years of college. The emphasis is on leadership and management, organizational patterns, technologies, military policies and procedures and provides in-depth study of national security affairs. Cadets also learn and practice communication, leadership and management skills. POC cadets receive a non-taxable subsistence allowance. All necessary textbooks, classroom material, uniforms, and other equipment are furnished at no cost.

The POC is composed of a total of 4 courses.

**First Year (Junior Year)**

**First Semester:**

AIR 100 - Leadership Laboratory - 0 credits
AIR 344 - Leadership Studies - 3 credits

**Second Semester:**

AIR 100 - Leadership Laboratory - 0 credits
AIR 348 - Leadership Studies - 3 credits

**Second Year (Senior Year)**

**First Semester:**

AIR 100 - Leadership Laboratory - 0 credits
AIR 404 - National Security Affairs - 3 credits

**Second Semester:**

AIR 100 - Leadership Laboratory - 0 credits
AIR 408 - National Security Affairs - 3 credits

**Scholarships**

High school seniors may apply for Air Force ROTC scholarships covering the 4-year college period. Some technical majors, such as engineering, are regularly approved for five-year scholarship support. Students should apply no later than December 1 of the senior year of high school. Online applications are available beginning 1 June of the junior year.

Qualified college students can compete for 2- and 3-year scholarship opportunities. These are awarded competitively and students automatically qualify to compete if they meet designated standards.

Scholarships generally cover tuition, laboratory and incidental fees, $600 a year for books, and the non-taxable subsistence allowance. Visit the afrotc.com for more information and to apply online for a high school scholarship.
Navy: Department of Naval Science

The Program

Courses in naval science include both practical and theoretical instruction in subjects pertaining to the Navy and the Marine Corps. The Navy-option student receives 23 credit hours of naval science instruction over a period of 4 years. The Marine-option student receives 17 credit hours of instruction.

Additionally, naval science laboratory meets every semester for 4 years. Laboratory sessions integrate and apply knowledge gained from naval science courses through practical application during tactical planning exercises, leadership training, and professional development. They also include classroom instruction on issues relating to naval careers and policies and some close-order drill.

4-Year Scholarship NROTC Students

Students may begin applying for scholarships as early as their second semester of their high school junior year (preceding the year in which the scholarship is desired). This scholarship is rolling, and therefore students will be selected periodically until the deadline (which typically occurs between December and January). Selection is based on high school grades, SAT/ACT test results, physical ability, citizenship, and aptitude for naval service.

If selected, students are appointed as midshipmen and granted compensation and benefits specified by law. These benefits include tuition, required fees, laboratory equipment, a $750-a-year book stipend, and subsistence pay of $250 a month for first-year students. Subsistence pay increases to $300 a month for sophomores, $350 for juniors, and $400 for seniors.

Scholarship students participate in 3 required summer training cruises. Scholarship students assume an obligation to serve at least 5 years on active duty after commissioning as Ensign, U.S. Navy, or 4 years as Second Lieutenant, U.S. Marine Corps.

Students with 30 or more college credits are not eligible to apply for this scholarship. More information can be found at https://www.nrotc.navy.mil/.

4-Year College Program NROTC Students

These NROTC students have the status of civilians who have entered into an agreement with the Navy. They are not entitled to the benefits and compensation given to scholarship NROTC students, but are entitled to uniform issue. A subsistence allowance of $350 a month for seniors and $400 for seniors is paid in the final two years of training if they are selected for scholarship.

These students participate in one summer cruise between their junior and senior years. College program students agree to accept commissions in the Navy or Marine Corps.

Upon proven superior performance in the college program, students will apply for a 3- or 2-year scholarship with the same requirements and benefits as 4-year scholarship students. Students must be selected for a scholarship by the end of their junior year to complete training. Admission into this program is through the KU NROTC Recruiting Officer.
3- and 2-Year Programs (Side-load Scholarship)

Entrance into the 3- or 2-year scholarship, or “side load scholarship”, program is offered to qualified students with 3 or 2 years remaining to complete their undergraduate degrees. Students applying for these scholarships are encouraged to have completed 1 year of differential and integral calculus of 1 real variable (MATH 115 and MATH 116, or MATH 121 and MATH 122) and must have attained a minimum grade of C.

Applications for these programs must be completed by date released via message to the Naval ROTC at University of Kansas. For more information contact the KU NROTC Recruiting Officer.

Naval Science Students

Any student enrolled at KU may enroll in a naval science course for KU credit after obtaining consent of the Naval Science Instructor. Such students are not considered to be in the NROTC program and are not entitled to receive any compensation, benefits, or a commission.

4-Year Program Requirements

Both Navy- and Marine-option students must take professional Navy and Marine courses as part of the NROTC program. The normal sequence of courses is:

Navy Students

Courses

MCOR 380. Evolution of Warfare. 3 Credits. U

A study of the art, science, concepts, and evolution of warfare as one instrument of government policy throughout history. The study of selected battles and campaigns serves as a vehicle to emphasize the application of the classical principles of warfare, the influence of leadership, and the advancement of technology of the art and science of war. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of twenty-five hours accepted from other schools and divisions.

MCOR 384. Fundamentals of Maneuver Warfare. 3 Credits. U
Broad aspects of warfare and their interactions with maneuver warfare doctrine. Focus on the United States Marine Corps as the premier maneuver warfare fighting institution. Historical influences on current tactical, operational, and strategic implications of maneuver warfare practices. Approved for degree credit in the College of Liberal Arts and Sciences effective Fall 1976. Such courses count within the limit of 25 hours accepted from other schools and divisions.

Courses

NAVY 100. Naval Science Laboratory. 0 Credits. U
Designed for and required annually of all NROTC midshipmen, Sailors and Marines in order to provide increased knowledge in the areas of close-order drill, ceremonial functions, and general military training. Also applies knowledge learned from other accredited naval science courses. Highly educated, well known, professional guest lecturers appear frequently and make presentations on topics which apply to naval science courses, increase the educational awareness of future Navy and Marine Corps officers, and further develop the leadership and decision making of the officer candidates. Graded on a satisfactory/unsatisfactory basis.

NAVY 101. Introduction to Naval Science. 2 Credits. U
An introduction to the Department of the Navy (U.S. Navy and U.S. Marine Corps) emphasizing its mission, organization, operation, and relationship to other U.S. federal and military institutions. Through historical overview, the development of the current Department of the Navy mission, organization and operation, both at sea and ashore, including customs, traditions, regulations, and professional/technical vocabulary is examined. Educational opportunities and specializations for naval officers are also detailed. Approved for degree credit in the College of Liberal Arts and Sciences effective spring 1982. Such courses count within the limit of 25 hours accepted from other schools and divisions.

NAVY 180. Introduction to Naval Ships Systems I. 3 Credits. U
A course designed to familiarize students with the types, structures, and purpose of naval ships. Ship compartmentation, propulsion systems, auxiliary power systems, electrical systems, interior communications, and control are included. Elements of ship design to achieve safe operations, damage control, and ship stability characteristics are examined. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions.

NAVY 184. Introduction to Naval Ships Systems II. 3 Credits. U
The concept of weapons systems and the systems approach are explored. The techniques of linear analysis of ballistics and weapons are introduced. The dynamics of the basic components of weapons control systems are investigated. This course provides the tools for the future development in the student’s understanding of the basic principles that underlie all modern naval weapons systems. To understand the evolving domain of cyber warfare, this course introduces topics in information systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions.

NAVY 220. Seapower and Maritime Affairs. 3 Credits. U
A survey of U.S. naval history. Explores the historical evolution of sea power and its effect on world history. Presents naval aspects of U.S. conflicts from the American Revolution to the global war on terror. Introduces prominent U.S. Navy and Marine Corps leaders and their contributions. Examines the influence of technological innovation, domestic politics, and foreign policy on the development and execution of naval doctrine and tactics. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions.

NAVY 300. Navigation and Operations I. 3 Credits. U
A comprehensive study of the theory, principles, and procedures of ship navigation in coastal and open ocean environment. Includes piloting, triangulation, ocean and tidal currents, International and U.S. inland rules of the road for navigation, sight reduction, publications, and logs; an introduction to electronic navigation, including theory of wave propagation, hyperbolic and azimuthal systems, doppler, inertial, and satellite systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions.

NAVY 304. Navigation and Operations II. 3 Credits. U
A study of the laws for the prevention of collisions at sea; tactical formations and dispositions, relative motion, and the maneuvering board. A portion of the semester is devoted to an analysis of naval operations utilizing formal decision making theory, particularly as applied to command and control. Numerous case studies are used to examine the application of the above topics. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: MATH 101 or higher and NAVY 300.

NAVY 401. Principles of Naval Organization and Management. 3 Credits. U
An introduction of management functions as they apply to routine daily military activities. The concepts of planning, organizing, staffing, directing, controlling, and coordinating are introduced and examined using lecture, seminar, and case study methods. The course includes discussions on responsibility and accountability, power and influence, managerial theories, decision making, personnel appraisal, organizational structure, and communications. Emphasis is placed on management of personnel and physical resources. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions.

NAVY 402. Seminar in Military Leadership and Management. 3 Credits. U
A study of military leadership and management which investigates techniques and concepts of task accomplishment in the absence of a normative business environment. The course includes an examination of military law, ethical leadership, personal responsibility, authority, and bureaucracy. The focus of discussion is on those aspects of leadership and management not normally present in civilian enterprise such as operating in the presence of hostility and morale management. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions.
Pre-Majors

The below pre-majors allow students to start out in the College of Liberal Arts and Sciences while completing prerequisites, if you were not directly admitted into a School or if the program you are interested in requires specific classes to be considered for admission.

Meanwhile, you’ll be classified in one of the following ways:

- Prebusiness (p. 83)
- Preclinical laboratory science (p. 598)
- Predentistry (p. 1731)$^2$
- Pre-education (p. 155)
- Pre-education (elementary) (p. 214)
- Pre-education (secondary) (p. 214)
- Pre-education (sport science/community health) (p. 287)
- Pre-education (p.e./health teacher education) (p. 287)
- Pre-engineering (p. 341)
- Prehealth information management (p. 641)
- Prehealth professions (p. 536)
- Prejournalism (p. 695)
- Prelaw (p. 1730)$^1$
- Premedicine (p. 1731)$^1$
- Prenursing (p. 2262)
- Pre-occupational therapy (p. 655)$^1$
- Pre-optometry (p. 1731)$^2$
- Prepharmacy (p. 2317)
- Prephysical therapy (p. 301)$^1$
- Prephysician’s assistant (p. 1731)$^2$
- Prerespiratory care (p. 686)
- Presocial welfare (p. 2423)
- Preveterinary medicine (p. 1731)$^2$

$^1$ These are graduate programs at KU. If you're interested in these programs, please consult your academic advisor for more information.

$^2$ KU doesn’t offer these degree programs. Students may indicate interest in these areas as preparation for programs at other colleges and universities.

### Army: Department of Military Science                                   | 2496 |
### Audiology and Speech-Language Pathology                                | 577  |

### BA in Anthropology                                                     | 1103 |
### BA in Applied Behavioral Science, concentration in Organizational Behavior Mgmt. Research & Practice | 1135 |
### BA in Applied Behavioral Science with concentration in Adults with Disabilities | 1127 |
### BA in Applied Behavioral Science with concentration in Basic Research  | 1128 |
### BA in Applied Behavioral Science with concentration in Child Life      | 1129 |
### BA in Applied Behavioral Science with concentration in Community Health & Development | 1130 |
### BA in Applied Behavioral Science with concentration in Conceptual Foundations | 1131 |
### BA in Applied Behavioral Science with concentration in Early Childhood Autism Intervention | 1132 |
### BA in Applied Behavioral Science with concentration in Early Childhood Education & Intervention | 1133 |
### BA in Applied Behavioral Science with concentration in Early Childhood Research | 1134 |
### BA in Chemistry                                                         | 1207 |
### BA in Chemistry with concentration in Biological Chemistry             | 1208 |
### BA in Classics with concentration in Archaeology and Art               | 1234 |
### BA in Classics with concentration in Classical Humanities              | 1235 |
### BA in Classics with concentration in Classical Languages               | 1237 |
### BA in Classics with concentration in Greek                              | 1238 |
### BA in Classics with concentration in Latin                              | 1239 |
### BA in Communication Studies                                            | 1262 |
### BA in East Asian Languages & Cultures with concentration in Chinese Language & Literature | 1289 |
### BA in East Asian Languages & Cultures with concentration in Double Language | 1294 |
### BA in East Asian Languages & Cultures with concentration in East Asian Studies/Chinese Language | 1291 |
### BA in East Asian Languages & Cultures with concentration in East Asian Studies/Japanese Language | 1292 |
### BA in East Asian Languages & Cultures with concentration in East Asian Studies/Korean Language | 1293 |
### BA in East Asian Languages & Cultures with concentration in Japanese Language & Literature | 1290 |
### BA in Economics                                                         | 1328 |
### BA in English                                                          | 1352 |
### BA in English with concentration in Creative Writing                    | 1353 |
### BA in English with concentration in Rhetoric, Language & Writing       | 1354 |
### BA in Environmental Studies                                            | 1385 |
### BA in Environmental Studies/Accelerated Master of Urban Planning       | 1391 |
### BA in Film & Media Studies with concentration in Culture and Studies   | 1926 |
### BA in Film and Media Studies with concentration in Production           | 1927 |
### BA in French and Francophone Studies                                    | 1406 |
### BA in French, Francophone and Italian Studies                          | 1408 |
BA in Geography .................................................... 1426
BA in Geology with concentration in Environmental Geology .......... 1464
BA in Geology with concentration in General Geology ....................... 1463
BA in Global and International Studies with concentration in European ...... 1500
BA in Global and International Studies with concentration in Global and International ................................................... 1501
BA in Global and International Studies with concentration in Latin American and Caribbean ......................................................... 1502
BA in Global and International Studies with concentration in Middle East ................................................................. 1503
BA in History .................................................................... 1533
BA in History of Art .................................................................. 1558
BA in Human Biology with concentration in Anthropology ................. 1179
BA in Human Biology with concentration in Applied Behavioral Science ......................................................... 1180
BA in Human Biology with concentration in Biology ......................... 1181
BA in Human Biology with concentration in Psychology ...................... 1182
BA in Human Biology with concentration in Speech-Language-Hearing .... 1183
BA in Human Sexuality ................................................................ 1869
BA in Italian Studies .................................................................. 1407
BA in Law and Society .................................................................. 1996
BA in Linguistics ......................................................................... 1616
BA in Literature, Language & Writing ............................................. 1360
BA in Philosophy ......................................................................... 1674
BA in Physics with concentration in Computational Physics ............... 1696
BA in Political Science .................................................................... 1724
BA in Psychology .......................................................................... 1747
BA in Public Administration .......................................................... 1999
BA in Religious Studies .................................................................. 1765
BA in Slavic, German, and Eurasian Studies with concentration in German Studies ......................................................... 1794
BA in Slavic, German, and Eurasian Studies with concentration in Polish Studies ................................................................. 1794
BA in Slavic, German, and Eurasian Studies with concentration in Russian Studies ............................................................... 1795
BA in Slavic, German, and Eurasian Studies with concentration in Russian, East European, and Eurasian Studies ........................................ 1796
BA in Slavic, German, and Eurasian Studies with concentration in South Slavic Studies .............................................................. 1797
BA in Sociology ............................................................................ 1818
BA in Speech-Language-Hearing ..................................................... 1844
BA in Theatre with concentration in Performance ................................ 1947
BA in Theatre with concentration in Theatre, Culture & Society .......... 1948
BA in Women, Gender, and Sexuality Studies ..................................... 1874
Bachelor of Applied Science in Applied Cybersecurity ....................... 2390
Bachelor of Applied Science in Biotechnology .................................. 2391
Bachelor of Applied Science in Exercise Science ............................... 299
Bachelor of Applied Science in Project Management .......................... 2393
Bachelor of Arts and Bachelor of General Studies in African and African-American Studies ..................................................... 1062
Bachelor of Arts and Bachelor of General Studies in American Sign Language and Deaf Studies .................................................. 2395
Bachelor of Arts and Bachelor of General Studies in American Studies .......................................................... 1079
Bachelor of Arts and Bachelor of General Studies in Anthropology .... 1101
Bachelor of Arts and Bachelor of General Studies in Applied Behavioral Science .......................................................... 1122
Bachelor of Arts and Bachelor of General Studies in Classics ............... 1231
Bachelor of Arts and Bachelor of General Studies in Communication Studies .......................................................... 1261
Bachelor of Arts and Bachelor of General Studies in Economics .......... 1327
Bachelor of Arts and Bachelor of General Studies in English ............... 1350
Bachelor of Arts and Bachelor of General Studies in Environmental Studies ......................................................... 1384
Bachelor of Arts and Bachelor of General Studies in Film and Media Studies .......................................................... 1924
Bachelor of Arts and Bachelor of General Studies in Geography ......... 1425
Bachelor of Arts and Bachelor of General Studies in History ............... 1529
Bachelor of Arts and Bachelor of General Studies in History of Art ....... 1556
Bachelor of Arts and Bachelor of General Studies in Human Sexuality 1866
Bachelor of Arts and Bachelor of General Studies in Law and Society 1995
Bachelor of Arts and Bachelor of General Studies in Linguistics .......... 1614
Bachelor of Arts and Bachelor of General Studies in Literature, Language, and Writing ..................................................... 1359
Bachelor of Arts and Bachelor of General Studies in Philosophy .......... 1673
Bachelor of Arts and Bachelor of General Studies in Political Science 1721
Bachelor of Arts and Bachelor of General Studies in Psychology ......... 1746
Bachelor of Arts and Bachelor of General Studies in Public Administration .......................................................... 1998
Bachelor of Arts and Bachelor of General Studies in Religious Studies 1763
Bachelor of Arts and Bachelor of General Studies in Sociology .......... 1817
Bachelor of Arts and Bachelor of General Studies in Speech-Language-Hearing .......................................................... 1843
Bachelor of Arts and Bachelor of General Studies in Theatre .............. 1946
Bachelor of Arts and Bachelor of General Studies in Women, Gender, and Sexuality Studies ..................................................... 1871
Bachelor of Arts in Astronomy .................................................... 1687
Bachelor of Arts in Biochemistry ................................................... 1166
Bachelor of Arts in Biology .......................................................... 1168
Bachelor of Arts in Chemistry ....................................................... 1205
Bachelor of Arts in Dance ............................................................... 1944
Bachelor of Arts in East Asian Languages and Cultures .................. 1280
Bachelor of Arts in Ecology, Evolution, and Organismal Biology ...... 1171
Bachelor of Arts in Fine Arts in Music .......................................... 2193
Bachelor of Arts in French, Francophone and Italian Studies .......... 1403
Bachelor of Arts in Geology ......................................................... 1461
Bachelor of Arts in German Studies ............................................. 1786
Bachelor of Arts in Global and International Studies ..................... 1496
Bachelor of Arts in Human Biology .............................................. 1173
Bachelor of Arts in Jewish Studies .............................................. 1588
Bachelor of Arts in Mathematics ................................................ 1628
Bachelor of Arts in Microbiology ............................................... 1184
Bachelor of Arts in Molecular, Cellular, and Developmental Biology .. 1187
Bachelor of Arts in Physics ........................................................ 1693
Bachelor of Arts in Slavic, German, and Eurasian Studies ............... 1788
Bachelor of Arts in Spanish ....................................................... 1830
Bachelor of Arts in Visual Art .................................................... 1978
Bachelor of Business Administration .......................................... 135
Bachelor of Fine Arts in Dance ................................................... 1941
Bachelor of Fine Arts in Design .................................................. 67
Bachelor of Fine Arts in History of Art ........................................ 1974
Bachelor of Fine Arts in Theatre Design ....................................... 1951
Bachelor of Fine Arts in Theatre-Voice ........................................ 2195
Bachelor of Fine Arts in Visual Art ............................................. 1968
Bachelor of General Studies in Liberal Arts and Sciences ............... 1598
Bachelor of Health Sciences ...................................................... 2397
Bachelor of Music ................................................................. 2197
Bachelor of Music Education in Music Education .......................... 2220
Bachelor of Music in Bassoon, Clarinet, Flute, Oboe, Saxophone ...... 2198
Bachelor of Music in Double Bass, Harp, Viola, Violin, Violoncello .... 2199
Bachelor of Music in Euphonium, French Horn, Percussion, Trombone, Trumpet, Tuba ......................................................... 2201
Bachelor of Music in Jazz .......................................................... 2203
Bachelor of Music in Music Composition ..................................... 2206
Bachelor of Music in Music Theory ............................................. 2209
Bachelor of Music in Music Therapy .......................................... 2211
Bachelor of Music in Musicology ............................................... 2205
Bachelor of Music in Organ and Church Music ................................ 2215
Bachelor of Music in Piano ........................................................ 2216
Bachelor of Music in Voice ....................................................... 2218
Bachelor of Professional Studies ................................................. 2398
Bachelor of Science in Aerospace Engineering ............................... 395
Bachelor of Science in Applied Biological Sciences ....................... 2400
Bachelor of Science in Architectural Engineering ......................... 448
Bachelor of Science in Astronomy ............................................. 1690
Bachelor of Science in Atmospheric Science ................................ 1432
Bachelor of Science in Behavioral Neuroscience ......................... 1750
Bachelor of Science in Biochemistry ......................................... 1189
Bachelor of Science in Business ............................................... 129
Bachelor of Science in Chemical Engineering .............................. 424
Bachelor of Science in Chemistry .............................................. 1209
Bachelor of Science in Civil Engineering .................................... 451
Bachelor of Science in Clinical Laboratory Science ....................... 604
Bachelor of Science in Computer Engineering .............................. 485
Bachelor of Science in Computer Science .................................... 488
Bachelor of Science in Ecology, Evolution, and Organismal Biology .. 1192
Bachelor of Science in Economics .............................................. 1329
Bachelor of Science in Education .............................................. 225
Bachelor of Science in Education .............................................. 301
Bachelor of Science in Electrical Engineering .............................. 481
Bachelor of Science in Engineering Physics ................................ 515
Bachelor of Science in Environmental Studies ............................. 1387
Bachelor of Science in Exercise Science & Sport Management .......... 305
Bachelor of Science in Geography ............................................. 1428
Bachelor of Science in Geology ............................................... 1466
Bachelor of Science in Health Information Management ............... 644
Bachelor of Science in Information Technology ............................ 2403
Bachelor of Science in Interdisciplinary Computing ....................... 492
Bachelor of Science in Interior Architecture ................................ 49
Bachelor of Science in Journalism and Mass Communications ........ 709
Bachelor of Science in Mathematics ......................................... 1631
Bachelor of Science in Mechanical Engineering ........................... 525
Bachelor of Science in Microbiology ......................................... 1194
Bachelor of Science in Molecular, Cellular, and Developmental Biology ........................................................................ 1197
Bachelor of Science in Nursing .................................................. 2282
Bachelor of Science in Petroleum Engineering .............................. 428
Bachelor of Science in Physics ................................................... 1697
Bachelor of Science in Project Management ................................ 2405
Bachelor of Science in Respiratory Care ...................................... 689
Bachelor of Social Work ........................................................... 2438
BFA in Visual Art with concentration in Ceramics ........................... 1979
BFA in Visual Art with concentration in Metalsmithing/Jewelry .......... 1980
BFA in Visual Art with concentration in Textile/Fibers ........................ 1981
BFA in Visual Art with Concentration in Visual Art Education ........ 1982
BGS in African & African-American Studies .................................. 1066

Graduate Certificate in Foundations of Project Management .......... 2420
Graduate Certificate in Geographic Information Science .......... 1452
Graduate Certificate in Health Administration ......................... 2130
Graduate Certificate in Health Psychology ............................. 1757
Graduate Certificate in High Incidence Disabilities Endorsement (KS) 335
Graduate Certificate in Historic Preservation .......................... 56
Graduate Certificate in Homeland Security: Law and Policy ........ 745
Graduate Certificate in Indigenous Studies ............................. 1576
Graduate Certificate in Interdisciplinary Early Intervention .......... 336
Graduate Certificate in Law & Society .................................. 2019
Graduate Certificate in Leadership in Special and Inclusive Education 337
Graduate Certificate in Leadership Studies ............................. 1582
Graduate Certificate in Licensure Endorsement in Early Childhood Unified (birth-k) (KS) 338
Graduate Certificate in Low Incidence Disabilities Endorsement (KS) 339
Graduate Certificate in Medieval and Early Modern Studies ........ 1415
Graduate Certificate in Mind, Brain, and Education .................. 287
Graduate Certificate in Museum Studies ................................. 1666
Graduate Certificate in Music Enterprise ................................ 2258
Graduate Certificate in Music Performance ............................. 2259
Graduate Certificate in Music Recording ................................. 2260
Graduate Certificate in Participatory Design ............................ 56
Graduate Certificate in Performance Management ..................... 2019
Graduate Certificate in Petroleum Management ......................... 438
Graduate Certificate in Piano Pedagogy ................................. 2260
Graduate Certificate in PK-12 Building Leadership .................... 267
Graduate Certificate in Professional Management ..................... 2420
Graduate Certificate in Professional Workplace Communication ...... 2421
Graduate Certificate in Public / Nonprofit Management .............. 2020
Graduate Certificate in Public Health Practice, Policy and Management 2130
Graduate Certificate in Public Policy ..................................... 2021
Graduate Certificate in Reading ......................................... 250
Graduate Certificate in Religious Studies ............................... 1769
Graduate Certificate in RF Systems Engineering ....................... 513
Graduate Certificate in Second Language Studies ..................... 1605
Graduate Certificate in Social Emotional Wellness .................... 287
Graduate Certificate in Social Media Strategy ........................ 717
Graduate Certificate in Software Engineering and Management ..... 2421
Graduate Certificate in Structural Analysis ............................. 468
Graduate Certificate in Structural Design ............................... 468
Graduate Certificate in Structural Forensics ........................... 469
Graduate Certificate in Studies in Equity and Social Diversity in the U.S. 1606
Graduate Certificate in Teaching English to Speakers of Other Languages .... 251
Graduate Certificate in Transition ......................................... 340
Graduate Certificate in Urban Design .................................... 57
Graduate Certificate in Urban Planning ................................... 2021
Graduate Certificate in Water Resources ................................ 469
Graduate Certificate in Women, Gender, and Sexuality Studies .... 1883

H

Health Data Science Graduate Certificate ............................... 2066
Health Informatics ......................................................... 2028
Health Informatics ......................................................... 2028
Health Information Management ......................................... 641
Health Professions ........................................................ 536
Health Professions Educator .............................................. 2306
Health, Sport, and Exercise Sciences .................................... 287
Health Systems Leadership ................................................ 2307
History ................................................................. 1511
History and Philosophy of Medicine ..................................... 2075
History of Art ........................................................... 1546

Indigenous Studies .......................................................... 1572
Indigenous Studies Minor .................................................. 1574
Institute for Leadership Studies ............................................ 1577
Interdisciplinary Education Programs ................................... 315
Interdisciplinary Graduate Program in Biomedical Sciences ........................................... 2131
Interdisciplinary Studies .................................................................................................. 1583
International Trade and Finance Certificate ................................................................... 739

J
Jack Lockton Undergraduate Certificate in Insurance & Risk Management .................. 141
Jewish Studies .................................................................................................................. 1583
Journalism & Mass Communications .............................................................................. 695
Juris Doctor and Master of Arts in Philosophy ............................................................... 1679
Juris Doctor Program ...................................................................................................... 734

K
Kansas City Clinical Required Courses ............................................................................ 2148
Kansas City Electives ....................................................................................................... 2151

L
Law .................................................................................................................................. 718
Liberal Arts & Sciences .................................................................................................... 747
Liberal Arts and Sciences ................................................................................................ 1592
Linguistics ....................................................................................................................... 1607

M
M.A.-J.D. Degree Program ................................................................................................ 1338
M.D.-Ph.D. Combined Degrees ....................................................................................... 2141
Major in Russian, East European, and Eurasian Studies ................................................. 1798
Master of Accounting ..................................................................................................... 146
Master of Architecture (3-year and 2-year) ................................................................... 50
Master of Architecture (5-year) ...................................................................................... 45
Master of Arts in African and African-American Studies ................................................ 1071
Master of Arts in American Studies ................................................................................ 1086
Master of Arts in Anthropology .................................................................................... 1106
Master of Arts in Applied Anthropology ...................................................................... 1146
Master of Arts in Architecture ....................................................................................... 52
Master of Arts in Child Language .................................................................................. 1221
Master of Arts in Classics .............................................................................................. 1247
Master of Arts in Clinical Child Psychology .................................................................. 1251
Master of Arts in Communication Studies ...................................................................... 1264
Master of Arts in Curriculum and Instruction ............................................................... 238
Master of Arts in Design with Concentration in Design Management & Strategy ......... 80
Master of Arts in Design with Concentration in Interaction & User Experience Design .................................................................................................................. 81
Master of Arts in East Asian Languages and Cultures ..................................................... 1299
Master of Arts in Ecology and Evolutionary Biology ..................................................... 1315
Master of Arts in Economics .......................................................................................... 1332
Master of Arts in English ................................................................................................ 1365
Master of Arts in Film and Media Studies ....................................................................... 1931
Master of Arts in French and Francophone Studies ....................................................... 1412
Master of Arts in Geography ......................................................................................... 1443
Master of Arts in Global and International Studies ....................................................... 1509
Master of Arts in History ............................................................................................... 1538
Master of Arts in History of Art ..................................................................................... 1560
Master of Arts in Indigenous Studies ............................................................................. 1575
Master of Arts in Leadership in Diversity and Inclusion ................................................. 1600
Master of Arts in Linguistics ......................................................................................... 1618
Master of Arts in Mathematics ...................................................................................... 1636
Master of Arts in Museum Studies .................................................................................. 1663
Master of Arts in Organizational Communication ........................................................ 2412
Master of Arts in Philosophy ......................................................................................... 1677
Master of Arts in Political Science .................................................................................. 1728
Master of Arts in Psychology .......................................................................................... 1754
Master of Arts in Religious Studies ................................................................................. 1768
Master of Arts in Slavic Languages and Literatures ....................................................... 1807
Master of Arts in Sociology ............................................................................................ 1821
Master of Arts in Spanish ............................................................................................... 1835
Master of Arts in Speech-Language Pathology ............................................................... 592
Master of Arts in Speech-Language Pathology ............................................................... 592
Master of Arts in Theatre ................................................................................................ 1954
Master of Arts in Women, Gender, and Sexuality Studies ............................................. 1881
Master of Business Administration ................................................................................ 142
Master of Civil Engineering ............................................................................................ 461
Master of Construction Management ............................................................................. 462
Master of Engineering in Aerospace Engineering ......................................................... 397
Master of Engineering in Bioengineering ....................................................................... 409
Master of Engineering in Electrical Engineering and Computer Science .................. 501
Master of Engineering in Project Management/Master of Science in Project Management ........................................................................................................ 2413
Master of Fine Arts in Creative Writing .......................................................................... 1372
Master of Fine Arts in Theatre Design-Scenography Concentration ............................ 1955
Master of Fine Arts in Visual Art .................................................................................... 1983
Master of Health Services Administration ..................................................................... 2117
Master of Laws in American Legal Studies ..................................................................... 742
Master of Music .............................................................................................................. 2225
Master of Music Education in Music Education or Music Therapy ............................... 2237
Master of Music in Conducting ..................................................................................... 2225
Master of Music in Music Performance: Brass and Percussion ..................................... 2225
Master of Music in Music Performance: Organ, Church Music, and Carillon ................ 2230
Master of Music in Music Performance: Piano ................................................. 2232
Master of Music in Music Performance: Strings ........................................... 2233
Master of Music in Music Performance: Voice and Opera ............................ 2234
Master of Music in Music Performance: Woodwinds .................................. 2235
Master of Music in Music Theory or Composition .................................... 2227
Master of Music in Musicology .................................................................. 2226
Master of Music in Piano Performance and Pedagogy .................................. 2228
Master of Public Administration .................................................................. 2002
Master of Public Administration and Juris Doctor ...................................... 2014
Master of Public Administration and Master of Urban Planning ............... 2015
Master of Public Health ................................................................................ 2121
Master of Science Great Plains IDEA program ......................................... 632
Master of Science in Aerospace Engineering ............................................. 400
Master of Science in Applied Statistics and Analytics ................................. 2051
Master of Science in Architectural Engineering ......................................... 456
Master of Science in Athletic Training ....................................................... 675
Master of Science in Atmospheric Science ............................................... 1446
Master of Science in Biochemistry and Biophysics ...................................... 1652
Master of Science in Biochemistry and Molecular Biology ....................... 2038
Master of Science in Bioengineering ......................................................... 411
Master of Science in Biostatistics ............................................................... 2049
Master of Science in Business Analytics .................................................... 147
Master of Science in Cancer Biology .......................................................... 2073
Master of Science in Cell Biology and Anatomy ......................................... 2033
Master of Science in Chemical Engineering .............................................. 432
Master of Science in Chemistry .................................................................. 1217
Master of Science in Civil Engineering ....................................................... 457
Master of Science in Clinical Research ....................................................... 2125
Master of Science in Computer Engineering .............................................. 505
Master of Science in Computer Science ..................................................... 507
Master of Science in Counseling Psychology ............................................ 276
Master of Science in Dietetics and Nutrition .............................................. 627
Master of Science in Digital and Integrated Marketing Communications ...... 713
Master of Science in Education in Curriculum and Instruction ..................... 241
Master of Science in Education in Educational Administration ................... 258
Master of Science in Education in Educational Psychology and Research .... 278
Master of Science in Education in Educational Technology ....................... 259
Master of Science in Education in Health, Sport, and Exercise Science ...... 310
Master of Science in Education in Higher Education Administration .......... 260
Master of Science in Education in Special Education .................................... 327
Master of Science in Education/Education and Social Policy ....................... 262
Master of Science in Electrical Engineering .............................................. 504
Master of Science in Engineering Management ......................................... 2415
Master of Science in Environmental & Water Resources Engineering ...... 458
Master of Science in Environmental & Water Resources Science ............. 460
Master of Science in Geography ............................................................... 1448
Master of Science in Geology ..................................................................... 1479
Master of Science in Health Data Science .................................................. 2054
Master of Science in Health Informatics ...................................................... 2025
Master of Science in Health Informatics ...................................................... 2025
Master of Science in Homeland Security: Law & Policy ............................ 745
Master of Science in Information Technology ............................................. 2416
Master of Science in Journalism and Mass Communications ..................... 714
Master of Science in Mechanical Engineering ........................................... 529
Master of Science in Medicinal Chemistry ............................................... 2341
Master of Science in Microbiology ............................................................. 1653
Master of Science in Microbiology ............................................................. 2077
Master of Science in Molecular and Integrative Physiology ....................... 2084
Master of Science in Molecular, Cellular, and Developmental Biology .... 1655
Master of Science in Neurosciences ........................................................... 2136
Master of Science in Neurosciences ........................................................... 2343
Master of Science in Nursing .................................................................... 2288
Master of Science in Organizational Leadership ......................................... 149
Master of Science in Pathology .................................................................. 2090
Master of Science in Petroleum Engineering ............................................. 433
Master of Science in Pharmaceutical Chemistry ....................................... 2349
Master of Science in Pharmacology ........................................................... 2098
Master of Science in Pharmacology and Toxicology .................................. 2355
Master of Science in Pharmacy Practice .................................................... 2363
Master of Science in Physics ...................................................................... 1704
Master of Science in Supply Chain Management and Logistics ............... 149
Master of Science in Toxicology ................................................................. 2100
Master of Social Work .............................................................................. 2441
Master of Urban Planning .......................................................................... 2004
Master of Urban Planning and Master of Arts in Geography ....................... 1444
Master of Urban Planning and Master of Arts in Geography ....................... 2012
Masters and Ph.D. Programs ...................................................................... 2031
Mathematics .............................................................................................. 1622
Mechanical Engineering .......................................................................... 519
Media, Law, and Technology Certificate ..................................................... 740
Medical Center Campus Interdisciplinary Studies ..................................... 2023
Medicinal Chemistry .................................................................................. 2339
Medicine (M.D. & Graduate Degrees) ......................................................... 2031
| Minor in Intelligence and National Security Studies                      | 1726 |
| Minor in African and African Diasporic Languages                      | 1068 |
| Minor in African and African-American Studies                         | 1066 |
